SIVAGANGA PALACE

Sivaganga palace in Sivaganga Town was built near the Teppakulam has historical importance. It is a beautiful palace, once the residence of the Zamindar of Sivaganga. The palace was occupied by the ex-rulers, one of the biggest and oldest, wherein Chinna Marudhu Pandiyar gave asylum to Veerapandiya Katta Bomman of Panchalankurichi when the British was trying to hang him as he was fighting against the colonial rule. There is a temple for Sri. Raja Rajeswari, inside the palace.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grossroots level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (VII) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespectiveof their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified

available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. C. Chandramouli, Director of Census Operations, Tamil Nadu. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division. Dr. R.P.Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

Publication of the District Census Handbooks (DCHBs) was initiated after the 1951 census and is continuing since then with innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the census organization on behalf of each State Government/Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts.

The District Census Handbook has two segments: Part A and Part B. Part A primarily deals with village and Town Directory and Part B contains Primary Census Abstract of each village and town of the District. The 1991 Census data presentation both in Part A and Part B of this book was the transition from traditional presentation at Taluk level to CD Block level and this pattern continued in 2001 census as well.

For the first time in 2001 census, the District Census Handbooks are being made available in electronic format.

The District Census Handbook is the joint collaboration of the Census Directorate and the Government of Tamil Nadu. On behalf of the Government of Tamil Nadu, this Directorate has prepared the manuscript of this book.

The District Census Handbooks of 2001 have some additional information which is based on the 2001 census as compared to the previous censuses like capturing of information on participation of women in economic activities, netting all the children in age-group 0-14 as also elderly people of age 60 years and above. The data about the number of handicapped persons including partial disability has also been collected in 2001 census for the whole of India. The most important methodological innovation introduced in 2001 census relate to carving out separate slum enumeration blocks.

The data being presented in this publication have been collected and compiled by Shri M.R.V. Krishna Rao, Deputy Director of Census Operations, Tamil Nadu with the assistance of S/Shri S.K. Srivastav, N. Sukumar Nandagopal and A. Achchhu Ali, Assistant Directors. For the preparation of manuscript of this book, I received wholehearted co-operation from all the Heads of Departments, Heads of offices of the District / Taluk / Corporation / Municipal / Town and Rural Administration and a number of dedicated and experienced Census staff of this office. I am grateful to all of them for their valuable contribution in the accomplishment of this task of national importance. I must place on record the co-operation extended to me by the press media and electronic media to make the census taking a great success in the state.

I am deeply grateful to Shri J.K. Banthia, IAS the Registrar General and Census Commissioner, India, New Delhi for the valuable guidance and advice at every step till the finalisation of this handbook. I also express my thanks to Dr I.C. Agrawal, Assistant Registrar General (Social Studies Division) and Shri S.L. Jain, Deputy Director, ORGI, New Delhi for preparing the set of instructions for the compilation of the village and Town Directory and other inset tables etc. being inserted in this District Census Handbook.

In particular, it has to be mentioned that the write up portion was taken up by Shri M.R.V.Krishna Rao, Deputy Director and finalised by Dr. D. Venkatesan, Deputy Director with the assistance of other members of the staff whose names have been mentioned in the "Acknowledgements".

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The compilation of District Census Handbook is an innovation of the 1951 Census. District is considered as the most important unit for presentation of Census data. Census Statistics are also compiled for individual villages and towns, as they constitute the basic units of human habitation. Besides this, some other useful information pertaining to the land and the people has also been included in it to make it a self-contained book of reference for the District. It was, however, not altogether a new idea, since census data for smaller units were published in earlier censuses also in one form or the other. For the first time in 1891 District wise list of villages were published giving the population of each village. At the 1911 Census, data of villages were published in the form of village directory. Such village directories were again compiled in the shape of District Census Statistics at the 1921 Census. Finally, District Census Handbooks emerged as regular decennial publication since 1951 Census. The demand for the basic data for the smallest administrative unit was greatly felt in the post-independence era. The ushering in an era of planning and development in the wake of launching of Five year plans after attaining independence, urgent need for detailed data at village level was felt. Thus, when the proposal to bring out District Census Handbook was put before the State Government, they readily agreed for the compilation and printing of District Census Handbooks through their respective Directors of Census Operations, under the authority of local government concerned. The general appreciation and utility of this handbook encouraged the Census Organisation to increase the scope of publication.

The tradition thus built up has been continued in the present series of District Census Handbooks. In the 1971 Census, it had been decided to bring out these hand books in three parts viz; Parts A, B and C. In respect of Tamil Nadu, Parts A and B of this publication had been printed in one volume and part C as a separate volume. During 1981 Census, it had been decided to print it in two parts viz., Parts A and B separately. Part A of this handbook consists of Village and Town Directory and Part B gives data on Primary Census Abstract (PCA). In 1991 Census also, the same pattern was adopted publishing Parts A and B in a single /double volumes as per the requirement and determining the size of the publication. However, in this census, some of the non-census data included are information on girl schools, social forestry areas etc. whereas items like staple food and information on newspapers etc. have been omitted.

In the present Census, this District Census Handbook is being brought out in one volume separately for the village and town directory as also the Primary Census Abstract and it should certainly quench the thirst of the planners involved in micro level planning. Similarly, additional data revealing civic and other amenities in Class I town has been presented especially in respect of slum dewellers. Scholars and planners alike may benefit from the data on amenities.

(ii) Brief History of the District

The present Sivaganga District was formed as a part of the traditional Marava Country. The Maravas were found in large numbers in this area. The numerous references in the legendary 'Purananooru' and 'Silapathikaram' exhort about the mighty Maravas. The history of the district is also closely linked to Pandya Kingdom. 'Megathenes', a great historian, mentions some special features about the administration of Pandya Kingdom in the south and this proves that Pandyas ruled over the southern peninsula during the period of Asoka (237 B.C.) Arthasastra of Kautilya and Mahavamsa, the Ceylones chronicle, also mentions the Pandyas. 'Mudukkudumudi' was the earliest king in the sangam period. He was succeeded by Nedunchezhian, a great warrior who defeated Cheras and Cholas and expanded the Pandya territory. 'Kalappairars' invaded this territory during the reign of Ugrapandya-Kodungon, a Pandya king drove away the Kapparars during the end of Sixth century and Pandyas were

able to rise under his leadership. The three centuries that followed the Pandya restoration have been called the Age of first Empire

The Kingdom of Ramnad originally comprised the present districts of Ramanathapuram, Sivaganga and Pudukottai of today. Regunatha Sethupathy alias Kilavan Sethupathy, the 7th King of Ramnad reiged between 1674 and 1710. He came to know about the bravery and valour of Peria Odaya Thevar of Nalukottai near Sivaganga and assigned him a portion of land sufficient to maintain 100-armed men. Vijaya Regunatha Sethupathy became the 8th King of Ramnad in 1710 after the death of Kilavan Sethupathy. He strengthened the relation with Paroa Odaya Thevar by giving his daughter in marriage to Sasivarna Thevar, son of Nalukottai Thevar. He placed his son-in-law incharge of the fortress of Piranmalai, Tirupathur, Sholapuram and Thiruppuvanam as well as harbour of Tondi. Bhavani Sankaran, the son of Kilavan Sethupathy conqurred Ramnad territory by arresting Sundareswara Regunatha Sethupathy, the 9th King ruled this territory from 1726 to 1729. He had quarreied with Sasivarna Peria Odaya Thevar of Nalukottai and drove him out of his territory. Sasivarna Thevar got 'Manthra Upadesam' from a saint named Sattappiah in Kalayarkoil jungles. As per his advice he went to Thanjavur and killed a ferrocious tiger, which was kept by the Rajah especially to test the bravery of men. There he met Kattaya Thevar, the brother of the late Sundaraeswara Ramanatha Sethupathy who was also fled from Ramnad to take refugee with the King Tulaji of Thanjavur. The Rajah of Thanjavur satisfied with the good behaviour of Kattaya Thevar and Sasivarna Thevar and helped them with his army to overpower Bhavani Sankaran. Then he became the 11th King of Ramnad. Kattaya Thevar divided Ramnad into five parts. While retaining three parts for himself, he granted the two parts to Sasivarna Thevar of Nallukottai confering on him the title of 'Rajah Muthu Vijaya Ragunatha Periya Odaya Thevar'. During the year 1750, after the death of Sasivarna Odaya Thevar his only son Muthuveduganatha Periya Odaya Thevar succeeded him. He was the second Rajah of Sivaganga. His wife Rani Velu Nachiar acted as a friend, philospher and guide to him. Thandavaraya Pillai was his able minister. Rajah granted commercial facilities to the Dutch only after the English rejected a similar offer

(iii) Administrative set up

Sivaganga District was within the composite district of Ramanathapuram until 1985. This district was initially named as Pasumpon Muthuramalinga Thevar District with Sivaganga as its headquarters. Devakottai Tiruppathur, Karaikudi, Sivagangai, Manamadurai and Ilayangudi taluks were formed part of this district. Only one village i.e., Emaneswaram village in Ilayangudi taluk got transpered to Paramakudi taluk of Ramanathapuram district. vide G.O.Ms.No.393 Rev. dated 15.03.1985. The name of the district was changed into Pasumpon Thevar Thirumagan District vide G.O.Ms.No.488 dated 5.4.89 and finally further changed as "Pasumpon Muthuramalinga Thevar District vide G.O.Ms.No.1044 dated 18.7.91. Again the name was changed as Sivaganga District vide Revenue Dept. 1 (1) G.O.No.618 dt.1.7.97. Ilayangudi taluk was upgraded as a full-fledged taluk vide G.O.Ms.No.157 dated 13.7.91. There are 2 revenue divisions, 38 revenue firkas, 519 revenue villages and 236 hamlets in this district. There are 12 Development Blocks, 437 village Panchayats, 12 Town Panchayats and 3 Municipalities in this district.

This district constitute five Assembly Constituencies, Tiruppathur, Karaikudi, Ilayangudi and Sivaganga Assembly Constitutencies form part of Sivaganga parliament constituency where as Manamadurai a reserved assembly constitutency for Scheduled castes form part of Ramanathapuram Parliament Constitutency.

The following table explains the precent administrative structure of the district

Name of the Taluks	Total number of towns	Name of the CD Blocks	Total number of villages	Total number of inhabited villages
1	2	3	4	5
Tiruppattur	3	S. Pudur	16	16
		Singampuneri	25	25

Manamadurai	2	Manamadurai	43	43
Ilayangudi	1	Ilaiyankudi	55	54
Total	**15**		**519**	**511**

There are 519 revenue villages; 511 inhabited and 8 uninhabited. While in urban areas there are 3 Municipalities (Karaikudi, Devakottai and Sivaganga) and 12 Town Panchayats in the district.

(iv) Physical features

Sivaganga District is located between 9°43' and 10°22' North Lattitude and 77°47' and 78°49' East Longitudes. It covers an area of 4,873.64 sq.kms. It is bounded by Pudukkottai on the north, Madurai on the west and Ramanathapuram on the west and south.

Physiography

Sivaganga district has red soil region and also clay soil. The familiar landscape is of palm and acacias. The famous Chettinad building architecture lies in many parts of the district.

The Vaigai river flow in the district which fills water to about 100 tanks.

A small hillock in Piranmalai at Tiruppathur and a small hillock in Karaikudi are the hills in the district worth mentioning.

Drainage

Besides river Vaigai, the other small rivers are Oppuodai, Manimuthuar and Thennar flows in this district.

Climate

The climate is almost dry and saltry especially during the summer months. During the winter season (i.e.) December to January the temperature is below the normal.

Rainfall

The annual rainfall recorded in the district during 1998-99 was 1095.3 mm as against the normal rainfall of 904.7 mm. The normal and actual seasonal rainfall for the period 1999 – 2000 in Sivaganga district and Tamil Nadu are as follows.

Period	Sivaganga District		Tamil Nadu State	
	Normal Rain Fall	Average Rain Fall	Normal Rain Fall	Average Rain Fall
South west Mansoon June 99 – Sep. 99	298	149.1	320.4	199.9
North East Mansoon Oct 99 – Dec 99	390.8	379.1	470.5	499.5
Winter season Jan – Feb 2000	47.7	112	47.8	119.5
Hot weather season march – may 2000	136.9	103.6	138.8	77.9
Annual total june 99 – may 2000	873.4	743.8	977.5	896.8

It is observed from the above table that the district received low rainfall than the State rainfall level in all seasons.

Minerals and mining

The mineral available in the district include Yellow Ochre, Graphite, Laterite and Limestone. It was reported that during1998-99, 34,085 tonnes of graphite at a value of Rs. 9,54,380/- was produced in the district.

The production and value of minor minerals for the year 1998-99 is detailed below.

Serial number	Name of the mineral	Quantity in Cft.	Value in Rs.
1	Sand	43,180,000	3,469,256
2	Clay	1,867,520	496,468
3	Gravel	82,400	28,520
4	Rough Stones	414,400	405,925

Soil

Large portions of Tiruppathur and Sivanganga taluks especially the sedimentary rock area are covered by a capping of hard red laterite. This is a poor soil and not suitable for cultivation. One could find the large tracts of thorny jungles. The plains available in parts of Sivaganga are drained by tanks.

There is a proposal to start a red soil research station in Arasanoor where the soil has the laterite mineral component for making the best utilisation of improving productivity near Sivaganga.

The research station is expected to serve the farmers in Sivaganga, Karaikudi and Devakottai as Arasanoor is only 15 kms from Sivaganga.

Land and land use pattern

The total geographical area, according to village records, is 409,432 hec. The land use pattern as per village records in Sivaganga district as on 31.03.1999 is furnished below:

Land and land use	Area in Hectares	Percentage
Forest	19,207.7	4.7
Total Irrigation	100,614.5	24.6
Un Irrigated	106,880.4	26.1
Cultivable waste, Grove and Gouchers	61,471.2	15.0
Area not available for cultivation	121,258.9	29.6
Rural Total	409,432.7	100.0
Urban Total	143.0	0.0
District Total	409,575.6	100.0

While analysing the above data it reveals that total cropped area is far below the State level as a whole. Fallow lands and land put to non agricultural uses contribute more than 50% of the total land area.

Sivaganga district continues to be drought prone area. It is generally believed that non-availability of adequate and regular supply of water is the main constraint of this region and as such the district will have to rely mostly on dry farming. Oil seeds, chillies, maize and to a lesser extent paddy are the chief crops of the region.

In order to meet the future food demands, there is a need to protect crop land both from soil erosion and from conversion into non-farm uses.

Though efforts to protect the crop land base are not undertaken properly, steps are now on to convert vast stretches of waste land in Sivaganga district into a bedrock for agro-based industries. The fact that waste land could be better utilised for productive purposes. This has been amply proved by a few farming companies which have already purchased thousands of acres of land. They have proved that fallow land can also be converted into promising plantations. Orchards have come up at places like Sembanoor, Alloor, Cholavandan and Manamadurai in this district.

Huge investment coupled with latest technology has transformed wastelands into promising tamarind, Cashew and mango plantations. Untapped groundwater potential is available in the district. The Sivaganga district spreads a little over four lakh hectares of land and of this, 1.32 lakh hectares are under crop cultivation and 21898 hectares under forest. The total wasteland available in the district as per official records is 1.29 lakh hectares. The young men could be trained in latest technology in agriculture and horticulture. Considering the various factors including vast stretches of fallow lands, the cashew plantation further is an another area of development in the district.

Sivaganga District occupies about 3.22 % of the total geographical area of Tamil Nadu. About 50.68% of the total rural area of the District is under cultivation

Agriculture

Cultivation is carried out by the irrigation from tanks and wells as no perennial rivers providing water supply. Though a dry district, agriculture is extensively carried out nowadays.

More than 80% area is brought under cultivation. Paddy is the most important food crop of the district and more than 70% of total cropped area is paddy. Jowar and Ragi are the other important cereals grown in the district. Chillies, Sugarcane and Cashewnut are the other important commercial crops of the district. Ground nut is also cultivated in the district.

The provision of liberal credit facilities to the farmers help in agricultural activities in the modern way. One central co-operative Bank and 124 primary agricultural credit societies assists the farmers. There are 6 Land Development Banks which provide loan for the purchase of farm machinery and installing tube-wells, digging of wells etc. The cultivators nowadays cultivate high yielding varieties of crops and also utilise fertilisers and pesticides. There are 11 main and 5 sub-agriculture extension centres in this district.

The table given below provide data on the area sown with different commercial and non-commercial crops in the district during 1998-99

Crop	Area (in Ha)	% of total area sown	Production (in MT)

Horticulture

The area under fruit trees and vegetables is very low in Sivaganga District. However, it was reported that during the period 1998-99, the area covered under various horticultural crops as follows:

Crop	Area in Ha.	Production in MT
Chillies	3,621	2,090
Cashewnut	4,537	935

Sericulture

The total area under mulberry cultivation as on 1.4.2000 was 11.20 hectares. The area under irrigation was 11.20 hectares. The total production of reeling cocoons was 0.006 MTs, which was valued at Rs. 0.60 lakhs. The production of raw silk in the same year was 0.001 MTs valued at Rs.0.76 lakhs.

Irrigation

In the absence of perennial rivers most of the irrigation is carried out by using tanks and wells. The following table reveal the sources of water supply and area irrigated from them.

Source	Number	Area irrigated (In hectares)
Canal	19	---
Tube Wells	104	609
Wells	27,947	11,789
Tanks	4,843	79,759
All Sources	32,913	92,157

Of the 4843 tanks, 129 are Vaigai river fed tanks, 123 receive water by Periyar extension and 348 are rainfed tanks. Remaining are minor irrigation tanks.

Major sources of water supply for irrigation in this District are as follows:

Irrigation Source	Number / Length
Canals	19/20 kms
Irrigation Wells	27,947
Tube Wells	104
Reservoirs	0
Tanks	4,843

The following table gives the source-wise Net Area Irrigated in 1998-99

Irrigation Source	Area Irrrigated (in Hectares)
1. Govt. Canals	229.8
2. Well without Electricity	2,952.5
3. Well with Electricity	8,824.5
4. Tube well with Electricity	1,212.8
5. Tank	83,804.4
6. Lake	0.0
7. River	114.3
8. Other Irrigation	3,476.2
Total	100,614.5

Animal husbandary

The live stock population of the District as per 1997 Livestock Census is given below:

Serial number	Category	Number
1	Cows	255,365
2	Buffaloes	25,834
3	Sheep	222,559
4	Goats	152,798
5	Poultry	533,449
6	Pigs	4,275

The Joint Director of Animal Husbandary controls one veterinary hospital at Sivaganga and Veterinary Dispensaries at 24 places. There are 24 Veterinary doctors. There were 2 milk chilling plant and one Dairy farm in this district. In 1999-2000, there were 2 hospitals, 24 dispensaries, 12 mobile units and 90 sub-centers in the district to take care of the animal population. (V) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel / hotel building was treated as one census house. but if such

built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably; the entire hostel/hotel building was treated as one census house., but if such hostels/ hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household.Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two

member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. In September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves a not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or

combination of both (agricultural labourers) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person, who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry, is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while

thosecarrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. :

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum^{45\text{-}49}\text{ASFR}_{15\text{-}19}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum^{45\text{-}49}\text{ASMFR}_{15\text{-}19}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1{,}00{,}000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

Migration, Internal and International migration, Impact of migration.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly a person is

considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence. By capturing the last of the migrations in cases where persons have migrated more than once, this concept would give a better picture of current migration scenarios.

Internal And International Migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (interdistrict migration) (ii) Migration from one state to another state of the country interstate migration (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Impact of Migration

As in 1991 and 2001 Census, like previous Censuses, had collected migration details for each individual by place of birth and last residence. Data on last residence along with details like duration of stay in the current residence and reason for migration provides useful insights for studying migration dynamics of population.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA / Town is based on the population. UAs / Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./ Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are :

M7 (5,000,000 and above);

M6 (2,000,000 to 4,999,999);

M5 (1,000,000-1,999,999);

M4 (500,000-999,999);

M3 (300,000-499,999);

M2 (200,000-299,999); and

M1 (100,000-199,999).

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as:

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) CENSUS 2001 FINDINGS

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census is the midnight of 28th February, 2001 i.e., the census provides a snapshot of the population of the country, as it existed at the midnight of 28th February, 2001. Actual enumeration was spread over a period of 20 days from 9th to 28th February, 2001 followed by revisional round up to 5th March, 2001 for up dating of the population figures with reference to the midnight of 28th February, 2001. Household schedule was canvassed by the enumerator and with a view to ensuring uniformity in approach in understanding the various concepts and in proper eliciting and recording of the information, the enumerators and supervisors were imparted both theoretical as well as practical training intensively in 3 rounds.

As a prelude to the actual census the urban and rural areas were identified and listed out in respect of each administrative unit. The Directorate of Census Operations had prepared the list of urban areas and simultaneously, a list of villages. These lists formed the basic frame for the organization of the census operations. There after, geographical areas that could be conveniently covered by each enumerator were carefully carved out to constitute the enumerator's block (EB).

The second major step was the house listing operation, which was carried out in this District during April, 2000. Thereafter, in order to adhere to the prescribed workload norms the actual census enumerator's blocks were carefully demarcated on the basis of the house list population and the layout sketches and notional maps prepared for the houselisting operation. Houselisting operation was also utilized to collect wealth of information on items such as predominant material used for construction of houses, amenities available to the census households, number of living rooms etc.

POPULATION IN RURAL AND URBAN AREAS

In 2001, the total population of Sivaganga District was 1,155,356; rural with 829,272 and urban with 326,084. In 1991, there were 1,103,077, 812,886 and 290,191 respectively.

The following table shows the taluk wise distribution of population to total, rural and urban areas of Sivaganga district. Sivaganga Taluk has the highest population of 250,347 and the lowest population recorded in the Ilayangudi taluk (99,476). Among the rural population again Sivaganga taluk stands first with 203,541 followed by Tiruppatur (194,610), and Manamadurai (136,923). Ilayangudi taluk has recorded the lowest rural population of 80,360. Karaikudi taluk ranks the first position with 125,717, followed by Manamadurai (47,842), Sivaganga taluk (46,806) and Tiruppathur taluk (46,106) among urban population.

The table – B gives the number and percentage of inhabited villages by C.D. Block wise at specified population size ranges among the rural areas of Sivaganga district. Out of 511 villages, 33.9% of the villages fall under the range group of 1000 – 1999 and 0.0% villages occupy 10,000 and above population range. It reflects further that 98.0% of villages fall below 4999 population range group while 2.0% villages found place in 5000 and above.

DENSITY OF POPULATION AND SEX RATIO

The density of population in Sivaganga District was 279, lower than the state average of 480.

TABLE E: DENSITY AND SEX RATIO

State / District	Density	Sex Ratio
Tamil Nadu	480	987
Sivaganga	279	1,038

The sex ratio (i.e., females per 1000 males) of the district was recorded as 1038, higher than the state (987).

LITERACY

A person who can read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write is not literate. It is not necessary that a person is literate should have received any formal education or should have passed any minimum educational standard. Like 1991 Census, all children of age 6 or less are treated as illiterate although they may be going to school and can read and write a few words. During 1981 Census this limit was upto the age of 4 years. It had also been decided in the 1991 Census to use only effective literacy rates (i.e.,) the ratio of literates and population excluding the age group of 0 – 6.

TABLE F: LITERACY

State / District	Percentage of Literates		
	Persons	Males	Females
Tamil Nadu	73.5	82.4	64.4
Sivaganga District	72.2	83.1	61.4

The literacy rate of the district is stood at 72.18%, lower than the literacy rate of the state (73.45%). The male literacy stood at 83.14% which is higher than the females (61.4%).

ECONOMIC ACTIVITY

TABLE G: DISTRIBUTION OF WORKERS, NON-WORKERS BY SEX

Persons/ Males/ Females	Percentage of workers		
	Main Workers	Marginal Workers	Non-workers
Persons	35.3	9.1	55.6
Males	48.1	7.8	44.2
Females	23.0	10.5	66.5

It can be seen from the above table that the main workers form 35.3% and non-workers form more than half of the population with 55.6%. The marginal workers was 9.1%. The 2001 Census recorded 44.4% as total workers, 35.3% as main workers, 9.1% as marginal workers and 55.6% as non-workers.

The table G shows that the proportion of the total workers and main workers are higher among males and the proportion of marginal workers. Non-workers was higher among females, the proportion of main workers higher in respect of males than females, whereas the proportion of marginal workers and non-workers were more among females than males.

WORK PARTICIPATION RATE

The work participation rate is defined as the percentage of total workers to total population.

TABLE H: WORK PARTICIPATION IN THE DISTRICT

Total/ Rural/ Urban	Work Participation Rate
Total	44.45
Rural	49.35
Urban	31.96

The total work participation rate of the district is 44.45%, in rural areas at 49.35% and 31.98% in urban areas

SCHEDULED CASTES AND SCHEDULED TRIBES

The following tables reveals that Scheduled Castes population in Sivaganga district was 16.3% and Scheduled Tribes population was 0.1%.

TABLE I: SCHEDULED CASTES AND SCHEDULED TRIBES

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house. Drainage means closed and open drainage.

This table indicates the talukwise number and percentage of households having the basic facilities. It is observed that the cent per cent households in both rural and urban areas have recieved the improved drinking water facility in all taluks

A few social welfare schemes are being implemented in this district. The Old Age Pension scheme, aid to pregnant women, aid for poor women marriage and handicapped persons are implemented.

(x) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district

Sivaganga, the capital of Sivaganga District, lies 48 kms, South east of Madurai. It has a railway station on the Tiruchirapalli-Manamadurai chord line. The founder of Sivaganga was Sasivarma Periya Udaya Thevar in 1733. There is a palace built near the Teppakulam and this was the residence of Zamindar of Sivaganga. The palace of the ex-rulers is one of the biggest and the eldest one where in 1798-99, Chinna Marudhu gave asylum to Virapandya Katta Bomman of Panchalankurichi. There is a famous temple Raja Rajeswari, the family deity of the Raja inside the palace. The Kalasa of the Sanctum Sanctorium is made up of gold. There are two Siva Temples at this place. Sri Viswanatha and Sri Subramanya Temples were originally built by Marudhu brothers. The other temple is Sasivaneswarar Temple near bus stand. There are also Protestant Churches and Mosques in the district.

Pillayarpatti, another important place is at 15 kms west of Karaikudi, stands at the foot of a sheet of rock where the famous Temple to the deity Sri Karpaga Vinayagar is situated. The name is derived from the deity of the temple as the name signifies. Pillayarpatti means Pillayar (Lord Ganesha) and Patti (village). The temple of Pillayar stands close to the northern foot of the rock and the inner most shrine of Pillayar Garbha. Graha is out of the solid rock. To the left of Pillayar is the life size figure of Thirubuvana Chakkaravarthy and to a little away to the left in a separate enclosure is lingam called Tinvengaigudy Madadevar which is also carved out of other same rock. It is believed to be one of the first rock cut temples of South India. It is one of the important temples of Nagarathar community and the temples are managed by committee of this community. The Presiding deity Karpaga Vinayagar is 6 feet high and 5 feet broad with only two hands instead of four, holding a lingam on the right hand, in a hald Padmaasan (one leg laid on the other thigh) sitting posture. This temple is rich with inscriptions. It is seen from this that it should have been founded during the Pallava period (642-658 AD). There is small Pillayar temple on a sheet of rock on the eastern side of the Karpaga Vinayagar temple called Gorakkar temple said to have been erected by the Siddha Gorakkar.

Karaikudi, one of the important towns of the district, where Dr. Alagappa University is situated. There are many palatial buildings in and around this place. These palatial building were built by Nagarathars which are just like palaces of local chieftains. Koppudayyamma temple is an important temple in this town. It is also an industrial, trading and educational centre. There is a Central Electro Chemical Research Institute run by Government of India. There are many handloom centres in and

around this town. Sarees in cotton and artificial silk are manufactured here. There are many educational institutitons founded by Dr.R.N. Alagappa Chettiyar of Kottiyur which included an Engineering College also.

Kunnakudi is about 10 kms from Tiruppathur and Karaikudi. Kunram in Tamil means hillock and kudy is village, meaning hillock village. This place is also known as Mayurapagara, Arasavanam, Mayilmalai and Krishnavanam. The hill is in the shape of Peacock and hence it derives the name Mayilmalai' i.e. Mayil means Peacock and malai means hollock.

There is a famous temple for Lord Subramanya on the top of the hillock. Lord Subramaniya with six faces facing east on his celestial vehicle. Peacock, with Valli and elvanai his two consorts are on his sides. The idol is exceedingly beautiful and attractive. At the entrance to the temple is the sannidhi of Thogaiyadi Vinayagar. At the foot of the South western side of the hillock there is a rock cut temple. The Shrine of the rock cut temple is graceful as the Lingam is hunge and marvelously cut out of solid rock. This place is the Seat of Tiruvannamalai mutt. This mutt controls the management of Kunnakudi, Tirupathur, Piranmalai and some other temples. The present chief is popularly known as 'Kundrakudy Adigalar' a great scholar in Tamil. He has developed a plan called 'Kundrakudi plan' by which he envisaged to get employment atleast for one person in each household. He started small scale industries also. He is the co-ordinator of village planning forun covering 24 villages to which CECRI is the advisory body.

Piranmalai is a small village 24 kms. north west of Tiruppathur and 8 kms. north of Chadurveda mangalam which is situated on the Tiruppattur Dindigul road. The origin of the name of place is referred to the Siva temple at the bottom of the hill. It is derived from Piran in Tamil referring to Lord Siva and kalai means mountain meaning Siva's Mountain. This place is situated in the bottom of a high and rugged mountain about 2500 feet high. It is very difficult to climb to the summit as it is very craggy. The hill in many parts is covered by deep jungle abunding with gaure. Short way up the hill there is a Bairavan temple. The top of the hill was a military post. On the top of the hill one can found the ruins of forts which bore testimony of native masonary. There is a Mosque of Sheik Abdulla near a pond which is a place of pilgrimage 'for Muslims. Two tridents (vel) planted on a massive rock of the hill are worshipped by Hindus. At the foot of the hill there is a fort of Marudhus enclosing the temple of Thirukodungadeesan. Piranmalai is a spur on the Eastern Chats. There are five temples three of them clustered together at the hill. Mangai Bagar with his consort is a rock cut Siva temple in a cave at top. A marvellous posture of this god is a rare one not to be seen in any other temple. Siva and his consort in a Wedding pose having more than 8 to 10 feet height is graceful to our eyes. The lore came down to earth to appear before Agasthia Rishi who die penance. There are deities of Ganesa, Sakthi and Lakshmi in this temple. The hall has 64 pillars representing 64 worlds of vaikuntam. Below this is the shrine of Bhairava the deity of guards. Next below is Ugraha Lingam. Amirthasani deity is little further to this. Beyond this is Lord Subramanya. His vehicle here is Elephant instead of his celestial peacock. Rare flag staff with the motif Ganesa on the south, Sivalinga on the west, three headed spear on the north and the sacred Bull on the East carved on it. This temple was sung by Sambandar a saiva saint of 6th century. This temple is richy sculptured with inscriptions of Pandya and Vijayanagara kings. The king Pari known as Parivallal of the Sangam age, a contemporary of Avvaiyar is said to have lived in this place and ruled over the country around when this area was known as Parambunadu.

Kalayarkoil is sixteen kms east of Sivaganga. Kalayarkoil derived its names from the Kaleeswaran temple of the place. During the Sanga period the place was known as Kanappair as is seen from 21st verst in the 'Purananooru' sung by Iyem Moolakizhar, a poet of Sangam period. This place was the seat of kings from early days and it was also the stronghold of the rulers of Sivaganga with a well built extensive fort for its strength and security. The temple of Kalayarkoil is very large and a beautiful building surrounded by a strong stone wall about 18 feet in height and forming one angle of the fort which was dismantled. The new tower on the south was built by Marudhu is seen at the east of the temple facing

the old entrance. This temple is an ancient temple built by one Veerasenan of Pandya king. There are three shrines called Someswaran representing 'Sthoola' Kaleeswaran representing 'Sushama' and Sundaraswara representing 'Karma'. Their consorts are Sri.Soundranayagi, Sri Somavalli and Sri Meenakshi, respectively. This temple enshrines Vishnu idol also. The famous saiva saints Appar, Gnanasambandar and Arunagirinathar visited this temple and sang its praise in their sacred poems.

(xi) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

Joseph Smith and Beyour, the two British Chieftains invaded Sivaganga in the year 1772. Only after a stiff resistance by the army of Rajah of Sivaganga, they captured entire Sivaganga. Muthuvaduganatha Odayar died along with his many followers. The heroic activities shown by the Queen Velu Nachiar during this battle was praised by every one. She along with her daughter Vellachi Nanchiyar and Tandavarayar Pillai fled to Virupakshi near Dindigul. Later they were joined by the two able Servaikaran, Vellai Marudhu and Chinna Marudhu. They lived under the protection of Hyder Ali. The Nawab ordered that Velu Nachiyar and Marudhu brothers were permitted to return to Sivaganga and rule the country subject to payment of kist to the Nawab.

During the year 1772 Rani Velu Nachiyar entered Sivaganga and started ruling, by appointing Chinnamarudu, the younger brother as her minister and Vellai Marudu, his elder brother as commander in chief. In the year 1780 Rani Velu Nachiar granted power to Marudhu brothers to administer the country.

Marudhu brothers are sons of Udayar Servai alias Mookiah Palaniappan and Anandaya alias Ponnathal. They do not belong neither to the family of the ancient poligars not to their division of the caste. Servaikaran was the caste title and Marudhu the family name. Though at first Marudhu brothers served under Muthu Vaduganatha Thevar, later they were elevated to the position of commanders. They were very famous in using a peculiar weapon-Boomerangs (Valari stick in Tamil) and they used it in the POLIGAR wars against the English. The Marudhu brother with a large army of 12,000 men surrounded Sivaganga and plundered the Nawabs territories. In the year 1789, the British troops on the request of the Nawab, attacked Kollangudi but was defeated by Marudhu troops. Marudhu brothers were in close association with Veerapandiya Kattabomman of Panchalankurichi, a famous warrior who opposed British rule. After the execution of Kattabomman in 1799 at Kayattar, Chinna-marudhu gave asylum to Kattabomman's brother Oomadurai and also issued an epoch-making Jumboo Dweepa Proclamation to the people in the island of Jamboo peninsular South India to fight against the English. But at last the Marudhu Pandiyars fell a victim to the cause of liberating the motherland from the English supremacy. Marudhupandiar the popular leader of the rebels together with his gallant brother, Vellaimarudhu were executed on the ruins of fort at Tiruppathur on 24.10.1801. They showed their determination and sprit at the outset of the final struggle of 1801 by setting fire to their handsome village Siruvayal to prevent it being used by the English forces. Marudhu brothers were great warriors of their period and also good administrators. During the period from 1783-1801 they have worked for the welfare of the people and made Sivagangai Seemai very fertile. They constructed and also renovated many temples, the masterpiece being the tail Rajagopuram of Kalayarkoil. They also constructed many Uranis and Tanks. Though British controlled this territory from the period after Marudhu brothers, the heirs of Sivaganga Rajah were allowed to have limited power to rule their territory as zamin. Even today Selvi Maduranthai Nachiyar is the legal heir of Sivaganga who controls the Sivaganga Devasthanam lands and temples

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of Revenue villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest

town with distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. The villages which are considered as Census Towns, the amenities data are shown in the Town Directory.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code and area of the village. The land use data for such villages are shown in col. 19 to 23.

Town Directory

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements to be included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV – A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities. This District data for the towns/U.A.s has been presented in these six statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of this District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State and at the national level.. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class and name of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

Statement III shows the municipal finance of the Towns. The income and expenditure for the towns of this district has been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the Scheduled Castes/Scheduled Tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others.

Statement V gives information regarding educational, medical, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of this District which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from Director of Health Services and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the towns. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Towns. Information on number of banks available in the towns have been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the towns.

Statement VII shows the various civic amenities available in the slums of towns of this District.

PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Schedules for both the phases were scanned through high speed scanners in fifteen data centres across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers

were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes population were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers and (iv) Other Workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been

restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis of literacy data.

The data in the Primary Census Abstracts are presented at different levels, The District Primary Census Abstract is presented at District/ C D block/ UA/City/Town, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented at District/C D block/ Town, Village Primary Census Abstract is presented villagewise for each C D block and Urban Primary Census Abstract at Town/Ward***** level. The Primary Census Abstract data for each of these characteristics is presented by sex and rural-urban residence.

The District Primary Census Abstract has been presented in 59 columns, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes has been presented in 52 columns, Village Primary Census Abstract and Urban Primary Census Abstract has been presented in 58 columns. The information on each village under a C D block are presented in the Village Primary Census Abstract and each of the wards under a town has been provided in the Urban Primary Census Abstract exist in the district. The Data was presented for villages C D block-wise for the first time in 1991 Census. This practice is continued in 2001 Census also.

The concepts and definitions used in the column heading are already explained under the sub heading 'Census concepts' in the Analytical note. The Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts is as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahasils, P.Ss and by the local bodies in respect of towns are given in sq.kms. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C D block is the total of the village areas coming under each C D block. The area figures for the district supplied by the Surveyor General of India have been adopted to maintain uniformity at the national level. The total area figures of all the Tahsils/C D blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of P.S./Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on total population, Scheduled Castes population and Scheduled Tribes population for each town.

ANNEXURE II

FERTILITY AND MORTALITY MEASURES

FERTILITY LEVELS

In demography, the word fertility is used in relation to the actual production of children or "occurrence of births specially live birth". Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age.

In other words, it is a major component of population growth. In the 1991 Census, questions of fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. As the data for 2001 is not available readily, 1981 and 1991 data has been compared.

SELECTED INDICATORS ON FEMALE NUPTIALITY, 1991

State / District	Total / Rural / Urban	Mean age at marriage of currently married women			Percentage of currently married women with age at marriage below 18		
		Total	who married during		Total	who married during	
			1981-86	1986-91		1981-86	1986-91
Tamil-Nadu	T	19.1	19.3	19.7	31.6	28.2	24.5
	R	19.0	19.1	19.3	32.2	30.2	27.8
	U	19.3	19.7	20.3	30.4	24.4	18.6
Sivaganga	T	19.7	19.8	19.8	21.4	20.5	20.7
	R	19.8	19.7	19.7	19.8	20.8	20.6
	U	19.5	19.9	20.0	25.8	19.7	21.0

The above table presenting the female age at marriage relates to all women who are living with their husbands. Some of them might be recently married and some of them decades ago. In view of this, the data presented in the table should be regarded as indicating the situation for the population as a whole.

It is also observed from the above table that the mean age at marriage of currently married females in Sivaganga District was 19.71 years in 1991, slightly higher than the corresponding state level of 19.12 years. In the rural areas also, same trend was noticed in the district data when compared with those of the corresponding state level data. The mean age at marriage of the currently married females has increased by about 0.05 years from 19.76 years who married during 1981 - 86 to 19.81 years who married during 1986 - 91 in the district as is evident from the above table.

Presently, the statutory minimum age at marriage for females is 18 years. It is worth examining the proportion of the currently married females whose age at marriage was below this limit during the periods 1981 - 86 and 1986 - 91. It is observed from the table that this proportion has decreased from 20.45% during 1981 - 86 to 20.70% in 1986 - 91 in the district lower than the corresponding state level data. Same trend was observed in case of urban areas also.

CHILD MORTALITY LEVELS

The estimates presented here have been obtained using the data on the number of children ever born and number of children surviving to ever-married women. Information on questions on children ever born and children surviving canvassed for all ever-married women have been tabulated by age of the mother. From this, estimates of child mortality (qi) have been worked out using Brass technique, where q (i) is the probability of a newborn child dying before age (i) = 1, 2, 3 and 5.

ESTIMATES OF CHILD MORTALITY INDICATORS BY SEX

State / District	Year	Persons				Males				Females			
		q(1)	q(2)	q(3)	q(5)	q(1)	q(2)	q(3)	q(5)	q(1)	q(2)	q(3)	q(5)
Tamil Nadu	1991	54	58	61	67	55	57	61	64	51	60	62	70
	1981	104	103	114	132	114	110	116	134	93	96	111	131
Sivaganga	1991	49	59	70	72	48	62	67	69	49	56	79	75
	1981	124	118	129	149	132	130	132	148	115	109	126	149

It is observed from the table that the child mortality estimates in the district and the state has decreased in 1991 when compared to those in 1981. The child mortality estimates at the district level was observed to be higher than the estimates at the state level.

ANNEXURE III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE

The measures of fertility worked out are based on the F – series tables of 1991 census pertaining to the State and Sivaganga district. The same data for 2001 is not readily available.

ESTIMATES OF FERTILITY INDICATORS

State / District	Year	CBR	TFR	TMFR	GFR	GMFR
Tamil Nadu	1981	32.0	3.9	5.5	123	169
	1991	26.4	3.1	4.8	99	136
Sivaganga	1981	35.2	4.5	6.2	135	190
	1991	28.4	3.6	5.6	106	150

Source: Occasional paper No. 1 of 1997, RGI

The values of CBR, TFR, TMFR, GFR and GMFR are presented separately for Tamil Nadu and Sivaganga District in the above table. These values can be compared for 1981 and 1991 Censuses. The table shows that in the Sivaganga District, all the above-mentioned rates from 1981 to 1991 have declined. Similar trend is observed at state level also. On comparing the district level data with the State level data in the above table, it is observed that all the above mentioned rates at the district level are higher than those at the State level.

IMPORTANT INDICES OF FERTILITY-1991

Fertility Indices	Sivaganga District			Tamil Nadu		
	Total	Rural	Urban	Total	Rural	Urban
No. of children ever born per ever married women in age group 45-49 years	3.5	3.5	3.5	3.4	3.4	3.6
Child - women ratio (0-4 years)	333	347	297	348	369	311
Child - women ratio (5-9 years)	460	464	449	447	462	418

Different fertility measures indicate that mostly all the fertility levels in the district are higher compared to the state average during 1991. This was duly supported by higher age at marriage of females in the district, compared to the State as is evident from the table.

One of the most useful indices that can be derived from the question on number of children born alive is the average number of children ever born alive per ever married women by age - group. Since most of the women complete their reproduction by the age - group 45 - 49, the average number of children ever born per ever-married women in the age - group 45 - 49 is termed as an index of completed level of fertility. Ever married include widows, divorced and separated women.

In the above table, average number of children born per ever-married women in the age group 45 - 49 in 1991 has been presented for total, rural and urban areas for the Sivaganga District and Tamil Nadu state. It is observed from the above table that the number of children ever born per ever-married women in rural and urban areas of Sivaganga District are almost the same.

Child - women ratio, a relative measure, is calculated to know the fertility performance of women. It is seen from the above table that child - women ratio in rural areas is higher than urban areas of the Sivaganga District and same trend is reported at State level data also.

ANNEXURE IV

DISTRIBUTION OF POPULATION BY PLACE OF BIRTH / PLACE OF LAST RESIDENCE

MIGRATION

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly, a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence.

INTERNAL AND INTERNATIONAL MIGRATION

The migrational movements are of three types; (i) Migration within the state itself with its components: (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (interdistrict migration), (ii) Migration from one state to another state of the country interstate migration and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

REASONS FOR MIGRATION

As in 1991, the reasons for migration were elicited in 2001 Census also. The reasons for migration were broadly categorized as (i) Employment / work, (ii) Business, (iii) Education, (iv) Marriage, (v) Moved after birth, (vi) Moved with household and (vii) Any other reason. Reasons for migration has been elicited only with reference to movement from place of last residence.

IMPACT OF MIGRATION

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

Note: Percentages are given in paranthesis

The above table is presented to compare the migrant population based on the place of last residence between 1991and 2001 censuses in the district. Of the total population in the district, 29.2 % returned as migrants based on place of last residence which was 21.4 % in 1991 census. This shows that there was an increasing trend of migration in the district. Majority of the migrants (74.9 %) were from other places within the district of enumeration who lived there and moved to the place of enumeration. In 1991 census, this accounted for 64.1 % who lived elsewhere within the district.

ANNEXURE - VI

MARITAL STATUS OF THE POPULATION

Marital status is defined as under:

Never married: A person who has never been married at any time before.

Married / Currently married: A person whose marriage is subsisting with spouse living. It may be the first or subsequent marriage of either of the persons. Persons who are recognized by custom or society as married and persons in stable de facto union are also considered as married.

Widowed: A person whose spouse is dead and who has not been married again.

Divorced or Seperated: A person who has been separated from the spouse and is living apart with no apparent intention of living together again or who has been divorced either by decree of a law court or by accepted social religious custom but who has not been re - married.

SEX WISE PERCENTAGE DISTRIBUTION OF MARITAL STATUS

Census year	Sex	Never married	Married	Widowed	Divorced/ Separated
2001	M	50.5	47.1	2.2	0.2
	F	40.3	50.1	8.8	0.7
1991	M	53.8	43.9	2.1	0.2
	F	44.1	47.5	7.9	0.5

From the above table we see that out of total population of males and females, 50.5% males and 40.3% females were never married in 2001 census whereas 53.8% and 44.1% for males and females respectively were never married in 1991. In case of married females we see that 50.1% were married in 2001 whereas 47.5% were married in 1991 census.

ANNEXURE VII

AGE, SEX AND EDUCATIONAL LEVEL IN THE DISTRICT

LITERATE

A person aged 7 years and above who can both read and write with understanding in any language is to be taken as literate. A person who can only read but cannot write is not literate. The tables below gives the selected indicators on literacy and education in Sivaganga District.

LITERACY RATE FOR AGE GROUPS BY SEX

Census Year	Sex	Literacy rates for the age groups					
		7 Years and above	10 Years and above	15 Years and above	10 - 14	15 - 59	60+
1	2	3	4	5	6	7	8
2001	M	83.2	83.2	81.2	96.9	84.6	61.0
	F	61.8	60.4	56.1	94.4	61.4	21.4
1991	M	76.9	69.2	55.9	13.3	50.9	49.8
	F	49.7	43.1	32.2	10.9	31.0	1.2

The table explains the literacy rate of both males and females during 2001 and 1991 census. Comparatively literates among males were more than females. The variation is very high in the age group of 60+ i.e. 61.0 % males and 21.4 % females at 2001 census and 49.8 % males and 1.2 % females at 1991 census.

PERCENTAGE OF LITERACY LEVEL IN TOTAL LITERATE

Serial number	Literacy Level	2001	1991
	Total Literates	**100.0**	**100.0**
1	Literate without level	5.0	0.9
2	Below Primary	15.5	26.6
3	Primary	31.8	35.5
4	Middle	20.4	17.0
5	Matric	15.2	12.1
6	Higher secondary	6.0	3.7
7	Non-technical diploma or Certified not equal to degree	0.1	0.2
8	Technical diploma or Certified not equal to degree	1.1	0.5
9	Graduate and above	5.0	3.5

Different literacy level has been picturised in the preceding table. In 2001 census, literates without any level were 5.0% whereas primary was 31.8%. But, during 1991 census, literates without level was only 0.9%. Primary level tops the rank with 35.5%. The graduate level was higher with 5.0% in 2001 census than that of 1991 census (3.5%).

DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL

Census Year	Sex	Percentage Literates who are				
		Below Primary	Primary but below Middlle	Middle but below Matric	Matric but below graduate	Graduate and above
1	2	3	4	5	6	7
2001	M	19.4	31.1	19.8	24.0	5.7
	F	22.0	32.6	21.1	20.3	4.0
1991	M	25.5	34.6	17.5	18.3	4.2
	F	30.5	36.8	16.6	13.7	2.4

From the above table it is clear that literacy rate for both males and females, during 2001 was higher than 1991. In case of educational level, the share of students in primary level was lower in 2001 as compared to 1991, while it was higher in Middle to graduate level for males and females in 2001 when compared to 1991.

ANNEXURE VIII

DISTRIBUTION OF DIFFERENT MOTHER TONGUES IN THE DISTRICT

The definition of mother tongue is the same as in 1991 Census. Mother tongue is the language spoken in childhood by the mother of the person. If mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf means the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded.

As per the Census concept, each language is a group of mother tongues. The Census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. There are 18 languages included in the Eighth Schedule to the Constitution of India (Scheduled Languages).
