CENSUS OF INDIA 2001

SERIES-12 **KARNATAKA**

DISTRICT CENSUS HANDBOOK

Part - A & B

RAICHUR DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

Directorate of Census Operations, Karnataka

F O R E W O R D

1. The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to taluk/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri.H.Shashidhar, Director of Census Operations, Karnataka. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division, Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and other who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

Motif

Rajolibunda Diversion

Rajolibunda Diversion has been built across Tungabhadra river near Rajolibunda of Manvi taluk. The Rajolibunda Dam is a masonry dam of 820 Mtrs length and 9.45 Mtrs height. The catchment area of the dam is 61,427 Sq.Kms with a yield of 3,277 Mcum. It is planned to utilize 30.53 Mcum of water through canals providing irrigation to 2,380 hectares of land. The dam is provided with a central spill way of 820 Mtrs. By constructing this diversion, an area of 571 hectares has been submerged without affecting any village or population. The diversion canal is of the running length of 43.47 Km with a capacity of 23.79 Cumecs.

P R E F A C E

In the foreword to the 2001 series of the District Census Handbooks, Sri. D.K. Sikri, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain salient data on the population for every village and town as revealed by 2001 Census. They also contain a wealth of information regarding villages and towns which, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information is also of considerable importance in the context of planned development.

The District Census Handbook is divided into two parts: Part A contains information regarding each village and town (Village Directory and Town Directory collected from various sources) and Part B which contains the data on the population collected during 2001 Census - the Primary Census Abstract. The data published in Part B was collected during February-March 2001 in the Population Census.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in 1999. The Village Directory formats were mailed to the Deputy Commissioners of Districts for obtaining the village wise particulars through Village Accountants. Similarly the Town Directory formats were mailed to the Commissioners of Corporations, Chief Officers of Town Municipal Councils, Town Panchayats, etc. The village wise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1991 District Census Handbooks. The Household Schedules, which were canvassed to collect the population data during 2001 Census, were scanned and data captured was processed electronically. The Primary Census Abstract was generated centrally on the computers by Registrar General, India.

In compilation of the District Census Handbooks, the Census Directorate had the co-operation of various departments of the State/Central Government. The Census Directorate gratefully acknowledge their assistance.

I take this opportunity to offer my grateful thanks to Sri. H. Shashidhar, Director of Census Operations and Sri. S.R. Raghavendra Rao, Deputy Director (Retd.) for their valuable guidance. I am also thankful to all the officers and officials of this Directorate who have been actively involved in the compilation of this volume.

I am highly grateful to Sri. J.K.Banthia, I.A.S., Ex. Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Sri R.G. Mitra, Ex. Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General and Sri S.L.Jain Deputy Director of Social Studies Division and Dr. R.P. Singh, Ex. Deputy Registrar General (Map) for their guidance.

DISTRICT HIGHLIGHTS – 2001 CENSUS

1 The jurisdiction of Raichur had undergone changes during 1991-2001, resulting in bifurcation into two districts, viz Raichur with 5 taluks and Koppal with 4 taluks.

2 After its bifurcation, the district is the 13th largest in the geographical area.

3 It is 14th largest in its population size.

4 It's decadal growth rate is third highest in the state.

5 It ranks among the top 10 districts in terms of sex ratio.

6 Not so densily populated and ranks at 19th place in its density.

7 Raichur is the most backward district in its literacy rate.

8 It's female literacy rate is the least in the state.

9 It's work force is predominantly agriculture labour and tops the list in the state.

IMPORTANT STATISTICS, 2001

Particulars	Persons Males Females	State	Percentage	District	Percentage
1	2	3	4	5	6
Number of villages	Total	29,406		883	
	Inhabited	27,481		830	
	Un-inhabited	1,925		53

ANALYTICAL NOTE

(i) HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

Introduction

The District Census Handbook is, most valuable district level publication brought out by the Census Organization. It contains micro-level data drawn to the lowest administrative units viz, revenue village in the case of rural areas and Division/Ward level in the case of urban areas. It is extremely useful to the planners, administrators, demographers, sociologists, etc., as it contains resourceful wealth of data regarding basic amenities available in each village and town of the district such as educational, medical, drinking water, post and telegraphs, transportation and communication, banks, societies, recreation clubs, power supply, export/import of important commodities and land use besides, the particulars revealed during the latest census enumeration. It is for the first time that the district census hand book series was included in the census publication programme at the 1951 census, in order to satisfy the growing demand by the administrators, the planners, research scholars, demographers and the other such census data users, for micro-level data. The idea of compiling the District Census Handbooks was pioneered by Sri R.A.Gopala Swamy, I.C.S. the then Registrar General, India and Ex-officio Census Commissioner of India, with a view to preserve the Census records prepared for areas below the district level. He proposed that all the district Census tables and Census abstracts prepared during the process of sorting and compilation, should be bound together in a single manuscript volume and named as the District Census Handbook and suggested that the State Government should take up printing and publication at their own cost. Then onwards, the District Census Handbooks were published in each Census with improved pattern with an aim to give the Census and Non-census data at micro level for each village of the taluk as a whole to suit the requirements of various departments.

The data in the District Census Handbook will help not only in local area planning but also in regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. The District Census Hand Book sought to replace "Part IV - Taluk Tables and Part V - Village Tables" of the earlier censuses and to present the basic demographic and economic data in the form of "Primary Census Abstract" in respect of each and every village and town within the jurisdiction of the district. The district census handbook consists of two parts, viz, Part A and Part B. Part A comprises village and Town Directory while Part-B contains Village and Town level Primary Census Abstracts. In addition, these volumes contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

District Census Handbook 1961

It was in 1961 Census that the scope of District Census Hand Book was shaped in the present form by presenting i) an account of descriptive note on the district, ii) a set of non-census data tables dealing with the administrative statistics of the district for a decade, iii) taluk and town level census tables on economic and socio-cultural aspects and iv) the village and urban Primary Census Abstracts depicting the nine fold industrial classification of workers. Information on the availability of certain basic amenities in villages and towns, such as the source of drinking water and educational institutions was also presented in the volumes. However, the district census handbooks of 3 out of then existing 19 districts viz, Bangalore, Dharwad and Mysore were confined to the publication of the village-wise and urban (census enumeration block-wise) Primary Census Abstract only.

District Census Handbook 1971

During the 1971 census, the district census handbook was further refined to present the data in a systematic way. In view of country-wide uniformity in approach and to have a comprehensive coverage,

the District Census Hand Books were presented in three parts each, for a district. Part A incorporates the Town and Village Directories. Part-B incorporates the Primary Census Abstract and includes data, in the case of rural areas down to the village level and in the case of urban areas up to the block level. In addition, an introduction is included wherein the changes in jurisdiction, if any, of the district or of the taluks and the changes in the number of villages between 1961 and 1971 were explained. Part-B was essentially demographic in nature and was the end product of the tabulation of the enumeration results. Part C incorporates other census tables and administrative statistics. For convenience, Part-A and Part-B of the District Census Hand Book was presented in one volume and Part-C in a separate volume. In part-C volume, the district and taluk maps were included. These maps were prepared on the basis of maps obtained from the competent authorities concerned.

District Census Handbook 1981

The District Census Hand Book series of 1981, had some new features along with the restructuring of the formats of village and town directories, keeping in view the comparability of 1971 data. All the amenities except power supply in the village were brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place/village where it is available were given. A few new items of information such as adult literacy centres, primary health sub-centres and community health centres/workers, data on the availability of Newspapers, Motor Vehicles, etc., in the village, were introduced in the village directory to meet the requirements of the "Revised Minimum Needs Programmes". A new column "total population and number of households" was introduced to examine the correlation of the amenities with the population and number of households they serve. The contents of Part-A were further enlarged by including two appendices, namely a list of villages not having any amenities and a distribution of villages according to the proportion of Scheduled Castes and Schedules Tribes in the total population of the village. The format of Town Directory were also modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items such as class of town and its population, population of SC & ST, decadal growth rate of population, working women's hostel, adult literacy classes / centres, storage system regarding drinking water supply etc., and also the information about the nearest place and distance having educational, medical and fire-fighting facilities, in case such a facility is not available in the referent town. A new statement on civic and other amenities in slums in Class I and Class II town were included to help the planners to chalk out their programmes of slum improvements.

District Census Handbook 1991

The presentation of the District Census Hand Book for the 1991 Census was more or less similar to the manner followed in 1981. The format of Primary Census Abstract was restructured slightly. Nine-fold industrial classification of main workers were given as against four-fold classification. The sex-wise population in the age-group of 0-6 was included in the Primary Census Abstract for the first time to enable data users to compute more realistic literacy rates as all the children below 7 years of age were treated as illiterate at the 1991 census. One of the important innovations in the 1991 census was the Community Development Block-level presentation of data in the village directory and Primary Census Abstract instead of the traditional taluk/PS level presentation. C.D.Block is the lowest administrative unit for developmental planning. The choice of the C.D. Block as the unit for data presentation was formulated to help the planners in micro-level developmental plans. Another important improvement at the 1991 Census was dissemination of data through magnetic tapes/floppies in which both the computer as well as manual codes for each revenue village were provided along with the corresponding codes of 1981 Census. In the volumes of the District Census Hand Books, the computer codes assigned to the revenue villages in the 1991 Census and the corresponding codes of 1981 Census were presented so that it may facilitate the data users to use the data either from magnetic tapes or computer floppies.

Scope of the 2001 District Census HandBook

Like in the previous censuses, the District Census Hand Book (DCH) for the 2001 Census brought out

in two parts as usual viz., Part-A The Village and Town Directory, and Part-B the Village and Town Primary Census Abstract.

The District Census Hand Books for the 2001 census is essentially presented in the similar manner in which the District Census Hand Books of 1991 census were presented. This is because the data can be comparable with the earlier censuses and also to study the changes taken place during the decades and hence the approach in 2001 census is similar to 1991 census. The contents have been slightly enlarged and the formats too are restructured to suit the requirements of the data users. In the village directory for 2001 census certain new amenities like, news papers, magazine received, Income-Expenditure of the local bodies, information on number of banks, credit societies, recreational and cultural facilities, most important commodities imported, manufactured and exported have been included whereas the information regarding the "Day or Days of market/hat if any" which was there in 1991 has been excluded. Apart from providing the information about the nearest place and distance in broad ranges for villages not having basic educational and medical facilities, information about the nearest place and distance in broad ranges for villages not having Middle School, College, Hospital (Allopathic), Maternity and Child Welfare Center and Primary Health Center are also been provided this time. Information on availability of drinking water during summer is also included in the Village Directory. However, in the town directory there are no changes except in the statement IV-A where this statement is separately numbered as Statement VII in 2001. Except these, the scope of 2001 series of the District Census Hand Book has, by and large remained the same as in 1991. The non-census information collected at the village level and town level was scrutinized and verified. In case of glaring discrepancies the data were cross-checked with respective parent departments for validation.

One of the significant changes made in 2001 series of District Census Hand Book is that Primary Census Abstracts are presented to the jurisdiction of the Panchayats in the district. With the constitution (73rd Amendment) Act, 1992, it has become necessary for the census organisation to provide population data for the territorial area of a panchayat in order to strengthen panchayat raj system in the country. In view of this, panchayat-wise population figures for total population and for Scheduled Castes and Scheduled Tribes population has been compiled and presented in the form of Primary Census Abstract for each district.

Further another important step taken during the 2001 census, is assigning the Permanent Location Code Numbers (PLCN) to the villages. Location code number is a simple but unique device by which every area in an administrative unit in the State/ U.T. can be identified. Thus assigning of Location Code Numbers at various administrative levels, right from State/U.T. to the lowest level namely enumeration block, in census taking is an important step. Each clearly demarcated area can be referred to by a combination of numbers. In a State or U.T. the next administrative area is District, followed by taluk or police station, circle, Development Block or Mandal, etc. Next below this administrative area, in urban areas are cities/towns, further divided into wards/divisions and villages in rural areas. The Location Code Numbers to various administrative areas are assigned in orderly manner always beginning from northwest point and the numbering proceeds in a serpentine manner, keeping the geographical continuity, ultimately ending at the South-East point.

There was a great demand from different organizations to study the village level data over a time span and hence a scheme of assigning permanent location code numbers to the villages and the higher level of administrative areas is devised to ensure data comparability over a period of time. In Indian Census, Location Code Numbers are allotted to each village based on traverse system (zigzag) in a serpentine manner at taluk level. These numbers for villages run from '1' to 'N' in each taluk independently. This system was adopted until 1991 census. But, for the Census of India 2001, all the villages in a state/U.T. are assigned with a Location Code Number in one continuous series beginning from "1" to "N" for the entire state/U.T. and it is not confined to a taluk. The field length of the complete PLCN structure for a village has been kept up to 8 digits and therefore the location code number of village in a taluk contains 8 digits number for 2001 Census.

(ii) BRIEF HISTORY OF THE DISTRICT

The district, named after its headquarters town Raichur, has a hoary past. The entire tract of land on the banks of the river Tungabhadra here is identified with Kishkindha, the kingdom of Vanaras. According to Jaina Ramayana, the city of Kishkindha was founded by Srikantha Kumara, brother-in-law of Dhanala Kirti. It was while roaming about in this part of the country during his exile that Rama was accorsted by Hanumantha. Kishkindha Kanda, a section of the epic Ramayana narrates the events and episodes that took place in this tract of land during those legendary days. In Mahabharata, Sahadeva, who lead an expedition to the south on the occasion of the Rajasuya yagya performed by Yudhishthira, is said to have encamped for sometime on the Kishkindha hill where the Vanara chiefs Sushera and Vishvasena made friends with him. These legendary references apart, archaeological evidences have amply demonstrated that this area has been the abode of man since very early times. The district abounds in pre-historic sites and, of those, Kaski is by far the most important. Each one of the seventeen spots excavated here has yielded Neolithic artefacts like store axes and hammers, chalcedony, chart flakes and cores besides beads and plain pottery. There is a flat-topped chain of granite hills near Maski and, at the foot of this hill, traces of iron smelting were discovered by the early explorers. A big field of menhirs has also been discovered here. In addition, at Benakal, Tolalasudda and Kallur there are pre-historic paintings and drawings besides megalithic tombs. The legendary accounts together with these relics testify to the great antiquity of the area comprised in this district.

Historically this district is known to have formed parts of the Mauryan empire. In the Deccan, Suvarnagiri was then a seat of viceroyalty. This place is identified with Kanakagiri in Gangawati taluk by some historians which is now in Koppal taluk and Maski in Lingsugur taluk by others. Edicts of Ashoka have been discovered at Maski. The importance of Maski edict lies in the fact that it contains a reference to Ashoka by his personal name also. After the death of Ashoka, however, the Mauryan empire disintegrated. By about 230 B.C., the Satavahanas established their supremacy in the Deccan and had their sway till 200 A.D. When the ruling family itself became extinct. Thereafter the Vakatakas rose to power in this region and certain parts of the district were ruled by the Chutus also. In about the middle of the sixth century A.D. the Chalukyas of Badami established a strong Kingdom and during the reign of Pulikeshi II (610-642) they succeeded to a great extent in their attempt at unifying the Deccan.

The Rashtrakutas of Malked, who flourished as feudatories of the Chalukyas for a couple of centuries, assumed sovereignity under Dantidurgal in 753 A.D. His successor Krishna I (756-775) extended the kingdom and the present Raichur too became a part of the vast Rashtrakuta empire. Krishna III (940-966) was also a powerful king who inflicted a crushing defeat on the Cholas in the south. Two inscriptions of this king have been found at Arakeri in Kushtagi taluk and Uppinabetagiri in Dharwad district. The rulers of Malva invaded Malked during the reign of Khottiga (967-972). In 973 A.D. Taila II (973-997) of the western Chalukya family dethroned Karka II the successor of Khottiga and resorted the ancient glory of the Chalukyas. He ruled from Malked and consolidated his sway in the western Deccan covering the entire area lying between the Narmada and the Tungabhadra. His son and successor Satyashraya (997-1008) continued his expansive policy. The Cholas were the main contenders for power and they were kept at bay. But the conflict between the Chalukyas and the Cholas lasted for a long period. In 1019, Jayasimha II (1015-1042) scored a decisive victory at the battle of Maski and compelled the intruding Rajendra Chola to withdraw to the south of the Tungabhadra. His successor Someshwara I (1042-1068) was however humbled by Rajadhiraja Chola who invaded the Chalukyan kingdom thrice. During the reign of Someshvara III (1126-1138) Vishnuvardhana, the Hoysala king led an unsuccessful attack on the Raichur doab. In 1157 Kalachuri Bijjala wrested the sovereignity of the Deccan from Taila III. The Kalachuri rule lasted for a brief period and during the reign of Sovideva, Madinur enjoyed the status of an alternative capital. In 1181, the Chalukyan supremacy was resorted by Someshvara IV, who however soon yielded place to Bhillama of the Devegiri Yadava family. During this period, the Hoysalas too made inroads into the area north of Tungabhadra. The conquests of Ballala II made him

the master of Puligera, Belvola, Kisukad and the neighbouring territories. He made Erambargi (modern Yelbarga in Koppal) as his northern capital and resided there for sometime during 1196. In 1211, the Yadava king Singhana recaptured their territories and once again the Tungabhadra came to be recognised as the border between these two kingdoms.

During the reign of Ramachandra (1271-1310), Ala-ud-din Khilji attached Devagiri, pillaged the capital and thus dealt a severe blow to the power and prestige of the Yadavas. Seizing this opportunity, Kakatiya Prataparudra pushed the western border of his kingdom as far as Raichur. In 1307, Malik Kafur conquered the Yadava kingdom and reduced the king into a vassal of the Delhi Sultan. During his next expedition in 1313, Malik Kafur killed Shankaradeva, the son of Rachandra, and resumed the government of Devagiri. His tenure was temporary, for as soon as he left for Delhi a little later, Harapala the son-in-law of Ramachandra rose in revolt and declared independence. But in 1317, Mubarak, the son and successor of Ala-ud-din Khilji, recaptured Devagiri. In 1318, Harapala was flayed alive for his defiance. In spite of these developments, the southern parts of Yadava kingdom including Raichur area continued to offer resistance to the Mohammadan rule. Last of such rebels was Kampilaraya who was finally vanquished by Muhammad-bin-Tughlak. After this victory, Muhammad-bin-Tughlak remained at Devagiri for a short period and in 1329, after appointing Kutilush Khan as the viceroy of Deccan, he left for Delhi. Immediately thereafter, the local leaders began to assort themselves. In 1331, Somadeva, of the Chalukyan dynasty revolted against the governor of Kampli and seized the forts of Anegondi, Raichur and Mudgal. Hoysala Ballala III threw off his allegiance to the Delhi Sultan and invaded the province of Kampli. The next few years that follwed these events witnessed the emergence of the Vijayanagar empire with its capital close to the southern borders of Raichur and of the Bhamani kingdom with its capital at Gulbarga and beyond the Krishna river in the north. Thereafter, Raichur doab became a bone of contention between these two powers and for a little more than two centuries, this tract witnessed intensive and almost incessant warfare in which especially the Bahamani rulers, to the life and properties of the civilians, showed scant respect. The region comprising Raichur district changed hands many times during this period and its history is said to be so confusing as to put one at a loss to know under whose control the area was during a particular period.

During the reign of Alla-ud-din(I) (1347-58), this area belonged to the Bahamanis. The kingdom had been divided into four large divisions; Ashnabad-Gulbarga, along with Raichur and Mudgal being one of among them. Later, Bukka Raya demanded the return of Raichur doab and, incensed by an insulting episode, he crossed the Tungabhadra and seized Mudgal. Muhammed I (1358-1375) got wild and proceeded plundering the country and killing the defenceless villagers. Bukka Raya had withdrawn to Adoni by now and was pursued by Muhammed early in 1367. At the battle near Kauthal, Bukka Raya faced defeat and resorted to guerrilla warfare for about 3 months whereafter he shut himself up in his capital. Muhammed on the other hand took to promiscuous slaughter of the inhabitants and thus compelled the Vijayanagara king to honour his demands. At the time of accession of Mujahid (1375-1378) the successor of Muhammed, some of the forts of Raichur doab were held by Bukka Raya and some including Raichur and Mudgal were held by the Bahamanis. Mujahid made an unsuccessful attempt on the Vijayanagar kingdom. Similarly, during the reign of Muhammed II (1378-1397), Harihar II made a futile attempt on Raichur. When Firoz Shah (1397-1422) and Harihara II (1377-1404) were at the helm of affairs of the two kingdoms, the latter started military operations for the recovery of Raichur doab in 1398 and moved upto the Krishna where he pitched the camp. Firoz Shah marched against him and incamped on the northern bank. He resorted to a stratagem by which his confidents could kill Harihara's son and create confusion in the Vijayanagar camp. Firoz crossed the river easily and pursued the fleeing Harihara. After this victory Firoz separated Raichur from Gulbarga province and appointed Fulad Khan as its first military governor. Again, in 1406, the year in which Devaraya I (1406-1422) ascended the Vijayanagara throne, a serious war broke out when Devaraya tried to secure the hand of a beautiful girl of Mudgal. Having failed in his attempt to capture the city of Vijayanagar Firoz withdrew and sent out his men to ravage the country. Ultimately Devaraya had to make peace on the terms laid down by Firoz.

In 1418, Firoz Shah laid sieze to Pangal and his protracted efforts lasting for nearly two years did not bear fruit. Vijayanagara scored a complete victory on this occasion and Firoz had to retreat leaving the southern and eastern boundaries of his kingdom in the occupation of Vijayanagara troops. This defeat was however avenged by his successor Sihab-ud-din Ahmed I (1422-1436) who resorted to indiscriminate slaughter, enslavement of civilian population, destruction of temples and killing of cows to compel Vijayanagara (1422-1426) to pay a large sum as arrears to tribute. During the reign of Ala-ud-din II (1436-1458) his younger brother rose in rebellion and captured some forts in the Raichur doab. But this rebellion was put down in time and the errant brother was made the governor of Raichur. Deveraya II (1424-1446) invaded the Raichur doab in 1443, captured Mudgal, besieged Raichur and bankapur and laid waste the country upto Bijapur and Sagar in Gulbarga district. But, on the approach of Ala-ud-din, he withdrew to Mudgal and Malik-ul-tujjar the Bahamani general could raise the sieges of Raichur and Bankapur. Deveraya finally agreed to make peace and pay tributes regularly to the Bahamani Sultan. Thereafter, for a short period till the Bahamani dynasty ceased to be a power to reckon with, peace reigned in Raichur doab.

During the reign of Mohammed III (1463-1482), the four administrative units of the Bahamani kingdom were divided into eight by his Prime Minister Khwaja Mohammed Gawan. The old province of Gulbarga was divided into two parts, Gulbarga and Bijapur and the latter included Raichur doab. The government of Bijapur was first given to Mohammed Gawan, and after his execution in 1480, Yusuf Adil Khan was appointed as its governor. In 1490 when Mohammed (1482-1518) was a king only in name, Adil Khan being unable to tolerate a weakling became an independent ruler and the founder of the Adil Shahi dynasty of Bijapur. Narasa Nayaka, the regent of Vijayanagara attacked Yusuf Adil Khan at the instigation of Kasim Barid, the Prime Minister of Bidar. He captured Raichur and Mudgal. But not being able to withstand the counterattack and the treacherous strategy adopted by Adil Khan, Narasa Nayaka had to accept defeat. However, it is said that Raichur doab remained part of Vijayanagara empire till 1502, when as a result of a jihad undertaken by the Bahaman nobler, it passed into the hands of Yusuf Adil Khan. Henceforth the history of Raichur ceased to have any relation with that of the Bahamani's of Bidar, which remained as a political power till 1527. Though Yusuf Adil Khan became an independent ruler for all practical purposes from 1490, it is said that Yusuf Adil Khan assumed the royal titles only in 1535.

Yusuf Adil Khan was succeeded by his son Ismail Adil Khan (1510-1534). This period coincides with heyday of the Vijayanagara empire under the able administration of the famous Krishnadeva Raya (1509-1529) whose reign has been hailed as the period of Vijayanagara's greatest success, when its armies were victorious everywhere, and the city was most prosperous. Krishnadevara Raya invaded Raichur doab and took Raichur fort in 1510-11 and marched to Gulbarga, defeated Amir Barid, the minister gaoler of the Bahamani king Mohammed and took over the city. Even there he proceeded to Bidar, captured it and reinstated Mohammed on the Bahamani throne and assumed the title establisher of Yavana kingdom. But, a little later Ismail Adil Khan recaptured Raichur. In 1520 however, Krishnadevaraya scored a resounding victory on the forces of Ismail Adil Khan and annexed Raichur. However, Ismail Adil Khan who survived Krishnadeva Raya invaded Raichur doab (1530-1542) and seized Raichur and Mudgal before Achuta Raya (1530-1542) could do anything to prevent this adventure. Four years later, immediately after the death of Ismail Adil Khan, Achuta Raya invaded the Raichur doab and subdued the country as far north as the Krishna. From 1534 upto 1565 the Raichur doab formed part of the Vijayanagara empire. Ali Adil Shah (1557-1580) made an alliance with the king of Ahmednagar, which was later joined by the Sultans of Golkonda and Berar. He demanded the restoration of Bagalkot and Raichur doab from Aliya Ramaraya (1543-1565). When this was sternly refused, the confederacy of the Sultans set out on its expedition against Ramaraya. In the battle that took place at Rakkasa-Tangodi near Talikote, Ramaraya was killed and the Vijayanagara forces were completely routed. Raichur henceforth became an undisputed part of Bijapur kingdom and remained comparatively peaceful for over a century till 1686. During the reign of Ali Adki Shah II (1656-1672) in 1662, an African Amir named Siddi Jauhar, rebelled in Kurnool. The Sultan marched through the

doab to perish the rebel. The royal forces encountered the rebels near Mudgal who on being defeated fled to Raichur and from thence fled beyond Tungabhadra. Sikandar (1672-1686) was the last ruler of the Adil Shahi dynasty. In 1685 Aurangazeb started his campaign against the Bijapur kingdom and scored victory in October 1686. Thenceforth Raichur doab also became a part of the Mughal Empire. Rahulla Khan was appointed as the Subedar of the new province of Bijapur and he was placed under the Mughal emperor's subedar at Hyderabad. With the proclamation of independence by the Nizam in 1724, the Bijapur province along with Raichur became a part of Nizami Dominions. Later, with the ascendency of the British, the Nizams accepted their overlordship. During the period of Nizam Ali (1761-1803), the English became masters of large tracts of land in the Deccan. Under a treaty entered into in 1855, Raichur district was assigned to the british. In 1858, Raichur doab was resorted to the Nizam and this position remained unchanged till 1948. Achievement of independence was followed immediately by an integration of the states. But the Nizam declared independence on 27th August 1947 and refused to accede to the Indian union. This was followed by a reign of terror, which was finally put down by a police action by the Indian government on 17th September 1948. Raichur became a part of the Hyderabad state of the Indian union. As a consequence of the reorganisation of the state, Raichur district was incorporated into the new Mysore state (that is, Karnataka) with effect from 1st November 1956.

The administrative history of the district reveals that till 1905, the Raichur doab region consisted of two districts: Raichur and Lingsugur. The former consisted of the taluks of Raichur, Yadgir, Yergera, Deodurg, Manvi, Alampur and Gadwal while Lingsugur district consisted of the taluks of Lingsugur, Kushtagi, Gangawati, Sindhnur, Shahpur and Shorapur. The taluks of Koppal and Yelbarga constituted a separate Jagir district. In 1905, Lingsugur district was abolished and all its taluks were transferred to Raichur district. At the same time, the taluk of Shahpur, Shorapur and Yadgir were transferred to Gulbarga district, and the villages of Yergera taluk were distributed among Raichur, Manvi and Deodurg. The abolition on Jagirs in 1949 resulted in the conversion of Koppal and Yelbarga into regular taluks of Raichur district. In 1956, Gadwal and Alampur were transferred to Andhra Pradesh. Thus at the time of its accession to Mysore state, the district consisted of nine taluks and this position has remained intact since then. During 2001 census, the district was further divided into two districts. Out of nine taluks, four taluks namely, Kushtagi Gangavati, Yelbarga and Koppal were separated and formed a separate district called Koppal.

(iii) Administrative set up and Jurisdictional changes

Raichur district comes under the Gulbarga Administrative division, which is one of the four divisions into which the state is organised. In 1991, the district had 9 taluks comprising of Devadurga, Gangavati, Koppal, Kushtagi, Lingsugur, Manvi, Raichur, Sindhnur and Yelbarga. However, during the decade 1991-2001, the district witnessed a major change in its territory and its outer boundaries. As a sequel to Government of Karnataka's notification No.RD 42 LRD 87 Part 3, Bangalore dated 2.8.1997, published in extra-ordinary gazette No.894 dated 2.8.1997, seven new districts were formed showing territorial changes in the administrative and political map of Karnataka during the 2001 census. Thus raising the total number of districts from 20 to 27. Consequently, a new district was carved out from Raichur. Out of 9 taluks, 5 taluks viz., Lingsugur, Devadurga, Raichur, Manvi and Sindhnur were retained within the jurisdictions of Raichur district. While Gangawati, Koppal, Kushtagi and Yelbarga were separated to form Koppal as a new district. The present Raichur district consists of 5 taluks, which is further grouped into 2 revenue sub-divisions. The jurisdiction of Raichur sub-division extends over Raichur, Devadurga and Manvi taluks while Lingsugur revenue sub-division covers Lingsugur and Sindhanur.

Total Number Of Towns/ Villages:-

As per census of India 2001 there are totally 883 villages and 9 towns in the district. Of the total villages 830 are inhabited and 53 are un-inhabited villages, when compared to the census of India 1991, apart from the major jurisdictional changes, few changes within the taluks are seen. During 1991 census, there were 156 villages in Raichur taluk. However, in 2001 census, total villages increased to 160 in the taluk. This is because in 1991, Askihal, Yermarus, Potgal

and Rampur villages were classified as outgrowths. In 2001 census part of these outgrowths were merged with Raichur (CMC) and the remaining portion is treated as revenue villages. Hence the increase. In Sindhanur taluk, one village by name Gandhinagar was newly created vide notification No RD 18 BHODHAPU 96 dated 5-5-97. Therefore, number of villages in the taluk increased to 173 in 2001, and on the other hand, the total number of towns remained the same as 1991 census. Talukwise comparison of number of villages and towns between two census and the reasons for variations can be seen from the table given below.

STATEMENT SHOWING THE NUMBER OF VILLAGES / TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS IF ANY AND REASONS THEREOF

Sl. No	Name of Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalized for		Reasons for variation
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
1	Lingasugur	191	191	4	4	Though the total number of villages remains same at 191 in both 1991 & 2001 Censuses, changes in the civic status have occurred in respect of two towns, Lingsugur and Mudgal towns were being Town Municipalities in 1991 and now changed to Town Panchayats vide Notification No. HUD 494 MLR 95 dated 18.10.95 and No. HUD 495 MLR 95 dated 18.10.95 respectively.
2	Devadurga	188	188	1	1	No change in total number of village and remains same at 188 both in 1991 and 2001 Censuses, Devadurga Mandal Panchayat status upgraded to Devadurga Town Panchayat with the existing jurisdiction of Mandal Panchayat Devadurga vide Notification No. HUD 641 MLR 95 (461) dated 09.01.96
3	Raichur	160	156	2	2	In 1991 Census, 4 villages namely (1) Askihal, (2) Yermarus, (3) Potgal and (4) Rampur were classified as outgrowths of Raichur City. Consequent on the expansion of city limits of Raichur CMC, the developed portions of the above four outgrowths now forms part of the city and rest of the areas of these villages which falls outside city limits are now covered by rural charge and included to the 2001 list of villages, hence total number of villages in the taluk has increased to 160 as against 156 in 1991 Census. The Raichur UA was dropped for the 2001 Census.(Raichur lost its UA status consequent on the merger of developed portions of its OGs in the city limits during 2001 Census)
4	Manvi	171	171	1	1	-
5	Sindhnur	173	172	1	1	'Gandhinagar' was newly created village vide Notification No. RD 18 BHODHAPU 96 dated 5.5.1997 and added to 2001 Census list of villages The total number of villages in the taluk which stood at 172 in 1991 has moved to 173 in 2001 Census.
	Total	**883**	**878**	**9**	**9**	-

Urban local bodies

The statutory urban local bodies are the City Municipal Councils, Municipal Corporations, Notified Area Committee, Town Municipal Councils, Town Panchayat, and Cantonment Boards. These urban local bodies elect Councilors / Corporators from each ward and the tenure of those Councilors / Corporators would be for five years. The President or VicePresident of the Municipal Council and the Mayor / Deputy Mayor of the Corporations are elected from among the elected Councilors / Corporators whose tenure will be for a period of one year. The Chairman of various

committees are also elected among the elected Councilors with a term of one year.

The Chief Officer in Municipal Council and the Commissioner in a City Corporation are responsible for daytoday administration and the executive authority is vested with them.

Zilla Panchayat and Taluk Panchayat

To promote the development of institution and secure greater measure of participation by the people in the local and governmental affairs by decentralisation of power and functions and for the purpose of development planning and implementation of various programmes thereof Zilla Panchayats have been constituted in the State. The jurisdiction of Zilla Panchayat is coterminous with that of the corresponding district and covers the entire rural and semi urban area but excludes the statutory towns. Accordingly, Zilla Panchayat has been constituted for Raichur district and its jurisdiction extends over the Taluk Panchayats of the district. The jurisdiction of each Taluk Panchayat is coterminous with that of the taluk of the same name but excludes the area incorporated in the statutory towns or cities.

The Zilla Panchayat elects its president and vicepresident and chairman of its committees from amongst the elected members. The term of these elected representatives will for five years. An officer of the rank of IAS is deputed by the State Government as Chief Executive Officer of the Zilla Panchayat. Various departments assist Panchayat.

Gram Panchayats

The Government of Karnataka has enacted the Karnataka Panchayat Raj Act 1993 on 30.4.1993 replacing its previous enactment in this regard for the formation of Gram Panchayat.

STATEMENT SHOWING THE TALUKWISE NUMBER OF PANCHAYATS AND HOBLIES/FIRKAS IN RAICHUR DISTRICT

Sl. No.	Name of Taluk	No. of Hoblis/Firkas	No. of Panchayats
1	2	3	4
1	Lingasugur	4	35
2	Devadurga	4	28
3	Raichur	6	31
4	Manvi	9	36
5	Sindhanur	15	35

Details regarding Panchayatwise number of villages have been furnished in Annexure I.

The Gram Panchayat is authorised to function on the items listed in Schedule I of the Act namely, preparation of annual plans for the development of Panchayat area, preparation of annual budget, providing reliefs in natural calamities, removal of encroachments on public properties, organising voluntary labour and contribution for community works, maintenance of essential statistics of the village, in addition to matters relating to Agriculture, Animal Husbandry, Fisheries, Social & Farm Forestry, Khadi, Village & Cottage Industries, Rural Housing, Drinking Water, Roads, etc., Rural Electrification, Nonconventional energy sources, Poverty Alleviation Programmes, Markets & Fairs, Rural Sanitation, Public Health & Family Welfare, Women and Child Development, Social Welfare, Welfare of Weaker Sections, Public Distribution System, Maintenance of Community assets, Construction and Maintenance of Dharmashalas, Chatras, Cattle Sheds, Ponds, Cart Stands, Slaughter Houses, Public Parks, Play Grounds, etc. Regulation of manure pits in public places and establishment and control of shandies. Such other functions as may be entrusted.

The Gram Panchayat is also empowered to make provisions for carrying out within its area any other work or measure which is likely to promote the heath, safety, education, comfort, convenience or social or economic well being of the inhabitants of the Panchayat area.

(IV) PHYSICAL FEATURES

(1) Location and size :

The district is located on the northeastern part of the state. After the bifurcation of Koppal as a separate district, the total geographical area of Raichur is at 6827.0 sq.km. and ranks at 13th among the district in

its area in the state. The east to west and north to south distance extend upto 144 and 109 kms. respectively. The most conspicuous areas of very high and very low are located at the minimum height of 350 metres and the maximum height of 650 metres of contour lines above the mean sea level. Situated on the northeastern part of the state, it lies between north latitude 15º32 minutes and 16º33 minutes and east longitude 76º16 minutes and 77º37 minutes. With regards to its surroundings, Gulbarga on the north, Kushtagi and Gangawati taluks of Koppal district and Siruguppa of Bellary district are its southern boundary. On the west it is bound by Bijapur and Bagalkot and on the east by Andhra Pradesh.

(2) Physiography :

Physiographically Raichur falls within the well-defined macro region of Deccan Plateau, one of the two regions into which the state has been divided. Within the state, it is a part of the central Karnataka Plateau one of the four micro regions into which the state has been further divided. The main physiographic feature of the district is that its western portion is a plain country, barren and scanty in vegetation and its eastern portion is adorned with few hillocks and has scrub jungles. Except for a few hillocks on the east, there is no continuous range of hills found in the district. Few clusters include a range of hill extending from northwest of Raichur towards Yergera for a distance of about 15 miles, another range runs in Raichur and Manvi taluks for about 10 miles and a third range extends from south of Raichur towards Alampur in Andhra Pradesh. Most of the clusters are made up of granite rocks. These rocks are the results of the erisional remnant of an uplifted plateau and these are made up of metamorphic schists and granitic gneisses of pre-Cambrian age. The important peaks include Morigudda (1992 feet) and Durgadagudda (1911 feet) in Sindhnur, Mallabad (1762 feet) in Raichur, Manvi (1836 feet) and Masarkal (1774 feet) in Devadurga taluk.

(3)Drainage :

The Krishna and the Tungabhadra are the two important rivers of the district. While the river Krishna forms its natural boundary on the north, Tungabhadra river forms its southern boundary. These rivers have from time to time, immemorial been associated with religious and cultural life of the people. Legend and tradition have sanctified these two perennial sources of water. The Krishna has its origin in the Western Ghats and enters the district in the north of Lingsugur taluk. It flows for a distance of about 170 kms along the northern borders. Several streams flow into this river before it leaves the district on the northeastern portion of Raichur taluk. Locally this river is popularly known as the Hire hole. The other important river Tungabhadra too originates from the Western Ghats and flows through Sindhnur, Manvi and Raichur taluks. Since the general slope of the land is from northwest to southeast, a large number of rivulets and streams flow into the Tungabhadra particularly during rainy season.

(4)Climate :

For the major part of the year, the climate remains dry in the district. The summer is very hot and it is also drought prone due to reasons in variations in the amount of rainfall received. Generally, the year is divided into four seasons. From mid of February upto the end of May, the district experiences hot climate. After this hot summer, the southwest monsoon begins from June and prolongs upto September. The months of October and November are the post-monsoon or retreating monsoon months. During the months from December to mid February, the district experiences cold season. During summer, more particularly in May, which is the hottest month of the season, the mean daily maximum temperature rises upto at 39.8ºC. The mean daily maximum temperature during December is 29.3ºC and mean daily minimum temperature is 17.7ºC. During this season, nights are generally cool, but the day temperatures sometimes reach 35ºC to 38ºC.

(5)Winds :

The wind blows in westerly to southwesterly direction during the southwest monsoon season. Strong wind prevails during this period. At the beginning of post monsoon and the cold season, the district experiences light winds and it blows in the directions between northeast and southeast. It blows in the same direction during the months of March and April. In the month of May, the winds are stronger than in March and April. The direction of the wind during the month is between southwest and northwest in the morning and changes its direction in the evening. Sometimes the depressions from Bay

of Bengal after becoming diffuse while crossing the eastern coast causes strong winds and widespread rain in the district. Also frequent thunderstorm occurs from March to June, September and October

(6)Rainfall pattern :

The District falls under north eastern dry and northern dry agroclimatic zones of the state. The taluks of Devadurga, Manvi and Raichur falls under north eastern dry zone. The taluks of Lingsugur and Sindhanur falls under northern dry zone.

The average Rainfall in the district ranges from 572 mm in Lingsugur taluk to 739 mm in Devadurga taluk. The rainfall decreases from north and west part of the district towards south and northwestern part. The northwest part of Lingsugur taluk receives the lowest rainfall.

Among the taluks in the district the premonsoon rainfall contributes 7 to 11 per cent of the annual rainfall, southwest monsoon contributes 65 to 71 per cent and northeast monsoon contributes 17 to 45 per cent of the annual rainfall.

The coefficient of variation ranges from 65 to 78 per cent for the premonsoon season, the highest variability (78per cent) being in Devadurga taluk.

The coefficient of variation for southwest monsoon ranges from 30 to 40 per cent, the highest being in Sindhanur taluk. The coefficient of variation for northeast monsoon ranges from 36 to 96 per cent, the highest being for Devadurga taluk.

The coefficient of variation for Annual rainfall ranges from 26 to 38 per cent. Devadurga taluk experiences high variability of rainfall. Talukwise rainfall pattern is given in the table below:

TALUK WISE RAINFALL PATTERN, RAICHUR DISTRICT

Taluks (No. of years of rainfall data available)	Statistical Parameters	Pre Monsoon	South West Monsoon	Northeast Monsoon	Annual Rainfall
1	2	3	4	5	6
Devadurga (45)	Average rainfall (mm)	61	523	155	738
	Minimum rainfall (mm)	0	195	12	402
	Maximum rainfall (mm)	203	1142	874	2086
	Standard Deviation (mm)	48	186	149	281
	C.V.(%)	78	36	96	38
Lingsugur (77)	Average rainfall (mm)	78	397	134	809
	Minimum rainfall (mm)	0	118	81	252
	Maximum rainfall (mm)	254	751	751	1596
	Standard Deviation (mm)	56	139	148	253
	C.V.(%)	71	35	44	31
Manvi(44)	Average rainfall (mm)	62	444	122	628
	Minimum rainfall (mm)	0	171	0	374
	Maximum rainfall (mm)	153	902	448	1150
	Standard Deviation (mm)	40	148	92	162
	C.V.(%)	65	33	76	26
Raichur (92)	Average rainfall (mm)	66	479	452	997
	Minimum rainfall (mm)	0	177	92	429
	Maximum rainfall (mm)	233	824	824	1778
	Standard Deviation (mm)	47	145	165	295
	C.V.(%)	71	30	36	30
Sindhanur (42)	Average rainfall (mm)	71	430	166	667
	Minimum rainfall (mm)	0	94	13	121
	Maximum rainfall (mm)	232	851	690	1518
	Standard Deviation (mm)	51	174	136	248
	C.V.(%)	72	40	82	37

A study of the rainfall deficit pattern during the last 20 years compared with the long term data for different seasons indicate increase in rainfall deficiency in the recent past during the premonsoon and decrease in after periods. Rainfall deficit during last 20 years has been compared with that of long term data in different seasons and is presented in the following table :

TALUKWISE AND SEASONWISE COMPARISON OF RAINFALL DEFICIT DURING LAST 20 YEARS WITH 99 YEARS DATA, RAICHUR DISTRICT

Name of Taluk	Seasons and no. of years with Deficit Rainfall							
	Pre Monsoon		Southwest Monsoon		Northeast Monsoon		Annual Rainfall	
	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs.
1	2	3	4	5	6	7	8	9
Devadurga (45)	18(40)	11(55%)	5(11)	2(10%)	14(31)	5(25%)	8(18)	2(10%)
Lingsugur (77)	41(53)	14(60%)	22(29)	6(30%)	30(39)	6(30%)	17(22)	3(15%)
Manvi(44)	18(41)	8(40%)	17(40)	9(45%)	21(48)	7(35%)	10(28)	4(20%)
Raichur (92)	41(45)	9(45%)	33(36)	5(25%)	45(49)	10(50%)	25(27)	2(10%)
Sindhanur (42)	20(48)	11(55%)	9(21)	4(20%)	16(38)	8(40%)	7(17)	2(10%)

NOTE : Figures in bracket indicate values as percentage of number of years for which data is available or for 20 years depending on the column in which it is given.

The following inferences could be made.

The Premonsoon rainfall in the recent 20 years is more deficit compared to the long term data.

Southwest monsoon in Manvi taluk in the recent 20 years is more deficit compared to the long term data.

The rainfall deficit during northeast monsoon has decreased during recent 20 years compared to the long term data, except in Raichur and Sindhnur taluks.

The trend analysis of annual rainfall indicate increasing trend in all the taluks of the district.

Source : Drought Monitoring Cell (Society of Govt. of Karnataka)

(7)Forestry

Except on the banks of the two major rivers that flow, forest vegetation is almost nil in the district. The reasons for the poor coverage of forest area may be attributed to inadequate rainfall, because of the dry tropical climate, frequent erosion and also there are no distinct hill ranges that help geological formation of such lands. Moreover even the meagre percentage of forest area has been deforested to supplement human survival. The existing forest area in the district is only 2.17 percent of the total geographical area. Of this, more than 50 percent of the area in the district lies in Lingsugur taluk and also to some extent in Devadurga and Manvi taluks. These are of mixed dry deciduous type consisting of open scrub jungles with weeds and bushes. In a few parts, timber of economic values are grown. With its small percentage of forest area, the minor forest produce that are available is the Tarwad bark, beedi leaves, Rousa grass, Sharifa or Seetaphal, honey and wax, soap nut and tamarind. Some of the timber spices found in these forests are considered to have low economic value..

(8)Geology

The major rock types occurring in the district may be classified as Dharwars, Peninsular gneissic complex and Dykes. The Dharwar series of rocks occur in the Maski band and Raichur band. The rocks occurring in Maski band consist of metamorphic series like chlorite schists, tale schists, banded ferruginous quartzites, hornblende schists, diabasic schists and amphibolites with their intrusives like quartz reefs and veins. The rocks occurring in Raichur band consist of chlorite, bornblende and diabasic schists and their reconstituted varieties. The quartz reefs and quartz veins occur in plenty in the Maski band. The quartz reefs can be broadly classified into three groups: - white quartz reefs; slate-blue quartz reefs; and pale-blue and white quartz reefs. The white quartziles and the pale-blue quarts reefs are found in Maski band where the Hatti gold mine is situated. However these varities are not gold bearing.The Peninsular gueissic rocks of grey and pink variety occur in the district. Large number of dykes which are mostly doleritic in composition are seen in the eastern portion of the district. Also found are series of rocks consisting of rounded pebbles of quartzites spread over an area of about two miles near Kachapur and Gundsagar in the district.

(9) Flora and Fauna

Flora :

As stated earlier, with just 2 percent of forest area, the district's forest wealth is almost nil. The weeds and climbers found in these forest neither possess any economic value nor are they nutritious. The different types of grass growth are not nourishing even to feed the cattle, but these are used for making thatch roof for kutcha houses in the villages. The most common shrubs are the `Bel Palas (Butea superba'), Dikmali (Gardania gummifera), Gotti or Challa (Zizyphus xylopyra), sharifa or seetaphal (Anona squamosa) and tarwad or tangadi (Cassia auriculate). These shrubs are mostly used for fencing purposes. The main tree species include Cassia fistula ('kakka' or 'Amaltas'), Acacia arabica ('Jali' or 'Babul'), Tamarindus indica ('Imli' or 'Hunise'), Pongamia glabra ('Hong' or 'Karanji'), Wrightia tinctoria ('Hale' or 'Pala-Kordsha'), Butea frondosa ("Pales" or "Muttaga'), Anogeissus latijolia ('Tirman' or 'Dindiga'), Albizzia amara ('Chujjalu'), Chloroxylon swietenia ('Huragalu'), Pterocarpus marsupium ('Bijasal' or 'Honna'), Hardwickia binata ('Karachi' or 'Kammara'), and Terminalia tomentose ('Nallamaddi' or 'Matti'). In addition to the above species, Celastrus sengalersis, Sapindus emarginata, Acacia sundra, Dodonea viscosa, Ficus bengalenisis and Dalbergia latijolia are also found in the district.

Fauna :

Since the forests in the district are of mixed dry deciduous type consisting of open scrub jungles, animals belonging to the family of big game variety have almost declined. It seems that few decades ago, tigers and leopards had their abode in these forest and sight of these animals was rare. Presently such encounters of these animals is almost found nil. Animals sighted in these forests are wolves, jackals and deers. Plenty of snakes, scorpions and lizards are met with in these jungles. Among the snakes, the cobra, Russel's viper and small water snakes are found not only in the forest but also in all regions of the district. Snakes with heads at both ends called Mannumukka-havu is a peculiar variety found in the district. Among the game birds, partridges and quails, along the rivers and streams, the wild duck, teal and waterfowl are also seen in the district.

(10) Soils

According to the National Bureau of Soil Survey Organisation and Land Use Planning (NSSO & ULP), the soils in the district can be defined as Udalfs, Orthents - Tropepts, Usterts, Usterts - Tropepts, Usterts _ Ustalfs _ Tropepts and Tropepts _ Usterts - Orthents. The black cotton soil and the red soil are predominant and it is found in major portion of the district. The black cotton soil is found where hornblende schists and the gneisses occur. The reddish sandy soil is confined to the zones of the pint gneisses in and around Mudgal, Jalahalli and Devadurga. The reddish brown soil is seen in the areas where the diabasic schists and basic dykes occur. These are found near chikhesrur and other localities. The black cotton soil is locally called as `Regadas' and the red soil is known as `Chalkas' or 'Masabs'. The red soils are exclusively utilised for Khariff crops because of their friable nature which makes it easy ploughing even after heavy rains. This soil appearing from six to eight inches in thickness are suited for all kinds of irrigated crops including sugarcane. On the other hand, black cotton soils are commonly used for raising Rabi crops. Grey loams and clay loams are found extensively in Sindhnur and Manvi taluks. Grey to dark grey black cotton soils are distributed all over the taluks. The black cotton soils possess high nutrient reserves of calcium, magnesium, soda etc. They also contain large quantities of water soluble salt and their phosphorous content is high.

(11)Cropping pattern

The vast area of the region consists of fertile tract of black cotton soil. Bordered by two perennial rivers, the Tungabhadra and the Krishna, traversed by few small streams, the district has vast irrigational potential. Despite this fact, the region remained backward in its agricultural sector until the opening of Tungabhadra, the major irrigation project by which the region received water through Tungabhadra Left Bank Canal Project. Unlike other districts, Raichur too is dependent on agriculture for their livelihood. According to the findings of Census of India 2001, cultivators and agricultural labourers together constitute 67.85 per cent of the total workers in the district.

LAND USE PATTERN FOR 1998-99 IN HECTARES

Name of Taluk	Geographical Area	Forest Area	Land put to Non-agricultural use		Uncultivable Fallow Land			Cultivable Fallow Land	Area Sown			Total Net Area Irrigated

Source : Raichur at a glance ; District Statistical Officer, Raichur

According to the latest statistics on land utilisation, which is given in the above table, forests occupy 2.2 per cent. Lands, which are put to non-agricultural use, and uncultivable fallow lands constitute 10.2 per cent. The statistics points out that 87.7 per cent of the total geographical area is utilised for agricultural purposes, which includes the current fallows.

LAND HOLDINGS IN HECTARES 1997-98

Name of Taluk	Marginal (Below 1)		Small (1–2)		Semi-Medium (2-4)		Medium (4-10)		Large (10 & above)		Total Holdings

Source : Raichur District at a Glance, 1998-99, District Statistical Officer, Raichur.

The size of the agricultural land holdings is one of the important factors that determine the productivity of the lands. According to the agricultural census of 1990-91, which is the latest statistics available on land holdings, there are 2.26 lakhs of holdings covering a total area of 6.9 lakh hectares. The table above reveals that small size holdings of 1-2 hectares and semi-medium holdings of 2-4 hectares are more in the district, which accounts for 30.06 and 27.89 per cent respectively. Agriculturists holding marginal size of less than one hectare is almost the same, the number of medium size land holdings of 4-10 hectares. The area held by the small and semi-medium size land holders is almost equal the area held by the marginal and medium size land holders. The table given above illustrates the distribution of taluk-wise land holdings in the district.

The soils of the district, which are predominantly black cotton soil and red soil are suitable for yielding a variety of crops among which most important, are jowar, paddy, cotton, groundnut and sugarcane. Jowar is the chief crop most extensively cultivated cereal in the district and it is grown in an area of 174,386 hectares. It is grown both under irrigated as well as unirrigated conditions. The district is known for its good variety jowar called the Raichur variety, which is popular even now. The next important crop is the paddy where 117,347 hectares are utilised for cultivation of this crop. Of this more than 97 per

cent of the area under paddy is cultivated under irrigated conditions. The third important cereal is the bajra. About 65,722 hectares of area are used for cultivation of this crop. It is grown in almost all parts of the district but grown extensively in Manvi and Lingsugur taluks. Besides these, wheat and maize is also grown in the district. Few oil seeds are also raised in the district. Among them sunflower and groundnut are sown in 109,783 hectares and 50,040 hectares respectively. The other oil seed crops grown in the district are castor, sesamum, linseed and nigerseed. Cotton is the chief commercial crop most extensively cultivated in the district. The total area put under cultivation of this crop is 49,208 hectares. Raichur is one of the top most cotton growing district in the state. Commercial crops like sugarcane and tobacco are also grown in the district. Raichur is not known for any large scale activity in the cultivation of fruits and vegetables. Fruits like banana, sweet potato, mango and sapota are raised in the district. Common vegetables cultivated in the district are brinjal, onion and lemon. Dry chillies, turmeric, dry ginger and coconut form the condiments and spices crops that are cultivated in the district. The area under each crop, their production and yield per hectare are given in the below table.

AREA, PRODUCTION AND AVERAGE YIELD OF PRINCIPAL CROPS FOR 1998-99 UNDER ALL SEASONS

Principal Crops	Irrigated			Un-irrigated			Total		
	Area in hectare	Production in tones	Yield in Kgs per hectare	Area in hectare	Production in tones	Yield in Kgs per hectare	Area in hectare	Production in tones	Yield in Kgs per hectare

(12)Irrigation :

Scanty and unreliable rainfall resulting in frequent droughts and famines has limited the progress of agriculture. Consequently this has led to the need for water through various irrigational sources in the district. The two major rivers, few tanks and wells have indeed augmented the irrigational potentiality in the district. The advent of canal irrigation under the Tungabhadra project brought drastic changes in agricultural operations. As a result, areas being brought under irrigation increased considerably over the years. According to the latest statistics available for 1998-99, the net area irrigated account for 122,140 hectares. Taluk-wise comparison points out that 50.6 per cent of the total irrigated areas are in Sindhnur taluk. Of all the sources listed in the table, irrigation through canals forms a major source where 82.9 per cent of the total area irrigated is through canals and it is a major source of irrigation for Sindhnur, Manvi and Raichur taluks. The taluk-wise details of net area irrigated through various sources is given in the following table.

NET AREA IRRIGATED BY DIFFERENT SOURCES

Name of Taluk	Net area irrigated for 1998-99 (Area in hectares)						
	Canal	Tank	Wells	Lift Irrigation	Bore Wells	Other sources	Total
1	2	3	4	5	6	7	8
Devadurga	820	425	1,375	8	-	150	2,778

Source : Raichur District at a Glance, 1998-1999, District Statistical Officer, Raichur

Apart from the sources mentioned above, there are a few irrigational projects implemented in the district to meet the requirement of the farmers. To mention is the two major projects namely, Rajolibanda Diversion Scheme and Tungabhadra Project. The Rajolibanda Diversion Scheme consists of an anicut across the Tungabhadra river near Rajolibanda village in Manvi taluk. The anicut is 12 feet high and 2,690 feet long with flooded banks on either side. The project was completed in the year 1962 and it was used for irrigational purpose in the same year. The second major project is the Tungabhadra project. Under this project, a dam across the river Tungabhadra was constructed at a distance of 6 kms. from Hospet in Bellary district. This project envisages construction of three canals, the Left Bank Canal, the Right Bank High Level Canal, and the Low Level Canals. While the former one passes through the Raichur district, the Right Bank High Level and Low Level Canal passes through Bellary district. The Tungabhadra Left Bank Canal passes through Raichur, Devadurga, Manvi and Sindhnur taluks. The benefits of the project reach to majority of the villages in Sindhnur and Manvi taluks. The third project is

the mighty Upper Krishna project undertaken by the government to irrigate the dry areas of Raichur, Koppal, Bijapur, Bagalkot and Gulbarga districts. This project has been taken up in stages. During the first stage, it has been proposed to construct a dam across the river Krishna, the downstream of Almatti dam at Narayanapur near Bachihal and Siddapur village in Muddebihal taluk of Bijapur district. As per the plan, a Narayanapur Right Bank Canal has been proposed to build during the second stage of this project. If constructed, it is expected to irrigate dry acreas of Lingsugur, Devadurga, Raichur and Manvi taluks. In addition to these, the government has sanctioned approval for Maskinala project which comprises of a reservoir across the Maskinala, a tributary to river Tungabhadra, near Muraladinni village in Lingsugur taluk. With canals on both banks, it is expected to provide irrigation to an extent of 3001 ha. in Lingsugur taluk. The final approval was accorded vide Government order No.ID 134 MTP 95, dated 22-4-96. The proposed dam is 814 M long and 23.74 M high and will submerge an area of 173 ha. without affecting any village. The work is under progress. With these on-going projects as well as projects which are accorded approval by the government, the irrigational potential of the district is thereby expected to increase resulting in more coverage of dry areas of the region.

(13)Natural Wealth

The Dharwar rocks of the district are fairly rich in economic minerals. This mineral wealth includes gold, silver, copper, iron, galena, quartz, mica, feldspar, ochres, ilmenite, soapstone and granites. However mining activity is confined mainly to gold, quartz, copper, silver, tourmaline, steatite, spodumene and minor minerals like building stone and ornamental stone. This is the second district in the state, next to Kolar, in producing gold. Gold occurs in reefs of quartz in the belts of Dharwar schists found at many places in the district. Of the many places, occurrences of gold on large scale at Maski band are worth mentioning. This area has been the most prominent amongst the other gold mines in the district even in the past. The evidences discovered here bear testimony to the high levels of skills and expertise achieved by the miners in those days when they carried their mining operations at a depth of 640 feet below the surface of the earth. The other minerals exploited in the district are copper and quartz. Copper is being exploited in Raichur, Lingsugur and Manvi taluks. Though as per the latest statistics, the quality of reserve has not been assessed in Raichur, about 2.00 MT and 8.00 MT of copper have been assessed in Lingsugur and Manvi taluks respectively. A number of white quartz reefs, suitable for glass and ceramic industries, occur in the district, especially in Raichur and Sindhanur taluks. Also found are potash feldspar in the neighbourhood of Parthipalli, Turkandona, Matmari and few other places. All along the flanks of the ferruginous quartz bands on the west of Nandihal hills and also on the eastern slope of Kalmangi hill, large quantities of hematitic ochres occur. Apart from these, on the banks of Krishna river in the northern portion of Lingsurur taluk, titanium measuring over six percent in black sand occur in the district. Building stones, though its value has not been assessed, occur in all the taluks of the district. about 16.66 MM3 and 2.86 MM3 of ornamental stones are being exploited in Devadurga and Lingsugur taluk respectively. Taluk-wise mineral resources of the district is given in the following table.

TALUK WISE MINERAL RESOURCES OF THE DISTRICT

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor	
1	2	3	4	5
1.	Devadurga	Tourmaline Gold Silver	Building Stone OrnamentalStone	Building stone is abundantly available.
2.	Lingasugur	Gold Silver Steatite Copper Spodumene	Building Stone. Ornamental stone	-
3.	Manvi	Copper	Building Stone. .	-

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor	
1	2	3	4	5
4.	Raichur	Quartz Copper	Building Stone.	Copper ore not economical
5.	Sindhnur	Quartz	Building Stone. .	-

(14)Animal Husbandry

Animal husbandry is an important economic activity in this district too. The hot dry climate and frequent droughts have lead to difficulty in grazing and providing fodder to the cattle, which in turn have affected the cattle wealth. The Krishna valley and Khillar varieties were the main breeds of cattle reared in the district. Of these two, farmers prefer Khillar breed because of its greater utility in agricultural operations and also its capacity to yield more milk. With the availability of water through irrigational projects, the district has seen some improvement in its cattle wealth. As per the statistics published by the department of Gazetteer, Government of Karnataka, the district ranks at 13th place in its cattle wealth in the state. The total livestock numbers to 10,27,037 which includes cattle, buffaloes, sheep, goats, pigs, rabbits, dogs, and other livestocks. In its poultry population, the district ranks at 25th place and the total poultry population numbers to 2,57,000. About 1,82,000 tonnes of milk, 309 lakhs of eggs and 3,034 tonnes of meat are produced. The department of Animal Husbandry and Veterinary Services is taking various measures to enhance its cattle wealth by introducing such breeds which are suitable to the soil, climate and other environmental conditions of the district. In their effort to bring improvement in this sector, the livestock breeding and training centre in the district is engaged in Jercy cattle breeding, fodder development, training of farmers and production and distribution of frozen semen. Of the 32 poultry institutions in the state one centre namely poultry rearing centre is in the district. The details of livestock population is given in the following table:

DISTRIBUTION OF LIVESTOCK POPULATION IN THE DISTRICT

Sl. No.	Name of Livestock	Total Livestock
1	2	3
1	Cattle	321,181
2	Buffaloes	118,299
3	Sheep	324,520
4	Goats	212,719
5	Pigs	10,430
6	Rabbits	212
7	Dogs	39,280
8	Other livestocks	396
	Total Livestock	**1,027,037**
	Total Poultry	**257,000**

(14 A) Veterinary services:

The spread of veterinary services has resulted in the improvement of animal health. There are 5 veterinary hospitals in the district. In addition, there are 13 dispensaries and 44 primary veterinary centres. Greater importance is being given to replace the local variety by exotic breeds. For this purpose, 5 artificial Insemination Centres have been established in the district. Also there are 4 mobile dispensaries to render services to the need of total livestock population in the district. The following table gives you the total veterinary services in the district.

VETERINARY INSTITUTIONS IN THE DISTRICT FOR THE YEAR 2000

Sl. No.	Veterinary Services	No. of Institutions
1	2	3
1	Hospital	5
2	Dispensaries	13
3	Primary Veterinary Centres	44
4	Mobile Dispensaries	4
5	Artificial Insemination Centres	5
	Total	**71**

(15)Fisheries

Situated in a dry zone with not many perennial sheets of water, Raichur district cannot lay claim to any great wealth in fisheries. The resources are mostly inland fishing confined to the river Krishna, the Tungabhadra and a few tanks. There are about 65 major tanks and 244 minor tanks with the water spread area of 3369.28 hectares in the district. Apart from these tanks, there are 2 reservoirs with less than 500 hectares of water spread area. Varieties like the carp, the catfish, the murrells and the eels are available in the district. Fishing is done by means of cast nets, gill nets, hooks and fishing traps. The district has neither the fish farms nor the fish seed farms. However there are 3 and 20 fish seed centres involved in production and rearing of fishes respectively. Further it has 4 ice plants and one cold storage facility. During 1998-99, the total number of fishermen actively engaged in this profession was just 1900 and they have 6 co-operative societies functioning in the district. As per the statistics, there are no fish markets in the district. The government has introduced various welfare schemes for the benefit of fishermen. Some of them includes, Group Accident Insurance, CSS for development of Model fishermen villages, CSS for motorisation of traditional fishing craft, CSS for reimbursement of central excise duty on diesel used by mechanised boats, subsidy on sales tax, payment of distress relief fund, etc. The following table highlights in brief the fishing activity in the district.

FISHING ACTIVITY IN THE DISTRICT

Fish Seed Stocked	In lakh fingerlings
a) Reservoirs	-
b) Major Tanks	27.00
c) Minor Tanks	11.00
Total	**38.00**
Estimated Fish Production	**In MTs**
a) Cultured	2,176.40
b) Natural	337.08
Total	**2,513.48**

(16)Industries

Raichur remained industrially backward till the opening of mighty Tungabhadra project in the region. Power has been the main reason for its backwardness in this sector. This constrain was removed when the district received hydro-electric power supply in 1963. Ever since, the district saw great improvements in its industrial sector. Through various power development schemes, the government is supplying electricity for starting large scale industries. Prior to the modern industry, the district is known for its old-time industries. The excavations conducted by Archaeologists at Maski and some other places in the district revealed that the area was once an important centre for craft industries. A number of old specimens of jewellery, beads, artistic pottery, metalware, arms, coins, tools and implements that were discovered in the region bear testimony to the high degree of craftsmanship that existed in those days.

Next to Kolar, the Raichur district has the distinction of having gold mines at Hatti, which are of economic importance. The history of gold mining at Hatti is said to have began in the pre-Ashokan period. This area was, at some point of time, systematically explored, prospected and mined for a longer period by some race of highly skilled people not only in mining but also in the extraction and metallurgy of gold. Modern mining started in 1886 by the Hyderabad (Deccan) company. After a gap of several years, again the Hatti Gold Mining Company Ltd., started its operation in the area in the year 1903. After the inception of Tungabhadra project, there came up few large-scale industries in the district. It is known for its richness in oil seeds and so there was ample scope for setting up vegetable oil industry in the district. Extraction of oils from groundnut, cottonseed, castor, gingelly and safflower is undertaken in the district. Besides these, there are few mills engaged in spinning and cotton ginning in the district. The reinforced cement concrete pipes manufactured by Messrs Indian Hume Pipe Company Ltd., is another venture in the field of industrial sector in the district. Apart from these few large-scale industries, the district is famous for its village and cotton industries like handloom weaving, leather working, salt making, carpentry, pottery and hand embroidery. As per the latest statistics for the year 1998-99, there are totally 90 textile factories, 3 chemical factories, 7 engineering and 119 other registered factories in the district. These factories have employed 10503 persons. Taluk-wise details can be seen in the table given below.

TALUKWISE DETAILS OF MAJOR FACTORIES FOR THE YEAR 1998-99

Name of Taluk	Number of Factories in the District					No. Employed
	Textiles	Chemicals	Engineering	Others	Total	
1	2	3	4	5	6	7

Devadurga	17	-	-	03	20	419
Raichur	35	03	04	95	137	8,684
Manvi	10	-	01	06	17	420
Sindhnur	08	-	01	13	22	520
Total	**90**	**03**	**07**	**119**	**219**	**10,503**

Source: District at a Glance 1998-99, Raichur, Government of Karnataka.

The table indicates the number of factories located in each taluk and the number of persons employed in each category of industrial unit.

(17)Trade and Commerce

Though Raichur was rich in trade and commerce, indigenous banking business however, did not thrive well. Not much can be said about the banking facilities except Chavani Fakirappa Fund which existed many decades ago, played an important role in the district. In fact this fund is said to have laid the foundation for modern banking practices in the district. Four or five decades ago institutions like Mahalaxmi Deccan Bank, Saraswati Bank, Osmania Aziz Bank and Sharada Banking Company started their activities but have to close down due to unsuccessful business activities. It was only during the late 50's and 60's many prominent institutions set their foot in the district. Banks like State Bank of Hyderabad, Syndicate Bank, Canara Bank, the Central Bank of India, the Canara Banking Corporation and the Vysya bank started their business in the district. Today as per statistics, the district has 45 commercial banks, 44 regional rural banks, 89 urban co-operative banks, 5 primary land development banks and 7 other co-operative banks. The taluk-wise details of banks are given in the following table:

Unlike other districts, the co-operative movement gained importance in the district in the year 1919. The first one to be established was the co-operative bank at Raichur. After a set back during the world wars, the co-operative movement gained momentum during successive five year plans. As on today, there are about 554 co-operative societies in different fields namely, agriculture, milk, housing and other societies. Apart from these societies, trade centres also came up in the district. The development of trade centres resulted in setting up of general market. These markets in turn helped the growth of regulated markets. The main purpose establishing regulated markets is to ensure the agriculturists obtain better

price, proper weightment for their produce and relief from collections of illegal fees. As on today, there are 5 main regulated markets one each in all the five taluks and there are 12 sub-markets in the district. Raichur market is famous for cotton and Turdal. Paddy is an important agricultural produce for Raichur and Sindhanur markets. The important exports include cotton, oil seeds, groundnut oil, pulses and cereals. Imports related to cotton yarn for handlooms, silk yarn, artificial silk yarn, leather, blankets, tobacco, beedi leaves, timber, vanaspati and jaggery. The following table gives an account of taluk-wise details of co-operative societies and regulated markets in the district.

TALUKWISE DETAILS OF BANKS IN THE DISTRICT

(18)Transport and Communication

In the matter of road and railway communication, Raichur district does not hold any envious position. The total length of railway line in the district is 51 kms. The only line between Raichur-Sholapur section was laid between 1861-1871. The purpose of laying this line was to connect the then Bombay and Madras Presidencies. At present this line has 7 stations within the district. The taluk-wise railway length in kilometres is given in the following table :

With regard to roads, few roads which existed formerly were of a poor standard and the two rivers as well as several streams hindered the development of proper road network. The black cotton soil of these tracts also posed problems of proper maintenance. The first early road to be laid across the district was Raichur-Lingsugur road, east to west on the black cotton soil. It is only after the reorganisation of the state in 1956, the district witnessed remarkable progress in this sphere. The total road length of the district is 3,107 kms. There are no national high ways passing through the district. In recent year several bridges and culverts have been built in different parts of the district and this rendered road communication to be more convenient. The taluk-wise details on road length can be seen in the following table.

DETAILS OF RAILWAY TRANSPORT IN THE DISTRICT

(19)Electricity and Power

Karnataka has a place of pride in the history of power generation in the country. KPTCL – Karnataka Power Transmission Corporation Limited (erstwhile KEB) is mainly vested with the functions of transmission and distribution of power in the entire state. The Corporation has been attaching great importance to electrification of villages and hamlets, tribal colonies and harijan basthis and energisation of irrigation pumpsets. Besides this, with a view to benefit weakest among the section of society, schemes called Bhagya Jyothi / Kutir Jyothi have been introduced.

Statement gives below shows talukwise number of villages electrified and talukwise energisation of IP as on 31.3.1999 in Raichur District

TALUKWISE NUMBER OF VILLAGES ELECTRIFIED AND ENERGISED IRRIGATION PUMP SETS AS ON 31.3.1999

(v) CENSUS CONCEPT

Building

A `Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in

addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A `census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multistoreyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multistoreyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard, by definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,`singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. But if such hostels/ hotels have out houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open

compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is `town' for urban areas and `village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in nonagricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multimember households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mantaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In respect of Karnataka State the Scheduled Castes and Scheduled Tribes as contained in the Scheduled Castes & Scheduled Tribes Orders (Amendment) Act, 1976 are valid for the purpose of Census of India, 2001. With the promulgation of Act 39 of 1991 however, the sub entries Naik, Nayak, Beda, Bedar and Valmiki were added under the main entry at S.No. 38 (Naikda, Nayaka, …..) of the Scheduled Tribes list of the State. There are in all 101 Scheduled Castes and 49 Scheduled Tribes in the State which are listed below:

List of Scheduled Castes

1 Adi Andhra
2 Adi Dravida
3 Adi Karnataka

4 Adiya (in Coorg district)
5 Ager
6 Ajila
7 Anamuk
8 Aray Mala
9 Arunthathiyar
10 Arwa Mala
11 Baira
12 Bakad
13 Bant (in Belgaum, Bijapur, Dharwar and North Kanara districts)
14 Bakuda
15 Balagai
16 Bandi
17 Banjara, Lambani
18 Bathada
19 Beda Jangam, Budga Jangam
20 Bellara
21 Bhangi, Mehtar, Olgana,Rukhi, Malkana, Halalkhor, Lalbegi,Balmiki, Korar, Zadmalli
22 Bhambi. Bhambi, Asadaru, Asodi, Chamadia, Chamar, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Muchi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit, Samgar
23 Bhovi
24 Bindla
25 Byagara
26 Chakkiliyan
27 Chalavadi, Chalvadi, Channayya
28 Chandala
29 Chenna Dasar, Holaya Dasar
30 Dakkal, Dokkalwar
31 Dakkaliga
32 Dhor, Kakkayya, Kankayya
33 Dom, Dombara, Paidi, Pano
34 Ellamalwar, Yellammalawandlu
35 Ganti Chores
36 Garoda, Garo
37 Godda
38 Gosangi
39 Halleer
40 Halsar, Haslar, Hulasvar,Halasvar
41 Handi Jogis
42 Hasla
43 Holar, Valhar
44 Holaya, Holer, Holeya
45 Holeya Dasari
46 Jaggali
47 Jambuvulu
48 Kadaiyan
49 Kalladi
50 Kepmaris
51 Kolupulvandlu
52 Koosa
53 Koracha
54 Korama
55 Kotegar, Metri
56 Kudumban
57 Kuravan
58 Lingader
59 Machala
60 Madari
61 Madiga
62 Mahar, Taral, Dhegu Megu
63 Mahyavanshi, Dhed, Vankar, Maru Vankar
64 Maila
65 Mala
66 Mala Dasari
67 Mala Hannai
68 Mala Jangam
69 Mala Masti
70 Mala Sale, Netkani
71 Mala Sanyasi
72 Mang, Matang, Minimadig
73 Mang Garudi, Mang Garodi
74 Manne
75 Masthi
76 Mavilan
77 Meghval, Menghvar
78 Moger
79 Mukri
80 Mundala
81 Nadia, Hadi
82 Nalkadaya
83 Nalakeyava
84 Nayadi
85 Pale
86 Pallan
87 Pambada
88 Panchama
89 Panniandi
90 Paraiyan, Paraya
91 Paravan
92 Raneyar
93 Samagara

94 Samban
95 Sapari
96 Sillekyathas
97 Sindhollu, Chindollu
98 Sudugadu Siddha
99 Thoti
100 Tigar, Tirbanda
101 Valluvan

List of Scheduled Tribes

1 Adiyan
2 Barda
3 Bavacha, Bamcha
4 Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
5 Chenchu, Chenchwar
6 Chodhara

43 Rathawa
44 Sholaga
45 Soligaru
46 Toda
47 Varli
48 Vitolia, Kotwalia, Barodia
49 Yerava

Language and Mother tongue

As per the Census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years

and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as `Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as `Marginal worker' .

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as `Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if she or he is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops - tea, coffee, rubber, coconut and betelnuts (areca).

Agricultural labourer

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. A person who has been engaged in the economic activity like above is termed as Household Industry Worker.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other workers

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as an 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1,000 males in a population.

(vi) NON-CENSUS CONCEPTS

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faucal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a subsoil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of

married women or number of women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear female population of the same age group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear married female population of the same age group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Midyear female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Midyear married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Midyear population of the same age group}} \times 1{,}000$$

q_1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2

Probability of dying between birth and age 2.

q_5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U_5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neonatal mortality rate and Post neonatal mortality rate. The neonatal mortality rate also comprises of two parts viz., early neonatal mortality rate and late neonatal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Perinatal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/ Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 100,000 and above population are classified as Class I UAs.

/ towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000- 4,999,999); M5 (1,000,000-1,999,999); M4 (500,000-999,999); M3(300,000-499,999); M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its Distribution:

(a) Distribution of population in Rural-Urban Areas:

According to the 2001 Census, the total population of Raichur district is 1,669,762, comprising 841,840 males and 827,922 females. The population of the district forms 3.2 percent of the state population and ranks at 14th place among the districts. Out of the total population of the district 74.8 percent lives in rural areas while 25.2 percent lives in urban areas. Rural population of the district is distributed among 5 taluks and urban population spread over in 9 towns. The total urban population in the district is 420,837 persons comprising 214,981 males and 205,856 females. The total rural population in the district comes to 1,248,925 persons and is composed of 626,859 males and 622,066 females as per 2001 Census. This rural population is distributed in 830 inhabited villages and there are 53 un-inhabited villages in the district.

(b) Size-class and Civic Status of towns:

The Statement below gives the position and number of urban units according to size-class of population as per 2001 Census:

SIZE-CLASS AND CIVIC STATUS OF TOWNS

Serial number	Size-Class of town	Name and civic status of town		Urban Population		
				Persons	Males	Females
1	2	3		4	5	6
1	IV	Mudgal	TP	19,116	9,822	9,294
2	III	Lingsugur	TP	27,306	13,907	13,399
3	IV	Hatti Gold Mines	NAC	14,722	7,525	7,197
4	IV	Hatti	CT	12,420	6,432	5,988
5	III	Devadurga	TP	21,994	11,312	10,682
6	IV	Shaktinagar	CT	18,983	9,825	9,158
7	I	Raichur	CMC	207,421	105,763	101,658
8	III	Manvi	TMC	37,613	19,061	18,552
9	II	Sindhnur	TMC	61,262	31,334	29,928

Population Growth, Density and Sex-ratio:

Population Growth:

Raichur District witnessed a positive growth rate in each decade with 7.4, 4.7, 10.3, 6.2, 19.3, 26.8, 28.8, 30.5 and 23.5 percent during the period 1901 to 2001 (except 9.6 percent negative growth during the decade 1911-1921). According to the 1991 Census the total population of the district was 1,351,809. There has been net addition of 317,953 persons during 1991-2001. The decadal growth rate of the district comes to 23.5 percent. The growth rate for the rural and urban areas of the district is 22.5 and 26.7 percent respectively.

Density:

The population density of Raichur district is 189 persons per Sq. Km. against the state average of 276 persons. At taluk level, the density varies between 148 persons in Devadurga taluk and 248 persons in Raichur taluk. In rural areas it comes to 150 persons per Sq. Km., while in urban areas it comes to 3,744 persons. In urban areas, the density of population varies between 2,003 persons in Sidhnur town and 26,183 persons in Devadurga town.

Sex Ratio:

There are 983 females for every one thousand males in Raichur district. The sex-ratio figures for rural areas and urban areas of the district are 992 and 958 respectively. It is also observed that, the proportion of females in rural areas is higher than that of urban areas. Sex-ratio in the age-group 0-6 comes to 964 girls per 1,000 boys in the district as a whole. In rural areas, this proportion is 969, while in urban areas the sex-ratio of Child population works out to 948 girls per 1,000 boys.

Work Participation Rate:

The work participation rate is defined as percentage of total workers to total population. According to 2001 Census, the total workers including main and marginal workers constitute 43.9 percent of total population of the district. Of the total workers, the share of main workers is 74.3 percent and marginal workers is 25.7 percent. The remaining 56.1 percent of population belongs to the category of non-workers.

As per 2001 Census among the main workers male participation rate in the district is 87.0 percent and corresponding proportion of females is 54.7 percent. The proportion of female marginal workers is higher than male marginal workers, as the females are attending to one or more economic activities in addition to their household duties to improve the family income. Majority of the workers are engaged in agricultural activities. Of the total 732,762 workers in the district, 28.2 percent of these total workers are categorized as cultivators, 44.8 percent agricultural labourers, 2.0 percent in household industries and 25.0 percent in other services.

Literacy:

A person who can read and write in any language is considered as literate in Census. All children of age below 7 years are treated as illiterate.

As per 2001 Census, Raichur district has reported 676,799 persons as literates constituting 48.8 percent of the total population excluding the population of 0-6 years. The male and female literacy rates in the district are 61.5 and 35.9 percent respectively. The literacy rate of males is higher than that of females. The gap in the male - female literacy rate is 25.6 in the district.

The total literacy rates of rural and urban area are 42.5 and 66.9 percent respectively. The male and female literacy rates in rural areas are 56.1 and 28.9 percent respectively. In urban areas these rates

are 76.8 and 56.5 percent respectively. The gap in male - female literacy rates in urban areas is 20.3 as against 27.2 in rural areas. It is thus clear that females are better educated in urban areas than their counterparts in rural areas.

(c) Scheduled Castes and Scheduled Tribes Population 2001:

Of the 1,669,762 total population of the district 19.0 percent of the total population belong to Scheduled Castes and 18.1 percent to Scheduled Tribes. The percentage of Scheduled Castes constitute 85.8 percent in rural areas and 14.2 percent in urban areas. The proporation of Scheduled Tribes is 92.9 and 7.1 in rural and urban areas respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36

Following tables, which presents the data on population within the district, with a brief notes will provide an overview of the district.

TABLE 1: DECADAL CHANGE IN POPULATION OF TALUKS BY RESIDENCE, 1991-2001

Taluk	Population						Percentage decadal variation 1991-2001			Percentage Urban Population	
	1991			2001							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12
Lingsugur	262,043	200,544	61,499	321,042	247,478	73,564	22.5	23.4	19.6	23.4	22.9
Devadurga	176,889	161,930	14,959	222,457	200,463	21,994	25.7	23.8	47.0	8.4	9.9
Raichur	358,846	175,708	183,138	435,380	208,976	226,404	21.3	18.9	23.6	51.0	52.0
Manvi	269,273	241,193	28,080	330,719	293,106	37,613	22.8	21.5	33.9	10.4	11.4
Sindhnur	284,758	240,383	44,375	360,164	298,902	61,262	26.4	24.3	38.0	15.5	17.0
District Total:	**1,351,809**	**1,019,758**	**332,051**	**1,669,762**	**1,248,925**	**420,837**	**23.5**	**22.4**	**26.7**	**24.5**	**25.2**

Data given in table-1 reveals the taluk-wise decadal variation of population in the district. During the decade 1991-2001, it has grown by 23.5 per cent. Taluk wise decadal change points out the highest variation is Sindhnur and Devadurga where the variation are 26.4 and 25.7 per cent. Devadurga urban has recorded the highest variation of 47.0 per cent. The percentage of urban population to total population in the district has grown by 0.7 per cent during the decade.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

There are 49 villages in the district having population less than 200. Also there are villages with population ranging between 200-499, 500-999, 1,000-1,999 and 2,000-4,999, when it numbers 105, 223, 282 and 140 villages respectively. The table also reveals that villages whose population ranging 5000 and above are very less in the district. With regard to villages with population 10,000 and above, it is observed that 10 villages in Raichur block has been reported under this column. In Lingsugur C D block, no village has been reported to have population 5,000-9,999

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS

		Name of Town
(a)	New	
	(i) Statutory Town	**- Nil -**
	(ii) Census Town	**- Nil -**
(b)	Denotified	
	(i) Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as Census Towns	**- Nil -**
	(ii) Statutory towns of 1991 Census denotified but identifiable as Census Towns based on demographic and economic criteria	**- Nil -**
	(iii) Census towns of 1991 Census notified as Statutory town in 2001 Census	**Devadurga (MP)**
(c)	Declassified	**- Nil -**
(d)	Wholly merged with other town(s)	**- Nil -**

Declassified means the Census towns of 1991 Census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	18	2.2	10,487	0.8
11-20	6	0.7	422	0.0
21-50	44	5.3	15,053	1.2
51-100	164	19.8	139,639	11.2
101-200	389	46.9	574,461	46.0
201-300	122	14.7	278,644	22.3
301-500	69	8.3	161,785	13.0
501 +	18	2.2	68,434	5.5
Not known	0	0.0	0	0.0
District Total:	**830**	**100.0**	**1,248,925**	**100.0**
Population Density (Rural) of the district:		**150**		

Distribution of villages by population density and ranges are presented in the above table. The above table reveals that 46.9 per cent of villages have density of population ranging between 101-200. Some 232 villages have the density less than 100 per square kilometer. Similarly there are 209 villages that have the density above 200 persons per sq.km.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT 1901-2001

Census Years	State			Census Years	District		
	Total	Rural	Urban		Total	Rural	Urban
1	2	3	4	5	6	7	8
1901	983	984	976	1901	NA	NA	NA
1911	981	984	960	1911	NA	NA	NA
1921	969	975	936	1921	NA	NA	NA
1931	965	972	927	1931	NA	NA	NA
1941	960	965	935	1941	NA	NA	NA
1951	966	974	941	1951	1004	1006	996
1961	959	973	913	1961	994	1002	960
1971	957	971	913	1971	982	990	942
1981	963	978	926	1981	988	998	951
1991	960	973	930	1991	978	989	948
2001	964	976	940	2001	983	992	958

The above table gives the sex-ratio for the rural and urban population of the state as well as that of the district from 1901 to 2001 census.

It is observed that the state has recorded a decrease in the sex-ratio since 1901 census (983). However in 2001 census, the state has registered a better sex-ratio of 965 little higher than the ratio of 1991 Census (960).

For the district, the sex-ratio in 1901 Census was 1004, which gradually decreased over the decades with some minute fluctuations. However, in 2001 Census, the district has recorded a sex-ratio of 983 better than that of 1991 Census 978. It is also observed that the sex-ratio in 2001 Census for the district (983), is more than that for the state (965).

Again, the ratio for the rural women in 2001 Census is comparatively better than, that for the urban women in the state as well as in the district.

TABLE 6 : SEX RATIO BY TALUKS, 2001

Sl. No.	Name of Taluk	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Lingsugur	974	981	952
2	Devadurga	982	986	944
3	Raichur	973	989	959

Sl. No.	Name of Taluk	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
4	Manvi	992	994	973
5	Sindhnur	998	1,007	955
	District Total:	**983**	**992**	**958**

There are 983 females per 1000 males in the district. The sex ratio for rural area is 992 and for urban, it is 958. The ratio is favourable for men in both rural and urban areas. Though the ratio at the district level favours men in both the areas, taluk wise comparison reveals that in Sindhanur rural the ratio favours women.

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Sl. No.	Name of C. D. block	Sex ratio
1	2	3
1	Lingsugur	981
2	Devadurga	986
3	Raichur	989
4	Manvi	994
5	Sindhnur	1,007
	District (Rural) Total:	**992**

This table highlights the data on sex ratio by C.D. blocks, which includes all the villages in the district. The overall ratio for the district favours men which is 992 females per 1000 males. Block wise comparison reveals that in Sindhnur C.D. block, the ratio favours women.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	6	0.7	1,088	0.1
700-749	2	0.2	202	0.0
750-799	7	0.8	1,170	0.1
800-849	14	1.7	7,987	0.6
850-899	37	4.5	26,792	2.1
900-949	115	13.9	175,326	14.0
950-999	252	30.4	475,833	38.1
1000-1099	352	42.4	536,796	43.0
1100+	45	5.4	23,731	1.9
	830	**100.0**	**1,248,925**	**100.0**
Sex ratio (Rural) for District:		**992**		

The sex ratio of rural population by ranges are given with corresponding number of villages. Though the overall sex ratio of rural population as given above is 992, the ratio for villages by ranges reveals that there are 397 villages which have the sex ratio above 1,000 favouring women in the rural areas. It covers 44.9 per cent of the rural population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Mudgal	TP	946
2	Lingsugur	TP	963
3	Hatti Gold Mines	NAC	956

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
4	Hatti	CT	931

		Urban	**61,461**	**31,547**	**29,914**	**948**

Variations in child sex ratio has been a long observed phenomenon and have undergone considerable debate among the researchers and policy makers from time to time. Although the observed variations in the ratio favouring males is a biological fact, continued decline over the period causes great concern among the policy makers. The taluk wise sex ratio for 0-6 population is given in the above table which reveals that there are 964 girls per 1,000 boys. The urban area of Manvi taluk is the only area where registered sex ratio favours girls.

The following table highlights the data on the sex ratio of population in the age group of 0-6 by C.D blocks, which includes only the rural portions of the district. The child ratio is favorable for boys in all the C.D. blocks.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females

900-949	114	13.7	37,160	16.8
950-999	104	12.5	49,968	22.5
1000-1099	175	21.1	54,751	24.7
1100+	167	20.1	28,992	13.1
District (Rural) Total	**830**	**100.0**	**221,607**	**100.0**
Sex ratio (Rural) for District:		**969**		

The sex ratio of rural population in the age group of 0-6 is presented by ranges in the above table. Though the overall sex ratio for the rural district is 969 girls per 1,000 boys, it is worth noting that 342 inhabited villages have the sex ratio favorable for girls. Similarly in 111 villages, the data shows a grim picture of the status of the girl child where the sex ratio ranges between less than 700, 700-749 and 750-799.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

		Urban	**420,837**	**68,912**	**25,127**	**16.4**	**6.0**

Taluk wise Scheduled Castes and Scheduled Tribes population are given in the above table. The total Scheduled Castes and Scheduled Tribes in the district are 317,276 and 303,042 persons respectively. The percentage of Scheduled Castes to total population is 19 and Scheduled Tribes to total population accounts for 18.1 per cent.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Lingsugur	247,478	54,760	47,303	22.1	19.1
2	Devadurga	200,463	40,689	69,131	20.3	34.5
3	Raichur	208,976	41,099	43,690	19.7	20.9
4	Manvi	293,106	57,699	73,265	19.7	25.0
5	Sindhnur	298,902	54,117	44,526	18.1	14.9
District (Rural) Total:		**1,248,925**	**248,364**	**277,915**	**19.9**	**22.3**

Similar analysis is presented by C.D. block wise which includes only rural areas in the district. The Scheduled Castes and Scheduled Tribes constitute 19.9 and 22.3 per cent to the total population. The highest of 22.1 per cent of Scheduled Castes from Lingsugur block and highest of 34.5 per cent of Scheduled Tribes from Devadurga block are reflected in the table.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	58	7.0	0.0	0.0
Less than 5	70	8.4	1,864	0.8
5-10	137	16.5	16,327	6.6
11-20	260	31.3	82,577	33.2
21-30	163	19.6	68,907	27.7
31-40	76	9.2	35,968	14.5
41-50	31	3.7	17,820	7.2
51-75	22	2.7	15,139	6.1
76 and above	13	1.6	9,762	3.9
District Total	**830**	**100.0**	**248,364**	**100.0**

The population of Scheduled Castes population in the villages are given by ranges in the above table. There are 58 villages in the district which does not have Scheduled Castes population. Majority of the villages have 5-10, 11-20 and 21-30 per cent of Scheduled Castes in each villages.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	58	7.0	0	0.0
Less than 5	108	13.0	4,010	1.4
5-10	124	14.9	18,225	6.6
11-20	162	19.5	43,635	15.7
21-30	96	11.6	41,094	14.8
31-40	88	10.6	46,125	16.6
41-50	61	7.3	42,672	15.4
51-75	83	10.0	53,883	19.4
76 and above	50	6.0	28,271	10.2
District Total	**830**	**100.0**	**277,915**	**100.0**

This table indicates the population of Scheduled Tribes population by ranges in the village. Data reveals that 58 villages do not have Scheduled Tribes population. Majority of the villages have less than 5, 5-10 and 11-20 per cent of Scheduled Tribes in each village.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Mudgal (TP)	19,116	2,057	163	10.8	0.9
2	Lingsugur (TP)	27,306	4,058	1,928	14.9	7.1
3	Hatti Gold Mines(NAC)	14,722	4,807	577	32.7	3.9

Sl. No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
4	Hatti (CT)	12,420	2,730	1,361	22.0	11.0
5	Devadurga (TP)	21,994	3,660	5,779	16.6	26.3
6	Shaktinagar (CT)	18,983	3,279	478	17.3	2.5
7	Raichur (CMC)	207,421	38,268	7,961	18.4	3.8
8	Manvi (TMC)	37,613	4,540	4,691	12.1	12.5
9	Sindhnur (TMC)	61,262	5,513	2,189	9.0	3.6
District(Urban) Total		**420,837**	**68,912**	**25,127**	**16.4**	**6.0**

The above table indicates the total urban population and percentage of Scheduled Castes and Scheduled Tribes in the district. It can be seen from the table that the Scheduled Castes constitute 16.4 per cent of the total population, where as Scheduled Tribes constitute 6 per cent. Among the towns, Hatti Gold Mines (NAC) has the highest per cent of Scheduled Castes and Devadurga (TP) has the highest per cent of Scheduled Tribes.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Lingsugur	980	981
2	Devadurga	990	991
3	Raichur	979	990
4	Manvi	1000	1002
5	Sindhnur	1021	1013
District (Rural) Total		**995**	**996**

The table presents the data on sex ratio among the Scheduled Castes and Scheduled Tribes in C.D. blocks. The rural sex ratio among the Scheduled Castes and Scheduled Tribes favours men. Among the blocks sex ratio favours Scheduled Castes as well as Scheduled Tribe women in Manvi and Sindhnur C.D. blocks.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Mudgal (TP)	974	988
2	Lingsugur (TP)	981	965
3	Hatti Gold Mines(NAC)	985	873
4	Hatti (CT)	931	925
5	Devadurga (TP)	877	924
6	Shaktinagar (CT)	945	889
7	Raichur (CMC)	996	975
8	Manvi (TMC)	987	983
9	Sindhnur (TMC)	954	1021
Sex ratio (Urban) for the district:		**978**	**961**

The overall sex ratio of the Scheduled Castes and Scheduled Tribes in the towns of Raichur district is 978 and 961 respectively. The ratio is favourable for men among the Scheduled Castes and Scheduled Tribes. Despite the ratio being favourable for men, Sindhnur (TMC) has registered the ratio favourable

for Scheduled Tribe women. Among the Scheduled Castes the lowest ratio is registered in Devadurga (TP), whereas Hatti Gold mines (NAC) has registered the lowest ratio among Scheduled Tribes.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TALUKS, 2001

The percentage of literates and illiterates in the taluk reveals that literates are more in urban than in rural areas. Male literates outnumbered females in the district. Among the taluks Raichur taluk has registered highest percentage of 55.6 literates in the district. The literacy rates for both males and females are high in the same taluk. The gap in male/female literacy rate is reported to be high in Lingsugur taluk.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Lingsugur	92,332	62,130	30,202	155,146	62,812	92,334	45.8	61.2	30.2	31.0

District (Rural) Total:		**436,522**	**288,478**	**148,044**	**812,403**	**338,381**	**474,022**	**42.5**	**56.1**	**28.9**	**27.2**

The percentage of literates by C.D blocks in the district accounts for 42.5 per cent, where male and female literates accounts for 56.1 per cent and 28.9 per cent respectively. Among the C.D blocks the highest of 48.4 per cent is reported from Sindhnur. Gender wise distribution also indicates the highest percentage of literates being reported in Sindhnur C.D block. Lingsugur has recorded the highest gap in male/female literacy rate.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	3	0.4	29	0.0
1-10	9	1.1	2,812	0.2
11-20	35	4.2	32,702	2.6
21-30	133	16.0	189,243	15.2
31-40	215	25.9	303,691	24.3
41-50	238	28.7	403,424	32.3

Distribution of urban literacy rate by sex is presented in this table. Data reveals that the urban literacy rate for the district is 66.9 per cent. The percentage of male and female literates constitute 76.8 and 56.5 per cent respectively. Among the towns Hatti Gold Mines (NAC) has recorded highest per cent of 82.2. The highest per cent of male and female literates are reported from the same town. The gap in male/female literacy rate is 20.2 per cent and this gap is more in Hatti (CT).

The sex wise distribution of number of Scheduled Castes literates and illeterates and their percentages are presented by C.D blocks in the following table. The percentage of Scheduled Castes literates in the rural area constitute 33.3 per cent. Male and female literates form 46.1 and 20.6 per cent respectively. Lingsugur has recorded the highest per cent of literates. With regard to gap in male/female literacy rate, it ranges between 22.1 per cent to 28.8 per cent

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Distribution of urban literacy rate of the Scheduled Tribes by sex is presented in this table. It accounts for 41.8 per cent. The male and female literacy rate is 53.0 and 30.1 per cent respectively. Among the towns, Hatti Gold Mines (NAC) has the highest percentage of literates. With regard to male and female, the same town has reported the highest percentage. Devadurga (TP) has recorded 15.7 per cent gap in male/female literacy rate which is considered to be the least among the towns.

The following table provides sex wise as well as taluk wise distribution of main workers, marginal workers and non workers of the district as per 2001 census. Percentage of total workers in the district accounts for 43.9 per cent. Among the taluks, workers percentage is high in Manvi where the total workers works out to 48.4 per cent. In the same taluk male and female workers are high compared other taluks in the district. More than 50 per cent of the population are non workers and this percentage is more Devadurga taluk.

This table provides sex wise distribution of workers by category for the urban areas of the district. The percentage of total workers in urban areas constitute 31.7 per cent. The statistics on town area points out that less percentage of female are engaged in main work. The percentage shown in the table is 11.5 as against 45.9 per cent of male workers. Another observation noticed is that among the marginal workers not much difference is seen between male and female proportion to total population, where the percentage accounts for 2.6 and 2.7 respectively. Hatti Gold Mines (NAC) has registered as low as 4.8 per cent of female workers in the district. The statistics given above also points out that number of non workers in the towns are as high as 68.3 per cent in the district. Among the towns, Hatti Gold Mines (NAC) has recorded the highest of 76.9 per cent non workers in the district.

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN TALUKS, 2001

				(34.7)	**(14.4)**	**(70.7)**	**(1.9)**	**(13.1)**

Note: Percent of Worker to total worker are given in brackets

The distribution of total workers by sex according to four industrial categories are highlighted in this table. As seen from the table, agricultural labourers and cultivators constitute 73.0 per cent of the total workers in the district. From the above it is observed that only 25.0 per cent are engaged in other type of work. This shows that agricultural activity is still predominant in the district. The highest of 84.0 per cent of total workers in Manvi taluk are engaged in agricultural activity.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

				(54.4)	**(46.9)**	**(34.9)**	**(1.8)**	**(16.4)**
		Females	**622,066**	**258,382**	**40,153**	**195,165**	**4,056**	**19,008**
				(41.5)	**(15.5)**	**(75.5)**	**(1.6)**	**(7.4)**

Note: Percent of Workers to total workers are given in brackets

The distribution of workers by economic activity is presented for the C.D blocks of the district which includes only the rural portion. The same trend as seen in taluk -wise distribution is observed in this table also. If only rural areas are taken into consideration, the percentage of cultivators and agricultural labourers are higher than as reflected in taluk wise distribution. The above distribution also points out that agricultural

activity is predominant in Manvi block where 88.0 per cent of them are involved in this activity. In rest of the blocks more than 80.0 per cent are engaged in this activity.

				(14.1)	**(4.0)**	**(27.4)**	**(4.8)**	**(63.8)**

The sex wise distribution of workers by economic activity is presented for the urban agglomeration/towns in the district. Total number of workers including main and marginal workers constitute 31.7 per cent. The cultivators and agricultural labourers constitute 4.9 and 10.8 per cent respectively. Urban population engaged in other works accounts for 81.2 per cent. Among the towns more than 30 per cent of urban population from Mudgal (TP) Devadurga (TP) and Manvi (TMC) hold agricultural activity as their occupation. In other towns, particularly Hatti Gold Mines (NAC), Shaktinagar (CT) and Raichur (CMC) more than 90 per cent are preoccupied in other works.

(ix) Brief analysis of Village Directory and Town Directory data based on inset tables 37 to 47

The following table highlights the number of villages having different type of amenities. The statistics given above points out to the fact that good number of villages are provided with basic amenities like educations, medical besides other facilities. Power is the only facility available to at least 95.9 per cent of the inhabited villages in the district. As far as improved drinking water facility is concerned, though all the villages in the district have one or the other source of drinking water, the improved drinking water sources can be taken into account only if the water is supplied through tap or a handpump / tubewell. Accordingly 773 or in other words 93.1 per cent of the villages have this facility. Access to healthcare services needs improvement on a large scale, so also is the matter with regard to educational facility. In all only 40.7 per cent of the villages are privileged to have medical facility and 90.4 per cent with educational

facility. Some 52.5 per cent of the villages can be approached through pucca roads and 82.9 per cent are connected with transport communication. Less than 50 per cent of the villages have facilities like post office, agricultural credit society and banks. Among the C.D blocks, the villages in Lingsugur, Raichur, and Manvi are better provided with more amenities than other two blocks in the district.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered

as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Rural population that are served by different amenities in the villages have been presented in the above table. It is the power supply which is available to 98.2 per cent of the population. Next in line is improved drinking water and transport communication which is available to 95.1 per cent and 91.7 per cent of the population. . More than 65 per cent of the population are benefited by telephone, and pucca road. While about 97.6 percent of villages have educational facility, merely 61.9 percent of them are provided with medical facility. With regard to other amenities, less than 60 per cent of the population are provided with them.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	88	0	0	88
(b) Middle School	301	156	22	479
(c) Degree College	40	112	676	828
2. Medical:-				
(a) Hospital	40	112	677	829
(b) PHC	161	321	300	782
3. Post Office	368	163	38	569
4. Telephone	273	42	65	380
5. Bus Service	164	36	7	207
6. Banks				
(a) Commercial Bank	210	323	240	773
(b) Cooperative Bank	16	155	639	810
7. Agricultural Credit Societies	224	260	235	719

Certain amenities are not available within the village. In such cases data on distance from where these are available in ranges are given in the above table. About 88 villages do not have primary schools. Yet, for these villages, the facility available at a distance of less than 5 kms. Similar is the case with middle school, where 479 villages do not have this facility. For these villages, the facility available in less than 5 Kms, 5-10 Kms and above 10 Kms. With regard to degree colleges, for most of the villages, the college is at a distance of 10 kms and above. As for as medical facility is concerned, maximum number of villages have been reflected in the table under the three different ranges. Hospitals are not available in any of the villages. Only 47 villages have PHC's within its limits. For the rest of the villages, the facility is scattered at a distance of less than 5 Kms, 5-10 Kms. and more than 10 Kms. Post office is less than 5 Kms away for 368 villages, 5-10 Kms away for 163 villages and it is more than 10 Kms for 38 villages. With regard to facilities like telephone and bus service, most of the villages have these facilities within 5 Kms reach. As far as bank and agricultural credit societies are concerned the table exhibits a different picture revealing not many villages have these facilities. However it is reachable at a distance of less than 5 Kms, 5-10 Kms and more than 10 Kms.

In the following table villages have been arranged according to the distance in ranges from the nearest statutory towns. Majority of the villages are little far from their nearest statutory town. Particularly 248 and 563 villages are situated at a distance of 5-15 kms and 16-50 kms respectively. The distance from the nearest statutory town to the village has been correlated with type of amenities available as per 2001 census. Irrespective of the distance, villages do not have certain facilities.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The rural population has been arranged with reference to ranges and the different amenities available under each range are given in the above table. Villages having population ranging between 10,000+ have most of the facilities. Irrespective of the size of the population of the village, certain amenities like post offices, banks and agricultural credit societies are not within the reach.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable
1	2	3	4	5	6
1	Lingsugur	186	188,113	80.2	4.7
2	Devadurga	173	142,712	79.0	4.9
3	Raichur	147	138,342	80.3	17.2
4	Manvi	164	177,369	86.1	30.3
5	Sindhnur	160	153,472	90.5	24.1
	District Total:	**830**	**800,008**	**83.3**	**16.7**

Note: - Cultivable area = irrigated area + unirrigated area

The land use data as per 2001 census presented in the above table takes into consideration only the cultivable area of the rural district. The cultivable area given in the table includes both irrigated and unirrigated areas. As such the cultivable area of the rural portion comprises of 83.3 per cent of the area. Among the C.D. blocks, the highest percent of the area cultivable for cultivation is in Sindhnur where the percentage works out to 90.5 and in rest of the blocks the percentage works out to more than 79.0. Total irrigated area accounts for 16.7 per cent to total cultivable area.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)

	District Total	**194.0**	**63.0**	**131.0**	**210.0**	**92.0**	**05.0**	**39.0**	**07.0**	**67.0**

The total Per capita receipts of the urban district is Rs 194.0 and the total per capita expenditure Rs 210.0. The receipts are mainly from sources other than taxes which is 131.0, through taxes it is Rs 63.0. The total per capita expenditure is Rs. 210.0. The expenditure is mainly on general administration which is Rs 92.0. The expenditure on others is Rs 67.0 and on public works is Rs 39.0.

The townwise and urban district total of educational institution per 10,000 population is given in the following table. The District urban has 2.6 primary schools per 10,000 population and 1.7 Junior secondary/Middle, 1.0 Secondary/ Matriculation, 0.6 senior secondary and 0.3 colleges. Mudgal (TP) has the highest ratio of Primary and Junior secondary/ Middle educational institutions.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Devadurga (TP)	4.1	2.7	1.8	0.9	0.5
2	Hatti Gold Mines (NAC)	6.4	3.2	2.4	0.7	0.0
3	Lingsugur (TP)	4.1	1.5	0.7	0.7	0.7
4	Manvi (TMC)	3.7	2.1	1.5	0.8	0.3
5	Mudgal (TP)	6.8	4.2	1.3	0.5	0.0
6	Raichur (CMC)	1.3	1.6	2.1	0.5	0.2
7	Sindhanur (TMC)	3.8	2.9	0.5	0.5	0.2
	District Total	**2.6**	**1.7**	**1.0**	**0.6**	**0.3**

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Devadurga(TP)	14
2	Hatti (CT)	0
3	Hatti Gold Mines(NAC)	48
4	Lingsugur(TP)	18
5	Manvi(TMC)	10
6	Mudgal(TP)	8
7	Raichur(CMC)	19
8	Shaktinagar (CT)	11
9	Sindhanur(TMC)	20
	Distrct Total	**18**

The number of beds in medical institutions is summerised as 18 per 10,000 population. This ratio among statutory is as low as 8 in Mudgal (TP) and as high as 48 in Hatti Gold Mines (NAC). Sindhnur TMC reported 20 beds per 10,000 population.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Devadurga	21,994	2,250	10.2
2	Lingsugur	27,306	5,056	18.5
3	Manvi	37,613	13,650	36.3
4	Mudgal	19,116	300	1.6
5	Raichur	207,421	50,712	24.4
6	Sindhnur	61,262	34,325	56.0
	District Total	**374,712**	**106,293**	**28.4**

Slum population is reported from 6 towns of the district. In terms of percentage of slum population of the district, it is 28.4 per cent. Mudgal (TP) reported the lowest at 1.6 per cent and the highest percentage of slum population is from Sindhnur at 56.0 per cent.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Devadurga (TP)	Handloom Clothes	Jowar Vegetables Sunflower
2	Hatti (CT)	Gold	Gold Jowar Sunflower
3	Hatti Gold Mines (NAC)	Gold	Gold Jowar Sunflower
4	Lingsugur (TP)	Candles	Bajra Jowar Sunflower
5	Manvi (TMC)	Cotton	Rice Cotton Groundnut
6	Mudgal (TP)	Polished Stones Granite Stones Stones	White Jowar Bajra Oil Seeds
7	Raichur (CMC)	Groundnut Oil Fabric	Cotton Groundnut Groundnut Oil
8	Shaktinagar (CT)	Drugs Electricity	Electricity Drugs Thread
9	Sindhnur (TMC)	Toor Dal Sugar Cotton	Rice Cotton Jowar

Different commodities are manufactured and exported from the district. The most important commodities manufactured and exported are Gold from Hatti Gold Mines, electercity and drugs from Shaktinagar, and Granite and Polished stones from Mudgal T.P. Agricultural products like Jowar, Groundnut, Edible oil, sunflower etc are also some of the commodities reported from the district. Town wise data is provided in the above table.

The above table represents the distribution of households by the number of dwelling rooms occupied by them. The data presented in this table is for the General, Scheduled Castes and Scheduled Tribes population of Raichur district. The rural-urban components and tenure status of the dwelling has also been furnished in the data. The details can be obtained form the table 48 above.

The table above highlights the percentage distribution of households living in the houses defined as per census concept in the district. The census houses occupied by the households for fully and partly residential purpose have been classified into permanent, semi-permanent and temporary. The households living in permanent structure in the district constitute 24.0 per cent, semi-permanent constitutes 44.3 per cent and temporary structure constitutes 31.6 per cent. Households living in permanent building are less in the district than semi-permanent and temporary structures. The same trend is seen in rural areas. On the other hand in urban areas households with permanent material is higher than semi-permanent and temporary structures.

Percentage of households having improved drinking water source, electricity, bathroom, toilet and proper drainage facility will throw light on the living conditions of the people. Improved drinking water and electricity are available to 76.6 and 64.3 per cent of households respectively. Proper sanitation facilities like bathroom, toilet and drainage is available to less than 50 per cent. The rural-urban comparison reveals that urban households have more accessibility to those facilities than rural households. Taluk-wise details can be seen in the above table.

The above table provides data on households using different types of fuel for the purpose of cooking. The percentage of households in the rural areas of the district, using firewood is very high at 91.1 per cent, followed by households using crop residue at 5.4 per cent. The use of other types of fuel are insignificant. As far as urban households are concerned, those using firewood are 62.0 per cent, L.P.G 21.3 per cent, kerosene 6.8 per cent. Those using Electricity are 3.6 per cent.

The above table provides data on households possessing specified assets and availing banking facilities. In terms of percentage, the rural households availing banking facility stands at 20.3 per cent. The same for urban households is higher at 39.7 per cent. As it is common in most of the districts, the gap between rural and urban households possessing T.V and scooter is remarkable. About 10.7 per cent of rural households possess T.V compared to 48.0 per cent of urban households. As far scooter/ Motor cycle 4.9 per cent rural households to 19.5 per cent urban households possess them. Those households not possessing any of the specified assets in the rural areas works out to 62.5 per cent and for urban areas it is 33.3 per cent.

(xi) Archaeology

Situated between the two rivers, the district has been the abode of man since very early times. The district abounds in prehistoric remains, representing all stages of prehistoric culture. A number of Neolithic sites has been found in the district. These prehistoric sites are located at Devardurga, Lingsugur, Manvi and Sindhnur taluks. Of these sites, Maski is the most important because as many as seventeen interesting spots have been identified. In all these seventeen sites, neolothic implements like stone-axes, hammers, chalcedony, chert-flakes, cores, beads, pottery, terra-cotta figurines, smelting factories, megalithic tombs and prehistoric paintings were discovered in large numbers. This place is also known for its Rock edicts of Ashoka. The Ashokan inscriptions, a version of

the Rupnath edict have been discovered at Maski. Some other relics of the Buddhist period have also been found at this place along with the discovery of an exquisite miniature head of Buddha in crystal dating back to 300 B.C. to 200 B.C. The district is an example for representing all types of megalithic tombs. At Agoli and Benkal, dolmens perfectly found intact were discovered. The megaliths unearthed at Benkal are of particular interest. The dolmons were made up of six slabs, cubic in shape and it varies in size. Measuring about six inches in thickness, these were obtained by splitting the rocks with the help of fire. At Lingsugur and Mudgal stone-circles containing the remains of some prehistoric persons were found. At Belkal, close to the dolmens, prehistoric paintings at three different places were discovered. At two places the paintings are under rock-shelters and at the third place, paintings were on the ceiling of a natural cave. Two other sets of prehistoric drawings have been found at Yemmigudda or buffalo-hill near Kallur. Raichur, known for its prehistoric sites and prehistoric findings opens up a new chapter in the field of prehistoric study.

(xii) Brief description on places of historical, religious, archaeological and tourist importance

Gabbur: (Devadurga taluk) In olden days this was known as Gopura Grama and there was an agrahara. The ruins of a gateway, called Chandi gate with a temple on either side of it and the remnants of the temple of Mala-Shankara, Venkatesha, Ishwara, Bangara Basappa and Hanuman bear testimony to the antiquity of the village. The Mala-Shankara temple has two inscriptions. The village has the ruins of the enclosure walls also. These walls, which seem to have been built around it at different periods, are now in different stages of decay. An inscription found here dated in 1109 A.D., belonging to the reign of Vikramaditya VI of Chalukyas of Kalyan is now preserved in the Hyderabad Archaeological Museum. According to the inscription, this place was an agrahara town and contained a Jaina temple, called Brahma Jinalaya or Nagara Jinalaya.

Jaladurga: (Lingasugur Taluk) This is an island having the remnants of a fort and is situated picturesquely in the Krishna river.

Devarbhupur: (Lingsugur Taluk) This place is noted for its Amareshwara temple under the auspices of which an annual fair is held during February and March.

Maski: (Lingsugur Taluk) Situated on the right bank of the Maski river, a tributary of Tungabhadra, Maski is a highly interesting place of great antiquity which has yielded a prehistoric artefacts. A number of inscriptions ranging from 10th to 16th century A.D. and traces of iron and gold working have been found here. The prehistoric finds found here are numerous and include megalithic burials, funerary pottery, ancient ash mounds.

Mudwal: (Lingsugur Taluk) On the slopes of a hill about 2 km west of the village prehistoric artefacts were found. Near this place gold crushers and iron slag were also found in abundance.

Venkatapur: (Lingasugur Taluk) Near the two hills to the south of this village as many as 45 cairns, all in a good condition of preservation, have been discovered. On the western side of these hills there is another group of cairns with double rings and some of these are about 16 metres in diameter. Venkatapur is thus an important centre of the megalithic period of history.

Kote Kal: (Manvi taluk) There are two hillocks each having a fort on its top. Along the slopes of these hillocks artefacts, iron-slag and gold-crushers belonging to the prehistoric period were discovered.

Kotwal: (Manvi taluk) Near the village is a hillock on the slopes of which many prehistoric artefacts and remains of an old iron smelting factory have been discovered. There is a medieval temple of Tryambakeshwara built on what appears to be an ash mound. It contains too lingas, a beautiful image of Mahishasuramardini and two Kannada inscriptions.

Kallur: (Manvi taluk) The village and the hills around are full of antiquities. At Yemmigudda nearby there are prehistoric paintings of buffaloes and bulls. The village has the remains of an old fort and gates, which seem to have been built around 13th or 14th century. The Markandeshwara temple here is of considerable interest at it contains some beautiful carvings. A number of inscriptions, most of them belonging to the period of the Chalukyas of Kalyan have also been found here. There are many old and specious walls of which five are built of solid masonry having flights of steps.

Gandhal: (Raichur taluk) The village is well known in the region for the temple of Panchamukhi Pranadevaru, that is, Hanuman with five faces.

Deosugur: (Raichur taluk) Situated on the right bank of the Krishna river, the village is known for its Sugureshwara or Veerabhadra temple. The annual fair held under its auspices in Margashira month is an important event.

Ramagaddi: (Raichur taluk) This is a beautiful island in Krishna river. It is looked upon as a sacred place. Sri Rama is said to have resided here for a year during exile. The village has a Veerashaiva math also.

Kadlur: (Raichur taluk) To the north of the village, the Bhima river joins the Krishna river and the place of confluence is considered as a very sacred spot. According to an inscription, Krishnadevaraja, the renowned Vijayanagara king visited this place and offered worship here.

Korva-Kalan: (Raichur taluk) An island on Krishna river, and popularly known as Naradagadde, this is the place where sage Narada is said to have performed penance. The village has a temple dedicated to Narada. There are two Veerashaiva maths and a temple of Basavanna as well. Koormagadde, which has a Dattatreya Peetha and the samadhi of Sripada Vallabha Swami, is nearby. The place is known for the annual cattle fair.

Somalapur: (Sindhnur taluk) This village is well known for its temple of Ambadevi under the auspices of which an annual fair is held during Pushya month.

Mukunda: (Sindhnur taluk) Situated on the bank of the Tungabhadra river, this village has the remnants of an old and large fort on top of the hill nearby. A temple of Murari at the entrance of the village and the dargah of Gaddikhadar Wali in an island nearby are places of considerable importance.

Roudkunda: (Sindhnur taluk)This is one of the important Neolithic sites discovered in the district. The remnants of a small fort may be seen on a hill nearby.

PLACES OF INTEREST IN AND AROUND THE TOWNS:

Mudgal:

Mudgal has yielded several inscriptions belonging to the Yadavas of Devagiri testifying to its importance in those historical times. During 14th century it was an important outpost of the Kakatiya kingdom. Malik Naib, after seizing Devagiri is known to have captured Mudgal along with Raichur. After the establishment of the Bahmani kingdom Mudgal became the scene of frequent warfare between the Bahamanis and the Vijayanagara kings for quite a long period. The most important place of interest here is the remnants of the Mudgal fort. The outer fortification covers an area of about a square kilometre and a half and the fort is surrounded by a wide moat. Behind the moat there is a scrap with a row of bastions. The moat and the row of bastions together offer a pleasing view. The fort has three massive gates and in front of Fateh Darwaza which faces north there is a massive bastion with a gun bearing a Kannada inscription near its muzzle. The Bala Hisar or citadel is built on the hill and compounds a good view of the interior of the fort as well as the surrounding country. Bastions and walls built at different parts provided defence to the buildings, which once covered these areas. In western part of the fort there is a large cistern, called the Hikrani Baoli, measuring about 120 metres in length and 40 metres in width. This fort contains several inscriptions of which at least seven are known to belong to the Adil Shahi dynasty of Bijapur, and another fifteen are in old Kannada and two are in Devanagari script. The town has an ancient Roman Catholic Church also. This is believed to have been built on the foundation of an earlier structure built by Jesuits before 1557 during the reign of Ibrahim Adil Shah who had granted lands for its support.

Lingsugur:

Lingsugur too is a commercial centre where several roads converge rendering the place into an important transport centre also. Sites close to this town have yielded Neolithic implements like stone axes, hammers, flakes etc.

Hatti Gold Mines (NAC)

Hatti Gold Mines is a new township that has emerged in an ancient gold mining site, consequent on the intensification of the gold mining activity.

Raichur

Raichur is a place of considerable historical importance and contains a few places of interest such as the fort, the tomb of a Muslim Saint, Jami masjid,

Ek-minarki Masjid etc. The hill fort of Raichur is surrounded on three sides by a double row of massive but low circuit walls. The inner wall is built of huge blocks of well dressed and nicely fitted slines without the aid of any connecting material. A slab on the western inner wall, which is about 13 metres long and is by far the largest slab found in the fort contains a Kannada inscription dated 1294 A.D. and stating that the fort was built by Raja Vitthala under the orders of Raja Gore Gangayya Raddivaru - a minister of the Kakatiya queen Rudramma Devi. Near this slab there are several slabs with drawings and one of these depicts the process by which the inscribed slab was brought here from the quarry, loaded on a buffalo-driven cart. The outer was built of comparatively rough stone masonry. The outer fortification contain five gateways: the Mecca Darwaza on the west, Naurangi Darwaza on the north, Kali Darwaza on the east, the Khandak Darwaza on the south and the Dadoli Darwaza on the southwest. The inner wall has two gateways: Sailani Darwaza in the west and Sikandari Darwaza on the east. The tombs of the Muslim saint Pir Sailani is a handsome and fascinating structure built in the Bijapur style and consists of a small rectangular hall surmounted by a beautiful dome set on a circular row of lotus petals and ornamental with four small lurrets at the corners. The Kali Masjid as also several others in the town are apparently built by using the material obtained by demolishing Hindu temples that once existed in this town. This Masjid contains several beautifully polished Chalukyan pillars of black basalt and also slabs bearing fragments of Kannada inscriptions. The Jami Masjid is a handsome structure having two entrances. The entrance on the southern side is supported on six massive stone pillars of the Chalukyan style with square bases, cruciform capitals and circular decorated middle portions. In the courtyard of the mosque there is a cemetery which is said to contain the graves of some members of the Adil Shahi dynasty. Opposite this mosque there are the remains of an ancient palace. Ek-minarki Masjid was constructed by Amber in 919 A.D. according to the Persian inscription found on its threshold. This mosque also contains several Chalukyan pillars. The minaret of this mosque is about 20 metres high and 4 metres in diameter. This is built in the Persian style and identical in form with the Chand Minar at Daulaband erected in 1445 A.D. by Ala-ud-din Bahmani. The minaret consists of two storeys and a winding staircase leads to the top from where one can have an excellent view of the town. Outside the fort walls there is another Jami Masjid which happens to be the biggest place of worship in the town. Khas Baoli is an ancient and extensive rectangular well built of solid stone masonry and approached by means of big staircases in the corners. This well, it is believed used to supply water to the entire fort area in the past. Bala Hisar on the citadel stands on an irregular platform and is situated on the summit of the middle and the loftiest of the hills in the southwest corner of the fort. The northern side seems to have been occupied by the durbar hall - a double three-arched and tripledomed structure with a battle mented and loop-holed parapet on the top. On its west there is a small mosque and on its eastern side there is a small pavilion, with a square pyramidal dome. In front of the hall there is a platform supporting a gun mounted on a turn-table. To the west of this gun there is the panch Bibi Dargah - a place held in reverence by the Muslims. Raichur is noted for its temples dedicated to Ramalingeshwara and Manik Prabhu.

Manvi

Manvi town has a well-known temple enshrining Jagannathaswamy and has also the ruins of an ancient fort.

Sindhnur

Sindhnur is now a flourishing town. But it does not have any places of interest.

Devadurga

Devadurga formerly spelt as Deodurg, was once a stronghold of the Bedar chiefs and has the remnants of a fort now.

(xiii) Scope of Village Directory and Town Directory

Village Directory

Village Directory provides micro-level data which will help the planners in formulation of micro-level developmental plans as the C.D.Block is the lowest administrative unit for developmental planning. Village wise information regarding the availability of certain basic amenities and facilities within the village, as also that on the manner of utilization of the land in the

concerned village are furnished in the village directory. The village directory format adopted for the 2001 Census has 23 columns whereas in the 1991 Census there were only 18 columns. When compared with the 1991 Census Village Directory format, column 9 which refers to the day or days of weekly market/hat if any has been now left out. New inclusions are in respect of facilities like banks, agricultural credit societies, non-agricultural credit societies, other cooperative societies, number of recreational and cultural facilities like cinema/video hall, sports club, stadium/auditorium; receipt of news papers/magazines and the name of the most important commodities manufactured in the village. In all the 23 columns in this tabulation statement, first 3 columns relates to serial number, name of the village with location code and area of village while the next 2 provide information on total population and number of households in the village as per 2001 Census. The next 8 columns relate to basic amenities such as educational; medical; drinking water (potable); post, telegraph and telephone, commercial and cooperative banks, agricultural, non-agricultural and other credit societies, number of recreational and cultural facilities such as cinema/video hall, sports club and stadium/auditorium and communications (bus service, railway station, waterway). Information in respect of approach to village, nearest town and distance in Kms., power supply, receipt of news paper/magazine, names of the most important commodities manufactured in the village are furnished in columns 14 to 18. Amenities available within the villages are shown in the respective columns and if a particular amenity especially Primary School, Middle School, College, Allopathic Hospital, PHC, MCW, Post Office, Telephone, etc., is not available in the village, the respective abbreviation is given and next to it in brackets the distance in broad ranges viz., <5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility available to that particular village is indicated. The next 5 columns, 19 to 23 provide information regarding land use (i.e., area under different types of land use in hectares rounded to two decimal places) such as forest, irrigated land by source of irrigation, un-irrigated, cultivable waste (including gauchar and groves) and finally the area not available for cultivation.

Town Directory

The Town Directory section contains seven statements (I to VII) which furnish information on all the statutory towns in the district, on aspects such as growth history, physical aspects and location of towns, municipal finance, civic and other amenities in the town, medical, educational, recreational and cultural facilities, trade, commerce, industry and banking in the towns, civic and other amenities in slum areas of the town. The scope of the various column headings adopted during 1991 Census has remained unchanged in 2001. The towns are arranged in the alphabetical order for the district.

Note :

1. The area figure for the district given under column No 3 against " Total" represents "Geographical Area" and has been furnished by the Surveyor General India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D. Blocks/Taluks in this district will not tally with the district figures (except urban), because the area figures for C.D. Blocks/Taluks represents the land-use area based on village wise area figures as reported by the local officers. The total area of the taluk may not tally with the aggregate of the areas of the villages listed for Census purposes for it includes the area of the statutory as well as non-statutory towns, villages which may be fully submerged and reserve forests which may not form part of any revenue village, if any, within the jurisdiction of the concerned taluk. The total area of the C.D. Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2. Out growths of towns in urban agglomerations are denoted by letter "OG".

3. The following abbreviations have been used to indicate the Civic Administration Status of town.

M.Corp	:	*Municipal Corporation*
CMC	:	*City Municipal Council*
TMC	:	*Town Municipal Council*
TP	:	*Town Panchayat*
NAC	:	*Notified Area Committee*
CB	:	*Cantonment Board*
CT	:	*Census Town (Non-Municipal Census Town / Non-Statutory Town)*

SECTION – I

VILLAGE DIRECTORY

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and cooperative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and un-inhabited villages.

Column 3 : Area of the village

The area of the village in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are treated as equivalent to Pre-University Course.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health SubCentre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Hand pump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12: Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If the village receives any News Paper/ Magazines, the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23: Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Unirrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash ‘‘-” is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water fa cilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix- VII-A, VII-B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Grama Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

LIST OF MERGED VILLAGES IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

TOWN DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I: Status and Growth History

Column (2): Class, name and civic administration status of town:

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 99,999	II
20,000 49,999	III
10,000 19,999	IV
5,000 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II Physical Aspects and Location of towns, 1999.

Column 3 to 5: Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8:

Name of the State headquarters, District headquarters and SubDivisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10:

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13:

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Itemwise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV: Civic and Other amenities, 1999

Column (1 to 5): Self explanatory.

Column (6): Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i) Pucca Road PR
(ii) Kutcha Road KR

Column (7): System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows:

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11: Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12: Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes:

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14: Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tubewell water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilolitres (in bracket) are presented in column 14.

Column 15: Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20: Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3: Self explanatory.

Column 4 & 5:

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes:

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below:

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9:

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10: Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used:

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/ Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, PrePrimary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16: Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19: Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/ Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20: Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows:

(i) Public Library	PL
(ii) Reading room	RR

Statement VI: Trade, Commerce, Industry and Banking, 1999

Column 3 to 8: Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9: Number of Banks

Number of Banks available in the referent town both Commercial and Cooperative banks are recorded against this column.

Column 10 & 11: Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII: Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Cenus Abstract	Level of presentation
1. District Primary Census Abstract	District/CDBlock/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CDBlock/Town
3. Primary Census Abstract for Scheduled Tribes	District/CDBlock/Town
4. Village Primary CensusAbstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/WardLevel

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

NOTE ON FERTILITY & MORTALITY AND MIGRATION – 1991 & 2001 CENSUS

Fertility levels

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all evermarried women and the last question related to currently married women. The measures of fertility worked out are based on the FSeries Tables of 1991 Census pertaining to Karnataka state and are defined as below:

MIGRATION

What is Migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another state of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why people migrate?

As in 1981 census, the reasons for migration were elicited in 1991 & 2001 census also. The reasons for migration were broadly categorized as (1) employment (2) business (3) education (4) family moved (5) marriage (6) natural calamities like drought, floods etc. and (7) other reasons. Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

ANNEXURE III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

Marriage and age at marriage are important social phenomena and crucial factors in the analysis of the dynamics of fertility. As such, various measures of fertility estimated based on these crucial factors are highlighted in the above table.

Estimates of General Fertility Rate (GFR) a refined measure of fertility, defined as the number of live births per thousand women in the reproductive age-group 15-49 years is a useful tool for measuring fertility, and this rate is further estimated only for the married women which is defined as General Marital Fertility Rate (GMFR). The GFR and GMFR for the district are 152 and 183 respectively.

The cumulative value of the age-specific fertility rates at the end of the child bearing ages gives a measure of fertility known as Total Fertility Rate (TFR). It indicates average number of children expected to be born per woman during her entire span on reproductive period assuming that the age specific fertility rates to which she is exposed to, continue to be the same and there is no mortality. The same is expected for married women known as Total Marital Fertility Rate (TMFR). The estimated TFR and TMFR for the district are 4.65 and 5.71 respectively. The Crude Birth Rate (CBR) is 34.70.

The most useful indices that can be derived from the question on number of Children born alive is the average number of children ever born per ever married women by age-group. Since most of the women complete their reproduction be the age-group

45-49, this indices is termed as completed fertility. The category ever married includes widows, divorced and separated women. As such the completed fertility for the district is 4.36. The child women ratio which is a relative measure to know the fertility performance of a women is 608 in the district.

One of the parameters, presenting female age at marriage relates to all women who live with their husbands, where some of them might have been recently married and some of them decades ago. It can be observed that mean age at marriage of the currently married women of Udupi district is lower than the state figure of 17.40.

The estimates of mortality indicators presented above have been obtained through indirect estimation using the data on the number of children ever born and number of children surviving to ever married women. The information on questions on children ever born and children surviving canvassed for all ever married woman have been tabulated by the age of the mother. This data has been converted into estimates of probability of dying before attaining a given age. These estimates have been worked out using Brass technique where (qi) is the probability of a newborn child dying before the age i = 1, 2, 3 and 5. The table above shows the estimates of infant and child mortality derived for the year 1991 by sex.

The infant mortality rate (q_1) for the person is 59 and for male and female are 58 and 52 respectively. The estimates of under 5 mortality (q_5) for person is 80 and for male and female are 79 and 84 respectively.

Source : Migration Tables of 1991 & 2001 Census

The Anenxure IV(I) presents data on migrants data on migration by their place of birth. The majority of migrants are those who are born within the state of enumeration, which constitute 81.28 per cent as per 2001 Census. Among them, migrants born elsewhere in the district are larger than migrants born in other districts of the state. Considerable proportion of population from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (2) - PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF LAST RESIDENCE

Source : Migration Tables of 1991 & 2001 Census

The Annexure IV(2) presents data on migration by their place of last residence. As far as the district is concerned, it can be seen that migrants whose place of last residence was within the state of enumeration but outside the place of enumeration, constitute major proportion of migrant population. As per 2001 Census, their percentage accounts for 82.03 Among them, more is the inflow from within the district. Considerable proportion from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (3) - INTERSTATE IN-MIGRATION TO RAICHUR DISTRICT

Sl. No.	Place of Birth	1991 Census		2001 Census	
		Migrants	Percentage of to total migrants	Migrants	Percentage of to total migrants
1	2	3	4	5	6
1	AndHra Pradesh	59,301	85.95	55,188	86.49
2	Goa	40	0.06	-	0.00
3	Kerala	1,220	1.77	-	0.00
4	Maharashtra	2,670	3.87	2,222	3.48
5	Tamil Nadu	2,820	4.09	1,762	2.76
6	Rajasthan	-	0.00	1,369	2.15
7	Haryana	-	0.00	859	1.35
8	Total for 5 states	66,051	95.74	61,400	96.22
9	Other states	2,940	4.26	2,410	3.78
	Total	**68,991**	**100.00**	**63,810**	**100.00**

The interstate in-migration to the district by their place of birth provided above, highlights the States with the largest contribution of migrants to the district. According to 2001 Census findings, majority of migrants are from Andhra Pradesh which accounts for 86.49 per cent. Migrants from Maharashtra, Tamilnadu, Rajsthan and Haryana have also reported which is marginal. Further the category migrants from `Other States' has come down from 4.26 per cent in 1991 to 3.78 per cent in 2001.

ANNEXURE IV(4) - RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH

Place of Birth	Place of Enumeration-1991			Place of Enumeration-2001		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1. Within the state	438,189	327,099	111,090	299,996	221,124	78,872
	100.0	74.6	25.4	100.0	73.7	26.3
2. In other states of India	68,991	47,695	21,296	65,011	43,161	21,850
	100.0	69.1	30.9	100.0	66.4	33.6

Rural and urban composition of internal migrants by their place of birth is provided in the above statement. The data for both the Census points out that majority of migrants within the State as well as from other states of India have migrated to rural areas of the district. The details can be seen from the Statement.

ANNEXURE - V

Brief account of Main Religions in the District / Taluk as per 2001 Census

Religion forms an integral part of Indian Social System. For an Indian, it is a way of life rather than a faith. Indian Census, since its inception is collecting data on religion and presenting the same in its reports. In the pre-independence Census reports, the data on religion was being presented for 6 major religions viz., Hindus, Muslims, Christians, Sikhs, Jains and Buddhists. Besides, the minor religions have been classified under the category of 'Others'. The data on religion collected and presented by the Indian Census is the basic data of immense use for the researchers, anthropologists, sociologists, demographers, administrators, planners and even for a common man.

ANNEXURE V(1) - PERCENTAGE DISTRIBUTION OF POPULATION BY MAJOR RELIGIONS IN INDIA AND KARNATAKA DURING 1991 & 2001 AND ITS GROWTH RATE DURING 1981-1991& 1991-2001

Sl No	Religion	India				Karnataka			
		Percentage of Population	Percentage growth rate 1981-1991	Percentage of Population	Percentage growth rate 1991-2001	Percentage of Population	Percentage growth rate 1981-1991	Percentage of Population	Percentage growth rate 1991-2001

India - State differentials

The comparative data of the country and the state of Karnataka presented in Annexure V(i) reveals that the religion wise concentration of population in the state of Karnataka is of three major religions viz., Hindus, Muslims and Christians. Hindus are returned on the higher side with over three per cent more than the national average. Christians recorded nearly one per cent less whereas the proportion of Muslims in the state to national population was almost the same. There are 85.5 per cent Hindus, 11.6 per cent Muslims and 1.9 per cent Christians in Karnataka as against that of 82.4 per cent Hindus, 11.7 per cent Muslims and 2.3 per cent Christians in India. In regard to concentration of other three major religions viz., Sikhs, Buddhists and Jains it is observed that Jains with 0.7 per cent form the fourth major religion in the state whereas Buddhists with 9.8 per cent is the third major religion in India. In the Indian scene the Sikhs form fifth major group, whereas in Karnataka, Buddhists and Sikhs are placed fifth position.

Religion wise growth in the state during the decade 1981 - 91 reveals that the major religions viz., Hindus, Muslims and Christians recorded a growth rate in lesser degree i.e., 20.7 per cent, 25.7 per cent and 11.1 per cent respectively, against that of 22.3, 26.1 and 16.9 per cent in India as a whole. On the other hand Buddhists, Sikhs and Jains recorded a growth rate of 72.8 per cent, 57.8 per cent and 14.6 pecent respectively for the state against that of 34.0, 24.2 and 3.9 per cent respectively for India. Thus, the Jains recorded a higher growth of nearly 11 per cent in the state than that of India as a whole during the decade 1981 - 91.

Percentage distribution of population during 2001 Census, by major religions in India and Karnataka shows that Hindus form majority of the population with 80.5 and 83.9 per cent respectively, while Muslims form 13.4 and 12.2 per cent for the country and state respectively. The proportion of these religions for the country and state, during 1991 Census was 82.4 per cent and 85.5 per cent for Hindus and 11.7 and 11.6 per cent for Muslims. There is not

much noticeable changes are found in other regions. Persons who have not reported to which religion or faith they belong to has increased in Karnataka, as its proportion to the total population has increased from 0.1 per cent in 1991 Census to 0.3 per cent during 2001 Census.

ANNEXURE V(2) - DISTRIBUTION OF POPULATION UNDER EACH RELIGION TO TOTAL POPULATION IN THE DISTRICTS OF KARNATAKA - 1991 CENSUS & 2001 CENSUS

The above table furnishes the composition of six major religions along with 'Other Religions' and 'Religion not stated' among the districts of the state during 2001 Census along with 1991 Census. As may be seen from the table that the proportion of population to total population during 2001 Census is below 5 per cent for 23 districts of the state and is between 5-10 per cent in 3 districts. Only Bangalore district has the distinction of having more than 10 per cent of the total population of the state in its jurisdiction. During 1991 Census the situation was almost similar with 22 districts having a proportion of less than 5 per cent and 4 districts had more than 5 per cent but below 10 per cent. With 10.76 per cent of the total population Bangalore district occupied the top position.

Of the total population of the state, proportion of districts having Hindus and Muslims was uniform during both the Censuses i.e. less than 5 per cent of the total population in 21 districts for Hindus and 23 districts for Muslims, while in 5 and 3 districts respectively for Hindus and Muslims had a proportion of 5-10 per cent and Bangalore district alone had more than 10 per cent.

ANNEXURE V(3) - PERCENTAGE AND DISTRIBUTION OF POPULATION BY MAJOR RELIGION IN KARNATAKA AND RAICHUR DISTRICT - 1991 & 2001

	KARNATAKA				RAICHUR			
	1991		2001		1991		2001

Sikhs	10,101	Ng	15,326	0.03	21	0.00	119	0.01
Others	6,325	Ng	115,460	0.22	106	0.01	1,684	0.10
Religion not stated	36,121	0.10	120,247	0.23	1,574	0.12	4,569	0.27

The percentage distribution of population by major religion in Karnataka and Raichur district for 1991 and 2001 Censuses are presented in the above table. As may be seen from the table that in Karnataka,

Hindus form 85.5 and 83.86 per cent of the total population during 1991 and 2001 Censuses, followed by Muslims and Christians. The corresponding statistics for the district does not differ much as Hindus and Muslims occupy the top two places followed by Christians. These three religion cover more than 90 per cent of the total population of the district. Remarkable increase in the proportion of Buddhists population has been noticed between 1991 and 2001 Censuses in the State.

ANNEXURE V(4) - DISTRIBUTION BETWEEN RURAL AND URBAN AREAS OF MAJOR RELIGIONS IN KARNATAKA AND RAICHUR - 1991 & 2001

	Religion not stated	995	63.2	579	36.8	3,648	79.8	921	20.2

Distribution of major religion by residence for the State and district are presented in the above statement. Majority of Hindus, Jains, Buddhists and those who have not stated their religion are residing in rural areas of the State during both the Censuses. While population belonging to Muslim, Christian and Sikh religion reside in urban areas of the State. Almost similar trend is seen in the district. As per 2001 Census data, while majority of Hindus, Buddhists and those who have not stated their religion reside in rural areas, majority of Muslims, Christians, Jains and Sikhs reside in urban areas. A comparative data for 1991 Census is provided in the annexure.

Talukwise distribution of population following major religion is presented above. As far as the district is concerned, majority of the population follow Hindu faith in all the taluks. This is followed by Muslims and Christians in Raichur district. A comparison between 1991 and 2001 Census data expose marginal variations in different faiths persuaded by the population during the decade.

Note:- *The data on marital status is being tabulated upto district level only. As such the data for newly created districts could not be recalibrated for 1991 Census. Hence the data of unbifurcated districts are presented for the newly created districts also.

It may be seen from Annexure VI that the percentage of "Never Married" population accounts for 49.24 per cent and 52.32 per cent at state and district levels during 2001 Census, while the same was 43.67 per cent and 51.53 per cent during 1991 Census. Similarly the percentage figures of the district for Married, widowed and Divorced or Separated are 42.18, 5.25 and 0.25 per cent during 2001 Census. Comparative data for 1991 Census is also furnished in the table for ready reference. The percentage variation of all the marital categories between rural and urban is marginal in both state and district population.

The level of education by sex for the district and the State during 1991 and 2001 Census are presented in the above annexure. It can be seen that percentage of illiterates during the decade has decreased vis-a-vis for the State and the district. Though the male literates out number females, the percentage of women folk acquired literacy during the decade is more than the male population. The comparison of data for the two censuses reveals it so for the State and the district. The different educational level attained by the population can be seen in detail in the above annexure.

ANNEXURE - VIII

Distribution of different Mother Tongue returned during 1991 and 2001 Censuses

As a part of census publication programme the data on spoken languages/mother tongues will be presented under C series. The table C-7 shows the distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each for district, with total, rural/urban and male/female break ups. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table divided into Part A – scheduled languages with the mother tongues grouped under each and Part B – Non-scheduled languages with the mother tongue grouped under each. The definition of 'Mother Tongue' is the same as in 1981 Census. The instructions to the enumerators in regard to this question read as under:

Record Mother Tongue in full, whatever be the name of the language returned by the person enumerated. The definition of Mother Tongue is the same as in 1991. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the Mother Tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded".

As the above instructions to the enumerators would show, the respondent was made to feel free to return the name of his/her mother tongue and the same was, recorded faithfully by the enumerators. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census are basically, the designations provided by the respondents. These designations or mother tongue labels need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects the raw returns of census were subjected to thorough scrutiny and rationalization.

As many as 20 and 25 languages are returned by the people of Raichur district during 1991 and 2001 Censuses. Of which 14 and 17 are scheduled languages, 6 and 8 are non-scheduled languages respectively.

Part A and Part B of Statement I and II furnishes the details of the Scheduled and Non-Scheduled languages spoken in the district.

11	Total Of Other Languages	427	0.03	1532	0.09

The statement I & II gives a clear picture of the languages spoken in the district. A closer study of 2001 Census data reveals that as many as 25 languages which returned 10,000 or more speakers are spoken in the district. The 'Other' category include Mother Tongues spoken by less than 10,000 speakers. Majority of the population speak Kannada which constitute 71.34 per cent followed by 11.92 per cent of Urdu and 11.56 per cent of Telugu speaking population. Among the languages not specified in the Eighth Schedule to the constitution, Coorgi is spoken by 0.07 per cent of population. Similar data for 1991 is provided in the annexure.

Linguistic classification of the languages

The names of the 114 Scheduled and Non-Scheduled languages falling in the five language families are given below with the Scheduled Languages denoted as (S). Of the 18 Scheduled Languages, 13 fall in the Indo-Aryan branch of the Indo-European family, 4 in the Dravidian family and one in the Tibeto-Burmese family.

1. INDO-EUROPEAN

(a) INDO-ARYAN

1. Assamese (S), 2. Bengali (S), 3. Bhili/ Bhilodi, 4. Bishnupuriya, 5. Dogri, 6. Gujarati (S), 7. Halabi, 8. Hindi (S), 9. Kashmiri (S), 10. Khandeshi, 11. Konkani (S), 12. Lahnda, 13. Marathi (S), 14. Nepali (S), 15. Oriya (S), 16. Punjabi (S), 17. Sanskrit (S), 18. Sindhi (S), 19. Urdu (S)

(b) GERMANIC

1. English

2. DRAVIDIAN

1. Coorgi/Kodagu, 2. Gondi, 3. Jatapu, 4. Kannada (S), 5. Khond/Kondh, 6. Kisan, 7. Kolami, 8.Konda, 9. Koya, 10. Kui, 11. Kurukh/Oraon, 12. Malayalam (S), 13. Malto, 14. Parji, 15. Tamil (S), 16. Telugu (S), 17. Tulu

3. AUSTRO-ASIATIC
