VELLORE FORT

The Vellore Fort was built during 13th Century which attracts large number of tourists. This Fort retains the past glory with its ramparts, basements, turrets, posts, sally gates and with perennial water supply. It is fortified by double walls and the main walls is made of massive granite blocks laid one over the other without using mortar. It was described as the strongest fortress in the Carnatic war in 17th century and witnessed the revolt of Indian soldiers during the mutiny of 1857.

The Fort houses a Hindu Temple, a Church and a Mosque. There are many buildings that are now used as Public Offices.

Annexures and their write-up

Annexure I : Number of villages under each Gram Panchayat 908

Annexure II : Fertility and mortality measures 946

Annexure III : Various measures of fertility and mean age at marriage 947

Annexure IV : Distribution of migrants by place of birth/place of last residence 948

Annexure V : Brief account of main religions in the district 950

Annexure VI : Marital status of population in the district 951

Annexure VII : Age, sex and educational level in the district 952

Annexure VIII : Distribution of different mother tongues returned in the district 953

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grossroots level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (VII) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities

available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. C. Chandramouli, Director of Census Operations, Tamil Nadu. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division. Dr. R.P.Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi,
17th October, 2006.

D.K. Sikri
Registrar General &
Census Commissioner, India

Preface

Publication of the District Census Handbooks (DCHBs) was initiated after the 1951 census and is continuing since then with innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the census organization on behalf of each State Government/Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts.

The District Census Handbook has two segments: Part A and Part B. Part A primarily deals with village and Town Directory and Part B contains Primary Census Abstract of each village and town of the District. The 1991 Census data presentation both in Part A and Part B of this book was the transition from traditional presentation at Taluk level to CD Block level and this pattern continued in 2001 census as well.

For the first time in 2001 census, the District Census Handbooks are being made available in electronic format.

The District Census Handbook is the joint collaboration of the Census Directorate and the Government of Tamil Nadu. On behalf of the Government of Tamil Nadu, this Directorate has prepared the manuscript of this book.

The District Census Handbooks of 2001 have some additional information which is based on the 2001 census as compared to the previous censuses like capturing of information on participation of women in economic activities, netting all the children in age-group 0-14 as also elderly people of age 60 years and above. The data about the number of handicapped persons including partial disability has also been collected in 2001 census for the whole of India. The most important methodological innovation introduced in 2001 census relate to carving out separate slum enumeration blocks.

The data being presented in this publication have been collected and compiled by Shri M.R.V. Krishna Rao, Deputy Director of Census Operations, Tamil Nadu with the assistance of S/Shri S.K. Srivastav, N. Sukumar Nandagopal and A. Achchhu Ali, Assistant Directors. For the preparation of manuscript of this book, I received wholehearted co-operation from all the Heads of Departments, Heads of offices of the District / Taluk / Corporation / Municipal / Town and Rural Administration and a number of dedicated and experienced Census staff of this office. I am grateful to all of them for their valuable contribution in the accomplishment of this task of national importance. I must place on record the co-operation extended to me by the press media and electronic media to make the census taking a great success in the state.

I am deeply grateful to Shri J.K. Banthia, IAS the Registrar General and Census Commissioner, India, New Delhi for the valuable guidance and advice at every step till the finalisation of this handbook. I also express my thanks to Dr I.C. Agrawal, Assistant Registrar General (Social Studies Division) and Shri S.L. Jain, Deputy Director, ORGI, New Delhi for preparing the set of instructions for the compilation of the village and Town Directory and other inset tables etc. being inserted in this District Census Handbook.

In particular, it has to be mentioned that the write up portion was taken up by Shri M.R.V.Krishna Rao, Deputy Director and finalised by Dr. D.Venkatesan, Deputy Director with the assistance of other members of the staff whose names have been mentioned in the "Acknowledgements".

Dr. C. Chandramouli, IAS

District Highlights - 2001 Census

1. Vellore District is 3rd highest district in terms of population size in the State.

2 The district has recorded the population density of 572 persons/Sq. km.

3 The district share urban population of 11.4% in the total population.

4 Total population decadal growth between 1991 and 2001 was 9.3%.

5 This district sex ratio was 997, higher then the State sex ratio of 987.

6 The district has recorded literacy rate of 72.36%.

7 Arakonam taluk has the highest number of inhabited villages (135) while Wallajah taluk has the least number (72) of such villages.

8 Pachchal village (L.C. No. 00256700) in Tirupathur taluk has the highest population of 15,288 and Sembakkam Village (L.C. No. 00224300) in Arcot taluk has recorded the leastpopulation of 13 in the district.

9 Ambur Reserve Forest Village (L.C. No. 00244400) in Vaniyambadi Taluk is the largest village with an area of 10651.0 hectares and Ambur Village (L.C. No. 00236200) in Vellore taluk and Ambur Plantation Reserve Forest village (L.C. No. 00244100) in Vaniyambadi taluk are the two smallest villages with an area of 47 hectares each.

10 Improved drinking water supply has been extended to 98.3% habitations and electricity available to 98.9% villages in the district.

11 Manufacturing other than Household Industry is the most important non-agricultural activity in the district.

12 The chief basic metal and alloyed small-scale industries and seed beds of large scale industries are established in this district.

Summary Statements

Summary Statements

Statement 1 : Name of the headquarters of District/Taluks, their rural-urban status and distance from District headquarters, 2001.

Statement 2 : Name of the headquarters of District/C D block, their rural-urban status and distance from District headquarters, 2001.

Statement 3 : Population of the District at each census from 1901 to 2001.

Statement 4 : Area, number of villages/towns and population in District and Taluks, 2001.

Statement 5 : C D block wise number of villages and rural population, 2001.

Statement 6 : Population of urban agglomerations (including constituent units/ towns), 2001.

Statement 7 : Villages with population of 5,000 and above at C D block level as per 2001 census and amenities available.

Statement 8 : Statutory Towns with population less than 5,000 as per 2001 Census and amenities available.

Statement 9 : Houseless and institutional population of Taluks, rural and urban, 2001.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The compilation of District Census Handbook is an innovation of the 1951 Census. District is considered as the most important unit for presentation of Census data. Census Statistics are also compiled for individual villages and towns, as they constitute the basic units of human habitation. Besides this, some other useful information pertaining to the land and the people has also been included in it to make it a self-contained book of reference for the District. It was, however, not altogether a new idea, since census data for smaller units were published in earlier censuses also in one form or the other. For the first time in 1891 District wise list of villages were published giving the population of each village. At the 1911 Census, data of villages were published in the form of village directory. Such village directories were again compiled in the shape of District Census Statistics at the 1921 Census. Finally, District Census Handbooks emerged as regular decennial publication since 1951 Census. The demand for the basic data for the smallest administrative unit was greatly felt in the post-independence era. The ushering in an era of planning and development in the wake of launching of Five-year plans after attaining independence, urgent need for detailed data at village level was felt. Thus, when the proposal to bring out District Census Handbook was put before the State Government, they readily agreed for the compilation and printing of District Census Handbooks through their respective Directors of Census Operations, under the authority of local government concerned. The general appreciation and utility of this handbook encouraged the Census Organisation to increase the scope of publication.

The tradition thus built up has been continued in the present series of District Census Handbooks. In the 1971 Census, it had been decided to bring out these hand books in three parts viz; Parts A, B and C. In respect of Tamil Nadu, Parts A and B of this publication had been printed in one volume and part C as a separate volume. During 1981 Census, it had been decided to print it in two parts viz. Parts A and B separately. Part A of this handbook consists of village and Town Directory and part B gives data on Primary Census Abstract (PCA). In 1991 Census also, the same pattern was adopted publishing Parts A and B in a single /double volumes as per the requirement and determining the size of the publication. However, in this census some of the non-census data included are information on girl schools, social forestry areas etc. whereas items like staple food and information on newspapers etc. have been omitted.

The present District Census Handbook is being brought out in two volumes which contain village and town directory as also the Primary Census Abstract and it should certainly quench the thirst of the planners involved in micro level planning. Similarly, additional data revealing civic and other amenities in Class I town has been presented especially in respect of slum dewellers. Scholars and planners alike should benefit from the data on amenities.

(ii) Brief History of the District

North Arcot District comprised the present Vellore District, was formed on 02.08.1801. The erstwhile North Arcot District was bifurcated during 1989 and named as North Arcot Ambedkar and Tiruvannamalai Sambuvarayar Districts from 01.10.1989. The former was renamed as Vellore district as per G O Ms.No.618, dated 01.07.1997.

Dr. Sarvapalli Radhakrishnan, the great philosopher and former President of India. Sir C.P. Ramaswamy Iyer a well known administrator, Dr. A.L. Mudaliar, the Vice-Chancellor of Madras University were hailed from this district. Dr. Ramasami Mudaliar, a great Trade Unionist, was also born in this district. This district is socially, educationally and economically being developed under various plan schemes introduced by Tamil Nadu Government.

Vellore became an important provincial centre of Vijayanagara empire with a strong fort and Nayakas to rule the region from here. Of this family important ruler was Chinna Bomma Nayaka, who patronised

the Javarakandesvara (Jalakandeswara) temple. His son Lingama Nayaka unsuccessfully rebelled against the Vijayanagara ruler Venkata II (A.D. 1586-1614) in A.D. 1604 when the power of Vijayanagara was waning.

Venkata II shifted his residence from Chandragiri to Vellore for sometime. In his court were present few jusuit priests, who were allowed to build a Church within the fort. Vellore remained the seat of later Vijayanagara rulers in their precarious existence till A.D. 1681.

However, the fort was captured by Mir Jumla in A.D. 1646 from the Vijayanagara rulers. It changed hands to Sivaji in A.D. 1677 after a protracted seige. The fort remained with the Marattas till the Mohuls captured it in A.D. 1708.

In the early decades of the 18th century Vellore was under Mutaza Ali, a relative of the Nawab of Arcot. It was converted into a British garrison by A.D. 1760 during the intense conflict between the British and Hyder Ali for Carnatic regime. Hyder Ali seiged the fort in A.D. 1780 and the British had to struggle hard to lift the seige. Vellore was the base of Lord Cornwallis in his campaign against Tippu Sultan. It was here the family of Tippu was kept under the arrest after his fall. In A.D. 1806, the Sepoys of Vellore rose heroically in mutiny against the British army officers which was promptly quelled. Since then Vellore remained as an administrative headquarters.

(iii) Administrative Setup

The district was comprised Arakkonam, Walajapet, Arcot, Vellore, Gudiyatham, Vaniyambadi and Thirupathur Taluks during bifurcation. It was administered from the existing District headquarters at Vellore. Further, Katpadi Taluk was newly formed and functioning from September, 1998, as per G.O.Ms.No.697, (Revenue), dated 21.8.1998.

The following table gives the Revenue Divisions, Taluks and Panchayat Unions in Vellore District.

Name of Taluk	No.of Towns	Name of CD Blocks	Total No. of Villages	No. of Inhabited villages

(iv) Physical features

Hills

The Javadu Hills represent the important mountain range in this district and they are loftiest mountains in the district. The Javadu Hills is surrounded by Tirupathur and Vaniyambadi taluks on the west, by Chengam taluk on the north-east, Polur taluk on the east and north by Vellore taluk. The general height of the Javadu Hills is 2,500 feet with peaks raising upto 4,200 ft. The Elagiri hills lie in the north-eastern part of Thirupathur taluk. Besides, the above, there are many hills of lower elevation which lie scattered in Vellore, Vaniyambadi, Gudiyattam, Arcot and Walajapet taluks. The mountain surrounding Vellore, Ranipet, Arcot and Arakonam taluks are rocky in nature.

Drainage

The district has the following important rivers: Palar, Ponnai, Pambar, Malattar, Kavundinyanadi and Goddar. Barring a few days in the rainy season these rivers are mostly dry and sand wastes. Palar is the most important river of the district. Rising near Nandidurg in Karnataka, Palar enters the district in the western part through Vaniyambadi taluk. It flows then on east direction in the taluk and joined by some jungle streams like Malattar flowing in Gudiyatham taluk. The river forms the boundary between Vaniyambadi, Gudiyatham and Vellore taluks. After cutting across Walajapet taluk it runs along the boundary between Wallajah and Arcot taluks as also Arakonam taluk before entering Cheyyar taluk in Tiruvannamalai District on the east. Ponnai river which is tributory of Palar river rises in Chittoor district of Andhra Pradesh, it flows on the western part of Walajapet taluk and joins Palar near Ranipet. The Goddar river and Kavundinya nadi which flow from north to south in Gudiyatham.

Climate

The climate of the district can be generally termed as “moderate”. The taluks lying in the eastern region with little or no forest area and mountains, experience a comparatively more equable climate than the remaining areas. The taluks falling in this group are Arakkonam, parts of Wallajah and Arcot. Vellore, Wallajah and Gudiyatham taluks which are interspersed by hills and mountains, exposed to different climate conditions – very hot during the summer months and slightly cold during the winter seasons. In Tirupathur and Vaniyambadi taluks, climate is rather slightly cold during winter, but moderate in other seasons. The following table explains the rainfall in this district during 1998-1999. Besides, humidity and temperature recorded in this district during the same period are also given below.

Rainfall

Season	Month	Normal	Actual
1. South West Mansoon	June '98	64.2	25.0

Flora and Fauna

The hilly areas in this district belong to the dry deciduous type generally observed in the projections of the Eastern Ghat ranges. In the low country, the ordinary plants of the Coromandel region are found viz., tamarind trees, teakwood, some sandalwood, ven-teak, casuarina, bamboo etc. As regards fauna, although no special and distinguishing variety is available in the district, the western region and in particular the mountainous tracts possess some wild animals. Bison is seen in small numbers on the Javadu Hill ranges and tiger is occassionally seen. Leopards are found all through the rocky hills, Black bears, hyenas, sambar, spotted deer, jungle sheep, barking deer, antelope, varieties of snakes including the king cobras are spread over different regions of the district. Elephants were previously seen and captured near Chengam forests. Monkeys exists in several places in the district. The skeleton of gigantic elephant caught in the Chengam forest region is kept for the view of visitors in the Madras Museum. About birds, most of the common birds of South Indian species are seen in the district. Peaf owls and jungle fowls exist in the forests of the district.

Forest

The Reserve Forest area has been identified in Gudiyatham, Katpadi, Arcot, Vellore, Vaniyambadi and Tirupathur taluks. The forest products are firewood, bamboo, cauarionas and to a lesser extent sandalwood and timber such as Teak, Rosewood etc.

Steps are taken to conserve the forest areas and to ensure among other things. Adequate plateu for livestock, supply of the fire wood for domestic consumption and raw materials for industries have been ensured. With the Social Forestry Programme by Government, forest department has enlarged its activities and even out side the reserved forest.

Minerals and Mining:

No mineral deposites are reported in this district.

Soil

Soil is thin layer of earth's crust made up of disintegrated and decomposed rocks, containing complex mineral compounds. Soil along with atmosphere constituted the natural medium supports to the growth of plants on earth's surface. While the central and southern parts of the district are mostly hilly and the eastern portion is almost a stretch of unbroken plain. In the western sector, the land rises gradually towards the Mysore plateau along the Kangundi Zamindar of Chittoor district. The soil is mostly of the red ferruginous variety both sandy and loamy, with black area accounting for about 16 per cent. The black soil is found mostly in the neighbourhood of the rivers of Palar, Ponnai and in the ayacuts of a few big tanks. The black clay occurs in Gudiyatham, Wallajah, Arcot, Arakonam and Vellore Taluks. The black series loam is found mostly in Arakonam and Gudiyatham taluks in larger areas than in other taluks while red loam soil is found in all the taluks

Cropping Pattern

The following table explains the cropping pattern along with area (hectares) of cultivation in different seasons.

Sl. No.	Crops	Season		
		Kharif	Rabi	Total
I	Cereals			
	Rice	14,113	65,788	79,901
	Jowar	13,594	86	13,680
	Bajra	2,881	1,142	4,023
	Maize	594	145	739
	Ragi	2,396	8,261	10,657
	Minor Millets	-	4,615	4,615
II	Pulses	38,699	5,737	44,436
	Other Food Crops	33,405	16,801	50,206
III	Oil seeds	86,389	13,947	100,336
IV	Other Oil seeds	1,597	-	1,597
V	Fabrics	7,284	-	7,284
	Other Crops	3,320	528	3,848
	Total Cropped area	102,910	102,575	205,485
	Total	**201,500**	**117,050**	**318,550**

Agriculture and Land use pattern

It is evident from the table given below that area covered by forest was 161 229 hectares. Barren and non-culturable land and land put to non-agricultural use were 26,054 and 82,685 hectares respectively. The net area sown remains at 248,279 hectares and the total cropped area was 318,550 hectares.

Rice is the chief crop sown on 79,901 hectares while Bajra sown on 4,023 hectares

Sl. No	Classification	Area (in Ha.)
1	Forest	1,61,229
2	Barren and non-culturable lane	26,054
3	Land put to non-agricultutal use	82,685
4	Cultivable waste	6,709
5	Permanent pastures and other grassing land	3,833
6	Land under miscellaneous tree crops and groves not included in net area sown	1,830
7	Current fallow land	30,574
8	Other fallow land	50,825
9	Net area sown	2,48,279
10	Geographical area	5,92,018
11	Total cropped area	3,18,550
12	Area sown more than once	70,271

Horticulture

There are different horticultural crops, fruit trees and vegetables grown in large scale in Vellore district.

Name of the fruit	Area in Ha.	Production in m.t.
Banana	6,824	42,990
Mango	11,626	48,198
Chilli	440	973

Sericulture

Area under mulberry cultivation was 927.24 hectares; rain fed was 118.24 hectares. Area newly planted was 232.55 hectares and production of reeling cocoon was 6.499 (metres). The value of reeling cocoon was Rs.649.00 lakhs. Production of raw silk was 0.684 (mertres),valuing about Rs. 820.93 lakhs.

Irrigation

The district is entirely dependent on the seasonal rainfall for its agricultural operations. Tanks and tube wells besides rivers channels and spring channels are the chief sources of irrigation. The rivers Palar, Ponnai and the Pennaiyar meet a good part of the irrigational needs and "Anaicuts" have been constructed across them. Channels have been dug in the sandy belts and rivers to tap the water. Spring channels are also dug and these are mostly found in Gudiyatham taluk.

The rivers are not perennial and whenever they are in spate, 'flood waters are diverted into the channels through the anaicuts. The three important anaicuts are Palar, Ponnai and Pennaiyar. The Palar anaicut benefits the taluks of Wallajah and Arakonam. The anaicut over Ponnai river benefits some lands in Arakonam and Wallajah taluks.

Towards meeting the irrigation needs, the district has no reservoir. There were 2,571 canals and 1,29,327 wells (for irrigation only) besides 37,340 wells used for domestic purposes, as per available data (1998-99). The number of tanks in the district are 1355 and out of this 420 have ayacuts of 40 hectares or more (100 acres are more) while remaining tanks have ayacuts of less than 40 hectares. Kaveripakkam lake is a major tank in the district which irrigates large hectares of land.

Kaveripakkam lake is quite a big and it covers about 6 sq. km area. It benefits 33 villages and adjoining places. Cultivation takes place 2 or 3 times a year under this lake.

Data on area irrigated in Vellore district in 1998-99 by the different sources are given below:

Sl. No.	Source of Irrigation	Area irrigated in 1998-99 (in Ha.)
1	Canals	2,571
2	Tanks	35,795
3	Ordinary wells (irrigation only)	129,327
4	Others	832

Area under irrigation

Source			Area in Ha.
Surface water	Canals	Govt.	2,571
		Private	-
	Tanks	Large	-
		Small	35,765
	Flow irrigation	Major	-
		Minor	-
	Lift irrigation	Major	-
		Minor	-
	Ponds	Lift irrigation	-
		Flow irrigation	-
	Other sources	Spring cannals	-
		Wells	129,327
		Others	153

It may be observed from the above table that wells in the district form a very important source of irrigation covering three-fourth of the total area under irrigation.

The number of wells are supplementing sources of irrigation. Other sources of irrigation cover about 129,327 hectares. The area of land irrigated more

than once in the district was 35,327 hectares in 1998-99. The irrigated area formed 58%.

Number of wells and Pumpsets

Category	Item	Number
Wells	Tube Wells	155
	Other Wells	-
	In use	157,178
	Not in use	17,670
Pumpsets	Diesel Operated	15,563
	Electrically Operated	93,104

Area under River within the District

	Ponnai Anacin	1	89282	-
	Total	**2**	**592018**	-
Minor Tanks	Above 40 Hectares	420	-	-
	Below 40 Hectares	935	-	35795
	Total	**1355**	**-**	**35795**

Animal Husbandry

Cattle are the mainstay of the peasants. From time immemorial animal husbandry alongside agriculture has been playing a pivotal role in our country. A vast majority of the people living in rural areas mainly depend on agriculture and animal husbandry for their livelihood. The role played by the animal husbandry in the economic field of the district is quite substantial.

A perusal of this following table reveals that there are 197,845 male cattle and 332,954 female cattle in Vellore district.

The number of buffaloes were 21,653 (males) and 92,383 (females). The number of sheep and goats were 300,888 and 232,374 respectively, Donkeys were 1,711 and domestic dogs were 104,397 totalling the livestock population to 1,304,958 in this district.

Fowls and ducks also were form part of poultry with 797,366 and 25,285 respectively in this district.

Cattles treated both indoor and outdoor accounting to 709,962. The number of castrations performed on animals were 15,402.

The number of slaughter houses that existed during 1998-99 were 9 and slaughtered animals were 74,655 for which 1365 persons engaged.

Haemorrhage, Black Ovarher, Anthrox and sheep pox were the killer diseases among sheep and goats. The number of sheep that died due to such diseases were 4 and 22 respectively

Livestock	Population
Cattle	
Males	197,845
Females	332,954
Cattle Total	530,799
Buffaloes	
He-nuffaloes	21,653
She-Buffaloes	92,383
Buffaloes Total	114,036
Sheep	300,888
Goats	232,374
Pigs	20,223
Donkeys	1,711
Domestic Dogs	104,397
Hare and Rabits	320
Fowls	797,366
Ducks	25,285
Total Poultry	**822,651**

The below table explains about veterinary hospitals and dispensaries in this district.

Veterinary Hospitals and Dispensaries

Clinical Centre	1
Veterinary Hospital	8
Veterinary Dispensary	37
Veterinary Doctors	8
Veterinary Livestock Inspectors	215
Cases treated excluding livestock Farms	
Indoor	186
Outdoor	709,776
Total	709,962
Castrations performed	15,402
Number of animals Inseminated at the Artificial insemination Center	63,121

Number of Mobile Veterinary Units	
Mobile VeterinaryUnits	3
(at Ranipet, Tirupattur, Athanavoor)	
Doctors	3
Cases Treated	19,697
Castrations performed	486

There is no poultry farm in this district.

Fsheries

Inland fishing is done in ponds, rivers and lakes in this district. Estimated Inland Fish Production in this district was 5,308 tonnes, valued Rs.76.32 lakhs.

Industry

The district has many big and small industries. The silk weaving industries are located at Wallajah. Leather, sugar, ceramics, chemicals and other allied small scale industries are located in different taluks. SIPCOT is located at Ranipet. BHEL has main factory of heavy machines is located in Ranipet. Several hundred leading private industries manufacturing particularly leather products are in and around Vaniyambadi and Ambur.

Small scale industries for the seed beds of large scale industries as ancillary industries they form the pillars of industrial growth and constitute significantly to the district economy. Small scale industries are a little bigger concerns working usually on a small factory basis. The small scale industries are of varied types. There are about 5590 small scale industries in Vellore District employing about 4244 people.

Of these, basic metal and alloyed industries numbering 816 with 1,745 employees function in this district. While textile products having five centres with 13 employees.

Industry Group		Total number of Factory	Number of workers employed
NIC Code			
20-21	Manufacture of food product	96	268

Ambur town is famous for its leather tannery and sugar industry. Gudiyatham is a centre for Trade and Industry and famous for its handloom weaving which is an important occupation in this town and there are large number of looms here besides cotton mills. Handloom weaving is the main source of livelihood along with agriculture. Most of the workers are engaged in household industry in this town and quite large number of them are in handlooms. A Sugarcane Research Institute is also located in this town.

Karigiri, a small village, is famous for its glazed pottery, variety of glazed articles are produced here. Goods produced here are marketed in industrial Museum and the Victoria Technical Institute at Chennai. A leprosy centre exists near Karigiri. Ranipet town has multifarious Industrial Complex sponsored by the SIDCO, Government of Tamil Nadu. This town has industrial growth in Leather, Sugar,

Ceramics, Chemicals and other small scale industrial products. It is also famous for its cottage industry of manufacturing beedies. Tamil Nadu Government has opened up a "SIPCOT" complex for leather chemicals to assist the leather industry. BHEL a leading public sector factory manufacturing heavy boilers and its ancillaries is located in this town.

A sandalwood factory is located in Tirupathur. Handlooms and beedi are the important household industries in this town which have more women participation. Arakonam has a railway junction and has a huge railway workshop. A ware-housing of FCI employing thousands of workers is located in this town. A naval and air base camps are also functions here. Handlooms and beedi are the important household industry in this town.

Wallajah is the headquarter of Wallajah taluk where silk weaving, wollen druggets, carpets and cane work (rattan) are important industries. Vaniyambadi town is well known for leather tannery. Production of jaggery, oil and beedi are important industries here. There is a famous mosque built on the model of Taj Mahal in Vaniyambadi.

Trade and Commerce

Vellore district is an important commercial centre. Most of the trade is carried through road transport by lorries and carts drawn by bullocks. The mercantile consignments include all items from iron and steel and sundry shopping goods. Most of the commodities that move out of the district are general goods, grains, sugar, jaggery fertilizers and chemicals.

Finance for the trade is provided by the commercial banks, Co-operative banks and private leading money lenders. The outlets for consumer goods consist of Co-operative consumer stores.

Vaniyambadi is noted trade centre and the name of town is said to have been derived from the term "Vaniya" meaning trader. The town Ambur is an important trade and commercial centre for fruits, flowers and food grains in Vaniyambadi taluk.

Regulated markets

In this district, there are 12 regulated markets for trading of agricultural products.

Fair price shops

There were 41 full-time fair price shops in this District; 1,030 full time co-operative shops and 267 part time fair price shops.

Transport

Vellore district has good network of roads to an extent of 2621.73 km. Even its farthest corners are well linked with important centres. Road communication is well supported by railways i.e. metre gauge and broad gauge lines. The following is a statement showing the length of roads maintained by various agencies as on 31.3.1999.

I. National Highways

1. Surfaced - Bituminous
2. Length of roads - 227.20Km
3. No. of Bridges - 47

II. Municipal Roads

1. Surfaced - 500.595 kms
2. Unsurfaced - 55.521 kms

National highways, No.47 trunk road from Madras to Bangalore pass through Kaveripakkam, Walajapet, Ranipet, Vellore, Ambur and Vaniyambadi towns.

Following is the detailed list of motor vehicles registered by type and driving lincence issued and renewed.

Commercial	
Stage Carriage Public	838
Stage Carriage Private	400
Mini Bus	3
Auto Rickshaw	4123
Ordinary Taxi	80
Motor cab - State	263

Others	85
Total	**138,825**

Bus Stop and Railway Stations

All towns and villages are having bus facilities and Railway Stations.

Electricity

The electricity from Mettur Hydro-electric power and the Madras Thermal Power Stations fulfill the needs of the district. The distribution of power is made to the district though the electricity systems of Vellore and Tirupathur Systems. There is a very good network of power transmission lines in the district. All the Census towns, villages, hamlets and Adi-Dravidar colonies of the district have been extended power connection. Barring very few places which are either interior areas or inaccessible regions, where there is little or no demand for power. The district particularly enjoys power connection in all areas. Almost all the inhabited places have been covered by the electrical connections. Tremendous progress in this regard has been achieved in the last two decades through plan schemes. The extension of power to every nook and corner of the district has opened up new vistas of development and has given fillip to both industrial and agricultural production.

Details of consumption of electricity in Vellore district during the year 1998-99 with the percentages in each category are presented below.

Sl. No	Categery	Consumption during 98-99 (in m.u.)	Percentage
1	Domestic	228.2	18
2	Commercial	59.4	04
3	Public Lights	40.0	05
4	Industrial	264.5	18
5	Agricultural	300.1	25
6	Miscellaneous	19.2	02
7	H.T.	314.4	28

Due to inadequate sources the district is increasingly dependent on well irrigation and the use of electrical pumpsets, for this puspose. Use of large quantum of power for agricultural purposes will therefore continue to be an important feature in the power consumption pattern of this district.

Education

Education is a powerful and pervasive agent of change. Higher education today is meant not only to seek knowledge but also for employment and economic prospects. It is the key that unlocks the door to rapid growth, progress and development.

There were 1317 Primary schools, 262 Middle schools, 123 High schools and 87 Higher Secondary Schools in Vellore district. The boys out number in all the schools in 1998 - 99

Education Facilities	Enrolment		
	Total	Boys	Girls
Primary School	314,765	161,404	153,361
Middle School	47,411	23,717	23,694
High School	81,339	50,320	31,019
Hr. Sec. School	35,684	20,547	15,137

There were 14 Arts and Science Colleges; 1 Medical College, 5 Engineering Colleges, 1 Agriculture College and 3 Teachers Training Colleges in the district.

More number of women teachers were reported in the district in Primary Schools.

Education Facilities	Trained Teachers		
	Men	Women	Total
Primary School	4,046	3,682	7,728
Middle School	1,729	1,308	3,037
High School	1,240	971	2,211
Hr. Sec. School	2,885	1,990	4,878

Noon Meal

There were number of nutritious meal centres operating in this District in 1999-2000. The total number of children benefited under the scheme in the same year was 430,437. Of this, 12,340 in the age group of 2-4 years; 309,329 in the age group of 5-9 years and 108,770 were in the age group of 10-15 years.

Medical

Hospitals, like educational institutions, are service organistions. Efficient and successful management

of these are essential for the creation of a better society.

There were 12 Government Hospitals in Vellore district but the number of doctors was only 172. The number of general beds were 1,055.

No Primary sub-centres and Rural Dispensaries in Vellore District. Only 61 Primary Health Centres were in existence during 1998-99 were the number of Vasectomy operations performed were 20,302, while the number of people who have consumed oral pills were 116,040. The number of Tubectomy operations however stood at 20,292.

Rural water supply

In this district 3,536, fully covered and 460 partialy covered habitations and villages under safe drinking water supply scheme during 1999-2000.

Post and Telegraph

This district has 383 post offices and 156 Post and Telegraph Offices. The Head Post Office being at the district headquarters at Vellore. These post offices consist of head-offices and extra-departmental sub-post offices. There were 92,324 Telephone sets and 3,601 Public Call Offices.

Commercial Bank

In this district 204 Banks were established; 101 were in rural, 70 were in sub urban and 33 were in urban areas.

Police & Fire Station

There were 51 police stations and 3 all-women police stations in this District. There were also fire stations in this District

Entertainment

The district has a total of 2703 theatres as at the end of 1998-99. Out of these, 2,473 were permanent ones and 230 were semi-permanent. The rest were 963 touring cinemas.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel / hotel building was treated as one census house, but if such built at different times and owned by different persons.

In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably; the entire hostel/hotel building was treated as one census house., but if such hostels/ hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the

Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household.Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. In September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or

a combination of both (agricultural labourers) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person, who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry, is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those

carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. :

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum^{45\text{-}49}\text{ASFR}_{15\text{-}19}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum^{45\text{-}49}\text{ASMFR}_{15\text{-}19}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000$$

i) Early neo- natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

ii) Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

Migration, Internal and International migration, Impact of migration.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly

a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence. By capturing the last of the migrations in cases where persons have migrated more than once, this concept would give a better picture of current migration scenarios.

Internal And International Migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (interdistrict migration) (ii) Migration from one state to another state of the country interstate migration (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Impact of Migration

As in 1991 and 2001 Census, like previous Censuses, had collected migration details for each individual by place of birth and last residence. Data on last residence along with details like duration of stay in the current residence and reason for migration provides useful insights for studying migration dynamics of population.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA / Town is based on the population. UAs / Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./ Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are :

M7 (5,000,000 and above);

M6 (2,000,000 to 4,999,999);

M5 (1,000,000-1,999,999);

M4 (500,000-999,999);

M3 (300,000-499,999);

M2 (200,000-299,999); and

M1 (100,000-199,999).

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as:

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) CENSUS 2001 FINDINGS

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census is the midnight of 28th February, 2001 i.e. the census provides a snapshot of the population of the country, as it existed at the midnight of 28th February, 2001. Actual enumeration was spread over a period of 20 days from 9th to 28th February, 2001 followed by revisional round up to 5th March, 2001 for up dating of the population figures with reference to the midnight of 28th February, 2001. Household schedule was canvassed by the enumerator and with a view to ensuring uniformity in approach in understanding the various concepts and in proper eliciting and recording of the information, the enumerators and supervisors were imparted both theoretical as well as practical training intensively in 3 rounds.

As a prelude to the actual census the urban and rural areas were identified and listed out in respect of each administrative unit. The Directorate of Census Operations had prepared the list of urban areas and simultaneously, a list of villages. These lists formed the basic frame for the organization of the census operations. There after, geographical areas that could be conveniently covered by each enumerator were carefully carved out to constitute the enumerator's block (EB)

The second major step was the houselisting operation, which was carried out in this District during April, 2000. Thereafter, in order to adhere to the prescribed workload norms the actual census enumerator's blocks were carefully demarcated on the basis of the house list population and the layout sketches and notional maps prepared for the houselisting operation. Houselisting operation was also utilized to collect wealth of information on items such as predominant material used for construction of houses, amenities available to the census households, number of living rooms etc.

POPULATION IN RURAL AND URBAN AREAS

In 2001, the total population of Vellore District was 3,477,317, the rural population as 2,169,319 and the urban population as 1,307,998. In 1991, there were 3,026,432, 2,066,718 and 959,714 respectively.

The following table shows the taluk level distribution of population in Total, Rural and Urban areas of Vellore district. The Vellore taluk has come out with the highest population of 643,645 and the lowest population recorded in the Arcot taluk with 230,673. Among the taluks, in Rural population in Tirupathur taluk tops with 403,278 followed by Arakonam (331,148), Vaniyambadi (324,059), Vellore (280,254). Arcot taluk has recorded the lowest rural population of 147,952.

Comparing to the urban population, Vellore taluks stands in the first position with 363,391 followed by Vaniyambadi (227,409), Wallajah (168,028), and Gudiyatham (141,614). Arcot has recorded the lowest population with 82,721.

TABLE A: DISTRIBUTION OF POPULATION - 2001

Sereial number	Name of Taluk	Total			Rural			Urban			Number of Villages		
		Person	Male	Female	Person	Male	Female	Person	Male	Female	Total	Inhabited	Towns
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Gudiyatham	378,674	189,039	189,635	237,060	118,555	118,505	141,614	70,484	71,130	101	83	3
2	Katpadi	332,363	165,166	167,197	232,867	115,591	117,276	99,496	49,575	49,921	102	90	7
3	Wallajah	380,396	190,203	190,193	212,368	106,485	105,883	168,028	83,718	84,310	77	72	7

Table B gives the number and percentage of inhabited villages by CD Blocks at specified population size ranges with the related population in rural areas of Vellore District. Out of 789 villages, 40.8% of the villages have recorded in the population ranges of 2000-4999 followed by 27.4% in the range of 1000-1999 and 13.2% in the range of 5000-9999.

SIZE, CLASS AND STATUS OF TOWNS

Out of 49 urban areas in Vellore district, there are 36 statutory towns (9 Municipalities and 27 Town Panchayats) and 13 non-statutory towns. Among the statutory towns one Municipality fall under Class I, 5 Municipalities fall under Class II, 3 Municipalities and 8 Town Panchayats fall under Class III, 10 Town Panchayats and 4 Census Towns fall under Class IV, 9 Town Panchayats and 8 Census Towns fall under Class V and one Census Town fall under Class VI.

TABLE C: SIZE, CLASS AND NUMBER OF STATUTORY & NON-STATUTORY TOWNS 2001

Class	Size & Class of Towns	Statutory Towns	Non-Statutory Towns	M	TP	CT
I	100000+	1	0	1	0	0
II	50000 – 99999	5	0	5	0	0
III	20000 – 49999	11	0	3	8	0
IV	10000 – 19999	10	4	0	10	4
V	5000 - 9999	9	8	0	9	8
VI	< 5000	0	1	0	0	1
District		**36**	**13**	**9**	**27**	**13**

SIZE OF THE NUMBER OF TOWNS AS PER CENSUS 2001

Size of the Town(Class)	Municipalities	Town Panchayats	Census Towns
100000 + (I)	1	0	0
50000 – 99999 (II)	5	0	0
20000 – 49999 (III)	3	8	0
1000 – 19999 (IV)	0	10	4
5000 – 9999 (V)	0	9	8
< 5000 (IV)	0	0	1
Total	**9**	**27**	**13**

The above table gives the size, class and status of the Towns in the Vellore District in detail.

DECADAL GROWTH OF POPULATION

The percentage of decadal variation of the total population during 1991 – 2001 in Vellore district has been recorded as 14.90% and in urban population with 36.3% and rural population with 5.0%

TABLE D: DECADAL GROWTH OF POPULATION

Name of District	1991			2001			% Decade Variation		
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
Vellore	3,026,432	2,066,718	959,714	3,477,317	2,169,319	1,307,998	14.9	5.0	36.3

DENSITY OF POPULATION AND SEX RATIO

TABLE E : DENSITY OF POPULATION / SEX RATIO

Name of State/District	Density of Population	Sex Ratio
Tamil Nadu	480	987
Vellore	572	997

The density of population in Vellore district was 572, higher than the State average of 480. The sex ratio (i.e. females per 1000 males) of the district was 997, higher than the State level of 987 in 2001 Census.

ECONOMIC ACTIVITY

TABLE G ECONOMIC ACTIVITY

Name of The District	Persons\ Males \ Females	Percentage of		
		Main Workers	Marginal Workers	Non Workers
Vellore	Persons	33.7	7.3	59.0
	Males	48.3	6.4	45.3
	Females	19.1	8.3	72.6

The Table – G shows that the proportion of the total workers, main workers among males were higher and the proportion of marginal workers and non-workers were higher among females.

It can be seen from the above table the non-workers forms more than half of the population of district followed by the main workers (33.7%). The marginal workers were 7.3%. The 2001 Census recorded 41.0% as the total workers, 33.7% as main workers, 7.3% as marginal workers and 59.0% as non-workers

LITERACY

TABLE F: LITERACY RATE

Name of the State/District	Literates		
	Persons	Males	Females
Tamil Nadu	73.5	82.4	64.4
Vellore	72.4	82.0	62.8

The literacy rate of the district recorded at 72.4%, below the literacy rate of the State (73.5%). The literacy rate for males was higher than females. The male literacy stood at 82.0% as compared to 62.8% for females.

WORK PARTICIPATION RATE

The work participation rate for total workers is defined as the percentage of total workers to total population.

TABLE - H : WORK PARTICIPATION RATE

Name of the District	Total/ Rural/ Urban	Work Participation Rate
Vellore	Total	41.0
	Rural	45.3
	Urban	34.0

The total Work Participation Rate of the district was 41.0%, 45.3% rural and 34.0% urban.

SCHEDULED CASTES AND SCHEDULED TRIBES

The following table reveals that Scheduled Castes Population in Vellore district was 20.5% and Scheduled Tribes population was 1.8%.

TABLE I : SCHEDULED CASTES AND SECHEDULED TRIBE POPULATION

Total\ Rural\ Urban	Total Population	Total S.C. Population (Percentage)	Total S.T. Population (Percentage)
Total	3,477,317	714,054(20.5)	63,040(1.8)
Rural	2,169,319	505.677(23.3)	58,237(2.7)
Urban	1,307,998	208,377(15.9)	4,803(0.4)

This table also provides data on rural and urban areas of the district by actual and percentage

RELIGION

Every census has attempted to provide an interesting picture on the act of religions persuasions and beliefs of the people of the country.

The following table shows the majority and minority religious communities in rural and urban areas of the district.

TABLE J: DISTRIBUTION OF POPULATION BY RELIGION

Name of Religion	Total	Rural	Urban
Hindus	3,016,962	2,060,885	956,077
Muslims	350,771	60,224	290,547
Christians	102,477	45,974	56,503
Sikhs	535	194	341
Buddhists	380	112	268
Jains	3,489	328	3,161
Others	297	91	206
Religion not stated	2,406	1,511	895
Total	**3,477,317**	**2,169,319**	**1,307,998**

The percentage of Hindus (86.8%) were more in the district. Secondly, Muslim population was 10.1% whereas Christians accounts 2.9% in the district.

(viii) Brief analysis of data based on inset tables

TABLE 1 : DECADAL CHANGE IN POPULATION OF TALUKS BY RESIDENCE, 1991-2001

Serial number	Taluk	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001			Total	Rural	Urban	1991	2001
		Total	Rural	Urban	Total	Rural	Urban

	(8) Ariyur	CT
	(9) Turuthipattu	CT
(b) Denotified Towns		
(i) Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as Census Town.	-Nil-	
(ii) Statutory Towns of 1991 Census denotified but identified as Census Town based on demographic and economic criteria.	-Nil-	
(iii) Census Town of 1991 Census are notified as statutory town in 2001 Census.	-Nil-	
(c) Declassified	Cheruvanki Devasthalam Virudhambattu	
(d) Wholly merged with other towns	-Nil-	

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
21-50	2	0.3	2,263	0.1
51-100	8	1.0	6,807	0.3
101-200	43	5.4	41,543	1.9
201-300	81	10.3	123,121	5.7
301-500	249	31.6	616,233	28.4
501 +	398	50.4	1,371,596	63.2
Not known		0.0	0	0.0
District Total:	**789**	**100.0**	**2,169,319**	**100.0**

This table gives the distribution of villages by population density. Out of 789 in habited villages, 398 villages (50.4%)fall in the range of population density 501+, 31.6% in 301 - 500 and 10.3% in each range of 201 - 300 respectively.

TABLE 5: SEX RATIO OF STATE AND DISTRICT 1901 - 2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1044	1043	1048	1035	1023	1102
1911	1042	1044	1032	1033	1018	1102
1921	1029	1033	1008	1019	1013	1045
1931	1027	1034	997	1006	1001	1027
1941	1012	1017	991	991	988	1001
1951	1007	1014	986	1000	993	1022
1961	992	1003	963	986	987	982
1971	978	990	951	973	975	970
1981	977	987	956	979	980	979
1991	974	981	960	978	972	992
2001	987	992	982	997	994	1003

TABLE 6 : SEX RATIO BY TALUKS, 2001

Serial number	Name of Taluk	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Gudiyatham	1,003	1,000	1,009
2	Katpadi	1,012	1,015	1,007
3	Wallajah	1,000	994	1,007
4	Arakonam	990	991	987
5	Arcot	1,009	1,012	1,005
6	Vellore	1,004	1,011	999
7	Vaniyambadi	998	987	1,013
8	Tirupathur	973	968	996
District Total:		**997**	**994**	**1,003**

This table furnishes the sex ratio for rural and urban areas in each taluks of Vellore district. It is noticed that Katpadi taluk has the highest sex ratio of 1,012 followed by Arcot (1,009) and Vellore (1,004). The district sex ratio has recorded as 997. Arakonam, Vellore and Tirupathur taluks have returned the sex ratio below 1000, both in rural and urban areas. On overall, the sex ratio in the district during 2001 Census found encouraging compared to other district.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Sholingur	1,001

Note: Percent of Worker to total worker are given in brackets

This table gives the distribution of workers by sex in four categories of economic activity in taluks of Vellore district. The district workers were 41% and the categories were divided into cultivator (17.6%), agricultural labour (17.6%), household industries (27.4%) and other worker (11.4%). Arcot taluk has recorded the highest (45.8%) with the four categories. Tirupathur taluk has recorded the highest (24.1%) cultivators, Arakonam taluk has recorded the highest percentage in agricultural labour (41.2%). Gudiyatham taluk has recorded the highest in household industry (19.5%). The Vellore taluk has recorded the highest percentage (54.9) of other workers.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table shows the distribution of villages according to the availability of different amenities. There are 789 inhabited villages in this district in 20 C.D. blocks of which 735 villages are provided with the educational institutions (93.2%). Out of 20 C.D. blocks, 2 are fully covered by education facilities, 8 Blocks by 95%, 7 Blocks with 90% and 3 Blocks with above 80%. Out of 789 inhabited villages, 756 villages have medical facilities which worksout to 95.8%. Out of 20 C.D. blocks, 7 Blocks coverd with cent percent medical facilities, 12 Blocks by more than 90% and one have more than 80%. It is noticed that all the villages have drinking water and power supply facilities. Post office facilities and phone facility are much improved, which works out to 81.7% and 84% respectively. Communication and approach to pucca road have improved which works out to 87% and 91% respectively. Banks and agricultural society covers 15.1% and 18.8% Villages respectively.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table shows the distribution of villages availing the different amenities. The district has recorded the Villages with different amenities such as (97.4%) by education, medical (97.6%), drinkingwater (98.9%), post office (89.6%), telephone (91.0%), transport and communication (90.9%), pucca road (91.9%), power supply (98.3%), bank and agricultural credit societies with (25.3%) and (23.6%) respectively.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The table provides the distribution of inhabited villages according to different population ranges and amenities available. The ammenities of drinking water and power supply are availed by almost all the villages. Among the four categories of population ranges, 322 vilages fall under 2000 - 4999 out of 789 inhabited villages in the district. Out of 322 villages in the population range of 2000 - 4999, education facility availed by 98.8% medical by 97.8%, drinking water by 99.4%, post office by 91.0% telephone by 92.5%, transport 93.2%, pucca road 94.4%, power supply by 99.4% and bank, agrucultural credit societies by 18.0% and 22.7% respectively. Similarly, 216 villages in the population range of 1000 - 1999 have the facilities of education 94.0%, medical by 94.4% post office by 75.5% drinking water by 97.2%, telephone by 78.2%, transport and cummunication by 83.8% banks 5.6% respectively, agricultural credit society 10.2%, approach by pucca road by 89.8% and power supply by 95.8%.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C D block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Sholingur	47	26,521.0	64.7	30.7
2	Kaveripakkam	55	32,813.5	58.4	37.2

18	Jolarpet	31	27,838.7	44.5	27.5
19	Tirupathur	19	17,872.6	83.2	23.2
20	Kandili	42	30,741.2	61.0	23.8
	District Total:	**789**	**429,244.8**	**61.1**	**28.6**

Note : - Cultivable area = irrigated area + unirrigated area

The table furnishes the distribution of villages according to the land use in 2001. The total area of 789 villages to 429,244.75 hectares of which the percentage of cultivable area to the total area was 61.1%. The percentage of irrigated area to the total cultivable area works out to 28.6%. Tirupathur C.D. block shows the highest percentage of cultivable area to the total area (83.2%) followed by K.V. Kuppam (75.0%), Peranampattu (73.8%) and Anaicut (73.1%). Alangayam C.D. block has recorded the lowest percentage of cultivable area.

Data source: Census of India 2001. H-series"Tables on house, household amenities an Assets."

Note:-

Permanent:-Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- Semi-permanent houses refer to those houses made of other types of materials.

Temporary:-Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

This table provides talukwise percentage distribution of permanent, semi permanent and temporary houses with rural and urban break up in the district. It clearly indicates that percentage of permanent houses are found to be higher in both rural and urban areas.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE , ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households .
Bathroom means bathroom within the house
Toilet means toilet within the house
Drainage means closed and open drainage

This table indicates taluk wise number and percentage of households having the basic facilities. It is observed that cent percent households to total households in both rural and urban areas have been provided with improved drinking water facility in all taluks. On the other hand, toilet facilities have recorded poor coverage.

TABLE 51: NUMBER AND PERCENT OF HOUSEHOLD BY TYPE OF FUEL USED FOR COOKING - 2001

It can be seen from the above table that fire-wood is the main source of fuel used for cooking followed by cooking gas (Liquified Petrolium Gas) and kerosene. Crop residue is the least used for cooking and fire-wood is the main source of fuel used for cooking in rural areas than urban areas. Likewise crop residue is used as fuel for cooking in rural areas. Cooking gas (LPG) is used as fuel for cooking largely in urban areas than that of rural areas. Likewise, kerosene is used as fuel for cooking largely in urban areas when compared to rural areas. In Tirupathur taluk, 80.9% of households are using fire-wood.

Number of households availing banking services and other assets like Radio / T.V., Telephone and vehicles are presented in the table. Households availing banking services are higher in rural areas except in Vellore and Wallajah Taluks, where urban population availability of this facility more than the rural population.

(ix) Major social cultural events, natural and administrative developments and significant activities during the decade

A few social welfare schemes are being implemented in this district. The Old Age Pension Scheme is common in this district. The other schemes such as aid to pregnant women, aid for poor women marriage, aid to handicapped persons etc., are being implemented in this district. The Samathuvapuram Scheme was initiated for the habitation to all community / caste at one place. Each Samathuvapuram has been formed with all facilities such as school, ration shop etc.

(x) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district.

The district has many temples and tourist places. The famous hill temple at Sholinghur is located in this district. Yelagiri hills, a tourist place, lying adjacent to Vaniyambadi and Tirupathur towns and situated at a distance of 5 km from Jolarpet Railway Station visited by many tourist. The world famous CMC hospital located at Vellore is known for its specialized medical services. The main aim of Dr. Ida Scudder, the founder of this Institution, was to serve the poor.

Some of the important places in the district which have become famous due to their religious, historical and archaeological importance are detailed below

Vellore

Vellore popularly known as "ROYER VELLORE", is historically famous and headquarters of the erstwhile North Arcot and also the newly formed and existing district of Vellore district as well as Vellore Taluk. The Vellore fort, built in the 13th century, has withstood many wars and is appreciated for its military architecture. The world famous Christian Medical College and Hospital was started in 1918, attached with a Medical College. It is the only town had over three lakhs of urban agglomeration population in Vellore district (3,86,746) as per Census 2001. The Central Jail in Vellore is the largest of its kinds. Jalakanteswarar temple (inside the Vellore fort) is situated in Vellore. Emergency Airport and Helipad at Abdullahpuram, and a "Tiger of Mysore"- the great Tippu Sultan and his family members tomb (cemetry) are found in Vellore town.

Arcot

It is a reputed commercial centre. Historically also it is famous and it serves as the headquarters of the taluk. It is situated on the banks of Palar river. Several battles were fought in and near this town during the 18th and 19th centuries. The place changed hands and was in possession of the British, French and Mughuls (Hyder Ali) in turns. Few tombs and other historical monuments are the centres of attraction in Arcot. It is also famous for its high quality of Arcot Kichidi rice (RICE) and "Makkan Beda" sweets

Sholinghur

A small town in Wallajah taluk is known for its hill temple and its main diety, Lord "Anjaneya", held sacred by Hindus. There are two small lion shaped hillocks here, the highest of which is only 400 ft. Patients suffering from certain diseases including those with mental disorders are said to be cured by staying and workshipping at this temple. There is also a spring here and the mineral water of which is believed to contain health properties.

Yelagiri

Yelagiri hill is a picnic and tourist spot situated at a height of 970 metres elevation. Yelagiri hills lies in the North eastern part of Tirupathur Taluk. The Jawadi Hills cover the eastern part of Tirupathur and Vaniyambadi taluks and north western portion of Chengam taluk. The hill is at a distance of 16 kms from Vaniyambadi town and 5 kms from Jolarpettai railway junction. The hill road has 13 hair pin bends and is 15 kms long. The hill natural features part at the foot of the hill present a beautiful pictures of fine scenery. The hill covers an area of over 13 sq. kms. The Malayalee tribe reside on the hill and cultivate tomato, cardamom, fruits, coffee etc. on the slopes. The place is developed as a picnic spot as well as health resort and is visited by people from far and near during summer.

Places of Tourist Importance

Fort at Vellore

Vellore and the region around has rich and varied pre-historic remains. The fort consists of the main rampart built of massive granite stones distinguished at regular intervals by round towers and rectangular projections. The broad plain to the east of town is strewn with numerous sites yielding vestiges of palaeolithic period (from about 500,000 years). Many habitation

mounds of Neolithic and Iron Age cultures (from 4,000 BC to 2,000 AD years) were located in the hill ranges around Vellore. The entire region is scattered with many types of megalithic burial tombs (c.2,500 years) known locally as Pandavar Kuli.

The region was a part of Perumbanavadi, the country of the Banas. Possibly, Vellore was a Brahmanical settlement known as Parameswaramangalam during Pallava period (6th – 9th century A.D.). Innumerable inscribed herostones of this period were discovered in this region. They record the heroic death of persons in cattle raids/battles. The architectural achievement of the Pallavas can be seen at Mahendravadi and Vilappakkam in the form of rock-cut cave temples. The structural temple at Solapuram (mid 9th Century A.D.) is the earliest memorial (Pallipadal) temple.

Subsequently Cholas established their rule over the region (A.D.890) under Aditya (871-907) only to loose it to the Rashtrakutas under Krishna III (A.D. 936-967). In fact, one of the inscription of latter king refers to Velurpadi, possibly the present Velapadi in Vellore town. Cholas built numerous temples in the region, among them the Cholisvara temple at Melpadi, a memorial temple for Arinjaya (A.D. 956-960) built by Rajaraja I (A.D. 985-1012). The Jain temple at Tirumalai known as Kundavaijinalaya, named after the famed sister (or daughter) of Rajaraja I are noteworthy. It is interesting to know that the region was a stronghold of Jainism in the Chola period.

The fort also contains within its four walls a Mosque and a Church built by the Muslim and British rulers who captured the fort in succession after its early occupation by the Vijayanagar rulers who built the temple. All the three places of worship are now in woe.

Jalakanteswarar Temple

The fort also contains one of the prides of Vellore, the Jalakanteswarar temple, which attract nation wide interest following the reinstallation of the main deity – the Lingam – in its original place and restoration of worship in the temple amidst a mass religious upsurge.

The temple which was built in the Vijayanagar style around the same time that the fort was built, consisted of a main shrine, a close ambulatory passage around and an integrated Mahamantapam. Subsidiary structures in the courtyard on the outer prahara included a lofty gopuram on the the south and a Kalyana mandapam on the south western corner of the Amman shrine.

Kavaloor

The biggest and wondrous Telescope in Asia is located at Kavaloor village in Jawathu Hills at a height of 4200 ft. It was declared open by late Prime Minister Rajiv Gandhi during the year 1986. It attracts a large number of tourists. Scientists from far flung areas keep visiting this place throughout the year.

(xi) Major Characteristics of the Vellore District, contribution of the district in the form of any historical figure associated with the district.

Vellore District was also known as 'Thondamandalam region' in early history of South India. The pages of South Indian History replete with incidences that the region has witnessed many thrilling fights for supremacy between the local chieftains and rulers on the one hand and the French and English invaders on the other.

Places of historical importance in this district like Arcot, Vellore and Wallajah etc. have seen several small and big battles. The district has many interesting places. The monumental fort at Vellore with its surrounding mostly provides an excellent specimen of the military architecture then in vogue.

From the earliest times for which evidence is available the Vellore district formed part of the Pallava Kingdom during the second half of the ninth century A.D. Kancheepuram in Chengalpattu MGR district was then the capital of Pallavas. In the succeeding periods, the district came under the rule of Cholas, the Rashtrakutas, the Thanjavur ruler, Raja Raja and the Hindu rulers of Vijayanagar. The last ruling kings of the Vijayanagar dynasty were overthrown by the Muslim rulers of deccan. The battle of Talikotta in 1565 brought the region under the sway of the Sultans of Bijapur and Golkonda. The Mughal King Aurangazeb sent his General Zulfikarkhan to bring the extreme Southern India under Mughal rule. The district then fell under the rule of the Mohamedan Nawabs of the Carnatic, whose headquarters was Arcot.

During the 18th Century, several battles have taken place in the district. In the year 1749, Nawab Anwaruddin was defeated and killed at Ambur by his rival Chanda Sahib assisted by the French. In the war on the Coromandel Coast, the English (with Robert Clive as Chief) captured Arcot, the capital of the new Nawab Chanda Sahib, on behalf of Mohamed Ali, son of Anwaruddin. The brave and brilliant defence of Clive's

forces in the subsequent war and the capture of the capital is considered as memorable event in Anglo-Indian history. The war was later renewed and in 1757. Arcot fell to the French. The English General, Sir Eyra Coote, defeated the French General Lally at Wandiwash or Vandavasi in 1760 and soon after took back every fortress earlier lost to French. Hyder Ali, the Mysore ruler invaded the Carnatic in 1767 and laid siege to Ambur, but later retired to Kaveripakkam. Again, in 1780, Hyder Ali invaded the region, pounding Vellore and neighbouring places and beseiged Arcot. He later abandoned the attempt on learning the advancement of British army under Colonel Baillie near Polur. Subsequently, he took Arcot and Ambur and beseiged Vellore and Vandavasi in another invasion. At a fight with English, later in Sholinghur, Hyder Ali sustained heavy losses. The war ended in 1783 and the district ceased from witnessing further battles for supremacy.

In 1781, the Nawab had assigned the revenues of the Carnatic to the East India Company and North Arcot then came under their management. In 1801, the region with the rest of the Carnatic was ceded in full sovereignty by the Nawab Azim-ud-Daula. The local chieftains initially opposed the English rulers but the latter subdued all of them by 1805. There was peace in the district after this, but for disturbance in 1806 due to the mutiny of the sepoys stationed at Vellore. This mutiny was however quelled successfully by the English rulers. The British rule which later lasted nearly 150 years ended in 1947 when India attained independence. The British had introduced many socio-economic changes here in the 19th Century and the first for the development of the region before they left this country. The Vellore jail has become famous in view of its importance in the history of the freedom struggle and also due to internment of many great leaders in this jail. The district has been making great strides in all spheres since then.

(xii) Scope of Village and Town Directory

Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of Revenue villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. The villages which are considered as Census Towns, the amenities data are shown in the Town Directory.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code and area of the village. The land use data for such villages are shown in col. 19 to 23.

Town Directory

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements to be included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV – A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities. This District data for the towns/U.A.s has been presented in these six statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of this District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State and at the national level.. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class and name of Town. Columns 3 to 5 show the rainfalland maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and

more, Railway Station, Bus facility and Navigable river/ canal from town.

Statement III shows the municipal finance of the Towns. The income and expenditure for the towns of this district has been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the Scheduled Castes/ Scheduled Tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others.

Statement V gives infor mation regarding educational, medical, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of this District which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from Director of Health Services and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the towns. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Towns. Information on number of banks available in the towns have been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the towns.

Statement VII shows the various civic amenities available in the slums of towns of this District.

Part - A
VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a) Note explaining the abbreviations used in the village directory

The Village Directory format has 23 columns and the details given under each column for the village are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. Classes from VI to VIII are included in the Middle school. Classes from IX and X included in Secondary / High school. Classes XI and XII are included in Higher / Senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	High/Secondary School	S
(iv)	Higher/Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) Computer Training institutes, Tailoring Classes, Music and Dance Classes etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also include the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D block wise of the district.
Appendix-I-A	Indicates number of villages C D block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV C D block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B

The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates CD Blockwise number of villages under each gram panchayat.

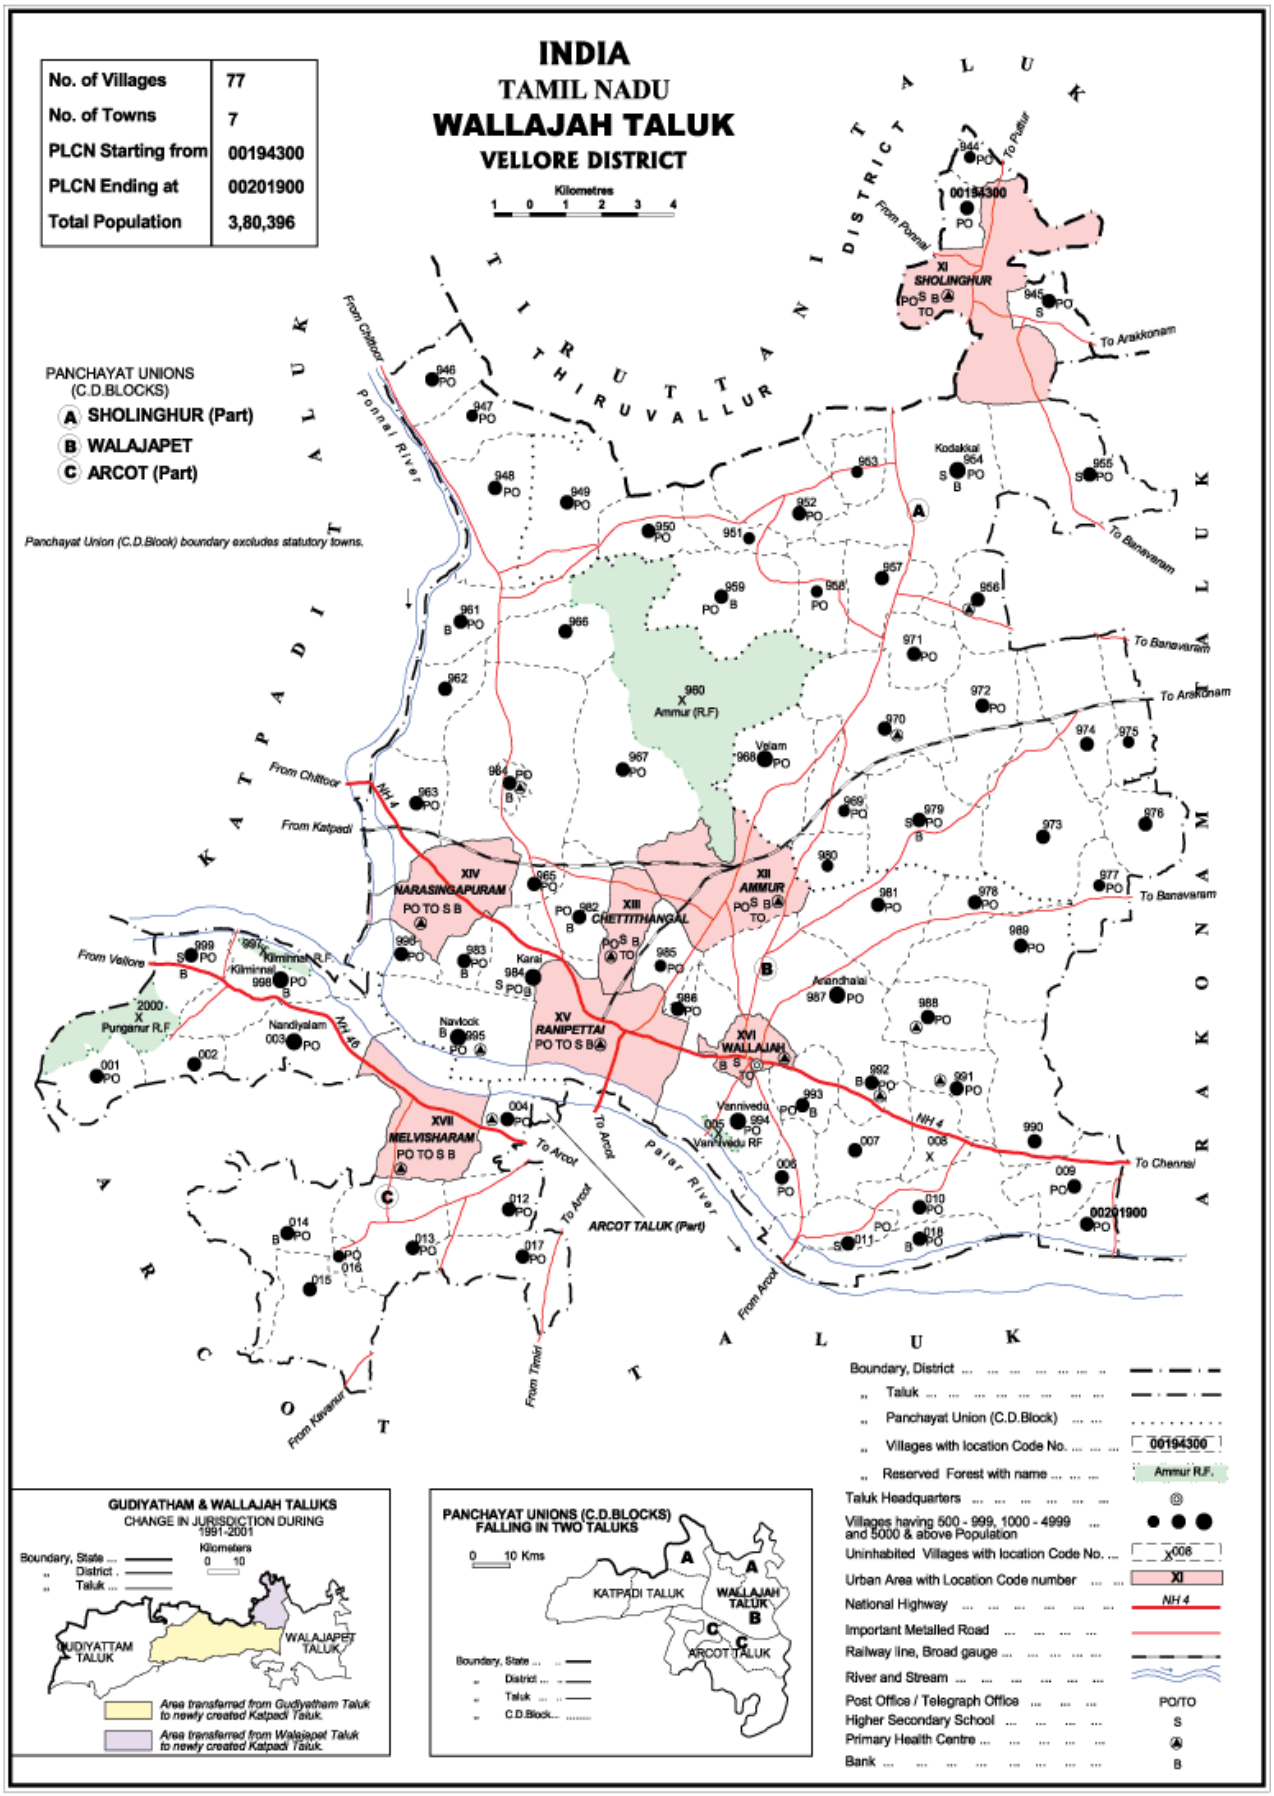

Appendix-IX Shows number of different types of girls school in a village.

(b) LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Sl. No.	Name of Towns	Name of villages merged in town(s)	Name of villages identified for outgrowth	Location Code Number 1991 Census	Town Location Code Number 2001 Census

- Not Available -

Note: The data pretends to this appendix table is not available.

Section II - Town Directory

(i) Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning

centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, which are treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Part - B
PRIMARY CENSUS ABSTRACT

BLANK

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation**.** The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Schedules for both the phases were scanned through high speed scanners in fifteen data centres across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data

for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes population were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has beenrestructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis of literacy data.

The data in the Primary Census Abstracts are presented at different levels, The District Primary Census Abstract is presented at District/ C D block/ UA/City/Town, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented at District/C D block/ Town, Village Primary Census Abstract is presented villagewise for each C D block and Urban Primary Census Abstract at Town/Ward***** level. The Primary Census Abstract data for each of these characteristics is presented by sex and rural-urban residence.

The District Primary Census Abstract has been presented in 59 columns, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes has been presented in 52 columns, Village Primary Census Abstract and Urban Primary Census Abstract has been presented in 58 columns. The information on each village under a C D block are presented in the Village Primary Census Abstract and each of the wards under a town has been provided in the Urban Primary Census Abstract exist in the district. The Data was presented for villages C D block-wise for the first time in 1991 Census. This practice is continued in 2001 Census also.

The concepts and definitions used in the column heading are already explained under the sub heading 'Census concepts' in the Analytical note. The Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts is as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahasils, P.Ss and by the local bodies in respect of towns are given in sq.kms. The area figures of the villages supplied by the Tahasildars in acres have been converted and shown in hectares. The area figures of the C D block is the total of the village areas coming under each C D block. The area figures for the district supplied by the Surveyor General of India have been adopted to maintain uniformity at the national level. The total area figures of all the Tahsils/C D blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of P.S./Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on total population, Scheduled Castes population and Scheduled Tribes population for each town.

Information on questions on children ever born and children surviving canvassed for all ever-married women have been tabulated by age of the mother. From this, estimates of child mortality (qi) have been worked out using Brass technique, where q (i) is the probability of a newborn child dying before age (i) = 1, 2, 3 and 5.

It is observed from the above table that the child mortality estimates in the district and the state has decreased in 1991 when compared to those in 1981.

ANNEXURE III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE

The measures of fertility worked out based on the F-series tables of 1991 census pertaining to Tamil Nadu and Vellore district are given below:

ESTIMATES OF FERTILITY INDICATORS, 1981 AND 1991.

Sl. No	State / District	Year	CBR	TFR	TMFR	GFR	GMFR
1	Tamil Nadu	1981	32.0	3.9	5.5	123	169
		1991	26.4	3.1	4.8	99	136
2	Vellore	1981	34.3	4.5	5.7	138	180
		1991	28.5	3.5	5.1	110	149

Source: Occasional paper No. 1 of 1997

The values of CBR, TFR, TMFR, GFR and GMFR are presented separately for Tamil Nadu and Vellore District in the above table. These values can be compared for 1981 and 1991 Censuses. The table shows that in the Vellore District, all the above-mentioned rates from 1981 to 1991 have declined. Similar trend is observed in Tamil Nadu Sate also. On comparing the district level data with the State level data in the above table, it is observed that all the above-mentioned rates at the district level are higher than those at the State level.

Different fertility measures indicate that mostly all the fertility levels in the district are lower compared to the state average during 1991. This is duly supported by the higher age at marriage of females in the district, compared to state as is evident from the above table.

IMPORTANT INDICES OF FERTILITY - 1991

Fertility Indices	Vellore			Tamil Nadu		
	Total	Rural	Urban	Total	Rural	Urban
Number of children ever born per ever married women in age group 45 - 49	3.7	3.6	3.9	3.4	3.4	3.6
Child - women ratio (0-4 years)	412	434	369	348	369	311
Child - women ratio (5-9 years)	492	497	481	447	462	418

One of the most useful indices that can be derived from the question on numbers of children born alive is the average number of children ever born per ever married women by age - group. Since most of the women complete their reproduction by the age - group 45 - 49, the average number of children ever born alive per ever married women in the age - group 45 - 49 is termed as an index of completed level of fertility. Ever married include widows, divorced and separated women also.

In the above table, average number of children born per ever married women in the age group 45 - 49 in 1991 has been presented for total, rural and urban areas for Vellore District and Tamil Nadu. It is observed from the above table that the number of children ever born per ever married women in rural and urban areas of the Vellore district is almost same.

Child-women ratio, a relative measures, is calculated to know the fertility performance of women. It is seen from the above table that child-women ratio for both 0-4 years and 5-9 years in rural areas was higher than urban reas of the Vellore District and Tamil Nadu.

PERCENTAGE DISTRIBUTION OF POPULATION BY PLACE OF LAST RESIDENCE

Place of last Residence	2001 Census			1991 Census		
	Persons	Males	Females	Persons	Males	Females
Total Migrants	**816,995**	**287,924**	**529,071**	**664,254**	**196,855**	**467,399**
1. Last residence elsewhere in India	810,546	284,636	525,910	644,884	189,591	455,293
	(99.2)	(98.9)	(99.4)	(97.1)	(96.3)	(97.4)
2. Last residence within the state of enumeration but outside the place of enumeration	771,113	271,638	499,475	601,083	177,020	424,063
	(95.1)	(95.4)	(95.0)	(93.2)	(93.4)	(93.1)
(i) Elsewhere in the district of enumeration	647,881	226,765	421,116	456,721	129,970	326,751
	(84.0)	(83.5)	(84.3)	(76.0)	(73.4)	(77.1)
(ii) In other districts of the state of enumeration	123,232	44,873	78,359	144,362	47,050	97,312
	(16.0)	(16.5)	(15.7)	(24.0)	(26.6)	(22.9)
3. Last residence in other States in India beyond the State of enumeration	39,433	12,998	26,435	43,801	12,571	31,230
	(4.9)	(4.6)	(5.0)	(6.8)	(6.6)	(6.9)
4. Last residence outside India	6,449	3,288	3,161	9,640	4,944	4,696
	(0.8)	(1.1)	(0.6)	(1.5)	(2.5)	(1.0)
5. Unclassified	0	0	0	9,730	2,320	7,410
	(0.0)	(0.0)	(0.0)	(1.5)	(1.2)	(1.6)

Note: Percentages are given in paranthesis

The above table is presented to compare the migrant population based on the place of last residence between 1991 and 2001 Censuses in the district. Majority of the migrants (95.1%) were from other places within the district of enumeration who lived elsewhere and moved to the place of enumeration. In 1991 Census, this accounted 93.2% who lived elsewhere within the district of the total population in the district. Population moved to this district from other states accounted 4.9%in 2001 and 6.8% in 1991 Census.

INTER STATE MIGRANTS

Serial No.	State	2001		1991	
		Migrants	% to Total Migrants	Migrants	% to Total Migrants
1	Andhra Pradesh	18181	44.2	21590	44.7
2	Karnataka	13569	33.0	17441	36.1
3	Kerala	3303	8.0	4060	8.4
4	Pondicherry	637	1.5	720	1.5
5	Maharashtra	880	2.1	740	1.5
6	Total for five State	36570	88.8	44551	92.2
7	Other State	4601	11.2	3760	7.8
	Total	**41171**	**100.0**	**48311**	**100.0**

In respect of Vellore District, 41,171 migrants were from other States in 2001 Census, lesser when compared to 1991 Census (48,311). The migrants from Andhra Predesh to Vellore district reported the highest with 44.2%, followed by Karnataka with 33.0%, Kerala with 8.0%, Maharashtra with 2.1%, Pondichery with 1.5%, and rest from remaining States with 11.2% in 2001 Census.

TALUKWISE DISTRIBUTION OF MAJOR RELIGIONS

Serial Number	District / Taluk	Census Year	Population	Hindu	Muslim	Christian	Sikh	Buddhist	Jain	Other religion persons	Religion not stated
	Vellore	**2001**	**3,477,317**	**3,016,962**	**350,771**	**102,477**	**535**	**380**	**3,489**	**297**	**2,406**

		1991	424,747	394,081	25,278	4,989	48	0	251	33	67

Note: Katpadi was a part of Vellore taluk in 1991 census

ANNEXURE - VI

MARIRAL STATUS OF POPULATION

Marital status is defined as under:

Never Married: A person who has never been married at any time before

Married / Currently Married: A person whose marriage is subsisting with spouse living. It may be the first or subsequent marriage of either of the persons. Persons who are recognized by custom or society as married and persons in stable de facto union are also considered as married.

Widowed: A person whose spouse is dead and who has not been married again.

Divorced or Seperated: A person who has been separated from the spouse and is living apart with no apparent intention of living together again or who has been divorced either by decree of a law court or by accepted social religious custom but who has not been re - married.

SEX-WISE PERCENTAGE DISTRIBUTION OF MARITAL STATUS

Census Year	Sex	Never married	Married	Widowed	Divorced / Seperated	Unspecified
2001	M	52.8	45.3	1.7	0.2	0.0
	F	41.4	47.4	10.4	0.8	0.0
1991	M	54.6	43.4	1.8	0.2	0.0
	F	44.3	45.5	9.7	0.5	0.0

From the above table we see that out of total population, 52.8% males and 41.4% females were unmarried in 2001 Census. Whereas 54.6% and 44.3% for males and females respectively were never married in 1991. In case of married females , 47.4% in 2001 and 45.5% in 1991 Census found married in Vellore District.

ANNEXURE - VIII

DISTRIBUTION OF DIFFERENT MOTHER TONGUES IN THE DISTRICT

MOTHER TONGUE

The definition of mother tongue is same as in 1991 Census. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants is deaf, the language usually spoken by the mother should be recorded."

As per the Census concept, each language is a group of mother tongues. The Census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the mother to the person. There are 18 languages included in the Eighth Schedule to the Constitution of India (Scheduled Languages).

ANNEXURE VIII : DISTRIBUTION OF DIFFERENT MOTHER TONGUES RETURNED

Serial number	Mother Tongue	Census Year	Number of persons who returned the mother tongue as their mother tongue					
			Total	Percentage to total population	Rural	Urban	Proportion	
							Rural	Urban
