SERIES-12 **KARNATAKA**

DISTRICT CENSUS HANDBOOK

Part - A & B

GADAG DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

लोकाभिमुख
PEOPLE ORIENTED

Directorate of Census Operations, Karnataka

F O R E W O R D

1. The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to taluk/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri.H.Shashidhar, Director of Census Operations, Karnataka. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division, Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and other who have contributed to make this publication possible.

Motif

Magadi Wetland in Gadag District

Magadi wetland is a tank situated on the Gadag - Laxmeshwar road, the size of the tank is around 35 hectares. The wetland attracts a huge number of migratory waterfowl. Notable among them is the Bar-headed Geese. Nearly 5000 birds visit the tank during winter and it is one of the largest wintering grounds in South India for the Bar-headed Geese. Apart from wintering migratory waterfowl, the tank is also home to the birds like Flamingoes, Spotbill ducks, Painted Storks, Purple Moorhens and Common Coots. Nearly 135 species of birds have been recorded near the tank.

The Bar-headed Geese is one among the four members of the family Anatidae which is considered to be threatened by Waterfowl Asia. The Bar-headed geese has the phenomenal ability to fly over the Himalayas, in fact is one of the highest flying bird in the world.

The Magadi tank is not only a wetland for the wintering birds but also acts as a lifeline for the people of Magadi village. The tank water meets the day to day needs of the population of the village. The wetland is becoming very popular and is emerging as a destination for Eco-tourism. A proposal to declare the wetland as a bird sanctuary is on the anvil.

The Magadi wetland was selected as one of the wetland to be covered under the UNDP - SACON project, which propose to identify wetlands of conservation importance in India.

P R E F A C E

In the foreword to the 2001 series of the District Census Handbooks, Sri. D.K. Sikri, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain salient data on the population for every village and town as revealed by 2001 Census. They also contain a wealth of information regarding villages and towns which, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information is also of considerable importance in the context of planned development.

The District Census Handbook is divided into two parts: Part A contains information regarding each village and town (Village Directory and Town Directory collected from various sources) and Part B which contains the data on the population collected during 2001 Census - the Primary Census Abstract. The data published in Part B was collected during February-March 2001 in the Population Census.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in 1999. The Village Directory formats were mailed to the Deputy Commissioners of Districts for obtaining the village wise particulars through Village Accountants. Similarly the Town Directory formats were mailed to the Commissioners of Corporations, Chief Officers of Town Municipal Councils, Town Panchayats, etc. The village wise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1991 District Census Handbooks. The Household Schedules, which were canvassed to collect the population data during 2001 Census, were scanned and data captured was processed electronically. The Primary Census Abstract was generated centrally on the computers by Registrar General, India.

In compilation of the District Census Handbooks, the Census Directorate had the co-operation of various departments of the State/Central Government. The Census Directorate gratefully acknowledge their assistance.

I take this opportunity to offer my grateful thanks to Sri. H. Shashidhar, Director of Census Operations and Sri. S.R. Raghavendra Rao, Deputy Director (Retd.) for their valuable guidance. I am also thankful to all the officers and officials of this Directorate who have been actively involved in the compilation of this volume.

I am highly grateful to Sri. J.K.Banthia, I.A.S., Ex. Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Sri R.G. Mitra, Ex. Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General and Sri S.L.Jain Deputy Director of Social Studies Division and Dr. R.P. Singh, Ex. Deputy Registrar General (Map) for their guidance.

District Highlights - 2001

1 New district carved out from the erstwhile Dharwad.

2 Population wise the rank of district is 25th in the State.

3 District occupies 22nd rank and 16th in the state with reference to Scheduled Caste and Scheduled Tribe population respectively.

4 In literacy rate the district is placed at 13th rank in the state.

5 District stands at 14th place in sex ratio.

6 Regarding number of villages the district stands at 25th rank in the state.

7 District occupies 18th place regarding density of population.

8 With regard to Decennial Growth, the rank of district is 17th in the state.

9 Regarding percentage of Scheduled Caste and Scheduled Tribe population, district is ranked at 18th and 14th position in the state respectively.

10 In respect of agricultural labourers the rank of district is 8th.

IMPORTANT STATISTICS, 2001

ANALYTICAL NOTE

(i) HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

Introduction

The District Census Handbook is, most valuable district level publication brought out by the Census Organization. It contains micro-level data drawn to the lowest administrative units viz, revenue village in the case of rural areas and Division/Ward level in the case of urban areas. It is extremely useful to the planners, administrators, demographers, sociologists, etc., as it contains resourceful wealth of data regarding basic amenities available in each village and town of the district such as educational, medical, drinking water, post and telegraphs, transportation and communication, banks, societies, recreation clubs, power supply, export/import of important commodities and land use besides, the particulars revealed during the latest census enumeration. It is for the first time that the district census hand book series was included in the census publication programme at the 1951 census, in order to satisfy the growing demand by the administrators, the planners, research scholars, demographers and the other such census data users, for micro-level data. The idea of compiling the District Census Handbooks was pioneered by Sri R.A.Gopala Swamy, I.C.S. the then Registrar General, India and Ex-officio Census Commissioner of India, with a view to preserve the Census records prepared for areas below the district level. He proposed that all the district Census tables and Census abstracts prepared during the process of sorting and compilation, should be bound together in a single manuscript volume and named as the District Census Handbook and suggested that the State Government should take up printing and publication at their own cost. Then onwards, the District Census Handbooks were published in each Census with improved pattern with an aim to give the Census and Non-census data at micro level for each village of the taluk as a whole to suit the requirements of various departments.

The data in the District Census Handbook will help not only in local area planning but also in regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. The District Census Hand Book sought to replace "Part IV - Taluk Tables and Part V - Village Tables" of the earlier censuses and to present the basic demographic and economic data in the form of "Primary Census Abstract" in respect of each and every village and town within the jurisdiction of the district. The district census handbook consists of two parts, viz, Part A and Part B. Part A comprises village and Town Directory while Part-B contains Village and Town level Primary Census Abstracts. In addition, these volumes contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

District Census Handbook 1961

It was in 1961 Census that the scope of District Census Hand Book was shaped in the present form by presenting i) an account of descriptive note on the district, ii) a set of non-census data tables dealing with the administrative statistics of the district for a decade, iii) taluk and town level census tables on economic and socio-cultural aspects and iv) the village and urban Primary Census Abstracts depicting the nine fold industrial classification of workers. Information on the availability of certain basic amenities in villages and towns, such as the source of drinking water and educational institutions was also presented in the volumes. However, the district census handbooks of 3 out of then existing 19 districts viz, Bangalore, Dharwad and Mysore were confined to the publication of the village-wise and urban (census enumeration block-wise) Primary Census Abstract only.

District Census Handbook 1971

During the 1971 census, the district census handbook was further refined to present the data in a systematic way. In view of country-wide uniformity in approach and to have a comprehensive coverage, the District Census Hand Books were presented in three parts each, for a district. Part A incorporates

the Town and Village Directories. Part-B incorporates the Primary Census Abstract and includes data, in the case of rural areas down to the village level and in the case of urban areas up to the block level. In addition, an introduction is included wherein the changes in jurisdiction, if any, of the district or of the taluks and the changes in the number of villages between 1961 and 1971 were explained. Part-B was essentially demographic in nature and was the end product of the tabulation of the enumeration results. Part C incorporates other census tables and administrative statistics. For convenience, Part-A and Part-B of the District Census Hand Book was presented in one volume and Part-C in a separate volume. In part-C volume, the district and taluk maps were included. These maps were prepared on the basis of maps obtained from the competent authorities concerned.

District Census Handbook 1981

The District Census Hand Book series of 1981, had some new features along with the restructuring of the formats of village and town directories, keeping in view the comparability of 1971 data. All the amenities except power supply in the village were brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place/village where it is available were given. A few new items of information such as adult literacy centres, primary health sub-centres and community health centres/workers, data on the availability of Newspapers, Motor Vehicles, etc., in the village, were introduced in the village directory to meet the requirements of the "Revised Minimum Needs Programmes". A new column "total population and number of households" was introduced to examine the correlation of the amenities with the population and number of households they serve. The contents of Part-A were further enlarged by including two appendices, namely a list of villages not having any amenities and a distribution of villages according to the proportion of Scheduled Castes and Schedules Tribes in the total population of the village. The format of Town Directory were also modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items such as class of town and its population, population of SC & ST, decadal growth rate of population, working women's hostel, adult literacy classes / centres, storage system regarding drinking water supply etc., and also the information about the nearest place and distance having educational, medical and fire-fighting facilities, in case such a facility is not available in the referent town. A new statement on civic and other amenities in slums in Class I and Class II town were included to help the planners to chalk out their programmes of slum improvements.

District Census Handbook 1991

The presentation of the District Census Hand Book for the 1991 Census was more or less similar to the manner followed in 1981. The format of Primary Census Abstract was restructured slightly. Nine-fold industrial classification of main workers were given as against four-fold classification. The sex-wise population in the age-group of 0-6 was included in the Primary Census Abstract for the first time to enable data users to compute more realistic literacy rates as all the children below 7 years of age were treated as illiterate at the 1991 census. One of the important innovations in the 1991 census was the Community Development Block-level presentation of data in the village directory and Primary Census Abstract instead of the traditional taluk/PS level presentation. C.D.Block is the lowest administrative unit for developmental planning. The choice of the C.D. Block as the unit for data presentation was formulated to help the planners in micro-level developmental plans. Another important improvement at the 1991 Census was dissemination of data through magnetic tapes/floppies in which both the computer as well as manual codes for each revenue village were provided along with the corresponding codes of 1981 Census. In the volumes of the District Census Hand Books, the computer codes assigned to the revenue villages in the 1991 Census and the corresponding codes of 1981 Census were presented so that it may facilitate the data users to use the data either from magnetic tapes or computer floppies.

Scope of the 2001 District Census Handbook

Like in the previous censuses, the District Census Hand Book (DCHB) for the 2001 Census brought out in two parts as usual viz., Part-A The Village and Town Directory, and Part-B the Village and Town Primary Census Abstract.

The District Census Hand Books for the 2001 census is essentially presented in the similar manner in which the District Census Hand Books of 1991 census were presented. This is because the data can be comparable with the earlier censuses and also to study the changes taken place during the decades and hence the approach in 2001 census is similar to 1991 census. The contents have been slightly enlarged and the formats too are restructured to suit the requirements of the data users. In the village directory for 2001 census certain new amenities like, news papers, magazine received, Income-Expenditure of the local bodies, information on number of banks, credit societies, recreational and cultural facilities, most important commodities imported, manufactured and exported have been included whereas the information regarding the "Day or Days of market/hat if any" which was there in 1991 has been excluded. Apart from providing the information about the nearest place and distance in broad ranges for villages not having basic educational and medical facilities, information about the nearest place and distance in broad ranges for villages not having Middle School, College, Hospital (Allopathic), Maternity and Child Welfare Center and Primary Health Center are also been provided this time. Information on availability of drinking water during summer is also included in the Village Directory. However, in the town directory there are no changes except in the statement IV-A where this statement is separately numbered as Statement VII in 2001. Except these, the scope of 2001 series of the District Census Hand Book has, by and large remained the same as in 1991. The non-census information collected at the village level and town level was scrutinized and verified. In case of glaring discrepancies the data were cross-checked with respective parent departments for validation.

One of the significant changes made in 2001 series of District Census Hand Book is that Primary Census Abstracts are presented to the jurisdiction of the Panchayats in the district. With the constitution (73rd Amendment) Act, 1992, it has become necessary for the census organisation to provide population data for the territorial area of a panchayat in order to strengthen panchayat raj system in the country. In view of this, panchayat-wise population figures for total population and for Scheduled Castes and Scheduled Tribes population has been compiled and presented in the form of Primary Census Abstract for each district.

Further another important step taken during the 2001 census, is assigning the Permanent Location Code Numbers (PLCN) to the villages. Location code number is a simple but unique device by which every area in an administrative unit in the State/ U.T. can be identified. Thus assigning of Location Code Numbers at various administrative levels, right from State/U.T. to the lowest level namely enumeration block, in census taking is an important step. Each clearly demarcated area can be referred to by a combination of numbers. In a State or U.T. the next administrative area is District, followed by taluk or police station, circle, Development Block or Mandal, etc., in different states/U.T.s. Next below this administrative area, in urban areas are cities/towns, further divided into wards/divisions and villages in rural areas. The Location Code Numbers to various administrative areas are assigned in orderly manner always beginning from northwest point and the numbering proceeds in a serpentine manner, keeping the geographical continuity, ultimately ending at the South-East point.

There was a great demand from different organizations to study the village level data over a time span and hence a scheme of assigning permanent location code numbers to the villages and the higher level of administrative areas is devised to ensure data comparability over a period of time. In Indian Census, Location Code Numbers are allotted to each village based on traverse system (zigzag) in a serpentine manner at taluk level. These numbers for villages run from '1' to 'N' in each taluk independently. This system was adopted until 1991 census. But, for the Census of India 2001, all the villages in a state/U.T. are assigned with a Location Code Number in one continuous series beginning from "1" to "N" for the entire state/U.T. and it is not confined to a taluk. The field length of the complete PLCN structure for a village has been kept up to 8 digits and therefore the location code number of village in a taluk contains 8 digits number for 2001 Census.

(ii) BRIEF HISTORY OF THE DISTRICT

After the 1991 Census, there were major changes in the administrative aspects of the State, due to administrative purpose, and 7 newly districts were carved out i.e., Chamarajanagar from the erstwhile

Mysore district, Davanagere from erstwhile Chitradurga, Bellary and Shimoga districts, Bagalkot from erstwhile Bijapur district. Gadag and Haveri from erstwhile Dharwad district, Udupi from erstwhile Dakshina Kannada district and Koppal from erstwhile Raichur district and there are 27 districts for the Census 2001 in the State.

Alike, Gadag district too had been carved out from the erstwhile Dharwad district, which comprises of 5 taluks namely, Gadag, Mundargi, Nargund, Ron, Shirahatti. Gadag taluk, which is big trade centre for cotton, groundnut crops and jowar, has been made District Headquarters wide Government of Karnataka Notification No. RD 42 LRD 87 PART- III Bangalore dated 2-8-1997.

Although, these 5 taluks, were taken out from erstwhile Dharwad district and are included in the new district, but their taluk Jurisdictional limits remain unaltered and one sub-division, which was in the erstwhile Dharwad district has been also included and its area limit also remain unchanged, but the Shirahatti taluk which has been included now in Gadag sub-division has been excluded from the Savanur sub-division of present Haveri district and erstwhile Dharwad district. Except the above, there were no other changes in the district.

Gadag was an eminent town from olden times. It is mentioned variously as Karnataka, Karatupura, Karadugu, Galadugu, Gadagu and described as a Mahaagrahara (i.e. great- agrahara), founded by Janamejaya. It was a renowned seat of learning whose management rested in the hands of seventy-two Mahajanas. There are 34 inscriptions in all and they are found mostly in the temples of Trikuteswara and Viranarayana. A few of these epigraphs appear to have been brought over from Betageri and Lakkundi. These records represent the Rastrakuta, later Chalukya, Kalachuri, Yadava, Hoysala and Vijayanagara dynasties.

The area comprised in the district has a few places of great antiquarian interest and has several sites of historical importance. The epics and the Puranas refer to this part of the country as forming part of Kuntala Desha. Lakkundi of Gadag taluk is for instance identified with the place described in ancient records as Sri Dasarathi Vinirmita Mahagrama (great village founded by Shri Rama) and as Rama-Rathi as agrahara. Ron is known as Dronapura and is said to have been named after Dronacharya, the famous guru of Kauravas and Pandavas. Puranas indicate that in ancient times the Matsyas, the Nagas, the Abhiras, Mahisika, Ajas and the Vanaras for varying periods ruled Karnataka, including this part of the country as well. Available evidence shows that men from the early palaeolithic age too inhabited this district. The relics of the palaeolithic period discovered in the district include the Cairns at Agadi, the dolmens at Motebennur, the pigmy flints, which are regarded as the memorials of the survivors of the palaeolithic man, and the clinder mound at Budiguntha. Among the artefacts of the neolithic period, a mention may be made of the painted potsherds, terracotta fancy articles and the Ukhapatra (sacrificial pot) discovered at Itgi and a few other places.

During the early historical period the entire Deccan region, including this district also, formed part of the Mauryan empire. Reminiscences of the Mauryan rule have lingered on to the modern times in expressions such as Morerangadi and Moreramatti applied to the dolmens and cairns found in several parts of the district. References in ancient inscriptions to various centres of this district reveal that the then Dharwad area too formed part of the empire of the Satavahanas who came to power after the fall of the Mauryas in the Deccan and claimed themselves to be the Lords of the Dakshinapatha. With the downfall of this main dynasty, the Satavahana empire was partitioned among the Abhiras in the north-west, the Chutus in the south and the Ikshavakus in the Andhradesha. The Kuntala country, including the then Dharwad district as well, formed part of the kingdom of the Chutus during the early parts of the Christian era. Subsequently till the emergence of the Kadambas in about 345 AD, the Gangas and the Pallavas reigned supreme for brief periods, in turns. The Kadambas (345 AD to 565 AD) had their capital at Banavasi and their kingdom included among other areas, the Suddi-Kundur Vishaya (which later came to be known as Kundur-500, extending from Narendra near the then Dharwad upto Halsi in Belgaum) and major parts of which now stand included in Dharwad district. The central and the northern parts of the district too formed part of their territory as may be made out from the description of the boundaries of their kingdom contained in Birur plates.

In the beginning of the sixth century, the Chalukyas of Badami established their supremacy and rendered the position of the Kadambas into that of their vassals with the title of Mahamandaleshvaras. The district has yielded numerous records registering grants made to various temples (543-65 AD) by Kritivarman II (744-55 AD). The Rashtrakuta Dantidurga in turn overthrew the Chalukyas in about 756 AD. The supremacy of the Rashtrakutas lasted for a little more than two centuries and during this period too the Kadambas managed to retain their position as feudatory chiefs. In matters of prowess and extending patronage to art and literature almost all the Rashtrakuta monarchs have carved out an unique place for themselves. Govinda III (792-814 AD) for instance led his victorious armies up to the Himalayas in the north, and brought the Pallava Dantiga and the Eastern Chalukya king Vishnuvardhana under his subjugation. The name of Nripatunga Amoghavarsha I (814-80 AD) the author of the famous Kavirajamarga, stands foremost in the annals of kannada history, literature and religion. However, Karka the last ruler of this dynasty defeated the family of the Later Chalukyas or the Chalukyas of Kalyan. Under Taila II (973-97 AD) the Belvola and Purigere countries were under the administrative control of his feudatories named Konnappa and Sobhanarasa. The latter is said to have exercised control over Kundur, Kukkunur and Halsige tracts as well. An inscription dated in 1071 AD states that when the Cholas invaded Belvola, burnt many temples, and destroyed several Jaina shrines at Purigere (Lakshmeshvar) as well, Someshvara I (1042-68 AD) repulsed the attack with the help of Chattadeva and Barmadeva. During the period of Someshvara II (1068-76 AD), Lakshmanarasa was the governor of Belvola and Purrigere while Udayaditya of the Ganga family, governing from the city of Bankapur, had the charge of Banavasi as well.

In 1076 AD, Vikramaditya VI rebelled against his brother Someshvara II and occupied the Chalukyan throne. Vikramaditya reigned supreme till 1126 AD and founded an era, called Chalukya Vikrama Varsa, in commemoration of his victory. A large mass of epigraphs bearing reference to the reign of 50 years has been hailed as the most glorious period of the Chalukyan rule when feudatory chiefs belonging to the Kadamba, Sinda, Gutta, Yadava, Kalachurya and Hoysala families ruled in their respective territories as Mahamandaleshvaras and paid homage to the imperial throne. His successor Someshvara III (1126-38 AD), known for his learning, is the author of Manasollasa or Abhilasha Chintamani which gives a great deal of information on a variety of subjects. He was succeeded by his son, Jagadekamalla II (1139-55 AD), who in addition to his capital at Kalyan, is, said to have established a provincial centre, at Kadalipura, near Hanagal. During the reign of his young brother and successor Taila III (1150-63 AD) the power of the Chalukyas rapidly declined. Bijjala of the Kalachurya family, who was then the commander-in-chief, enlisted the cooperation of some of the dissident power chiefs such as Vijayarka, Prolaraja and kept his own master Taila under complete subjection. In 1157 AD Taila III fled to Annigeri in the then Dharwad district and made it the capital of his kingdom which was greatly reduced in extent. In 1162 AD, Bijjala marched against Taila forcing the latter to retreat further west to Banavasi and declared himself an independent monarch. The supremacy of the Kalachuryas lasted hardly for two decades. During the brief reign of Bijjala, his prime minister Basaveshvara emerged as a great social and religious reformer and his egalitarian teachings acquired an overwhelming number of followers. The opponents of the reforms preached by Basaveshvara included the king also and the chain of events that took place in the capital culminated in the flight of Basaveshvara to Kudala Sangama and an insurrection in which the Bijjala himself was killed.

In 1182 AD Someshvara IV of the Chalukya family regained some of the provinces of his ancestral dominions from the Kalachuryas and re-established the Chalukyan Empire in this region for a short period. He established himself at Banavasi and had his capital at Annigeri also. Shortly thereafter, the Yadavas of Devagiri (who in the meantime had captured large parts of the Chalukyan empire in the east and the north-east of the then Dharwad from the Kalachuryas) took over these territories also. Though the period of the Later Chalukyas is reckoned from 1184 AD their empire was divided between the Hoysalas in the west and the south, and the Yadavas of Devagiri in the north and northeast. This division however ceased in 1210 AD when the whole of the dominions passed to the Yadavas of Devagiri. That

there was a keen contest between the Hoysalas and the Yadavas for the occupation of the delta between the Tungabhadra and the Malaprabha is evident from the existence of records, both of Hoysala Ballala and Yadava Singhana, in the same region issued by each after their conquests of the place. Hoysal king Vishnuvardhana (1100-52 AD) is said to have extended his power up to Banavasi, Panugal, Halsige, Purigere and Masvadi near Dharwad. His conquests were short-lived and a somewhat more lasting conquest of Dharwad region was by Vira Ballala II (1173-1210 AD). A hero stone in Satenahalli near Hanagal refers to the battle between Vira Ballala and Mahamandaleshvara Kamadeva and suggests that this region was occupied by the former after wresting it from Kamadeva. In 1192 A.D. Vira Ballala established himself at Lokkigundi (modern Lakkundi). Much before this, according to an inscription at Gadag, he had defeated Kuntala country and had a capital at Annigeri also. An inscription on a hero stone at Haveri records that in 1196 AD Vira Ballala laid siege to the city and that his forces were routed by the dashing counter-attack by the brave Sohani and his son Padmanna the leaders of the Kadamba garrison and that in this battle Sohani lost his life. Later, in 1200 AD, Ballala succeeded in taking Hanagal. His son and successor, Narasimha II (1220-39 AD), however lost all that his father had captured in the north of the Tungabhadra and retired to Dwarasamudra.

The first mention of Yadavas in connection with the then Dharwad is in the reign of their third King Bhillama (1187-92 AD) whose son was defeated by Vira Ballala at Lakkundi. As this victory is said to have secured to Vira Ballala the country of Kuntala it is evident that Bhillama must have then held a fairly extensive kingdom including the then Dharwad. One of his inscriptions at Annigeri, dated in 1189 AD speaks of Annigeri as the capital from which his underlord, Mahamandaleshvara Bachiraja was governing Belvola. Gadag, Lakshmeshvar, Chaudadanapur and Rattihalli have yielded inscriptions belonging to Singhana II (1209-47 AD) the grandson of Bhillama. In 1247, his Mahapradhana and Senapati Bachiraja was the governor at Lakshmeshvar. A Haveri inscription belonging to the reign of Krishna (1247-1309 AD) the grandson of Singhana, states that his minister Chavundaraya was administering these territories from his capital at Puligere i.e., Lakshmeshvar. Several epigraphs belonging to the reign of Ramachandra Deva (1271-1309 AD), the greatest of the Devagiri Yadava kings, have been found at Chuddnpur, Lakshmeshvar, Naregal and Rattihalli. One of these inscriptions, dated in 1277 AD, mentions that one of his Mahamandaleshvaras namely Saluva Tikkama, led a victorious expedition upto Tungabhadra in the south. Tikkama has been hailed in it as the establisher of the Kadambas and the over thrower of the Hoysalas.

According to another inscription in 1295 AD, his Mahapradhana Mallideva was the governor at Lakshmeshvar. During the reign of his successor Shankara Deva (1309-12 AD), the Yadava kingdom was annexed by the Sultan of Delhi. The suzerainty of the Sultan was resisted by Kampila Raya who was a subordinate of Yadava Ramachandra and had declared independence during the period of the political chaos that ensued the invasions by Malik Kafur. This new kingdom with its strongholds at Kampili, Kummata and Hosadurga (Anegondi) included the present districts of Bellary, Raichur and Dharwad. However, in the 1327 AD campaign Kampila Raya was killed. But, by then, he had sown the seeds from which the great Vijayanagara Empire emerged. An inscription found in Lakshmeshvar commemorates the death of Kampila Raya while another found at Sangur in Haveri taluk records that the image of Kumara Ramanatha (the valiant son of Kampila Raya) was set up at Chengapura (Sangur) by Madarasa in Saka 1329 during the reign of Devaraya. This image is even now regarded as an object of worship and in folk literature, Kumara Rama is hailed as a great saviour. As a result of the conquests undertaken by Harihara and Bukka soon after the formation of the Vijayanagara kingdom, the then Dharwad district too became one of its integral parts. While Vijayanagara was fast developing, another powerful force, namely that of the Bahamanis, emerged with Gulbarga as its headquarters. As a result northern parts of Karnataka inclusive of the then Dharwad district became a ground of hot contest between these two powerful rivals. Consequently wars were fought more frequently and the people of this region were subjected to much suffering. In spite of several reverses, by and large, the Vijayanagara kings retained control over a major portion of the district during this period.

Navalgund and Bankapur however were among the notable possessions of the Bahamanis.

Yusuf Adil Khan proclaimed independence, seized Bijapur as also Bahamani possessions in the then Dharwad district and founded the Adil Shahi rule in 1498 AD. The rivalry for the possession of the then Dharwad region became much more intense until Sri Krishnadeva Raya (1509-29 AD) defeated Ismail Adil Shah in decisive battles and ushered in a period of comparative peace and prosperity. Sri Krishnadeva Raya and his brother Achyuta Raya are credited with the introduction of the system of water works for which the district is famous and also with the introduction of Rai Rekha Mar survey which formed the basis of all later revenue settlements. During this period the Portuguese occupied Goa and they were on good terms with the Vijayanagara monarchs. This region flourished as it was located on the main trade route between the capitals of Goa and Vijayanagar.

With the decline of the Vijayanagara power following the death of Rama Raya in the battlefield and the utter defeat suffered by the Vijayanagara forces at the Rakkasa Tangadgi battle in 1565 AD, the unbifurcated Dharwad district came under the sway of the Bijapur kingdom. In 1569 AD the then Dharwad district witnessed a major war for supremacy fought between the forces of the Sultan of Ahmednagar and those of Ali Adil Shah. The governors at Dharwad and Bankapur who had been appointed by the erstwhile Vijayanagara kings held out as independent rulers and fiercely resisted the imposition of Bijapur rule for a short while. It was in fact only in 1573 AD that Ali Adil Shah (1557-80 AD) could capture Dharwad (which was regarded as one of the strongest forts at that period) and follow it up in 1575 by the annexation of Bankapur. Thenceforth, for about a hundred years, this region formed part of the Adil Shahi kingdom of Bijapur, that is, until it was taken over by the Moghul emperor. Though this period of Bijapur rule cannot be hailed as a period of undisturbed peace and prosperity, it may be said that wars were much less frequent. In the latter half of the 17th century it has been recorded that this region was full of villages with weavers and that Hubli was a place of much wealth and trade.

Muhammed Adil Shah of Bijapur refused to accept the supremacy of the Moghul emperor. Consequently in 1633 AD Moghul emperor Shah Jehan invaded the Deccan and laid waste the country and also extirpated the Sultan of Ahmednagar. In 1637 AD, Shahji Bhonsle who was till then in the service of Ahmednagar Sultan entered service in the court of Muhammed Adil Shah of Bijapur and soon earned for himself a place of honour in the Bijapur kingdom. About a decade later, in 1647 AD, his son Shivaji rebelled against the Bijapur Sultan as well as his own father and established himself as an independent ruler with his capital at Kalyan. Shivaji captured portions of the then Dharwad district also. In 1673 AD, while ravaging Bijapur territory, the Maratha army plundered the rich mercantile town of Hubli. In 1674, Shivaji fortified Nargund and took Dharwad as well. At about this time, Abdul Karim Khan was appointed as the governor of Bankapur province and also as the chief captain against the Marathas. Aurangzeb's son, Sultan Muassim, marched in the name of the Delhi emperor to regain the lost territories and to establish the supremacy of the Moghul and placed garrisons at both these places. But, as his army was greatly reduced due to famine conditions he was compelled to withdraw towards Ahmednagar. However in 1686 AD, Aurangzeb captured Bijapur and annexed the entire kingdom to his empire. The Moghul rule, which started thus, was purely of a military nature and it lasted till 1720 AD only. Abdul Rahuf Khan, the son of Abdul Karim Khan the Bijapur governor of Bankapur, was inducted into the service of the Moghul emperor and was entrusted with the administration of the then Dharwad region and the surrounding areas. At first he had his capital at Bankapur but, shortly after assuming office, he preferred to move over to Savanur.

The Moghul power began to weaken soon after the death of Aurangazeb in 1707 AD. This led to the establishment of two Maratha principalities under two of Shivaji's grandsons: Satara under Sahu and Kolhapur under Sambhaji. In 1719 AD, Sahu received three imperial grants: one for the Chowth (one-fourth-share), another for the Sardeshmukhi (one-tenth-share) of the revenues of the six Deccan provinces including Bijapur which covered the then Dharwad as well and the third grant was for the swaraj of sixteen districts including Gadag. Sahu appointed Fathe Singh Bhonsle, the Raja of Akalkot to collect the dues on his behalf. The local Subhedars were however too powerful to

allow the Marathas to collect the tributes. As a result in 1726, Peshva Baji Rai himself marched into Karnataka with a large army and plundered places as far south as Shrirangapattana. But he did not make any attempt to establish his power on any durable basis. In consequence thereof the Nawab of Savanur gradually acquired a large territory and in 1746, he openly resisted the Marathas. This was resented by the Peshva and culminated in a Maratha invasion of his territories. The Nawab entered into a peace treaty by which he yielded large tracts of the then Dharwad district to the Peshva and retained only Hubli, Bankapur, Hanagal and a few other places. Again in 1755, the Nawab, invited trouble by offering asylum to a deserter of the Maratha command. Bankapur was beseiged by the Marathas and realising the futility of holding out, the Nawab bought peace by surrendering a few more tracts to the Peshva.

The local desais were permitted by the Peshva to administer the ceded territories and he made them responsible for regular payment of tributes due to the Marathas. A few years later, in 1764, Haidar Ali of Mysore subdued the Nawab of Savanur when the latter refused to break off his allegiance to the Marathas. His general Fazal Ulla Khan took the unbifurcated Dharwad and over ran the country as far north as the Krishna. Naturally, there was counter attack by Peshva Madhava Rao, and, even though the advance party led by Gopal Rao Patvardhan was defeated by Fazal Ulla Khan, the Peshva used his troops for driving out Haidar's garrisons from the towns and villages north of the Varada and he also took the then Dharwad. Thus the Maratha supremacy was again re-established in this region. After the death of Peshva Madhava Rao in 1773 there were dissensions in the Poona Court. At this juncture Haidar Ali entered into close relations with Raghunatha Rao, acknowledged him as the head of the Marathas and agreed to support him in the fight for succession. In 1776, in return for a gift of Rs.16 lakhs, Raghunatha Rao agreed that Haidar Ali should take hold of the country to the south of Krishna. Accordingly, Haidar Ali crossed the Tungabhadra, took Bankapur and Savanur. The opponents of Raghunatha Rao enlisted the support of the Nizam and marched south to drive out Haidar's troops. Muhammed Ali, the Mysore general, destroyed the advance party and Haidar Ali tactfully bought off the Nizam's forces. The Maratha re-crossed the Krishna without risking any action. Then, Haidar Ali retook the unbifurcated Dharwad and also established his suzerainty over the Desais of Nargund, Navalgund, Dambal, Sirahatti and such other strong places. He strengthened his hold on the district further and formed a close alliance with the Nawab by accepting the offer of Nawab's daughter for his own second son in turn. It was only in 1782 that the Marathas could turn their attention to the territories they had lost to Haidar Ali. Nana Phadnavis demanded that Haidar Ali should pay the tributes due to the Marathas and also to restore to him the territories north of the Tungabhadra. At this juncture, consequent on the death of Haidar Ali, his son Tipu Sultan took over the reigns of administration. When Nana Phadnavis renewed his demands, Tipu Sultan acknowledged the obligations but evaded payment. In the meantime, the Nawab of Savanur shifted his loyalty to the Marathas and thus incurred the wrath of Tipu Sultan. The Nawab was attacked and forced to seek refuge at the Poona court. In 1785, Tipu Sultan demanded a higher tribute from the chief of Nargund. But the chief refused to pay up and sought for the intervention of Nana Phadnavis. Tipu Sultan besieged Nargund and, inspite of the reinforcements despatched by Nana Phadnavis, captured Nargund. He took Kittur as well.

The Marathas then formed an alliance with the Nizam and in 1786 started a major offensive by which they compelled Tipu Sultan to negotiate a treaty. Tipu Sultan, however, had no intention of honouring the agreement and, as soon as the Marathas crossed the Krishna, Mysore troops recaptured Kittur and all other places. Annoyed at this utter faithlessness on the part of Tipu Sultan, the Marathas forged an alliance with the English as well to mount an attack to regain their territories. In 1790, the confederate forces launched a major offensive as a result of which all the territories north of the Tungabhadra (i.e. Bombay-Karnataka region) came under the Maratha rule. By the treaty of Shrirangapattana (1792), the Marathas were, confirmed in their possessions in what has come to be known as the Bombay-Karnataka region. The Maratha rule lasted for nearly three decades and was marked by internal rivalries and considerable hardship to the common man. Most of the then Dharwad and Savanur region was made over by the Peshva to Parasuram-bhau in payment of the expenses incurred

by the latter in the war, which had just concluded. In respect of the other areas the Peshva appointed Dhondopant Gokhale as his representative. Around 1790, Dhondia Vagh who had risen to a high rank in the Mysore army left Tipu's service and, with a few followers, settled near Dharwad as a freebooter. In 1794, Dhondopant Gokhale defeated Dhondia Vagh and forced him to take refuge with Tipu Sultan. Thereafter Dhondopant Gokhale was appointed the Sar-Subhedar of the province. Owing to the policy of self-aggrandizement adopted by him and the absence of Parasuram-bhau from the district resulted in widespread disturbances for a considerable period of time. Thus, for about a decade from 1797, Bhimrao who had possessed himself of Dambal near Gadag, let loose a reign of terror and unceasing pillage, with the connivance of Dhondopant Gokhale, in the country south of Malaprabha.

In the south, contests were continually going on amongst the followers of Dhondopant gokhale, Parasuram-bhau and the chief of Kolhapur. In the course of these struggles, while Dhondopant appropriated Navalgund and Gadag, the Kolhapur chief took over a major portion of Parasuram-bhau's possessions. In 1799 the fourth Mysore war culminated in the fall of Shrirangapattana and the death of Tipu Sultan. Parasuram-bhau was also killed in 1799. At this juncture, Dhondia Vagh who had been imprisoned and kept in irons, by Tipu Sultan was, set free by the British. He gathered a small army, rebelled against the British rule and began to plunder the countryside. He was however forced to leave the Mysore territories by hot pursuit and on his entering the then Dharwad district, Dhondopant Gokhale too attacked him and forced him to move further north to take up the service under the chief of Kolhapur. Subsequently, in early 1800, Dhondia Vagh re-entered the then Dharwad district, firmly established himself in the Savanur country and assumed the title of the king of the two worlds. Thereafter he captured almost all the forts north of Tungabhadra and reigned supreme for a brief period. The combined forces of the British and the Peshva mounted a major attack on Dhondia Vagh in which the latter was finally killed. The destruction of Dhondia's power did not free the district from disturbances mainly because of the bitter feelings between Peshva Baji Rao and the Patvardhans. Struggle for power and plunder among the local estate holders continued almost unchecked. Towards the close of Baji Rao's Peshvaship most of the Southern Maratha chiefs maintained an attitude of semi-independence. In 1817, under the treaty of Poona, the Peshva ceded the territory of the then Dharwad and Kusugal to the British, which the latter occupied without much delay. A year later, in 1818 at the end of the Maratha war, the Peshva was formally deposed and his territory was formally annexed to the British dominions. Thus a major part of the unbifurcated Dharwad district too came under the British rule. In 1830, the Southern Maratha country was brought under Regulation VII and these territories were formed into one collectorate, called the Dharwad district or Zilla. This included, besides the present Dharwad district, parts of Belgaum, Bijapur and Solapur districts. In 1836 Belgaum was formed into a separate collectorate and in 1839 as a consequence of the annexation of the estate of the chief of Nipani 13 villages in Annigeri were added to the district. The year 1857-58, which has since been hailed as the year when the first war of independence was fought, witnessed anti-British rebellion in the then Dharwad district too. Baba Saheb of Nargund, Bhimrao of Mundargi and Kenchengauda of Shirhatti were in the forefront of the struggle. As elsewhere here too the rebellion was crushed and Baba Sahib was publicly hanged along with scores of his followers. With this, the British rule took firm roots and lasted till the country-attained independence in 1947. Thereafter, the princely States and estates were formally merged with the Union of India and the entire unbifurcated Dharwad district formed part of the then Bombay State. In November 1956, as a result of the re-organisation of the States on a linguistic basis the entire Bombay-Karnataka region, including the then Dharwad district, was merged with Mysore State, which has since been renamed as Karnataka. Gadag district has five taluks namely Gadag, Mundargi, Nargund, Ron and Shirhatti. The district lies within the jurusdiction of Belgaum Division, which is one of the four divisions into which the state is divided for the purpose of the administration.

(iii) Administrative setup and jurisidictional changes during the decade, 1991-2001

Gadag district is situated in the central sector of the northern half of Karnataka, comes under Belgaum revenue division. This district has been carved out from the erstwhile Dharwad district which comprises of five taluks, namely, Gadag, Mundargi, Nargund, Ron and Shirhatti. Gadag has been made as District Head Quarters vide Government of Karnataka Notification No. Rd 42 LRD 87 Part - III Bangalore dated 02-08-1997. Although, the five taluks were taken out from erstwhile Dharwad district and are included in the new district, but their taluk jurisdictional limits remained unaltered. Gadag, once a taluk Headquarters in the erstwhile Dharwad district during 1991 has the pride of being a district Headquarters during 2001.

Total number of towns / villages

According to 2001 Census, there are 9 towns and 337 villages in the district. As compared to the position in 1991 Census, where in there were 9 towns and 312 villages in Gadag district.

REASONS FOR VARIATION IN THE NUMBER OF VILLAGES/ TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS IF ANY AND REASONS THEREOF

Sl.No.	Name of the Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalised		Reasons for variation in the number of villages/towns in each taluk of the district, decadal variations if any and reasons thereof
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
1	Nargund	35	35	01	01	-
2	Ron	93	91	03	03	Two newly formed villages viz., (1) Melmanth vide Notification No. RD 11 LRD 95 dated 25-07-97 and (2) Bhairapur, vide Notification No. RD 24 LRD 92 dated 10-09-94 were added to 2001 Census List of Villages. With the addition of these two villages, the total number of villages in the taluk increased from 91 in 1991 to 93 in 2001 Census. The civic status of Ron Town has been changed from Town Municipality to Town Panchayat vide notification as indicated under Gadag District.
3	Gadag	64	55	02	02	Six new villages viz,. (1) Jalashankar Nagar (2) Siddarameshwaranagar vide Notification No. RD 11 LRD 95 dated 25-07-97 and (3) Balajinagar (4) Panduranga Nagar (5) Bramandapur (6) Mahalingeshwaranagar. were constituted vide Notification No. 24 LRD 92 dated 19-09-94. in the taluk and subsequently included in the 2001 village list. Further in 1991, it was presumed that entire geographical areas of Mulgund, Seethalahari and Basapur villages were included in Mulgund Town limits, later it was noticed that only some portions of these villages formed part of the town. The left out areas of these villages were considered as separate villages and included in the 2001 list of villages. With the inclusion of these 9 villages the total number of villages in the taluk has increased from 55 in 1991 to 64 in 2001 census. The civic status of Mulgund Town of this taluk has changed from Town Municipality to Town Panchayat vide Notification No. HUD 388 MLR 95 dated 13.10.95
4	Shirhatti	87	83	02	02	The following four villages were newly constituted vide Notification No. RD 24 LRD 92 dated 06-12-1995 – (1) Suvarnagiri (2) Guddapur (3) Shivajinagar (4) Sevanagar and added to 2001 Census List of Villages. With the addition of these villages, the total number of villages in the taluk moved up to 87 in 2001 Census from 83 in 1991 Census. The civic

REASONS FOR VARIATION IN THE NUMBER OF VILLAGES/ TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS IF ANY AND REASONS THEREOF

Urban local bodies

The statutory urban local bodies are the City Municipal Councils, Municipal Corporations, Notified Area Committee, Town Municipal Councils, Town Panchayath, Cantonment Boards. These urban local bodies elect Councilors / Corporators from each ward and the tenure of those Councilors / Corporators would be for five years. The President or Vice President of the Municipal Council and the Mayor / Deputy Mayor of the Corporations are elected from among the elected Councilors / Corporators whose tenure will be for a period of one year. The Chairman of various committees are also elected among the elected Councilors with a term of one year.

The Chief Officer in Municipal Council and the Commissioner in a City Corporation are responsible for day to day administration and the executive authority is vested with them.

Zilla Panchayat and Taluk Panchayat

To promote the development of institution and secure greater measure of participation by the people in the local and governmental affairs by decentralisation of power and functions and for the purpose of development planning and implementation of various programmes there of Zilla Panchayats have been constituted in the State. The jurisdiction of Zilla Panchayat is coterminous with that of the corresponding district and covers the entire rural and semi urban area but excludes the statutory towns. Accordingly to Zilla Panchayat has been constituted for Gadag district and its jurisdiction extends over the Taluk Panchayats of the district. The jurisdiction of each taluk Panchayat is coterminous with that of the taluk of the same name but excludes the area incorporated in the statutory towns or cities.

The Zilla Panchayat elects its president and vice-president and chairman of its committees from amongst the elected members. The term of these elected representatives will be for five years. An officer of the rank of IAS is deputed by the State Government as Chief Executive Officer of the Zilla Panchayat. Panchayat is assisted by various departments.

Gram Panchayats

The Government of Karnataka has enacted the Karnataka Panchayat Raj Act 1993 on 30.4.1993 replacing its previous enactment in this regard for the formation of Gram Panchayat.

STATEMENT SHOWING THE TALUKWISE NUMBER OF GRAMA PANCHAYATS AND HOBLIS/ FIRKAS

	Total	**10**	**110**

Details regarding Panchayatwise number of villages have been furnished in Annexure I.

The Grama Panchayat is authorised to function on the items listed in Schedule I of the Act namely, preparation of annual plans for the development of Panchayat area, preparation of annual budget, providing reliefs in natural calamities, removal of encroachments on public properties, organising voluntary labour and contribution for community works, maintenance of essential statistics of the village, in addition to matters relating to Agriculture, Animal Husbandry, Fisheries, Social & Farm Forestry, Khadi, Village & Cottage Industries, Rural Housing, Drinking Water, Roads, etc., Rural Electrification, Nonconventional energy sources, Poverty Alleviation Programmes, Markets & Fairs, Rural Sanitation, Public Health & Family Welfare, Women and Child Development, Social Welfare, Welfare of Weaker Sections, Public Distribution System, Maintenance of Community assets, Construction and Maintenance of Dharmashalas, Chatras, Cattle Sheds, Ponds, Cart Stands, Slaughter Houses, Public Parks, Play Grounds, etc. Regulation of manure pits in public places and establishment and control of shandies. Such other functions as may be entrusted.

The Grama Panchayat is also empowered to make provisions for carrying out within its area any other work or measure which is likely to promote the health, safety, education, comfort, convenience or social or economic well being of the inhabitants of the Panchayat area.

(iv) PHYSICAL FEATURES

(1) Location and size

Gadag district is located in the Central sector of the northern half of Karnataka state. The district has an irregular shape and while its maximum length from north to south is 105 kms and maximum breadth from east to west is 83 kms spanning a total Geographical area of 465,715 hectares.

Gadag district lies between the Latitudinal parallels of 14 degree 54 minutes south and 15 degree 53 minutes north and longitudinal parallels of 75 degree 16 minutes west and 76 degree 03 minutes east.

Gadag district is bound by Bagalkot in the north and Koppal district towards the east. Dharwad bound Gadag district in the west and on the south Haveri and Bellary bound the district Gadag.

(2) Physiography

The district may be divided into two natural division namely the semi-malnad and maidan particularly the northern maidan. The Gadag district is a part of Central Karnataka Plateau. The region extends over the entire area of Nargund, Ron and Gadag taluks and certain parts of Shirahatti taluk. The landscape of the region is an undulating surface, relief is subdued. However, residual knolls are studded at some places around Nargund. The most conspicuous areas of very high and very low areas of the district is located at 500 meters and 800 meters of contour lines above the mean sea level respectively.

The hill ranges with their base and rounded topography are typical representatives of this area. To its north towards Laxmeshvar and Shirahatti the landscape changes into one of small hills and rounded bosses influence by a granitic out crop. On the north eastern side of this tract lies the Kappatgudda range which stand in isolation, stretches about thirty miles south east from Gadag after an initial stretch as a

single ridge from Gadag, the range branches of into three or four parallel hill ranges near Dambal, but once again closes into a single range towards the Tungabhadra.

(3)Drainage

The erstwhile Dharwad district was drained by two major river i.e. Malaprabha in the north and the Tungabhadra in the south. With the bifurcation of the district into three part viz Dharwad, Gadag and Haveri, the drainage system of the Gadag district has underwent changes. Hence, it can not be stated that, these two rivers are the perennial rivers of the Gadag district.

Yet, it may be mentioned here that, the Malaprabha and Tungabhadra rivers are the source of drainage to Gadag district. North east portion of the district is drained by Bennihalla, Hirehalla and Tupari nadi with dendritic drainage pattern. Bennihalla is the main tributary of Malaprabha. The Bennihalla drains the west part of the district. An extremely low gradient, a broad shifting course intensely furrowed bank, deep gullies and an equally deep loamy bed, threaded channels, and saline waters which leave their traces in the dry seasons are the characteristic feature of the Bennihalla. Of the other seasonal streams, the Hirehalla drains the hill tract of the Gadag-Mundargi region, the Allurhalla drains the Gadag-Ron black soil tract of the Malaprabha.

(4) Climate

The district has an agreeable climate and pleasant weather. The year may be broadly, divided into four seasons which are as follows:-

1) Summer season starts during the mid of February and last till the end of May. This season is marked by western winds rising temperature whirl winds and occasional thunder storm accompanied by sharp showers. 2) Western Monsoon starts during early June and last till end of September. This is a period of cool and damp climate. 3) The months of October and November constitute the post Monsoon. This period witness a general rise in day temperature and a substantial amount of rainfall. 4) Winter season covers the period from December to mid February, the district enjoys moderate weather. The air is hottest in April and May, the temperature sometimes rising to 105 to 107 F.

(5) Winds

Between March and April whirl winds are common. The easterly winds blow with less force in April. By may the west wind begins to freshen and lasts through the day. Towards the end of May, the west winds begins to blow stronger. During the day the wind blows steadily from the south-west. During the storms the direction of winds changes frequently until it get steadily from the west and the tempest ceases. These storm takes place daily for several days and after they are over, for five or six months the wind continues to blow constantly from the west.

(6) Rainfall pattern

The District falls under northern transition and northern dry agro-climatic zones of the state. The taluks of Gadag, Mundaragi, Naragund and Ron falls under northern dry zone. Shirahatti taluk falls under northern transition zone.

The average Rainfall in the district ranges from 517 mm in Mundaragi taluk to 736 mm in Shirahatti taluk. The rainfall decreases from southern part of the district towards western part. The western part of Mundaragi taluk receives the lowest rainfall.

Among the taluks in the district the pre-monsoon rainfall contributes 18 to 20% of the annual rainfall, southwest monsoon contributes 54 to 60% and northeast monsoon contributes 22 to 27% of the annual rainfall.

The coefficient of variation ranges from 34 to 84% for the pre-monsoon season, the highest variability (84%) being in Ron taluk.

The coefficient of variation for southwest monsoon ranges from 28 to 58%, the highest being in Mundargi taluk. The coefficient of variation for northeast monsoon ranges from 56 to 74%, the highest being for Ron taluk.

The coefficient of variation for Annual rainfall ranges from 20 to 54%. The taluk of Nargund experiences high variability of rainfall.

TALUK WISE RAINFALL PATTERN, GADAG DISTRICT

TALUKS (No. of years of rainfall data available)	Statistical Parameters	Pre- Monsoon	South-West Monsoon	North-east Monsoon	Annual Rainfall

	C.V.(%)	60	48	61	33

A study of the rainfall deficit pattern during the last 20 years compared with the long term data for different seasons indicate increase in rainfall deficiency in the recent past during the premonsoon, southwest and northeast monsoon period. Rainfall deficit during last 20 years has been compared with that of long term data in different seasons and is presented in the following table.

TALUKWISE AND SEASONWISE COMPARISION OF RAINFALL DEFICIT DURING LAST 20 YEARS WITH 99 YEARS DATA, GADAG DISTRICT

Taluks	Seasons and no. of years with deficit rainfall							
	Pre-Monsoon		South-west Monsoon		North-east Monsoon		Annual Rainfall	
	Long Term	Recent 20 Yrs.	Long Term	Recent 20 Yrs.	Long term	Recent 20 Yrs	Long term	Recent 20 Yrs.
1	2	3	4	5	6	7	8	9
Gadag (35)	12(34)	7(35)	7(20)	5(25)	16(46)	12(60)	7(20)	5(25)
Mundargi (94)	39(41)	10(50)	25(27)	3(15)	43(46)	10(50)	21(22)	2(10)
Nargund (95)	48(51)	13(65)	29(31)	8(40)	42(45)	11(55)	29(31)	6(30)
Ron (45)	9(20)	4(20)	16(36)	7(35)	19(42)	9(45)	11(24)	5(55)
Shirhatti (43)	24(56)	16(90)	12(28)	8(40)	20(46)	11(55)	12(28)	8(40)

Note : Figures in bracket indicate values as percentage of number of years for which data is available or for 20 years depending on the column in which it is given.

The following inferences could be made:

* The Pre-monsoon rainfall in the recent 20 years is more deficit compared to the long term data with Ron as an exception.
* Southwest monsoon is less deficit in the recent 20 years compared to the long term data with Mundargi and Ron taluks as an exception.
* The rainfall deficit during northeast monsoon is increasing during recent 20 years compared to the long term data.
* The annual rainfall trend analysis indicate increasing trend in the taluks of Mundargi, and Nargund. The taluks of Shirhatti, Gadag and Ron indicate decreasing trend

(7) Forestry

Gadag district is deficient in forest wealth. The monsoon forest are confined to eastern part of the district and are generally limited to an area having more than 40" rainfall. The forest exhibit regional variation . In Gadag and Mundargi taluks the growth is scrub while in Ron taluk forest area is classified as pasture. A large portion of the forests of the district belong to scrub category. The scrub forest offer a few more stern and drier landscape. Under the influence of dry climate and a very inferior soil, several of the shrubs have economic utility and the grass land patches provide inferior grassing for sheep. The deciduous or monsoon forest are managed under regular working plan with an objective of supplying the fuel to the public and small tenable for the purpose of house construction and agricultural implants. Fire wood, charcoal and sandal wood are some of the important major forest produce. While among the minor forest produce, marketable are tunni leaves, harda, tar wad, gum, honey and bamboos.

(8) Geology

The varieties of rocks chiefly found in the district are Dharwads phyllites, argrillites, felsite, honatile quartzites and limestones. The schists include biotite-muscorite schist, gritty schist. They occur mainly in the southern and western portions of the district. Two series of dykes have been distinguished viz., doleritic and diabasic.

The economic minerals found in the district are iron ore, alluvial gold, reef gold, manganese ore, potstone, etc.

(9)Flora and Fauna

Flora : The forest flora of the district includes the important spices such as Ical {phoenix silvertis}, the wild date palm, Kakki (Cassia fistula), Karegida (Randia dumeforum), Muttal (Butea frondosa), Shivani (Gmelinia arbarea), Sirsal (Albizzialebbek) . The chief trees found in fields and gardens are Babuva (citrus indica) halasu, jack (Arto carpus integrifolia), Nirala, Jambool (Eugenia jamboolana), ramphal sweet soil (Anona reticulata). The chief fibre yielding trees are ambada (Hibicus cannenbinus), Bambu (Bambusa arundinaceq), musk bhendi (abelmoschus moschntus), morodphal (helictreras isona). The chief climbing shrubs, plants and weeds growing on waste lands and hills are dhattura thorn, apple, tottal balli (capparis horida).

Fauna : The scrub jungle are met in the northern part of the district after a dry landscape dotted with a sporadic growth of thorny shrubs and rough grasses. The wild animal found in the district include the panther, leopard cat bear, wolf, hyena and the jackal besides the Indian fox and deer. The hunting leopard, cheets or chirtcha were formally found in the Kod and Gadag hills. It has not been recorded in the recent years and are in all probability extinct.

(10) Soils

Two type of soils are noticed. One is the regular or black soil and the other is red soil. They show a variety, both in their texture and appearance, according to the nature of the underlying rocks. They exhibit a great deal of variation in thickness, consistency and colour. The soil of the district are formed from the mixture of decomposed rocks of different type through out the district. The greatest part of the district is found having black soil. Brown and red comes subsequently in the order of merit. Red soil s found where there are hill slopes and ridges.

(11) Cropping pattern

Jowar, wheat, maize, paddy are the chief cereal. Crops of the district are grown in almost all taluks of the district and of the five taluks of the district ragi is grown only in Gadag and Shirhatti taluks. According to 2001, 30.4 Per cent are cultivators and 39.2 per cent are agricultural labourers.

LAND USE PATTERN FOR 1997-98 IN HECTARES

Source : District at a glance, Gadag District, 1999-2000, Directorate of Economics & Statistics, Bangalore.

The landholdings for the year 1997-98 of different size are given in the above table. The size of the agricultural holdings is one of the important factors that determine the productivity of the land. From the above table it is observed that the number of marginal holdings below one hectare and small holdings of size one to two hectares constitute 49.55 per cent of the total holdings. Only 4.0 per cent holder own land more than ten hectares.

As stated, Jowar, Wheat and Maize are the major cereal crops grown in the district. Cotton and tobacco are the commercial crops grown in the district. The yield of Jowar under irrigated area is 1,943 Kgs per hectares and under unirrigated area it is 624 Kg per hectares. The other oil seed crops grown in the district are groundnut, sesamum and sunflower etc. The total area put under these crops is 130,507 hectares. Sizable hectares of land is put under plantation and horticultural crops. The chief crops grown are onion, brinjal and tomato. The total area put under the cultivation of plantation and horticultural crops is 12,899 hectares, the other condiments and spices produced in the district are dry chillies, coriander, garlic.

(12) Irrigation

The irrigation wealth with which the district is endowed is not quite satisfactory. Though the general usefulness of rivers and streams which crisis cross the district cannot be denied. It has to be conceded that these are not of any specific economic significance for the district does not have within its limits any hydel power generating station. The Malaprabha Project provides irrigation facility to certain areas of Nargund, Ron and Gadag taluks. The main source of irrigation are tanks, canals and wells and most of the irrigation wells have been energised.

Though river Malaprabha flow through the district, the water of this river have not been harnessed on a large scale within the district for the purpose for irrigation. The Dharma Project is

the only medium sized irrigation project of the district.

It deserves to mention about the Magodi wet land which is situated on the Gadag - Laxmeshwar road, the size of the tank is around 35 hectates which attracts huge number of migratory birds. Themagadi tank is not only a wet land for the migrating birds, but also useful to agriculture as a life line for the people of Magodi village.

NET AREA IRRIGATED BY DIFFERENT SOURCES

Name of Taluk	Net area irrigated for 1998-99 (Area in hectares)						
	Canal	Tanks	Wells	Lift Irrigation	Tube Wells	Others	Total

Source : Gadag District at a Glance, 1999-2000, District Statistical Officer, Gadag

As per the statistics given in the above table, borewell is the main source of irrigation in the taluks of the district, which accounts for 29 per cent of the total irrigated area. An area of 31,806 hectates are being irrigated by canal only in two taluks viz Nargund and Ron taluks which accounts for 52 percent.

(13) Natural Wealth

The mineral wealth with which the district is endowed is not quite impressive. However the mineral wealth of the district includes gold, copper, iron and manganese besides granite, which is most useful as construction material and is extensively quarried in all parts of the district. The talukwise mineral resources for the district is presented in the following table.

TALUK WISE MINERAL RESOURCES OF THE DISTRICT

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor	
1	2	3	4	5
1	Gadag	Gold, Iron ore, Manganese, Lime stone, Copper	Building Stone	-
2	Mundargi	Gold, Iron ore, Lime stone, Copper	Building Stone,Ordinary Sand	-
3	Nargund	-	-	-
4	Ron	-	Ornamental Stone,Building Stone	-
5	Shirhatti	Gold, Iron Ore, Clay Steatite, Soapstone	Building Stone,Ornamental Stone, Ordinary Sand	-.

(14) Animal Husbandry

Animal Husbandry is by and large regarded as an adjunct to agriculture. Every cultivators household usually posses atleast a pair of bullocks quite a large proportion among them posses a few cow one or two buffaloes, a few sheep and goat as well. Poultry keeping is also quite popular both in rural as well as urban areas.

Bullocks and buffaloes are kept for the purpose of heavier agriculture work cows and she buffaloes are kept mainly for breeding and milk production. The cow and bullocks belong to the imported breed. The important among them being the Amrit Mahal and the Krishna valley. Among the buffaloes the Pandhara puri and the Jawari breeds are common. Pandhara puri buffaloes are

much costlier than local breeds. Gadag district depend for their milk supply more on cows and buffaloes. Dairy farming is an important economic activity :

DISTRIBUTION OF LIVESTOCK POPULATION IN THE DISTRICT

(14A) Veterinary services

As regard the availability of veterinary services it may be observed that, category wise description of the various veterinary institutions in different taluks of the district is mentioned in the below given table.

VETERINARY INSTITUTIONS IN THE DISTRICT FOR THE YEAR 2000

Sl. No.	Veterinary Services	No. of Institutions
1	2	3
1	Veterinary Hospital	6
2	Veterinary Dispensary	12
3	Primary Veterinary Centre	95
4	Mobile Dispensary	5
5	Artificial Insemination	10
	Total	**128**

Source : Karnataka at a Glance 2000-2001, Directorate of Economics and Statistics, Govt. of Karnataka

As much as 95 Primary Veterinary Centres, 6 Veterinary hospitals, 12 Veterinary dispensaries and 10 Artificial Insemination Centres are available in the district. There are five mobile dispensaries each one in five taluks.

(15) Fisheries

The Rivers such as Tungabhadra, Varada and Kumudavati besides several streams and nallahs and the numerous tanks of varying dimensions found scattered all over the district provide ample opportunity to the fishing profession. There is a considerable scope for the development of inland fisheries. Large scale fishing activity throughout the year is at present restricted to the villages on the bank of major rivers. By an large fishing is a seasonal occupation for most of the tanks and streams dry up during the summer seasons. There are several fisherman co-operative societies in the district. The contribution of fisheries to the over all economy of the district is only marginal.

(16) Industries

Gadag ranks amongst the industrially backward districts of the State. There are no mineral based industries in the district. There is few agro based industrial units. Ground nut oil mills are far more numerous and are found all over the district. There are several general engineering works which are engaged in the manufacture of Iron and Steel goods. The other important industries are beedi factories and the units engaged in the manufacture of Brass and Copper utensils and the agarbathi industries.

There are good number of Cotton handloom industries. The weaving establishment are in most of the cases household enterprises. Among the several other small scale and household industries of the district a particular mention may be made of Leather tanning and production of Leather foot wear. A particular type of Chappals known as Gadag Chappals are famous for their design and durability through out the State. There are totally 132 factories in the district giving employment to 10,554 persons. The table below gives the talukwise details of major factories for the year 1998-99 in the district.

TALUKWISE DETAILS OF MAJOR FACTORIES FOR THE YEAR 1998-99

(17) Trade and Commerce

Trade and Commerce constitute the back bone of the economy of a district. Trade and Commerce rank next only to agriculture as important source of livelihood for the people. Gadag, Mundargi, Nargund are important centres of trade within district. As on 31.3.94 the district has 45 Commercial Banks, 8 Urban Co-operative banks, 34 Rural banks and 5 Primary Land Development banks in the district. In the recent past the Co-operative institutions and other Governmental agencies have expanded their trading and Commercial functions. Cotton is the most important commodity exported from the district. The chief whole sale Cotton markets are located at Gadag and Nargund. The other agricultural product exported from the district are Ground nut, Cotton seeds, Chillies, betal nuts. Handloom fabrics and beedis are some of the important manufactured goods that are exported from the district. in exchanging the goods and commodities regulated markets play an important role.

Apart from various banks there are number of co-operative societies in the district which are discharging useful functions in different parts of the district and are dealing with various items produced by them. The number of Co-operative societies in

the district are 275 and the total turnover is around 16,901 lakhs. The table presented below gives the details of number of co-operative societies in the district.

(18)Transport and Communication

Transport and communication play an important role in the economy of the district. Gadag is a important prominent centre of road communication. In the matter of transport and communication facilities Gadag district is fairly well placed. As on 31.3.99 the district had a total road length of 2,696 kms comprising 203 km of State high way and 663 km length of Major district roads. A major portion of the road length to the extent of 941km has been categorised as Village roads 889 km roads have been categorised as TDB Roads. Besides, Road ways the district is well connected with Rail route as well. The total length of railway network in the district is about 91 km with 11 railway station.

The table above shows talukwise details of post offices and telephone offices, etc. The district has 170 post offices, 120 telegraph offices, 43 telephone exchanges and good number of telephone connections, apart from the mobile telephones.

(19) Electricity and Power

Karnataka has a place of pride in the history of power generation in the country. KPTCL - Karnataka Power Transmission Corporation Limited (erstwhile KEB) is mainly vested with the functions of transmission and distribution of power in the entire state. The Corporation has been attaching great importance to electrification of villages and hamlets, tribal colonies and harijan basthis and energisation of irrigation pumpsets. Besides, this with a view to benefit weakest among the section of society schemes called Bhagya Jyothi / Kutir Jyothi have been introduced.

Statement gives below shows talukwise number of villages electrified and talukwise energisation of IP as on 31.3.1999 in Gadag District.

(v) CENSUS CONCEPT

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A `census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate

building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multistoreyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multistoreyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard, by definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,`singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. But if such hostels/ hotels have out houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is `town' for urban areas and `village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non- agricultural pursuits and

iii) a density of population of at least 400 per sq.km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in nonagricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multimember households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen

is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mantaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In respect of Karnataka State the Scheduled Castes and Scheduled Tribes as contained in the Scheduled Castes & Scheduled Tribes Orders (Amendment) Act, 1976 are valid for the purpose of Census of India, 2001. With the promulgation of Act 39 of 1991 however, the sub entries Naik, Nayak, Beda, Bedar and Valmiki were added under the main entry at S.No. 38 (Naikda, Nayaka, …..) of the Scheduled Tribes list of the State. There are in all 101 Scheduled Castes and 49 Scheduled Tribes in the State which are listed below:

List of Scheduled Castes

1 Adi Andhra
2 Adi Dravida
3 Adi Karnataka
4 Adiya (in Coorg district)
5 Ager
6 Ajila
7 Anamuk

Language and Mother tongue

As per the Census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if she or he is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops - tea, coffee, rubber, coconut and betelnuts (areca).

Agricultural labourer

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. A person who has been engaged in the economic activity like above is termed as Household Industry Worker.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as an 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1,000 males in a population

(vi) NON-CENSUS CONCEPTS

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a subsoil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear female population of the same age group}} \times 1,000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear married female population of the same age group}} \times 1,000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Midyear female population in the age-group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Midyear married female population in the age-group(15-49) Yrs}} \times 1,000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1,000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1,000}$$

Age specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Midyear population of the same age group}} \times 1,000$$

q_1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2

Probability of dying between birth and age 2.

q_5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U_5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during The year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neonatal mortality rate and Post neonatal mortality rate. The neonatal mortality rate also comprises of two parts viz., early neonatal mortality rate and late neonatal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Perinatal mortality rate (PMR)

Number of stillbirths plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four

months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/ Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000- 4,999,999); M5 (1,000,000-1,999,999); M4 (500,000-999,999); M3(300,000-499,999); M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of `Mega city' is a recent phenomenon in the Urban Sociology and is defined in

term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its Distribution:

(a) Distribution of population in Rural-Urban Areas:

According to the 2001 Census, the total population of Gadag district is 971,835, comprising 493,533 males and 478,302 females. The population of the district forms 1.8 percent of the state population and ranks at 25th place among the districts. Out of the total population of the district 64.8 percent lives in rural areas while 35.2 percent lives in urban areas. Rural population of the district is distributed among 5 taluks and urban population spread over in 9 towns. The total urban population in the district is 342,183 persons comprising 173,904 males and 168,279 females. The total rural population in the district comes to 629,652 persons and is composed of 319,629 males and 310,023 females as per 2001 Census. This rural population is distributed in 329 inhabited villages and there are 8 un-inhabited villages in the district.

(b) Size-class and Civic Status of towns:

The Statement below gives the position and number of urban units according to size-class of population as per 2001 Census:

SIZE-CLASS AND CIVIC STATUS OF TOWNS

Serial number	Size-Class of town	Name and civic status of town		Urban Population		
				Persons	Males	Females
1	2	3		4	5	6
1	III	Nargund	TMC	32,561	16,585	15,976
2	III	Gajendragarh	TMC	28,226	14,352	13,874
3	IV	Naregal	TP	16,685	8,429	8,256
4	III	Ron	TP	21,643	10,797	10,846
5	I	Gadag-Betigeri	CMC	154,982	78,713	76,269
6	IV	Mulgund	TP	18,098	9,268	8,830
7	III	Lakshmeshwar	TMC	33,417	16,951	16,466
8	IV	Shirhatti	TP	16,208	8,274	7,934
9	III	Mundargi	TP	20,363	10,535	9,828

Population Growth, Density and Sex-ratio:

Population Growth:

Gadag District witnessed a positive growth rate in each decade with 5.7, 0.2, 12.2, 11.0, 20.4, 18.3, 19.4, 15.6, and 13.1 percent during the period 1901 to 2001(except 6.0 percent negative growth during the decade 1901-1911). According to the 1991 Census the total population of the district was 859,042. There has been net addition of 112,793 persons during 1991-2001. The decadal growth rate of the district comes to 13.1 percent. The growth rate for the rural and urban areas of the district is 12.2 and 14.8 percent respectively.

Density:

The population density of Gadag district is 209 persons per Sq. Km. against the state average of 276 persons. At taluk level, the density varies between 131 persons in Mundargi taluk and 303 persons in Gadag taluk. In rural areas it comes to 144 persons per Sq. Km., while in urban areas it comes to 1,265 persons. In urban areas, the density of population varies between 195 persons in Naregal town and 9,478 persons in Shirhatti town.

Sex Ratio:

There are 969 females for every one thousand males in Gadag district. The sex-ratio figures for

rural areas and urban areas of the district are 970 and 968 respectively. It is also observed that, the proportion of females in rural areas is higher than that of urban areas. Sex-ratio in the age-group 0-6 comes to 952 girls per 1,000 boys in the district as a whole. In rural areas, this proportion is 950, while in urban areas the sex-ratio of Child population works out to 955 girls per 1,000 boys.

Work Participation Rate:

The work participation rate is defined as percentage of total workers to total population. According to 2001 Census, the total workers including main and marginal workers constitute 47.1 percent of total population of the district. Of the total workers, the share of main workers is 84.9 percent and marginal workers is 15.1 percent. The remaining 52.9 percent of population belongs to the category of non-workers.

As per 2001 Census among the main workers male participation rate in the district is 93.8 percent and corresponding proportion of females is 71.3 percent. The proportion of female marginal workers is higher than male marginal workers, as the females are attending to one or more economic activities in addition to their household duties to improve the family income. Majority of the workers are engaged in agricultural activities. Of the total 457,817 workers in the district, 30.4 percent of these total workers are categorized as cultivators, 39.2 percent agricultural labourers, 3.7 percent in household industries and 26.7 percent in other services.

Literacy:

A person who can read and write in any language is considered as literate in Census. All children of age below 7 years are treated as illiterate.

As per 2001 Census, Gadag district has reported 551,362 persons as literates constituting 66.1 percent of the total population excluding the population of 0-6 years. The male and female literacy rates in the district are 79.3 and 52.5 percent respectively. The literacy rate of males is higher than that of females. The gap in the male - female literacy rate is 26.8 in the district.

The total literacy rates of rural and urban area are 61.5 and 74.4 percent respectively. The male and female literacy rates in rural areas are 76.4 and 46.3 percent respectively. In urban areas these rates are 84.6 and 63.9 percent respectively. The gap in male - female literacy rates in urban areas is 20.7 as against 30.1 in rural areas. It is thus clear that females are better educated in urban areas than their counterparts in rural areas.

(c) Scheduled Castes and Scheduled Tribes Population 2001:

Of the 971,835 total population of the district 14.1 percent of the total population belong to Scheduled Castes and 5.6 percent to Scheduled Tribes. The percentage of Scheduled Castes constitute 41.4 percent in rural areas and 58.6 percent in urban areas. The proporation of Scheduled Tribes is 62.7 and 37.3 in rural and urban areas respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36

Following tables, which presents the data on population with in the district with brief notes will provide an overview of the district.

TABLE 1: DECADAL CHANGE IN POPULATION OF TALUKS BY RESIDENCE, 1991-2001

Taluk	Population						Percentage decadal variation 1991-2001			Percentage Urban Population	
	1991			2001							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12
Nargund	86,691	56,747	29,944	92,679	60,118	32,561	6.9	5.9	8.7	34.5	35.1
Ron	220,973	163,081	57,892	247,645	181,091	66,554	12.0	11.0	14.9	26.2	26.9
Gadag	289,904	140,093	149,811	332,011	158,931	173,080	14.5	13.4	15.5	51.6	52.1
Shirhatti	159,680	115,912	43,768	183,191	133,566	49,625	14.7	15.2	13.3	27.4	27.1
Mundargi	101,794	85,252	16,542	116,309	95,946	20,363	14.2	12.5	23.1	16.2	17.5
District Total	**859,042**	**561,085**	**297,957**	**971,835**	**629,652**	**342,183**	**13.1**	**12.2**	**14.8**	**34.6**	**35.2**

Decadal variation in population of taluks by residence is indicated in the above table. Data reveals that overall growth of 13.1 per cent has been recorded in the district during the decade. The growth of population in rural areas of the district is 12.2 per cent while in urban areas it is 14.8 per cent. Thus, the population of the district has grown faster in urban areas.Among the taluks Shirhatti has registered highest growth in total population. In urban areas, Mundargi taluk is highest.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Nargund	34	60,118	30,701	29,417	4 (11.8)	156	154
2	Ron	93	181,091	91,080	90,011	- (0.0)	-	-
3	Gadag	61	158,931	80,906	78,025	3 (4.9)	49	32
4	Shirhatti	87	133,566	68,059	65,507	6 (6.9)	47	31
5	Mundargi	54	95,946	48,883	47,063	1 (1.9)	84	86
District Total:		**329**	**629,652**	**319,629**	**310,023**	**14 (4.3)**	**336**	**303**

The above table indicates the number and percentage of inhabited villages with different population size ranges as per 2001 census. Data reveals that out of 329 inhabited villages, highest number of villages 108 (32.8 per cent) is in the population range of 1000-1999. Only four villages are having a population range of 10,000. About 14 villages (4.3 per cent) are having population less than 200. Other details can be observed from the table No.2 above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS

		Name of Town
(a)	**New**	
(i)	Statutory Town	**Nil**
(ii)	Census Town	**Nil**

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS

		Name of Town
(b)Denotified		
(i)	Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as Census towns	**Nil**
(ii)	Statutory towns of 1991 Census denotified but identified as Census towns based on demographic and economic criteria	**Nil**
(iii)	Census towns of 1991 Census are notified as Statutory towns in 2001 Census	**Nil**
(c)Declassified		**Nil**
(d)Wholly merged with other Towns		**Nil**

*.Declassified means the Census towns of 1991 Census which failed to satisfy the demographic and economic criteria.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	13	4.0	643	0.1
11-20	1	0.3	57	0.0
21-50	8	2.4	3,844	0.6
51-100	62	18.8	73,024	11.6
101-200	152	46.2	335,135	53.2
201-300	51	15.5	103,233	16.4
301-500	32	9.7	78,465	12.5
501 +	10	3.0	35,251	5.6
Not known	-	0.0	-	0.0
District Total:	**329**	**100.0**	**629,652**	**100.0**
Population Density (Rural) of the district:		**145.7**		

Distribution of villages of population density and ranges are presented in this table. The density of population for the district rural is 145.7 persons/sq.km. If the villages are distributed by different ranges of population density, the picture that would emerge for the rural population of the district would be as indicated in the above Table No.4. Highest nos. of villages totalling 152 (46.2) per cent falls in the population density range of 101-200 covering a population of 335,135. Other details can be had from the above table.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT 1901-2001

Census Years	Karnataka			Census Years	Gadag		
	Total	Rural	Urban		Total	Rural	Urban
1	2	3	4	5	6	7	8
1901	983	984	976	1901	995	995	998
1911	981	984	960	1911	976	976	978
1921	969	975	936	1921	993	1,009	948
1931	965	972	927	1931	981	993	951
1941	960	965	935	1941	973	980	950
1951	966	974	941	1951	987	997	967
1961	959	973	913	1961	981	998	938
1971	957	971	913	1971	983	1,003	936
1981	963	978	926	1981	981	996	953
1991	960	973	930	1991	969	973	960
2001	965	977	942	2001	969	970	968

The above table gives the sex-ratio for the rural and urban population of the state as well as that of the district from 1901 to 2001 census.

It is observed that the state has recorded a decrease in the sex-ratio since 1901 census (983). However in 2001 census, the state has registered a better sex-ratio of 965 little higher than the ratio of 1991 Census (960).

For the district, the sex-ratio in 1901 Census was 995, which with high fluctuations gradually decreased over the decades. However, in 2001 Census, the district has recorded a sex-ratio of 969 equal to that of 1991 Census 969. It is also observed that the sex-ratio in 2001 Census for the district (969), is slightly more than that for the state (965).

Again, the ratio for the rural women in 2001 Census is comparatively better than, that for the urban women in the state as well as in the district.

TABLE 6 : SEX RATIO BY TALUKS, 2001

Sl. No.	Name of Taluk	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Nargund	960	958	963
2	Ron	987	988	982
3	Gadag	966	964	967
4	Shirhatti	964	963	967
5	Mundargi	957	963	933
	District Total:	**969**	**970**	**968**

This table gives the taluk-wise sex ratio for rural and urban population as per 2001 census. It is observed from the above table that the sex ratio for rural areas is 970 and urban area is 968. The sex ratio is highest in Ron taluk and lowest in Mundargi taluk, in urban areas, the highest sex ratio of 982 is reported from Ron taluk.

The sex ratio of the district as a whole is 969 females per 1,000 males.

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Sl. No.	Name of C. D. Block	Sex ratio
1	2	3
1	Nargund	958
2	Ron	988
3	Gadag	964
4	Shirhatti	963
5	Mundargi	963
	District (Rural) Total:	**970**

This table highlights the data on sex ratio by C.D. blocks, which include all villages of the district. The sex ratio for the district rural is 970. Among the C.D. blocks, the highest sex ratio of 988 is noticed in Ron taluk followed by Gadag. The sex ratio in Ron is above the district rural sex ratio. Whereas the lowest sex ratio is reported from Nargund C.D. block, which is 958.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	5	1.5	96	0.0
700-749	2	0.6	261	0.0

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
750-799	3	0.9	1,387	0.2
800-849	8	2.4	4,574	0.7
850-899	15	4.6	18,940	3.0
900-949	85	25.8	169,340	26.9
950-999	112	34.0	286,050	45.4
1,000-1,099	85	25.8	139,501	22.2
1,100+	14	4.3	9,503	1.5
District Total	**329**	**100**	**629,652**	**100.0**
Sex ratio (Rural) for District:			**970.0**	

Table No.8 gives the sex ratio of rural population by ranges. If the sex ratio of rural population by ranges is given for the inhabited villages in the district the picture that would emerge is as indicated in the above table. Highest nos. of inhabited villages of 112 (34.0 per cent) fall under the sex ratio range of 950-999. Only 14 villages (4.3 per cent) come under the sex ratio range of 1,100 and above. As a whole the sex ratio of the district rural is 970.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Nargund	TMC	963
2	Ron	TP	1005
3	Gajendragarh	TMC	967
4	Naregal	TP	979
5	Gadag-Betigeri	CMC	969
6	Mulgund	TP	953
7	Shirhatti	TP	959
8	Lakshmeshwar	TMC	971
9	Mundargi	TP	933
Sex ratio Urban for the district:			**968**

The above table indicates the sex ratio of Urban Agglomeration / Towns. We can see Ron (TP) possessed highest with 1,005, which is more than sex ratio of urban for the district. Lowest can be seen in Mundargi (TP) with 933 sex ratio only.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TALUKS, 2001

Sl. No.	Name of Taluk	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Nargund	Total	13,549	6,952	6,597	949
		Rural	8,844	4,537	4,307	949
		Urban	4,705	2,415	2,290	948
2	Ron	Total	36,453	18,643	17,810	955
		Rural	26,932	13,842	13,090	946
		Urban	9,521	4,801	4,720	983
3	Gadag	Total	44,569	22,771	21,798	957
		Rural	22,279	11,309	10,970	970
		Urban	22,290	11,462	10,828	945

Sl. No.	Name of Taluk	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
4	Shirhatti	Total	25,723	13,165	12,558	954
		Rural	18,965	9,744	9,221	946
		Urban	6,758	3,421	3,337	975
5	Mundargi	Total	17,541	9,096	8,445	928
		Rural	14,732	7,626	7,106	932
		Urban	2,809	1,470	1,339	911
District Total :		**Total**	**137,835**	**70,627**	**67,208**	**952**
		Rural	**91,752**	**47,058**	**44,694**	**950**
		Urban	**46,083**	**23,569**	**22,514**	**955**

Taluk-wise sex ratio of population in the age group of 0-6 years with rural, urban break-up for the district is presented in the above table. Data reveals that among the taluks the sex ratio in the age group of 0-6 is the highest in Gadag 957 and 955 in Ron taluk. Lowest can be find in Mundargi and Nargund taluks. The district total for sex ratio is 969.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Nargund	8,844	4,537	4,307	949
2	Ron	26,932	13,842	13,090	946
3	Gadag	22,279	11,309	10,970	970
4	Shirhatti	18,965	9,744	9,221	946
5	Mundargi	14,732	7,626	7,106	932
	District (Rural) Total:	**91,752**	**47,058**	**44,694**	**950**

Sex ratio for age group between 0-6 in the C.D. blocks of the district is presented in this table. The sex ratio for the district rural is 950. Among the C.D. blocks the highest sex ratio is reported from Gadag 970 and the lowest of 932 is reported from Mundargi C.D. block.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	20	6.1	843	0.9
700-749	6	1.8	531	0.6
750-799	16	4.9	2,830	3.1
800-849	28	8.5	6,387	7.0
850-899	48	14.6	15,422	16.8
900-949	54	16.4	20,681	22.5
950-999	51	15.5	19,222	20.9
1,000-1,099	61	18.5	17,664	19.3
1,100+	45	13.7	8,172	8.9
District (Rural) Total	**329**	**100.0**	**91,752**	**100.0**
Sex ratio (Rural) for District		**950**		

Sex ratio for the rural population by ranges has been given in the above table. Data reveals that except for the ranges 700-749 and 750-799 in all other ranges good number of villages are reported under each range though the sex ratio for the district rural is 950 in the age group for 0-6. It is worth noting that 106 out of 329 inhabited villages have the sex ratio favourable for female child.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Nargund	TMC	4,705	2,415	2,290	948
2	Ron	TP	3,219	1,595	1,624	1,018
3	Gajendragarh	TMC	4,066	2,066	2,000	968
4	Naregal	TP	2,236	1,140	1,096	961
5	Gadag-Betigeri	CMC	19,608	10,060	9,548	949
6	Mulgund	TP	2,682	1,402	1,280	913
7	Shirhatti	TP	2,183	1,102	1,081	981
8	Lakshmeshwar	TMC	4,575	2,319	2,256	973
9	Mundargi	TP	2,809	1,470	1,339	911
District(Urban) Total			**46,083**	**23,569**	**22,514**	**955**

The child sex ratio for the urban agglomerations/towns of the district is given in the above table. Data reveals that the child sex ratio for district urban is 955 females per 1,000 males. Highest child sex ratio is noticed in Ron (TP) 1,018 followed by Shirhatti 981 Lakshmeshwar 973. Lowest child sex ratio of 911 is reported from Mundargi (TP).

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TALUKS, 2001

Sl. No.	Name of Taluk	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Nargund	Total	92,679	8,242	4,224	8.9	4.6
		Rural	60,118	5,026	3,508	8.4	5.8

		Urban	**342,183**	**35,976**	**8,554**	**10.5**	**2.5**

Taluk-wise number and percentage of Scheduled Castes/Scheduled Tribes population is given in the above table. The total Scheduled Castes/Scheduled Tribes in the district is 137,414 and 54,410 respectively. The rural-urban distribution reveals that 16.1 per cent of Scheduled Castes live in rural area and 10.5 per cent of them live urban areas. As regards Scheduled Tribes 7.3 per cent live in rural areas and 2.5 per cent of them live in urban areas. The table also indicate the percentage of Scheduled Castes/ Scheduled Tribes population to total population in the district.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Nargund	60,118	5,026	3,508	8.4	5.8
2	Ron	181,091	24,631	11,379	13.6	6.3
3	Gadag	158,931	24,507	10,933	15.4	6.9
4	Shirhatti	133,566	27,945	11,644	20.9	8.7
5	Mundargi	95,946	19,329	8,392	20.1	8.7
District (Rural) Total:		**629,652**	**101,438**	**45,856**	**16.1**	**7.3**

This table depicts population of Scheduled Castes and Scheduled Tribes and its percentage proportion to total population. In rural areas of the district 16.1 per cent and 7.3 per cent population comprises of Scheduled Castes and Scheduled Tribes respectively. Higher concentration of Scheduled Castes is reported from Shirhatti (20.9 per cent) and Mundargi (20.1 per cent) and of Scheduled Tribes also from Mundargi (8.7 per cent) and Shirhatti (8.7 per cent).

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	19	5.8	-	0.0
Less than 5	46	14.0	2,307	2.3
5-10	91	27.7	20,448	20.2
11-20	100	30.4	32,916	32.4
21-30	30	9.1	11,577	11.4
31-40	7	2.1	3,916	3.9
41-50	6	1.8	3,623	3.6
51-75	7	2.1	4,590	4.5
76 and above	23	7.0	22,061	21.7
District Total	**329**	**100.0**	**101,438**	**100.0**

The above table shows the distribution of villages by percentage range of Scheduled Castes/Scheduled Tribes population to total population and the percent distribution of Scheduled Castes population in different ranges. Data reveals that out of 329 inhabited villages 19 villages do not have Scheduled Castes population. The maximum Scheduled Castes population fall in the range 11-20 per cent in 100 villages. There are only 23 villages which comprises of more than 76 percent of Scheduled Castes population and number of villages where the Scheduled Castes population varies between 51-75 per cent are 7 only.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	51	15.5	-	0.0
Less than 5	94	28.6	5,363	11.7
5-10	98	29.8	17,741	38.7
11-20	53	16.1	13,565	29.6
21-30	15	4.6	3,797	8.3
31-40	8	2.4	2,618	5.7
41-50	2	0.6	474	1.0

76 and above	3	0.9	1,189	2.6
District Total	**329**	**100.0**	**45,856**	**100.0**

The above table shows the distribution of villages by percentage range of Scheduled Tribes population to total population and the per cent distribution of Scheduled Tribes population in different ranges. Data reveals that out of 329 inhabited villages 51 villages do not have Scheduled Tribes population. The maximum Scheduled Tribes population fall in the range of 5-10 in 98 villages. There are only 5 villages where Scheduled Tribes population varies between 51-75 per cent.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Nargund (TMC)	32,561	3,216	716	9.9	2.2

District(Urban) Total		**342,183**	**35,976**	**8,554**	**10.5**	**2.5**

Number and percentage of Scheduled Castes and Scheduled Tribes population for urban agglomeration/ towns of the district is presented in the above table. Scheduled Castes/Scheduled Tribes constitute 10.5 per cent and 2.5 per cent of the district urban population. Highest (15.1 per cent) of Scheduled Castes population is reported from Mundargi (TP) followed by Naregal (TP) (13.5 per cent) and the lowest of 6.1 percent is reported from Shirhatti. The highest of 7.5 percent of Scheduled Tribes population is reported from Naregal (TP) and the lowest of 0.4 per cent is reported from Mulgund (TP).

Sex ratio among the Scheduled Castes and Scheduled Tribes in the C.D. blocks of the district is presented in table 19. The sex ratio in the district rural for Scheduled Castes is 967 and Scheduled Tribes is 965. Highest (986) sex ratio for Scheduled Castes is

reported from Ron C.D. block and the lowest from Mundargi (954) whereas the highest sex ratio (985) for Scheduled Tribes is reported from Mundargi and the lowest sex ratio of 922 is reported from Nargund.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4

Sex-wise distribution of literacy rate by residence in the taluks of the district is presented in the above table. Data reveals that the total literacy rate of the district is 66.1 per cent. Male and female literacy rate constitute 79.3 and 52.5 per cent respectively. Gap in male-female literacy is 26.8 per cent. Highest literacy rate of 71.4 per cent is reported from Gadag which is higher than the district percentage. Highest female literacy rate of 69.9 per cent is reported from the Gadag urban areas. The highest gap in male-female literacy is (33.0 per cent) reported from Ron rural areas.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C.D.Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates

District (Rural) Total:		**331,057**	**208,253**	**122,804**	**298,595**	**111,376**	**187,219**	**61.5**	**76.4**	**46.3**	**30.1**

The C.D. block-wise percentage of literacy in the district accounts for 61.5 per cent in which maleand female literacy rates are 76.4 per cent and 46.3 per cent respectively. Gap in male-female literacy rate for the district rural accounts for 30.1 per cent. The highest literacy rate of 63.4 per cent is reported from Nargund and the highest female literacy rate of 48.8 percent is reported from Gadag C.D. block. The highest male literacy rate of 78.8 per cent is reported from Nargund C.D. block. The gap in male-female literacy rate is also highest (33 per cent) in Ron C.D. block.

The literacy rate for the district as reported is 66.1. If the distribution of villages are made according to range of literacy rate in the district the picture that would emerge would be as indicated in the above table. The highest numbers of villages (142) come under the literacy range of 61-70 per cent. No village is having a literacy range of 91-99 per cent. Other details can be had from table 23.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

The distribution of urban literacy rate by sex is presented in the above table. Data reveals that the literacy rate for the district urban is 74.4 per cent. Urban literacy rate among the males is 84.6 per cent and that of females is 63.9 per cent. The gap in male-female literacy rate is 20.7 per cent. Highest literacy rate of 80.8 with highest male and female literacy rates of 89.1 and 72.3 per cent is reported from Gadag-Betageri CMC.

Table 25 provides information on sex-wise literacy rate among the Scheduled Castes in the C.D. blocks of the district. The percentage of literacy rate for Scheduled Castes in the district rural is 44.0 per cent, the percentage of male literacy rate works out to 58.6 per cent and that of female is 29.0 per cent. The gap in male-female literacy rate is 29.6 per cent. There are not much noteworthy variations or changes exist in the C.D. blocks literacy rate percentages.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTE LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

81-90	0	0.0	0	0.0
91-99	1	0.3	43	0.0
100	2	0.6	8	0.0
District Total:	**310**	**100.0**	**101,438**	**100.0**
Literacy rate for District (Rural):		**44.0**		

The sex-wise literacy rate among Scheduled Castes has been given in the previous table. This table highlights the distribution of villages by literacy rate for the Scheduled Castes population. Literacy rate for the district rural among Scheduled Castes is 44.0 per cent. If the distribution of villages is made by range of literacy rate, the picture that would emerge for all the 310 inhabited villages of the district would be as indicated in the above table. The highest nos. of villages (121) (39 per cent) covering a population of 42,325 falls under the literacy rate of 41-50. Only two villages have 100 per cent literacy rate covering a meagre population of only 8.

The distribution of urban literacy rate by sex among Scheduled Castes is presented in table 27. Data reveals that the literacy rate for the district urban is 60.8 per cent and that of male literacy rate is 74.4 per cent, female literacy rate is 46.8 per cent. The gap between male and female literacy rate accounts for 27.6 per cent. It is interesting to note that the highest literacy rate of 70 per cent with highest male literacy rate of 81.6 percent and , highest female literacy rate of 58.2 per cent, is reported from Gadag-Betagere (CMC) and highest male-female literacy gap of 33.9 per cent is reported from Nargund TMC.

District (Rural)		**21,743**	**14,104**	**7,639**	**24,113**	**9,229**	**14,884**	**55.6**	**71.0**	**39.6**	**31.4**

This table provides information on sex-wise literacy rate among the Scheduled Tribes in the C.D. blocks of the district. The percentage of literacy rate among the Scheduled Tribes for the district rural is 55.6 per cent. The percentage of male literacy rate works out to 71 per cent and that of female is 39.6 per cent. The gap in male-female literacy rate is 31.4 per cent. Of all the C.D. blocks, Mundargi C.D. blocks stands in the first position in respect of the highest literacy rate of 58 per cent with the highest male literacy rate of 74.4 per cent and the highest female literacy of 41.5 per cent. The highest gap in male-female literacy rate accounts for 35.6 per cent is reported from Nargund.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	3	1.1	15	0.0
1-10	1	0.4	61	0.1
11-20	2	0.7	59	0.1

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
21-30	6	2.2	149	0.3
31-40	17	6.1	2,247	4.9
41-50	60	21.6	10,145	22.1

81-90	3	1.1	88	0.2
91-99	0	0.0	0	0.0
100	3	1.1	14	0.0
District Total:	**278**	**100.0**	**45,856**	**100.0**
Literacy rate for District (Rural):		**55.6**		

This table highlights the distribution of villages by literacy rate for the Scheduled Tribes population. Literacy rate for the district rural is 55.6 per cent. If the distribution of villages is made by range of literacy rate, the picture that would emerge for all the 278 Scheduled Tribes inhabited villages of the district would be as indicated in the above table. The highest nos. of 101 villages (44.2 per cent) covering a population of 20,286 falls under the literacy range of 51-60 per cent. 100 per cent literacy rate is reported from only 3 villages covering a meagre population of only 14.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBE LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATION / TOWNS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate

9	Mundargi (TP)	547	330	217	398	171	227	68	79.3	55.8	23.5
Gadag (Urban)		**5,140**	**3,136**	**2,004**	**3,414**	**1,270**	**2,144**	**69.2**	**82.7**	**55.1**	**27.6**

The distribution of urban literacy rate by sex among Scheduled Tribes is presented in the above table. Data reveals that the literacy rate for the district urban is 69.2 per cent, male literacy rate is 82.7 per cent, and female literacy rate is 55.1 per cent. The gap between male and female literacy rate accounts for 27.6 per cent. Of all the towns, Mulgund (TP) stands first with the highest male & female literacy rates of 90.5 and 76.9 per cent. Gap in male-female literacy rate of 37.6 is reported highest from Naregal (TP).

Table 31 provides sex-wise distribution of workers by category in the taluks of the district. Data reveals that percentage of total workers constitutes 47.1 per cent. Among the taluks, the highest percentage of total workers (51.0 per cent) is reported from Mundargi. The highest percentage of female workers is also reported from Mundargi i.e. 44.4 per cent. The percentage of non-workers is accounted for 52.9 per cent in the district and highest 56.8 per cent is reported from Gadag.

Note: Percent of Worker to total worker are given in brackets

The distribution of total workers by sex according to four fold industrial category in taluks is highlighted in this table. Data reveals that agricultural labourers and cultivators together constitute 69.6 percent of the total workers. At taluk level, the maximum number of cultivators is found in Nargund taluk (44.5 per cent). Whereas agricultural labourers are more in Shirhatti (47.8 per cent). Number of other workers is more in Gadag taluk (42.9 per cent).

Note: Percent of Worker to total worker are given in brackets

The distribution of total workers by sex according to four fold industrial category in C.D. blocks is highlighted in this table. Data reveals that agricultural labourers and cultivators together constitute 83.9 percent of the total workers. At taluk level maximum number of cultivators are found in Nargund C.D. block (53.4 per cent). Whereas agricultural labourers are more in Shirhatti (53.2 per cent). Number of other workers is more in Gadag (18.2 per cent).

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered

as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table reveals brief analysis of various amenities, which are available in C.D. block. Of the district, it can be seen from the above table that 93.9 per cent of the inhabited villages have educational facilities and 96.7 per cent have improved drinking water facility. Medical and post office facilities are available for 61.4 per cent and 46.8 per cent of villages respectively. About 97.9 per cent villages have power supply in the district. C.D. block-wise analysis shows that good percentage of inhabited villages has educational facility. The position of medical facilities varies from 48.3 per cent to 85.2 per cent in the C.D. blocks. Availability of banking facility is not satisfactory.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

C.D.Block wise distribution of rural population served by different amenities is presented in table No. 38. Data reveals that 98.0 percent of the rural population is served by deucational institutions while 97.7 percent have improved drinking water facility. About 82.5 percent of population have medical facility and 75.3 percent rural population is served with post office facility. About 99.6 percent of them have power supply.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	26	-	-	26
(b) Middle School	61	10	2	73

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
(c) Degree College	61	79	186	326

(a) Hospital	80	84	157	321
(b) PHC	77	100	123	300
3. Post Office	159	19	-	178
4. Telephone	53	6	5	64
5. Bus Service	24	4	1	29
6. Banks				
(a) Commercial Bank	126	92	72	290
(b) Cooperative Bank	123	71	71	265
7. Agricultural Credit Societies	164	33	35	232

Certain amenities are not available within the village. In such case, data on distance range is given. There are 26 villages, which do not have any primary education facility. For these villages primary school is located at a distance of less than 5 kms. About 73 villages do not have middle school out of which 61 villages have this facility at a distance of less than 5 kms, 10 villages at a distance of 5-10 kms. Of 321 villages not having hospital, about 80 villages have this at a distance of less than 5 kms. For 77 villages primary health centres are available at a distance of less than 5 kms. Regarding post office, telephone and bus service good number of villages have this facility at a distance less than 5 kms. Majority of the villages have banking facility at a distance of 5 kms. range.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table No.40 depicts distribution of villages according to distance from the nearest statutory town and availability of certain amenities. It is observed that the distance from the statutory town to the villages does not exceed 15 kms. for 142 villages. About 63 villages have been classified as unspecified as far as distance is concerned. Distance from nearest statutory town to the village has been correlated with the type of amenities available as per 2001 census. Four categories of distance range per nearest statutory town and type of amenities available in the villages is indicated in the above table. About 91.5 per cent of

villages have educational facility at a range of 5-15 kms. About 58.5 per cent of villages have medical facility in the same range. About 75.4 per cent villages have telephone facility also in the same range. Transport facility is available in the range of 5-15 kms for 125 villages.

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table No.41 depicts the distribution of villages according to population range and availability of certain amenities. It can be seen from the above table that 70 villages are having a population of less than 1,000. Only 4 villages have a population of above 10,000. About 108 villages have a population in the range 1,000-1,999. About 97.9 per cent villages have power supply. About 93.9 per cent of villages have educational facilities. Improved drinking water facility is available in 96.7 per cent villages. Post office and transport facilities are also available for 46.8 percent and 91.2 per cent of villages respectively. Banking facility is less in all ranges.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable
1	2	3	4	5	6
1	Nargund	34	40,506	93.3	73.6
2	Ron	93	111,784	93.1	8.5
3	Gadag	61	101,720	85.9	2.8
4	Shirhatti	87	94,053	78.9	5.1
5	Mundargi	54	84,201	79.5	11.2
	District Total:	**329**	**432,264**	**85.7**	**13.6**

Note: - Cultivable area = irrigated area + unirrigated area

Table No.42 depicts the distribution of villages according to land use. Data reveals that only the cultivable area of the rural district has been taken into consideration, which include both irrigated and un-irrigated areas. The cultivable areas of the rural portion comprise of 85.7 per cent of the total area. Among the C.D. blocks Nargund is having the highest percentage of cultivable area i.e. 93.3 per cent. If the percentage of irrigated areas to total cultivable areas is considered Nargund C.D. block is having the highest with 73.6 per cent.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Gadag-Betigeri (CMC)	347	60	287	367	164	-	82	-	120
2	III Gajendragarh (TMC)	201	31	170	286	102	-	21	-	163
3	III Lakshmeshwar (TMC)	166	18	149	190	84	-	34	-	72
4	IV Mulgund (TP)	688	24	664	266	79	-	92	-	94
5	III Mundargi (TP)	480	41	439	471	146	-	125	-	200
6	IV Naregal (TP)	130	33	97	114	84	-	3	-	26

8	III Ron (TP)	460	28	432	315	53	-	146	2	113
9	IV Shirhatti (TP)	75	47	29	79	62	-	8	-	9
District Total		**316**	**44**	**273**	**304**	**123**	**-**	**68**	**1**	**112**

The total per capita receipt of the urban district is Rs. 316.0 and the total per capita expenditure Rs. 304.0. The receipt of Rs 273.0 is mainly from sources other than taxes and from taxes it is Rs 44.0. The expenditure is mostly on general administration and "other" which is Rs. 123.0 and Rs 112.0 respectively. Rs 68.0 is spent on public works and Rs 1.0 on public institutions.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Gadag-Betigeri (CMC)	3.1	2.5	2.0	0.6	1.0
2	Gajendragarh (TMC)	3.5	0.7	0.7	0.4	0.7
3	Lakshmeshwar (TMC)	3.9	1.8	1.2	0.6	0.3
4	Mulgund (TP)	5.5	2.2	1.1	0.6	0.6
5	Mundargi (TP)	7.4	4.4	1.5	1.0	0.5
6	Naregal (TP)	8.4	4.2	3.0	0.6	0.6
7	Nargund (TMC)	3.7	3.7	2.8	0.6	0.3
8	Ron (TP)	1.4	1.4	1.4	0.9	0.5
9	Shirhatti (TP)	4.9	2.5	2.5	0.6	0.6
District Total		**3.9**	**2.5**	**1.8**	**0.6**	**0.5**

The types of educational institutions per 10,000 population is given in the above table. The urban district has 3.9 Primary Schools, 2.5 Junior Secondary/ Middle,, 1.8 Secondary/ Matriculation, 0.6 Senior Secondary and 0.5 college (s) per 10,000 population. Naregal (TP) with a ratio of 8.4 Primary Schools is at the top and at the bottom with 1.4 is Ron (TP). Mundargi with 7.4 Primary, has the highest ratio of Junior Secondary/ Middle with 4.4 and the lowest with 0.7 is in Gajendragarh (TMC). Town-wise data is provided in the above table.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Gadag-Betigeri (CMC)	10
2	Gajendragarh (TMC)	11
3	Lakshmeshwar (TMC)	9
4	Mulgund (TP)	3
5	Mundargi (TP)	18
6	Naregal (TP)	12
7	Nargund (TMC)	22
8	Ron (TP)	14
9	Shirhatti (TP)	19
District Total		**12**

The number of beds in medical institutions per 10,000 population is surmised in the above table. The highest number of beds 22 is reported from Nargund (TMC). The lowest at 3 is from Mulgund (TP). The district urban is 12 per 10,000 population.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Gadag-Betigeri	154,982	10,641	6.9
2	Gajendragarh	28,226	996	3.5
3	Lakshmeshwar	33,417	12,155	36.4
4	Mulgund	18,098	4,000	22.1
5	Mundargi	20,363	6,409	31.5
6	Naregal	16,685	1,650	9.9
7	Nargund	32,561	2,960	9.1
8	Ron	21,643	3,400	15.7
9	Shirahatti	16,208	1,206	7.4
District Total		**342,183**	**43,417**	**12.7**

Note: - Data presented for Statutory Towns having slum population only.

The slum population town-wise is given along with percentage to the total population. The urban district slum population is 12.7 per cent. The highest at 36.4 per cent slum population is reported from Lakshmeshwar followed by Mundargi with 31.5 per cent. Ganjendragarh has the lowest slum population with 3.5 per cent.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Gadag-Betigeri (CMC)	Handloom Silk Sarees	Handloom Sarees
		Bakery Products	Edible Oil
		Edible Oil	Cotton Kapas
2	Gajendragarh (TMC)	-	-
3	Lakshmeshwar (TMC)	Groundnut Oil	Groundnut Oil
		Handloom Clothes	Cotton (Lint)
		Cotton (Lint)	Powerloom Clothes
4	Mulgund (TP)	Groundnut Oil	Groundnut

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
		Cotton Ginning	Cotton
		Carpet Manufacturing	Chilly
5	Mundargi (TP)	Groundnut Oil	Groundnut
		-	Jowar
		-	Sunflower
6	Naregal (TP)	Bakery Products	Jowar
		Carpets	Cotton
		Groundut Oil	Onion
7	Nargund (TMC)	Cotton Yarn	Cotton (Lint)
		Edible Oil	Groundnut Oil
		Wheat Products	Maize
8	Ron (TP)	Groundut Oil	Jowar
		Cotton Ginning	Wheat
		-	Cotton
9	Shirhatti (TP)	Groundnut Oil	Groundnut Oil
		Beedies	Cotton (Lint)
		Handloom Sarees	Silk Thread

The town-wise commodities that are manufactured and exported are listed in the above table. Handloom silk sarees, cotton, carpets etc are some of the commodities. Edible, Agriculture commodities are Groundnut oil, Jowar, Maize, Wheat etc.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48 to 52.

Table No.49 gives the distribution of households by the type of census houses occupied by them in the district. The structures of census houses occupied by the households have been classified with permanent semi-permanent and temporary. The taluk-wise details of which can be seen from the above table.

TABLE 50 : NUMBER AND PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Table No.50 gives the distribution of households by availability of different amenities. Data reveals that, 87.3 per cent of the households have improved drinking water. About 78.7 per cent of them have electricity, 33.0 per cent have bathroom, 16.2 per cent have toilet facility. About 43.5 per cent have drainage facility. All the above facilities are reported to be higher in the urban areas.

The above table provides data on households using different types of fuel for the purposes of cooking. The percentage of rural households using firewood follows the general trend as in most districts, i.e 87.7 per cent. However the percentage of urban households using firewood is also unusually high at 63.2 per cent. Where as at the State level it is just 27.6 per cent of the urban households using firewood. The state level urban households using kerosene and LPG are much higher than the district level percentage. The other fuels used are negligent. The data is provided taluk wise in the table.

The above table provides the data on Households availing banking facilities and possessing other specified assets. The district level percentage of households availing banking facility and possessing other specified assets is far lower than the State level percentages, both in respect of rural and urban areas, except for rural household availing banking facility. The percent of households not possessing any of the specified assets is higher at the district, than the State level.

(xi) Archaeology

There are many evidences of some kind of civilization in the district Gadag in the early period of antiquity. The various cleavers found on the banks of Malaprabha and the dolmens found on the hills adjoining Bellati village of Sirahatti taluk were the evidences of prehistoric age. In some parts of this district pigmy flints have been found, which may be considered to be memorials of the survivors of paleolithic man. Other findings of prehistoric origin are implements of neolothic period polished on gneiss rocks, wheel made pottery, stone beads and pieces of haemetite for the manufacture of pigment. The painted postsherds, terracotta fancy articles, the ukhapatra (sacrificial pot) and other articles found at Itagi on the Tungabhadra in the Sirahatti taluk have laid bare antiquities of the Neolithic and Iron Ages and Mauryan and Satvahana cultures.

Besides these, there are many places in the district with inscriptions, monuments, temples and sculptures of archaeological and architechtural interest. One of them is Hombala. There are 9 inscriptions ranging from 11th to 16th century in Hombala. The Sankaralinga shrine owes its origin to an early period. This temple has preserved the interesting sculptures of medieval age.

(xii) Brief description on places of religious, historical or archaeological importance in villages and place of tourist interest in towns.

GADAG TALUK:

Nagavi : The village is noted for its temple associated with the great Buddhist teacher Nagarjuna. The nicely executed figure of Nagarjuna found here is a good specimen of the medieval sculptor's art. Of the six inscriptions found in this village the earliest one dated in 969 A.D., is that which refers to the reign of Rashtrakuta king Khottiga. The latest of these is of the times of Yadava king Kanhara, and is dated in 1255 A.D.

Sortur : During the medieval times this was an *agrahara* administered by 200 *mahajanas*. The importance of this place in ancient days is borne out by the fact that it contains thirteen inscriptions and the earliest of these is dated in 867 A.D. and belongs

to the reign of Amoghavarsha I. Another epigraph, dated in 1071 A.D. make a reference to a Jaina temple. In yet another inscription of 1091 A.D., goddess Mahalakshmi of Kolhapur is stated to be the protecting goddess of this place as well. The village is noted for its Kalabhairava temple which enshrines an awe-inspiring figure (about 2 metres high) of Kalabhairava accompanied by the figure of a scorpion.

Nilgund : The village has two inscriptions of which one belongs to the reign of Vikramaditya VI and the other dated in 1524 A.D. registers a grant to God Siddeshvara by Vengalappa Nayaka. The temple of Narayana here is built of polished stone and has a large *mantapa* in front. The roof of the temple rests on twelve round beautifully carved pillars and its walls are adorned with mythological sculptures.

Hombal : Known as *Pombolal* during the medieval times, this was a seat of learning and an *agrahara* administered by 120 Mahajanas. Preceptors of the *pasupata* school of Shaivism prospered here. The ancient Shankarlinga temple has the interesting sculptures of *Bhikshatana Murti*, Umamaheshvara, Anantashayana and the Saptramatrikas. In the Yoga-Narayana temple the idol of the main deity as also that of goddess Saraswati is remarkable for its superb workmanship. The village has yielded of inscriptions ranging from the 11th to the 16th century.

Kotumachagi : The ruins of a fort and the temples of Someshvara and Kalameshvara are the chief objects of interest. An inscription in the Kalameshvara temple, dated in 1012 A.D. mentions that this village was at that time a great educational centre with free hostel and a college where instruction was being imparted in several sciences. This inscription provides details about the proper conduct of worship in the temples, the imparting of education and the feeding of the asceties, the supply of water to the people, and the punishment to criminals. The Someshvara temple has three inscriptions. The local Jaina basti also has an inscription.

Lakkundi : This place of great antiquarian importance, was known as Lokkigundi in ancient times and contains the ruins of a fort and as many as 50 temples and 30 inscriptions. This was a seat of learning, being an *agrahara* administered by one thousand *mahajanas* who were renowned for their erudition and virtues. In 1007 A.D. Dana-Chintamani Attimabbe the patron of Kannada Poet Ranna, erected the Brahma Jinalaya at this place. During the medieval period Lokkigundi was a busy centre of minting activities and the gold coins minted here were known as *Lokki Gadyanas*. In 1192 A.D., Hoysala king Vira Ballala (1191-1211) was residing at this place and according to tradition, between 1187 and 1192 A.D. Lokkigundi was the scene of his bitter battle against Jaitugi, the son of Yadava King Bhillama in which the latter was worsted. The chief temples of interest here are those of Kashivisveshwara, Mallikarjuna, Halagund Basavanna, Virupaksha, Lakshmi Narayana, Manikeshvara, Virabhadra, Nanneshvara, Someshvara, Nilakanthesvara, Nadayadeva or Kumbharagirishvara, Nagaradeva and Visvanatha. It is said that in the construction of the Kashi-Visveshvara temple the Chalukyan builders reached their high watermark in decorative architecture. Among the temples in Lakkundi, the Jaina basti which enshrines Mahavira is the largest and also the oldest building. The inner hall of this *basti* has a well-carved idol of Brahma. Lakkundi is noted for its wells with flights of steps built in the Jakanacharya style. These are locally known by names such as Chabir-bhanvi, Kannerbhanvi and Musukinabhanvi. The best amongst these is the Musukinabhanvi which is located near Manikeshvara temple.

Narasapur : The village has an ancient temple which is of considerable architectural interest. It has two windows adorned with figures carved in deep relief. The figures are much like the elaborate sculptures in the Kailas temple of Ellora and are fine examples of the manner in which the 13th century sculptors carved life in action in a conventional way but free extravagance.

MUNDARGI TALUK :

Korlahalli : Situated on the left bank of the river Tungabhadra has an inscription dated in 1051 A.D. which mentions that at that time the Chalukyan Princess Akkadevi was governing the areas of Kisukad, Torgal and Maseyavadi. The village has a large weir built on a natural barrier of rock in the river formed by a trap dyke in the granite. Its crest is about 7 metres above the low water level of the river and is about 7 metres wide at the top. However, the central part of the weir is breached now rendering the weir into an useless piece of architectural work

of the ancient times. It is supposed to have been built by the Vijayanagara Kings, probably the first in the series of such weirs across the Tungabhadra.

Shingatalur : On the south hill of the Kappat range, about 70 metres above foot hills, there is the ancient Virabhadra temple under the auspices of which a largely attended fair is held every year during *Chaitra masa* (April-May).

Gumgol : An inscription found here is dated in 1529 and belongs to the reign of Sri Krishnadevaraya. The village has a temple of Goni Basavanna, under the auspices of which a month long festival and a cattle fair are held during *Chaitramasa* (April-May).

Mustikop : The village is noted for its temple dedicated to Venkatesha.

Dambal : The temples of Dodda Basavanna, Kaleshvara and Someshvara are the chief objects of interest here. The Dodda Basavanna temple is built in an unique style and differs from the temples found at Gadag and Lakkundi. The base of the temple as well as its main hall are star-shaped. The interiors of the shrine and the hall are square. The temple enshrines a linga and the door-step in front of the shrine is beautifully carved in low relief with rosettes, festoons and small figures. Above the entrance, to the little ante-chamber there is a sculptured architrave spanning the two slender pillars on either side of the entrance. It is one block about 8 feet across and 3 to 4 feet deep. On each side, close above the pillars, is carved the conventional griffin like monster, often called a *makara*, with an elaborate florid tail coiling over its back and great square jaws from which issues an ornamental wreath or arch. The dome of the hall is supported by four carefully finished pillars. Unlike most Chalukyan temples this has no cornice and the spire runs direct from the caves as a truncated cone. The doorway on the south is very richly carved though it is now carved up by plaster and paint. The Someshvara temple is a plain structure, its marked feature being very deep flat straight-lined cornice which runs round over the caves of the hall. To the west of the village site there is the site of a fort with an ancient Jain shrine which is in ruins and a Ganapati temple. On a stone tablet to the left of the Jain shrine is an inscription which is dated in 1095 A.D. At the top of this tablet there are several emblems and the inscription which begins with a salutation to Buddha and Tara refers to the grants made to the two Buddhist *Viharas* at Dambal. The inscription further mentions that Lakshmadevi, the chief queen as governing the district called the eighteen *agraharas* and the city of Dharmapura or Dharmavolal (apparently Dambal). The village has yielded 10 more inscriptions. Two of these, dated in 1098 A.D. and 1283 A.D. record further grants to the Buddhist establishments. The earliest inscription is of 1060 A.D. and this, as well as another dated in 1289 A.D. register gifts to the Nagara Jinalaya founded by the local mercantile community. Inscriptions recording grants to Saiva institutions and mentioning teachers of the Pashupata school of Saivism are also found here. Obviously during the medieval period Buddhism, Jainism as well as the Saiva faith flourished in this neighbourhood. The village has a very large tank (storage capacity of 96.70 million cft) which is said to be more than 400 years old.

NARGUND TALUK :

Konnur : This village is located on the banks of the river Malaprabha and is noted for its temples dedicated to Parameshvara and Rameshvara of which the latter is a very large building. An inscription built into a wall of the Parameshvara temple refers to the transactions of the reign of Rashtrakuta Amoghavarsha I and is dated in 860 A.D. Of the other two inscriptions one is dated in 1547 A.D. and, belonging to the reign of Sadasiva Raya the Vijayanagara King, it records the remission of tax on barbers.

Kallapur : The village has a large temple of Advi Basavanna. The villagers of this neighbourhood believe that the animals suffering from diseases would be cured if taken round this shrine after offering prayers to the deity.

RON TALUK :

Hirehal : This village is known for its Ramalingeshvara temple.

Sudi : In the records of the 15th century, this village is referred to as a *rajadhani*. The goldsmiths of this place were, in those days, licensed to mint coins and the foremost among them was the royal mint-master Uttavoja who struck coins for Vikramaditya VI (1076-1126 A.D.). According to an epigraph of 1010 A.D., the Chalukyan princess Akkadevi was governing this neighbourhood from her capital at Vikramapura.

Sawadi : The earliest of the three inscriptions found here is dated in 970 A.D. and belongs to the reign of Rashtrakuta King Khottiga. The second inscription dated in 1082 A.D. is of Vikramaditya VI and mentions the administration of his son Someshvara II over this region. The third inscription found on a pillar in the Brahmadeva temple refers to the renovation of the shrine of Traipurusha. The Brahmadeva temple is said to have been built of stone brought from Badami of Bijapur district. The roof of this temple rests on numerous carved pillars and the outer walls of the temple are adorned with paintings. The village has a temple dedicated to Narayana.

Maranabasari : Under the renowned Annadanaswamy *matha* of this village a largely attended annual fair is held during December.

SHIRHATTI TALUK :

Varvi : This village is the seat of Mouneshvara math, a religious institution of repute.

Bellatti : In the hills adjoining this village dolmens of a pre-historic age were found. The village is noted for its ancient temple dedicated to Ramalingeshvara.

Devihal : On a hill nearby there is the temple of Holalamma. This goddess, endowed with eight hands, represents Mahishasuramardini, a form of Durga. The idol is about 2 metres high and is beautifully carved. A 16th century inscription etched on a pillar here registers gifts to the deity. An annual fair is held in honour of this goddess on *Magha paurnima* (full moon day during February). Earthern pots with ashes and bones comprising the relics of prehistoric funerary practices were found on this hill.

Adarakatti : The village is noted for its Basaveshvara temple.

Doddur : The main object of interest and of considerable religious importance is the well-built Maruti temple.

Shigli : The Gurubasavanna *matha* of this place is an important religious institution.

Gulganjikoppa : This village is known for its Dandi Basaveshwara temple.

Yalavatti : The objects of historical importance here include a small fort built by the first Khangauda Desai of Shirhatti during the 17th century. The northern wall of this fort is built of stone and mortar to the height of about 1.2 metres the rest being of earth. The other three sides are built of stone and earth inside with strong dry pitching on the outside. The fort has twelve bastions about 8 metres high and its wall is 6 metres high and 3 metres thick. In 1846 Yelavatti fort was granted as *inam* by the East India Company to Chintamani Rao of Sangli. The village has a temple of Gundeshvara which attracts a large number of devotees from far off places also. According to local tradition this village was founded by Sri Rama. Of the seven inscriptions found here the earliest is of the eighth century A.D. In one of the inscriptions it has been described as a *mahagrama* and an *agrahara administered* by 120 *Mahajanas*.

Places of tourist and other interest in and around the towns:

Gadag-Betigeri : Gadag is a place of great antiquity and has been referred to as a *Maha-agrahara* founded by Janamejaya of the legendary times. In inscriptions the name of the place has been mentioned as Krutuka, Kratupura, Kardugu, Galadugu and Gadugu. In historical times it was a renowned seat of learning and was being administered by 72 *Mahajanas*. There are 34 inscriptions here and most of these are found in the precincts of the temples dedicated to Trikuteshvara and Viranarayana. It is held that this Viranarayana temple is one of the five Narayana temples built in about 1117 A.D. by Hoysala King Vishnuvardhana (1117-1137 A.D.) on his conversion to the Vaishnava faith. An inscription of the Vijayanagara King Achutaraya, dated in 1539 A.D. records his gift of Anandanidhi, adding that the god Viranarayana had conferred his blessings on the poet Kumara Vyasa, the famous author of Kannada Mahabharata. In Betigeri at a place called Mallarayanakatte there is a group of 15 memorial stones known as Virkals or Vira Sasanas. These are very large in size and depict different military standards in their sculpture.

Among the temples of Gadag, the small temple of Saraswati is noted for its delicacy and beauty of detail. The richness and grace of some of its columns are unsurpassed and the pillars are beautiful specimens of Chalukyan art. The life-sized idol of Saraswati is, however, mutilated, the four arms are lopped off at the elbows. The Trikuteshvara temple lies in the same enclosed courtyard in which the Saraswati temple is

located. This was originally a double temple consisting of the principal shrine facing east with a small enclosed hall before it. This shrine has three *lingas* set up in a row on the single *salunka* (i.e. pedestal). The interior of this temple is very plain. The Someshvara temple is a good specimen of a fully developed Chalukyan temple. There are frequent repetition of details of the carvings found here. The doorways are richly decorated. The Viranarayana temple has a big *gopura* are carved with beautiful figures. It is believed that the renowned Kannada poet Kumara Vyasa composed the epic Mahabharata in this temple sitting in front of the beautiful idol of Viranarayana. This temple belongs to the 11th or the early 12th century A.D. There are two Jaina temples dedicated to Parshvanatha and Mahavira besides four churches and three mosques. The Tontadaswamy matha, founded during the 16th century is also a noted religious institution of this place.

Gajendragarh : The fort of Gajendragarh was built by Shivaji and the fort at Unchigeri nearby was built in 1685 A.D. by Daulatrav Ghorpade. The town has a ruined temple of Virupaksha with an unfinished hall. The other temples of interest here are those of Durga devi, Ramalinga, Rama and Panduranga. Near the fort, on the hill-side there is a cavern which is a natural opening between two huge blocks of granite. The cavern has an idol of Lord Shiva and is reached by a flight of steps. The flat ledge rests above the blocks of granites, about 100 metres high and has precipitous sides. Near this cavern there are two tirthas fed by unfailing springs. The shrine of Kalkeshvara is a noted place of pilgrimage. To the left of the *linga* here, there is a basin containing water, called *Patalangange*, and a niche with a figure of Nandi. This Nandi, it is believed, is imperceptibly but continuously growing and is worshipped by barren women. In the temple of Kalkeshvara there are four inscriptions which record various grants to the deity.

Lakshmeshvar : This is a place of great antiquarian interest which has yielded more than 50 inscriptions and contains several historical monuments mainly temples and sculptures. In ancient days this was known by the names such as Puligere, Huligere, Purigere or Pulikaranagara and, according to early Kannada authors, this was one of the places where chaste Kannada language was spoken. The epigraphs stretch over the period from the Seventh to the sixteenth century and register variuos gifts to different religious institutions. These epigraph represent all the dynasties that ruled in Karnataka and the oldest inscription refers to Vinayaditya and is dated in 686 A.D. In many of these records this place has been called the *rajadhani-pattana* (capital city) and a part of it called Brahmeshvaragiri was being administered by 120 Mahajanas. The Someshvara temple is chief object of interest here. In inscription the deity has been referred to as Swayambhu-Dakshina-Somanathadeva. An inscription dated in 1128 A.D. registers a gift by Kadamba Jayakeshi II for the educational institution attached to the temple. Sanka-basadi is also an early structure and among the Jaina shrines mentioned in inscriptions Anesajjeya basadi built by Kunkumadevi the younger sister of Vijayaditya (696-733 A.D.) appears to be the oldest. During the supremacy of the Adil Shahi Kings of Bijapur, Lakshmeshvara was being governed by Ankush Khan and to him is attributed the construction of the Jumma Masjid found in the town. In addition to the above antiquities the town has a number of ancient and modern temples dedicated to Baleshvara, Kodeyallamma, Dundi-Basavanna, Hanuman, Vithoba, Amba Bhavani, etc., and the monasteries known as Sankara matha, Raghvendraswamy matha and the Mahantina matha.

Mulgund : The inscriptions found here, numbering eighteen, are quite interesting in that these furnish details regarding the political as well as the religious activities of the followers of different faiths. Mulgund was a prominent centre of the Shaiva as well as Jaina teachers. A distinguished line of Jaina scholars and monks flourished here. Reputed among them was Nayasena, the author of Kannada classical work *Dharmamrita*. The earliest epigraph here is of Chalukya Jayasimha II and is dated in 1028 A.D. The places of interest in the town include the temples of Kalabhairava, Nagaresha, Pete Basappa and Siddheshvara as well as the Hire basadi, the Parshwanatha basadi, the Chandranatha basadi and the Annadanasvami's matha. A large annual fair held at a small hill nearby during the month of Kartika (November) attracts a large gathering.

Mundargi : The ruins of a fort on a rocky hill near the town is the main object of interest here. Bhimrao Nadgir of Mundargi rebelled against the British rule during 1857-58 and joined hands with the chief of

Nargund who raised the standard of revolt in the south. On a hillock nearby there is a temple of Kanaka Narasimha under the auspices of which a largely attended annual fair is held during the month of *Phalguna*. The town has two veerashaiva *mathas* known as Annadanaswami *matha* and Tontadarayaswami *matha* and, under the auspices of the former an annual fair is held during the month of Chaitra (March-April).

Naregal : The town is noted for its black-stone temples of Tripurantakeshvara, Someshvara, Kalmeshvara, Chandramouleshvara and Molle Brahmadeva. The Someshvara temple which is the chief of the temple has two halls, a shrine beyond them, and two shrines one on either side of the first hall which is open in the front. The town has ten inscriptions and the earliest of these is dated in 950 A.D.

Nargund : The chief attraction of the town is the Nargund hill, where there are the remains of an old fort, which was built in 1674 by Shivaji and was at one time was regarded as one of the strongest forts of the Bombay-Karnataka region. When Nargund State was confiscated by the British in 1858, the fortifications were dismantled and the fort was rendered useless by destroying some of the chief reservoirs. The town has a large temple dedicated to Shankaralinga and a smaller temple enshrining Mahabaleshvara and another small temple of Joda Hanumanta. On the summit, of fort-hill there is the temple of Venkatesha which was built in 1720 A.D. by Ramrao the founder of the Ramdurg Chiefship. In 1858 the temple was desecrated and the idol broken. Later the Ramdurg chief got the temple re-consecrated. The annual fair held under the auspices of this temple lasts for 12 days and on the last day, which corresponds to the full-moon of Ashvija, a car festival is also held. The event attracts a large gathering from far and near. There is also a Nagareshvara temple which is much more ancient and is attributed to Jakanacharya. The town has three inscriptions which belong to the three successive rulers of the Later Chalukya family, namely, Someshvara III, Jagadekamalla II and Taila II. In these the town is described as agrahara administered by 220 *mahajanas*. As has already been mentioned elsewhere, Bhaskar Rao Appa Saheb, commonly called Baba Saheb, the chief of Nargund rebelled against the British in 1857. He was finally captured, tried, convicted and hanged on the 12th june 1858.

Ron : Tradition attributes the derivation of the name Ron or *Rona* to Drona of the Mahabharata times. The original temple of Dronacharya has been converted into a Basavanna temple and the idol of Dronacharya is kept outside. The town has about a dozen epigraphs and the earliest of these, dated in 874 A.D. belongs to the reign of Rashtrakuta Amoghavarsha I. A record of 1111 A.D. near the Dronacharya temple registers the gifts for lighting the assembly hall and study room, for dinner in honour of the goddess of learning on the occassion of the Indra festival and for teaching logic. Obviously Ron was an important centre of learning in those days. It was a *maha-agrahara* administered by 104 *mahajanas.* The ancient monuments of the place include the Parshvanatha basadi and the temples of Lokanatha, Anantasayana and Sangameshvara. The Veerabhadra temple is comparatively modern and deserves notice.

Shirhatti : The fort, Avlingavva Math and the Fakirsvami Math are the chief objects of interest here. The fort which is attributed to Ankush Khan the Jagirdar of Lakshmeshvar by some and to Khangauna Desai by others, had 15 bastions. The fortwalls built of earth and rubble are 6 metres high and about 5 metres thick. The main gate faces east and has two bastions, one on each side, measuring 12 metres in height and 9 metres in diameter. The fort is surrounded by a moat. The Avlingavva Math, a 17th century stone building, was built by Avlingavva the founder of the Lakshmeshvar *desgat*. The building intended to be tomb is quite large and is decorated with numerous sculptures displaying considerable artistic skill. The Fakirsvami Math was founded by Chennavira Svami, a contemporary of Avlingavva. The Math has six tombs enshrining the mortal remains of six successive Svamis. These tombs are held in high veneration by the Veerashaivas of this region. On the full-moon day of *Vaishaka* (April-May) a fair is held in honour of the Fakirsvami.

(xiii) Scope of Village Directory and Town Directory

Village Directory

Village Directory provides micro-level data which will help the planners in formulation of micro-level

developmental plans as the C.D.Block is the lowest administrative unit for developmental planning. Village wise information regarding the availability of certain basic amenities and facilities within the village, as also that on the manner of utilization of the land in the concerned village are furnished in the village directory. The village directory format adopted for the 2001 Census has 23 columns whereas in the 1991 Census there were only 18 columns. When compared with the 1991 Census Village Directory format, column 9 which refers to the day or days of weekly market/hat if any has been now left out. New inclusions are in respect of facilities like banks, agricultural credit societies, non-agricultural credit societies, other cooperative societies, number of recreational and cultural facilities like cinema/video hall, sports club, stadium/auditorium; receipt of news papers/magazines and the name of the most important commodities manufactured in the village. In all the 23 columns in this tabulation statement, first 3 columns relates to serial number, name of the village with location code and area of village while the next 2 provide information on total population and number of households in the village as per 2001 Census. The next 8 columns relate to basic amenities such as educational; medical; drinking water (potable); post, telegraph and telephone, commercial and cooperative banks, agricultural, non-agricultural and other credit societies, number of recreational and cultural facilities such as cinema/video hall, sports club and stadium/auditorium and communications (bus service, railway station, waterway). Information in respect of approach to village, nearest town and distance in Kms., power supply, receipt of news paper/magazine, names of the most important commodities manufactured in the village are furnished in columns 14 to 18. Amenities available within the villages are shown in the respective columns and if a particular amenity especially Primary School, Middle School, College, Allopathic Hospital, PHC, MCW, Post Office, Telephone, etc., is not available in the village, the respective abbreviation is given and next to it in brackets the distance in broad ranges viz., <5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility available to that particular village is indicated. The next 5 columns, 19 to 23 provide information regarding land use (i.e., area under different types of land use in hectares rounded to two decimal places) such as forest, irrigated land by source of irrigation, un-irrigated, cultivable waste (including gauchar and groves) and finally the area not available for cultivation.

Town Directory

The Town Directory section contains seven statements (I to VII) which furnish information on all the statutory towns in the district, on aspects such as growth history, physical aspects and location of towns, municipal finance, civic and other amenities in the town, medical, educational, recreational and cultural facilities, trade, commerce, industry and banking in the towns, civic and other amenities in slum areas of the town. The scope of the various column headings adopted during 1991 Census has remained unchanged in 2001.

Note :

1. The area figure for the district given under column No 3 against " Total" represents "Geographical Area" and has been furnished by the Surveyor General India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D. Blocks/Taluks in this district will not tally with the district figures (except urban), because the area figures for C.D. Blocks/Taluks represents the land-use area based on village wise area figures as reported by the local officers. The total area of the taluk may not tally with the aggregate of the areas of the villages listed for Census purposes for it includes the area of the statutory as well as non-statutory towns, villages which may be fully submerged and reserve forests which may not form part of any revenue village, if any, within the jurisdiction of the concerned taluk. The total area of the C.D. Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2. Out growths of towns in urban agglomerations are denoted by letter "OG".

3. The following abbreviations have been used to indicate the Civic Administration Status of town.

M.Corp	:	*Municipal Corporation*
CMC	:	*City Municipal Council*
TMC	:	*Town Municipal Council*
TP	:	*Town Panchayat*
NAC	:	*Notified Area Committee*
CB	:	*Cantonment Board*
CT	:	*Census Town (Non-Municipal Census Town / Non-Statutory Town)*

SECTION – I

VILLAGE DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and cooperative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are as follows:

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and un-inhabited villages.

Column 3 : Area of the village

The area of the village in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23,availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are treated as equivalent to Pre-University Course.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health SubCentre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10:Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, cooperative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If the village receives any News Paper/ Magazines, the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State Government is furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Unirrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	-	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-IA	-	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-IB	-	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-IC	-	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	-	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-IIA	-	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	-	It gives the land utilization data in respect of Census Towns / nonmunicipal Towns.
Appendix-IV	-	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	-	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	-	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII A- & VII B		The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	-	Indicates C D Block wise number of villages under each Grama Panchayat.
Appendix-IX	-	Shows number of different types of girls school in a village.

SECTION – II

TOWN DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I: Status and Growth History

Column (2): Class, name and civic administration status of town:

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 99,999	II
20,000 49,999	III
10,000 19,999	IV
5,000 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II Physical Aspects and Location of towns, 1999.

Column 3 to 5: Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8:

Name of the State headquarters, District headquarters and SubDivisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10:

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13:

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Itemwise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV: Civic and Other amenities, 1999

Column (1 to 5): Self explanatory.

Column (6): Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7): System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows:

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11: Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12: Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes:

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14: Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tubewell water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilolitres (in bracket) are presented in column 14.

Column 15: Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20: Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3: Self explanatory.

Column 4 & 5:

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies

like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes:

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below:

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9:

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10: Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used:

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/ Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, PrePrimary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning

Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16: Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19: Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/ Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20: Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows:

(i) Public Library	PL
(ii) Reading room	RR

Statement VI: Trade, Commerce, Industry and Banking, 1999

Column 3 to 8: Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9: Number of Banks

Number of Banks available in the referent town both Commercial and Cooperative banks are recorded against this column.

Column 10 & 11: Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII: Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Cenus Abstract	Level of presentation
1. District Primary Census Abstract	District/CDBlock/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CDBlock/Town
3. Primary Census Abstract for Scheduled Tribes	District/CDBlock/Town
4. Village Primary CensusAbstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/WardLevel

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of taluks, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Talukdars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the taluks/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Taluk. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Taluks and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE – II
NOTE ON FERTILITY & MORTALITY AND MIGRATION – 1991 & 2001 CENSUSES

Fertility levels

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all evermarried women and the last question related to currently married women.

MIGRATION

What is Migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another state of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why people migrate?

As in 1981 census, the reasons for migration were elicited in 1991 and 2001 censuses also. The reasons for migration were broadly categorized as (1) employment (2) business (3) education (4) family moved (5) marriage (6) natural calamities like drought, floods etc. and (7) other reasons. Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

ANNEXURE III

Marriage and age at marriage are important social phenomena and crucial factors in the analysis of the dynamics of fertility. As such, various measures of fertility estimated based on these crucial factors are highlighted in the above table.

Estimates of General Fertility Rate (GFR) a refined measure of fertility, defined as the number of live births per thousand women in the reproductive age-group 15-49 years is a useful tool for measuring fertility, and this rate is further estimated only for the married women which is defined as General Marital Fertility Rate (GMFR). The GFR and GMFR for the district are 130 and 171 respectively.

The cumulative value of the age-specific fertility rates at the end of the child bearing ages gives a measure of Fertility known as Total Fertility Rate (TFR). It indicates average number of children expected to be born per woman during her entire span on reproductive period assuming that the age The same is expected for married women known as Total Marital Fertility Rate (TMFR). The estimated TFR and TMFR for the district are 3.94 and 5.61 respectively. The Crude Birth Rate (CBR) is 30.59.

The most useful indices that can be derived from the question on number of children born alive is the average number of children ever born per ever married women by age-group. Since most of the women complete their reproduction be the age-group 45-49, this indices is termed as

completed fertility. The category ever married includes widows, divorced and separated women. As such the completed fertility for the district is 4.74. The child women ratio which is a relative measure to know the fertility performance of a woman is 503 in the district.

One of the parameters, presenting female age at marriage relates to all women who live with their husbands, where some of them might have been recently married and some of them decades ago. It can be observed that mean age at marriage of the currently married women of Gadag district is higher than the state figure of 18.00.

The estimates of mortality indicators presented above have been obtained through indirect estimation using the data on the number of children ever born and number of children surviving to ever married women. The information on questions on children ever born and children surviving canvassed for all ever married woman have been tabulated by the age of the mother. This data has been converted into estimates of probability of dying before attaining a given age. These estimates have been worked out using Brass technique where (q_i) is the probability of a newborn child dying before the age i = 1, 2, 3 and 5. The table above shows the estimates of infant and child mortality derived for the year 1991 by sex.

The infant mortality rate (q_1) for the person is 74 and for male and female are 74 and 75 respectively. The estimates of under 5 mortality (q_5) for person is 95 and for male and female are 94 and 97 respectively.

The Anenxure IV(1) presents data of migrants data on migration by their place of birth. The majority of migrants are those who are born within the state of enumeration, which constitute 98.23 per cent as per 2001 Census. Among them, migrants born elsewhere in the district are larger than migrants born in other districts of the state. Considerable proportion of population from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (2) - PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF LAST RESIDENCE

The Annexure IV(2) presents data on migration by their place of last residence. As far as the district is concerned, it can be seen that migrants whose place of last residence was within the state of enumeration but outside the place of enumeration, constitute major proportion of migrant population. As per 2001 Census, their percentage accounts for 98.27. Among them, more is the inflow from within the district. Considerable proportion from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (3) - INTERSTATE IN-MIGRATION TO GADAG DISTRICT

Sl. No.	Place of Birth	1991 Census		2001 Census	
		Migrants	Percentage of total migrants	Migrants	Percentage of total migrants

Other states		9,120	22.71	1,253	20.28
Total		**40,150**	**100.00**	**6,180**	**100.00**

Source : Migration Tables of 1991 & 2001 Census

The interstate in-migration to the district by their place of birth provided above, highlights the States with the largest contribution of migrants to the district. According to 2001 Census findings, large inflow of population is from Maharashtra and Andhra Pradesh which accounts for 33.69 and 22.57 per cent respectively. The migrants are also reported from other States i.e., Rajasthan, Tamilnadu and Gujarat. By way of comparison between 1991 and 2001 Census, the decrease seen above is only marginal.

ANNEXURE IV(4) - RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH - 1991 and 2001 CENSUS

Sl.No.	Place of Birth	Place of Enumeration-1991			Place of Enumeration-2001		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
1.	Within the state	1,222,118	822,222	399,896	355,321	234,512	120,809
		100.0	67.3	32.7	100.0	66.0	34.0
2.	In other states of India	40,150	4,680	35,470	6,207	1,244	4,963
		100.0	11.7	88.3	100.0	20.0	80.0

Source : Migration Tables of 1991 & 2001 Census

Rural and urban composition of internal migrants by their place of birth is provided in the above statement. The data for both the census points out that majority of migrants within the State have relocated at rural areas. Whereas this trend slightly varies with migrants from other states of India, where large influx is seen in urban areas. The details can be seen from the statement.

ANENXURE - V

Brief account of Main Religions in the District /Taluk as per 2001 Census

Religion forms an integral part of Indian Social System. For an Indian, it is a way of life rather than a faith. Indian Census, since its inception is collecting data on religion and presenting the same in its reports. In the pre-independence Census reports, the data on religion was being presented for 6 major religions viz., Hindus, Muslims, Christians, Sikhs, Jains and Buddhists. Besides, the minor religions have been classified under the category of 'Others'. The data on religion collected and presented by the Indian Census is the basic data of immense use for the researchers, anthropologists, sociologists, demographers, administrators, planners and even for a common man.

ANNEXURE V(1) - PERCENTAGE DISTRIBUTION OF POPULATION BY MAJOR RELIGIONS IN INDIA AND KARNATAKA DURING 1991 & 2001 AND ITS GROWTH RATE DURING 1981-1991& 1991-2001

Sl. No.	Religion	India				Karnataka			
		Percentage of Population	Percentage growth rate 1981-1991	Percentage of Population	Percentage growth rate 1991-2001	Percentage of Population	Percentage growth rate 1981-1991	Percentage of Population	Percentage growth rate 1991-2001
1	2	3	4	5	6	7	8	9	10

India - State differentials

The comparative data of the country and the state of Karnataka presented in Annexure V(i) reveals that the religion wise concentration of population in the state of Karnataka is of three major religions viz., Hindus, Muslims and Christians. Hindus are returned on the higher side with over three per cent more than the national average. Christians recorded nearly one per cent less whereas the proportion of Muslims in the state to national population was almost the same. There are 85.5 per cent Hindus, 11.6 per cent Muslims and 1.9 per cent Christians in Karnataka as against that of 82.4 per cent Hindus, 11.7 per cent Muslims and 2.3 per cent Christians in India. In regard to concentration of other three major religions viz., Sikhs, Buddhists and Jains it is observed that Jains with 0.7 per cent form the fourth major religion in the state whereas Buddhists with 9.8 per cent is the third major religion in India. In the Indian scene the Sikhs form fifth major group, whereas in Karnataka, Buddhists and Sikhs are placed fifth position.

Religion wise growth in the state during the decade 1981 - 91 reveals that the major religions viz., Hindus, Muslims and Christians recorded a growth rate in lesser degree i.e., 20.7 per cent, 25.7 per cent and 11.1 per cent respectively, against that of 22.3, 26.1 and 16.9 per cent in India as a whole. On the other hand Buddhists, Sikhs and Jains recorded a growth rate of 72.8 per cent, 57.8 per cent and 14.6 pecent respectively for the state against that of 34.0, 24.2 and 3.9 per cent respectively for India. Thus, the Jains recorded a higher growth of nearly 11 per cent in the state than that of India as a whole during the decade 1981 - 91.

Percentage distribution of population during 2001 Census, by major religions in India and Karnataka shows that Hindus form majority of the population with 80.5 and 83.9 per cent respectively, while Muslims form 13.4 and 12.2 per cent for the country and state respectively. The proportion of these religions for the country and state, during 1991 Census was 82.4 per cent and 85.5 per cent for Hindus and 11.7 and 11.6 per cent for Muslims. There are not

much noticeable changes are found in other religions. Persons who have not reported to which religion or faith they belong to has increased in Karnataka, as its proportion to the total population has increased from 0.1 per cent in 1991 Census to 0.3 per cent during 2001 Census.

ANNEXURE V(2) - DISTRIBUTION OF POPULATION UNDER EACH RELIGION TO TOTAL POPULATION IN THE DISTRICTS OF KARNATAKA - 1991 CENSUS & 2001 CENSUS

The above table furnishes the composition of six major religions along with 'Other Religions' and 'Religion not stated' among the districts of the state during 2001 Census along with 1991 Census. As may be seen from the table that the proportion of population to total population during 2001 Census is below 5 per cent for 23 districts of the state and is between 5-10 per cent in 3 districts. Only Bangalore district has the distinction of having more than 10 per cent of the total population of the state in its jurisdiction. During 1991 Census the situation was almost similar with 22 districts having a proportion of less than 5 per cent and 4 districts had more than 5 per cent but below 10 per cent. With 10.76 per cent of the total population Bangalore district occupied the top position.

Of the total population of the state, proportion of districts having Hindus and Muslims was uniform during both the Censuses i.e. less than 5 per cent of the total population in 21 districts for Hindus and 23 districts for Muslims, while in 5 and 3 districts respectively for Hindus and Muslims had a proportion of 5-10 per cent and Bangalore district alone had more than 10 per cent.

ANNEXURE V(3) - PERCENTAGE AND DISTRIBUTION OF POPULATION BY MAJOR RELIGION IN KARNATAKA AND GADAG DISTRICT - 1991 & 2001

	KARNATAKA				GADAG			
	1991		2001		1991		2001	
RELIGION	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage

Religion not stated	36,121	0.10	120,247	0.23	1,188	0.14	2,940	0.30

The percentage distribution of population by major religion in Karnataka and Gadag district for 1991 and 2001 Censuses are presented in the above table. As may be seen from the table that in Karnataka, Hindus form 85.5 and 83.86 per cent of the total population during 1991 and 2001 Censuses, followed by Muslims and Christians. The corresponding statistics for the district does not differ much as Hindus and Muslims occupy the top two places followed by Jains. These three religion cover more than 97 per cent of the total population of the district. Remarkable increase in the proportion of Buddhists population has been noticed between 1991 and 2001 Censuses in the State.

ANNEXURE V(4) - DISTRIBUTION BETWEEN RURAL AND URBAN AREAS OF MAJOR RELIGIONS IN KARNATAKA AND GADAG - 1991 & 2001

	Others	43	16.5	217	83.5	2,468	31.9	5,275	68.1
	Religion not stated	1,035	87.1	153	12.9	2,491	84.7	449	15.3

Distribution of major religion by residence for the State and district are presented in the above statement. Majority of Hindus, Jains, Buddhists and those who have not stated their religion are residing in rural areas of the State during both the Censuses. While population belonging to Muslim, Christian and Sikh religion reside in urban areas of the State. Almost similar trend is seen in the district. As per 2001 Census data, while majority of Hindus, Buddhists, Sikhs and those who have not stated their religion reside in rural areas, majority of Muslims, Christians and Jains reside in urban areas. A comparative data for 1991 Census is provided in the annexure.

A: Absolute, **P:** Percentage

Talukwise distribution of population following major religion is presented above. As far as the district is concerned, majority of the population follow Hindu faith in all the taluks. This is followed by Muslims and Jains in Gadag district. A comparison between 1991 and 2001 Census data expose marginal variations in different faiths persuaded by the population during the decade.

ANNEXURE VI - MARITAL STATUS OF POPULATION IN GADAG DISTRICT - 1991& 2001

Note:- *The data on marital status is being tabulated upto district level only. As such the data for newly created districts could not be recalibrated for 1991 Census. Hence the data of unbifurcated districts are presented for the newly created districts also.

It may be seen from Annexure VI that the percentage of "Never Married" population accounts for 49.24 per cent and 50.42 per cent at state and district levels during 2001 Census, while the same was 52.05 per cent and 53.55 per cent during 1991 Census. Similarly the percentage figures of the district for Married, widowed and Divorced or Separated are 42.93, 6.33 and 0.31 per cent during 2001 Census. Comparative data for 1991 Census is also furnished in the table for ready reference. The percentage variation of all the marital categories between rural and urban is marginal in both state and district population.

The level of education by sex for the district and the State during 1991 and 2001 Census are presented in the above annexure. It can be seen that percentage of illiterates during the decade has decreased vis-a-

vis for the State and the district. The male literates out number female literates. The different educational level attained by the population can be seen in detail in the above annexure.

ANNEXURE - VIII

DISTRIBUTION OF DIFFERENT MOTHER TONGUE RETURNED DURING 1991 & 2001 CENSUS

As part of Census publication programme the data on spoken languages/Mother Tongues will be presented under C Series. The table C-7 shows the distribution of languages/Mother Tongues which returned 10,000 or more speakers each at all-India level (including of Mother Tongues grouped under each for the district, with total, rural/urban and male/female break ups). The unclassified Mother Tongues and the Mother Tongues having less than 10,000 speakers have been relegated to 'Other' Mother Tongue category. The table is divided into Part A-Scheduled languages with Mother Tongues grouped under each and Part B-Non-scheduled languages with Mother Tongue grouped under each. The instructions to the enumerators in regard to this question read as under.

"Record Mother Tongue in full, whatever be the name of the language returned by the person enumerated". The definition of Mother Tongue is the same as in 1991. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the Mother Tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded".

As the above instructions to the enumerators would show, the respondent was made to feel free to return the name of his/her Mother Tongue and the same was recorded faithfully by the enumerators. This naturally leads to recording of a very large number of Mother Tongue names. It is to be mentioned that Mother Tongues as returned in the Census are basically, the designation provided by the respondents. These designations or Mother Tongue labels need not be identical with the actual linguistic mediums. For assessing the correlation between the Mother Tongue designations and actual languages and dialects the raw returns of Census were subjected to thorough scrutiny and rationalization.

The abstract of languages as Mother Tongues and their strength in the district during 1991 and 2001 Census are provided below.

STATEMENT-I
ABSTRACT OF LANGUAGES AS MOTHER TONGUES AND THEIR STRENGTH IN MANDYA DISTRICT-1991 AND 2001 CENSUS

9	Total Of Other Languages	1,486	0.17	8,038	0.83

The statements of Part A and Part B gives a clear picture of the languages spoken in the district. A closer study of the above statements reveals that as many as 17 languages are spoken in the district. Majority of the population in the district speak Kannada that constitute 85.76 per cent followed by 5.33 per cent of Tamil speaking population. Some 3.7 per cent of Telugu speakers and 3.69 per cent of Urdu speakers are in the district. With regard to languages not specified in the Eighth Schedule to the constitution, Tibetan is spoken by 0.4 per cent followed by Tulu by 0.03 per cent.

Linguistic classification of the languages

The names of the 114 Scheduled and Non-Scheduled languages falling in the five language families are given below with the Scheduled Languages denoted as (S).
