Sri Kalyanapasupatheeswarar Temple

Sri Kalyanapasupatheeswarar Temple, is situated at the mid of Karur town. Swami here is swayambu moothy. Kamadhenu, the holy cow, worshipped Lord here and hence the name 'Aanilaiappar' (Aa means cow). It performed the Bramah's work of 'creating' at Karuvoor by praying Pasupatheeswarar . Brahmah couldn't continue his work because he developed pride on his power of creating.

On realising his mistake he came to Karuvoor and worshipped Lord here and got back his power again. Ambal by name Soundaranayaki , born in a village nearby called 'Appipalayam' in a hunter's house and attained the Lord. Muchukuntha chola ruled chola kingdom with karur as capital.

There is a place in 'Kandha puraanam' where it comes that devendran invited muchukuntha cholan from karuvoor for her daugter's (theivaanai ammai) marrige with Lord Muruga. This shows the existence of Karuvoor as a town right from kandha purana period.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. C. Chandramouli, Director of Census Operations, Tamil Nadu. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division. Dr. R.P.Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

Publication of the District Census Handbooks (DCHBs) was initiated after the 1951 census and is continuing since then with innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the census organization on behalf of each State Government/Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts.

The District Census Handbook has two segments: Part A and Part B. Part A primarily deals with village and Town Directory and Part B contains Primary Census Abstract of each village and town of the District. The 1991 Census data presentation both in Part A and Part B of this book was the transition from traditional presentation at Taluk level to CD Block level and this pattern continued in 2001 census as well.

For the first time in 2001 census, the District Census Handbooks are being made available in electronic format.

The District Census Handbook is the joint collaboration of the Census Directorate and the Government of Tamil Nadu. On behalf of the Government of Tamil Nadu, this Directorate has prepared the manuscript of this book.

The District Census Handbooks of 2001 have some additional information which is based on the 2001 census as compared to the previous censuses like capturing of information on participation of women in economic activities, netting all the children in age-group 0-14 as also elderly people of age 60 years and above. The data about the number of handicapped persons including partial disability has also been collected in 2001 census for the whole of India. The most important methodological innovation introduced in 2001 census relate to carving out separate slum enumeration blocks.

The data being presented in this publication have been collected and compiled by Shri M.R.V. Krishna Rao, Deputy Director of Census Operations, Tamil Nadu with the assistance of S/Shri S.K. Srivastav, N. Sukumar Nandagopal and A. Achchu Ali, Assistant Directors. For the preparation of manuscript of this book, I received wholehearted co-operation from all the Heads of Departments, Heads of offices of the District / Taluk / Corporation / Municipal / Town and Rural Administration and a number of dedicated and experienced Census staff of this office. I am grateful to all of them for their valuable contribution in the accomplishment of this task of national importance. I must place on record the co-operation extended to me by the press media and electronic media to make the census taking a great success in the state.

I am deeply grateful to Shri J.K. Banthia, IAS the Registrar General and Census Commissioner, India, New Delhi for the valuable guidance and advice at every step till the finalisation of this handbook. I also express my thanks to Shri I.C. Agrawal, Assistant Registrar General (Social Studies Division) and Shri S.L. Jain, Deputy Director, ORGI, New Delhi for preparing the set of instructions for the compilation of the village and Town Directory and other inset tables etc. being inserted in this District Census Handbook.

In particular, it has to be mentioned that the write up portion was taken up by Shri M.R.V.Krishna Rao, Deputy Director and finalised by Dr. D. Venkatesan, Deputy Director with the assistance of other members of the staff whose names have been mentioned in the "Acknowledgements".

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The compilation of District Census Handbook is an innovation of the 1951 Census. District is considered as the most important unit for presentation of Census data. Census Statistics are also compiled for individual villages and towns, as they constitute the basic units of human habitation. Besides this, some other useful information pertaining to the land and the people has also been included in it to make it a self-contained book of reference for the District. It was, however, not altogether a new idea, since census data for smaller units were published in earlier censuses also in one form or the other. For the first time in 1891 District wise list of villages were published giving the population of each village. At the 1911 Census, data of villages were published in the form of village directory. Such village directories were again compiled in the shape of District Census Statistics at the 1921 Census. Finally, District Census Handbooks emerged as regular decennial publication since 1951 Census. The demand for the basic data for the smallest administrative unit was greatly felt in the post-independence era. The ushering in an era of planning and development in the wake of launching of Five-year plans after attaining independence, urgent need for detailed data at village level was felt. Thus, when the proposal to bring out District Census Handbook was put before the State Government, they readily agreed for the compilation and printing of District Census Handbooks through their respective Directors of Census Operations, under the authority of local government concerned. The general appreciation and utility of this handbook encouraged the Census Organisation to increase the scope of publication.

The tradition thus built up has been continued in the present series of District Census Handbooks. In the 1971 Census, it had been decided to bring out these hand books in three parts viz; Parts A, B and C. In respect of Tamil Nadu, Parts A and B of this publication had been printed in one volume and part C as a separate volume. During 1981 Census, it had been decided to print it in two parts viz. Parts A and B separately. Part A of this handbook consists of village and Town Directory and part B gives data on Primary Census Abstract (PCA). In 1991 Census also, the same pattern was adopted publishing Parts A and B in a single /double volumes as per the requirement and determining the size of the publication. However, in this census some of the non-census data included information on girl schools, social forestry areas etc. whereas items like staple food and information on newspapers etc. have been omitted.

In the present Census, this District Census Handbook is being brought out in a single volume which contain the village and town directory as also the Primary Census Abstract and it should certainly quench the thirst of the planners involved in micro level planning. Similarly, additional data revealing civic and other amenities in class I town has been presented especially in respect of slum dewellers. Scholars and planners alike should benefit from the data on amenities.

(ii) Brief History of the District

Karur District with headquarters at Karur is located in central Tamil Nadu. Karur has a very ancient history and finds mention in songs sung by various poets of the Sangam era. It has been the battleground of various Tamil Kings of the Chera, Chola, Pandya and Pallava dynasties because of its strategic location. The district has a very rich and varied cultural heritage. The district is fertile by the perennial river of Cauvery on the northern side, Amaravathi, Nanganjiyar rivers on the southern side and Noyyal river on the north western side. Its economy is mainly agrarian. The district is also famous worldwide for its handloom products.

Karur is one of the oldest towns in Tamil Nadu and has played a very significant role in the glorious history and culture of the Tamils. Its history dates to

centuries before Christ and has been a flourishing trading centre even in the early Sangam days. Epigraphical, Numismatic, Archaeological and Literary evidence has proved beyond doubt that Karur was the capital of early Chera Kings of Sangam age. It was called Karuvoor or Vanji during Sangam days. There has been a plethora of rare findings during the archaeological excavations undertaken in Karur. These include mats, designed pottery, bricks, mud-toys, Roman coins, Chera Coins, Pallava Coins, Roman Amphorae, Russet coated ware, rare rings etc. Karur has been built on the banks of river Amaravathi that was called Annaporunai during the Sangam days. The names of the early Chera kings who ruled from Karur, have been found in the rock inscriptions in Aru Nattar Malai close to Karur. The Tamil epic Silapathikaram mentions that the famous Chera King Cheran Senguttuvan ruled from Karur. The Greek scholar Ptolemy has mentioned about "Korevora" which was a very famous inland trading centre in Tamil Nadu. After the early Cheras, Karur was conquered and ruled by Pandyas followed by Pallavas and later Chloas. Karur was ruled for a long time by Chola Kings. Later the Naickers followed by Tippu Sultan also ruled Karur. The British added Karur to their possessions after destroying the Karur Fort during their war against Tippu Sultan in 1783. There is a memorial at Rayanur near Karur for the warriors who lost their lives in the fight against the British in the Anglo-Mysore war. Thereafter, Karur became part of British India and was first part of Coimbatore District and later Tiruchirappalli District.

(iii) Administrative set-up

Karur was initially a taluk, a part of Coimbatore district. It was then transferred to Tiruchirappalli district in 1910. The present Karur district was formed on 30th September 1995 by trifurcation of Tiruchirappalli district. Initially, Karur District was carved out of the composite Tiruchirapalli district consisting of three taluks i.e., Karur, Kulithalai and Manapparai. Subsequently, Manapparai Taluk was excluded and Musiri Taluk was included in Karur District. Later Musiri Taluk was also taken out from Karur District. Presently, Karur District consists of 4 Taluks- Karur, Kulithalai, Krishnarayapuram, and Aravakurichi.

Karur district includes 2 Municipalities, 13 Town Panchayats, 158 Village Panchayats and 203 Revenue Villages. Karur District has 4 Assembly constituencies of which one is a reserved for i.e., Krishnarayapuram Constituency.

The following Table gives number of Taluks with number of towns and Community Development Blocks and number of villages in Karur District.

(iv) Physical Features

Location and Size

Karur district has an area of 2900 Sq.Kms. It is located between 10.45^0 and 11.45^0 of the Northern latitude and 77.45^0 and 78.07^0 of the Eastern longitude. The district is bounded by Tiruchirappalli district on the East, Namakkal and Tiruchirappalli districts on the North, Dindigul district on the South and Erode district on the west.

Physiography

The Amaravathi river flows from the Anamalai and Travancore hills and traverses through southwest to the middle northern part of the district and the river Cauvery traverses through the northern part of the district. The rivers Amaravathi and Cauvery and their tributaries provide irrigation potential for a portion of the district. The district falls under the agro-climatic zone of the southern plateau and hills with semi-arid and dry sub-humid climate.

The **flora** and **fauna** of this district are moderate. The fruit trees commonly found here are Tamarind. In the hilly tracks, Navel, Elanthai etc., are found in the wild. The varieties of timber found in the hilly tracks are Neem, Malai Vembu, Manja Kadambu, Navel etc. As regards fauna, animals like Elephant, Tigers, etc are not found anywhere in the district. Only small animals like Rabbits, Foxes and Reptiles are seen in the forests in very small numbers.

Climate

The district has a high mean temperature and low degree of humidity. Even though the region does not face extreme climate, the summer months are quite hot. The differences between maximum and minimum temperature is moderate.

The atmosphere is dry with little moisture during the early months of the year. The winter season being cool is pleasant and enjoyable. By March, the mercury acquires an up trend, which is gradual and persistent. This trend of the barometer indicates the ushering of summer with its hot days. This period of hot sun prevails till June when South West monsoon sets in and brings scanty rains. This monsoon period last till August. The heaviest rainfall occurs during October to December when the North East monsoon is active.

In 1999-2000, Karur received 673.9 mm of rainfall as compared to a normal of 654.5 mm. The table below gives the actual and normal rainfall in the District during the South West, North East monsoon, Winter and Hot weather season in 1999-2000 (in mm).

	South West Monsoon		North East Monsoon

Forest

The forest resources of this district are very meagre when compared to the State as a whole. Karur district has only about 3.11% of its land under forest cover. The forest available in this district is situated mostly in Kadavur Panchayat Union and in small patches in the other parts of the district. They are not only small in area but also poor in quality. All the forests are degraded forests and tropical dry thorny forests. The main forest produce in this area is firewood and to a lesser extent country wood small timber.

The Reserved forests in this district are identified as degraded forests and therefore Karur forest division is implementing Tamil Nadu Afforestation Project since 1997. The specific objectives of this project are improving the productivity of forests by creating rich tree cover through intensive soil conservation and water harvesting measures, preservation of areas which are rich in bio-diversity, enhancing the capabilities of Tamil Nadu Forest Department by establishing geographic information system and management of natural resources through joint forest management.

Minerals and Mining

The district is rich in mineral deposits. Good building stones and road metal, sand, impure bands of crystalline limestone, scattered bladed aggregates of sillimenite crystals and quartz and feldspar are found in the District. At Thogamalai and surrounding areas multi-coloured Granites are available. The cement and quartz powder industries are the most important in this district. Chettinad Cements at Puliyur produces around 2,400 Tonnes of Cement per day. The revenue obtained from the mineral sector is around 3 Crores per annum.

	Mineral	Production
1	Lime Stone	15,500 MT
2	Quartz	11,525 MT
3	Feldspar	8,705 MT
4	Building stone/road metal	95,000 Cft
5	Granite	2,250 m3

Soil

The Soil series of this district are Irugur, Tulukkanaur, Vannapatti, Palladam, Mixed alluium, Adanur, Palathurai, Kalakur, Pilamedu. The soil of this district are generally of low to medium fertility.

Cropping Pattern

The economy of the district is mainly agrarian. Farm output meets not only the food requirements of the district but is also exported to other parts of Tamil Nadu. Agriculture provides sustenance to around 33% of the labour force in the district and forms the basis for a vast market of consumer goods and agro based industries.

The principal cereal crops of this district are Paddy, Cholam and Cumbu. Among the pulses, the major crops raised are red gram, black gram, green gram, and Horse gram Pulses are predominantly cultivated as rain fed crops. Oil seeds are grown throughout the district. Among the oil seeds groundnut, gingelly and sunflower occupy important places. Groundnut cultivation is under taken under irrigated as well as rain fed areas. Sugarcane is the major commercial crop raised under irrigation.

The following Table gives the area under Crops and production during 1998-99:

Crop	Area (in Ha)	% of total area sown	Production (in MT)

Land and Land use pattern

There are 0.99 Lakh operational holdings in this district, of which 0.43 lakh holdings are below one hectare; 0.22 Lakh holdings are between one hectare to two hectares and 0.34 lakh holdings are above 2 hectares.

The net sown area of the district accounted for almost 36% of the geographical area of the district followed by Culturable Waste (24%). The following Table gives the Land-use pattern in the District in 1998-99.

Classification of land use	District	
	Area (in Ha)	% to total Area
Total Geographical Area	289,557	100.0
Forests	6,187	2.1

Total Cropped Area	106,128	36.7

Agriculture

The Department of Agriculture implements the Integrated Cereal development programme, National Pulses development programme, Oilseeds Production Programme, Oil Palm Development Programme and National Watershed Development Programme for Rain fed Areas in the District.

The District has one State seed farm situated at Inungur in Kulithalai Taluk. The main objective of this farm is production and distribution of quality seed of Paddy, Millets. This farm serves as a model Farm to the nearby farming community on farm maintenance and Scientific methods of cultivation.

There are 12 wholesale fertilizer dealer shops and 242 Fertilizer dealer shops in the district. 37 Agriculture Credit Societies are also functioning to meet the fertilizer and pesticide needs of the farmers.

Horticultural Crops

Banana and Chillies are the two main Horticultural crops in this District. In 1998-99 the area under various horticultural crops was as follows:

Crop	Area in Ha.	Production in MT
Banana	5605	156725
Chillies	2500	1753

Source: Department of Economics & Statistics, Chennai

Sericulture

The total area under mulberry cultivation as on 1.4.2000 was 69.10 hectares. The total production of reeling cocoons was 0.121 MTs, which was valued at Rs. 12.10 lakhs. The production of raw silk in the same year was 0.013 MTs valued at Rs.15.28 lakhs.

Irrigation

The Cauvery system channels are the main source of irrigation. Other rivers, which are tapped for irrigation, are Amaravathi and Noyyal. The irrigation facilities are often found inadequate to raise crops throughout the year. Because of inadequate storage and seasonal variations in the river flow there are severe shortages during critical months.

Irrigation wells provide an unfailing supply of water and are an important source of irrigation in the district. There are 39760 wells (including 445 tube wells) in the district used exclusively for irrigation. 29045 electrical and 7670 diesel pump sets are in use for pumping water from these wells.

Major sources of water supply for irrigation in this District are as follows:

Irrigation Source	Number / Length
Canals	23/226 Kms
Irrigation Wells	39760
Tube Wells	445
Reservoirs	0
Tanks	266

Source: Department of Economics & Statistics, Chennai

The following table gives the source wise Net Area Irrigated in 1998-99:

Irrigation Source	Area in Hectares
Govt. Canals	22043
Private Canals	0
Tanks	1549
Tube Wells	535
Other wells	23594

Area sown and irrigated

Net area sown in Karur district in 1998-99 was 103980 hectares. Out of this, 48451 hectares were irrigated. This constitutes 46.60% of the Net sown area. The Gross Sown Area in the same year was 106128 hectares out of which, 50553 hectares (47.63%) was irrigated.

Animal Husbandry

The following table gives the livestock and poultry population of Karur District in 1998-99.

1	Cows	125419
2	Buffaloes	88050
3	Sheep	257974
4	Goats	153084
5	Poultry	516130

In 1999-2000, there was one clinician centre, 2 hospitals, 15 dispensaries, 14 mobile dispensaries, 1 mobile unit and 53 sub-centres to take care of the animal population of this District. The total milk production in this District in the year 1999-2000 was 103.18 tonnes out of which 33.0 tonnes was cow's milk and 70.18 tonnes was buffaloes milk. The egg production in this District in 1999-2000 was 290.53 lakh. The in-land fishery production in this District in 1998-99 was 4325 tonnes.

Fisheries

Kulithalai Taluk has potential for natural fish seed collection. Fish Nurseries were constructed in 1963 to stock the natural Fish seed and were later converted to rear the Fish seed hatchlings up to fingerling size. There are five nurseries at Kulithalai Fish Farm each measuring 61.5MT (Total area 307.5M2). The reared stock size fingerlings are being stocked in Ponnaniyar Dam situated in Karur district to enhance the fish production.

There are two inland Fisherman Co-operative Societies in Karur district. These societies take lease of fishing rights of inland waters and distribute the lease to its members. The fisheries department does conservation work to safe guard the Fish wealth of the inland water sources by taking action against dynamite fishing and poisoning of fish.

Industries

The District Industries Centre, Karur is functioning with effect from 5.8.1966. The establishment of cement, sugar, paper and textile mills in addition to the establishment of a number of Industries in the medium and small scale sectors has accelerated the rate of industrialisation in the District.

There are 14 Medium & Large Scale Industries functioning in the district. There are 6932 registered small scale industrial units in the district as on 31.12.99 engaged in production of a wide range of products. Two Industrial Estates are situated in Karur District. Karur holds a place of pride in cottage industries. There are many cottage and village industries throughout the rural areas of the district which are engaged in ornamental/synthetic gem cutting and mat weaving. Cutting and polishing of synthetic gems is a growing industry in the district. The synthetic gems manufactured at Mettupalayam in Coimbatore district are further processed in Karur District

Tamil Nadu Newsprint and papers Limited better known, as TNPL is the country's largest non-wood based paper factory. It was established in the early 80's at Pugalur near Karur. It is acknowledged as the world leader in the technology for manufacture of newsprint from bagasse.

The TNPL produces standard newsprint (45\48.8 gsm) and other special varieties like pink newsprint and high brightness newsprint, computer stationery, cream wove, surface sized map litho offset printing and super printing paper etc. The TNPL currently has on its rolls 1714 employees, of which 1062 are workmen. In addition, indirect employment is provided to about 3600 people.

Internationally, Karur has become synonymous with handloom "made-ups". The weaving industry came to Karur from Kerala and has today earned a reputation for its high quality handloom products. Export of handlooms from Karur began on a modest scale with just 15 exporters in 1975 and today Karur has over 300 exporters. The handloom products being exported could be broadly classified under three heads-kitchen, bathroom, and bedroom furnishings. Some of the handloom made-ups exported from Karur are Bedspreads, towels, floor rugs, tea towels, napkins, aprons, kitchen towels, pot holders, plate mats, bathmats, tea mats, curtains, pillow, quill-covers, shower curtains etc. The products are exported to Europe, U.S, Japan, Canada, Australia, Singapore, South Korea, South Africa and the Scandinavian

countries among others. The handloom industry in Karur generates an annual turnover of nearly Rs. 1000 crores with nearly Rs. 700 crores of direct and indirect exports of textile goods. The development of export as a major trade has led to the mushroom growth of other allied industries like handloom and powerloom weaving units, dyeing and bleaching units, tailoring, packaging units etc. The handloom and its allied industries provide direct and indirect employment to over a lakh of persons. There are 12,789 handlooms functioning in Karur District. 7,817 handlooms out of 12,789 are being run by various co-operative societies. There are 39 handloom Co-operative Societies functioning in the District.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

*S*emi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel / hotel building was treated as one census house. but if such built at different times and owned by different persons.

In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably; the entire hostel/hotel building was treated as one census house., but if such hostels/ hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban

area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household.Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. In September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or

a combination of both (agricultural labourers) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person, who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry, is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those

carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. :

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \text{å}^{45\text{-}49}\text{ASFR}_{15\text{-}19}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \text{å}^{45\text{-}49}\text{ASMFR}_{15\text{-}19}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1{,}00{,}000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

Migration, Internal and International migration, Impact of migration.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly a personis considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence. By capturing the last of the migrations in cases where persons have migrated more than once, this concept would give a better picture of current migration scenarios.

Internal and International Migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (interdistrict migration) (ii) Migration from one state to another state of the country interstate migration (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Impact of Migration

As in 1991 and 2001 Census, like previous Censuses, had collected migration details for each individual by place of birth and last residence. Data on last residence along with details like duration of stay in the current residence and reason for migration provides useful insights for studying migration dynamics of population.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA / Town is based on the population. UAs / Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./ Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are :

M7 (5,000,000 and above);

M6 (2,000,000 to 4,999,999);

M5 (1,000,000-1,999,999);

M4 (500,000-999,999);

M3 (300,000-499,999);

M2 (200,000-299,999); and

M1 (100,000-199,999).

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as:

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) Census 2001 Findings

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census is the midnight of 28th February, 2001 i.e., the census provides a snapshot of the population of the country, as it existed at the midnight of 28th February, 2001. Actual enumeration was spread over a period of 20 days from 9th to 28th Februrary, 2001 followed by revisional round up to 5th March, 2001 for up dating of the population figures with reference to the midnight of 28th February, 2001. Household schedule was canvassed by the enumerator and with a view to ensuring uniformity in approach in understanding the various concepts and in proper eliciting and recording of the information, the enumerators and supervisors were imparted both theoretical as well as practical training intensively in 3 rounds.

As a prelude to the actual census the urban and rural areas were identified and listed out in respect of each administrative unit. The Directorate of Census Operations had prepared the list of urban areas and simultaneously, a list of villages. These lists formed the basic frame for the organization of the census operations. Thereafter, geographical areas that could be conveniently covered by each enumerator were carefully carved out to constitute the enumerator's block (EB).

The second major step was the house listing operation, which was carried out in this district during April 2000. Thereafter, in order to adhere to the prescribed workload norms the actual census enumerator's blocks were carefully demarcated on the basis of the house list population and the layout sketches and notional maps prepared for the houselisting operation. Houselisting operation was also utilized to collect wealth of information on items such as predominant material used for construction of houses, amenities available to the census households, number of living rooms etc.

As per 2001 Census, the total population of Karur District was 935,686 with 465,538 males and 624,430 females. As per 2001 Census, the district consists of 4 taluks, 8 C.D. Blocks and 15 towns. There are 176 villages in the district of which 175 are inhabited. Among the 15 towns of the district 2 are municipalities and 13 are town panchayats. There are two non-statutory towns in the district. Karur taluk has shown significant increase in population from 1991 to 2001, especially in the urban population.

Table B depicts the C.D. Block wise distribution of villages by various population ranges. 52% of the villages fall in the population range of 2000 – 4999, 21.7% fall under the range of 5000 to 9999 and 1.1% in the range 10000+. So, in total 74.8% of the villages are in the range of 2000+ population. Only 20% of villages are in the population range of 1000 – 1999. There are no villages below 200 population. K. Paramathy C.D. Block has the maximum of 35 villages and Kulithalai C.D. has a minimum of 15 villages.

Tamil Nadu		**480**	**987**
	T	323	1,010
Karur	R	239	1,008
	U	274	1,013

Table E shows the density and sex ratio of the district as compared to the state population. The density of the district as a whole was 323; the rural with 239 and urban with 274.

The sex ratio of the district as a whole was 1010 as against state level of 987. The rural sex ratio of Karur district was 1008 while that of the urban was 1013.

Religion

In our country, which is a secular country, many religions have thrived and every Census have attempted to provide an interesting picture on the religious persuasions and beliefs of the people of the country.

The following table shows the main religious communities between rural and urban areas of major religions in Karur District – 2001.

The sex ratio of 0 - 6 age group of population of towns shows a better position as compared to the rural (of the C.D. blocks). TNPL Pugalur ranks at the top followed by Punjaipugalur T.P., Aravakurichi T.P., Marudur T.P. and Punjaithottakurichi. It is the least in P J Cholapuram T.P. followed by Krishnarayapuram T.P. and Uppidamangalam T.P.

8	Thogaimalai	1,020	1,000
	District (Rural) Total	**1,018**	**1,017**

Sex ratio among Scheduled Caste population is 1018 and 1017 among ST for the district. This is above the district sex ratio as a whole which is 1008. Kulithalai C.D. ranks top in the Scheduled Caste sex ratio followed by karur and Thogaimalai C.D. The Scheduled Tribe sex ratio of Thogaimalai, K. Paramathy and Aravakurichi can be ignored since they are quite low in number having only 4,9 and 14 Scheduled Tribe population, as seen in Table 15.

16	Nangavaram (TP)	1,064	0
	Sex ratio (Urban) for the district:	**1,026**	**1,107**

The sex ratio of Scheduled Caste and Scheduled Tribe in the towns reveal that among Scheduled Caste it is 1026 which is much higher than the district population as a whole which is 1013. Punjaipugalur T.P. ranks at the top followed by Nangavaram T.P. and Pujnaithottakurichi T.P. The sex ratio of Krishnarayapuram T.P., Kulithalai M, Marudur T.P. and Puliyur T.P. alone are worth any mention since other towns have only insignificant Scheduled Tribe population.

Note: Percentage of Workers to total workers are given in brackets

Categorising work participation under the four broad categories by sex among the eight CD blocks of the district we find kadavur CD at the top in cultivation followed by Aravakurichi, K. Paramathy and Thogaimalai. In agricultural labourers category Kulithalai CD tops the list followed by Krishnarayapuram, Kadavur and Thogaimalai CD. Among household industries, Thogaimalai ranks high followed by Karur, K. Paramathy and Thanthoni CD. Coming to other workers Thanthoni tops the list followed by Karur, K. Paramathy and Aravakurichi CD blocks.

This table throws light on the number of households having the various assets like television, radio, telephone, vehicles. This also indicates the advancement of quality of life. More urban the area, more advancement in holding such assets. Karur taluk ranks high followed by Kulithalai, Aravakurichi and Krishnarayapuram taluks.

(ix) Major social and cultural events, natural and administrative developments and significant activities during the decade

Thai poosam and Adi Kirthigai are the important annual festivals celebrated in Sri Balasubramanya temple at Vennaimalai, which attracts about 2000 devotees.

(x) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district.

There are numerous ancient Temples in Karur district. An important Shiva Temple in the district is the Sri Pasupatheeswarar temple in Karur. It is one of the seven sacred Siva Sthalams of old Kongunadu and finds mention in Devaram Hymns. The temple has 125 feet Rajagopuram, 4 stone Mandapam, 15 stone Mani Mandapam etc. In A.D. 1128, the Chola King Kolathungam-III constructed the Raja Gopuram. Subsequently, the temple was renovated and Kumbabishekam performed in the years 1960, 1974, 1980 and 1993. Arulmigu Rathinagiriswarar at Ayyar Malai, the Shiva temple at Sivayam and Arulmigu Kadambavaneswarar Temple at Kulitalai are also famous.

Of the Vaishnavite sites, the Kalyana Venkatramaswami temple at Thanthoni is the most popular. The shrine is located on a raised portion of a small hillock. The temple is also known as Then (South) Tirupathi. Arulmigu Abaya Pradhana Renganathaswami Temple in Karur is another ancient Vaishnavite shrine.

Lord Balamurugan temple in Pugalur, Vennaimalai Murugan temple and Balamalai Murugan temple are also very popular. There is a very old temple on the bank of River Amaravathi by name Vanji Amman temple in Karur. The Mariamman temple which is in the heart of the town is very popular and the annual festival celebrated in the month of May is the most popular event in the district.

The Government Museum established by the Tamil Nadu Archaeological Department in 1983 in Jawahar Bazar in the heart of the Karur Town has some of the finest collections of archaeological, numismatic and epigraphical evidences to prove the hoary past of Karur town.

Some of the important exhibits in the Government museum are silver and gold coins of the Roman emperors, including the coins of Augustus Tiberious dated 37 A.D., which had been excavated from sites in and around Karur. Besides these, Coins, Durga Coin, Sathavagana coins and Lakshmi coins too had been found near Karur, along with square Chera coins, Pallava coins and circular copper coins. But among the most prized coins are the three coins of historical interest with the portraits of the Chera king Kolippurai, Makootai and Kuthuvaukottai found from the Amaravathi river bed. A remarkable golden signet ring was found by chance on the Amaravathi river bed in Karur in 1991 and it is not only a revelation to the numismatists but opens up new vistas in the history of Tamil art and culture. The ring weighing 15.6 gm with an oval face depicts an amorous couple of extraordinary grace and beauty engraved on it

Two huge burial urns kept in the museum were obtained from the Chinnaandankoil area of Karur Town. Manavasi, Pudukkotai, Sanapiratti, Thirukampuliyur, Thanthoni and Karur have yielded terracotta figurines, shell bangle pieces, beads, semi-precious stones etc. There is a five- foot tall hero stone in the museum belonging to the 16th Century brought from Tenumalai village, 10 km from Karur.

On 26.03.2000 a new Government Museum was opened by the Department of Museums in the heart of the town.

Another important place of interest is Arunattar Malai in Pugalur. On the hill, there are very old caves called “Samanar Padugai” where Jain Saints lived in the ancient past. Ancient rock inscript;ions relating to 2nd Century A.D. are also found in the hill. Similarly caves connected with Jain Saints are found at Sukkaliyur near Karur. Near Ayyarmalai in Kulithalai Taluk in a monolith rock called “Kundankkal” rare Jaina panel sculptures relating the 10th Century A.D. are found beautifully exhibited.

(xi) Major Characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Karur is also a part of Kongu Nadu. The history of Kongu nadu dates back to the 8th century. The name Kongunadu originated from the term “Kongu”,

meaning nectar or honey. Kongu came to be called as Kongu nadu with the growth of civilization. The ancient Kongunadu country was made up of various districts and taluks which are currently known as Palani, Dharapuram, Karur, Nammakkal, Thiruchengodu, Erode, Salem, Dharmapuri, Satyamangalam, Nilgiris, Avinashi, Coimbatore, Pollachi and Udumalpet. Kongunadu was blessed with enormous wealth, a pleasant climate and distinct features. Kongunadu was ruled over by the Gangas(Kongilam Kosargal), Chera, Chola, Pandya, Hoysala, Muslim rulers and finally the British.

The Pasupatheesvarar temple sung by Thirugnana Sambhandar, in Karur was built by the Chola kings in the 7th century.

(xii) Scope of Village and Town Directory

Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of Revenue villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. The villages which are considered as Census Towns, the amenities data are shown in the Town Directory.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code and area of the village. The land use data for such villages are shown in col. 19 to 23.

Town Directory

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements to be included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV – A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities. This District data for the towns/U.A.s has been presented in these six statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of this District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State and at the national level.. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class and name of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

Statement III shows the municipal finance of the Towns. The income and expenditure for the towns of this district has been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the Scheduled Castes/Scheduled Tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others.

Statement V gives information regarding educational, medical, recreational and cultural facilities available in the town. Population figures for 2001

census have also been presented for the towns of this District which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from Director of Health Services and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the towns. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Towns. Information on number of banks available in the towns have been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the towns.

Statement VII shows the various civic amenities available in the slums of towns of this District.

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation**.** The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Schedules for both the phases were scanned through high speed scanners in fifteen data centres across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data

for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes population were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been

restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis of literacy data.

The data in the Primary Census Abstracts are presented at different levels, The District Primary Census Abstract is presented at District/ C D block/ UA/City/Town, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented at District/C D block/ Town, Village Primary Census Abstract is presented villagewise for each C D block and Urban Primary Census Abstract at Town/Ward level. The Primary Census Abstract data for each of these characteristics is presented by sex and rural-urban residence.

The District Primary Census Abstract has been presented in 59 columns, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes has been presented in 52 columns, Village Primary Census Abstract and Urban Primary Census Abstract has been presented in 58 columns. The information on each village under a C D block are presented in the Village Primary Census Abstract and each of the wards under a town has been provided in the Urban Primary Census Abstract exist in the district. The Data was presented for villages C D block-wise for the first time in 1991 Census. This practice is continued in 2001 Census also.

The concepts and definitions used in the column heading are already explained under the sub heading 'Census concepts' in the Analytical note. The Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts is as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, P.Ss and by the local bodies in respect of towns are given in sq.kms. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C D block is the total of the village areas coming under each C D block. The area figures for the district supplied by the Surveyor General of India have been adopted to maintain uniformity at the national level. The total area figures of all the Tahsils/C D blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of P.S./Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on total population, Scheduled Castes population and Scheduled Tribes population for each town.

FERTILITY AND MORTALITY MEASURES

FERTILITY LEVELS

In demography, the word fertility is used in relation to the actual production of children or "occurrence of births specially live birth". Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age.

In other words, it is a major component of population growth. In the 1991 Census, questions of fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. In 2001 census too, the same information were gathered. However, these are not readily available.

SELECTED INDICATORS ON FEMALE NUPTIALITY, 1991

State / District	Total / Rural / Urban	Mean age at marriage of currently married women who married during			Percentage of currently marriage women with age at marriage below 18 who married during		
		Total	1981-86	1986-91	Total	1981-86	1986-91
Tamil Nadu	T	19.1	19.3	19.7	31.6	28.2	24.5
	R	19.0	19.1	19.3	32.2	30.2	27.8
	U	19.3	19.7	20.3	30.4	24.4	18.6
Karur	T	19.1	19.3	19.6	30.8	27.3	23.8
	R	19.0	19.1	19.3	31.9	29.9	26.6
	U	19.5	19.9	20.4	27.9	20.2	16.4

Note: Karur was part of Tiruchirappalli District in 1991.

The above table presenting the female age at marriage relates to all women who are living with their husbands. Some of them might be recently married and some of them decades ago. In view of this, the figures mentioned in the table should be regarded as indicating the situation for the population as a whole.

It is observed from the above table that the mean age at marriage of currently married females in Tiruchirapalli/Karur/Perambalur/Ariyalur District is 19.1 years in 1991, which is slightly higher than the corresponding state figure of 19.1 years. In the rural areas also, same trend is observed in the district figures when compared with those of the corresponding state figures in the above table. The mean age at marriage of the currently married females has increased by about 0.27 years from 19.3 years who married during 1981 - 86 to 19.6 years who married during 1986 - 91 in the district as is evident from the above table.

Presently the statutory minimum age at marriage for females is 18 years. It is worth examining the proportion of the currently married females whose age at marriage was below this limit during the periods 1981 - 86 and 1986 - 91. It is observed from the table that this proportion has decreased from 29.9% during 1981 - 86 to 26.6% in 1986 - 91 in the district which are lower than the corresponding state figures. Same trend is observed in case of rural and urban areas also.

CHILD MORTALITY LEVELS

Child - women ratio, which is a relative measure, to know the fertility performance of women. It is seen from the above table that child - women ratio in rural areas are higher than urban areas of the Tiruchirapalli/ Karur/Perambalur/Ariyalur District(combined before separation of Karur) and same trend in state Tamil Nadu also.

Source: Occational Paper No 1 Of 1997 RGI.

Note: Karur was part of Tiruchirapalli District in 1991.

It is observed from the above table that the child mortality estimates in the district and the state has decreased in 1991 when compared to those in 1981.

The estimates presented here have been obtained using the data on the number of children ever born and number of children surviving to ever-married women. Information on questions on children ever born and children surviving canvassed for all ever-married women have been tabulated by age of the mother. From this, estimates of child mortality (qi) have been worked out using Brass technique, where q (i) is the probability of a newborn child dying before age (i) = 1, 2, 3 and 5.

Note: *The informations furnished from Annexure II to Annexure VIII related to the undivided Tiruchirappalli as it existed during 1991 Census which includes the present Tiruchirappalli, Karur, Perambalur and Ariyalur District (as per 2001 census). So this does not relate to the existing Perambalur District alone.*

ANNEXURE III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE

The measures of fertility worked out are based of the F - series tables of 1991 Census pertaining to Tamil Nadu state and are given as below: -

ESTIMATES OF FERTILITY INDICATORS -1981 & 1991.

Sl. No	State / District	Year	CBR	TFR	TMFR	GFR	GMFR
1	Tamil Nadu	1981	32.0	3.9	5.5	123	169
		1991	26.4	3.1	4.8	99	136
2	Karur	1981	29.4	3.6	5.0	114	153
		1991	26.3	3.1	4.8	96	132

Source: Occasional paper No. 1 of 1997 RGI

Note: Karur was part of Tiruchirapalli District in 1991

The values of CBR, TFR, TMFR, GFR and GMFR are presented separately for Tamil Nadu and Tiruchirapalli/Perambalur/Ariyalur District in the above table. These values can be compared for 1981 and 1991 Censuses. The table shows that in the Tiruchirapalli/Perambalur/Ariyalur District, all the above-mentioned rates from 1981to 1991 have declined. Similar trend is observed in Tamil Nadu Sate also. On comparing the district level data with the State level data in the above table, it is observed that all the above-mentioned rates at the district level are lower than those at the State level except TMFR in 1991.

Different fertility measures indicate that mostly all the fertility levels in the district are lower compare to the state average during 1991. This is duly supported by the higher age at marriage of females in the district. Compared to the state as in evident from the above table.

IMPORTANT INDICES OF FERTILITY - 1991

	Karur District*			Tamil Nadu		
Fertility Indices	Total	Rural	Urban	Total	Rural	Urban
Number of children ever born per ever married women in age group 45 - 49	3.2	3.1	3.5	3.4	3.4	3.6
Child - women ratio (0-4 years)	332	345	298	348	369	311
Child - women ratio (5-9 years)	419	426	399	447	462	418

*Include Tiruchirapalli district.

One of the most useful indices that can be derived from the question on numbers of children born alive in the average number of children ever born alive per ever married women by age - group. Since most of the women complete their reproduction by the age - group 45 - 49, the average number of children ever born per ever-married women in the age - group 45 - 49 is termed as an index of completed level of fertility. Ever married include widows, divorced and separated women.

It is observed from the above table that the number of children ever born per ever-married women in rural and urban areas of Tiruchirapalli/Karur/Perambalur/ Ariyalur District almost same.

ANNEXURE IV

MIGRATION

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence.

INTERNAL AND INTERNATIONAL MIGRATION

The migrational movements are of three types; (i) Migration within the state itself with its components: (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (interdistrict migration), (ii) Migration from one state to another state of the country interstate migration and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

REASONS OF MIGRATION

As in 1991 Census, the reasons for migration were elicited in 2001 Census also. The reasons for migration were broadly categorized as (i) employment / work, (ii) Business, (iii) Education, (iv) Marriage, (v) Moved after birth, (vi) Moved with household and (vii) Any other reasons. Reasons for migration has been elicited only with reference to movement from place of last residence.

IMPACT OF MIGRATION

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

1991 data include Tiruchirapalli district.

The above table explains the comparison between 1991 and 2001 census data on migrant population by place of birth. It reveals that 15.3% (2001 census) migrants were born elsewhere in the district of enumeration but within the state, while 11.2% were born in other districts of the State. There were migrants(0.4%) also from other areas beyond the State of enumeration. In 1991 census the migrant population to the place of enumeration within the district and from other districts of the State and other places beyond the State were less compared to 2001.

1991 data include Tiruchirapalli district.

The above table is presented to compare the migrant population based on the place of last residence between 1991 and 2001 censuses in the district. Of the total population in the district 28.0% returned as migrants based on place of last residence which was 24.4% in 1991 census. This shows that there was an increasing trend of migration in the district. Majority of the migrants (63.6%) were from other places within the district of enumeration who lived there and moved to the place of enumeration. In 1991 census, this accounted only 68.8% who lived elsewhere within the district.

	Total	**3,768**	**100**	**21,490**	**100**

1991 data include Tiruchirapalli district.

While analysing interstate migration in 2001 and 1991, it is found that more migrants from 5 States have been migrated to Karur District. Of the total migrants to the District, migrants from Kerala reported the highest number, followed by migrants from Karnataka. It is evident that the total migrants in these states have declined to 3,768 in 2001 from 21,490 in 1991.

RURAL - URBAN COMPONENT OF MIGRATION

The flow of migrants consists of four streams viz., rural to rural, rural to urban, urban to rural and urban to urban. The data on the basis of these streams in case of migrants classified by place of birth are given below..

ANNEXURE V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE DISTRICT

RELIGION

In our country, which is a secular country, many religions have thrived and every Census have attempted to provide an interesting picture of the religious persuasions and beliefs of the people of the country.

The following table shows the main religious communities between Rural and Urban areas of major religions in Karur District in 2001 and 1991 Censuses.

Serial Number		2001 Census			1991 Census		
	Religion	Total	Rural	Urban	Total	Rural	Urban

1991 data include Tiruchirapalli district.

The distribution of population among the major religious groups in the District during 2001 Census indicate that the Hindus share the highest position followed by Muslims and Christians. Majority of Muslims are concentrated in Urban areas. While the majority of Hindus live in rural areas. A comparision between 1991 and 2001 is not attempted as the district was a part of Thiruchirapalli District in 1991 Census.

1991 data pertain to undivided district of Tiruchirapalli.

Talukwise distribution of major religions population in Karur District is given in Annexure V. Aravakurichi and Krishnarayapuram taluks are newly formed taluks in 2001 Census. In all taluks, the Hindus share majority of the population in 2001 Census.

ANNEXURE VI

MARITAL STATUS OF POPULATION

Marital status is defined as under:

Never married: A person who has never been married at any time before.

Married / Currently married: A person whose marriage is subsisting with spouse living. It may be the first or subsequent marriage of either of the persons. Persons who are recognized by custom or society as married and persons in stable de facto union are also considered as married.

Widowed: A person whose spouse is dead and who has not been married again.

Divorced or Seperated: A person who has been separated from the spouse and is living apart with no apparent intention of living together again or who has been divorced either by decree of a law court or by accepted social religious custom but who has not been re - married.

SEX-WISE PERCENTAGE DISTRIBUTION OF MARITAL STATUS

Census Year	Sex	Never married	Married	Widowed	Divorced / Seperated	Unspecified
2001	M	46.6	50.4	2.7	0.4	0
	F	34.5	52.4	11.9	1.2	0
1991	M	52.2	45.1	2.5	0.2	0
	F	41.1	48.8	9.6	0.5	0

1991 data are combined for Karur and Tiruchirapalli district

Martial status of the population in the district for 2001 and 1991 Censuses are given in Annexure VI. Married females are more than married males in both the Censuses. The never married males are more than the never married females; ie., females 34.5% and males 41.1% respectively.

ANNEXURE VII

AGE, SEX AND EDUCATIONAL LEVEL IN THE DISTRICT

LITERATE

A person aged 7 years and above who can both read and write with understanding in any language is to be taken as literate. A person, who can only read but cannot write, is not literate. The tables, below gives the selected indications on literacy and education 1991 for Tamil Nadu and Tiruchirapalli/Perambalur/ Ariyalur District.

LITERACY RATES FOR AGE GROUP BY SEX

District	Census Year	Sex	Literacy rates for the age-group: 7 years and above	10 years and above	15 years and above	10-14	15-59	60+
Karur	2001	M	70.4	83.1	57.3	95.9	81.1	52.7
		F	50.7	46.4	38.8	92.5	56.8	48.1
	1991	M	73.4	72.1	69.2	91.4	71.9	48.0
		F	48.9	46.2	41.2	81.1	44.3	14.4

Note: 'Age not Stated' is not included

Literacy rates among the population in the district described in Annexures VII. Literates among the age group 0-14 years tops the list both in 1991 and 2001 Censuses, while it remains the least in the age groups 60+. As a whole literates are lesser among females than the males during both the Censuses.

PERCENTAGE OF LITERACY IN THE TOTAL LITERATE

Sl. No	Literacy Level	2001 Census	1991 Census
	Total Literates	100.0	100.0
1	Literate without level	3.4	0.7
2	Below Primary	19.0	24.7
3	Primary	32.4	32.3
4	Middle	17.4	17.4
5	Matric/Secondary	15.5	15.0
6	Higher Secondary	6.4	4.5
7	Non-techinical diploma or certificate not equal to degree	0.06	0.26
8	Technical diploma or certificate not equal to degree	0.89	0.8
9	Graduate and above	5.0	4.4

1991 data are combined for Karur and Tiruchirapalli district

DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL

Census Year	Sex	Percentage Literates who are: below primary	primary but below middle	middle level below matric	matric but below graduate	graduate and above
2001	M	21.3	31.5	16.8	24.6	5.8
	F	23.9	33.6	18.0	20.5	3.9
1991	M	23.9	31.1	17.3	22.6	5.1
	F	27.8	34.1	17.6	17.3	3.3

From the above table we have seen that literacy for both males and females, in all the age groups the literacy rates for Tiruchirapalli/Perambalur/Ariyalur District higher than Tamil Nadu State. In case of educational level the percentage upto Primary standard are higher in state as compared to district and from Middle to Graduate standard mostly percentages for males and females were higher in district compare to state. A table above gives the literacy level percentage in Tamil Nadu and Tiruchirapalli/Karur/Perambalur/ Ariyalur District.

ANNEXURE VIII

DISTRIBUTION OF DIFFERENT MOTHER TONGUES IN THE DISTRICT

MOTHER TONGUE

The definition of mother tongue is same as in 1991 Census. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf means the language usually spoken by the mother should be recorded. In the case of doubt, the language mainly spoken in the household may be recorded".

As per the Census concept, each language is a group of mother tongues. The Census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. There are 18 languages included in the Eighth Schedule to the Constitution of India (Scheduled Languages).
