MURUGAN TEMPLE

Murugan Temple, located at sea-shore in Tiruchendur of Thoothukudi district, is one of the six sacred abodes (Arupadai Veedu) of Lord Murugan, son of Lord Shiva. The temple was constructed in the 17 th century. The height of the temple gopuram (tower) is 157 ft. The temple is noted for its architectural and sculptural beauty. The temple festivals like "Soora Samharam" and "Vishakam" etc., attract lakhs of pilgirims from various parts of the state.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking

water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. C. Chandramouli, Director of Census Operations, Tamilnadu. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division. Dr. R.P.Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

Publication of the District Census Handbooks (DCHBs) was initiated after the 1951 census and is continuing since then with innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the census organization on behalf of each State Government/Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts.

The District Census Handbook has two segments: Part A and Part B. Part A primarily deals with village and Town Directory and Part B contains Primary Census Abstract of each village and town of the District. The 1991 Census data presentation both in Part A and Part B of this book was the transition from traditional presentation at Taluk level to CD Block level and this pattern continued in 2001 census as well.

For the first time in 2001 census, the District Census Handbooks are being made available in electronic format.

The District Census Handbook is the joint collaboration of the Census Directorate and the Government of Tamil Nadu. On behalf of the Government of Tamil Nadu, this Directorate has prepared the manuscript of this book.

The District Census Handbooks of 2001 have some additional information which is based on the 2001 census as compared to the previous censuses like capturing of information on participation of women in economic activities, netting all the children in age-group 0-14 as also elderly people of age 60 years and above. The data about the number of handicapped persons including partial disability has also been collected in 2001 census for the whole of India. The most important methodological innovation introduced in 2001 census relate to carving out separate slum enumeration blocks.

The data being presented in this publication have been collected and compiled by Shri M.R.V. Krishna Rao, Deputy Director of Census Operations, Tamil Nadu with the assistance of S/Shri S.K. Srivastav, N. Sukumar Nandagopal and A. Achchhu Ali, Assistant Directors. For the preparation of manuscript of this book, I received wholehearted co-operation from all the Heads of Departments, Heads of offices of the District / Taluk / Corporation / Municipal / Town and Rural Administration and a number of dedicated and experienced Census staff of this office. I am grateful to all of them for their valuable contribution in the accomplishment of this task of national importance. I must place on record the co-operation extended to me by the press media and electronic media to make the census taking a great success in the state.

I am deeply grateful to Shri J.K. Banthia, IAS the Registrar General and Census Commissioner, India, New Delhi for the valuable guidance and advice at every step till the finalisation of this handbook. I also express my thanks to Dr. I.C. Agrawal, Assistant Registrar General (Social Studies Division) and Shri S.L. Jain, Deputy Director, ORGI, New Delhi for preparing the set of instructions for the compilation of the Village and Town Directory and other inset tables etc. being inserted in this District Census Handbook.

In particular, it has to be mentioned that the write up portion was taken up by Shri M.R.V.Krishna Rao, Deputy Director and finalised by Dr.D.Venkatesan, Deputy Director with the assistance of other members of the staff whose names have been mentioned in the “Acknowledgements”.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The compilation of District Census Handbook is an innovation of the 1951 Census. District is considered as the most important unit for presentation of Census data. Census Statistics are also compiled for individual villages and towns, as they constitute the basic units of human habitation. Besides this, some other useful information pertaining to the land and the people has also been included in it to make it a self-contained book of reference for the District. It was, however, not altogether a new idea, since census data for smaller units were published in earlier censuses also in one form or the other. For the first time in 1891 District wise list of villages were published giving the population of each village. At the 1911 Census, data of villages were published in the form of village directory. Such village directories were again compiled in the shape of District Census Statistics at the 1921 Census. Finally, District Census Handbooks emerged as regular decennial publication since 1951 Census. The demand for the basic data for the smallest administrative unit was greatly felt in the post-independence era. The ushering in an era of planning and development in the wake of launching of Five year plans after attaining independence, urgent need for detailed data at village level was felt. Thus, when the proposal to bring out District Census Handbook was put before the State Government, they readily agreed for the compilation and printing of District Census Handbooks through their respective Directors of Census Operations, under the authority of local government concerned. The general appreciation and utility of this handbook encouraged the Census Organisation to increase the scope of publication.

The tradition thus built up has been continued in the present series of District Census Handbooks. In the 1971 Census, it had been decided to bring out these hand books in three parts viz; Parts A, B and C. In respect of Tamil Nadu, Parts A and B of this publication had been printed in one volume and part C as a separate volume. During 1981 Census, it had been decided to print it in two parts viz. Parts A and B separately. Part A of this handbook consists of village and Town Directory and part B gives data on Primary Census Abstract (PCA). In 1991 Census also, the same pattern was adopted publishing Parts A and B in a single /double volumes as per the requirement and determining the size of the publication. However, in this census some of the non-census data included are information on girl schools, social forestry areas etc. whereas items like staple food and information on newspapers etc. have been omitted.

In the present Census, this District Census Handbook is being brought out in a single volume which contain the village and town directory as also the Primary Census Abstract and it should certainly quench the thirst of the planners involved in micro level planning. Similarly, additional data revealing civic and other amenities in Class I town has been presented especially in respect of slum dewellers. Scholars and planners alike may benefit from the data on amenities.

(ii) Brief history of the district

From the ancient legends (Purunas), it is known that once Lord Hanuman stayed at a place near the sea during his travel to Lanka as the Ambassador of Lord Sri Rama as to save Sita from Ravana, the King of Lanka. This place was called “Thoothuvankudi” i.e., staying place of Ambassador. The name “Thoothuvankudi” has changed itself in course of time as Thoothukkudi.

Another historical name of Thoothukkudi is “Thirumanthira Nagar”. Once Lord Siva was preaching Vedic Hymn (Mantras) to goddess Parvathi and Parvathi was unable to listen it due to noise from the waves of sea, waving of Palmyra trees etc. Immediately Lord Siva ordered to calm down noise. Hence, it is the reason that no sound can by heard from the sea and palmyrah trees around Thoothukkudi area. So the name Thirumanthira Nagar was christened to Thoothukkudi.

The history of this district is bound up with that of the Pandyas just like Madurai and Ramanathapuram areas including Thoothukkudi and the coastal line leads to Kanniyakumari.

Tamil literature of those time sush as Thevaram, Seevagachinthamani and Periapuranam mention the pearls of this place. From the writings of Megastenes, the Greek Ambassador, Marco polo and other foreign travellers, it is seen that the Pandya kingdom was in a prosperous state duing that period. Korkai, a port town about 15 Kilometers south of Thoothukkudi, was the capital of Pandya Rulers.

Thoothukkudi formed a part of the Pandya kingdom during 7th to 9th centuries and fell into the hands of the Cholas during the 10th and 12th centuries (1000 – 1200). Hence, it might be possible that the Chola's invasion on Sri Lanka was launched from Thoothukkudi, being the nearest sea base to Sri Lanka. The port at Korkai served as a port also to Arabic Merchants but it paled into insignificance due to sitting (as it is located on the delta portion of the river Tamirabarani). In 1532, the Portugese landed at Thoothukkudi. Their main aim was to spread Christianity in the coastal area from Kanniyakumari to Thoothukkudi. The great missionary, St. Francis Xavier, came toThoothukkudi in 1542. The Portuguese opposed the Dutch in 1602. In 1649, the Dutch captured Thoothukkudi and Tiruchendur Temple. Many European visitors, particularly travellers, meticulously recorded their impressions of Thoothukkudi, in 17th century. The lucrative pearl fishery that flourished under the Dutch is vouchsafed by Jean De Lan came. After about a century of political suppremacy in the area, the Dutch came into conflict with the British East India Company in the later half of the 18th century. In 1825, after nearly four decades of intermittent conflicts, the East India company took over the administration of Thoothukkudi, and its dependencies in Kayalpattinam, Alwarthirunageri, Punnakayal and Manappad.

In other area, particularly the Taluks of Kovilpatti, Ottapidaram and Vilathikulam at present the Pandya rule continued till the end of 15th century, with short period under Chola and Mogulaya Rulers. In 1063 AD, Tirunelveli territory including the present Thoothukkudi District, was conqured by Rajendra Chola and held it under his regime for a short period. After the Chola rule the fterritory was ruled by the Moguls till 1365 AD. The territory once again came under the Pandya rule when Parakrama Pandya was king who was helped by the Vijayanagar kings. By 1520 A.D. the Pandya Dynasty was ousted by the Nayaks of Vijayanagar. The Nayaks ruled this area from Madurai as it was the capital during 16th and 17th Centuries and early part of the 18th part of the century. Rani Mangammal ruled over this area from 1688 to 1704 A.D., as a representative of Vijayanagar kingdom. The last ruler of Nayak died in 1731 AD and after that the kingdom fell in to the hands of Moguls whose regime lasted till 1805 AD. During the Nayak rule, Poligars of feudal chiefs were well established and had firm foundation of their power.

With the fall of the Nayaks, the territory fell into the hands of Carnatic Nawab in 1736 AD. Mohamed Ali and Chanda Sahib were the claimants to the throne of Carnatic in which the areas of Madurai and Tirunelveli were included. The British supported Mohamed Ali while the French allied with Chanda Sahib. The British being pre-occupied in the war with the Tippu Sultan of Mysore, the Poligars in the south rose in rebellion against Nawab of Carnatic and caused lot of distrubances. The Poligars at that time numbered 32 in Tirunelveli region including present Thoothukkudi district. Each Poligar had a strong fort and armed forces who were Chiefs under the Vijayanagar Empire. After the fall of the Vijayanagar Empire, they fought with one another. Though the authority of Nawab was acknowledged they evaded payment of tribute and rebelled. Veerapandia Kattabomma Nayakkan of Panchalankurichi was the foremost among the rebel poligars. He stood up against foreign domination and raised the banner of revolt against the East India Company. The Poligars of Nagalapuram, Gollarpatti, Elayerampannai, Kadalkudi, Kulathur and Pulithevar of Avudaiapuram joined hand with Veerapandya Kattabomman. The English had the support of the Poligars of Ettayapuram, Uttumalai, Chockampatti, Thalivankottai, Maniyachi and Melmandhi. Major Bannerman attacked the fort at Panchalankurichi in 1799 AD against the stiff resistance of Kattabomman. Kattabomman escaped but was later caught by Thondaiman, King of Pudukottai and handed over to the British who hanged him at Kayathar. The

properties of the rebel Poligars were distributed among the Poligars who supported the British. The two brothers of Kattabomman who were kept in jail started a second revolt and fought the British alongwith Maruthupandya brothers of Sivagangai at Kalayarkoil 1801 AD. The revolt failed and they were caught and hanged.

During the later half of the 18th century, the East India Company was frequently at war with the Poligars on behalf of the Carnatic Nawab in Tirunelveli and Madurai. With the fall of Thippu Sulthan in 1799 AD, the British concentrated their forces in the south and suppressed the Poligars. At this time, the Nawab of Carnatic became powerless and left the administration of the territory to the British. The Nawab was pensioned off and the administration of the revenue of Tirunelveli was made over to the British in 1801 under a treaty. Thus, the British rule which started during the second half of the 18th century lasted till 1947.

(iii) Administrative set-up

Thoothukkudi district lies in the southern part of the Indian subcontinent. For Revenue Administration, the district is divided into three revenue divisions as Thoothukudi, Tiruchendur and Kovilpatti. The details of administrative structure is given below:

Name of Taluk	Number of Towns	Name of CD Blocks	Total No. of Villages	Number of inhabited Villages
1	2	3	4	5
Ettayapuram	1	Pudur (Part)	52	51
Vilathikulam	2	Vilathikulam (Part)	59	57
Kovilpatti	5	Kovilpatti (Part)	37	37
		Kayatharu	59	58

Total	**26**		**436**	**426**

For the purpose of Election, this district is divided into 7 Legistrative Assembly constituencies and comes under 3 Parliamentary constituencies:

There are 8 Taluks and 436 Revenue villages. Out of this, 426 villages are inhabited and 10 villages are uninhabited villages in this district.

There are 2 Municipalities (Kovilpatti and Thoothukudi), 20 Town Panchayats and 4 Census Towns in this district.

As per 2001 census the population of Thoothukudi District was 1,572,273, consisting of 766,823 males and 805,450 females. The rural population of the district was 907,500 consisting 439,254 males and 468,246 females. The urban population of the district was 664,773 consisting 327,569 males and 337,204 females. The total area of the district is 462,100 hectares.

(iv) Physical Features

Location and Size

The district lies between 0.8^0 and 45"North Latitude and 78^0 11'East Longitude.

The district is bounded by Ramanathapuram and Kamarajar districts on North, Bay of Bengal on the East, Kanyakumari district on the South and Tirunelveli district on the West.

Tamirabarani river which has its origion in the Western ghats in Tirunelveli and Kanyakumari districts, traverses through this district and enters sea at Punnaikayal. The best irrigated lands are found on both sides of Tamirabarani river in Srivaikuntam and Tiruchendur Taluks. In the North and North Western parts of the district, the soil is black and best suited for cultivating cotton, pulses, cholam and cumbu. The eastern coastal area is sandy with palmyrah trees. In the coastal Taluks of Tiruchendur, Srivaikuntam, Sathankulam, there are sandy belts created by wind which look like hillocks and known as "Their". There are great inland pools close to "Their". The large ponds known as "Tharuvai" are found and are used for cultivation. The coastal line extends over 140 Kms, from Vembar in the north upto a point in Kuttam.

Thoothukkudi Port is the second major port in the State. Coast line is also famous for pearls and chunk fishing from early centuries. Up to Tiruchendur, the slope of the coast is low. The first prominent break is the sand stone cliff at the sea-shore in Tiruchendur. The coast line drops then to a shallow bend till it reaches Manapad. The coastal line takes an abrupt south-west turn near Kulasekarappattinam in Tiruchendur Taluk.

Physiography

Hills

The area comprising Thoothukudi is plain and is sloping towards the sea. The plain area is having some detached hills in the north and north-east. The land is black and this area is best suited for raising cotton, cholam and cumbu. The eastern part is sandy with palmyra palms. In the coastal of Tiruchendur and Srivaikuntam, there are sandy belts created by winds which look like hilloks known as "Theris".

A deer sanctuary is maintained in the hills of Vallanad. Except Vallanad and Kurumalai hills, there are no other hills or mountains.

Drainage

Tambraparani river which rises in Agasthiya Malai of the Western Ghats, flows through Srivaikuntam and Tiruchendur taluks and joins the sea at Punnakayal in Srivaikuntam taluk. Pambayar and Manimuthar are the chief tributaries of Tambaraparani which passes through the district. The Malattar and Uppodai flowing in Kovilpatti taluk are drainage courses.

Climate

The climate in the district is generally hot and dry. The maximum temperature ranges from 29.6^0 C to 40.5^0, C. The minimum temperature ranges from 18.4^0 C to 26.7^0 C. The months of April and May are the hottest months. The coastal areas, due to proximity to the sea, enjoy cool breeze. The lowest temperature is recorded in the months of December and January. From the beginning of February, the temperatures starts rising up and continues to rise in the months of March, April and May. Towards the middle of June, the South-West monsoon sets in. Wind travels west to east with light showers. By July-August winds with greater velocity and carrying sand start blowing and cause damage in the red sand soil tracks. With the onset of the north-east monsoon by October-November the temperature takes a downward trend and the region experiences a fair climate accompanied by showers. The average rainfall of this district is 693.4 mm.

The average rainfall for five years in the district is given below. (in mm)

Forest

The total extent of forest in the district is 11,012 hectares which works out to 2.47 percent of the total geographical area of the district.

The forest products in the district during 1999 - 2000 include:

1. Timber - 69.857 Cu.m.
2. Fuel wood - 13.273 M.T
3. Cashew - 5.24 M.T.

Minerals and Mining

There are vast mineral resources in this district. Alkaline and saline are found. Acidic soil is found (1.15%) in Thoothukkudi, Srivaikuntam and Alwarthirunagari blocks. Alkaline soil is found predominantly in Udangudi and Tiruchendur blocks. Saline soil is found in Tiruchendur, Kovilpatti and Ottapidaram blocks.

Sand available in Kuthiraimozhi, a village in Tiruchendur taluk, contains rich resource of Uranium and Titanium which are main ingredient for Atomic Energy. The coastal sand of Tiruchendur and Sattankulam contains the Granite, Silicon Illuminate and Monosite which are used for Atomic Energy.

Soil

The district has fertile soil in scattered areas. In the north and north-west, black soil which is very much suited for raising cotton is found i.e. in parts of Kovilpatti, Vilathikulam and Srivaikuntam Taluk. In the coastal areas of Tiruchendur and Sathankulam, sandy soil is found. Black-loam, red sandy and alluvial soils are found in this district. Kovilpatti, Vilathikulam and Ottapidaram Taluks have black-loamy soil. Red-sandy soil is found in Sathankulam and parts of Tiruchendur and Thoothukkudi Taluks. In Srivaikuntam and parts of Tiruchendur Taluks, alluvial soil is available.

Agriculture

Paddy is mainly cultivated in Srivaikundam, Sattankulam and Tiruchendur taluks. Cumbu, cholam, kuthiraivali and other pulses are raised in the dry tracts of Kovilpatti, Vilathikulam and Ottapidaram taluks. Cotton is being cultivated mainly in Kovilpatti and Ottapidaram taluks. Groundnut cultivation is mainly

undertaken in Kovilpatti, Tiruchendur and Sattankulam taluks. Groundnut cake is being used as manure and cattle feed.

Palmyrah trees are grown mostly in Tiruchendur, Srivaikundam, Sattankulam and Vilathikulam taluks. Jaggery is produced from Palmyrah joice and the production of jaggery is the main occupation at Tiruchendur and Sattankulam taluks next to agriculture. Banana and other vegetables are raised in Srivaikundam and Tiruchendur taluks.

Sericulture

The total area under mulberry cultivation as on 1.4.2000 was 14.04 hectares. The total production of reeling cocoons was 0.027 MTs, valued at Rs. 2.70 lakhs. The production of raw silk in the same year was 0.003 MTs, valued at Rs.3.41 lakhs.

Irrigation

There are no big reservoirs in this district. In Ottapidaram Taluk there is one small reservoir at Eppodumvendran village. However Papanasam and Manimuthar Dams which are located in the Tirunelveli district under Tamiraparani system are the main sources of irrigation. In the river Tamiraparani there are 4 channels viz., Maruthur Melakkal, Maruthur Keelakkal from Manimuthar Anaicut, North main canal and South main canal from Srivaikuntam Anaicut. Water is released through Manimuthar Canal whenever the water level in the dam exceeds 80 feet. There are 161 major irrigation tanks and 521 minor irrigation tanks. The total extent of wet lands is 27,016 hectares and extent of dry land is 3,38,168 hectares. Besides Tamirabarani river, there is a river named as "Vaipar" in Vilathikulam Taluk and a river named as "Karumeni" which traverses through Sathankulam and Tiruchendur Taluks.

One channel named as "Kadamba By-pass channel" is being excavated from Kalvoy village of Srivaikuntam Taluk to Puthantharavai village of Sathankulam Taluk which traverses through 14 villages. The total length of channel is 17 mile. This scheme is being implemented with the aid of World Bank.

Major sources of water supply for irrigation in this District are as follows:

Fisheries

Marine fishing, Pearl and Chunk fishing were famous in this district from the time immemorial. is the main centre for deep sea fishing in the district which has a lengthy coast-line of about 140 Km. Prawn culture was very flourishing in this district and earning considerable amount of forign exchange. Now the prawn culture has been banned by the Supreme Court of India due to pollution issues. The other varieties of fishes are caught and most of the quantity of the fish are exported to all parts of the country. Dry-fish produced here is very famous all over the country. Some kind of fishes are caught, powdered and backed and it is called as MASI. The MASI is even exported to all parts of the country as well as foreign countries particularly to Sri Lanka and other Indian Ocean countries. The fish-cake produced here are used for food for prawns and other fishes. There are 11 marine fishing villages.

There are one Joint Director of Fisheries and Assistant Directors of Fisheries in charge of Pearl-chunk fishing, Fishermen Training Institute and for technical guidance. There is fish-seed farm at Kadamba. Service centre /Base workshop of this district is situated at . Fish is produced and supplied to the poor at cheaper rates. There is a fish curing centre at Punnakayal. There are 450 mechanised boats, 1,300 vallams and 900 kattamarans in this district. About 5,428 Fishermen families are directly engaged in fishing in these vessels. The Tamil Nadu Fish Development Corporation has proposed to set up an Aquaculture centre at Tharuvaikulam of Ottapidaram taluk. There is a Fisheries College also. The estimated Inland fish catch is 1,650 MT and Marine fish catch was 48,140 MT in the year 1999.

Mechanised	29,913
Non-Mechanised	4,605
Motor used	13,622

The exported quantity of fish and fish products in 1999 was 27,252 ton and the value was Rs.Seventy one lakhs. Guiding lights (small light houses) for marine fishing are available in six coastal villages. Fish being a perishablecommodity, marketing of fish very much depends upon the availability of cold storage facility and 24 ton ice-plant and cold storage facilities are available in the district. At the training centre

42 persons were trained in 1999. Marine Research Centres of state and central governments are also located. Under free housing scheme for fishermen, 465 houses were constructed during the year 1999-2000. Covering 18 villages in the region, there are 40 fishermen co-operative societies catering to the needs of fishermen byway of obtaining loans from Government and distributing the same to its members for the purchase of fishing materials.

Industries

The district constitutes 70 % of the total salt production of the state and meets 30 % of salt requirement of our country. There are two Industrial Estates one at Kovilpatti with 11 units and the other at with 20 units. The former is managed by SIDCO and the latter by SIPCOT. Small Scale industries such as match industries, food-based and metal-based industries are generally concentrated in Kovilpatti and taluks. In Puthiamputhur village of Ottapidaram taluk and in Kovilpatti, the production of Readymade dresses are very much flourishing in recent times and the readymade dresses produced here are exported to Northern India and it earns a reputed name.

The main varieties involved in the khadi and village industries are the cotton and woolen. The value of total production is Rs. 40 lakhs. There are 4,618 families are engaged in Handlooms and 32 families are engaged in Powerlooms in this district.

Trade And Commerce

The people of this district are very much interested in Trade and Commerce and involved on a large scale. Even before independence, the starting of a Swadeshi Steam Ship company by Shri V.O. Chidambaram Pillai would show their anxiety and enthusiasm in maritime trade. Early Tamil history in Sangam age reveals that pearls and chunks available in coastal parts this district were exported abroad particularly to the Greek countries from the Tamil literature Devaram, Seevaga Chinthamani and Periapuranam mentioned about the Pearls. Korkai of Sivaikundam taluk was one of the ancient important pearl fisheri centres and port of the Pandya kingdom. At Korkai port Arabic horses were imported by the Pandya kings in lieu of exporting the pearls.

At present, chillies, groundnuts, cotton and safety matches from the district are transported to other parts of the state for marketing. The eastern coastal belt around provides a good market for the export of salt and fish. The export of fish and by-products of fish is earning good foreign exchange. , Kovilpatti, Eral and Udangudi are the main business centres of the district. The palm-jaggery, palm-leaf products and fish are also exported to foreign countries. M/s. SPIC is manufacturing fertilizers which are marketed all over the state and other states as well. M/s. Sterlite Copper Industries Ltd., is manufacturing copper and other by-products and exporting to foreign countries. TAC and

DCW industries are manufacturing chemicals for industrial purpose.

There are 26 banks with their branches all over the district including 16 Nationalised banks and 377 co-operative societies including 159 Primary Agricultural Credit Societies, 60 Employees Co-operative societies and 32 Weavers co-operative societies are functioning in this district.

The total deposit amount of the above banks in 1999 is Rs. 828 crores. There are 4 LIC branches in this district and 1,80,294 policies were issued in 1999. The General Insurance company has two branches.

Electricity and Power

The Thermal Power Station is the biggest power station in Tamil Nadu under the control of Tamil Nadu Electricity Board with three units of 2 ton M.W. each generating 50 million units of energy daily. The first unit was commissioned in July, 1979, the second unit in December, 1980 and the third unit in March, 1982. This power station is feeding about 1/3 of the total power demand of Tamil Nadu.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel / hotel building was treated as one census house. but if such built at different times and owned by different persons.

In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably; the entire hostel/hotel building was treated as one census house., but if such hostels/ hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the

Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household.Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. In September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or

a combination of both (agricultural labourers) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person, who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry, is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex Ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those

carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. :

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1,000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1,000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum^{45-49} ASFR_{15-19}}{1,000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum^{45-49} ASMFR_{15-19}}{1,000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1,000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1{,}00{,}000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

Migration, Internal and International migration, Impact of migration.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly

a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence. By capturing the last of the migrations in cases where persons have migrated more than once, this concept would give a better picture of current migration scenarios.

Internal And International Migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (interdistrict migration) (ii) Migration from one state to another state of the country interstate migration (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Impact of Migration

As in 1991 and 2001 Census, like previous Censuses, had collected migration details for each individual by place of birth and last residence. Data on last residence along with details like duration of stay in the current residence and reason for migration provides useful insights for studying migration dynamics of population.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA / Town is based on the population. UAs / Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./ Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are :

M7 (5,000,000 and above);

M6 (2,000,000 to 4,999,999);

M5 (1,000,000-1,999,999);

M4 (500,000-999,999);

M3 (300,000-499,999);

M2 (200,000-299,999); and

M1 (100,000-199,999).

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as:

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) CENSUS 2001 FINDINGS

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census is the midnight of 28th February, 2001 i.e., the Census provides a snapshot of the population of the country, as it existed at the midnight of 28th February, 2001. Actual enumeration was spread over a period of 20 days from 9th to 28th February, 2001 followed by revisional round up to 5th March, 2001 for up dating of the population figures with reference to the mid night of 28th February, 2001. Household Schedule was canvassed by the enumerator and with a view to ensuring uniformity in approach in understanding the various concepts and in proper eliciting and recording of the information, the enumerators and supervisors were imparted both theoretical as well as practical training intensively in 3 rounds.

As a prelude to the actual census the urban and rural areas were identified and listed out in respect of each administrative unit. The Directorate of Census Operations had prepared the list of urban areas and simultaneously, a list of villages. These lists formed the basic frame for the organization of the Census Operations. Thereafter, geographical areas that could be conveniently covered by each enumerator were carefully carved out to constitute the enumerator's block (EBs).

The second major step was the house listing operation, which was carried out in this Union Territory during April, 2000. Thereafter, in order to adhere to the prescribed workload norms the actual Census enumerator's blocks were carefully, demarcated on the basis of the house list population and the layout sketches and notional maps prepared for the house listing operation. House listing operation was also utilized to collect wealth of information on items such as predominant material used for construction of houses, amenities available to the census households, number of living rooms etc.

DISTRIBUTION OF POPULATION IN RURAL AND URBAN AREAS

In 2001, the total population of Thoothukkudi District was 1,572,273, the rural population with 907,500 and the urban population with 664,773. In 1991 the total population of the district was recorded as 1,455,920; the rural population as 856,229 and the urban population 599,651.

The table below shows the taluk level distribution of population total, rural and urban areas of Thoothukkudi District. The Thoothukkudi taluk has come out with the highest population of 405,363 and the lowest population recorded in the Ettayapuram taluk with 73,991. Among the rural population Srivaikuntam taluk tops with (147,160) followed by Tiruchendur (141,133) and Koilpatti (135122). Ettayapuram taluk has recorded the lowest rural population of 61,197 comparing the population of urban areas in Thoothukkudi taluk which tops with 293,995 followed by Tiruchendur taluk (150,295), and Koilpatti (127,127).

When comparing with the 1991 urban population of the district, the percentage of population has been increased sharply due to the new urban formula adopted in Tamil Nadu. Most of the Town Panchayats which was defined as rural areas in Census 1991, has been declared as new towns in Census 2001. The urban area of Kovilpatti taluk was increased from 38.90% in 1991 to 48.5% in 2001, Vilathikulam from 6.49% to 16%, Thoothukkudi from 85.28% to 72.5 %, Srivaikuntam from 22.69% to 23.3%, Tiruchendur from 49.57% to 51.6% and Sathankulam decreased from 19.84% to 14.7%. In total, the district urban population was also increased from 41.9% to 42.3%.

SIZE, CLASS AND STATUS OF TOWNS:

Out of 26 urban areas in Thoothukudi district, there are 22 Statutory Towns (2 Municipalities and 20 Town Panchayats) and 4 Non-Statutory Towns. Among the Statutory Towns, one Municipality fall under Class I and another one Municipality falls under Class II. Out of 20 Towns Panchayats, 3 TPs and 2 CTs falls under Class III, 8 TPs and 2 CTs fall under Class IV, 7 TPs fall under Class V and 2 TPs fall under Class VI.

DECADAL GROWTH OF POPULATION

The percentage of decadal variation of the total population during 1991 – 2001 in the district has been recorded as 8.0% and 10.9 % growth was recorded in urban areas and 5.99 % was recorded in rural areas.

TABLE- D : DECADAL CHANGE IN DISTRIBUTION OF POPULATION

Serial Number	Name of the District	Population						Percentage of decadal Variation 1991 - 2001			Percentage Urban

DENSITY OF POPULATION AND SEX RATIO

The density of population in Thoothukkudi district was 340, less than the State average of 480. The Sex ratio (i.e. females per 1000 males) of the district was 1050, higher than the State level of 987.

TABLE E : DENSITY OF POPULATION/SEX

Name of State/District	Density of Population	Sex Ratio
Tamil Nadu	480	987
Thoothukkudi	340	1050

LITERACY

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write is not literate. It is not necessary that a person who is literate should have received any formula education or should have passed any minimum educational standard. Like 1991 Census all children of age 6 years or less are treated as illiterates although they may be going to school and can read and write a few add words. The ratio of literates and population excluding the age group of 0-6. The literacy of the district was 81.5%. The male literacy stood at 88.3% as compared to 75.1 percent for females.

TABLE F : LITERACY

Name of the State/District	Literates		
	Persons	Males	Females
Tamil Nadu	73.5	82.4	64.4
Thoothukkudi	81.5	88.3	75.1

ECONOMIC ACTIVITY

It can be seen from the above table that the main workers forms more than half of the population of the district followed by the Non-Workers(56.8%). The marginal workers were 5.7%. The 2001 Census recorded 43.2% as the total workers.

TABLE G: ECONOMIC ACTIVITY

Name of the District	Persons/ Males/ Females	Percentage of		
		Main Workers	Marginal Workers	Non workers
Thoothukkudi	Persons	37.4	5.7	56.8
	Males	51.6	4.7	43.7
	Females	23.9	6.8	69.3

The above table shows that the proportion of the total workers, main workers and marginal workers were lower among males and the proportion of non-workers were higher among females. The proportion of main workers were higher in respect of males than females. Whereas the proportion of marginal workers and non-workers were more among females than males.

WORK PARTICIPATION RATE

The work participation rate for total workers is defined as the percentage of total workers to total population.

TABLE - H : WORK PARTICIPATION RATE

Name of the District	Total/Rural/Urban	Work Participation Rate
Thoothukudi	Total	43.2
	Rural	47.6
	Urban	55.5

The work participation rate of the district was 43.2; 47.6% in rural areas and 55.5% in urban areas.

SCHEDULED CASTES AND SCHEDULED TRIBES

The following table reveals that Scheduled Castes population in Thoothukkudi District was 18.4 percent and Scheduled Tribes population was 0.2 percent in 2001.

TABLE I: SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION

Name of the District	Total/ Rural/ Urban	Total Population	Total Scheduled Castes Population (percentage)		Total Schedulaed Tribes Population (percentage)	
Thoothukudi	Total	1,572,273	288,954	(18.4)	3,494	(0.2)
	Rural	907,500	216,801	(23.9)	1,060	(0.1)
	Urban	664,773	72,153	(10.8)	2,434	(0.4)

It also gives the Scheduled Caste and Scheduled Tribes population in rural and urban areas of the district by actual and percentage.

RELIGION

In India, many religions have thrived prosperously and every census have attempted to provide an interesting picture on the act of religious persuations and beliefs of the people of the country. The following table shows the different religions communities with population in rural and urban areas of Thoothukkudi district during 2001.

TABLE J : DISTRIBUTION OF POPULATION BY RELIGION

Religion	Total	Rural	Urban

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

This table provides the distribution of inhabited villages according to different population ranges and ammenities available. The amenity of drinking water and power supply are availed by almost all villages. It is formed from the data presented above that the different amenities extended fully to the villages which have returned higher population.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

(x) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district.

The following are the important places of tourism having historical importance.

Thoothukudi

Thoothukudi is the district headquarters. Major industries such as SPIC, Chemical Industries, Heavy Water Plant and Thermal Plant are located here. It is also called **"Pearl City"** in view of the pearl fishing being conducted periodically, The city is also famous for production of salt.

Here is one Sivan Temple called as Sri Sankara Rameswarar Temple and Sri Vaikundapathy Temple built by the Pandya King, Sankara Pandyan.

One famous Church named as "panimaya matha" (Lady Snow). It was built by Portugese in 1714.

Tiruchendur

This is one of the six sacred abodes of **(Arupadai Veedu)** Lord Muruga situated on sea-shore. The temple was constructed in th 17th century. The height of the temple gopuram (tower) is 157 ft. The temple is noted for its architectural and sculptural beauty. The important temple festival like **"Soora Samharam"** and **"Vishakam"** etc., attract lakhs of pilgrims from various parts of the State.

Manapad

This is also located on the sea-shore at Bay of Bengal about 18 Km. from Tiruchendur. An ancient Roman Catholic Church is here where the Cross is said to have been brought from Jerusalem. This Church is also associated with St. Xavier, the famous missionary from West. Since there are other small temples here this place is called as "Cinna Jerusalem" (Small Jerusalem).

Kalugumalai

This place is famous for the Jain cave temple and Jain architecture. There is also a Murugan Temple called Kalugasalamoorthy Kovil which belongs to the 18th century.

Nava Thiruppathi

There are nine Vaishnavite temples in and around Srivaikuntam Town situated within a radius of about 30 Km. Nine temples called a **"Nava Thiruppathi"** are as follows.

1. Srivaikuntam
2. Varagunamangai
3. Thirupauliangudi
4. Perungulam
5. Mangalakurichi
6. Errattai Thiruppathi
7. Thenthiruperai
8. ThirukkTalur
9. Alwarthirunagari.

There places are also important from architectural point of view.

Korkai

This is an ancient Port Town which is mentioned in the ancient Tamil literature. This was once the capital of Pandiya Kingdom. Pearls were exported to Greece and other countries in the Sangam Age, from this Port. Now it is a small village. The sea has receded to the village Punnaikkayal which may become a port in future. A museum set up by Tamil

Nadu Archaeological Department is situated here and the collection of ancient monuments are placed for public exhibition.

Athichanallur

In Archaeological point of view, this place has a glorious past and it is located on the bank of the river Tamirabarani. It is assumed that, in ancient times, a civilised habitation was well flourished here. Some monuments i.e., Urns (bourat–clay vessels which were used for burying the dead bodies of the very old people), small mud vessels were found near the river Tamirabarani and they are supported evidences for the civilisation. This place is now under the supervision of Tamil Nadu Archaelogical Department.

(xi) Major Characteristics of the District, contribution of the district in the form of any historical figure associated with the district.

Ottapidaram

This is the birth place of the famous freedom fighter Sri. V.O. Chidambaram Pillai.

Ettayapuram

This is the birth place of Mahakavi Subramaniya Bharathiyar who wrote a number of patriotic songs which kindled patriotism in the minds of many and in turn influenced them to join freedom struggle. His house was converted into **"Bharathiyar Memorial"** by the Government of Tamil Nadu. The palace of the Ettayapuram Poligar is also here. A Polytechnic exclusively for women was also started here by the Government of Tamil Nadu during Bharathiyar's Birth centenary.

Panchalankurichi

This is the capital of the Poligars and Veera Pandiya Kattabomman who raised the banner of revolt against the British. There is a temple for Veera Jakkammal which is the family diety of Veera Pandiya Kattabomman. The temple festival in the month of May is celebrated as a Government festival. In 1974, a fort was constructed in memory of Veera Pandiya Kattabomman.

The original name of the place is Maniyachi which has been renamed as "Vanchi Maniyachi" in memory of the brave freedom fighter Vanchi Nathan who shot dead by the then British Collector of Tirunelveli.

(xii) Scope of Village and Town Directory

Village Directory

The "Village Directory" is one of the traditional compilations of the Census. PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation**.** The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Schedules for both the phases were scanned through high speed scanners in fifteen data centres across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data

for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalisation of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes population were finalised at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis of literacy data.

The data in the Primary Census Abstracts are presented at different levels, The District Primary Census Abstract is presented at District/ CD block/ UA/City/Town, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented at District/CD block/ Town, Village Primary Census Abstract is presented villagewise for each CD block and Urban Primary Census Abstract at Town/Ward***** level. The Primary Census Abstract data for each of these characteristics is presented by sex and rural-urban residence.

The District Primary Census Abstract has been presented in 59 columns, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes has been presented in 52 columns, Village Primary Census Abstract and Urban Primary Census Abstract has been presented in 58 columns. The information on each village under a C D block are presented in the Village Primary Census Abstract and each of the wards under a town has been provided in the Urban Primary Census Abstract exist in the district. The Data was presented for villages C D block-wise for the first time in 1991 Census. This practice is continued in 2001 Census also.

The concepts and definitions used in the column heading are already explained under the sub heading 'Census concepts' in the Analytical note. The Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts is as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahasils, P.Ss and by the local bodies in respect of towns are given in sq.kms. The area figures of the villages supplied by the Tahasildars in acres have been converted and shown in hectares. The area figures of the CD block is the total of the village areas coming under each CD block. The area figures for the district supplied by the Surveyor General of India have been adopted to maintain uniformity at the national level. The total area figures of all the Taluks/CD blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of P.S./Taluk. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on total population, Scheduled Castes population and Scheduled Tribes population for each town.

FERTILITY AND MORTALITY MEASURES

FERTILITY LEVELS

In demography, the word fertility is used in relation to the actual production of children or "occurrence of births specially live birth. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age".

In other words, it is a major component of population growth. In 1991 Census, questions of fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. Census 2001 data is not readily available.

The above table presents the female age at marriage relates to all women who are living with their husbands. Some of them might be recently married and some of them decades ago. In view of this, the figures mentioned in the table should be regarded as indicating the situation for the population as a whole.

It is also observed from the above table that the mean age at marriage of currently married females in Thoothukudi District was 20.12 years in 1991, slightly higher than the corresponding state level of 19.12 years. In rural areas also, same trend was observed in the district when compared to those of the corresponding state level in the above table. The mean age at marriage of the currently married females has increased by about 0.50 years from 20.18 years who married during 1981 - 86 to 20.6 years who married during 1986 - 91 in the district as is evident from the above table.

Presently the statutory minimum age at marriage for females was 18 years. It is worth examining the proportion of the currently married females whose age at marriage was below this limit during the periods 1981 - 86 and 1986 - 91 and afterwards.

CHILD MORTALITY LEVELS

The estimates presented below have been obtained using the data on the number of children ever born and number of children surviving to ever married women. Information on questions on children ever born and children surviving canvassed for all ever married women have been tabulated by age of the mother. From this, estimates of child mortality (qi) have been worked out using Brass technique, where q (i) is the probability of a newborn child dying before age (i) = 1, 2, 3 and 5.

ESTIMATES OF CHILD MORTALITY INDICATORS BY SEX

State / District		Tamil Nadu		Thoothukudi

It is observed from the above table that the child mortality estimates in the district and the state has decreased in 1991 when compared to those in 1981.

ANNEXURE III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE

The measures of fertility worked out, based on the F - series tables of 1991 Census pertaining to Tamil Nadu and Thoothukkudi is as explained below:

ESTIMATES OF FERTILITY INDICATORS

Sl. No.	State / District	Year	CBR	TFR	TMFR	GFR	GMFR
1	Tamil Nadu	1981	32.0	3.9	5.5	123	169
		1991	26.4	3.1	4.8	99	136
2	Thoothukudi	1981	36.0	4.7	6.7	138	203
		1991	25.7	3.1	5.4	94	144

Source: Occasional paper No. 1 of 1997

The values of CBR, TFR, TMFR, GFR and GMFR are presented separately for Tamil Nadu and Thoothukkudi District in the above table. These values can be compared for 1981 and 1991 Censuses. The table shows that in the Thoothukudi District, all the above mentioned rates from 1981 to 1991 have declined. Similar trend was observed in Tamil Nadu State also. On comparing the district level data with the State level data in the above table, it was observed that all the above mentioned rates at the district level are almost higher than those at the State level.

Different fertility measures indicate that mostly all the fertility levels in the district were lower compared to the state average during 1991. This was duly supported by the higher age at marriage of females in the district, compared to the state as is evident from the following table.

IMPORTANT INDICES OF FERTILITY IN 1991

Fertility Indices	Thoothukudi			Tamil Nadu		
	Total	Rural	Urban	Total	Rural	Urban
Number of children ever born per ever married women in age group 45 - 49	4.1	4.1	4.1	3.4	3.4	3.6
Child - women ratio (0-4 years)	338	356	314	348	369	311
Child - women ratio (5-9 years)	479	482	474	447	462	418

One of the most useful indices that can be derived from the question on numbers of children born alive in the average number of children ever born alive per ever married women by age - group. Since most of the women complete their reproduction by the age - group 45 - 49, the average number of children ever born per ever married women in the age - group 45 - 49 is termed as an index of completed level of fertility. Ever married include widows, divorced and separated women. In the above table, average number of children born per ever married women in the age group 45 - 49 in 1991 has been presented for total, rural and urban areas for the Thoothukkudi District and Tamil Nadu state.

It is observed from the above table that the number of children ever born per ever married women in rural and urban areas of Thoothukudi District is almost same.

Child - women ratio, a relative measure, is calculated to know the fertility performance of women. It is seen from the above table that child - women ratio for both 0-4 years and 5-9 years in rural areas are higher than the urban areas of the Thoothukudi District and same trend in Tamil Nadu was also observed.

ANNEXURE IV

DISTRIBUTION OF POPULATION BY PLACE OF BIRTH / PLACE OF RESIDENCE

MIGRATION

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly, a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence.

INTERNAL AND INTERNATIONAL MIGRATION

The migrational movements are of three types; (i) Migration within the state itself with its components: (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (interdistrict migration), (ii) Migration from one state to another state of the country interstate migration and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

REASONS OF MIGRATION

As in 1991 Census, the reasons for migration were elicited in 2001 Census also. The reasons for migration were broadly categorized as (i) Employment / work, (ii) Business, (iii) Education, (iv) Marriage, (v) Moved after birth, (vi) Moved with household and (vii) Any other reason. Reasons for migration has been elicited only with reference to movement from place of last residence.

IMPACT OF MIGRATION

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

The above table explains the comparison between 1991 and 2001 census data on migrant population by place of birth. It reveals that 17.9 % (2001 census) migrants were born elsewhere in the district of enumeration but within the State. While 4.4 % were born in other districts of the State. There were migrants (0.2%) also from other areas beyond the State of enumeration. In 1991 census, the migrant population to the place of enumeration within the district were less compared to 2001.

The above table is presented to compare the migrant population based on the place of last residence between 1991and 2001 censuses in the district. Of the total population in the district, 23.8 % returned as migrants based on place of last residence which was 24.2 % in 1991 census. This shows that there was an increasing trend of migration in the district. Majority of the migrants (84.0 %) were from other places within the district of enumeration who lived there and moved to the place of enumeration. In 1991 census, this accounted for 68.2 % who lived elsewhere within the district.

ANNEXURE VI

MARITAL STATUS OF POPULATION IN THE DISTRICT

Marital status is defined as under:

Never Married : A person who has never been married at any time before

Married / Currently Married : A person whose marriage is subsisting with spouse living. It may be the first or subsequent marriage of either of the persons. Persons who are recognized by custom or society as married and persons in stable de facto union are also considered as married.

Widowed : A person whose spouse is dead and who has not been married again.

Divorced or Seperated :A person who has been separated from the spouse and is living apart with no apparent intention of living together again or who has been divorced either by decree of a law court or by accepted social religious custom but who has not been remarried.

SEX-WISE PERCENTAGE DISTRIBUTION OF MARITAL STATUS

Census Year	Sex	Never married	Married	Widowed	Divorced / Seperated	Unspecified
2001	M	51.4	46.3	2.1	0.2	0.0
	F	42.8	46.7	9.7	0.8	0.0
1991	M	54.8	43.1	2.0	0.2	0.0
	F	46.7	43.2	9.6	0.5	0.0

* Thoothukkudi District is bifurcated from Chidambaranar District after 1991 census

From the above table it is clear that never married among the males were more than that of females during 2001 census. Similar was case in 1991 census also, 51.4% males unmarried and 42.8% females unmarried. Contrary to this is the other status like married, widowed and divorced/separated where females are higher than the males.

ANNEXURE VII

AGE, SEX AND EDUCATION IN THE DISTRICT

LITERATE

A person aged 7 years and above who can both read and write with understanding in any language is to be taken as literate. A person, who can only read but cannot write, is not literate. The tables below gives the selected indications on literacy and education in 2001 and 1991 for Thoothukkudi District.

LITERACY RATES FOR AGE GROUP BY SEX

District	Census Year	Sex	Literacy rates for the age-group					
			7 years and above	10 years and above	15 years and above	10-14	15-59	60+
Thoothukudi	2001	M	88.4	88.5	87.2	97.4	89.4	73.1

		F	64.6	62.4	58.1	89.0	62.8	23.7

Note: 'Age not stated' is not included

The above table indicate the literacy rate of both males and females during 2001 and 1991 census. Comparatively literates among males are more than females. The variation is very high in the age group of 60 + i.e.,73.1% males and 39.9% females at 2001 census and 62.4% males and 23.7% females at 1991 census.

PERCENTAGE OF LITERACY LEVEL IN TOTAL LITERATES

7	Non Technical, Diploma and Certified not equal to degree	0.1	0.1
8	Technical Diploma or Certified not equal to degree	0.8	0.6
9	Graduate and above	3.9	3.9

* Thoothukkudi District is bifurcated from Chidambaranar District after 1991 census

Literacy level is picturised in the above table. In 2001 census, literates without any level were 13.3% whereas primary was 32.1%. But, during 1991 census, literate without any level was only 1.0%. Primary level tops the rank with 37.0%. In general, literacy rates among various level (as given in the table) was considerably high at 1991 census than that of 2001census.

DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL

Census Year	Sex	Percentage Literates who are				
		below primary	primary but below middle	middle level below matric	matric but below graduate	graduate and above
2001	M	29.3	31.2	16.9	18.2	4.4
	F	30.7	33.1	17.6	15.1	3.4
1991*	M	24.5	35.8	17.4	17.8	4.6
	F	28.4	38.5	16.5	13.4	3.2

Distribution of literates by educational level for 2001 and 1991 has been narrated in the above table. Female literates up to the level of metric was more than that of males but metric, graduate and above were higher among males than females as per 1991 census data.

ANNEXURE VIII

DISTRIBUTION OF DIFFERENT MOTHER TONGUES RETURNED IN THE DISTRICT

MOTHER TONGUE

The definition of mother tongue used in 2001 census is same as in 1991 Census. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf means the language usually spoken by the mother should be recorded".

As per the Census concept, each language is a group of mother tongues. The Census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. There are 18 languages included in the Eighth Schedule to the Constitution of India (Scheduled Languages).
