CENSUS OF INDIA 2001

SERIES-12 **KARNATAKA**

DISTRICT CENSUS HANDBOOK

Part - A & B

HASSAN DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

Directorate of Census Operations, Karnataka

F O R E W O R D

1. The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to taluk/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri.H.Shashidhar, Director of Census Operations, Karnataka. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division, Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and other who have contributed to make this publication possible.

D.K. Sikri

Motif

Hemavathy Reservoir in Hassan District

Hemavathy Reservoir has been built across Hemavathy river near Gorur village of Hassan taluk. Catchment area of the reservoir is 2,810 Sq.Km with a yield of 78.687 Thousand Million Cubic Feet (TMC). Gross storage capacity of the reservoir is 37.103 TMC. With the construction of this reservoir an area of 16,000 acres of cultivable area and 6,640 acres of karab and river portion area pertaining to 172 villages (of which 46 completely and 126 partially) have been affected. The ayacut of reservoir is 700,756 acres i.e. 1) Hemavathy Left Bank Canal - 195,000, 2) Tumkur Branch Canal - 237,000, 3) Nagamangala Branch Canal - 147,000, 4) Hemavathy Right Bank Canal 20,000, 5) Hemavathy Right Bank High Canal - 56,000 and 6) Lift Irrigation schemes (14 No.s) - 45,756 Acres.

Hemavathy reservoir is a masonry dam 15,394 Ft long and 146 Ft in height with central spill way of 128,000 cusecs capacity. Left Bank Canal runs a distance of 214 Kms, while the Right Bank Canal and Right Bank High Canal runs a distance of 91 and 106 Kms respectively. Two Branch Canal under Hemavathy Left Bank Canal namely Tumkur Branch Canal and Nagamangala Branch Canals runs a distance of 240 and 78.5 Kms respectively. Cost of the project is Rs. 3,710 Crores.

P R E F A C E

In the foreword to the 2001 series of the District Census Handbooks, Sri. D.K. Sikri, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain salient data on the population for every village and town as revealed by 2001 Census. They also contain a wealth of information regarding villages and towns which, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information is also of considerable importance in the context of planned development.

The District Census Handbook is divided into two parts: Part A contains information regarding each village and town (Village Directory and Town Directory collected from various sources) and Part B which contains the data on the population collected during 2001 Census - the Primary Census Abstract. The data published in Part B was collected during February-March 2001 in the Population Census.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in 1999. The Village Directory formats were mailed to the Deputy Commissioners of Districts for obtaining the village wise particulars through Village Accountants. Similarly the Town Directory formats were mailed to the Commissioners of Corporations, Chief Officers of Town Municipal Councils, Town Panchayats, etc. The village wise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1991 District Census Handbooks. The Household Schedules, which were canvassed to collect the population data during 2001 Census, were scanned and data captured was processed electronically. The Primary Census Abstract was generated centrally on the computers by Registrar General, India.

In compilation of the District Census Handbooks, the Census Directorate had the co-operation of various departments of the State/Central Government. The Census Directorate gratefully acknowledge their assistance.

I take this opportunity to offer my grateful thanks to Sri. H. Shashidhar, Director of Census Operations and Sri. S.R. Raghavendra Rao, Deputy Director (Retd.) for their valuable guidance. I am also thankful to all the officers and officials of this Directorate who have been actively involved in the compilation of this volume.

I am highly grateful to Sri. J.K.Banthia, I.A.S., Ex. Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Sri R.G. Mitra, Ex. Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General and Sri S.L.Jain Deputy Director of Social Studies Division and Dr. R.P. Singh, Ex. Deputy Registrar General (Map) for their guidance.

DISTRICT HIGHLIGHTS - 2001 CENSUS

1. As per 2001 census the rank of Hassan district is 13th in terms of population size.

2. Hassan district occupies 3rd rank in the state with regard to sex ratio as per 2001 census.

3. According to 2001 census the district stands in 13th place regarding population density.

4. Female literacy rate in the district has increased from 44.90 percent during 1991 to 59 percent in 2001 census.

5. World's tallest monolithic statue of Lord Bahubali is situated in Shravanabelagola in the district.

6. Mahamastakabhisheka, a spectacular ceremony will be held once in 12 years. Lakhs of Jain devotees congregate.

7. Famous Channakeshva temple, finest example of Hoysala architechture is situated in Belur taluk of the district..

8. Hoysaleshwara temple of the 12th centuary, a testimony of the rich cultural heritage of Karnataka is situated in Halebeedu of the district.

9. Hemavathy reservoir has been built across Hemavathi river near Gorur village in the district.

ANALYTICAL NOTE

(i) HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

Introduction

The District Census Handbook is, most valuable district level publication brought out by the Census Organization. It contains micro-level data down to the lowest administrative unit viz, revenue village in the case of rural areas and Division/Ward level in the case of urban areas. It is extremely useful to the planners, administrators, demographers, sociologists, etc., as it contains resourceful wealth of data regarding basic amenities available in each village and town of the district such as educational, medical, drinking water, post and telegraphs, transportation and communication, banks, societies, recreation clubs, power supply, export/import of important commodities and land use besides, the particulars revealed during the latest census enumeration. It is for the first time that the district census hand book series was included in the census publication programme at the 1951 census, in order to satisfy the growing demand by the administrators, the planners, research scholars, demographers and the other such census data users, for micro-level data. The idea of compiling the District Census Handbooks was pioneered by Sri R.A.Gopala Swamy, I.C.S. the then Registrar General, India and Ex-officio Census Commissioner of India, with a view to preserve the Census records prepared for areas below the district level. He proposed that all the district Census tables and Census abstracts prepared during the process of sorting and compilation, should be bound together in a single manuscript volume and named as the District Census Handbook and suggested that the State Government should take up printing and publication at their own cost. Then onwards, the District Census Handbooks were published in each Census with improved pattern with an aim to give the Census and Non-census data at micro level for each village of the taluk as a whole to suit the requirements of various departments.

The data in the District Census Handbook will help not only in local area planning but also in regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. The District Census Hand Book sought to replace "Part IV - Taluk Tables and Part V - Village Tables" of the earlier censuses and to present the basic demographic and economic data in the form of "Primary Census Abstract" in respect of each and every village and town within the jurisdiction of the district. The District Census Handbook consists of two parts, viz, Part A and Part B. Part A comprises village and Town Directory while Part-B contains Village and Town level Primary Census Abstracts. In addition, these volumes contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

District Census Handbook 1961

It was in 1961 Census that the scope of District Census Hand Book was shaped in the present form by presenting i) an account of descriptive note on the district, ii) a set of non-census data tables dealing with the administrative statistics of the district for a decade, iii) taluk and town level census tables on economic and socio-cultural aspects and iv) the village and urban Primary Census Abstracts depicting the nine fold industrial classification of workers. Information on the availability of certain basic amenities in villages and towns, such as the source of drinking water and educational institutions was also presented in the volumes. However, the district census handbooks of 3 out of then existing 19 districts viz, Bangalore, Dharwad and Mysore were confined to the publication of the village-wise and urban (census enumeration block-wise) Primary Census Abstract only.

District Census Handbook 1971

During the 1971 census, the District Census Handbook was further refined to present the data in a systematic way. In view of country-wide uniformity in approach and to have a comprehensive coverage, the District Census Hand Books were presented in three parts each, for a district. Part A incorporates the Town and Village Directories. Part-B incorporates the Primary Census Abstract and includes data, in the case of rural areas down to the village level and in the case of urban areas up to the block level. In addition, an introduction is included wherein the

changes in jurisdiction, if any, of the district or of the taluks and the changes in the number of villages between 1961 and 1971 were explained. Part-B was essentially demographic in nature and was the end product of the tabulation of the enumeration results. Part C incorporates other census tables and administrative statistics. For convenience, Part-A and Part-B of the District Census Hand Book was presented in one volume and Part-C in a separate volume. In part-C volume, the district and taluk maps were included. These maps were prepared on the basis of maps obtained from the competent authorities concerned.

District Census Handbook 1981

The District Census Hand Book series of 1981, had some new features along with the restructuring of the formats of village and town directories, keeping in view the comparability of 1971 data. All the amenities except power supply in the village were brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place/village where it is available were given. A few new items of information such as adult literacy centres, primary health sub-centres and community health centres/workers, data on the availability of Newspapers, Motor Vehicles, etc., in the village, were introduced in the village directory to meet the requirements of the "Revised Minimum Needs Programmes". A new column "total population and number of households" was introduced to examine the correlation of the amenities with the population and number of households they serve. The contents of Part-A were further enlarged by including two appendices, namely a list of villages not having any amenities and a distribution of villages according to the proportion of Scheduled Castes and Schedules Tribes in the total population of the village. The format of Town Directory were also modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items such as class of town and its population, population of SC & ST, decadal growth rate of population, working women's hostel, adult literacy classes / centres, storage system regarding drinking water supply etc., and also the information about the nearest place and distance having educational, medical and fire-fighting facilities, in case such a facility is not available in the referent town. A new statement on civic and other amenities in slums in Class I and Class II towns were included to help the planners to chalk out their programmes of slum improvements.

District Census Handbook 1991

The presentation of the District Census Hand Book for the 1991 Census was more or less similar to the manner followed in 1981. The format of Primary Census Abstract was restructured slightly. Nine-fold industrial classification of main workers were given as against four-fold classification. The sex-wise population in the age-group of 0-6 was included in the Primary Census Abstract for the first time to enable data users to compute more realistic literacy rates as all the children below 7 years of age were treated as illiterate at the 1991 census. One of the important innovations in the 1991 census was the Community Development Block-level presentation of data in the village directory and Primary Census Abstract instead of the traditional tahsil/taluk/PS level presentation. C.D.Block is the lowest administrative unit for developmental planning. The choice of the C.D. Block as the unit for data presentation was formulated to help the planners in micro-level developmental plans. Another important improvement at the 1991 Census was dissemination of data through magnetic tapes/floppies in which both the computer as well as manual codes for each revenue village were provided along with the corresponding codes of 1981 Census. In the volumes of the District Census Hand Books, the computer codes assigned to the revenue villages in the 1991 Census and the corresponding codes of 1981 Census were presented so that it may facilitate the data users to use the data either from magnetic tapes or computer floppies.

Scope of the 2001 District Census Hand Book

Like in the previous censuses, the District Census Hand Book (DCH) for the 2001 Census brought out in two parts as usual viz., Part-A The Village and Town Directory, and Part-B the Village and Town Primary Census Abstract.

The District Census Hand Books for the 2001 census is essentially presented in the similar manner in which the District Census Hand Books of 1991 census were presented. This is because the data can

be comparable with the earlier censuses and also to study the changes taken place during the decades and hence the approach in 2001 census is similar to 1991 census. The contents have been slightly enlarged and the formats too are restructured to suit the requirements of the data users. In the village directory for 2001 census certain new amenities like, news papers, magazine received, Income-Expenditure of the local bodies, information on number of banks, credit societies, recreational and cultural facilities, most important commodities imported, manufactured and exported have been included whereas the information regarding the "Day or Days of market/hat if any" which was there in 1991 has been excluded. Apart from providing the information about the nearest place and distance in broad ranges for villages not having basic educational and medical facilities, information about the nearest place and distance in broad ranges for villages not having Middle School, College, Hospital (Allopathic), Maternity and Child Welfare Center and Primary Health Center are also been provided this time. However, in the town directory there are no changes except in the statement IV-A where this statement is separately numbered as Statement VII in 2001. Except these, the scope of 2001 series of the District Census Hand Book has, by and large remained the same as in 1991. The non-census information collected at the village level and town level was scrutinized and verified. In case of glaring discrepancies the data were cross-checked with respective parent departments for validation.

One of the significant changes made in 2001 series of District Census Hand Book is that Primary Census Abstracts are available to the jurisdiction of the Panchayats in the district. With the constitution (73rd Amendment) Act, 1992, it has become necessary for the census organisation to provide population data for the territorial area of a panchayat in order to strengthen panchayat raj system in the country. In view of this, panchayat-wise population figures for total population and for Scheduled Castes and Scheduled Tribes population has been compiled and presented in the form of Annexure-I for each district.

Further another important step taken during the 2001 census, is assigning the Permanent Location Code Numbers (PLCN) to the villages. Location code numbers is a simple but unique device by which every area in an administrative unit in the State/U.T. can be identified. Thus assigning of Location Code Numbers at various administrative levels, right from State/U.T. to the lowest level namely enumeration block, in census taking is an important step. Each clearly demarcated area can be referred to by a combination of numbers. In a State or U.T. the next administrative area is District, followed by taluk or police station, circle, Development Block or Mandal, etc., Next below this administrative area, in urban areas are cities/towns, further divided into wards/ divisions and villages in rural areas. The Location Code Numbers to various administrative areas are assigned in orderly manner always beginning from northwest point and the numbering proceeds in a serpentine manner, keeping the geographical continuity, ultimately ending at the South-East point.

There was a great demand from different organizations to study the village level data over a time span and hence a scheme of assigning permanent location code numbers to the villages and the higher level of administrative areas is devised to ensure data comparability over a period of time. In Indian Census, Location Code Numbers are allotted to each village based on traverse system (zigzag) in a serpentine manner at taluk level. These numbers for villages run from '1' to 'N' in each taluk independently. This system was adopted until 1991 census. But, for the Census of India 2001, all the villages in a state/U.T. are assigned with a Location Code Number in one continuous series beginning from "1" to "N" for the entire state/U.T. and it is not confined to a taluk. The field length of the complete PLCN structure for a village has been kept up to 8 digits and therefore the location code number of village in a taluk contains 8 digits number for 2001 Census.

(ii) BRIEF HISTORY OF THE DISTRICT

Hassan district is named after its headquarter town. According to the popular belief the town takes its name from Hasanamba, the presiding deity of the place. As per another version, the name of the town itself is said to be a contraction or derivative of Simhasanapura associated with Janamejaya, the grandson of Arjuna. The discovery of Palaeolithic artifacts found at Kibbanahalli and Kardigudda in the district reveal that this region was inhabited by human beings in those early times. Besides this, many

megalithic sites have also been discovered in the district. The district, with its hoary past can boast of places like Shravanbelagola which has acquired world fame. Legends reveal that Sukracharya the preceptor of the Rakshasas performed penance at Ramanathapura on the banks of Cauvery to realise the Mritasanjivini mantra. Vahni the fire-god performed penance to propitiate Svayambhu Shiva at Ramanathapura and Rama worshipped the Shivalinga at this place to absolve himself of the 'Brahmahatya Dosha' on his way back to Ayodhya.

References to the earlier history of the District links it to the great Mauryan period. According to Jaina tradition and a 7th century inscription found on Chandragiri at Shravanabelagola, in 298 BC, Bhadrabahu, the last of the Shrutakevalis foretold the occurance of a dreadful famine which would last for 12 years in northern India. Thousands of his followers including Emperor Chandragupta Maurya left the northern regions and migrated to the South under his guidance. When the group reached Shravanabelagola, Bhadrabahu chose to stay back at this place itself with his disciple Chandragupta Maurya and sent a group of disciples and followers further south to the Chola and Pandya countries under the leadership of Vishakhacharya. Bhadrabahu attained salvation in this place in 297 BC. Chandragupta served his group for 12 years which he spent in ascetic rites. In view of this association of Jaina saints Shravanabelagola became a centre of pilgrimage for the Jains. Later, in about 983 AD Chavundaraya, a Minister of Ganga King Rachamalla got a monolithic colossal of Bahubali (Gomatheshwara) erected at this place. Thereafter the place assumed a prominent Jain centre. Mahamastakabhisheka, an event which is held once in 12 years attracts large number of pilgrims from all corners of the country.

The Kadambas of Banavasi dominated this region for several centuries. Halmidi in Belur Taluk of the District has yielded an important inscription relating to the reign of Kakusthavarma. This is the oldest lithic record found in the district and the earliest among the hitherto known Kannada inscriptions. Two copper plate inscriptions in Sanskrit relating to the reign of his son Krishnavarman I have also been discovered in this district. The Kadambas seem to have ruled over these tracts during the 10th-11th centuries even after their decline at Banavasi. The Gangas too held sway over certain parts of this District. The Kongalvas ruled a kingdom situated mainly in the present Arkalgud Taluk. Their territory was called Kongalnad 8000 and this principality came into existence after the Cholas conquered the Western Gangas of Talakad in 1004 AD. Subsequently the Changalvas sovereigned the Kongalvas and were in turn defeated by the Hoysalas.

The Hoysalas, who became powerful feudatories under the Chalukyas and later moved on to get paramount power made Hassan district core of their kingdom. After expelling Cholas in about 1116 AD they remained in power till 1327 AD. The district is a treasure house of Hoysala art and architecture and abounds in inscriptions. Vinayaditya (1045-1098 AD) moved his capital from Sasanur to Belur at first and then to Devasamudra (i.e. Halebid) in about 1062 AD for strategic reasons. Bittideva (1109-1152 AD) better known as Vishnuvardhana proved to be a great king of this dynasty. Originally a Jain, he embraced Vaishnava faith under the influence of Ramanuja the founder of the Vishista Advaita Philosophy and assumed the name of Vishnuvardhana. His conquests over the Cholas, the Kongalvas, the Changalvas, the Tuluva, the Pandyas of Uchchangi, the Kadambas of Hangal and several other territories rendered him an independent ruler. Like Vishnuvardhana, the Chief Queen Shantala is also well known to historians, especially for her unparalled accomplishments in fine arts. It was during this period that building of temples and Bastis gained a tremendous momentum. The Channakeshava and the Kappechannigaraya temple in Belur, Parswanatha Basti at Halebid and Siddeshwara temple at Marale are some of the outstanding monuments assigned to his reign. He was the first Hoysala ruler to issue a coinage of his own. The prestige of the Hoysala kingdom reached the zenith during the period of Ballala II (1173-1220 AD) who defeated the Pandya of Uchchangi. By 1189 AD he occupied a considerable portion of the Chalukya territory. In a memorable battle fought in 1190 AD near Soratur, Ballala defeated the Sevunas (i.e. the Yadavas of Devgiri), entrenched himself at Belvola and extended his sway upto Malaprabha river. The famous Kedareshwara temple of Halebid belongs to this period. Narasimha II was a worthy successor of

Ballala II and is known to have set up a victory pillar at Rameshwaram after defeating the combined armies of the Pandya and his feudatories. During the reign of Someshwara (1235-1253 AD), the Hoysala kingdom was divided into two parts - the one consisting mainly of the northern parts with Dwarasamudra (Halebid) as its capital and assigned to his elder son Narasimha III and other part containing mainly the southern portion with its capital at Kannanur and assigned to his younger son Ramanatha. Both of them assumed royal titles. Ramanatha repeatedly encroached upon the territory of his elder brother and this prolonged wrangle weakened both of them. Inspite of this, Narasimha II scored a victory over Sevuna king Ramachandra in a battle that raised at Belavadi near Dwarasamudra in 1276 AD. Several fine temples including the one at Somanathapura of Mysore district were built during his period. After the death of these two brothers Narasimha and Ramanatha in the years 1291 and 1295, the southern part also came to be reunited with the ancestral kingdom and Ballala III (1291-1342 AD) became the sole heir to Hoysala kingdom.

The first Muslim invasion of the Hoysala territory took place in 1311 AD when Malik Kafur, the General of Ala-ud-Din Khilji aided by Parashuram, the General of the vanquished Sevunas sacked Dwarasamudra. Ballala III had to buy peace and surrender enormous wealth to the aggressor. He rebuilt the capital in 1313 AD, secured the release of his son who had been carried over to Delhi as a hostage. In 1327 AD Muhammad Bin Tughlak invaded the Hoysala kingdom and this time the rebuilt Dwarasamudra was completely destroyed by the invading army. The defeated Ballala shifted his residence to Tonnur and then to Thiruvannamalai which became his southern headquarters. Ballala III was killed in the war at Madura. Ballala III was known for his long and eventful career and for his handling of affairs of South India with statesmanship and wisdom. By appointing Hariyappa Odeya as the Provincial Governor with headquarters at Hampi he laid the foundation of the Vijayanagara empire.

The transition from Hoysala rule to the Vijayanagara rule was smooth. By 1346 AD Harihara I (1336-1356 AD) had brought under his control the whole country between the eastern and the western oceans. Dwarasamudra continued to be an important seat of administration and the Prince Bukka I was the Governor of Dwarasamudra region till he ascended the throne in 1356 AD. Later his son Tippana Odeya was incharge of the province of Dwarasamudra.

The Vijayanagara kings showed keen interest in the development of Manjarabad then known as the province of Balam. Every encouragement was given to settlers of all castes in this region by granting them lands at little or no rent. The settlers were given property rights and the Patels were granted hereditary feudal powers. The western portion of the present Hassan District with adjoining tracts above and below the ghats were granted to Vina Ramappa, a court mucisian, by the Vijayanagara king. Later in 1397 this province of Balam was given to Hiriya Singappa Nayaka - one of the Vijayanagara generals and son of Palegar Manchayya Nayaka. The Balam Palegars had the capital at Aigur. After Hiriya Singappa Nayaka upto the 16th century nothing is known about the chiefs of this principality. Era Krishnappa Nayaka (1524-1566 AD) is represented in several inscriptions as head of the family of Balam chiefs, probably a new line of chiefs began with him. Krishnappa Nayaka was previously the bearer of the king's betalbag. His successors administered these territories for 250 years till 1799 AD when Venkatadri Nayaka, the last chief of the line rebelled against the British and was captured and hanged in 1802 AD.

Shivappa Nayaka of Ikkeri captured Hassan, Belur and the neighbouring areas in 1657 and established his supremacy. In 1659 Shivappa Nayaka established Srirangaraya, the fugitive emperor of Vijayanagara at Belur. He marched with a force from Belur and laid siege to Srirangapatna to restore the suzerenity of Vijayanagara. But he did not succeed in his objective. In 1662 AD Shivalinga Nayaka, the son-in-law of Shivappa Nayaka went to Belur after re-enforcement and laid siege to Holenarasipur which was then in the possession of Odeyars of Mysore. However Shivalinga Nayaka died in the battlefield. By 1693 AD part of the principality was conquered by Chikkadevaraja Wodeyar and Yelusavira Seeme which was under the Balam Chief was conquered by Doddaveerappa Wodeyar of Kodagu. A peace accord was reached in 1694 between the Wodeyars of Mysore and Rani Channammaji of Ikkeri according to which

the Balam Chief was allowed to retain only six nads and the rest of the territory of the principality was divided between Ikkeri and Mysore. Belur continued to be a place of importance under Balam Chiefs. According to an inscription Venkatadri Nayaka (1708-1751) arranged to build the tower of Keshava temple at Belur in 1736. Krishnappa Nayaka (1755-1794) joined Parashuram Bhau when the latter marched to cooperate with Lord Cornwallis against Shrirangapattana in 1792. On conclusion of peace, Krishnappa Nayaka fled to Kodagu but was brought back by Tippu Sultan and put in charge of a part of his principality to the south of Balam. The rest of the territory became a part of Mysore. When Shrirangapattana fell to the British in 1799, Venkatadri Nayaka was in possession of Aigur Seeme. He strengthened his fort at Arakere and resisted the British. He along with his followers were captured near Uggihalli and he was hanged in 1802 to set an example to others who rebelled against the British. After the fall of Tippu Sultan the Balam area was taken over and made a part of Mysore State.

Separate lines of local chiefs having their seat of power at Holenarsipur, Javagal, Maharajana Durga and Nuggehalli were known after these places. The Holenarsipur fort was built in 1168 by Narasimha Nayaka. After the decline of Hoysala power, Channarayapatna too came under the control of Holenarsipur chiefs. Chamaraja Wodeyar V annexed Channarayapattana to Mysore by 1633 and Holenarsipur itself was taken by Dalavai Nanjarajaiya in 1644. The rule of this family came to end after 1667 when it was captured by Devaraja Wodeyar (1659-1673) of Mysore. The chiefs of Javagal claimed to be of the lunar race and the descendants of Channa. The line of the Maharajana Durga Chiefs goes back to 1371 AD and according to a tradition this line came to an end after the chief named Veera Raja threw himself over a precipice from his fort at Maharajana Durga (from a galloping horse into a ravine) being overcome by remorse. The Nuggehalli chiefs belonged to Pudu Vamsha and their genealogy goes back to Tirumalaraja, a son-in-law of Praudha Devaraya of Vijayanagara. Inscriptions of the chiefs of this line have been found at Hassan, Arakalgud and Channarayapatna.

During the 19th century, Hassan district formed part of the Patnada Rayada or Manjarabad Faujdari. From 1832, it was included in the Ashtagram division, which however was abolished in 1881. The Krishnarajpet and Nagamangala taluks of the present Mandya district were part of Hassan district upto 1882. Similarly, Banavar and Haranahalli were headquarters of the taluks of the same name and Banavar stood included in Kadur district prior to 1882. Territorial changes brought about in 1882 resulted in abolition of Banavar and Haranahalli taluks and inclusion of the same in Arsikere taluk; abolition of Arkalgud taluk and reduction of Hassan district into a sub division under Kadur district. In 1886, Arsikere taluk was revived and Hassan district was re-established with seven taluks namely Hassan, Manjarabad, Belur, Arsikere, Holenarsipur and Arkalgud besides the sub taluk of Grama. In 1894 Grama sub taluk was abolished and in its place Alur was created which continued as headquarters of Maharajanadurga taluk till 1875. In 1941, Alur was constituted into a full-fledged taluk and since then the district is having eight taluks. These taluks are grouped into two revenue sub divisions with headquarters at Hassan and Sakleshpur respectively. While the taluks of Manjarabad, Alur, Arkalgud and Belur come under the jurisdiction of Sakleshpur sub-division, the other four viz., Hassan, Arsikere, Holenarasipur and Channarayapatna are included in the Hassan sub-division.

(iii) Administrative Setup And Jurisdictional Changes during the decade - 1991-2001

During 1991 Census, geographical and political map of Karnataka depicted the territories of 20 districts. As a sequel to Government of Karnataka Notification No.RD 42 LRD 97 Part-III, Bangalore dated 2nd August, 1997 published in Extraordinary Gazette No.894, dated 2.8.1997, seven new districts took birth showing territorial changes on the political map of Karnataka thus raising the numberfrom 20 to 27 during 2001 Census. The State is divided into four revenue divisions and 27 districts for the purpose of revenue administration. Hassan district is one of the eight districts of Mysore Revenue division which is located in the south-western part of Karnataka. There are two revenue sub-divisions in the district viz., Hassan Sub Division and Sakleshpur Sub Division. Arsikere, Hassan, Channarayapatna,

Holenarsipur taluks comes under the Hassan Sub Division and Sakleshpur Sub Division comprises the taluks of Alur, Arkalgud, Belur and Sakleshpur. There are eight taluks, nine towns and 2559 villages in the district. Hassan is the district headquarters and seat of administration. The Deputy Commissioner who is also the District Magistrate is the custodian of the district administration. The superintendent of Police is responsible for the law and order in the district. The Chief Executive Officer of Zilla Panchayat and a team of his officers look after the developmental regulatory function of the district.

Total number of Towns/Villages

According to 2001 Census, there are 9 towns and 2559 villages in the district as compared to the position in 1991 Census wherein there were 13 towns and 2552 villages.

STATEMENT SHOWING THE NUMBER OF VILLAGES / TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS IF ANY AND REASONS THEREOF

Sl. No	Name of Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalized for		Reasons for variation
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
1	Sakleshpur	227	227	1	1	-
2	Belur	383	383	1	1	-
3	Arsikere	369	368	1	3	In 1991 Banavara Mandal Panchayat was treated as an urban unit and was derecognised as Gram Panchayat and also it failed to fulfill the demographic criteria of a place to be treated as urban. Further Arsikere Town limits were extended by including the portions of Arsikere non municipal census town vide notification No HUD 319 MLR 95 dated 6.10.95. The contiguous developed area (part) of Arasikere non municipal census town, but falling outside town limits, has been classified as outgrowth of Arasikere town and the rest of villages in the taluk increased from 248 in 1991 census to 249 in 2001 census. of area as Arsikere Rural. With the inclusion of Banavara and Arsikere Rural into the 2001 list of villages, the total number of villages in the taluk has increased from 368 in 1991 to 370 in 2001 census and lost 2 urban units of 1991 census.
4	Hassan	391	385	2	2	Gondikaval village was fully submerged under the backwaters of Hemavathi Reservoir. Hence deleted from 2001 census village list. Entire geographical area of two villages viz., Channapatna and Bommanayakanahalli and one outgrowth Beeranahalli along with the portions of 15 villages including eight outgrowths of Hassan Urban Agglomeration, were included in the extended boundary limits of Hassan City Municipality vide GOK Notification No. The portions of the eight outgrowths falling outside the said statutory towns were treated as rural and included in the 2001 Census village list. Sathyamangala 1991 outgrowth of Hassan UA now classified as Census Town, for having satisfied the urban criteria, Gorur a Non Municipal Census Town in 1991 was declassified for not fulfilling the urban criteria and hence included in the village list of 2001 census. As a result, the total

STATEMENT SHOWING THE NUMBER OF VILLAGES / TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS IF ANY AND REASONS THEREOF

Sl. No	Name of Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalized for		Reasons for variation
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
						number of villages in the taluk has gone up from 385 in 1991 census to 391 in 2001 census.
5	Alur	259	257	1	1	In 1991 census 2 (two) revenue villages viz. (1) Katte Hosur (2) Lakkondanahalli were wrongly reported as fully submerged. It is ascertained in 2001 census that these two villages are partly submerged and are also populated and hence included in the village list of 2001 census.
6	Arkalgud	296	296	1	2	No change in the number of villages in 2001 census compared to 1991 census. The number of towns is reduced by 1 (one), due to the declassification of Konanur M.P. of 1991 census and the corresponding area merged with that of the original area of the revenue village of Konanur (R).
7	Hole Narsipur	249	248	1	1	There is an increase of 1 (one) village in the list of 2001 census, due to the wrong inclusion of the entire revenue village of Holenarsipur in the limits of Holenarsipur town in 1991 census. It is ascertained that a part of this revenue village is still outside the limits of this town. Hence, Holenarsipur (R) village has come into existence.
8	Channarayapatna	385	388	1	2	The number of villages in 2001 census is reduced by three as the revenue villages Gooranahalli, Mavinahalli and Nagasamudra of 1991 census is fully merged in the Municipal limits of Channaraya patna T.M.C.Number of towns reduced to one in 2001 census due to the declassification of Shravanabelagola M.P. of 1991 census into revenue village and the corresponding area is included in the already existing revenue village Shravanabelagola (R).

Urban local bodies

The statutory urban local bodies are the Municipal Corporations and Municipal Councils. These urban local bodies elect Councilors/Corporators from each ward and the tenure of the Councilors/Corporators would be for five years. The President or Vice-President of the Municipal Council and the Mayor/ Deputy Mayor of the Corporations whose tenure will be for a period one year are elected from among the elected Councilors/Corporators. The Chairman of various committees are also elected from among the elected Councilors for a term of one year.

The Chief Officer in Municipal Council and the Commissioner in a City Corporation are responsible for day-to-day administration and the executive authority is vested with them.

Zilla Panchayat and Taluk Panchayat

To promote the development of institution and secure greater measure of participation by the people

in the local and governmental affairs by decentralization of power and functions for the purpose of development, planning and implementation of various programmes the Zilla Panchayats have been constituted in the State. The jurisdiction of Zilla Panchayat is coterminous with that of the corresponding district but excludes the statutory towns. Accordingly, Zilla Panchayat has been constituted for Hassan district and its jurisdiction extends over the Taluk Panchayats of the district. The jurisdiction of each Taluk Panchayat is coterminous with that of the taluk of the same name but excludes the area incorporated in the statutory towns or cities, if any.

The Zilla Panchayat elects its president and vice-president and chairman of its committees from amongst the elected members. The term of these elected representatives will be for five years. An IAS officer is posted by the State Government as Chief Executive Officer of the Zilla Panchayat. Various departments assist the Panchayat.

Grama Panchayats

The Government of Karnataka enacted the Karnataka Panchayat Raj Act 1993 on 30.4.1993 replacing its previous enactment in this regard for the formation of Grama Panchayat.

STATEMENT SHOWING NUMBER OF GRAMA PANCHAYATS AND HOBLIES/FIRKAS

Sl. No.	Name of Taluk	No. of Hoblis/Firkas	No. of Grama Panchayats
1	2	3	4
1	Sakleshpur	5	26
2	Belur	5	37

5	Alur	4	15
6	Arkalgud	5	29
7	Hole Narsipur	3	26
8	Channarayapatna	6	40
	Total	**38**	**258**

Note: Details regarding Panchayatwise number of villages are furnished in Annexure I.

The Grama Panchayat is authorized to function on the items listed in Schedule I of the Act namely, preparation of annual plans for the development of Panchayat area, preparation of annual budget, providing reliefs in natural calamities, removal of encroachments on public properties, organising voluntary labour and contribution for community works, maintenance of essential statistics of the village, in addition to matters relating to Agriculture, Animal Husbandry, Fisheries, Social & Farm Forestry, Khadi, Village & Cottage Industries, Rural Housing, Drinking Water, Roads, etc., Rural Electrification, Non-conventional energy sources, Poverty Alleviation Programmes, Markets & Fairs, Rural Sanitation, Public Health & Family Welfare, Women and Child Development, Social Welfare, Welfare of Weaker Sections, Public Distribution System, Maintenance of Community assets, Construction and Maintenance of Dharmashalas, Chatras, Cattle Sheds, Ponds, Cart Stands, Slaughter Houses, Public Parks, Play Grounds, etc. Regulation of manure pits in public places and establishment and control of shandies. Such other functions as may be entrusted.

The Grama Panchayat is also empowered to make provisions for carrying out within its area any other work or measure which is likely to promote the health, safety, education, comfort, convenience or social or economic well being of the inhabitants of the Panchayat area.

(iv) PHYSICAL FEATURES.

Hassan district is located in the south-western part of Karnataka. It is bound on the north by Chikmagalur district, on the east by Tumkur and Mandya district, on the south by Mysore and Kodagu district and on the west by Dakshina Kannada district. The district has a length of 111 kms from north to south and east to west its breadth is 115 kms. The most conspicuous areas of very low and very high area of this district is located at 600 and 1200 metres of contour line above the MSL respectively.

(1) Location and size

The district is situated between 12 degree 31 minutes and 13 degree 33 minutes north latitude and 75 degree 33 minutes and 76 degree 38 minutes east longitude.

(2) Physiography

The district lies partly in the malnad tract and partly in the southern maidan (plain) tract. Topographically the district may be divided into three regions, namely (1) Southern malnad, (2) Semi-malnad and the (3) Southern maidan. The western and north-eastern portion of Belur taluk, western and central parts of Alur taluk and the entire tract of Sakleshpur (Manjarabad) taluk constitute the malnad. The semi-malnad zone consist of the central parts of Arkalgud taluk. The western portion of Hassan taluk, the eastern portion of Alur taluk, the central and eastern portion of Belur taluk etc.

The southern malnad is a forest-clad hilly region with a heavy rainfall. On the western periphery are the picturesque ghats extending from the pass at Bisle Ghat to the Jenkalbetta. The features of the semi-malnad region fringing the malnad area on the east are more or less similar to those of the maidan. The southern maidan is much larger in extent than the other two region. The Southern maidan is bounded by 650 meters contour and is characterised by a higher degree of slope. So far as Hassan district is concerned it represents an area of undulating plain where the general elevation varies between 780 meters and 930 meters.

The important hills forming the western borders extends from the pass at the Bisle ghat to Jenkal betta and includes peaks like Pushpagiri or Subramaniya (1715 meters) Devara betta (1282 meters) Murkangudda (1300 meters) and Jenkal Betta (1389 meters). Some low hills also pass through Hole Narsipur taluk towards Hassan and Channarayapatna. The Indra Betta (Indragiri) in the south eastern part of Channarayapatna taluk is 3347 feet or 1020 meters high and is noted for the 57 feet Colossal statue of Gommateshwara on its summit. The general level of the district slopes with the course of the Hemavathi except in the ghat ranges.

(3) Drainage

The area of the district mainly consist of the Hemavathi river basin. The important rivers which flow through the district are the Cauvery, the Hemavathi and the Yagachi. It will be of interest to note that, while Yagachi is a tributary of Hemavathi, Hemavathi itself is a tributary of the Cauvery. Cauvery river enters and leaves the Hassan district respectively near Kadavina hosahalli and Keralapura both in Arkalgud taluk and in the process traverses a total distance of only 25 kms. Within the span of 25 kms. itself the waters of the Cauvery have been harnessed for irrigation purpose. There are several rivulets and streams of which Vatehole, Kemphole, Kabbinalehole and Girihalla deserve mention. Hemavathi means Golden river. Hemavathi, also called as "Yenne Hole" rises at Javali just beyond the boundaries of Hassan district. The river enters Hassan district near Achanahalli village of Sakleshpur (Manjarabad) taluk. The waters of this river are made use of for irrigation

in the district by constructing an anicut called Sriramadevara Katte about five miles north-west of Hole Narsipura. The river flows for a total length of 113 meters within Hassan district. As in the case of every important river or holy place in India, there are legends relating to the origin of this river as well. The Hemavathy river is fabled to be Dakshayani, the daughter of Daksha and wife of Ishwara. Hemavathi irrigation project which is at Gorur has turned out to be a boon to the people of this neighborhood.

(4) Climate

The climate of the district can be categorised as agreeable and pleasant. The year may be divided into four seasons according to the climatic conditions. Summer season starts from the month of March to the end of May and it is marked by rising day temperature. Generally, April happens to be the hottest month with a daily mean temperature of 33.5 degree celcius. The south-west monsoon sets in during June and last till the end of September with the onset of rain. The period from October to the end of November constitute the retreating monsoon season. The winter season begins in December, generally from mid-December to mid-January happens to be the coldest period of the year. This period is dry and is marked by clear and bright weather. Relative humidities are generally high from June to October and very low during February and March.

(5) Winds

Winds are in general light with some increase in force during the late Summer and early Monsoon season from April to September. Winds blow mostly from direction between south-west and north-west. During October they are variable in direction. During the post monsoon and winter season the wind blow mostly from direction between north-east and south-east. In March the winds are variable in direction.

(6) Rainfall pattern

The period from October to the end of November constitute the retreating monsoon season and an occasssional spell of rain is quite common. July is the month of with the heaviest amount of rainfall about 60% of rainfall occurs during the rainy season from June to September.

The District falls under southern transition, southern dry, hilly and central dry agroclimatic zones of the state. The taluks of Arakalgodu, Alur, Belur and Holenarasipura falls under southern transition zone. The taluks of Hassan and Channarayapatna falls under southern dry zone. Sakleshpur taluk falls under hilly zone and Arsikere taluk falls under central dry zone.

The average Rainfall in the district ranges from 687 mm in Arsikere taluk to 2,250 mm in Sakleshpur taluk. The rainfall decreases from south western part of the district towards north. The northern part of Arsikere and eastern part of Channarayapatna taluk receives the lowest rainfall.

Among the taluks in the district the premonsoon rainfall contributes 9 to 26% of the annual rainfall, southwest monsoon contributes 41 to 79% and northeast monsoon contributes 12 to 33% of the annual rainfall.

The coefficient of variation ranges from 37 to 88% for the premonsoon season, the highest variability (88 %) being in the taluk of Arkalgud.

The coefficient of variation for southwest monsoon ranges from 25 to 44%, the highest being in H.N.Pura taluk. The coefficient of variation for northeast monsoon ranges from 45 to 55%, the highest being for Belur taluk.

The coefficient of variation for Annual rainfall ranges from 22 to 30%.

TALUK WISE RAINFALL PATTERN, HASSAN DISTRICT

Taluks (No. of years of rainfall data available)	Statistical Parameters	Pre Monsoon	South-West Monsoon	North-East Monsoon	Annual Rainfall
1	2	3	4	5	6
Alur (99)	Average rainfall (mm)	198	574	234	1,007

A study of the rainfall deficit pattern during the last 20 years compared with the long term data for different seasons indicate increase in rainfall deficiency in the recent past during the premonsoon and northeast monsoon period.

Rainfall deficit during last 20 years has been compared with that of long term data in different seasons and is presented in the following table.

TALUKWISE AND SEASONWISE COMPARISION OF RAINFALL DEFICIT DURING LAST 20 YEARS WITH 99 YEARS DATA, HASSAN DISTRICT

Taluks	Pre Monsoon		South-West Monsoon		North-East Monsoon		Annual Rainfall	
	Long term	Recent 20 Yrs.	Long term.	Recent 20 Yrs.	Long term	Recent 20 Yrs	Long term	Recent 20 Yrs.
1	2	3	4	5	6	7	8	9
Alur (99)	33(33)	5(25)	27(27)	4(20)	43(43)	9(45)	24(24)	5(25)
Arkalgud (99)	41(41)	12(60)	41(41)	8(40)	43(43)	11(55)	29(29)	10(50)
Arasikere 98	35(35)	8(40)	26(26)	1(5)	40(40)	9(45)	23(23)	5(25)
Belur (99)	35(35)	10(50)	27(27)	8(40)	42(42)	9(45)	22(22)	8(40)
Channarayapatna (98)	42(42)	11(55)	29(29)	2(10)	43(43)	10(50)	26(26)	4(20)
Hassan (99)	40(40)	9(45)	32(32)	5(25)	40(40)	8(40)	24(24)	4(20)
Hole Narsipura (97)	31(31)	5(25)	29(29)	2(10)	33(33)	7(35)	17(17)	2(10)
Sakaleshpur (99)	36(36)	9(45)	22(22)	6(30)	39(39)	11(55)	19(19)	8(40)

Note: Figures in bracket indicate values as percentage of number of years for which data is available or for 20 years depending on the column in which it is given.

- The Premonsoon rainfall in the recent 20 years is more deficit compared to the long term data.
- South-west monsoon is less deficit in the recent 20 years compared to the long term data with Sakaleshpur and Belur taluks as an exception.
- The rainfall deficit during north-east monsoon is increasing during recent 20 years compared to the long term data.

The annual rainfall trend analysis indicates increasing trend in the taluks of Hassan, Channarayapatna and Hole Narsipur. The rest of the taluks viz. Alur, Arkalgud, Arsikere, Belur and Sakaleshpur indicates decreasing trend.

(7) Forestry

Forest have an important place in the economy of the district. The western portion which form part of the lofty western ghats is clothed with magnificent virgin forest. The major portion of the forest wealth is located in the confines of Sakleshpur (Manjarabad) taluk. These forests exert a favourable influence on the rainfall and on the moisture content in the atmosphere. The Kabbinale State Forest in the taluk ranks among the biggest forest plantations in the State. There are four types of forest namely : ever green, moist deciduous, dry deciduous and scrub. About 22 types of valuable trees and about 45 different notable timber species have been identified in these forests. Exploitation of forest wealth has always been a regular feature of the economy of the district. Out of 662,602 hectares of total geographical area, only 54,039 hectares is covered by forest.

Forest department has since a couple of decades taken up long range developmental schemes such as soil conservation, raising economic plantation. Timber, sandal wood and fire wood including charcoal are the main items of forest produce both in terms of quantity produced and the money value.

The chief sources of forest revenue in the district are the sandal wood and some other soft and hard wood exploited for commercial purposes. Besides, there are also minor forest product like, thangadi and kakke barks, tupra leaves, myrobalans, gum, honey, wax, tamarind, honge seed and bamboo from the evergreen forests, which add to the forest revenue of the district.

(8) Geology

Geologically the rock formation of the district belong to a most ancient period of earth's history and mainly consist of older series of schists cut up and intruded by granite gneisses. Bold outcrops of coarse granite of a latter age are however found in the neighbourhood of Banavara and Arsikere. Holenarsipur taluk has the unique distinction of having different types of rock formation and economic minerals. The schistose rock which appears in well defined bands are rich in quartize and other minerals. A narrow belt extending from about Arsikere upto Nuggehalli contains rich deposit of chromite granites which provide an excellent building material in the form of size stones.

(9) Flora and Fauna

The differences in the topographical features and rainfall have enriched the flora and fauna of the district. There is a rapid transition from scrub jungle to the monsoon forests as one moves from east to west. The intermediary stages of the dry deciduous and the semi-evergreen forms a continuous pattern as the rainfall increases and the plateau breaks up into the lofty peak and the deep valleys of the western ghats. More than 1500 species of vascular plants are found in the district.

Flora: The maidan is dotted with numerous irrigation tanks often supporting an interesting aquatic flora. Rolling Green hills with narrow Paddies in their shallow valleys are typical of the areas around Arehalli, Sakleshpur and Hethnur. In the larger valleys opening on to the plains, the flora of the district attains its real splendor. The herbaceous monsoon flora of these forests is rich and interesting. Besides liverworts, lichens, mosses and ferns, innumerable flowering plants thrive during the wet season.

Fauna: Major group of Indian Mammals i.e., cats, civets, mongooses, dogs, bears, otter rodents, deers, antilopes etc, are well represented in the district. Of these most important ones are the tigers and leopard, the former being comparatively rare. Besides this the wolf, the jackal, the Indian fox, the wild dog are found in the district. Bears, especially the sloth bears are also found. Indian bison is the only representative of the oxen found in the district. Out of the four poisonous group of Indian snake viz the cobras, vipers, kraits and sea-snakes, only the first two are found in the district. In addition to the above mentioned group of birds, parrots, cuckoos, king fisher, rollers, bee sectors, horn bills, bar bets and wood peckers also adorn the forested tracts of the district. Similarly, the fauna of the district is rich and varied as it contains more than fifty species of mammals, about 250 species of bird and about 35 species of snakes.

(10) Soils

The soils of the district display a wide diversity and are quite fertile. The soils of the western taluks are derived from Granites, Laterites and Schists. The depth is shallow to medium and the colour is red at surface and red to mottled red and yellow at depth. These soils are highly leaned and poor in bases and are suitable for crops like coffee, cardamom, areca, paddy and sugar cane. The eastern taluk have red shandy soil derived from granite, gneiss and schists. These soils are shallow loamy to sandy loamy in texture, are intermixed with Coarse Gravel and Pebbles and are well drained but are poor in moisture retention capacity. The National Bureau of Soil Survey and Land use planning (NBSS & LUP) has defined the soils of the district and classified them as Ustalfs, Ustalfs-Rock outcrops, Tropepts-orthents Aqualfs, Ustalfs-Tropepts and Udalfs-Tropepts.

(11) Cropping Pattern

The topographical and the climatic conditions of the district are eminently suited for the production of plantation crop like coffee and cardamom and also agricultural and horticultural crops such as Paddy, Sugar cane, Coconut, Potato and vegetables under irrigated condition and ragi, millets, groundnut, cotton under rain fed conditions.

Paddy is grown under canal irrigation mainly in all the taluks of the district. Paddy along with Ragi is the main staple food of the people. Ragi is grown as semi-irrigational crop during the summer months. The extent of area held in the district for the growing of Maize is negligible (29 hectares).

Apart from the above agricultural crops, it deserves a word of mention about horticultural and plantation crops on which the economy of district rests to a great extent. A considerable area in the western sector belonging to the taluks of Sakleshpur, Alur and Belur has been planted with coffee.

Sakleshpur taluk is noted for Cardamom plantations. Pepper is another important plantation crop of the Malnad zone. In the eastern belt consisting of the semi-malnad and maidan zone, coconut is an important cash crop. The taluks of Arsikere, Belur and Channarayapatna have large areas under this crop. Arecanut is also an important garden crop which is grown mainly in the taluks of Arkalgud, Belur, Alur, Sakleshpur, Hassan. Arecanut is grown in places of heavy and well-distributed rainfall. Arecanut is in fact grown in small patches of Bagayat in garden lands irrigated by tanks and wells. In most of these gardens, banana, jack fruits and betal leaf are also grown.

From the foregoing it is obvious that production of plantation and garden crops has a pre-eminent place in the economy of the district.

In the production of fruit and vegetables also the district is well known. Mango is an important fruit crop grown in all taluks of the district except Sakleshpur (Manjarabad). Banana and orange are produced in large quantity mainly in the taluks of Sakleshpur (Manjarabad) and Belur. Arkalgud, Hassan, Arsikere and Hole Narsipur taluks are noted for vegetable cultivation. Potato has gained popularity

in recent years and as it thrives well in red loam, its cultivation is mainly concentrated in the taluks of Hassan, Belur and Arkalgud.

The district has a sound economic base and has always been reckoned amongst the most prosperous district of the State. It is noted for its coffee, pepper and cardamom. The characteristic product of the southern malnad is also renowned for its production of coconut, paddy, tobacco, groundnut, cotton, sugarcane and a variety of agricultural and horticultural crops.

Nature has blessed the district with a fairly rich deposit of variety of minerals. A fertile soil coupled with favourable climate that promotes the growth of several species of useful trees and plant. The perennial Hemavathi has turned out to be a boon to not only the people of Hassan but also to those residing in parts of the neighbouring Mandya district. Agriculture is by and large a profitable enterprise. Arsikere is noted for its coconut market and enjoys countrywide reputation. The weekly market at Gandasi ranks amongst the largest shandies in the State.

The land use data for the district for the year 1998-99 reveals that the net area sown is 57.18 percent and the total area sown is 64.98 percent. The cultivable waste land accounts for 3.08 percent.

Land and land-use pattern, tenancy

The figures given below represents the agricultural land holdings by size, for the year 1998-99. The figures clearly indicates that the number of persons holding less than 1 hectares of agricultural land (very small sized) are predominant in the district with 57.26 per cent, followed by small sized land holders, who constitute 25.60 per cent. The semi-medium and medium sized land holders (2 hectares to 10 hectares) constitute 16.55 percent and the large sized land holders constitute just 0.58 per cent.

Source : Hassan District at a Glance, 1998-99, District Statistical Officer, Hassan

Paddy is the major cereal crop grown mainly under canal irrigation. About 66,684 hectares of area is put under paddy cultivation. The yield of paddy under irrigated area is 3,698 kgs per hectares. The other oil seeds crop grown in the district are sunflower, groundnut, nigerseed, castor etc. The total area put under these crops is 29,532 hectares. Cotton, sugarcane and tobacco are the commercial crops grown in the district. Sizeable land is put under plantation and horticultural crops.

(12) Irrigation

The total cultivable area of the district is 433,826 hectares. Where as the area under cultivation is 78,626 hectares which is provided with irrigational facilities. The distribution of area under different sources of irrigation in each taluk of the district according to statistics provided by the Directorate of Economics & Statistics is given in the table.

NET AREA IRRIGATED BY DIFFERENT SOURCES

Name of Taluk	Net area irrigated for 1998-99 (Area in hectares)						
	Canal	Tank	Wells	Bore wells	Lift Irrigation	Other sources	Total
1	2	3	4	5	6	7	8
Alur	947	6,776	19	32	-	72	7,846
Arkalgud	8,996	3,400	203	218	50	750	13,617
Arsikere	-	270	780	2,900	-	-	3,950
Belur	885	6,246	180	1,967	8	145	9,431
Channarayapatna	3,767	3,503	73	8,893	-	-	16,236
Hassan	3,169	780	321	325	-	-	4,595

Sakleshpur	-	6,500	375	935	-	4,692	12,502
Total	**27,356**	**27,923**	**2,132**	**15,460**	**96**	**5,659**	**78,626**

Source : Hassan District at a Glance, 1998-1999, District Statistical Officer, Hassan

Bore Wells Tank and Well - these three types of irrigational facilities are available in all the taluks of the district, whereas lift irrigational facilities are available only in Belur, Arkalgad and Hole Narsipur taluks. The taluks of Sakleshpur and Arsikere have not been bestowed with Canal irrigational facility.

The net area irrigated in the district by different sources is 78,626 hectares of which 27,356 hectares and 27,932 hectares of area are irrigated through canals and tanks as source. Highest are of 9,592 hectares and 8,996 hectares is by canals in Holenarsipur and Arkalgud taluks, whereas an area of 6,776 and 6,550 hectares have been irrigated by tanks in Alur and Sakleshpur taluks respectively. Apart from canals and tanks, bore wells are the major source of irrigation. As it can be observed from the given table, a net area of 15,460 hectares has been irrigated by bore wells in the district. of all the taluks, highest net area of 8,893 hectares is being irrigated through bore wells in Channarayapatna taluk.

(13) Natural Wealth

A number of metalliferous and non-metalliferous minerals occur in the district. However, there are not many mineral based industries of importance in the district. The mineral wealth of the district chiefly consist of rich deposits of copper, chromite, china clay, asbestos, corundum, beryl, garnet, kyanite, mica and soap stone. The chromite found in Hassan district ranks amongst the best in the country and is in great demand by the steel mills. Though the deposit of copper has always been in existence at certain places of district, its discovery was somewhat recent. The contribution of mining sector to the economy of the district is quite significant. Taluk wise mineral resources of the district is presented in the following table.

TALUK WISE MINERAL RESOURCES OF THE DISTRICT

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor	
1	2	3	4	5
1	Alur	-	Building Stone	
			Ordinary Sand	-
2	Arkalgud	-	Building Stone	
			Ordinary Sand	-
3	Arsikere	Chromite	Building Stone	
		Quartz	Soap Stone	
		Kaoline	Ordinary Sand	-
4	Belur	-	Ornamental Stone	
			Ordinary Sand	
			Building Stone	-
5	Channaraya-patna	Chromite	Building Stone	Ordinary sand along river bed is in abundance. There is great deal of demand for Arsikere granite.
		Vermiculite		
6	Hassan	-	Building stone	In Hassan district there is scope for further exploitation of building and Ornamental Stone - mainly Hassan Green.
			Ordinary Sand

(14) Animal Husbandry

Animal husbandry is an important element of the economy of the district and is an adjacent to agriculture. It is the bullocks that provides the much needed power for ploughing field since mechanised farming has not made any headway. Thus the livestock animals are a cherished possession of the agriculturist. The livestock possessions usually include cattle bullocks, sheep and goats. The climatic condition in the semi-malnad and maidan region are well suited for breeding cattle and also sheep and goats. Amruth Mahal and Hallikar are the two main breeds of cattle that are reared in the district. Hassan district is reckoned as the home of the Hallikar and Amrith Mahal breed of cattle. The district is famous for the annual cattle market and fairs organised at several places including Hassan city. Hassan cattle show is one of the major event of the district.

Pig breeding is also a profitable activity of considerable economic significance especially in the taluks of Belur and Sakleshpur. The said activity is confined to certain communities.

DISTRIBUTION OF LIVESTOCK POPULATION IN THE DISTRICT

Sl. No.	Name of Livestock	Total Livestock
1	2	3
1	Sheep	2,02,423
2	Buffaloes	2,03,646
3	Cattle	6,15,616
4	Goats	111,018
5	Pigs	9,179
6	Rabbite	659
7	Dogs	82,866
8	Other livestock	1,329
9	**Total Livestock**	**12,26,281**
	Total Poultry	**7,60,000**

Source : A Handbook of Karnataka - 2001, Gazetteer Department, Government of Karnataka.

(14A) Veterinary Services

In so far as the veterinary services are concerned as on 31.3.1999, it may be noted that Hassan district has 11 veterinary hospitals 44 dispensaries 107 primary veterinary health centres and each taluk headquarters had one mobile veterinary dispensary amounting to 8 in the district. Besides, there are 10 artificial insemination centres in the district.

VETERINARY INSTITUTIONS IN THE DISTRICT FOR THE YEAR 2000

Sl. No.	Veterinary Services	No. of Institutions
1	**2**	**3**
1	Hospital	11
2	Dispensaries	44
3	Primary Veterinary Centres	107
4	Mobile Insemination Centres	8
5	Artificial Insemination Centres	10
	Total	**180**

Source: Karnataka at a Glance 2000-2001, Directorate of Economics and Statistics, Government of Karnataka.

(15) Fisheries

The fishing activity of the district has been confined to that of the inland fishing only as there is no coastal line in the district. There are seven fish rearing farms. However, there are no ice plants and cold storage facilities in the district. The district has a fishermen population of 38,856 out of which 1,833 are active fishermen. With regard to having the active fishermen, the district can be placed in 19th rank. There are only 7 Fishery Co-operative societies in the district. From the point view of developments the State Government has introduced various welfare schemes such as saving cum relief scheme, group accident insurance for the active fishermen, Fisher Women Co-operative Societies, development of model villages for Fishermen, establishment of District Relief Fund with a view to improve the socio-economic condition of the fishermen in the district.

The fish wealth in inland water is limited, as such, great care in exploiting the potential is being exerted in addition to proper cultivation and conservation. The fishing community is mainly composed of Besta, whose main occupation is fishing. The common method employed by the fisherman for exploiting the fishery resources in the district are general battue and regular fishing. The fishes are caught in drag nets or cast nets and basket traps. Exploitation of fishery wealth is taken up by the fisheries department. Licences are issued in respect of catching fish in certain categories of water sheets, while a few are auctioned. Conservation of fishes in these water bodies is pre-requisite of increased production and as such the department of fisheries is having a strict watch against the possible poaching and distruction of fishes.

There are few fisherman's Co-operative Societies in the district. All these societies are functioning as primary credit co-operative societies and providing long term loan to the fisherman for purchasing equipment.

FISHING ACTIVITY IN THE DISTRICT

Fish Seed Stocked	In lakh fingerlings
a) Reservoirs	16.67
b) Major Tanks	51.79

(16) Industries

Industries play a significant role in the economy of the district. The district can be proud of its large scale industry known as Karnataka Implements and Machinery Company, which manufactures and supplies various tools and implements required by the agriculturists. This factory is said to be the best of

its kind in South India. Kothari Coffee Curing Works is the other important factory of Hassan. Apart from this, a few more coffee curing factories such as Bharathi Coffee Curing Works, Hassan Coffee Curing Works, Plantas Coffee Curing Works have come. These units provide seasonal employment to hundreds of workers. Coffee curing is now one of the most important industries of the district. There are more than 100 rice mills in the district, most of which are operating on a small scale. A few cotton ginning and pressing factories and few oils mills and sugar factory at Channarayapatna are other agro based industries. There are numerous small scale industrial units of which specific mention may be made of the general engineering and automobile repairs, soap manufacturing units, tiles factories, factories manufacturing plantation equipments, etc.

Statement below is an indicator of manufacturing industry in the district, which furnishes details of Sectors, number of units, investments and number of persons employed in the district.

TALUKWISE DETAILS OF MAJOR FACTORIES FOR THE YEAR 1998-99

(17) Trade and Commerce

Trading and commerical activities have a special place in the economy of the district. Arsikere, Sakleshpur, Hassan and Alur are the chief trading centres. Arsikere is famous throughout the country for its copra and coconut market. The transactions in cotton, groundnut, paddy and gingelly are also done on a large scale and the Arsikere market ranks amongst the biggest markets of the State. Sakleshpur enjoys wide reputation for its cardamom market while Hassan and Alur are known for their heavy transactions in paddy (rice). The important agricultural produce exported from these markets are coffee, cardamom, paddy (rice), ragi, coconut and copra, groundnut, til, cotton and potato. Hassan market is known for jaggery also. Regulated markets have been functioning at Arsikere, Sakleshpur, Hassan, Channarayapatna and Hole Narsipur and have to some extent minimised the role of the traditional middle men and enabled the producers to get a fair price for their commodities. As on 31/03/1999 the district had 43 commercial banks, 122 Regional Rural Banks, 4 urban Co-Operative Banks besides 8 primary land development banks.

(18) Transport and Communication

Hassan district is quite fortunate in the matter of transport and communication facilities. It has, since early times a good network of roads. The important places of the district are linked up with each other and also with the prominent centres like Bangalore, Mysore, Shimoga and Mangalore. The district has two important ghat roads which connect the eastern plains with the places beyond the western ghats. These roads pass through Shiradi ghat leading to Subramanya, a noted place of pilgrimate. The district has a total road length of 7,208 kms of which a length of 135 kms and 512 kms belong to the category of National Highway and State Highway respectively. A major portion of these roads, however belong to the category of village roads. Arsikere and Hassan are the important railway junctions of the district. The Hassan-Mangalore railway passing through Sakleshpur has now become a reality and is useful for transportation of goods to the west coast. Arsikere lies on the main line connecting Bangalore with Bombay, and the Arsikere-Mysore line which passes through Hassan and Hole Narsipur is also of considerable importance.

(19) Electricity and Power

Karnataka has a place of pride in the history of power generation in the country. KPTCL - Karnataka Power Transmission Corporation Limited (erstwhile KEB) is mainly vested with the functions of transmission and distribution of power in the entire state. The Corporation has been attaching great importance to electrification of villages and hamlets, tribal colonies and harijan basthis and energisation of irrigation pumpsets. Besides, this with a view to benefit weakest among the section of society, schemes called Bhagya Jyothi / Kutir Jyothi have been introduced.

Statement gives below shows talukwise number of villages electrified and talukwise energisation of IP as on 31.3.1999 in Hassan District.

TALUKWISE NUMBER OF VILLAGES ELECTRIFIED AND ENERGISED IRRIGATION PUMP SETS AS ON 31.3.1999

(v) CENSUS CONCEPT

Building

A `Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them.

If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A `census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multistoreyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multistoreyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard, by definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,`singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. But if such hostels/ hotels have out houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is `town' for urban areas and `village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in nonagricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house

but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multimember households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mantaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In respect of Karnataka State the Scheduled Castes and Scheduled Tribes as contained in the Scheduled Castes & Scheduled Tribes Orders (Amendment) Act, 1976 are valid for the purpose of Census of India, 2001. With the promulgation of Act 39 of 1991 however, the sub entries Naik, Nayak, Beda, Bedar and Valmiki were added under the main entry at S.No. 38 (Naikda, Nayaka, ...) of the Scheduled Tribes list of the State. There are in all 101 Scheduled Castes and 49 Scheduled Tribes in the State which are listed below:

List of Scheduled Castes

1 Adi Andhra
2 Adi Dravida
3 Adi Karnataka
4 Adiya (in Coorg district)
5 Ager
6 Ajila
7 Anamuk
8 Aray Mala
9 Arunthathiyar
10 Arwa Mala
11 Baira
12 Bakad
13 Bant (in Belgaum, Bijapur, Dharwar and North Kanara districts)
14 Bakuda
15 Balagai
16 Bandi
17 Banjara, Lambani
18 Bathada
19 Beda Jangam, Budga Jangam
20 Bellara

21 Bhangi, Mehtar, Olgana,Rukhi, Malkana, Halalkhor, Lalbegi,Balmiki, Korar, Zadmalli
22 Bhambi. Bhambi, Asadaru, Asodi, Chamadia, Chamar, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Muchi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit, Samgar
23 Bhovi
24 Bindla
25 Byagara
26 Chakkiliyan
27 Chalavadi, Chalvadi, Channayya
28 Chandala
29 Chenna Dasar, Holaya Dasar
30 Dakkal, Dokkalwar
31 Dakkaliga
32 Dhor, Kakkayya, Kankayya
33 Dom, Dombara, Paidi, Pano
34 Ellamalwar, Yellammalawandlu
35 Ganti Chores
36 Garoda, Garo
37 Godda
38 Gosangi
39 Halleer
40 Halsar, Haslar, Hulasvar,Halasvar
41 Handi Jogis
42 Hasla
43 Holar, Valhar
44 Holaya, Holer, Holeya
45 Holeya Dasari
46 Jaggali
47 Jambuvulu
48 Kadaiyan
49 Kalladi
50 Kepmaris
51 Kolupulvandlu
52 Koosa
53 Koracha
54 Korama
55 Kotegar, Metri
56 Kudumban
57 Kuravan
58 Lingader
59 Machala
60 Madari
61 Madiga
62 Mahar, Taral, Dhegu Megu
63 Mahyavanshi, Dhed, Vankar, Maru Vankar
64 Maila
65 Mala
66 Mala Dasari
67 Mala Hannai
68 Mala Jangam
69 Mala Masti
70 Mala Sale, Netkani
71 Mala Sanyasi
72 Mang, Matang, Minimadig
73 Mang Garudi, Mang Garodi
74 Manne
75 Masthi
76 Mavilan
77 Meghval, Menghvar
78 Moger
79 Mukri
80 Mundala
81 Nadia, Hadi
82 Nalkadaya
83 Nalakeyava
84 Nayadi
85 Pale
86 Pallan
87 Pambada
88 Panchama
89 Panniandi
90 Paraiyan, Paraya
91 Paravan
92 Raneyar
93 Samagara
94 Samban
95 Sapari
96 Sillekyathas
97 Sindhollu, Chindollu
98 Sudugadu Siddha
99 Thoti
100 Tigar, Tirbanda
101 Valluvan

List of Scheduled Tribes

1 Adiyan
2 Barda
3 Bavacha, Bamcha
4 Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
5 Chenchu, Chenchwar
6 Chodhara
7 Dubla, Talavia, Halpati
8 Gamit, Gamta, Gavit, Mavchi, Padvi, Valvi
9 Gond, Naikpod, Rajgond
10 Gowdalu
11 Hakkipikki
12 Hasalaru
13 Irular

14 Iruliga
15 Jenu Kuruba
16 Kadukuruba
17 Kammara (in South Kanara district and Kollegal taluk of Mysore district)
18 Kaniyan, Kanyan (in Kollegal taluk of Mysore district)
19 Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari
20 Kattunayakan
21 Kokna, Kokni, Kukna
22 Koli Dhor, Tokre Koli, Kolcha, Kolgha
23 Konda Kapus
24 Koraga
25 Kota
26 Koya, Bhine Koya, Rajkoya
27 Kudiya, Melakudi
28 Kuruba (in Coorg district)
29 Kurumans
30 Maha Malasar
31 Malaikudi
32 Malasar
33 Malayekandi
34 Maleru
35 Maratha (in Coorg district)
36 Marati (in South Kanara district)
37 Meda
38 Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka, Naik, Nayak, Beda, Bedar and Valmiki
39 Palliyan
40 Paniyan
41 Pardhi, Advichincher, Phanse Pardhi

43 Rathawa
44 Sholaga
45 Soligaru
46 Toda
47 Varli
48 Vitolia, Kotwalia, Barodia
49 Yerava

Language and Mother tongue

As per the Census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the

last one year preceding the date of enumeration) in any economically productive activity is termed as `Main worker'

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as `Marginal worker' .

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as `Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if she or he is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops - tea, coffee, rubber, coconut and betelnuts (areca).

Agricultural labourer

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. A person who has been engaged in the economic activity like above is termed as Household Industry Worker.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as an 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1,000 males in a population.

(vi) NON-CENSUS CONCEPTS

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well

(protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faucal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a subsoil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear female population of the same age group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear married female population of the same age group}} \times 1,000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Midyear female population in the age-group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Midyear married female population in the age-group (15-49) years}} \times 1,000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1,000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{45-49}^{15-19} ASFR}{1,000}$$

Age specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Midyear population of the same age group}} \times 1,000$$

q_1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2

Probability of dying between birth and age 2.

q_5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U_5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neonatal mortality rate and Post neonatal mortality rate. The neonatal mortality rate also comprises of two parts viz., early neonatal mortality rate and late neonatal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Perinatal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple(Couples per 1,000 population)

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place

of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/ Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000- 4,999,999); M5 (1,000,000-1,999,999); M4 (500,000-999,999); M3(300,000-499,999); M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

(a) Distribution of population in Rural-Urban Areas:

According to the 2001 Census, the total population of Hassan district is 1,721,669, comprising 859,086 males and 862,583 females. The population of the district forms 3.3 percent of the state population and ranks at 13th place among the districts. Out of the total population of the district 82.3 percent lives in rural areas while 17.7 percent lives in urban areas. Rural population of the district is distributed among 8taluks and urban population spread over in 9 towns. The total urban population in the district is 304,673 persons comprising 155,129 males and 149,544 females. The total rural population in the district comes to 1,416,996 persons and is composed of 703,957 males and 713,039 females as per 2001 Census. This rural population is distributed in 2,394 inhabited villages and there are 165 un-inhabited villages in the district.

(b) Size-class and Civic Status of towns:

SIZE-CLASS AND CIVIC STATUS OF TOWNS

Serial number	Size-Class of town	Name and civic status of town		Urban Population		
				Persons	Males	Females
1	2	3		4	5	6
1	III	Sakleshpur	TMC	23,176	11,755	11,421
2	III	Belur	TP	20,228	10,347	9,881
3	III	Arsikere	TMC*	45,166	22,832	22,334
4	I	Hassan	CMC*	121,874	62,433	59,441
5	IV	Satyamangala	CT	11,388	5,809	5,579
6	V	Alur	TP	6,133	3,036	3,097
7	IV	Arkalgud	TP	15,169	7,684	7,485
8	III	Hole Narsipur	TMC	27,024	13,687	13,337
9	III	Channarayapatna	TMC*	34,515	17,546	16,969

Population Growth, Density and Sex-ratio:

Population Growth:

Hassan District witnessed a positive growth rate in each decade with 1.6, 0.6, 2.6, 5.2, 13.9, 25.3, 23.1, 23.1, 15.7 and 9.7 percent during the period 1901 to 2001. According to the 1991 Census the total population of the district was 1,569,684. There has been net addition of 151,985 persons during 1991-2001. The decadal growth rate of the district comes to 9.7 percent. The growth rate for the rural and urban areas of the district is 9.3 and 11.7 percent respectively.

Density:

The population density of Hassan district is 253 persons per Sq. Km. against the state average of 276 persons. At taluk level, the density varies between 131 persons in Sakaleshpur taluk and 384 persons in Hassan taluk. In rural areas it comes to 210 persons per Sq. Km., while in urban areas it comes to 4,489 persons. In urban areas, the density of population varies between 3,287 persons in Channarayapatna town and 7,810 persons in Hole Narsipur town.

Sex Ratio:

There are 1,004 females for every one thousand males in Hassan district. The sex-ratio figures for rural areas and urban areas of the district are 1,013 and 964 respectively. It is also observed that, the proportion of females in rural areas is higher than that of urban areas. Sex-ratio in the age-group 0-6 comes to 958 girls per 1,000 boys in the district as a whole. In rural areas, this proportion is 964, while in urban areas the sex-ratio of Child population works out to 932 girls per 1,000 boys.

Work Participation Rate:

The work participation rate is defined as percentage of total workers to total population. According to 2001 Census, the total workers including main and marginal workers constitute 50.2 percent of total population of the district. Of the total workers, the share of main workers is 81.3 percent and marginal workers is 18.7 percent. The remaining 49.8 percent of population belongs to the category of non-workers.

As per 2001 Census among the main workers male participation rate in the district is 92.9 percent and

corresponding proportion of females is 63.6 percent. The proportion of female marginal workers is higher than male marginal workers, as the females are attending to one or more economic activities in addition to their household duties to improve the family income. Majority of the workers are engaged in agricultural activities. Of the total 864,711 workers in the district, 55.0 percent of these total workers are categorized as cultivators, 14.6 percent agricultural labourers, 1.6 percent in household industries and 28.7 percent in other services.

Literacy:

A person who can read and write in any language is considered as literate in Census. All children of age below 7 years are treated as illiterate.

As per 2001 Census, Hassan district has reported 1,044,584 persons as literates constituting 68.6 percent of the total population excluding the population of 0-6 years. The male and female literacy rates in the district are 78.4 and 59.0 percent respectively. The literacy rate of males is higher than that of females. The gap in the male - female literacy rate is 19.4 in the district.

The total literacy rates of rural and urban area are 65.2 and 88.4 percent respectively. The male and female literacy rates in rural areas are 75.9 and 54.7 percent respectively. In urban areas these rates are 89.3 and 79.4 percent respectively. The gap in male - female literacy rates in urban areas is 9.9 as against 21.2 in rural areas. It is thus clear that females are better educated in urban areas than their counterparts in rural areas.

(c) Scheduled Castes and Scheduled Tribes Population 2001:

Of the 1,721,669 total population of the district 18.1 percent of the total population belong to Scheduled Castes and 1.5 percent to Scheduled Tribes. The percentage of Scheduled Castes constitute 75.5 percent in rural areas and 24.5 percent in urban areas. The proporation of Scheduled Tribes is 86.5 and 13.5 in rural and urban areas respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36

Following tables, which presents the data on population within the district, with a brief notes will provide an overview of the district.

TABLE 1: DECADAL CHANGE IN POPULATION OF TALUKS BY RESIDENCE, 1991-2001

Taluk	Population						Percentage decadal variation 1991-2001			Percentage Urban Population	
	1991			2001							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12
Sakleshpur	124,753	105,881	18,872	134,345	111,169	23,176	7.7	5.0	22.8	15.1	17.3
Belur	170,321	153,494	16,827	183,755	163,527	20,228	7.9	6.5	20.2	9.9	11.0
Arsikere	284,379	238,379	46,000	303,044	257,878	45,166	6.6	8.2	-1.8	16.2	14.9
Hassan	315,676	201,946	113,730	361,147	227,885	133,262	14.4	12.8	17.5	35.9	36.9

TABLE 1: DECADAL CHANGE IN POPULATION OF TALUKS BY RESIDENCE, 1991-2001

Taluk	Population						Percentage decadal variation 1991-2001			Percentage Urban Population	
	1991			2001							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12
Alur	79,081	74,120	4,961	86,071	79,938	6,133	8.8	7.8	23.6	6.3	7.1
Arkalgud	182,647	161,438	21,209	199,958	184,789	15,169	9.5	14.5	-28.5	11.6	7.6
Hole Narsipur	158,615	135,048	23,567	175,244	148,220	27,024	10.5	9.8	14.7	14.9	15.4
Channara yapatna	254,212	226,656	27,556	278,105	243,590	34,515	9.4	7.5	25.3	10.8	12.4
District Total:	**1,569,684**	**1,296,962**	**272,722**	**1,721,669**	**1,416,996**	**304,673**	**9.7**	**9.3**	**11.7**	**17.4**	**17.7**

Data given in table 1 reveals the talukwise decadal variation of population in the district. During the decade 1991-2001, it has grown by 9.7 percent. The decadal change in urban areas highlights the variations to be negative in Arkalgud taluk, which has, on the other hand, recorded the highest decadal variation of 14.5 percent in rural areas. There is a slight increase in the percentage of urban population to the total population during the decade.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

9 (2.5)	15,048	14,988	0 (0.0)	0	0	0 (0.0)	0	0
1 (0.4)	1,020	1,077	0 (0.0)	0	0	0 (0.0)	0	0
12 (4.3)	14,935	15,187	1 (0.4)	4,260	4,289	0 (0.0)	0	0
7 (3.3)	7,923	7,605	0 (0.0)	0	0	0 (0.0)	0	0
7 (1.9)	10,488	10,503	1 (0.3)	3,309	3,085	0 (0.0)	0	0
59 (2.5)	**79,426**	**79,268**	**7 (0.3)**	**24,878**	**24,120**	**0 (0.0)**	**0**	**0**

The above table indicates the number and per cent of inhabited villages with reference to population size ranges as per 2001 census. Data reveals that out of 2394 inhabited villages, maximum 33.9 per cent i.e. 811 villages are in the population range of 200-499. About 21.7 percent villages (519) are in the population range of less than 200, and 707 villages (29.5 percent) are in the population range of 500-999. There is no village in the ranges of 10,000 & above Other details can be observed from the table No.2 above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS

		Name of Town
(a)	New	
(i)	Statutory Town	**- Nil -**
(ii)	Census Town	**Satyamangala CT**
(b)	Denotified	
(i)	Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as Census Towns	**- Nil -**
(ii)	Statutory towns of 1991 Census denotified but identifiable as Census Towns based on demographic and economic criteria	**- Nil -**
(iii)	Census towns of 1991 Census notified as Statutory town in 2001 Census	**- Nil -**
(c)	Declassified	**1 Gorur (NMCT)** **2 Konanuru (MP)** **3 Banavar (MP)** **4 Shravan Belgola (MP)**
(d)	Wholly/Partly merged with other town(s)	**1 Arsikere Non Municipal Area (NMCT)**

Declassified means the Census towns of 1991 Census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	35	1.5	598	0.0
11-20	32	1.3	2,905	0.2
21-50	115	4.8	16,534	1.2
51-100	215	9.0	43,504	3.1
101-200	674	28.2	276,207	19.5
201-300	658	27.5	447,705	31.6
301-500	509	21.3	419,081	29.6
501 +	156	6.5	210,462	14.9
Not known	0	0.0	0	0.0
District Total:	**2,394**	**100.0**	**1,416,996**	**100.0**
Population Density (Rural) of the district:		**219.5**		

Distribution of villages of population density and ranges are presented in this table. The density of population for the district rural is 219.5 person/sq.km. If the villages are distributed by different ranges of population density the picture that would emerge for the rural population of the district would be as indicated in the above Table No.4.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT 1901-2001

Census Years	State			Census Years	District		
	Total	Rural	Urban		Total	Rural	Urban
1	2	3	4	5	6	7	8
1901	983	984	976	1901	1,010	1,013	978
1911	981	984	960	1911	1,019	1,021	984
1921	969	975	936	1921	998	1,006	893
1931	965	972	927	1931	985	992	910
1941	960	965	935	1941	977	981	938
1951	966	974	941	1951	970	979	909
1961	959	973	913	1961	969	977	907
1971	957	971	913	1971	974	984	915
1981	963	978	926	1981	987	999	916
1991	960	973	930	1991	999	1,012	941
2001	965	977	942	2001	1,004	1,013	964

The above table gives the sex-ratio for the rural and urban population of the state as well as that of the district from 1901 to 2001 census.

It is observed that the state has recorded a decrease in the sex-ratio since 1901 census (983). However in 2001 census, the state has registered a better sex-ratio of 965 little higher than the ratio of 1991 Census (960).

For the district, the sex-ratio in 1901 Census was 1010, which at first decreased and then increased. However, in 2001 Census, the district has recorded a sex-ratio of 1004, better than that of 1991 Census 999. It is also observed that the sex-ratio in 2001 Census for the district (1004), much better than that for the state (965).

Again, the ratio for the rural women in 2001 Census is comparatively better than, that for the urban women in the state as well as in the district.

TABLE 6 : SEX RATIO BY TALUKS, 2001

Sl. No.	Name of Taluk	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Sakleshpur	1,024	1,035	972
2	Belur	1,003	1,009	955
3	Arsikere	992	995	978
4	Hassan	995	1,020	953
5	Alur	1,007	1,006	1,020
6	Arkalgud	1,004	1,007	974
7	Hole Narsipur	1,001	1,006	974
8	Channarayapatna	1,022	1,029	967
	District Total:	**1,004**	**1,013**	**964**

This table gives the talukwise sex ratio for rural and urban population as per 2001 census. It is observed from the above table that the sex ratio for rural areas is 1,013 and urban area is 964. The sex ratio in urban is highest in Alur (1,020). whereas in rural areas highest (1,035) sex ratio is reported from Sakleshpur. The sex ratio of the district as a whole is 1,004 females per 1,000 males.

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Sl. No.	Name of C. D. block	Sex ratio
1	2	3
1	Sakleshpur	1,035
2	Belur	1,009
3	Arsikere	995
4	Hassan	1,020
5	Alur	1,006
6	Arkalgud	1,007
7	Hole Narsipur	1,006
8	Channarayapatna	1,029
	District (Rural) Total:	**1,013**

This table highlights the data on sex ratio by CD Blocks which includes all villages in the district. The sex ratio for the district rural is 1,013. Among the CD Blocks, highest sex ratio of 1,035 is noticed in Sakleshpur C.D. block followed by Channarayapatna and Hassan C.D. blocks respectively. Whereas lowest in sex ratio of 995 is reported from Arsikere CD Block.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	38	1.6	3,112	0.2
700-749	7	0.3	543	0.0
750-799	28	1.2	5,101	0.4
800-849	46	1.9	7,412	0.5
850-899	123	5.1	40,759	2.9
900-949	267	11.2	168,037	11.9

1,100+	441	18.4	167,126	11.8
District Total:	**2,394**	**100.0**	**1,416,996**	**100.0**

Sex ratio (Rural) for District:1,013

Table No.8 provides the distribution of inhabited villages by different range of sex ratio. It is observed that the concentration of villages is maximum (968) in the range of (1,000-1,099). This is also explained by the sex ratio (rural) for the district, which is 1,013 and fully in the same range of sex ratio. Other details can be observed from the table above.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4

Taluk wise sex ratio of population in the age group of 0-6 years with rural,urban breakup for the district is presented in the above table. Data reveals that among the Taluks the sex ratio in the age group of 0-6 is highest in Holenarsipur (981) followed by Alur (979) and Sakhleshpur (976). The district total sex ratio is 958. The rural sex ratio is highest, both in the district and in all the taluks.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females

	District (Rural) Total:	**164,948**	**83,998**	**80,950**	**964**

Sex ratio for 0-6 age group in the CD Blocks of the district is presented in this table. The sex ratio for the district rural is 964. The sex ratio is favourable for males in all the C.D. Blocks in the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	432	18.0	13,425	8.1
700-749	106	4.4	7,126	4.3
750-799	147	6.1	10,516	6.4
800-849	152	6.3	12,975	7.9
850-899	134	5.6	13,017	7.9
900-949	178	7.4	16,827	10.2
950-999	128	5.3	17,907	10.9
1,000-1,099	363	15.2	29,352	17.8
1,100+	754	31.5	43,803	26.6
District (Rural) Total	**2,394**	**100.0**	**164,948**	**100.0**
Sex ratio (Rural) for District:		**964**		

Sex ratio for the rural population by ranges has been given in the above table. Data reveals that the concentration of villages is maximum 754 in the range of 1,100 and 363 in the range of 1,000-1,099. About 128 villages are in the range of 950-999 and the table also provides the sex ratio (rural) for the district which is 964. Other details can be observed from the above table.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

District (Rural) Total:		**11,330**	**6,803**	**4,527**	**12,872**	**5,304**	**7,568**	**54.0**	**65.0**	**43.0**	**22.0**

This table provides information on sex wise literacy rate among the Scheduled Tribes in the C.D. blocks of the district. The percentage of literacy rate for the district rural is 54.0 per cent, the percentage of male literacy rate works out to 65.0 per cent and that of female is 43 per cent. The gap in male/female literacy rate is 22.0 per cent. Highest literacy rate of 70.7 per cent for males and 49.6 for females is reported from Arsikere C.D. block. Highest male/female literacy gap is reported from Hole Narsipur C.D.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	28	5.6	150	0.6
1-10	4	0.8	75	0.3
11-20	22	4.4	1,102	4.6
21-30	34	6.7	669	2.8
31-40	40	7.9	1,636	6.8
41-50	85	16.9	5,383	22.2
51-60	84	16.7	7,377	30.5
61-70	71	14.1	5,453	22.5
71-80	50	9.9	1,742	7.2
81-90	18	3.6	267	1.1
91-99	3	0.6	103	0.4
100	65	12.9	245	1.0
District Total:	**504**	**100.0**	**24,202**	**100.0**
Literacy rate for District (Rural):		**54.0**		

The sex wise literacy rate among Scheduled Tribes has been given in the above table. This table highlights the distribution of villages by literacy rate for the Scheduled Tribes population. Literacy rate among the Scheduled Tribes for the district rural is 54.0 per cent. If the distribution of villages is made by range of literacy rate for the Scheduled Tribes, the picture that would emerge for all the 504 inhabited villages of the district inhabited would be as indicated in the above Table No.29.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Sakleshpur (TMC)	124	74	50	38	19	19	86.7	94.9	76.9	17.9

Sex wise distribution of categories of workers for the urban population of district is given in the above table by number and percentage. It can be seen from the above table that, the percentage of total workers for the district urban is 33.5 per cent and highest (39.1) per cent of total workers are reported from Alur TP. Highest percentage of (68) non-workers is reported from Arsikere (TMC). Among the female total workers highest percentage of 22.4 is reported from Alur TP.

Note: Percent of Worker to total worker are given in brackets

The distribution of total workers by sex according to four-fold industrial category in taluks is highlighted in this table. Data reveals that Agricultural labourers and cultivators together constitute 69.6 per cent of the total workers. At taluk level maximum number of cultivators (71.2 per cent) are found in Channarayapatna taluk. Whereas agricultural labourers are more in Hole Narsipur. Number of other workers is more in Sakleshpur taluk (73.8 per cent).

				(12.9)	**(3.1)**	**(5.2)**	**(9.6)**	**(82.1)**

The distribution of total workers by sex according to four-fold industrial category in urban agglomerations/towns is highlighted in this table. Data reveals that other workers constitute 90.5 per cent. Cultivators and agricultural labourers constitute 5.6 per cent whereas household industry workers constitute 3.9 per cent. Highest number of cultivators and agricultural labourers are found in Arkalgud TP and Alur TP respectively and maximum numbers of female agricultural labourers are reported from Alur TP.

(ix) Brief Analysis of the village Directory and Town Directory data based inset tables 37 to 47

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table reveals brief analysis of various amenities, which are available in C.D. block, of the district. It can be seen from the above table that 84.6 per cent of the inhabited villages have educational facilities and 95.1 per cent have improved drinking water facility. Medical and post office facilities are available for 20.1 percent and 18.0 percent of villages respectively. 97.8 per cent villages have power supply in the district. The position of medical facilities varies from 9.2 percent to 25.7 per cent in the C.D. blocks. Availability of banking facility is not satisfactory.

C.D. Blockwise distribution of rural population served by different amenities is presented in Table No.38. Data reveals that 96.5 per cent of the rural population is served by educational institutions while 97.1 per cent have improved drinking water facility. About 39.0 per cent of population have medical facility and 38.1 per cent rural population is served with post facility. 98.1 per cent of them have power supply.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	308	64	0	372
(b) Middle School	999	378	0	1,377
(c) Degree College	277	526	1,583	2,386
2. Medical:-				
(a) Hospital	278	532	1,579	2,389

6. Banks				
(a) Commercial Bank	914	977	376	2,267
(b) Cooperative Bank	509	997	822	2,328
7. Agricultural Credit Societies	779	815	635	2,229

There are 372 villages which do not have primary school, out of this for 308 villages primary school is located at a distance of less than 5 kms. Again, 64 villages have this facility at a distance of 5-10 kms range. Nearly, 1,377 villages do not have middle school out of which 999 villages have this facility at a distance of less than 5 kms. Of 2,394 villages not having hospitals, 283 have this at a distance of less than 5 kms. For 512 villages primary health centres are available at a distance of less than 5 kms. Regarding post office , telephone and bus service good number of villages have this facility at a distance less than 5 kms. Majority of the villages have banking facility at a distance of 5-10 kms range.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table No.40 depicts distribution of villages according to distance from the nearest statutory town and availability of certain amenities. It is observed that the distance from the statutory town to the villages does not exceed 50 kms except for 18 villages. Nearly 14 villages have been classified as unspecified as far as distance is concerned. Distance from nearest statutory town to the village has been correlated with the type of amenities available as per 2001 census. Four categories of distance range per nearest statutory town and type of amenities available in the villages is indicated in the above table.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table No.41 depicts the distribution of villages according to population range and availability of certain amenities. It can be seen from the above table that 2,037 villages are having a population of less than 1,000. No village has population above 10,000. 291 villages have population in the range 1,000-1 999. 97.8 per cent villages have power supply. Good number of villages have education. Improved drinking water facility is available in 95.1 per cent villages. Transport facilities are also available in good number of villages. Banking facility is less in all ranges.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Sakleshpur	222	98,959	48.5	24.6
2	Belur	355	79,937	64.7	30.9
3	Arsikere	339	118,530	57.8	17.2
4	Hassan	367	86,079	63.3	32.7
5	Alur	250	41,297	62.4	35.2
6	Arkalgud	278	63,713	62.9	32.3
7	Hole Narsipur	209	54,896	65.7	32.7
8	Channarayapatna	374	102,179	70.6	25.9
	District Total:	**2,394**	**645,590**	**61.4**	**27.7**

Note: - Cultivable area = irrigated area + unirrigated area

Table No.42 depicts the distribution of villages according to land use. Data reveals that, only the cultivable area of the rural district has been taken into consideration, which include both irrigated and un-irrigated areas. The cultivable area of the rural portion comprises of 61.4 per cent of the total area. Among the C.D. blocks, Channarayapatna is having the highest percentage of cultivable area i.e. 70.6 per cent. If the percentage of irrigated area to total cultivable area is considered Alur C.D. block is having the highest with 35.2 per cent.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11

5	III Channarayapatna (TMC*)	52.06	46.0	480.0	475.0	99.0	0.0	168.0	0.0	208.0
6	I Hassan (CMC*)	11.05	80.0	31.0	191.0	95.0	0.0	14.0	0.0	77.0
7	III Hole Narsipur (TMC)	478.0	65.0	414.0	378.0	123.0	0.0	158.0	0.0	97.0
8	III Sakleshpur (TMC)	435.0	146.0	289.0	362.0	121.0	0.0	106.0	0.0	135.0
District Total		**271.0**	**76.0**	**193.0**	**274.0**	**105.0**	**0.0**	**66..0**	**0.0**	**100.0**

The total per capita receipt of the urban district is Rs.271.0 and the total per capita expenditure Rs.274.0. The receipts are mainly from sources other than taxes which is Rs.193.0 and through taxes it is Rs.76.0. With regard to expenditure, per capita spending is mainly on general administration Rs.105.0 and Rs.66.0 on public works. The expenditure under 'Others' is Rs.100.0. Townwise data is provided in the above table.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Alur (TP)	9.8	9.8	4.9	1.6	0.0
2	Arkalgud (TP)	9.9	4.0	5.3	1.3	1.3
3	Arsikere (TMC*)	5.1	4.4	3.1	1.5	1.1
4	Belur (TP)	8.4	8.4	4.9	2.0	1.0
5	Channarayapatna (TMC*)	8.7	7.8	3.2	0.9	1.4
6	Hassan (CMC*)	6.4	5.3	2.9	0.9	0.5
7	Hole Narsipur (TMC)	13.0	6.7	4.8	0.7	0.7
8	Sakleshpur (TMC)	8.2	5.6	4.7	1.3	0.4
	District Total	**7.6**	**5.8**	**3.6**	**1.1**	**0.8**

The types of educational institutions per 10,000 population for the district (urban) are 7.6 primary, 5.8 junior secondary/middle, 3.6 secondary/ matriculation, 1.1 senior secondary and 0.8 colleges. Townwise, the highest number of primary schools of 13.0 are reported from Hole Narsipur and the lowest 5.1 from Arsikere (TMC). The highest number of junior secondary/middle is 9.8 reported from Alur (TP). The secondary/matriculation schoools vary from 2.9 to 5.3. The number of senior secondary vary from 0.7 to 2.0 per 10,000 population. The variance among towns as far as colleges are concerned is marginal that is 0.0 to 1.4 per 10,000 population.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Alur (TP)	98
2	Arkalgud (TP)	20
3	Arsikere (TMC*)	33
4	Belur (TP)	33
5	Channarayapatna (TMC*)	14
6	Hassan (CMC*)	31
7	Hole Narsipur (TMC)	41
8	Sakleshpur (TMC)	56
9	Satyamangala (CT)	0
	Distrct Total	**32**

The total number of beds in medical institutions in towns of the district is surmised as 32 per 10,000 population. This ratio is low at '0' in Satyamangala (CT) and 14 in Channarayapatna (TMC). Alur (TP) reported the highest at 98 beds followed by Sakleshpur (TMC) with 56 beds.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Alur	6,133	3,169	51.7
2	Arkalgud	15,169	11,798	77.8

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
3	Arsikere	45,166	3,625	8.0
4	Belur	20,228	8,103	40.1
5	Channarayapatna	34,515	4,494	13.0
6	Hassan	26,376	9,481	35.9
7	Sakleshpur	23,176	4,750	20.5
	District Total	**170,763**	**45,420**	**26.6**

Note: Data presented for Statutory Towns, only having slum population

Slum population is reported from 7 taluks of the district. This works out for the district as a whole at 26.6 per cent. Arkalgud reports an exceptional percentage of 77.8 per cent slum population, followed by 51.7 per cent from Alur. Belur also reported a high of 40.1 per cent. The lowest is from Arsikere with 8.0 percent slum population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Alur (TP)		Medicine
2	Arkalgud (TP)	Mud Pots	Rice
			Cut Sizes of Timber
			Mud Pots
3	Arsikere (TMC*)	Foot Rugs	Foot Rugs
		Plastic Bags	Plastic Bags
		Soapnut Powder	Soapnut Powder
4	Belur (TP)	Steel Almirahs	Coffee
		Coffee	Steel Almirahs
			Potato
5	Channarayapatna (TMC*)	Cut Sizes Of Timber	Edible Oil
		Edible Oil	Jaggery
		Sugar	Cut Sizes of Timber
6	Hassan (CMC*)	Coir Products	Coir Products
		Bamboo Baskets	Cardamom
		Incense Sticks	Coffee
7	Hole Narsipur (TMC)	Matches	Matches
		Agarbathi	Agarbathi
		Coir Products	Coir Products
8	Sakleshpur (TMC)	Cardamom	Cardamom
		Coffee	Coffee
			Pepper
9	Satyamangala (CT)	Jaggery	Potato
			Jaggery
			Coconut

Different commodities are manufactured and exported from the district. Plantation and agricultural products like coffee, pepper, cardamom, sugar, potato, coconut and edible oil etc., are exported. Important manufactured commodities are medicines, steel almirahs, coir products, foot rugs, incense sticks, timber etc. Townwise details are provided in the above table.

(x) Brief analysis of the data on houses and household amenities, Houselisting operations, Census of India 2001 based on inset tables 48 to 52.

Table No.50 gives the distribution of households by availability of different amenities. Data reveals that, 93.0 percent of the households have improved drinking water. 83.5 percent of them have electricity 85.5 percent have bathroom, 27.8 percent have toilet facility and 41.8 percent have drainage facility. All the above facilities are reported to be higher in the urban areas.

The above table provides data on Households using different types of fuel for the purpose of cooking. The households of rural areas of the district mainly use firewood which 89.2 percent. Those using LPG, is 4.1 percent and it is 3.0 per cent of households who use crop residue. The households using other types of fuel is negligible. As far as households of the urban areas are concerned. 46.3 per cent use LPG, 25.7 per cent households use kerosne followed by 24.7 per cent of households using firewood. The households using other types of fuel are again negligible. The data is provided talukwise for the district.

Table No.52 provides data on households availing banking facility and also households possessing specified assets. In terms of percentage, the households of the rural areas of the district availing banking facility is 38.6 per cent and the same for urban areas is 53.6 per cent. As far as other assets are concerned, there is a significant contrast of rural and urban households possessing T.V., Telephone and Scooter/Motor Cycle. The rural households who possess T.V. are 27.2 percent and the same for urban areas is 69.2 percent. With regard to telephone, 6.7 per cent of rural households possess them, whereas 31.2 per cent of urban households have telephone, 7.1 per cent of rural households possess scooter/motor cycle whereas 25.3 percent of urban households have them. The table also provides data on those not possessing any of the specified assets. For rural areas this is 37.6 per cent and for urban it is 19.1 per cent of households who do not possess these assets.

(xii) Archaeology

Paleolithic remains found in the district show that man was resident in the region in those early times. One or two Paleolithic implements were discovered at Karadigudda, a minor site in Alur taluk of the district, while a large number of Paleolithic were found at Kibbanahalli (Tumkur district) at a short distance from the district's boundary.

The Holenarsipur belt in the district forms a part of one of the groups of the Dharwars and it has been established that the Dharwars provided the early man with various raw materials for the manufacture of his tools. Some of the megalithic sites have been discovered in the district. Few stone circles were also discovered at Gunni, Halebid, Honnavara, Pumgame, Kondajii, and Sompur in the district. At Pumgame, a few menhirs were also noticed. At sompur, small moulds were found enclosed by stone circles, some of which had a pit or cavity in the center.

Remains of another race of men from Neolithic Age were also found in the district. They polished stone, made pottery and drilled stone and other hard material. Their implements were still predominantly stones. The remains of their direct descendaints, i.e, the people of Iron age are found widely scattered in the district. Along with iron implements, wheel made pottery; they used other metals too.

There are many old monuments of archaeological importance in Hassan district, like, 'Jinalayas' or 'bastis', i.e, the temples dedicated to Jain saints, and 'stambhas' or pillars and memorial slabs or 'veeragals'.

The bastis situated on chandragiri hill date probably from about 8th century. Among them are Shantinatha, the Suparshvanatha, the Parshvanatha, the Chandragupta and the Chandraprabha bastis. The Chandragupta basti which is the smallest basti on this hill, have figures of Parshvanatha, Padmavati and Kusmandinidevi, in three cells and those of Dharmendra Yaksha and Sarvahana Yaksha in the Verandah. Chandraprabha basti, built in the beginning of 9th Century, have figure of the 8th Teerthankar Chandraprabha with images of Yaksha and Yakshini. The Chamundraya basti, built on the same hill is the largest and most beautiful of the temples on the hill.

Among the pillars, one of the noteworthy pillars is the Kuge Brahmadeva Pillar at the south entrance to the enclosure on Chandragiri Hill at Shravanabeloagola, with a small seated figure of Brahmadeva on the top facing east. Another pillar named the Thyagada Brahmadeva pillar is a more beautiful and greater work of art, set up by Chamundaraya, with an inscription containing account of his exploits.

Among the statues, the colossal statue of Gommateshvara at Shravanabelagola, is the greatest monument of Ganga Period, the height of which is about 57 feet. Among the other, the Lakshmidevi temple at Doda-Gaddavalli which is in the rare quadruple form, is an architectural gem and is one of the earliest examples of the Hoysala style. The Keshava temple at Belur and Hoysaleshvara temple at Halebid may also be regarded as masterpiece of the Hoysala style. Besides these, the district is known for its places of tourist and religious importance. These are discussed in detail in the following paragraphs.

(xii) Brief description on places of religious, historical or archaeological and tourist importance in villages and places of tourist interest in the towns of the district

Chatchatanhalli (Belur Taluk): The village has a temple dedicated to Chatteshvara. It is a Trikutachala temple and while in one cell a linga is enshrined in the other two there are the idols of Vishnu and Surya, the Sun God. All the cells have a ‘sukhanasi’ - a rare feature in the temples of this style. The ceiling panels are elegantly executed. This temple was built by Chatta Dannayaka, a Hoysala officer in about 1200 A.D.

Halebid (Belur Taluk): This village marks the site of Dorasamudra or Dwarasamudra (also called Dwaravatipura) which was founded early in the eleventh century and developed into the wealthy capital of the Hoysalas. The city was sacked and plundered by general Malik-Kafur in 1311 A.D. In 1327 another invasion destroyed the city. The splendour of this ancient city is attested to not only by the accounts of the Muslim historians mentioning the fabulous wealth obtained from its conquest by the invading forces but also by its architectural monuments which even now rank among the best masterpieces of art and architecture. The most remarkable of these are the temples of Hoysaleshvara

and Kedareshvara. The latter, though smaller in size is a gem of art. According to inscriptions this temple was built by Ballala II and his consort Abhinava Ketaladevi at the beginning of the 13th century. The eleborateness of ornamentation of these temples can be compared to jewellery. Fergusson, the great authority on architecture, has described this temple as one of the most exquisite specimens. The Hoysaleshvara temple which was built in about 1141 A.D. consists of four entrances, one on the north, another on the south and the other two on the east. This temple is the largest existing structure of the Hoysala style. The elaboration of ornamental sculpture round the walls and the general architectural effect are marvellous. The Kedareshvara temple closely resembles the Channakeshava temple of Somanathapura. The terrace on which the temple is built is supported at the angles by figures of elephants facing outwards. This temple has three cells, that in the north having no entrance.

There is a Vishnu temple, also of the Hoysala period, which was rebuilt by the Vijayanagara rulers with the help of the salvaged material in the Dravidian style. Like Belur, Halebid is also a centre of attraction for the artist and the archaeologist as well as the ordinary tourist. Any visitor to these shrines is readily fascinated by the beauty and artistic appeal of the sculptures.

Arakere (Arsikere Taluk): The Rameshvara temple, which is an exact replica of the temple of the same name in Bandikere village of Alur taluk, has an excellently carved idol of Vishnu leaning against the wall opposite to the entrance. The idol of the Sun god is also exquisitely carved and richly ornamented. A large sized Viragal with an inscription found near this temple refers to the reign of the Ganga King Ereyappa (887-935 A.D.).

Bommenahalli (Arsikere Taluk): This village has one of the largest inscription stones which is more than 3.3 metres high and about a metre in width. It belongs to the reign of Hoysala Ballala II and is dated in 1194 A.D. The inscribed matter is said to have been composed by poet Trivikrama.

Harnahalli (Arsikere Taluk): There are the remains of an old fort which is said to have been erected in 1070 A.D. by Someshvara Raya, a local chief. The Channakeshava and Someshvara temples of this place are good specimens of Hoysala architecture and are attributed to the 13th century. In both the temples there are towns of elephants etc., on the outer walls.

Hullekere (Arsikere Taluk): The temple dedicated to Channakeshava which is now in a dilapidated condition built in the Hoysala style during the year 1163 A.d. All the ceiling panels inside the temple are of very good workmanship and the central panel is the best amongst them. The Channakeshava idol here is well-carved and ornamented. From an inscription in the temple it is learnt that the temple was built in 1163 A.D., during the reign of Narasimha I. The temples of Saptamatrikas, Ishvara and Anjaneya are also quite noteworthy.

Javagal(ArsikereTaluk): The Lakshminarasimha temple here is a good specimen of Hoysala on the outer walls. The temple has a lofty outer entrance and a Jagati, or raised platform, and has three cells enshrining Keshava in the main cell, Gopala to the right and Lakshminarasimha to the left. However on the basis of the labels below some of the large sculptures giving out the names of the sculptors, it has been surmised that the temple was built during the 13th century A.D. Altogether there are 137 large figures on the walls, of which 77 are of females and the rest of males. The temples of Gangadhareshvara, Veerabhadra, Chandrakantha (a Jaina Basti) and Banashankari are also worthy of note.

Kalasadarahalli(ArsikereTaluk): Garudanagiri, a conspicuous hill fort at an altitude of about 1100 MSL, is located in this village. This hill was formerly known as Nonabankal and acquired the name Garudanagiri in 1660 A.D. , when it was fortified by the Wodeyars of Mysore. In 1770 this place was occupied by the Maratha forces under Tryambak Rao after the defeat of Haider Ali at Chinkurali, but was restored by Mysore on the conclusion of the peace treaty. After the fall of Tipu Sultan this fort was taken over by the British and was garrisoned for some time by the Mysore troops. The fort is now in ruins.

Tirupathi(ArsikereTaluk): Known as Malekal-Tirupathi, this place has a temple dedicated to Venkataramanaswamy. A flight of 1700 steps leads to the temple which is built on the summit on the northern side of the Hirekal hills. At the foot of the hills there is a large temple enshrining Govindaraja

Swamy. Both the temples are frequented by a large number of devotees throughout the year. An annual car festival held here in July is an event of considerable importance and on this occasion a cattle fair is also organised.

Bastihalli(HassanTaluk): The Parshvanatha basti here is a Hoysala structure with a grand central hall and a beautiful mukha-mantapa or front hall. The former is supported by 14 black stone pillars of exquisite workmanship while the latter is supported by 32 pillars all of which are of the same design but are of three different sizes.

Boovanahalli(HassanTaluk): In ancient days this place was known by the name Agrahara periyam Boovanahalli and was duly protected by a strong fort. There are about half a dozen temples here and these are dedicated to Channakeshava, Shridevi, Ramadevaru, Basaveshvara, Shivalinga swamy and Ganapathi.

Doddagadduvalli(HassanTaluk): The Lakshmidevi temple of this village is situated in a courtyard enclosed by an old stone wall, about 2 metres high and is in the rare quadruple form constituting an earliest example of the Hoysala style. Its chief merit lies in the symmetrical disposition of its plan. At the corners of the enclosure are four small shrines surmounted by stone towers and Hoysala crests. This temple was caused to be built by Kullahana Rahuta in1114 A.d. The presiding deity here is called Dakshina Kollapuradamma and this is enshrined in the eastern cell. The western cell enshrines a linga called Bhutanatha while the southern and northern cells enshrine Bhairava and Kali respectively.

Heragu (Hassan Taluk): The Keerti-Narayana temple of this village was built in 1217 A.D. It consists of a *garbhagriha*, *sukhanasi* and a *navaranga* and is of the early Hoysals style with plain outer walls and a step like tower of uncarved blocks. The *Kalasha* is very fine and so also the *navaranga* ceilings are well carved. The main deity here is a 2 metres high idol which is flanked by the idols of Shridevi and Bhudevi.

Kondajji (Hassan Taluk): The village is noted for temple enshrining a 4.2 metres high idol of Channakeshava, also known as Allalanatha.

Markuli (Hassan Taluk): The village is noted for its ancient basti which is a small but beautiful structure of the early Hoysala style. An inscription stone in front of the basti indicates that it was built in 1173 A.D., by Buchimayya, a minister of Ballala II. It is three-celled shrine consisting of three *Garbhagrihas*, three *Sukhanasis*, a *Navaranga* and a porch. The chief i.e. the south cell in the main temple contains a seated figure of Adisvara in the Yogo-mudra pose. The eastern and the western cells contain the standing images of Bahubali and Parshvanatha respectively.

Mosale (Hassan Taluk): According to a local tradition, in the days of yore sage Jamadagni had his hermitage here. The village has two Hoysala temples dedicated to Nageshvara and Channakeshava respectively - which stand side by side and are separated only by a few feet. Such juxta-positioning of a Shiva temple with a Vishnu temple is indeed a very rare event. Further, it is of interest to note that these two temples are identical in design and workmanship. On the basis of style and architectural characteristics, these have been assigned to the 13th century A.D. Each temple surmounted by an elegant tower elaborately carved with intricate geometrical patterns and highly complicated designs.

Shantigrama (Hassan Taluk): The village has four temples of which the one dedicated to Keshava is the largest. The Yoga-Narasimha temple has some delicate floral work and within its precincts there are three badly effaced inscription stones. The Dharmeshvara temple was built in 1123 A.D. by Narasingayya the father of Shantala Devi, the chief queen of Vishnuvardhana. Veerabhadra temple has two cells, the main cell enshrining Veerabhadra facing east and the other facing north. This temple has a good figure of Mahishasura-mardhini or Kali.

Belavadi (Arkalgud Taluk): This village is said to have been an important Jaina settlement during the times of the early Hoysala kings. The village is now famous for its beautiful Vishnu temple which is a large trikutachala temple and is supposed to be the biggest in size among such temples in the State. In it are enshrined the idols of Veera-Narayana, Venugopala and Yoga-Narasimha. The temple is attributed to the

11th-12th century. The Veera-Narayana idol which is about 2.4 metres high excels the other two in beauty and workmanship. The Yoga_Narasimha idol is about 1.8 metres high. This idol is said to rank amongst the best Venugopala figures available in the State.

Ramanathapura(ArkalgudTaluk): Picturesquely situated on the left bank of the river Cauvery this is a noted centre of pilgrimage. The Vahni-Pushkarini (Pond) here is considered sacred. The village has as many as seven important temples. The Subramanyeshvara temple is a large structure built in the Dravidian style and enshrines a seven-hooded serpent which is of good workmanship. The car festival of this deity is celebrated on "Margashira Shudda Shrashti" every year and on this occasion a cattle fair as well as a rural exhibition are also being organised. The temple of Agastyeshvara is another important temple and the car festival of this deity is held on the day following the Mahashivaratri festival. The deity in the Durga-rameshvari temple is believed to have been installed by Adi-Shankaracharya and is particularly popular among the worshippers of Shakti.

Ane Kannambadi(HoleNarsipurTaluk): It has the remnants of an old fort from which it can be surmised that the fort was built of stones of a gigantic size. The village has a temple dedicated to Narayana. This temple conforms to the early Hoysala style and is assigned to the first quarter of the 12th century A.D.

Doddakunche(HoleNarsipurTaluk): This village was ruled by palegars for some time and has the ruins of a old fort.

Hallimysore(HoleNarsipurTaluk): The village has an old Virgal of the times of Ganga King Marasimha (961-974 A.D.). According to a local tradition this was the capital of a small kingdom and several of the surrounding villages once formed its suburbs.

Agrahara Belguli(ChannarayapatnaTaluk): The village is noted for its ancient temples of Keshaveshvara (also known as Betteshvara) and Someshvara. The Keshaveshvara temple is the larger of the two and has some fine carvings in the interior. This was built in 1210 A.D. by Keshava Dannayaka an officer of Ballala II. This has a main cell for Shiva with a vestibule, a minor cell for Keshava, a large navaranga with a porch on the south and cross-shaped mukha-mantapa.

Dindagur(ChanarayapatnaTaluk): Pandita Dandanatha is believed to have founded this agrahara during the early part of the 13th century. The village has two temples dedicated to Keshava and Malleshvara respectively and both belong to the same period.

Halebelagola(ChannarayapatnaTaluk): The village has a ruined Jaina temple which was built in about 1094 A.D. in the Hoysala style of architecture. The central ceiling of the navaranga which is beautifully carved has the figures of ashta-dikpalakas.

Hebbalalu(ChannarayapatnaTaluk): The Singeshvara temple which is a Hoysala structure is located in the tank bed of this village. This temple consists of a *garbagriha*, a *sukhanasi* and a *navaranga* with a fine porch in front of the south entrance. This was built in about 1200 A.D. during the reign of Hoysala King Ballala II.

Jinnathapura(ChannarayapatnaTaluk): According to an inscription this village was founded by Ganga Raja, a general of Hoysala king Vishnuvardhana in about 1117 A.D. The Shantinatha basti here is a fine specimen of the Hoysala style of architecture and is one of the most ornate of the Jaina temples. The navaranga has four elegantly executed pillars adorned with bead work, one of them being in an unfinished condition. The outer walls have a row of large images surmounted by beautiful turrets and scrolls. On a rock to the east of the village there is another more ancient Jaina temple known Aregal basti. It enshrines a seated marble figure of Parshvanatha canopied by an eleven-hooded serpent. The basti contains metallic figures representing the 24 Teerthankaras, Panchaparameshtis, Navadevatas and Nandishvara. To the south-west of the village there is Samadi mantapa, a square stone structure containing an inscribed Jaina tomb. This was built by Bairoja to commemorate the death of Bala Chandradeva's son in 1212 A.D.

Kundur(ChannarayapatnaTaluk): The village is noted for its matha, and the temples of Chamundeshvari, Ranganatha and Subramaneshvara.

Nuggehalli(ChannarayapatnaTaluk): Inscriptional evidence shows that in 1246 A.D.

Bommanna Dandanayaka founded an agrahara at this place which at that time was called Somanathapura. He has also credited with the construction of the Lakshminarasimha temple and the installation of the main idol in it. Below some of the sculptured figures, sculptors have engraved their names. The Sadashiva temple is a find specimen of Hoysala style. The 'sanctum sanctorum' is surmounted by a carved stone tower with the Hoysala crest in the front.

Places of interest in and around the towns

Among the towns of the district, Belur, Shravanbelgola and Hassan deserves a special mention while a passing mention would suffice in all other cases.

Arsikere has a large tank constructed during the Hoysala period (11th century A.D.). The Ishvara temple here is an important Hoysala structure (1220 A.D.) and is noted for its beautifully sculptured porch. The 40-day long Ganesha festival being observed here as a public function every year has acquired considerable fame in the neighbourhood. Gorur town is noted for its Yoga-Narasimha temple which stands on the banks of the Hemavathy. Trikuteshvara and Kailaseshvara temples are also of interest.

Hole Narsipur town is also on the banks of the Hemavathy and has the remnants of an ancient fort which was built in 1168 A.D. by Narasimha Nayaka. This town is the residence of the chief of the Uttaradhi Matha. The headquarters of the Adhyatma Prakash Karyalaya, an institution founded by Sachchidananda Saraswati for the study and practice of Adhyatma (spiritualism) is also located in this town.

Sakleshpur town has a comparatively modern Dravidian temple enshrining Sakaleshvara, the presiding deity of the place. This town is the gateway to Mangalore and also to the Bisle Ghat which leads to Kukke Subramanya the renowned pilgrim centre. Manjarabad Fort, built around 1792 by Tipu Sultan, is situated about 6 kms to the south-east of this town. Built of stones and mud to resemble an eight pronged star this fort is surrounded by a moat all around and its parapet walls are provided with canon mouths and musket-holes in order to render it impregnable.

Belur, the famous tourist centre is situated on the banks of the river Yagachi and contains marvellous temples. Hoysala king Vishnuvardhana caused the construction of the famous Channakeshava temple to commemorate his victories. This is now a national monument. The idol of Channakeshava, also known as Vijayanarayana is about 4 metres high. On the jambs of the eastern door are sculptured the beautiful figures of Rati and Manmatha - a rare feature in the temples of this type. The architectural beauty of this temple is superb in every way, the work in the inner portions being finer. The madanike figures supporting the caves on the outer walls known as Shila Balikeyaru have no parallel. The fertility of design, the thoroughness of finish, the richness of ornamentation and the elaboration of details speak most highly of the skills attained by sculptors of those days. The annual car festical of Channakeshava is held during the bright half of the Chaitra and for this purpose the temple has a magnificent severn-storeyed chariot which was constructed recently. Belur town has the tomb of Raghavanka, a famous Kannada poet of the 13th century.

Hassan is known as the poor man's Ooty on account of its salubrious climate. Though the town itself does not contain any places of tourist interests it has been developed into a prominent tourist centre because of its proximity to Belur and Halebid on the one hand and the infrastructural facilities it has been enjoying all along on the other. Being an important centre of road and railway transport as well as of commerce, the town offers comparatively good boarding and lodging facilities to the tourists. Hassan town has an interesting temple which enshrines an ant-hill representing Hasanamba, the presiding deity of the place. There is the ancient Siddheshvara temple which was constructed by Venkatappa Nayaka and his son Krishnappa Nayaka. The main idol here is believed to have sprouted on its own from underneath the surface of the earth (udbhava moorthy) and it is said that water would always be oozing out from its forehead.

Shravanabelagola is one of the main pilgrimage centres for the Jains and is a place of great historical and cultural interest in general. The celebrated saint Bhadrabahu and Chandragupta Maurya are stated to have encamped and attained salvation here. The town lies picturesquely between two rocky hills. The larger hill, known as Doddabetta, or Vindhyagiri or Indragiri has on it, the colossal statue of Gommateshvara. The

statue is 57 feet high and is surrounded by several sacred structures. The ascent to the summit is by a flight of 500 steps cut in the granite rock. Chavundaraya, a general and minister of the Ganga King Rachamalla got this statue made in about 978-983 A.D. The Chikkabetta or Chandragiri contains 13 bastis, all within a walled enclosure. All these bastis are built in the Dravidian style and the oldest structure is of the 8th century A.D. The town proper contains a big Jain temple, called the Bhandari Basti, as also Akkana Basti, Siddhanta Basti, Danasale Basti and an important Jain Matha. Mahamastakabhisheka, the head-anointing ceremony is performed once in about 12 years depending upon certain specified conjunctions of the heavenly bodies. The earliest reference to such an event is found in an inscription dated in 1398 A.D. The ceremonies connected with a anointment last for twenty days and during this period the entrie town and its neighbourhood wears a festival look.

(xiii) Scope of Village Directory and Town Directory

Village Directory

Village Directory provides micro-level data which will help the planners in formulation of micro-level developmental plans as the C.D.Block is the lowest administrative unit for developmental planning. Village wise information regarding the availability of certain basic amenities and facilities within the village, as also that on the manner of utilization of the land in the concerned village are furnished in the village directory. The village directory format adopted for the 2001 Census has 23 columns whereas in the 1991 Census there were only 18 columns. When compared with the 1991 Census Village Directory format, column 9 which refers to the day or days of weekly market/hat if any has been now left out. New inclusions are in respect of facilities like banks, agricultural credit societies, non-agricultural credit societies, other cooperative societies, number of recreational and cultural facilities like cinema/video hall, sports club, stadium/auditorium; receipt of news papers/magazines and the name of the most important commodities manufactured in the village. In all the 23 columns in this tabulation statement, first 3 columns relates to serial number, name of the village with location code and area of village while the next 2 provide information on total population and number of households in the village as per 2001 Census. The next 8 columns relate to basic amenities such as educational; medical; drinking water (potable); post, telegraph and telephone, commercial and cooperative banks, agricultural, non-agricultural and other credit societies, number of recreational and cultural facilities such as cinema/video hall, sports club and stadium/ auditorium and communications (bus service, railway station, waterway). Information in respect of approach to village, nearest town and distance in Kms., power supply, receipt of news paper/magazine, names of the most important commodities manufactured in the village are furnished in columns 14 to 18. Amenities available within the villages are shown in the respective columns and if a particular amenity especially Primary School, Middle School, College, Allopathic Hospital, PHC, MCW, Post Office, Telephone, etc., is not available in the village, the respective abbreviation is given and next to it in brackets the distance in broad ranges viz., <5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility available to that particular village is indicated. The next 5 columns, 19 to 23 provide information regarding land use (i.e., area under different types of land use in hectares rounded to two decimal places) such as forest, irrigated land by source of irrigation, un-irrigated, cultivable waste (including gauchar and groves) and finally the area not available for cultivation.

Town Directory

The Town Directory section contains seven statements (I to VII) which furnish information on all the statutory towns in the district, on aspects such as growth history, physical aspects and location of towns, municipal finance, civic and other amenities in the town, medical, educational, recreational and cultural facilities, trade, commerce, industry and banking in the towns, civic and other amenities in slum areas of the town. The scope of the various column headings adopted during 1991 Census has remained unchanged in 2001. The towns are arranged in an alphabetical order for the district.

Note :

1. The area figure for the district given under column No 4 against " Total" represents "Geographical Area" and has been furnished by the Surveyor General India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D. Blocks/Taluks in this district will not tally with the district figures (except urban), because the area figures for C.D. Blocks/Taluks represents the land-use area based on village wise area figures as reported by the local officers. The total area of the taluk may not tally with the aggregate of the areas of the villages listed for Census purposes for it includes the area of the statutory as well as non-statutory towns, villages which may be fully submerged and reserve forests which may not form part of any revenue village, if any, within the jurisdiction of the concerned taluk. The total area of the C.D. Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2. Out growths of towns in urban agglomerations are denoted by letter "OG".

3. The following abbreviations have been used to indicate the Civic Administration Status of town.

M.Corp	:	*Municipal Corporation*
CMC	:	*City Municipal Council*
TMC	:	*Town Municipal Council*
TP	:	*Town Panchayat*
NAC	:	*Notified Area Committee*
CB	:	*Cantonment Board*
CT	:	*Census Town (Non-Municipal Census Town / Non-Statutory Town)*

SECTION – I

VILLAGE DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and cooperative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and un-inhabited villages.

Column 3 : Area of the village

The area of the village in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are treated as equivalent to Pre-University Course.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health SubCentre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Hand pump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	S

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist

is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12: Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If the village receives any News Paper/Magazines, the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23: Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Unirrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash "-" is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water fa cilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix- VII-A, VII-B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Grama Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

TOWN DIRECTORY

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I: Status and Growth History

Column (2): Class, name and civic administration status of town:

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 99,999	II
20,000 49,999	III
10,000 19,999	IV
5,000 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II Physical Aspects and Location of towns, 1999.

Column 3 to 5: Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8:

Name of the State headquarters, District headquarters and SubDivisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10:

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13:

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Itemwise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV: Civic and Other amenities, 1999

Column (1 to 5): Self explanatory.

Column (6): Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7): System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows:

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11: Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12: Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes:

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14: Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tubewell water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilolitres (in bracket) are presented in column 14.

Column 15: Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20: Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3: Self explanatory.

Column 4 & 5:

The data covers all such medical institutions run by or aided by Government/Semi Government/Local

bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes:

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below:

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9:

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10: Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used:

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/ Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, PrePrimary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16: Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19: Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/ Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20: Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows:

(i) Public Library	PL
(ii) Reading room	RR

Statement VI: Trade, Commerce, Industry and Banking, 1999

Column 3 to 8: Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9: Number of Banks

Number of Banks available in the referent town both Commercial and Cooperative banks are recorded against this column.

Column 10 & 11: Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII: Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

APPENDIX : TOWNS SHOWING THEIR OUTGROWTHS WITH POPULATION

Sl. No.	Name of Town with location code	Population of the core town	Name of Outgrowth	Population of outgrowth
1	2	3	4	5
		Nil		

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the

coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Cenus Abstract	Level of presentation
1. District Primary Census Abstract	District/CDBlock/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CDBlock/Town
3. Primary Census Abstract for Scheduled Tribes	District/CDBlock/Town
4. Village Primary CensusAbstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/WardLevel

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the taluks/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE – II

NOTE ON FERTILITY & MORTALITY AND MIGRATION – 1991 & 2001 CENSUS

Fertility levels

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below : -

MIGRATION

What is Migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another state of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why people migrate?

As in 1981 census, the reasons for migration were elicited in 1991 & 2001 census also. The reasons for migration were broadly categorized as (1) employment (2) business (3) education (4) family moved (5) marriage (6) natural calamities like drought, floods etc. and (7) other reasons. Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region

Marriage and age at marriage are important social phenomena and crucial factors in the analysis of the dynamics of fertility. As such, various measures of fertility estimated based on these crucial factors are highlighted in the above table.

Estimates of General Fertility Rate (GFR) a refined measure of fertility, defined as the number of live births per thousand women in the reproductive age-group 15-49 years is a useful tool for measuring fertility, and this rate is further estimated only for the married women which is defined as General Marital Fertility Rate (GMFR). The GFR and GMFR for the district are 97 and 136 respectively.

The cumulative value of the age-specific fertility rates at the end of the child bearing ages gives a measure of fertility known as Total Fertility Rate (TFR). It indicates average number of children expected to be born per woman during her entire span on reproductive period assuming that the age specific fertility rates to which she is exposed to, continue to be the same and there is no mortality. The same is expected for married women known as Total Marital Fertility Rate (TMFR). The estimated TFR and TMFR for the district are 2.90 and 5.12 respectively. The Crude Birth Rate (CBR) is 27.56.

The most useful indices that can be derived from the question on number of Children born alive is the average number of children ever born per ever married women by age-group. Since most of the women complete their reproduction be the age-group 45-49, this indices is termed as completed fertility. The

category ever married includes widows, divorced and separated women. As such the completed fertility for the district is 4.42. The child women ratio which is a relative measure to know the fertility performance of a women is 410 in the district.

One of the parameters, presenting female age at marriage relates to all women who live with their husbands, where some of them might have been recently married and some of them decades ago. It can be observed that mean age at marriage of the currently married women of Hassan district is higher than the state figure of 18.00.

27	Chamarajnagara	57	75	81	89	57	86	92	97	58	64	75	86

The estimates of mortality indicators presented above have been obtained through indirect estimation using the data on the number of children ever born and number of children surviving to ever married women. The information on questions on children ever born and children surviving canvassed for all ever married woman have been tabulated by the age of the mother. This data has been converted into estimates of probability of dying before attaining a given age. These estimates have been worked out using Brass technique where (qi) is the probability of a newborn child dying before the age i = 1, 2, 3 and 5. The table above shows the estimates of infant and child mortality derived for the year 1991 by sex.

The infant mortality rate (q1) for the person is 61and for male and female are 73 and 44 respectively. The estimates of under 5 mortality (q5) for person is 78 and for male and female are 80 and 76 respectively.

Source : Migration Tables of 1991 & 2001 Census

The Anenxure IV(1) presents data of migrants on migration by their place of birth. The majority of migrants are those who are born within the state of enumeration, which constitute 97.82 per cent as per 2001 Census. Among them, migrants born elsewhere in the district are larger than migrants born in other districts of the state. Considerable proportion of population from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (2) - PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF LAST RESIDENCE

Source : Migration Tables of 1991 & 2001 Census

The Annexure IV(2) presents data on migration by their place of last residence. As far as the district is concerned, it can be seen that migrants whose place of last residence was within the state of enumeration but outside the place of enumeration, constitute major proportion of migrant population. As per 2001 Census, their percentage accounts for 98.01. Among them, more is the inflow from within the district. Considerable proportion from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (3) - INTERSTATE IN-MIGRATION TO HASSAN DISTRICT

Sl. No.	Place of Birth	1991 Census		2001 Census	
		Migrants	Percentage of total migrants	Migrants	Percentage of to total migrants
1	2	3	4	5	6
1	Andra Pradesh	1,890	12.91	2,020	17.72
2	Goa	40	0.27	0	0.00
3	Kerala	3,680	25.14	2,157	18.92
4	Maharashtra	490	3.35	478	4.19
5	Tamil Nadu	7,128	48.70	4,095	35.92
6	Rajasthan	0	0.00	1,272	11.16
7	Total for 5 states	13,228	90.37	10,022	87.92
8	Other states	1,410	9.63	1,377	12.08
	Total	**14,638**	**100.00**	**11,399**	**100.00**

The interstate in-migration to the district by their place of birth provided above, highlights the States with the largest contribution of migrants to the district. According to 2001 Census findings, large inflow of migrants are from Tamilnadu which constitute 35.92 per cent. Considerable proportion of migrants are from Kerala, Andhra Pradesh and Rajasthan that works out to 18.92, 17.72 and 11.16 per cent respectively. Further the category migrants from `Other States' has increased from 9.63 per cent in 1991 to 12.08 per cent in 2001.

ANNEXURE IV(4) - RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH

Place of Birth	Place of Enumeration-1991			Place of Enumeration-2001		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1. Within the state	491,316	375,739	115,577	558,965	449,721	109,244
	100.00	76.48	23.52	100.0	80.5	19.5
2. In other states of India	14,638	7,380	7,258	12,266	6,752	5,514
	100.00	50.42	49.58	100.0	55.0	45.0

Rural and urban composition of internal migrants by their place of birth is provided in the above statement. The data for both the Census points out that majority of migrants within the State as well as from other states of India have migrated to rural areas of the district. The details can be seen from the Statement.

ANNEXURE - V

Brief account of Main Religions in the District / Taluk as per 2001 Census

Religion forms an integral part of Indian Social System. For an Indian, it is a way of life rather than a faith. Indian Census, since its inception is collecting data on religion and presenting the same in its reports. In the pre-independence Census reports, the data on religion was being presented for 6 major religions viz., Hindus, Muslims, Christians, Sikhs, Jains and Buddhists. Besides, the minor religions have been classified under the category of 'Others'. The data on religion collected and presented by the Indian Census is the basic data of immense use for the researchers, anthropologists, sociologists, demographers, administrators, planners and even for a common man.

ANNEXURE V(1) - PERCENTAGE DISTRIBUTION OF POPULATION BY MAJOR RELIGIONS IN INDIA AND KARNATAKA DURING 1991 & 2001 AND ITS GROWTH RATE DURING 1981-1991& 1991-2001

Sl No	Religion	India				Karnataka			
		Percentage of Population during 1991	Percentage growth rate 1981-1991	Percentage of Population during 2001	Percentage growth rate 1991-2001	Percentage of Population during 1991	Percentage growth rate 1981-1991	Percentage of Population during 2001	Percentage growth rate 1991-2001

India - State differentials

The comparative data of the country and the state of Karnataka presented in Annexure V(i) reveals that the religion wise concentration of population in the state of Karnataka is of three major religions viz., Hindus, Muslims and Christians. Hindus are returned on the higher side with over three per cent more than the national average. Christians recorded nearly one per cent less whereas the proportion of Muslims in the state to national population was almost the same. There are 85.5 per cent Hindus, 11.6 per cent Muslims and 1.9 per cent Christians in Karnataka as against that of 82.4 per cent Hindus, 11.7 per cent Muslims and 2.3 per cent Christians in India. In regard to concentration of other three major religions viz., Sikhs, Buddhists and Jains it is observed that Jains with 0.7 per cent form the fourth major religion in the state whereas Buddhists with 9.8 per cent is the third major religion in India. In the Indian scene the Sikhs form fifth major group, whereas in Karnataka, Buddhists and Sikhs are placed fifth position.

Religion wise growth in the state during the decade 1981 - 91 reveals that the major religions viz., Hindus, Muslims and Christians recorded a growth rate in lesser degree i.e., 20.7 per cent, 25.7 per cent and 11.1 per cent respectively, against that of 22.3, 26.1 and 16.9 per cent in India as a whole. On the other hand Buddhists, Sikhs and Jains recorded a growth rate of 72.8 per cent, 57.8 per cent and 14.6 pecent respectively for the state against that of 34.0, 24.2 and 3.9 per cent respectively for India. Thus, the Jains recorded a higher growth of nearly 11 per cent in the state than that of India as a whole during the decade 1981 - 91.

Percentage distribution of population during 2001 Census, by major religions in India and Karnataka shows that Hindus form majority of the population with 80.5 and 83.9 per cent respectively, while Muslims form 13.4 and 12.2 per cent for the country

and state respectively. The proportion of these religions for the country and state, during 1991 Census was 82.4 per cent and 85.5 per cent for Hindus and 11.7 and 11.6 per cent for Muslims. There are not much noticeable changes are found in other religions. Persons who have not reported to which religion or faith they belong to has increased in Karnataka, as its proportion to the total population has increased from 0.1 per cent in 1991 Census to 0.3 per cent during 2001 Census.

ANNEXURE V(2) - DISTRIBUTION OF POPULATION UNDER EACH RELIGION TO TOTAL POPULATION IN THE DISTRICTS OF KARNATAKA - 1991 CENSUS & 2001 CENSUS

The above table furnishes the composition of six major religions along with 'Other Religions' and 'Religion not stated' among the districts of the state during 2001 Census along with 1991 Census. As may be seen from the table that the proportion of population to total population during 2001 Census is below 5 per cent for 23 districts of the state and is between 5-10 per cent in 3 districts. Only Bangalore district has the distinction of having more than 10 per cent of the total population of the state in its jurisdiction. During 1991 Census the situation was almost similar with 22 districts having a proportion of less than 5 per cent and 4 districts had more than 5 per cent but below 10 per cent. With 10.8 percent of the total population Bangalore district occupied the top position.

Of the total population of the state, proportion of districts having Hindus and Muslims was uniform during both the Censuses i.e. less than 5 per cent of the total population in 21 districts for Hindus and 23 districts for Muslims, while in 5 and 3 districts respectively for Hindus and Muslims had a proportion of 5-10 per cent and Bangalore district alone had more than 10 per cent.

ANNEXURE V(3) - PERCENTAGE AND DISTRIBUTION OF POPULATION BY MAJOR RELIGION IN KARNATAKA AND HASSAN DISTRICT - 1991 & 2001

	KARNATAKA				HASSAN			
	1991		2001		1991		2001

Religion not stated	36,121	0.10	120,247	0.23	2,506	0.16	5,244	0.30

The percentage distribution of population by major religion in Karnataka and Hassan district for 1991 and 2001 Censuses are presented in the above table. As may be seen from the table that in Karnataka, Hindus form 85.5 and 83.86 per cent of the total population during 1991 and 2001 Censuses, followed by Muslims and Christians. The corresponding statistics for the district does not differ much as Hindus and Muslims occupy the top two places followed by Christians. These three religion cover more than 98 per cent of the total population of the district. Remarkable increase in the proportion of Buddhists population has been noticed between 1991 and 2001 Censuses in the State.

Note: A: Actual, P: Percentage

Talukwise distribution of population following major religion is presented above. As far as the district is concerned, majority of the population follow Hindu faith in all the taluks. This is followed by Muslims and Christians in Hassan district. A comparison between 1991 and 2001 Census data expose marginal variations in different faiths persuaded by the population during the decade.

The level of education by sex for the district and the State during 1991 and 2001 Census are presented in the above annexure. It can be seen that percentage of illiterates during the decade has decreased vis-a-vis for the State and the district. Though the male literates out number females, the percentage of women folk acquired literacy during the decade is more than the male population. The comparison of data for the two censuses reveals it so for the State and the district. The different educational level attained by the population can be seen in detail in the above annexure.

ANNEXURE - VIII

Distribution of different Mother Tongue returned during 1991 & 2001 Census

As a part of census publication program the data on spoken languages/mother tongues will be presented under C series. The table C-7 shows the distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each for district, with total, rural/urban and male/female break ups. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table divided into Part A - scheduled languages with the mother tongues grouped under each and Part B - Non-scheduled languages with the mother tongue grouped under each. The definition of 'Mother Tongue' is the same as in 1991 Census. The instructions to the enumerators in regard to this question read as under:

Record Mother Tongue in full, whatever be the name of the language returned by the person enumerated. The definition of Mother Tongue is the same as in 1991. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the Mother Tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded".

As the above instructions to the enumerators would show, the respondent was made to feel free to return the name of his/her mother tongue and the same was, recorded faithfully by the enumerators. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census are basically, the designations provided by the respondents. These designations or mother tongue labels need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects the raw returns of census were subjected to thorough scrutiny and rationalization. This resulted in 1,576 rationalised mother tongues in 1991 for the entire country, which were further classified following the usual linguistic methods. The total number of languages so arrived at is 114 returned by 10,000 or more speakers at the all-India level and grouped under appropriate languages.

As many as 21 languages are returned by the people of Hassan district of which 16 are scheduled languages and 5 are non schedule languages. However, there are a total of 42 identifiable mother tongues which returned 10,000 or more speakers each at all India level. Comprising 16 mother tongues grouped under the scheduled languages (Part A) and the 6 mother tongues grouped under the non- scheduled languages (Part B). Those mother tongues which returned less than 10,000 speakers each and which were classified under particular language are included in ‘Others’ under that language.

Statement II

Part A : Languages in descending order of strength with their percentage to the total population of the district (percentage of only those languages have been shown which comprise at least 0.01 per cent of the total population of the district) - 1991

TOTAL POPULATION OF HASSAN DISTRICT: 1,569,684

Sl. No.	Language	Speakers	Percentage
1	2	3	4
1	Kannada	1,368,107	87.16
2	Urdu	81,083	5.17
3	Telugu	35,904	2.29
4	Tamil	22,109	1.41
5	Malayalam	13,032	0.83
6	Hindi	11,956	0.76
7	Marati	8,722	0.56
8	Konkani	4,715	0.30
9	Gujarati	782	0.05
10	Nepali	62	Ng
11	Punjabi	44	Ng
12	Oriya	29	Ng
13	Bengali	28	Ng
14	Sindhi	04	Ng
15	Kashimiri	03	Ng
16	Sanskrit	02	Ng

Part B : Languages in descending order of strength with their percentage to the total population of the district (percentage of only those languages have been shown which comprise at least 0.01 per cent of the total population of the district) - 1991

Sl.No.	Language	Speakers	Percentage
1	2	3	4
1	Tulu	20,908	1.33
2	Coorgi/Kodagu	759	0.05
3	Arabi/Arbi	262	0.02
4	English	39	0
5	Dogari	07	0
6	Others	1,127	0.07
	Total	**23,102**	**100.00**

A closer study of the statement I and II reveals that there are as many as 21 languages spoken in the district. Majority of the population of the district speak Kannada that constitutes 87.16 per cent in 1991. This is followed by Urdu speakers who constitute 5.17 per cent. Among the languages not specified in the eight schedule, Tulu is spoken by 1.33 per cent of the population. Others are negligent percentage.

Linguistic classification of the languages

The names of the 114 Scheduled and Non-Scheduled languages falling in the five language families are given below with the Scheduled Languages denoted as (S). Of the 18 Scheduled Languages, 13 fall in the Indo-Aryan branch of the Indo-European family, 4 in the Dravidian family and one in the Tibeto-Burmese family.

1. INDO-EUROPEAN

(a) INDO-ARYAN

1. Assamese (S), 2. Bengali (S), 3. Bhili/Bhilodi, 4. Bishnupuriya, 5. Dogri, 6. Gujarati (S), 7. Halabi, 8. Hindi (S), 9. Kashmiri (S), 10. Khandeshi, 11. Konkani (S), 12. Lahnda, 13. Marathi (S), 14. Nepali (S), 15. Oriya (S), 16. Punjabi (S), 17. Sanskrit (S), 18. Sindhi (S), 19. Urdu (S)

(b) GERMANIC

1. Enhglish

2. DRAVIDIAN

1. Coorgi/Kodagu, 2. Gondi, 3. Jatapu, 4. Kannada (S), 5. Khond/Kondh, 6. Kisan, 7. Kolami, 8.Konda, 9. Koya, 10. Kui, 11. Kurukh/Oraon, 12. Malayalam (S), 13. Malto, 14. Parji, 15. Tamil (S), 16. Tulu, 17. Telugu (S)

3. AUSTRO-ASIATIC

1. Bhumij, 2. Gadaba, 3. Ho, 4. Juang, 5. Kharia, 6. Khasi, 7. Koda/Kora, 8. Korku, 9. Korwa, 10. Munda, 11. Mundari, 12. Nicobarese, 13. Santali, 14. Savara

4. TIBETO-BURMESE

1. Adi, 2. Anal, 3. Angami, 4. Ao, 5. Bhotia, 6. Bodo/Boro, 7. Chakesang, 8. Chakru/Chokri, 9. Chang, 10. Deori, 11. Dimasa, 12. Gangte, 13. Garo, 14. Halam, 15. Hmar, 16. Kabui, 17. Karbi/Mikir, 18. Khezha, 19. Khiemnungan, 20. Kinnauri, 21. Koch, 22. Kom, 23. Konyak, 24, Kuki, 25. Lahauli, 26. Lakher, 27. Lalung, 28. Lepcha, 29. Liangmei, 30. Limbu, 31. Lotha, 32. Lushai/Mizo, 33. Manipuri (S), 34. Mao, 35. Maram, 36. Maring, 37. Miri/Mishing, 38. Mishmi, 39. Mogh, 40. Monpa, 41. Nissi/Dafla, 42. Nocte, 43. Paite, 44. Pawi, 45. Phom, 46. Pochury, 47. Rabha, 48. Rengma, 49. Sangtam, 50. Sema, 51. Sherpa, 52. Tangkhul, 53. Tangsa, 54. Thado, 55. Tibetan, 56. Tripuri, 57. Vaiphei, 58. Wancho, 59. Yimchungre, 60. Zeliang, 61. Zemi, 62. Zou

5. SEMITO-HAMITIC

1. Arabic/Arbi
