CENSUS OF INDIA 2001

SERIES-12 **KARNATAKA**

DISTRICT CENSUS HANDBOOK

Part - A & B

KOPPAL DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

Directorate of Census Operations, Karnataka

F O R E W O R D

1. The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to taluk/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri.H.Shashidhar, Director of Census Operations, Karnataka. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division, Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and other who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

P R E F A C E

In the foreword to the 2001 series of the District Census Handbooks, Sri. D.K. Sikri, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain salient data on the population for every village and town as revealed by 2001 Census. They also contain a wealth of information regarding villages and towns which, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information is also of considerable importance in the context of planned development.

The District Census Handbook is divided into two parts: Part A contains information regarding each village and town (Village Directory and Town Directory collected from various sources) and Part B which contains the data on the population collected during 2001 Census - the Primary Census Abstract. The data published in Part B was collected during February-March 2001 in the Population Census.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in 1999. The Village Directory formats were mailed to the Deputy Commissioners of Districts for obtaining the village wise particulars through Village Accountants. Similarly the Town Directory formats were mailed to the Commissioners of Corporations, Chief Officers of Town Municipal Councils, Town Panchayats, etc. The village wise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1991 District Census Handbooks. The Household Schedules, which were canvassed to collect the population data during 2001 Census, were scanned and data captured was processed electronically. The Primary Census Abstract was generated centrally on the computers by Registrar General, India.

In compilation of the District Census Handbooks, the Census Directorate had the co-operation of various departments of the State/Central Government. The Census Directorate gratefully acknowledge their assistance.

I take this opportunity to offer my grateful thanks to Sri. H. Shashidhar, Director of Census Operations and Sri. S.R. Raghavendra Rao, Deputy Director (Retd.) for their valuable guidance. I am also thankful to all the officers and officials of this Directorate who have been actively involved in the compilation of this volume.

I am highly grateful to Sri. J.K.Banthia, I.A.S., Ex. Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Sri R.G. Mitra, Ex. Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General and Sri S.L.Jain Deputy Director of Social Studies Division and Dr. R.P. Singh, Ex. Deputy Registrar General (Map) for their guidance.

Motif

Kabbaragi Falls in Koppal District

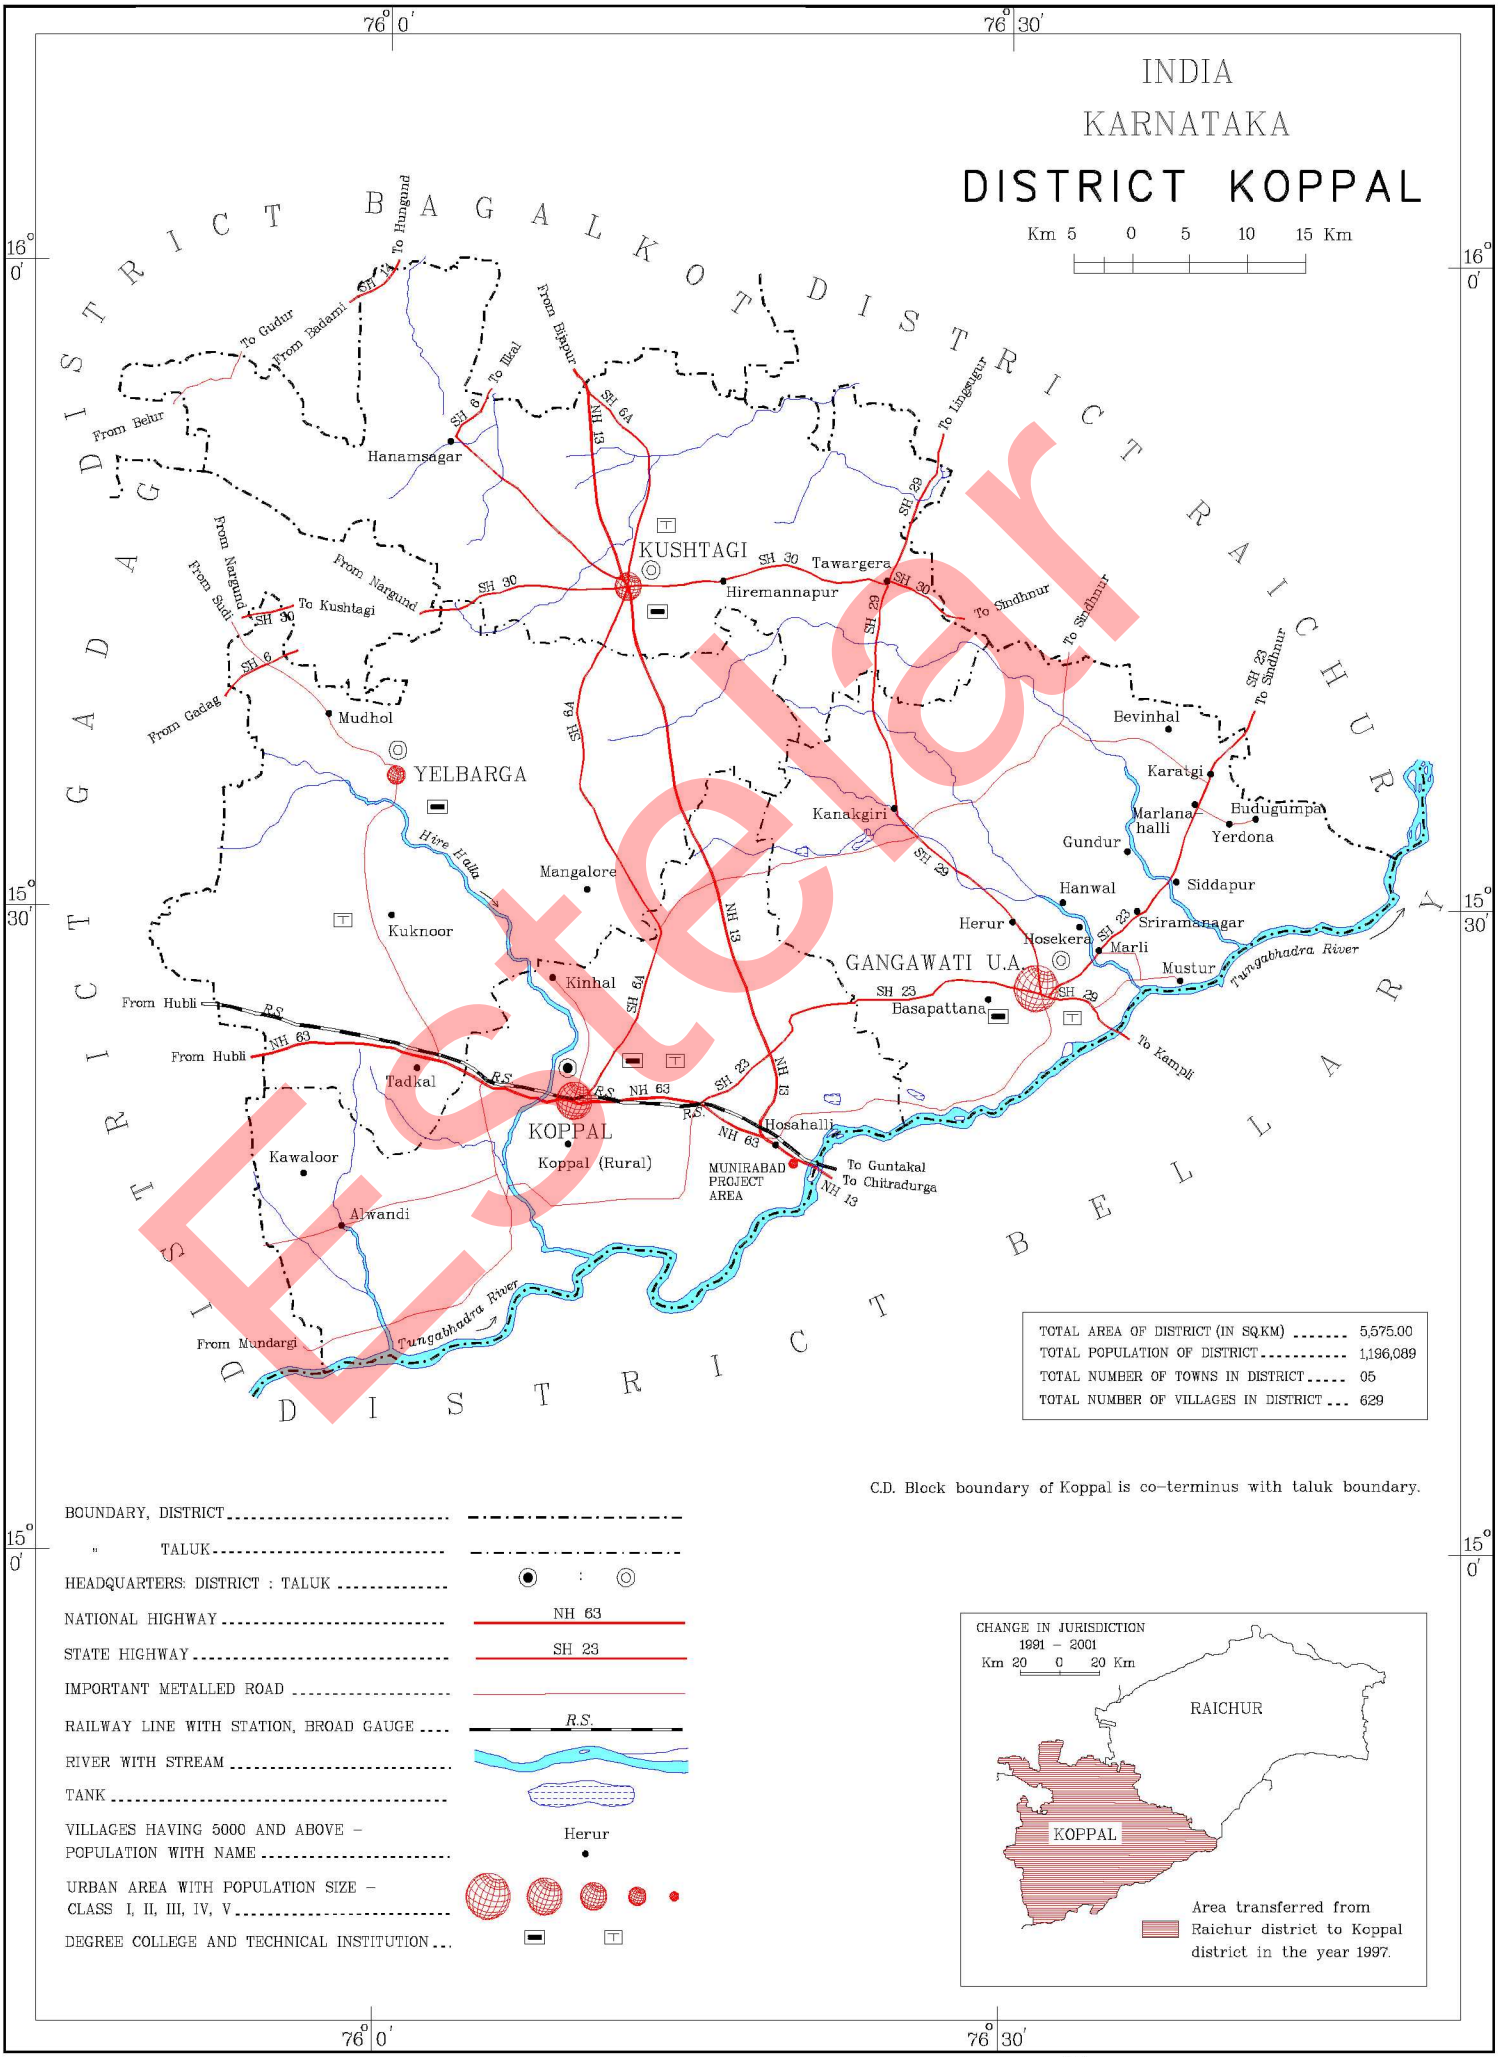

Kapila Teertha otherwise known as Kabbaragi Falls is an unique waterfalls for Koppal, Raichur, Gadag, Bagalkot and Bijapur districts, which is an area of plain and attacked by famine in much more times.

A rare and rainy season's roaring waterfalls of barren land of Koppal district is native to Kabbaragi, little village of Kushtagi taluk. So this waterfall is known as "Kabbaragi Water Falls". It is 28 Kms. from Kushtagi. If any one wants to see this waterfall he/she has to traverse a distance of one and half Km. from Kabbaragi village by foot.

Water falls from a height of 40 feet and a width of 10 feet by 3 steps like a staircase, on the slippery marbles rocks below. During monsoon, the cascades almost look like milk being poured from heaven and create a rainbow with its dews. The goddess of nature created a natural swimming pool with the constant flow of water. This waterfall is a sheer delight during monsoon season till October end.

Popular story linked to this waterfall is that Chandralingeswara and Kapileshwara were two brothers of contemporary period of great sage Jamadagni. The elder brother was living on the upper hills, while the younger brother Kapileshwara was living in the footsteps of the hills. Kapileshwara did an austerity on Ganga and finally succeeded in bringing down the Ganga. He offered his crown to Ganga by filling her pouch of sari, so the statue of Kapileshwara haven't the crown. Hence the waterfall is named after him as Kapilateertha water falls or Kapileppa water falls. On the last Monday of Sravana Masa every year farmers of the neighbourhood assemble here to worship Ganga and carry water to sprinkle on their fields with a belief that Ganga will live in their fields all through the year. A tank has been built to harness the water for agricultural purposes.

DISTRICT HIGHLIGHTS - 2001 CENSUS

1 Koppal is a newly formed district carved out from Raichur in the year 1997.

2 In its population size Koppal ranks 22nd among district in the state.

3 The district is the 11th largest in its total geographical area.

4 It's decadal growth rate is the 2nd highest in the state.

5 It's sex ratio is 983 and finds a place among the top 10 districts in the state.

6 The district is not so thickly populated as it ranks 17th in its density among the district.

7 It ranks among the first 5 districts in its lowest literacy rate. It's female literacy rate is third lowest in the state.

8 The district has the highest percent of Agricultural labourers.

ANALYTICAL NOTE

(i) HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

Introduction

The District Census Handbook is the most valuable district level publication brought out by the Census Organization. It contains micro-level data down to the lowest administrative units viz, revenue village in the case of rural areas and Division/Ward level in the case of urban areas. It is extremely useful to the planners, administrators, demographers, sociologists, etc., as it contains resourceful wealth of data regarding basic amenities available in each villages and towns of the district such as educational, medical, drinking water, post and telegraphs, transportation and communication, banks, societies, recreation, power supply, export/import of important commodities and land use besides, the particulars revealed during the latest census enumeration. It is for the first time that the district census hand book series was included in the census publication programme at the 1951 census, in order to satisfy the growing demand by the administrators, the planners, research scholars, demographers and the other such census data users, for micro-level data. The idea of compiling the District Census Handbooks was pioneered by Sri R.A.Gopala Swamy, I.C.S. the then Registrar General, India and Ex-officio Census Commissioner of India, with a view to preserve the Census records prepared for areas below the district level. He proposed that all the district Census tables and Census abstracts prepared during the process of sorting and compilation, should be bound together in a single manuscript volume and named as the District Census Handbook and suggested that the State Government should take up printing and publication at their own cost. Then onwards, the District Census Handbooks were published in each Census with improved pattern with an aim to give the Census and Non-census data at micro level for each village of the taluk as a whole to suit the requirements of various departments.

The data in the District Census Handbook will help not only in local area planning but also in regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. The District Census Hand Book sought to replace “Part IV - Taluk Tables and Part V - Village Tables” of the earlier censuses and to present the basic demographic and economic data in the form of “Primary Census Abstract” in respect of each and every village and town within the jurisdiction of the district. The district census handbook consists of two parts, viz, Part A and Part B. Part A comprises village and Town Directory while Part-B contains Village and Town level Primary Census Abstracts. In addition, these volumes contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

District Census Handbook 1961

It was in 1961 Census that the scope of District Census Hand Book was shaped in the present form by presenting (i) an account of descriptive note on the district, (ii) a set of non-census data tables dealing with the administrative statistics of the district for a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban Primary Census Abstracts depicting the nine fold industrial classification of workers. Information on the availability of certain basic amenities in villages and towns, such as the source of drinking water and educational institutions was also presented in the volumes. However, the district census handbooks of 3 out of then existing 19 districts viz, Bangalore, Dharwad and Mysore were confined to the publication of the village-wise and urban (census enumeration block-wise) Primary Census Abstract only.

District Census Handbook 1971

During the 1971 census, the district census handbook was further refined to present the data in a systematic way. In view of countrywide uniformity

in approach and to have a comprehensive coverage, the District Census Hand Books were presented in three parts each, for a district. Part A incorporated the Town and Village Directories. Part-B incorporated the Primary Census Abstract and included data, in the case of rural areas down to the village level and in the case of urban areas up to the block level. In addition, an introduction was given wherein the changes in jurisdiction, if any, of the district or of the taluks and the changes in the number of villages between 1961 and 1971 were explained. Part-B was essentially demographic in nature and was the end product of the tabulation of the enumeration results. Part C incorporated other census tables and administrative statistics. For convenience, Part-A and Part-B of the District Census Hand Book were presented in one volume and Part-C in a separate volume. In part-C volume, the district and taluk maps were included. These maps were prepared on the basis of maps obtained from the competent authorities concerned.

District Census Handbook 1981

The District Census Hand Book series of 1981, had some new features along with the restructuring of the formats of village and town directories, keeping in view the comparability of 1971 data. All the amenities except power supply in the village were brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place/village where it is available were given. A few new items of information such as adult literacy centres, primary health sub-centres and community health centres/workers, data on the availability of Newspapers, Motor Vehicles, etc., in the village, were introduced in the village directory to meet the requirements of the "Revised Minimum Needs Programmes". A new column "total population and number of households" was introduced to examine the correlation of the amenities with the population and number of households they serve. The contents of Part-A were further enlarged by including two appendices, namely a list of villages not having any amenities and a distribution of villages according to the proportion of Scheduled Castes and Schedules Tribes in the total population of the village. The format of Town Directory were also modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items such as class of town and its population, population of SC & ST, decadal growth rate of population, working women's hostel, adult literacy classes / centres, storage system regarding drinking water supply etc., and also the information about the nearest place and distance having educational, medical and fire-fighting facilities, in case such a facility is not available in the referent town. A new statement on civic and other amenities in slums in Class I and Class II town were included to help the planners to chalk out their programmes of slum improvements.

District Census Handbook 1991

The presentation of the District Census Hand Book for the 1991 Census was more or less similar to the manner followed in 1981. The format of Primary Census Abstract was restructured slightly. Nine-fold industrial classification of main workers was given as against four-fold classification. The sex-wise population in the age-group of 0-6 was included in the Primary Census Abstract for the first time to enable data users to compute more realistic literacy rates as all the children below 7 years of age were treated as illiterate at the 1991 census. One of the important innovations in the 1991 census was the Community Development Block-level presentation of data in the village directory and Primary Census Abstract instead of the traditional tahsil/taluk/PS level presentation. C.D.Block is the lowest administrative unit for developmental planning. The choice of the C.D. Block as the unit for data presentation was formulated to help the planners in micro-level developmental plans. Another important improvement at the 1991 Census was dissemination of data through magnetic tapes/floppies in which both the computer as well as manual codes for each revenue village were provided along with the corresponding codes of 1981 Census. In the volumes of the District Census Hand Books, the computer codes assigned to the revenue villages in the 1991 Census and the corresponding codes of 1981 Census were presented so that it may facilitate the data users to use the data either from magnetic tapes or computer floppies.

Scope of the 2001 District Census Handbook

Like in the previous censuses, the District Census Hand Book (DCHB) for the 2001 Census is brought out in two parts as usual viz., Part-A The Village and Town Directory, and Part-B the Village and Town Primary Census Abstract.

The District Census Hand Books for the 2001 census is essentially presented in the similar manner in which the District Census Hand Books of 1991 census were presented. This is because the data would be comparable with the earlier censuses and also to study the changes taken place during the decades and hence the approach in 2001 census is similar to 1991 census. The contents have been slightly enlarged and the formats too are restructured to suit the requirements of the data users. In the village directory for 2001 census certain new amenities like, news papers, magazine received, Income-Expenditure of the local bodies, information on number of banks, credit societies, recreational and cultural facilities, most important commodities imported, manufactured and exported have been included whereas the information regarding the "Day or Days of market/*hat* if any" which was there in 1991 has been excluded. Apart from providing the information about the nearest place and distance in broad ranges for villages not having basic educational and medical facilities, information about the nearest place and distance in broad ranges for villages not having Middle School, College, Hospital (Allopathic), Maternity and Child Welfare Center and Primary Health Center are also provided this time. However, in the town directory there are no changes except in the statement IV-A where this statement is separately numbered as Statement VII in 2001. Except these, the scope of 2001 series of the District Census Hand Book has, by and large remained the same as in 1991. The non-census information collected at the village level and town level was scrutinized and verified. In case of glaring discrepancies the data were cross-checked with data made available by the respective parent departments for validation.

One of the significant changes made in 2001 series of District Census Hand Book is that Primary Census Abstracts are available to the jurisdiction of the Panchayats in the district. With the constitution (73rd Amendment) Act, 1992, it has become necessary for the census organisation to provide population data for the territorial area of a panchayat in order to strengthen panchayat raj system in the country. In view of this, panchayat-wise population figures for total population and for Scheduled Castes and Scheduled Tribes population has been compiled and presented in the form of Annexure-I for each district.

Further another important step taken during the 2001 census, is assigning the Permanent Location Code Numbers (PLCN) to the villages. Location code number is a simple but unique device by which every area in an administrative unit in the State/U.T. can be identified. Thus assigning of Location Code Numbers at various administrative levels, right from State/U.T. to the lowest level namely enumeration block, in census taking is an important step. Each clearly demarcated area can be referred to by a combination of numbers. In a State or U.T. the next administrative area is District, followed by taluk or police station, circle, Development Block or Mandal, etc., Next below this administrative area, in urban areas are cities/towns, further divided into wards/ divisions and villages in rural areas. The Location Code Numbers to various administrative areas are assigned in an orderly manner always beginning from northwest point and the numbering proceeds in a serpentine manner, keeping the geographical continuity, ultimately ending at the South-East point.

There was a great demand from different organizations to study the village level data over a time span and hence a scheme of assigning permanent location code numbers to the villages and the higher levels of administrative areas is devised to ensure data comparability over a period of time. In Indian Census, Location Code Numbers are allotted to each village based on traverse system (zigzag) in a serpentine manner at taluk level. These numbers for villages run from '1' to 'N' in each taluk/tahsil independently. This system was adopted until 1991 census. But, for the Census of India 2001, all the villages in a state/U.T. are assigned with a Location Code Number in one continuous series beginning from "1" to "N" for the entire state/U.T. and it is not confined to a talukl. The field length of the complete PLCN structure for a village has been kept up to 8

digits and therefore the location code number of village in a taluk contains 8 digits number for 2001 Census.

(ii) BRIEF HISTORY OF THE DISTRICT

The district, named after the headquarters town Koppal has a hoary past. The entire tract of land on the banks of the river Tungabhadra here is identified with Kishkindha, the kingdom of Varanas. According to Jaina Ramayana, the city of Kishkandha was founded by Srikantha Kumara, the brother-in- law of Dhavala Kirti. It was while roaming about this part of the country during his exile that Rama was accosted by Hanumantha. Kishkandha Kaanda, a section of the epic Ramayana, narrates the events and episodes that took place in this tract of land during those legendary days. In Mahabharata, Sahadeva, who led the expedition to the south on the occasion of the *Rajasuya yagya* performed by Yudhisthira, is said to have encamped for some time on the Kishkindha hill where the Vanara chiefs Sushena and Vrishasena made friends with him. These legendary references apart, archaeological evidences have amply demonstrated that this area has been the abode of man since very early times. The district abounds in pre-historic sites.The legendary accounts together with these relics testify to the great antiquity of the area in this district.

Historically this district is known to have formed part of the Mauryan empire. In the Deccan, Suvarnagiri was then a seat of viceroyalty. This place is identified with Kanakagiri in Gangawati taluk by some historians. Edicts of Ashoka have been discovered at Gavimath and Palakigundu near Koppal. After the death of Ashoka, however, the Mauryan empire disintegrated. By about 230 B.C., the Satavahanas established their supremacy in the Deccan and held their sway till 200 A.D., when the ruling family itself became extinct. Thereafter the Vakatakas rose to power in this region and certain parts of the district were ruled by the Chutus also. In about the middle of the sixth century A.D. the Chalukyas of Badami established a strong Kingdom and during the reign of Pulikeshi II (610-642 A.D.) they succeeded to a great extent in their attempt at unifying the Deccan. The Rashtrakutas of Malked, who flourished as feudatories of the Chalukyas for a couple of centuries, assumed sovereignty under Dantidurga in 753 A.D. His successor Krishna I (756-775 A.D.) extended the kingdom and the present Koppal too became a part of the vast Rashtrakuta empire. An inscription referring to the reign of Nripatunga Amoghavarsha I (814-880 A.D.) has been discovered at Koppal. Krishna III (940-966 A.D.) was also a powerful king who inflicted a crushing defeat on the Cholas in the south. The rulers of Malva invaded Malked during the reign of Khottiga (967-972 A.D.). In 973 A.D. Taila II (973-997 A.D.) of the western Chalukya family dethroned Karka II the successor of Khottiga and restored the ancient glory of the Chalukyas. He ruled from Malked and consolidated his sway in the western Deccan covering the entire area lying between the Narmada and the Tungabhadra. An inscription found in Madinur village of Koppal taluk refers to his reign and recounts his high sounding titles which are expressions of extraordinary valour. His son and successor Satyashraya (997-1008 A.D.) continued his expansive policy. The Cholas were the main contenders for power and they were kept at bay. But the conflict between the Chalukyas and the Cholas lasted for a long period. In 1019 A.D., Jayasimha II (1015-1042 A.D.) scored a decisive victory at the battle of Maski in Koppal and compelled the intruding Rajendra Chola to withdraw to the south of the Tungabhadra. His successor Someshwara I (1042-1068 A.D.) was however humbled by Rajadhiraja Chola who invaded the Chalukyan kingdom thrice. During the reign of Someshvara III (1126-1138 A.D.) Vishnuvardhana, the Hoysala king led an unsuccessful attack on the Raichur doab. In 1157 A.D. Kalachuri Bijjala wrested the sovereignty of the Deccan from Taila III. The Kalachuri rule lasted for a brief period and during the reign of Sovideva, Madinur enjoyed the status of an alternative capital. In 1181 A.D., the Chalukyan supremacy was restored by Someshvara IV, who however soon yielded place to Bhillama of the Devagiri Yadava family. During this period, the Hoysalas too made inroads into the area north of Tungabhadra. The conquests of Ballala II made him the master of Puligere, Belvola, Kisukad and the neighbouring territories. He made Erambargi (modern Yelbarga) his northern capital and resided there for sometime during 1196 A.D. In 1211 A.D., the Yadava king Singhana recaptured these territories and once again the Tungabhadra came to be recognised as the border between these two kingdoms.

During the reign of Ramachandra (1271-1310 A.D.), Ala-ud-din Khilji attacked Devagiri, pillaged the capital and thus dealt a severe blow to the power and prestige of the Yadavas. Seizing this opportunity, Kakatiya Prataparudra pushed the western border of his kingdom as far as Raichur. In 1307 A.D., Malik Kafur conquered the Yadava kingdom and reduced the king into a vassal of the Delhi Sultan. During his next expedition in 1313 A.D., Malik Kafur killed Shankaradeva, the son of Ramachandra, and resumed the government of Devagiri. His tenure was temporary, for as soon as he left for Delhi a little later, Harapala the son-in-law of Ramachandra rose in revolt and declared independence. But in 1317 A.D., Mubarak, the son and successor of Ala-ud-din Khilji, recaptured Devagiri. In 1318 A.D., Harapala was flayed alive for his defiance. In spite of these developments, the southern parts of Yadava kingdom including Raichur area continued to offer resistance to the Muhammadan rule. Last of such rebels was Kampilaraya who was finally vanquished by Muhammad-bin-Tughlak. After this victory, Muhammad-bin-Tughlak remained at Devagiri for a short period and in 1329 A.D., after appointing Kutlugh Khan as the viceroy of Deccan, he left for Delhi. Immediately thereafter, the local leaders began to assert themselves. In 1331 A.D., Somadeva, of the Chalukyan dynasty revolted against the governor of Kampli and seized the fort of Anegondi. Hoysala Ballala III, threw off his allegiance to the Delhi Sultan and invaded the province of Kampli. The next few years that followed these events witnessed the emergence of the Vijayanagar empire with its capital close to the southern borders of Koppal and of the Bahmani kingdom with its capital at Gulbarga and beyond the Krishna river in the north. Thereafter, the district became a bone of contention between these two powers and for a little more than two centuries this tract witnessed intensive and almost incessant warfare in which scant respect was shown, especially by the Bahmani rulers, to the life and properties of the civilians. The region comprising Koppal district changed hands many times during this period and its history is said to be so confusing as to put one at a loss to know under whose control the area was during a particular period.

During the reign of Alla-ud-din I (1347-58 A.D.), this area belonged to the Bahmanis. The kingdom had been divided into four large divisions; Ashnabad-Gulbarga, along with Raichur and Mudgal being one of these. Later, Bukka Raya demanded the return of Raichur doab and, incensed by an insulting episode, he crossed the Tungabhadra and seized Mudgal. Muhammed I (1358-1375 A.D.) got wild and proceeded plundering the country and killing the defenseless villagers. Bukka Raya had withdrawn to Adoni by now and was pursued by Muhammed early in 1367 A.D. At the battle near Kauthal, Bukka Raya faced defeat and resorted to guerrilla warfare for about 3 months whereafter he shut himself up in his capital. Muhammed on the other hand took to promiscuous slaughter of the inhabitants and thus compelled the Vijayanagara king to honour his demands. At the time of ascension of Mujahid (1375-1378 A.D.) the successor of Muhammed, some of the forts of Raichur doab were held by Bukka Raya and some including Raichur and Mudgal were held by the Bahmanis. Mujahid made an unsuccessful attempt on the Vijayanagar kingdom. Similarly, during the reign of Muhammed II (1378-1397 A.D.), Harihara II made a futile attempt on Raichur. When Firoz Shah (1397-1422 A.D.) and Harihara II (1377-1404 A.D.) were at the helm of affairs of the two kingdoms, the latter started military operations for the recovery of Raichur doab in 1398 and moved upto the Krishna, where he pitched the camp. Firoz Shah marched against him and encamped on the northern bank. He resorted to a stratagem by which his confidants could kill Harihara's son and create confusion in the Vijayanagar camp. Firoz crossed the river easily and pursued the fleeing Harihara. After this victory Firoz separated the then undivided Raichur district from Gulbarga province and appointed Fulad Khan as its first military governor. Again, in 1406 A.D., the year in which Devaraya I (1406-1422 A.D.) ascended the Vijayanagara throne, a serious war broke out when Devaraya tried to secure the hand of a beautiful girl of Mudgal. Having failed in his attempt to capture the city of Vijayanagar, Firoz withdrew and sent out his men to ravage the country. Ultimately Devaraya had to make peace on the terms laid down by Firoz. In 1418 A.D., Firoz Shah laid siege to Pangal and his protracted efforts lasting for nearly two years did not bear fruit. Vijayanagara scored a complete victory on this occasion and Firoz had to retreat leaving the southern and eastern boundaries of his

kingdom in the occupation of Vijayanagara troops. This defeat was however avenged by his successor Sihab-ud-din Ahmed I (1422-1436 A.D.) who resorted to indiscriminate slaughter, enslavement of civilian population, destruction of temples and killing of cows to compel Vijayaraya (1422-1426 A.D.) to pay a large sum as arrears of tribute. During the reign of Ala-ud-din II (1436-1458 A.D.) his younger brother rose in rebellion and captured some forts in the district. But this rebellion was put down in time and the errant brother was made the governor of Raichur. Deveraya II (1424-1446 A.D.) invaded the district in 1443 A.D., captured some parts of the district. But, on the approach of Ala-ud-din, he withdrew and Deveraya finally agreed to make peace and pay tributes regularly to the Bahmani Sultan. Thereafter, for a short period till the Bahmani dynasty ceased to be a power to reckon with, peace reigned in the district.

During the reign of Mohammed III (1463-1482 A.D.), the four administrative units of the Bahmani kingdom were divided into eight by his Prime Minister Khwaja Mahmud Gawan. The old province of Gulbarga was divided into two parts, Gulbarge and Bijapur and the latter included Raichur doab. The government of Bijapur was first given to Mahmud Gawan, and after his execution in 1480 A.D., Yusuf Adil Khan was appointed as its governor. In 1490 when Mahmud (1482-1518 A.D.) was a king only in name, Adil Khan being unable to tolerate a weakling became an independent ruler and the founder of the Adil Shahi dynasty of Bijapur. Narasa Nayaka, the regent of Vijayanagara attacked Yusuf Adil Khan at the instigation of Kasim Barid, the Prime Minister of Bidar. He captured Raichur and Mudgal. But not being able to withstand the counter-attack and the treacherous strategy adopted by Adil Khan, Narasa Nayaka had to accept defeat. However, it is said that Raichur doab remained part of Vijayanagara empire till 1502 A.D., when as a result of a jehad undertaken by the Bahmani nobler, it passed into the hands of Yusuf Adil Khan. Henceforth the history of Raichur ceased to have any relation with that of the Bahmani's of Bidar, which remained as a political power till 1527 A.D. Though Yusuf Adil Khan became an independent ruler for all practical purposes from 1490 A.D., it is said that Yusuf Adil Khan assumed the royal titles only in 1535 AD.

Yusuf Adil Khan was succeeded by his son Ismail Adil Khan (1510-1534 A.D.). This period coincides with the heyday of the Vijayanagara empire under the able administration of the famous Krishnadeva Raya (1509-1529) whose reign has been hailed as the period of Vijayanagara's greatest success, when its armies were victorious everywhere, and the city was most prosperous. Krishnadevara Raya invaded the then Raichur doab and took Raichur fort in 1510-1511 A.D. and marched to Gulbarga, defeated Amir Barid, the minister and gaoler of the Bahmani king Mahmud and took the city. From there he proceeded to Bidar, captured it and reinstated Mahmud on the Bahmani throne and assumed the title 'establisher of Yavana kingdom'. But, a little later Ismail Adil Khan recaptured the district. In 1520 however, Krishnadevaraya scored a resounding victory on the forces of Ismail Adil Khan and annexed Raichur. However, Ismail Adil Khan who survived Krishnadeva Raya invaded Raichur doab (1530-1542 A.D.) and seized Raichur and Mudgal before Achuta Raya (1530-1542 A.D.) could do anything to prevent this adventure. Four years later, immediately after the death of Ismail Adil Khan, Achuta Raya invaded the Raichur doab and subdued the country as far north as the Krishna. From 1534 A.D. upto 1565 A.D. the Raichur doab formed part of the Vijayanagara empire. Ali Adil Shah (1557-1580 A.D.) made an alliance with the king of Ahmadnagar which was later joined by the sultan of Golkonda and Berar. He demanded the restoration of Bagalkot and then Raichur doab from Aliya Ramaraya (1543-1565 A.D.). When this was sternly refused, the confederacy of the Sultans set out on its expedition against Ramaraya. In the battle that took place at Rakkasa-Tangadi near Talikote, Ramaraya was killed and the Vijayanagara forces were completely routed. Raichur doab henceforth became an undisputed part of the Bijapur kingdom and remained comparatively peaceful for over a century till 1686 A.D. During the reign of Ali Adil Shah II (1656-1672 A.D.) in 1662 A.D., an African Amir named Siddi Jauhar, rebelled in Kurnool. The Sultan marched through the doab to punish the rebel. The royal forces encountered the rebel near Mudgal who on being defeated fled to Raichur and from thence fled beyond Tungabhadra. Sikandar (1672-1686 A.D.) was the last ruler of the Adil Shahi dynasty.

In 1685 A.D. Aurangazeb started his campaign against the Bijapur kingdom and scored victory in October 1686 A.D. Thenceforth Raichur doab also became a part of the Mughal empire. Rahulla Khan was appointed as the Subedar of the new province of Bijapur and he was placed under the Mughal emperor's subedar at Hyderabad. With the proclamation of independence by the Nizam in 1724 A.D., the Bijapur province along with Raichur became a part of the Nizam's Dominions. Later, with the ascendancy of the British, the Nizams accepted their overlordship. During the period of Nizam Ali (1761-1803 A.D.), the English became masters of large tracts of land in the Deccan. Under a treaty entered into in 1853 A.D., Raichur district was assigned to the British. In 1858, Raichur doab was restored to the Nizam and this position remained unchanged till 1948. Achievement of independence was followed immediately by an integration of the states. But the Nizam declared independence on 27th August 1947 and refused to accede to the Indian union. This was followed by a reign of terror, which was finally put down in a police action by the government of India on 17th September 1948. Raichur became a part of the Hyderabad state of the Indian union. As a consequence of the reorganisation of the states, the then undivided Raichur district was incorporated into the new Mysore state (that is, Karnataka) with effect from 1st November 1956.

The administrative history of the district reveals that till 1905, the Raichur doab region consisted of two districts: Raichur and Lingsugur. The former consisted of the taluks of Raichur, Yadgir, Yergera, Deodurg, Manvi, Alampur and Gadwal while Lingsugur district consisted of the taluks of Lingsugur, Kushtagi, Gangawati, Sindhanur, Shahpur and Shorapur. The taluks of Koppal and Yelbarga constituted a separate Jagir district. In 1905, Lingsugur district was abolished and all its taluks were transferred to Raichur district. At the same time, the taluk of Shahpur, Shorapur and Yadgir were transferred to Gulbarga district, and the villages of Yergera taluk were distributed among Raichur, Manvi and Deodurg. The abolition of Jagirs in 1949 resulted in the conversion of Koppal and Yelbarga into regular taluks of Raichur district. In 1956, Gadwal and Alampur were transferred to Andhra Pradesh. Thus at the time of its accession to Mysore state, the district consisted of nine taluks and this position has remained intact since then. During 2001 census, the district was further divided into two districts. Out of nine taluks, four taluks namely, Kushtagi Gangavati, Yelbarga and Koppal were separated to form a new district by name Koppal.

(iii) Administrative setup and jurisidictional changes during the decade, 1991-2001

Koppal is a newly formed district which took birth in the year 1997. The district has been carved out from Raichur which had 9 taluks. Out of these, 4 taluks namely, Gangawati, Koppal, Kustagi and Yelbarga have been included in Koppal to form a new district. There is only one revenue sub-division which covers all the four taluks. This was the major jurisdictional change that took place during the decade.

STATEMENT SHOWING THE NUMBER OF VILLAGES / TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS IF ANY, AND REASONS THEREOF

Sl. No.	Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalised for		Reasons for variation in the number of villages/towns in each taluk of the district, decadal variations if any and reasons thereof
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
1	Yelbarga	144	144	1	1	Though the number of villages in the taluk remains same at 144 both in 1991 & 2001 Censuses, the interim Mandal Panchayat Yelbarga a rural unit in 1991 Census was upgraded to Yelbarga Town Panchayat vide Notification No. HUD 641 MLR 95 (48) dated 09.01.96 having the same jurisdiction as that of Mandal Panchayat.

Sl. No.	Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalised for		Reasons for variation in the number of villages/towns in each taluk of the district, decadal variations if any and reasons thereof
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
2	Kustagi	177	177	1	1	In this taluk also, the total number of villages remains same at 177, however the civic status of Interim Mandal Panchayat of Kushtagi changed to Kushtagi Town Panchayat vide Notification No. HUD 641 MLR 95(47) dated 09.01.1996.
3	Gangawati	157	156	1	1 l	IThe total number of villages in the taluk has moved up to 157 in 2001 from 156 in 1991 Census. The developed portions of Gangawati outgrowth, now forms parts of Gangawati city limits vide Government of Karnataka Notification No. HUD 316 MLR 95 dated 01-08-95. So the left out portions of Gangawati outgrowth of 1991 Census falling outside the city limits is now treated as a village and included in 2001 ist of villages and hence the difference. The civic status of Gangawati Town Municipality was upgraded to City Municipality vide Government of Karnataka Notification No. 641 MLR 95(37) dated 09.01.96.
4	Koppal	151	151	2	2	-
	Total	**629**	**628**	**5**	**5**	

Total number of Towns/Village

The new district is formed of 629 villages and 5 towns. Of the total villages, 594 are inhabited and 35 are uninhabited villages. Except for a change in Gangawati taluk, the number of villages and towns in the other three taluks remain the same as it was during 1991 census. The reason for a change in Gangawati taluk is because, during 1991 census, two villages namely Gangawati (R) and Waddarhatti were fully treated as “Outgrowths” and were included in Gangawati (CMC). Whereas in 2001 census, while the entire village of Wadderahatti has retained its urban status as “Outgrowth”; Gangawati (R) has been declassified into revenue village. Therefore total number of villages in the taluk increased by one from 156 in 1991 to 157 in 2001 census. However there was no change in the number of towns in the district. Taluk-wise comparison of number villages and towns between two census and the reasons for variation can be seen from the table given above.

Urban local bodies

The statutory urban local bodies are the City Municipal Councils, Municipal Corporations, Notified Area Committee, Town Municipal Councils, Town Panchayat, and Cantonment Boards. These urban local bodies elect Councilors / Corporators from each ward and the tenure of those Councilors / Corporators would be for five years. The President or VicePresident of the Municipal Council and the Mayor / Deputy Mayor of the Corporations are elected from among the elected Councilors / Corporators whose tenure will be for a period of one year. The Chairman of various committees are also elected among the elected Councilors with a term of one year.

The Chief Officer in Municipal Council and the Commissioner in a City Corporation are responsible for day-to-day administration and the executive authority is vested with them.

Zilla Panchayat and Taluk Panchayat

To promote the development of institution and secure greater measure of participation by the people in the local and governmental affairs by decentralisation of power and functions and for the purpose of development planning and implementation of various programmes thereof Zilla Panchayats have been constituted in the State. The jurisdiction of Zilla Panchayat is coterminous with that of the corresponding district and covers the entire rural and semi urban area but excludes the statutory towns. Accordingly, Zilla Panchayat has been constituted for Koppal district and its jurisdiction extends over the Taluk Panchayats of the district. The jurisdiction of each Taluk Panchayat is coterminous with that of the taluk of the same name but excludes the area incorporated in the statutory towns or cities.

The Zilla Panchayat elects its president and vicepresident and chairman of its committees from amongst the elected members. The term of these elected representatives will be for five years. An officer of the rank of IAS is deputed by the State Government as Chief Executive Officer of the Zilla Panchayat. Various departments assist Panchayat.

Grama Panchayats

The Government of Karnataka has enacted the Karnataka Panchayat Raj Act 1993 on 30.4.1993 replacing its previous enactment in this regard for the formation of Grama Panchayat.

STATEMENT SHOWING THE TALUKWISE NUMBER OF GRAMA PANCHAYATS AND HOBLIES/ FIRKAS

Sl. No.	Name of Taluk	No. of Hoblies/Firkas	No. of Panchayats
1	**2**	**3**	**4**
1	Yelbarga	4	33
2	Kushtagi	4	28
3	Gangawati	8	38
4	Koppal	4	35
	Total	**20**	**134**

Details regarding Panchayat-wise number of villages have been furnished in Annexure I.

The Grama Panchayat is authorised to function on the items listed in Schedule I of the Act namely, preparation of annual plans for the development of Panchayat area, preparation of annual budget, providing reliefs in natural calamities, removal of encroachments on public properties, organising voluntary labour and contribution for community works, maintenance of essential statistics of the village, in addition to matters relating to Agriculture, Animal Husbandry, Fisheries, Social & Farm Forestry, Khadi, Village & Cottage Industries, Rural Housing, Drinking Water, Roads, etc., Rural Electrification, Nonconventional energy sources, Poverty Alleviation Programmes, Markets & Fairs, Rural Sanitation, Public Health & Family Welfare, Women and Child Development, Social Welfare, Welfare of Weaker Sections, Public Distribution System, Maintenance of Community assets, Construction and Maintenance of Dharmashalas, Chatras, Cattle Sheds, Ponds, Cart Stands, Slaughter Houses, Public Parks, Play Grounds, etc. Regulation of manure pits in public places and establishment and control of shandies. Such other functions as may be entrusted.

The Grama Panchayat is also empowered to make provisions for carrying out within its area any other work or measure which is likely to promote the health, safety, education, comfort, convenience or social or economic well being of the inhabitants of the Panchayat area.

(iv) PHYSICAL FEATURES

(1) Location and size

The district is located on the north-eastern part of the state. After its bifurcation from Raichur as a separate district, the total geographical area of this new district is 7,189 Sq.Kms. In its geographical area Koppal ranks at 11th place among the districts in the state. The east to west and north to south distance extend upto 110 and 96 Kms. respectively. The most conspicuous areas of very high and very low are located at the minimum height of 400 meters and the maximum height of 700 meters of contours lines

above the mean sea level. Situated on the north-eastern part of the state, it lies between north latitude 15 degrees 9 minutes and 16 degrees and east longitudes 75 degrees 47 minutes and 76 degrees 48 minutes. Koppal district is bound on the west by Gadag, the southern and south east portion of the district by Bellary, Bagalkot on the north and Raichur towards north-east.

(2) Physiography

Physiographically, Koppal falls within the well defined macro region of Deccan Plateau, one of the two regions into which the state has been divided. Within the state, it is a part of the central Karnataka Plateau, one of the four micro regions into which the state has been further divided. The region represents a plain country, barren and scanty in vegetation. It has few hillocks and scrub jungles. There is a chain of small hills in Kushtagi taluk, originating from the Badami group of hills in Bijapur district and this chain of hills extend upto Gangawati taluk. This strip is locally called Yemme-Gudda. These hill ranges neither belong to the eastern ghats nor the western ghats. It represents erosion remnants of an uplifted plateau and are mostly made up of metamorphic and granitic genisses of pre-Cambrian age. Jagadgudda (2,101 feet) 20 miles east of Kushtagi and Nishanigudda (1,933 feet), some seven miles north-east of Kanakgiri are the two important highest peaks in the district.

(3) Drainage

The Tungabhadra is the only major and important river that flows in the district. It forms its natural southern and south-east boundary. From time immemorial this river has been associated with religious and cultural life of the people. Legend and tradition have sanctified this perennial river. This river is formed by the confluence of two rivers, the Tunga and the Bhadra, which rises at Gangamula in Varaha Parvata of the western ghats, and flows through Koppal and Gangawati taluks. Since the general slope of the land is from north-west to south-east, a large number of rivulets and streams drain into the Tungabhadra particularly during rainy season. Some of the important streams and nalas that either passes through the district or originates in the taluks include Hirehalla, Maskinala, Hirenad, Alawandi nala, Sindhanur nala, Siddapur stream, Masti stream and Kanakagiri nala.

(4) Climate

For the major part of the year, the climate remains dry in the district. The summer is very hot. The district is drought prone due to variations in the amount of rainfall received. Generally the year is divided into four seasons. From mid February upto the end of May the district experiences hot climate. After the hot summer, the south-west monsoon begins from June and prolong upto September. October and November are the post-monsoon or retreating monsoon months. During the months from December to mid-February, the district experiences cold season. During summer, particularly in May which is the hottest month of the season, the mean daily maximum temperature raised to 39.8ºC. The mean daily maximum temperature during December is 29.3ºC. and mean daily minimum temperature is 17.7ºC. During this season, nights are generally cool, but day temperatures sometimes reach 35º to 38ºC.

(5) Winds

The wind blow in westerly to south-westerly direction during the south-west monsoon season. Strong wind prevails during the period. At the beginning of post-monsoon and the cold season, the district experiences light winds and it blows in the direction between north-east and south-east. It blows in the same direction during the months March and April. In the month of May, the winds are stronger than in March and April. The direction of the wind during May is between south-west and north-west in the morning and changes its course in the evening. As a special weather phenomena, sometimes the depression from Bay of Bengal after becoming diffuse while crossing the eastern coast causes strong winds and widespread rain in the district. Also frequent thunderstorm occur from March to June, September and October.

(6) Rainfall pattern

The District falls under nothern dry agroclimatic zones of the state. The taluks of Gangavathi, Koppal, Kushtagi and Yelbarga comes under the district.

The average Rainfall in the district ranges from 576 mm in Kushtagi taluk to 615 mm in Koppal taluk.The rainfall decreases from southern part of the district towards north and northwestern part. The northern part of Kushtagi and Yelbarga taluks receives the lowest rainfall.

Among the taluks in the district the premonsoon rainfall contributes 12 to 15% of the annual rainfall, southwest monsoon contributes 60 to 64% and northeast monsoon contributes 22 to 26% of the annual rainfall.

The coefficient of variation ranges from 61 to 76% for the premonsoon season, the highest variability (76%) being in Gangavathi taluk.

The coefficient of variation for southwest monsoon ranges from 34 to 39%, the highest being in Gangavathi taluk. The coefficient of variation for northeast monsoon ranges from 62 to 74%, the highest being for Gangavathi taluk.

The coefficient of variation for Annual rainfall ranges from 25 to 32%. Gangavathi taluk experiences high variability of rainfall.

TALUK WISE RAINFALL PATTERN, KOPPAL DISTRICT

Taluks(No. of Years of Rainfall data available)	Statistical Parameters	Pre Monsoon	South-West Monsoon	North-East Monsoon	Annual Rainfall

Gangawati (42)	18(43)	11(55%)	8(19)	4(20%)	15(36)	6(30%)	7(17)	3(15%)
Koppal (41)	21(45)	13(65%)	11(26)	6(30%)	17(40)	7(35%)	10(24)	5(25%)

Note : Figures in bracket indicate values as percentage of number of years for which data is available or for 20 years depending on the column in which it is given.

The following inferences could be made.

* The Premonsoon rainfall in the recent 20 years is more deficit compared to the long term data.
* Southwest monsoon is more deficit in the recent 20 years compared to the long term data.
* The rainfall deficit during northeast monsoon is increasing during recent 20 years compared to the long term data, except Gangawati & Koppal taluks.
* The trend analysis of annual rainfall indicates decreasing trend in the taluk of Kushtagi. The taluks of Koppal & Yelbarga indicate no significant change. The taluk of Gangawati shows increasing trend of rainfall.

Source : Drought Monitoring Cell (Society of Govt. of Karnataka)

(7) Forestry

The district forest area accounts for 5.3 percent of the total geographical area. Thee forest areas are found in Gangawati, Koppal and also to some extent in Kushtagi taluks. Majority of these areas lies along the banks of Tungabhadra river that forms the south east border of the district covering Koppal and Gangawati taluks. With little coverage, the forest vegetation is almost nil in the district. Even the little produce available from the woods, do not posses any economic value. The reasons for the poor coverage of forest area may be attributed to inadequate rainfall because of the dry tropical climate and frequent erosions. Also there are no district hill ranges that helps geological formation of such lands. Moreover even the meager percentage of forest area have been deforested to supplement man's survival. The forests in the district are of mixed dry deciduous type consisting of open scrub jungles with weeds and bushes. In few places timbers of economic values are grown. With its small percentage of forest area, the minor forest produce that are available are Tarwad bark, beedi leaves, Rousa grass, Sharifa or Seetaphal, honey and wax, Soapnut and Tamarind. Some of the timber spices found in these forests are considered to have economic value.

(8) Geology

The major rock types occurring in the district may be classif ied as Dharwars,Peninsular gneissic complex, Dykes and Kaladgi series. The Dharwar series of rocks occur in Kushtagi band. Minor patches are also seen in Gangawati, Yabbalu, Ullanur and Timmapur. The rocks occurring in Kushtagi band and also on other minor patches consist of metamorphic series, namely Chlorite schists, Tale schists, banded ferruginous quartzites, Hornblende schists, Diabasic schists and Amphibolites with their intrusives like quartz reef and veins. The quartz reef can be broadly classified into three groups:- white quartz reefs; slate-blue quartz reefs; and pale-blue and white quartz reefs. Of these three, the slate-blue quartz is of great importance on account of its auriferous nature. These auriferous quartz veins are mostly confined to the hornblende schists. The peninsular gneissic rocks of pink variety and gray variety occur on the southern and northern portions of the district. The Kaladgi series of rocks occur over an area of about 10 miles in the north- western portion of Kushtagi taluk.These rocks consist of the alternate layers of conglomerates and sandstone.

(9) Flora and Fauna

Flora : As stated earlier, with just 5.3 percent of forest area, the districts' forest wealth is almost nil. The weeds and climbers found in these forest neither posses any economic value nor they are nutritious. The different types of grass grown are not nourishing even to feed the cattle, but these are used for making thatch roof for katcha houses in the villages. The most common shrubs are the Bel Palas (Butea Superba), Dikmali (Gardenia gummifera), Gotti or Challe (Zizyphus), Sharifa or Seetaphal, (Anona Squamesa) and Tarwad or Tangadi (Cassia auriculata). These shrubs are mostly used for fencing purposes. The main tree species include Cassia Fistula (Kakke or Amallas), Acacia arabica (Jali or Babul), Tamarindus indica (Imli or Hunise), Pongamia glabra (Honge or Karanji), Wrighta tinctoria (Hale or Pala-Kordsha), Butea frondasa (Palas or Muttaga), Anogeissus Latifolia (Tirman or dindiga), Albizzia amara (Chujjalu), chloroxylon Swietenia (Huragalu), Pterocarpus marsupium (Bijasal or Honne), Hard wickia binata (Karachi or Kammasa), and Terminalia tomentosa (Nallamaddi or Matti). In addition to the above species, Celastrus Sengalersis, Sapindus emarginata, Acacia sundra, Dodonea viscosa, Ficus bengalenisis and Dalbergia Latifolia are also found in the district.

Fauna: Since the forests in the district are of mixed dry deciduous type consisting of open scrub jungles, animals belonging to the family of big game variety are almost extinct. It seems that few decades ago tigers and leopards had their abode in these forests and sighting of these animals was rare. Presently such encounters is almost nil in the district. Animals sighted in these forests are wolves, jackals and deers. Plenty of snakes, scorpions and lizards are in these jungles. Among the snakes, the Cobra, Russels'viper and small water snakes are found not only in the forest but in all the regions of the district. Snakes with heads at both ends called Mannumuka-havu is a peculiar variety found in the district. Among the game birds, Partridges and quails, along the rivers and streams, the wild duck, teal and water fowl are also seen in the district.

(10) Soils

According to the National Bureau of Soil Survey Organization and Land Use Planning (NSSO & ULP), the soils in the district can be defined as Tropepts-Aquepts, Usterts-Ustalfs, Usterts-Tropepts, Usterts-Orthents, and Usterts-Ustalfs-Tropepts. The black cotton soil and the red soil are predominant and it is found in major portion of the district. The black cotton soil are found wherever the hornblende schists and the gneiss occur. The reddish sandy soils are noticed wherever the pink gneiss occur and these places are located in Gangawati and Kushtagi. The reddish brown soil is seen in areas where the diabasic schists and basic dykes occur. The black cotton soil is locally called as "Regadas" and the red soil is known as "Chalkas" or "Masabs". The red soil is exclusively used for cultivation of Khariff crops because of its friable nature and the deep red soil is suited for cultivation of all kinds of irrigated crops. The red soil is generally poor in plant nutrients. Though in general it is calcareous, this type soil is not free from lime especially in the lower depths. On the other hand, the black cotton soil which is commonly used for raising rabi crops contains high nutrient reserves of basic chemical properties of Calcium, Magnesium, Soda etc. This soil contains large quantities of water soluble salts and it is very calcareous. Repeated soil analysis are being carried on in the district. The reports and recommendation of these analysis are passed on to the agriculturist and follow up programmes are being conducted to train the farmers to follow the cropping pattern that will suit the type of soil, climatic conditions and irrigation potential of the district.

(11) Cropping pattern

The vast area of the region consist of fertile tract of black cotton soil. Bordered by a major river, the Tungabhadra on the south and traversed by small streams and canals, the district has vast irrigated potential. Despite this fact, the region remained backward in its agriculture sector until the opening of Tungabhadra project, the major irrigation project, by which the region receives water through Tungabhadra left bank canal. As other districts, Koppal too is dependent on agriculture for its livelihood. According to the findings of Census of India 2001, cultivation and agriculture labourers together constitute 68.9 percent of the total workers in the district.

LAND USE PATTERN FOR 1998-99 IN HECTARES

Name of Taluk	Geographical Area	Forest Area	Land put to Non-agricultural use		Uncultivable Fallow Land			Cultivable Fallow Land	Area Sown			Total Net Area Irrigated
			Barren and Uncultivable land	Land put to Non-agricultural use	Cultivable waste land	Permanent pastures	Trees and groves		Net Area Sown	More than once	Total Area Sown

Source : District at a Glance, Koppal District, 1999-2000, Directorate of Economics & Statistics, Bangalore

According to the latest statistics on land utilization, which is given in the above table, about 81.4 per cent of land is put under agricultural use. Of this 64.8 per cent of area is sown for cultivation and 16.6 percent is cultivable fallow. That which is put for non-agricultural use accounts for about 10 per cent of the total geographical area. Forest area constitutes 5.3 per cent.

LAND HOLDINGS IN HECTARES 1997-98

Name of Taluk	Marginal (Below 1)		Small (1–2)		Semi-Medium (2-4)		Medium (4-10)		Large (10 & above)		Total Holdings	
	Holder	Area	Holder	Area	Holder	Area	Holder	Area	Holder	Area	Holder	Area

Source : District at a Glance, Koppal District, 1999-2000, Directorate of Economics & Statistics, Bangalore

The size of the agricultural land holdings is one of the important factors that determine the productivity of the lands. According to the agricultural census of 1990-91, which is the latest statistics available on land holdings, there are 1.56 lakhs of holdings covering a total area of 4.51 lakh hectares. The table above reveals that small size holdings of 1-2 hectares and semi-medium holdings of 2-4 hectares are more in the district, which accounts for 32.04 and 29.47 per cent respectively. Agriculturists holding marginal size of less than one hectare is almost the same, the number of medium size land holdings of 4-10 hectares. The area held by the small and semi-medium size land holders is more than the area held by the small size land holders. The table given above illustrates the distribution of taluk-wise land holdings in the district.

AREA, PRODUCTION AND AVERAGE YIELD OF PRINCIPAL CROPS FOR 1998-99 UNDER ALL SEASONS

Principal Crops	Irrigated			Un-irrigated			Total		
	Area in hectare	Production in tones	Yield in Kgs per hectare	Area in hectare	Production in tones	Yield in Kgs per hectare	Area in hectare	Production in tones	Yield in Kgs per hectare
1	2	3	4	5	6	7	8	9	10
Paddy	68,370	348,977	5,373	477	956	2,109	68,847	349,933	5,350
Rice	68,370	232,771	3,584	477	638	1,407	68,847	233,409	3,569
Jowar	7,537	11,854	1,656	55,172	32,708	624	62,709	44,562	748
Bajra	731	787	1,133	53,387	26,145	516	54,118	26,932	524
Maize	15,647	55,654	3,744	17	33	2,050	15,664	55,687	3,742
Wheat	385	503	1,375	10,902	3,594	347	11,287	4,097	382
Total cereals	92,670	301,569	3,425	119,955	63,118	554	212,625	364,687	1,805
Total pulses	-	-	-	-	-	-	53,082	14,424	286
Total food grains	-	-	-	-	-	-	**277,540**	**381,960**	**1,449**

Note : Data for irrigated and un-irrigated area separately are not available.

The soils of the district which are predominantly black cotton soil and red soils are suitable for yielding a variety of crops among which the most important are paddy, jowar, bajra, maize, wheat, groundnut and sunflower. Paddy and jowar are the chief crops grown extensively in an area of 68,847 hectares and 62,709 hectares respectively. While paddy is cultivated mainly under irrigated conditions, jowar is cultivated as rain-fed crop. The next important crop cultivated on large scale is the bajra, and grown in an area of 54,118 hectares. This is mostly cultivated as a rain-fed crop. About 15,664 hectares and 11,287 hectares are put under cultivation of maize and wheat. The wheat growing taluks in the district are, Yelbarga, Gangawati and Koppal. Besides the food grains highlighted above, few oil seeds are grown in the district. Among them, groundnut and sunflower are grown in larger area. Koppal is known for groundnut cultivation in the state.

Apart from these, crops like castor, sesame, linseed, Niger seed are the other oilseed crops grown in the district. Total area of 21,138 hectares are utilised for cultivation of cotton and sugarcane. The district was not known for any large-scale activity in the field of horticulture. For a systematic development of horticultural activities, the Tungabhadra project was commenced by appointing, an Assistant Director of Horticulture at Munirabad, in Koppal taluk. Currently a total area of, 1220 hectares are under cultivation of plantation and horticultural crops. Crops like onion, tomato, brinjal, banana, mango, guava, sapota and lemon are the different crops grown in the district. Dry chilies, coriander and coconut are also grown in the district. The area under each crop, their production and yield per hectare are given in the below table.

AREA, PRODUCTION AND AVERAGE YIELD OF CROPS FOR 1998-99 UNDER ALL SEASONS

Crops	Area in hectares	Production in tones	Yield in Kgs per hectare
1	2	3	4
Oil Seed Crops			
Ground nut	53,391	31,521	621
Castor	2,437	2,375	1,026
Sesamum	16,759	2,977	187
Linseed	1,424	257	190
Nigerseed	1,467	192	132
Sunflower	43,017	11,655	285
Commercial Crops			
Cotton	19,182	18,430	172
Sugarcane	1,956	200,686	108
Plantation and Horticultural Crops			
Onion	434	2,073	4,776
Tomato	27	267	9,889
Brinjal	15	174	11,575
Banana	327	6,322	19,332
Mango	317	821	2,590
Guava	8	52	6,448
Sapota	39	112	2,868
Lemon	53	690	13,016
Condiments and Spices Crops			
Dry chillies	156	134	859
Coriander	413	72	176
Coconut	254	1,211	4,817

(12) Irrigation

Scanty and unreliable rainfall, resulting in frequent draughts and famines has limited the progress of agriculture in the district. Consequently this has led to the need for water through various irrigational sources in the district. The major river Tungabhadra, few tanks and wells have indeed augmented the irrigational potential of the district. The advent of canal irrigation under the Tungabhadra project brought drastic changes in agricultural operations. As a result, areas being brought under irrigation increased considerably over the years. According to the latest statistics available for 1998-99, the net area irrigated account for 85,200 hectares. Taluk-wise comparison, point out that 57.3 percent of the total irrigated area is in Gangawati taluk. Of all the sources listed in the table, irrigation through canals forms a major source where the percentage accounts for 60.2 percent of the total irrigated area, and this source is available for Gangawati and Koppal taluks. The next major source of irrigation is through wells, which constitute 28.7 percent of the net area irrigated.

Tank irrigation also played an important role in the district. It is worth mentioning about Kalapur tank, Lakshmidevikere and Chittavadgi tank, which has a potential of irrigating about 5,300 acres of land in the district. The taluk-wise details of net area irrigated through various sources is given in the following table.

NET AREA IRRIGATED BY DIFFERENT SOURCES

Name of Taluk	Net area irrigated for 1998-99 (Area in hectares)						
	Canal	Tank	Wells	Lift Irrigation	Bore Wells	Other sources	Total
1	2	3	4	5	6	7	
Yelbarga	-	-	8,508	-	97	457	9,062
Kushtagi	-	40	8,77	-	192	192	8,061
Gangawati	46,658	75	2,128	-	-	-	48,861
Koppal	4,597	884	5,649	-	76	7,470	18,676
Total	**51,255**	**999**	**24,462**	**-**	**365**	**8,119**	**85,200**

Source : Koppal District at a Glance, 1999-2000, District Statistical Officer, Koppal

Apart from the sources mentioned above, there are few irrigational projects implemented in the district to meet the demand from this sector. Foremost to mention is the major Tungabhadra project. Under this project, a dam across the river Tungabhadra was constructed at a distance of 6 kms from Hospet in Bellary district. This project envisages construction of three canals, the Left Bank Canal, the Right Bank High Level Canal and the Low Level Canals. While the former one passes through the Raichur district, the Right Bank High level and Low Level Canals pass through Bellary district. The Left Bank Canal passes through Koppal and Gangawati taluks. A serious problem faced by the government after the construction of reservoir was the sediments that has accumulated in the reservoir. The quantity of inflow of sediments into the reservoir through Hirehalla streams was large. In order to prevent this, the government decided to construct an anicut across Hirehalla stream near Kinnal village in Koppal taluk. This project was accorded administrative approval vide government order No. PWD 164 MTP 73, dated 24-5-1979. With canals on both sides, it is expected to provide irrigation to an extent of 8230 hectares in the taluk. The proposed dam is 3.6 km long and 15 meters high. The construction is under progress. With these projects, the irrigational potential of the district is thereby expected to increase resulting in more coverage of dry areas of the district.

(13) Natural Wealth

Koppal district is not much bestowed with mineral wealth. The only major minerals occurring in the district are quartz and red ochre. Quartz occur in Koppal, Kushtagi and Gangawati taluks and red ochre occur in Koppal taluk. As per the latest statistics, reserves upto 3.5 MT and 0.53 MT of quartz have been assessed in Koppal and Kushtagi taluks, while it is yet to be assessed in Gangawati. Red ochre is estimated to be 0.08 MT in Koppal taluk. Of the minor minerals, building stone and ornamental stone are reported to be available in abundance. These are available in all the taluks of the district. The taluk-wise mineral resources of the district is given in the following table.

TALUK WISE MINERAL RESOURCES OF THE DISTRICT

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor	
1	2	3	4	5
1	Yelbarga	-	Building Stone, Ornamental Stone	Building stone is abundantly available. Production of Ornamental stone depends upon demand and International Market.

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor	
1	2	3	4	5
2	Kushtagi	Quartz	Building Stone, Ornamental Stone	Building stone is abundantly available. Production of Ornamental stone depends upon demand and International Market.
3	Gangawati	Quartz	Building Stone, Ornamental Stone	Building stone is abundantly available. Production of Ornamental stone depends upon demand and International Market.
4	Koppal	Quartz Red Ochre	Building Stone, Ornamental Stone	Building stone is abundantly available. Production of Ornamental stone depends upon demand and International Market.

(!4) Animal Husbandry

Animal husbandry is an important economic activity in the district too. The hot and dry climate and frequent droughts have led to difficulty in growing and providing fodder to the cattle which in turn have effected the cattle wealth. The Krishna valley and Khillar varieties were the main breeds of cattle reared in the district. Of these two, farmers prefer Khillar breed because of its greater utility in agricultural operations and also its capacity to yield more milk. With the availability of water through Tungabhadra irrigation project, the district has seen some improvement in its cattle wealth. As per the statistics published by the department of Gazetteer, Government of Karnataka, the district ranks at 17th place in its cattle wealth in the state. The total livestock numbers to 886,402 which includes cattle, buffaloes, sheep, goats, pigs, rabbits, dogs and other livestock. In its poultry population, the district ranks at 14th and the total poultry population numbers to 668,000. About 32,000 tons of milk, 571 lakhs of eggs and 2,141 tons of meat are produced in the district. The department of animal husbandry and veterinary services is taking various measures to enhance its cattle wealth by introducing such breeds, which are suitable to the soil, climate and other environmental conditions of the district. In their effort to bring improvement in this sector, the Livestock Breeding and Training Centre, at Munirabad is engaged in Jerry cattle breeding and fodder development. The centre also conducts training programme for farmers, and it is also engaged in production of frozen semen and distribution. Of the 32 poultry institution in the state, one Regional Poultry breeding and training Centre is at Gangawati. The details of livestock population are given in the following table.

DISTRIBUTION OF LIVESTOCK POPULATION IN THE DISTRICT

Sl. No.	Name of Livestock	Total Livestock
1	2	3
1	Cattle	333,727
2	Buffaloes	124,659
3	Sheep	219,392
4	Goats	153,583
5	Pigs	8,739
6	Rabbits	54
7	Dogs	45,429
8	Other Livestocks	819
	Total Livestocks	**886,402**
	Total Poultry	**668,000**

Source : A Handbook of Karnataka – 2001, Gazetteer Department, Government of Karnataka.

(14A) Veterinery Services

The spread of veterinary services has resulted in the improvement of animal health. There are 9 veterinary hospitals in the district. In addition there are 11 dispensaries and 59 Primary veterinary centres. Greater importance is being given to replace the local variety by exotic breeds. For this purpose, 12 Artificial Insemination Centres have been established in the district. Also there are 5 Mobile dispensaries to render Services in the district.

VETERINARY INSTITUTIONS IN THE DISTRICT FOR THE YEAR 2000

Sl. No.	Veterinary Services	No. of Institutions
1	2	3
1	Hospitals	9
2	Dispensaries	11
3	Primary veterinary centres.	59
4	Mobile dispensaries	5
5	Artificial Insemination centre	12

Source : Karnataka at a glance 2000 – 2001, Directorate of Economics and Statistics, Government of Karnataka.

The table furnished above clearly describes category wise, taluk wise, number of veterinary service institution in the district.

(15) Fisheries

Situated in a dry zone with not many perennial sheets of water, Koppal district cannot lay claim to any great wealth in fisheries. The resources are mostly inland fishing confined to the river Tungabhadra, Tungabhadra Left Bank Canal, and a few tanks. There are about 49 major tanks and 24 minor tanks with the water spread area of 2083.81 hectares. Apart from these tanks, there are 4 reservoirs with less than 500 hectares of water spread area. Varieties like the carp, the catfish, the murrels and the eels are the frequent catches in the district. Fishing is done by means of cast nets, gill nets, hooks and fishing traps. There are two fish farms, one each engaged in production and rearing activities, and also there is one fish seed centre involved in rearing activities. The district does not have Ice plants and cold storage facility to support the fishing activity in the district. During 1998-99, the total number of fishermen actively engaged in this profession were 9625 and it ranks at 8th place in having larger number of fishermen population and they have 7 societies functioning in the district. As per the statistics, there are 12 fish markets run by the private people. The government has introduced various welfare schemes for the benefit of fishermen. Some of them include, Group Accident Insurance, Centrally Sponsored Scheme (CSS) for Development of Model fishermen villages, CSS for motorisation of traditional fishing craft, CSS for reimbursement of Central Excise duty on diesel used by mechanised boats, Subsidy on sales tax, payment of Distress Relief Fund, etc. The following table highlights in brief the fishing activity in the district.

FISHING ACTIVITY IN THE DISTRICT

Fish Seed Stocked	In lakh fingerlings
a) Reservoirs	-
b) Major Tanks	40.72
c) Minor Tanks	8.38
Total	**49.10**
Estimated Fish Production	**In MTs**
a) Cultured	2,417.80
b) Natural	105.05
Total	**2,522.85**

Source: Statistical Bulletin of Fisheries 1998-99, Directorate of Fisheries, Government of Karnataka

(16) Industries

Koppal remained industrially backward till the opening of mighty Tungabhadra Project in the region. Power and water has always been the main reason for its backwardness in this sector. This constraint was removed when the district received hydroelectric power supply through Tungabhadra project and water through Tungabhadra Left Bank Canal. Through various power development schemes, the government is supplying electricity for starting large scale industries in the district. One such large scale industry that benefited from Tungabhadra project was the Salarjung Sugar Mill at Munirabad engaged in the manufacturing of white sugar. Tungabhadra Pulp and Board Mill is another industry engaged in the manufacturing of straw boards. The Chamundi Chemicals and Fertilizers Ltd. is yet another large scale industry of the region. Koppal is also known for its oil mill industries. These mills are functioning in large number in Koppal, Yelbarga and Gangawati taluks. Another industry that is thriving in the district is the handloom weaving and this is flourishing mostly in Koppal and Gangawati taluks. The other cottage industries in the district include leather working and tanning, carpentry and blacksmithy, basket and mat making, salt making, handicrafts, hand-embroidery etc. As per the latest statistics for the year 1998-99, there are total 31 textile, 5 chemical, 5 engineering and 120 other types of registered factories in the district providing employment opportunity to 8,058 persons. There is ample scope for expansion and modernisation of existing industries as well as starting of new industries. The taluk-wise details can be seen in the table given below.

TALUKWISE DETAILS OF MAJOR FACTORIES FOR THE YEAR 1998-99

Name of Taluk	Number of Factories in the District					No. Employed
	Textiles	Chemicals	Engineering	Others	Total	
1	2	3	4	5	6	7
Yelbarga	17	-	-	7	24	480
Kushtagi	2	-	1	2	5	100
Gangawati	4	-	1	80	85	2,600

The table indicates the number of factories located in each taluk and the number of persons employed in each category of industrial unit.

(17) Trade and Commerce

Though Koppal was rich in trade and commerce, indigenous banking business however did not thrive well. Not much can be said about the banking facilities except Chavani Fakirappa Fund which existed many decades ago in the then undivided Raichur and played an important role in the district. This fund is said to have laid the foundation for modern banking practice in the district. It was during the late 50's. and early 60's. Many prominent institutions set their foot in the district. Banks like State Bank of Hyderabad, Syndicate Bank, etc, are some of the banks that started their business in the district. Today as per statistics, the district has 35 commercial banks, 38 Regional Rural Banks, 5 Urban Co-operative Banks, 7 other co-operative banks and 4 Primary Land Development Banks. The taluk-wise details of banks are given in the following table.

TALUKWISE DETAILS OF BANKS IN THE DISTRICT

Name of Taluk	Number of Banks as on 31.03.1999				
	Commercial Banks	Regional Rural Banks	Urban Co-op Banks	Other Co-op Banks	Primary Land Development Bank

Source: Koppal District at a Glance 1998-99, District Statistical Office, Koppal

Unlike other district, the co-operative movement gained importance in the then undivided Raichur district in the year 1919. After a setback during the world wars, the co-operative movement gained momentum during the successive five-year plans. As on today, there are about 349 co-operative societies functioning in different fields namely agriculture, milk and other societies. Apart from these societies, trade centres also came up in the district. The development of trade centres resulted in setting up of general market. These markets in turn helped the growth of regulated markets. The main purpose of establishing regulated markets is to ensure, that the agriculturists obtain better price, proper weighing of their produce and relief from middlemen/commission agents, who use to collect additional fee/charges. As on today, there are 4 main markets supported by 11 sub-markets. The above table gives an account of taluk-wise details of co-operative societies and regulated markets in the district.

(18) Transport and Communication

In the matter of road and railway communications Koppal district does not hold any envious position. The total length of railway line in the district is 55 kms. The Hubli-Gadag-Hospet-Bellary-Guntakal railway line passes though the district via Yelbarga and Koppal. This line covers a distance of 33 kms in Koppal and 22 kms in Yelbarga taluk. It has 8 stations in the district. The taluk-wise details can be seen in the following table.

DETAILS OF RAILWAY TRANSPORT IN THE DISTRICT

Name of Taluk	Length of Railway Line in kms.				Railway Stations

Road Transport

With regard to roads, few roads which existed formerly were of a poor standard and the major river Tungabhadra as well as several streams hindered the development of proper road network. The black cotton soil of these tracts also posed problems of proper maintenance. It is only after the reorganisation of the state in 1956, the district witnessed remarkable progress in this sphere. The total road length of the district is 4221 kms. The National Highway passes through Koppal, Yelbarga, and Kushtagi taluks. In recent years several bridges and culverts have been built in different parts of the district, and this has rendered road communication to be more convenient. The taluk-wise details on road length can be seen in the following table.

DETAILS OF ROAD TRANSPORT IN THE DISTRICT

Name of Taluk	Length of Roads in kms.										Major Bridges
	National Highways	State Highways	District Major Roads	Other District Roads	Village Roads	TDB Roads	Municipality Roads	Forest Roads	Irrigation Department Roads	Total Roads

(19) Electricity and Power

Karnataka has a place of pride in the field of power generation in the country. KPTCL – Karnataka Power Transmission Corporation Limited (erstwhile KEB) is mainly vested with the functions of transmission and distribution of power in the entire state. The Corporation has been attaching great importance to electrification of villages and hamlets, tribal colonies and harijan basthis and energisation of irrigation pump sets. Besides, this with a view to benefit weakest among the section of society schemes called Bhagya Jyothi / Kutir Jyothi have been introduced.

Following statement shows talukwise number of villages electrified and talukwise energisation of IP sets as on 31.3.1999 in Koppal District.

TALUKWISE NUMBER OF VILLAGES ELECTRIFIED AND ENERGISED IP SETS AS ON 31.3.1999

(v) CENSUS CONCEPT

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate

building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multistoreyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multistoreyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard, by definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. But if such hostels/ hotels have out houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in nonagricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multimember households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mantaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

In pursuance of the article 34 of the constitution of India the President of India has notified some castes, races or tribes or parts of or groups within castes, races tribes as scheduled castes.Similarly Scheduled tribes mean all such tribes or tribal communities or parts of or groups within such tribes or tribal communities as declared by the president of India, to be treated asScheduled tribes under article 342 of the Indian constitution. There is a slight change in the definition of Scheduled Caste in 1990. Before that Scheduled castes could belong to Hindu or Sikh religion, but from 1990, in addition to Hindu andSikh religions, Scheduled Castes may belong to Buddhist religion also. The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In respect of Karnataka State the Scheduled Castes and Scheduled Tribes as contained in the Scheduled Castes & Scheduled Tribes Orders (Amendment) Act, 1976 are valid for the purpose of Census of India, 2001. With the promulgation of Act 39 of 1991 however, the sub entries Naik, Nayak, Beda, Bedar and Valmiki were added under the main entry at S.No. 38 (Naikda, Nayaka, …..) of the Scheduled Tribes list of the State. There are in all 101 Scheduled Castes and 49 Scheduled Tribes in the State which are listed below:

List of Scheduled Castes

1 Adi Andhra

49 Yerava

Language and Mother tongue

As per the Census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if she or he is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betelnuts (areca).

Agricultural labourer

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. A person who has been engaged in the economic activity like above is termed as Household Industry Worker.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not

as a cultivator or agricultural labourer or in Household Industry is termed as an 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1,000 males in a population.

(vi) NON-CENSUS CONCEPTS

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a subsoil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of

married women or number of women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1,000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1,000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear female population of the same age group}} \times 1,000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear married female population of the same age group}} \times 1,000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Midyear female population in the age-group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid year married female population in the age-group (15-49) years.}} \times 1,000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1,000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1,000}$$

Age specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Midyear population of the same age group}} \times 1,000$$

q_1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2

Probability of dying between birth and age 2.

q_5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U_5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during The year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neonatal mortality rate and Post neonatal mortality rate. The neonatal mortality rate also comprises of two parts viz., early neonatal mortality rate and late neonatal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Perinatal mortality rate (PMR)

Number of stillbirths plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1,000$$

Still birth rate (SBR)

$$= \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and stillbirths during the year}} \times 1,000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/ Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000- 4,999,999); M5 (1,000,000-1,999,999); M4 (500,000-999,999); M3(300,000-499,999); M2

(200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its Distribution:

(a) Distribution of population in Rural-Urban Areas:

According to the 2001 Census, the total population of Koppal district is 1,196,089, comprising 603,312 males and 592,777 females. The population of the district forms 2.3 percent of the state population and ranks at 22nd place among the districts. Out of the total population of the district 83.4 percent lives in rural areas while 16.6 percent lives in urban areas. Rural population of the district is distributed among 4 taluks and urban population spread over in 5 towns. The total urban population in the district is 198,292 persons comprising 100,580 males and 97,712 females. The total rural population in the district comes to 997,797 persons and is composed of 502,732 males and 495,065 females as per 2001 Census. This rural population is distributed in 594 inhabited villages and there are 35 un-inhabited villages in the district.

(b) Size-class and Civic Status of towns:

The Statement below gives the position and number of urban units according to size-class of population as per 2001 Census:

SIZE-CLASS AND CIVIC STATUS OF TOWNS

Serial number	Size-Class of town	Name and civic status of town		Urban Population		
				Persons	Males	Females
1	2	3		4	5	6
1	IV	Yelbarga	TP	11,442	5,793	5,649
2	III	Kushtagi	TP	21,183	10,766	10,417
3	I	Gangawati	CMC*	101,392	51,211	50,181
4	II	Koppal	TMC	56,160	28,676	27,484

* Includes outgrowth

Population Growth, Density and Sex-ratio:

Population Growth:

Koppal District witnessed a positive growth rate in each decade with 7.4, 9.4, 12.2, 18.3, 10.6, 31.4, 22.3, 28.0 and 24.8 percent during the period 1901 to 2001 (except 4.9 percent negative growth during the decade 1911-1921). According to the 1991 Census the total population of the district was 958,078. There has been net addition of 238,011 persons during 1991-2001. The decadal growth rate of the district comes

to 24.8 percent. The growth rate for the rural and urban areas of the district is 23.2 and 33.9 percent respectively.

Density:

The population density of Koppal district is 215 persons per Sq. Km. against the state average of 276 persons. At taluk level, the density varies between 159 persons in Yelbarga taluk and 310 persons in Gangavati taluk. In rural areas it comes to 180 persons per Sq. Km., while in urban areas it comes to 4,569 persons. In urban areas, the density of population varies between 1,868 persons in Kustigi town and 9950 persons in Yelbarga town.

Sex Ratio:

There are 983 females for every one thousand males in Koppal district. The sex-ratio figures for rural areas and urban areas of the district are 985 and 971 respectively. It is also observed that, the proportion of females in rural areas is higher than that of urban areas. Sex-ratio in the age-group 0-6 comes to 953 girls per 1,000 boys in the district as a whole. In rural areas, this proportion is 952, while in urban areas the sex-ratio of Child population works out to 958 girls per 1,000 boys.

Work Participation Rate:

The work participation rate is defined as percentage of total workers to total population. According to 2001 Census, the total workers including main and marginal workers constitute 46.4 percent of total population of the district. Of the total workers, the share of main workers is 81.2 percent and marginal workers is 18.8 percent. The remaining 52.3 percent of population belongs to the category of non-workers.

As per 2001 Census among the main workers male participation rate in the district is 91.5 percent and corresponding proportion of females is 62.4 percent. The proportion of female marginal workers is higher than male marginal workers, as the females are attending to one or more economic activities in addition to their household duties to improve the family income. Majority of the workers are engaged in agricultural activities. Of the total 840,419 workers in the district, 48.9 percent of these total workers are categorized as cultivators, 24.5 percent agricultural labourers, 2.1 percent in household industries and 24.4 percent in other services.

Literacy:

A person who can read and write in any language is considered as literate in Census. All children of age below 7 years are treated as illiterate.

As per 2001 Census, Koppal district has reported 534,547 persons as literates constituting 54.1 percent of the total population excluding the population of 0-6 years. The male and female literacy rates in the district are 68.4 and 39.6 percent respectively. The literacy rate of males is higher than that of females. The gap in the male - female literacy rate is 28.8 in the district.

The total literacy rates of rural and urban area are 51.0 and 69.1 percent respectively. The male and female literacy rates in rural areas are 66.1 and 35.8 percent respectively. In urban areas these rates are 79.7 and 58.3 percent respectively. The gap in male - female literacy rates in urban areas is 21.4 as against 30.3 in rural areas. It is thus clear that females are better educated in urban areas than their counterparts in rural areas.

(c) Scheduled Castes and Scheduled Tribes Population 2001:

Of the 1,196,089 total population of the district 15.5 percent of the total population belong to Scheduled Castes and 11.6 percent to Scheduled Tribes. The percentage of Scheduled Castes constitute 73.8 percent in rural areas and 26.2 percent in urban areas. The proporation of Scheduled Tribes is 84.3 and 15.7 in rural and urban areas respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36

Following tables, which presents the data on population with in the district with brief notes will provide an overview of the district.

TABLE 1: DECADAL CHANGE IN POPULATION OF TALUKS BY RESIDENCE, 1991-2001

Taluk	Population						Percentage decadal variation 1991-2001			Percentage Urban Population	
	1991			2001							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12
Yelbarga	196,080	196,080	-	236,373	224,931	11,442	20.55	14.71	-	-	4.8
Kushtagi	189,891	175,239	14,652	239,331	218,148	21,183	26.04	24.49	44.57	7.72	8.9
Gangawati	320,394	239,238	81,156	406,334	304,942	101,392	26.82	27.46	24.93	25.33	25
Koppal	251,713	199,450	52,263	314,051	249,776	64,275	24.77	25.23	22.98	20.76	20.5
District : Total	**958,078**	**810,007**	**14,8071**	**1,196,089**	**997,797**	**198,292**	**24.84**	**23.18**	**33.92**	**15.46**	**16.6**

Data given in table-1 reveals the talukwise decadal variation of population in the district. During the decade 1991-2001, it has grown by 24.84 per cent. Talukwise decadal change points out the highest variation in Gangawati and Kushtagi where it is 26.82 and 26.04 per cent. Kushtagi urban has recorded the highest variation of 44.57 percent. The percentage of urban population to total population in the district has grown by 1.14 during the decade.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Yelbarga	138	224,931	113,471	111,460	2 (1.4)	163	173
2	Kushtagi	164	218,148	109,855	108,293	3 (1.8)	134	129
3	Gangawati	148	304,942	153,145	151,797	12 (8.1)	568	527

28 (20.3)	41,794	40,916	3 (2.2)	10,516	10,409	1 (0.7)	7,978	7,740
21 (12.8)	29,608	29,375	1 (0.6)	2,619	2,460	2 (1.2)	13,521	13,050
35 (23.6)	49,931	50,023	13 (8.8)	40,711	40,617	2 (1.4)	19,896	19,051
26 (18.1)	45,380	44,569	4 (2.8)	15,664	15,183	1 (0.7)	6,383	6,201
110 (18.5)	**166,713**	**164,883**	**21 (3.5)**	**69,510**	**68,669**	**6 (1.0)**	**47,778**	**46,042**

There are 28 villages in the district having population less than 200 in each village. Also there are villages with population ranging between 200-499, 500-999, 1,000-1,999 and 2,000-4,999, where it numbers 72, 170, 187 and 110 respectively. The table also reveals that villages whose population ranging 5,000 and above are very less in the district. With regard to villages with population 10,000 and above, out of 6 villages only one village each has been reported in Yelbarga and Koppal Taluks. Similar is the observation seen in Kushtagi taluk where there is only one village to have population between 5,000-9,999.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS

		Name of Town
(a)	New	
(i)	Statutory Town	**1. Yelbarga (TP)**
(ii)	Census Town	**Nil**
(b)	Denotified	
(i)	Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as Census towns.	**Nil**
(ii).	Statutory towns of 1991 Census denotified but identified as Census towns based on demographic and economic criteria	**1. Munirabad Project Area (NAC)**
(iii)	Census towns of 1991 Census are notified as Statutory towns in 2001 Census	**1. Kushtagi**
(c)	Declassified	**Nil**
(d)	wholly merged with other towns	**Nil**

Declassified means the census towns of 1991 Census, which fail to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	7	1.2	478	0.0
11-20	5	0.8	455	0.0
21-50	15	2.5	4,711	0.5
51-100	93	15.7	77,168	7.7
101-200	265	44.6	369,330	37.0
201-300	125	21.0	230,473	23.1
301-500	50	8.4	149,253	15.0
501 +	34	5.7	165,929	16.6
Not known	-	0.0	-	0.0
District Total:	**594**	**100.0**	997,797	**100.0**
Population Density (Rural) of the district:		**188**		

Distribution of villages by population density and ranges are presented in the above table. The above table reveals that 44.6 per cent of villages have density of population ranging between 101-200. Some 120 villages have the density less than 100 per square kilometer. Similarly there are 209 villages that have the density above 200 persons per square kilometer.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT 1901-2001

State				District			
Census Years	Total	Rural	Urban	Census Years	Total	Rural	Urban
1	2	3	4	5	6	7	8
1901	983	984	976	1901	NA	NA	NA
1911	981	984	960	1911	NA	NA	NA
1921	969	975	936	1921	NA	NA	NA
1931	965	972	927	1931	NA	NA	NA
1941	960	965	935	1941	NA	NA	NA
1951	966	974	941	1951	968	994	891
1961	959	973	913	1961	973	979	927
1971	957	971	913	1971	979	986	937
1981	963	978	926	1981	989	996	954
1991	960	973	930	1991	981	986	955
2001	964	976	940	2001	983	985	971

The above table gives the sex-ratio for the rural and urban population of the state as well as that of the district from 1901 to 2001 census. It is observed that the state has recorded a decrease in the sex-ratio since 1901 census (983). However in 2001 census, the state has registered a better sex-ratio of 965 little higher than the ratio of 1991 Census (960).

For the district, the sex-ratio in 1951 Census was was 968 which gradually increased over the decades. However, in 2001 Census, the district has recorded a sex-ratio of 983 better than that of 1991 Census 981. It is also observed that the sex-ratio in 2001 Census for the district (983), is more than that for the state (965).

Again, the ratio for the rural women in 2001 Census is comparatively better than, that for the urban women in the state as well as in the district.

TABLE 6 : SEX RATIO BY TALUKS, 2001

Sl. No.	Name of Taluk	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Yelbarga	982	982	975
2	Kushtagi	984	986	968
3	Gangawati	988	991	980
4	Koppal	974	978	959
	District Total:	**983**	**985**	**971**

There are 983 females per 1,000 males in the district. The sex ratio for rural is 985 and for urban, it is 971. The ratio is favourable for men in both rural and urban areas in all the taluks. Koppal has registered the lowest among the taluks.

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Sl. No.	Name of C. D. block	Sex ratio
1	2	3
1	Yelbarga	982
2	Kushtagi	986
3	Gangawati	991
4	Koppal	978
District (Rural) Total:		**985**

The above table highlights the data on sex ratio by C.D. blocks which includes all the villages in the district. The overall ratio for the district favours men which is 985 females per 1,000 males. Blockwise comparison also reveals that in all the C.D. blocks the ratio favours men.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	5	0.8	301	0.0
700-749	1	0.2	283	0.0
750-799	-	0.0	-	0.0
800-849	7	1.2	4,471	0.4
850-899	30	5.1	20,894	2.1
900-949	104	17.5	128,436	12.9
950-999	206	34.7	487,517	48.9
1,000-1,099	226	38.0	350,127	35.1
1,100+	15	2.5	5,768	0.6
District Total:	**594**	**100.0**	**997,797**	**100.0**
Sex ratio (Rural) for District:		**985**		

The sex ratio for rural population by ranges are given with corresponding number of villages. Though the overall sex ratio of rural population as given above is 985, the ratio for villages by ranges reveals that there are 241 villages which have the sex ratio above 1000 favouring women in rural areas. It covers 35.7 per cent of the rural population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Yelbarga	TP	975
2	Kushtagi	TP	968
3	Gangawati	UA	980
4	Gangawati	CMC+OG	980
5	(i) Gangawati	CMC	977
6	Koppal	TMC	958
7	Munirabad Project Area	CT	963
Sex ratio (Urban) for the district :			**971**

The sex ratio for the urban areas of the district is 971. The ratio is favourable for men in all the towns of the district. Among the towns Koppal (TMC) has registered the lowest of 958.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TALUKS, 2001

Sl. No.	Name of Taluk	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Yelbarga	Total	40,310	20,897	19,413	929
		Rural	38,507	19,947	18,560	930
		Urban	1,803	950	853	898
2	Kushtagi	Total	43,691	22,237	21,454	965
		Rural	40,523	20,672	19,851	960
		Urban	3,168	1,565	1,603	1,024
3	Gangawati	Total	69,116	35,312	33,804	957
		Rural	53,523	27,386	26,137	954
		Urban	15,593	7,926	7,667	967

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TALUKS, 2001

Sl. No.	Name of Taluk	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
4	Koppal	Total	54,887	28,053	26,834	957
		Rural	45,357	23,127	22,230	961
District Total:		**Total**	**208,004**	**106,499**	**101,505**	**953**
		Rural	**177,910**	**91,132**	**86,778**	**952**
		Urban	**30,094**	**15,367**	**14,727**	**958**

Variations in child sex ratio has been a long observed phenomenon and have undergone considerable debate among the researchers and policy makers from time to time. Although the observed variations in the ratio favouring males is a biological fact, continued decline over the period causes great concern among the policy makers. The talukwise sex ratio for 0-6 population is given in the above table which reveals that there are 953 girls for 1,000 boys. The urban area of Kushtagi taluk is the only area where the ratio registered favours girls. Among the places which has the ratio favourable for boys, Yelbarga urban has reported as low as 898 girls.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Yelbarga	38,507	19,947	18,560	930
2	Kushtagi	40,523	20,672	19,851	960
3	Gangawati	53,523	27,386	26,137	954
4	Koppal	45,357	23,127	22,230	961
	District (Rural) Total:	**177,910**	**91,132**	**86,778**	**952**

This table highlights the data on the sex ratio of population in the age group 0-6 by C.D. blocks which includes only the rural portion of the district. The child ratio is favourable for boys in all C.D. blocks and the lowest of 930 is reported from Yelbarga.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	30	5.1	2,209	1.2
700-749	17	2.9	2,531	1.4
750-799	39	6.6	6,531	3.7
800-849	46	7.7	13,470	7.6
850-899	81	13.6	26,804	15.1
900-949	88	14.8	42,845	24.1
950-999	68	11.4	25,749	14.5
1,000-1,099	126	21.2	39,313	22.1
1,100+	99	16.7	18,458	10.4
District (Rural) Total	**594**	**100.0**	**177,910**	**100.0**
Sex ratio (Rural) for District:		**952**		

The sex ratio of rural population in the age group 0-6 is presented by ranges in the above table. Though the overall sex ratio for the rural district is 952 girls per 1,000 boys, it is worth noting that 225 inhabited villages have the sex ratio favourable for girls. Similarly in 86 villages the data shows a grim picture of the status of the girl child where the sex ratio ranges between less than 700, 700-749 and 750-799.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Yelbarga	TP	1,803	950	853	898
2	Kushtagi	TP	3,168	1,565	1,603	1,024
3	Gangawati	UA	15,593	7,926	7,667	967
4	Gangawati	CMC+OG	15,593	7,926	7,667	967
5	(i) Gangawati	CMC	14,313	7,309	7,004	958
6	Koppal	TMC	8,495	4,395	4,100	933
7	Munirabad Project Area	CT	1,035	531	504	949
	District(Urban) Total		**30,094**	**15,367**	**14,727**	**958**

The child sex ratio for the urban agglomerations/ towns is given in the above table. Data reveals that the urban sex ratio is 958 girls per 1,000 boys. In Kushtagi (TP) the ratio is favourable for girls. Among the other towns Yelbarga (TP) has registered a lowest ratio of 898 girls in the district.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TALUKS, 2001

Sl. No.	Name of Taluk	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Yelbarga	Total	236,373	34,744	24,836	14.7	10.5
		Rural	224,931	33,232	24,677	14.8	11.0
		Urban	11,442	1,512	159	13.2	1.4

		Rural	218,148	28,501	30,524	13.1	14.0
		Urban	21,183	3,577	990	16.9	4.7
3	Gangawati	Total	406,334	66,711	55,996	16.4	13.8
		Rural	304,942	53,445	49,536	17.5	16.2
		Urban	101,392	13,266	6,460	13.1	6.4
4	Koppal	Total	314,051	51,676	26,242	16.5	8.4
		Rural	249,776	43,743	23,982	17.5	9.6
		Urban	64,275	7,933	2,260	12.3	3.5
	District Total:	**Total**	**1,196,089**	**185,209**	**138,588**	**15.5**	**11.6**
		Rural	**997,797**	**158,921**	**128,719**	**15.9**	**12.9**
		Urban	**198,292**	**26,288**	**9,869**	**13.3**	**5.0**

Talukwise Schedule Castes and Schedule Tribes population are given in the table. The total Schedule Castes and Schedule Tribes in the district are 1,85,209 and 1,38,588 persons respectively. The percentage of Schedule Castes to total population is 15.5 and Schedule Tribes to total population accounts for 11.6 per cent.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Yelbarga	224,931	33,232	24,677	14.8	11.0
2	Kushtagi	218,148	28,501	30,524	13.1	14.0
3	Gangawati	304,942	53,445	49,536	17.5	16.2
4	Koppal	249,776	43,743	23,982	17.5	9.6
	District (Rural) Total:	**997,797**	**158,921**	**128,719**	**15.9**	**12.9**

Similar analysis is presented C.D. block-wise which includes only the rural areas of the district. The Schedule Castes and Schedule Tribes constitute 15.9 and 12.9 per cent to the total population. The highest of 17.5 per cent of Schedule Castes from Gangawati and Koppal blocks and highest of 16.2 per cent Schedule Tribes from Gangawati are reflected in the table.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	36	6.1	-	0.0
Less than 5	80	13.5	2,131	1.3
5-10	142	23.9	19,546	12.3
11-20	214	36.0	73,565	46.3
21-30	65	10.9	32,311	20.3
31-40	23	3.9	10,981	6.9
41-50	10	1.7	6,616	4.2
51-75	16	2.7	10,021	6.3
76 and above	8	1.3	3,750	2.4
District Total	**594**	**100.0**	**158,921**	**100.0**

The proportion of Schedule Castes population in the villages are given by ranges in the above Table. There are 36 villages in the district which does not have Schedule Castes population. Majority of the villages have '5-10' and '11-20' per cent of Schedule Castes in each village.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	51	8.6	-	0.0
Less than 5	132	22.2	6,494	5.0
5-10	138	23.2	22,945	17.8
11-20	111	18.7	31,709	24.6
21-30	73	12.3	27,638	21.5
31-40	18	3.0	6,395	5.0
41-50	23	3.9	10,479	8.1
51-75	33	5.6	15,514	12.1
76 and above	15	2.5	7,545	5.9
District Total	**594**	**100.0**	**128,719**	**100.0**

This table indicates the proportion of Schedule Tribes population by ranges in the village. Data reveals that 51 villages do not have Schedule Tribes population. Majority of the villages have 'less than 5', '5-10' and '11-20' percent of Schedule Tribes in each village.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Yelbarga (TP)	11,442	1,512	159	13.2	1.4
2	Kushtagi (TP)	21,183	3,577	990	16.9	4.7
3	Gangawati UA	101,392	13,266	6,460	13.1	6.4
4	Gangawati (CMC+OG)	101,392	13,266	6,460	13.1	6.4
5	(i) Gangawati (CMC)	93,240	12,636	5,432	13.6	5.8
6	Koppal (TMC)	56,160	6,286	1,990	11.2	3.5
7	Munirabad Project Area (CT)	8,115	1,647	270	20.3	3.3
	District(Urban) Total	**198,292**	**26,288**	**9,869**	**13.3**	**5.0**

The above table indicates the total urban population and percentage of Schedule Castes and Schedule Tribes in the district. It can be seen from the table that the Schedule Castes constitute 13.3 per cent to the total population whereas Schedule Tribes constitute 5.0 per cent. Among the towns, Munirabad Project Area (NAC) has the highest percent of Schedule Castes and Gangawati (UA) has the highest percent of Schedule Tribes.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Yelbarga	986	964
2	Kushtagi	986	969
3	Gangawati	1,009	997
4	Koppal	997	959
	District (Rural) Total	**997**	**977**

The table present the data on sex ratio among the Schedule Castes and Schedule Tribes in C.D. blocks. The rural sex ratio among the Schedule Castes and Schedule Tribes favours men in the district. Blockwise comparison points out that Schedule Caste women outnumber men in Gangawati block, whereas the ratio favours Schedule Tribe men in all the blocks.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Yelbarga (TP)	946	1,409
2	Kushtagi (TP)	981	988
3	Gangawati UA	1,028	1,006
4	Gangawati (CMC+OG)	1,028	1,006
5	(i) Gangawati (CMC)	1,028	997
6	Koppal (TMC)	987	923
7	Munirabad Project Area (CT)	924	1,000
	Sex ratio (Urban) for the district:	**1,000**	**992**

The overall sex ratio of the Schedule Castes and Schedule Tribes in the towns of Koppal district is equal in case of Schedule Castes and it is 992 for Schedule Tribes. Gangawati (UA) has registered the highest ratio of 1,028 which is favourable for Schedule Caste women and the lowest of 924 is recorded in Munirabad Project Area (CT). As regards the Schedule Tribes, the ratio is equal in Munirabad Project Area (CT). As high as 1409 females per 1,000 males are reported from Yelbarga (TP).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TALUKS, 2001

	District (Rural)	**418,249**	**272,058**	**146,191**	**579,548**	**230,674**	**348,874**	**51.0**	**66.1**	**35.8**	**30.3**

The percentage of literate by C.D. blocks in the district accounts for 51.0 per cent, where male and female literate accounts for 66.1 and 35.8 per cent respectively. Among the C.D. blocks, the highest of 53.8 per cent is reported from Koppal. Genderwise distribution indicates the highest percentage of male literate from Yelbarga block and female literate from Koppal block. Kushtagi has recorded the highest gap in male-female literacy rate.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.2	2	0.0
1-10	1	0.2	646	0.1
11-20	7	1.2	3,898	0.4
21-30	36	6.1	30,735	3.1
31-40	114	19.2	148,135	14.8
41-50	182	30.6	276,792	27.7
51-60	169	28.5	326,224	32.7
61-70	75	12.6	205,940	20.6
71-80	6	1.0	5,290	0.5
81-90	2	0.3	116	0.0

The above table provides sexwise as well as talukwise distribution of main workers marginal and non-workers in the district. Percentage of total workers in the district accounts for 46.4 per cent. Among the taluks, workers percentage is high in Yelbarga taluk, where the total workers works out to 52.7 per cent. In the same taluk male and female workers are high compared to other taluks in the district. More than 50 per cent of the population are non-workers in Kushtagi, Gangawati and Koppal taluks.

TABLE 32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

		Females	**495,065**	**123,950**	**25.0**	**92,216**	**18.6**	**216,166**	**43.7**	**278,899**	**56.3**

The data presented in this table is for C.D. blocks which includes only the rural population of the district. Data reveals that total workers including main and marginal workers constitute 49.0 per cent and non-workers accounts for 51.0 per cent. Total male and female workers figure out to be 54.2 and 43.7 per cent respectively. Among the C.D. blocks, total workers are high in Yelbarga block and non-workers are more in Gangawati block.

This table provides sex-wise distribution of workers by category for the urban areas of the district. The percentage of total workers in urban areas constitute 33.2 per cent. The statistics on town areas point out that less percent of female are engaged in either main or marginal work. The percentage shown in the table is 15.0 as against 50.9 per cent of male workers. Another observation noticed is that among the marginal workers not much difference is seen between male and female proportion to the total population where the percentage accounts for 3.7 and 3.3 respectively. Among the working population, Munirabad Project Area (CT) has registered as low as 7.2 per cent of female workers in the district. The statistics given above also points out that number of non-workers in the towns are as high as 66.8 per cent in the district. Among the towns, Munirabad Project Area (CT) has recorded the highest of 72.5 per cent of non-workers in the district.

Note: Percent of Worker to total worker are given in brackets

The distribution of total workers by sex according to four industrial categories are highlighted in this table. As seen from the table, cultivators and agricultural labourers together constitute 72.8 per cent of the total workers in the district. From the above it is observed that only 24.0 per cent are engaged in other type of work. This shows that agricultural activity is still predominant in the district. The highest of 82.2 per cent of total workers in Yelbarga taluk are engaged in agricultural activity.

Note: Percent of Worker to total worker are given in brackets

The distribution of workers by economic activity is presented for the C.D. blocks of the district which includes only the rural portion. The same trend as seen in talukwise distribution is observed in this table also. If only rural areas are taken into consideration, the percentage of cultivators and agricultural labourers are little higher than as reflected in talukwise distribution. The above distribution also points out that agricultural activity is predominant in Yelbarga block where 83.7 per cent of them are involved in this activity. In rest of the blocks more than 70.0 per cent are engaged in this activity.

The sexwise distribution of workers by economic activity is presented for the urban agglomeration/towns in the district. Total number of workers including main and marginal workers constitute 33.2 percent. The cultivators and agricultural labourers constitute 5.0 and 15.0 per cent respectively. Urban population engaged in other works accounts for 74.7 per cent. Among the towns, except Koppal (TMC) and Munirabad Project Area (NAC), in rest of the towns more than 20 per cent of urban population hold agricultural activity as their occupation.

As regards to other workers, except Yelbarga (TP) in all other towns more than 70 per cent of the population are engaged in this work. The highest of 96.1 is being reported from Munirabad Project Area (NAC).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47 :

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

***** Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the Household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transportcommunication includes bus service, rail facility and navigable waterways.

The above table highlights the number of villages having different type of amenities. The statistics given above points out to the fact that good number of villages are not provided with basic amenities. Power supply is the only facility available to all the inhabited villages in the district. As far as improved drinking water facility is concerned, though all the villages in the district have one or the other source of drinking water, the improved drinking water can be taken into consideration only if the water is supplied through tap or a hand pump/tubewell. Accordingly 578 or in other words 97.3 per cent of the villages have this facility. Some 97.6 per cent of the villages are provided with educational facility. Access to healthcare services needs improvement on a larger scale. In all only 47.3 percent of the villages are privileged to have access to medical facility. Some 73.9 per cent of the villages can be approached through pucca roads. Though the table reveals that 84.2 per cent of the villages have transport communication facility, there are villages which are yet to be connected with transport facility. Less than 40 per cent of the villages have facilities like post office, agricultural credit societies and banks. Among the C.D. blocks, the villages in Gangawati are better provided with more amenities than other three blocks in the district.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Rural population that are served by different amenities in the villages have been presented in the above table. It is the power supply which is available to 100 per cent of the population. Next in line is improved drinking water, education and transport communication which is available to 99.0, 99.9 and 93.7 per cent of the population. More than 70 per cent of the population are benefited by telephone, pucca road, medical and post office facilities. With regard to banks and agricultural credit societies facilities, less than 40 per cent of the population are provided with.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of		Distance range of place from the villages where the amenity is available			
		Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1		2	3	4	5
1.	Education :-				
	(a) Primary School	17	-	-	17
	(b) Middle School	193	10	-	203
	(c) Degree College	36	111	444	591
2.	Medical:-				
	(a) Hospital	39	110	426	575
	(b) PHC	139	318	96	553
3.	Post Office	284	87	9	380
4.	Telephone	108	90	36	234
5.	Bus Service	104	19	4	127
6.	Banks				

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
(a) Commercial Bank	168	248	125	541
(b) Cooperative Bank	35	110	436	581
7. Agricultural Credit Societies	136	225	153	514

Certain amenities are not available within the village. In such cases data on distance where these are available in ranges are given in the above table. Out of 594 inhabited villages only 17 villages do not have primary schools. Yet, for these villages, the facility is available at a distance of less than 5 kilometers. Similar is the case with middle school, where 203 villages do not have this facility. For these villages, the facility is available at less than 5 kms and 5-10 kms. With regard to degree colleges, for most of the villages, the college is at a distance of 10 kms and above.

As far as medical facility is concerned, maximum number of villages have been reflected in the table under the three different ranges. Hospitals are not available in only 19 villages. Only 41 villages have PHCs within its limits. For the rest of the villages, the facility is scattered at a distance of less than 5 kms, 5-10 kms and more than 10 kms. Post office is less than 5 kms away for 284 villages, 5-10 kms away for 87 villages and it is more than 10 kms away for 9 villages. With regard to facilities like telephone and bus service, most of the villages have this facility within 5 kms reach. As far as bank and agricultural credit societies are concerned, the table exhibits a different picture revealing not many villages have this facility. However it is reachable at a distance of less than 5 kms, 5-10 kms and more than 10 kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

The villages have been arranged according to the distance in ranges from the nearest statutory town. Majority of the villages are little far from their nearest town. Particularly 249 and 322 villages are situated at a distance of 5-15 kms and 16-50 kms respectively. For 4 villages the distance could not be specified. The distance from the nearest statutory town to the village has been correlated with type of amenities available as per 2001 census. Irrespective of the distance, villages do not have certain amenities.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The rural population has been arranged with reference to ranges and the different amenities available under each range is given in the above table. Villages with population ranging between 5,000-9,999 and 10,000+ have most of the facilities. Irrespective of the size of the population of the village, certain amenities like post offices, banks and agricultural credit societies are not within the reach.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of C.D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable
1	2	3	4	5	6
1	Yelbarga	138	143,433	87.2	12.3
2	Kushtagi	164	128,509	87.4	7.4
3	Gangawati	148	126,332	73.4	43.2
4	Koppal	144	132,459	71.1	20.6
	District Total:	**594**	**530,733**	**80.0**	**19.6**

Note : - Cultivable area = irrigated area + unirrigated area

The land use data as per 2001 census presented in the above table takes into consideration only the cultivable area of the rural district. The cultivable area given in the table includes both irrigated and unirrigated areas. As such the cultivable area of the rural portion comprises of 80.0 per cent of the total area. Among the C.D. blocks, the highest percent of area available for cultivation is in Kushtagi and Yelbarga, works out to 87.4 and 87.2 per cent respectively. In rest of the two C.D. blocks the percentage works out to more than 70.0. Total irrigated area accounts for 19.6 per cent to total cultivable area and 43.2 per cent of the total cultivable area have been brought under irrigation in Gangawati, which is highest in the district.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class,	name & urban status of the Town	Per capita receipt			Per capita expenditure					
			Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1		2	3	4	5	6	7	8	9	10	11
1	I	Gangawati (CMC)	290	41	243	280	83	-	92	0	102
2	II	Koppal (TMC)	257	28	230	229	127	-	3	6	93
3	III	Kushtagi (TP)	249	19	230	155	55	-	41	3	56
4	IV	Yelbarga (TP)	626	10	616	201	145	7	37	2	11
		Total	**296**	**33**	**260**	**246**	**96**	**1**	**56**	**2**	**89**

The total per capita receipt of this urban district is Rs. 296.0 and the total per capita expenditure is Rs 246.0 The receipts are mainly from source other than taxes, which is Rs 260.0 through taxes it is 33.0.

With regard to expenditure, the per capita expenditure is mainly on general administration which is Rs. 960 and Rs 89.0 is spent on other's expenditure. The public works expenditure is Rs. 56.0.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Gangawati (CMC)	5.7	3.1	0.9	0.4	0.5
2	Koppal (TMC)	3.2	2.0	0.9	0.5	0.4
3	Kushtagi (TP)	5.7	4.2	1.9	0.5	0.9
4	Yelbarga (TP)	7.0	7.0	2.6	1.7	0.9
	District total	**5.0**	**3.1**	**1.1**	**0.5**	**0.5**

The town wise educational institutions per 10,000 Populationis given in the above table. The urban district have 5 primary schools per 10.000 population, 3.1 Junior Secondary/ Middle, 1.1 secondary/ Matriculation, 0.5Senior secondary and 0.5 collage. Among the towns Yelbarga (TP) has higher ratio in regard to all Institutions.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Gangawati(CMC*)	14
2	Koppal (TMC)	5
3	Kushtagi (TP)	24
4	Munirabad Project Area (CT)	-
5	Yelbarga (TP)	26
	Distrct Total	**69**

There are 69 beds per 10,000 population for the district urban. Yelbarga TP has the highest ratio at 26 beds per 10,000 population followed by Kushtagi (TP) with 24 beds. The statutory town of Koppal TMC has a low ratio of 5 beds and the non statutory Census Town of Munirabad Project Area has 0 beds per 10,000 population.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Gangawati	101,392	36,886	36.4
2	Koppal	56,160	8,580	15.3
3	Kushtagi	21,183	5,325	25.1
4	Yelbarga	11,442	3,790	33.1
	District Total	**142,132**	**54,581**	**28.7**

Slum population has been reported from 4 towns of the district, this works out to 28.7 per cent of the slum population to the total urban district population. The lowest slum population is reported from Koppal TMC with 15.3 per cent of slum population and the highest at 36.4 per cent reported from Gangawati CMC.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Gangawati (CMC*)	Sugar Jaggery Sooji	Rice Sugar Jaggery
2	Koppal (TMC)	Groundnut-Oil	Groundnut Oil Maize H.Jowar
3	Kushtagi (TP)	Cotton Groundnut-Oil	Bajra Groundnut Oil Maize
4	Munirabad Project Area (CT)	-	-
5	Yelbarga (TP)	Groundnut-Oil	Groundnut Oil Grams Moong

Different types of commodities are manufactured and exported from the district. Agricultural commodities are the common and production and export of Groundnut oil is reported from three of the towns, Koppal TMC, Kushtagi TP, and Yelbarga TP. Town wise details are given in the above table.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48 to 52.

Table 48 gives the distribution of households by tenure status and the number of dwelling rooms occupied by them. The data presented in this table is for general, as well as Schedule Castes and Schedule Tribes. It can be seen that households dwelling in one and two rooms constitute more in number than households with 'No exclusive room'. Majority of the households live in their own structure with one and two rooms. Same scenario can be seen in rural areas. The living conditions of the urban households in Koppal is somewhat better as the table shows that only 929 do not have exclusive room. Same is the condition with Schedule Tribes. The median number of rooms is 1 in the district. It is calculated as 2 in urban areas and 1 in rural areas for all type of tenure status. As far as Schedule Castes and Schedule Tribes are concerned, the median number of rooms for the district is 1 both in urban and rural areas.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

		25.9	**40.2**	**33.8**	**17.5**	**35.9**	**29.5**	**8.4**	**4.3**	**4.3**

The table above highlights the percentage distribution of households living in the houses defined as per census concept in the district. The census houses occupied by the households for fully and partly residential purpose have been classified into permanent, semi-permanent and temporary. The households living in permanent structure constitute 25.9 percent, semi-permanent constitute 40.2 per cent and temporary structure constitute 33.8 percent. Households living in permanent building is less in the district than semi-permanent and temporary structure. The same trend is seen in rural areas. On the other hand in urban areas, households with permanent material is higher than semi-permanent and temporary structures.

Percentage of households having improved drinking source, electricity, bathroom, toilet and proper drainage facility will throw light on the living conditions of the people. Improved drinking water and electricity are available to 92.6 and 67.1 per cent respectively. Proper sanitation facilities like bathroom, toilet and drainage is available to less than 50 per cent of the households. The rural urban comparison reveals that urban households have more accessibility to these facilities than rural households. Talukwise details can be seen in the table.

The above table provides data on the households using different types of fuel for the purpose of cooking. The rural households in the district use mostly firewood 86.7 per cent and crop residue 8.7 Per cent and 3.0 per cent use L.P.G.. Uses of other types of fuel are negligible. As far as urban households of the district are concerned 65.5 per cent used firewood, followed by 21.7 per cent using LPG and 7.2 per cent use kerosene. The data is presented talukwise for the district.

The above table provides data on households availing banking facility and possessing specified assets. In terms of percentages, 27.0 per cent of the rural Households,of the district avail banking facilities. The urban Households availing the facility works out to 41.8 per cent. Large disparity between rural and urban Households having T.V and scooter/ M.C may be noted. 13 per cent rural Households posses TV compared to 42.3 per cent of urban House holds.The rural Households possessing Scooter/MC works out to 5.5 per cent compared to 17.4 per cent of urban Households.

(xi) Archaeology

The district has been the abode of man since very early times. The district has few sites of prehistoric remains unearthing prehistoric culture. These sites are located at Gangawati and Koppal taluks. The district is also famous from epigraphical point of view. Inscriptions in different languages like Sanskrit, Prakrit, Kannada, Arabic and Persian belonging to almost all the dynasties that ruled over the Deccan were found in the district. Especially the Ashokan edicts of a different version, discovered at Gavimatha and Palkigundu hills, near Koppal is worth mentioning. Archaeological Survey of India protects these discoveries. To the west of Palkigundu, there is a hillock called the Mali Mallappa hill where number of dolmens were found on top of the hill. Some of these dolmens, which are locally called 'Moriyara-angadi', were found intact while others are disturbed. As dolmens are generally found at the foot of the hill, their existence on top of the hills is perhaps considered to be rather unusual. Another most important architectural remains of the district are the temples at Kuknur and Itgi in Yelbarga taluk. These temples contain some excellent specimens representing the later phase of the Chalukyan architecture. This paved the way for the emergence of Hoysala School of architecture, and it is believed that these developments must have flourished around 1000 A.D. and 1300 A.D. The temples of Kuknur

bare the earliest example of depicting the initial character of the movement as well as the transition between 'early' Chalukyan and 'later' Chalukyan type. Of the temples found in the taluk, the oldest structure is called the Navalinga group. It consists of a cluster of nine cells connected with one another by mantapas. The structure resembles the ramparts of a fort. The temple at Kalleshvara is another example of Chalukyan architecture. This structure is said to be similar to the Navalinga shrine. Another important archaeological interest is the Mahadeva temple at Itagi. A mediaeval Kannada inscription in the temple states that, Mahadeva, a General of the western Chalukyan king Tribhuvanamalla Vikramaditya VI, constructed the temple during 1112 A.D.. This temple is said to be one of the best in the country both in its magnificent architecture style and luxuriant decorative detail. This temple is a protected monument and is managed by the Archaeological Survey of India. The fort at Koppal is another interesting monument of historical importance. It is said that this fort was acquired by Tippu Sultan in 1786 A.D. from a Paleyagar and with the help of French engineers he rebuilt it into one of the strongest fort in the region. The fortification consists of two forts and is situated on a lofty and isolated hill, which is about 400 feet above the plains. Its strength lies mainly in its inaccessibility except by a flight of very crude and rough steps, which are in some places extremely narrow and dangerous. Amongst the other archaeological remains, it is worth mentioning about the remains of some magnificent buildings of the Vijayanagara days that are still traceable at Anegundi. Fine specimens of the contemporary work can be seen on the pillars of the Oncha- Appa Matha and in the sculptural details of the Ganesha temple. There are also some fresco paintings, belonging to the early Rajput style on the ceiling of the matha.

(xii) Brief description on places of religious, historical or archaeological and tourist importance

Anegundi (Gangawati Taluk) : Being identified as a part of Kishkindha, the capital of Vanara Kingdom mentioned in Ramayana, this ranks among the most ancient place in the district. Anegundi literally means the "Elephant pit" and place got its name, because the Vijayanagar emperors used by to keep their war elephants at this place. There are remains of some magnificient buildings of the Vijayanagara times. Oncha Appa Matha here has beautifully carved pillars of jet black basalt and some good paintings on the ceilings. The Pampa Sarovara, Kamal Mahal and Nava Brindavana (which has Samadhis of some saints) are situated nearby. An old fort and the old temples of Ranganatha and Jayalakshmi are also of considerable interest.

Benkal (Gangawati Taluk) : This is a site of pre-historic culture consisting of dolmens, cromlechs, remains of an iron smelting factory and some paintings. Dolmens here are of special interest being cubic in form and made out of six stone slabs, each acting as support for the other.

Kanakagiri (Gangawati Taluk) : Known as Swarnagiri in former days, this place was probably the headquarters of the Southern Vice royalty of the Mauryan empire. During the Vijayanagara period, this was the chief town of principality of Beda Rajas founded by Parasappa Nayaka. These rajas have built several temples of which the Kanakachalapathi temple is a large one. This has spacious halls and massive pillars and is a fine specimen of South Indian architecture of Vijayanagara times.

Pura (Kushtagi Taluk) : This place is noted for the fine and spacious temple of Someshwara, which has Koti lingas. Annual *Jatra* is held during *Shravana.*

Kuknur (Yelbarga Taluk) : The *Sthala Purana* identifies this village with Kuntalapura connected with Chandrahasa of the Mahabharata days. Being as important place from the ancient days, the village contains the remains of the later Chalukyan buildings (8^{th} to 13^{th} century A.D). The group of temples known as Navalinga group represents early Chalukyan art. Kalleshwara temple is a fine structure of the Chalukyan period and is in a good condition. Many inscriptions have been found in the temples of this place. From religious view point the temple of Mahamaya is the most important one. Kuknur was an important centre of *Shakta* sect during the 12^{th} century A.D. This was a major agrahara and also the headquarters of a small regime called Kuknur-Thirty. The inscriptional evidence indicates that this village contained a few Jain and Veerashaive temples also.

Itagi (Yelbarga Taluk) : This place is famous for the Mahadeva temple which is one of the finest specimens of the later Chalukyan architecture. The pillared hall seems to have been supported originally by 68 pillars of which 26 were large. Inscription in medieval Kannada verse set up in a hall adjacent to the temple states that the temple was built in the 1112 A.D. by Mahadeva, a general of Tribhuvanamalla Vikramaditya VI of Itage western Chalukyan dynasty and praises the temple as Devalaya Chakravarti (emperor among the temples).

Yelbarga : Yelbarga is a place of some historical interest, formerly known as *Erambargi* or *Yerambarge.* In ancient days it was the capital of the Sinda chiefs. However the town does not have any interesting relics of its past glory.

Kushtagi : Kushtagi is a noted commercial center and the place is known for the largely attended fair held in honour of Advieswari.

Gangawati : Gangawati is also known as Neelavati in ancient days. Anegundi, a place of historical interest is situated quite close to this town. Ever since the Tungabhadra Reservoir Project was commissioned, Gangawati gained in importance as it became the centre of developmental activities and has an agricultural research station.

Koppal : Koppal was known as Kopananagara in the ancient and mediaeval historical periods and was an important Jaina centre. This was the capital of the Silaharas and also known to have been patronised by the Gangas of Talkad who professed the Jain faith and later on by the Chalukyas of Kalyana. Numerous inscriptions and Muslim chronicles abound in reference to this place. In the famous Kannada work, *Kavirajamarga*, this place is referred to as *Vidita Maha Kopana Nagara* and in certain other records it has been called *Adi-tirtha* and *Maha-tirtha* testifying to the sanctity associated with it. This town is reported to have contained as many as 772 Jaina basadis and 24 Jaina Sanghas. Ashokan edicts have also been discovered here. The town is located at the foot of a rocky and fortified hill. The hill ranges close to the town have spurs, locally known by such names as Palakigundu, Gavimatha, Bahadur Bande etc, and there is a hillock called Mali-Mallappana-Betta. On the top of Mali-mallappana-betta there are several dolmens. The fields between Palakigundu and Mali-mallappana-betta are known as Pandavara Vathara, Gavimatha contains four caves and a modern temple. One of the Ashokan edicts is on the Palakigundu and the other is on the Gavimatha spur. The fort is an important object of historical interest. Though it is not clear when it was built first, it is known that it was acquired in 1786 A.D. by Tipu Sultan and was got completely rebuilt with the help of French engineers. Thereafter the fort became on of the strongest forts of his times. In 1790, when the British and the Nizam besieged it, the fort withstood the European artillery attack for six months and remained impregnable. Koppal finally capitulated not on account of the might of the attacking forces but because of the news about the occupation of Bangalore by the British, which was received at this juncture. During 1855, Bhima Rao Nadagudd took possession of Koppal and occupied it for a brief period. Along with his accomplices he was finally killed during the battle that ensued. The fortification here consists of two parts. The upper fort is situated on a lofty and almost isolated summit in a gorge on the eastern side of a cluster of rocky hills.

Munirabad Project Area : Munirabad Project Area is a new township, which emerged when the work relating to the Tungabhadra Reservoir Project was taken up during the latter half of the 1940's. The Left Bank Canal starts from a place nearby. On the completion of the Project work the major portion of the working force deserted the place and the township has now only the maintenance staff associated with the project. This neighborhood is humming with industrial activity and there is a sugar factory as well. A Japanese style ornamental garden laid out here is an added attraction for the tourist who would have a fascinating view of the vast sheet of water stored in the Tungabhadra reservoir.

(xiii) Scope of Village Directory and Town Directory

Village Directory

Village Directory provides micro-level data which will help the planners in formulation of micro-level developmental plans as the C.D.Block is the lowest administrative unit for developmental planning. Village wise information regarding the availability of certain

basic amenities and facilities within the village, as also that on the manner of utilization of the land in the concerned village are furnished in the village directory. The village directory format adopted for the 2001 Census has 23 columns whereas in the 1991 Census there were only 18 columns. When compared with the 1991 Census Village Directory format, column 9 which refers to the day or days of weekly market/ hat if any has been now left out. New inclusions are in respect of facilities like banks, agricultural credit societies, non-agricultural credit societies, other cooperative societies, number of recreational and cultural facilities like cinema/video hall, sports club, stadium/auditorium; receipt of news papers/magazines and the name of the most important commodities manufactured in the village. In all the 23 columns in this tabulation statement, first 3 columns relates to serial number, name of the village with location code and area of village while the next 2 provide information on total population and number of households in the village as per 2001 Census. The next 8 columns relate to basic amenities such as educational; medical; drinking water (potable); post, telegraph and telephone, commercial and cooperative banks, agricultural, non-agricultural and other credit societies, number of recreational and cultural facilities such as cinema/ video hall, sports club and stadium/auditorium and communications (bus service, railway station, waterway). Information in respect of approach to village, nearest town and distance in Kms., power supply, receipt of news paper/magazine, names of the most important commodities manufactured in the village are furnished in columns 14 to 18. Amenities available within the villages are shown in the respective columns and if a particular amenity especially Primary School, Middle School, College, Allopathic Hospital, PHC, MCW, Post Office, Telephone, etc., is not available in the village, the respective abbreviation is given and next to it in brackets the distance in broad ranges viz., <5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility available to that particular village is indicated. The next 5 columns, 19 to 23 provide information regarding land use (i.e., area under different types of land use in hectares rounded to two decimal places) such as forest, irrigated land by source of irrigation, un-irrigated, cultivable waste (including gauchar and groves) and finally the area not available for cultivation.

Town Directory

The Town Directory section contains seven statements (I to VII) which furnish information on all the statutory towns in the district, on aspects such as growth history, physical aspects and location of towns, municipal finance, civic and other amenities in the town, medical, educational, recreational and cultural facilities, trade, commerce, industry and banking in the towns, civic and other amenities in slum areas of the town. The scope of the various column headings adopted during 1991 Census has remained unchanged in 2001.

Note :

1. The area figure for the district given under column No 3 against " Total" represents "Geographical Area" and has been furnished by the Surveyor General India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D. Blocks/Taluks in this district will not tally with the district figures (except urban), because the area figures for C.D. Blocks/Taluks represents the land-use area based on village wise area figures as reported by the local officers. The total area of the taluk may not tally with the aggregate of the areas of the villages listed for Census purposes for it includes the area of the statutory as well as non-statutory towns, villages which may be fully submerged and reserve forests which may not form part of any revenue village, if any, within the jurisdiction of the concerned taluk. The total area of the C.D. Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2. Out growths of towns in urban agglomerations are denoted by letter "OG".

3. The following abbreviations have been used to indicate the Civic Administration Status of town.

M.Corp	:	*Municipal Corporation*
CMC	:	*City Municipal Council*
TMC	:	*Town Municipal Council*
TP	:	*Town Panchayat*
NAC	:	*Notified Area Committee*
CB	:	*Cantonment Board*
CT	:	*Census Town (Non-Municipal Census Town / Non-Statutory Town)*

SECTION – I

VILLAGE DIRECTORY

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column are for the village are as follows:-

Columns 1 & 25: Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 &24: Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab,etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the

distance of the nearest place where such facility exist is given

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(with electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Blockwise of the district.
Appendix-IA	Indicates number of villages C D Blockwise having one or more primary schools.
Appendix-IB	Indicates number of villages C D Blockwise having primary, middle and secondary schools.
Appendix-IC	Shows number of villages C D Blockwise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-IIA	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / Non-municipal Towns.
Appendix-IV	C D Blockwise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII	The appendix shows the list of villages according to proportion of the
A, VII B	Scheduled Castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Blockwise number of villages under each Grama Panchayat..
Appendix-IX	Shows number of different types of girls school in a village.

TOWN DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified AreaI	NA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/ Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Grama Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 6) : Self explanatory

Column (7) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories- Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 :

Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes

populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued

and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Cenus Abstract	Level of presentation
1. District Primary Census Abstract	District/CD Block/ UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CD Block/ Town
3. Primary Census Abstract for Scheduled Tribes	District/CD Block/ Town
4. Village Primary Census Abstract	CD Block/ Villagewise
5. Urban Primary Census Abstract	Town/Ward Level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the taluks/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

NOTE ON FERTILITY & MORTALITY AND MIGRATION - 1991 & 2001 CENSUS

Fertility levels

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to Karnataka state and are defined as below:-

Migration

What is Migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another state of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why people migrate?

As in 1981 census, the reasons for migration were elicited in 1991 and 2001 census also. The reasons for migration were broadly categorized as (1) employment (2) business (3) education (4) family moved (5) marriage (6) natural calamities like drought, floods etc. and (7) other reasons. Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

ANNEXURE III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

Sl. No	State/District	GFR	GMFR	TFR	TMFR	CBR	No. of children ever born per ever married women in age-group 45-49	Child - Women ratio (0 - 4)	Mean Age at Marriage

27	Chamarajnagara	118	156	3.56	5.20	29.72	4.14	416	17.1

Marriage and age at marriage are important social phenomena and crucial factors in the analysis of the dynamics of fertility. As such, various measures of fertility estimated based on these crucial factors are highlighted in the above table.

Estimates of General Fertility Rate (GFR) a refined measure of fertility, defined as the number of live births per thousand women in the reproductive age-group 15-49 years is a useful tool for measuring fertility, and this rate is further estimated only for the married women which is defined as General Marital Fertility Rate (GMFR). The GFR and GMFR for the district are 152 and 183 respectively.

The cumulative value of the age-specific fertility rates at the end of the child bearing ages gives a measure of fertility known as Total Fertility Rate (TFR). It indicates average number of children expected to be born per woman during her entire span on reproductive period assuming that the age specific fertility rates to which she is exposed to, continue to be the same and there is no mortality. The same is expected for married women known as Total Marital Fertility Rate (TMFR). The estimated TFR and TMFR for the district are 4.65 and 5.71 respectively. The Crude Birth Rate (CBR) is 34.70.

The most useful indices that can be derived from the question on number of Children born alive is the average number of children ever born per ever married women by age-group. Since most of the women complete their reproduction be the age-group 45-49, this indices is termed as completed fertility. The category ever married includes widows, divorced

and separated women. As such the completed fertility for the district is 4.36. The child women ratio which is a relative measure to know the fertility performance of a women is 608 in the district.

One of the parameters, presenting female age at marriage relates to all women who live with their husbands, where some of them might have been recently married and some of them decades ago. It can be observed that mean age at marriage of the currently married women of Koppal district is lower than the state figure of 18.00.

27	Chamarajnagara	57	75	81	89	57	86	92	97	58	64	75	86

The estimates of mortality indicators presented above have been obtained through indirect estimation using the data on the number of children ever born and number of children surviving to ever married women. The information on questions on children ever born and children surviving canvassed for all ever married woman have been tabulated by the age of the mother. This data has been converted into estimates of probability of dying before attaining a given age. These estimates have been worked out using Brass technique where (q_i) is the probability of a newborn child dying before the age i = 1, 2, 3 and 5. The table above shows the estimates of infant and child mortality derived for the year 1991 by sex.

The infant mortality rate (q_1) for the person is 59 and for male and female are 58 and 52 respectively. The estimates of under 5 mortality (q_5) for person is 80 and for male and female are 79and 84 respectively.

Source : Migration Tables of 1991 & 2001 Census

The Anenxure IV(!) presents data on migrants data on migration by their place of birth. The majority of migrants are those who are born within the state of enumeration, which constitute 92.55 per cent as per 2001 Census. Among them, migrants born elsewhere in the district are larger than migrants born in other districts of the state. Considerable proportion of population from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (2) - PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF LAST RESIDENCE

Sl. No.	Place of Last Residence	1991 Census			2001 Census		
		Persons	Males	Females	Persons	Males	Females

Source : Migration Tables of 1991 & 2001 Census

The Annexure IV(2) presents data on migration by their place of last residence. As far as the district is concerned, it can be seen that migrants whose place of last residence was within the state of enumeration but outside the place of enumeration, constitute major proportion of migrant population. As per 2001 Census, their percentage accounts for 93.01. Among them, more is the inflow from within the district. Considerable proportion from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (3) - INTERSTATE IN-MIGRATION TO DAKSHINA KANNADA DISTRICT

Place of Birth	1991 Census		2001 Census	
	Migrants	Percentage of total migrants	Migrants	Percentage of total migrants
1	2	3	4	5
Andhra Pradesh	59,301	85.95	15,132	77.15
Goa	40	0.06	-	0.00
Kerala	1,220	1.77	-	0.00
Maharashtra	2,670	3.87	792	4.04
Tamil Nadu	2,820	4.09	1,110	5.66
Rajasthan	-	0.00	1,181	6.02
Haryana	-	0.00	320	1.63
Total for 5 states	66,051	95.74	18,535	94.49
Other states	2,940	4.26	1,080	5.51
Total	**68,991**	**100.00**	**19,615**	**100.00**

The interstate in-migration to the district by their place of birth provided above, highlights the States with the largest contribution of migrants to the district. According to 2001 Census findings, majority of migrants are from Andhra Pradesh which accounts for 77.15 per cent. Migrants from Maharashtra, Tamilnadu and Rajsthan include 4.04, 5.66, and 6.02 per cent respectively. Haryana have also reported which is marginal. Further the category migrants from 'Other States' has increased from 4.26 per cent in 1991 to 5.51 per cent in 2001.

Rural-Urban components of migration

The flow of migrants consists of four streams viz., rural to rural, rural to urban, urban to rural and urban to urban. The data on the basis of these streams in case of migrants classified by place of birth. It represents data only in relation to internal migrants. The data for Dakshina Kannada district is presented separately.

ANNEXURE-IV(4) RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH - 1991 & 2001 CENSUS

Place of Birth	Place of Enumeration-1991			Place of Enumeration-2001		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1. Within the state	438,189	327,099	111,090	252,905	192,979	59,926
	100.0	74.6	25.4	100.0	76.3	23.7
2. In other states of India	68,991	47,695	21,296	20,276	14,079	6,197
	100.0	69.1	30.9	100.0	69.4	30.6

Rural and urban composition of internal migrants by their place of birth is provided in the above statement. The data for both the Census points out that majority of migrants within the State as well as from other states of India have migrated to rural areas of the district. The details can be seen from the Statement.

ANENXURE - V

Brief account on Main Religions in the District / Taluk as per 1991 & 2001 Census

Religion forms an integral part of Indian Social System. For an Indian, it is a way of life rather than a faith. Indian Census, since its inception is collecting data on religion and presenting the same in its reports. In the pre-independence Census reports, the data on religion was being presented for 6 major religions viz., Hindus, Muslims, Christians, Sikhs, Jains and Buddhists. Besides, the minor religions have been classified under the category of 'Others'. The data on religion collected and presented by the Indian Census is the basic data of immense use for the researchers, anthropologists, sociologists, demographers, administrators, planners and even for a common man.

ANNEXURE V(1) - PERCENTAGE DISTRIBUTION OF POPULATION BY MAJOR RELIGIONS IN INDIA AND KARNATAKA DURING 1991 & 2001 AND ITS GROWTH RATE DURING 1981-1991& 1991-2001

Sl. No.	Religion	India				Karnataka			
		Percentage of Population during 1991	Percentage growth rate 1981-1991	Percentage of Population during 2001	Percentage growth rate 1991-2001	Percentage of Population during 1991	Percentage growth rate 1981-1991	Percentage of Population during 2001	Percentage growth rate 1991-2001

India - State differentials

The comparative data of the country and the state of Karnataka presented in Annexure V(i) reveals that the religion wise concentration of population in the state of Karnataka is of three major religions viz., Hindus, Muslims and Christians. Hindus are returned on the higher side with over three per cent more than the national average. Christians recorded nearly one per cent less whereas the proportion of Muslims in the state to national population was almost the same. There are 85.5 per cent Hindus, 11.6 per cent Muslims and 1.9 per cent Christians in Karnataka as against that of 82.4 per cent Hindus, 11.7 per cent Muslims and 2.3 per cent Christians in India. In regard to concentration of other three major religions viz., Sikhs, Buddhists and Jains it is observed that Jains with 0.7 per cent form the fourth major religion in the state whereas Buddhists with 9.8 per cent is the third major religion in India. In the Indian scene the Sikhs form fifth major group, whereas in Karnataka, Buddhists and Sikhs are placed fifth position.

Religion wise growth in the state during the decade 1981 - 91 reveals that the major religions viz., Hindus, Muslims and Christians recorded a growth rate in lesser degree i.e., 20.7 per cent, 25.7 per cent and 11.1 per cent respectively, against that of 22.3, 26.1 and 16.9 per cent in India as a whole. On the other hand Buddhists, Sikhs and Jains recorded a growth rate of 72.8 per cent, 57.8 per cent and 14.6 pecent respectively for the state against that of 34.0, 24.2 and 3.9 per cent respectively for India. Thus, the Jains recorded a higher growth of nearly 11 per cent in the state than that of India as a whole during the decade 1981 - 91.

Percentage distribution of population during 2001 Census, by major religions in India and Karnataka shows that Hindus form majority of the population

with 80.5 and 83.9 per cent respectively, while Muslims form 13.4 and 12.2 per cent for the country and state respectively. The proportion of these religions for the country and state, during 1991 Census was 82.4 per cent and 85.5 per cent for Hindus and 11.7 and 11.6 per cent for Muslims. There are not much noticeable changes are found in other religions. Persons who have not reported to which religion or faith they belong to has increased in Karnataka, as its proportion to the total population has increased from 0.1 per cent in 1991 Census to 0.3 per cent during 2001 Census.

The above table furnishes the composition of six major religions along with 'Other Religions' and 'Religion not stated' among the districts of the state during 2001 Census along with 1991 Census. As may be seen from the table that the proportion of population to total population during 2001 Census is below 5 per cent for 23 districts of the state and is between 5-10 per cent in 3 districts. Only Bangalore district has the distinction of having more than 10 per cent of the total population of the state in its jurisdiction. During 1991 Census the situation was almost similar with 22 districts having a proportion of less than 5 per cent and 4 districts had more than 5 per cent but below 10 per cent. With 10.76 per cent of the total population Bangalore district occupied the top position.

Of the total population of the state, proportion of districts having Hindus and Muslims was uniform during both the Censuses i.e. less than 5 per cent of the total population in 21 districts for Hindus and 23 districts for Muslims, while in 5 and 3 districts respectively for Hindus and Muslims had a proportion of 5-10 per cent and Bangalore district alone had more than 10 per cent.

ANNEXURE V(3) - PERCENTAGE AND DISTRIBUTION OF POPULATION BY MAJOR RELIGION IN KARNATAKA AND KOPPAL DISTRICT - 1991 & 2001

Religion	Karnataka				Koppal			
	1991		2001		1991		2001	
	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
1	2	3	4	5	6	7	8	9
Hindus	38,432,027	85.50	44,321,279	83.86	844,048	88.10	1,042,294	87.14
Muslims	5,234,023	11.60	6,463,127	12.23	107,218	11.19	137,174	11.47
Christians	859,478	1.90	1,009,164	1.91	4,002	0.42	4,083	0.34
Jains	326,114	0.70	412,659	0.78	1,823	0.19	2,649	0.22
Buddhists	73,012	0.20	393,300	0.74	30	0.00	99	0.01
Sikhs	10,101	Ng	15,326	0.03	43	0.00	120	0.01
Others	6,325	Ng	115,460	0.22	21	0.00	4,275	0.36
Religion not stated	36,121	0.10	120,247	0.23	893	0.09	5,395	0.45

The percentage distribution of population by major religion in Karnataka and Koppal district for 1991 and 2001 Censuses are presented in the above table. As may be seen from the table that in Karnataka, Hindus form 85.5 and 83.86 per cent of the total population during 1991 and 2001 Censuses, followed by Muslims and Christians. The corresponding statistics for the district does not differ much as Hindus and Muslims occupy the top two places followed by Christians. These three religion cover more than 90 per cent of the total population of the district. Remarkable increase in the proportion of Buddhists population has been noticed between 1991 and 2001 Censuses in the State.

Distribution of major religion by residence for the State and district are presented in the above statement. Majority of Hindus, Jains, Buddhists and those who have not stated their religion are residing in rural areas of the State during both the Censuses. While population belonging to Muslim, Christian and Sikh religion reside in urban areas of the State. Almost similar trend is seen in the district. As per 2001 Census data, while majority of Hindus, Muslims, Buddhists, Sikhs and those who have not stated their religion reside in rural areas, majority of Christians and Jains reside in urban areas. A comparative data for 1991 Census is provided in the annexure.

Note: A: Actual; P: Percentage

Talukwise distribution of population following major religion is presented above. As far as the district is concerned, majority of the population follow Hindu faith in all the taluks. This is followed by Muslims and Christians in Koppal district. A comparison between 1991 and 2001 Census data expose marginal variations in different faiths persuaded by the population during the decade.

Note: The data on marital status is being tabulated upto district level only. As such the data for newly created districts could not be recalibrated for 1991 Census. Hence the data of unbifurcated districts are presented for the newly created districts also.

It may be seen from Annexure VI that the percentage of "Never Married" population accounts for 49.24 per cent and 52.45 per cent at state and district levels during 2001 Census, while the same was 43.67 per cent and 0 per cent during 1991 Census. Similarly the percentage figures of the district for Married, widowed and Divorced or Separated are 41.71, 5.54 and 0.31 per cent during 2001 Census. Comparative data for 1991 Census is also furnished in the table for ready reference. The percentage variation of all the marital categories between rural and urban is marginal in both state and district population.

The level of education by sex for the district and the State during 1991 and 2001 Census are presented in the above annexure. It can be seen that percentage of illiterates during the decade has decreased vis-a-vis for the State and the district. The male literates out number female literates. The different educational level attained by the population can be seen in detail in the above annexure.

ANNEXURE - VIII

Distribution of different Mother Tongue returned during 1991 & 2001 Census

As a part of census publication program the data on spoken languages/mother tongues will be presented under C series. The table C-7 shows the distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each for district, with total, rural/urban and male/female break ups. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table divided into Part A - scheduled languages with the mother tongues grouped under each and Part B - Non-scheduled languages with the mother tongue grouped under each. The definition of 'Mother Tongue' is the same as in 1991 Census. The instructions to the enumerators in regard to this question read as under:

Record Mother Tongue in full, whatever be the name of the language returned by the person enumerated. The definition of Mother Tongue is the same as in 1991. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the Mother Tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded".

As the above instructions to the enumerators would show, the respondent was made to feel free to return the name of his/her mother tongue and the same was, recorded faithfully by the enumerators. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census are basically, the designations provided by the respondents. These designations or mother tongue labels need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects the raw returns of census were subjected to thorough scrutiny and rationalization.

The abstract of languages as mother tongues and their strenght in the district during 1991 and 2001 Census are provided below.

The statement I & II gives a clear picture of the languages spoken in the district. A closer study of 2001 Census data reveals that as many as 23 languages which returned 10,000 or more speakers are spoken in the district. The 'Other' category include Mother Tongues spoken by less than 10,000 speakers. Majority of the population speak Kannada which constitute 83.21 per cent followed by 7.73 per cent of Urdu speaking population. Among the languages not specified in the Eighth Schedule to the constitution, Coorgi/Kodagu is spoken by 0.52 per cent of population. Similar data for 1991 is provided in the annexure.

Linguistic classification of the languages

The names of the 114 Scheduled and Non-Scheduled languages falling in the five language families are given below with the Scheduled Languages denoted as (S). Of the 18 Scheduled Languages, 13 fall in the Indo-Aryan branch of the Indo-European family, 4 in the Dravidian family and one in the Tibeto-Burmese family.

1. INDO-EUROPEAN

(a) INDO-ARYAN

1. Assamese (S), 2. Bengali (S), 3. Bhili/Bhilodi, 4. Bishnupuriya, 5. Dogri, 6. Gujarati (S), 7. Halabi, 8. Hindi (S), 9. Kashmiri (S), 10. Khandeshi, 11. Konkani (S), 12. Lahnda, 13. Marathi (S), 14. Nepali (S), 15. Oriya (S), 16. Punjabi (S), 17. Sanskrit (S), 18. Sindhi (S), 19. Urdu (S)

(b) GERMANIC

1. English

2. DRAVIDIAN

1. Coorgi/Kodagu, 2. Gondi, 3. Jatapu, 4. Kannada (S), 5. Khond/Kondh, 6. Kisan, 7. Kolami, 8.Konda, 9. Koya, 10. Kui, 11. Kurukh/Oraon, 12. Malayalam (S), 13. Malto, 14. Parji, 15. Tamil (S), 16. Tulu, 17. Telugu (S)

3. AUSTRO-ASIATIC

1. Bhumij, 2. Gadaba, 3. Ho, 4. Juang, 5. Kharia, 6. Khasi, 7. Koda/Kora, 8. Korku, 9. Korwa, 10. Munda, 11. Mundari, 12. Nicobarese, 13. Santali, 14. Savara

4. TIBETO-BURMESE

1. Adi, 2. Anal, 3. Angami, 4. Ao, 5. Bhotia, 6. Bodo/Boro, 7. Chakesang, 8. Chakru/Chokri, 9. Chang, 10. Deori, 11. Dimasa, 12. Gangte, 13. Garo, 14. Halam, 15. Hmar, 16. Kabui, 17. Karbi/Mikir, 18. Khezha, 19. Khiemnungan, 20. Kinnauri, 21. Koch, 22. Kom, 23. Konyak, 24, Kuki, 25. Lahauli, 26. Lakher, 27. Lalung, 28. Lepcha, 29. Liangmei, 30. Limbu, 31. Lotha, 32. Lushai/Mizo, 33. Manipuri (S), 34. Mao, 35. Maram, 36. Maring, 37. Miri/ Mishing, 38. Mishmi, 39. Mogh, 40. Monpa, 41. Nissi/Dafla, 42. Nocte, 43. Paite, 44. Pawi, 45. Phom, 46. Pochury, 47. Rabha, 48. Rengma, 49. Sangtam, 50. Sema, 51. Sherpa, 52. Tangkhul, 53. Tangsa, 54. Thado, 55. Tibetan, 56. Tripuri, 57. Vaiphei, 58. Wancho, 59. Yimchungre, 60. Zeliang, 61. Zemi, 62. Zou

5. SEMITO-HAMITIC

1. Arabic/Arbi
