CENSUS OF INDIA 2001

SERIES-12 **KARNATAKA**

DISTRICT CENSUS HANDBOOK

Part - A & B

CHAMARAJANAGAR DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

Directorate of Census Operations, Karnataka

F O R E W O R D

1. The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to taluk/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri.H.Shashidhar, Director of Census Operations, Karnataka. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division, Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and other who have contributed to make this publication possible.

Motif

Suvarnavathy Reservoir in Chamarajanagar

A symbolic representation of water bodies such as rivers, reservoirs, water falls, multi-purpose tanks, barrages, seas and oceans etc., in the district is presented on the cover of the District Census Handbook.

The photograph on the cover represents the crest gate of Suvernavathy Reservoir built across Suvarnavathy River near Attigulipura village of Chamarajanagar taluk.

The length of the dam is 3840 ft. and its height is 85 ft. The gross storage capacity of the reservoir is 1.26 TMC and it provides irrigation to 7,000 acres, of which 6,600 acres through Right Bank Canal and 400 acres through Left Bank Canal. 9,694 acres of land are also irrigated through river channel and tanks below the reservoir. The inflow received at Suvarnavathy reservoir was much below the estimated yield at the time of project planning. Hence to augment flows at Suvarnavathy a link canal for a length of 2.8 Km with a capacity of 750 Cusecs to divert excess flow available at Chikkahole Reservoir, which is located at a distance of 3 km., to Suvarnavathy Reservoir was constructed in 1988 at a cost of Rs.59.5 lakhs.

The reservoir has Left and Right Bank Canals. The length of Left Bank Canal is 5.2 kms and that of Right Bank Canal is 19.9 kms. Apart from the Left and Right Bank Canals, there are a few diversion river channels in the downstream of Suvarnavathy Reservoir. Hongalawadi Anicut is one of them and it is the only Anicut which has a permanent masonry weir structure with canal on the left side. The other river channels do not have any permanent structure but are only open cut channels. Whenever the water is allowed in the river for these river channels atchkatdars will make their own arrangement for drawals of water with temporary bunds.

There are numerous feeder channels from this anicut totalling to 49.12 km and 55.4 km feeder channels below the Hongalawadi anicut.

P R E F A C E

In the foreword to the 2001 series of the District Census Handbooks, Sri. D.K. Sikri, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain salient data on the population for every village and town as revealed by 2001 Census. They also contain a wealth of information regarding villages and towns which, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information is also of considerable importance in the context of planned development.

The District Census Handbook is divided into two parts: Part A contains information regarding each village and town (Village Directory and Town Directory collected from various sources) and Part B which contains the data on the population collected during 2001 Census - the Primary Census Abstract. The data published in Part B was collected during February-March 2001 in the Population Census.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in 1999. The Village Directory formats were mailed to the Deputy Commissioners of Districts for obtaining the village wise particulars through Village Accountants. Similarly the Town Directory formats were mailed to the Commissioners of Corporations, Chief Officers of Town Municipal Councils, Town Panchayats, etc. The village wise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1991 District Census Handbooks. The Household Schedules, which were canvassed to collect the population data during 2001 Census, were scanned and data captured was processed electronically. The Primary Census Abstract was generated centrally on the computers by Registrar General, India.

In compilation of the District Census Handbooks, the Census Directorate had the co-operation of various departments of the State/Central Government. The Census Directorate gratefully acknowledge their assistance.

I take this opportunity to offer my grateful thanks to Sri. H. Shashidhar, Director of Census Operations and Sri. S.R. Raghavendra Rao, Deputy Director (Retd.) for their valuable guidance. I am also thankful to all the officers and officials of this Directorate who have been actively involved in the compilation of this volume.

I am highly grateful to Sri. J.K.Banthia, I.A.S., Ex. Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Sri R.G. Mitra, Ex. Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General and Sri S.L.Jain Deputy Director of Social Studies Division and Dr. R.P. Singh, Ex. Deputy Registrar General (Map) for their guidance.

District Highlights - 2001

1 Chamrajnagar district is carved out from the erstwhile Mysore district during the year 1997 (02-08-1997) and comprises of four taluks viz, Gundlupet, Kollegal, Yalandur, and Chamrajnagar.

2 The district has the second lowest population in the state and it is one among the three districts which have recorded less than ten lakh population.

3 The decadal growth rate of the population in the district is 9.3 per cent and ranks third among the districts having the lowest growth rates.

4 The density of the population is 189 per sq. km. and ranks in 21st place among the districts.

5 The sex ratio of the district is 971 and ranks in 15th place among the districts in the state.

6 The literacy rate for the district is 50.9.

ANALYTICAL NOTE

(i) HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

Introduction

The District Census Handbook is the most valuable district level publication brought out by the Census Organization. It contains micro-level data down to the lowest administrative units viz, revenue village in the case of rural areas and Division/Ward level in the case of urban areas. It is extremely useful to the planners, administrators, demographers, sociologists, etc., as it contains resourceful wealth of data regarding basic amenities available in each villages and towns of the district such as educational, medical, drinking water, post and telegraphs, transportation and communication, banks, societies, recreation, power supply, export/ import of important commodities and land use besides, the particulars revealed during the latest census enumeration. It is for the first time that the district census hand book series was included in the census publication programme at the 1951 census, in order to satisfy the growing demand by the administrators, the planners, research scholars, demographers and the other such census data users, for micro-level data. The idea of compiling the District Census Handbooks was pioneered by Sri R.A.Gopala Swamy, I.C.S. the then Registrar General, India and Ex-officio Census Commissioner of India, with a view to preserve the Census records prepared for areas below the district level. He proposed that all the district Census tables and Census abstracts prepared during the process of sorting and compilation, should be bound together in a single manuscript volume and named as the District Census Handbook and suggested that the State Government should take up printing and publication at their own cost. Then onwards, the District Census Handbooks were published in each Census with improved pattern with an aim to give the Census and Non-census data at micro level for each village of the taluk as a whole to suit the requirements of various departments.

The data in the District Census Handbook will help not only in local area planning but also in regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. The District Census Hand Book sought to replace “Part IV - Taluk Tables and Part V - Village Tables” of the earlier censuses and to present the basic demographic and economic data in the form of “Primary Census Abstract” in respect of each and every village and town within the jurisdiction of the district. The district census handbook consists of two parts, viz, Part A and Part B. Part A comprises village and Town Directory while Part-B contains Village and Town level Primary Census Abstracts. In addition, these volumes contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

District Census Handbook 1961

It was in 1961 Census that the scope of District Census Hand Book was shaped in the present form by presenting (i) an account of descriptive note on the district, (ii) a set of non-census data tables dealing with the administrative statistics of the district for a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban Primary Census Abstracts depicting the nine fold industrial classification of workers. Information on the availability of certain basic amenities in villages and towns, such as the source of drinking water and educational institutions was also presented in the volumes. However, the district census handbooks of 3 out of then existing 19 districts viz, Bangalore, Dharwad and Mysore were confined to the publication of the village-wise and urban (census enumeration block-wise) Primary Census Abstract only.

District Census Handbook 1971

During the 1971 census, the district census handbook was further refined to present the data in a systematic way. In view of countrywide uniformity in approach and to have a comprehensive coverage, the District Census Hand Books were presented in three parts each, for a district. Part A incorporated the Town and Village Directories.

Part-B incorporated the Primary Census Abstract and included data, in the case of rural areas down to the village level and in the case of urban areas up to the block level. In addition, an introduction was given wherein the changes in jurisdiction, if any, of the district or of the taluks and the changes in the number of villages between 1961 and 1971 were explained. Part-B was essentially demographic in nature and was the end product of the tabulation of the enumeration results. Part C incorporated other census tables and administrative statistics. For convenience, Part-A and Part-B of the District Census Hand Book were presented in one volume and Part-C in a separate volume. In part-C volume, the district and taluk maps were included. These maps were prepared on the basis of maps obtained from the competent authorities concerned.

District Census Handbook 1981

The District Census Hand Book series of 1981, had some new features along with the restructuring of the formats of village and town directories, keeping in view the comparability of 1971 data. All the amenities except power supply in the village were brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place/village where it is available were given. A few new items of information such as adult literacy centres, primary health sub-centres and community health centres/workers, data on the availability of Newspapers, Motor Vehicles, etc., in the village, were introduced in the village directory to meet the requirements of the "Revised Minimum Needs Programmes". A new column "total population and number of households" was introduced to examine the correlation of the amenities with the population and number of households they serve. The contents of Part-A were further enlarged by including two appendices, namely a list of villages not having any amenities and a distribution of villages according to the proportion of Scheduled Castes and Schedules Tribes in the total population of the village. The format of Town Directory were also modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items such as class of town and its population, population of SC & ST, decadal growth rate of population, working women's hostel, adult literacy classes / centres, storage system regarding drinking water supply etc., and also the information about the nearest place and distance having educational, medical and fire-fighting facilities, in case such a facility is not available in the referent town. A new statement on civic and other amenities in slums in Class I and Class II town were included to help the planners to chalk out their programmes of slum improvements.

District Census Handbook 1991

The presentation of the District Census Hand Book for the 1991 Census was more or less similar to the manner followed in 1981. The format of Primary Census Abstract was restructured slightly. Nine-fold industrial classification of main workers was given as against four-fold classification. The sex-wise population in the age-group of 0-6 was included in the Primary Census Abstract for the first time to enable data users to compute more realistic literacy rates as all the children below 7 years of age were treated as illiterate at the 1991 census. One of the important innovations in the 1991 census was the Community Development Block-level presentation of data in the village directory and Primary Census Abstract instead of the traditional taluk/PS level presentation. C.D.Block is the lowest administrative unit for developmental planning. The choice of the C.D. Block as the unit for data presentation was formulated to help the planners in micro-level developmental plans. Another important improvement at the 1991 Census was dissemination of data through magnetic tapes/floppies in which both the computer as well as manual codes for each revenue village were provided along with the corresponding codes of 1981 Census. In the volumes of the District Census Hand Books, the computer codes assigned to the revenue villages in the 1991 Census and the corresponding codes of 1981 Census were presented so that it may facilitate the data users to use the data either from magnetic tapes or computer floppies.

Scope of the 2001 District Census Handbook

Like in the previous censuses, the District Census Hand Book (DCH) for the 2001 Census is brought out in two parts as usual viz., Part-A The Village and

Town Directory, and Part-B the Village and Town Primary Census Abstract.

The District Census Hand Books for the 2001 census is essentially presented in the similar manner in which the District Census Hand Books of 1991 census were presented. This is because the data would be comparable with the earlier censuses and also to study the changes taken place during the decades and hence the approach in 2001 census is similar to 1991 census. The contents have been slightly enlarged and the formats too are restructured to suit the requirements of the data users. In the village directory for 2001 census certain new amenities like, news papers, magazine received, Income-Expenditure of the local bodies, information on number of banks, credit societies, recreational and cultural facilities, most important commodities imported, manufactured and exported have been included whereas the information regarding the "Day or Days of market/*hat* if any" which was there in 1991 has been excluded. Apart from providing the information about the nearest place and distance in broad ranges for villages not having basic educational and medical facilities, information about the nearest place and distance in broad ranges for villages not having Middle School, College, Hospital (Allopathic), Maternity and Child Welfare Center and Primary Health Center are also provided this time. However, in the town directory there are no changes except in the statement IV-A where this statement is separately numbered as Statement VII in 2001. Except these, the scope of 2001 series of the District Census Hand Book has, by and large remained the same as in 1991. The non-census information collected at the village level and town level was scrutinized and verified. In case of glaring discrepancies the data were cross-checked with data made available by the respective parent departments for validation.

One of the significant changes made in 2001 series of District Census Hand Book is that Primary Census Abstracts are available to the jurisdiction of the Panchayats in the district. With the constitution (73rd Amendment) Act, 1992, it has become necessary for the census organisation to provide population data for the territorial area of a panchayat in order to strengthen panchayat raj system in the country. In view of this, panchayat-wise population figures for total population and for Scheduled Castes and Scheduled Tribes population has been compiled and presented in the form of Annexure-I for each district.

Further another important step taken during the 2001 census, is assigning the Permanent Location Code Numbers (PLCN) to the villages. Location code number is a simple but unique device by which every area in an administrative unit in the State/U.T. can be identified. Thus assigning of Location Code Numbers at various administrative levels, right from State/U.T. to the lowest level namely enumeration block, in census taking is an important step. Each clearly demarcated area can be referred to by a combination of numbers. In a State or U.T. the next administrative area is District, followed by taluk or police station, circle, Development Block or Mandal, etc., next below this administrative area, in urban areas are cities/towns, further divided into wards/ divisions and villages in rural areas. The Location Code Numbers to various administrative areas are assigned in an orderly manner always beginning from northwest point and the numbering proceeds in a serpentine manner, keeping the geographical continuity, ultimately ending at the South-East point.

There was a great demand from different organizations to study the village level data over a time span and hence a scheme of assigning permanent location code numbers to the villages and the higher levels of administrative areas is devised to ensure data comparability over a period of time. In Indian Census, Location Code Numbers are allotted to each village based on traverse system (zigzag) in a serpentine manner at taluk level. These numbers for villages run from '1' to 'N' in each taluk independently. This system was adopted until 1991 census. But, for the Census of India 2001, all the villages in a state/U.T. are assigned with a Location Code Number in one continuous series beginning from "1" to "N" for the entire state/U.T. and it is not confined to a taluk. The field length of the complete PLCN structure for a village has been kept up to 8 digits and therefore the location code number of village in a taluk contains 8 digits number for 2001 Census.

(ii) BRIEF HISTORY OF THE DISTRICT

Chamarajanagar district was newly constituted vide Government Notification No.RD.42.LRD.87 (Part-3) dated 2.8.1997. It was bifurcated out of Mysore district comprising the taluks of Chamarajanagar, Gundlupet, Kollegal and Yelandur. Chamarajanagar, the district headquarters, was previously known as "Arikotara". Its present name was bestowed in 1880 by Krishnaraja Wodeyar of Mysore, who in 1825, built a large temple of Chamarajeshvara in Dravidian style here and named the town as Chamarajanagar. Ramasamudram, a locality situated at about 5 kms from the core town, was a separate municipal town for nearly four decades from 1921 to 1961. In 1961, the two towns were merged into a single unit, namely Chamarajanagar. Near Ramasamudram there exists the ruins of an extensive city of antiquity the name of which according to tradition was Manipura.

The district is rich in antiquarian remains with a large number of inscriptions. Activity of the pre-historic man is noticeable particularly in the alluvial plains of the river valleys like those of the Cauvery and its tributaries. Artifacts belonging to the Palaeolithic, Neolithic and Megalithic phases have been unearthed at several sites located in the taluks of Yelandur, Chamarajanagar and Kollegal.

The Gangas who established their dynasty in the second century AD, ruled over the greater part of the district till 1004 AD and the tract under their rule was known as "Gangavadi-Ninety Six Thousand". According to a tradition, the Gangas initially had their capital at Skandapura a place which is supposed to have been located at Gajalahatti on the banks of Moyar beyond the south of the Chamarajanagar taluk. Later, during the third century, the Gangas shifted their capital to Talakad on the banks of the river Cauvery in Tirumakudalu Narsipur taluk of the present Mysore district. During this period Chamarajanagar district formed part of the "Punnadu Ten Thousand" kingdom with its capital at Kittipura identified with Kittur on the banks of the river Kabini in Heggadadevanakote taluk of the present Mysore district. In the 5th century, Ganga King Avinita married the daughter of Skandavarma the Punnadu King and later, his son Durvinita absorbed Punnadu Ten Thousand into the Ganga dominions.

In the early 9th century, the Rashtrakutas of Manyakheta captured and imprisoned the ruling Ganga king and appointed their own viceroy to administer territories ruled by Gangas. In subsequent years the Ganga king recaptured the power. In the 10th century, there were matrimonial alliances between the Gangas and the Rashtrakutas resulting in the two powers to become close allies.

In about 1004 AD, Rajendra Chola invaded the Ganga kingdom, captured Talakad and renamed it as Rajarajapura. They speedily conquered all the territories in Mysore south of the Cauvery together with Srirangapattana alongwith the Bangalore and Kolar districts. They renamed all the conquered territories and area south of the present Mysore district was given the name Mudikonda Chola Mandala.

The Hoysalas in the meanwhile rose to power with Dorasamudra as their capital. In 1104 AD, the Hoysala King Bittideva, who later assumed the name Vishnuvardhana, captured Talakad, drove the Cholas out of Mysore and conquered all the former Ganga territories. He earned the title "Viraganga". The Hoysalas were in full control of the territory till the 14th century whereafter the Vijayanagara kings gradually established their supremacy throughout the south. Srirangaraya was appointed as the viceroy and he ruled the territory with Srirangapattana as his capital. At this time, a line of kings were ruling Padinadu (the name of which is surviving in Hadinadu) and there were also chiefs at Ummathur, Mugur and other places. Ummathur was formerly an important principality under the Vijayanagara kings. The rajas of Ummathur who exercised control for long over Nilgiris (Tamilnadu) were the traditional enemies of the rajas of Mysore and the Kalali chiefs. In 1673 AD, the Ummathur principality was annexed by the Mysore rajas alongwith Srirangapattana. The subsequent history of the region is closely associated with the rise of the Wodeyars of Mysore. The establishment of Wodeyar family is traced back to two brothers Yaduraya and Krishnaraya of Yadava dynasty (Yaduvansha) who, induced by circumstances,

had moved south from Gujarat to carve out the careers and happened to encamp at Hadinadu on the outskirts of Mysore in about 1399. Their help was sought for by the ruling family at Hadinadu to vanquish a tormentor. Subsequently the heiress of Hadinadu was offered in marriage of Yaduraya and thenceforth he became the chief of Hadinadu and the founder of the Wodeyar family. These rajas established themselves firmly as feudatory chiefs under the suzerainty of the Vijayanagara empire. With the decline of the Vijayanagara power, the Wodeyars of Mysore gradually rose to a position of independence. In 1610, Raja Wodeyar (1578-1617) got possession of Srirangapattana. The quite retirement of Tirumalaraya, the Viceroy of Vijayanagara to Talakad, enabled the peaceful occupation of the capital. Raja Wodeyar soon shifted the seat of his rule from Mysore to Srirangapattana from where he and his descendants continued to rule the country without any interruption till 1761.

Kanthirava Narasaraja (1638-1662) and Chikkadevaraya (1672-1704) are the two illustrious rulers of this dynasty. At the time of death of Chikkadevaraya, the kingdom had extended from mountain ranges of Chikmagalur and Tumkur districts in the north to the Annamalai and Palani hills in the south, from Salem in the east to Belur and Kodagu in the west. Thereafter, the royal power began to decline and the administration of the State fell into the hands of *Dalavayis*. In 1761 Haider Ali came to power and became the *de facto* ruler. His territory witnessed an unprecedented expansion of the Mysore kingdom. He was succeeded by Tipu Sultan (1778-1799) who continued the war with the British even after his father's death. Tipu Sultan was finally killed in 1799, in the battle field at Srirangapattana and his end paved the way for the establishment of British supremacy.

After the fall of Tipu Sultan in 1799, the Mysore kingdom was restored to the Wodeyars of Mysore by the British. Soon, the capital city was shifted from Srirangapattana to Mysore and with this the Mysore city began to flourish. Under the suzerainty of the British empire, the Wodeyars of Mysore ruled the kingdom till 1947 when the country acquired independence. However, for the brief period of 50 years from 1831-1881, the British ruled the State directly through their commissioners and reinstalled the Wodeyars dynasty on the throne after rendition.

Krishnaraja Wodeyar III struggled hard for the restoration of his State for several years and died in 1868 without success. As a result of his efforts, further in March 1888, his adopted son Chamaraja Wodeyar I was crowned as the king. After this rendition, many administrative changes were introduced. The post of Commissioner was abolished. Instead a British representative was appointed at the Mysore court. A post of *Dewan* was created to head the administration of the State along with two advisors. A representative assembly consisting of 144 members was constituted and this institution was the first of its kind in the entire country under the British rule. The subsequent rulers of the State like Krishnaraja Wodeyar IV and Jayachamaraja Wodeyar endeared themselves to the common man by their exemplary actions. The State administration was managed by a galaxy of able and illistrious *Dewans* resulting in the State becoming a model in the country. The city of Mysore and its surrounding areas enjoyed an aura of royal splendour and had their share of development. In September 1947, Mysore became part of Union of India and Maharaja of Mysore came to be titled as the *Rajpramukh* of the State.

As a consequence of the reorganisation of the States in 1956, the taluka of Kollegal belonging to the erstwhile Coimbathur district of Tamil Nadu, was included into the limits of the present Chamarajanagar district.

iii) Administrative setup and Jurisidictional changes during the decade 1991-2001

Chamrajnagar is located in the south most part of the Karnataka state. This district comes under Mysore Revenue Division one of the four revenue division into which the state is being organized for the purpose of general administration. Chamrajnagar was carved out as a separate district from the erstwhile Mysore district during 1997. Of the 11 taluks in Mysore district, 4 taluks have been transferred and formed into new district. The new district consist of 4 taluks namely, Chamrajnagar, Gundlupet, Kollegal and Yelandur. It has 4 towns

namely, Chamrajnagar, Gundlupet, Kollegal and Yelandur and there are no non-statutory towns in the district. The district is further divided into Revenue Sub-division and as such it has only one sub division. All the four taluks comes under the Kollegal sub division. After its bifurcation from Mysore district, the geographical area of the district is 5101.00 Sq.km. The district has 509 villages and 4 towns as per 2001 Census. As per 1991 Census, there were 5 towns in the district. Out of the 2 towns at Kollegal taluk, Malai Mahadeshwara Hills(NAC) which was partly shown as urban area covering an area of 903.93 ha. has been declassified into gram panchayat as per Government order vide No. G.P.ELN: 9/97-98 dated 28-12-98. Out of 140 villages in the same taluk one village namely Bastipura has been merged into Kollegal TMC vide Government notification No. HUD 450 MLR 95 dated 23-08-95 and the number of villages as per 2001 Census stands as 139. In Chamrajnagar taluk, out of 188 villages as per 1991 Census, 4 villages have been merged into Chamrajnagar TMC and the number of villages in the taluk as per 2001 Census is 184. In Yelandur taluk, 2 new villages have been created vide Government order No. Rd 26 LRD 92 dated 28-01-95 namely Kinakahalli and Mamballi. The total number of villages in this taluk has increased to 28. The total number of villages and towns as per 2001 Census can be seen in the statement given below.

STATEMENT SHOWING THE NUMBER OF VILLAGES / TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS IF ANY AND REASONS THEREOF

Sl. No	Name of Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalized for		Reasons for variation
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
1	Gundlupet	158	158	1	1	-
2	Chamarajnagar	184	188	1	1	Besides the taluk headquarters, it also became district headquarters after formation of new district. The civic status of the Town Municipality has been upgraded to City Municipality with extended jurisdictions vide Government of Karnataka Notification No HUD 448 MLR 95 dated 19.10.1995. The extended City limits, includes the entire geographical area of Karinanjapura, Somvarpet, Galipura and Mudalapura villages. As a result, the total number of villages in the taluk fell from 188 in 1991 Census to 184 in 2001 Census.
3	Yelandur	28	26	1	1	Kinakahalli and Mamballi are newly formed villages vide Notification No. RD 26 LRD 92 dtd. 29.01.95 With the addition of these two newly created villages, the total number of villages in the taluk has increased from 26 in 1991 to 28 in 2001. The civic status of Yelandur Town was upgraded from Mandal Panchayat to Town Panchayat vide notification No. HUD 641 MLR. 95 (32) dated 2.11.1995.
4	Kollegal	139	140	1	2	Bastipura, a revenue village has been included in the extended limits of Kollegal Municipality, vide Notification No. HUD 450 MLR 95 dated 19.10.1995 and the name of village has been deleted from the rural frame. With the deletion of this village, the total number of villages in the taluk has decreased from 140 in 1991 to 139 in 2001. Further one statutory town viz., Malai Mahadeshwara Hills (NAC) was declassified and included in the concerned village, which had no effect on the total number of villages.
	Total	**509**	**512**	**4**	**5**	**-**

Total Number of Towns/Villages

According to 2001 Census there are four towns and 509 villages in Chamrajnagar district. As compared to the position in 1991 where there were five towns and 512 villages in Chamrajnagar district.

Urban local bodies

The statutory urban local bodies are the Municipal Corporations and Municipal Councils. These urban local bodies elect Councilors/ Corporators from each ward and the tenure of the Councilors/Corporators would be for five years. The President or Vice-President of the Municipal Council and the Mayor/Deputy Mayor of the Corporations whose tenure will be for a period one year are elected from among the elected Councilors/ Corporators. The Chairman of various committees are also elected from among the elected Councilors for a term of one year.

The Chief Officer in Municipal Council and the Commissioner in a City Corporation are responsible for day-to-day administration and the executive authority is vested with them.

Zilla Panchayat and Taluk Panchayat

To promote the development of institution and secure greater measure of participation by the people in the local and governmental affairs by decentralization of power and functions for the purpose of development, planning and implementation of various programmes thereof Zilla Panchayats have been constituted in the State. The jurisdiction of Zilla Panchayat is coterminous with that of the corresponding district but excludes the statutory towns. Accordingly, Zilla Panchayat has been constituted for Chamarajanagar district and its jurisdiction extends over the Taluk Panchayats of the district. The jurisdiction of each Taluk Panchayat is coterminous with that of the taluk of the same name but excludes the area incorporated in the statutory towns or cities, if any.

The Zilla Panchayat elects its president and vice-president and chairman of its committees from amongst the elected members. The term of these elected representatives will be for five years. An IAS officer is posted by the State Government as Chief Executive Officer of the Zilla Panchayat. Various departments assist the Panchayat.

Grama Panchayats

The Government of Karnataka enacted the Karnataka Panchayat Raj Act 1993 on 30.4.1993 replacing its previous enactment in this regard for the formation of Grama Panchayat.

STATEMENT SHOWING NUMBER OF GRAMA PANCHAYATS AND HOBLIES/FIRKAS

Sl. No.	Name of Taluk	No. of Hoblis/Firkas	No. of Grama Panchayats
1	**2**	**3**	**4**
1	Gundlupet	4	30
2	Chamrajanagar	5	42
3	Yelandur	2	11
4	Kollegal	6	38
	Total	**17**	**121**

Details regarding Panchayatwise number of villages have been furnished in Annexure I.

The Gram Panchayat is authorised to function on the items listed in Schedule I of the Act namely, preparation of annual plans for the development of Panchayat area, preparation of annual budget, providing reliefs in natural calamities, removal of encroachments on public properties, organising voluntary labour and contribution for community works, maintenance of essential statistics of the village, in addition to matters relating to Agriculture, Animal Husbandry, Fisheries, Social & Farm Forestry, Khadi, Village & Cottage Industries, Rural Housing, Drinking Water, Roads, etc., Rural Electrification, Nonconventional energy sources, Poverty Alleviation Programmes, Markets & Fairs, Rural Sanitation, Public Health & Family Welfare, Women and Child Development, Social Welfare, Welfare of Weaker Sections, Public Distribution System, Maintenance of Community assets,

Construction and Maintenance of Dharmashalas, Chatras, Cattle Sheds, Ponds, Cart Stands, Slaughter Houses, Public Parks, Play Grounds, etc. Regulation of manure pits in public places and establishment and control of shandies. Such other functions as may be entrusted.

The Gram Panchayat is also empowered to make provisions for carrying out within its area any other work or measure which is likely to promote the health, safety, education, comfort, convenience or social or economic well being of the inhabitants of the Panchayat area.

(iv) PHYSICAL FEATURES

Chamrajnagar is located at the Southern most part of the Karnataka State. It has the greatest extent of 77 kms. from North to South and 146 kms. from East to West covering a total geographical area of 5101.0 Sq. Km. The most conspicuous areas of very high and very low area of the District is located at 300 and 1600 metres of contour lines above the mean sea level respectively

(1) Location and size

The district lies between the North latitudes $11^0$34'' minutes to $12^0$19" minutes and East longitudes between $76^0$27" minutes to $77^0$48'' minutes. The district is bound an North by Mandya, Bangalore Rural and part of Mysore Districts. On the east by Dharmapuri and Salem Districts of Tamil Nadu, and on the South by Periyar and Udagamandalam (Nilgiri) of Tamilnadu State. Heggadadevankote-Bandipur Forested upland of Mysore district and Waynad on the Western Ghats of Kerala State forms its Western boundary.

(2) Physiography

Physiographically Karnataka State has been formed into two well defined macro regions of the Indian Union: the Deccan Plateau and the Coastal Plains and Islands. Further the state has been divided into 4 micro regions considering the physio-graphic characteristics of the regions. The micro regions are the Northern Karnataka Plateau, Central Karnataka Plateau, the Southern Karnataka plateau and the Karnataka Coast. Chamrajnagar falls within the region of Southern Deccan Plateau.

The region in general represents an extension of both the Western ghats and the Eastern ghats. Some parts of the region also represents the landscape of a plain with a few residual knolls cropping at few places. The entire area is hilly covered with close reserve forests. Variations in height are quite high. The maximum heights of 1,750 metres above the mean sea level is found in Balaji beat of Kollegal taluk while the area along the Cauvery river on the Eastern fringe has a general elevation of around 300 meters. The famous Biligiri Rangan Hills are largely spread in the region covering Chamrajnagar, Kollegal and Yelandur taluks and appear like a tableland lifted abruptly from surrounding hilly area presenting a steep slopes on all sides. The next maximum height of 1454 metres is found on Gopalaswami Betta hill near village Lakkipura in Gundlupet Taluk.

(3) Drainage

Generally the drainage is towards east and comprises mainly of the Cauvery river basin besides those of the Kabini and the Survarnavati which are the tributaries of the Cauvery. It is famous alike for its traditional sanctity, its picturesque scenery and its utility for irrigation. It is also known as Dakshin Ganga or "The Ganges of South". The Cauvery flows in the eastern direction in Kollegal taluk before reaching Tamil Nadu. The Cauvery forms a boundary between Kollegal taluk and Mandya district for about 27 Km., Kollegal taluk and Bangalore district for about 20 km and Karnataka (Kollegal taluk) and Tamilnadu (Salem district) or about 64 kms before leaving the district in the South-East of Kollegal taluk near the Bodamalai Hills of the Mahadeshwara series.

The Kabini also called as the Kapila or Kappuhole is an important tributary of the river Cauvery. It rises in the Western Ghats at an elevation of about 2,140 meteres in North-Wynad in Kerala state as two streams, namely the Manantody Puzha and Panamaran Puzha. It is a perennial river. The tributory of river Kabini is the Gundal river also known as the Kaundinya river rises in the Gopalaswamy betta at an elevation of 1,678 meters and flows through length of 64 kms in Gundlupet Taluk.

The river Suvarnavati also called as Honnuhole is another important river of the district which rises

in the mountains of the South Eastern position of the district near Gajjalahatti vally and flows Northwards through Chamrajnagar and Yelandur taluks. It has a catchment area of 1,787 Sq. km and a total course of about 88 km in the district. Niredurgihalla from Attikani estate and the Araikadihalla originating at Dimbam are the two streams joining near Budipadaga to make the river Suvarnavati. Niredurgihalla traverses for about 19 kms and Araikadihalla traverses for about 32 kms, before joining Suvarnavati. Before joining the river Cauvery, the Suvarnavati is joined by another tributary called the Chikkahole. This tributary originates from Hasanus Ghat range to the South of Chamrajnagar close to the State border with Tamilnadu. A dam has been constructed across this tributary about 12 km away from Chamrajnagar. A dam is also been constructed across the river Suvarnavati at Attigulipura in Chamrajnagar taluk to feed for irrigation purposes.

(4) Climate

The climate of the district is moderate throughout the year. The year is divided into four seasons. The Summer season start from March to the end of May and it is followed by South West monsoon season which prolong upto the end of September. The hottest month of the year is April and the Coldest month is December. During April, the mean daily maximum temperature is 34^0C and the mean daily minimum temperature is 21.4^0C. Sometime the day tempertaure during summer may exceed 39^0C. In December, the near daily maximum temperature is 27^0C and the mean daily minimum temperture is 16.5^0C. On some days during the cold season the minimum temperature may go below 11^0C.

(5) Winds

The Winds are generally moderate with some strengthening during the south west monsoon season. During the months from May to September, the winds blow in the Westerly or South-Westerly directions. In October, the directions of the winds are easterly or north easterly and this condition persist for the next four months. In March and April, the winds are mainly Westerly or South-westerly in the mornings and in the afternoon it blows between North and East.

On some occasions, the depressions and Cyclonic storms at Bay of Bengal during October and November Crosses the East Coast and move West wards across the Peninsula. When it crosses, the district receives heavy rains with high winds. Thunder-storms are common during the hot season and the post-monsoon seasons. Rainfall during the monsoon period is sometimes associated with thunders.

(6) Rainfall pattern

The rainfall and the climate of the district are quite congenial for those working in the fields as well as to those who are engaged in agriculture. With regard to agro-climat conditions, Chamarajnagar has been classified as Southern Dry Zone. The district receives more than 50 Per cent of the rain during Kharif season, and hence it is also known as kharif Zone.

The entire District falls under Southern dry agroclimatic zones of the state. The taluks under the district are Chamarajanagar, Kollegal, Gundlupet and Yelandur.

The average Rainfall in the district ranges from 680 mm in Gundlupet taluk to 800 mm in Kollegal taluk. The rainfall decreases from north eastern part of the district towards south western part. The south western part of taluk of Gundlupet receives the lowest rainfall.

Among the taluks in the district the premonsoon rainfall contributes 27 to 34 percent of the annual rainfall, southwest monsoon contributes 30 to 42 percent and northeast monsoon contributes 31 to 36 per cent of the annual rainfall.

The coefficient of variation ranges from 41 to 49 percent for the premonsoon season, the highest variability (49 percent) being in the Yelandur taluk.

The coefficient of variation for southwest monsoon ranges from 45 to 56 percent, the highest being in Gundlupet taluk. The coefficient of variation for northeast monsoon ranges from 45 to 47 percent, the highest being for Kollegal taluk.

The coefficient of variation for Annual rainfall ranges from 29 to 35 per cent. The taluk of Gundlupet experiences high variability of rainfall

TALUK WISE RAINFALL PATTERN, CHAMARAJNAGAR DISTRICT

Taluks (No. of years of rainfall data available)	Statistical Parameters	Pre Monsoon	South West Monsoon	Northeast Monsoon	Annual Rainfall
1	2	3	4	5	6
Chamarajanagar (98)	Average rainfall (mm)	217	253	252	722
	Minimum rainfall (mm)	33	49	0	341
	Maximum rainfall (mm)	471	697	566	1,400
	Standard Deviation (mm)	88	121	113	206
	C.V.(%)	41	48	45	29
Gundlupet (98)	Average rainfall (mm)	231	209	248	688
	Minimum rainfall (mm)	24	7	30	77
	Maximum rainfall (mm)	532	620	515	1,580
	Standard Deviation (mm)	101	117	112	237
	C.V.(%)	44	56	45	35
Kollegal (45)	Average rainfall (mm)	224	309	267	800
	Minimum rainfall (mm)	14	74	0	341
	Maximum rainfall (mm)	579	835	654	1,687
	Standard Deviation (mm)	102	153	126	244
	C.V.(%)	46	49	47	31
Yellandur (43)	Average rainfall (mm)	230	358	259	847
	Minimum rainfall (mm)	66	59	15	407
	Maximum rainfall (mm)	495	736	521	1,373
	Standard Deviation (mm)	114	162	118	264
	C.V.(%)	49	45	46	31

A study of the rainfall deficit pattern during the last 20 years compared with the long term data for different seasons indicate no significant change in recent past during premonsoon period. Whereas during the southwest and northeast monsoon period, the rainfall deficiency is decreasing in two taluks viz. Gundlupet and Chamarajanagar and it is increasing in two taluks viz. Kollegal and Yelandur.

Rainfall deficit during last 20 years has been compared with that of long term data in different seasons and is presented in table following :-

TALUKWISE AND SEASONWISE COMPARISON OF RAINFALL DEFICIT DURING LAST 20 YEARS WITH 99 YEARS DATA, CHAMARAJNAGAR DISTRICT

Name of Taluk	Seasons and no. of years with Deficit Rainfall							
	Pre Monsoon		Southwest Monsoon		Northeast Monsoon		Annual Rainfall	
	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs.
1	2	3	4	5	6	7	8	9
Chamarajanagar (98)	34(35.0)	7(35.0)	26(27.0)	2(10.0)	39(40.0)	6(30.0)	24(24.0)	4(20.0)
Gundlupet (98)	37(38.0)	7(35.0)	38(39.0)	4(20.0)	39(40.0)	6(30.0)	25(25.0)	3(15.0)
Kollegal (45)	17(38.0)	7(35.0)	16(36.0)	9(45.0)	17(38.0)	9(45.0)	15(23.0)	8(40.0)
Yelandur (43)	23(54.0)	11(55.0)	11(26.0)	5(25.0)	17(40.0)	9(45.0)	9(21.0)	4(20.0)

Note : Figures in bracket indicate values as percentage of number of years for which data is available or for 20 years depending on the column in which it is given

The following inferences could be made**.**

1. The premonsoon, southwest and northeast monsoon rainfall in the recent 20 years is less deficit in two taluks (Gundlupet and Chamarajanagara) and it is more deficit in another two taluks (Kollegal and Yellandur) compared to the long term data, particularly during Northeast monsoon.
2. The annual rainfall trend analysis indicate increasing trend in all the taluks, except Kollegal taluk.

Source : Drought Monitoring Cell (Society of Govt. of Karnataka)

(7) Forestry

Of the total geographical area forest constitute 2756.1 sq.km covering nearly 50 percent of the total area. More than 70 percent of the forest area lies in Kollegal taluk and also to some extent in Gundlupet. The types of forest in the district are semi-evergreen, moist, dry deciduous, scrub and thorn forests. Apart from this some portion of revenue wastelands, which are not fit for agriculture, have been handed over to the forest department in mid-eighties to take up large scale afforestation programmes. In addition a few hundreds of square kilometre area have been earmarked separately for the purpose of Project Tiger in Bandipur National Park since 1973. Various forest products are systematically exploited on the principle of progressive and sustained yield. A number of forest based industries are permitted to take softwoods from the forest. The raw materials include plywood, matchwood, softwood, packing case wood etc. Eucalyptus plantations raised under various socio-economic programmes are reserved for supply of firewood and small timber to the rural and urban population. Bamboo was grown extensively in the district. Due to uncontrolled grazing and reckless removal by permit holders, the government has started extracting bamboos and supply them to bamboo depots in the district. Efforts are being taken up to preserve the forest. Under the social forestry project funded by the World Bank, afforestation programmes were taken up on a large scale by bringing in barren lands into the scheme. It was decided to plant trees in a phased manner on all available revenue wastelands, gomal lands, barren forest areas, roadside, foreshore of tanks and reservoirs, canal banks, fallow and marginal agricultural lands, etc., with the active participation of the village panchayat and the public.

(8) Geology

The Chamrajnagar district exposes a vast expanse of migmatite gneisses (Popularly known as Peninsular Genesis complex) within which elongate rafts and enclaves of supracrustal rocks consisting of high-grade schists occur. These high-grade schists are considered as belonging to the oldest group of supracrustal rocks. The peninsular gneisses are represented by migmatites of both diatexitic and metatexitic types with inclusions of emphibolite in different stages of assimilation. The migmatites are the predominant rock types occupying the vast stretch of plain terrain in the district. The high-grade schists are noticed as rafts within the gneissic complex in the district. Two parallel schist bands are exposed over a length of five kilometers and a width of one kilometer between southeast of Volagere and South-east of Amble in Yelandur Taluk. These bands chiefly comprise amphibolite, pyribolite and calc-silicate rocks. This band is associated with gold mineralization and available reports indicate mining activity in the past. East of Althur, a kilometer long schist band comprising amphibolitre, pyribolite and calc-silicate rocks occur.

The Southern termination of the lines closepet granite Batholith takes place in the Kollegal taluk. These graniter are 2,380 + my of age and are surrounded by the high hills of charnockite. The charnockites or the granulitic hypersthene rocks are found, on the ranges of Biligirirangan hills. There are numerous thin bands and lenses of similar granulitic hypersthene rocks in those areas. Dolorites are noticed traversing in all the above formation. Chamarajnagar, which forms the part of pre-cambrian shield of India, is relatively less vulnerable to earthquakes.

(9) Flora and Fauna

Flora :

The ecological factors of the district that lies in the southern most part of the Deccan plateau vary considerably and nurture different types of plants. The district receives fairly good amount of seasonal precipitation from south-west monsoon. The dry season is long and it is also a reproductive season. The leafless trees burst into flowers, set seed and develop fruits. The conventional showers in April-May come as a relief and trigger off a series of changes. The herbaceous plants, which survive the dry period by perennating underground parts, emerge through the soil with an array of flowers. These forests are termed as moist deciduous forests. The dry deciduous forests is adopted for a longer dry period. The trees are short and the undergrowth forms throny thickals. Dinduga (Anogeissus latifolia), taremara, (Terminalia bellirica) and alala (Terminalia

chebula) are the principal broad leaved trees of these forests. During the dry season, the large yellow flowers of arasina buruga (Cochlospermum religiosum) display a spectaular view.

Besides the trees there are many climbers and epihytes. The undisturbed moist deciduous forests make a good habitat for epiphytic orchids. The graceful spikes of sitahoo (Rhychostylis retusa) adorn many a tree during the dry season. Since the open canopy permits light to penetrate to the lower strata of the forest, there is a well developed shrub layer. Bodina gida (Ardisia solanacea) and Kodasige (Holarrhena puboscens) are conspicuous.

Some of the higher slopes of the Biligirirangana Betta and Mahadeswara Hills also have deciduous forests. The structure of the moist deciduous forests consists of a tree layer with an open canopy. A number of good timber trees are of native here. Nandi (Lagerstroemia microcarpa), saguvani (Tectona grandis) and matti (Terminalia alata) dominate in some places. Especially prominent during the dry period are the white flowers of Konana Kombu (Radermachera xylocarpa) and the red flowers of Kempuvanija (Erythrina indica) and bilisulige (Pterocarpus marsupium). The composition and frequency of the canopy trees vary depending on soil and rainfall. Gante mara (Schrekera Swietenioides) is much more frequent in the moist deciduous forests of the Biligirirangana hills.

Fauna :

Chamrajnagar district has a rich and colourful heritage in respect of wildlife. The forests of the district offer good habitat for larger grazing animals like the gaur and deer. The wildlife bearing forest areas can be seen in Kollegal hills. It is an eastern extension of the western ghats region except for the Biligiri rangana hill pocket, which can support only dry deciduous forests. The elephants are commonly found over most of this region as bamboo shoots and other plant fodder are available. The gaur, sambar and the spotted deer are seen in most places of the hill ranges. The wild dog is also found in these forests. Though tigers and panthers are spotted in these jungles, they are poor in number. This region which once enjoyed a rich fauna is diminishing largely due to human activities. The other animals that are habited in these forests include the jungle cat, the small Indian civet, and the mangoose. Also found are the bonnet macaque, the common languar, the Indian giant squirrel, the fascinating large brown flying squirrel much bigger than the giant squirrel, the Indian porcupine and the black napped hares. The four horned Indian antelope, the Indian wild boar, the sloth bear, the jackal, the Indian fox, the striped hyaena, the Indian bush rat and the Indian pangolin are sighted in these forests. During summer, birds of different kinds are seen. Some of them include, the southern yellow legged green pigeon, parakeets, the Indian lorikeet, the cuckoo, the crimson-breasted barbet, the green barbet, wood peckers, the southern tree pie and other common ground birds. Pythons are common in these jungles. The other snakes like the king cobra, the krait, the viper, the rat snakes water snakes, tree snakes and the common green-whip snakes are also found in the forests.

(10) Soils

The type of soils that are contained in the district are predominantly red loamy and are derived from granites and gneisses and vary from pure sandy soils to typical black cotton soils. Patches of schists are found in Yelandur and Chamrajnagar taluks. Deep red loamy soil occasionally interspersed with black soil are also found in all the taluks of the district. As per the definitions given by the National Bureau of Soil Survey and Land use Planning the names of soils, contained the district are: Ustalfs, Ustalfs-Tropepts, Usterts-tropepts, Udalfs-Tropepts, Ustalfs-Orthents, and Rock out crops. The Ustalfs are red loamy, red sandy and alluvial soils. The tropepts are shallow black, brown and alluvial soils of Southern region. The Usterts are deep black soils and Udalfs are high base status soils of humid regions. The Orthents are the recently formed soils. Generally the red soils are well drained and may not contain lime nodules and at depth. On the other hand, the black soils contain lime nodules have rich bases with good water holding capacity. The soils in Kollegal taluk is normal in PH and in other taluks are alkaline. In these soils, the soluble salt content is normal, the organic matter content is high, the availability of

phosphorous is poor and the soils contain variable amounts of potassium.

(11) Cropping pattern

The perennial flow of river Cauvery and its tributaries had helped their alluvial soils as fertile agriculture fields right from the prehistoric periods. The inscription of the historic rulers speaks of the steps taken to facilitate agricultural activities, and extension of irrigation facilities during their reign. For decades agricultural activity has been the main activity in the economy. The statistics reveals that more than 50% of the population is engaged in agricultural activity. The provisional figure for 2001 also emphasise the fact where the proportion of cultivation and agricultural labourers together constitute 71.2 percent in the district.

The below given table reveals data on land use pattern in the different taluks of the district for the year 1998-99 in Hectares.

LAND USE PATTERN FOR 1998-99 IN HECTARES

Name of Taluk	Geographical Area	Forest Area	Land put to Non-agricultural use			Uncultivable Fallow Land		Cultivable Fallow Land	Area Sown			Total Net Area Irrigated
			Barren and Uncultivable land	Land put to Non-agricultural use	Cultivable waste land	Permanent pastures	Trees and groves		Net Area Sown	More than once	Total Area Sown	
1	2	3	4	5	6	7	8	9	10	11	12	13
Chamarajnagar	123,078	26,903	2,763	9,962	2,921	11,703	1,179	22,266	45,381	9,200	54,581	6,962

Source : Chamarajnagar at a glance ; District Statistical Officer, Chamarajnagar

The Land use data for the district for the year 1998-99 reveals that the net area sown is 26.7 percent and the total area shown is 31.4 per cent. The cultivable waste land accounts for 1.4 per cent. An area of 48.4 per cent are covered by the forest. Cultivable follow land constitute about 10.6 per cent of the total geographical area.

LAND HOLDINGS IN HECTARES 1997-98

Name of Taluk	Marginal (Below 1)		Small (1–2)		Semi-Medium (2-4)		Medium (4-10)		Large (10 & above)		Total Holdings

Source : Chamarajanagar District at a Glance, 1998-99, Chamarajanagar, DES, Bangalore

The land holdings of different sizes are shown in the above table. The size of the agricultural holding is one of the important factors that determine the productivity of the land. The number of operational holding is 1.58 lakhs. The total area operated by 1.58 lakh holders are 2.01 lakhs hectares of land. It is

observed from the table that majority of the holders have marginal or smallholdings of below one hectare or one to two hectares. In terms of percentage, the marginal and small size holding together constitute 82.8 per cent On the whole, only 427 persons hold agricultural lands of 10 hectares and above.

AREA, PRODUCTION AND AVERAGE YIELD OF PRINCIPAL CROPS FOR 1998-99 UNDER ALL SEASONS

Principal Crops	Irrigated			Un-irrigated			Total		
	Area in hectare	Production in tones	Yield in Kgs per hectare	Area in hectare	Production in tones	Yield in Kgs per hectare	Area in hectare	Production in tones	Yield in Kgs per hectare

Total FoodGrains	**-**	**-**	**-**	**-**	**-**	**-**	**97,164**	**155,532**	**1,685**

Note : * Data for irrigated and un-irrigated area separately are not available.

Paddy is the major cereal crop cultivated in the district. About 18,465 hectares are put under cultivation of this crop. This crop is purely grown under irrigation facilities. The total production is 88,974 tones. Ragi is the next major crop grown in the district and 23,484 hectares are put under cultivation of this crop. In more than eighty percent of the area, the crop is being grown under rain-fed conditions. Besides these, crops like Jowar, Maize, Bajra and Wheat are also grown in the district. Among the oil seeds crops, more areas has been put under cultivation of Groundnut and Sunflower. The other oil seeds crops grown in the district are castor, Niger seed, Sesamum and Soyabeans. Among the oil seeds Groundnut and Soyabean has produced highest yield per hectare where it is 1,388 and 1,133 yield per hectare respectively.

Cotton, Sugarcane and Tobacco are the Chief commercial crops grown in the district. A total area of 30,350 hectare is put under cultivation of these crops.

The table below provides the details of various plantation and horticultural crops grown in the district. A total area of 2,820 hectares is covered under cultivation of these crops. Among these, Onion alone is grown under 1,586 hectares of area. The details regarding production and yield per hectares can be seen in the given table.

AREA, PRODUCTION AND AVERAGE YIELD OF CROPS FOR 1998-99 UNDER ALL SEASONS

Crops	Area in hectares	Production in tones	Yield in Kgs per hectare
1	2	3	4
Oilseeds Crops			
Groundnut	17,842	23,519	1,388
Castor	928	429	487
Sesamum	721	410	599
Soyabean	29	31	1,133
Nigerseed	848	175	208
Sunflower	8,408	5,007	627

Crops	Area in hectares	Production in tones	Yield in Kgs per hectare
1	2	3	4
Commercial Crops			
Cotton	12,738	32,303	454
Sugarcane	17,490	2,309,555	139
Tobacco	122	86	742
Plantation and Horticulture Crops

Arecanut (Processed)	174	124	717
Coconut	7,019	24,995	3,597

Source : Fully Revised Estimates of Principal Crops in Karnataka for the year 1998-99 Directorate of Economics & Statistics, Bangalore

Few condiments and spices are also grown in the district. The chief among them are Coconut and Turmeric besides other crops like Dry Chillies, Arecanut, Coriander, Garlic and Cardamoms. (Table 1-4)

(12) Irrigation :

More importance were given to improve the irrigation facilities and to upkeep and maintain right from the historical period. Many inscriptions refer to small and large canals constructed during the prehistoric period. One of the writing mentions that in Kollegal taluk, there were nearly forty to fifty reservoirs constructed during the period Dalawai of Mysore and Dodda Deva Raya Wodeyar.

The district has vast potentiality for ground water exploitation. The traditional way of exploiting groundwater is by means of digging wells. According to the Statistic, provided by the Directorate of Economics & Statistics for the year 1998-99, the total area irrigated by various sources of irrigation accounts for 33,840 hectares of area. Of these, area irrigated by wells alone constitutes 16,654 hectores. This is followed by 8,961 hectares irrigated by Canals, 4,170 hectares irrigated by Tanks, 3,590 hectares irrigated by Borewells and 465 hectares through lift irrigation.

By way of comparison between the taluks, more area has been brought under cultivation with irrigated facility in Kollegal Taluk. An area of 12,686 hectares was irrigated by various sources in the taluk. Irrigated through wells constitute about 8,500 hectares. Also considerable proportion of area has been cultivated through canals in the same taluk. The details regarding net area irrigated by various sources for the district can be seen in the table given below.

Apart from various sources listed in the table, the district's agricultural activity is supported by the three reservoirs built across the rivers passing through the district. They are Uduthorehalla project, Gundal Nallu Amanikere Reservoir project and Suvarnavathi reservoir project. Under Uduthorehalla project, a reservoir has been built across the Uduthorehalla stream a tributary of Thattehalla in Cauvery Basin near Ajipura village in Kollegal taluk. With canals on both banks, this project was designed to irrigate 6,273 hectares of fresh atchkat in addition to stabilising an extent of 324 hectares under the existing anicut. The Nallur Amanikere reservoir has been built across Gundlu stream near Ingalvadi village in Gundlupet taluk. This reservoir has been constructed to provide irrigation covering an area of 3,728 hectares in the taluk through the canals built on either side of the banks.

A masonry dam with earthen banks has been constructed under the Suvarnavathi project across the Suvarnavathi, a tributary of river Cauvery near Attigulipura village in Chamrajnagar taluk. An area covering 6,942 hectares will be irrigated through this project.

Another earthern dam has been constructed across the Gundal stream, a major stream flowing in Kollegal taluks and it is a tributary of the river Cauvery. Two canals on either side of the bank has been built and it is designed to provide irrigation covering an area of 8,176 hectares in the taluk.

NET AREA IRRIGATED BY DIFFERENT SOURCES

Name of Taluk	Net area irrigated for 1998-99 (Area in hectares)						
	Canal	Tank	Wells	Bore Wells	Lift Irrigation	Other sources	Total
1	2	3	4	5	6	7	8
Chamarajnagar	2,700	1,300	200	2,762	-	-	6,962
Gundlupet	-	110	6,454	408	-	-	6,972
Kollegal	3,461	120	8,500	140	465	-	12,686

(13) Natural Wealth

There are no major mineral resources known to have occurred in the district. Though the district is not rich in its mineral wealth, occurrence of few minor minerals is reported from certain parts of the district. Deposits of Copper, Corundum, Auriferous quartz reefs, Iron ore, Kyanite and Sillimanite, Magnesite, Limestone and Dolomite, and Ornamental stones are reported from the district.

The copper mineralization in the form of malachites and azurite encrustations are observed in the fracture plane in Mastihalli stream around Kalmathurdoddi in Kollegal Taluk. It is also reported from Halavanahundi, Porsegavandanapalya, Hadabanahatta and Adamalnathan areas in the same taluk. Few occurrences of corundum embedded in the quartzite as prismatic and barrel shaped crystals are reported from three km. north-east of Bheemanabeedu of Gundlupet taluk.

Occurrences of Auriferous quartz reefs, deposits of Iron ore, deposits of Kyanite and Sillimanite and deposits of Magnesite also have been reported in Kollegal taluk. The Limestone is being quarried and used as chips for mosaic flooring and also as a filler for the chemical fertilizers. Lime Kankar occurs on either bank of the river Gundal and near the villages Nenekatte, Bettadamadahally and Halladamadahally in Gundlupet taluk. Grey and greenish grey coloured moonstones exhibiting excellent silk occurs in Charnockites within Biligirirangana hills. Ordinary sand is available only in Kollegal taluk of the district. The taluk-wise mineral resources and their reserves wherever assessed and their production is given in the table.

TALUK WISE MINERAL RESOURCES OF THE DISTRICT

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor

(14) Animal Husbandry

DISTRIBUTION OF LIVESTOCK POPULATION IN THE DISTRICT

Sl. No.	Name of Livestock	Total Livestock
1	2	3
1	Cattle	272,184
2	Buffaloes	40,881
3	Sheep	117,785
4	Goats	98,329
5	Pigs	1,645
6	Rabbit	196
7	Dogs	25,911
8	Other Livestock	276
	Total Livestock	**557,207**
	Total Poultry	**186,000**

Source : A Handbook of Karnataka – 2001, Gazetteer Department, Government of Karnataka.

The details regarding total livestock population in the district are given in the table presented above. Livestock development plays an important role in providing gainful employment apart from providing meat, which has high nutritive contents. Animal husbandry activity in the district has made significant stride in its development in recent year. The adoption of modern techniques of breeding, feeding, management and disease control has contributed to the increase in productivity of livestock. Intensive cross breeding of indigenous cattle to increase milk production and breeding of indigenous sheep for improved wool and meat production are the few approaches adopted to bring about development in the sector.

The district has made substantial improvement in poultry development too. The District Poultry Rearing and Training Centre at Gundlupet, offers technical guidance and training to private breeders in poultry keeping and other preventive measures from infectious disease. Various poultry development schemes were undertaken by establishing poultry units under the Applied Nutrition Programme, which is in operation in the district.

(14) (A) Veterinary Institutions

The increased number of institutions in the district has contributed significant development in its animal husbandry activity. The statistics reveals that, the district has seven veterinary hospitals to meet the needs of the growing livestock population. There are also other health services like veterinary dispensaries, primary veterinary centres, Mobile dispensaries and artificial insemination centres in the district. The number of such institution category wise is given in the table presented below.

VETERINARY INSTITUTIONS IN THE DISTRICT FOR THE YEAR 2000

Sl. No.	Veterinary Services	No. of Institutions
1	2	3
1	Hospital	7
2	Dispensary	14
3	Primary Veterinary Centres	38
4	Mobile Dispensaries	4
5	Artificial Insemination Centres	12
	Total	**75**

(15) Fisheries

The districts, fishing activity is dependent on inland resources like the rivers and its tributaries, reservoirs, tanks, ponds, irrigation wells, etc., The district is endowed with 3 reservoirs, 131 major tanks, 225 minor tanks, 76 ponds, 2 fish farms and one private fish seed rearing centre. The ice plants and Freezing plants are yet to be set up in the district and also there are no fish markets in the district. The active fishermen population is 17,300 and ranks at 4th place among the districts of the State. The details of fishing activity can be seen in the table given below.

(16) Industries.

The district has not made much progress in the industrial sector. It has been declared as industrially backward district. The inscriptions on historical period talks about the traditional industries that flourished during the period. Some of the important industries that flourished include weaving, oil crushing, bronze work and manufacture of salt and lime. The district, large and medium scale industries are very few in number. There are totally 241 factories in the district giving employment to 1,480 person. The table below gives taluk-wise details of factories for the year 1998-99.

TALUKWISE DETAILS OF MAJOR FACTORIES FOR THE YEAR 1998-99

Source: District at a Glance 1998-99, Chamarajanagar, Government of Karnataka.

(17) Trade and Commerce

The district's rich agriculture and forest wealth paved the way for flourishing trading activities during the pre-historic days. The literature on Veerashaiva tradition speaks of traders from Chamrajnagar area taking betelnuts and other items to Madurai by foot. The commercial towns in the district traded items like textiles, Yarn, Betelnut, Tamarind, Pepper, Ginger, Ghee, Oil, Betel leaves, Jaggery, Salt, rice, Paddy, Gunny bags, Black gram and Tobacco. Improved roads during those days gave a further fill up to trading activities. The opening of Kollegal-Satymangala State road in the mid eighties established important trade links of the district with other district and State. The item of imports and exports of the district have changed from time to time due to several factors like industrialization, occupational changes and other factors. The main items of imports include sugarcane, Cocoon, Groundnut, Oil seeds, art silk yarn, Textiles, rice, food grains and cloths. The main items of exports included jaggery, beedies, coconuts, puffed rice, chillies, betel leave, silk thread, raw silk yarn,

twisted silk yarn, silk sarees, cloth and handloom fabrics and Kamblies.

Due to expansion of trading and commercial activities many new trade centers have emerged in the district. To support the expansion in this sector, commercial banking showed some improvement. The table given below indicates the taluk wise banks in the district as on 31-3-1999.

TALUKWISE DETAILS OF BANKS IN THE DISTRICT

Name of Taluk	Number of Banks as on 31.03.1999			
	Commercial Banks	Rural Banks	Urban Co-op Banks	Primary Land Development Bank
1	2	3	4	5

Chamarajanagar	5	5	1	1
Yelandur	3	3	1	1
Kollegal	13	9	2	1
Total	**34**	**23**	**5**	**4**

Source: Chamarajanagar District at a Glance 1998-99, Directorate of Economics and Statistics, Govt of Karnataka.

There are number of co-operative societies in different parts of the district and are dealing with various items produced by them. The number of regulated markets are only 6 and the total turnover of these markets are around 91.74 lakhs. The table presented below gives the details of number of co-operative societies by taluk in the district.

NUMBER OF CO-OPERATIVE SOCIETIES IN THE DISTRICT

Name of Taluk	Co-operation and Agricultural Marketing as on 31.03.99								
	Co-operative Societies					Regulated Markets			
	Agriculture	Milk Producers	Others	Total	Liqui-dated	Main	Sub	Total	Turnover in lakhs

(10) Transport and Communication

Unlike other districts, the transport and communication sector in Chamrajnagar district has not shown any significant improvement in its progress. As it can be seen from the table given below a distance of 18 kms in Chamrajanagar Taluk district is connected by railway line. The other taluks in the district cannot be approached by rail transport. In the case of transportation by roads, there are no national highways passing through the district. The State highway runs at a length of 222 kms, in the district. The roads in the district are further classified as major district roads, village roads, T.D.B. roads, Forest roads, Irrigation dept. roads, and Municipality roads.

The district is not connected by Air transport. With regards to Inland water transport, the rivers in the district are navigable unlike the rivers in the coastal districts. ferry services managed by the department of Ports and Inland water transport, is operational in Kollegal taluk. The ferry service between Dasanapura and Cauverypura that crosses the river Cauvery is operational only during Mahadeshwara temple *Jathra* for five days.

(19) Electricity and Power

Karnataka has a place of pride in the history of power generation in the country. KPTCL – Karnataka Power Transmission Corporation Limited (erstwhile KEB) is mainly vested with the functions of transmission and distribution of power in the entire state. The Corporation has been attaching great importance to electrification of villages and hamlets, tribal colonies and harijan basthis and energisation of irrigation pumpsets. Besides, this with a view to benefit weakest among the section of society schemes called Bhagya Jyothi / Kutir Jyothi have been introduced.

Statement given below shows talukwise number of villages electrified and talukwise energisation of IP as on 31.3.1999 in Chamarajanagar District.

TALUKWISE NUMBER OF VILLAGES ELECTRIFIED AND ENERGISED IRRIGATION PUMP SETS AS ON 31.3.1999

(v) CENSUS CONCEPT

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in

addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multistoreyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multistoreyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard, by definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. But if such hostels/ hotels have out houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in nonagricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multimember households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mantaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In respect of Karnataka State the Scheduled Castes and Scheduled Tribes as contained in the Scheduled Castes & Scheduled Tribes Orders (Amendment) Act, 1976 are valid for the purpose of Census of India, 2001. With the promulgation of Act 39 of 1991 however, the sub entries Naik, Nayak, Beda, Bedar and Valmiki were added under the main entry at S.No. 38 (Naikda, Nayaka, …..) of the Scheduled Tribes list of the State. There are in all 101 Scheduled Castes and 49 Scheduled Tribes in the State which are listed below:

Language and Mother tongue

As per the Census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is

taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if she or he is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betelnuts (areca).

Agricultural labourer

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the

household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. A person who has been engaged in the economic activity like above is termed as Household Industry Worker.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as an 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

A1ge

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1000 males in a population

(vi) NON-CENSUS CONCEPTS

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a subsoil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where

human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear female population of the same age group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear married female population of the same age group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Midyear female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Midyear married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1,000}$$

Age specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Midyear population of the same age group}} \times 1,000$$

q_1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2

Probability of dying between birth and age 2.

q_5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U_5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neonatal mortality rate and Post neonatal mortality rate. The neonatal mortality rate also comprises of two parts viz., early neonatal mortality rate and late neonatal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Perinatal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1,000$$

Still birth rate (SBR)

$$= \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and stillbirths during the year}} \times 1,000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant

iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/ Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000- 4,999,999); M5 (1,000,000-1,999,999); M4 (500,000-999,999); M3(300,000-499,999); M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its distribution

(a) Distribution of population in Rural-Urban Areas:

According to the 2001 Census, the total population of Chamarajanagar district is 965,462, comprising 489,940 males and 475,522 females. The population of the district forms 1.8 percent of the state population and ranks at 26th place among the districts. Out of the total population of the district 84.7 percent lives in rural areas while 15.3 percent lives in urban areas. Rural population of the district is distributed among 4 taluks and urban population spread over in 4 towns. The total urban population in the district is 148,090 persons comprising 75,157 males and 72,933 females. The total rural population in the district comes to 817,372 persons and is composed of 414,783 males and 402,589 females as per 2001 Census. This rural population is distributed in 424 inhabited villages and there are 85 un-inhabited villages in the district.

(b) Size-class and Civic Status of towns:

The Statement below gives the position and number of urban units according to size-class of population as per 2001 Census:

SIZE-CLASS AND CIVIC STATUS OF TOWNS

Serial number	Size-Class of town	Name and civic status of town		Urban Population		
				Persons	Males	Females
1	2	3		4	5	6
1	IV	Mudgal	TP	19,116	9,822	9,294
1	III	Gundlupet	TMC	26,340	13,414	12,926
2	II	Chamarajanagar	CMC	60,558	30,632	29,926
3	V	Yelandur	TP	8,585	4,396	4,189
4	II	Kollegal	TMC	52,607	26,715	25,892

Population Growth, Density and Sex-ratio:

Population Growth:

Chamarajanagar District witnessed a positive growth rate in each decade with 2.9, 7.3, 10.7, 15.1, 18.8, 15.5, 24.6, 15.0, and 9.3 percent during the period 1901 to 2001(except 4.6 percent negative growth during the decade 1911-1921). According to the 1991 Census the total population of the district was 883,365. There has been net addition of 82.097 persons during 1991-2001. The decadal growth rate of the district comes to 9.3 percent. The growth rate for the rural and urban areas of the district is 7.6 and 19.7 percent respectively.

Density:

The population density of Chamarajanagar district is 189 persons per Sq. Km. against the state average of 276 persons. At taluk level, the density varies between 121 persons in Kollegal taluk and 293 persons in Yellandur taluk. In rural areas it comes to 162 persons per Sq. Km., while in urban areas it comes to 2,712 persons. In urban areas, the density of population varies between 1,909 persons in Kollegal town and 19,965 persons in Malavalli town.

Sex Ratio:

There are 986 females for every one thousand males in Chamarajanagar district. The sex-ratio figures for rural areas and urban areas of the district are 990 and 967 respectively. It is also observed that, the proportion of females in rural areas is higher than that of urban areas. Sex-ratio in the age-group 0-6 comes to 934 girls per 1,000 boys in the district as a whole. In rural areas, this proportion is 929, while in urban areas the sex-ratio of Child population works out to 960 girls per 1,000 boys.

Work Participation Rate:

The work participation rate is defined as percentage of total workers to total population. According to 2001 Census, the total workers including main and marginal workers constitute 46.4 percent of total population of the district. Of the total workers, the share of main workers is 75.2 percent and marginal workers is 24.8 percent. The remaining 53.6 percent of population belongs to the category of non-workers.

As per 2001 Census among the main workers male participation rate in the district is 83.7 percent and corresponding proportion of females is 57.7 percent. The proportion of female marginal workers is higher than male marginal workers, as the females are attending to one or more economic activities in addition to their household duties to improve the family income. Majority of the workers are engaged in agricultural activities. Of the total 448,369 workers in the district, 27.7 percent of these total workers are categorized as cultivators, 43.0 percent agricultural labourers, 4.4 percent in household industries and 24.9 percent in other services.

Literacy:

A person who can read and write in any language is considered as literate in Census. All children of age below 7 years are treated as illiterate.

As per 2001 Census, Chamarajanagar district has reported 432,700 persons as literates constituting 50.9 percent of the total population excluding the population of 0-6 years. The male and female literacy rates in the district are 59.0 and 42.5 percent respectively. The literacy rate of males is higher than that of females. The gap in the male - female literacy rate is 16.5 in the district.

The total literacy rates of rural and urban area are 47.2 and 70.9 percent respectively. The male and female literacy rates in rural areas are 55.6 and 38.6 percent respectively. In urban areas these rates are 77.7 and 63.9 percent respectively. The gap in male - female literacy rates in urban areas is 13.8 as against 17.0 in rural areas. It is thus clear that females are better educated in urban areas than their counterparts in rural areas.

(c) Scheduled Castes and Scheduled Tribes Population 2001:

Of the 965,462 total population of the district 24.6 percent of the total population belong to Scheduled Castes and 11.0 percent to Scheduled Tribes. The percentage of Scheduled Castes constitute 25.4 percent in rural areas and 20.2 percent in urban areas. The proporation of Scheduled Tribes is 10.4 and 14.3 in rural and urban areas respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

Following tables which presents the data on population within the district, with a brief notes, which will provide an overview of the district

TABLE 1: DECADAL CHANGE IN POPULATION OF TALUKS BY RESIDENCE, 1991-2001

Taluk	Population						Percentage decadal variation 1991-2001			Percentage Urban Population	
	1991			2001							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12
Gundlupet	195,706	171,772	23,934	213,082	186,742	26,340	8.8	8.7	10.0	12.2	12.4
Chamarajnagar	311,323	266,845	44,478	337,571	277,013	60,558	8.4	3.8	36.1	14.2	17.9
Yelandur	71,715	64,037	7,678	77,971	69,386	8,585	8.7	8.3	11.8	10.7	11.0
Kollegal	304,621	257,036	47,585	336,838	284,231	52,607	10.5	10.5	10.5	15.6	15.6
District Total	**883,365**	**759,690**	**123,675**	**965,462**	**817,372**	**148,090**	**9.3**	**7.5**	**19.7**	**14.0**	**15.3**

Data given in Table 1 reveals that taluk-wise decadal variation of population in the district. During the decade 1991-2001, the variation is observed to be 9.2 per cent. Taluk-wise decadal change indicates that a highest of 10.5 per cent is reported from Kollegal taluk and the lowest of 8.4 per cent is reported from Chamarajanagar. The same trend is observed in respect of rural areas, whereas in urban areas, the percentage of variation is higher in Chamarajanagar. The percentage of urban population in 2001 has grown comparatively by 15.3 per cent.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Gundlupet	140	186,742	93,981	92,761	22 (15.7)	681	593
2	Chamarajanagar	171	277,013	139,593	137,420	22 (12.9)	847	762
3	Yelandur	28	69,386	35,267	34,119	1 (3.6)	71	70
4	Kollegal	85	284,231	145,942	138,289	1 (1.2)	30	24
Districts (Rural) Total:		**424**	**817,372**	**414,783**	**402,589**	**46 (10.8)**	**1,629**	**1,449**

Number and percentage of villages	Population 200-499		Number and percentage of villages	Population 500-999		Number and percentage of villages	Population 1,000-1,999	
	Males	Females		Males	Females		Males	Females
10	11	12	13	14	15	16	17	18
18 (12.9)	3,210	3,093	25 (17.9)	8,956	8,782	40 (28.6)	26,145	25,948
22 (12.9)	4,060	4,057	30 (17.5)	11,921	11,681	45 (26.3)	32,281	31,668
2 (7.1)	358	328	3 (10.7)	1,129	1,142	10 (35.7)	7,106	6,860
4 (4.7)	929	834	9 (10.6)	3,398	3,161	20 (23.5)	14,925	14,386
46 (10.8)	**8,557**	**8,312**	**67 (15.8)**	**25,404**	**24,766**	**115 (27.1)**	**80,457**	**78,862**

Number and percentage of villages	Population 2,000-4,999		Number and percentage of villages	Population 5,000-9,999		Number and percentage of villages	Population 10,000 and above	
	Males	Females		Males	Females		Males	Females
19	20	21	22	23	24	25	26	27
33 (23.6)	48,256	47,743	2 (1.4)	6,733	6,602	- (0.0)	-	-
46 (26.9)	72,323	71,239	6 (3.5)	18,161	18,013	- (0.0)	-	-
7 (25.0)	12,057	11,517	5 (17.9)	14,546	14,202	- (0.0)	-	-
30 (35.3)	43,568	41,842	18 (21.2)	64,260	60,513	3 (3.5)	18,832	17,529
116 (27.4)	**176,204**	**172,341**	**31 (7.3)**	**103,700**	**99,330**	**3 (0.7)**	**18,832**	**17,529**

Gundlupet and Chamarajanagar have each 22 villages where the population of each village ranges less than 200. One village each is Yelandur and Kollegal taluk have less than 200 persons. In the ranges given above, it can be seen that only in Kollegal taluk there are 3 villages where the population exceeds 10,000 in each village.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS

		Name of Town
(a)	New	
	(i) Statutory Town	**- Nil -**
	(ii) Census Town	**- Nil -**
(b)	Denotified	
	(i) Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as Census Towns	**- Nil -**
	(ii) Statutory towns of 1991 Census denotified but identifiable as Census Towns based on demographic and economic criteria	**- Nil -**
	(iii) Census towns of 1991 Census notified as Statutory town in 2001 Census	**- Nil -**
(c)	Declassified	**Malai Mahadeshwara Hills (NAC)**
(d)	Wholly merged with other town(s)	**- Nil -**

Declassified means the Census towns of 1991 Census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	13	3.1	2,909	0.4
11-20	13	3.1	4,585	0.6
21-50	20	4.7	6,208	0.8
51-100	26	6.1	22,536	2.8
101-200	78	18.4	95,150	11.6
201-300	93	21.9	180,827	22.1
301-500	105	24.8	271,669	33.2
501 +	76	17.9	233,488	28.6
Not known	-	0.0	-	0.0
District Total:	**424**	**100.0**	**817,372**	**100.0**

Population Density (Rural) of the district: 226.3

The density of villages distributed by ranges reveals that out of 424 villages in the district, 72 villages have less than 100 persons per sq.km. Similarly, 76 villages are thickly populated with above 500 persons per sq.km. Villages with population density of 101-200, 201-300 and 301-500 numbers to 78, 93 and 105 respectively. The population density of the rural area is 226.3 persons per sq.km.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT 1901-2001

Census Years	State			Census Years	District		
	Total	Rural	Urban		Total	Rural	Urban
1	2	3	4	5	6	7	8
1901	983	984	976	1901	1024	1023	1038
1911	981	984	960	1911	1015	1015	1010
1921	969	975	936	1921	1007	1008	997
1931	965	972	927	1931	998	1002	970

1961	959	973	913	1961	968	967	975
1971	957	971	913	1971	955	956	945
1981	963	978	926	1981	956	959	937
1991	960	973	930	1991	953	958	924
2001	965	976	940	2001	971	971	970

The above table gives the sex-ratio for the rural and urban population of the state as well as that of the district from 1901 to 2001 census.

It is observed that the state has recorded a decrease in the sex-ratio since 1901 census (983). However in 2001 census, the state has registered a better sex-ratio of 965 little higher than the ratio of 1991 Census (960).

For the district, the sex-ratio in 1901 Census was 1024, which gradually decreased over the decades. However, in 2001 Census, the district has recorded a sex-ratio of 968 better than that of 1991 Census 953. It is also observed that the sex-ratio in 2001 Census for the district (968), is more than that for the state (965).

Again, the ratio for the rural women in 2001 Census is comparatively better than, that for the urban women in the state as well as in the district.

TABLE 6 : SEX RATIO BY TALUKS, 2001

Sl. No.	Name of Taluk	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Gundlupet	984	987	964
2	Chamarajanagar	983	984	977
3	Yelandur	966	967	953
4	Kollegal	951	948	969
	District Total:	**971**	**971**	**970**

There are 971 females per 1,000 males in the district. The sex ratio for rural area is 971 and 970 for urban areas. In all the taluks and also both in rural and urban areas, males outnumber females in the district. The lowest of 948 females is reported from Kollegal rural areas.

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Sl. No.	Name of C. D. block	Sex ratio
1	2	3
1	Gundlupet	987
2	Chamarajanagar	984
3	Yelandur	967
4	Kollegal	948
	District (Rural) Total:	**971**

This table highlights the data on sex ratio by C.D. Blocks which includes all the villages in the district. The sex ratio is favourable for men in all the C.D. blocks. The lowest of 948 is reported from Kollegal and the highest of 987 is reported from Gundlupet C.D. block.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	8	1.9	164	0.0
700-749	1	0.2	93	0.0
750-799	3	0.7	344	0.0
800-849	10	2.4	1,866	0.2
850-899	28	6.6	35,868	4.4
900-949	82	19.3	199,986	24.5
950-999	157	37.0	359,145	43.9
1000-1099	120	28.3	212,777	26.0
1100+	15	3.5	7,129	0.9
District Total:	**424**	**100.0**	**817,372**	**100.0**
Sex ratio (Rural) for District:		**971**		

The sex ratio of rural population by ranges is given with the corresponding number of villages. Though the average sex ratio of rural population as given above is 971, the ratio for villages by ranges reveals that there are 135 villages which have the sex ratio above 1000, favouring women in rural areas.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Gundlupet	TMC	964
2	Chamarajanagar	CMC	977
3	Yelandur	TP	953
4	Kollegal	TMC	969
Sex ratio Urban for the district:			**970**

The sex ratio for the urban areas of the district is 970. The ratio is favourable for men in all the towns in the district. The lowest of 953 is reported from Yelandur (TP) and the highest of 977 is reported from Chamarajanagar (CMC).

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TALUKS, 2001

Sl. No.	Name of Taluk	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group

District Total:		**Total**	**114,937**	**58,511**	**56,426**	**964**
		Rural	**97,705**	**49,719**	**47,986**	**965**
		Urban	**17,232**	**8,792**	**8,440**	**960**

Variations in child sex ratio has been a long observed phenomenon and have undergone considerable debate among the researchers and policy makers from time to time. Although the observed variations in the ratio favouring males is a biological fact, continued decline over the periods causes great concern among the policy makers. The taluk-wise sex ratio for 0-6 population is given in the above table which reveals that there are 964 girls per 1,000 boys. The rural Chamarajanagar has recorded 1,006 girls per 1,000 boys. Gundlupet urban has recorded the lowest ratio of 933 girls per 1000 boys.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Gundlupet	20,714	10,556	10,158	962
2	Chamarajanagar	31,475	15,689	15,786	1,006
3	Yelandur	8,353	4,273	4,080	955
4	Kollegal	37,163	19,201	17,962	935
District (Rural) Total:		**97,705**	**49,719**	**47,986**	**965**

This table highlights the data on the sex ratio of population in the age group 0-6 by C.D. blocks which includes only the rural portions of the district. Among the C.D. blocks, except Chamarajanagar, the ratio is favourable for boys in other taluks, anmely, Gundlupet, Yelandur and Kollegal. Whereas Chamarajanagar C.D. block is the only block with a sex ratio of 1,006 girls for 1,000 boys.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	40	9.4	1,298	1.3
700-749	10	2.4	2,486	2.5
750-799	19	4.5	2,854	2.9
800-849	36	8.5	10,329	10.6
850-899	36	8.5	8,475	8.7
900-949	51	12.0	15,054	15.4
950-999	46	10.8	16,803	17.2
1000-1099	89	21.0	27,615	28.3
1100+	97	22.9	12,791	13.1
District (Rural) Total	**424**	**100.0**	**97,705**	**100.0**
Sex ratio (Rural) for District:		**965**		

The sex ratio of rural population in the age group 0-6 is 965 girls for 1000 boys. Though the overall sex ratio of the rural area favours boys, in 186 villages girls outnumber boys covering the population of 41.4 per cent. On the other hand, the situation is grim in 40 villages, where the ratio is less than 700 and in 29 villages it ranges between 700-749 and 750-799.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Gundlupet	TMC	3,193	1,652	1,541	933
2	Chamarajanagar	CMC	7,521	3,833	3,688	962
3	Yelandur	TP	954	491	463	943
4	Kollegal	TMC	5,564	2,816	2,748	976
District(Urban) Total			**17,232**	**8,792**	**8,440**	**960**

The child sex ratio for the urban agglomerations/towns is given in the above table. The overall urban sex ratio of the district is 960. In all the towns, the ratio favours boys and also the ratio exceeds 900 girls for 1,000 boys. The highest of 976 is reported from Kollegal (TMC) and the lowest of 933 is reported from Gundlupet (TMC).

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TALUKS, 2001

Sl. No.	Name of Taluk	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Gundlupet	Total	213,082	40,728	24,588	19.1	11.5
		Rural	186,742	37,230	18,562	19.9	9.9
		Urban	26,340	3,498	6,026	13.3	22.9
2	Chamarajanagar	Total	337,571	78,755	32,968	23.3	9.8
		Rural	277,013	67,816	27,068	24.5	9.8

		Rural	284,231	78,049	28,599	27.5	10.1
		Urban	52,607	13,543	6,240	25.7	11.9
	District Total:	**Total**	**965,462**	**237,624**	**106,111**	**24.6**	**11.0**
		Rural	**817,372**	**207,638**	**84,897**	**25.4**	**10.4**
		Urban	**148,090**	**29,986**	**21,214**	**20.2**	**14.3**

The total Scheduled Castes and Scheduled Tribes in the district are 237,624 and 106,111 persons respectively. This accounts for 24.6 per cent of Scheduled Castes and 11 per cent of Scheduled Tribes to the total population of the district. Among the taluk, Yelandur consists of highest per cent of Scheduled Castes and Scheduled Tribes in the district.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bijapur	315,457	73,897	3,725	23.4	1.2
1	Gundlupet	186,742	37,230	18,562	19.9	9.9
2	Chamarajanagar	277,013	67,816	27,068	24.5	9.8
3	Yelandur	69,386	24,543	10,668	35.4	15.4
4	Kollegal	284,231	78,049	28,599	27.5	10.1
District (Rural) Total:		**817,372**	**207,638**	**84,897**	**25.4**	**10.4**

Similar analysis is presented by C.D. block-wise which includes only the rural areas in the district. The total Scheduled Castes and Scheduled Tribes are 207,638 and 84,897 persons in the district. This accounts for 25.4 per cent of Scheduled Castes and 10.4 percent of Scheduled Tribes to the total population of the district. Among the C.D. blocks, Yelandur is populated with highest percent of both Scheduled Castes and Scheduled Tribes in the district.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	60	14.2	-	0.0
Less than 5	28	6.6	1,162	0.6
5-10	41	9.7	5,821	2.8
11-20	91	21.5	37,420	18.0
21-30	74	17.5	50,877	24.5
31-40	59	13.9	44,654	21.5
41-50	36	8.5	37,780	18.2
51-75	25	5.9	23,920	11.5
76 and above	10	2.4	6,004	2.9
District Total	**424**	**100.0**	**207,638**	**100.0**

The proportion of Scheduled Castes population in the villages are given by ranges in the above table. There are 60 villages in the district that does not have Scheduled Castes population. In 10 villages, more than 75 per cent of population in each village are Scheduled Castes. In 91 villages, the percentage ranges between 11-20, and in 74 villages it ranges between 21-30 per cent in each village.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	188	44.3	-	0.0
Less than 5	83	19.6	3,484	4.1
5-10	40	9.4	8,869	10.4
11-20	51	12.0	24,638	29.0

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
21-30	18	4.2	11,769	13.9
31-40	18	4.2	13,426	15.8
41-50	11	2.6	10,204	12.0
51-75	9	2.1	7,552	8.9
76 and above	6	1.4	4,955	5.8
District Total	**424**	**100.0**	**84,897**	**100.0**

The proportion of Scheduled Tribe population in the villages are given by ranges in the above table. There are 188 villages that are not inhabited with Scheduled Tribe population. This accounts for 44.3 per cent of the total villages in the district. Less than 5 per cent of the tribes in each village are found in 83 villages. Population of more than 20 per cent in a village are observed to be less in the district.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Gundlupet (TMC)	26,340	3,498	6,026	13.3	22.9
2	Chamarajanagar (CMC)	60,558	10,939	5,900	18.1	9.7
3	Yelandur (TP)	8,585	2,006	3,048	23.4	35.5
4	Kollegal (TMC)	52,607	13,543	6,240	25.7	11.9
District(Urban) Total		**148,090**	**29,986**	**21,214**	**20.2**	**14.3**

The above table presents the urban population and percentage with regard to Scheduled Castes and Scheduled Tribes in the district. The Scheduled Castes constitute 20.2 per cent and Scheduled Tribes constitute 14.3 per cent of the total population. Highest per cent of Scheduled Castes are found in Kollegal (TMC) and highest per cent of Scheduled Tribes are found in Yelandur (TP).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Gundlupet	988	1,006
2	Chamarajanagar	973	1,015
3	Yelandur	963	949
4	Kollegal	936	969
District (Rural) Total		**960**	**989**

The sex ratio of Scheduled Castes and Scheduled Tribes in the C.D. blocks are 960 and 989 respectively. Although the sex ratio of Scheduled Castes are less than the ratio of general population in the C.D. blocks, the ratio among the Scheduled Tribes show a higher value of 989 females per 1000 males. Further, by analysing the data by C.D. blocks, the ratio favours Scheduled Tribes women in Gundlupet and Chamarajanagar. As far as Scheduled Castes population are concerned, the ratio is favourable for men in all the four C.D. blocks.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Gundlupet (TMC)	935	1,022
2	Chamarajanagar (CMC)	955	997
3	Yelandur (TP)	907	1,047
4	Kollegal (TMC)	917	1,012
Sex ratio (Urban) for the district:		**932**	**1,016**

The sex ratio of the Scheduled Castes and Scheduled Tribes in the towns of Chamarajanagar district are 932 and 1016 respectively. As less as 907 Scheduled Castes women against 1000 males are reported from Yelandur (TP). In the case of Scheduled Tribes, except in Chamarajanagar (CMC), the ratio is favourable for women in other taluks namely Gundlupet (TMC) Yelandur (TP) and Kollegal(TMC).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TALUKS, 2001

As per 2001 census, the district ranks 25th place in literacy rate. The literates are more in urban than in rural areas. Male literates outnumber female literates in the district. Among the taluks, Kollegal has the highest percent of both male and female literates. The gap in male/female literacy rate is 16.6 per cent and a highest rate of 19.6 per cent is reported from Gundlupet taluk.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

District(Urban) Total		**92,749**	**51,562**	**41,187**	**55,341**	**23,595**	**31,746**	**70.9**	**77.7**	**63.9**	**13.8**

The distribution of urban literacy rate by sex is presented in the above table. The urban literacy rate is 70.9 per cent. The male and female literacy rates are 77.7 and 63.9 per cent respectively. The statistics for the town also implies that the rate is high in Kollegal (TMC) and also it has registered a high male and female literacy rates. The gap in male/female rate is 13.8 per cent for the towns and this gap is 17.1 per cent in Gundlupet (TMC) which is higher when compared to other towns.

The sex wise distribution of number of Scheduled Castes literates and illiterates and their percentages are presented by C.D. blocks in Table No. 25. The percentage of Scheduled Castes literates in the rural areas constitute 47.4 per cent. Male and female literates form 54.8 and 39.6 per cent respectively. Among the C.D. blocks, Yelandur has recorded highest percentage of literates. The male and female literates are also high in the same C.D. blocks. The observed gap in male/female literacy rate is 15.2 per cent for the district.

This table provides sex-wise distribution of workers by category for the urban areas of the district. The percentage of total workers in urban area is 37.3 per cent. Less number of urban women are occupied compared to as high as 55.6 per cent of male workers. The highest of 38.9 per cent of total workers are reported from Gundlupet (TMC). The lowest of 15.2 per cent of females are workers in Yelandur (TP). Yelandur (TP) has the highest percent of non-workers among the urban areas in the district.

Note: Percent of Worker to total workers are given in brackets

The distribution of total workers by sex according to four industrial categories highlighted in this table. As seen from the table agricultural labourers and cultivators alone constitute 70.7 percent of the total working population. Persons engaged in agricultural labour, household industry and other work are found more in terms of percentage in Yelandur taluk while the highest of 33.1 percent of cultivators are in Gundlupet taluk.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Note: Percent of Workers to total workers are given in brackets

The distribution of workers by economic activity is presented for the C.D. blocks of the district which includes only the rural portion. The same trend as seen in taluk-wise distribution is observed in this table too. If only rural areas are taken into consideration, the percentage of cultivators and agricultural labourers are little higher than as reflected in taluk-wise distribution. The fact that agricultural labour and household industries are predominantly held by the women are more emphatically proved by the large percentages of women being reported under agricultural labourers and household industrial workers in the district.

ix) Brief analysis of Village Directory and Town Directory data based on inset tables 37 to 47.

The sex-wise distribution of workers by economic activity is presented in Table 36, for the urban agglomeration/towns in the district. The urban trend is slightly different from the rural areas. The highest of 5.5 per cent of cultivators and 24.9 per cent of

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table highlights the number of villages having different types of amenities. It shows that all of the villages in the district do not have all the amenities listed above. Of the basic amenities shown above, improved drinking water and power supply are available to more than 95 per cent of the villages. Though all the villages in the district have one or the other source of drinking water, the improved drinking water sources can be taken into account only if the water is supplied through tap or a handpump/tubewell. Accordingly 417 villages in the district have improved drinking water facility. Educational facility is available to 90.3 percent villages. Among the C.D. blocks, quite a few villages in Gundlupet, Chamarajanagar and Kollegal do not have this facility. Accessibility to health care services in the villages is poor in the district. It is evident from the table that only 25.5 percent of the villages have access to medical facilities. The villages in the district also lacks in financial institutions like banks and agricultural credit societies to cater the financial needs of the people. Only 14.4 per cent and 18.2 per cent of the villages have banks and agricultural credit societies in the district; About 79.0 percent villages are connected with transport facility. Post offices and telephone connections are available in 67.9 per cent and 59.7 per cent villages in the district.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Rural population that are served by different amenities in the villages are given in the above table. Amenities like education, improved drinking water, transport and communication, approach by pucca roads and power supply are obtainable for more than 90 per cent of the population. Post office and telephones are accessible to 88.6 per cent and 76.2 per cent of the population. Banks serve 31.1 per cent of the population and agricultural credit societies cater to the needs of 35.6 per cent of the population. Among the C.D. blocks, the rural population in Yelandur and Kollegal are better served than the people in other two C.D. blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	37	5	-	42
(b) Middle School	133	20	4	157
(c) Degree College	44	113	266	423
2. Medical:-				
(a) Hospital	54	103	260	417
(b) PHC	198	110	65	373
3. Post Office	110	20	6	136
4. Telephone	131	17	23	171
5. Bus Service	74	11	4	89
6. Banks				
(a) Commercial Bank	160	134	93	387
(b) Cooperative Bank	90	144	145	379
7. Agricultural Credit Societies	176	103	68	347

Certain amenities are not available within the village. In such cases data on distance range at which they are available, are given in the above table. Primary school facility is not available for 42 villages. Yet, this is accessible for 37 villages at a distant of less than 5 kms. and for 5 villages it is at a distance of 5-10 kms. Similarly there are 157 villages, where middle schools are not in operation, but for the majority of such villages, these are functioning within the radius of 5 kms. The student population from 266 villages have to travel for more than 10 kms to pursue their degrees. For 113 villages it is situated at a distance of 5-10 kms. and less than 5 kms. for 44 villages. As far as medical facility is concerned, maximum number of villages have been reflected in the table under three different distant ranges. As much as 7 villages in the district have hospitals within its limits and 51 villages have PHCs within the boundary. For the rest of the villages, the facility is scattered at a distance of less than 5 kms, 5-10 kms and more than 10 kms. For the majority of the villages which do not have post offices, it is located at a distance of less than 5 kms and 6 villages have this facility for more than 10 kms. Similarly telephones are not available for 171 villages and majority of them have it within 5 kms. In general, access to bus service is much advanced in the district. For most of the villages that are not connected through bus transportation, have this facility at a distance of less than 5 kms. Inspite of improved bus services, for 4 villages, these are far reachable. With regards to bank and agricultural credit societies, the district needs to improve this facility at the village level. However, these are accessible at a distance of less than 5 kms, 5-10 kms and more than 10 kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The villages have been classified according to the distance in ranges from the nearest statutory town. It is observed that the distance from the statutory town to the majority of the villages does not exceed more than 50 kms. As far as the distance is concerned, some 4 villages have been classified as 'unspecified'. The distance from the nearest statutory town to the village has been correlated with the type of amenities available as per 2001 census. Though the villages are situated less than 5 kms. away from the nearest statutory town, amenities like medical, banks and agricultural credit societies are not available to the same villages. Irrespective of the distance, facilities like education, and to a larger extent transport and communication and approach by pucca roads are accessible to most of the villages.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.
* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or Otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The rural population has been arranged in terms of ranges and the different amenities available under each ranges are given in the above table. Majority of the villages fall in the population range between 1000-1999 and 2000-4999. Villages with more than 10000 persons have all the amenities except the telephone facility, which is not available in one of the 3 villages. Further the table reveals that as the population increases in its size, the types of amenities available to each village also increases. Overall, it is the medical, banks and agricultural credit societies which suffer a setback in the district.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Gundlupet	140	123,602	43.6	18.8
2	Chamarajanagar	171	117,660	54.9	28.1
3	Yelandur	28	26,465	40.9	46.9
4	Kollegal	85	93,489	69.9	32.0
	District Total:	**424**	**361,216**	**53.9**	**27.9**

Note : - Cultivable area = irrigated area + unirrigated area

The land use data as per 2001 census given above takes into consideration only the cultivable area of the rural district. The cultivable area given in the table includes both irrigated and unirrigated areas. As such the total cultivable area of the rural portion comprises of 53.9 per cent of the total area. Among the C.D. blocks, the highest of 69.9 per cent of the area in Kollegal block is put under cultication. If the percentage of irrigated area to total cultivable area is considered, Yelandur block reports a highest percentage of 46.9 per cent.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11

3	II Kollegal (TMC)	166	55	111	166	96	26	25	0.2	19
4	V Yelandur (TP)	518	54	464	384	102	-	19	-	264
	District Total	**192**	**49**	**142**	**181**	**93**	**0.9**	**1.9**	**-**	**60**

Table 43 provides details on per capita receipts and expenditure (in rupees) for each town in the district. The percapita receipt for the district is Rs.192 of which Rs. 49 received through taxes and rest through other sources. On the other hand the per capita expenditure is Rs. 181 of which Rs.93 is spent on general administration, Rs.1.9 on public works, Rs.0.9 on public health and Rs. 0.08 on public institution and Rs.60 on other items. Highest Per capita receipt (518) and expenditure 384 is reported from Yelandur.

The table 48 gives the distribution of households by tenure status and the number of dwelling rooms occupied by them. The data presented in this table is for the general as well as scheduled caste and scheduled tribe population of Chamarajanagar district. It can be seen that households dwelling in more than one room constitute more in number than households with 'no exclusive room'. The table also highlights the households living in their own structure is comparatively more than the rented accommodation and other type of tenure status. Majority of the households live in one and two rooms. The median number of rooms is one for all types of accommodation and it is also the same for the total as well as scheded caste and scheduled tribe population.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Name of District /Taluk	Total number of House holds	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11

Kollegal	70,912	57.7	35.0	7.3	46.5	31.7	7.0	11.2	3.3	0.3
Yelandur	15,576	45.0	45.1	9.9	38.6	41.1	9.1	6.4	4.0	0.9
Chamarajanagar*	**202,913**	46.8	41.8	11.4	36.9	37.9	10.4	9.8	3.8	1.0

The table gives the percentage distribution of households living in the houses defined as per census concept in the district. The census houses occupied by the households for fully and partly residential purpose have been classified into permanent, semi-permanent and temporary Households living in permanent and semi-permanent structures are many in the district. The temporary structures constitute 11.4 per cent. In the rural areas, households dwelling in semi-permanent structures are a little higher compared to permanent structures. On the other hand in urban areas, the percentage of households living in permanent structure is more than the semi-permanent and temporary structure.

Percentage of households having improved drinking water sources, electricity, bathroom toilet and proper drainage facility will throw light on the living conditions of the people.

About 93.2 percent of H.H's have improved drinking water, 64.5 percent of them have electricity, 46.8 percent have bathrooms, 53.3 percent have drainage facility. Only 11.5 percent of H.H's in rural areas have toilet facility. Other rural urban break ups and taluk level details can be seen from the table 50 above.

TABLE 51: NUMBER AND PERCENTAGE OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Sl No	Name of the District/ Taluk	Total Rural Urban	Total Number of House holds	Type of fuel used for cooking									
				Fire wood	Crop residue	Cow dung cake	Coal Lignite (Charcoal)	Kerosene	Cooking Gas (LPG)	Electricity	Bio gas	Others	No Cooking

The above table provides data on households using different types of fuel for the purpose of cooking. The percentage of households in the rural areas of the district, using firewood is very high at 89.8 per cent, followed by households using crop residue at 5.4 per cent. The use of other types of fuel are insignificant. As far as urban households are concerned, those using firewood are 51.2 per cent, L.P.G 24.4 per cent and kerosene 19.1 per cent. The use of other types of fuel are insignificant.

TABLE 52: NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Sl. No.	Taluk	Total/ Rural/ Urban	Total number of house holds	Total number of households availing banking services	Availability of assets

		Urban	10,473	2,823	4,756	5,322	1,517	4,595	1,820	271	2,994
	Chamarajanagar*	**Total**	**202,913**	**34,676**	**75,951**	**31,867**	**8,305**	**62,728**	**13,615**	**1,549**	**95,913**
		Rural	**173,032**	**26,196**	**63,039**	**18,548**	**4,649**	**51,433**	**8,792**	**923**	**85,831**
		Urban	**29,881**	**8,480**	**12,912**	**13,319**	**3,656**	**11,295**	**4,823**	**626**	**10,082**

The above table provides data on households possessing specified assets and availing banking facilities. In terms of percentage, the rural households availing banking facility stands at 15.1 per cent. The same for urban households is higher at 28.4 per cent. As it is common in most of the districts, the gap between rural and urban households possessing T.V and scooter is remarkable. About 10.7 per cent of rural households possess T.V compared to 44.6 per cent of urban households. As far scooter/ Motor cycle 5.1 per cent rural households to 16.1 per cent urban households possess them. Those households not possessing any of the specified assets in the rural areas works out to 49.6 per cent and for urban areas it is 33.7 per cent.

(xi) Archaeology

Prior to the bifurcation of Chamrajnagar as a separate district, the then Mysore district has been rich in antiquarian remains including numerous inscriptions as many as 2,300 or more. These inscriptions found in the district are the most important sources for outlining the history from the 3rd to the 19th century. Also there are number of temples in the district which are important from religious as well as archaeological point of view. Some of the prominent archaeologists who had surveyed the tract had discovered the existence of the pre-historic activities of man in the alluvial plains of the river Cauvery and its tributaries. These are mostly of the Neolithic and megalithic phases found in Kollegal, Yelandur and Chamrajnagar taluks. Surface finds of microliths like lunates, hallow scrapers, flakes and cores have been located at Yaragamballi and Gumballi in Yelandur taluk and Chandakavadi in Chamrajnagar taluk. Other Neolithic sites in the district are Budithittu and Hosalli in Chamrajnagar taluk, Boodithittu and Shivakahalli in Yelandur taluk and Telnur in Kollegal taluk. Megalithic habitations are located in 9 places in Yelandur and 15 in Kollegal taluks. The most interesting megalithic burials were discovered in Kollegal taluk and this taluk alone has 47 such groups. As stated earlier, the district is known for its numerous temples built by the Gangas, Hoysalas and the Mysore rulers. It has been enriched by their love for art by way of constructing beautiful temples endowed with tall *gopuras* and huge pillared halls. Though all the temples are beautiful in many dimensions, it is worth

mentioning about the four temples of archaeological importance which are protected and controlled by the Archaeological Survey of India. To begin with is the Sri Vijayanarayana temple located in Gundlupet taluk. The place itself is an important centre rich in antiquity. The place has temples dedicated to various deity. But for the Vijayanarayana temple, other temples have been ruined and deserted Sri Vijayanarayana temple has been protected and controlled by the Archaeological Survey of India. This temple is considerably large in size and it appears to be the earliest structure as many of its interiors were built according to Hoysala style. It is believed that this temple must have been built dating back to 10th to 15th century A.D. It is made up of granites, with several distinguished features in it. The main deity called Vijayanarayana is about one metre tall and is of Hoysala workmanship. The second protected monument by Archaeological Survey of India is the Sri Arkeshwara temple at Hale Alur, also known as Hole Alur in Chamrajnagar taluk. This place is also known for its rich antiquity. A Kannada inscription says that this is a Ganga monument and it was renovated by Rajendra Chola around 11th century A.D. to commemorate his victory over the Chalukya country. The rich relief sculptures engraved on the walls and pillars depict many qualities of King Rajendra Chola. The third protected monument is the Rameshwara temple at Narasimhamangala in Chamrajnagar taluk. It is a beautiful monument belonging to Ganga period and dated back to 9th century A.D. An inscriptions engraved on two slabs to the south of the temple refers to Hoysala Viraballal III and certain grants made to the God Ramanathadeva of Narasimhamangala. Gaurishwara temple is another protected monument. This temple was constructed in 1550 A.D. by Singadeva or Devabhupala, a ruler of Hadinadu, a feudagtory of the Vijayanagara dynasty. It has a very beautiful entrance. This attractive entrance has no gopura but has artistically created fine sculptures all round the walls and on the pillars. The four corners and side of the door of the mantapa have monolithic stone chains formed by circular links. The pillars are of Vijayanagara style.

(xii) Brief description on places of historical, religious, archaeological and tourist importance.

CHAMRAJNAGAR TALUK

Haradanahalli:

This village has a ruined fort. The Divyalingeshwara Temple here is an old structure with a big Gopura and has a stout but loty lamp pillar in front. It was at this village that the Lingayat guru Gosala-Channabasava had his mutt. Tontada Siddalinga, another great teacher and author of the same sect who flourished at the close of the 15th century, was initiated at this mutt in the tenets of Virashaiva faith. It is said that the Chikka-Devaraya Wodeyar, dismantled the mutt and built the Gopalakrishna temple with the same materials. The figure of Gopalakrishna is well executed. There are also figures of Varadaraja, Srinivasa, Sathagopa, Ramanujacharya and Vishvaksena.

Narasa mangala:

This village has the ruins of an old Rameshwara Temple, which shows that it was a very massive building of black stone. The Linga and the pillars are of unusual girth. There is a fine-seated figure of Parasurama on one side within and a proportionate Ganesha on the opposite.

Ummathur:

Ummathur was formerly an important principality under the Vijayanagara Kings. The Rajas of Ummathur who, exercised control for long over Nilgiris (Tamil Nadu) were the traditional enemies of the Rajas of Mysore and the Kalale Chiefs. In 1613 A.D. the Mysore Rajas along with Shrirangapattana annexed the Ummathur principality.

Alur (Halealur):

There is a deserted Arkeshwara temple the materials of which have been put together in subsequent times. Out of four pillars, three are elaborately carved and one is plain. The sculptures on these pillars have been interpreted as representing the conquests of the Chola King, Rajendra Deva in about 1023 A.D.

GUNDLUPET TALUK

Terakanambi:

This place is of great antiquity. Though its early history is somewhat obscure, there is a general agreement that its name was formerly

Trikadambapura and that it sprang out of a village called Kudugallur located at the tri-junction, marked by Kudugallu or boundary stones, of three countries, namely Dravida, Kerala and Hadinad. At the point of the junction a temple dedicated to Trikadamba, the consort of the three-eyed Shiva was erected in the 6th Century by a king named Lambakarna Raya (the long-eared king), ruling the Southern part of Karnataka. Inscriptions indicate that Bayalnad (Heggadadevanakote Taluk) was ruled by chiefs of Kadamba descent until they were subdued by the Hoysalas.

2. Bandipura:

Bandipura National Park is a well known tourist spot and is located in a wild life sanctuary. Since 1974 this area has been notified as a project tiger area also. This is considered to be one of the best Wild life sanctuaries in the country.

3. Kannegala:

Gopalaswamy hill located in the limits of this village, is a lofty hill of extremely picturesque appearance, rising to a height of 1,454 meters above the sea level. It is generally enveloped in clouds and mist. Inside the old fort there is a temple dedicated to Gopalaswamy, who is said to be heard playing on his flute on certain occasions. In an inscription dated 1504 A.D., this fort has been referred to as Mudankote (Eastern fort) and the territory held by its chiefs is referred to as Kote-since. An annual car festival is held in honour of Gopalaswamy during Phalguna bahula (January).

KOLLEGAL TALUK

1. Siddayyanapura (Siddianapura)

A mutilated *lithic* record belonging to a Western Ganga King is found here.

2. Sathegala:

The beautiful Cauvery falls called Gaganchukki and Bharchukki are located very close to this place. The tomb of Peersab is of religious importance to the Muslims.

3. Singanallur:

Two stone inscriptions of Vijayanagar period are found here.

4. Mahadeswara betta:

This is a well-known place of pilgrimage and is of considerable religious importance. There is a temple on the top of the hill dedicated to Mahadeswaraswamy. Periodic fairs held here attract people from all over the State. It is a hill range about 3200 ft above sea level and contains 77 ranges. To the tourist and also to the devote pilgrims this place offers a panoramic view of the enchanting scene of the hill ranges.

5. Modahalli (Modalli):

Stone inscriptions bearing references to Vijayanagar Kings, Kampana II and Vira Harihara are found here.

YELANDUR TALUK

1. Agara:

This village has four old temples dedicated to Rameswara, Narasimha, Varadaraja and Durga, all of which are in a dilapidated condition. The Narasimha temple has been renovated. In Tamil inscriptions the village is known as Durgaiyagaram and in the Kannada, Durgagrahara. There are nearly fifty Tamil inscriptions in the four temples at Agara. A good number of them are written in Grantha and Nagari characters.

2. Biligirirangana betta:

This is a range of hills in the South-eastern portion of the Yelandur Taluk. On the highest point, which is 1,567 meter above the sea level, the temple of Biligiri Rangaswami is situated. The main inhabitants of this hill are Soligas (a Scheduled Tribe) who occupy isolated hamlets. At the top of the ghat there is a cinchona plantation. An old fort known as Kanchikote said to have been built by Gangaraja of Shivasamudram exists on the summit of the hill. At the foot of the hill there is a brindavan known as Tolasamma's shrine. There is a cave known as Kanakadasa's cave. The temple on the hills is a pretty large Dravidian structure and it is of great antiquity. Some copper plates at this temple relate to grant made to it in 1667 A.D. by Mudduraja of Hadinad.

PLACES OF INTEREST IN AND AROUND THE TOWNS:

1. Chamrajnagar:

The original name of this place was Arikotara. The present name was bestowed in 1818 by Krishnaraja Wodeyar of Mysore. In 1825 he built a temple of Chamrajeshwara here. This temple is a large structure in the Dravidian style. About 5 km. to the east of core town the portion known as Ramasamudram is situated. For nearly four decades from 1921 to 1961 Ramasamundaram was a separate municipal town. The two towns were merged into a single unit at the 1961 Census. The ruins of an extensive city of antiquity, the name of which, according to tradition was Manipura are pointed out here.

2. Gundlupet:

The ancient name of Gundlupet was Vijayapura and under this name it appears to have been held by the rules of Terakanambi for a longtime. In 1674 Chikkadevaraja Wodeyar gave the present name. Gundlupet has a ruined fort. There are temples of Vijayanarayana, Paravasudeva and Rameswara which deserve mention for having some architectural merit.

3. Yelandur:

This town situated on the bank of the Honnuhole has inscriptions of the Ganges, Cholas and Hoysalas. The principle temple here is of Gaureswara built by Singa Depa king of Padinad in about 1450 A.D. The celebrated Lingayath poet Shadakshara Deva, who wrote the popular Rajasekhara Vilasa in 1657 A.D. is said to have lived here for sometimes in a Mutt known as Danaguru devara mutt. The inscription at Gaureswara temple explains the name of the place as Yelandur.

(xiii) Scope of Village Directory and Town Directory

Village Directory

Village Directory provides micro-level data, which will help the planners in formulation of micro-level developmental plans as the C.D.Block is the lowest administrative unit for developmental planning. Village wise information regarding the availability of certain basic amenities and facilities, within the village, as well as the manner of utilization of the land in the concerned village is furnished in the village directory. The village directory format adopted for the 2001 Census has 23 columns whereas in the 1991 Census there were only 18 columns. When compared with the 1991 Census Village Directory format, column 9, which refers to the day or days of weekly market/ hat if any., has been now left out. New inclusions are in respect of facilities like banks, agricultural credit societies, non-agricultural credit societies, other cooperative societies, number of recreational and cultural facilities like cinema/ video hall, sports club, stadium/auditorium; receipt of news papers/magazines and the name of the most important commodities manufactured in the village. In all the 23 columns in this tabulation statement, first 3 columns relates to serial number, name of the village with location code and area of village while the next 2 provide information on total population and number of households in the village as per 2001 Census. The next 8 columns relate to basic amenities such as educational; medical; drinking water (potable); post, telegraph and telephone, commercial and cooperative banks, agricultural, non-agricultural and other credit societies, number of recreational and cultural facilities such as cinema/ video hall, sports club and stadium/auditorium and communications (bus service, railway station, waterway). Information in respect of approach to village, nearest town and distance in Kms., power supply, receipt of news paper/magazine, names of the most important commodities manufactured in the village are furnished in columns 14 to 18. Amenities available within the villages are shown in the respective columns and if a particular amenity especially Primary School, Middle School, College, Allopathic Hospital, PHC, MCW, Post Office, Telephone, etc., is not available in the village, the respective abbreviation is given and next to it in brackets the distance in broad ranges viz., <5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility available to that particular village is indicated. The next 5 columns, 19 to 23 provide information regarding land use (i.e., area under different types of land use in hectares rounded to two decimal places) such as forest, irrigated land by source of irrigation, un-irrigated, cultivable waste (including gauchar and groves) and finally the area not available for cultivation.

Town Directory

The Town Directory section contains seven statements (I to VII) which furnish information on all the statutory towns in the district, on aspects such as growth history, physical aspects and location of towns, municipal finance, civic and other amenities in the town, medical, educational, recreational and cultural facilities, trade, commerce, industry and banking in the towns, civic and other amenities in slum areas of the town. The scope of the various column headings adopted during 1991 Census has remained unchanged in 2001. The towns are arranged in an alphabetical order for the district.

Note :

1. The area figure for the district given under column No 3 against " Total" represents "Geographical Area" and has been furnished by the Surveyor General India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D. Blocks/Taluks in this district will not tally with the district figures (except urban), because the area figures for C.D. Blocks/Taluks represents the land-use area based on village wise area figures as reported by the local officers. The total area of the taluk may not tally with the aggregate of the areas of the villages listed for Census purposes for it includes the area of the statutory as well as non-statutory towns, villages which may be fully submerged and reserve forests which may not form part of any revenue village, if any, within the jurisdiction of the concerned taluk. The total area of the C.D. Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2. Out growths of towns in urban agglomerations are denoted by letter "OG".

3. The following abbreviations have been used to indicate the Civic Administration Status of town.

M.Corp	:	*Municipal Corporation*
CMC	:	*City Municipal Council*
TMC	:	*Town Municipal Council*
TP	:	*Town Panchayat*
NAC	:	*Notified Area Committee*
CB	:	*Cantonment Board*
CT	:	*Census Town (Non-Municipal Census Town / Non-Statutory Town)*

SECTION – I

VILLAGE DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and cooperative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and un-inhabited villages.

Column 3 : Area of the village

The area of the village in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are treated as equivalent to Pre-University Course.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health SubCentre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Hand pump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12: Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If the village receives any News Paper/ Magazines, the same is noted in this column using following codes

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23: Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Unirrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash ‘‘-” is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	:	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	:	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	:	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	:	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	:	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	:	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	:	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	:	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	:	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	:	Summary showing number of villages not having Scheduled Tribes population.
Appendix- VII-A & VII-B	:	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	:	Indicates C D Block wise number of villages under each Grama Panchayat.
Appendix-IX	:	Shows number of different types of girls school in a village.

(b) LIST OF MERGED VILLAGES IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

(AREA IN HECTARES 0.00)

APPENDIX II -- A CENSUS TOWN

CENSUS TOWNS WHICH DO NOT HAVE ONE OR MORE AMENITIES AVAILABLE

Serial number	Name of Census Town	Location code number	Name of C.D. block	Population	Senior Secondary School	College	Primary Health Sub Centre	Tap drinking water	Bus facility	Approach by Pucca road	Commercial Bank
1	2	3	4	5	6	7	8	9	10	11	12
Nil											

APPENDIX III - VILLAGE DIRECTORY

LAND UTILISATION DATA IN RESPECT OF CENSUS TOWNS/NON-MUNICIPAL TOWNS

Serial Number	Name of Census Town	Land use (I.e. area under different types of land use in hectares)					
		Total area	Forest	Irrigated by source	Unirrigated	Culturable waste (including gauchar & groves	Area not available for cultivation
1	2	3	4	5	6	7	8
Nil							

APPENDIX IV - VILLAGE DIRECTORY

C.D. BLOCK WISE LIST OF INHABITED VILLAGES WHERE NO AMENITY OTHER THAN DRINKING WATER FACILITY IS AVAILABLE

Serial number	Location code number	Name of village
1	2	3
	Name of CD Block: Gundlupet	
1	02891900	Parvathanapura
2	02901100	Berambadi State Forest
3	02905300	Bandipura State Forest
	Name of CD Block: Chamarajanagar	
4	02922400	Haradanahalli District Forest
	Name of CD Block: Yelandur	
		Nil
	Name of CD Block: Kollegal	
		Nil

APPENDIX V - VILLAGE DIRECTORY

SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED CASTE POPULATION

Serial number	Name of C.D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Castes population
1	2	3	4	5	6
1	Gundlupet	158	18	140	26
2	Chamarajanagar	184	13	171	29
3	Yelandur	28	-	28	4
4	Kollegal	139	54	85	1
	District Total:	**509**	**85**	**424**	**60**

APPENDIX VI - VILLAGE DIRECTORY

SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED TRIBE POPULATION

Serial number	Name of C.D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Tribes population
1	2	3	4	5	6
1	Gundlupet	158	18	140	72
2	Chamarajanagar	184	13	171	87
3	Yelandur	28	-	28	8
4	Kollegal	139	54	85	21
	District Total:	**509**	**85**	**424**	**188**

TOWN DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I: Status and Growth History

Column (2): Class, name and civic administration status of town:

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 99,999	II
20,000 49,999	III
10,000 19,999	IV
5,000 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i	Municipal Corporation	M.Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II Physical Aspects and Location of towns, 1999.

Column 3 to 5: Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8:

Name of the State headquarters, District headquarters and SubDivisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10:

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13:

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Itemwise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV: Civic and Other amenities, 1999

Column (1 to 5): Self explanatory.

Column (6): Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7): System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows:

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11: Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12: Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes:

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14: Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tubewell water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilolitres (in bracket) are presented in column 14.

Column 15: Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20: Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3: Self explanatory.

Column 4 & 5:

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes:

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below:

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9:

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10: Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used:

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/ Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, PrePrimary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16: Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19: Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/ Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20: Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows:

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI: Trade, Commerce, Industry and Banking, 1999

Column 3 to 8: Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9: Number of Banks

Number of Banks available in the referent town both Commercial and Cooperative banks are recorded against this column.

Column 10 & 11: Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII: Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I
(b) STATUS AND GROWTH HISTORY

APPENDIX : TOWNS SHOWING THEIR OUTGROWTHS WITH POPULATION

Sl. No.	Name of Town with location code	Population of the core town	Name of Outgrowth	Population of outgrowth
1	2	3	4	5
		Nil		

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Cenus Abstract	Level of presentation
1. District Primary Census Abstract	District/CDBlock/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CDBlock/Town
3. Primary Census Abstract for Scheduled Tribes	District/CDBlock/Town
4. Village Primary CensusAbstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/WardLevel

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of taluks, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the taluks/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ taluks. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the taluks and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

NOTE ON FERTILITY & MORTALITY AND MIGRATION – 1991 CENSUS

Fertility levels

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all evermarried women and the last question related to currently married women. The measures of fertility worked out are based on the FSeries Tables of 1991 Census pertaining to Karnataka state and are defined as below:

MIGRATION

What is Migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another state of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why people migrate?

As in 1981 census, the reasons for migration were elicited in 1991 census also. The reasons for migration were broadly categorized as (1) employment (2) business (3) education (4) family moved (5) marriage (6) natural calamities like drought, floods etc. and (7) other reasons. Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

Marriage and age at marriage are important social phenomena and crucial factors in the analysis of the dynamics of fertility. As such, various measures of fertility estimated based on these crucial factors are highlighted in the above table.

Estimates of General Fertility Rate (GFR) a refined measure of fertility, defined as the number of live births per thousand women in the reproductive age-group 15-49 years is a useful tool for measuring fertility, and this rate is further estimated only for the married women which is defined as General Marital Fertility Rate (GMFR). The GFR and GMFR for the district are 118 and 156 respectively.

The cumulative value of the age-specific fertility rates at the end of the child bearing ages gives a measure of fertility known as Total Fertility Rate (TFR). It indicates average number of children expected to be born per woman during her entire span on reproductive period assuming that the age specific fertility rates to which she is exposed to, continue to be the same and there is no mortality. The same is expected for married women known as Total Marital Fertility Rate (TMFR). The estimated TFR and TMFR for the district are 3.56 and 5.20 respectively. The Crude Birth Rate (CBR) is 29.72.

The most useful indices that can be derived from the question on number of Children born alive is the average number of children ever born per ever married women by age-group. Since most of the women

complete their reproduction be the age-group 45-49, this indices is termed as completed fertility. The category ever married includes widows, divorced and separated women. As such the completed fertility for the district is 4.14. The child women ratio which is a relative measure to know the fertility performance of a women is 416 in the district.

One of the parameters, presenting female age at marriage relates to all women who live with their husbands, where some of them might have been recently married and some of them decades ago. It can be observed that mean age at marriage of the currently married women of Chamarajanagar district is lower than the state figure of 18.00.

The estimates of mortality indicators presented above have been obtained through indirect estimation using the data on the number of children ever born and number of children surviving to ever married women. The information on questions on children ever born and children surviving canvassed for all ever married woman have been tabulated by the age of the mother. This data has been converted into estimates of probability of dying before attaining a given age. These estimates have been worked out using Brass technique where (qi) is the probability of a newborn child dying before the age i = 1, 2, 3 and 5. The table above shows the estimates of infant and child mortality derived for the year 1991 by sex.

The infant mortality rate (q1) for the person is 57 and for male and female are 57 and 58 respectively. The estimates of under 5 mortality (q5) for person is 89 and for male and female are 97 and 86 respectively.

ANNEXURE - IV

ANNEXURE IV (1) - PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF BIRTH

	Place of Birth	1991 Census			2001 Census

Source : Migration Tables of 1991 & 2001 Census

The Anenxure IV(1) presents data on migrants data on migration by their place of birth. The majority of migrants are those who are born within the state of enumeration, which constitute 92.76 per cent as per 2001 Census. Among them, migrants born elsewhere in the district are larger than migrants born in other districts of the state. Considerable proportion of population from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (2) - PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF LAST RESIDENCE

Sl. No.	Place of Last residence	1991 Census			2001 Census		
		Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8
1	Last residence within the state of Enumeration but	732,450	225,662	506,788	203,137	48,499	154,638

Source : Migration Tables of 1991 & 2001 Census

The Annexure IV(2) presents data on migration by their place of last residence. As far as the district is concerned, it can be seen that migrants whose place of last residence was within the state of enumeration but outside the place of enumeration, constitute major proportion of migrant population. As per 2001 Census, their percentage accounts for 93.16 Among them, more is the inflow from within the district. Considerable proportion from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (3) - INTERSTATE IN-MIGRATION TO MANDYA DISTRICT

Place of Birth	1991 Census		2001 Census	
	Migrants	Percentage of to total migrants	Migrants	Percentage of to total migrants
1	2	3	4	5
Andhra Pradesh	5,900	8.62	-	0.00
Goa	70	0.10	-	0.00
Kerala	12,370	18.08	938	6.43
Maharashtra	1,810	2.65	-	0.00
Tamil Nadu	39,621	57.92	11,287	77.39
Rajasthan	-	0.00	325	2.23
Himachal Pradesh	-	0.00	1,079	7.40
Sikkim	-	0.00	263	1.80
Total for 5 states	59,771	87.37	13,892	95.26
Other states	8,640	12.63	692	4.74
Total	**68,411**	**100.00**	**14,584**	**100.00**

The interstate in-migration to the district by their place of birth provided above, highlights the States with the largest contribution of migrants to the district. According to 2001 Census findings, majority of migrants are from Tamilnadu which contributes 77.39 per cent. This followed by 7.4 and 6.43 per cent from Himachal Pradesh and Kerala. Migrants from Rajasthan and Sikkim are also reported in the district. Further the category migrants from `Other States' has come down from 12.63 per cent in 1991 to 4.74 per cent in 2001.

ANNEXURE - IV (4): RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH - 1991 AND 2001 CENSUSES

Place of Birth	Place of Enumeration-1991			Place of Enumeration-2001		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1. Within the state	725,470	479,423	246,047	191,812	163,128	28,684
	100.00	66.08	33.92	100.0	85.0	15.0
2. In other states of India	68,411	28,030	40,381	13,662	10,901	2,761
	100.00	40.97	59.03	100.0	79.8	20.2

Rural and urban composition of internal migrants by their place of birth is provided in the above statement. The data for both the Census points out that majority of migrants within the State as well as from other states of India have migrated to rural areas of the district. The details can be seen from the Statement.

ANNEXURE - V

Brief account of Main Religions in the District / Taluk as per 2001 Census

Religion forms an integral part of Indian Social System. For an Indian, it is a way of life rather than a faith. Indian Census, since its inception is collecting data on religion and presenting the same in its reports. In the pre-independence Census reports, the data on religion was being presented for 9 major religions viz., Hindus, Muslims, Tribals, Christians, Sikhs, Jains and Buddhists. Besides, the minor religions have been classified under the category of 'Others'. The data on religion collected and presented by the Indian Census is the basic data of immense use for the researchers, anthropologists, sociologists, demographers, administrators, planners and even for a common man.

ANNEXURE V(1) - PERCENTAGE DISTRIBUTION OF POPULATION BY MAJOR RELIGIONS IN INDIA AND KARNATAKA DURING 1991 & 2001 AND ITS GROWTH RATE DURING 1981-1991& 1991-2001

Sl. No.	Religion	India				Karnataka			
		Percentage of Population	Percentage growth rate 1981-1991	Percentage of Population	Percentage growth rate 1991-2001	Percentage of Population	Percentage growth rate 1981-1991	Percentage of Population	Percentage growth rate 1991-2001
1	2	3	4	5	6	7	8	9	10
1	Hindus	82.4	22.3	80.5	20.0	85.5	20.7	83.9	15.3
2	Muslims	11.7	26.1	13.4	29.3	11.6	25.7	12.2	23.5
3	Christians	2.3	16.9	2.3	22.1	1.9	11.1	1.9	17.4
4	Sikhs	2.0	24.2	1.9	16.9	Ng	57.8	0.0	51.7

India - State differentials

The comparative data of the country and the state of Karnataka presented in Annexure V(i) reveals that the religion wise concentration of population in the state of Karnataka is of three major religions viz., Hindus, Muslims and Christians. Hindus are returned on the higher side with over three per cent more than the national average. Christians recorded nearly one per cent less whereas the proportion of Muslims in the state to national population was almost the same. There are 85.5 per cent Hindus, 11.6 per cent Muslims and 1.9 per cent Christians in Karnataka as against that of 82.4 per cent Hindus, 11.7 per cent Muslims and 2.3 per cent Christians in India. In regard to concentration of other three major religions viz., Sikhs, Buddhists and Jains it is observed that Jains with 0.7 per cent form the fourth major religion in the state whereas Buddhists with 9.8 per cent is the third major religion in India. In the Indian scene the Sikhs form fifth major group, whereas in Karnataka, Buddhists and Sikhs are placed fifth position.

Religion wise growth in the state during the decade 1981 - 91 reveals that the major religions viz., Hindus, Muslims and Christians recorded a growth rate in lesser degree i.e., 20.7 per cent, 25.7 per cent and 11.1 per cent respectively, against that of 22.3, 26.1 and 16.9 per cent in India as a whole. On the other hand Buddhists, Sikhs and Jains recorded a growth rate of 72.8 per cent, 57.8 per cent and 14.6 pecent respectively for the state against that of 34.0, 24.2 and 3.9 per cent respectively for India. Thus, the Jains recorded a higher growth of nearly 11 per cent in the state than that of India as a whole during the decade 1981 - 91.

Percentage distribution of population during 2001 Census, by major religions in India and Karnataka shows that Hindus form majority of the population with 80.5 and 83.9 per cent respectively, while Muslims form 13.4 and 12.2 per cent for the country

and state respectively. The proportion of these religions for the country and state, during 1991 Census was 82.4 per cent and 85.5 per cent for Hindus and 11.7 and 11.6 per cent for Muslims. There are not much noticeable changes are found in other religions. Persons who have not reported to which religion or faith they belong to has increased in Karnataka, as its proportion to the total population has increased from 0.1 per cent in 1991 Census to 0.3 per cent during 2001 Census.

ANNEXURE V(2) - DISTRIBUTION OF POPULATION UNDER EACH RELIGION TO TOTAL POPULATION IN THE DISTRICTS OF KARNATAKA - 1991 CENSUS & 2001 CENSUS

The above table furnishes the composition of six major religions along with 'Other Religions' and 'Religion not stated' among the districts of the state during 2001 Census along with 1991 Census. As may be seen from the table that the proportion of population to total population during 2001 Census is below 5 per cent for 23 districts of the state and is between 5-10 per cent in 3 districts. Only Bangalore district has the distinction of having more than 10 per cent of the total population of the state in its jurisdiction. During 1991 Census the situation was almost similar with 22 districts having a proportion of less than 5 per cent and 4 districts had more than 5 per cent but below 10 per cent. With 10.76 per cent of the total population Bangalore district occupied the top position.

Of the total population of the state, proportion of districts having Hindus and Muslims was uniform during both the Censuses i.e. less than 5 per cent of the total population in 21 districts for Hindus and 23 districts for Muslims, while in 5 and 3 districts respectively for Hindus and Muslims had a proportion of 5-10 per cent and Bangalore district alone had more than 10 per cent.

ANNEXURE V(3) - PERCENTAGE AND DISTRIBUTION OF POPULATION BY MAJOR RELIGION IN KARNATAKA AND CHAMARAJANAGAR DISTRICT - 1991 & 2001

	KARNATAKA				CHAMARAJNAGAR			
	1991		2001		1991		2001

Religion not stated	36,121	0.10	120,247	0.23	744	0.08	1,463	0.15

The percentage distribution of population by major religion in Karnataka and Chamrajnagar district for 1991 and 2001 Censuses are presented in the above table. As may be seen from the table that in Karnataka, Hindus form 85.5 and 83.86 per cent of the total population during 1991 and 2001 Censuses, followed by Muslims and Christians. The corresponding statistics for the district does not differ much as Hindus and Muslims occupy the top two places followed by Buddhists in 2001 Census. These three religion cover more than 90 per cent of the total population of the district. Remarkable increase in the proportion of Buddhists population has been noticed between 1991 and 2001 Censuses in the State.

	Religion not stated	727	97.7	17	2.3	1,119	76.5	344	23.5

Distribution of major religion by residence for the State and district are presented in the above statement. Majority of Hindus, Jains, Buddhists and those who have not stated their religion are residing in rural areas of the State during both the Censuses. While population belonging to Muslim, Christian and Sikh religion reside in urban areas of the State. As far as the district is concerned, according to 2001 Census data, while majority of Hindus, Christians, Buddhists, `Others' and `Religion not stated' reside in rural areas, majority of Muslims, Jains and Sikhs are concentrated in urban areas. A comparative data for 1991 Census is provided in the statement.

Note:- *The data on marital status is being tabulated upto district level only. As such the data for newly created districts could not be recalibrated for 1991 Census. Hence the data of unbifurcated districts are presented for the newly created districts also.

It may be seen from Annexure VI that the percentage of "Never Married" population accounts for 49.24 per cent and 45.94 per cent at state and district levels during 2001 Census, while the same was 52.05 per cent and 51.10 per cent during 1991 Census. Similarly the percentage figures of the district for Married, widowed and Divorced or Separated are 47.91, 5.74 and 0.40 per cent during 2001 Census. Comparative data for 1991 Census is also furnished in the table for ready reference. The percentage variation of all the marital categories between rural and urban is marginal in both state and district population.

The level of education by sex for the district and the State during 1991 and 2001 Census are presented in the above annexure. It can be seen that percentage of illiterates during the decade has decreased vis-a-vis for the State and the district. Though the male literates out number females, the percentage of women folk acquired literacy during the decade is more than the male population. The comparison of data for the two censuses reveals it so for the State and the district. The different educational level attained by the population can be seen in detail in the above annexure.

ANNEXURE - VIII

Distribution of different Mother Tongue returned during 1991 and 2001 Censuses

As a part of census publication program the data on spoken languages/mother tongues will be presented under C series. The table C-7 shows the distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each for district, with total, rural/urban and male/female break ups. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table divided into Part A - scheduled languages with the mother tongues grouped under each and Part B - Non-scheduled languages with the mother tongue grouped under each. The definition of 'Mother Tongue' is the same as in 1991 Census. The instructions to the enumerators in regard to this question read as under:

Record Mother Tongue in full, whatever be the name of the language returned by the person enumerated. The definition of Mother Tongue is the same as in 1991. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the Mother Tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded".

As the above instructions to the enumerators would show, the respondent was made to feel free to return the name of his/her Mother Tongue and the same was recorded faithfully by the enumerators. This naturally leads to recording of a very large number of Mother Tongue names. It is to be mentioned that Mother Tongues as returned in the Census are basically, the designation provided by the respondents. These designations or Mother Tongue labels need not be identical with the actual linguistic mediums. For assessing the correlation between the Mother Tongue designations and actual languages and dialects the raw returns of Census were subjected to thorough scrutiny and rationalization.

The abstract of languages as Mother Tongues and their strength in the district during 1991 and 2001 Census are provided below.

STATEMENT-I
ABSTRACT OF LANGUAGES AS MOTHER TONGUES AND THEIR STRENGTH IN CHAMARAJANAGAR DISTRICT-1991 AND 2001 CENSUS

7	Garo	-	0.00	1	0.00
8	Kinnauri	-	0.00	1	0.00
9	Kuruba/Kurumba	-	0.00	181	0.02
10	Total Of Other Languages	376	0.04	492	0.05

The statement I & II gives a clear picture of the languages spoken in the district. A closer study of 2001 Census data reveals that as many as 22 languages which returned 10,000 or more speakers are spoken in the district. The 'Other' category include Mother Tongues spoken by less than 10,000 speakers. Majority of the population speak Kannada which constitute 85.10 per cent followed by 4.65 per cent of Tamil speaking population. Among the languages not specified in the Eighth Schedule to the constitution, Tibetan is spoken by 0.36 per cent of population. Similar data for 1991 is provided in the annexure.

Linguistic classification of the languages

The names of the 114 Scheduled and Non-Scheduled languages falling in the above file language families are given below with the Scheduled Languages denoted as (S). Of the 18 Scheduled Languages, 13 fall in the Indo-Aryan branch of the Indo-European family, 4 in the Dravidian family and one in the Tibeto-Burmese family.

1. INDO-EUROPEAN

(a) INDO-ARYAN

1. Assamese (S), 2. Bengali (S), 3. Bhili/ Bhilodi, 4. Bishnupuriya, 5. Dogri, 6. Gujarati (S), 7. Halabi, 8. Hindi (S), 9. Kashmiri (S), 10. Khandeshi, 11. Konkani (S), 12. Lahnda, 13. Marathi (S), 14. Nepali (S), 15. Oriya (S), 16. Punjabi (S), 17. Sanskrit (S), 18. Sindhi (S), 19. Urdu (S)

(b) GERMANIC

1. English

2. DRAVIDIAN

1. Coorgi/Kodagu, 2. Gondi, 3. Jatapu, 4. Kannada (S), 5. Khond/Kondh, 6. Kisan, 7. Kolami, 8.Konda, 9. Koya, 10. Kui, 11. Kurukh/ Oraon, 12. Malayalam (S), 13. Malto, 14. Parji, 15. Tamil (S), 16. Telugu (S), 17. Tulu

3. AUSTRO-ASIATIC

1. Bhumij, 2. Gadaba, 3. Ho, 4. Juang, 5. Kharia, 6. Khasi, 7. Koda/Kora, 8. Korku, 9. Korwa, 10. Munda, 11. Mundari, 12. Nicobarese, 13. Santali, 14. Savara

4. TIBETO-BURMESE

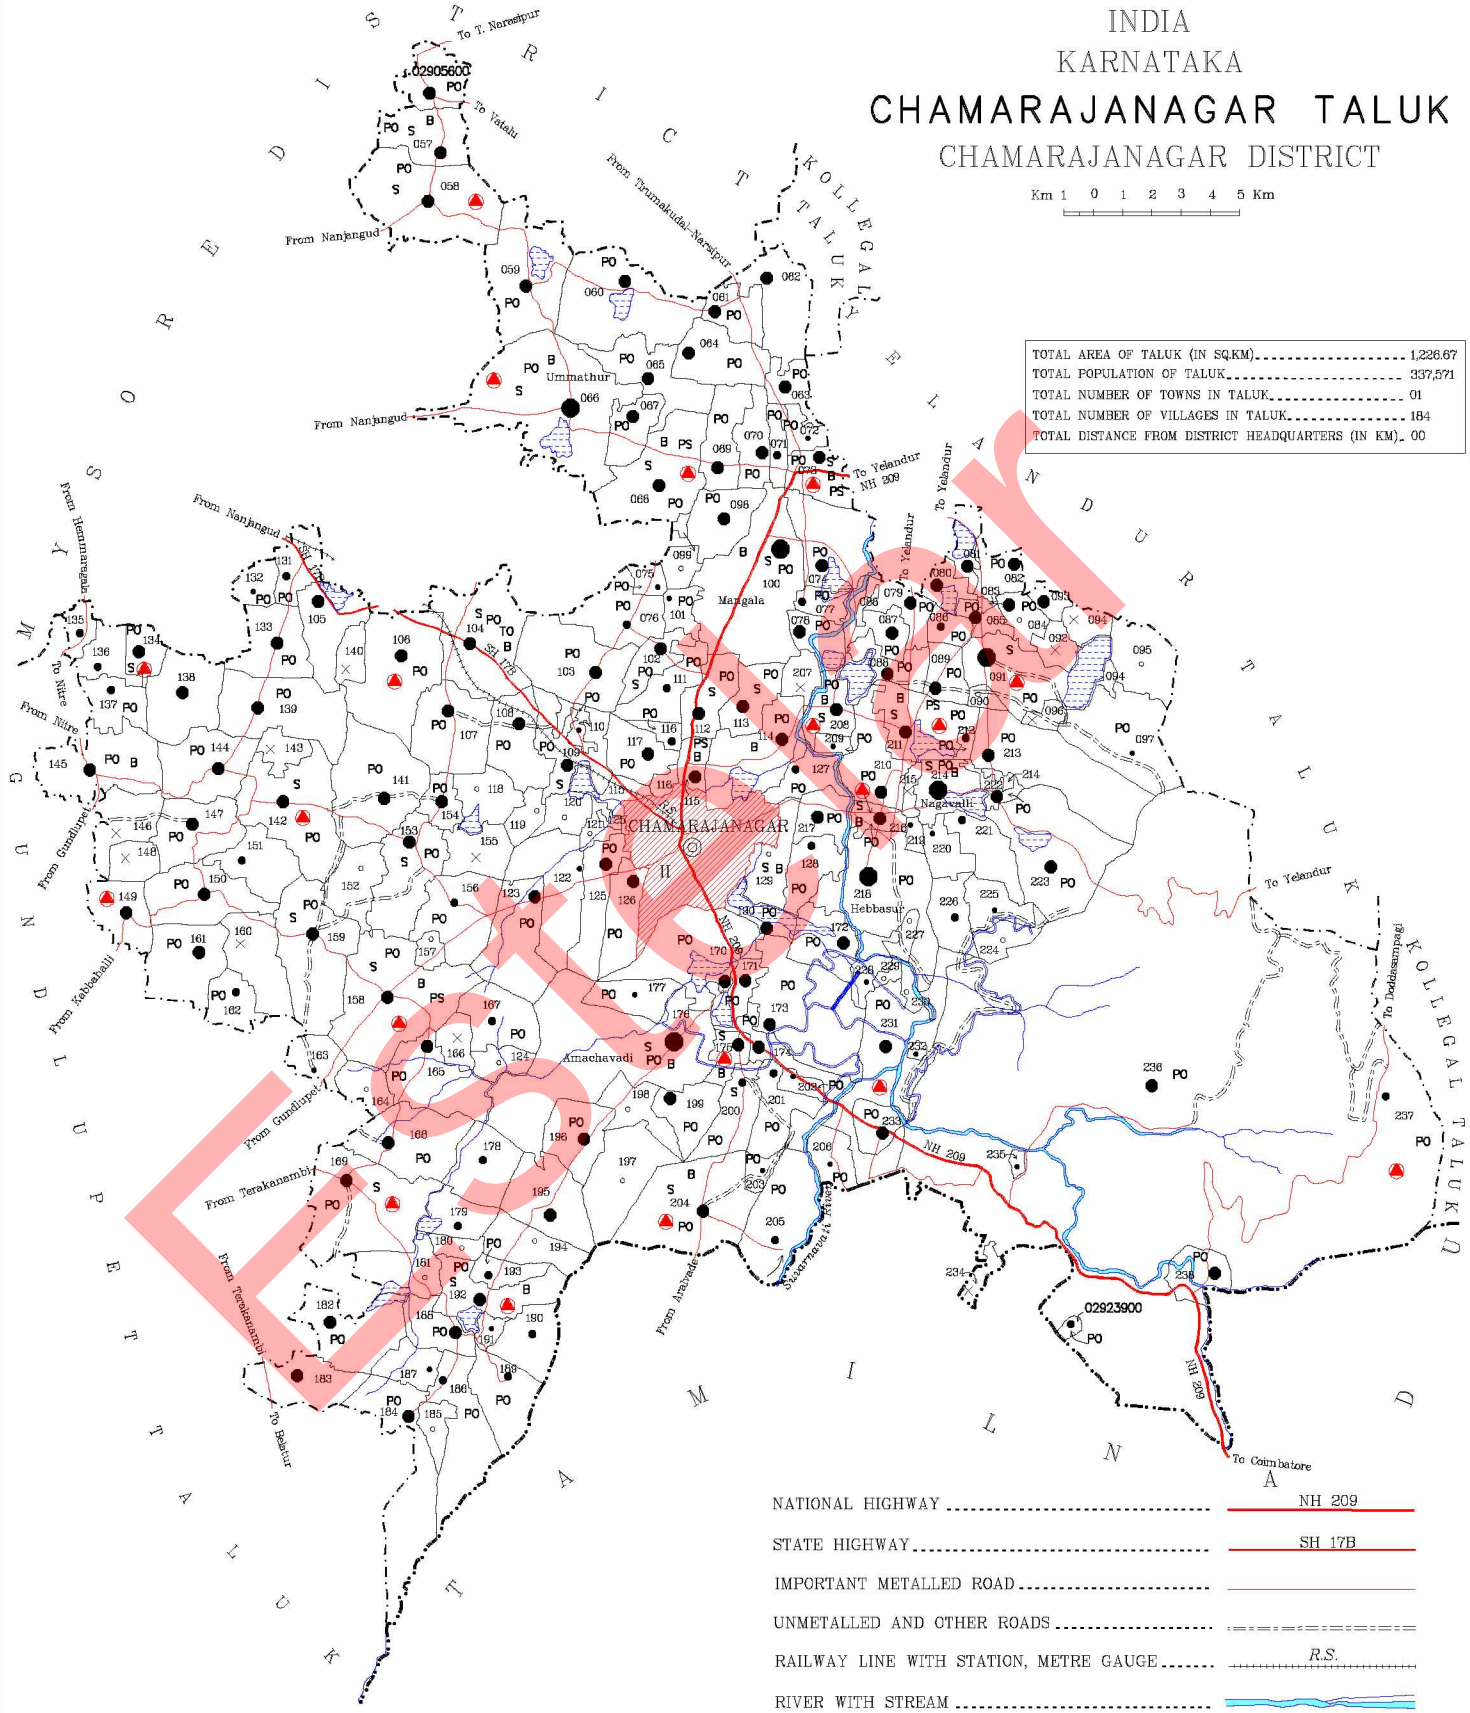

1. Adi, 2. Anal, 3. Angami, 4. Ao, 5. Bhotia, 6. Bodo/Boro, 7. Chakesang, 8. Chakru/Chokri, 9. Chang, 10. Deori, 11. Dimasa, 12. Gangte, 13. Garo, 14. Halam, 15. Hmar, 16. Kabui, 17. Karbi/Mikir, 18. Khezha, 19. Khiemnungan,

20. Kinnauri, 21. Koch, 22. Kom, 23. Konyak, 24, Kuki, 25. Lahauli, 26. Lakher, 27. Lalung, 28. Lepcha, 29. Liangmei, 30. Limbu, 31. Lotha, 32. Lushai/Mizo, 33. Manipuri (S), 34. Mao, 35. Maram, 36. Maring, 37. Miri/Mishing, 38. Mishmi, 39. Mogh, 40. Monpa, 41. Nissi/Dafla, 42. Nocte, 43. Paite, 44. Pawi, 45. Phom, 46. Pochury, 47. Rabha, 48. Rengma, 49. Sangtam, 50. Sema, 51. Sherpa, 52. Tangkhul, 53. Tangsa, 54. Thado, 55. Tibetan, 56. Tripuri, 57. Vaiphei, 58. Wancho, 59. Yimchungre, 60. Zeliang, 61. Zemi, 62. Zou
