CENSUS OF INDIA 2001

SERIES-12 **KARNATAKA**

DISTRICT CENSUS HANDBOOK

Part - A & B

MYSORE DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

Directorate of Census Operations, Karnataka

F O R E W O R D

1. The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to taluk/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri.H.Shashidhar, Director of Census Operations, Karnataka. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division, Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and other who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

Motif

Kabini Reservoir in Mysore District

Kabini reservoir is built across river Kabini, a tributary to river Cauvery and is located near Beechanahally of Heggadadevan Kote taluk. Catchment area of the reservoir is 2,141.90 Sq.Km and designed to yield 97.70 Thousand Million Cubic Feet (TMC) of water. Gross storage capacity is 19.52 TMC, submerging a total area of 15,820 Acres and 140.84 Acres of Karnataka and Kerala State respectively affecting 22 villages and 14 hamlets. Canals on both Left and Right Banks have been provided.

This masony gravity dam with overflow and non over flow sections with earthen flanks on either side is 8,965 Ft long and 95 Ft high with a spillway of 265 Ft. long.

Left Bank Canal and the Right Bank Canal run a distance of 26 Kms and 202 Kms. providing irrigation to 1,214 hectares and 44,516 hectares respectively. The cost of the project is Rs. 1,102.50 Crores.

P R E F A C E

In the foreword to the 2001 series of the District Census Handbooks, Sri. D.K. Sikri, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain salient data on the population for every village and town as revealed by 2001 Census. They also contain a wealth of information regarding villages and towns which, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information is also of considerable importance in the context of planned development.

The District Census Handbook is divided into two parts: Part A contains information regarding each village and town (Village Directory and Town Directory collected from various sources) and Part B which contains the data on the population collected during 2001 Census - the Primary Census Abstract. The data published in Part B was collected during February-March 2001 in the Population Census.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in 1999. The Village Directory formats were mailed to the Deputy Commissioners of Districts for obtaining the village wise particulars through Village Accountants. Similarly the Town Directory formats were mailed to the Commissioners of Corporations, Chief Officers of Town Municipal Councils, Town Panchayats, etc. The village wise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1991 District Census Handbooks. The Household Schedules, which were canvassed to collect the population data during 2001 Census, were scanned and data captured was processed electronically. The Primary Census Abstract was generated centrally on the computers by Registrar General, India.

In compilation of the District Census Handbooks, the Census Directorate had the co-operation of various departments of the State/Central Government. The Census Directorate gratefully acknowledge their assistance.

I take this opportunity to offer my grateful thanks to Sri. H. Shashidhar, Director of Census Operations and Sri. S.R. Raghavendra Rao, Deputy Director (Retd.) for their valuable guidance. I am also thankful to all the officers and officials of this Directorate who have been actively involved in the compilation of this volume.

I am highly grateful to Sri. J.K.Banthia, I.A.S., Ex. Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Sri R.G. Mitra, Ex. Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General and Sri S.L.Jain Deputy Director of Social Studies Division and Dr. R.P. Singh, Ex. Deputy Registrar General (Map) for their guidance.

DISTRICT HIGHLIGHTS - 2001 CENSUS

1 Jurisdiction of district has undergone changes between 1991-2001, it was bifurcated into two districts viz., Mysore with seven taluks and Chamrajnagar with four taluks.

2 As per 2001 Census Mysore district stand in 4th place among the 27 districts in population size.

3 It's decadal growth is 11th highest in the state.

4 Density of population of the district is 385. The district stand 3rd in rank among the high population density district in the state.

5 Mysore district has registered with 964 females per 1,000 males (sex ratio) and stands in 18th position in the state.

6 Premier scientific and research institutions such as Central Food Technological and Research Institute, Defence Food Research Laboratory, Anthropological Survey of India, etc., are located in Mysore city.

7 It rank at 17th place in its literacy rate.

8 University of Mysore is the first University of the state which is located in Mysore.

9 Panchalinga Darshana a very famous religious congregation of 2 lakhs is held once in 12 years at Talkad of Tirumakudal Narsipur taluk.

10 The district is famous for its cultural heritage especially the Dasara festival of Mysore which is famous in the country.

11 Sandal Soap and Oil Factory of Mysore is famous in the country.

IMPORTANT STATISTICS, 2001

Particulars	Persons Males Females	State	Percentage	District	Percentage

ANALYTICAL NOTE

(i) HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

Introduction

The District Census Handbook is the most valuable district level publication brought out by the Census Organization. It contains micro-level data down to the lowest administrative units viz, revenue village in the case of rural areas and Division/Ward level in the case of urban areas. It is extremely useful to the planners, administrators, demographers, sociologists, etc., as it contains resourceful wealth of data regarding basic amenities available in each villages and towns of the district such as educational, medical, drinking water, post and telegraphs, transportation and communication, banks, societies, recreation, power supply, export/import of important commodities and land use besides, the particulars revealed during the latest census enumeration. It is for the first time that the district census hand book series was included in the census publication programme at the 1951 census, in order to satisfy the growing demand by the administrators, the planners, research scholars, demographers and the other such census data users, for micro-level data. The idea of compiling the District Census Handbooks was pioneered by Sri R.A.Gopala Swamy, I.C.S. the then Registrar General, India and Ex-officio Census Commissioner of India, with a view to preserve the Census records prepared for areas below the district level. He proposed that all the district Census tables and Census abstracts prepared during the process of sorting and compilation, should be bound together in a single manuscript volume and named as the District Census Handbook and suggested that the State Government should take up printing and publication at their own cost. Then onwards, the District Census Handbooks were published in each Census with improved pattern with an aim to give the Census and Non-census data at micro level for each village of the taluk as a whole to suit the requirements of various departments.

The data in the District Census Handbook will help not only in local area planning but also in regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. The District Census Hand Book sought to replace “Part IV - Taluk Tables and Part V - Village Tables” of the earlier censuses and to present the basic demographic and economic data in the form of “Primary Census Abstract” in respect of each and every village and town within the jurisdiction of the district. The district census handbook consists of two parts, viz, Part A and Part B. Part A comprises village and Town Directory while Part-B contains Village and Town level Primary Census Abstracts. In addition, these volumes contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

District Census Handbook 1961

It was in 1961 Census that the scope of District Census Hand Book was shaped in the present form by presenting (i) an account of descriptive note on the district, (ii) a set of non-census data tables dealing with the administrative statistics of the district for a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban Primary Census Abstracts depicting the nine fold industrial classification of workers. Information on the availability of certain basic amenities in villages and towns, such as the source of drinking water and educational institutions was also presented in the volumes. However, the district census handbooks of 3 out of then existing 19 districts viz, Bangalore, Dharwad and Mysore were confined to the publication of the village-wise and urban (census enumeration block-wise) Primary Census Abstract only.

District Census Handbook 1971

Physiographically Karnataka State has been formed into well-defined macro regions of the Indian Union: the Deccan Plateau and the coastal plains and islands. Further, the state has been divided into four micro regions considering the physiographic

charecteristics of the regions. The micro regions are the Northern Karnataka Plateau, the Central Karnataka Plateau, the Southern Karnataka Plateau and the Karnataka Coast. Mysore falls with the regions of southern Karnataka Plateau. The lands of the district form an undulating tableland with granite rocks protruding at odd intervals. The southern taluk of the district is covered with few mountain ranges with dense forests. The principal ranges are the Bettadapura hills near Mysore. The Chamundi betta rises to a height of 1,074 meters above mean sea level. Bettadapura hill is an isolated conical hill of 1,338.6 meters above mean sea level and the celebrated temple of Mallikarjuna is situated on top of this hill.

During the 1971 census, the district census handbook was further refined to present the data in a systematic way. In view of countrywide uniformity in approach and to have a comprehensive coverage, the District Census Hand Books were presented in three parts each, for a district. Part A incorporated the Town and Village Directories. Part-B incorporated the Primary Census Abstract and included data, in the case of rural areas down to the village level and in the case of urban areas up to the block level. In addition, an introduction was given wherein the changes in jurisdiction, if any, of the district or of the taluks and the changes in the number of villages between 1961 and 1971 were explained. Part-B was essentially demographic in nature and was the end product of the tabulation of the enumeration results. Part C incorporated other census tables and administrative statistics. For convenience, Part-A and Part-B of the District Census Hand Book were presented in one volume and Part-C in a separate volume. In part-C volume, the district and taluk maps were included. These maps were prepared on the basis of maps obtained from the competent authorities concerned.

District Census Handbook 1981

The District Census Hand Book series of 1981, had some new features along with the restructuring of the formats of village and town directories, keeping in view the comparability of 1971 data. All the amenities except power supply in the village were brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place/village where it is available were given. A few new items of information such as adult literacy centres, primary health sub-centres and community health centres/workers, data on the availability of Newspapers, Motor Vehicles, etc., in the village, were introduced in the village directory to meet the requirements of the "Revised Minimum Needs Programmes". A new column "total population and number of households" was introduced to examine the correlation of the amenities with the population and number of households they serve. The contents of Part-A were further enlarged by including two appendices, namely a list of villages not having any amenities and a distribution of villages according to the proportion of Scheduled Castes and Schedules Tribes in the total population of the village. The format of Town Directory were also modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items such as class of town and its population, population of SC & ST, decadal growth rate of population, working women's hostel, adult literacy classes / centres, storage system regarding drinking water supply etc., and also the information about the nearest place and distance having educational, medical and fire-fighting facilities, in case such a facility is not available in the referent town. A new statement on civic and other amenities in slums in Class I and Class II town were included to help the planners to chalk out their programmes of slum improvements.

District Census Handbook 1991

The presentation of the District Census Hand Book for the 1991 Census was more or less similar to the manner followed in 1981. The format of Primary Census Abstract was restructured slightly. Nine-fold industrial classification of main workers was given as against four-fold classification. The sex-wise population in the age-group of 0-6 was included in the Primary Census Abstract for the first time to enable data users to compute more realistic literacy rates as all the children below 7 years of age were treated as illiterate at the 1991 census. One of the important innovations in the 1991 census was the Community Development Block-level presentation of data in the village directory and Primary Census Abstract instead of the traditional taluk/PS level

presentation. C.D.Block is the lowest administrative unit for developmental planning. The choice of the C.D. Block as the unit for data presentation was formulated to help the planners in micro-level developmental plans. Another important improvement at the 1991 Census was dissemination of data through magnetic tapes/floppies in which both the computer as well as manual codes for each revenue village were provided along with the corresponding codes of 1981 Census. In the volumes of the District Census Hand Books, the computer codes assigned to the revenue villages in the 1991 Census and the corresponding codes of 1981 Census were presented so that it may facilitate the data users to use the data either from magnetic tapes or computer floppies.

Scope of the 2001 District Census Handbook

Like in the previous censuses, the District Census Hand Book (DCHB) for the 2001 Census is brought out in two parts as usual viz., Part-A The Village and Town Directory, and Part-B the Village and Town Primary Census Abstract.

The District Census Hand Books for the 2001 census is essentially presented in the similar manner in which the District Census Hand Books of 1991 census were presented. This is because the data would be comparable with the earlier censuses and also to study the changes taken place during the decades and hence the approach in 2001 census is similar to 1991 census. The contents have been slightly enlarged and the formats too are restructured to suit the requirements of the data users. In the village directory for 2001 census certain new amenities like, news papers, magazine received, Income-Expenditure of the local bodies, information on number of banks, credit societies, recreational and cultural facilities, most important commodities imported, manufactured and exported have been included whereas the information regarding the "Day or Days of market/*hat* if any" which was there in 1991 has been excluded. Apart from providing the information about the nearest place and distance in broad ranges for villages not having basic educational and medical facilities, information about the nearest place and distance in broad ranges for villages not having Middle School, College, Hospital (Allopathic), Maternity and Child Welfare Center and Primary Health Center are also provided this time. However, in the town directory there are no changes except in the statement IV-A where this statement is separately numbered as Statement VII in 2001. Except these, the scope of 2001 series of the District Census Hand Book has, by and large remained the same as in 1991. The non-census information collected at the village level and town level was scrutinized and verified. In case of glaring discrepancies the data were cross-checked with data made available by the respective parent departments for validation.

One of the significant changes made in 2001 series of District Census Hand Book is that Primary Census Abstracts are available to the jurisdiction of the Panchayats in the district. With the constitution (73rd Amendment) Act, 1992, it has become necessary for the census organisation to provide population data for the territorial area of a panchayat in order to strengthen panchayat raj system in the country. In view of this, panchayat-wise population figures for total population and for Scheduled Castes and Scheduled Tribes population has been compiled and presented in the form of Annexure-I for each district.

Further another important step taken during the 2001 census, is assigning the Permanent Location Code Numbers (PLCN) to the villages. Location code number is a simple but unique device by which every area in an administrative unit in the State/U.T. can be identified. Thus assigning of Location Code Numbers at various administrative levels, right from State/U.T. to the lowest level namely enumeration block, in census taking is an important step. Each clearly demarcated area can be referred to by a combination of numbers. In a State or U.T. the next administrative area is District, followed by taluk or police station, circle, Development Block or Mandal, etc. Next below this administrative area, in urban areas are cities/towns, further divided into wards/ divisions and villages in rural areas. The Location Code Numbers to various administrative areas are assigned in an orderly manner always beginning from northwest point and the numbering proceeds in a serpentine manner, keeping the geographical continuity, ultimately ending at the South-East point.

There was a great demand from different organizations to study the village level data over a time span and hence a scheme of assigning permanent location code numbers to the villages and the higher

levels of administrative areas is devised to ensure data comparability over a period of time. In Indian Census, Location Code Numbers are allotted to each village based on traverse system (zigzag) in a serpentine manner at taluk level. These numbers for villages run from '1' to 'N' in each taluk independently. This system was adopted until 1991 census. But, for the Census of India 2001, all the villages in a state/U.T. are assigned with a Location Code Number in one continuous series beginning from "1" to "N" for the entire state/U.T. and it is not confined to a taluk The field length of the complete PLCN structure for a village has been kept up to 8 digits and therefore the location code number of village in a taluk contains 8 digits number for 2001 Census.

(ii) BRIEF HISTORY OF THE DISTRICT

Earlier to first November, 1975, Karnataka State was known as Mysore. Mysore city is now the headquarters of the district and the Revenue Division. The city is famous for the Dasara Festival which is celebrated with pomp and gaiety annually during the Navaratri (September-October). The festival attracts tourists from all over the country and abroad in large numbers to witness *Jambo Savari* - the chief attraction. Besides, the city is also famous for its nearby Brindavan Gardens that are laid out at Krishnarajasagar Reservoir.

Due to the formation of a new district, namely, Chamarajnagar from out of the erstwhile Mysore district, vide Government of Karnataka Notification No.RD.42.LRD.87(Part-3) dated 2.8.1997, four taluks, i.e., Chamarajnagar, Gundlupet, Kollegal and Yelandur which earlier formed part of Mysore district, are now under the newly constituted Chamarajnagar district. Presently Mysore district comprise of seven taluks, namely, Heggadadevankote, Hunsur, Krishnarajanagara, Mysore, Nanjangud, Tirumakudal-Narsipur and Piriyapatna.

According to a legend, the name 'Mysore' is said to be derived from 'MAHISHASURA'. In Sanskrit 'Mahisha' means a buffalo. There is a popular story to substantiate the assoication of a buffalo with the city's name. In the ancient days, *Mahishashura*, a *Rakshasa* who could at his will assume any form including that of a buffalo, ruled the town. He was very cruel and took pleasure in torturing the *devas* and the *rishis* living in the hermitages. To seek relief, the *devas* and the *rishis* went to *Kailas*, the abode of *Lord Shiva* and pleaded him to destroy the cruel *Rakshasa* and establish peace on earth. When *Lord Shiva* expressed his inability to kill their tormenter, they approached *Parvathi*, his consort. Thereupon, *Parvathi* assumed the responsibility by waging a war and finally killed the *Asura* when he took on the form of a buffalo and attacked her. She came to be known as *Mahishasura Mardini*. Later, the ruling family of the Wodeyars of Mysore adopted *Mahishasura Mardini*, also called *Chamundeshwari*, as their family goddess. Another theory behind naming it as 'MYSORE' is the mention of 'MYSOORU' in the copper plate inscription dated 862 AD and later in 11th and 12th centuries it was called as 'MAISURNAD' and later it took the anglicised form of Mysore.

Mysore district is not only rich in antiquarian remains but also enjoys the distinction of yielding the largest number of inscriptions among the districts of the state. Activity of the pre-historic man is noticeable, particularly in the alluvial plains of the river valleys like those of the Cauvery and its tributaries. Artifacts of the Paleolithic, Neolithic and Megalithic phases have been unearthed at several sites located in the taluks of Mysore, Tirumakudal-Narsipur and Nanjangud. Recent excavations at a Megalithic site in Koppa village of Mysore taluk yielded iron implements such as huge axes, arrow-heads and knives, paddy husk and a three legged jar.

The earliest mention of Mysore in recorded history may be traced to 245 B.C., i.e., to the period of Asoka when on the conclusion of the third Buddhist convocation, a team was despatched to 'Mahisha-mandala' for propogating Buddhism. An old Jaina work of 10th Century mentions that when Bhadrabahu came to the South with Chandragupta in the 3rd century B.C., he was on his way to the Punnata country. This 'Punnata' corresponds to 'Puonnata' mentioned by Ptolemy and the 'Punnadu Ten Thousand' which the Gangas were ruling during the 5th Century A.D.

Ganga dynasty which appears to have been established in the second century A.D. ruled over the greater part of Mysore district till 1004 A.D. and the tract under their region was known as 'Gangavadi Ninety Six Thousand'. During the third century, the

Gangas established their capital at Talakad on the banks of the river Cauvery in Tirumakudalu-Narisipur taluk. During this period, the South of the Mysore District formed part of the 'Punnadu Ten Thousand' kingdom with its capital at Kittipura - identified with Kittur on the banks of the river Kabini in Heggadadevanakote taluk. In the 5th century, Ganga King Avinita married the daughter of Skandavarma the Punnada King and later, his son Durvinita absorbed Punnadu Ten Thousand into the Ganga dominions. During the earlier 9th century, the Rashtrakutas whose capital was at Manyakheta seiged and imprisoned the reigning Ganga King and appointed their own Viceroy to administer the erstwhile Ganga territory. However, later the Ganga King was again restored to power. In the 10th century, there were matrimonial alliances between the Gangas and the Rashtrakutas resulting in the two powers becoming allies.

In about 1004 AD, Rajendra Chola invaded the Ganga kingdom, captured Talakad and renamed the place as Rajarajapura. The Cholas captured all the tracts south of the Cauvery along with the areas east to Srirangapattana, Bangalore and Kolar districts. They held these territories for about a century and imposed their own names on the conquered provinces. Accoridngly, the south of Mysore district was renamed as 'Mudikonda Chola Mandala' and the Talakad came to be known as 'Rajendra Chola Valanad'. Towards the west, the Cholas subdued Changalva King of Nanjarajapatna and Piriyapatna, who in consequence received the name 'Kulottunga Chola Changalva'.

In 1104 AD, the Hoyasala King Bittideva, who later assumed the name 'Vishnuvardhana', captured Talakad, conquered the former Ganga strongholds and drove the Cholas out of Mysore. He earned the title 'Viraganga'. The Hoysalas continued their control over the Ganga territory till 14th century whereafter the Vijayanagara Kings established their supremacy throughout the South. In 1495 AD, Srirangapattana was captured by Narasanayaka and later on Srirangaraya was appointed as the Viceroy and he ruled over these territories with Srirangapattana as his capital.

The subsequent history of Mysore is closely associated with the rise of Wodeyars of Mysore. The origin of this family is traced to two brothers, Yaduraya and Krishnaraya of Yadava dynasty, who induced by circumstances had moved South from Gujarat to carve out their careers and happened to encamp at Hadinadu on the outskirts of Mysore in about 1399 A.D. Their help was sought for by the ruling family at Hadinadu to vanquish a tormenter. Later the heiress of Hadinadu was offered in marriage to Yeduraya and thenceforth he became the chief of Hadinadu and the founder of the Wodayar family. These Rajas established themselves as feudatory chiefs under the renovated suzerainty of the Vijayanagara empire. During the reign of Chamaraja Wodeyar III (1513-1533 AD) who divided his estate among his three sons, Puragere or Mysore was assigned to Chamaraja Wodeyar, the 'bald'. In about 1524 AD, a fort was either built or rennovated at Mysore. With the decline of Vijayanagar, the Wodeyars of Mysore gradually rose to a position of independence. In 1610 AD, Raja Wodeyar (1578-1617 AD) gained possession of Srirangapattana. The quite retirement of Tirumalaraya, the Viceroy of Vijayanagara, to Talakad, enabled peaceful occupation of the capital. Raja Wodeyar soon shifted the seat of his government from Mysore to Srirangapattana from where he and his decendents continued to rule the country without any interruption till 1761A.D. Kanthirava Narasaraja (1638-1662 AD) and Chikkadevaraya (1672-1704 AD) are amongst the most illustrious rulers of this dynasty. The kingdom extended from the mountain ranges of Chikmagalur to Tumkur districts in the north to Annamalai and Palani hills in the south; from Selam in the east to Belur and Kodagu in the west by 1704 AD. After the demise of Chikkadevaraya, the royal power began to decline and the administration of the State fell into the hands of the Dalavayis.

In 1761 AD, Hyder Ali usurped power and became the *de facto* ruler of the kingdom for the next 20 years during which the territories of the kingdom were greatly extended. In 1780 AD Hyder Ali joined the confederacy formed against the English by the Marathas and the Nizam. In the Second Anglo-Mysore War, Hyder Ali died of sickness in December 1782 A.D. He was succeeded by his son Tipu Sultan who continued the war and defeated the British at Wandiwash in 1783 A.D. However, at the Third Anglo-Mysore War, Tipu Sultan suffered defeat and humiliation. Ultimately, during the Fourth Anglo-

Mysore War, when Shrirangapattana was besieged in 1799 A.D., Tipu Sultan fought heroically and was slain in the battle field.

With the fall of Tipu Sultan in 1799 A.D., the kingdom was restored to the Wodeyars of Mysore by the British. In 1800 A.D., the seat of the Government was shifted to Mysore which paved the way for a flourished Mysore. Under the suzerainty of the British empire, the Wodeyars of Mysore ruled over Mysore kingdom till the independence of the nation in 1947. However, for 50 years starting from 1831 A.D. to 1881A.D., the British ruled the State directly through their Commissioners and reinstated the Wodeyar dynasty on the throne in March 1881 A.D. After Rendition when Chamaraja Wodeyar I was crowned as the king, many administrative changes were introduced. The post of the Commissioner was abolished. A British Resident was appointed at the Mysore Court to head the administration of the state. A post of *Deewan* along with that of two advisors was also created. A Representative Assembly constituting of 144 members was formed and this institution was the first of its kind in the country under the British rule. Subsequent rulers of the State like Krishnaraja Wodeyar IV and Jayachamaraja Wodeyar endeared themselves with the masses by their exemplary actions. The administration of the State was manned by many able and illustrious *Deewans* including Sri M.Visweswaraya who is hailed as the "Maker of Modern Mysore" and Mysore state greatly developed into a model state in the country. The state of Mysore and its surroundings enjoyed an aura of royal splendor and had their share of development.

In September 1947 Mysore became a part of the Union of India and erstwhile Maharaja was appointed as the *Rajapramukh* of the State. As a result of the reorganisation of the states in 1956, the taluk of Kollegal belonging to the erstwhile Coimbatore district of Tamil Nadu was included in the Mysore district which formed part of the newly constituted Chamrajnagar district.

In 1997 a new district namely Chamarajnagar was carved out of the Mysore district. Presently Mysore district consists of seven taluks namely Heggadadevanakote, Hunsur, Krishnarajanagar, Mysore, Nanjangud, Tirumakkudal Narsipur and Piriyapatna and the remaining four taluks namely, Kollegal, Yelandur, Chamarajnagar and Gundlupet formed the newly constituted Chamarajnagar district.

(iii) Administrative setup and jurisidictional changes during the decade, 1991-2001

During 1991 Census, geographical and political map of Karnataka depicted the territories of 20 districts. As a sequel to Government of Karnataka Notification No.RD 42 LRD 97 Part-III, Bangalore dated 2nd August, 1997 published in Extraordinary Gazette No.894, dated 2.8.1997, seven new districts took birth showing territorial changes on the administrative map of Karnataka thus raising the number to 27 from 20 during 2001 Census. The State is divided into four revenue divisions and 27 districts for the purpose of revenue administration. One of the eight districts of Mysore revenue division situated in the southern part of State,Mysore city is the divisional headquarters of Mysore Division and the district. The jurisdiction extends over the district of Mysore, Mandya, Kodagu, Hassan, Dakshina Kannada, Udupi, Chikmagalur and Chamarajnagar.

STATEMENT SHOWING THE NUMBER OF VILLAGES / TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS IF ANY AND REASONS THEREOF

Sl. No	Name of Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalized for		Reasons for variation
		2001 Census	1991 Census	2001 Census	1991 Census

2	Hunsur	213	210	1	1	1) Kabbe Koppalu, 2) Rathnapuri and 3) Maralaina Koppaly villages are newly created vide Notification No. RD 26 LRD 92 dated 28.1.1995.
3	Krishnarajanagar	178	176	1	1	1) Kulume Hosuru and 2) Kalammana Koppalu villages are newly created villages vide Notification No.RD 26 LRD 92 dated 28.1.1995.
4	Mysore	143	144	4	4	Lingambudi, a revenue village is treated as OG in 2001 Census and hence deleted from list of villages.
5	Heggadadevankote	281	281	1	3	Two towns viz. Sargur (MP) and Kabini Colony (NMCT) of 1991 Census are declassified and the areas of these towns are included in the respective revenue villages from which the towns were formed earlier.
6	Nanjangud	190	188	1	1	Jeemaralli and Srikantanagar villages are newly created villages vide Notification No.RD 26 LRD 92 dated 28.1.1995.
7	Tirumakudal -Narsipur	132	132	2	2	-
	Total	**1,340**	**1,332**	**11**	**13**	

Total Number of Towns/ Villages

Mysore district comprises of 7 taluks which are grouped into two Revenue Sub-Divisions and the Sub-Divisional Headquarters are Mysore and Hunsur. The Mysore Sub-Division has its jurisdiction over the taluks of Mysore, Nanjangud and T.Narsipur. The Hunsur Sub-Division has jurisdiction over Heggadadevankote, Hunsur, Krishnarajanagar and Piriyapatna. According to 2001 Census, there are 1,351 villages and 11 towns in the district as against 1,353 villages and 13 towns during 1991.

Urban local bodies

The statutory urban local bodies are the Municipal Corporations and Municipal Councils. These urban local bodies elect Councilors/ Corporators from each ward and the tenure of the Councilors/Corporators would be for five years. The President or Vice-President of the Municipal Council and the Mayor/ Deputy Mayor of the Corporations whose tenure will be for a period one year are elected from among the elected Councilors/Corporators. The Chairman of various committees are also elected from among the elected Councilors for a term of one year.

The Chief Officer in Municipal Council and the Commissioner in a City Corporation are responsible for day-to-day administration and the executive authority is vested with them.

Zilla Panchayat and Taluk Panchayat

To promote the development of institution and secure greater measure of participation by the people in the local and governmental affairs by decentralization of power and functions for the purpose of development, planning and implementation of various programmes thereof Zilla Panchayats have been constituted in the State. The jurisdiction of Zilla Panchayat is coterminous with that of the corresponding district but excludes the statutory towns. Accordingly, Zilla Panchayat has been constituted for Mysore district and its jurisdiction extends over the Taluk Panchayats of the district. The jurisdiction of each Taluk Panchayat is coterminous with that of the taluk of the same name

but excludes the area incorporated in the statutory towns or cities, if any.

The Zilla Panchayat elects its president and vice-president and chairman of its committees from amongst the elected members. The term of these elected representatives will be for five years. An IAS officer is posted by the State Government as Chief Executive Officer of the Zilla Panchayat. Various departments assist the Panchayat.

Grama Panchayats

The Government of Karnataka enacted the Karnataka Panchayat Raj Act 1993 on 30.4.1993 replacing its previous enactment in this regard for the formation of Grama Panchayat.

STATEMENT SHOWING THE TALUKWISE NUMBER OF GRAMA PANCHAYATS AND HOBLIES/ FIRKAS

Sl. No.	Name of Taluk	No. of Hoblis/Firkas	No. of Panchayats
1	2	3	4
1	Piriyapatna	4	26
2	Hunsur	4	30
3	Krishnarajanagara	6	31
4	Mysore	4	39
5	Heggadadevankote	5	33
6	Nanjangud	5	45
7	Tirumakudal Narsipur	5	36
	Total	**33**	**240**

Details regarding Panchayatwise number of villages have been furnished in Annexure I.

The Grama Panchayat is authorised to function on the items listed in Schedule I of the Act namely, preparation of annual plans for the development of Panchayat area, preparation of annual budget, providing reliefs in natural calamities, removal of encroachments on public properties, organising voluntary labour and contribution for community works, maintenance of essential statistics of the village, in addition to matters relating to Agriculture, Animal Husbandry, Fisheries, Social & Farm Forestry, Khadi, Village & Cottage Industries, Rural Housing, Drinking Water, Roads, etc., Rural Electrification, Non-conventional energy sources, Poverty Alleviation Programmes, Markets & Fairs, Rural Sanitation, Public Health & Family Welfare, Women and Child Development, Social Welfare, Welfare of Weaker Sections, Public Distribution System, Maintenance of Community assets, Construction and Maintenance of Dharmashalas, Chatras, Cattle Sheds, Ponds, Cart Stands, Slaughter Houses, Public Parks, Play Grounds, etc. Regulation of manure pits in public places and establishment and control of shandies. Such other functions as may be entrusted.

The Grama Panchayat is also empowered to make provisions for carrying out within its area any other work or measure which is likely to promote the health, safety, education, comfort, convenience or social or economic well being of the inhabitants of the Panchayat area.

(iv) PHYSICAL FEATURES

Mysore is located at the southern most of the Karnataka state. It has the greatest extent of 99 Kms from North to South and 131 Kms from East to West. After the bifurcation of Chamrajnagar, Gundlupet, Kollegal and Yelandur to form as a separate district, the total geographical area of the district stands as 6,854 sq.km, which ranks at 12th place in the state. The most conspicuous areas of very high and very low areas of the distict is located at 700 and 950 metres of contour lines above the mean sea level respectively.

(1) Location and Size

The district lies between the North latitude 11 degree 44 minutes to 12 degree 37 minutes and East longitude between 75 degree 57 minutes to 77 degree 12 minutes. The district is bound on the North by Mandya and part of Hassan districts. On the East, it is bound by Chamarajanagar. Kodagu forms its

Western boundary and the Southern portion is covered by Kerala and part of Chamarajanagar district.

(2) Physiography

Physiographically Karnataka State has been formed into well-defined macro regions of the Indian Union: the Deccan Plateau and the coastal plains and Islands. Further, the state has been divided into four micro regions considering the physiographic characteristics of the regions. The micro regions are the Northern Karnataka Plateau, the Central Karnataka Plateau, the Southern Karnataka Plateau and the Karnataka Coast. Mysore falls with the regions of southern Karnataka Plateau. The lands of the district form an undulating tableland with granite rocks protruding at odd intervals. The southern taluk of the district is covered with few mountain ranges with dense forests. The principal ranges are the Bettadapura hills in the north-west and the Chamundi Hills near Mysore. The Chamundi betta rises to a height of 1,074 meters above mean sea level. Bettadapura hill is an isolated conical hill of 1,338.6 meters above mean sea level and the celebrated temple of Mallikarjuna is situated on top of this hill.

(3) Drainage

The drainage is generally towards the east and the most important rivers are the Cauvery and the Kabini, which is the tributary of River Cauvery. River Cauvery forms a natural boundary between Mysore and Kodagu districts and has its origin in the Western Ghats. Cauvery flows into the district near Abbur in the northwest of Krishnarajanagar taluk and traverses eastwards. After flowing for some distance in Mandya, the river enters the district again at Ranganathapura in the north-west of Tirumakudal Narsipur (T. Narsipur). The Lakshmanatirtha a tributary of river Cauvery also flows in the district. It rises at Brahmagiri Devasi hills in the Western Ghats in southern Kodagu. It enters the district near Chikkahejjur in Hunsur taluk and flows through Hanagodu, Hunsur and Kattemalalavadi before joining the Cauvery at Sagarakatte in Krishrajanagara taluk. Among the number of falls on the river bed, one important fall is the Chuncanakatte which is about 20 metres in height and 60 kms. upstream of Krishnarajasagara Dam. The next important river is the Kabini, a tributary of the river Cauvery also originates from the western ghats at an elevation of about 2,140 meters in Kerala. The river enters the district near Bavali in the southwest of Heggadadevankote. It is a perennial river. The tributaries of Kabini includes, the Nugu, the Taraka, the Sutnalla,the Barala hole and the Voddallihole.All these tributaries flow into the district at Heggadadevanakote taluk before joining Kabini.The river Gundal also known as the Kaundinya is a tributary of Kabini and joins the river at Nanjangud.

(4) Climate

Though the climate of the district is moderate throughout the year, it may be divided into four seasons. The summer season starts from March and prevails up to May and is followed by South-west monsoon season or rainy season, which is between June to September. October and November, may be termed as the post-monsoon or retreating monsoon seasons. The period from December to February is the dry or winter season. April is usually the hottest month and December is the coldest month of the year. Generally the temperature during the period from March to May rises continuously. April being the hottest month, the mean daily maximum temperature is at 34 degree Celsius and the mean daily minimum is at 21.4 degree Celsius. On individual days, the day temperatures during summer may exceed 39 degree Celsius. December is the coldest month with the mean daily maximum temperature at 27 degree Celsius and the mean daily minimum at 16.5 degree Celsius. On some days during the period from November to January the minimum temperature may go below 11 degree Celsius. The rainfall and the climate of the district are quite congenial for those working in the fields as well as for those who are engaged in sericulture.

(5) Winds

The winds are generally moderate with some strengthening during the southwest monsoon season. During the period from May to September, winds are mostly westerly or southwesterly. North easterlies and easterlies appear in October and these become more predominant in the next four months. During March and April, winds are mainly southwesterly or westerly in the mornings, while, in the afternoons, blow from directions between north and east. There

will be heavy rains and high winds due to depressions and cyclonic storms, which originate in Bay of Bengal. Relative humidities are generally high during the southwest monsoon season.

(6) Rainfall pattern

The District falls under southern dry and southern transition agroclimatic zones of the state. The taluks of Krishnarajanagara, Mysore, Nanjangud and Tirumakudal Narsipur taluks fall under southern dry zone. The rest of the taluks, viz. Heggadadevankote, Hunsur and Piriyapatana fall under southern transition zone.

The average Rainfall in the district ranges from 706 mm in Nanjangud taluk to 866 mm in Heggadadevankote and Piriyapatna taluks. The rainfall decreases from western part of the district towards eastern part. The southeast part of Nanjangud taluk receives the lowest rainfall.

Among the taluks in the district the premonsoon rainfall contributes 26 to 30% of the annual rainfall, southwest monsoon contributes 38 to 49% and northeast monsoon contributes 23 to 32% of the annual rainfall.

The co-efficient of variation ranges from 37 to 43% for the premonsoon season, the highest variability (43%) being in the taluks of Krishnarajanagara and Tirumakudal Narsipur.

The co-efficient of variation for southwest monsoon ranges from 33 to 46%, the highest (46%) being in Krishnarajangara taluk. The c-oefficient of variation for northeast monsoon ranges from 47 to 55%, the highest (55%) being Hunsur taluks.

The co-efficient of variation for Annual rainfall ranges from 23 to 31%, highest being in Krishnarajanagara taluk.

TALUK WISE RAINFALL PATTERN, MYSORE DISTRICT

Taluks (No. of years of rainfall data available)	Statistical Parameters	Pre Monsoon	South West Monsoon	Northeast Monsoon	Annual Rainfall
1	2	3	4	5	6
Heggadadevankote 99	Average rainfall (mm)	241	422	203	866
	Minimum rainfall (mm)	0	131	23	471
	Maximum rainfall (mm)	444	758	474	1440
	Standard Deviation (mm)	92	141	98	201
	C.V.(%)	38	33	48	23
Hunsur 99	Average rainfall (mm)	220	339	221	780

	C.V.(%)	43	42	47	25

A study of the rainfall deficit pattern during the last 20 years compared with the long term data for different seasons indicate increase in rainfall deficiency in the recent past during the premonsoon period. During southwest monsoon period, the deficiency is increasing in Heggadadevankote taluk and decreasing in rest of the taluks viz. Hunsur, Krishnarajanagara, Mysore, Nanjangud, Piriyapattana and Tirumakudal Narsipur. During northeast monsoon period the rainfall deficiency is increasing in all the taluks except Hunsur taluk.

Rainfall deficit during last 20 years has been compared with that of long term data in different seasons and is presented below.

TALUKWISE AND SEASONWISE COMPARISON OF RAINFALL DEFICIT DURING LAST 20 YEARS WITH 99 YEARS DATA, MYSORE DISTRICT

Name of Taluk	Seasons and no. of years with Deficit Rainfall							
	Pre Monsoon		Southwest Monsoon		Northeast Monsoon		Annual Rainfall	
	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs.
1	2	3	4	5	6	7	8	9
Heggadadevankote 99	36(36)	9(45%)	34(34)	7(35%)	43(43)	13(65%)	28(28)	8(40%)
Hunsur 99	35(35)	11(55%)	31(31)	3(15%)	38(38)	7(35%)	19(19)	4(20%)
Krishnarajanagar 98	46(46)	13(65%)	35(35)	6(30%)	42(42)	12(60%)	32(32)	8(40%)
Mysore 99	33(33)	8(40%)	40(40)	5(25%)	37(37)	9(45%)	25(25)	6(30%)
Nanjangud 99	41(41)	13(65%)	30(30)	4(20%)	37(37)	9(45%)	21(21)	3(15%)
Periyapatna 89	42(47)	11(55%)	27(30)	4(20%)	39(44)	10(50%)	23(26)	4(20%)
T.Narasipura 99	41(41)	12(60%)	32(32)	5(25%)	40(40)	12(60%)	18(18)	3(15%)

Note : Figures in bracket indicate values as percentage of number of years for which data is available or for 20 years depending on the column in which it is given

The following inferences could be made.

- The Premonsoon rainfall in the recent 20 years is more deficit compared to the long term data.
- South-west monsoon is less deficit in the recent 20 years compared to the long term data with H.D.Kote taluk as an exception.
- The rainfall deficit during northeast monsoon is increasing during recent 20 years compared to the long term data with an exception of Hunsur taluk.
- The trend analysis of annual rainfall shows decrease of rainfall in Heggadadevankote and Krishnarajanagara taluks and increase of that in Nanjangud, Piriyapatna and Tirumakudal Narsipur taluks. Hunsur do not show any significant change.

(7) Forestry

Forest area accounts for 9.3 per cent of the total geograhical area of the district. Heggadadevanakote

and Piriyapatna taluks have vast forest area, when compared with other taluks. These forests are classified as moist deciduous forest. The Mysore rulers had made the sandal wood tree a State property as early as in the days of Chikkadevaraya..

Teak was always a royal tree and protected. The forest products are exploited on the principle of progressive and sustained yield and sold to various industries and individuals as per government policy. The raw materials alloted are plywood, matchwood, softwood, and packing case wood. The industries are permitted to extract softwood from the areas leased to them.

Government has opened a few fire wood depots in the district to make available firewood for domestic use.

(8) Geology

The Mysore district exposes a vast expanse of migmatite gneisses (popularly known as peninsular gneissic complex) within which clongate raffs and enclaves of supracrustal rocks consisting of high-grade schists occur. The migmatites are the predominant rock types occupying the vast stretch of plain terrain in the district. The high-grade schists are noticed as rafts within the gneissic complex in the southern part of the district. It is the largest schist belts with the length of 70 kms.and a maximum width of 10 kms. It contains garnetiferous Kyanite-sillimanite-staurolite, fuchsitic quartzite, Kyanite, quartzite, crystalline, limestone, dolomite, garnetiferous, pyribolite and amphibolite, ironstone, metaultramafic schists intruded by basic dykes (dolerite, amphibolite). The schist band occuring at north-northwest of Nanjangud is about 8 kms in length and comprises of hornblende-granulite, fuchsite quartzite and calc-silicate rocks. The existence of layered complexes near Konkanhundi and Lalithadripura was brought to light recently. The Chamundi granite, which has been dated around 800 m.y., represented the youngest ignitous activity in the district. Several dykes of felsite and porphyry, associated with Chamundi granite episode occur in clusters and are found to the north-west of Mysore. The charnockites or the granulitic hypersthene rocks are found in small bands in the vast stretch of plain terrain to the west of Piriyapatna in the western border of the district.

(9) Flora and Fauna

Flora: The structure of moist deciduous forest consists of a tree layer with an open canopy. A number of good timber trees are native here. Nandi (Lagerstroemia microcarpa), saguvanii (Tectone grandis) and matti (Terminalia alata) dominate in some places. Especially prominent during the dry period are the white flowers of Konanakombu (Radermachera xylocarpa) and the red flowers of Kempuvanija (Erythrina indica) and bilisulige (Pterocarpus marsupium). The composition and frequency of the canopy trees vary depending on soil and rainfall.

The dry deciduous forest is adapted to a longer dry period. The trees are shorter, often armed. The undergrowth forms thorny thickets. Climbers are wiry and often with latex. Sclerophyllous and succulent xerophytes are not in frequent. Survival during the dry months and protection from browsing are priorities for this type of vegetation. Dinduga (Anogeissus latifolia), taremara (Terminalia bellirica) and alale (Terminalia chebula) are the principal broad-leaved trees of these forests. Crotalaria berteroana with silky leaves and yellow flowers is a common and elegant shrub.

To summarise, there are two types of vegetation in the district - the wet and the dry. The Southern Montane and Moist Deciduous belong to the wet type. The Dry Deciduous and the Thorn-scrub belong to the dry type. Irrigation and agriculture have modified part of the plant cover. Sanctuaries and Parks have helped in preserving other areas.

Fauna: Mysore district has a rich and colourful heritage in respect of wildlife. The forests of the district offer good habitat for larger grazing animals like gaur and deer. The old Mysore plateau includes moist and dry deciduous forests and undulating plains. This area harbours a rich and variegated array of wild animals and is probably best known by naturalists. There is a good representation of the sambar and spotted deer, which seems to prefer a semi-degraded habitat.

The notable fauna that is found in the district is as follows:

The tiger (Panthera tigris), the most magnificent of the greater cats, is called *huli* and some *hirey huli* in Kannada. Panthers (Panthera pardus) are common and constitute the co-predators of the tiger. Panthers are also nocturnal. The jungle cat (Felis chaus) or *kadu bekku* mainly prey upon rats, lizards and birds and also potential predator of chital fawns. The Indian or wild dog or *silunayii* (Cuon alpinus) is the real competitor to the tiger and panther. The small Indian civet (Viverricula indica) or *punugina bekku* and the toddy cat or common palm civet *Paradoxurus Hermaphroditus* is the animals of the civet tribe in the district. Both are small, long and low to ground animals with long nails. The common mangoose *Herpestes edwardsii* and striped-necked mongoose *Herpestes vitticollis* are common here.

The two primates in the district are the bonnet macaque (*Mucaca radiata*) and the common langur (*Presbytis entellus*). The bonnet monkey is the familiar red monkey of South India, common around shrines and jungleside towns. They are omnivorous, often found near water and are excellent swimmers. Langurs are vegetarians and seen in fair numbers. The bonnet monkey is called *kapi, kothi, manga* and the common langur as *muscia* or *muela*.

The Indian giant squirrel or *kendalilu, Ratufa indica* is the largest of all squirrels, arboreal and diurnal. The other diurnal squirrel of the area is the familiar three striped palm squirrel or alilu. The fascinating large brown flying squirrel (haruva bekku) is even bigger than the giant squirrel.

Chital or spotted deer, are found all over the forests and are among the commonest wild animals. Minas and fantail flycatchers are often seen.

(10) Soils

The soils of the district are predominantly red Loams and derived from granites and gneisses and vary from pure sandy soils to typical block cotton soils. According to National Bureau of Soil Survey and land use planning, the soils of the district are grouped as Ustalfs -Tropepts, Usterts -Tropepts, Rock outcrops and Ustalfs - Orthents. Patches of Schists are found in Tirumakudal Narsipur. The western taluks of Piriyapatna, Hunsur and Heggadadevankote are covered with hilly terrain and contain red shallow gravelly soils. Deep red loams occasionally interspersed with black soils are found in Tirumakudal Narsipur taluk. The red soils are generally shallow to deep, red to pale brown in colour, well drained, does not contain lime nodules at depth. The black soils are shallow from four to five feet in depth, contain lime nodules rich in bases with good water holding capacity. The soils of the district are generally alkaline to neutral in reaction. There are few acidic soils in the district. The soils in all the taluks are normal in phosphorous except in Tirumakudal Narsipur taluk, where the soluble salt content is normal, the organic matter content is high, the availability of phosphorous is poor and the soils contain variable amounts of potassium.

(11) Cropping pattern

The perennial flow of the river Cauvery and its tributaries had helped the alluvial valleys to bloom as fertile agricultural fields right from the pre-historic periods. Moreover, the eastern, southern and western parts of the district being on the edge of the ghats receives good amount of rainfall. In addition, irrigation through well, tank and canals have helped agriculture and horticulture flourish in the district. According to the Census of India 2001, among the main workers, 39.00 per cent are cultivators and 15.41 per cent are agricultural labourers. Thus cultivators and agricultural labourers together account for 54.4 per cent which only highlights the fact that agriculture is predominant in the district economy.

Paddy, Ragi, Jowar and Maize are the major cereal crops grown in all the seven taluks of the district. Paddy amd Ragi occupy large area under cultivation. Under cereals, Tur, Gram and oil seeds are the other important pulses. Sugarcane, tobacco and cotton are cash crops.

The below given table states the data with regard to area under each crop in all the seven taluks of the district.

LAND USE PATTERN FOR 1998-99 IN HECTARES

Name of Taluk	Geographical Area	Forest Area	Land put to Non-agricultural use		Uncultivable Fallow Land			Cultivable Fallow Land	Area Sown			Total Net Area Irrigated
			Barren and Uncultivable land	Land put to Non-agricultural use	Cultivable waste land	Permanent pastures	Trees and groves		Net Area Sown	More than once	Total Area Sown	
1	2	3	4	5	6	7	8	9	10	11	12	13

The table on land use data for the district for the year 1998-99 reveals that the net area sown is 56.4 per cent and the total net area sown is 68.9 per cent. The details of existing land according to its actual use can be seen from the table above.

The total geographical area of the district is 6,76,382 hectares of which 2,60,149 hectares are area not available for cultivation, as these are put to various non-agricultural use, like forest, permanent pastures, gauchar and grooves. Permanent fallows are areas under roads, tanks, gramatanas and other non-agricultural purpose. The remaining 4,16,233 hectares are under cultivation of which only 113,115 hectares or 27.18 percentage of land are provided with irrigation facilities. The distribution of area under different source of irrigation in each taluk of the district according to the statistics provided by the Directorate of Economics and Statistics is given below.

LAND HOLDINGS IN HECTARES 1997-98

Source : Mysore District at a Glance, 1998-99, District Statistical Officer, Mysore

As a result of the implementation of various tenancy laws, measures regarding consolidation of holdings, ceiling on land holdings and other land reforms, the agricultural land is now found distributed

amongst a large number of land holders. The following statement based on the Mysore district at a glance 1998-99 gives a distribution of the land holdings by size-group.

The figures clearly indicates that the number of persons holding less than 1 hectare of agricultural land (very small sized) are predominant in the district with 52.25 per cent, followed by small sized land holders, who constitute 29.02 per cent. The medium sized land holders (2 hectares to 10 hectares) constitute 18.3 per cent and the large sized land holders constitute just 0.42 per cent. Though the percentage of large sized land holders are just 0.42 per cent of the total extent of land held by this group is 5.52 per cent. The very small and small sized land holders, who together constitute more than 81 per cent hold below 50.00 per cent of the total agricultural land, which clearly indicates the uneven distribution of agricultural land amongst the land holders.

AREA, PRODUCTION AND AVERAGE YIELD OF PRINCIPAL CROPS FOR 1998-99 UNDER ALL SEASONS

Source: Fully Revised Estimates of Principal Crops in Karnataka for the year 1998-99, Directorate of Economics & Statistics, Bangalore

Mysore district is divided into two Agro-climatic zones namely Southern Dry Zone and Southern Transition Zone. The Southern Dry Zone consists of Nanjangud, Yelandur, T.Narasipur, Mysore and Krishnarajanagar taluks. Since more than 50 per cent of the rain is received during Kharif season, this zone is also known as Kharif Zone. The soils in this part of Mysore are red sandy loams and black soils, which are suitable for growing principal crops like paddy, ragi, pulses, minor millets and sugarcane. The remaining taluks namely, Heggadadevankote, Hunsur and Piriyapatna comes under Southern Transition Zone. This zone is also predominantly a Kharif zone as it receives more than 60 per cent of the rain during kharif season. In major parts of the area the soils are red sandy loams and it is red loams in the remaining areas making it suitable for cultivation of principal crops like paddy, ragi, pulses, jowar and tobacco. The cropwise area, production and average yield for the year 1998-99 under all seasons is given in the above table. The table reveals that about 60.00 per cent of the net-cropped area are put under cultivation of cereal crops and minor millets. Of this paddy and ragi alone constitute 28.8 per cent and 21.9 per cent of the net cropped area. The yield in kg per hectare of paddy is 4,792 and that of maize is 4,493. The oil seed crops grown in the district are Groundnut, Castor, Sesamum, Soyabean, Nigerseed and Sunflower. These crops are grown in an area of 23,402 hectares in the district. Among the commercial crops, cotton, sugarcane and tobacco are grown in the district. In terms of its yield, tobacco's yield is 701 kgs per hectare. Potato, onion, tomato, beans, brinjal, banana, grapes, mango, papaya, cashewnut, guava, sapota and lemon are plantation and horticultural crops grown in the district. Among the condiments and spices, dry chillies, turmeric, dry ginger, black pepper, arecanut, coriander and coconut are being raised in the district. The details regarding its area, production and yield can be seen from the above table.

(12) Irrigation

The inscription of the Gangas, Cholas, Hoysalas, the Vijayanagara and the Mysore rulers speaks of the various means of irrigation facilities that were developed and patronage by them. These inscription talks about canals, tank, sluices and other sources existed during their regime. Not only these facilities were created, but considerable efforts were made for the conservation of these facilities by way of undertaking of repairing works or de-silting of tanks and so on. An irrigation commission was set up by the Government of India and the commission in its report in March 1972 A.D made specific recommendations on the need for systematic development of command area in the country. On the basis of its recommendation, the State

Government constituted the Command Area Development Authority (CADA) of the Cauvery Basin projects at Mysore during 1974 A.D. to ensure rapid and optimum utilization of irrigation potential created through major and medium projects. The CADA was made an autonomous statutory body as per the CADA act of 1980. The major functions of the CADA are, conservation of land and water, construction of field irrigation channels and field drains, on farm development, adoption of warabandi system for proper distribution of water, adoption and enforcement of suitable cropping pattern and development of areas, pertaining to agriculture, horticulture, sericulture etc. The following table illustrates the taluk wise net area irrigated through various sources for the year 1998-99.

NET AREA IRRIGATED BY DIFFERENT SOURCES

Name of Taluk	Net area irrigated for 1998-99 (Area in hectares)						
	Canal	Tank	Wells	Lift Irrigation	Bore Wells	Other sources	Total
1	2	3	4	5	6	7	8
Piriyapatna	2,295	1,776	282	30	215	-	4,598
Hunsur	6,530	1,892	2,007	-	41	-	10,470
Krishnarajanagara	27,040	1,101	675	-	124	-	28,940
Mysore	2,610	900	2,000	-	198	-	5,708
Heggadadevankote	6,019	1,958	1,776	-	85	-	9,838
Nanjangud	20,687	-	1,424	125	150	-	22,386
Tirumudal-Narsipur	28,850	1,010	961	200	154	-	31,175
Total	**94,031**	**8,637**	**9,125**	**355**	**967**	**-**	**1,13,115**

Source: District at a Glance, 1999-2000, Directorate of Economics & Statistics, Bangalore

As per the statistics given in the above table, about 83.0 per cent of the cropped area is being irrigated through canals followed by 8.07 per cent and 7.64 per cent through wells and tanks respectively. Prior to Independence, Krishnarajasagar was the only major irrigation project undertaken in the district. After the initiation of Five-year plan, couple of projects was accorded government approval and was completed. After the construction of famous Krishnarajasagar dam, on the river Cauvery, the construction of left and Right Bank canal was proposed. The left bank canals was designed to provide irrigational facilities for 79,800 hectare in Mandya taluk and the right bank canal was to irrigate Mysore district. About an area of 32,375 hectare will be benefited under this project. Another project that was completed is the Nugu Reservoir project, which consists of two canals extended from the reservoir, constructed across the river Nugu, a tributary to the river Kabini near Birwal village in Heggadadevankote taluk. The project was initiated in the year 1946 A.D. and was completed in 1959 A.D.

Sagare Doddakere project is another completed irrigation project constructed across the Bandigaduhalla, a tributary to river Kabini near Hegnur village in Heggadadevankote taluk. In the same taluk, Hebballa reservoir project has been completed. An earthern dam has been constructed across the Hebballa, a tributary to the Taraka River in the taluk. An area of 1,235 hectare in the taluk is benefited under this project. The district is also benefited by the Hemavathy Gorur reservoir project in Hassan. About 2,266 hectare in Krishnarajanagar taluk of the district receive irrigation facility. Similarly, the district is benefited by Harangi project at Somvarpet taluk of Kodagu district. The taluks, which are covered under this project, are Krishnarajanagara and Piriyapatna covering an area of 12,309 hectare and 12,185 hectare respectively.

Among the ongoing project, the Taraka project comprises of a reservoir across the river Taraka, a tributary to river Kabini near Penjahalli village in Heggadadevankote taluk. It has been designed to construct two canals on both banks, in order to provide irrigation to an extent of 7,040 hectare in the taluk. The administrative approval has been accorded vide government order No. P.W.D. 23 GLP 67 dated 12-4-1970. The height of the dam is 32 metre and has submerged an extent of 1,093 hectare without affecting any village.

Another project, which is on the progress in the same taluk, is the Kabini, which comprises of a

reservoir across the river Kabini, a tributary to river Cauvery near Beechanahalli and Bidarhalli in the taluk. It is expected to cover an area of 87,900 hectare under this project. The administrative approval has been accorded during 1986 vide government order no P.W.D. 22 MKR 81 dated 24-6-1986. The dam is 28.96 metre high with the storage capacity of 552.42m. The construction of the dam has affected 36 villages with the population of 21,000, submerging an extent of 6,402 hectares.

Different sources of irrigation are prevalent in the district for the purpose of cultivation.

Total area sown in the district is 465,961 hectars out of which net area under irrigation by different sources is 113,115 hectares.

The given table shows talukwise break up of area under irrigation by different sources.

The irrigation facilities are available in all the taluks of the district, however it is more in the taluks of Tirumakudal Narsipur, Krishnarajanagar and Nanjangud taluks, which together constitute nearly two thirds of the total irrigated area of the district, the other four taluks share the remaining one third of the irrigated area. The highest irrigated area is in Tirumakudal Narsipur taluk (27.56 per cent) and the least is in Piriyapatna taluk (4.06 per cent).

(13) Natural Wealth

Though the district is not rich in its mineral wealth, occurrence of few of them are reported from certain parts of the district. These deposits include chromite, corundum, graphite, kyanite, magnesite, limestone and dolomite, vermiculite, and ornamental building stones. Chromites occur in altered ultra basic rocks. Workable deposits of various grades and varying extent of chromites occur mostly to the west of the line joining Mysore city and Nanjangud town. Occurrences of corundum are reported from Hunsur, Heggadadevankote and T. Narasipur taluks. Crystalline graphite in the form of an lenticular body occurs at Heggadadevankote. Also in the same taluk, Kyanite and sillimanite are reported. Usually Kyanite and sillimanite occur mostly together as constituents of the pelitic schists, quartzites and gneisses over a vast stretch of the taluk. Deposits of magnesite which occur as a network of intersecting veins in the ultrabase rock are extracted in Hunsur, Mysore and Nanjangud taluks. Notable deposits of limestone and dolomite are quarried in Heggadadevankote taluk and these are gray in colour interlayered with their cherty quartzite. Soapstone is quarried in Mysore and Heggadadevankote taluks. Vermiculite which occurs at the contact of the ultramafic rocks and the gneisses is being extracted in Hunsur and Mysore taluks. Apart from these, minor minerals like building stones, ornamental stones, brick earth, ordinary sand, molding sand, and lime kanakar are available in most parts of the district. The taluk wise details of major and minor minerals resources available in the district are given in the following table.

TALUK WISE MINERAL RESOURCES OF THE DISTRICT

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor	
1	2	3	4	5
1	Piriyapatna	-	Building Stone	
			Ornamental Stone	-
2	Hunsur	Magnesite	Ornamental Stone	
		Vermiculite	Brick earth	
		Corundum	Ordinary Sand	
			Building Stone	-
3	Krishnarajanagara	-	Building Stone	
			Brick earth	-

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor	
1	2	3	4	5
4	Mysore	Felsite Soap Stone Magnesite Dunite Vermiculite	Building stone Brick earth	Because of variegated colours of felsite, they are used in various building constructions. Enough scope is there for investigation due south and south-west of Mysore district.
5	Heggadadevankote	Dolomite, Kyanite Soap Stone Graphite Corundum	Ordinary sand	Bands of Dolomite are exposed near Bettadabidu on the road to H.D.Kote and about 7 Million Tonnes of Dolomite is estimated to be available
6	Nanjangud	Magnestie Asbestos Chromite(Pocket deposit)	Ornemental stone Building stone Brick earth Ordinary sand Lime Kankar	Magnestie : Hullahalli and Karya are held under mining lease. Good quality of Magnesite can be made available in Hanagodu in Hunsur taluk. Asbestos : Even though the blocks are held under lease the out crop is traced upto 3 Kms and deserves further exploration. West of Mavinahalli can also be investigated. Konur 20 Km. SE of Nanjangud can be taken up. Ornamental Stone : the ornamental stone building stone resources are quite large and needs investigation.
7	Tirumakudal Narsipur	Moulding sand Corundum	Ordinary stone Building stone	-

(14) Animal Husbandry

The livestock wealth occupies a vital place in any rural economy, as it constitutes the basis for agricultural prosperity. Livestock development in the district has been undergoing revolutionary changes in the recent past. Right from the days of Vijayanagar viceroys, importance was given to livestock rearing. More importance was given to breeding of indigenous cattle. Two types of cattle namely the Hallikar breed known for drought cattle and Amrit Mahal were reared on a large scale in the district. Even today breeding of these two varieties are being undertaken throughout the district. The recent development in this sector had pushed the district to rank 5th place in its cattle wealth and 12th place in its total livestock population in the state. As a result of Intensive Poultry Development Programme, the district poultry population has increased to 12.53 lakhs by 1998-99, and ranks at 4th place in poultry population in the state. The following table provides the total livestock wealth in the district.

As per the latest statistics, the total milk production in the district is 259 thousand tonnes and about 1,150 lakhs of eggs are produced annually. The development seen in livestock wealth is a result of organised functioning of few institutions in the district. They are, one Poultry Rearing Centre at Tirumakudal Narasipur taluk, an Intensive Poultry and Egg Marketing Centre and a Sheep Breeders Association at Mysore.

DISTRIBUTION OF LIVESTOCK POPULATION IN THE DISTRICT

Sl. No.	Name of Livestock	Total Livestock
1	2	3
1	Cattle	559,492
2	Buffaloes	87,282
3	Sheep	224,134
4	Goats	137,780
5	Pigs	3,145
6	Rabbits	449
7	Dogs	65,365
8	Other Livestock	324
	Total Livestock	**1,077,971**
	Total Poultry	**1,253,000**

Source : A Handbook of Karnataka – 2001, Gazetteer Department, Government of Karnataka.

(14A) Veterinary Services

The adoption of modern techniques of breeding, feeding management and disease control has contributed to the overall enhancement of the productivity of livestock and the spread of veterinary services has resulted in improvement in animal health. The details regarding various services available in the district are given below.

VETERINARY INSTITUTIONS IN THE DISTRICT FOR THE YEAR 2000

Sl. No.	Veterinary Services	No. of Institutions
1	2	3
1	Hospital	16
2	Dispensaries	37
3	Primary Veterinary Centres	104
4	Mobile Dispensaries	07
5	Artificial Insemination Centres	09
	Total	**173**

Source: Karnataka at a Glance 2000-2001, Directorate of Economics and Statistics, Government of Karnataka.

(15) Fisheries

Fishing activity is confined to inland fishing sources through its rivers, reservoirs, tanks, ponds, and wells. As per the latest statistics, there are 207 major tanks with the water-spread area of 6,383.12 hectares. Also there are 870 minor tanks with the water spread area of 2,935.0 hectares. Besides these, three reservoirs with the water spread area of 8,585.00 hectars adds to the source of fishing activity in the district. The total fish production for the year 1998-99 is estimated as 10,021.38 Metric tons and this has been possible with the support of 4 fish production farms and 6 fish rearing farms. To augment the fishing activity in the district, private agencies were also encouraged to venture into this sector to explore all possible means. As such there are three private fish seed production centre and 7 fish seed-rearing centre. Further seven Ice plants, two cold storage and one Frozen plant support this activity. Marketing which is most important of any economic activity is provided by the department as well as by the private agencies. As such there are two fish markets run by the department and two by the private agencies. The government has introduced various welfare schemes for the benefit of fishermen population in the district. The active fishermen in the district numbers to 18,724, which rank at 3rd in having largest population among the districts. Some of the schemes introduced for the benefit of these fishermen include Group Accident Insurance, CSS Development of Model Fishermen Villages, CSS for Motorization of Traditional Fishing Craft, CSS for reimbursement of central excise duty on diesel used by mechanized boats, Subsidy on sales tax payment of distress relief fund etc. The following table highlights in brief the fishing activity in the district.

FISHING ACTIVITY IN THE DISTRICT

Estimated Fish Production	**In MTs**
Fish Seed Stocked	**In lakh fingerlings**
a) Reservoirs	-
b) Major Tanks	116.05
c) Minor Tanks	12.64
Total	**128.69**
a) Cultured	9,387.90
b) Natural	633.48
Total	**10,021.38**

Source: Statistical Bulletin of Fisheries 1998-99, Directorate of Fisheries, Government of Karnatka

(16) Industries

From the point of view of industrial development, there is not much significant and noteworthy to mention about its growth in the district. There are no thermal power or diesel power generating stations in the district. The inscriptions point out some of the industries that flourished in the past. Industries engaged in weaving, production of rock salt, oil presses, carpet weaving, pottery, carpentry, tanning etc, were in existence since ancient time. The development of modern industries in the district started during the early years of 19th century. During 1998-99, there were about 461 registered factories. Highest number of establishments are located in Mysore. Most of them are engaged in the field of chemical, engineering and also textiles. Of the different industries that flourished in the district, sericulture and handloom weaving are the important economic activities, which provide work and livelihood to many in rural and urban areas. Some of the important industries are as follow: 1) The Govt. Sandalwood Oil Factory,. 2) Govt. Silk Weaving Factory, 3) Govt. Silk Filatures, 4) Mysore Lac and Paints, 5) South India Paper Mills in Nanjangud, 6) Sunanda Aromatic Industries, 7) Hunsur Plywood Works at Hunsur.

TALUKWISE DETAILS OF MAJOR FACTORIES FOR THE YEAR 1998-99

(17) Trade and Commerce

Trade and Commerce have an important place in the economy of the district. Mysore city is the main centre of all trading and commercial activities. All the taluk headquarters and the municipal towns of Bannur, Sargur, Nanjangud, Krishnarajanagara are some of the important centres for trade and commerce. All the taluks have branches of commercial banks. State Agricultural and Rural Development Banks are functioning in all the taluks. As on 31.3.99 there are 171 commercial banks in the district, of which Mysore itself has 117 being the highest and Heggadadevankote with only 3. The district has 53 rural banks, 11 urban co-operative banks and 7 primary land development banks at the rate one bank for each taluk. These banks provide financial help to merchants and small enterprenuers.

There are number of co-operative societies and regulated markets in every taluk to help the farmers to secure better price. As such there are agricultural co-operative societies, Milk co-operative societies and other societies functioning in the district. Also there is one regulated market in every taluk and except in Heggadadevankote and Nanjangud, in all other taluks a sub-market is also functioning, especially Mysore is known for having important regulated market for fruits, flowers and vegetables, onions and potatoes. The talukwise details of number of co-operative societies and regulated markets in the district are given below.

TALUKWISE DETAILS OF BANKS IN THE DISTRICT

Name of Taluk	Number of Banks as on 31.03.1999				
	Commercial Banks	Regional Rural Banks	Urban Co-op Banks	Other Co-op Banks	Primary Land Development Bank

(18) Transport and Communication

Mysore district is well served by a large network of roads connecting all the taluks and important trading centres outside the district. It has a total road length of 6,060.8 kms by the year end 1999. As per the statistics given in the table, there are no national highways passing through the district. However a decision has been taken to declare the Kozikode-Kollegal section passing through Nanjangud, Mysore and Tirumakudal Narasipur as NH-209 on June-July 1999 and work is also in progress. Similarly, the Mysore-Bannur-Malavalli road is also likely to be elevated as national highway very shortly. As per statistics given below, the roads in the district are classified as State highways, district major roads, other district roads, village roads, TDB roads, Municipal roads, and forest roads. The taluk wise details of road length are given below.

DETAILS OF ROAD TRANSPORT IN THE DISTRICT

Name of Taluk	Length of Roads in kms.											Major Bridges
	National High Way	State High Way	Dist. Major Roads	Other Dist. Roads	Village Roads	TDB Roads	Forest Roads	Irrigation Dept. Roads	Municipality Roads	Panchayat Roads	Total Roads	
1	2	3	4	5	6	7	8	9	10	11	12	13

The total length of railways in the district is 102 Kms. Of the total railway length, 59 kms are broad gauge and 43 Kms. are metre gauge respectively. The metre gauge line passes through Mysore and Nanjangud, and the total length of railways passes through Krishnarajanagar, Mysore and Nanjangud. Apart from this, the railway department is planning to implement the long-standing demand for Mysore-Madikeri railway line. The taluk wise length of railways is given in the following table.

DETAILS OF RAILWAY TRANSPORT IN THE DISTRICT AS ON 31.3.1999

Name of Taluk	Length of Railway Line in kms.				Railway Stations
	Broad Gauge	Meter Gauge	Mixed Gauge	Total	
1	2	3	4	5	6
Piriyapatna	-	-	-	-	-

(19) Electricity and Power

Karnataka has a place of pride in the history of power generation in the country. KPTCL – Karnataka Power Transmission Corporation Limited (erstwhile KEB) is mainly vested with the functions of transmission and distribution of power in the entire state. The Corporation has been attaching great importance to electrification of villages and hamlets,

tribal colonies and harijan basthis and energisation of irrigation pumpsets. Besides, this with a view to benefit weakest among the section of society schemes called Bhagya Jyothi/Kutir Jyothi have been introduced.

Statement gives below shows talukwise number of villages electrified and talukwise energisation of IP as on 31.3.1999 in Mysore District.

TALUKWISE NUMBER OF VILLAGES ELECTRIFIED AND ENERGISED IP SETS AS ON 31.3.1999

Sl. No.	Name of District / Taluk	No. of Villages electrified	No. of IP Set energised	No. of Bhagyajyothi connections

v) CENSUS CONCEPT

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not

considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multistoreyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multistoreyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard, by definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. But if such hostels/ hotels have out houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and

therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in nonagricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multimember households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mantaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In respect of Karnataka State the Scheduled Castes and Scheduled Tribes as contained in the Scheduled Castes & Scheduled Tribes Orders (Amendment) Act, 1976 are valid for the purpose of Census of India, 2001. With the promulgation of Act 39 of 1991 however, the sub

entries Naik, Nayak, Beda, Bedar and Valmiki were added under the main entry at S.No. 38 (Naikda, Nayaka, …..) of the Scheduled Tribes list of the State. There are in all 101 Scheduled Castes and 49 Scheduled Tribes in the State which are listed below:

List of Scheduled Castes

1 Adi Andhra
2 Adi Dravida
3 Adi Karnataka
4 Adiya (in Coorg district)
5 Ager
6 Ajila
7 Anamuk
8 Aray Mala
9 Arunthathiyar
10 Arwa Mala
11 Baira
12 Bakad
13 Bant (in Belgaum, Bijapur, Dharwar and North Kanara districts)
14 Bakuda
15 Balagai
16 Bandi
17 Banjara, Lambani
18 Bathada
19 Beda Jangam, Budga Jangam
20 Bellara
21 Bhangi, Mehtar, Olgana,Rukhi, Malkana, Halalkhor, Lalbegi,Balmiki, Korar, Zadmalli
22 Bhambi. Bhambi, Asadaru, Asodi, Chamadia, Chamar, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Muchi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit, Samgar
23 Bhovi
24 Bindla
25 Byagara
26 Chakkiliyan
27 Chalavadi, Chalvadi, Channayya
28 Chandala
29 Chenna Dasar, Holaya Dasar
30 Dakkal, Dokkalwar
31 Dakkaliga
32 Dhor, Kakkayya, Kankayya
33 Dom, Dombara, Paidi, Pano
34 Ellamalwar, Yellammalawandlu
35 Ganti Chores
36 Garoda, Garo
37 Godda
38 Gosangi
39 Halleer
40 Halsar, Haslar, Hulasvar,Halasvar
41 Handi Jogis
42 Hasla
43 Holar, Valhar
44 Holaya, Holer, Holeya
45 Holeya Dasari
46 Jaggali
47 Jambuvulu
48 Kadaiyan
49 Kalladi
50 Kepmaris
51 Kolupulvandlu
52 Koosa
53 Koracha
54 Korama
55 Kotegar, Metri
56 Kudumban
57 Kuravan
58 Lingader
59 Machala
60 Madari
61 Madiga
62 Mahar, Taral, Dhegu Megu
63 Mahyavanshi, Dhed, Vankar, Maru Vankar
64 Maila
65 Mala
66 Mala Dasari
67 Mala Hannai
68 Mala Jangam
69 Mala Masti
70 Mala Sale, Netkani
71 Mala Sanyasi
72 Mang, Matang, Minimadig
73 Mang Garudi, Mang Garodi
74 Manne
75 Masthi
76 Mavilan
77 Meghval, Menghvar
78 Moger
79 Mukri
80 Mundala
81 Nadia, Hadi
82 Nalkadaya

83 Nalakeyava
84 Nayadi
85 Pale
86 Pallan
87 Pambada
88 Panchama
89 Panniandi
90 Paraiyan, Paraya
91 Paravan
92 Raneyar
93 Samagara
94 Samban
95 Sapari
96 Sillekyathas
97 Sindhollu, Chindollu
98 Sudugadu Siddha
99 Thoti
100 Tigar, Tirbanda
101 Valluvan

List of Scheduled Tribes

1 Adiyan
2 Barda
3 Bavacha, Bamcha
4 Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
5 Chenchu, Chenchwar
6 Chodhara
7 Dubla, Talavia, Halpati
8 Gamit, Gamta, Gavit, Mavchi, Padvi, Valvi
9 Gond, Naikpod, Rajgond
10 Gowdalu
11 Hakkipikki
12 Hasalaru
13 Irular
14 Iruliga
15 Jenu Kuruba
16 Kadukuruba
17 Kammara (in South Kanara district and Kollegal taluk of Mysore district)
18 Kaniyan, Kanyan (in Kollegal taluk of Mysore district)
19 Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari
20 Kattunayakan
21 Kokna, Kokni, Kukna
22 Koli Dhor, Tokre Koli, Kolcha, Kolgha
23 Konda Kapus
24 Koraga
25 Kota
26 Koya, Bhine Koya, Rajkoya
27 Kudiya, Melakudi
28 Kuruba (in Coorg district)
29 Kurumans
30 Maha Malasar
31 Malaikudi
32 Malasar
33 Malayekandi
34 Maleru
35 Maratha (in Coorg district)
36 Marati (in South Kanara district)
37 Meda
38 Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka, Naik, Nayak, Beda, Bedar and Valmiki
39 Palliyan
40 Paniyan
41 Pardhi, Advichincher, Phanse Pardhi
42 Patelia
43 Rathawa
44 Sholaga
45 Soligaru
46 Toda
47 Varli
48 Vitolia, Kotwalia, Barodia
49 Yerava

Language and Mother tongue

As per the Census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the

respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if she or he is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betelnuts (areca).

Agricultural labourer

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. A person who has been engaged in the economic activity like above is termed as Household Industry Worker.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as an 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1000 males in a population

(vi) NON-CENSUS CONCEPTS

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local

septic tank with a subsoil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear female population of the same age group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear married female population of the same age group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Midyear female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Midyear married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that

will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Midyear population of the same age group}} \times 1{,}000$$

q_1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2

Probability of dying between birth and age 2.

q_5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U_5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neonatal mortality rate and Post neonatal mortality rate. The neonatal mortality rate also comprises of two parts viz., early neonatal mortality rate and late neonatal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Perinatal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant

iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration,

while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/ Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000- 4,999,999); M5 (1,000,000-1,999,999); M4 (500,000-999,999); M3(300,000-499,999); M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its Distribution:

(a) Distribution of population in Rural-Urban areas:

According to the 2001 Census, the total population of Mysore district is 2,641,027 comprising 1,344,670 males and 1,296,357 females. The population of the district forms 5.0 per cent of the state population and ranks at 4th place among the districts. Out of the total population of the district, about 62.8 per cent lives in rural areas while 37.2 per cent lives in urban areas. Rural population of the district is distributed among 7 taluks and urban population spread over in 11 towns. The total urban population in the district is 982,128 persons comprising 499,291 males and 482,837 females. The total rural population in the district comes to 1,658,899 persons and is composed of 845,379 males and 813,520 females as per 2001 Census. The rural population is distributed in 1,216 inhabited villages and there are 124 un-inhabited villages in the district.

(b) Size-class and Civic Status of towns:

The Statement below gives the position and number of urban units according to size-class of population as per 2001 Census:

SIZE-CLASS AND CIVIC STATUS OF TOWNS

Serial number	Size-Class of town	Name and civic status of town		Urban Population		
				Persons	Males	Females
1	2	3		4	5	6
1	IV	Piriyapatna	TP	14,924	7,592	7,332
2	III	Hunsur	TMC	43,900	22,360	21,540
3	III	Krishnarajanagara	TMC	30,633	15,600	15,033
4	I	Mysore	M.Corp*	787,179	400,109	387,070
5	V	Belvata	CT	5,707	2,939	2,768

11	V	Tirumakudal-Narsipur	TP	9,927	4,989	4,938

* Includes OG

Population Growth, Density and Sex-ratio:

Population Growth:

Mysore district witnessed a positive growth rate in each decade with 3.2, 2.6, 8.6, 16.2, 23.7, 16.7, 28.4, 25.1, 24.8 and 15.8 per cent during the period 1901 to 2001. According to the 1991 Census the total population of the district was 2,281,653. There has been net addition of 359,374 persons during 1991-2001. The decadal growth rate of the district comes to 15.8 per cent. The growth rate for the rural and urban areas of the district is 15.2 and 20.3 per cent respectively.

Density:

The population density of Mysore district is 385 persons per Sq. Km. against the state average of 276 persons. At taluk level, the density varies between 152 persons in Heggadadevankote taluk and 1,254 persons in Mysore taluk. In rural areas it comes to 248 persons per Sq. Km., while in urban areas it comes to 5,508 persons. In urban areas the density of population varies between 2,491 persons in Piriyapatna town and 9,927 persons in Tirumakudal Narsipur town.

Sex Ratio:

There are 964 females for every one thousand males in Mysore district. The sex-ratio figures for rural areas and urban areas of the district are 962 and 967 respectively. It is also observed that, the proportion of females in rural areas is higher than that of urban areas. Sex-ratio in the age-group 0-6 comes to 962 girls per 1,000 boys in the district as a whole. In rural areas, this proportion is 967, while in urban areas the sex-ratio of Child population works out to 952 girls per 1,000 boys.

Work Participation Rate:

The work participation rate is defined as percentage of total workers to total population. According to 2001 Census, the total workers including main and marginal workers constitute 42.0 per cent of total population of the district. Of the total workers, the share of main workers is 83.4 per cent and marginal workers is 16.6 per cent. The remaining 58.0 per cent of population belongs to the category of non-workers.

As per 2001 Census among the main workers male participation rate in the district is 91.0 per cent and corresponding proportion of females is 65.3 per cent. The proportion of female marginal workers is higher than male marginal workers, as the females are attending to one or more economic activities in addition to their household duties to improve the family income. Majority of the workers are engaged in other activities. Of the total 1,110,264workers in the district, 35.8 per cent of these total workers are categorized as cultivators, 22.5 per cent agricultural labourers, 1.9 per cent in household industries and 39.7 per cent in other services.

Literacy:

A person who can read and write in any language is considered as literate in Census. All children of age below 7 years are treated as illiterate.

As per 2001 Census, Mysore district has reported 1,471,155 persons as literates constituting 63.5 per cent of the total population excluding the population of 0-6 years. The proportion of male and female literacy rates in the district are 70.9 and 55.8 per cent respectively. The literacy rate of males is higher than that of females. The gap in the male-female literacy rate is 15.1 per cent in the district.

The total literacy rates of rural and urban area are 51.8 and 82.8 per cent respectively. The rate of male and female literacy in rural areas is 61.0 and 42.3 per cent respectively. In urban areas this rate is 87.3 and 78.1 per cent respectively. The gap in male-female literacy rates in urban areas is 9.2 as against 18.7 in rural areas. It is thus clear that females are better educated in urban areas than their counterparts in rural areas.

(c) Scheduled Castes and Scheduled Tribes Population 2001:

Of the 2,641,027 total population of the district 17.7 per cent of the total population belong to Scheduled Castes and 10.3 per cent to Scheduled Tribes. The percentage of Scheduled Castes constitute 87.4 per cent in rural areas and 12.6 per cent in urban areas. The proportion of Scheduled Tribes is 80.0 and 20.0 in rural and urban areas respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36

Following tables, which presents the data on population and amenities available within the district, with a brief notes will provide an overview of the district.

TABLE 1: DECADAL CHANGE IN POPULATION OF TALUKS BY RESIDENCE, 1991-2001

Taluk	Population						Percentage decadal variation 1991-2001			Percentage Urban Population	
	1991			2001							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12
Piriyapatna	188,902	176,894	12,008	224,254	209,330	14,924	18.71	18.34	24.28	6.36	6.65
Hunsur	222,173	187,420	34,753	253,926	210,026	43,900	14.29	12.06	26.32	15.64	17.29
Krishnaraja nagara	217,370	191,286	26,084	239,199	208,566	30,633	10.04	9.03	17.44	12.00	12.81
Mysore	854,499	201,154	653,345	1,038,490	239,262	799,228	21.53	18.94	22.33	76.46	76.96
Heggada devankote	216,399	196,288	20,111	245,930	233,885	12,045	13.65	19.15	-40.11	9.29	4.90
Nanjangud	324,198	281,600	42,598	360,223	311,991	48,232	11.11	10.79	13.23	13.14	13.39
Tirumakudal Narsipur	258,112	230,392	27,720	279,005	245,839	33,166	8.09	6.70	19.65	10.74	11.89
Mysore	**2,281,653**	**1,465,034**	**816,619**	**2,641,027**	**1,658,899**	**982,128**	**15.75**	**13.23**	**20.27**	**35.79**	**37.19**

This table indicates taluk wise decadal variation both in case of rural and urban constituents so far as the total population of the district is concerned. It is evident from the table that over all growth of 15.75 per cent population has been recorded in district during the decade. The growth of population in rural areas of the district works out to 13.23 per cent while in urban areas it comes to 20.27 per cent there by the population of district has grown faster in urban areas than in rural areas. Among the taluks Mysore has registered the highest growth in total population. But in urban areas Hunsur is higher compared to other taluks. However in Heggadadevankote taluk the urban population is indicating a decreasing trend.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Piriyapatna	197	209,330	108,257	101,073	21 (10.7)	796	764
2	Hunsur	192	210,026	107,049	102,977	23 (12.0)	1,010	968
3	Krishnarajanagara	156	208,566	104,881	103,685	16 (10.3)	466	480

54 (30.7)	78,588	76,455	6 (3.4)	20,071	19,848	- (0.0)	-	-
44 (36.4)	65,553	62,773	4 (3.3)	14,950	14,634	1 (0.8)	6,170	5,925
219 (18.0)	**326,348**	**314,073**	**27 (2.2)**	**91,255**	**85,117**	**2 (0.2)**	**12,151**	**11,724**

The above table indicates the number and percentage of inhabited villages with different population size ranges as per 2001 census. Data reveals that out of 1,216 inhabited villages, highest number of villages i.e. 362(29.8) are in the population range (1000-1999). Only 2 villages (0.2) having population range above 10,000. 129 villages are having population less than 200. Other details can be observed from the Table No.2 above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS

		Name of Town
(a) New		
(i)	Statutory Town	**- Nil -**
(ii)	Census Town	**1 Hebbalu (CT)**
		2 Belavata (CT)
		3 Bhogadi (CT)
(b) Denotified		
(i)	Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as Census Towns	**1 Chamundibetta (NAC)**
(ii)	Statutory towns of 1991 Census denotified but identifiable as Census Towns based on demographic and economic criteria	**- Nil -**
(iii)	Census towns of 1991 Census notified as Statutory town in 2001 Census	**1 Heggadadevankote (MP)**
		2 Piriyapatna (MP)
		3 Tirumakudal-Narsipur (MP)
(c) Declassified		**1 Kabini Colony (NMCT)**
		2 Sargur (MP)
(d) Wholly merged with other town(s)		**1 Mysore Non-Municipal Area (NMCT)**
		2 Kyathamanahalli (NMCT)

Declassified means the Census towns of 1991 Census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	**2**	**3**	**4**	**5**
0-10	35	2.9	1,078	0.1
11-20	18	1.5	891	0.1
21-50	44	3.6	9,127	0.6
51-100	61	5.0	20,254	1.2
101-200	218	17.9	167,216	10.1
201-300	296	24.3	351,381	21.2
301-500	308	25.3	522,093	31.5
501 +	236	19.4	586,859	35.4
Not known	-	0.0	-	0.0
District Total:	**1,216**	**100.0**	**1,658,899**	**100.0**
Population Density (Rural) of the district:		**293.3**		

Distribution of villages of population density and ranges are presented in this table. The density of population for the district rural is 293.3 persons/sq.km. If the villages are distributed by different ranges of population density the picture that would emerge for the rural population of the district would be as indicated in the above table No.4.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT 1901-2001

Census Years	State			Census Years	District		
	Total	Rural	Urban		Total	Rural	Urban
1	2	3	4	5	6	7	8
1901	983	984	976	1901	1,024	1,023	1,038
1911	981	984	960	1911	1,015	1,015	1,010
1921	969	975	936	1921	1,007	1,008	997
1931	965	972	927	1931	998	1,002	970
1941	960	965	935	1941	975	975	971
1951	966	974	941	1951	978	976	992
1961	959	973	913	1961	968	967	975
1971	957	971	913	1971	955	956	945
1981	963	978	926	1981	956	959	937
1991	960	973	930	1991	953	958	924
2001	965	977	942	2001	964	962	967

The above table gives the sex-ratio for the rural and urban population of the state as well as that of the district from 1901 to 2001 census. It is observed that the state has recorded a decrease in the sex-ratio since 1901 census (983). However in 2001 census, the state has registered a better sex-ratio of 965 little higher than the ratio of 1991 Census (960). For the district, the sex-ratio in 1901 Census was 1024, which gradually decreased over the decades. However, in 2001 Census, the district has recorded a sex-ratio of 964 better than that of 1991 Census 953. It is also observed that the sex-ratio in 2001 Census for the district (964), is slightly less than that for the state (965). Again, the ratio for the rural women in 2001 Census is comparatively better than, that for the urban women in the state but vice-versa for the district.

TABLE 6 : SEX RATIO BY TALUKS, 2001

Sl. No.	Name of Taluk	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Piriyapatna	936	934	966
2	Hunsur	962	962	963
3	Krishnarajanagara	985	989	964
4	Mysore	961	943	967
5	Heggadadevankote	972	973	953
6	Nanjangud	974	973	977
7	Tirumakudal Narsipur	963	961	973
	District Total:	**964**	**962**	**967**

This table gives the talukwise sex ratio for rural and urban population as per 2001 census. It is observed from the above table that the sex ratio for rural areas is 962 and urban area is 967. The sex ratio for rural areas is highest (989) in Krishnarajanagara whereas in urban area it is highest (977) in Nanjangud . The sex ratio of the district as a whole is 964 female per 1,000 males.

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Sl. No.	Name of C. D. block	Sex ratio
1	2	3
1	Piriyapatna	934
2	Hunsur	962
3	Krishnarajanagara	989
4	Mysore	943
5	Heggadadevankote	973
6	Nanjangud	973
7	Tirumakudal Narsipur	961
	District (Rural) Total:	**962**

This table highlights the data on sex ratio by CD Blocks which includes all villages in the district. The sex ratio for the district rural is 962. Comparatively the sex ratio is high in Krishnarajanagar followed by Heggadedevankote and Nanjangud which is above the district rural sex ratio.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	21	1.7	9,770	0.6
700-749	7	0.6	5,321	0.3
750-799	16	1.3	7,146	0.4
800-849	19	1.6	7,768	0.5
850-899	91	7.5	85,779	5.2
900-949	281	23.1	398,807	24.0
950-999	415	34.1	719,235	43.4
1000-1099	312	25.7	405,799	24.5
1100+	54	4.4	19,274	1.2
District Total:	**1,216**	**100.0**	**1,658,899**	**100.0**
Sex ratio (Rural) for District:		**962**		

Sex ratio by taluks and CD Blocks has been presented in the previous tables i.e. Table No.6 and Table No.7. If the sex ratio of the rural population by ranges is given for the inhabited villages in the district the picture that would emerge is as indicated in the above Table No.8.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Piriyapatna	TP	966
2	Hunsur	TMC	963
3	Krishnarajanagara	TMC	964
4	Mysore	UA	967
5	(a) Mysore	M.Corp.+OG	967
6	(i) Mysore	M.Corp.	970
7	(b) Belvata	CT	942
8	(c) Bhogadi	CT	904
9	(d) Hebbalu	CT	943
10	Heggadadevankote	TP	953
11	Nanjangud	TMC	977
12	Bannur	TP	965
13	Tirumakudal-Narsipur	TP	990
	Sex ratio Urban for the district:		**967**

Data on urban sex ratio is presented for the district on the above table with reference to urban agglomeration/town, the sex ratio for the district urban is 967. The sex ratio is above the district urban figures and highest in Tirumakudal Narsipur (TP) i.e. 990. The details of sex ratio of other urban agglomerations/towns in the district can be observed from the above Table No.9

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TALUKS, 2001

Sl. No.	Name of Taluk	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

		Rural	32,219	16,497	15,722	953
		Urban	88,602	45,392	43,210	952
5	Heggadadevankote	Total	34,086	17,182	16,904	984
		Rural	32,539	16,362	16,177	989
		Urban	1,547	820	727	887
6	Nanjangud	Total	45,307	22,818	22,489	986
		Rural	39,700	20,047	19,653	980
		Urban	5,607	2,771	2,836	1,023
7	Tirumakudal Narsipur	Total	33,008	16,925	16,083	950
		Rural	29,102	14,900	14,202	953
		Urban	3,906	2,025	1,881	929
District Total:		**Total**	**323,555**	**164,934**	**158,621**	**962**
		Rural	**212,842**	**108,220**	**104,622**	**967**
		Urban	**110,713**	**56,714**	**53,999**	**952**

Taluks wise sex ratio of population in the age group of 0-6 years with rural, urban breakup for the district is presented in the above table. Data reveals that among the taluks the sex ratio in the age group of 0-6 is highest in Nanjangud (986) followed by Heggadadevana kote (984). The district total for sex ratio is 962. The rural sex ratio is higher when compared to the urban sex ratio for the district and also in taluks of the district. Except for Nanjangud where the urban sex ratio is the highest (1,023).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

	District (Rural) Total:	**212,842**	**108,220**	**104,622**	**967**

Sex ratio for 0-6 age group in the CD Blocks of the district is presented in this table. The sex ratio for the district rural is 967. Among the CD Blocks highest sex ratio is reported from Heggadadevankote (989) and lowest of (948) is reported from Krishnarajanagara CD Block.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	111	9.1	4,158	2.0
700-749	31	2.5	3,289	1.5
750-799	65	5.3	9,567	4.5
800-849	108	8.9	19,025	8.9
850-899	117	9.6	29,224	13.7
900-949	128	10.5	31,821	15.0
950-999	129	10.6	33,146	15.6
1,000-1,099	244	20.1	48,948	23.0
1,100+	283	23.3	33,664	15.8
District (Rural) Total	**1,216**	**100.0**	**212,842**	**100.0**
Sex ratio (Rural) for District :		**967**		

Sex ratio for the rural population by ranges has been given in the above table. Data reveals that except for the ranges 700-749 and 750-799 in all other ranges good number of villages are reported under each range though the sex ratio for the district rural is 967 females per 1,000 males. It is worth noting that 527 out of 1,216 inhabited villages have the sex ratio favourable for female child.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

	District (Urban) Total		**110,713**	**56,714**	**53,999**	**952**

The child sex ratio for the urban agglomerations/ towns of the district is given in the above table. Data reveals that the child sex ratio for district urban is 952 females per 1,000 males. Highest child sex ratio is noticed in Tirumakudal Narsipur (TP) (1,047) followed by Nanjangud (TMC) (1,023). Lowest child sex ratio of 822 is reported from Hebbalu (CT) of Mysore UA.

Taluk wise number and percentage of Scheduled Castes/Scheduled Tribes population is given in table 14. The total Scheduled Castes/Scheduled Tribes population in the district is 467,640 and 271,351 persons respectively. The rural-urban distribution reveals that 74.6 per cent of Scheduled Castes live in rural area and 25.4 per cent of them live in urban areas. As regards Scheduled Tribes 82.6 per cent live in rural areas and 17.3 per cent of them live in urban areas. The table also indicate the percentage of Scheduled Castes/Scheduled Tribes population to total population in the district.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TALUKS, 2001

District (Rural) Total:		**1,658,899**	**348,780**	**224,254**	**21.0**	**13.5**

This table depicts population of Scheduled Castes and Scheduled Tribes and its percentage proportion to total population. In rural areas of the district 21.0 per cent and 13.5 per cent population comprises of Scheduled Castes and Scheduled Tribes respectively. The highest concentration of both Scheduled Castes and Scheduled Tribes with 27.2 per cent and 21.1 per cent respectively is found in Heggadadevankote. Whereas the lowest concenration of both Scheduled Castes and Scheduled Tribes with 14.6 per cent and 6.7 per cent respectively is reported from Krishnarajanagara.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	199	16.4	-	0.0
Less than 5	104	8.6	3,384	1.0
5-10	156	12.8	22,286	6.4
11-20	253	20.8	71,619	20.5
21-30	206	16.9	89,099	25.5
31-40	128	10.5	66,188	19.0
41-50	70	5.8	40,670	11.7

51-75	45	3.7	44,649	19.9
76 and above	36	3.0	29,758	13.3
District Total	**1,216**	**100.0**	**224,254**	**100.0**

The above table shows the distribution of villages by percentage range of Scheduled Tribes population to total population and the per cent distribution of Scheduled Ttribes population in different ranges. Data reveals that out of 1,216 inhabited villages 487 villages do not have Scheduled Tribes population. The maximum Scheduled Tribes population falls in the range of less than 5 per cent in 226 villages. There are only 36 villages which comprises of more than 76 per cent of Scheduled Tribes population and the number of villages where Scheduled Tribes population varies between 51-75 per cent are 45.

Number and percentage of Scheduled Castes and Scheduled Tribes population for urban agglomeration/towns of the district is presented in table 18. Scheduled Castes/Scheduled Tribes constitute 12.1 per cent and 4.8 per cent of the district urban population. Highest (23.0 per cent) of Scheduled Castes population is reported from H.D.Kote (TP) and lowest of 7.9 per cent is reported from Bhogadi (CT). Highest of 27.4 per cent of Scheduled Tribes population is reported from Tirumakudal-Narsipur and lowest of 1.8 per cent is reported from Bhogadi (CT).

7	(b) Belvata (CT)	861	938
8	(c) Bhogadi (CT)	886	692
9	(d) Hebbalu (CT)	1,000	912
10	Heggadadevankote (TP)	905	1,067
11	Nanjangud (TMC)	1,007	1,022
12	Bannur (TP)	999	969
13	Tirumakudal - Narsipur (TP)	878	1,056
	Sex ratio (Urban) for the district:	**956**	**986**

Sex ratio among Scheduled Castes/Scheduled Tribes in urban agglomeration/towns of the district is presented in this table. Sex ratio for the district urban for Scheduled Castes is 956 and Scheduled Tribes is 986. Among Scheduled Castes highest sex ratio of 1,007 and 1,000 is reported from Nanjangud (TMC) and Hebbalu (CT) respectively. Both are more than the district urban sex ratio. The lowest of 861 is reported from Belavata (CT). Among Scheduled Tribes highest sex ratio of 1,067 is reported from Heggadadevankote (TP) followed by 1056 from Tirumakudal- Narsipur (TP) which are higher than the district urban sex ratio. The lowest sex ratio 692 is reported from Bhogadi (CT).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TALUKS, 2001

Sl. No.	Name of Taluk	Total / Rural / Urban	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

The above table provides information on sex wise literacy rate of rural and urban population inhabiting in the taluks of the district. The literacy rate of the district works out to 63.5 per cent. It is 70.9 per cent for males and 55.8 per cent for females. Gap in male and female literacy rate is 15.1 per cent. Highest literacy rate of 76.5 per cent is reported from Mysore taluk, which is higher than the district literacy rate. It can also be noticed that the urban literacy rate is generally higher both at district as well as taluk level.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Piriyapatna	105,704	64,973	40,731	103,626	43,284	60,342	58.1	68.9	46.5	22.4

7	Tirumakudal- Narsipur	111,841	64,791	47,050	133,998	60,562	73,436	51.6	58.7	44.3	14.4
District (Rural) Total:		**749,655**	**449,708**	**299,947**	**909,244**	**395,671**	**513,573**	**51.8**	**61.0**	**42.3**	**18.7**

The C.D. Block wise percentage of literacy in the district accounts for 51.8 per cent in which male-female literacy rate is 61.0 per cent and 42.3 per cent respectively. Among the C.D. blocks highest 58.1 per cent is reported from Piriyapatna followed by Krishnarajanagara 56.5 per cent. Highest percentage of male literates has also been reported from these C.D. blocks. Highest 22.7 per cent of gap in male-female literacy rate is reported from Krishnarajanagara and lowest of 14.4 per cent from Tirumakudal-Narsipur.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	3	0.2	13	0.0
1-10	-	0.0	-	0.0
11-20	4	0.3	2,509	0.2
21-30	27	2.2	22,021	1.3
31-40	146	12.0	190,294	11.5
41-50	387	31.8	567,840	34.2
51-60	396	32.6	527,672	31.8
61-70	186	15.3	286,539	17.3
71-80	44	3.6	44,589	2.7
81-90	18	1.5	17,385	1.0
91-99	1	0.1	18	0.0
100	4	0.3	19	0.0
District Total:	**1,216**	**100.0**	**1,658,899**	**100.0**
Literacy rate for District:		**63.5**		

Sex wise literacy rate by taluks and C.D. blocks has been presented in the previous table nos.21 & 22. Literacy rate of the district rural is 63.5 per cent. If the distribution of villages are made by range of literacy rate in the district the picture that would emerge would be as indicated in the above table No.23.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

District (Rural) Total:		**80,914**	**49,423**	**31,491**	**143,340**	**63,699**	**79,641**	**41.9**	**50.8**	**32.9**	**17.8**

This table provides information on sex wise literacy rate among the Scheduled Tribes in the C.D. blocks of the district. The percentage of literacy rate for the district rural is 41.9 per cent, the percentage of male literacy rate works out to 50.8 per cent and that of female is 32.9 per cent. The gap in male-female literacy rate is 17.8 per cent. Highest male and female literacy rate of 66.8 per cent and 40.8 per cent respectively and highest male-female literacy gap is also reported from Krishnarajanagara only. Lowest literacy rate of 35.2 per cent, lowest male-female literacy rate of 42.5 per cent and 27.7 per cent respectively is reported from Mysore C.D. block.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	29	4.0	295	0.1
1-10	6	0.8	702	0.3
11-20	27	3.7	3,971	1.8
21-30	85	11.7	32,421	14.5
31-40	188	25.8	67,293	30.0
41-50	195	26.7	72,912	32.5
51-60	112	15.4	33,918	15.1
61-70	44	6.0	10,610	4.7
71-80	25	3.4	1,905	0.8
81-90	10	1.4	193	0.1
91-99	-	0.0	-	0.0
100	8	1.1	34	0.0
District Total:	**729**	**100.0**	**224,254**	**100.0**
Literacy rate for District (Rural):		**41.9**		

The sex wise literacy rate among Scheduled Tribes has been given in the previous table. This table highlights the distribution of villages by literacy rate for the Scheduled Tribes population. Literacy rate for the district rural is 41.9 per cent. If the distribution of villages is made by range of literacy rate, the picture that would emerge for all the 729 inhabited villages of the district would be as indicated in the above Table No.29.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Sex wise distribution of categories of workers for the urban population of district is given in the above table by number and percentage. It can be seen from the above table that, the percentage of total workers for the district urban is 33.7 per cent. Highest percentage of (39.0 per cent) total workers are reported from the Belvata urban and lowest percentage of (33.2 per cent) the same is reported from Mysore (M.Corp.+OG) and Mysore (M. Corp.). Highest percentage of female workers (22.4 per cent) is reported from Heggadadevankote. The percentage of non-workers accounts for 66.3 per cent for the district urban whereas main workers constitute 31.7 per cent.

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN TALUKS, 2001

Note: Per cent of Worker to total worker are given in brackets

The distribution of total workers by sex according to four fold industrial category in taluks is highlighted in this table. Data reveals that Agricultural labourers and cultivators together constitute 58.3 per cent of the total workers. At taluk level maximum number of cultivators are found in Piriyapatna whereas number of agricultural labourers are more in Tirumakudal Narsipur. The number of other workers is found more in Mysore taluk.

Note: Percent of Workers to total workers are given in brackets

The distribution of total workers by sex according to four-fold industrial category in C.D. Blocks is highlighted in this table for the C.D.blocks of the district which include only the rural population. Data reveals that Agricultural labourers and cultivators together constitute 81.0 per cent of the total workers. At taluk level maximum number of cultivators are found in Piriyapatna. Whereas agricultural labourers are more in Tirumakudal Narsipur. Number of other workers are found more in Mysore.

The distribution of total workers by sex according to four fold industrial category in urban agglomerations/towns is highlighted in table 36. Data reveals that other workers constitute 90.9%. for the district urban. Cultivators and agricultural labourers constitute 5.0 per cent whereas household industry workers constitute 4.1 per cent. Highest number of cultivators and agricultural labourers are found in Bannur TP and maximum numbers of female agricultural labourers are reported from Heggadadevankote

ix) Brief analysis of Village Directory and Town Directory data based on inset tables 37 to 47.

The table-37 reveals brief analysis of various amenities, which are available in C.D. block. Data reveals that 90.7 per cent of the inhabited villages have educational facility and 96.0 per cent have improved drinking water facilities. Medical facility is available for 37.7 per cent of villages. Of the 1,216 inhabited villages only 375 villages have post office. About 702 villages have telephone facility. Power supply is available to 1,215 villages which is about 99.9 per cent of the total inhabited villages. C.D.block wise analysis shows that 100 per cent i.e. all the villages in Tirumakudal Narsipur have educational, improved drinking water and power supply facilities. The position of medical facility varies from 31.8 per cent to 39.7 per cent in all the C.D. blocks. Except for Tirumakudal Narsipur where it is 59.5 per cent.

Note : - Percentages are given in brackets.

***** Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

If the household has access to drinking water supplied from a tap or a hand pump / tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

C.D. Blockwise distribution of rural population served by different amenities is presented in Table No.38. This table depicts that 99.0 per cent of the rural population is served by educational institutions while 99.6 per cent of rural population have improved drinking water facility. About 58.9 per cent of the rural population have medical facility and 56.4 per cent of rural population is served with post office facility.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	113	-	-	113
(b) Middle School	445	55	-	500
(c) Degree College	128	333	746	1,207
2. Medical:-				
(a) Hospital	241	341	608	1,190
(b) PHC	739	382	-	1,121
3. Post Office	700	124	17	841
4. Telephone	426	46	42	514
5. Bus Service	198	18	3	219
6. Banks				
(a) Commercial Bank	542	396	177	1,115
(b) Co-operative Bank	234	346	486	1,066
7. Agricultural Credit Societies	556	279	241	1,076

Certain amenities are not available within the village. In such cases data on distance range is given in the above table. About 113 villages, which do not have primary schools, have this facility at a distance of less than 5 kms. Nearly 746 villages have access to degree colleges located at a distance of more than 10 kms. Again 333 villages have this facility at a distance ranging between 5-10 kms. There are 608 villages having hospital facility at a distance of more than 10 kms. and 739 villages have PHC at a distance of less than 5 kms. range. Regarding facilities like post office, telephone and bus service, more number of villages have these available at a distance of less than 5 kms range. 542 villages have commercial bank at a distance of less than 5 kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

	(100.0)	(90.7)	(37.7)	(30.8)	(57.7)	(82.6)	(15.8)	(11.5)	(74.3)

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table No.40 depicts distribution of villages according to distance from the nearest statutory town and availability of certain amenities. It is observed that the distance from the statutory town to the villages does not exceed 50 kms except for 4 villages. About 246 villages have been classified as unspecified as far as distance is concerned. Distance from nearest statutory town to the village has been correlated with the type of amenities available as per 2001 census. Four categories of distance range per nearest statutory town and type of amenities available in the villages is indicated in the above table.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or Otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table No.41 depicts the distribution of villages according to population range and availability of certain amenities. It can be seen from the above table that 606 villages are having a population of less than 1,000. Only two villages have population above 10,000. About 362 villages have population in the range 1,000-1,999. Percentage of villages having grants and agricultural credit socities is less in all ranges. More number of villages has education and improved drinking water facility. Power supply is available in almost all the villages.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable
1	2	3	4	5	6
1	Piriyapatna	197	77,912	63.7	18.8
2	Hunsur	192	81,124	52.3	19.6
3	Krishnarajanagara	156	54,397	74.4	41.0
4	Mysore	131	65,553	72.0	13.5
5	Heggadadevankote	243	137,166	44.0	13.4
6	Nanjangud	176	93,079	76.9	28.4
7	Tirumakudal Narsipur	121	56,292	78.7	49.8
	District Total:	**1,216**	**565,523**	**63.0**	**25.6**

Note : - Cultivable area = irrigated area + unirrigated area

Table No.42 depicts the distribution of villages according to land use. Data reveals that, only the cultivable area of the rural district has been taken into consideration, which include both irrigated and un-irrigated areas. The cultivable area of the rural portion comprise of 63.0 per cent of the total area. Among the C.D. blocks Tirumakudal Narsipur is having the highest percentage of cultivable area i.e. 78.7 per cent. If the percentage of irrigated area to total cultivable area is considered Tirumakudal Narsipur C.D. block is having the highest with 49.8 per cent.

Table 43 presents the total per capita receipt of the urban district is Rs.533.0 and the total per capita expenditure is Rs.479.0. The receipts are mainly from other sources and only Rs.141.0 is received through taxes. Per head expenditure is incurred mainly on general administration, public works and other expenditure, which account for Rs.147.0, Rs.102.0 and Rs.223.0 respectively.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bannur (TP)	6.5	4.7	2.6	0.9	0.4
2	Heggadadevankote (TP)	10.0	5.8	4.2	1.7	0.8
3	Hunsur (TMC)	6.6	3.2	2.1	0.5	0.2
4	Krishnarajanagara (TMC)	9.8	6.2	2.9	1.0	0.3
5	Mysore (M.Corp*)	4.5	2.5	1.4	0.3	0.5
6	Nanjangud (TMC)	7.7	4.6	2.3	0.6	0.4
7	Piriyapatna (TP)	7.4	4.7	3.4	2.0	0.7
8	Tirumakudal-Narsipur (TP)	6.0	4.0	3.0	2.0	1.0
	District Total	**5.1**	**2.9**	**1.7**	**0.4**	**0.3**

*.Includes Outgrowth

The educational institutions per 10,000 population in various statutory towns in the district given above indicates that 5.1 per cent primary, 2.9 per cent of junior secondary/middle and 1.7 per cent of secondary/matriculation schools are available in the towns. Highest per cent of primary and secondary/matriculation schools are reported from Heggadadevankote. Senior secondary and college constitute 0.4 and 0.3 per cent respectively.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bannur(TP)	17
2	Belvata (CT)	-
3	Bhogadi (CT)	-
4	Hebbalu (CT)	-

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
5	Heggadadevankote (TP)	42
6	Hunsur (TMC)	13
7	Krishnarajanagara (TMC)	20
8	Mysore (M.Corp*)	24
9	Nanjangud (TMC)	17
10	Piriyapatna (TP)	26
11	Tirumakudal-Narsipur (TP)	30
	District Total	**23**

*.Includes Outgrowth

The number of beds in medical institutions in towns is surmised as 23 per 10,000 population. While it is low in Hunsur (TMC) of 13 beds, highest of 42 beds are reported from Heggadadevankote (TP). No bed is available in Belvata (CT), Bhogadi (CT) and Hebbalu (CT).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Bannur	23,239	5,332	22.9
2	Heggadadevankote	12,045	1,220	10.1
3	Hunsur	43900	7,123	16.2
4	Krishnarajanagar	30,633	3,530	11.5
5	Mysore	787,179	68,543	8.7
6	Nanjangud	48,232	9,103	18.9
7	Piriyapatna	14,924	856	5.7
8	Tirumukudal Narsipur	9,927	1,388	14.0
	District Total	**970,079**	**97,095**	**10.0**

The proportion of slum population in towns constitute 10.0 per cent of the district's town population. It is reported in all the statutory towns. Except in Piriyapatna and Mysore, slum population in other towns exceeds 10.0 per cent. The highest of 22.9 per cent is reported in Bannur and the lowest of 5.7 per cent from Piriyapatna.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bannur (TP)	Cut Sizes of Timber	Rice
		Sugar	Cut Sizes of Timber
		Jaggery	Sheeps
2	Heggadadevankote (TP)	Bricks	Tobacco
		Tobacco Processing	Cotton
			Ragi
3	Hunsur (TMC)	Paper	Tobacco
		Cotton	Plywood
		Woollen	Woollen
4	Krishnarajanagara (TMC)	Paper	Beedies
		Beedi	Package Paper
			Rice

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
5	Mysore (M.Corp*)	Incense Sticks, Wood	Sandal Oil
		Sandal Oil	Incense Sticks
		Silk Sarees	Silk Sarees
6	Nanjangud (TMC)	Cotton Thread	Cotton Thread
		Ayurvedic Medicines	Ayurvedic Medicines
		Coffee	Coffee
7	Piriyapatna (TP)	Arecanut	Rice
		Tobacco Processing	Arecanut
			Tobacco
8	Tirumakudal-Narsipur (TP)	Beedies	Rice
		Silk Yarn	Silk Thread
		Groundnut Oil	Groundnut Oil

*.Includes Outgrowth

Different types of commodities are manufactured as well as exported from the district. Almost all the towns are engaged in trading of commodities produced or manufactured by them. Some of the important products include sugar, jaggery, cotton, coffee, arecanut, etc. Beedies and tobaccos are also manufactured and exported from the district. Few towns reported to have woollen and silk weaving units. The Mysore Silk Sarees, which are famous around the globe, is exported from the district. The townwise details can be seen from the table.

x) Brief analysis of the data on houses and households amenities, Houselisting Operations, Census of India 2001 based on inset tables 48 to 52.

Table No.50 gives the distribution of households by availability of different amenities. Data reveals that, 95.2 per cent of the households have improved drinking water, 78.5 per cent of them have electricity, 73.9 per cent have bathroom 44.1 per cent have toilet facility and 65.8 per cent have drainage facility. The rural urban break up can be seen from the above table. All the above facilities are reported to be higher in the urban areas.

Table 51 provides data on type of fuel used for cooking by the households. In the different types of fuel listed above, three types are put to use by the majority of the households. Firewood, LPG and Kerosene are widely used by 59.4, 21.0 and 13.2 per cent of the households respectively. LPG and Kerosene are important type of fuel for urban households while 85.3 and 7.2 per cent of rural households use firewood and crop residue respectively for cooking. Talukwise details can be seen from the table.

The data on banking services available by the households and certain specified assets owned by them are given above. The percentage of households availing banking services is less which constitute 31.3 per cent, of this 48.3 per cent of urban population and 21.0 per cent of rural population avail banking facility. With regard to assets, percentage of households holding these assets does not exceed 50 per cent. The maximum number of households who owns any of the specified assets listed above is the 44.1 per cent having radio/transistor. Some 35.4 and 34.3 per cent possess television and bicycle respectively. These are more in case of urban households. Talukwise details can be seen from the table.

(xi) Archaeology

The district is rich in antiquarian remains including numerous inscriptions. These inscriptions found in the district are the most important source for outlining the history from the 3rd to the 19th century. Also there are number of temples in the district which are important from religious as well as archaeological point of view. Some of the prominent archaeologists who had surveyed the tract had discovered the existence of the pre-historic activities of man in the alluvial plains of the river Cauvery and its tributaries. These are mostly of the Neolithic and megalithic phases found in Mysore and Tirumakudal Narasipur taluks. Discovery of Paleolithic tool in Tirumakudal-Narsipur taluk indicates the existence of Paleolithic nomadic man in the area. Similar discovery was unearthed in Mysore city but not much is known about their activities. Neolithic sites at Hemmige, Muttalvadi and T. Narasipur were excavated by Archaeologists. The other Neolithic site is at Yachagali

in Nanjangud taluk. Megalithic sites found in Nanjangud and T.Narasipur taluks are noteworthy. The recent excavations of Megalithic site at Koppa in Mysore is a prominent location. Apart from these, a pre-historic site belonging to Neolithic age at Kittur in Piriyapatna was discovered. This site is located in a valley where the eastern and western ghat ranges converge into a group of hills called Nilgiri hills. This is a protected site and comes under the administrative control of Archaeological Survey of India. As stated earlier, the district is known for its numerous temples built by the Gangas, Hoysalas and the Mysore rulers. It has been enriched by their love for art by way of constructing beautiful temples endowed with tall 'Gopuras' and huge pillared halls. Though all the temples are beautiful in many dimensions, it is worth mentioning about the five temples of archaeological importance, which are protected and controlled by the Archeological Survey of India. One such protected monument is Sidilu Mallikarjuna temple at Bettadapura in Piriyapatna taluk. The temple date back to 12th century A.D and it belongs to Chola-Hoysala period. There are many inscriptions on the walls of the temple. The temple is on the summit of the hill and it can be reached by climbing nearly 3,108 steps. It is dedicated to Mallikarjuna. There are huge copper vessels of antiquity in the temple, which indicates large scale feeding of pilgrims. Sri Srikanteshwara temple is another protected monument at Nanjangud. This is the most notable temple and place of pilgrimage at Nanjungud which has grown in the course of its 1,000 years existence, beginning from Ganga period till 19th century. The temples pillars built in Hoysala style indicates that it must have been built during 13th century. Keshava temple at Somanathpur in T.Narasipur taluk is another protected monument. The temple is the most ornate and a perfect model of the Hoysala style of temple architecture. Similarly Keerthinarayana temple at Talkad in same taluk is a protected monument, and it is built in 1117 A.D. Also at the same place is the Vaidyeshware temple, a protected monument built according to Ganga, Chola and Hoysala features is datable between 10th and 14th century A.D. The Vaidyeshwara linga in the temple is held with reverence by devotees.

The district is 770 mts. above sea level and 140 kms from Bangalore, this imperial city was the erstwhile capital of the Wodeyars. Also known as the City of Palaces, Mysore retains a quaint charm that never fails to enchant.

(xii) Brief description on places of religious, historical or archaeological and tourist importance in villages and places of tourist interest in the towns of the district

Bettadapura (Piriyapatna Taluk):

The isolated conical hill of Bettadapura, 1350 metres above the sea level is a conspicuous object to all the country around. Said to have been founded in the 10th century by Vikrama Raya, a fugitive from the inundation of Dwaraka, Bettadapura was formerly a Jain Principality. There is an Anjaneya temple on the western slope of the smaller hill close to the hamlet called Koppal. The lofty hill of the southwest of the village site contains a temple dedicated to Mallikarjuna. The metallic figure of Tandaveswara in the temple is a very fine piece of South Indian workmanship in bronze.

Kuppe (Chunchanakatte) (Krishnarajanagara Taluk):

Chunchanakatte is a dam across the Cauvery built in an advantageous position, a short distance from the head of a narrow gorge called Dhanushkoti and a few hundred yards above the spot where the river falls from a height 60 to 80 feet in a succession of cascades. The Ramasamudram channel led off from this dam, together with the *anicut* itself, was constructed by Chikkadevaraja Wodeyar of Mysore who came to the throne in 1672 A.D The rapids in the river invest the spot with great sanctity. A festival in honour of Rama and cattle fair is held here annually in January for about 15 days.

Mirle (Krishnarajanagara Taluk):

This place is also associated with Sri Ramanujacharya. When persecuted by the Chola king Kulottunga, Ramanujacharya is said to have fled the Chola country and first stayed at Vahnipushkarini (the place now known as Mirle) from where he moved on to Saligrama.

Saligrama (Krishnarajanagara Taluk):

Situated on the north bank of the Cauvery, this place is esteemed as sacred by the Shri Vaishnavas on account of its having been the residence of Sri Ramanujacharya.

Chamundibetta (Mysore Taluk):

This village consists mainly of a rocky hill, two miles south-east of the fort of Mysore, that rises to a height of 1074 metres above sea level. The oldest temples of Marbbala or Mahabaleswara is situated on the hill and this was endowed by the Hoysala King Vishnuvardhana in 1128 and also in 1620 by a descendant of the Vijayanagar kings, ruling at Chandragiri. This temple stands to the south of the famous Chamundeswari temple. The hill takes its name from the goddess Kali or Chamundi, the consort of Shiva held to delight in blood who is worshipped in a temple on the summit. Human sacrifices were said to have been common here in olden times but were rigorously put a stop by Haidar Ali. Krishnaraja Wodeyar III got the temple repaired in 1827 and furnished it with a tower. The temple is a fine quadrangular structure and is a landmark for many miles around the city. In 1848 the king offered the Simha Vahana and other animal cars used in the processions. Chamundeswari being the patron deity of the Wodeyars of Mysore the temple enjoyed the royal patronage. On the top of the hill there is a palace of the former Maharajas of Mysore. Now Chamundibetta stands included in Mysore Urban Agglomeration.

Annual car festival of Chamundeswari is held during the full moon day of Ashvija Masa (September-October). The huge bull, Nandi halfway up this hill is carved out of a monolith and is artistically executed with rich ornaments. On the hill close to the palace is seen an imposing figure of Mahishasura holding a sword in his right hand and a serpent in the left. To the east of this is the beautiful Lalithadri hill.

Dyavalapura (Devalapura) (Mysore Taluk):

This village in Mysore taluk has an inscription, which refers to Sripurusha the Ganga King of the 8th century A.D. There is a small shrine at this place containing the 'gaddige' tomb of Manteswami.

Kyathamaranahalli (Ketamanhalli) (Mysore Taluk):

This village in Mysore taluk has a large number of *veeragals* (hero stones) none of which bears any inscription. The goddess of the village, a stone pillar about two feet high with human head, is called Huliyamma, because, according to the tradition she was brought from Huliyurdurga. On the way to the village a mutilated Jina figure about 2 feet high is found lying to the right. A portion of this village is incorporated within the limits of Mysore city and the rest in Urban Agglomeration.

Varuna (Mysore Taluk):

From the remains at this place, it is evident that the place is of great antiquity. There is a Ganga inscription of the 8th century. At the close of the 9th century, this place appears to have been the capital of the chiefs of a minor branch of the Chalukya dynastry named Durga and Goggi. The oldest temple in the village is that of Mahalingeswara, which is probably identical with the Buteswara mentioned in the old inscription. Minute sculptures representing scenes from the Ramayana are found here on a narrow frieze running under the roof. The village has also a temple of Mahadeswara built in 1828 A.D. in the name of Devarajammanni queen of Krishnaraja Wodeyar III. A mound to the west of the village is known as Basti-tittu where once a large basti or Jain temple stood. Six mutilated figures of Jina are the only remains now. On the basis of the inscriptions at the Varakodu Varadaraja temple it is found that the materials of this basti were removed and used for the constructions of the temple at Varakodu.

Mysore Palace:

The residence of the Wodeyars, this structure is one of the largest of its kind in India. Built in 1912 in the Indo-Saracenic style, this palace exudes a grandeur that is unmatched.

The Golden Royal Throne, the Durbar Hall, the Kalyana Mandap, the Gallery and the Ambavilas are the main attractions here.

Sri Jayachamarajendra Art Gallery:

Housed in the Jaganmohan Palace, this gallery has a collection of exquisite paintings dating back to 1875. The collection includes paintings by Raja Ravi Varma, the Russian Svetoslva Roerich and the traditional Mysore gold leaf style of painting.

St.Philomena's Church:

In the Gothic style, it is one of the largest churches in the country and has beautiful stained-glass windows.

Mysore Zoo :

Houses some rare animals bred in captivity, and exotic species of plants.

Brindavan Gardens:

North-west of Mysore is the KRS Dam and the ornamental Brindavan Gardens. The musical fountains and colourful lights transform this place into a fairyland in the evenings (actually located in Mandya district but due to its nearness, 19 kms away from Mysore it is popularly known as Brindavan Gardens of Mysore).

Shopping:

Sandalwood, its products and silk are Mysore's specialities, sold in Government owned emporia at fixed prices. The Government Silk Factory offers silk straight from the looms.

Festivals:

The **Dasara** celebrations in Mysore bring back the glory and grandeur of a bygone era. During Sept-October the entire city rejoices with colour and gaiety. The 10-days festivity culminates in a grand procession on the last day-Vijayadashami.

Hampapura (Nugu) (Heggadadevankote Taluk): Nugu river joins Kabini near this village. It is said that gold dust in small quantities has been occasionally found in the bed of the stream, but never sufficient to repay the trouble of searching for it. Gold dust is supposed to be washed down from the source of the river in the Nilambur hills in Malabar.

Kakanakote Forest (Heggadadevankote Taluk):

This forest area was formerly being used for the famous Khedda operations to catch the wild elephants. A major part of this is now submerged under the Kabini Reservoir.

Karapura (Heggadadevankote Taluk):

This was also an area of thick forest vegetation that formed a part of the site used for Khedda operations in the past. Now a major part of this forest is also submerged under the Kabini Reservoir.

Kittur (Heggadadevankote Taluk):

This village is of historical interest, for it is identified with Kittipura or Kirthipura, which was the capital of the Punnad Rajas. An inscription of the 11th century describes it as 'the royal residence, the immense great city, Kirthipura'.

Malali (Heggadadevankote Taluk):

This village contains two important Jain bastis. In Bhimanakote, a suburb attached to it, a big Jatra is held every year.

Badanavalu (Nanjangud Taluk):

At this village a mutilated Jain figure with a well carved 'Prabha" adorned with a triple umbrella is found. Near the Siddappa temple to the west is found a figure of Nambi-Narayana. These indicate that at one time this village had a Vishnu temple as well as a Jain temple.

Devanur (Nanjangud Taluk):

The village has several small temples of which that of Nambi-Narayana has a good figure. The Puradayya temple to the south of the village has a bull seated on a pillar (Upparige-basava). This portion of the village is said to be the site on which an old village named Pura stood. Similarly, the site near the Malleswara temple is said to have once been occupied by a village named Baguru.

Herathale (Hedatale) (Nanjangud Taluk):

The Lakshmikanta temple at this village is a three celled structure built of granite in the Hoysala style. From the inscription here it is learnt that the temple existed here before 1292 A.D. The Nagareswara temple situated on the bank of the Gundal River is also a Hoysala building in granite with a stone tower. The temple is in a dilapidated condition.

Kalale (Nanjangud Taluk):

This place was the capital of a line or chiefs known as the Kalale chiefs. An old structure, locally known as the Pattada-Chavadi is said to have been their coronation hall and the plain in front of it is said to be the site on which their palace once stood. The Lakshmikantha temple at the village is a good Dravidian structure with stucco figures in fine niches over the roof. The Kalale chiefs hold a prominent place in the history of this region.

Nagarle (Nanjangud Taluk):

The Durga Parameshwari temple at this village has a four-armed figure. The village goddess Malagarasi is seated stucco figure, about 3 feet 6

inches high, bearing in the upper hands a discus and a conch and in the lower a sword and a cup. The ruined Parsvanath basti here is of some architectural merit. An epigraph of the time of the Chola king Rajendra Deva has been found here.

Nerale (Nanjangud Taluk):

There is a Virabhadra temple at this village with a four-armed figure. According to an inscription found in the village the name of the village is Nirili.

Suthur (Suttur) (Nanjangud Taluk):

This village is called Srotriyur in a Chola inscription of 1032 A.D. and Sottiyur in a Hoysala record of 1169 A.D. The present name occurs in the records of the Vijayanagar period. In 1169 A.D., it was the headquarters of Lakmayya, a General of the Hoysala king Narasimha I. The Someswara temple here is a three-celled Hoysala structure. Here, we have a rather rare instance of a Hoysala temple built of granite with a carved tower built of potstone. There is also a temple of Narayana, which is in ruins. The village has a Lingayat Mutt of the 15th century. One of the famous *Swamis* of the mutt was Shivaratri-Odeyar. This mutt has of late been running several educational institutions.

Algodu (Tirumakudal Narsipur Taluk):

The village has the temples of Siddeswara and Chennigaraya or Keshava. These temples contain a few inscription of the Ganga period (350 A.D. to 1050 A.D.).

Somanathapura (Tirumakudal Narsipur Taluk):

This place is noted for the temple of Prasanna Channakeshava. This elaborately carved structure is attributed to Jakanachari, the famous sculptor and architect patronised by the Hoysala kings. According to an inscription the construction of this temple was completed in 1269 A.D. by Soma, a member of the royal family. This temple is a splendid example of the Hoysala style of architecture. The Panchalinga and Lakshminarasimha temples are to the east and southwest of the Keshava temple. The former, mostly in ruins is a large structure in this Dravidian style and the latter is built in the Hoysala style.

Sosale (Tirumakudal Narsipur Taluk):

This village is the headquarters of the Vyasaraya *matha*. The swamiji of the *matha* has in his possession a large number of copper plate grants. These are engraved in Tamil, Telugu, Nagari and Kannada characters and record the grants by the Vijayanagar kings, Nayaks of Madurai and others.

Talakad (Tirumakudal Narsipur Taluk):

This is a place of great antiquity. Sri Rama is said to have stayed for a while on his way to Lanka. The earliest notice of the city of Talakad is in connection with the Ganga line of kings. Harivarma (247 - 266 A.D.) is said to have resided in the city of Dalavanapura (Talakad) in the Karnataka desha. In the middle of the 14th century, Talakad was ruled by Vijayanagar kings. In 1634 A.D. Mysore Rajas conquered the city, the old city of Talakad is now completely buried under the sands. It is said that more than thirty temples also lay buried under the sand dunes. At Talakad there are the Vaidyeswara, Pataleswara and Maraleswara temples containing three of the well-known 'Panchalingas'. The remaining two Panchalingas are Arkeswara at Vijayapura and Mallikarjuna at Mudukudore. The temples buried in the sand are opened for the ceremonial worship on every occasion when there will be five Mondays in the month of Karthika. This usually occurs once in twelve years. On these occasions a large number of devotees visit this place to have Panchalinga Darshana.

Tirumukudal (Tirumakudal Narsipur Taluk):

The Agastyeswara temple here is a large structure enshrining Agastyeswara in the form of a *Saikatalinga* or *linga* formed of sand with a cavity at the top in which there is always some water representing the divine Ganga. There is also another temple of Hanumanteswara.

(xiii) Scope of Village Directory and Town Directory

Village Directory

Village Directory provides micro-level data, which will help the planners in formulation of micro-level developmental plans as the C.D.Block is the lowest administrative unit for developmental planning. Village wise information regarding the availability of certain basic amenities and facilities, within the village, as well as the manner of utilization of the land in the concerned village is furnished in the village directory. The village directory format adopted for the 2001

Census has 23 columns whereas in the 1991 Census there were only 18 columns. When compared with the 1991 Census Village Directory format, column 9, which refers to the day or days of weekly market/ hat if any., has been now left out. New inclusions are in respect of facilities like banks, agricultural credit societies, non-agricultural credit societies, other cooperative societies, number of recreational and cultural facilities like cinema/ video hall, sports club, stadium/auditorium; receipt of news papers/magazines and the name of the most important commodities manufactured in the village. In all the 23 columns in this tabulation statement, first 3 columns relates to serial number, name of the village with location code and area of village while the next 2 provide information on total population and number of households in the village as per 2001 Census. The next 8 columns relate to basic amenities such as educational; medical; drinking water (potable); post, telegraph and telephone, commercial and cooperative banks, agricultural, non-agricultural and other credit societies, number of recreational and cultural facilities such as cinema/ video hall, sports club and stadium/auditorium and communications (bus service, railway station, waterway). Information in respect of approach to village, nearest town and distance in Kms., power supply, receipt of news paper/magazine, names of the most important commodities manufactured in the village are furnished in columns 14 to 18. Amenities available within the villages are shown in the respective columns and if a particular amenity especially Primary School, Middle School, College, Allopathic Hospital, PHC, MCW, Post Office, Telephone, etc., is not available in the village, the respective abbreviation is given and next to it in brackets the distance in broad ranges viz., <5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility available to that particular village is indicated. The next 5 columns, 19 to 23 provide information regarding land use (i.e., area under different types of land use in hectares rounded to two decimal places) such as forest, irrigated land by source of irrigation, un-irrigated, cultivable waste (including gauchar and groves) and finally the area not available for cultivation.

Town Directory

The Town Directory section contains seven statements (I to VII) which furnish information on all the statutory towns in the district, on aspects such as growth history, physical aspects and location of towns, municipal finance, civic and other amenities in the town, medical, educational, recreational and cultural facilities, trade, commerce, industry and banking in the towns, civic and other amenities in slum areas of the town. The scope of the various column headings adopted during 1991 Census has remained unchanged in 2001.

Note :

1. The area figure for the district given under column No 3 against " Total" represents "Geographical Area" and has been furnished by the Surveyor General India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D. Blocks/Taluks in this district will not tally with the district figures (except urban), because the area figures for C.D. Blocks/Taluks represents the land-use area based on village wise area figures as reported by the local officers. The total area of the taluk may not tally with the aggregate of the areas of the villages listed for Census purposes for it includes the area of the statutory as well as non-statutory towns, villages which may be fully submerged and reserve forests which may not form part of any revenue village, if any, within the jurisdiction of the concerned taluk. The total area of the C.D. Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2. Out growths of towns in urban agglomerations are denoted by letter "OG".

3. The following abbreviations have been used to indicate the Civic Administration Status of town.

M.Corp	:	*Municipal Corporation*
CMC	:	*City Municipal Council*
TMC	:	*Town Municipal Council*
TP	:	*Town Panchayat*
NAC	:	*Notified Area Committee*
CB	:	*Cantonment Board*
CT	:	*Census Town (Non-Municipal Census Town / Non-Statutory Town)*

SECTION – I

VILLAGE DIRECTORY

(A) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and cooperative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and un-inhabited villages.

Column 3 : Area of the village

The area of the village in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are treated as equivalent to Pre-University Course.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health SubCentre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Hand pump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 :Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If the village receives any News Paper/ Magazines, the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Unirrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash "-" is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water fa cilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix- VII-A, VII-B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Grama Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

TOWN DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory Statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 -19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Grama Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998-1999

Itemwise amount of receipt andexpenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tubewell water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilolitres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/ Intermediate / Senior Secondary / PUC / Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, PrePrimary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate/ Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Cooperative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made

available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Cenus Abstract	Level of presentation
1. District Primary Census Abstract	District/CDBlock/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CDBlock/Town
3. Primary Census Abstract for Scheduled Tribes	District/CDBlock/Town
4. Village Primary CensusAbstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/WardLevel

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of taluks, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the taluks/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/taluks. The difference may be due to the fact that while the area covered by hills, forests

and rivers etc, have been accounted in the Taluks and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE II

Note on Fertility & Mortality and Migration - 1991 & 2001 Census

Fertility levels

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to Karnataka state and are defined as below: -

Migration

What is Migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another state of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why people migrate?

As in 1981 census, the reasons for migration were elicited in 1991 & 2001 census also. The reasons for migration were broadly categorized as (1) employment (2) business (3) education (4) family moved (5) marriage (6) natural calamities like drought, floods etc. and (7) other reasons. Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

ANNEXURE III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

27	Chamarajnagara	118	156	3.56	5.20	29.72	4.14	416	17.1

Marriage and age at marriage are important social phenomena and crucial factors in the analysis of the dynamics of fertility. As such, various measures of fertility estimated based on these crucial factors are highlighted in the above table.

Estimates of General Fertility Rate (GFR) a refined measure of fertility, defined as the number of live births per thousand women in the reproductive age-group 15-49 years is a useful tool for measuring fertility, and this rate is further estimated only for the married women which is defined as General Marital Fertility Rate (GMFR). The GFR and GMFR for the district are 118 and 156 respectively.

The cumulative value of the age-specific fertility rates at the end of the child bearing ages gives a measure of fertility known as Total Fertility Rate (TFR). It indicates average number of children expected to be born per woman during her entire span on reproductive period assuming that the age specific fertility rates to which she is exposed to, continue to be the same and there is no mortality. The same is expected for married women known as Total Marital Fertility Rate (TMFR). The estimated TFR and TMFR for the district are 3.56 and 5.20 respectively. The Crude Birth Rate (CBR) is 29.72

The most useful indices that can be derived from the question on number of children born alive is the average number of children ever born per ever married women by age-group. Since most of the

women complete their reproduction be the age-group 45-49, this indices is termed as completed fertility. The category ever married includes widows, divorced and separated women. As such the completed fertility for the district is 4.14 The child women ratio which is a relative measure to know the fertility performance of a women is 416 in the district.

One of the parameters, presenting female age at marriage relates to all women who live with their husbands, where some of them might have been recently married and some of them decades ago. It can be observed that mean age at marriage of the currently married women of Mysore district is lower than the state figure of 18.00.

The estimates of mortality indicators presented above have been obtained through indirect estimation using the data on the number of children ever born and number of children surviving to ever married women. The information on questions on children ever born and children surviving canvassed for all ever married woman have been tabulated by the age of the mother. This data has been converted into estimates of probability of dying before attaining a given age. These estimates have been worked out using Brass technique where (q_i) is the probability of a newborn child dying before the age i = 1, 2, 3 and 5. The table above shows the estimates of infant and child mortality derived for the year 1991 by sex.

The infant mortality rate (q_1) for the person is 57 and for male and female are 57 and 58 respectively. The estimates of under 5 mortality (q_5) for person is 89 and for male and female are 97 and 86 respectively.

Source : Migration Tables of 1991 & 2001 Census

The Anenxure IV(1) presents data on migration by their place of birth. The majority of migrants are those who are born within the state of enumeration, which constitute 92.00 per cent as per 2001 Census. Among them, migrants born elsewhere in the district are larger than migrants born in other districts of the state. Considerable proportion of population from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (2) - PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF LAST RESIDENCE

Source : Migration Tables of 1991 & 2001 Census

The Annexure IV(2) presents data on migration by their place of last residence. As far as the district is concerned, it can be seen that migrants whose place of last residence was within the state of enumeration but outside the place of enumeration, constitute major proportion of migrant population. As

per 2001 Census, their percentage accounts for 92.36 Among them, more is the inflow from within the district. Considerable proportion from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (3) - INTERSTATE IN-MIGRATION TO MYSORE DISTRICT

Place of Birth	1991 Census		2001 Census	
	Migrants	Percentage of total migrants	Migrants	Percentage of total migrants
1	2	3	4	5
Andhra Pradesh	5,900	8.62	5,333	10.91
Goa	70	0.10	-	0.00
Kerala	12,370	18.08	10,357	21.19
Maharashtra	1,810	2.65	2,313	4.73
Tamil Nadu	39,621	57.92	16,382	33.52
Rajasthan	0	0.00	4,083	8.36
Total for 5 states	59,771	87.37	38,468	78.72
Other states	8,640	12.63	10,398	21.28
Total	**68,411**	**100.00**	**48,866**	**100.00**

The interstate in-migration to the district by their place of birth provided above, highlights the States with the largest contribution of migrants to the district. According to 2001 Census findings, large inflow of migrants are from Tamilnadu which accounts for 33.52 per cent followed by 21.19 per cent from Kerala. Considerable proportion of migrants are from Andhra Pradesh, Rajasthan and Maharashtra constituting about 10.91, 8.36 and 4.73 per cent respectively. Further the category migrants from 'Other States' has nearly doubled from 12.63 per cent in 1991 to 21.28 per cent in 2001.

ANNEXURE IV(4) - RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH

Place of Birth	Place of Enumeration-1991			Place of Enumeration-2001		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1. Within the state	725,470	479,423	246,047	654,756	432,303	222,453
	100.0	66.1	33.9	100.0	66.0	34.0
2. In other states of India	68,411	28,030	40,381	47,970	13,037	34,933
	100.0	41.0	59.0	100.0	27.2	72.8

Rural and urban composition of internal migrants by their place of birth is provided in the above statement. The data for both the census points out that majority of migrants within the State have relocated at rural areas. Whereas this trend slightly varies with migrants from other states of India, where large influx is seen in urban areas. The details can be seen from the statement.

ANNEXURE - V

Brief account of Main Religions in the District / Taluk as per 2001 Census

Religion forms an integral part of Indian Social System. For an Indian, it is a way of life rather than a faith. Indian Census, since its inception is collecting data on religion and presenting the same in its reports. In the pre-independence Census reports, the data on religion was being presented for 6 major religions viz., Hindus, Muslims, Christians, Sikhs, Jains and Buddhists. Besides, the minor religions have been classified under the category of 'Others'. The data on religion collected and presented by the Indian Census is the basic data of immense use for the researchers, anthropologists, sociologists, demographers, administrators, planners and even for a common man.

India - State differentials

The comparative data of the country and the state of Karnataka presented in Statement No.1 reveals that the religion wise concentration of population in the state of Karnataka is of three major religions viz., Hindus, Muslims and Christians. Hindus are returned on the higher side with over three per cent more than the national average. Christians recorded nearly one per cent less whereas the proportion of Muslims in the state to national population was almost the same. There are 85.5 per cent Hindus, 11.7 per cent Muslims and 1.9 per cent Christians in Karnataka as against that of 82.4 per cent Hindus, 11.7 per cent Muslims and 2.3 per cent Christians in India. In regard to concentration of other three major religions viz., Sikhs, Buddhists and Jains it is observed that Jains with 0.7 per cent form the fourth major religion in the state whereas Buddhists with 9.8 per cent is the third major religion in India. In the Indian scene the Sikhs form fifth major group, whereas in Karnataka, Buddhists and Sikhs are placed fifth position.

Religion wise growth in the state during the decade 1981-91 reveals that the major religions viz., Hindus, Muslims and Christians recorded a growth rate in lesser degree i.e., 20.7 per cent, 25.7 per cent and 11.1 per cent respectively, against that of 22.3, 26.1 and 16.9 per cent in India as a whole. On the other hand Buddhists, Sikhs and Jains recorded a growth rate of 72.8 per cent, 57.8 per cent and 14.6 pecen respectively for the state against that of 34.0, 24.2 and 3.9 per cent respectively for India. Thus, the Jains recorded a higher growth of nearly 11 per cent in the state than that of India as a whole during the decade 1981-91.

ANNEXURE V (1) - PERCENTAGE DISTRIBUTION OF POPULATION BY MAJOR RELIGIONS IN INDIA AND KARNATAKA DURING 1991 & 2001 AND ITS GROWTH RATE DURING 1981-91 AND 1991-2001

Sl. No.	Religion	India				Karnataka			
		Percentage of Population	Percentage growth rate 1981 - 1991	Percentage of Population	Percentage growth rate 1991 - 2001	Percentage of Population	Percentage growth rate 1981 - 1991	Percentage of Population	Percentage growth rate 1991 - 2001
1	2	3	4	5	6	7	8	9	10

The above table furnishes the composition of six major religions along with 'Other Religions' and 'Religion not stated' among the districts of the state during 2001 Census along with 1991 Census. As may be seen from the table that the proportion of population to total population during 2001 Census is below 5 per cent for 23 districts of the state and is between 5-10 per cent in 3 districts. Only Bangalore district has the distinction of having more than 10 per cent of the total population of the state in its jurisdiction. During 1991 Census the situation was almost similar with 22 districts having a proportion of less than 5 per cent and 4 districts had more than 5 per cent but below 10 per cent. With 10.76 per cent of the total population Bangalore district occupied the top position.

Of the total population of the state, proportion of districts having Hindus and Muslims was uniform during both the Censuses i.e. less than 5 per cent of the total population in 21 districts for Hindus and 23 districts for Muslims, while in 5 and 3 districts respectively for Hindus and Muslims had a proportion of 5-10 per cent and Bangalore district alone had more than 10 per cent.

ANNEXURE V(3) - PERCENTAGE AND DISTRIBUTION OF POPULATION BY MAJOR RELIGION IN KARNATAKA AND MYSORE DISTRICT - 1991 & 2001

	KARNATAKA				MYSORE			
	1991		2001		1991		2001

Others	6,325	Ng	115,460	0.22	747	0.03	4,599	0.17
Religion not stated	36,121	0.10	120,247	0.23	1,281	0.06	4,576	0.17

The percentage distribution of population by major religion in Karnataka and Mysore district for 1991 and 2001 Censuses are presented in the above table. As may be seen from the table that in Karnataka, Hindus form 85.50 and 83.86 per cent of the total population during 1991 and 2001 Censuses, followed by Muslims and Christians. The corresponding statistics for the district does not differ much as Hindus and Muslims occupy the top two places followed by Buddhists in 2001 Census. These three religion cover more than 97 per cent of the total population of the district. Remarkable increase in the proportion of Buddhists population has been noticed between 1991 and 2001 Censuses in the State.

Rural - Urban differentials

	Religion not stated	931	72.7	350	27.3	3,067	67.0	1,509	33.0

Distribution of major religion by residence for the State and district are presented in the above statement. Majority of Hindus, Jains, Buddhists and those who have not stated their religion are residing in rural areas of the State during both the Censuses. While population belonging to Muslim, Christian and Sikh religion reside in urban areas of the State. As far as the district is concerned, according to 2001 Census data, while majority of Hindus, Buddhists, 'Others' and 'Religion not stated' reside in rural areas, majority of Muslims, Christians, Jains and Sikhs are concentrated in urban areas. A similar trend is seen during 1991 Census.

A : Absolute **P :** Percentage

Talukwise distribution of population following major religion is presented above. As far as the district is concerned, majority of the population follow Hindu faith in all the taluks. This is followed by Muslims and Buddhists in Mysore district. A comparison between 1991 and 2001 Census data expose a remarkable growth of Buddhists during the decade in the region.

Note:- *The data on marital status is being tabulated upto district level only. As such the data for newly created districts could not be recalibrated for 1991 Census. Hence the data of unbifurcated districts are presented for the newly created districts also.

It may be seen from Annexure VI that the percentage of “Never Married” population accounts for 49.24 per cent and 47.63 per cent at state and district levels during 2001 Census, while the same was 52.05 per cent and 51.10 per cent during 1991 Census. Similarly the percentage figures of the district for Married, widowed and Divorced or Separated are 47.01, 5.06 and 0.30 per cent during 2001 Census. Comparative data for 1991 Census is also furnished in the table for ready reference. The percentage variation of all the marital categories between rural and urban is marginal in both state and district population.

The level of education by sex for the district and the State during 1991 and 2001 Census are presented in the above annexure. It can be seen that percentage of illiterates during the decade has decreased vis-a-vis for the State and the district. Though the male literates out number females, the percentage of women folk acquired literacy during the decade is more than the male population. The comparison of data for the two censuses reveals it so for the State and the district. The different educational level attained by the population can be seen in detail in the above annexure.

ANNEXURE - VIII

DISTRIBUTION OF DIFFERENT MOTHER TONGUE RETURNED DURING 1991 & 2001 CENSUS

As part of Census publication programme the data on spoken languages/Mother Tongues will be presented under C Series. The table C-7 shows the distribution of languages/Mother Tongues which returned 10,000 or more speakers each at all-India level (including of Mother Tongues grouped under each for the district, with total, rural/urban and male/female break ups). The unclassified Mother Tongues and the Mother Tongues having less than 10,000 speakers have been relegated to 'Other' Mother Tongue category. The table is divided into Part A-Scheduled languages with Mother Tongues grouped under each and Part B-Non-scheduled languages with Mother Tongue grouped under each. The instructions to the enumerators in regard to this question read as under.

"Record Mother Tongue in full, whatever be the name of the language returned by the person enumerated". The definition of Mother Tongue is the same as in 1991. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the Mother Tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded".

As the above instructions to the enumerators would show, the respondent was made to feel free to return the name of his/her Mother Tongue and the same was recorded faithfully by the enumerators. This naturally leads to recording of a very large number of Mother Tongue names. It is to be mentioned that Mother Tongues as returned in the Census are basically, the designation provided by the respondents. These designations or Mother Tongue labels need not be identical with the actual linguistic mediums. For assessing the correlation between the Mother Tongue designations and actual languages and dialects the raw returns of Census were subjected to thorough scrutiny and rationalization.

The abstract of languages as Mother Tongues and their strength in the district during 1991 and 2001 Census are provided below.

STATEMENT-I

ABSTRACT OF LANGUAGES AS MOTHER TONGUES AND THEIR STRENGTH IN MYSORE DISTRICT-1991 AND 2001 CENSUS

	Mysore District	**23,577**	**1.03**	**36,102**	**1.36**

The statement I & II gives a clear picture of the languages spoken in the district. A closer study of 2001 Census data reveals that as many as 42 languages which returned 10,000 or more speakers are spoken in the district. The 'Other' category include Mother Tongues spoken by less than 10,000 speakers. Majority of the population speak Kannada which constitute 81.02 per cent followed by 8.56 per cent of Urdu speaking population. Among the languages not specified in the Eighth Schedule to the constitution, Tibetan is spoken by 0.53 per cent of population. Similar data for 1991 is provided in the annexure.

Linguistic classification of the languages

The names of the 114 Scheduled and Non-Scheduled languages falling in the five language families are given below with the Scheduled Languages denoted as (S). Of the 18 Scheduled Languages, 13 fall in the Indo-Aryan branch of the Indo-European family, 4 in the Dravidian family and one in the Tibeto-Burmese family.

1. INDO-EUROPEAN

(a) INDO-ARYAN

1. Assamese (S), 2. Bengali (S), 3. Bhili/Bhilodi, 4. Bishnupuriya, 5. Dogri, 6. Gujarati (S), 7. Halabi, 8. Hindi (S), 9. Kashmiri (S), 10. Khandeshi, 11. Konkani (S), 12. Lahnda, 13. Marathi (S), 14. Nepali (S), 15. Oriya (S), 16. Punjabi (S), 17. Sanskrit (S), 18. Sindhi (S), 19. Urdu (S).

(b) GERMANIC

1. English.

2. DRAVIDIAN

1. Coorgi/Kodagu, 2. Gondi, 3. Jatapu, 4. Kannada (S), 5. Khond/Kondh, 6. Kisan, 7. Kolami, 8.Konda, 9. Koya, 10. Kui, 11. Kurukh/Oraon, 12. Malayalam (S), 13. Malto, 14. Parji, 15. Tamil (S), 16. Tulu, 17. Telugu (S).

3. AUSTRO-ASIATIC

1. Bhumij,2. Gadaba, 3. Ho, 4. Juang, 5. Kharia, 6. Khasi, 7. Koda/Kora, 8. Korku, 9. Korwa, 10. Munda, 11. Mundari, 12. Nicobarese, 13. Santali, 14. Savara.

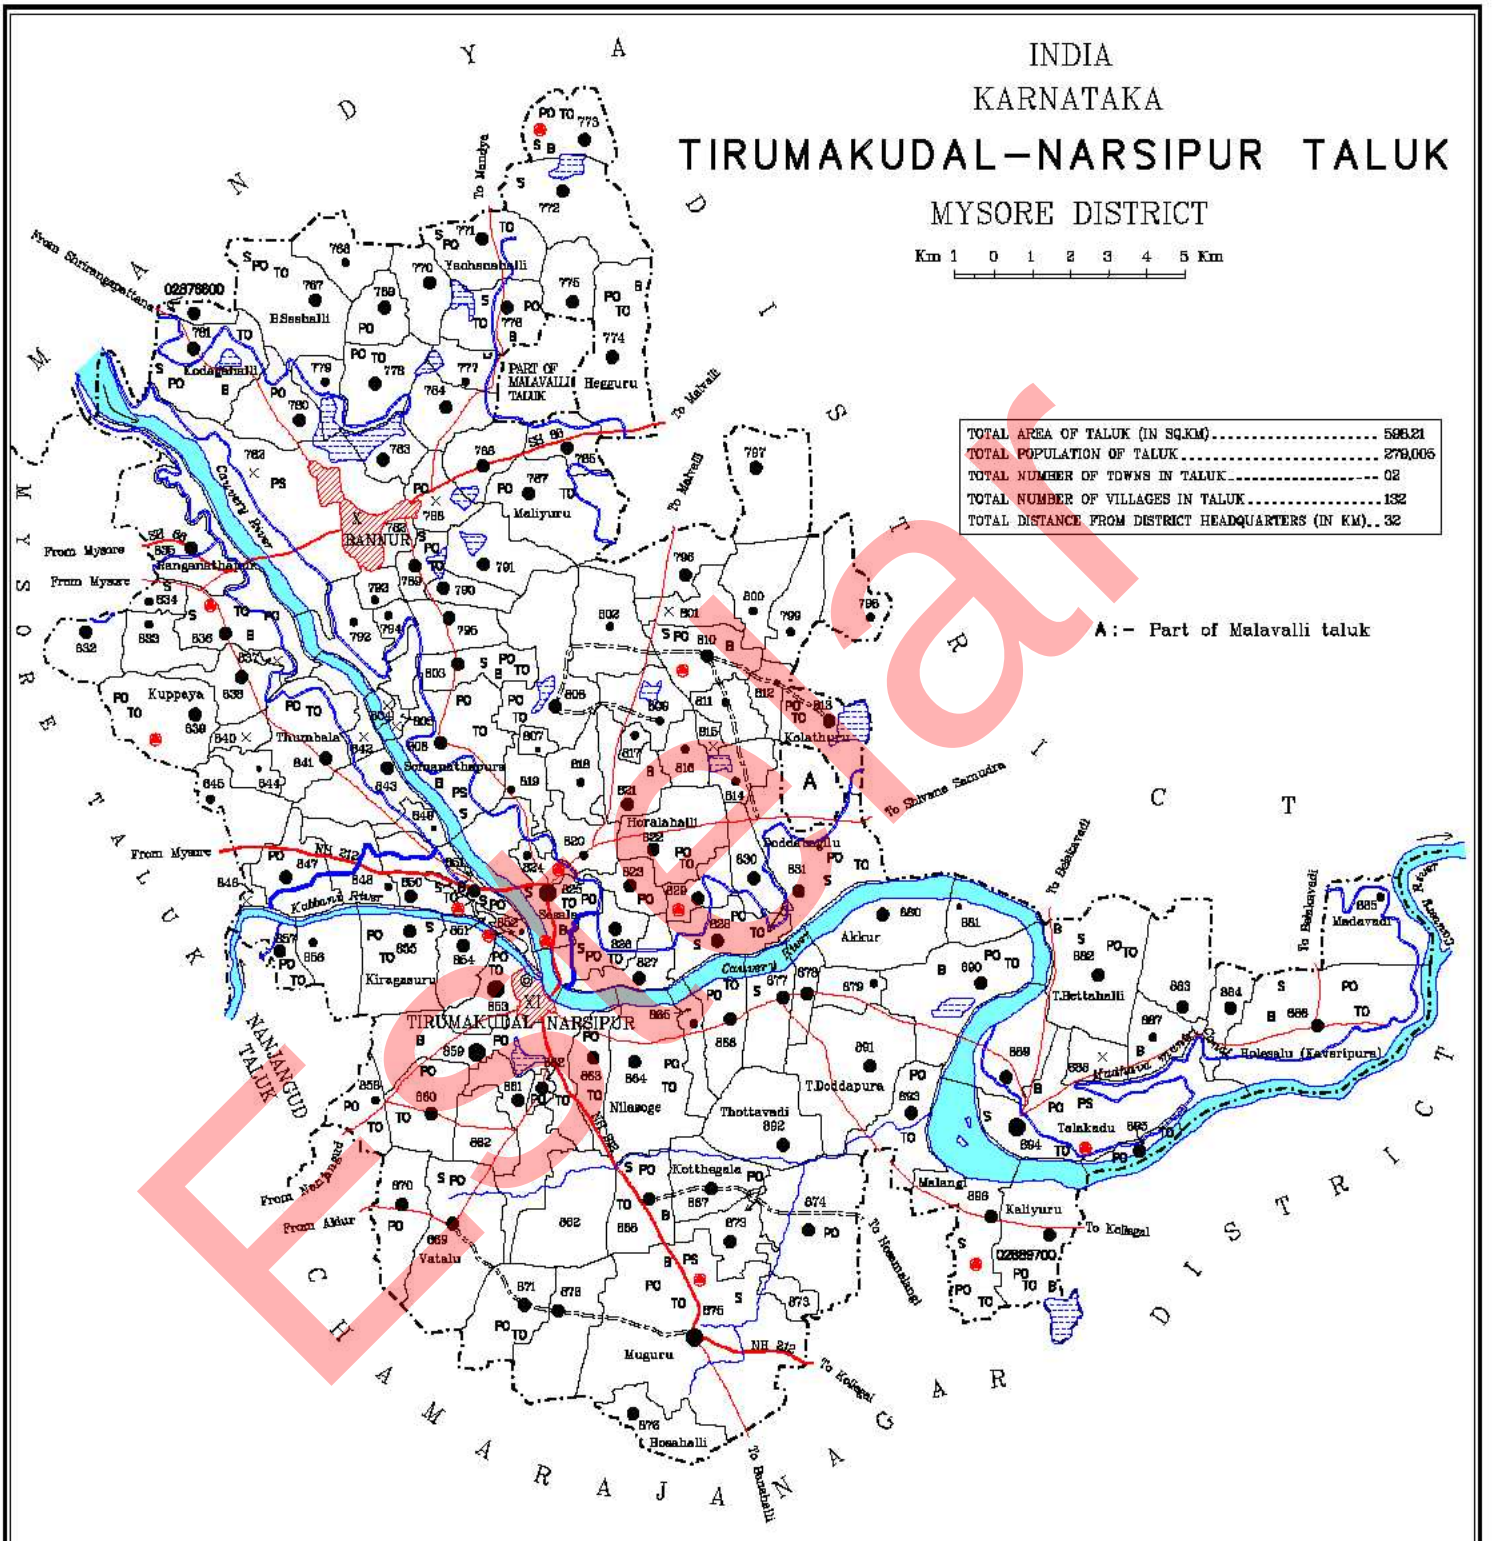

4. TIBETO-BURMESE

1. Adi, 2. Anal, 3. Angami, 4. Ao, 5. Bhotia, 6. Bodo/ Boro, 7. Chakesang, 8. Chakru/Chokri, 9. Chang, 10. Deori, 11. Dimasa, 12. Gangte, 13. Garo, 14. Halam, 15. Hmar, 16. Kabui, 17. Karbi/Mikir, 18. Khezha, 19. Khiemnungan, 20. Kinnauri, 21. Koch, 22. Kom, 23. Konyak, 24, Kuki, 25. Lahauli, 26. Lakher, 27. Lalung, 28. Lepcha, 29. Liangmei, 30. Limbu, 31. Lotha, 32. Lushai/Mizo, 33. Manipuri (S), 34. Mao, 35. Maram, 36. Maring, 37. Miri/ Mishing, 38. Mishmi, 39. Mogh, 40. Monpa, 41. Nissi/ Dafla, 42. Nocte, 43. Paite, 44. Pawi, 45. Phom, 46. Pochury, 47. Rabha, 48. Rengma, 49. Sangtam, 50. Sema, 51. Sherpa, 52. Tangkhul, 53. Tangsa, 54. Thado, 55. Tibetan, 56. Tripuri, 57. Vaiphei, 58. Wancho, 59. Yimchungre, 60. Zeliang, 61. Zemi, 62. Zou.

5. SEMITO-HAMITIC

1. Arabic/Arbi.
