DISTRICT CENSUS HANDBOOK

Part - A & B

HAVERI DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

लोकाभिमुख
PEOPLE ORIENTED

Directorate of Census Operations, Karnataka

F O R E W O R D

1. The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to taluk/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri.H.Shashidhar, Director of Census Operations, Karnataka. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division, Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and other who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

Dated : 17.10.2006

Motif

River Varada flowing in Haveri District

A tributary to Tungabhadra river, Varada enters Haveri district at Gondi village of Hangal taluk, enters Haveri taluk near Adoor and joins River Tungabhadra near Galaganath of same taluk.

The Department of Minor Irrigation has built 3 Lift Irrigation Projects and Barrages near Honkana, Koosanur and Arelakamapur villages to harness the river water in Hangal taluk. Barrages near Sangur, Naganur, Karjagi, Hosariththi, Maradur, Neeralagi and Belevigi of Haveri taluk, Kunimellihalli, and Hiremaralihalli of Savanur taluk of the district have been built. Lift Irrigation Projects near Koosanur and Vasana on the left bank and Sheshagiri on the right bank have been constructed.

Drinking water is being supplied to Haveri town from Karjagi barrage for a period of six months.

P R E F A C E

In the foreword to the 2001 series of the District Census Handbooks, Sri. D.K. Sikri, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain salient data on the population for every village and town as revealed by 2001 Census. They also contain a wealth of information regarding villages and towns which, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information is also of considerable importance in the context of planned development.

The District Census Handbook is divided into two parts: Part A contains information regarding each village and town (Village Directory and Town Directory collected from various sources) and Part B which contains the data on the population collected during 2001 Census - the Primary Census Abstract. The data published in Part B was collected during February-March 2001 in the Population Census.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in 1999. The Village Directory formats were mailed to the Deputy Commissioners of Districts for obtaining the village wise particulars through Village Accountants. Similarly the Town Directory formats were mailed to the Commissioners of Corporations, Chief Officers of Town Municipal Councils, Town Panchayats, etc. The village wise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1991 District Census Handbooks. The Household Schedules, which were canvassed to collect the population data during 2001 Census, were scanned and data captured was processed electronically. The Primary Census Abstract was generated centrally on the computers by Registrar General, India.

In compilation of the District Census Handbooks, the Census Directorate had the co-operation of various departments of the State/Central Government. The Census Directorate gratefully acknowledge their assistance.

I take this opportunity to offer my grateful thanks to Sri. H. Shashidhar, Director of Census Operations and Sri. S.R. Raghavendra Rao, Deputy Director (Retd.) for their valuable guidance. I am also thankful to all the officers and officials of this Directorate who have been actively involved in the compilation of this volume.

I am highly grateful to Sri. J.K.Banthia, I.A.S., Ex. Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Sri R.G. Mitra, Ex. Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General and Sri S.L.Jain Deputy Director of Social Studies Division and Dr. R.P. Singh, Ex. Deputy Registrar General (Map) for their guidance.

DISTRICT HIGHLIGHTS - 2001 CENSUS

1 New district carved out from the erstwhile Dharwad.

2 Populationwise the rank of district is 20th in the State.

3 District occupies 21st rank and 12th in the State with reference to Scheduled Castes and Scheduled Tribes population respectively.

4 In literacy rate the district is placed at 10th rank in the State.

5 District stands at 26th place in sex ratio.

6 Regarding number of villages the district stands at 16th rank in the State.

7 District occupies 10th place regarding density of population.

8 With regard to Decennial Growth the rank of district is 16th in the State.

9 Regarding percentage of Scheduled Castes and Scheduled Tribes population district is ranked at 22nd and 9th position in the State respectively.

10 In respect of agricultural labourers the rank of district is 7th.

IMPORTANT STATISTICS, 2001

Particulars	Persons Males Females	State	Percentage	District	Peercentage
1	2	3	4	5	6
Number of villages	Total	29,406		698	
	Inhabited	27,481		691	
	Un-inhabited	1,925		7	
Number of Towns	Total	270		9

ANALYTICAL NOTE

(i) HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

Introduction

The District Census Handbook is the most valuable district level publication brought out by the Census Organization. It contains micro-level data down to the lowest administrative units viz, revenue village in the case of rural areas and Division/Ward level in the case of urban areas. It is extremely useful to the planners, administrators, demographers, sociologists, etc., as it contains resourceful wealth of data regarding basic amenities available in each villages and towns of the district such as educational, medical, drinking water, post and telegraphs, transportation and communication, banks, societies, recreation, power supply, export/import of important commodities and land use besides, the particulars revealed during the latest census enumeration. It is for the first time that the district census hand book series was included in the census publication programme at the 1951 census, in order to satisfy the growing demand by the administrators, the planners, research scholars, demographers and the other such census data users, for micro-level data. The idea of compiling the District Census Handbooks was pioneered by Sri R.A.Gopala Swamy, I.C.S. the then Registrar General, India and Ex-officio Census Commissioner of India, with a view to preserve the Census records prepared for areas below the district level. He proposed that all the district Census tables and Census abstracts prepared during the process of sorting and compilation, should be bound together in a single manuscript volume and named as the District Census Handbook and suggested that the State Government should take up printing and publication at their own cost. Then onwards, the District Census Handbooks were published in each Census with improved pattern with an aim to give the Census and Non-census data at micro level for each village of the taluk as a whole to suit the requirements of various departments.

The data in the District Census Handbook will help not only in local area planning but also in regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. The District Census Hand Book sought to replace "Part IV - Taluk Tables and Part V - Village Tables" of the earlier censuses and to present the basic demographic and economic data in the form of "Primary Census Abstract" in respect of each and every village and town within the jurisdiction of the district. The district census handbook consists of two parts, viz, Part A and Part B. Part A comprises village and Town Directory while Part-B contains Village and Town level Primary Census Abstracts. In addition, these volumes contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

District Census Handbook 1961

It was in 1961 Census that the scope of District Census Hand Book was shaped in the present form by presenting (i) an account of descriptive note on the district, (ii) a set of non-census data tables dealing with the administrative statistics of the district for a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban Primary Census Abstracts depicting the nine fold industrial classification of workers. Information on the availability of certain basic amenities in villages and towns, such as the source of drinking water and educational institutions was also presented in the volumes. However, the district census handbooks of 3 out of then existing 19 districts viz, Bangalore, Dharwad and Mysore were confined to the publication of the village-wise and urban (census enumeration block-wise) Primary Census Abstract only.

District Census Handbook 1971

During the 1971 census, the district census handbook was further refined to present the data in

a systematic way. In view of countrywide uniformity in approach and to have a comprehensive coverage, the District Census Hand Books were presented in three parts each, for a district. Part A incorporated the Town and Village Directories. Part-B incorporated the Primary Census Abstract and included data, in the case of rural areas down to the village level and in the case of urban areas up to the block level. In addition, an introduction was given wherein the changes in jurisdiction, if any, of the district or of the taluks and the changes in the number of villages between 1961 and 1971 were explained. Part-B was essentially demographic in nature and was the end product of the tabulation of the enumeration results. Part C incorporated other census tables and administrative statistics. For convenience, Part-A and Part-B of the District Census Hand Book were presented in one volume and Part-C in a separate volume. In part-C volume, the district and taluk maps were included. These maps were prepared on the basis of maps obtained from the competent authorities concerned.

District Census Handbook 1981

The District Census Hand Book series of 1981, had some new features along with the restructuring of the formats of village and town directories, keeping in view the comparability of 1971 data. All the amenities except power supply in the village were brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place/village where it is available were given. A few new items of information such as adult literacy centres, primary health sub-centres and community health centres/workers, data on the availability of Newspapers, Motor Vehicles, etc., in the village, were introduced in the village directory to meet the requirements of the "Revised Minimum Needs Programmes". A new column "total population and number of households" was introduced to examine the correlation of the amenities with the population and number of households they serve. The contents of Part-A were further enlarged by including two appendices, namely a list of villages not having any amenities and a distribution of villages according to the proportion of Scheduled Castes and Schedules Tribes in the total population of the village. The format of Town Directory were also modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items such as class of town and its population, population of SC & ST, decadal growth rate of population, working women's hostel, adult literacy classes / centres, storage system regarding drinking water supply etc., and also the information about the nearest place and distance having educational, medical and fire-fighting facilities, in case such a facility is not available in the referent town. A new statement on civic and other amenities in slums in Class I and Class II town were included to help the planners to chalk out their programmes of slum improvements.

District Census Handbook 1991

The presentation of the District Census Hand Book for the 1991 Census was more or less similar to the manner followed in 1981. The format of Primary Census Abstract was restructured slightly. Nine-fold industrial classification of main workers was given as against four-fold classification. The sex-wise population in the age-group of 0-6 was included in the Primary Census Abstract for the first time to enable data users to compute more realistic literacy rates as all the children below 7 years of age were treated as illiterate at the 1991 census. One of the important innovations in the 1991 census was the Community Development Block-level presentation of data in the village directory and Primary Census Abstract instead of the traditional Taluk/PS level presentation. C.D.Block is the lowest administrative unit for developmental planning. The choice of the C.D. Block as the unit for data presentation was formulated to help the planners in micro-level developmental plans. Another important improvement at the 1991 Census was dissemination of data through magnetic tapes/floppies in which both the computer as well as manual codes for each revenue village were provided along with the corresponding codes of 1981 Census. In the volumes of the District Census Hand Books, the computer codes assigned to the revenue villages in the 1991 Census and the corresponding codes of 1981 Census were presented so that it may facilitate the data users to use the data either from magnetic tapes or computer floppies.

Scope of the 2001 District Census Hand Book

Like in the previous censuses, the District Census Hand Book (DCH) for the 2001 Census is brought out in two parts as usual viz., Part-A The Village and Town Directory, and Part-B the Village and Town Primary Census Abstract.

The District Census Hand Books for the 2001 Census is essentially presented in the similar manner in which the District Census Hand Books of 1991 Census were presented. This is because the data would be comparable with the earlier censuses and also to study the changes taken place during the decades and hence the approach in 2001 Census is similar to 1991 Census. The contents have been slightly enlarged and the formats too are restructured to suit the requirements of the data users. In the village directory for 2001 Census certain new amenities like, news papers, magazine received, Income-Expenditure of the local bodies, information on number of banks, credit societies, recreational and cultural facilities, most important commodities imported, manufactured and exported have been included whereas the information regarding the "Day or Days of market/hat if any" which was there in 1991 has been excluded. Apart from providing the information about the nearest place and distance in broad ranges for villages not having basic educational and medical facilities, information about the nearest place and distance in broad ranges for villages not having Middle School, College, Hospital (Allopathic), Maternity and Child Welfare Center and Primary Health Center are also provided this time. However, in the town directory there are no changes except in the statement IV-A where this statement is separately numbered as Statement VII in 2001. Except these, the scope of 2001 series of the District Census Hand Book has, by and large remained the same as in 1991. The non-census information collected at the village level and town level was scrutinized and verified. In case of glaring discrepancies the data were cross-checked with data made available by the respective parent departments for validation.

One of the significant changes made in 2001 series of District Census Hand Book is that Primary Census Abstracts are available to the jurisdiction of the Panchayats in the district. With the constitution (73rd Amendment) Act, 1992, it has become necessary for the Census Organisation to provide population data for the territorial area of a panchayat in order to strengthen panchayat raj system in the country. In view of this, panchayat-wise population figures for total population and for Scheduled Castes and Scheduled Tribes population has been compiled and presented in the form of Annexure-I for each district.

Further another important step taken during the 2001 Census, is assigning the Permanent Location Code Numbers (PLCN) to the villages. Location code number is a simple but unique device by which every area in an administrative unit in the State/U.T. can be identified. Thus assigning of Location Code Numbers at various administrative levels, right from State/U.T. to the lowest level namely enumeration block, in census taking is an important step. Each clearly demarcated area can be referred to by a combination of numbers. In a State or U.T. the next administrative area is District, followed by taluk or police station, circle, Development Block or Mandal, etc. Next below this administrative area, in urban areas are cities/towns, further divided into wards/divisions and villages in rural areas. The Location Code Numbers to various administrative areas are assigned in an orderly manner always beginning from northwest point and the numbering proceeds in a serpentine manner, keeping the geographical continuity, ultimately ending at the South-East point.

There was a great demand from different organizations to study the village level data over a time span and hence a scheme of assigning permanent location code numbers to the villages and the higher levels of administrative areas is devised to ensure data comparability over a period of time. In Indian Census, Location Code Numbers are allotted to each village based on traverse system (zigzag) in a serpentine manner at taluk level. These numbers for villages run from '1' to 'N' in each taluk independently. This system was adopted until 1991 census. But, for the Census of India 2001, all the villages in a state/U.T. are assigned with a Location Code Number in one continuous series beginning from "1" to "N" for the entire state/U.T. and it is not confined to a taluk. The field length of the complete PLCN structure for a village has been kept up to 8 digits and therefore the location code number of village in a taluk contains 8 digits number for 2001 Census.

(ii) BRIEF HISTORY OF THE DISTRICT

Haveri is one of the seven newly formed districts in the State constituted vide Government of Karnataka Notification No. RD.42.LRD.87 (PartIII) dated 2.8.1997. It was carved out of the erstwhile Dharward district comprising of seven taluks, namely, Haveri, Hirekerur, Ranibennur, Byadgi, Savanur, Hanagal and Shiggaon. The district has two revenue sub divisions, namely, Savanur and Haveri. Earlier to the formation of the district Savanur sub division had five taluks but now its jurisdiction covers only three taluks, namely Savanur, Shiggaon and Hanagal and remaining four taluks formed part of Haveri sub division.

Formerly Haveri formed a part of Karajgi taluk with its headquarters at Karajgi. In 1905, the Taluk headquarters was transferred from Karajgi to Haveri and from then onwards it became Haveri taluk. The old name of Haveri was Pavari and with the passage of time it came to be known as Haveri.

Available evidence shows that the district was inhabited by men from the early Palaeolithic period. Many relics belonging to the Paleolithic period discovered in the district include the cairns at Agadi, Dolmens at Motebennur. Among the artifacts of the Neolithic period a mention may be made of the painted pot and shreds, terra-cotta fancy articles and the Ukhapatra (sacrificial pot) discovered at few places.

The epics and the puranas refer to this part of the country as forming part of Kuntala Desha. Some peculiar structures found in the forests of Hirekerur taluk are locally known as Pandavara Kattegalu (platforms of Pandavas). Hanagal is identified with Viratakate and Viratanagiri, the place where the Pandavas spent a part of their period of exile.

During the earlier historical period, the entire Deccan region including the district formed part of the Mauryan empire. Reference in ancient inscriptions found in the district reveal that this area also formed part of the empire of the Satavahanas who came to power after the fall of Mauryans in the Deccan region. The Satavahana empire was partitioned among the Abhiras in the North-West, the Chutus in the South and the Ikshvakus in the Andhra Desha. The Kuntala country including the erstwhile Dharwad district formed part of the kingdom of the Chutus during the early part of the Christian era. Later, Kadambas emerged in 345 AD and the Gangas and the Pallavas regained supreme for brief periods in turns. The Kadambas (345-565 AD) had their capital at Banavasi and their kingdom extended from Narendra near Dharwad upto Halsi in Belgaum and Panugal-500 covering Hanagal taluk.

In the beginning of the 6th century, the Chalukyas of Badami established their supremacy and rendered the position of the Kadambas into that of their vassals with the title of Mahamandaleshwaras. The district yielded many records registering grants made to various temples (542-65 AD), by Kritivarman II (744-55 AD). The Chalukyas were in turn overthrown by the Rashtrakutas in about 756 AD, and their supremacy lasted for a little more than two centuries and during this period too, the Kadambas managed to retain their position as feudatory chiefs.

Rashtrakutas overthrew Chalukyas in 756 AD and their supremacy lasted for two centuries.The Rashtrakutas claimed a Yadu descent. The Rashtrakuta monarchs stand supreme both from the point of view of prowess and as patrons of art and literature. The Gangas, Kadambas and other were acting as their feudatories. Govinda III (792-814 AD) defeated Gujara Pratihara Nagabhatta II and the Pala King Dharmapala and led his victorious armies upto the Himalayas in the North and had brought the Pallava Dantiga and Eastern Chalukya King Vishnuvardhana IV under his subjugation. Nripatunga Amoghavarsa I (814-880) made outstanding contribution to Kannada history, literature and religion. He is said to have written the famous Kaviraja-marga. However, Karka the last ruler of this dynasty was defeated by Taila II (937-97 AD) who founded the later Chalukya dynasty. The Belvolna and Purigere countries were under the administrative control of his feudatories named Konnappa and Sobhanarasa. During the period of Someshvara II (1068-76 AD) Udayaditya of the Ganga family, governing from the city of Bankapur, had the charge of Banavasi as well. In 1076 AD, Vikramaditya VI rebelled against his brother Someshvara II and occupied the Chalukyan throne. He reigned supreme till 1126 AD. His successor Someshvara III (1126-38 AD), known for his learning is the author of Manasollasa or Abhilasha Chintamani which gives a great deal of information on a variety of subjects. He was succeeded by his

son Jagadekamalla II (1139-55 AD) who, in addition to his capital at Kalyan is said to have established a provincial centre at Kadalipura near Hanagal. Taila-III (1150-63 AD) who succeeded him brought decline of the Chalukyas. Bijjala of the Kalachurya family, who was then the commander-in-chief enlisted the cooperation of some of the dissidents power chiefs such as Vijayarka Prolaraja and kept his own master Taila under complete subjection. In 1157 AD, Taila II fled to Annigeri in Dharwad district and made it the capital of his kingdom which was greatly reduced in extent. In 1162 AD, Bijjala marched against Taila forcing the latter to retreat further west to Banavasi and declared himself an independent monarch. The supremacy of Kalachurya lasted hardly for two decades. During the brief reign of Bijjala, his Prime Minister Basaveshwara emerged as a great social and religious reformer and his egalitarian teachings acquired an over-whelming number of followers. The opponents of the reforms preached by Basaveshwara included the King also and the chain of events that took place in the capital culminated in the flight of Basaveshwara to Kudala Sangama and an insurrection in which the Bijjala himself was killed.

Though usurped for nearly twenty years by the Kalachuryas, the power of Western Chalukyas was not destroyed. Somesvara IV (1184-89 AD) son of Taila, wrested some of the provinces of his ancestral dominions from the Kalachuryas and the rest must have been conquered by the Devagiri Yadavas. Somesvara's inscriptions have been found at Hanagal. Shortly after 1189 AD, the Western Chalukya dominions were divided. This division ceased when about 1210 AD, the whole of the Western Chalukya dominions passed to Devagiri Yadavas in Haveri district.

The first mention of the Hoysala Ballalas of Halebid in the district dates back to 1137 AD in an inscription belonging to the fourth Hoysala King Vishnuvardhana (1100-52 AD). His power is said to have extended to Banavasi, Hanagal, Halasige, Puligere and Masvadi in the Dharwad region. There was a keen contest between the Hoysalas and the Yadavas for the occupation of the delta between Tungabhadra and the Malaprabha, is evident from the existence of records, both of Hoysala Ballala and Yadava Singhana, in the same region issued by each, after their conquests of the place. An inscription records that in 1196 AD Vira Ballala laid siege to the city and that his forces were routed by the dashing counter-attack by the brave Sohani and his son Padmanna, the leaders of the Kadamba garrison and that in this battle Sohani lost his life. Later, in 1200 AD Ballala succeeded in taking Hanagal. His son and successor Narasimha II (1220-39 AD), however, lost all that his father had captured in the north of Tungabhadra and retired to Dwarasamudra.

The first mention of Yadavas pertaining to this region is in the reign of their third king Billama (1187-91 AD) whose son was defeated by Vira Ballala at Lakkundi. A Haveri inscription belonging to the reign of Krishna (1247-1309 AD), the grandson of Singhana, states that his minister Chavundaraya was administering these territories from his capital at Paligere, i.e., present Lakshmeshwar. Several epigraphs belonging to the reign of Ramachandradeva (1271-1309 AD), greatest of the Devgiri Yadava Kings, have been found at Naregal and Rattihalli. One of these inscriptions dated 1277 AD mentions that one of his underlord Mahamandaleshwara Saluva Tikkama led a victorious expedition upto Tungabhadra in the South. Tikkama has been hailed in it as the establisher of the Kadambas and the overthrower of the Hoysalas.

According to another inscription of 1295 AD Tikkama's Mahapradhana Mallideva was the governor of Lakshmeshvar. During the reign of his successor Shankara Deva (1309-12 AD) the Yadava Kingdom was annexed by the Sultan of Delhi. The suzerainty of the Sultan was resisted by Kampila Raya who was a subordinate of Yadava Ramachandra and had declared independence during the period of the political chaos that ensued the invasions by Malik Kafur. This new kingdom with its strongholds at Kampli, Kumata and Hosadurga (Anegondi) included the present districts of Bellary, Raichur, Koppal, Dharwad, Gadag and Haveri. However, in the 1327 AD campaign Kampila Raya was killed. But by then he had sown the seeds from which the great Vijayanagara empire emerged. An inscription found at Sangur, Haveri taluk records that the image of Kumara Ramanatha (the valiant son of Kampila Raya) was set up at Chengapura (Sangur) by Madarusa in Saka 1329 AD during the reign of Devaraya. This image is even

now regarded as an object of worship and in folk literature, Kumara Rama is hailed as a great saviour. As a result of the conquests undertaken by Harihara and Bukka soon after the formation of the Vijayanagara kingdom, the district too became one of its parts while first developing another powerful force, namely that of the Bahamanis emerged with Gulbarga as its capital. This resulted in the northern parts of Karnataka including the district becoming a ground of hot contest between these two powerful rivals. Consequently wars were fought more frequently and the people of this region were subjected to much sufferings. In the process, Bankapur was among the notable possessions of the Bahamanis.

Yusuf Adil Khan proclaimed independence, seized Bijapur as also Bahamani possessions in the district and founded the Adil Shahi rule in 1498 AD. The rivalry for the possession of this region became much more intense until Sri Krishna Deva Raya (1509-29 AD) defeated Ismail Adil Shah in decisive battles and ushered in a period of comparative peace and prosperity. Sri Krishna Deva Raya and his brother Achyuth Raya are credited with the introduction of the system of water works and introduction of Rai Rekha Mar Survey which formed the basis of all later revenue settlements.

The district came under the sway of the Bijapur kingdom when the Vijayanagar power declined following the death of Rama Raya in the battle field and the utter defeat suffered at the Rakkasa Tangadgi battle in 1565 AD. In 1569 AD, the district witnessed a major war for supremacy fought between the forces of the sultan of Ahmednagar and those of Ali Adil Shah. The governor of Bankapur who had been appointed by the erstwhile Vijayanagara kings held out as independent ruler and fiercely resisted the imposition of Bijapur rule for a short while. In 1575 AD Ali Adil Shah annexed Bankapur and henceforth, for about a hundred years, the region formed part of the Adil Shahi Kingdom of Bijapur, that is until it was taken over by the Moghul emperor.

Muhammed Adil Shah of Bijapur refused to accept the supremacy of Moghul emperor and as a consequence emperor Shah Jehan invaded the Deccan and extirpated the Sultan of Ahmednagar in 1633 AD. In 1637 AD Shahji Bonsle who was till then in the service of Ahmednagar Sultan entered service in the court of Muhammed Adil Shah of Bijapur and soon earned for himself a place of honour in the Bijapur kingdom. In about a decade later his son Shivaji rebelled against the Bijapur Sultan as well as his own father and established himself as an independent ruler in 1647 AD with his capital at Kalyan. At about this time, Abdul Karim Khan was appointed as the Governor of Bankapur province and also as the chief captain against the Marathas. Abdul Rahuf Khan, the son of Abdul Karim Khan, the Bijapur governor of Bankapur was inducted into the service of the Moghul emperor and was entrusted with the administration of the Dharwad region and its surrounding areas. At first, he had his capital at Bankapur but shortly after assuming office he moved his capital to Savanur.

The Moghul power began to weaken after the death of Aurangazeb in 1707 AD. This led to the establishment of Maratha principalities under two of Shivaji's grandsons Sahu and Sambhaji. In 1719 AD Sahu received three imperial grants i.e. (i) one-fourth share (ii) Sardeshmukhi (one-tenth share) of the revenues of the six Deccan provinces and (iii) for the swaraj of the sixteen districts including Gadag. Sahu appointed Fathe Singh Bhonsale, the Raja of Akalkot to collect the dues on his behalf. But this didn't work. As a result in 1726 Peshva Baji Rao himself marched into Karnataka but didn't make any attempt to establish his power. In consequence thereof the Nawab of Savanur gradually acquired a large territory and in 1746 he openly resisted the Marathas. This led to Maratha invasion of his territories. The Nawab entered into a peace treaty by which he yielded large tract of Dharwad district to the Peshva and retained Hubli, Bankapur, Hanagal and a few other places. In 1755, the Nawab of Savanur gave asylum to a deserter of the Maratha command which resulted in the besieging of Bankapur by the Marathas and gaining a few more tracts from the Nawab of Savanur.

In 1764 Haidar Ali of Mysore subdued the Nawab of Savanur when the latter refused to break off his allegiance to the Marathas. His general Fazlulla Khan took the country as far North as the Krishna. There was counter attack by Peshva Madhava Rao who used his troops for driving out Haidar's garrisons north of the river Varada. After the death of Peshva Madhava Rao in 1773, Haidar Ali entered into close

relations with Raghunatha Rao, acknowledged him as the head of the Marathas and agreed to support him in the fight for succession. In 1776, in return for a gift of Rs.16 lakhs, Raghunatha Rao agreed to give right to hold the country to the south of Krishna. Accordingly Haidar Ali crossed the Tungabhadra, took Bankapur and Savanur. It was only in 1782 that the Marathas could turn their attention to the territories they had lost to Haidar Ali. Nana Phadnavis demanded the tributes due to the Marathas from Tipu Sultan who took over the reigns of administration after the death of his father Haidar Ali. Tipu Sultan acknowledged the obligation but evaded payment. In the meantime, the Nawab of Savanur shifted his loyalty to the Marathas and thus incurred the wrath of Tipu Sultan. The Nawab was attacked and forced to seek refuge at the Poona Court.

In 1786 the Marathas formed an alliance with the Nizam and started a major offensive against Tipu Sultan compelling him to negotiate a treaty. However, Tipu Sultan had no intention of honouring the agreement. This led the Marathas to forge an alliance with the English as well to mount an attack to regain their territories. In 1790, the confederate forces launched a major offensive as a result of which all the territories north of the Tungabhadra (i.e., Bombay-Karnatak region) came under the Maratha rule. The Maratha rule lasted for nearly three decades and was marked by internal rivalries. Most of Dharwad and Savanur regions was made over by the Peshva to Parasuram-Bhau in payment of the expenses incurred by the latter in the war which had just concluded. In respect of the other areas the Peshva appointed Dhondopant Gokhale as his representative. Around 1790, Dhondia Vagh who had risen to a high rank in the Mysore army left Tipu's service and with a few followers settled near Dharwad as a freebooter. In 1794, Dhondopant Gokhale defeated Dhondia Vagh and forced him to take refuge with Tipu Sultan. Thereafter Dhondopant Gokhale was appointed the Sar-Subhedar of the province. Subsequently in early 1800, Dhondia Vagh re-entered erstwhile Dharwad district, firmly established himself in the Savanur country for a brief period. The combined forces of the British and the Peshva mounted a major attack on Dhondia Vagh in which the latter was finally killed.

In 1818 Cholera prevailed to a frightful degree in this part of the country causing immense mortality in the army and among the people generally.

In 1826, the question arose whether the district of erstwhile Dharwad and the states under it continued under Bombay area by transfer to the Madras Presidency. It was decided by the court of Directors in 1830 that the Karnataka districts should continue to form part of the Bombay Presidency. The year 1857-58 which has since been hailed as the year when the first war of independence was fought, witnessed anti-British rebellion in this part. The rebellion was crushed and the British rule took firm roots and lasted till the country attained independence in 1947. Thereafter the princely states like Savanur was formerly merged with the Union of India and the entire erstwhile Dharwad district formed part of the then Bombay State. In November 1956 as a result of re-organisation of the States on linguistic basis, the entire Bombay-Karnataka region was merged in Mysore State which is now re-named as Karnataka. Earlier, Dhawrad district was enjoying the distinction of having the largest number of taluks namely 17. In October 1997 erstwhile Dharwad district was re-constituted into two more districts i.e., Haveri and Gadag. Haveri district continues to form part of Belgaum revenue division.

(iii) Administrative setup and jurisdictional changes during the decade 1991-2001 :-

District Haveri is situated in the Central sector of the northern half of Karnataka State, and comes under the Belgaum Revenue division. The district comprises of seven taluks viz: Shiggaon, Savanur, Hanagal, Haveri, Byadgi, Hirekerur and Ranibennur which are grouped into two Revenue Sub-Divisions viz., Haveri Sub-division and Savanur Sub-divisions. Haveri sub-division comprise of Byadgi, Haveri Hirekerur and Ranibennur, where as Hanagal, Savanur and Shiggaon comes under Savanur sub-division.

During the decade 1991-2001 the administrative division and Jurisdiction of Karnataka have undergone drastic changes. In August 1997 seven more district were newly formed raising the number of districts in the State to 27. Dharwad district was divided into three districts. Viz, Dharwad, Gadag and Haveri. Haveri is one of such new district come into existence during the decade.

Haveri, which was one of the taluks in the erstwhile Dharwad district during 1991 has the pride of being a district and district headquarters during 2001, comprising the taluks of Shiggaon, Savanur, Hanagal, Haveri, Byadgi, Hirekerur and Ranibennur.

Total number of Towns/ Villages

According to 2001 Census there are 7 (seven) towns and 698 villages in Haveri district. As compared to the position in 1991 Census where in there were 6 towns and 591 villages in the district.

REASONS FOR VARIATION IN THE NUMBER OF VILLAGES/ TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS IF ANY AND REASONS THEREOF

Sl.No.	Name of the Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalised		Reasons for variation in the number of villages/towns in each taluk of the district, decadal variations if any and reasons thereof
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
1	Shiggaon	92	93	2	1	Three new villages have been created after 1991 Census.. (1) Kamalanagar, G.O No. RD 24 LRD 92 dated 19.9.1994, (2). Konankeri, newly constituted village by amalgamating two villages namely B. Konankeri and K. Konanker vide Notification No. RD 11 LRD 95 dated 25.7.1997 and (3). Shivapura, G.O No. RD 24 LRD 92 dated 19.9.1994. Further, in 1991 it was presumed that entire Shiggaon village was covered in Shiggaon Town Municipal Council, however later it was noticed that Shiggaon town covers only a portion of Shiggaon village and for the 2001 Census, the uncovered areas of Shiggaon village were identified and treated as a village and included in List of villages. The civic status of the town has been changed from Town Municipal Council to Town Panchayat vide Notification No. HUD 392 MLR 95 dt. 17.08.95. Apart from these, three villages namely Ankad Khan, Shahabazar, and Kottigere revenue villages were fully included in the newly formed statutory town Bankapur Town Panchayat vide Notification No. HUD 380 MLR 97 dated 07.12.1997. As a consequence of all these changes now there are 92 villages as against 93 in 1991 Census.
2	Savanur	65	62	1	1	Three villages were newly constituted in the taluk. They are (1) Paramavadi, (2) Sevalalpur vide Notification No. RD 24 LRD 92 dated 19.09.1994 and (3) Maruthipura vide Notification No. RD 11 LRD 95 dated 25.07.1997. With the inclusion of these 3 villages, the total number of villages in the taluk has risen to 65 in 2001 from 62 in 1991 Census.
3	Hanagal	151	145	1	1	The total number of villages has increased from 145 in 1991 to 151 in 2001 Census due to formation and inclusion of following six villages in the 2001 Census List of villages. 1. Shivajipur, 2. Rathnapur, 3. Joginakoppa, 4. Gururayapatna, 5. Sevalal. vide G.O No. RD 24 LRD 92 dated 6.12.1995 and (6) Hanumankoppa vide G.O No. RD 11 LRD 95 dated 25.07.1997.

REASONS FOR VARIATION IN THE NUMBER OF VILLAGES/ TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS IF ANY AND REASONS THEREOF

Sl.No.	Name of the Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalised		Reasons for variation in the number of villages/towns in each taluk of the district, decadal variations if any and reasons thereof
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
4	Haveri	89	88	1	1	The total number of villages has increased to 89 in 2001 as against 88 in 1991 Census. The newly created villages are: Shivajinagar, Siddeswaranagar, Shivanagar and Rajivnagar vide Notification No. RD 24 LRD 92 dated 19-09-1999. Further, the jurisdiction of Haveri Town limits has been expanded by including the entire geographical areas of the villages Haveri, Siddapur and Ijari Lakanpur vide Notification No. HUD 383 MLR 95 dated 13-10-95 and hence their names deleted from 2001 list of villages.The place Haveri, besides taluk headquarters is also district headquarters place.
5	Byadgi	66	63	1	1	With the addition of three new villages to list of 2001 villages, the total number of villages has moved up to 66 as against 63 in 1991 Census. The newly created villages are 1. Sevanagar, 2. Shivanagar, 3. Shivajinagar, vide G.O No. RD 24 LRD 92 dt. 19.9.1994.
6	Hirekerur	128	128	1		No changes has occurred in total number of villages in the taluk and remains same at 128 both in 1991 and 2001 Censuses. The existing area of Interim Mandal Panchayat of Hirekerur a rural unit in 1991 Census comprising entire area of Hirekerur village has been declared as Town Panchayat vide Notification No. HUD 641 MLR 95(34) dated 09.01.1996. Hence the village name is omitted from the 2001 list of villages. Further, one new village viz., Sevalayanagar has been formed vide Notification No. RD 24 LRD 92 dated 19.09.1994.
7	Ranibennur	107	103	2	1	The taluk witnessed creation of six villages after 1991 Census. They are Siddapur, Ramapur, Channapura, Venkatapura, Padmavathipura and Srinivasapura vide Notification No. RD 4 LRD 95 dtd. 19.09.94. Further the entire geographical area of Siddapur village now forms part of Ranibennur city limits vide Notification No. HUD 379 MLR 95 dt. 13-10-1995 and Kodiyal Village has been classified as a Census Town for the 2001 Census hence deleted from 2001 list of villages. With the inclusion of these 6 villages and deletion of two villages the total number of villages in the taluk has increased to 107 in 2001 Census as against 103 in 1991 Census.

Urban local bodies

The statutory urban local bodies are the City Municipal Councils, Municipal Corporations, Notified Area Committee, Town Municipal Councils, Town Panchayat, and Cantonment Boards. These urban local bodies elect Councilors / Corporators from each ward and the tenure of those Councilors / Corporators would be for five years. The President or Vice President of the Municipal Council and the Mayor / Deputy Mayor of the Corporations are elected from among the elected Councilors / Corporators whose tenure will be for a period of one year. The Chairman of various committees are also elected among the elected Councilors with a term of one year.

The Chief Officer in Municipal Council and the Commissioner in a City Corporation are responsible for day-to-day administration and the executive authority is vested with them.

Zilla Panchayat and Taluk Panchayat

To promote the development of institution and secure greater measure of participation by the people in the local and governmental affairs by decentralisation of power and functions and for the purpose of development planning and implementation of various programmes thereof Zilla Panchayats have been constituted in the State. The jurisdiction of Zilla Panchayat is coterminous with that of the corresponding district and covers the entire rural and semi urban area but excludes the statutory towns. Accordingly, Zilla Panchayat has been constituted for Haveri district and its jurisdiction extends over the Taluk Panchayats of the district. The jurisdiction of each Taluk Panchayat is coterminous with that of the taluk of the same name but excludes the area incorporated in the statutory towns or cities, if any.

The Zilla Panchayat elects its president and vice-president and chairman of its committees from amongst the elected members. The term of these elected representat ives will be for five years. An officer of the rank of IAS is deputed by the State Government as Chief Executive Officer of the Zilla Panchayat. Various departments assist Panchayat.

Grama Panchayats

The Government of Karnataka has enacted the Karnataka Panchayat Raj Act 1993 on 30.4.1993 replacing its previous enactment in this regard for the formation of Grama Panchayat.

STATEMENT SHOWING NUMBER OF GRAMA PANCHAYATS AND HOBLIES/FIRKAS

Sl. No.	Name of Taluk	No. of Hoblis/Firkas	No. of Grama Panchayats
1	2	3	4
1	Shiggaon	3	26
2	Savanur	2	20
3	Hanagal	3	40
4	Haveri	3	32
5	Byadgi	2	20
6	Hirekerur	3	39
7	Ranibennur	3	33
	Total	**19**	**210**

Details regarding Panchayatwise number of villages have been furnished in Annexure I.

The Grama Panchayat is authorised to function on the items listed in Schedule I of the Act namely, preparation of annual plans for the development of Panchayat area, preparation of annual budget, providing reliefs during natural calamities, removal of encroachments on public properties, organising voluntary labour and contribution for community works, maintenance of essential statistics of the village, in addition to matters relating to Agriculture, Animal Husbandry, Fisheries, Social & Farm Forestry, Khadi, Village & Cottage Industries, Rural Housing, Drinking Water, Roads, etc., Rural Electrification, Nonconventional energy sources, Poverty Alleviation Programmes, Markets & Fairs, Rural Sanitation, Public Health & Family Welfare, Women and Child Development, Social Welfare, Welfare of Weaker Sections, Public Distribution System, Maintenance of Community assets, Construction and Maintenance of

Dharmashalas, Chatras, Cattle Sheds, Ponds, Cart Stands, Slaughter Houses, Public Parks, Play Grounds, etc. Regulation of manure pits in public places and establishment and control of shandies. Such other functions as may be entrusted.

The Grama Panchayat is also empowered to make provisions for carrying out within its area any other work or measure which is likely to promote health, safety, education, comfort, convenience or social or economic well being of the inhabitants of the Panchayat area.

(iv) PHYSICAL FEATURES

Haveri district is situated in the central sector of the northern half of Karnataka state. Its maximum length from north to south is 95 kms. and maximum breadth from east to west is 84 kms. spanning a total geographical area of 485,156 Hectares.

(1) Location and size

Haveri district lies between the Latitudinal parallels of 14 degree 15 minutes south and 15 degree 09 minutes north and Longitudinal parallels of 75 degree 02 minutes west and 75 degree 48 minutes east.

The district is bound by Dharwad and Gadag district to the north, Shimoga and Davanagere to the south, Uttara Kannada to the west, Davanagere and Bellary district to the east.

(2) Physiography

The district has been divided into two natural divisions namely the Semi Malnad and Maidan particularly the northern maidan. District Haveri is a part of Central Karnataka Plateau. The region extends in the southern parts of erstwhile Dharwad district covering entire Byadgi taluk, larger portion of Hirekerur taluk and some parts of Ranibennur and Hanagal taluks. It makes its boundaries with Varda basin in the north, middle Tungabhadra valley in the east and Shimoga district in the south and west. The topographic land scape of the region is characterised by a number of eroded knobs and enclosed low lands. The General Elevation varies between 600 and 900 metres. Development of such a land scape may be due to different mineralogical composition of Dharwarian rocks of the region. The resistant rocks stand out as knobs while soft one have been eroded to a lower level. The most conspicuous area of very high and very low areas of the district is located at 600 metres and 700 metres of contour lines above the mean sea level respectively.

The Hillocks are generally covered with mixed deciduous forests.The Hill ranges with their base and rounded topography are typical representatives of the area. The relief here is marked by chain of low hills, occasional scrap lands, isolated hog backs and narrow meandering valley courses. The Hill ranges near Dhundashi and Hanagal and those of Masur and Maravalli in the extreme south. The Budangudda range is about eight miles from north to south and a mile broad. It rises to about 500 ft from the surrounding land and has a much eroded Western flank. The Region represent on middle east running belt of dissected and residual hills, it acts as a divide between Tungabhadra and Krishna River system. The hills in this belt are detached and isolated. Inspite of its relief this belt has not formed an effective barrier for means of transport. The Hill ranges run to the stroke of the Dharwad out crop with a general south west trend. More often they develop bulging sides.

(3) Drainage

The erstwhile Dharwad district was drained by two major rivers Malaprabha in the north and the Tungabhadra in the south. With the bifurcation of the district Tungabhadra has become the source of drainage to Haveri district. The Tungabhadra is formed north of Shimoga at an elevation of about 610 metres by the Union of twin Rivers the Tunga and the Bhadra which rise together in the Western Ghats at an elevation of about 1,198 metres. The Varada and the Hagari are its important tributaries. It has a drainage area of 71,417 sq km. out of which 57,671 sq km lies in the State. It flows for a distance of 293 km in the State. The Tungabhadra river system mainly consists of the rivers Varada and Kumudavati which drains a considerable area of the district. The Varada flows through the Hanagal and Haveri taluks of the district. Whereas the Kumudavati flows along the southern most margins of the Hirekerur and Ranibennur taluks of the district. The Tungabhadra stretch approximately more than 50 miles in the district. It is almost uniformly marked by a stony land scape derived from a Granitic outcrop. Rounded bosses lending almost a ruinous appearance to the Land scape, steep banks, a boulder strewn bed that favours the formation of eddies and

whirlpool are typical of the Tungabhadra scenery. There are several important places along the course most of them being either fording or crossing places.

Of the Perennial rivers, the Varada and the Kumudvati are important. The Varada reach, extends to about more than 40 kms in the district, enters the district from the west after a course of about 40 miles in the Mysore territory. It represents, through its broad floor and low gradient a graded appearence. While several tributory are mostly seasonal, the Varada drains a considerable area of the district. The Dharma its chief tributory,after a course of about 20 miles in North Kanara and Mysore drains a basin of about 240 square miles and thence after a stretch of 35 miles it meets the Varada to create the Holy confluence "Kudala Sangameshwar". The Kumudavati drains the district Haveri to a considerable extent a tract of varied topography possessing economic advantage through its irrigation.

(4) Climate

Haveri district has on the whole healthy and agreeable climate. The district covering the taluks of Hanagal, Shiggaon, Hirekerur and Byadgi has a typical Malnad climate and the Sahyadrian Land scape which is dominated by low hills meandering streams.

The year is usually divided into four seasons which have been described as follows:-

Summer starts during the second half of February and continues up to the end of May. The season is marked by harsh eastern winds, rising temparature, whirlwinds and occassional thunder storms accompanied by sharp showers.

South West Monsoon starts during early June and continues upto September marked by cool and damp climate. The month of October and November constitute the post monsoon or the north west monsoon. This period witness a general rise in day temparature and a substantial amount of rainfall.

Winter season covers the period from December to mid February.

Climate is very hot in April and May month, raising the temparature at times from 105° to 107° F. The force of easterly wind will be less during April and at times give way to a westerly breeze. Temparature will be lower during the day and the nights will be cool and fresh.

(5) Winds

Between March and April whirl winds are common. The easterly winds blow with less force in April. By May the west wind begins to freshen and lasts through the day. Towards the end of May the west winds begins to blow stronger. During the day the wind blows steadily from the south-west. During the storms the direction of winds changes frequently until it sets steadily from the west and the tempest ceases. These storm takes place daily for several days and after they are over, for five or six months the wind continues to blow constantly from the west.

(6) Rainfall pattern

The District falls under northern transition and hilly agroclimatic zones of the state. The taluks of Byadgi, Haveri, Hirekerur, Ranibennur, Savanur and Shiggaon falls under northern transition zone. The taluk of Hanagal falls under hilly zone.

The average rainfall in the district ranges from 616 mm in Ranibennur taluk to 980 mm in Hanagal taluk. The rainfall decreases from southwestern part of the district towards eastern part. The southern part of Ranibennur taluk receives the lowest rainfall.

Among the taluks in the district the pre-monsoon rainfall contributes 13 to 21 per cent of the annual rainfall, southwest monsoon contributes 53 to 70 per cent and north-east monsoon contributes 17 to 26 per cent of the annual rainfall.

The co-efficient of variation ranges from 52 to 73 per cent for the premonsoon season, the highest variability (73 per cent) being in Haveri taluk.

The co-efficient of variation for southwest monsoon ranges from 25 to 39 per cent, the highest being in Hanagal taluk. The co-efficient of variation for northeast monsoon ranges from 54 to 69 per cent, the highest being for Byadgi taluk.

The coefficient of variation for Annual rainfall ranges from 22 to 33 per cent, the highest being in Hanagal taluk.

TALUK WISE RAINFALL PATTERN, HAVERI DISTRICT

TALUKS (No. of years of rainfall data available)	Statistical Parameters	Pre- Monsoon	South-West Monsoon	North-east Monsoon	Annual Rainfall
1	2	3	4	5	6
Byadgi (42)	Average rainfall (mm)	119	403	151	672

Source : Drought Monitoring Cell, Government of Karnataka

A study of the rainfall deficit pattern during the last 20 years compared with the long term data for different seasons indicate increase in rainfall deficiency in the recent past during the premonsoon and northeast monsoon period. Rainfall deficit during last 20 years has been compared with that of long term data in different seasons and is presented in the following table.

TALUKWISE AND SEASONWISE COMPARISION OF RAINFALL DEFICIT DURING LAST 20 YEARS WITH 99 YEARS DATA, HAVERI DISTRICT

Taluks	Seasons and no. of years with deficit rainfall							
	Pre-Monsoon		South-west Monsoon		North-east Monsoon		Annual Rainfall	
	Long Term	Recent 20 Yrs.	Long Term	Recent 20 Yrs.	Long term	Recent 20 Yrs	Long term	Recent 20 Yrs.
1	2	3	4	5	6	7	8	9
Byadgi (42)	22(52)	10(55)	14(33)	7(35)	20(48)	12(60)	12(29)	8(40)
Hanagal (94)	38(40)	5(25)	22(23)	3(15)	43(46)	9(45)	13(14)	2(10)
Haveri (88)	34(39)	8(40)	22(25)	5(25)	34(39)	9(45)	21(24)	5(25)
Hirekerur (94)	40(42)	11(55)	20(21)	3(15)	32(34)	6(30)	21(24)	5(25)
Ranibennur (95)	42(44)	11(55)	22(23)	3(15)	42(44)	12(60)	25(26)	6(30)
Savanur (90)	46(51)	11(55)	17(19)	6(30)	38(42)	9(45)	17(19)	3(15)
Shiggaon (82)	28(34)	9(45)	19(23)	3(15)	31(38)	8(40)	10(12)	2(10)

Note : Figures in bracket indicate values as percentage of number of years for which data is available or for 20 years depending on the column in which it is given.

The following inferences could be made.

- The Pre-monsoon rainfall in the recent 20 years is more deficit compared to the long term data with Hanagal taluk as an exception.
- South-west monsoon is less deficit in the recent 20 years compared to the long term data with Savanur,Byadgi taluk as an exception.
- The rainfall deficit during northeast monsoon is increasing during recent 20 years compared to the long term data, except in Hanagal and Hirekerur taluk.
- The annual rainfall trend analysis indicate increasing trend in the taluks of Hanagal, Savanur and Shiggaon. The taluks of Haveri and Hirekerur indicates no significant change. Whereas, Byadgi and Ranibennur taluk shows decreasing trend.

(7) Forestry

The total Geographical area of the district is 485,156 Hectares out of which 47,454 Hectares of area falls under the category of forest. The forest wealth of the district is hardly worth mentioning. The forest exhibit regional variation. The forests in the Shiggaon taluk can be categorised as that of deciduous type.

Whereas in Hanagal taluk the forest are similar in growth to those of Shiggaon taluk. There are reserved forest and they contain a very rich growth of Sandal wood trees. The forest of the Haveri taluk are scrubby with sparse growth of trees common to the locality and the type of forest. A large portion of the forest of the district belongs to the scrub category. The scrub forest offer a far more stern and drier land scape under the influence of dry climate and a very inferior soil. Several of the shrubs have economic utility and the Grass Land patches provide inferior grazing for sheep. The deciduous or Monsoon forest are managed under regular working plan.

(8) Geology

The Dharwars represent the oldest rocks and comprise schists, phyllites, argillites, felsite, hemitite, quartzites and lime stone. The Schists include Biotite-muscorite schists, gritty schist which mainly occur in the district. Two series of dykes have been distinguished as dolenitic and dia basic. The minerals of economic importance found in the district are Iron ore, Alluvial Gold, Reef Gold, Manganese ore, Pot stone etc.

(9) Flora and Fauna

The forest flora of this district includes the important species such as Ical (Phoenix sylvestris) the wild date palm, Kakki(Cassia fistula), Karegida (Randia dumetorum), Muttal (Butea frondosa), Shivani (Gmelinia arbarea), Sirsal (Albizzia lebbek). The chief trees found in fields and gardens are Baglura (Citrus indica) halasu, Jack (Artocarpus integrifolia) Nirala, Jambool (Eugenia Jamboolana), Ramphal sweet sop (Arona reticulata). The chief fiber yielding trees are ambada(Hibiscus cannanbinus), Bambu (Bambusa arundinacea), musk bhendi (Abelmoschus moschatus),

morodphal (Helictreres isora). The chief climbing shrubs, plants and weeds growing on waste lands and hills are dhattura, thorn apple, tottal balli (Capparis horrida).

The scrub Jungle met in the northern part of the district offer a dry land scape dotted with a sporadic growth of thorny shrubs and rough grasses. The wild animal found in the district include the Panther, Leopard, Cat, Bear, Wolf, Hyena and Jackal besides the Indian fox and deer. The hunting Leopard, Cheetah or Chirteha was formerly found in the Kodagu and Gadag hills. It has not been recorded in the recent years and is in all probability extinct.

(10) Soils

The soil of the district are formed from the mixture of decomposed rocks of type through out the district.

The prevelent type of soils in the district are of the following:

Black soil, Brown soil, Red soil and the Sandy soil.

The Greatest part of the district is found having the Black soil. Brown and red comes subsequently in the order of merit. Red soil is found where there are hill slopes and ridges. The cultivable lands have been classified as :

1) Jirayat 2) Bagayath and 3) Bhattada Bhumi. The first and second category land is the rice land.

The dry crop land which is dependent on Monsoon have been further divided into Kharif and Rabi Lands. i.e., Mungari or Early Monsoon and Hingari or Late Monsoon.

The duration of Mungari season starts during the middle of June and ends during the middle of October. The important Mungari crops of the district are Bajri, Maize, Kulthi, Ground nut, Cotton, Chilles and Rice. The preparation of sowing the Mungari crops starts by the second half of June and it continues upto July. The crops such as Tobacco and Cotton are preferably sown in the month of August, where as the Sugar cane is planted during January. The mungari crops are normally reaped during October and November. But, Tur, Cotton, Tobacco are reaped during January to March. Whereas Sugarcane is harvested from January to April.

Middle of October marks the beginning of Hingari seasons which concludes during the middle of February in the northern portions of the district. Where rainfall is scanty and uncertain Hingari crops are more important.

Jowar, Barley, Wheat, Safflower are main crops grown during this season.

Except for Jowar the sowing of all other Hingari Crops starts during the month of October and November.However, although Jowar is a Hingari crop it is sown during August and the district reaping is done in December. Where as all the crops comes to maturity by the end of January and harvesting is completed by February -March.

(11) Cropping pattern

According to 2001 Census, 30.5 per cent are cultivators and 43.7 per cent are agricultural labourers. Jowar, Paddy, Maize, Ragi are the important Cereal crops of the district grown in all most all taluks of the district.

The Land Use data for the year 1998-99 reveals that the net area sown is 74 per cent and the total area sown is 97.2 per cent. The cultivable land accounts for 0.66 per cent. The table on land use pattern for Haveri district reveals that considerable extent of Land is put under cultivation.

LAND USE PATTERN FOR 1998-99 IN HECTARES

Source : Haveri District at a Glance, 1998-99, District Statistical Officer, Haveri.

From the above table it is observed that the number of marginal holdings below one hectare and small holdings of size one to two hectares is more which constitute about 58.38 per cent of the total holdings. Only 2,649 holders own land more than ten hectares. The more the marginal and small holdings more are the obstacle to increase the productivity of the cultivated area.

AREA, PRODUCTION AND AVERAGE YIELD OF PRINCIPAL CROPS FOR 1998-99 UNDER ALL SEASONS

Principal Crops	Irrigated			Un-irrigated			Total

Note : * Data for irrigated and un-irrigated area separately are not available.

As already stated, Paddy, Jowar, Maize and Ragi are the major Cereal crops grown in the district. Besides this Cotton and Sugarcane are the important Commercial Crops of the district. Only 15.11 per cent of the net cropped area is put under Paddy Cultivation. The yield of Paddy under irrigated area is 3,221 Kgs

per hectare and under un-irrigated area it is 1,431 Kgs per hectare.

Jowar and Maize are next important crops of the district other than Paddy. About 20.5 per cent and 15.1 per cent of the net cropped area is put under Jowar and Maize cultivation respectively. The yield of Jowar and Maize under irrigated area is 2,508 and 3,859 Kgs per hectare respectively whereas under un-irrigated area it is 1,284 and 3,339 Kgs per hectare.

Among the Commercial crops of the district mention may be made of Cotton and Sugarcane. 79,382 hectares of land is put under the cultivation of Cotton.

Sizeable hectares of Land is put under horticultural crops. The chief crops grown are Onion, Tomato, Mango, Banana and Guava. Total area put under cultivation of Plantation and horticultural crop is 14,842 hectares of land. The other Condiments and Spices crops grown in the district are dry Chillies, Ginger, Garlic, Coriander, Arecanut and Coconut.

AREA, PRODUCTION AND AVERAGE YIELD OF CROPS FOR 1998-99 UNDER ALL SEASONS

Crops	Area in hectares	Production in tones	Yield in Kgs per hectare

(12) Irrigation

The irrigation wealth with which the district is endowed with is not quite satisfactory. Though the general usefulness of rivers and streams which criss-cross the district cannot be denied, it has to be conceded that these are not of any specific economic

significance. For the district does not have within its limits any hydel power generating station though the rivers Tungabhadra,Varada and Hagari flows through the district. The water of these rivers have not been harnessed on a large scale within the district for the purposes of Irrigation. The Dharma Project is the only medium size irrigation project of the district. This is an old irrigation system built about 400 years ago but kept in good repairs and improved upon in recent decades. The Head works of the Canal are at Shirngere near Hanagal. The statistics given in the table below reveals that there are good number of wells at Hirekerur and Ranibennur. There are no irrigation wells in the Haveri taluk.

The Department of Irrigation has built three Lift irrigation project and Barages near Honkana, Koosnur and Arelakanpur villages to harness river water in Hanagal taluk. Barages near Sangur, Nagnur, Kanjagi, Hosariththi, Maradur, Neeralagi and Belevigi of Haveri taluk, Kunimellihalli and Hiremarlihalli of Savanur taluk of the district have been built. Lift Irrigation Project near Koosanur and Vasana of the left bank and Sheshagiri on right bank have been constructed.

The below given table shows a clear picture on the net area irrigated by different sources in the district for the year 1998-99.

NET AREA IRRIGATED BY DIFFERENT SOURCES

Name of Taluk	Net area irrigated for 1998-99 (Area in hectares)						
	Canal	Tanks	Wells	Lift Irrigation	Tube Wells	Others	Total
1	2	3	4	5	6	7	8
Byadgi	-	71	-	-	3,510	-	3,581

(13) Natural Wealth

The mineral wealth with which the district is endowed is not quite impressive. However the mineral wealth of the district includes gold, copper, iron and manganese besides granite, which is most useful as construction material and is extensively quarried in all parts of the district. The talukwise mineral resources for the district is presented in the following table.

TALUK WISE MINERAL RESOURCES OF THE DISTRICT

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor	
1	2	3	4	5
1	Byadgi	-	Building Stone	-
2	Hanagal	Clay	Building Stone	-

(14) Animal Husbandry

Animal Husbandry is by and large regarded as an adjunet to agriculture. Livestocks forms an important part of a farmer's possessions. A farmer usually keeps a pair of bullocks, a few cows, often a few sheep, goats and poultry. In rural areas, a

farmer's status and efficiency are judged by the number of Cattle that he possess.

The bullocks and he buffaloes are mainly kept for the purpose of heavier agricultural work on the farm and cows and she buffaloes mainly for breeding and milk production. Bullocks are the common animal in the agricultural operation and rural transportations. The cows and bullocks belong to the imported breed. The Amrith Mahal and Krishna valley are important among them. Among the buffaloes the Pandharapuri and the Jawari breeds are common.

According to livestock census 1997 provisional figures, the total livestock population in the district is 926,281 which includes cattle, buffaloes, sheep, goat, pig, rabbits and dogs. The total poultry stock is 362,000. The following table shows the distribution of various types of livestock in the district for the year 1997.

DISTRIBUTION OF LIVESTOCK POPULATION IN THE DISTRICT

Sl. No.	Name of Livestock	Total Livestock
1	2	3
1	Cattle	345,411
2	Buffaloes	121,386
3	Sheep	280,874
4	Goats	133,125
5	Pigs	2,822
6	Rabbit	64
7	Dogs	42,599
	Total Livestock	**926,281**
	Total Poultry	**362,000**

(14A) Veterinary Services

The main function of the Veterinary department are treatment of sick animals, control of Cattle Epidemics and Castrations.

As regard the avaiability of Veterinary services in the district, it may be mentioned here that as on 31.3.99 there are 10 Veterinary Hospitals, 29 Veterinary dispensaries, 72 Primary veterinary centres besides, 7 mobile dispensaries and 21 Artificial Insemination centres. Thus numbering to 139 Veterinary Institution comprising all the categories.

VETERINARY INSTITUTIONS IN THE DISTRICT FOR THE YEAR 2000

Sl. No.	Veterinary Services	No. of Institutions
1	2	3
1	Veterinary Hospital	10
2	Veterinary Dispensary	29
3	Primary Veterinary Centre	72
4	Mobile Dispensary	7
5	Artificial Insemination	21

Source : Karnataka at a Glance 2000-2001, Directorate of Economics and Statistics, Govt. of Karnataka

The table furnished above clearly describes category wise, talukwise number of veterinary service institution in the district.

(15) Fisheries

The Rivers such as Tungabhadra, Varada and Kumudavati besides several streams and nallahs and the numerous tanks of varying dimensions found scattered all over the district provide ample opportunity to the fishing profession. There is a considerable scope for the development of inland fisheries. Large scale fishing activity throughout the year is at present restricted to the villages on the bank of major rivers. By and large fishing is a seasonal occupation for most of the tanks and streams dry up during the summer seasons.

Amongst the taluks of the district, Hanagal has the largest water spread area followed by Haveri taluk. There are several fisherman co-operative societies in the district. The contribution of fisheries to the overall economy of the district is only marginal.

Source : Statistical Bulletin of Fisheries, 1998-99, Directorate of Fisheries, Government of Karnataka.

(16) Industries

Haveri ranks among the industrially backward district of the State. There are no mineral based industries in the district. There are few agro based industrial units. Ground nut oil mills are more in number and are found all over the district. There are several general Engineering works which are engaged in the manufacture of Iron and Steel goods and in carrying out repair works. Automobile repairs workshop are also found all over the district.

Of the large scale Cotton textile industry a mention may be made about the Harihar Polyfibers on the northern bank of the River Tungabhadra in Ranibennur taluk to produce synthetic cloths and yarn. There are several rice mills all over the district, especially in the taluks of Hanagal and Haveri. Among the other important industries a mention may be made of the beedi factories and the units engaged in the manufacture of brass and copper utensils and those engaged in the production of agarbathis.

There are large number of power looms also. Cotton yarn of different counts and artificial silk are the main raw materials. There are some Weavers Co-operative societies. Ranibennur is one of the important centre of this traditional industry. The main product is Kambli (Coarse Blanket).

Domestration cum Silk farms have been established at Ranibennur, Haveri and Hirekerur taluks of the district. Leather tanning and production of Leather foot wear is the other small scale and household industry of the district. Hanagal and Ranibennur taluks are the prominent centres of Leather works.

The table below gives details of major factories for the year 1998-99.

TALUKWISE DETAILS OF MAJOR FACTORIES FOR THE YEAR 1998-99

(17) Trade and Commerce

Trade and Commerce constitute the back bone of the economy of a district. Trade and Commerce rank next only to agriculture as important source of livelihood for the people. Haveri is a route centre, but claims quite a large under its commercial influence and specializes in its export of Cardamoms gathered from the Kanara interior. The market place is obviously the centre of activity around which hums the urban life. Byadgi as a trade centre has also a similar function, the town is one of the largest Chilli exporting centre.

The trade has undergone not only growth in volume but also changed in pattern and organization. Rapid improvement in transport popularity of machine made goods, growing importance of Commercial crops etc., have all influenced this transformation. Byadgi, Haveri and Ranibennur are some of the main centres of trades located naturally at the transport junction.

Centres of whole sale trade known as Padmuli (whole sale) Bazars play the most important part in assembling and distributing agricultural and other goods in the district.

Byadgi, Haveri, Ranibennur, Savanur are some of the noted whole sale market centres of the district. Chillies, Betelnut, Groundnut seed and Cardamom, Cotton are some of the important Commodities handled here. In exchanging the goods and commodities, regulated market plays an important role. Besides this, Village shop keepers occupy an important place in the organisation of trade in rural areas of the district.

As on 31.3.99 the district has 48 Commercial and 47 Rural Banks. Besides there are 12 Urban Co-operative Bank. Every taluk of the district has one State Agricultural & Rural Development Bank numbering to Seven in the district.

The table below gives the taluk-wise details of banks in the district.

TALUKWISE DETAILS OF BANKS IN THE DISTRICT

Name of Taluk	Number of Banks as on 31.03.1999

Source: Haveri District at a Glance 1998-99, District Statistical Officer, Haveri.

There are also no. of co-operative societies discharging useful functions in different parts of the district and are dealing with various items produced by them. The number of regulated markets are 15 and the total turnover of these market are around 25,750 lakhs.

The below given table gives the details of number of co-operative societies in the district.

NUMBER OF CO-OPERATIVE SOCIETIES IN THE DISTRICT

Name of Taluk	Co-operation and Agricultural Marketing as on 31.03.99								
	Co-operative Societies					Regulated Markets

(18) Transport and Communication

Transport and Communication play an important role in the economy of the district. Haveri district is favourably placed in this regard as it has a good network of roads and railway communication. National High way 4 passes through the district and touches Haveri and Ranibennur. Roads in the district have been classified according to their importance into four category. Viz, 1) National High way which has a length of 103 kms. 2) State High way 197 km. 3) Major district Road with a length of 742 km in the district. Besides this, the district has the other three category of Roads such as 1) other district Roads with 20 km length and 2) Village Roads 2080 km length 3) T.D.B. Roads 1681 km length. Besides Road ways, the district is well connected with rail route as well. The total rail length in the district is 79 kms Broad Gauge with 9 Railway stations. The details of various facilities available under transport and communication for the year 1998-99 are given in the following tables :

DETAILS OF RAILWAY TRANSPORT IN THE DISTRICT

Name of Taluk	Length of Railway Line in kms.				Railway Stations

(19) Electricity and Power

Karnataka has a place of pride in the history of power generation in the country. KPTCL - Karnataka Power Transmission Corporation Limited (erstwhile KEB) is mainly vested with the functions of transmission and distribution of power in the entire state. The Corporation has been attaching great importance to electrification of villages and hamlets, tribal colonies and harijan basthis and energisation of irrigation pumpsets. Besides this, with a view to benefit weakest among the section of society, schemes called Bhagya Jyothi / Kutir Jyothi have been introduced.

Statement gives below shows talukwise number of villages electrified and talukwise energisation of IP as on 31.3.1999 in Haveri District.

TALUKWISE NUMBER OF VILLAGES ELECTRIFIED AND ENERGISATION IN THE DISTRICT

(v) CENSUS CONCEPT

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-

residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A ‘census house’ is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multistoreyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multistoreyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such

building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard, by definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,`singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. But if such hostels/ hotels have out houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is ‘town’ for urban areas and ‘village’ for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non- agricultural pursuits ; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in nonagricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multimember households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household

Households who do not live in buildings or census houses but live in the open on roadside,

pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mantaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In respect of Karnataka State the Scheduled Castes and Scheduled Tribes as contained in the Scheduled Castes & Scheduled Tribes Orders (Amendment) Act, 1976 are valid for the purpose of Census of India, 2001. With the promulgation of Act 39 of 1991 however, the sub entries Naik, Nayak, Beda, Bedar and Valmiki were added under the main entry at S.No. 38 (Naikda, Nayaka, …..) of the Scheduled Tribes list of the State. There are in all 101 Scheduled Castes and 49 Scheduled Tribes in the State which are listed below:

List of Scheduled Castes

1 Adi Andhra
2 Adi Dravida
3 Adi Karnataka
4 Adiya (in Coorg district)
5 Ager
6 Ajila
7 Anamuk
8 Aray Mala
9 Arunthathiyar
10 Arwa Mala
11 Baira
12 Bakad
13 Bant (in Belgaum, Bijapur, Dharwar and North Kanara districts)
14 Bakuda
15 Balagai
16 Bandi
17 Banjara, Lambani
18 Bathada
19 Beda Jangam, Budga Jangam
20 Bellara
21 Bhangi, Mehtar, Olgana,Rukhi, Malkana, Halalkhor, Lalbegi,Balmiki, Korar, Zadmalli
22 Bhambi, Bhambi,Asadaru, Asodi, Chamadia Chamar, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Muchi,Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit, Samgar
23 Bhovi
24 Bindla
25 Byagara
26 Chakkiliyan

27 Chalavadi, Chalvadi, Channayya
28 Chandala
29 Chenna Dasar, Holaya Dasar
30 Dakkal, Dokkalwar
31 Dakkaliga
32 Dhor, Kakkayya, Kankayya
33 Dom, Dombara, Paidi, Pano
34 Ellamalwar, Yellammalawandlu
35 Ganti Chores
36 Garoda, Garo
37 Godda
38 Gosangi
39 Halleer
40 Halsar, Haslar, Hulasvar,Halasvar
41 Handi Jogis
42 Hasla
43 Holar, Valhar
44 Holaya, Holer, Holeya
45 Holeya Dasari
46 Jaggali
47 Jambuvulu
48 Kadaiyan
49 Kalladi
50 Kepmaris
51 Kolupulvandlu
52 Koosa
53 Koracha
54 Korama
55 Kotegar, Metri
56 Kudumban
57 Kuravan
58 Lingader
59 Machala
60 Madari
61 Madiga
62 Mahar, Taral, Dhegu Megu
63 Mahyavanshi, Dhed, Vankar, Maru Vankar
64 Maila
65 Mala
66 Mala Dasari
67 Mala Hannai
68 Mala Jangam
69 Mala Masti
70 Mala Sale, Netkani
71 Mala Sanyasi
72 Mang, Matang, Minimadig
73 Mang Garudi, Mang Garodi
74 Manne
75 Masthi
76 Mavilan
77 Meghval, Menghvar
78 Moger
79 Mukri
80 Mundala
81 Nadia, Hadi
82 Nalkadaya
83 Nalakeyava
84 Nayadi
85 Pale
86 Pallan
87 Pambada
88 Panchama
89 Panniandi
90 Paraiyan, Paraya
91 Paravan
92 Raneyar
93 Samagara
94 Samban
95 Sapari
96 Sillekyathas
97 Sindhollu, Chindollu
98 Sudugadu Siddha
99 Thoti
100 Tigar, Tirbanda
101 Valluvan

List of Scheduled Tribes

1 Adiyan
2 Barda
3 Bavacha, Bamcha
4 Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
5 Chenchu, Chenchwar
6 Chodhara
7 Dubla, Talavia, Halpati
8 Gamit, Gamta, Gavit, Mavchi, Padvi, Valvi
9 Gond, Naikpod, Rajgond
10 Gowdalu
11 Hakkipikki
12 Hasalaru
13 Irular
14 Iruliga
15 Jenu Kuruba
16 Kadukuruba
17 Kammara (in South Kanara district and Kollegal taluk of Mysore district)

18 Kaniyan, Kanyan (in Kollegal taluk of Mysore district)
19 Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari
20 Kattunayakan
21 Kokna, Kokni, Kukna
22 Koli Dhor, Tokre Koli, Kolcha, Kolgha
23 Konda Kapus
24 Koraga
25 Kota
26 Koya, Bhine Koya, Rajkoya
27 Kudiya, Melakudi
28 Kuruba (in Coorg district)
29 Kurumans
30 Maha Malasar
31 Malaikudi
32 Malasar
33 Malayekandi
34 Maleru
35 Maratha (in Coorg district)
36 Marati (in South Kanara district)
37 Meda
38 Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka, Naik, Nayak, Beda, Bedar and Valmiki
39 Palliyan
40 Paniyan
41 Pardhi, Advichincher, Phanse Pardhi
42 Patelia
43 Rathawa
44 Sholaga
45 Soligaru
46 Toda
47 Varli
48 Vitolia, Kotwalia, Barodia
49 Yerava

Language and Mother tongue

As per the Census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as ‘Main worker’ .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if she or he is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops - tea, coffee, rubber, coconut and betelnuts (areca).

Agricultural labourer

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. A person who has been engaged in the economic activity like above is termed as Household Industry Worker.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as an 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1000 males in a population.

(vi) NON-CENSUS CONCEPTS

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well

(protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a subsoil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1,000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear female population of the same age group}} \times 1,000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear married female population of the same age group}} \times 1,000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Midyear female population in the age-group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Midyear married female population in the age-group (15-49) years.}} \times 1,000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Midyear population of the same age group}} \times 1,000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U_5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neonatal mortality rate and Post neonatal mortality rate. The neonatal mortality rate also comprises of two parts viz., early neonatal mortality rate and late neonatal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$\text{ENMR} = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$\text{LNMR} = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$\text{PNMR} = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Perinatal mortality rate (PMR)

Number of stillbirths plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Still Birth Rate (SBR)

$$\text{SBR} = \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Maternal Mortality Rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/ his family normally resides. She/he is not considered as migrant

iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/ Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000- 4,999,999); M5 (1,000,000-1,999,999); M4 (500,000-999,999); M3(300,000-499,999); M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of `Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban

Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

(a) Distribution of population in Rural-Urban Areas:

According to the 2001 Census, the total population of Haveri district is 1,439,116, comprising 740,469 males and 698,647 females. The population of the district forms 2.7 per cent of the state population and ranks at 20th place among the districts. Out of the total population of the district 79.2 per cent lives in rural areas while 20.8 per cent lives in urban areas. Rural population of the district is distributed among 7 taluks and urban population spread over in 9 towns. The total urban population in the district is 299,020 persons comprising 153,534 males and 145,486 females. The total rural population in the district comes to 1,140,096 persons and is composed of 586,935 males and 553,161 females as per 2001 Census. This rural population is distributed in 691 inhabited villages and there are 7 un-inhabited villages in the district.

(b) Size-class and Civic Status of towns:

The Statement below gives the position and number of urban units according to size-class of population as per 2001 Census:

SIZE-CLASS AND CIVIC STATUS OF TOWNS

Serial number	Size-Class of town	Name and civic status of town		Urban Population		
				Persons	Males	Females
1	2	3		4	5	6
1	III	Shiggaon	TP	24,327	12,507	11,820
2	III	Bankapura	TP	20,324	10,608	9,716
3	III	Savanur	TMC	35,563	18,333	17,230
4	III	Hangal	TMC	25,009	12,801	12,208
5	II	Haveri	TMC	55,913	28,589	27,324
6	III	Byadgi	TMC	25,663	13,124	12,539
7	IV	Hirekerur	TP	15,872	8,104	7,768
8	II	Ranibennur	CMC	89,618	45,976	43,642
9	V	Kodiyal	CT	6,731	3,492	3,239

Population Growth, Density and Sex-ratio:

Population Growth:

Haveri District witnessed a positive growth rate in each decade with 10.5, 7.4, 19.7, 24.9, 14.9, 24.8, 20.5 and 13.4 per cent during the period 1901 to 2001 (except 7.7 and 5.2 per cent negative growth during 1901-1921). According to the 1991 Census the total population of the district was 1,269,213. There has been net addition of 169,903 persons during 1991-2001. The decadal growth rate of the district comes to 13.4 per cent. The growth rate for the rural and urban areas of the district is 7.0 and 46.7 per cent respectively.

Density:

The population density of Haveri district is 298 persons per Sq. Km. against the state average of 276 persons. At taluk level, the density varies between 263 persons in Hirekerur taluk and 337 persons in Ranibennur taluk. In rural areas it comes to 243 persons per Sq. Km., while in urban areas it comes to 2,137 persons. In urban areas the density of population varies between 1,027 persons in Hanagal town and 7,661 persons in Byadgi town.

Sex Ratio:

There are 944 females for every one thousand males in Haveri district. The sex-ratio figures for rural areas and urban areas of the district are 942 and 948 respectively. It is also observed that, the proportion of females in rural areas is higher than that of urban areas. Sex-ratio in the age-group 0-6 comes to 957 girls per one thousand boys in the district as a whole. In rural areas, this proportion is 959 , while in urban areas the sex-ratio of Child population works out to 946 girls per one thousand boys.

Work Participation Rate:

The work participation rate is defined as percentage of total workers to total population.

According to 2001 Census, the total workers including main and marginal workers constitute 46.3 per cent of total population of the district. Of the total workers, the share of main workers is 79.7 per cent and marginal workers is 20.3 per cent. The remaining 53.7 per cent of population belongs to the category of non-workers.

As per 2001 Census among the main workers male participation rate in the district is 90.3 per cent and corresponding proportion of females is 60.1 per cent. The proportion of female marginal workers is higher than male marginal workers, as the females are attending to one or more economic activities in addition to their household duties to improve the family income. Majority of the workers are engaged in agricultural activities. Of the total 666,714 workers in the district, 30.5 per cent of these total workers are categorized as cultivators, 43.7 per cent agricultural labourers, 4.1 per cent in household industries and 21.6 per cent in other services.

Literacy:

A person who can read and write in any language is considered as literate in Census. All children of age below 7 years are treated as illiterate.

As per 2001 Census, Haveri district has reported 837,509 persons as literates constituting 67.8 per cent of the total population excluding the population of 0-6 years. The proportion of male and female literacy rates in the district are 77.6 and 57.4 per cent respectively. The literacy rate of males is higher than that of females. The gap in the male - female literacy rate is 20.2 in the district.

The total literacy rates of rural and urban area are 65.9 and 75.0 percent respectively. The rate male and female literacy in rural areas is 76.6 and 54.5 per cent respectively. In urban areas this rate are 81.4 and 68.2 per cent respectively. The gap in male - female literacy rates in urban areas is 13.2 as against 22.1 in rural areas. It is thus clear that females are better educated in urban areas than their counterparts in rural areas.

(c) Scheduled Castes and Scheduled Tribes Population 2001:

Of the 1,439,116 total population of the district 12.2 per cent of the total population belong to Scheduled Castes and 8.8 per cent to Scheduled Tribes. The percentage of Scheduled Castes constitute 72.3 per cent in rural areas and 27.7 per cent in urban areas. The proportion of Scheduled Tribes are 77.2 and 22.8 in rural and urban areas respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36

Following tables, which presents the data on population within the district, with a brief notes will provide an overview of the district.

TABLE 1: DECADAL CHANGE IN POPULATION OF TALUKS BY RESIDENCE, 1991-2001

Taluk	Population						Percentage decadal variation 1991-2001			Percentage Urban Population	
	1991			2001							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12
Shiggaon	147,499	127,690	19,809	166,742	122,091	44,651	13.05	-4.38	125.41	13.43	26.78
Savanur	123,674	93,935	29,739	143,885	108,322	35,563	16.34	15.32	19.58	24.05	24.72
Hanagal	204,408	183,502	20,906	230,750	205,741	25,009	12.89	12.12	19.63	10.23	10.84
Haveri	220,476	175,181	45,295	252,347	196,434	55,913	14.46	12.13	23.44	20.54	22.16
Byadgi	111,935	91,361	20,574	127,944	102,281	25,663	14.30	11.95	24.74	18.38	20.06
Hirekerur	191,956	191,956	0	212,458	196,586	15,872	10.68	2.41	-	0.00	7.47
Ranibennur	269,265	201,823	67,442	304,990	208,641	96,349	13.27	3.38	42.86	25.05	31.59
Haveri	**1,269,213**	**1,065,448**	**203,765**	**1,439,116**	**1,140,096**	**299,020**	**13.39**	**7.01**	**46.75**	**16.05**	**20.78**

Decadal variation in population of taluks by residence is indicated in the above table. Data reveals that over all growth of 13.39 per cent has been recorded in the district during the decade. The growth of population in rural areas of the district is 7.01 per cent, while in urban areas it is 46.75 per cent. Thus, the population of district has grown faster in urban areas.Among the taluks Savanur has registered highest

growth in total population. In urban areas Shiggaon taluk is higher. However in Shiggaon taluk the rural population is indicating a decreasing trend. A negative growth rate is reported from this taluk.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Shiggaon	91	122,091	62,997	59,094	5 (5.5)	304	285

140 (20.3)	**209,993**	**197,113**	**25 (3.6)**	**90,862**	**85,832**	**3 (0.4)**	**18,404**	**17,519**

The above table indicates the number and per cent of inhabited villages with different population size ranges as per 2001 Census. Data reveals that out of 691 inhabited villages, highest number of villages 251(36.3 per cent) are in the population range of 1000-1999. Only three villages are having a population range of 10,000. 18 villages (2.6 per cent) are having population less than 200. Other details can be observed from the table no. 2 above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS

		Name of Town
(a)	New	
	(i) Statutory Town	**1.Bankapura (TP), 2. Hirekerur (TP)**
	(ii) Census Town	**1. Kodiyal (CT)**
(b)	Denotified	
	(i) Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as Census Towns	**- Nil -**
	(ii) Statutory towns of 1991 Census denotified but identifiable as Census Towns based on demographic and economic criteria	**- Nil -**
	(iii) Census towns of 1991 Census are notified as Statutory town in 2001 Census	**- Nil -**
(c)	Declassified	**- Nil -**
(d)	Wholly merged with other town(s)	**- Nil -**

Declassified means the Census towns of 1991 Census which failed to satisfy the demographic and economic criteria.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	2	0.3	162	0.0
11-20	1	0.1	1,587	0.1
21-50	13	1.9	2,942	0.3
51-100	51	7.4	28,085	2.5
101-200	203	29.4	216,747	19.0
201-300	226	32.7	408,023	35.8
301-500	147	21.3	344,217	30.2
501 +	48	6.9	138,333	12.1
Not known	0	0.0	0	0.0
District Total:	**691**	**100.0**	**1,140,096**	**100.0**

Population Density (Rural) of the district: 238.4

Distribution of villages of population density and ranges are presented in this table. The density of population for the district rural is 238.4 person/sq. km. If the villages are distributed by different ranges of population density, the picture that would emerge for the rural population of the district would be as indicated in the above table no.4. Highest no of 32.7 per cent of villages falls in the population density range of 201-300, covering a population of 408,023, other details can be had from the table.

Table 5, gives the sex ratio for the rural and urban population of the state as well as that of the district from 1901 to 2001 Census.

It is observed that the state has recorded a decrease in the sex ratio since 1901 Census (983). However in 2001 Census, the state has registered a better sex ratio of 963, little higher than the ratio of 1991 Census (960).

For the district, the sex ratio in 1901 Census was 1,003, which with some fluctuations gradually

decreased over the decades. However in 2001 Census, the district has recorded a sex ratio of 948 slightly better than that of 1991 Census (947) and it is less than that for the state (963).

Again, the ratio for rural women in 2001 Census is comparatively better that that for the urban women in the state as well as in the district.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT 1901-2001

Census Years	Karnataka			Census Years	Haveri		
	Total	Rural	Urban		Total	Rural	Urban
1	2	3	4	5	6	7	8
1901	983	984	976	1901	973	968	1,003
1911	981	984	960	1911	973	969	1,016

TABLE 6 : SEX RATIO BY TALUKS, 2001

Sl. No.	Name of Taluk	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Shiggaon	936	938	932
2	Savanur	935	934	940
3	Hanagal	953	953	954
4	Haveri	938	933	956
5	Byadgi	945	943	955
6	Hirekerur	952	952	959
7	Ranibennur	942	940	948
	District Total:	**944**	**942**	**948**

This table gives the talukwise sex ratio for rural and urban population as per 2001 census. It is observed from the above table that the sex ratio for rural areas is 942 and urban area is 948. The sex ratio is high in Hanagal taluk and low in Savanur taluk, whereas in urban areas highest (959) sex ratio reported from Hirekerur taluk.

The sex ratio of the district as a whole is 944 females per 1,000 males.

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Sl. No.	Name of C. D. Block	Sex ratio
1	2	3
1	Shiggaon	938
2	Savanur	934
3	Hanagal	953
4	Haveri	933
5	Byadgi	943
6	Hirekerur	952
7	Ranibennur	940
District (Rural) Total:	**942**	

This table highlights the data on sex ratio by CD blocks which includes all villages in the district. The sex ratio for the district rural is 942. Among the CD blocks, highest sex ratio is noticed in Hanagal followed by Hirekerur and Byadgi which is above the district rural sex ratio. Whereas lowest sex ratio is reported from Haveri CD block (933).

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	0	0.0	0	0.0
700-749	2	0.3	262	0.0
750-799	5	0.7	2,051	0.2

District Total:	**691**	**100.0**	**1,140,096**	**99.9**
Sex ratio (Rural) for District :		**942**		

The sex ratio of the rural population by ranges given for the inhabited villages in the district is indicated in the above table No. 8. Around 237 villages covering a population of 463,906 falls under the sex ratio range of 900-949. About 93 villages covering population of 90,170 falls under the sex ratio range of 1,000-1,099. Other details can be observed from the table.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Shiggaon	TP	945
2	Bankapura	TP	916

		Urban	**42,358**	**21,770**	**20,588**	**946**

Talukwise sex ratio of population in the age group of 0-6 years with rural, urban breakup for the district is presented in the above table. Data reveals that among the taluks the sex ratio in the age group of 0-6 is highest in Hirekerur 974 and 963 in Haveri taluks. The district total for sex ratio is 957. Rural sex ratio is higher in 4 taluks and in other three taluks, the urban sex ratio is higher.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Shiggaon	18,704	9,616	9,088	945
2	Savanur	16,116	8,283	7,833	946

District (Rural) Total:		**161,354**	**82,349**	**79,005**	**959**

Sex ratio for 0-6 age group in the CD blocks of the district is presented in this table. The sex ratio for the district rural is 959. Among the CD blocks highest sex ratio is reported from Hirekerur (971) and lowest of 945 is reported from Shiggaon and Savanur CD blocks(946).

Sex ratio for the rural population by ranges has been given in table 12. Data reveals that except for the ranges from 700-749 in all other ranges good number of villages are reported under each range. Though the sex ratio for the district rural is 959 (in the age group for 0-6) it is worth noting that 178 out of 691 inhabited villages have the sex ratio favourable for female child.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	23	3.3	3,175	2.0
700-749	30	4.3	4,312	2.7

Taluk wise number and percentage of Scheduled Castes/ Scheduled Tribes population is given in the above table. The total Scheduled Caste/Scheduled Tribe population in the district is 12.2 per cent and 8.8 per cent respectively. The rural-urban distribution reveals that 13.4 per cent of Scheduled castes live in rural area and 7.7 per cent of them live in urban areas. As regards Scheduled Tribes 10.2 per cent live in rural areas and 3.8 percent of them live in urban areas. The table also indicate the percentage of Scheduled Castes/Scheduled Tribes population to total population in the district.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Shiggaon	122,091	14,716	9,484	12.1	7.8
2	Savanur	108,322	16,999	11,114	15.7	10.3

41-50	10	1.4	4,199	2.8
51-75	21	3.0	11,083	7.3
76 and above	37	5.4	25,812	16.9
District Total	**691**	**100.0**	**152,349**	**100.0**

The above table shows the distribution of villages by percentage range of Scheduled Castes/ Scheduled Tribes population to total population and the per cent distribution of Scheduled castes population in different ranges. Data reveals that out of 691 inhabited villages 52 villages do not have Scheduled castes population. The maximum Scheduled castes population falls in the range 5-10 per cent in 203 villages. There are only 37 villages which comprises of more than 76 per cent of Scheduled Castes population and number of villages where the Scheduled Castes population varies between 51-75 per cent are 21.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	115	16.6	0	0.0
Less than 5	155	22.4	8,528	7.4
5-10	134	19.4	23,049	20.0

41-50	11	1.6	3,945	3.4
51-75	11	1.6	5,261	4.5
76 and above	8	1.2	2,114	1.8
District Total	**691**	**100**	**115,826**	**100**

The above table shows the distribution of villages by percentage range of Scheduled Tribes population to total population and the percentage distribution of Scheduled Tribes population in different ranges. Data reveals that out of the 691 inhabited villages, 115 villages do not have Scheduled Tribes population. The maximum number of villages falls in the range of less than 5 in 155 villages followed by the range of 11-20 percent with 153 villages. There are only 11 villages where Scheduled Tribes population varies between 51-75 per cent.

Number and percentage of Scheduled Castes and Scheduled Tribes population for urban agglomeration/towns of the district is presented in the above table. Scheduled Castes/Scheduled Tribes constitute 7.7 per cent and 3.8 per cent of the district urban population. The highest (11.6 per cent) of Scheduled Castes population is reported

from Haveri (TMC) and Byadgi 10.6 and lowest of 4.3 per cent is reported from Bankapura (TP). The highest 10.7 per cent of Scheduled Tribes population is reported from Byadgi(TMC) and lowest 0.7 per cent is reported from Savanur (TMC).

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sex wise distribution of literacy rate by residence in the Taluks of the district is presented in the above table. Data reveals that the total literacy rate of district is 67.8 per cent. Male and female literacy rate constitute 77.6 per cent and 57.4 per cent respectively. Gap in male-female literacy is 20.2 per cent. Highest literacy rate of 73.5 per cent is reported from Hirekerur taluk which is however higher than the district percentage. The highest female literacy rate of 75.7 per cent is reported from the Hirekerur urban areas. The gap in male-female literacy is highest of 23.8 per cent reported from Ranibennur rural areas.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

71-80	193	27.9	318,638	27.9
81-90	34	4.9	49,278	4.3
91-99	3	0.4	2,954	0.3
100	0	0.0	0	0.0
District Total:	**691**	**100.0**	**1,140,096**	**100.0**
Literacy rate for District :		**67.8**		

The literacy rate for the district rural as reported is 65.9. If the distribution of villages are made according to range of literacy rate in the district the picture that would emerge would be as indicated in the above table no 23. The highest no. of villages 270 having a population of 494,982 falls under the literacy range of 61-70 per cent. Only three villages comes under the literacy range of 91-99, comprising a population of 2,954.

The distribution of urban literacy rate by sex is presented in table 24. Data reveals that the literacy rate for the district urban is 75 per cent. Urban literacy rate among the male is 81.4 per cent and females is 68.2. The gap in male-female literacy rate is 13.3 per cent. Highest literacy rate of 81.7 per cent and highest male literacy rate of 88.9 per cent is reported from Kodiyal CT. Highest female literacy rate of 75.7 per cent is reported from Hirekerur (TP).

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District (Rural) Total:		**60,855**	**39,862**	**20,993**	**91,494**	**38,552**	**52,942**	**47.7**	**60.5**	**34.0**	**26.5**

This table provides information on sex wise literacy rate among the Scheduled Castes in the CD blocks of the district. The percentage of literacy rate for the district rural is 47.7 per cent. The percentage of male literacy rate works out to 60.5 and that of female is 34.0 percent. The gap in male-female literacy rate is 26.5 per cent. There are not much noteworthy variations or changes exist between CD blocks presentation of literacy rate to that of the district percentage.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	6	0.9	15	0.0
1-10	0	0.0	0	0.0
11-20	6	0.9	259	0.2
21-30	39	6.1	13,072	8.6
31-40	113	17.7	35,408	23.2
41-50	189	29.6	44,480	29.2
51-60	144	22.5	33,194	21.8

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
61-70	89	13.9	18,523	12.2
71-80	32	5.0	6,410	4.2
81-90	15	2.3	760	0.5
91-99	2	0.3	210	0.1
100	4	0.6	18	0.0
District Total:	**639**	**99.8**	**152,349**	**100.0**
Literacy rate for District (Rural):		**47.7**		

The above table highlights the distribution of villages by literacy rate for the Scheduled Castes population. Literacy rate for the district rural is 47.7 per cent. If the distribution of villages is made by range of literacy rate, the picture that would emerge for the 639 Scheduled Castes inhabited villages of the district would be as indicated in the above table no.26. The highest no. of 189 (29.6 per cent) villages comprising a Scheduled Caste population of 44,480 comes under the literacy range of 41-50. Only 4 villages have 100 per cent literacy rate covering a megre population of 18.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl. No	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

The distribution of urban literacy rate by sex among Scheduled Castes is presented in the above table. Data reveals that the literacy rate for the district urban is 67 per cent and that of male literacy rate is 77.7 per cent, female literacy rate is 55.7 per cent. The gap between male and female literacy rate accounts for 22.1 per cent. It is interesting to note that the highest literacy rate of 74.3 per cent, highest male literacy rate of 83.5 per cent, highest female literacy rate of 64.6 per cent is reported from Ranibennur (CMC). The highest male-female literacy gap of 26.2 per cent is reported from Haveri (TMC) and Kodiyal (CT).

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

District (Rural) Total:		**57,211**	**36,126**	**21,085**	**58,615**	**23,515**	**35,100**	**57.6**	**70.5**	**43.9**	**26.6**

This table provides information on sex wise literacy rate among the Scheduled Tribes in the CD blocks of the district. The percentage of literacy rate for the district rural is 57.6 per cent . The percentage of male literacy rate works out to 70.5 per cent and that of female is 43.9 per cent. The gap in male-female literacy rate is 26.6 per cent of all the C.D. Blocks. Hirekerur CD block stands in first position in respect of highest literacy rate of 63.8 per cent, highest male literacy rate of 76.7 per cent, highest female literacy of 50.4 per cent. The highest gap in male-female literacy rate accounts for 28 per cent is reported from Ranibennur CD block.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	3	0.5	6	0.0
1-10	0	0.0	0	0.0
11-20	1	0.2	19	0.0
21-30	6	1.0	339	0.3
31-40	37	6.4	4,743	4.1
41-50	92	16.0	21,175	18.3
51-60	186	32.3	47,429	41.0
61-70	148	25.7	31,430	27.1
71-80	76	13.2	8,709	7.5
81-90	20	3.5	1,077	0.9
91-99	2	0.3	821	0.7
100	5	0.9	78	0.1
District Total:	**576**	**100.0**	**115,826**	**100**
Literacy rate for District (Rural):		**57.6**		

The above table highlights the distribution of villages by literacy rate for the Scheduled Tribes population. Literacy rate for the district is 57.6 per cent. If the distribution of villages is made by range of literacy rate, the picture that would emerge for all the 576 inhabited villages of the district would be as indicated in table no 29. However, highest no of (186) villages comprising population of 47,429 falls under the literacy range of 51-60 per cent. Only five villages comprising a small population of 78 falls under 100 per cent literacy range.

The distribution of urban literacy rate by sex among Scheduled Tribes is presented in table 30. Data reveals that the literacy rate for the district urban is 69.4 per cent and that of male literacy rate accounts for 79.9 per cent, female literacy rate of 58.2 per cent. The gap between male-female literacy rate accounts for 21.8 per cent. Of all the towns, Ranibennur CMC stands first in highest literacy rate of 76.8 per cent and male literacy rate 87.1 per cent. The highest gap in male-female literacy rate of 29.4 per cent is reported from Bankapura (TP). Whereas highest female literacy rate of 65.8 per cent has been reported from Shiggaon (TP).

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy

Data presented in this table is for the CD blocks of the district which includes only the rural population. Data reveals that the percentage of total workers in the district is 49.2 per cent. Among the CD blocks Shiggaon has the highest percentage of 51.4 per cent of total workers. Among the total workers highest percentage among the female are reported from Byadgi. (42.8 per cent). Non-workers constitute 50.8 per cent in the district. Highest percentage of them (53.4 per cent) are reported from Hanagal. Percentage of marginal workers for the district are 10.9 per cent. Highest of 14.8 per cent is reported from Byadgi CD block.

Sex wise distribution of categories of workers for the urban population of district is given in the above table by number and percentage. It can seen from the above table that, the percentage of total workers for the district urban is 35.2 per cent, highest 38.4 per cent of total workers are reported from Savanur (TP). Highest percentage of (69.3 per cent) non-workers are reported from Hanagal (TMC). Among the female total workers highest percentage of 21 per cent is reported from Savanur (TP).

Note: Percent of Worker to total worker are given in brackets

The distribution of total workers by sex according to four fold industrial category in taluks is highlighted in this table. Data reveals that Agricultural labourers and cultivators together constitute 74.2 per cent of the total workers. At taluk level maximum number of 39.4 per cent of cultivators are found in Hirekerur taluk whereas agricultural labourers are more (49.4 per cent) in Savanur. Number of other workers are more in Ranibennur (32.2 per cent).

Note: Percent of Workers to total workers are given in brackets

The distribution of total workers by sex according to four fold industrial category in CD blocks is highlighted in this table. Data reveals that agricultural labourers and cultivators together constitute 83.7 per cent of the total workers. At taluk level maximum number of cultivators are found in Hirekerur (41.2 per cent) whereas agricultural labourers are more in Savanur (54.5 per cent). Number of other workers are more in Ranibennur C.D. Block (18.1 per cent).

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

The distribution of total workers by sex according to four fold industrial category in urban agglomerations/towns is highlighted in this table. Data reveals that other workers constitute 66.2 per cent, cultivators and agricultural labourers constitute 23.4 per cent, whereas household industry workers constitute 10.4 per cent. Highest number of cultivators and agricultural labourers are found in Bankapura (TP) and Shiggaon (TP) respectively and maximum number of female agricultural labourers are reported from Bankapura (TP).

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table reveals brief analysis of various amenities which are available in CD block of the district. It can be seen from the above table that 97.0 per cent of the inhabited villages have educational facilities and 99.1 per cent have improved drinking facility. Medical and post office facilities are available to 51.5 per cent and 33.9 per cent of villages respectively. About 99.0 per cent of villages have power supply in the district. CD blockwise analysis shows that good percentage of inhabited villages have educational facility. The position of medical facilities varies from 36.9 per cent to 62.6 per cent in the CD blocks. Availability of banking facility is not satisfactory.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household

has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

CD blockwise distribution of rural population served by different amenities is presented in table no.38. Data reveals that 98.6 per cent of the rural population is served by educational institutions while 99.6 per cent have improved drinking water facility. About 72.8 per cent of population have medical facility and 61.1 per cent rural population with post facility. About 99.3 per cent of them have power supply.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	26	0	0	26
(b) Middle School	153	15	2	170
(c) Degree College	111	160	416	687
2. Medical:-				
(a) Hospital	210	141	329	680
(b) PHC	285	179	175	639
3. Post Office	438	17	2	457
4. Telephone	130	20	17	167
5. Bus Service	57	5	1	63
6. Banks				
(a) Commercial Bank	319	166	140	625
(b) Co-operative Bank	306	165	175	646
7. Agricultural Credit Societies	369	71	77	517

There are 26 villages which do not have any educational facility, and for these villages, primary school is located at a distance of less than 5 kms. About 170 villages do not have middle school out of which 153 villages have this facility at distance of less than 5 km. Nearly 416 villages have college at a distance of beyond 10 kms. Of 680 villages not having hospitals, 210 have this at a distance of less than 5 kms. For 285 villages primary health centers are available at a distance of less than 5 kms. Regarding post office, telephone and bus service good number of villages have this facility at a distance less than 5 kms. Majority of the villages have banking facility at a distance of 5 kms. range.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table No.40 depicts distribution of villages according to distance from the nearest statutory town and availability of certain amenities. It is observed that the distance from the statutory town to the villages does not exceed 50 km in the district. None of the villages have been classified as unspecified as far as distance is concerned. Distance from nearest statutory town to the village has been correlated with the type of amenities available as per 2001 census. Four categories of distance range per nearest statutory town and type of amenities available in the villages is indicated in the above table. Villages which are in 5-15 and 16-50 km away from the nearest statutory town has most of the amenities like, education, medical and telephone facilities.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of in habited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table No.41 depicts the distribution of villages according to population range and availability of certain amenities. It can be seen from the above table that 272 villages are having a population of less than 1000.

Only three villages have population above 10,000. About 251 villages have population in the range 1,000-1,999. Nearly 99.0 per cent of villages have power supply. Good number of villages 96.7 per cent have education facility. Improved drinking water facility is available in almost all villages. About 34.0 per cent of villages have Post office and transport facilities are also available in 91.3 per cent of villages. Banking facility is less in all ranges.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable
1	2	3	4	5	6
1	Shiggaon	91	55,645	59.7	13.1
2	Savanur	65	53,384	92.4	7.2
3	Hanagal	150	75,086	74.4	36.6
4	Haveri	89	78,142	85.0	13.1
5	Byadgi	64	41,743	75.0	11.1
6	Hirekerur	125	78,738	76.6	18.8
7	Ranibennur	107	95,576	61.1	19.7
	District Total:	**691**	**478,314**	**74.2**	**17.9**

Note: - Cultivable area = irrigated area + unirrigated area

Table No.42 depicts the distribution of villages according to land use. Data reveals that only the cultivable area of the rural district has been taken into consideration which include both irrigated and un-irrigated areas. The cultivable area of the rural portion comprise of 74.2 percent of the total area. Among the CD blocks Savanur is having highest percentage of cultivable area i.e 92.4 percent.If the percentage of irrigated area to total cultivable area is considered, Hanagal CD block is having the highest with 36.6 percent

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1 III	Bankapura (TP)	25.0	0.0	0.0	25.	0.0	0.0	0.0	0.0	0.0
2 III	Byadgi (TMC)	448.0	24.0	424.	403.0	123.0	0.0	55.0	0.0	224.0
3 III	Hanagal (TMC)	444.0	40.0	404.0	362.0	90.0	0.0	69.0	0.0	202.0
4 II	Haveri (TMC)	435.0	45.0	391.0	385.0	96.0	0.0	52.0	0.0	237.0
5 IV	Hirekerur (TP)	501.0	143.0	358.0	68.0	40.0	0.0	0.0	0.0	27.0
6 II	Ranibennur (CMC)	392.0	77.0	315.0	377.0	104.0	0.0	44.0	0.0	228.0
7 III	Savanur (TMC)	161.0	230.0	138.0	145.0	75.0	0.0	19.0	0.0	51.0
8 III	Shiggaon (TP)	353.0	32.0	321.0	252.0	69.0	0.0	53.0	0.0	130.0
	District Total	**359.0**	**51.0**	**306.0**	**299.0**	**86.0**	**0.0**	**41.0**	**0.0**	**171.0**

The total per capita receipt of the urban district is Rs. 359.0 and the total per capita expenditure is Rs. 299.0. The receipts are mainly from sources other than taxes, which is Rs.306.0. And through taxes it is Rs.51.0 The expenditure is again mainly on general administration of Rs.86.0. The expenditure on 'Others' is Rs.171.0 and on public works Rs.41.0. Townwise data is provided in the above table.

The types of educational institutions per 10,000 population for total urban district are 5.6 Primary, 4.5 Junior Secondary/Middle, 2.1 Secondary/Matriculation, 1 Senior Secondary and 0.7 College(s). Byadgi (TMC) has the highest ratio of 8.6 Primary and 6.2 Junior Secondary Schools per 10,000 population. And Hirekerur (TP) has the highest ratio of Secondary/ Matriculation at 3.8, Senior Secondary with 3.2 and 3.2 Colleges. Townwise data is provided in table 44.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bankapura (TP)	4.4	4.4	1.5	0.5	0.5
2	Byadgi (TMC)	8.6	6.2	3.1	1.2	0.4
3	Hanagal (TMC)	6.8	3.6	2.0	0.8	0.8
4	Haveri (TMC)	5.9	5.4	3.2	0.7	0.4
5	Hirekerur (TP)	7.6	5.0	3.8	3.2	3.2
6	Ranibennur (CMC)	5.0	4.1	1.7	1.0	0.7
7	Savanur (TMC)	4.2	3.9	1.7	0.6	0.3
8	Shiggaon (TP)	4.9	3.3	0.4	1.2	0.4
District Total		**5.6**	**4.5**	**2.1**	**1.0**	**0.7**

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bankapura (TP)	16
2	Byadgi (TMC)	29
3	Hanagal (TMC)	37
4	Haveri (TMC)	19
5	Hirekerur (TP)	26
6	Kodiyal (CT)	1
7	Ranibennur (CMC)	4
8	Savanur (TMC)	16
9	Shiggaon (TP)	29
Distrct Total		**17**

The total no.of beds in medical institutions of the urban district is 17 per 10,000 population. Townwise data is provided in the above table and may be noted that the highest ratio of 37 beds is reported from Hanagal (TMC). And lower ratio of 1 and 4 is reported from Kodiyal (CT) and Ranibennur (CMC) respectively.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Byadgi	25,663	1,680	6.5
2	Hanagal	25,009	3,983	15.9
3	Haveri	55,913	8,666	15.5
4	Hirekerur	15,872	825	5.2
5	Ranibennur	89,618	6,025	6.7
6	Savanur	35,563	3,650	10.3
7	Shiggaon	24,327	2,000	8.2
District Total		**271,965**	**26,829**	**9.9**

Slum population and percentage to total population is presented in the table. The urban district total percentage of slum population is 9.9 per cent. Hirekerur (TP) reported the lowest of 5.2 per cent slum population and the highest of 15.9 per cent is reported from Hanagal (TMC).

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bankapura (TP)	Cotton Cloth	Cotton Cloth
2	Byadgi (TMC)	Chilly Powder Leather Chappals Agrl. Equipments	Cotton (Lint) Chilly Powder Betelnut
3	Hanagal (TMC)	Cut Sizes of Timber Cotton (Lint)	Rice Cotton (Lint) Sugarcane
4	Haveri (TMC)	Cardamom Bleaching Bricks	Cotton (Lint) Groundnut Cakes Groundnut Oil
5	Hirekerur (TP)	Groundnut Oil	Groundnut Oil Cotton Chillies
6	Kodiyal (CT)	Polly Fiber	Polly Fiber Pulp
7	Ranibennur (CMC)	Edible Oil Handloom Sarees Beedies	Edible Oil Handloom Sarees Beedies
8	Savanur (TMC)	Beedies Groundnut Oil	Beaf Meat Betel Leaf Chillies
9	Shiggaon (TP)	Groundnut Oil Cotton (Lint)	Betel Leaf Groundnut Oil Cotton (Lint)

Different commodities manufactured and exported from the district are plantation and agricultural products like betelnut, edible oils, sugarcane, rice etc. Some of the manufactured products are handloom sarees, cotton cloth, etc. Townwise details are listed in the above table.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48 to 52.

Table No. 50 gives the distribution of households by availability of different amenities. Data reveals that, 97.4 per cent of the households have improved drinking water, 75.3 per cent of them have electricity, 56.0 per cent have bathroom, 26.4 per cent have toilet facility and 48.9 per cent have drainage facility. All the above facilities are reported for Rural and Urban areas.

The type of fuel used for cooking by the households is given in the above table. The different types of fuel include, firewood, crop-residue, cowdung cake, charcoal, kerosene, cooking gas (LPG), electricity, bio-gas etc. It is observed that households using firewood is as high as 73.7 per cent in the district. Even crop residue is as high as 15.3 per cent, compared to cooking gas which is 8.2 per cent. The urban areas too reflect the wide use of fire wood by 59.3 per cent of households. The percentage of households using cooking gas (LPG) in urban areas is 30.3 per cent. The percentage of households using other types of fuel is negligible. Talukwise details can also be seen from the table.

Data on households availing banking services as well as possessing specified assets, is provided in the above table. The percentage of households availing banking facility in the rural, urban district and the state, is more or less equal. The same trend can be observed as far as possession of radio and transistor is concerned. There is a significant and high percentage of urban households possessing television, telephones and scooter, motor cycle, moped. With regard to other assets, more number of urban households have these than rural households. The number / percentage of rural households who do not possess any of the specified assets is higher than urban areas.

(xi) Archaeology

There are many evidence which shows that the district was inhabited by men from early Paleolithic period. The cairns found at Agadi in the Haveri taluk and dolmens discovered at Motebennur in Byadgi taluk indicates the presence of civilization in Haveri district in the early period of antiquity. In some parts of the district pigmy flints have been found, which may be considered to be the memorials of survivors of Paleolithic men. Implements of Neolithic period polished on gneiss rocks, wheel-made pottery, stone beads and pieces of haematite for the manufacture of pigment are the other findings in the district. A village named Belavatti in Hanagal taluk is said to be the site of an ancient city named Lilavati Pattana. Beside this, there were many inscriptions found all over the district belonging from ninth century to thirteenth century. An ancient Virabrahmadeva temple at Warah of Hirekerur taluk contains a Sati stone.

Besides the prehistoric sites mentioned above, there are many famous monuments and temples of archaeological interest spread all over the district, which comes under the administration of Archaeological Survey of India. Descriptions for a few are given below. At Naregal in Hanagal taluk there is an ancient temple of Sarveshvara, containing 24 round polished stone pillars. The famous Galageshvara temple of Galaganath village in Haveri taluk is built of black granite with mythological figures on its walls. The most notable feature of this temple is its great pyramidal basement. The temples of Someshvara and Kaleshvara belonging to Haralahalli of Haveri taluk are now in ruined condition but they are of considerable antiquarian interest. The Rattihalli village of Hirekerur taluk has a ruined fort and an ancient temple of Kadambeshvara built of sculptured slabs and with three domes supported on 36 pillars. The Mukteshvara temple of Chavadadanapur of Ranibennur taluk, which is situated on the banks of the river Tungabhadra is in Chalukyan style and is of some architectural importance. It is built of black stones and has two porches and its walls are decorated with bands of fine scroll work.

(xii) Brief description on places of religious, historical or archaeological importance in villages and places of tourist interest in the towns

BYADGI TALUK

Motebennur : This village has 8 inscriptions. The inscription found on a slab in the Mallikarjuna temple and dated in 1051 A.D. is the earliest. Close to the village there is an unique megalithic structure, apparently the remains of an enormous dolmen of the ancient days. During the medieval period this village was an important centre of Jaina learning where several renowned teachers chose to reside.

Kadarmandalagi : This village has yielded six inscriptions. According to the local belief the main deity in the temple of Maruti Kantesh was installed by the great king Janamejaya mentioned in the Puranas. The inscription found on the Garuda pillar in front of the Hanuman temple records that Kengappa Nayaka, the chief of Sante-bennur granted this village, then known as Kaduravundalige, for the service of the deity.

Kaginelli : The village is noted for its Adikeshava temple which is closely associated with Kanakadasa, the renowned 16th century saint and poet. He is said to have brought the idol of Adikeshava from Baad, his native village, got it installed here and spent his last days in this village as an ardent devotee of the deity and finally attained salvation at the feet of his patron deity. The Lakshmi Narasimha temple is situated adjacent to that of Adikeshava and the construction of both these temples is ascribed to Kondappa and Venkappa. The courtyard of this temple complex has a shrine dedicated to Bhandarakeri Swami. The other temples of interest in this village are those of Kalahasteshvara, Someshvara, Sangameshvara and Veerabhadra. There are about a dozen inscriptions in this village, one of which belongs to the reign of Devagiri Yadava king Ramachandra, the rest relate to the rulers of the Later Chalukyan dynasty.

HANAGAL TALUK

Arleshwar : The local Kadambeshvara temple, built in the medieval style of Chalukyan architecture has seven inscriptions belonging to the reigns of Kadamba Chief Santivarma (1088 A.D.), Tailappa (1122 A.D.), Mallikarjuna (1138 A.D.) and Yadava king Kanhara (1260 A.D.)

Sringeri : Near this village there is an old waste-weir, which has been built across the river Dharma, using carved stones, which are said to have been brought here for the purpose from the ruined temples of Hanagal. This waste-weir forms the head-works of canal system that irrigates about 3000 hectares of land and feeds several tanks.

Bommanahalli : The village is noted for its temple dedicated to Ishwara which is of considerable religious importance in the neighbourhood.

Belavatti : The village has a large blackstone temple of Gokuleshvara containing carved walls and several inscriptions. Most of the inscriptions found in this village belong to the times of the Later Chalukyas. However the earliest record is that of Rashtrakuta King Govinda and is dated in 929 A.D. Belavatti is said to be the site of an ancient city named Lilavati Pattana.

Kudal : The village is located near the confluence of the rivers Dharma and Varada and has the temple dedicated to Sangameshvara besides a hero stone belonging to the twelfth century.

Naregal : Amongst the nine inscriptions found here the earliest one belongs to the reign of Rashtrakuta King Dhruva (780-92 A.D.). During the 11th and 12th centuries this was a flourishing "agrahara" managed by one thousand mahajanas. Besides an ancient temple of Sarveshvara containing 24 round polished stone pillars, the village has a small temple of Basappa and is a famous for its large tank.

Jakkanaikankoppa : The village is known for its temple dedicated to Sarveshvaradeva.

Yelawatti : A temple dedicated to Ramalingeshwara and a Jain 'basti' are the main objects of interest here.

Akki Alur : Akki Alur is known for its Channa Veeresha Matha, a religious institution of considerable importance.

Balambeed : The village has the ancient temples of Rameshvara and Kalameshvara both of which are of antiquarian interest. There are sixteen inscriptions comprising mostly hero stones and nisidi memorials. An epigraph dated in 1145 A.D. records the construction of a Parshvanatha temple here.

Adur : This is an ancient village which contains seven inscriptions. The earliest inscription refers to a Jain temple and belongs to the reign of Kirtivarma II of the Badami Chalukya family (746-757 A.D.).

Hirebasur : The village was formerly known as Vyasapura. Its name was later modified into Basavuru. This was the headquarters of a minor branch of the Silahara chiefs. On a rising ground near this village there is a cave which is believed to pass a great distance underground. Of the 6 inscriptions found here two belong to the reign of Kalachuri Bijjala and his son Ahavamalla and two other inscriptions belong to the reign of Yadava Singhana. The village has two old temples dedicated to Visveshvara and Hanuman respectively.

Tilavalli : Tilavalli is noted for its Santeshvara temple which has comparatively little figure sculpture about it, but is fully decorated with other ornaments. The outer side of the parapet wall is very effectively decorated with an endless repetition of miniature sikharas. The three porches of the hall have rather pretty ceilings. The village has 26 inscriptions, many of which are the times of the Later Chalukya Kings. It was a prominent seat of learning, being an agrahara administered by one thousand mahajans. According to an inscription found here the Santeshvara temple was built in 1238 A.D. by Savanta Kalideva, a subordinate of Yadava Singhana, in memory of his father Savanta Thakkura and named Sanvateshvara after him.

Hallibail : The village has a temple dedicated to Sri. Siddharameshvara.

Honkan : The Ramalingeshvara temple of this village is of considerable interest.

HAVERI TALUK

Sangur : Situated on the left bank of the Varada river, this village has a temple of Ishvara with a roof supported on two octagonal pillars, a Virabhadra temple and a ruined fort. It has eight inscriptions. An inscription dated in 1265 A.D. registers the gift of this village to God Kapilasiddha Mallikarjuana of Sonnalage, the native place of the Veerashaiva saint Siddharama. A stone slab bearing the sculpture of a warrior on horseback bears an inscription dated in 1407 A.D. describing the setting up of the memorial in the name of Kumara Ramanatha, the son of Kampilaraya.

Devihosur : Ten inscriptions spread over the times of the Rashtrakuta, the Chalukyas, the Yadavas and the Vijayanagar rulers have been found here. In ancient times, this was a prominent seat of the goddess Malaja, the consort of Mallari Martanda. The village derives its name from this Devi (goddess) who is now represented by the deity in the local Banashankari temple.

Devagiri : This village has as many as 21 inscriptions, some of which refer to the rule of the Rashtrakutas, the Chalukyas, the Kalachuri and the Yadavas. The Yellamma temple here is said to have been built by Jakanacharya. Other temples of interest here are those of Hanuman and Basavanna.

Karajagi : During the early period of British administration, this was the headquarters of a taluk of the same name, till in 1905, the taluk was named after Haveri and the headquarters was also shifted to that place.

Ganajur : The village is noted for its Muthyadeva temple.

Hosaritti : The Dheerendraswamy Matha and Shri Guddy Swamy Matha of this place are of considerable religious importance in the neighbourhood.

Galaganath : This village is situated on the left bank of the Tungabhadra. It is famous for its Galageshvara temple which is located near the confluence of the rivers Tungabhadra and the Varada. This temple is built of black granite and its walls are covered with mythological figures. The most notable feature of this temple is its great pyramidal basement. The walls rise from the top of this basement. The local Hanuman temple has a monumental hero-stone. Of the five inscriptions found here, the earliest belongs to the 10th century A.D. Two records of Vikramaditya VI, dated in 1079 A.D. and 1080 A.D. , mention his younger brother Jayasimha as the governor of this area.

Haralahalli : The temples of Someshvara and Kaleshvara which are now in a ruined condition are of considerable antiquarian interest. The village has five inscriptions of the 11th and 12th centuries and these refer to the reign of Kalachuri Ahavamalla, Yadava Singhana and Gutta Vikramaditya.

HIREKERUR TALUK

Masur : The village has the ruins of a fort. Close by, there is a large tank popularly known as Magadakere. According to Persian and Arabic inscription stone built into the sluice of this tank the fort at Masur was built in 1635 A.D. by Muhammad Khan, an officer of the Adil Shahi King Mahmud,(1626-1656 A.D.). The tank itself is believed to have been in existence from the times of the Vijayanagar kings. The legend associated with the construction of the mammoth upper sluice of this tank speaks of the young woman named Lakshmi who voluntarily sacrificed her life for ensuring the successful completion of the project and thus attained immortal fame. Another legend speaks of a virgin named Kenchavva, who entered a temple (now submerged under the tank) and devoted herself to god without paying heed to the entreaties of the people to move out when the entire area became inundated.

Warah : The ancient Virabrahamadeva temple of this place contains a Sati stone.

Balambid : The village is well known in the neighbourhood on account of its Vishaparihareshvara temple. It is widely believed that the main deity in the form of a linga, when placated by proper prayers, can provide relief and cure to persons bitten by snakes and other poisonous animals. This temple is built in Hoysala style. The local Basava temple is also a Hoysala structure. Of the five inscriptions found in the village there are dated in 1058 A.D, 1079 A.D. and 1088 A.D. respectively.

Chinmulugund : The black granite temple of Chikeshvara here has walls carved with figures and its roof is supported on 40 pillars. On a hillock to the east of the village there is the shrine of Siddheshvara linga with an underground cave.

Abalur : This village of antiquarian interest has about 20 inscriptions of great historical importance. This was a stronghold of the Jains during the 12th century. But Veerashaiva saint Ekantada Ramiah challenged the Jains in a religious dispute and won the wager, it is said, by cutting off his head which was restored by the grace of Siva. This miracle led to the ascendancy of the Veerashaivas Ramiah and his preceptor are consecrated in the form of Shivalingas in the local Someshvara temple. The Brahmeshvara temple is

notable for the inscriptions describing the exploits of Ramiah. Abalur is the birth place of Sarvajna the famous 17th century Kannada poet.

Rattihalli : Rattihalli has a ruined fort and an ancient temple of Kadambeshvara built of sculptured slabs and with three domes supported on 36 pillars. This was the chief town of a unit of one hundred villages during the medieval period and has yielded ten inscriptions belonging to the reign of the Later Chalukyas, Kalachuri, Yadava and Vijayanagara Kings.

Hallur : This village is noted for its Ranganatha temple.

Nagawad : This village is noted for its Nagarjuna temple.

RANIBENNUR TALUK

Hulihalli : The village which has about ten inscriptions, has the ruins of a fort and a temple of Rameshvara. Some of the inscriptions are of the early 9th century. Three belong to the reigns of Chalukya Jagadekamalla II, Kalachuri Ahavamalla and Gutta Joyideva.

Kajjari : The village is noted for its Kalmeshvara temple.

Gudda Guddapura : The village is on the top of a steep hill and is famous for its temple, enshrining Mailara or Malhari. It is built of black polished stone with a brick spire. The roof is supported on twenty pillars. The outer walls are adorned with carved figures. Near this temple there are several smaller shrines of which two are dedicated to goddesses Malasamba and Tuppada Mallavva. According to local legend, God Malhari incarnated here as Martand Bhairav, and with his 3 metre long bow killed the demon Malla who infested this neighbourbood. It is said that Malhari used to go hunting with a pack of hounds. When the god was enshrined in a temple the dogs incarnated as human beings to serve the god as ministrants who came to be known as Vaggayyas or Goravas. A two day fair is held here commencing on the Mahalaya Amavasya every year and this event attracts a very large number of devotees from far and near. On this occasion, the Vaggayyas put on black woollen jackets, wear necklaces of cowrie shells, tie bells and tiger or bear skins around their waists, hold large wooden bowls in hand and try to appear as ugly and as wild as possible. At the approach of the pilgrims the Vaggayyas bark most furiously at them and hold out their bowls into which the pilgrims pour a little milk and ghee, put a plantain and other eatables besides offering a small coin or two. The great bow of the god is brought out and set up on the fore-ground on the first day of the Dasara. A ministrant climbs to the top of the bow, moves into a trance and gets possessed by the god Malhari and then makes a forecast of the events which would come off during the following year or immediate future.

Honnatti : The Honnattiamma temple of this village is of considerable religious importance in the neighbourhood.

Medleri : This village is situated on the banks of the river Tungabhadra and the main object of interest here is a large tank. The earthen dam forming this tank is 675 metres long has a top which of about 2 metres and a maximum height of about 12 metres.

Chavadadanapur : There are about ten inscriptions in this village and the earliest of these belongs to the reign of Chalukya Vikramaditya VI. Among the other inscriptions, a few refer to the reigns of Yadava Kings Kanhara, Ramachandra and Mahadeva. Mukteshvara temple which is situated on the banks of the river Tungabhadra here is in Chalukyan style and is of some architectural importance. It is built of black stone, has two porches and its walls are decorated with bands of fine scroll work. The other temples of interest here are those of Ishvara and Gopadevasvami.

Udagatti : The Kudli Sringeri matha of this village is a noted religious institution.

Airani : The main object of interest here is the ruins of an old fort. This fort was built irregularly on a small knoll and was of considerable strength in former times. It had an inner line of works surrounded by an outer line with a ditch on the west and the south-west fronts. All the gates as well as their flank defences are now in ruins. There is nothing inside the fort except for the four walls of ruined palace. Close to the fort there is a hill which commands it.

SAVANUR TALUK

Mantrodi : The village is noted for its Siddheshvara matha a religious institution of considerable regional importance.

Karadgi : The Veerabhadra temple of this village attracts a large number of devotees from surrounding villages.

SHIGGAON TALUK

Ganjigatti : The village has a large-sized ceiling slab, nearly 2.5 metres square, which is carved with the images of the ashtadikpalakas. It lies against a platform in the open air at the village shrine and is said to have been brought here from the ruins of a temple at Karjagi. The whole slab, which is a single piece of stone, is divided into nine compartments by two cross ribs each way which are ornamented with bosses at their intersections, and scroll-work down the centres of each. The central panel shows Siva in his Bhairava form dancing upon a prostrate figure and holding up the elephant hide. The carvings have been executed with utmost care and the figures stand out in bold relief.

Hirebendigeri : Known as Pindangere in ancient times this village contains 7 inscriptions, two mathas (called Hirematha and Koradyamatha) and a temple dedicated to Kalappa. Most of the inscriptions are of the times of Chalukya Vikramaditya VI(1076-1126 A.D.) and Jagadekamalla II (1163-1182 A.D.) and Kalachuri Bijjala II (1156- 67 A.D.).

Hulgur : Hulgur is a noted place of pilgrimage to the Muslims of this region. In a valley near the village site there are four tombs one of which is the tomb of a Muslim saint Hazarath Kederi while the others are of his relatives. This saint is said to have lived in Savanur in about 1800 under the Nawab Abdul Khairkhan. It is further said that once while he was away at Bankapur, the Nawab violated the daughter of one of his disciples whereupon the saint cursed the Nawab and retired to Hulgur where he died a few years later. In honour of this saint an annual fair is held. The village has a temple of Siddhalinga and in honour of this deity an annual fair is held immediately after the full-moon day during February-March. In addition the village contains as many as 15 inscriptions which belong to the reigns of Rashtrakutas, later Chalukyas, Kalachuri and Yadava rulers. In ancient times this village was known by the name Pullungur. The earliest inscription at this place is dated in 970 A.D. during the reign of Nityavarsha Khottiga.

Ankadkhan and Shahabazar : This area, along with Ibrahimpur and Kottigeri is collectively known as Bankapura and till 1951, was the headquarters of a taluk named after it. In 1951, the taluk was renamed and the headquarters was moved to Shiggaon. A ruined fort and the ancient temples of Rangaswami Nagareshvara and Siddheshvara are the chief objects of interest here. This is a place of great historical importance, which according to a Jain manuscript from Kolhapur, derives its name from Bankeyarasa, a feudatory of Rashtrakuta Amoghavarsha I(814-80 A.D.), who belonged to the Chellaketan family and was the governor of the Banavasi province. On account of its strategic location it continued to be the headquarters of the subsequent governors and kings of this region. Of the 16 inscriptions found here, the earliest is dated in 993 A.D. and six inscriptions belong to the reign of Someshvara I, Vikramaditya VI and Someshvara II. From 1052 A.D., the Kadamba feudatory Harikesari was ruling at Bankapura. In 1140 Hoysala King Vishnuvardhana captured Bankapura and made it the capital of his northern dominions. An epigraph of Harihara II of Vijayanagara is also found here. This was a famous resort of Jain teachers. At the same time, preceptors of the Pashupata school of Saivism also flourished here. In 1406 A.D. this place and its dependencies were ceded to the Bahamanis. An attempt by Deva Raya to take over this place in 1443 proved futile. After the decline of Vijayanagar supremacy Velapa Raya, a former feudatory with his capital at Bankapur had assumed independence. In 1573 A.D. Ali Adil Shah took Dharwad and marched on Bankapura. Velapa Raya defended himself with great vigour but was compelled to heed after holding out for one year and three months. On this occasion a superb temple within the fort was destroyed and the king himself laid the foundations of a mosque to be built on the site of the temple. In 1673 A.D. Abdul Karim Khan the ancestor of the Nawabs of Savanur was made the governor of the province of Bankapura on behalf of Bijapur. In 1755 A.D. when Savanur was besieged by the French general Bussy the Nawab had to pledge Bankapura fort to Holkar in order to buy off the withdrawal of the Maratha troops. In 1776 A.D. Haidar Ali took Bankapura as well as Savanur and in 1790 this place was the headquarters of a Sirkar of 16 paraganas. Before it was dismantled by Tipu's

army, Bankapura fort was the chief fortification in the province of Savanur which lay about ten kilometres north-east and the two places were together known as Savanur-Bankapura. In 1802 in accordance with the terms of the treaty of Bassein Bankapur taluk was ceded to the British by the Peshwa. About a year later these areas were restored to the Peshwa in exchange for territory in Bundel-Khand.

The Nagareshvara temple is situated on the western side of the ruined fort. It is a fine large building partly ruined and a good deal buried. The hall consisted of 52 pillars cut from selected blocks of dark grey stone. Nearly the whole of the shaft has been turned in a lathe and has been very highly finished. The polishing is so fine as to give out a series of sparkling lights. Several old inscriptions are found in this temple. The Siddheshvara temple is smaller and relatively modern. It is built of black stone, has three doors on the east and its roof is supported on eight pillars. Its walls are adorned with numerous and well-carved figures.

Neeralgi : An inscription found in the Siddharameshvara temple of this village relates to the reign of Vikramaditya VI (1076- 1126 A.D.) and mentions that his feudatory, Tailapa of the Hanagal Kadamba family was administering this area. This temple resembles the Mukteshvara temple of Chandadanapura in its style of construction. This was originally a Vaishnava shrine and a figure of Lord Krishna is found carved above the entrance to the antechamber.

Brief note on places of tourist interest in the towns of the district :

Byadgi : Among the four inscriptions found here the earliest is dated in 901 A.D. and belongs to the reign of Rashtrakuta King Krishna II. The temples of Siddheshvara and Kalameshvara are of some archaeological interest. Since early times Byadgi town is reputed for its trade in chillies, so much so a particular variety grown in this neighbourhood is known as Byadgi Chillies.

Hanagal : Known as Panthipura, Viratapura, Viratakota, Panungal and Hanugal, this place of antiquity has more than 30 inscriptions and several ancient temples. It was for some time the capital of a branch of the Kadamba family. It was well fortified and is mentioned among the strongholds captured by Hoysala Vishnu Vardhana in the course of his Northern expedition. The fort is now in ruins. Among the temples here, the one dedicated to Tarakeshvara is the most interesting. It is a large structure of black granite and consists of four parts, a small anteroom with four pillars, an audience hall or Sabhamantapa with twenty pillars, twelve and eight small pillars, the porch of the shrine and the shrine itself which is irregularly round. A magnificient dome covers the central portion of the Sabhamantapa. This dome is supported on 8 large pillars placed at the corners of an octagon and 8 smaller pillars placed in pairs between these on each side of the octagon. The dome rises for about 9 feet from the octagon in five ascending tiers of circles of cusped mouldings and towards the center, descends again in a splendidly cusped and star shaped central pendant. In each of the 8 corners of the octagon, above each pillar, there is a slab bearing the figure of one of the astadik palakas seated on his mount beneath a floral arch. This is one of the largest and the few that can be classed as the most interesting temples of Haveri district. Near this temple there are three finely carved hero stones. Hanagal has an important Veerashaiva matha called Kumaraswamy matha and in addition has a Sankara matha, a vithal mandir, besides a mosque and a few darghas.

Haveri : In ancient times this was an agrahara administered by four hundred mahajanas and was also known as Pavari and Havari. The town has yielded as many as 32 inscriptions and several of these belong to the rulers of the Yadava dynasty. Epigraphs found engraved on stones, pillars and beams in the Siddeshvara temple record the gifts to the deity Swayambhu Siddhanatha. Built into the wall of a step-well, in front of this temple, there is a stone slab bearing a good representation of the Saptamatrikas. This place was an important center of the Kalamukha sect. In addition to the Siddheshvara temple, the town and its neighbourhood contain several hero stones and ancient temples dedicated to Basavanna, Kalmeshvara, Virabhadra etc. The Hukeri matha belonging to the Veerashaivas is also of importance and under its auspicious a large cattle fair is organised every year. The town has the dargah of Mahabub Subhani which is of considerable religious importance to the muslims. There are mosques, churchs and Jaina

shrines as well. The place shot into prominence during the freedom movement and in commemoration of the martydom of Mailar Mahadevappa a statue has also been installed here. Haveri is a renowned centre of cardamom trade.

Hirekerur : The objects of interest here include the nine inscriptions and the temples of Totada Viranna, Janardhana, Hanuman and Durga. One of the inscriptions is dated in 1060 A.D. and it describes the exploits of Gundamayya, a general of Someshvara I who took part in emperor's campaigns in the area north of river Narmada. The temples of Viranna and Janardhana are badly damaged and half buried in mud. However the beautifully carved figures of the Sun god and Janardhana are note worthy. The temples of Hanuman and Durga are located on the tank bund and the later is noted for the beautiful idols of Durga and Traipurusha.

Ranibennur : The town has three inscriptions of which the earliest is dated in 859 A.D. and the latest which is of the time of the Vijayanagara King Sadasiva Raya is dated in 1550 A.D. Among the temples of the town, the one dedicated to Siddeshvara is the most ancient. The tomb of a muslim saint, Hazrat Jamal Shah who is highly venerated and the annual prayer meeting attracts a large gathering. It is held that this saint came here from Ajmere in about 1785.

Savanaur : In ancient times Savanur was an agrahara administered by 200 Mahajanas who, according to an epigraph of 1087 A.D. selected Madhusudhana, a renowned warrior, as protector of the frontier towns of Savanur. The town has about 20 inscriptions covering different periods. The modern town was founded by Abdul Rauf Khan (one of the ancestors of the Savanur nawabs) who received from Aurangzeb an assignment of the 22 mahals and it first had his headquarters at Bankapur. He took a fancy to a village then known as Janmarahalli, founded the town and later moved his capital. The chief objects of interest here are the Nawab's palace, ruins of the fort and its gates, mosques and the Satyabodhaswamy matha besides some old ponds and wells. Among the mosques, the two named Kamalbandgi and Khadarbag are of special interest in that these two contain the tombs of the Nawabs. Among the large wells, ponds, Vishnu Tirth is held in great veneration by the Hindus of the region. The annual fair held under the Satyabodhaswamy matha attracts a large number of Vaishnava devotees from far and near.

Shiggaon : The town has about 16 inscriptions and the earliest of these, dated in 865 A.D. belongs to Amoghavarsha I and registers a gift to Suryanarayana, the Sun god. The town is noted for its temple of Basavanna and Kalmeshvara. At Edlasad, about 6 Km west of town, there is a well called 'Gangibhavi'. This well is in a fine mango grove and on its edge there is a small shrine of Rameshvara represented in the form of a linga that has sprouted of its own accord. To the north-west of the well there is a cave, said to have once been the hermitage of sage Jahnu who used to drink the well dry and then allow the water to flow out from his ears in the form of a trickle. It may be noted that a small brook rises from this well and flows down the valley. The pilgrims bathe at this well and worship Rameshvara on the auspicious occasion of makara sankranti when a fair is also organized here.

(xiii) Scope of Village Directory and Town Directory

Village Directory

Village Directory provides micro-level data which will help the planners in formulation of micro-level developmental plans as the C.D.Block is the lowest administrative unit for developmental planning. Village wise information regarding the availability of certain basic amenities and facilities within the village, as also that on the manner of utilization of the land in the concerned village are furnished in the village directory. The village directory format adopted for the 2001 Census has 23 columns whereas in the 1991 Census there were only 18 columns. When compared with the 1991 Census Village Directory format, column 9 which refers to the day or days of weekly market/ hat if any has been now left out. New inclusions are in respect of facilities like banks, agricultural credit societies, non-agricultural credit societies, other cooperative societies, number of recreational and cultural facilities like cinema/video hall, sports club, stadium/auditorium; receipt of news papers/magazines and the name of the most important commodities manufactured in the village. In all the 23 columns in this tabulation statement, first 3 columns relates to serial number, name of the village with location code and area of village while the next 2 provide information

on total population and number of households in the village as per 2001 Census. The next 8 columns relate to basic amenities such as educational; medical; drinking water (potable); post, telegraph and telephone, commercial and cooperative banks, agricultural, non-agricultural and other credit societies, number of recreational and cultural facilities such as cinema/ video hall, sports club and stadium/auditorium and communications (bus service, railway station, waterway). Information in respect of approach to village, nearest town and distance in Kms., power supply, receipt of news paper/magazine, names of the most important commodities manufactured in the village are furnished in columns 14 to 18. Amenities available within the villages are shown in the respective columns and if a particular amenity especially Primary School, Middle School, College, Allopathic Hospital, PHC, MCW, Post Office, Telephone, etc., is not available in the village, the respective abbreviation is given and next to it in brackets the distance in broad ranges viz., <5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility available to that particular village is indicated. The next 5 columns, 19 to 23 provide information regarding land use (i.e., area under different types of land use in hectares rounded to two decimal places) such as forest, irrigated land by source of irrigation, un-irrigated, cultivable waste (including gauchar and groves) and finally the area not available for cultivation.

Town Directory

The Town Directory section contains seven statements (I to VII) which furnish information on all the statutory towns in the district, on aspects such as growth history, physical aspects and location of towns, municipal finance, civic and other amenities in the town, medical, educational, recreational and cultural facilities, trade, commerce, industry and banking in the towns, civic and other amenities in slum areas of the town. The scope of the various column headings adopted during 1991 Census has remained unchanged in 2001.

Note :

1. The area figure for the district given under column No 3 against " Total" represents "Geographical Area" and has been furnished by the Surveyor General India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D. Blocks/Taluks in this district will not tally with the district figures (except urban), because the area figures for C.D. Blocks/Taluks represents the land-use area based on village wise area figures as reported by the local officers. The total area of the taluk may not tally with the aggregate of the areas of the villages listed for Census purposes for it includes the area of the statutory as well as non-statutory towns, villages which may be fully submerged and reserve forests which may not form part of any revenue village, if any, within the jurisdiction of the concerned taluk. The total area of the C.D. Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2. Out growths of towns in urban agglomerations are denoted by letter "OG".

3. The following abbreviations have been used to indicate the Civic Administration Status of town.

M.Corp	:	*Municipal Corporation*
CMC	:	*City Municipal Council*
TMC	:	*Town Municipal Council*
TP	:	*Town Panchayat*
NAC	:	*Notified Area Committee*
CB	:	*Cantonment Board*
CT	:	*Census Town (Non-Municipal Census Town / Non-Statutory Town)*

SECTION – I

VILLAGE DIRECTORY

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and cooperative banks, agricultural, nonagricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. For the villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and un-inhabited villages.

Column 3 : Area of the village

The area of the village in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are treated as equivalent to Pre-University Course.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health SubCentre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, cooperative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Cooperative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non- Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If te village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If the village receives any News Paper/Magazines, the same is noted in this column using following codes

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State Government is furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Unirrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices:

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
AppendixIA	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-IB	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-IC	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
AppendixIIA	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / nonmunicipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII A, VII B	The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Grama Panchayat.
AppendixIX	Shows number of different types of girls school in a village.

4	Bes.Girls HS	Savanur	8	10	G

SECTION – II

TOWN DIRECTORY

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I: Status and Growth History

Column (2): Class, name and civic administration status of town:

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 99,999	II
20,000 49,999	III
10,000 19,999	IV
5,000 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II Physical Aspects and Location of towns, 1999.

Column 3 to 5: Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8:

Name of the State headquarters, District headquarters and SubDivisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10:

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13:

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Itemwise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV: Civic and Other amenities, 1999

Column (1 to 5): Self explanatory.

Column (6): Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7): System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows:

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11: Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12: Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes:

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14: Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tubewell water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilolitres (in bracket) are presented in column 14.

Column 15: Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20: Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : **Medical, Educational, Recreational and Cultural Facilities, 1999**

Column 1 to 3: Self explanatory.

Column 4 & 5:

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes:

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions

have further been distinguished by providing additional codes within the bracket as given below:

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9:

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10: Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used:

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/ Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, PrePrimary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16: Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19: Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/ Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20: Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows:

(i) Public Library	PL
(ii) Reading room	RR

Statement VI: Trade, Commerce, Industry and Banking, 1999

Column 3 to 8: Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9: Number of Banks

Number of Banks available in the referent town both Commercial and Cooperative banks are recorded against this column.

Column 10 & 11: Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII: Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Cenus Abstract	Level of presentation
1. District Primary Census Abstract	District/CDBlock/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CDBlock/Town
3. Primary Census Abstract for Scheduled Tribes	District/CDBlock/Town
4. Village Primary CensusAbstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/WardLevel

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of taluks, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Talukdars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the taluks/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Taluk. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Taluks and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE – II

NOTE ON FERTILITY & MORTALITY AND MIGRATION – 1991 & 2001 CENSUS

Fertility levels

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all evermarried women and the last question related to currently married women.

MIGRATION

What is Migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another state of the country (interstate migration), (iii) Migration from one country to country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why people migrate?

As in 1981 census, the reasons for migration were elicited in 1991 & 2001 census also. The reasons for migration were broadly categorized as (1) employment (2) business (3) education (4) family moved (5) marriage (6) natural calamities like drought, floods etc. and (7) other reasons. Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

Marriage and age at marriage are important social phenomena and crucial factors in the analysis of the dynamics of fertility. As such, various measures of fertility estimated based on these crucial factors are highlighted in the above table.

Estimates of General Fertility Rate (GFR) a refined measure of fertility, defined as the number of live births per thousand women in the reproductive age-group 15-49 years is a useful tool for measuring fertility, and this rate is further estimated only for the married women which is defined as General Marital Fertility Rate (GMFR). The GFR and GMFR for the district are 149 and 181 respectively.

The cumulative value of the age-specific fertility rates at the end of the child bearing ages gives a measure of Fertility known as Total Fertility Rate (TFR). It indicates average number of children expected to be born per woman during her entire span on reproductive period assuming that the age specific fertility rates to which she is exposed to, continue to be the same and there is no mortality. The same is expected for married women known as Total Marital Fertility Rate (TMFR). The estimated TFR and TMFR for the district are 3.94 and 5.61 respectively. The Crude Birth Rate (CBR) is 30.59.

The most useful indices that can be derived from the question on number of children born alive is the average number of children ever born per ever married women by age-group. Since most of the women complete their reproduction be the age-group 45-49, this indices is termed as completed fertility. The category ever married includes widows, divorced and separated women. As such the completed fertility

for the district is 4.74. The child women ratio which is a relative measure to know the fertility performance of a woman is 503 in the district.

One of the parameters, presenting female age at marriage relates to all women who live with their husbands, where some of them might have been recently married and some of them decades ago. It can be observed that mean age at marriage of the currently married women of Gulbarga district is higher than the state figure of 18.3.

27	Chamarajnagara	57	75	81	89	57	86	92	97	58	64	75	86

The estimates of mortality indicators presented above have been obtained through indirect estimation using the data on the number of children ever born and number of children surviving to ever married women. The information on questions on children ever born and children surviving canvassed for all ever married woman have been tabulated by the age of the mother. This data has been converted into estimates of probability of dying before attaining a given age. These estimates have been worked out using Brass technique where (q_i) is the probability of a newborn child dying before the age i = 1, 2, 3 and 5. The table above shows the estimates of infant and child mortality derived for the year 1991 by sex.

The infant mortality rate (q_1) for the person is 74 and for male and female are 74 and 75 respectively. The estimates of under 5 mortality (q_5) for person is 95 and for male and female are 94 and 97 respectively.

ANNEXURE - IV

ANNEXURE IV (1) - PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF BIRTH

	Place of Birth	1991 Census			2001 Census		
		Persons	Males	Females	Persons	Males	Females

Source : Migration Tables of 1991 & 2001 Census

The Annexure IV(1) presents migration data of persons by their place of birth. The majority of migrants are those who are born within the state of enumeration, which constitute 99.02 per cent as per 2001 Census. Among them, migrants born elsewhere in the district are larger than migrants born in other districts of the state. Considerable proportion of population from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (2) - PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF LAST RESIDENCE

Source : Migration Tables of 1991 & 2001 Census

The Annexure IV(2) presents data on migration by their place of last residence. As far as the district is concerned, it can be seen that migrants whose place of last residence was within the state of enumeration but outside the place of enumeration, constitute major proportion of migrant population. As per 2001 Census, their percentage accounts for 99.09 Among them, more is the inflow from within the district. Considerable proportion from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (3) - INTERSTATE IN-MIGRATION TO HAVERI DISTRICT

Sl. No.	Place of Birth	1991 Census		2001 Census	
		Migrants	Percentage of total migrants	Migrants	Percentage of total migrants
1	2	3	4	5	6
1	Andhra Pradesh	10,970	27.32	652	16.33
2	Goa	1,320	3.29	0	0.00

7	Total for 5 states	31,030	77.29	2,840	71.14
8	Other states	9,120	22.71	1,152	28.86
	Total	**40,150**	**100.00**	**3,992**	**100.00**

Source : Migration Tables of 1991 & 2001 Census

The interstate in-migration to the district by their place of birth provided above, highlights the States with the largest contribution of migrants to the district. According to 2001 Census findings, population from states like Andhra Pradesh, Kerala, Maharashtra, Tamilnadu and Rajasthan have migrated to the district. Together they constitute about 71.14 per cent of the total migrants. Further the category migrants from 'Other States' has increased from 22.71 per cent in 1991 to 28.86 per cent in 2001.

ANNEXURE IV(4) - RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH

Sl.No.	Place of Birth	Place of Enumeration-1991			Place of Enumeration-2001		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
1	Within the state	1,222,118	822,222	399,896	355,321	234,512	120,809
		100.0	67.3	32.7	100.0	66.0	34.0
2	In other states of India	40,150	4,680	35,470	6,207	1,244	4,963
		100.0	11.7	88.3	100.0	20.0	80.0

Source : Migration Tables of 1991 & 2001 Census

Rural and urban composition of internal migrants by their place of birth is provided in the above statement. The data for both the census points out that majority of migrants within the State have relocated at rural areas. Whereas this trend slightly varies with migrants from other states of India, where large influx is seen in urban areas. The details can be seen from the statement.

ANNEXURE - V

Brief account on Main Religions in the District / Taluk as per 1991 & 2001 Censuses

Religion forms an integral part of Indian Social System. For an Indian, it is a way of life rather than a faith. Indian Census, since its inception is collecting data on religion and presenting the same in its reports. In the pre-independence Census reports, the data on religion was being presented for major religions viz., Hindus, Muslims, Christians, Sikhs, Jains and Buddhists. Besides, the minor religions have been classified under the category of 'Others'. The data on religion collected and presented by the Indian Census is the basic data of immense use for the researchers, anthropologists, sociologists, demographers, administrators, planners and even for a common man.

In 1991 the Indian Census collected the religion data in question no.8 of the Individual slips and recorded the same under the six major religions, other religions were recorded in actual as returned by the respondent and classified under the category of 'Others'.

India - State differentials

The comparative data of the country and the state of Karnataka presented in Annexure V(1) reveals that the religionwise concentration of population in the state of Karnataka is of three major religions viz., Hindus, Muslims and Christians. Hindus are returned on the higher side with over three per cent more than the national average. Christians recorded nearly one per cent less whereas the proportion of Muslims in the state to national population was almost the same. There are 85.5 per cent Hindus, 11.6 per cent Muslims and 1.9 per cent Christians in Karnataka as against that of 82.4 per cent Hindus, 11.7 per cent Muslims and 2.3 per cent Christians in India. In regard to concentration of other three major religions viz., Sikhs, Buddhists and Jains it is observed that Jains with 0.7 per cent form the fourth major religion in the state whereas Buddhists with 9.8 per cent is the third major religion in India. In the Indian scene the Sikhs form fifth major group, whereas in Karnataka, Buddhists and Sikhs are placed fifth position.

Religionwise growth in the state during the decade 1981 - 91 reveals that the major religions viz., Hindus, Muslims and Christians recorded a growth rate in lesser degree i.e., 20.7 per cent, 25.7 per cent and 11.1 per cent respectively, against that of 22.3, 26.1 and 16.9 per cent in India as a whole. On the other hand Buddhists, Sikhs and Jains recorded a growth rate of 72.8 per cent, 57.8 per cent and 14.6 percent respectively for the state against that of 34.0, 24.2 and 3.9 per cent respectively for India. Thus, the Jains recorded a higher growth of nearly 11 per cent in the state than that of India as a whole during the decade 1981 - 91.

ANNEXURE V(1) - PERCENTAGE DISTRIBUTION OF POPULATION BY MAJOR RELIGIONS IN INDIA AND KARNATAKA DURING 1991 & 2001 AND ITS GROWTH RATE DURING 1981-1991& 1991-2001

Sl No	Religion	India				Karnataka			
		Percentage of Population	Percentage growth rate 1981-1991	Percentage of Population	Percentage growth rate 1991-2001	Percentage of Population	Percentage growth rate 1981-1991	Percentage of Population	Percentage growth rate 1991-2001
1	2	3	4	5	6	7	8	9	10
1	Hindus	82.4	22.3	80.5	20.0	85.5	20.7	83.9	15.3
2	Muslims	11.7	26.1	13.4	29.3	11.6	25.7	12.2	23.5
3	Christians	2.3	16.9	2.3	22.1	1.9	11.1	1.9	17.4
4	Sikhs	2.0	24.2	1.9	16.9	Ng	57.8	0.0	51.7
5	Buddhists	9.8	34.0	0.8	23.2	0.1	72.8	0.7	438.7
6	Jains	0.4	3.9	0.4	26.0	0.7	14.6	0.8	26.5
7	Others	0.4	13.1	0.6	111.3	Ng	51.0	0.2	1,725.5
8	Religions not stated	0.6	573.4	0.1	76.3	0.1	8,242.0	0.3	232.9

Percentage distribution of population during 2001 Census, by major religions in India and Karnataka shows that Hindus form majority of the population with 80.5 and 83.9 per cent respectively, while Muslims form 13.4 and 12.2 per cent for the country and state respectively. The proportion of these religions for the country and state, during 1991 Census was 82.4 per cent and 85.5 per cent for Hindus and 11.7 and 11.6 per cent for Muslims. There is not much noticeable changes are found in other regions. Persons who have not reported to which religion or faith they belong to has increased in Karnataka, as its proportion to the total population has increased from 0.1 per cent in 1991 Census to 0.3 per cent during 2001 Census.

The above table furnishes the composition of six major religions along with 'Other Religions' and 'Religion not stated' among the districts of the state during 2001 Census along with 1991 Census. As may be seen from the table that the proportion of population to total population during 2001 Census is below 5 per cent for 23 districts of the state and is between 5-10 per cent in 3 districts. Only Bangalore district has the distinction of having more than 10 per cent of the total population of the state in its jurisdiction. During 1991 Census the situation was almost similar with 22 districts having a proportion of less than 5 per cent and 4 districts had more than 5 per cent but below 10 per cent. With 10.76 per cent of the total population Bangalore district occupied the top position. Of the total population of the state, proportion of districts having Hindus and Muslims was uniform during both the Censuses i.e. less than 5 per cent of the total population in 21 districts for Hindus and 23 districts for Muslims, while in 5 and 3 districts respectively for Hindus and Muslims had a proportion of 5-10 per cent and Bangalore district alone had more than 10 per cent

ANNEXURE V(3) - PERCENTAGE AND DISTRIBUTION OF POPULATION BY MAJOR RELIGION IN KARNATAKA AND HAVERI DISTRICT - 1991 & 2001

Religion not stated	36,121	0.10	120,247	0.23	1,111	0.09	5,495	0.38

The percentage distribution of population by major religion in Karnataka and Haveri district for 1991 and 2001 Censuses are presented in the above table. As may be seen from the table that in Karnataka, Hindus form 85.5 and 83.86 per cent of the total population during 1991 and 2001 Censuses, followed by Muslims and Christians. The corresponding statistics for the district does not differ much as Hindus and Muslims occupy the top two places followed by Jains. These three religion cover more than 98 per cent of the total population of the district. Remarkable increase in the proportion of Buddhists population has been noticed between 1991 and 2001 Censuses in the State.

ANNEXURE V(4) - DISTRIBUTION BETWEEN RURAL AND URBAN AREAS OF MAJOR RELIGIONS IN KARNATAKA AND HAVERI - 1991 & 2001

	Religion not stated	991	89.2	120	10.8	4,408	80.2	1,087	19.8

Distribution of major religion by residence for the State and district are presented in the above statement. Majority of Hindus, Jains, Buddhists and those who have not stated their religion are residing in rural areas of the State during both the Censuses. While population belonging to Muslim, Christian and Sikh religion reside in urban areas of the State. As far as the district is concerned, according to 2001 Census data, except Buddhists and Sikhs, all major religions are concentrated in rural areas. A comparative data for 1991 Census is provided in the annexure.

Talukwise distribution of population following major religion is presented above. As far as the district is concerned, majority of the population follow Hindu faith in all the taluks. This is followed by Muslims and Jains in Haveri district. A comparison between 1991 and 2001 Census data expose marginal variations in different faiths persuaded by the population during the decade.

	100	**65.06**	**34.94**	**100**	**79.22**	**20.78**

Note:- * The data on marital status is being tabulated upto district level only. As such the data for newly created districts could not be recalibrated for 1991 Census. Hence the data of unbifurcated districts are presented for the newly created districts also.

It may be seen from Annexure VI that the percentage of "Never Married" population accounts for 49.24 per cent and 51.86 per cent at state and district levels during 2001 Census, while the same was 52.05 per cent and 53.55 per cent during 1991 Census. Similarly the percentage figures of the district for Married, widowed and Divorced or Separated are 45.35, 5.07 and 0.34 per cent during 2001 Census. Comparative data for 1991 Census is also furnished in the table for ready reference. The percentage variation of all the marital categories between rural and urban is marginal in both state and district population

ANNEXURE VII

The level of education by sex for the district and the State during 1991 and 2001 Census are presented in the above annexure. It can be seen that percentage of illiterates during the decade has decreased vis-a-vis for the State and the district. Though the male literates out number females, the percentage of women folk acquired literacy during the decade is more than the male population. The comparison of data for the two censuses reveals it so for the State and the district. The different educational level attained by the population can be seen in detail in the above annexure.

ANNEXURE - VIII

Distribution of different Mother Tongue returned during 1991 Census

As part of Census publication programme the data on spoken languages/Mother Tongues will be presented under C Series. The table C-7 shows the distribution of languages/Mother Tongues which returned 10,000 or more speakers each at all-India level (including of Mother Tongues grouped under each for the district, with total, rural/urban and male/female break ups). The unclassified Mother Tongues and the Mother Tongues having less than 10,000 speakers have been relegated to 'Other' Mother Tongue category. The table is divided into Part A-Scheduled languages with Mother Tongues grouped under each and Part B-Non-scheduled languages with Mother Tongue grouped under each. The instructions to the enumerators in regard to this question read as under.

"Record Mother Tongue in full, whatever be the name of the language returned by the person enumerated". The definition of Mother Tongue is the same as in 1991. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the Mother Tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded".

As the above instructions to the enumerators would show, the respondent was made to feel free to return the name of his/her Mother Tongue and the same was recorded faithfully by the enumerators. This naturally leads to recording of a very large number of Mother Tongue names. It is to be mentioned that Mother Tongues as returned in the Census are basically, the designation provided by the respondents. These designations or Mother Tongue labels need not be identical with the actual linguistic mediums. For assessing the correlation between the Mother Tongue designations and actual languages and dialects the raw returns of Census were subjected to thorough scrutiny and rationalization.

The abstract of languages as Mother Tongues and their strength in the district during 1991 and 2001 Census are provided below.

STATEMENT-I

ABSTRACT OF LANGUAGES AS MOTHER TONGUES AND THEIR STRENGTH IN HAVERI DISTRICT-1991 AND 2001 CENSUS

16	Sindhi	-	-	8	-

Part B: Languages in descending order of strength with their percentage to the total population of the district (percentage of only those languages have shown which comprise at least 0.01 per cent of the total population of the district) – 1991and 2001.

Sl. No.	Language	1991 Census		2001 Census	
		Speakers	Percentage	Speakers	Percentage
1	2	3	4	5	6
	Haveri District	**1,181**	**0.09**	**4,434**	**0.31**
1	Tulu	247	0.02	279	0.02
2	English	6	-	15	-
3	Coorgi / Kodagu	4	-	3,075	0.21
4	Kurukh/Oraon	4	-	-	-
5	Dogri	3	-	-	-
6	Arabic/Arbi	1	-	-	-
7	Koda/Kora	-	-	6	-
8	Total Of Other Languages	916	0.07	1,059	0.07

The statement I & II gives a clear picture of the languages spoken in the district. A closer study of 2001 Census data reveals that as many as 31 languages which returned 10,000 or more speakers are spoken in the district. The 'Other' category include Mother Tongues spoken by less than 10,000 speakers. Majority of the population speak Kannada which constitute 67.27 per cent followed by 16.82 per cent of Urdu speaking population. Among the languages not specified in the Eighth Schedule to the constitution, Coorgi is spoken by 0.09 per cent of population. Similar data for 1991 is provided in the annexure.

Linguistic classification of the languages

The names of the 114 Scheduled and Non-Scheduled languages falling in the five language families are given below with the Scheduled Languages denoted as (S). Of the 18 Scheduled Languages, 13 fall in the Indo-Aryan branch of the Indo-European family, 4 in the Dravidian family and one in the Tibeto-Burmese family.

1. INDO-EUROPEAN

(a) INDO-ARYAN

1. Assamese (S), 2. Bengali (S), 3. Bhili/Bhilodi, 4. Bishnupuriya, 5. Dogri, 6. Gujarati (S), 7. Halabi, 8. Hindi (S), 9. Kashmiri (S), 10. Khandeshi, 11. Konkani (S), 12. Lahnda, 13. Marathi (S), 14. Nepali (S), 15. Oriya (S), 16. Punjabi (S), 17. Sanskrit (S), 18. Sindhi (S), 19. Urdu (S).

(b) GERMANIC

1. English.

2. DRAVIDIAN

1. Coorgi/Kodagu, 2. Gondi, 3. Jatapu, 4. Kannada (S), 5. Khond/Kondh, 6. Kisan, 7. Kolami, 8.Konda, 9. Koya, 10. Kui, 11. Kurukh/Oraon, 12. Malayalam (S), 13. Malto, 14. Parji, 15. Tamil (S), 16. Telugu (S), 17. Tulu.

3. AUSTRO-ASIATIC

1. Bhumij, 2. Gadaba, 3. Ho, 4. Juang, 5. Kharia, 6. Khasi, 7. Koda/Kora, 8. Korku, 9. Korwa, 10. Munda, 11. Mundari, 12. Nicobarese, 13. Santali, 14. Savara.

4. TIBETO-BURMESE

1. Adi, 2. Anal, 3. Angami, 4. Ao, 5. Bhotia, 6. Bodo/Boro, 7. Chakesang, 8. Chakru/Chokri, 9. Chang, 10. Deori, 11. Dimasa, 12. Gangte, 13. Garo, 14. Halam, 15. Hmar, 16. Kabui, 17. Karbi/Mikir, 18. Khezha, 19. Khiemnungan, 20. Kinnauri, 21. Koch, 22. Kom, 23. Konyak, 24, Kuki, 25. Lahauli, 26. Lakher, 27. Lalung, 28. Lepcha, 29. Liangmei, 30. Limbu, 31. Lotha, 32. Lushai/Mizo, 33. Manipuri (S), 34. Mao, 35. Maram, 36. Maring, 37. Miri/Mishing, 38. Mishmi, 39. Mogh, 40. Monpa, 41. Nissi/Dafla, 42. Nocte, 43. Paite, 44. Pawi, 45. Phom, 46. Pochury, 47. Rabha, 48. Rengma, 49. Sangtam, 50. Sema, 51. Sherpa, 52. Tangkhul, 53. Tangsa, 54. Thado, 55. Tibetan, 56. Tripuri, 57. Vaiphei, 58. Wancho, 59. Yimchungre, 60. Zeliang, 61. Zemi, 62. Zou.

5. SEMITO-HAMITIC

1. Arabic/Arbi.
