DISTRICT CENSUS HANDBOOK

Part - A & B

TUMKUR DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

लोकाभिमुख
PEOPLE ORIENTED

Directorate of Census Operations, Karnataka

F O R E W O R D

1. The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to taluk/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri.H.Shashidhar, Director of Census Operations, Karnataka. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division, Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and other who have contributed to make this publication possible.

D.K. Sikri

Motif

Marconahalli Dam across river Shimsha in Tumkur district

Marconahally Reservoir is built across Shimsha River, which originates in the southern portions of Devarayanadurga hill range, near Marconahalli village of Kunigal taluk of the district for harnessing the water for irrigation. This reservoir has an atchkat area of 4,560 hectares of which 4,275 hectares belong to Kunigal taluk and 285 hectares belong to Nagamangala taluk of Mandya district. The catchment area of this reservoir is about 4,103 sq. kms. The reservoir has a length of 1,812 metres and the height of the dam is 22.5 metres. The gross storage capacity of the reservoir is 68 M cum. The full reservoir level is 731.57 metres and when filled the water spread covers an area of 1,338 hectares. 8 villages have been affected with the affected population being 1,886. The left bank canal runs to a length of 28.80 km with a capacity of 7.00 cumecs providing irrigation to 4000 hectares. The length of right bank canal is 12.80 km with a capacity of 1.13 cumecs, providing irrigation to 560 hectares.

P R E F A C E

In the foreword to the 2001 series of the District Census Handbooks, Sri. D.K. Sikri, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain salient data on the population for every village and town as revealed by 2001 Census. They also contain a wealth of information regarding villages and towns which, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information is also of considerable importance in the context of planned development.

The District Census Handbook is divided into two parts: Part A contains information regarding each village and town (Village Directory and Town Directory collected from various sources) and Part B which contains the data on the population collected during 2001 Census - the Primary Census Abstract. The data published in Part B was collected during February-March 2001 in the Population Census.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in 1999. The Village Directory formats were mailed to the Deputy Commissioners of Districts for obtaining the village wise particulars through Village Accountants. Similarly the Town Directory formats were mailed to the Commissioners of Corporations, Chief Officers of Town Municipal Councils, Town Panchayats, etc. The village wise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1991 District Census Handbooks. The Household Schedules, which were canvassed to collect the population data during 2001 Census, were scanned and data captured was processed electronically. The Primary Census Abstract was generated centrally on the computers by Registrar General, India.

In compilation of the District Census Handbooks, the Census Directorate had the co-operation of various departments of the State/Central Government. The Census Directorate gratefully acknowledge their assistance.

I take this opportunity to offer my grateful thanks to Sri. H. Shashidhar, Director of Census Operations and Sri. S.R. Raghavendra Rao, Deputy Director (Retd.) for their valuable guidance. I am also thankful to all the officers and officials of this Directorate who have been actively involved in the compilation of this volume.

I am highly grateful to Sri. J.K.Banthia, I.A.S., Ex. Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Sri R.G. Mitra, Ex. Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General and Sri S.L.Jain Deputy Director of Social Studies Division and Dr. R.P. Singh, Ex. Deputy Registrar General (Map) for their guidance.

DISTRICT HIGHLIGHTS - 2001 CENSUS

1 Tumkur is the 5th largest district in the state in terms of population.

2 It is the third largest district in its total geographical area.

3 The decadal growth rate is less and ranks at 22nd place among the districts in the state.

4 It's sex ratio is 967 and ranks at 16th place in the state.

5 It is the 15th thickly populated district in the state.

6 The highest work participation rate is reported in the district.

7 It is the third largest district having cultivation as its work force.

8 The district ranks at 12th place in its literacy rate.

Analytical Note

(i) HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

Introduction

The District Census Handbook is the most valuable district level publication brought out by the Census Organization. It contains micro-level data down to the lowest administrative units viz, revenue village in the case of rural areas and Division/Ward level in the case of urban areas. It is extremely useful to the planners, administrators, demographers, sociologists, etc., as it contains resourceful wealth of data regarding basic amenities available in each villages and towns of the district such as educational, medical, drinking water, post and telegraphs, transportation and communication, banks, societies, recreation, power supply, export/import of important commodities and land use besides, the particulars revealed during the latest census enumeration. It is for the first time that the district census hand book series was included in the census publication programme at the 1951 census, in order to satisfy the growing demand by the administrators, the planners, research scholars, demographers and the other such census data users, for micro-level data. The idea of compiling the District Census Handbooks was pioneered by Sri R.A.Gopala Swamy, I.C.S. the then Registrar General, India and Ex-officio Census Commissioner of India, with a view to preserve the Census records prepared for areas below the district level. He proposed that all the district Census tables and Census abstracts prepared during the process of sorting and compilation, should be bound together in a single manuscript volume and named as the District Census Handbook and suggested that the State Government should take up printing and publication at their own cost. Then onwards, the District Census Handbooks were published in each Census with improved pattern with an aim to give the Census and Non-census data at micro level for each village of the taluk as a whole to suit the requirements of various departments.

The data in the District Census Handbook will help not only in local area planning but also in regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. The District Census Hand Book sought to replace “Part IV - Taluk Tables and Part V - Village Tables” of the earlier censuses and to present the basic demographic and economic data in the form of “Primary Census Abstract” in respect of each and every village and town within the jurisdiction of the district. The district census handbook consists of two parts, viz, Part A and Part B. Part A comprises village and Town Directory while Part-B contains Village and Town level Primary Census Abstracts. In addition, these volumes contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

District Census Handbook 1961

It was in 1961 Census that the scope of District Census Hand Book was shaped in the present form by presenting (i) an account of descriptive note on the district, (ii) a set of non-census data tables dealing with the administrative statistics of the district for a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban Primary Census Abstracts depicting the nine fold industrial classification of workers. Information on the availability of certain basic amenities in villages and towns, such as the source of drinking water and educational institutions was also presented in the volumes. However, the district census handbooks of 3 out of then existing 19 districts viz, Bangalore, Dharwad and Mysore were confined to the publication of the village-wise and urban (census enumeration block-wise) Primary Census Abstract only.

District Census Handbook 1971

During the 1971 census, the district census handbook was further refined to present the data in a systematic way. In view of countrywide uniformity in approach and to have a comprehensive coverage, the District Census Hand Books were presented in three parts each, for a district. Part A incorporated the Town

and Village Directories. Part-B incorporated the Primary Census Abstract and included data, in the case of rural areas down to the village level and in the case of urban areas up to the block level. In addition, an introduction was given wherein the changes in jurisdiction, if any, of the district or of the taluks and the changes in the number of villages between 1961 and 1971 were explained. Part-B was essentially demographic in nature and was the end product of the tabulation of the enumeration results. Part C incorporated other census tables and administrative statistics. For convenience, Part-A and Part-B of the District Census Hand Book were presented in one volume and Part-C in a separate volume. In part-C volume, the district and taluk maps were included. These maps were prepared on the basis of maps obtained from the competent authorities concerned.

District Census Handbook 1981

The District Census Hand Book series of 1981, had some new features along with the restructuring of the formats of village and town directories, keeping in view the comparability of 1971 data. All the amenities except power supply in the village were brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place/village where it is available were given. A few new items of information such as adult literacy centres, primary health sub-centres and community health centres/workers, data on the availability of Newspapers, Motor Vehicles, etc., in the village, were introduced in the village directory to meet the requirements of the "Revised Minimum Needs Programmes". A new column "total population and number of households" was introduced to examine the correlation of the amenities with the population and number of households they serve. The contents of Part-A were further enlarged by including two appendices, namely a list of villages not having any amenities and a distribution of villages according to the proportion of Scheduled Castes and Schedules Tribes in the total population of the village. The format of Town Directory were also modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items such as class of town and its population, population of SC & ST, decadal growth rate of population, working women's hostel, adult literacy classes / centres, storage system regarding drinking water supply etc., and also the information about the nearest place and distance having educational, medical and fire-fighting facilities, in case such a facility is not available in the referent town. A new statement on civic and other amenities in slums in Class I and Class II town were included to help the planners to chalk out their programmes of slum improvements.

District Census Handbook 1991

The presentation of the District Census Hand Book for the 1991 Census was more or less similar to the manner followed in 1981. The format of Primary Census Abstract was restructured slightly. Nine-fold industrial classification of main workers was given as against four-fold classification. The sex-wise population in the age-group of 0-6 was included in the Primary Census Abstract for the first time to enable data users to compute more realistic literacy rates as all the children below 7 years of age were treated as illiterate at the 1991 census. One of the important innovations in the 1991 census was the Community Development Block-level presentation of data in the village directory and Primary Census Abstract instead of the traditional Taluk/ PS level presentation. C.D.Block is the lowest administrative unit for developmental planning. The choice of the C.D. Block as the unit for data presentation was formulated to help the planners in micro-level developmental plans. Another important improvement at the 1991 Census was dissemination of data through magnetic tapes/floppies in which both the computer as well as manual codes for each revenue village were provided along with the corresponding codes of 1981 Census. In the volumes of the District Census Hand Books, the computer codes assigned to the revenue villages in the 1991 Census and the corresponding codes of 1981 Census were presented so that it may facilitate the data users to use the data either from magnetic tapes or computer floppies.

Scope of the 2001 District Census Hand Book

Like in the previous censuses, the District Census Hand Book (DCHB) for the 2001 Census is brought out in two parts as usual viz., Part-A The Village and Town Directory, and Part-B the Village and Town Primary Census Abstract.

The District Census Hand Books for the 2001 Census is essentially presented in the similar manner in which the District Census Hand Books of 1991 Census were presented. This is because the data would

be comparable with the earlier censuses and also to study the changes taken place during the decades and hence the approach in 2001 Census is similar to 1991 Census. The contents have been slightly enlarged and the formats too are restructured to suit the requirements of the data users. In the village directory for 2001 Census certain new amenities like, news papers, magazine received, Income-Expenditure of the local bodies, information on number of banks, credit societies, recreational and cultural facilities, most important commodities imported, manufactured and exported have been included whereas the information regarding the "Day or Days of market/*hat* if any" which was there in 1991 has been excluded. Apart from providing the information about the nearest place and distance in broad ranges for villages not having basic educational and medical facilities, information about the nearest place and distance in broad ranges for villages not having Middle School, College, Hospital (Allopathic), Maternity and Child Welfare Center and Primary Health Center are also provided this time. However, in the town directory there are no changes except in the statement IV-A where this statement is separately numbered as Statement VII in 2001. Except these, the scope of 2001 series of the District Census Hand Book has, by and large remained the same as in 1991. The non-census information collected at the village level and town level was scrutinized and verified. In case of glaring discrepancies the data were cross-checked with data made available by the respective parent departments for validation.

One of the significant changes made in 2001 series of District Census Hand Book is that Primary Census Abstracts are available to the jurisdiction of the Panchayats in the district. With the constitution (73rd Amendment) Act, 1992, it has become necessary for the census organisation to provide population data for the territorial area of a panchayat in order to strengthen panchayat raj system in the country. In view of this, panchayat-wise population figures for total population and for Scheduled Castes and Scheduled Tribes population has been compiled and presented in the form of Annexure-I for each district.

Further another important step taken during the 2001 Census, is assigning the Permanent Location Code Numbers (PLCN) to the villages. Location code number is a simple but unique device by which every area in an administrative unit in the State/U.T. can be identified. Thus assigning of Location Code Numbers at various administrative levels, right from State/U.T. to the lowest level namely enumeration block, in census taking is an important step. Each clearly demarcated area can be referred to by a combination of numbers. In a State or U.T. the next administrative area is District, followed by taluk or police station, circle, Development Block or Mandal, etc., in different states/U.T.s. Next below this administrative area, in urban areas are cities/towns, further divided into wards/divisions and villages in rural areas. The Location Code Numbers to various administrative areas are assigned in an orderly manner always beginning from northwest point and the numbering proceeds in a serpentine manner, keeping the geographical continuity, ultimately ending at the South-East point.

There was a great demand from different organizations to study the village level data over a time span and hence a scheme of assigning permanent location code numbers to the villages and the higher levels of administrative areas is devised to ensure data comparability over a period of time. In Indian Census, Location Code Numbers are allotted to each village based on traverse system (zigzag) in a serpentine manner at taluk/Taluk level. These numbers for villages run from '1' to 'N' in each taluk independently. This system was adopted until 1991 census. But, for the Census of India 2001, all the villages in a state/U.T. are assigned with a Location Code Number in one continuous series beginning from "1" to "N" for the entire state/U.T. and it is not confined to a taluk. The field length of the complete PLCN structure for a village has been kept up to 8 digits and therefore the location code number of village in a taluk contains 8 digits number for 2001 Census.

(ii) BRIEF HISTORY OF THE DISTRICT

Tumkur district has also been named after its Head Quarters town as in the case of most of the other districts of the State. 'Tumkur' which itself is a derivative of 'Tummeguru' or 'Tumbeluru', the original name of the place. The Tumkur town has a history of only 2-3 centuries and is believed to owe its origin to `Kanthe Arasu', a member of the Mysore royal family. The town does not have any historical

relics to boast of, for even the traces of the fort, said to have been erected at the time of its founding, have already vanished completely. The area comprised in the district consists of a few places of great antiquarian interest and several places of historical importance. Sage Kadamba is believed to have had his hermitage near Kadamba in Gubbi taluk. On his way to Ayodhya after the conquest of Lanka, Shri Rama is said to have called on this sage at his hermitage for a brief sojourn during which at the request of his spouse Sita, he ordered the river Shimsha to be damned so as to form a large lake here. Sampige in Turuvekere taluk is identified with the ancient Champakanagar, the capital of Sudhanva of the Mahabharata period. The palaeolithic artifacts discovered near Biligere and Kibbanahalli reveal that certain places of the district were inhabited by the pre-historic man. The district has a megalithic site also and this is located on a crest of the low ride near Keralakatte village.

The district has not yielded any historical records belonging to the early dynasties of the South India such as the Satavahanas, Kadambas, Badami, Chalukya etc. The earliest record discovered here consisting of five copper plate grants ascribed to 400 A.D. belongs to the Gangas. The Gangas ruled over the Southern and Eastern districts of the State, from the early years of the Christian era up to 1025 A.D. and obviously has yielded numerous inscriptions belonging to the period of Shri Punsha (725-758 A.D.) and several hero stones testifying to the battles that were fought between the forces of the Gangas and Rashtrakutas. The last Ganga inscription found here is dated in 972 A.D., the period when Satyavakya Nolamba Kulantaka,i.e.,Marasimha III,was on throne.Of the Rashtrakutas there are three inscriptions and one of these refers to Vimaladitya as the Adhiraja of the entire Ganga/Mandala while another confirms the date and mode of death of Indira-Raja, the last of the Rashtrakutas who passed away on 20th March 982 A.D.at Shravanabelagola. There are numerous inscriptions which apparently belong to the Chalukyas of Kalyan and these range from 1040 to 1200 AD. However, these merely acknowledge the supremacy of the Chalukyas and are actually those of the Cholas and Hoyasalas. During this period it may be noted, the Nolambas were the principal local rulers and their kingdom was known as Nolambavadi 32000. They had their capital at Henjeru which is identified with the Hemavathi village on the northern border of Sira Taluk. Nidugal of Pavagada taluk was one of their strongholds. The district has yielded several records relating to the Nolambas rulers such as Mahendra who is stated to have uprooted the Cholas his son Nanniga and grandson Anniga or Bira Nolamba and Ahavamalla Nolamba. In about 974 AD the Nolambas were over run by the Ganga king Marasimha-II who earned the title Nolamba-Kulantaka. The Cholas who appear to have wielded supreme power in this region from 1000 AD were over-run by the Hoyasalas.

The earliest Hoysala inscription found in the district is dated in 1078 AD. Hoysala King Vishnuvardhana is stated to have been in possession of both Gangavadi 96000 and Nolambavadi 32000. During the Hoysala supremacy also different tracks of this district were being administered by different local chiefs, for instance, an inscription dated in 1151 AD states that a chief named Guli Bachi was ruling Marugerenad in Kaidala near Tumkur. He built the temples of Gangeshwara, Narayana and Chalavarishwara at Kaidala. The Vijayanagar Empire gradually absorbed the Hoysala dominions including this district. The earliest of the Vijaya Nagar inscriptions found in Tumkur districts refers to the reign of Bukka Raya (1344-1377 AD).

During the 15th and 16th centuries, the Vijayanagara Kings granted various tracts of lands to their Vassal Chiefs bearing different titles, in recognition of the services rendered. Some of the petty principalities already in existence were allowed to continue to administer their traditionally acquired territories. Among such feudatory principalities that arose in the district a mention may be made of those with their headquarters at Nidigal, Holavanahalli, Madhugiri and Hagalavadi.

The Nidugal chiefs were the descendants of Harati Tippa Nayaka whose possession was in the northeast of the Chitradurga district. One of the inscriptions found in Pavagada Taluk describes him as ruling from Nidugal hill fort. He divided his territory among his seven sons. But on invasion of their share of the country by the Bijapur army, the descendants of the family retired to Nidugal fort under the leadership of Thimmanna Nayaka who had lost Dodderi. This family remained at Niduyal for a long time paying tributes to the Subedar of Sira. In 1761 AD when Sira was captured by Haidar Ali, the Nidugal chief also submitted

himself to the conqueror and agreed to abide by the conditions imposed on him. This chief,Thimmanna Nayaka, was later compelled by Tippu Sultan to relinquish his rights over the territory. His sons were taken prisoners and lodged at Shirangapatna where they were ultimately put to death by the British.

The Holavanahalli family was founded by Baire Gowda, said to be one of those that settled at Avati during the 15th century. This chiefdom was soon taken over by the chief of Magadi who gave it away to his own brother Ankana Gowda. The dispossessed chief joined the Sira court where he was well received and invested with an important command. His younger son however sought the help of the Chief of Doddaballapur who captured Holavanavalli and placed the administration in the hands of the Sanna Baiche Gowda. But within the next couple of years Sira army attacked and captured Doddaballapur the former chief Baire Gowda, who had gone over to Sira court fell in the Sage and his eldest son Dodda Baiche Gowda was invested with the Government of Holavanahalli with an increase of territory. Subsequent members of this family fortified Koratagere and extended their territories until they were finally disposed by Hydar Ali of Mysore. The Madhugiri family or the Maddagiri line of Chiefs arose in a similar manner and extended its territory over the northern parts of the district by fortifying Madhugiri Channarayadurga and such other strategic points. In 1678 AD Madhugiri was captured by Dalavai Devaraj and the joint rulers named Rama Gowda and Thimma Gowda were taken prisoners and conveyed to Shrirangapattana. However, they were later released and granted Midigeshi as an estate.

Founded by Erimada Nayaka, the Hagavaladi line of chiefs exercised power over a large portion of the present Tumkur district for nearly 300 years from 1478 AD. The credit of expanding their territories goes to Sali Nayaka the second ruler who captured Kandikere, Shettikere, Honnavalli, Turuvekere and such other places of strategic importance and also founded Chiknayakanahalli. His grandson Mudiyappa Nayaka-I was also equally successful in extending his territories; The ninth ruler who later gave up his throne to pursue his spiritual pursuits. His son, Mudduveerappa Nayaka, earned the title Jung Bahadur for having successfully resisted the onslaughts of Salabat Jung and Dilawar Khan. The twelfth ruler Channabasappa Nayaka was captured and imprisoned by Haider Ali at Shrirangapattana. Soon after his death in the prison the Hagalavadi chiefdom was totally annexed to Mysore.

In 1638 A.D. under the command of Rahamdulla Khan the Bijapur army invaded the northern portions of this district. Along with the southern principalities of the Doddaballapur, Bangalore, Kolar and Hoskote, Sira was placed under the charge of Shahji and for quite some time Malik Rihan was the Governor of Sira.With the capture of Bijapur in 1686 A.D.,Aurangzeb established the Mughal supremacy in this regin. Sira was made the capital of a new province consisting of the seven paraganas of Sira, Basavapattana, Budihal, Doddaballapur, Hoskote, Kolar and Penukonda and was placed under the charge of a Subedar or Faujdar. Kashim Khan was the first Subedar and Dilwar Khan (1724-56) the last. During the period Sira and its neighborhood assumed considerable importance as a seat of administration and received royal patronage. Sheikh Farid for instance built a big mosque. Rustumjung, who earned for himself the title of Bahadur built a fort and a *petta*.

During the same period, parts of this district came to be annexed by the Wodeyars and Mysore in a phased manner as it were. In 1650 AD Kanteerava Narasimharaja Wodeyar (1638-59) made a beginning by acquiring Hebbar in Tumkur taluk from Immadi Keme(pe) Gowda. By 1673 AD, the kingdom of Mysore had been extended as Chikkanayakanahalli in the North. This was followed by the conquest of Chikka-Devanadurga (which he named after himself as Chikkadevarayana Durga), Maddagiri, Midigeshi, Bijjawara, Chennarayanadurga and several other places. By the end of his reign, except for Sira and its immediate surroundings, rest of the Tumkur district formed part of Mysore. These areas for were taken during the period of Haidar Ali on his conquest of Sira in 1761 and the annexation of Haggalavadi in 1776, with the fall of Tippu Sultan in 1799, this territory to passed into the hands of British who restored it in the Wodeyars of Mysore from which date the history of district coincides with the history of the erstwhile Mysore State. During the reign of Krishnamaraja Wodeyar-III (1811-1831) the State consisted of six Faujdaris and the present Tumkur

district stood included in the Maddagiri, i.e., Madhugiri Faujdari, in 1834 these were reconstituted into four divisions and Tumkur became the headquarters of Chitradurga division which encompassed the areas now included in these two districts.

In 1863, Chitradurga division was broken up and while Chitradurga district was added on to Nagar division and Tumkur area attached to the newly formed Nandidurga Division. Sira taluk was transferred from Chitradurga district to Tumkur in 1866. In 1879 all the divisions were abolished and in 1882 Chitradurga district was reduced to a sub-division under Tumkur. However in 1886, Chitradurga district was restored but Pavagada taluk was made a part of Tumkur district. The district consisted of 8 taluks namely Sira, Madhugiri, Pavagada, Tumkur, Chikkanayakanahalli, Nonnavalli, Kunigal and Kadaba. In 1886, Kadaba and Honnavalli taluks were named after Gubbi and Tiptur. In 1928 and 1938, the sub-taluks of Koratagere and Turuvekere were elevated to the status of full-fledged taluks. Since then, but for the transfer of two villages of Madhugiri taluk from Madakasira taluks of Ananthpur district, there have practically been no changes in the administrative divisions of the district. The taluks of the districts are grouped into three revenue sub-divisions with headquarters at Tumkur, Tiptur and Madhugiri respectively. The taluks of Tumkur, Gubbi and Kunigal constitute the Tumkur sub-division and the other four taluks of Madhugiri, Sira, Koratagere and Pavagada constitute the Madhugiri sub-division. Tumkur district itself stands included in Bangalore division which is one of the four divisions into which the State is organised at present.

(iii) Administrative setup and jurisdictional changes during the decade 1991-2001:-

Tumkur district belongs to Mysore division, which is one of the four administrative divisions into which the state is organized. The district is divided into ten taluks. These taluks are further divided into three revenue sub-divisions. Tumkur sub-division includes Tumkur, Gubbi, and Kunigal taluks. Tiptur sub-division covers Tiptur, Chikknayakanhalli and Turuvekere taluks, and Madhugiri sub-division comprises of Madhugiri, Sira, Koratagere and Pavagada taluks. During the decade the district has not witnessed any jurisdictional changes either with regard to its outer boundaries or with regard to the boundaries of the taluks.

Total number of Towns/Village

As per the census of India 2001, there are totally 2708 villages and 11 statutory towns in the district. Of the total villages, 2,574 are inhabited and 134 are uninhabited villages. When compared to the census of India 1991, certain changes in the number of villages and towns during Census 2001 is observed the reasons of which are attributed either to declassification or merging of towns or to creation of new villages.

STATEMENT SHOWING THE NUMBER OF VILLAGES/TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS, IF ANY, AND REASONS THEREOF

Sl. No.	Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalised for		Reasons for variation in the number of villages/towns in each taluk of the district, decadal variations if any and reasons thereof
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
1	Chikknayakanhalli	234	234	1	1	-
2	Sira	249	249	1	1	-
3	Pavagada	147	144	1	2	Three new villages namely, K.Sevalalpura, Indiranagara, Ranganathapura, were formed vide G.O NO 15 LRD 92 dated 29.8.94, and included in the 2001 village list. As a result of this, the total number of villages in the taluk increased to 147 in 2001 as against 144 in 1991. Further Y N Hoskote an urban unit in 1991 was declassified as it did not satisfy the urban criteria and hence it was included in Y N Hoskote village this has not affected the total number of villages in the taluk. The civic status of Pavagada Town has changed from Mandal Panchayat to Town Panchayat vide Notification No. HUD 641 MLR 95(15) dated 09.01.1996.

Sl. No.	Taluk	Total No. of villages according to the list finalised for		Total No. of towns according to the list finalised for		Reasons for variation in the number of villages/towns in each taluk of the district, decadal variations if any and reasons thereof
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
4	Madhugiri	320	321	1	1	Lingenahally revenue Village is completely merged in the Madhugiri town limits owing to town limit extension vide Notification No. HUD 476 MLR dated 10.10.95. So the total number of villages fell to 320 in 2001 from 321 in 1991 Census.
5	Koratagere	251	251	1	1	-
6	Tumkur	373	385	1	1	There is fall of 12 villages due to their amalgamation in the extended boundary limits of Tumkur City vide Notification No. HUD 474 MLR 95 dated 10-10-95. The affected villages are 1. Geddalahalli, 2. Gangasandra, 3. Bheema sandra, 4. Melekote, 5. Tumkur Amanikere, 6. Dibbur, 7. Honnenahalli, 8. Lingapura, 9. Antharasanalli, 10. Rangapura, 11. Moralena hally, and 12. Sathyamangala. Hence these villages were deleted from 2001 list of villages. Besides all the outgrowths of Tumkur Urban Agglomeration of 1991 Census viz., Tumkur, Devarayapatna, Batavadi, Channadinne, Settihalli, Upparahalli, Maralur, Veerasagara, Baddihalli and Kyatasandra were also included in the city limits and as a result of this change, Tumkur Urban Agglomeration was de-recognised for the 2001 Census. With all these changes, the total number of villages fell from 385 in 1991 to 373 in 2001.
7	Gubbi	346	346	1	1	-
8	Tiptur	231	231	1	1	-
9	Turuvekere	243	243	2	2	-
10	Kunigal	314	314	1	1	-
	Total	**2,708**	**2,718**	**11**	**12**	

Urban Local Bodies

The statutory urban local bodies are the City Municipal Councils, Municipal Corporations, Notified Area Committee, Town Municipal Councils, Town Panchayath, Cantonment Boards. These urban local bodies elect Councilors / Corporators from each ward and the tenure of those Councilors / Corporators would be for five years. The President or Vice-President of the Municipal Council and the Mayor / Deputy Mayor of the Corporations are elected from among the elected Councilors / Corporators whose tenure will be for a period of one year. The Chairman of various committees are also elected among the elected Councilors with a term of one year. As regards district specific, there are three Town Panchayats, three Town Municipal Councils, one City Municipal Council and one Notified Area Committee, i.e. Krishnaraja Sagar.

The Chief Officer in Municipal Council and the Commissioner in a City Corporation are responsible for day to day administration and the executive authority is vested with them.

Zilla Panchayat and Taluk Panchayat

To promote the development of institution and secure greater measure of participation by the people in the local and governmental affairs by decentralisation of power and functions and for the purpose of development planning and implementation of various programmes thereof Zilla Panchayats have been constituted in the State. The jurisdiction of Zilla Panchayat is coterminus with that of the corresponding district and covers the entire rural and semi urban area but excludes the statutory towns. Accordingly Zilla Panchayat has been constituted for Tumkur distrct and its jurisdiction extends over the Taluk

Panchayats of the district. The jurisdiction of each Taluk Panchayat is coterminus with that of the taluk of the same name but excludes the area incorporated in the statutory towns or cities.

The Zilla Panchayat elects its president and vice-president and chairman of its committee from amongst the elected members. The term of these elected representatives will be for five years. An officer of the rank of IAS is deputed by the State Government as Chief Executive Officer of the Zilla Panchayat. Panchayat is assisted by various departments.

Grama Panchayats

The Government of Karnataka has enacted the Karnataka Panchayath Raj Act 1993 on 30.4.1993 replacing its previous enactment in this regard for the formation of Grama Panchayath.

STATEMENT SHOWING THE TALUKWISE NUMBER OF GRAMA PANCHAYATS AND HOBLIES/ FIRKAS

Sl. No.	Name of Taluk	No. of Hoblis/Firkas	No. of Panchayats
1	2	3	4
1	Chiknayakanhalli	5	28
2	Sira	5	36
3	Pavagada	4	33
4	Madhugiri	6	39
5	Koratagere	4	23
6	Tumkur	6	41
7	Gubbi	6	33
8	Tiptur	4	26
9	Turuvekere	4	26
10	Kunigal	6	36
	Total	**50**	**321**

Details regarding Panchayatwise number of villages have been furnished in Annexure I.

The Grama Panchayat is authorised to function on the items listed in Schedule I of the Act namely, preparation of annual plans for the development of panchayat area, preparation of annual budget, providing reliefs in natural calamities, removal of encroachments on public properties, organising voluntary labour and contribution for community works, maintenance of essential statistics of the village, in addition to matters relating to agriculture, Animal Husbandry, Fisheries, Social & Farm Forestry, Khadi, Village & Cottage Industries, Rural Housing, Drinking Water, Roads, etc., Rural Electrification, Non-conventional energy sources, poverty alleviation programmes, Markets & Fairs, Rural Sanitation, Public Health & Family Welfare, Women and Child Development, Social Welfare, Welfare of Weaker Sections, Public Distribution System, Maintenance of Community assets, Construction and Maintenance of Dharmashalas, Chatras, Cattle Sheds, Ponds, Cart Stands, Slaughter Houses, Public Parks, Play Grounds, etc. Regulation of manure pits in public places and establishment and control of shandies. Such other functions as may be entrusted.

The Grama Panchayat is also empowered to make provisions for carrying out within its area any other work or measure which is likely to promote the heath, safety, education, comfort, convenience, social or economic well being of the inhabitants of the panchayat area.

(iv) PHYSICAL FEATURES

Tumkur district is located on the eastern belt in the southern region of the state. It comprises of an area of 10,597 sq.kms. It is the third largest district in terms of area in the state. The district's north to south extension runs to 174 km. and east to west extension is measured as 125 kms.

(1) Location and Size

The district lies between $12^{0}45'$ to $14^{0}22'$ north longitude. The highest and lowest area of the district is located at 1000 and 600 metres of contour line above the mean sea level. The district has peculiar

shape in that Pavagada which is one of its taluk is totally detached from the remaining area of the district. This taluk is surrounded on all sides by area belonging to Andhra Pradesh except for a short stretch of land on the western border touching Chitradurga district . The remaining portion of Tumkur district is bound on the north by Andhra Pradesh, on the east by Kolar and Bangalore districts, Mandya on the south and major portions of the district is bound by Hassan on the west. Chikmagalur too shares its border on the west for short distance, and Chitradurga forms its north-west boundary.

(2) Physiography

Physio-graphically Karnataka State has been formed into well-defined macro regions of the Indian union. The Deccan plateau and the coastal plain and Islands. Further the state has been divided into 4 micro regions considering the Physio-graphic characteristics of the regions. The micro regions are the northern Karnataka plateau, the central Karnataka plateau, the southern Karnataka plateau and the Karnataka coast. Tumkur is a part of the southern Karnataka plateau and located in the eastern belt in the southern half of the State. Tumkur is a land locked district. It has no natural features like rivers or mountains dividing it from the other districts of the state. The landscape consists mainly of undulating plains interspersed with a sprinkling of hills. To the east of Tumkur and north by Devarayana-durga there is a short stretch of hilly country intersected by cultivated villages. Besides these, there are several hill ranges and isolated hills as well. While the western parts are occupied by long ranges of hills running in a south by southeasterly direction, the eastern parts are occupied by a narrow range of granitic hills running north and south. There are two parallel ranges running north to south and the first one of these in the eastern portion passes through Pavagada, Madhugiri, Koratagere and northern part of Tumkur taluk. The second range, mainly composed of schistose rocks, passes through the western parts of the district in the taluks of Chiknayakanhalli, Sira and Gubbi. There is another cluster of hills covering the middle and the southern parts of Kunigal taluk. In this zone the tree-growth is comparatively dense and trees tend to grow taller and stouter. The prominent hill peaks of the district are Devarayana-durga (1,169 metres), Ramadevara-betta (1,164 metres), Nijagal (1068 metres) and Seetakal (1,004 metres) in Tumkur taluk; Madhugiri –durga (1,179 metres), Midigeshi-durga (1,023 metres) Doddanaramangala (930 metres) and Byalya (874 metres) in Madhugiri taluk, Hutridurga (1,112 metres), Hemagiri (925 metres), Rangaswami-beta (899 metres) and Huliyurdurga (831 metres) in Kunigal taluk, Kamanadurga (1,060 metres) Nidugal 1,131 metres) and Pavagada hill (904 metres) in Pavagada taluk : Channarayana-durga (1,120 metres) and Koratagere hill (867 metres) in Koratagere taluk : and Bommanahalli (938 metres) and Chondanahalli (80 metres) in Tiptur taluk.

(3) Drainage

There are no perennial streams in the district. Few rivers and a number of big streams flow during the rainy season and dry up during summer. Of the few rivers that flow in the district, the most important are river Shimsha and Jayamangali. The river Shimsha originates from the south of Devarayana-durga hill and flows in a southernly direction before joining the river Cauvery. It traverse for 100 kms in the district passing through Tumkur, Gubbi, Turuvekere and Kunigal taluks. Enroute, this river feeds the large Kadaba tank. Naga stream which joins the river near Kallur and the Nagini stream that emerges from Kunigal tank, joins the river near Hanumapura, deserves special mention. The waters of this river have been harnessed for purposes of irrigation by constructing a dam near Marconahalli in Kunigal taluk. The river Jayamangali too rises from Devarayana-durga but on the north side of the hill in a place called Jaladagondi. It flows in a northwesterly direction traversing through Tumkur, Koratagere and Madhugiri for about 65 kms before joining the river Penner. Garudachala near Horavanahalli and Suvarnamukhi near Rampura are the two streams that join the river. Tumkur district contains two rivers bearing the same name. One is a tributary of river Vedavati and the source of this main stream is near Badamuddanahalli village in Koratagere taluk. Flowing northwards through Koratagere and Madhugiri taluks it enters Ananthapur district covering a distance of about 5 kms. Further it turns westwords and enters Sira taluk near Madalur village. After flowing in westward direction, it takes northwest direction. The total length of its course Tumkur district is about 70 kms. Doddahalla is an

important tributary of this river. It rises from the southern portion of Sira taluk and flows towards north to join rivers Suvarnamukhi near Adlur. Chikka tore and Kere tore are other constituents of Suvarnamukki . Chikktore taken a northerly course and cuts through Chikknayakanhalli. A few kilometers to the northeast, this is joined by kere tore flowing in a northwesterly direction near the Suvarnamukhi State Forest. It is from this place onwards the combined stream gets the name Suvarnamukhi. There after it continues to flow in the general northeasterly direction and is joined by the other branch of the Suvarnamukhi, which flows in from the east near Hunsehalli in Sira taluk. The other Suvarnamukhi stream originates on the Devarayana-durga hills in Tumkur taluk. It flows towards northeast, after flowing a distance of about 25 kms, it joins the Jayamangali river near Kyasavara village. It traverse through the taluks of Tumkur, Koratagere and Madhugiri .The river is formed by the confluence of streams, one of which has its origins near Devarayana-durga of Tumkur taluk and another has its origins near Kolikal State Forest of Koratagere taluk. The former stream flows in a northern direction while the latter, known as Doddahalla, flows in an easterly direction for a distance of about 15 km before uniting with the other stream near Rampura village. Garudachala is another stream, which flows in the north direction into Koratagere taluk and joins the river Jayamangali near Holavanahalli. North Pinakini also known as North Pennar flows through Pavagada taluk for a short distance. Likewise Kumudwati also known as Kunder River near Makalidurga in Doddaballapur taluk of Bangalore Rural district cuts through eastern borders of Madhugiri taluk. Among the other stream, Nagini deserves special mention. It has its source in the Kunigal – Doddakere and flows for about 6 miles in Kunigal taluk before joining the river Shimsha near Hanumapura. An anicut was constructed across the stream near Sankanpura lake way back in 1901, which irrigates about 250 hectares and one more anicut in 1980 has been built across the streams near Mangala village. The district particularly the regions covering the taluks of Madhugiri, parts of Koratagere and Pavagada taluks are known for its ‘tala pariges’ (springs). The water from these springs is used for irrigation purpose.

(4) Climate

The climate of the district is generally agreeable. However, the climate surrounding Pavagada region and north of Sira, is relatively hot. The year may be divided into four seasons. The district experiences continuous rise in temperature during the months of March to May and April is usually considered as hottest month. Maximum temperature may reach 40 or 41^0 C during the hot season. Southwest monsoon sets in during the period of June to September. In this season, the temperature drops appreciably and the weather is pleasant throughout the season. October and November may be termed as post-monsoon season and during the period, temperature decreases steadily and remains cool till February. Winter sets in December and prolongs up to February. December is generally the coolest month of the year and the daily minimum temperature in this season sometimes reaches 9 to 10°C.

(5) Winds

Winds are generally moderate with some increase in strength during the monsoon months. The winds are mainly southwesterly or westerly during the months May to September and sometimes northwesterly in the afternoon. In October, it blows in north easterly and easterly direction and it prevails till the end of January. The district experience a gradual shift in a clockwise direction from February and by April, winds are mainly south-westerly to westerly in the morning and between north-east and south-east in the afternoons. The special weather phenomena of the district is that it experience a occasional thunder storms in February and March, and it becomes more frequent in April, May and mid June.

(6) Rainfall pattern

The District falls under central dry, southern dry and eastern dry agroclimatic zones of the state. The taluks of Tiptur, Chikkanayakanahalli, Sira, Madhugiri and Koratagere falls under central dry zone. The taluks of Gubbi and Tumkur falls under eastern dry zone. Turuvekere and Kunigal taluks falls under southern dry zone.

The average Rainfall in the district ranges from 558 mm in Pavagada taluk to 832 mm in Tumkur taluk. The rainfall decreases from southeastern part of the district towards north and northwestern part.

The northern part of Sira and Pavagada taluks receives the lowest rainfall.

Among the taluks in the district the premonsoon rainfall contributes 18 to 25 % of the annual rainfall, southwest monsoon contributes 42 to 54 % and northeast monsoon contributes 27 to 33 % of the annual rainfall.

The coefficient of variation ranges from 42 to 53 % for the premonsoon season, the highest variability (52 to 53 %) being in the taluks of Madhugiri, Pavagada, Sira and Chiknayakanhalli.

The coefficient of variation for south-west monsoon ranges from 32 to 47 %, the highest being in Pavagada taluk. The coefficient of variation for northeast monsoon ranges from 48 to 62 %, the highest being for Sira taluk.

The coefficient of variation for Annual rainfall ranges from 25 to 33 %. The taluks of Sira, Pavagada and Gubbi experiences high variability of rainfall is given below.

TALUK WISE RAINFALL PATTERN, TUMKUR DISTRICT

Taluks(No. of Years of Rainfall	Statistical Parameters	Pre Monsoon	South-West Monsoon	North-East Monsoon	Annual Rainfall

A study of the rainfall deficit pattern during the last 20 years compared with the long term data for different seasons indicate increase in rainfall deficiency in the recent past during the pre-monsoon and northeast monsoon period. Rainfall deficit during last 20 years has been compared with that of long term data in different seasons and is presented in the following table.

TALUKWISE AND SEASONWISE COMPARISION OF RAINFALL DEFICIT DURING LAST 20 YEARS WITH 99 YEARS DATA, TUMKUR DISTRICT

	Seasons and no. of years with deficit rainfall							
	Pre Monsoon		Southwest Monsoon		Northeast Monsoon		Annual Rainfall	
Taluks	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs	Long Term	Recent 20 Yrs.
1	2	3	4	5	6	7	8	9
Chiknayakanhalli (98)	41(42)	11(55%)	34(35)	6(30%)	43(44)	11(55%)	30(31)	6(30%)
Gubbi (99)	44(44)	10(50%)	34(34)	4(20%)	41(41)	8(40%)	32(32)	4(20%)
Koratagere (99)	39(39)	8(40%)	28(28)	1(5%)	36(36)	9(45%)	21(21)	2(10%)
Kunigal (98)	36(37)	9(45%)	32(33)	3(15%)	41(42)	10(50%)	23(23)	2(10%)
Madhugiri (98)	41(42)	11(55%)	36(37)	9(45%)	33(34)	6(30%)	22(22)	4(20%)
Pavagada (98)	42(43)	11(55%)	38(39)	4(20%)	43(44)	10(50%)	25(26)	3(15%)
Sira (99)	41(41)	13(65%)	32(32)	6(30%)	45(45)	10(50%)	29(29)	4(20%)
Tiptur (97)	23(24)	6(30%)	31(32)	4(20%)	40(41)	9(45%)	20(21)	5(25%)
Tumkur (99)	36(36)	6(30%)	22(22)	3(15%)	37(37)	7(35%)	20(20)	2(10%)
Turuvekere (97)	37(38)	10(50%)	30(31)	4(20%)	41(42)	12(60%)	23(24)	5(25%)

Note : Figures in bracket indicate values as percentage of number of years for which data is available or for 20 years depending on the column in which it is given.

- The Premonsoon rainfall in the recent 20 years is more deficits compared to the long-term data.
- Southwest monsoon is less deficit in the recent 20 years compared to the long-term data with Madhugiri taluk as an exception.
- The rainfall deficit during northeast monsoon is increasing during recent 20 years compared to the long-term data, excepting Gubbi, Madhugiri and Tumkur taluks.
- The trend analysis of annual rainfall indicates increasing trend in the taluks of Gubbi, Koratagere, Kunigal, Pavagada, Sira and Tumkur taluks. The taluks of Madhugiri, Turuvekere and Chikkanayakanahalli indicate no significant change. Annual rainfall shows a decreasing trend in Tiptur taluk.

(7) Forestry

The total forest area constitutes 4 per cent of the total geographical area. These forests areas lie in the dry belt zone. The vegetation in this dry belt is inferior to those found in evergreen forests. Forest region in the district is found to a larger extent on the lower slopes of hill ranges. Devarayana-durga, hills around Koratagere, ranges near Madhugiri, chain of hills to the west of Kibbanahalli, the region around Bukkapatna, the area near Huliyurdurga, around Kudrekanive and keepalpura are the ranges where these forests are located. These are mostly open and consist of mixed species varying from dry deciduous to thorny bushes. Due to scanty rainfall, the trees are short, twisted, knotty and full of branches. The forests contain very few timber species and the wood that is generally available is suitable for fuel purposes. Due to excessive felling of trees and also due to excessive grazing in the past decades, forests have become depleted and in most of the areas, it has become barren. Efforts are being made to improve the forest wealth of the district by afforestation and other schemes such as rehabilitation of degraded forests, soil conservation, agave planting, Cashew development, etc.

(8) Geology

Geologically, Tumkur district is situated right on the archaen complex. The rock formations are represented by the crystalline schists, the granitic gneisses and the newer granites. The crystalline schists of this district, which form the southern extension of the will defined Chitradurga schist belt of the Dharwar system, are the oldest members of the archaean complex. A main central schist passes through the east of Chiknayakanahalli. From this belt, a branch extends over 40 km to the west-northwest near Banasandra. This narrow belt is composed of chloritic schists, micaceous schists, quartzites, limestones and ferruginous quartzites. In this belt, lans-shaped masses of grey trap occur between the villages of Bellara and Bukkapatna. These are basic and intermediate types of volcanic rocks. Portions of the Schist belt near Doddaguni show clear evidences of sedimentation. The thin patches of Schists scattered about in the gneissic complex show evidences of repeated metamorphison. The biggest of the scattered Schist patches are formed to the west of Huliyurdurga and covers an extent of about 20 square miles. Besides, there are two small Schists one near Bidaloti in Koratagere taluk and the other near Tipsandra to the east of Kunigal taluk. These Schists are intensely altered and new minerals like diopside, hyperthene, varieties of garnets, cordierite, sillimanite and corundum have developed giving rise to several interesting rock types. The narrow belt at Chiknayakanahalli as well as the scattered patches is surrounded by gneissic complex and they are grouped as peninsular gneiss. It is composed of four major components of banded gneisser, granitic gneisses, gneissic granites and granites, and grano-diorites, diorites, inter-action diorites and other varieties. Regarding the mode of origin of this peninsular gneiss, it is stated to be the formation of older rocks, and by the action of magmatic emanations and juices that came up during the infrusion of magma. On the other hand, the younger granites constitute a well-defined narrow range of hills, which run north and south in the eastern portions of the Tumkur district. These granites are usually coarse-grained and coarsely porphyritic and they represent the northern extension of the younger 'closepet' granites and intrude all earlier formations.

(9) Flora and Fauna

Fauna: The forest area covers 4.2 percent of the total geographical area. It lies on the dry belt zone and is found mostly on the lower slopes of hill ranges. Forests lying on the eastern belt are of dry deciduous type and the trees are short, twisted, knotty and full of branches. However, in the southern portion, there are forests tracts with tall and well-grown trees. By and large, the type of soil, rainfall, and climatic conditions of the district are not favourable for the growth of rich vegetation. Hence, very few species of wild animals are spotted in these forests. Bear, wild boar, hyena, fox, spotted deer and rabbit are the important animals encountered in the district's forests.

Flora : The flora of the forests is of dry deciduous type of two orders namely, the higher and the lower. The higher type is found in the Madhugiri State Forest Zone, in Bukkapatna, Tirtharampura, Manchaldore, Huliyur-druga and Devarayana-durga State Forest areas. The species seen in higher type are 'Karimatti', 'Jalari', 'Honne', 'Dindiga, Alale', 'Toramatti', Hunise', 'Teak', and Sandal wood. The species of the lower order are found mainly in the forest areas of Pavagada taluk and these include

'Kaggali', 'Pale', 'Kare', 'Bandre', 'Tanygadi', and Chujjalu trees. Barks of kakke and Tangadi are useful in tanning industry. The other important minor forest produce include alalekai, hunise hannu, maradi, beedi or 'tupra leanes' and 'sitaphala'.

(10) Soils

The soils in the district is in generally hard and less fertile. More commonly seen in the district are red soil, black soil and sandy soil. The red soil also known as ragi soil is seen in southern and western taluks. While the black soils in northern taluks and sandy soils in eastern tract are spotted in the district. As per the definition of National Soil Survey Organization & Land Use Planning, the soils in the district can be classified as Ustalfs and Ustalfs-Tropepts. Red, gravelly, sandy, clay loam, blade soil, sandy clay, clay and alkaline soils confined to Koratagere taluk alone are the other types of soils found in the district. The red soil is found in the taluks of Tumkur, Madhugiri, Pavagada, Tiptur, Turuvekere, Kunigal and Gubbi. Especially in Tumkur, Kunigal and Sira, the soils are red loans, and are 2 to 5 feet fairly deep. They are underlaid with murram and are well drained but poor in lime and bases. The red and red loamy soils are suitable for graining a wide variety of crops with manuring and proper irrigation. These soils occur in regions of medium rainfall ranging from 25 inches to 60 inches. Except plantation crops like coffee and cardamom, almost all crops are grown in the district. The black soil more suitable for cultivation of cotton crops is found in large extent in Madhugiri taluk. This type of soil is also found in Sira, Chiknayakanahalli, Gubbi, Tiptur, Turuvekere and Pavagada taluks. These soils are rich in bases and have a high water holding capacity. The rainfall in these tracts is generally lower than in other parts and farming is of the dry type. Black soils are particularly suited for rain-fed crops like short staple cotton, groundnut, jowar and tur.

(11) Cropping pattern

The economy of Tumkur is mainly dependent on agricultural land. The district in spite of being not blessed with major rivers and also with few irrigation projects, the agricultural activity and its contribution to the district economy is worth mentioning. Another feature of the agricultural economy of the district is that a considerable portion of its land lies in the coconut belt. According to Census of India 2001, cultivators form 45.7 per cent and agricultural labourers form 23.8 per cent which only highlights that agricultural activity is still predominant in the district.

The below given table reveals data on land use pattern in the different taluks of the district for the year 1998-99 in Hectares.

LAND USE PATTERN FOR 1998-99 IN HECTARES

Name of Taluk	Geographical Area	Forest Area	Land put to Non-agricultural use		Uncultivable Fallow Land			Cultivable Fallow Land	Area Sown			Total Net Area Irrigated
			Barren and Uncultivable land	Land put to Non-agricultural use	Cultivable waste land	Permanent pastures	Trees and groves		Net Area Sown	More than once	Total Area Sown

Source : Tumkur District at a Glance, 1998-99, District Statistical Office, Tumkur.

According to the latest land use statistics, which is given in the above table for the year 1998-99, forests occupy 4.2 percent. Lands put to non-agricultural use accounts for 14.1 percent. Permanent pastures, cultivable waste lands, trees, and groves constitute 17.5 percent. Cultivable fallow land is 16 percent of the total geographical area. The net area shown is 48.2 percent and the total area sown is 51 percent. The area under cultivable fallow land represents the lands, which have been brought under plough but for some reason, crops have not been sown during that particular year or season. Thus broadly speaking 64.2 percent of the area may be regarded to have been brought under plough.

The size of the agricultural land holdings is one of the important factors that determine the productivity of the land. According to the agricultural census of 1995-96, there are totally, 4.16 lakh land holdings covering a total area of 6.89 lakh hectares. More than 75 per cent of the holdings are of marginal and small size lands held by them amounts to 36.6 per cent. The table below illustrates the distribution of land holdings in the district.

LAND HOLDINGS IN HECTARES 1995-96

Note : *-Data for irrigated and un-irrigated area separately are not available.

Ragi is chief crop most extensively cultivated food crop of the district. It is grown both under irrigated and un-irrigated conditions. The total area put under cultivation of ragi roughly constitutes one-third of the total cropped area. Paddy, maize, and jowar are the other important crops that is being raised in the district. While paddy is cultivated under irrigated conditions, maize and jowar are grown under un-irrigated conditions. Among the oil seeds groundnut is grown extensively in the district. About 1.9 lakh hectares of land are utilized for cultivation of groundnut. The other major oil seeds include sunflower, castor and nigerseeds besides rape and mustard, sesamum and soyabean. Cotton, sugarcane and tobacco are the commercial crops raised in the district. Grapes, brinjal, potato, banana, tomato, and lemon are some of the plantation and horticultural crops cultivated in the district. Among condiments and spices, the district is known for coconuts, arecanuts, and dry chillies.

(12) Irrigation

There is no perennial stream in the district. There are few small rivers and a number of big streams that feed number of tanks. They flow during rain season and dry up during summer. In the absence of abundant rainfall on the one hand and on the other hand, more than 64 per cent of the total geographical area being put under plough, the need for more irrigation projects to meet the increasing demand also mounts up. Despite the fact not many major irrigation projects are there in the district. Nevertheless, the northern and the north eastern portion of the district covering the taluks of Madhugiri, parts of Koratagere and Pavagada taluks is known for its 'tala pariges' (springs) which provide water for irrigation. Water obtained from these springheads is either conduced directly by narrow channels to the fields or large wells have been constructed so that water can be stored, lifted and channalised. The district is also known for is large number of tanks, most of which are important from the point of view of irrigation potential. As per the latest statistics, a considerable proportion of cropped area is being irrigated through borewells. It accounts for 55.9 per cent of the total irrigated area. Tanks and wells form the next major source of irrigation in the district. An area of 270 hectares is being irrigated through canals. The table below gives the taluk wise distribution of net area irrigated by different sources.

NET AREA IRRIGATED BY DIFFERENT SOURCES

Name of Taluk	Net area irrigated for 1998-99 (Area in hectares)						
	Canal	Tank	Wells	Lift Irrigation	Bore Wells	Other sources	Total
1	2	3	4	5	6	7	
Chiknayakanhalli	-	57	160	-	3,736	-	3,953
Gubbi	-	2,410	620	-	6,717	-	9,747
Koratagere	-	2,392	1,190	-	3,964	-	7,546
Kunigal	-	10,731	1,010	141	3,114	-	14,996
Madhugiri	-	-	350	-	10,820	-	11,170

Source: Tumkur District at a Glance, 1998-99, District Statistical Office, Tumkur.

Besides these tanks, wells and other sources, the district has four irrigation projects to supplement the requirement. Of the four project Marconohalli dam built across the river Simsha near Amruthur in Kunigal taluk is the biggest. Also the Sankarapura anicut built across river Nagini and Mangala reservoir near Mangala river are the other two projects to irrigate the cropped area in Kunigal taluk. The fourth one is the Boranakanive reseervoir in Chiknayakanhalli taluk constructed as a femine relief work across the river Suvarnamukhi. In the recent past the government has approved Hemavathy canal zone project across river Hemavathy in Tumkur taluk, as per order PWD/11/ pco/87 dated 14.01.1987 for execution of canal works in Tumkur and Mandya district. In Tumkur alone this canal extends upto 240 Kms, benefiting an area of 95909 hectares. Beside this, the district will also be benefited by Hemavathy project zone-Gorur which envisages construction of a dam across the river Hemavathy near Gorur in Hassan district.

(13) Natural Wealth

Tumkur is not rich in its mineral resources. Few minerals of economic importance occur in the district. Minerals like asbestos, corundum, clay, fieldspar, limestone, manganese, quartz, sillimanite, silver sands, soapstone, and building and ornamental stones are available in the district. Extremely fine-grained white clay are exposed on a large scale in the district. As per the latest statistics 3 MT deposits of clay has been assessed in Gubbi. These deposits are also located in Chikknayakanhalli and Tiptur taluks but their reserves have not been assessed. Large exposures of limestones are found near Chikknayakanhalli, Gubbi, and Tiptur. While 20 MT of reserves have been assessed in Chikknayakanhalli, in Gubbi and Tiptur the value of reserves are yet to be assessed. It has been estimated that 8,010 tonnes in Chikknayakanhalli, 9280 tonnes in Gubbi and in Tiptur 6380 tonns of limestones are currently produced. Occurrences of manganese are noted in Chikknayakanhalli, Gubbi and Tiptur, but their values have not been assessed. Besides other minerals, gold is located in Chikknayakanhalli and Sira taluks. About 2.00 MT gold assaying 6.8 Gm per tones of gold reserve in Sira taluk has been assessed in the district. Minor minerals like building stones, brick earth, lime kankars and ornamental stones are available in the district . The value of these reserves are yet to be assessed. Almost in all taluks except in Tiptur building stones are produced in large quantities. The table gave below highlights different types of major and minor minerals occurring in the district. The taluk-wise-mineral resources are presented in the following table.

MINERAL RESOURCES OF THE DISTRICT

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor	
1	2	3	4	5
1	Tumkur	-	Building Stone Brick earth	-
2	Chiknayakanhalli	Gold, Iron Ores, Manganese Ores, Quartz, Red Ochre, Clay Limestone, Steatite, Dolomite	Brick earth, Building Stone, Lime Kankar	There is ample scope for establishing cement manufacturing units
3	Gubbi	Manganese Ore, Limestone, Clay, Quartz	Building Stone, Brick earth	-
4	Tiptur	Manganese Ore, Limestone, Clay, Quartz	Ornamental Stone, Building Stone, Brick earth	-
5	Koratagere	Red Oxide	Building Stone	-
6	Turuvekere	-	Building Stone, Brick earth	-
7	Sira	Gold	Ornamental Stone, Building Stone, Brick earth	Lease granted to M/s. H.G.M.L. at Ajjanahalli
8	Madhugiri	Red Oxide	Building Stone,	-

Sl. No.	Taluk	Type of Mineral		Remarks
		Major	Minor

(14) Animal Husbandry

Livestock rearing is an important economic activity in the district. A large number of cultivators as a rule keep a pair of bullocks, a few cows and a couple of buffaloes. While comparing with other district, Tumkur ranks in 2nd place in its livestock population and 10th place in its poultry wealth. (Ref: A Handbook of Karnataka 2001, Gazatteer Department, Government of Karnataka). The predominant breed of cattle found in the district is the Hallikar breed. The Animal Husbandry and Veterinary services Department has undertaken various measures to improve the existing breeds of cattle in the district. Measures like mass castration of all scrub bulls, artificial insemination, supply of stud-bulls of good breeds etc, have been taken up by the department.

According to the provisional figures of livestock census, 1997, the total livestock population in the district is 2,248,583 which includes cattle, buffaloes, sheep, Goats, pigs, Rabbits, Dogs and other livestocks. The total poultry stock is 876,000. The following table shows the distribution of various types of livestock in the district for the year 1997.

DISTRIBUTION OF LIVESTOCK POPULATION IN THE DISTRICT

Sl. No.	Name of Livestock	Total Livestock
1	2	3
1	Cattle	578,305
2	Buffaloes	259,622
3	Sheep	874,598
4	Goats	364,627
5	Pigs	19,836
6	Rabbit	1,343
7	Dogs	141,451
8	Other Livestock	8,801
	Total Livestock	**2,248,583**
	Total Poultry	**876,000**

Source : A Handbook of Karnataka – 2001, Gazetteer Department, Government of Karnataka.

As per the statistics of the livestock census, the district ranks in 4th and 2nd place in its total cattle and buffaloes population. Sheep breeding, rearing of goats and rabbits are also of considerable importance. The district is the 2nd largest in the State in sheep breeding, 3rd largest in rearing of goats and first in rabbit rearing.

The milk production in the district is 226 thousand tonnes. About 490 lakhs of eggs and 3,609 tonnes of meat are produced annually. There are eleven livestock farms under the control of the Department of Animal Husbandry and Veterinary Services. Of which one farm namely Hallikar Cattle Breading station, Kunikenahalli, is in the district. Hallikar cattle breading, bull-calf production and distribution and fodder development are the main activities of the centre. A sheep breeders association has been functioning in the district. The district also has one poultry rearing centre. A number of young and enthusiastic farmers in the district have been given training at the Hesarghatta Poultry Farms in modern methods of rearing and managing poultry.

(14A) Veterinary Services.

The spread of veterinary services has resulted in overall improvement of animal health. In all Tumkur has 224 veterinary institutions catering to the needs of the livestock population in the district for the year 2000. The details are given below:

VETERINARY INSTITUTIONS IN THE DISTRICT FOR THE YEAR 2000

Sl. No.	Veterinary Services	No. of Institutions
1	2	3
1	Hospital	15
2	Dispensaries	54
3	Primary Veterinary Centres	127
4	Mobile Dispensaries	10
5	Artificial Insemination Centres	18
	Total	**224**

Source: Karnataka at a Glance 2000-2001, Directorate of Economics and Statistics, Government of Karnataka.

(15) Fisheries

Plenty of major and minor tanks as well as four reservoirs provide ample scope for the development of inland fisheries. A variety of finest fresh water fishes are found in the district. The major and minor tank numbers to 1,726 with the water spread area of 48,977 ha. In addition, there are 4 reservoirs with the water-spread area of 3,078 ha. Fishing is done by means of dragnets, gill nets, cast nets, prawn nets, long line and plunge baskets. The district has 3 fish farms, of which 2 are involved in production and one farm is engaged in rearing activities. There are 2 fish seed center engaged in production of fish seeds. The principles of co-operative effort have also been applied in the sphere of fisheries by establishing Fisheries co-operative society. As such there are 8 primary Fisher men's co-operative society functioning in the district. Fish marketing scheme is in operation and the district has 13 Fish markets. All the 13 markets are under the control of private people. The active fishermen population in the district numbers to 5,369. The government has introduced various welfare schemes for the benefit of fishermen. Some of them includes, group accident Insurance, CSS for development of model fishermen villages, CSS for motorizations of traditional fishing craft, CSS for reimbursement of Central Excise duty on diesel used by mechanized boats, subsidy on sales for payment of Distress Relief Fund, etc. The following table highlights in brief the fishing activity in the district.

FISHING ACTIVITY IN THE DISTRICT

Fish Seed Stocked	**In lakh fingerlings**
a) Reservoirs	10.11
b) Major Tanks	186.03
c) Minor Tanks	15.52
Total	**211.66**
Estimated Fish Production	**In MTs**
a) Cultured	14,078.60
b) Natural	1,296.88
Total	**15,375.48**

Source: Statistical Bulletin of Fisheries 1998-99, Directorate of Fisheries, Government of Karnataka

(16) Industries

In its industrial sector, Tumkur has been rated as industrially backward district in the State. There are no inscriptions that speak about the existence of large-scale industries either during ancient days or during the medieval period. But for one cement factory, which came up couple of decades ago and the recently established watch factory, the district does not have any large-scale industries. Reference can be made about the gold mining works at Ajjenahalli and Bellara villages, which was closed due to heavy loss in further exploration of gold. The availability of limestone, clay and sand in large quantities prompted the State Government to set up a factory at Ammasandra village in Turuvekere taluk. The plan of setting up a cement factory was assigned to the private sector and the factory by name Mysore Cements Ltd., came up in the year 1958. The H.M.T. Watch Factory at Tumkur was established in the year 1978. The establishment of this prestigious factory in the district has provided the much-needed boost to the industrial economy of the district. Apart from these two major industries, Tumkur has couple of medium size industries and large number of small-scale industries. Groundnut has all along provided the necessary base for the working of numerous oil mills in different parts of the district. The district is also known for rice mills, saw mills and wood based industries. The other small scale industries in the district include automobile body building units, printing presses, match industries, carpentry, blacksmith, manufacturing of domestic utensils, soap-making, bricks and tiles beedi making, Slate pencil units, ribbon

manufacturing and other small scale industries. Among the village and cottage industries, a special mention may be made of handloom weaving, pottery, leather stitching, etc. Cotton, silk and woollen weaving are prevalent to an almost equal extent. Tumkur is known for its Sericulture. Mulberry cultivation and silk worm rearing are practiced as a subsidiary occupation by a considerable number of farmers especially in Kunigal taluk. This taluk occupies a pride of place as a seed area for the pure Mysore race of silkworms. As per the latest statistics, the number of factories registered under the factory act and the total number of person employed stood at 176 and 12,813 respectively. The taluk–wise details of factories registered for the year 1998-99 is given below. The taluk wise details are given below:

MAJOR FACTORIES FOR THE YEAR 1998-99

Name of Taluk	Number of Factories in the District					No. Employed
	Textiles	Chemicals	Engineering	Others	Total	
1	2	3	4	5	6	7

(17) Trade and Commerce

Banking has been an important economic activity in the district for the last seven decades and has attracted a considerable amount of capital by way of deposits. With the gradual growth of industry, trade and commerce, more and more branches of various commercial banks came into existence in the district in all the important industrial and commercial centres. Way back in 1906, Town co-operative Bank established at Sira, marked the beginning of modern banking system in the district. Similarly in 1909, one more co-operative bank at Chikknayakanhalli was opened. The era of commercial banking system began in the year 1913-14, when branches of Mysore bank were started in Tiptur and Tumkur. This paved the way for other banking establishments to start their business in the district. The district by now has 138 commercial banks, 48 Regional Rural Banks, 14 Urban Co-operative Banks, 19 other co-operative banks and 10 Primary Land Development banks at the rate of one per taluk. The taluk wise details of various banks in the district can be seen in the following table.

BANKS IN THE DISTRICT

Name of Taluk	Number of Banks as on 31.03.1999				
	Commercial Banks	Regional Rural Banks	Urban Co-op Banks	Other Co-op Banks	Primary Land Development Bank
1	2	3	4	5	6

Source: Tumkur District at a Glance 1998-99, District Statistical Office, Tumkur

Trade and commerce substantially contributed to the economy of the district. Tumkur, Tiptur, Sira and Madhugiri are the prominent business centres. Tiptur is famous for its copra market and enjoys the distinction of having the earliest regulated market of the district. It was established in the year 1949. Besides copra and coconut, the other commodities covered under the regulations are Seegu (coco-palm fronds and the broomsticks made out of their reeds), jaggery and oil seeds. Tumkur Regulated market came into being in 1952 and this covers the commodities like groundnut, arecanut, tamarind, gur, soap-nuts, edible and non-edible oil seeds, cereals and pulses. The next market to be established in the district was in the year 1956 at Sira. Setting up of markets in the district continued in the following years and the statistics for the year 1999 reveals that totally there are 31 markets with the total turnover of Rs. 23920 lakhs. Except in Koratagere taluk, in all the other taluks, these markets are functioning to service the needs of the farmers and traders. The taluk wise details regarding the number of co-operative societies and Regulated markets can be seen in the following table.

NUMBER OF CO-OPERATIVE SOCIETIES IN THE DISTRICT

Name of Taluk	Co-operative Societies					Liquidated	Regulated Markets			Turn over

(18) Transport and Communication

During the early years of 18th century, the transport and communication sector in the district did not contribute much to the economy. It was between 1870 and 1909, when the district witnessed a change in the means of transport and communication. During this period, roads connecting different parts of the district were laid and opened for public movement. These roads were well maintained by the government. It was during this period, even the railways saw a new beginning. The railway line from Bangalore to Tumkur was opened for traffic in August 1884. The railway line which connects Bangalore with Pune and Bombay on the one hand and Bhadravati and Shimoga on the other hand covers a distance of 97 Kms in Tumkur district. It passes through Gubbi, and Tiptur. This line also passes through Ammasandra, which has assumed importance due to setting up of cement factory. Not only the railways, the transport and communication by road have also seen stages of improvement. The roads in the district are classified as National Highway, State Highway, District major roads, other district roads, village roads, T.D.B. roads, Forest roads, Irrigation Department roads and Municipality roads. The latest statistics point out that the total road length up to the year 1998-99 runs to 9,618 Kms.

There are two national highways passing through the district. The Bangalore –Pune national highway passes through Tumkur and Sira, while Bangalore Mangalore national highway passes through Kunigal. The total length of the National Highway Sum upto 105 kms in the district. Almost all-important centres including the small towns enjoy good road transport facilities. The taluk wise details a railway length and road transport is given in the following table.

ROAD TRANSPORT IN THE DISTRICT

Name of Taluk	Length of Roads in kms.										Major Bridges
	National Highways	State Highways	District Major Roads	Other District Roads	Village Roads	TDB Roads	Irrigation Dept. Roads	Municipal Roads	Panchayat Roads	Total Roads

In the field of Post and telegraph there has been a gradual expansion since 1890 and the progress achieved since independence is remarkable. The district has 570 post office and Telegraph Offices. The first telephone exchange in the district was opened in the year 1955 with 75 connection. Over the decades the number of telephone exchanges and connections have increased and at the end of 1998-99, there are 98 telephone exchanges with 38,683 connections. The taluk wise details can be seen in the following table.

COMMUNICATION FACILITIES IN THE DISTRICT

Name of Taluk	Communication Facilities

(19) Electricity and Power

Karnataka has a place of pride in the history of power generation in the country. KPTCL – Karnataka Power Transmission Corporation Limited (erstwhile KEB) is mainly vested with the functions of transmission and distribution of power in the entire state. The Corporation has been attaching great importance to electrification of villages and hamlets, tribal colonies and harijan basthis and energisation of irrigation pumpsets. Besides, this with a view to benefit weakest among the section of society schemes called Bhagya Jyothi / Kutir Jyothi have been introduced.

Statement given below shows talukwise number of villages electrified and talukwise energisation of IP sets as on 31.3.1999 in Mandya district.

TALUKWISE NUMBER OF VILLAGES ELECTRIFIED AND ENERGISED IP SETS AS ON 31.3.1999

(v) CENSUS CONCEPT

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multistoreyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multistoreyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard, by definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. But if such hostels/ hotels have out houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in nonagricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multimember households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mantaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the

Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In respect of Karnataka State the Scheduled Castes and Scheduled Tribes as contained in the Scheduled Castes & Scheduled Tribes Orders (Amendment) Act, 1976 are valid for the purpose of Census of India, 2001. With the promulgation of Act 39 of 1991 however, the sub entries Naik, Nayak, Beda, Bedar and Valmiki were added under the main entry at S.No. 38 (Naikda, Nayaka, …..) of the Scheduled Tribes list of the State. There are in all 101 Scheduled Castes and 49 Scheduled Tribes in the State which are listed below:

Language and Mother tongue

As per the Census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if she or he is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator.

Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betelnuts (areca).

Agricultural labourer

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. A person who has been engaged in the in the economic activity like above is termed as Household Industry Worker.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as an 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1,000 males in a population.

(vi) NON-CENSUS CONCEPTS

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open

surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a subsoil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear female population of the same age group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear married female population of the same age group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{Number of live births in a year}$$

$$GFR = \frac{\text{Number of live births in a year}}{\text{Midyear female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Midyear married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Midyear population of the same age group}} \times 1{,}000$$

q_1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2

Probability of dying between birth and age 2.

q_5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U_5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during The year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neonatal mortality rate and Post neonatal mortality rate. The neonatal mortality rate also comprises of two parts viz., early neonatal mortality rate and late neonatal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Perinatal mortality rate (PMR)

Number of stillbirths plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant

iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/ Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000-4,999,999); M5 (1,000,000-1,999,999); M4 (500,000-999,999); M3(300,000-499,999); M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its Distribution:

(a) Distribution of population in Rural-Urban Areas:

According to the 2001 Census, the total population of Tumkur district is 2,584,711 comprising 1,313,801 males and 1,270910 females. The population of the district forms 4.9 percent of the state population and ranks at 5th place among the districts. Out of the total population of the district 80.4 percent lives in rural areas while 19.6 percent lives in urban areas. Rural population of the district is distributed among 10 taluks and urban population spread over in 11towns. The total urban population in the district is 507,202 persons comprising 261,688 males and 245,514 females. The total rural population in the district comes to 2,077,509 persons and is composed of 1,052,113 males and 1,025,396 females as per 2001 Census. This rural population is distributed in 2574 inhabited villages and there are 134 un-inhabited villages in the district.

(b) Size-class and Civic Status of towns:

The Statement below gives the position and number of urban units according to size-class of population as per 2001 Census:

SIZE-CLASS AND CIVIC STATUS OF TOWNS

Serial number	Size-Class of town	Name and civic status of town		Urban Population		
				Persons	Males	Females
1	2	3		4	5	6
1	III	Chiknayakanhalli	TMC	22,389	11,209	11,180
2	II	Sira	TMC	50,088	25,855	24,233
3	III	Pavagada	TP	28,068	14,416	13,652
4	III	Madhugiri	TMC	26,304	13,550	12,754
5	IV	Koratagere	TP	13,655	6,929	6,726
6	I	Tumkur	CMC	248,929	129,273	119,656
7	IV	Gubbi	TP	16,805	8,635	8,170
8	II	Tiptur	TMC	53,104	27,301	25,803
9	IV	Turuvekere	TP	13,281	6,851	6,430
10	VI	Adityapatna	CT	4,236	2,180	2,056
11	III	Kunigal	TMC	30,343	15,489	14,854

Population Growth, Density and Sex-ratio:

Population Growth:

Tumkur District witnessed a positive growth rate in each decade with 10.0, 5.1,11.1, 10.7,20.5,18.8,19.0,21.5, 16.6 and 12.1 percent during the period 1901 to 2001. According to the 1991 Census the total population of the district was 2,305,819. There has been net addition of 278,892 persons during 1991-2001. The decadal growth rate of the district comes to 12.1 percent. The growth rate for the rural and urban areas of the district is 8.0 and 32.7 percent respectively.

Density:

The population density of Tumkur district is 244 persons per Sq. Km. against the state average of 276 persons. At taluk level, the density varies between 168 persons in Chiknayakanhalli taluk and 510 persons in Tumkur taluk. In rural areas it comes to 198 persons per Sq. Km., while in urban areas it comes to 4,111 persons. In urban areas, the density of population varies between 3,288 persons in Madhugiri town and 11,379 persons in Koratagere town.

Sex Ratio:

There are 967 females for every one thousand males in Tumkur district. The sex-ratio figures for rural areas and urban areas of the district are 975 and 938 respectively. It is also observed that, the proportion of females in rural areas is higher than that of urban areas. Sex-ratio in the age-group 0-6 comes to 949 girls per 1,000 boys in the district as a whole. In rural areas, this proportion is 950, while in urban areas the sex-ratio of Child population works out to 946 girls per 1,000 boys.

Work Participation Rate:

The work participation rate is defined as percentage of total workers to total population. According to 2001 Census, the total workers including main and marginal workers constitute 51.0 percent of total population of the district. Of the total workers, the share of main workers is 79.8 percent and marginal workers is 20.2 percent. The remaining 49.0 percent of population belongs to the category of non-workers.

As per 2001 Census among the main workers male participation rate in the district is 91.3 percent and corresponding proportion of females is 62.4 percent. The proportion of female marginal workers is higher than male marginal workers, as the females are attending to one or more economic activities in addition to their household duties to improve the family income. Majority of the workers are engaged in agricultural activities. Of the total 1,316,939 workers in the district, 45.7 percent of these total workers are categorized as cultivators, 23.8 percent agricultural labourers,4.6 percent in household industries and 25.8 percent in other services.

Literacy:

A person who can read and write in any language is considered as literate in Census. All children of age below 7 years are treated as illiterate.

As per 2001 Census, Tumkur district has reported 1,525,485 persons as literates constituting 67.0 percent of the total population excluding the population of 0-

6 years. The male and female literacy rates in the district are 76.8 and 56.9 percent respectively. The literacy rate of males is higher than that of females. The gap in the male - female literacy rate is 19.9 in the district.

The total literacy rates of rural and urban area are 63.4 and 81.8 percent respectively. The male and female literacy rates in rural areas are 74.2 and 52.3 percent respectively. In urban areas these rates are 86.9 and 76.3 percent respectively. The gap in male - female literacy rates in urban areas is 10.6 as against 21.9 in rural areas. It is thus clear that females are better educated in urban areas than their counterparts in rural areas.

(c) Scheduled Castes and Scheduled Tribes Population 2001:

Of the 2,584,711 total population of the district 18.2 percent of the total population belong to Scheduled Castes and 7.5 percent to Scheduled Tribes. The percentage of Scheduled Castes constitute 79.8 percent in rural areas and 20.2 percent in urban areas. The proporation of Scheduled Tribes is 92.4 and 7.6 in rural and urban areas respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36

Following tables, which presents the data on population within the district, with a brief notes will provide an overview of the district.

TABLE 1:DECADAL CHANGE IN POPULATION OF TALUKS BY RESIDENCE, 1991-2001

Taluk	Population						Percentage decadal variation 1991-2001			Percentage Urban Population	
	1991			2001							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12
Chiknayakanhalli	1,93,419	1,75,756	17,663	209,622	187,233	22,389	8.38	6.53	26.76	9.13	10.70
Sira	2,55,235	2,21,842	66,696	301,473	251,385	50,088	18.12	13.32	50.00	13.08	16.60
Pavagada	2,12,768	1,83,976	28,792	246,255	218,187	28,068	15.74	18.60	-2.51	13.53	11.40
Madhugiri	1,45,600	2,23,772	21,828	265,884	239,580	26,304	8.26	7.06	20.51	8.89	9.90
Koratagere	1,45,560	1,34,029	11,531	160,952	147,297	13,655	10.57	9.90	18.42	7.92	8.50
Tumkur	4,26,137	2,46,260	1,79,877	516,661	267,732	248,929	21.24	8.72	38.39	42.21	48.20
Gubbi	2,31,615	2,17,801	13,814	256,413	239,608	16,805	10.71	10.01	21.65	5.96	6.60
Tiptur	1,95,826	1,59,773	36,053	217,124	164,020	53,104	10.88	2.66	47.29	18.41	24.50
Turuvekere	1,64,609	1,48,629	15,980	174,297	156,780	17,517	5.89	5.48	9.62	9.71	10.10
Kunigal	2,35,050	2,11,818	23,232	236,030	205,687	30,343	0.42	-2.89	30.61	9.88	12.90
District Total:	**23,05,819**	**19,23,656**	**3,82,163**	**2,584,711**	**2,077,509**	**507,202**	**12.10**	**8.00**	**32.72**	**16.57**	**19.60**

Data given in Table 1 reveals the taluk wise decadal variation of population in the district. During the decade 1991-2001, the variation is observed to be 12.1 per cent. Taluk-wise decadal change indicates that a highest of 21.24 per cent is reported from Tumkur taluk and the lowest of 0.42 per cent is reported from Kunigal. The observed variation is negative in case of Kunigal rural and Pavagada urban areas. The percentage of urban population in 2001 has grown comparatively by 3.03 per cent.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

There are 436 villages in the district having population of less than 200. Also 689 villages have 200-499 population, 790 villages have the population ranging between 500-999 and the population in 471 villages ranging between 1,000-1,999. The population size of 2000 and above is being reported in less number of villages.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS

		Name of Town
(a)	New	
	(i) Statutory Town	**NIL**
	(ii) Census Town	**NIL**
(b)	Denotified	
	(i) Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as Census towns.	**NIL**
	(ii). Statutory towns of 1991 Census denotified but identified as Census towns based on demographic and economic criteria	**NIL**
	(iii) Census towns of 1991 Census are notified as Statutory towns in 2001 Census	**1. Pavagada (MP)** **2. Koratagere (MP)** **3. Gubbi (MP)** **4. Turuvekere (MP)**
(c)	Declassified	**1. Y,N.Hosakote (MP)**
(d)	wholly merged with other towns	**NIL**

Declassified means the census towns of 1991 Census, which fail to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	82	3.2	1,946	0.1
11-20	54	2.1	3,879	0.2
21-50	132	5.1	18,929	0.9
51-100	245	9.5	99,679	4.8
101-200	746	29.0	519,826	25.0
201-300	653	25.4	611,088	29.4
301-500	471	18.3	486,798	23.4
501 +	191	7.4	335,364	16.1
Not known	0	0.0	0	0.0
District Total:	**2,574**	**100.0**	**2,077,509**	**100.0**
Population Density (Rural) of the district:		**204.4**		

Distribution of villages by population density and ranges are presented in the above table. For most of the villages, the population density per sq. km falls within the ranges 101-200 and 201-300. Some 513 villages have the density less than 100 per sq. km. There are 662 villages that have the density above 300 persons per sq. km.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT 1901-2001

State				District			
Census Years	Total	Rural	Urban	Census Years	Total	Rural	Urban
1	2	3	4	5	6	7	8
1901	983	984	976	1901	985	984	1,000
1911	981	984	960	1911	977	978	960
1921	969	975	936	1921	958	960	933
1931	965	972	927	1931	962	966	914
1941	960	965	935	1941	951	954	911
1951	966	974	941	1951	958	963	915
1961	959	973	913	1961	956	962	903
1971	957	971	913	1971	957	964	901
1981	963	978	926	1981	961	969	912
1991	960	973	930	1991	959	972	893
2001	964	977	942	2001	967	975	938

The above table gives the sex-ratio for the rural and urban population of the state as well as that of the district from 1901 to 2001 census.

It is observed that the state has recorded a decrease in the sex-ratio since 1901 census (983). However in 2001 census, the state has registered a better sex-ratio of 965 little higher than the ratio of 1991 Census (960).

For the district, the sex-ratio in 1901 Census was 985, which with some fluctuations, gradually decreased over the decades. However, in 2001 Census, the district has recorded a sex-ratio of 967 better than that of 1991 Census 959. It is also observed that the sex-ratio in 2001 Census for the district (967), is slightly more than that for the state (965).

Again, the ratio for the rural women in 2001 Census is comparatively better than, that for the urban women in the state as well as in the district.

TABLE 6 : SEX RATIO BY TALUKS, 2001

Sl. No.	Name of Taluk	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Chiknayakanhalli	986	984	997
2	Sira	961	966	937
3	Pavagada	958	959	947
4	Madhugiri	965	967	941
5	Koratagere	966	966	971
6	Tumkur	925	925	926
7	Gubbi	977	979	946
8	Tiptur	977	988	945
9	Turuvekere	1,001	1,008	940
10	Kunigal	1,024	1,034	959
	District Total:	**967**	**975**	**938**

Sex ratio for the district shows 967 females per 1,000 males. The ratio for the rural area is 975 and for urban it is 938. The ratio for the rural area is 975 and for urban it is 938. The ratio is favourable for men both in rural and urban areas. Taluk-wise comparison reveals that in Turuvekere and Kunigal, the reported ratio favours women.

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Sl. No.	Name of C. D. block	Sex ratio
1	2	3
1	Chiknayakanhalli	984
2	Sira	966
3	Pavagada	959
4	Madhugiri	967
5	Koratagere	966
6	Tumkur	925
7	Gubbi	979
8	Tiptur	988
9	Turuvekere	1,008
10	Kunigal	1,034
	District (Rural) Total:	**975**

This table highlights the data on sex ratio by C.D. blocks, which includes all the villages in the district. The ratio is favourable for men in the rural district. However, block wise comparison points out that in Turuvekere and Kunigal blocks, the ratio favours women.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	53	2.1	10,021	0.5
700-749	11	0.4	1,917	0.1
750-799	36	1.4	7,033	0.3
800-849	72	2.8	20,363	1.0
850-899	173	6.7	98,081	4.7
900-949	502	19.5	464,942	22.4
950-999	647	25.1	756,494	36.4
1,000-1,099	841	32.7	627,484	30.2
1,100+	239	9.3	91,174	4.4
District Total:	**2,574**	**100.0**	**2,077,509**	**100.0**
Sex ratio (Rural) for District:		**975**		

The sex ratio of rural population by ranges is given with corresponding numbers of villages. Though the overall sex ratio of rural population as given above works out to 975, the ratio for the villages by ranges reveals that there are 1,080 villages which have the sex ratio above 1,000 favouring women to the rural areas.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Chiknayakanhalli	TMC	997
2	Sira	TMC	937
3	Pavagada	TP	947
4	Madhugiri	TMC	941

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
5	Koratagere	TP	971
6	Tumkur	CMC	926
7	Gubbi	TP	946
8	Tiptur	TMC	945
9	Turuvekere	TP	939
10	Adityapatna	CT	943
11	Kunigal	TMC	959
Sex ratio Urban for the district:			**938**

Data on urban sex ratio is presented for the district on the above table with reference to urban agglomeration/town, the sex ratio for the district urban is 938. The sex ratio is above the district urban figures in 9 taluks and is highest in Chiknayakanhalli T.M.C. i.e. 997 followed by Koratagere T.P. (971). The lowest sex ratio of 926 is registered in Tumkur (CMC), followed by 937 in Sira T.M.C.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TALUKS, 2001

		Urban	**60,013**	**30,844**	**29,169**	**946**

Variations in child sex ratio have been a long observed phenomenon and have undergone considerable debate among the researchers and policy makers from time to time. Although the observed variations in the ratio, favouring the males is a biological fact, continued decline over the periods causes great concern among the policy makers. The taluk wise sex ratio for 0-6 population is given in the above table, which reveals that there are 949 girls per 1,000 boys. Chiknayakanahalli urban is the only area where girls outnumber boys. In all the other places both in rural and urban areas, the ratio favours boys.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Chiknayakanhalli	21,901	11,144	10,757	965
2	Sira	31,771	16,358	15,413	942

900-949	227	8.8	34,312	13.8
950-999	164	6.4	27,717	11.2
1,000-1,099	459	17.8	51,698	20.8
1,100+	664	25.8	43,499	17.5
District (Rural) Total	**2,574**	**100.0**	**248,149**	**100.0**
Sex ratio (Rural) for District:		**950**		

The sex ratio of rural population in the age group 0-6 is presented by ranges in table 12. It is worth noting that a good number of 395 villages have the child sex ratio less than 700. At the same time, though the overall child sex ratio for the rural district stands at 950, some 1,123 villages have recorded the ratio above 1,000 favouring the girl children, covering 38.3 percent of the population.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Taluk wise Scheduled Castes (SC) and Scheduled Tribes (ST) population are given in the above table. The total SC and ST population in the district is 474,044 and 193,819 persons respectively. The percentage of Scheduled Castes to total population is 18.3 and Scheduled Tribes accounts for 7.5 per cent.

Similar analysis is presented by C.D. block-wise in table-15 which includes only the rural areas in the district. The Scheduled Castes and Scheduled Tribes constitute 19.8 and 8.2 per cent to total population. The highest of 28.4 per cent of Scheduled Castes and 16.8 per cent of Scheduled Tribes are reported from Pavagada block.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

	District (Rural) Total:	**2,077,509**	**411,747**	**169,930**	**19.8**	**8.2**

The proportion of Scheduled Castes population in the villages is given by ranges in table-16. There are 468 villages in the district, which do not have Scheduled Castes population. Villages having population above 40 per cent is very less in the district. It actually covers 9.9 per cent of the villages in the district. Of the other ranges, 23.4 per cent and 16.0 per cent of the villages have 11-20 and 21-30 per cent of Scheduled Castes population in each village.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	468	18.2	0	0.0
Less than 5	265	10.3	4,023	1.0

51-75	53	2.1	16,905	9.9
76 and above	27	1.0	7,007	4.1
District Total	**2,574**	**100.0**	**169,930**	**100.0**

The table indicates the proportion of Scheduled Tribes population by ranges in the villages. Data reveals that 1,136 villages do not have Scheduled Tribes population. Even among the villages that have Scheduled Tribes, majority of them has less than 5 percent and it numbers to 516 villages in the district. It is also observed that 327 and 310 villages have 5-10 and 11-20 per cent of the tribes in each village.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Chiknayakanhalli (TMC)	22,389	2,207	964	9.9	4.3
2	Sira (TMC)	50,088	7,829	1,998	15.6	4.0
3	Pavagada (TP)	28,068	4,714	3,902	16.8	13.9
4	Madhugiri (TMC)	26,304	3,908	2,632	14.9	10.0
5	Koratagere (TP)	13,655	2,029	2,199	14.9	16.1
6	Tumkur (CMC)	248,929	29,155	9,512	11.7	3.8
7	Gubbi (TP)	16,805	2,122	709	12.6	4.2
8	Tiptur (TMC)	53,104	5,078	1,347	9.6	2.5
9	Turuvekere (TP)	13,281	1,713	274	12.9	2.1
10	Adityapatna (CT)	4,236	315	129	7.4	3.0
11	Kunigal (TMC)	30,343	3,227	223	10.6	0.7
	District(Urban) Total	**507,202**	**62,297**	**23,889**	**12.3**	**4.7**

The above table indicates the total urban population and percentage of scheduled Castes and Scheduled Tribes in the district. It can be seen from the table that the Scheduled Castes constitute 12.3 per cent of the total population whereas Scheduled Tribes constitute 4.7 per cent. Among the towns, Pavagada (TP) has the highest of 16.8 percent of Scheduled Castes and Koratagere (TP) has 16.1 per cent of Scheduled Tribes, which is the highest among the towns.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Chiknayakanhalli	973	982
2	Sira	960	974
3	Pavagada	949	961
4	Madhugiri	956	963
5	Koratagere	959	963
6	Tumkur	960	942
7	Gubbi	973	976
8	Tiptur	1,013	973
9	Turuvekere	996	997
10	Kunigal	1,051	952
	District (Rural) Total	**971**	**966**

The sex ratio of Scheduled Castes and Scheduled Tribes in the C.D. blocks is 971 and 966 respectively. Although the sex ratio of Scheduled Castes favours men in the district, block wise analysis points out that in Tiptur and Kunigal, the ratio favours women. On the other hand, the sex ratio of Scheduled Tribes favours men in all the C.D. blocks.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Chiknayakanhalli (TMC)	972	920
2	Sira (TMC)	923	932
3	Pavagada (TP)	967	949
4	Madhugiri (TMC)	865	910
5	Koratagere (TP)	1,037	958
6	Tumkur (CMC)	911	924
7	Gubbi (TP)	987	948
8	Tiptur (TMC)	956	944
9	Turuvekere (TP)	985	957
10	Adityapatna (CT)	1,006	1,263
11	Kunigal (TMC)	974	1,009
	Sex ratio (Urban) for the district:	**931**	**935**

The overall sex ratio of the Scheduled Castes and Scheduled Tribes in the towns of Tumkur district is 931 and 935 respectively. The reported ratio favours Scheduled Castes women in Koratagere (TP) and Adityapatna (CT). With regard to Scheduled Tribes, the highest of 1,263 females per 1,000 males is registered in Adityapatna (CT) and 1,009 in Kunigal (TMC).

As per 2001 census, Tumkur ranks 12th place among the districts literacy rate. The literates are more in urban than in rural areas. Male literates out number females in the district. Among the taluks Tumkur and Tiptur has registered highest percent of literates. The gap in male-female literacy rate is 19.8 per cent and this gap is more in Pavagada taluk where it is registered as 24.6 per cent.

In table-22 the percentage of literates by C.D. blocks in the district accounts for 63.4 per cent, where male and female literacy rate accounts for 74.2 and 52.3 per cent respectively. Among the C.D. blocks the highest literacy rate of 72.5 per cent is reported from Tiptur. Gender-wise distribution also indicates the highest percent of literates being observed in Tiptur block. The gap in male-female literacy rate is 22 per cent in the district and it ranges between 19.1 per cent and 25.7 per cent among the C.D. blocks.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

The above table provides sex-wise as well as taluk wise distribution of main workers, marginal workers and non-workers in the district as per 2001 census. Percentage of total workers in the district accounts for 51 percent. Among the taluks workers percentage is high in Koratagere where the total works out to 56.3 percent. In the same taluk, female workers are high compared to other taluks in the district. Male workers in Tiptur taluk constitute more in terms of percentage where it is reported to be 63.5 percent. About 49 percent of the district's population are non-workers and this percentage is more in Tumkur taluk.

The data presented in this table is for C.D. blocks which includes only the rural population of the district. Data reveals that total workers including main and marginal workers constitute 54.3 per cent and non-workers accounts for 45.7 per cent. The total male and female workers figures out to be 61.6 and 46.8 per cent respectively. Among the C.D. blocks, total workers are high in Koratagere block and non-workers are found more in Turuvekere and Chiknayakanahalli blocks.

This table provides sex-wise distribution of workers by category for the urban areas of the district. The percentage of total workers in urban areas constitute 37.3 per cent. The statistics on town area points out that female working population is very less where it is 18.7 per cent. Of this most of them are engaged in main work. Adityapatna (CT) has registered as low as 9.4 per cent of female workers in the district. The statistics given above also points out that number of non-workers in the towns is as high as 62.7 per cent in the district.

Note: Percent of Worker to total worker are given in brackets

The distribution of total workers by sex according to four industrial categories is highlighted in this table. As seen from the table, agricultural labourers and cultivators constitute 69.5 per cent of the total workers in the district. The people who are engaged in other type of work accounts for 25.8 per cent. The data above reveals that agricultural activity is still predominant in Gubbi taluk where 81.7 per cent of them are engaged in this activity. An equally higher proportion is also reported from Koratagere, Madhugiri, Pavagada, Kunigal and Turuvekere.

Note: Percent of Worker to total worker are given in brackets

The distribution of workers by economic activity is presented for the C.D. blocks of the district which includes only the rural portion. The same trend as seen in taluk-wise distribution is observed in this table too. If only rural areas are taken into consideration, the percentage of cultivators and agricultural labourers are higher than as reflected in taluk-wise distribution. The above distribution also points out that agricultural activity is predominant in Gubbi block where 84.7 per cent of them are involved in this activity and in rest of the blocks it is more than 70 per cent.

The sex-wise distribution of workers by economic activity is presented for the urban agglomeration/ towns in the district. Total number of workers including main and marginal workers constitutes 37.3 per cent. The cultivators and agricultural labourers in the urban area constitute 5.4 and 3.8 per cent respectively. Urban population engaged in other works accounts for 81.1 per cent. Among the towns, 21.7 per cent of urban population from Chiknayakanahalli (TMC) hold agricultural activity as their occupation. The other towns particularly Pavagada (TP), Tumkur (CMC), Tiptur (TMC), Turuvekere (TP), and Adityapatna (CT) are more than 80 percent pre-occupied in other works.

ix) Brief analysis of Village Directory and Town Directory data based on inset tables 37 to 47

Note : - Percentages are given in brackets.

***** Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table highlights the number of villages having different types of amenities. The statistics given above points out to the fact that a good number of villages are not provided with amenities like medical, post office, banks, agricultural credit societies. Power supply is the only facility available to all the villages except one village in Sira block. As far as improved drinking water facility is concerned, though all the villages in the district have one or other source of drinking water, the improved water sources can be taken into account only if the water is supplied through tap or a handpump/tubewell. Accordingly 2,458 villages in the district have improved drinking water facility. Educational facility is available to 86.1 per cent of villages. Access to health care services needs improvement on a larger scale. In all only 14.8 per cent of the villages are privileged to have medical facility. The villages in the district also lacks in financial institutions like banks and agricultural credit societies to cater to the financial needs of the people. Only 6.7 and 9.2 per cent of the villages have banks and agricultural credit societies in the district. Pucca roads can approach about 60.7 per cent of the villages and 61.4 per cent of the villages are connected by transport facility. Post offices and telephone connections are available to 22.1 and 46.3 per cent of the villages.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be consideredaccordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Rural population that are served by different amenities in the villages are given in the above table. It is the power supply, which is available to entire rural population. Next is the improved drinking water and education facility, which is provided to more than 90 per cent of the population. About 73.5 and 76.6 per cent of the population derive the benefits of pucca roads and transportation facilities. Another 65.8 per cent are provided with telephone facility. With regard to other amenities less than 50 per cent of the population are provided with.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5

(b) Co-operative Bank	226	470	1,804	2,500
7. Agricultural Credit Societies	986	1,098	253	2,337

Certain amenities are not available in the village. In such cases data on distance from where these are available in ranges are given in the above table. Except for primary schools, the number of villages not having other facilities runs into thousands. Particularly facilities like degree colleges, hospitals, PHCs, post offices, financial institutions like commercial banks, cooperative banks and agricultural credit societies are not available to more than 2000 villages. However, these are reachable at a distance of less than 5 kms, 5-10 kms and more than 10 kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The villages have been arranged according to the distance in ranges from the nearest statutory town. Majority of the villages are little far from their nearest statutory town. Some 1,079 and 1,326 villages are situated at a distance of 5-15 and 16-50 kms respectively. For 7 villages, the distance could not be specified. The distance from the nearest statutory town to the villages has been correlated with type of amenities available as per 2001 census. Irrespective of the distance villages do not have certain amenities.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The rural population has been arranged with reference to ranges and the different amenities available under each range are given in the above table. Villages having population size ranging between 2,000-4,999, 5,000-9,999 and above 10,000 have most of the facilities. Irrespective of the size of the population, certain amenities like medical, banks and agricultural credit societies are not available within the reach.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable
1	2	3	4	5	6
1	Chiknayakanhalli	221	106,912	63.2	17.1
2	Sira	235	146,367	71.6	20.0
3	Pavagada	145	134,140	67.5	16.7
4	Madhugiri	298	108,404	62.5	26.3
5	Koratagere	236	63,556	65.5	19.8
6	Tumkur	358	94,407	68.0	24.4
7	Gubbi	328	115,105	62.9	25.5
8	Tiptur	227	76,879	68.0	22.1
9	Turuvekere	232	75,964	69.4	22.3
10	Kunigal	294	94,481	58.2	29.7
	District Total:	**2,574**	**1,016,215**	**65.8**	**22.1**

Note : - Cultivable area = irrigated area + unirrigated area

The land use data as per 2001 census presented in the above table takes into consideration only the cultivable area of the rural district. The cultivable area given in the table includes both irrigated and un-irrigated areas. As such the total cultivable area of the rural portion comprises of 65.8 per cent of the total area. Among the C.D. blocks, the highest of 71.6 per cent of the area in Sira block is put under cultivation. If the percentage of irrigated area to total cultivable area is considered, Kunigal block reports a highest percentage of 29.7 per cent to total cultivable area.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)

10	IV Turuvekere (TP)	299.0	70.0	229.0	244.0	144.0	0.0	25.0	0.0	74.0
District Total		**180.0**	**55.0**	**125.0**	**189.0**	**82.0**	**0.0**	**26.0**	**0.0**	**81.0**

The total per capita receipt for the district urban is Rs.180 and the total expenditure is Rs.189. The receipt are mainly from other sources which is Rs.125, whereas through taxes it is a mere Rs.55. The expenditure of Rs.82.0 is spent on general administration, Rs.81 on "others" and Rs.26 on public works. A negligible amount is spent on public health and convenience. Townwise details are provided in the above table.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Chiknayakanhalli (TMC)	7.6	5.4	2.7	1.3	1.3
2	Gubbi (TP)	6.0	4.8	3.0	1.8	0.6
3	Koratagere (TP)	8.1	6.6	2.2	2.2	0.7
4	Kunigal (TMC)	5.3	4.3	2.3	1.3	0.3
5	Madhugiri (TMC)	4.6	3.4	2.3	1.1	0.8
6	Pavagada (TP)	6.4	4.3	3.2	1.1	0.4
7	Sira (TMC)	5.4	3.4	1.6	1.6	0.6
8	Tiptur (TMC)	6.8	4.7	3.0	1.7	0.6
9	Tumkur (CMC)	5.0	4.3	3.0	1.6	0.8
10	Turuvekere (TP)	10.5	9.8	5.3	3.8	1.5
	District Total	**5.7**	**4.5**	**2.8**	**1.6**	**0.8**

Different types of educational institutions per 10,000 population is tabulated in the table. The District Urban total reported 5.7 Primary, 4.5 Junior Secondary/ Middle, 2.8 Secondary/ Matriculation, 1.6 Senior Secondary schools and 0.8 college per 10,000 population. Turuvekere (TP) tops the list having highest ratio of all types of educational institutions per 10,000 populations among all towns. Koratagere (TP) stands second in the list having 8.1 Primary, 6.6 Jr. Secondary/ Middle and 2.2 Sr. Secondary educational institutions. Townwise details are provided in the above table.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Adityapatna (CT)	0
2	Chiknayakanhalli (TMC)	18
3	Gubbi (TP)	18
4	Koratagere (TP)	22
5	Kunigal (TMC)	26
6	Madhugiri (TMC)	19
7	Pavagada (TP)	11
8	Sira (TMC)	6
9	Tiptur (TMC)	17
10	Tumkur (CMC)	15
11	Turuvekere(TP)	23
	District Total	**16**

The number of beds in Medical institutions, in the district urban, is surmised as 16 beds per 10,000 population. Kunigal (TMC) with 26 beds has the highest ratio and the lowest of 6 beds is reported from Sira (TMC).No bed is available in Adityapatna(CT).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Chiknayakanahalli	22,389	5,000	22.3
2	Gubbi	16,805	2,185	13.0
3	Koratagere	13,655	3,000	22.0
4	Kunigal	30,343	6,300	20.8
5	Madhugiri	26,304	10,200	38.8
6	Pavagada	28,068	5,090	18.1
7	Sira	50,088	11,700	23.4
8	Tiptur	53,104	10,979	20.7
9	Tumkur	248,929	21,362	8.6
10	Turuvekere	13,281	2,500	18.8
	District Total	**486,161**	**78,316**	**16.1**

The sum population for the district urban is reported as 16.1 per cent of the total population. Madhugiri (TMC) reported the highest of 38.8 per cent of slum population, and Tumkur (CMC) reported the lowest slum population at 8.6 per cent of the total population of the town.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Adityapatna (CT)	Cement	Cement
2	Chiknayakanhalli (TMC)	Handloom Products	Arecanut
		Beedi	Coconut
3	Gubbi (TP)	Coir Products	Coir Products
		Beedi	Beedi
		Groundnut Oil	Groundnut Oil & Powder

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
4	Koratagere (TP)	Silk Clothes	Groundnut Oil
		Soapnut Powder	Size Stones
		Groundnut Oil	Groundnut
5	Kunigal (TMC)	Groundnut Oil	Silk
		Silk	Beedi
		Beedi	Jaggery
6	Madhugiri (TMC)	Groundnut Oil	Groundnut Oil
		Beedies	Beedies
		Bricks	Rice
7	Pavagada (TP)	Groundnut Oil	Groundnut Oil
		Groundnut Cake	Groundnut Cake
			Groundnut
8	Sira (TMC)	Beedi	Beedies
		Plastic	Groundnut Oil
		Silk	Blankets

	Median number of rooms	**2**	**2**	**2**	**1**	**1**	**2**	**1**	**1**	**2**

The above table gives the distribution of households by tenure status and the number of dwelling rooms occupied by them. The data presented in this table is for the general as well as Scheduled Caste and Scheduled Tribe population. It can be seen that households dwelling in more than one room constitute more in number than households with 'no exclusive room'. The table also highlights the households living in their own structure is comparatively more than the rented accommodation and other type of tenure status. Majority of the households has either one or two rooms. The median number of rooms is 2 for the district, it is one in rural areas and 2 in urban areas for both Scheduled Caste and Scheduled Tribes.

The above table gives the percentage distribution of households living in the houses defined as per census concept in the district. The census houses occupied by the households for fully and partly residential purpose have been classified into permanent, semi-permanent and temporary. House holding in permanent structures is many in both in the rural as well as in the urban areas. Semi-permanent and temporary structures are found more in rural areas and in urban it constitutes only 2.9 and 0.9 per cent.

TABLE 50 : NUMBER AND PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Percentage of households having improved drinking water sources, electricity, bathroom, toilet and proper drainage facility will throw light on the living conditions of the people. Improved drinking water is available to 96.9 per cent of the households. Electricity and bathroom is provided to 79.9 and 64.5 per cent of the households. Drainage and toilet facility is available to less than 50 per cent of the households. The rural-urban composition reveals that urban households have more accessibility to these facilities than rural households. Wide variations in terms of percentages are seen in respect of toilet and drainage facilities.

The table above provides data on households using different types of fuel for the purpose of cooking. The rural areas of the district, about 92.1 per cent of households depend on firewood with 3.8 per cent using crop residue and only 2.4 per cent use LPG. The usage of other types of fuel is negligible. Almost equal proportion of households in urban areas, use both firewood and LPG for cooking purpose and a good percentage of 16.8 use Kerosene. The data is provided talukwise for the district.

Table No.52 provides data on households availing banking facility and households possessing specified assets. The percentage of households in the rural areas of the district having access to banking facility is 24.2 whereas in urban areas, the percentage is 47.7. While in rural areas, most of the households possess radio or transistor (43.0 per cent), only 20.3 per cent of them have access to television. On the contrary, most of the households urban areas of the district (61.8 per cent) have access to television and 51 per cent possess radio/ Transistor. While in both rural and urban areas, a good percentage of households possess bicycle, only 7.7 per cent of household's in rural areas possess Scooter/ Moped/ Motorcycle, whereas this percentage for urban areas is 26.3. The percentage of households having Car/ Jeep/ Van is less for both the areas. In urban areas, while 24.3 per cent of household's have access to telephone facility, only 3.9 per cent of households in rural areas have this facility. Nearly 40.5 per cent of households in rural areas and 22.5 per cent

of them in urban areas do not have access to any of the specified assets. The data is provided taluk wise for the district.

(xi) Archaeology

Places of archaeological importance in the district are many. These places can be divided and analysed as pre-historic archaeological sites and the remains of the later period. As regards the pre-historic archaeological importance, couple of sites has been unearthed at Kibbanahahalli and Biligere of Tiptur taluk. In these sites, palaeolithic specimens have been discovered. Of these two sites, Kibbanahalli is considered to be the most important due to the fact that large collection of antifacts have been obtained from this site. Further, around this site, inexhaustible supply of intensely jointed quartzite, and the raw materical used by palaeolithic man for making his tools have been found. Implements like hand-axes on cores, cleavers of varied shapes, beaked implements, choppers and other chopping tools, scrapers such as end-scrapers, side-scrapers, hollow-scrapers, etc., fabricators and cores have been obtained from the site. The only megalithic site that has been discovered is located at the low range of hills, which begins at Kibbanahalli and run along northwards of Chiknayakanahalli. Apart from these sites, not much can be said about the pre-historic archaeological interest in the district. However, the archaeological remains of the later period are many and can be broadly classified into temples, forts, muslim monuments and other remains.

Temples of archaeological importance are many in the district. All the structures were built according to Hoysala, Vijayanagara and Dravidian styles. The most earliest temples are found at Nonavinakere which is an ancient village, its name being derived from its large and highly useful tank originally known as Nanabanakere. The architectural evidences of some of the shrines at this place prove that it dates back to 10th century A.D. Most important temples of the place are Venugopala or Gopalaswamy and Beteraya, which belong to Hoysala and Vijayanagara periods. Of the other temples in the district, Channakeshava temple at Aralaguppa in Tiptur taluk, Channakeshava and Kedareshwara temple at Nagalapura in Turuvekere taluk are worth mentioning. These are protected monuments and come under the administrative control of the Archaeological Survey of India. There are number of ancient forts in the district. Majority of them belongs to the Hoysala period and some of them were reconstructed by Haidar Ali and Tipu Sultan of Mysore. Important among them are forts of Madhugiri, Midigeshi, Pavagada, Nidugal, Koratagere, Devarayanadurga, Channarayanadurga, Huliyurdurga, Hutridurga and Sira. Of the many forts mentioned above, Madhugiri is considered to be one of the finest forts in Southern Karnataka. It was constructed in 15th century A.D. It was later rebuilt by Haidar Ali. The most interesting feature of this structure is that it is built on a huge rock on a high hill that has several gates leading to the top of the hill. Also there are number of springs within the fort and these reservoirs are provided with steps built with bricks. It is a protected monument and comes under the administrative control of Archaeological Survey of India. The district is also known for major Muslim monuments where most of them are found at Sira, which was once the headquarters of a province first under the Mughals, then under the Bijapur kings and finally under Haidar Ali and Tipu Sultan. The Jumma Masjid and Darga of Malik Rihan are fine structures. It is said that the Masjid was constructed in 1696 A.D. and the Darga in 1651. Both the monuments are protected and come under the control of the Archaeological Survey of India. Various noted wells of Madhugiri, large number of hero and sati stones, the caves and cave temples found mostly on the hills are the other remains which draws attraction from all around.

xii) Brief description on places of religious, historical or archaeological and tourist importance in villages and places of tourist interest in the towns of the district

Dabbeghatta (Chiknayakanhalli Taluk): The village has a Trikutachala temple, which belongs to the 13th century A.D. The three cells enshrine three lingas the names of which have been mentioned as Hoysaleshvara, Brahmeshvara and Macheshvara in one of the inscriptions discovered near this temple. However the temple is now known as Mahalingeshvara temple. The village contains a number of tombs of bulls, which were dedicated to the local temples in the past. The local Marula Siddeshivara temple is also of some importance.

Doddabidare (Chiknayakanhalli Taluk): The Ishwara temple at this place has, in its navaranga,

several figures such as Saraswati, Mahishasuramardhini, Umamaheshvara etc., among which a two- armed durga and a fine Naga stone deserve special notice. The main object of worship in the Pate Linga temple is 101 small stones of irregular shape each representing a Linga. In front of this temple there is an open mantapa containing a rough stone which is pointed as the pate (that is patala) Linga.

Godekere (Chiknayakanhalli Taluk): The village is known for its shrine dedicated to Guru Siddarameshvara and the annual fair held under its auspices every November.

Honnebagi (Chiknayakanhalli Taluk): On a hill nearby there is the Ranganatha temple, which has some unique features. The priest of this Vaishnava temple is a Veerashiva (Lingayat) and it is the members of this community who take the leading part in conducting the annual car festival of Ranganatha. The Timmappa temple of Dugudihalli is also likewise patronised by the Lingayats.

Huliyar (Chiknayakanhalli Taluk): Inscriptions of the Chalukyan period and such other relics available here indicate that Huliyar was an agrahara town in the past. The Ranganath temple here is basically of the Hoysala period, especially in so far as garbha griha is concerned. The idol, which is about 150 cm high, is beautifully carved. The Malleshwara temple is a small but neat Chalukyan structure. During the 16th century Huliyar formed part of the possessions of Hagalawadi Chiefs and later on became a part of the province of Sira. The village has a Virakta math also.

Kandikere (Chiknayakanhalli Taluk): The village has the ruins of a fort surrounded by a moat. The Gopalakrishna temple with a beautiful idol, about 150cm high and the Shantinatha basti deserve notice. At some distance to the northwest of the village-site there are the ruins of a Siva temple and a matha. Near this place a large number tombs of temple bulls are also found.

Kuppuru (Chiknayakanhalli Taluk): The village is noted for its tomb shrine of saint Marula Siddeshwara and also for annual jatra and cattle fair which come off during February.

Maruhole (Chiknayakanhalli Taluk): This village has some fine mastikals or sati stones. One of these depicts a man holding a sword in the right hand with the point turned towards the ground and the left hand on his waist. His wife wears a crown with flames, hold a lime in her right hand and mirror in the left. Another mastikal shows a richly ornamented couple in an almost similar representation.

Pankajanahalli (Chiknayakanhalli Taluk): The Mallikarjuna temple of this village is a fine Dravidian structure of large proportions. The linga enshrined here is said to be a conglomerate of 101 smaller Lingas. The mahadwara of this temple is fine piece of art. The temples of Ranganatha and Virabhadra are also noteworthy.

Settikere (Chiknayakanhalli Taluk): The village is known for its Yoga-Madhava temple. This is a Trikutachala temple of Hoysala style and its main cell is adorned with a beautiful Stone tower. The three metre high seated figure of Yoga-Madhava is rich in ornamentation and is regarded as a rare specimen. The Ranganathe temple, which is older than that of Yoga-Madhava is also some architectural importance.

Voderahalli (Chiknayakanhalli Taluk): In front of the local Shantamallappa temple there is a fine lamp-pillar, which is about 13metres high. The village has in its northwest, a shrine dedicated to Henjerappa a deity that represents Bhairava the principal deity worshipped at Henjeru in Madakasira taluk of Andhra Pradesh.

Yalanadu (Chiknayakanhalli Taluk): The Siddharameshvara Temple of this village is a noted, large Dravidian structure having two Mahadwaras, one on the east and the other on the south. It is believed that Siddharama, a Veerashiva preceptor performed penance here. The main object of worship in the temple is an ant hill, which is decorated and given the appearance of linga. The temple has a Bilva-Vriksha-Vahana in the shape of car, adorned with painted images. The village has temples dedicated to Lakshmi, Revanasiddeshvara, Hariyappa and Kariyamma besides a Veerashaiva matha of the Renuka sampradaya, known as shrimadarasikere Yelanadu samsthana.

Hagalawadi (Gubbi Taluk): This was once the headquarters of a line of chiefs known as the Hagalavadi paleyagararu, who held sway over large tracts of lands presently included in this district, for nearly three centuries from 1478 A. D.

Kadaba (Gubbi Taluk): The village takes its name from Kadamba rishi who is believed to have had his hermitage here on the banks of Shimsha river and to have honoured Rama during the latter's sojourn here on his way back to Ayodhya. Sage Kadamba is believed to have set up the idol of Rama for worship. The temple dedicated to Rama is a large Dravidian structure with a gopura and fine Garuda Pillar in front. However, this temple does not contain the idol of Rama as, it is believed to have destroyed or taken out by the invading Muhammadens. The tower over this cell, it is said, was subsequently struck by lightning and was thus destroyed. The temple has 3 cells in a row the middle cell enshrines the idols of yoga Narasimha and Venugopala. The local Kailaseshvara temple appears to be much older structure and has a lamp pillar, which is about 7 metres high and has a frame work at top for placing lamps. The temple faces south though the linga itself faces the east. The north outer wall has a slab on which the figures of an elephant and its rider armed with a goad are found engraved. The bund of the tank also has a similarly engraved large slab. At the eastern outlet of the tank there is a temple dedicated to Hanuman and to its east there is a fine Uyyalekamba in the form of a gate. Kadaba is one of the five settlements of Hebbar Shrivaishnavas that were founded during the times of Ramanuja Charya. In the Tamil inscriptions this place is referred to as Dasharatha Rama-Chaturvedi-mangalam. An inscription dated 1696 A.D. found a Rampura nearby is of considerable interest as it throws some light on the ideas about public health which the villagers entertained in those days. This inscription States that at a meeting the villagers decided that no corpse should be buried within an arrow shot of a well that had been newly sunk and any one violating this ruling would be punishable with excommunication.

Muganayakanakote (Gubbi Taluk): This was once a strongly fortified place with flourishing market. It is said that when this place was besieged by the forces dispatched by Parashu Rama Bhau, the local inhabitants destroyed the market and defended the fort for about two months by which time the attacking Marathas abandoned the siege and retired.

Nittur (Gubbi Taluk): This is a place of historical importance and in an inscription dated in 1126 A.D. it has been referred to as the southern Aihole, the navel of Gangavadi 96000 and the crest-jewel of the Heruhe-nad. The Shantishvara basti here is a Hoyasala structure of the 12th century and consists of garbhagriha, a sukhanasi, a navaranga and a mukha mantapa and contains beautiful sculptures. The main object of worship in the temple dedicated to Mariyamma, the village Goddess, is an ant hill.

Akki Ramapura (Koratagere Taluk): The Venkataramana temple in this village is a large structure, built in the Dravidian style of architecture, with a gopura and prakara. This temple is said to have been renovated during the region of Haidar Ali. The structure bears some features of saracenic style also.

Channayya Durga (Koratagere Taluk): This village has the remnants of a beautiful fort atop massive rocky hill, which rises to an altitude of 1120m above the mean sea level. These fortifications are ascribed to the Madhugiri chief Channappa Gauda (mid 17th century). Later it was captured by Komaraiya, a general of the Mysore Raja and its name was also changed to Prasannagiri. For a brief period the fort was occupied by the Marathas also and from them it was taken back by Tipu Sultan. At the entrance there are inscriptions of Maratha Generals Pant Pradhan and Madhava Rao and in the latter inscription dated in 1766 A.D. the hill is called Chandrayadurga. At the foot of the hill there is a fine cave temple, which is known as Murari Matha and has a pair of Padukas as the chief objects of worship. The two samadhis found here are said to be those of the disciple of Murari Swamy.

Hanchenahalli (Koratagere Taluk): A hill nearby is known as urugutte. The village has the ruins of a fort and a mastikal which, the villagers believe, represents Vyasanatolu. This sati stone showing an arm and a hand projecting from an upright post has the figures of a couple sculptured below.

Holavanahalli (Koratagere Taluk): Situated on the banks of the Jayamangali river, this village was formerly known as Koramapura and was being ruled by a chief named Holava Gauda. It is said that when Baire Gauda of Avati or one of his descendants proposed to establish a fort and pete (bazaar) at this place the local people insisted that the town should be named after their former ruler Holava Gauda. This was accepted and the name duly changed to

Holavanahalli. This was a place of considerable importance during the paleyagar period. The brindavana of Raghavendra Swamy here is one of the oldest and is held in high reverence by the people of the neighbourhood.

Hulikunte (Koratagere Taluk): The village has an artistically well-executed (and inscribed) sati stone. The slab consists of 3 panels. The top panel has, between the sun and moon, two cobras with a male figure in a standing posture. The middle panel has a linga in the centre flanked by couples with folded hands on both sides. The bottom panel has a standing couple with an intervening sword, and the female figure holding a mirror in the left hand and a lime in the right. On either side of this couple is a female figure on horse back, holding a mirror in one hand and lime in the other.

Kyamenahalli (Koratagere Taluk): The village is well known on account of the annual festival in honour of Anjaneyawamy. On this occasion a cattle hair is also held and this happens to be one of the biggest cattle fairs held in the district.

Mallekavu (Koratagere Taluk): The village has a cave temple enshrining a linga. At the foot of this linga there is a small well formed by a perennial spring and this forms the source of the stream known as Siddhara Bettadahalla.

Nagenahalli (Koratagere Taluk): The village has a cave temple of Gutte Mallappa and close to it, there is large slab containing a fine figure of Hanuman.

Navilakurke (Koratagere Taluk): A fine mastikal (sati stone) found here depicts a couple standing side by side in a dancing pose as an indication of their joyful mood after their re-union in heaven. Flames are shown as emanating from the head of the female figure.

Amrutur (Kunigal Taluk) : This seems to have been an Agrahara town, known as Veera Narasimhapur and Atakur in former days. The Channakeshava temple here is a Dravidian structure of the 16th century. The Someshvara or Chandramauleshvara temple near a tank, which is also of the 16th century enshrines an Udbhava Linga and has a good lamp pillar, which is about 14 metres high. Behind this temple there is an Uyyale Kamba (swinging arch) about 5 metres high. The Pattaladamma temple here has several painted strucco figures of which two, seated in the middle represent Pattaladamma and Lakshmi. The annual festival in honour of this goddess, which comes off in the month of Vaishakha (April-May) is an important event in this neighborhood.

Huliyur-durga (Kunigal Taluk): The founding of village and the fortifications of the hill commanding it are attributed to Kempe Gowda, the chief of Magadi. The hill is a solid mass of almost perpendicular rock. The ascent is rather very difficult and the hill has the peculiar appearance of an inverted cup. The hill has a number of springs, ruined houses, granaries, powder magazines, remnants of palaces, Durbar hall etc. At the second gateway from the foot there is the shrine of Ganapati carved on a boulder. To the west of the hill there is the Gopalakrishna temple which has well-worked pillars in the Navaranga. Hemagiri, another hill nearby, has the temple of Mallikarjuna on its summit and its western slope is the shrine of Varadaraja where the object of worship is a round stone which is believed to have sprouted forth from the ground (Udbhava murthy).

Hutridurga (Kunigal Taluk): Also known as dodda betta, this is a fortified hill at an altitude of 1112 metres MSL. From the foot of the hill to the summit there are as many as 8 gateways. From the summit one can have a panoramic view of the surrounding country. The hilltop is known as Shankara Kumbhi and has a temple dedicated to Shankareshvara and a spring called Dodda-Done. The village is situated on the first elevation and has the temples of Adinarayana, Veeraghadra and Anjaneya.

Kaggere (Kunigal Taluk): This village is believed to be the place where Tontada Siddhalingaswamy used to sit for his meditations. The spot has been sanctified by erecting a temple thereon and, under the auspices of this temple, Siddhalingaswamy jatra is celebrated every year during Phalguna (Feb-March).

Kodavathi (Kunigal Taluk): The village is noted for its Lingayat Math, which is situated in a cave and is known as gavi math. Legend has it that this cave is connected by a sub terranean channel with the pattalaganga of Kelaganagavi-math at Shivaganga. There are few Gadduges (tombs) close to this math and of these, the one representing Channaviraswamy is held in high reverence.

Kottagere (Kunigal Taluk): This was known as Sridharapura during the time of the Hoysala King Vishnuvardhana and contains the several historical relics including inscriptions. The Kotteshvara temple, now mostly buried, is an ancient Dravidian structure. Local tradition states that this founded by Kottappa who by the favour of some Bairagis acquired immense treasure after killing a seven-hooded serpent. He is also said to have built the tank at this village. The ruins of a jaina basti of the 12th century and of another temple with the figures of Surya and Bhairavi are the other objects of interest in this village.

Yediyur (Kunigal Taluk): The Siddhalingeshvara temple here is a large Dravidian structure facing north. It enshrines the gadduge (tomb) of Tontada Siddalinga swamy, a celebrated Veerashaiva preceptor and author of the 15th century, whose main Kannada literary work is said to be Shatsthala Jnanasaramrita. Yediyur is an important place of pilgrimage, which attracts devotees all through the year. The annual car festival of Siddhalingeshvara, which comes off during the bright half of Chaitra (March-April) is a major event. Close to this temple there is a Veerashaiva math and there is one more Veerashaiva math at some distance there too. The village has a dilapidated temple enshrining Varadarajaswamy.

Basmangi Kaval (Madhugiri Taluk): On the summit of this fortified hill Bhasmangeshvara temple is situated. This place, which was originally fortified with walls of mud and stone by Budi Basavappa Nayaka was captured by Haider Ali in 1768. The old fort was then dismantled to make way for superior structure of stones and brick. Ruins of mahal, which was built by Haider Ali are also seen here.

Doddadalavatta (Madhugiri Taluk): The Lakshminarasimha temple of this village is a large structure in Dravidian style with an extensive prakara and a lofty mahadwara surmounted by a gopura. The chief object of worship is believed to be an Udbhava murti and this is in the form of a small round stone adorned with a crown. The car festival, which comes off in the month of July, is an important event that attracts a large number of devotees.

Haleitakalaloti (Madhugiri Taluk): The Anjaneya temple of this place enshrines a beautiful idol. To its left there is a stone slab on which a female figure is carved. This figure is supposed to represent Dombara women (Tumblers and Jugglers) who fell from pole and died.

Kodigenahalli (Madhugiri Taluk): Located on the banks of the Jayanangali river, this village is noted for its temples dedicated to Dandina Maramma (the village goddess) and Lakshminarasimha.

Medigeshi (Madhugiri Taluk): The village is located at the eastern base of Medigeshi durga, a fortified hill. The fort is said to have erected by Nagareddi, a local chief, and named after his wife who had very long hairs touching her heels. Later it was taken by Chikkappa Gowda the chief of Madhugiri. In 1761 it was reduced by Haider Ali and then the place was also under the occupation of the Marathas for a brief period before it was recovered by Tipu Sultan in 1774. Under the Muhammaden government. Medigeshi was the residence of an Asoph and afterwards it was the headquarters of a taluk for a short period. The fort has seven gates leading to the summit of the hill which contains the remains of granaries, dome like structures for storing oil and ghee, powder magazines and also dones or springs. There is, on the summit, a fine mosque with two minarets at the sides and an ornamented parapet all round the roof. Nearby there is Hanuman temple also. The Venkataramana temple in this village, which is similar to the one at Madhugiri is said to have been built by the local chief Nagareddi. The Malleshwara temple here is also of some importance.

Siddapura (Madhugiri Taluk): The village has the remnants of a fort which according to an inscription found in the village, was built 1593 A.D. by Mahanada-prabhu Chikkappa Gowda of Bijavara during the reign of Vijayanagara king Venkatapathi Raya I. There is a Veerashaiva matha, known after Balaradhya presumably the preceptor of Chikkappa Gowda.

Sravanagudi (Madhugiri Taluk): There are about a dozen inscribed Viragals (hero-stones) in this village. Besides there is an uninscribed viragal, which depicts a hero in the arms of celestial nymphs and a tiger pouncing on a bull.

Sravandanahalli (Madhugiri Taluk): The village has an inscription of Nolamba King Ponnera (8th century A.D.). There is an uninscribed viragal also.

Chikkanayakanahalli (Pavagada Taluk): The hill, known as Bangaranayakana betta, near this village has a temple that enshrines pillar (about 4 metres high) on the sides of which the figures of a conch and discus

are engraved. An iron lamp is fixed at the top of this pillar. The pillar represents the deity popularly called kambada-raya in the region. Ruins of several buildings can be seen on the hill.

Gundlahalli (Pavagada Taluk): The village has an ancient large tank, named Akalesamudra. The fine sluice has a discus and a conch carved out of black stone fixed at the sides. Two inscriptions are found engraved on a rough boulder on the bund of the tank. There is one more tank called chikka kere and on its bund an Ishwara temple has been built. The prakara of this temple has unique stone slab about 2.7 metres high with several curves in the form of a snake. The Anjaneya temple enshrines a large idol of the God, about 3 metres high.

Nidigal (Pavagada Taluk): Also known as Nidugaldurga this fortified hill formed part of the Nolamba kingdom. Later it came into the possession of the Cholas and was then taken by Hoysala Ballala II. Subsequently this was held for brief periods by the Nidugal chiefs and the Harati chiefs from whom it was captured by Tipu Sultan. The hill has three district elevations and the ascent is very steep and difficult, as there are no steps to help the climber. According to an inscription found on the hill, the hill was named Nidugal (lofty peak) because it reached the skies and, according to another dated in 1487 A.D., this fort was the most impregnable of all the hill –fortresses in the Karnataka country. There are several lines of fortifications known as Kaleshvara kote, Bhiravana kote, Are kote, Nagareshvara kote etc., and a number of gates known as Natanura-bagilu. Singrada-bagilu, Seemalayyana-diddi etc. There are the ruins of a palace besides of the granaries and powder magazines and dones. On the summit is a small ruined temple of Basava built by chief Hotenna Nayaka in 1653 A.D. and close to it there is an iron lamp which is lighted once a year or more often in fulfillment of the vows undertaken by the people of the surrounding villages. A little lower down is the Kalahastishvara temple, which had its linga set up by Rama and was renovated by Harati chief Timmanna Nayaka in 1670. Close by there are three pieces of canon. The ruined Nageshvara temple near a pond known as Hokkarne was, according to an inscription dated in 1115 A.D. founded during the reign of Jagadekamalla II. An under ground canal supplies water to the Hokkarne pond. Of the temples at the foothills, mention may be made of the Saravadeshvara temple. According to an inscription this was built in 1681 A.D. and the god named after Saravad, a village in Bijapur district said to be the birthplace of the progonitor of the Harati family. The village has the tomb shrine of Mirza Hussain Vali and, under its auspices urus is held every year.

Seebi (Sira Taluk): Formerly known as Sibur and Harihara Rayara Pura this was once an agrahara town. The village is noted for its Narasimha temple under the auspices of which an annual festival is held every year in the month of Magha. The temple has architectural peculiarities of four periods. The ten avatars of Vishnu, Leelas of Shiva and scenes from Mahabharata and Ramayana are depicted in mural paintings on the beams and ceilings of the Mukha mantapa and the ceilings of the Mahadwara. In this temple God Narasimha is in the form of a Saligrama. It is said that this temple was extensively renovated by Faujdar Karnika Nallappa and his brothers.

Albur (Tiptur Taluk): This village has several inscription stones including two artistically executed Viragals. One of the Viragals found near the Shiva temple is dated in 1395 A.D. and is sculptured with caparisoned horses and elephants. The other viragal found in a field is adorned with sculptures in several panels among which top one depicts a hero seated on a throne and borne on two elephants.

Aralaguppe (Tiptur Taluk): The village is renowned for its Channakeshava temple, a fine building in Hoysala style containing several well-carved friezes and wall decorations. The garbhagriha is surmounted by a well-carved tower. Attached to the south wall of this temple stands the Ugra Narasimha temple. The Kalleshvara temple here appears belongs to the 9th century. The Navaranga has a well-carved doorway with Gajalakshmi on the lintel and a row of dwarfs on the pediment. The central ceiling with nine panels is of remarkable workmanship with Ashta- dikpalakas supported by four good pillars, with a most elegantly carved Tandaveshvara in the middle and four doubled up and hanging figures of flying Gandharvas in the four directions. The village has 4 more temples, which belong to the period of the Gangas and resembles the temples at Talakad.

Honnavalli (Tiptur Taluk): The village derives its name from Honnamma, the tutelary goddess who, in a vision, is said to have directed Someshvara the chief of Haranahalli to build this town. The Lakshmi Narayana temple at this place belongs to the Chola period and contains some beautiful carvings.

Nonavinakere (Tiptur Taluk): This is a place of considerable antiquity and happens to be one of the five settlements of the Hebbar Shrivaishnavas set up during the times of Ramanujacharya. The Beterayaswamy temple here is a large Dravidian structure enshrining a fine figure of Srinivasa. There is an image of Koneri Iyengar, the founder of this temple on a pillar as well as a few relievo figures of several chiefs and their queens on other pillars. The temple has several stone and metallic figures of Alavars and Sages. The Gopalakrishna temple is of an earlier period and is a trikutachala, the three cells of which enshrine the idols of Keshava, Yoga-Narasimha and Venugopala. The villages have five Shiva temples with the deities known as Shanteshvara, Nonabeshvara, Choleshvara, Kalleshvara and Garigeshvara. The earliest temples in the district are to be met with here.

Vignasanthe (Tiptur Taluk): The Lakshminarasimha temple of this village is quite large and is of fine workmanship. According to an inscription this temple was built in 1286 A.D. by three brothers Appayya, Madhava and Gopala who were generals of Hoysala king Narasimha III. In this trikutachala temple it is only the cell in the west that has a vestibule and stone tower, of exquisite workmanship with remarkable floral carvings. The main cell enshrines a fine idol of Keshava about 1.5 metres high, supported by a consort on each side, having serpentine scroll with fine lace-work and ten avataras on the torana. The other two cells enshrine Lakshminarasimha and Venugopala. The Balalingeshvara temple is a plain Hoysala structure with a stone tower adorned with four figures one over the other in four directions and a Hoysala crest in front. The Banashankari temple has a mutilated figure of the goddess seated in Sukhasana endowed with eight hands, some of which are broken. The Bhairava shrine has a panel carved with two goddesses.

Devarayana-durga (Tumkur Yaluk): This is fortified hill situated amidst picturesque scenery. It consists of three elevations and on the lowest one there is the Lakshminarasimha temple. Near a spring, known as Anedone, there are the remains of the tomb of an elephant. In fact, this place was originally known as Anebiddasari i.e., the precipice where the elephant had a fatal fall and then as Jadakandurga after a chief and finally acquired the present name after its capture in 1696 A.D .by Chikka Devaraja wodeyar of Mysore. The large tank named Bukkasamudra was formed during the early Vijayanagara period by putting up an embarkment across the gorge, which is the source of Jayamangali River. The remains of this embarkment and the ruins of the ancient town can still b traced. The Narasimha temple built in Dravidian style is attributed to Kanthirava Narasaraja I and an inscription indicates that was this got repaired in 1858 by Krishnaraja Wodeyar III. The annual fair at this place comes off in April and is an important event that attracts a large number of people. The Hanuman temple nearby is said to be much older than the Lakshinarasinha temple and the deity Snjivaraya is represented in a standing posture with folded hands. The middle elevation has a large cave with the figures of Rama, Sita and Lakshmana and two springs known as Ramatirtha and Dhanushthirtha. On the third elevation there is the Kumbhi Narasimha temple consisting of Garbha griha, a Sukhasasi, a navaranga and a Mukhamantapa. There are three sacred ponds called narasimha-tirtha, parashara-tirtha and Pada-tirtha. Higher up there is a shrine of Garuda and a large-boulder called divigegundu. Near this hill there is a small natural spring of pellucid water, known as Namada chilume, which fills and over flows a mortar cut in the rock. On the slope of the hill there is the Jalada-gondi gorge which is the source of Mangali stream. Higher up, the stream jaya issues forth from another spring Jaya-thirtha and these two streams unite at foot of the hill forming Jayamangali River. This hill is also the source of the River Shimsha.

Gulur (Tumkur Taluk): Gulur is associated with Siddhaveerannacharya the author of Shoonya Sampadane and Anadi Veershaiva Sangraha. This village is renowned for its huge Ganesh, about 2.5 metres high, which is made every year in clay for being worshipped over a period of 30 days and then immersed in the local tank. The jatra comes off on the third day of Margashira (December) and during the entire month the devotees throng the village. The Ganesha temple however enshrines a small idol, which is worshipped every day.

Hebbur (Tumkur Taluk): This is an old village said to have been founded by two brothers Hale Gowda and Timme Gowda and named Hebbulli form the circumstance that a bullock. When attacked by tiger here counter-attacked the tiger and drove it off. The cattle owners of the place pursued and killed the tiger and then the fort was built with the approval of the Vijayanagar king. The village has a branch of the Sringeri- matha and the temple of Minakshiamma in which a shri chakra has been etched and consecreated in front of the idol of the goddess.

Heggere (Tumkur Taluk): The village has 3 Shiva temples, 2 Jaina basadis and a mastikal. Amongst the temples, Kalleshvara temple is the largest and the Galgeshvara temple is the most ornate. The Parshvanatha basadi is a fine specimen of Hoysala architecture built in 1160 A.D. During the reign of Narasimha I by Maha Samanta Govideva in memory of his deceased consort. It is remarkable for its simplicity and elegance.

Kaidala (Tumkur Taluk): Formerly known as Kridapura this was the capital of petty chief dom local legend has it that the renowned sculptor Jakanachari belonged to this place which he left on taking up assignments under the Hoysala Kings. However he left behind his family and some time after his departure his son Dankanachari was born. Engrossed in work Jakanachari could not return home for several years during which his son grew in an young man and an accomplished sculptor as well. Dankanachari then set out in search of his father and the encounter between the father and the son, who had not seen each other at all, took place at the Channakeshava temple under construction at Belur. As fate would have it Dankanachari pointed out a blemish in one of the carved figures, which was not accepted by the artist, namely Jakanachari. In the test that ensued the son was proved correct and in pursuance of his challenge Jakanachari had his right arm cut off. Subsequently Jakanachari was directed in a vision to dedicate a temple to Keshava at Kridapura. Accordingly he returned home along with his son, completed the temple and had his right arm restored by the Divine Grace. Henceforth the place came to be known as Kaidala i.e. the restored hand.

The Channakeshava temple here is a large Dravidian structure with a mahadwara surmounted by a tower. The Channigaraya idol, about 1.55 metres high stands on a high pedestal facing west. One of the pillars here has a figure of a man, standing with folded hands, and this is said to represents the celebrated sculptor Jakanachari. The Gangadhareshvara temple contains inscriptions stating that this temple and the Narayana temple were built in 1150 A.D. during the reign of Hoysala king Narasimha by chief named Gule Bachi. In this temple there is a stone railing all round the navaranga on which elephants and flowers are carved.

Maralur (Tumkur Taluk): The Rama temple here has a stone panel depicting a horseman holding a spear in his uplifted right hand with two male figures to his rear and five female figures to his fore. The semi-circular top of the panel is artistically executed with scrollwork.

Benakanakere (Turuvekere Taluk): The idol in the local Anjaneya temple has been carved out of a thick inscribed stone of the Hoysala period.

Goni Tumkur (Turuvekere Taluk): The Ishvara temple here is built in Hoysala style of architecture. The village has three worn out viragals belonging to the Hoysala period.

Hosahalli (Turuvekere Taluk): The Kalleshvara temple here is a Hoysala structure consisting of a garbhagriha a Sukhanasi and Navaranga. The navaranga doorway is well carved and that of the Sukhanasi has perforated screens at the sides. In the Hosahalli-amma temple a painted stucco figure represents the goddess.

Kadasur (Turuvekere Taluk): The village is known for its Bhairava temple which enshrines a fine idol, about a metre high, endowed with four hands- the upper ones holding a trident and a drum and lower ones holding a sword and a decapitated head.

Mayasandra (Turuvekere Taluk): The temple of Mayamma, the tutelary goddess of the fishermen community of Gangamatha, is located in the centre of the tank bund. The village has a temple dedicated to Kollapuradamma. On a hillock nearby there is the temple of Mahadeshwara under the auspices of which an annual Jatra and cattle fair are held. At Ramasagara, which is also nearby there, is the Varadaraja temple, which is of the Hoysala period. This has a well-carved idol of Varadaraja and close to it there is a Linga also.

Sampige (Turuvekere Taluk): This place is identified as the Champakanagara, the capital of Sudhanva, of whom an account is given in the Jaimini Bharata. The village has a fine temple dedicated to Venkataramana.

Sulekere (Turuvekere Taluk): The village has a small Ishvara temple, built in the Hoysala style, enshrining a fine figure of Bhairava set up near the Linga. The outer walls have only pilasters and the garbhagriha is surmounted a small tower. The Veerabhadra temple has four sculptured pillars depicting scenes such as the Arjunas fight with Shiva, hunter Kannappa in front of a linga, etc. Another sculpture worth noticing in an ingenious combination of an elephant and a bull with only one head for both.

(xiii) Scope of Village Directory and Town Directory

Village Directory

Village Directory provides micro level data, which will help the planners in formulation of micro-level developmental plans, as the C.D.Block is the lowest administrative unit for developmental planning. Village wise information regarding the availability of certain basic amenities and facilities within the village, as also that on the manner of utilization of the land in the concerned village are furnished in the village directory. The village directory format adopted for the 2001 Census has 23 columns whereas in the 1991 Census there were only 18 columns. When compared with the 1991 Census Village Directory format, column 9, which refers to the day or days of weekly market/hat if any has been now left out. New inclusions are in respect of facilities like banks, agricultural credit societies, non-agricultural credit societies, other cooperative societies, number of recreational and cultural facilities like cinema/video hall, sports club, stadium/auditorium; receipt of news papers/magazines and the name of the most important commodities manufactured in the village. In all the 23 columns in this tabulation statement, first 3 columns relates to serial number, name of the village with location code and area of village while the next 2 provide information on total population and number of households in the village as per 2001 Census. The next 8 columns relate to basic amenities such as educational; medical; drinking water (potable); post, telegraph and telephone, commercial and cooperative banks, agricultural, non-agricultural and other credit societies, number of recreational and cultural facilities such as cinema/video hall, sports club and stadium/auditorium and communications (bus service, railway station, waterway). Information in respect of approach to village, nearest town and distance in Kms., power supply, receipt of news paper/magazine, names of the most important commodities manufactured in the village are furnished in columns 14 to 18. Amenities available within the villages are shown in the respective columns and if a particular amenity especially Primary School, Middle School, College, Allopathic Hospital, PHC, MCW, Post Office, Telephone, etc., is not available in the village, the respective abbreviation is given and next to it in brackets the distance in broad ranges viz., <5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility available to that particular village is indicated. The next 5 columns, 19 to 23 provide information regarding land use (i.e., area under different types of land use in hectares rounded to two decimal places) such as forest, irrigated land by source of irrigation, un-irrigated, cultivable waste (including gauchar and groves) and finally the area not available for cultivation.

Town Directory

The Town Directory section contains seven statements (I to VII) which furnish information on all the statutory towns in the district, on aspects such as growth history, physical aspects and location of towns, municipal finance, civic and other amenities in the town, medical, educational, recreational and cultural facilities, trade, commerce, industry and banking in the towns, civic and other amenities in slum areas of the town. The scope of the various column headings adopted during 1991 Census has remained unchanged in 2001.

Note :

1. The area figure for the district given under column No 3 against " Total" represents "Geographical Area" and has been furnished by the Surveyor General India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D. Blocks/Taluks in this district will not tally with the district figures (except urban), because the area figures for C.D. Blocks/Taluks represents the land-use area based on village wise area figures as reported by the local officers. The total area of the taluk may not tally with the aggregate of the areas of the villages listed for Census purposes for it includes the area of the statutory as well as non-statutory towns, villages which may be fully submerged and reserve forests which may not form part of any revenue village, if any, within the jurisdiction of the concerned taluk. The total area of the C.D. Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2. Out growths of towns in urban agglomerations are denoted by letter "OG".

3. The following abbreviations have been used to indicate the Civic Administration Status of town.

M.Corp	:	*Municipal Corporation*
CMC	:	*City Municipal Council*
TMC	:	*Town Municipal Council*
TP	:	*Town Panchayat*
NAC	:	*Notified Area Committee*
CB	:	*Cantonment Board*
CT	:	*Census Town (Non-Municipal Census Town / Non-Statutory Town)*

SECTION – I

VILLAGE DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and cooperative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and un-inhabited villages.

Column 3 : Area of the village

The area of the village in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are treated as equivalent to Pre-University Course.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health SubCentre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, cooperative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given

(i)	Agricultural Credit Society	ACS
(ii)	Non Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If the village receives any News Paper/Magazines, the same is noted in this column using following codes

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State Government is furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Unirrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I -	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-IA -	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-IB -	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-IC -	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II -	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-IIA -	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III -	It gives the land utilization data in respect of Census Towns / nonmunicipal Towns.
Appendix-IV -	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V -	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI -	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII A & VII B -	The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII -	Indicates C D Block wise number of villages under each Grama Panchayat.
Appendix-IX -	Shows number of different types of girls school in a village.

SECTION - II
TOWN DIRECTORY

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory Statements (I to VII)

Statement I : Status and Growth Histor

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 -19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Itemwise amount of receipt andexpenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tubewell water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilolitres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/ Intermediate / Senior Secondary / PUC / Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, PrePrimary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate/ Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Cooperative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation

of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary

Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Cenus Abstract	Level of presentation
1. District Primary Census Abstract	District/CD Block/UA/ City/Town
2. Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4. Village Primary Census Abstract	CD Block/ Villagewise
5. Urban Primary Census Abstract	Town/Ward Level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of taluks, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the Taluks/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Taluk. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Taluks and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE II

Note on Fertility & Mortality and Migration - 1991 and 2001 Census

Fertility levels

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to Karnataka state and are defined as below: -

Migration

What is Migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another state of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why people migrate?

As in 1981 census, the reasons for migration were elicited in 1991 and 2001 census also. The reasons for migration were broadly categorized as (1) employment (2) business (3) education (4) family moved (5) marriage (6) natural calamities like drought, floods etc. and (7) other reasons. Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

ANNEXURE III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

Marriage and age at marriage are important social phenomena and crucial factors in the analysis of the dynamics of fertility. As such, various measures of fertility estimated based on these crucial factors are highlighted in the above table.

Estimates of General Fertility Rate (GFR) a refined measure of fertility, defined as the number of live births per thousand women in the reproductive age-group 15-49 years is a useful tool for measuring fertility, and this rate is further estimated only for the married women which is defined as General Marital Fertility Rate (GMFR). The GFR and GMFR for the district are 109 and 142 respectively.

The cumulative value of the age-specific fertility rates at the end of the child bearing ages gives a measure of fertility known as Total Fertility Rate (TFR). It indicates average number of children expected to be born per woman during her entire span on reproductive period assuming that the age specific fertility rates to which she is exposed to, continue to be the same and there is no mortality. The same is expected for married women known as Total Marital Fertility Rate (TMFR). The estimated TFR and TMFR for the district are 3.46 and 5.11 respectively. The Crude Birth Rate (CBR) is 27.04.

The most useful indices that can be derived from the question on number of Children born alive is the average number of children ever born per ever married women by age-group. Since most of the women complete their reproduction be the age-group 45-49, this indices is termed as completed fertility. The category ever married includes widows, divorced and separated

women. As such the completed fertility for the district is 4.23. The child women ratio which is a relative measure to know the fertility performance of a women is 422 in the district.

One of the parameters, presenting female age at marriage relates to all women who live with their husbands, where some of them might have been recently married and some of them decades ago. It can be observed that mean age at marriage of the currently married women of Tumkur district is lower than the state figure of 18.00.

27	Chamarajnagara	57	75	81	89	57	86	92	97	58	64	75	86

The estimates of mortality indicators presented above have been obtained through indirect estimation using the data on the number of children ever born and number of children surviving to ever married women. The information on questions on children ever born and children surviving canvassed for all ever married woman have been tabulated by the age of the mother. This data has been converted into estimates of probability of dying before attaining a given age. These estimates have been worked out using Brass technique where (qi) is the probability of a newborn child dying before the age i = 1, 2, 3 and 5. The table above shows the estimates of infant and child mortality derived for the year 1991 by sex.

The infant mortality rate (q1) for the person is 64 and for male and female are 66 and 60 respectively. The estimates of under 5 mortality (q5) for person is 102 and for male and female are 99 and 108 respectively.

Source : Migration Tables of 1991 & 2001 Census

The Anenxure IV(1) presents data on migrants on migration by their place of birth. The majority of migrants are those who are born within the state of enumeration, which constitute 92.30 per cent as per 2001 Census. Among them, migrants born elsewhere in the district are larger than migrants born in other districts of the state. Considerable proportion of population from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (2) - PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF LAST RESIDENCE

Source : Migration Tables of 1991 & 2001 Census

The Annexure IV(2) presents data on migration by their place of last residence. As far as the district is concerned, it can be seen that migrants whose place of last residence was within the state of enumeration but outside the place of enumeration, constitute major proportion of migrant population. As per 2001 Census, their percentage accounts for 92.56. Among them, more is the inflow from within the district. Considerable proportion from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (3) - INTERSTATE IN-MIGRATION TO TUMKUR DISTRICT

Place of birth	1991 Census		2001 Census	
	Migrants	Percentage	Migrants	Percentage
1	2	3	4	5
Andhra Pradesh	38,571	78.49	48,614	80.14
Goa	10	0.02	-	0.00
Kerala	1,470	2.99	1,682	2.77
Maharashtra	520	1.06	663	1.09
Tamil Nadu	5,850	11.90	5,158	8.50
Rajasthan	-	0.00	1,578	2.60
Total for 5 states	46,421	94.46	57,695	95.11
Other states	2,720	5.54	2,965	4.89
Total	**49,141**	**100.00**	**60,660**	**100.00**

The interstate in-migration to the district by their place of birth provided above, highlights the States with the largest contribution of migrants to the district. According to 2001 Census findings, majority of migrants are from Andhra Pradesh which accounts for 80.14 per cent followed by 8.5 per cent from Tamilnadu. Further the category migrants from 'Other States' has come down from 5.54 per cent in 1991 to 4.89 per cent in 2001.

ANNEXURE-IV(4)
RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH - 1991 CENSUS

Place of Birth	Place of Enumeration-1991			Place of Enumeration-2001		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1. Within the state	638,338	495,774	142,564	736,646	552,343	184,303
	100.0	77.7	22.3	100.0	75.0	25.0
2. In other states of India	49,141	35,160	13,981	61,266	43,458	17,808
	100.0	71.5	28.5	100.0	70.9	29.1

Rural and urban composition of internal migrants by their place of birth is provided in the above statement. The data for both the Census points out that majority of migrants within the State as well as from other states of India have migrated to rural areas of the district. The details can be seen from the Statement.

ANNEXURE - V

Brief account of Main Religions in the District / Taluk as per 2001 Census

Religion forms an integral part of Indian Social System. For an Indian, it is a way of life rather than a faith. Indian Census, since its inception is collecting data on religion and presenting the same in its reports. In the pre-independence Census reports, the data on religion was being presented for 6 major religions viz., Hindus, Muslims, Christians, Sikhs, Jains and Buddhists. Besides, the minor religions have been classified under the category of 'Others'. The data on religion collected and presented by the Indian Census is the basic data of immense use for the researchers, anthropologists, sociologists, demographers, administrators, planners and even for a common man.

ANNEXURE V (1) - PERCENTAGE DISTRIBUTION OF POPULATION BY MAJOR RELIGIONS IN INDIA AND KARNATAKA DURING 1991 AND ITS GROWTH RATE DURING 1981-91 & 1991-2001

Sl. No.	Religion	India				Karnataka			
		Percentage of Population	Percentage growth rate 1981 - 1991	Percentage of Population	Percentage growth rate 1991 - 2001	Percentage of Population	Percentage growth rate 1981 - 1991	Percentage of Population	Percentage growth rate 1991 - 2001
1	2	3	4	5	6	7	8	9	10
1	Hindus	82.4	22.3	80.5	20.0	85.5	20.7	83.9	15.3

India - State differentials

The comparative data of the country and the state of Karnataka presented in Annexure V(i) reveals that the religion wise concentration of population in the state of Karnataka is of three major religions viz., Hindus, Muslims and Christians. Hindus are returned on the higher side with over three per cent more than the national average. Christians recorded nearly one per cent less whereas the proportion of Muslims in the state to national population was almost the same. There are 85.5 per cent Hindus, 11.6 per cent Muslims and 1.9 per cent Christians in Karnataka as against that of 82.4 per cent Hindus, 11.7 per cent Muslims and 2.3 per cent Christians in India. In regard to concentration of other three major religions viz., Sikhs, Buddhists and Jains it is observed that Jains with 0.7 per cent form the fourth major religion in the state whereas Buddhists with 9.8 per cent is the third major religion in India. In the Indian scene the Sikhs form fifth major group, whereas in Karnataka, Buddhists and Sikhs are placed fifth position.

Religion wise growth in the state during the decade 1981 - 91 reveals that the major religions viz., Hindus, Muslims and Christians recorded a growth rate in lesser degree i.e., 20.7 per cent, 25.7 per cent and 11.1 per cent respectively, against that of 22.3, 26.1 and 16.9 per cent in India as a whole. On the other hand Buddhists, Sikhs and Jains recorded a growth rate of 72.8 per cent, 57.8 per cent and 14.6 pecent respectively for the state against that of 34.0, 24.2 and 3.9 per cent respectively for India. Thus, the Jains recorded a higher growth of nearly 11 per cent in the state than that of India as a whole during the decade 1981 - 91.

Percentage distribution of population during 2001 Census, by major religions in India and Karnataka shows that Hindus form majority of the population with 80.5 and 83.9 per cent respectively, while Muslims form 13.4 and 12.2 per cent for the country and state respectively. The proportion of these religions for the country and state, during 1991 Census was 82.4 per cent and 85.5 per cent for Hindus and 11.7 and 11.6

per cent for Muslims. There is not much noticeable changes are found in other regions. Persons who have not reported to which religion or faith they belong to has increased in Karnataka, as its proportion to the total population has increased from 0.1 per cent in 1991 Census to 0.3 per cent during 2001 Census.

ANNEXURE V(2) - DISTRIBUTION OF POPULATION UNDER EACH RELIGION TO TOTAL POPULATION IN THE DISTRICTS OF KARNATAKA - 1991 CENSUS & 2001 CENSUS

The above table furnishes the composition of six major religions along with 'Other Religions' and 'Religion not stated' among the districts of the state during 2001 Census along with 1991 Census. As may be seen from the table that, the proportion of population to total population during 2001 Census, is below 5 per cent for 23 districts of the state and, is between 5-10 per cent in 3 districts. Only Bangalore district has the distinction of having more than 10 per cent of the total population of the state in its jurisdiction. During 1991 Census the situation was almost similar with 22 districts having a proportion of less than 5 per cent and 4 districts had more than 5 per cent but below 10 per cent. With 10.76 per cent of the total population Bangalore district occupied the top position.

Of the total population of the state, proportion of districts having Hindus and Muslims was uniform during both the Censuses i.e. less than 5 per cent of the total population in 21 districts for Hindus and 23 districts for Muslims, while in 5 and 3 districts respectively for Hindus and Muslims had a proportion of 5-10 per cent and Bangalore district alone had more than 10 per cent.

ANNEXURE V(3) - PERCENTAGE AND DISTRIBUTION OF POPULATION BY MAJOR RELIGION IN KARNATAKA AND TUMKUR DISTRICT - 1991 & 2001

	KARNATAKA				TUMKUR			
	1991		2001		1991		2001	
RELIGION	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage

Religion not stated	36,121	0.10	120,247	0.23	1,704	0.07	3,743	0.14

The percentage distribution of population by major religion in Karnataka and Tumkur district for 1991 and 2001 Censuses are presented in the above table. As may be seen from the table that in Karnataka, Hindus form 85.5 and 83.86 per cent of the total population during 1991 and 2001 Censuses, followed by Muslims and Christians. The corresponding statistics for the district does not differ much as Hindus and Muslims

occupy the top two places followed by Christians. These three religion cover more than 98 per cent of the total population of the district. Remarkable increase in the proportion of Buddhists population has been noticed between 1991 and 2001 Censuses in the State.

ANNEXURE V(4) - DISTRIBUTION BETWEEN RURAL AND URBAN AREAS OF MAJOR RELIGIONS IN KARNATAKA AND TUMKUR - 1991 & 2001

	Religion not stated	1,626	95.4	78	4.6	2,870	76.7	873	23.3

Distribution of major religion by residence for the State and district are presented in the above statement. Majority of Hindus, Jains, Buddhists and those who have not stated their religion are residing in rural areas of the State during both the Censuses. While population belonging to Muslim, Christian and Sikh religion reside in urban areas of the State. As far as the district is concerned, according to 2001 Census data, Hindus and those who have not stated their religion live in rural areas. All the major religions are concentrated in urban areas. Comparative data for 1991 Census is provided in the annexure.

The level of education by sex for the district and the State during 1991 and 2001 Census are presented in the above annexure. It can be seen that percentage of illiterates during the decade has decreased vis-a-vis for the State and the district. Though the male literates out number females, the percentage of women folk acquired literacy during the decade is more than the male population. The comparison of data for the two censuses reveals it so for the State and the district. The different educational level attained by the population can be seen in detail in the above annexure.

ANNEXURE - VIII

DISTRIBUTION OF DIFFERENT MOTHER TONGUE RETURNED DURING 1991 & 2001 CENSUS

As part of Census publication programme the data on spoken languages/Mother Tongues will be presented under C Series. The table C-7 shows the distribution of languages/Mother Tongues which returned 10,000 or more speakers each at all-India level (including of Mother Tongues grouped under each for the district, with total, rural/urban and male/female break ups). The unclassified Mother Tongues and the Mother Tongues having less than 10,000 speakers have been relegated to 'Other' Mother Tongue category. The table is divided into Part A-Scheduled languages with Mother Tongues grouped under each and Part B-Non-scheduled languages with Mother Tongue grouped under each. The instructions to the enumerators in regard to this question read as under.

"Record Mother Tongue in full, whatever be the name of the language returned by the person enumerated". The definition of Mother Tongue is the same as in 1991. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the Mother Tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded".

As the above instructions to the enumerators would show, the respondent was made to feel free to return the name of his/her Mother Tongue and the same was recorded faithfully by the enumerators. This naturally leads to recording of a very large number of Mother Tongue names. It is to be mentioned that Mother Tongues as returned in the Census are basically, the designation provided by the respondents. These designations or Mother Tongue labels need not be identical with the actual linguistic mediums. For assessing the correlation between the Mother Tongue designations and actual languages and dialects the raw returns of Census were subjected to thorough scrutiny and rationalization.

The abstract of languages as Mother Tongues and their strength in the district during 1991 and 2001 Census are provided below.

STATEMENT-I
ABSTRACT OF LANGUAGES AS MOTHER TONGUES AND THEIR STRENGTH IN TUMKUR DISTRICT-1991 AND 2001 CENSUS

PART A: LANGUAGES SPECIFIED IN THE EIGHTH SCHEDULE TO THE CONSTITUTION

5	Bhili / Bhilodi	5	0.00	-	0.00
6	Arabic/Arbi	-	-	17	0.00
7	Dogri	-	-	2	0.00
8	Khasi	-	-	2	0.00
9	Ladakhi	-	-	5	0.00
10	Total of other Languages	168	0.01	994	0.04

The statement I & II gives a clear picture of the languages spoken in the district. A closer study of 2001 Census data reveals that as many as 25 languages which returned 10,000 or more speakers are spoken in the district. The 'Other' category include Mother Tongues spoken by less than 10,000 speakers. Majority of the population speak Kannada which constitute 83.16 per cent followed by 8.14 per cent of Urdu speaking population. Among the languages not specified in the Eighth Schedule to the constitution, Coorgi is spoken by 0.11 per cent of population. Similar data for 1991 is provided in the annexure.

Linguistic classification of the languages

The names of the 114 Scheduled and Non-Scheduled languages falling in the five languages families are given below with the Scheduled Languages denoted as (S). Of the 18 Scheduled Languages, 13 fall in the Indo-Aryan branch of the Indo-European family, 4 in the Dravidian family and one in the Tibeto-Burmese family.

1. INDO-EUROPEAN

(a) INDO-ARYAN

1. Assamese (S), 2. Bengali (S), 3. Bhili/Bhilodi, 4. Bishnupuriya, 5. Dogri, 6. Gujarati (S), 7. Halabi, 8.Hindi (S), 9. Kashmiri (S), 10. Khandeshi, 11. Konkani (S), 12. Lahnda, 13. Marathi(S),14. Nepali (S), 15. Oriya (S), 16. Punjabi (S), 17. Sanskrit (S), 18. Sindhi (S), 19. Urdu (S).

(b) GERMANIC

1. English.

2. DRAVIDIAN

1.Coorgi/Kodagu, 2.Gondi, 3. Jatapu, 4. Kannada (S), 5. Khond/Kondh, 6. Kisan, 7. Kolami, 8.Konda, 9. Koya, 10. Kui, 11. Kurukh/Oraon, 12. Malayalam (S), 13. Malto, 14. Parji, 15. Tamil (S), 16. Telugu (S), 17. Tulu.

3. AUSTRO-ASIATIC

1. Bhumij, 2. Gadaba, 3. Ho, 4. Juang, 5. Kharia, 6. Khasi, 7. Koda/Kora, 8. Korku, 9. Korwa, 10. Munda, 11. Mundari, 12. Nicobarese, 13. Santali, 14. Savara.

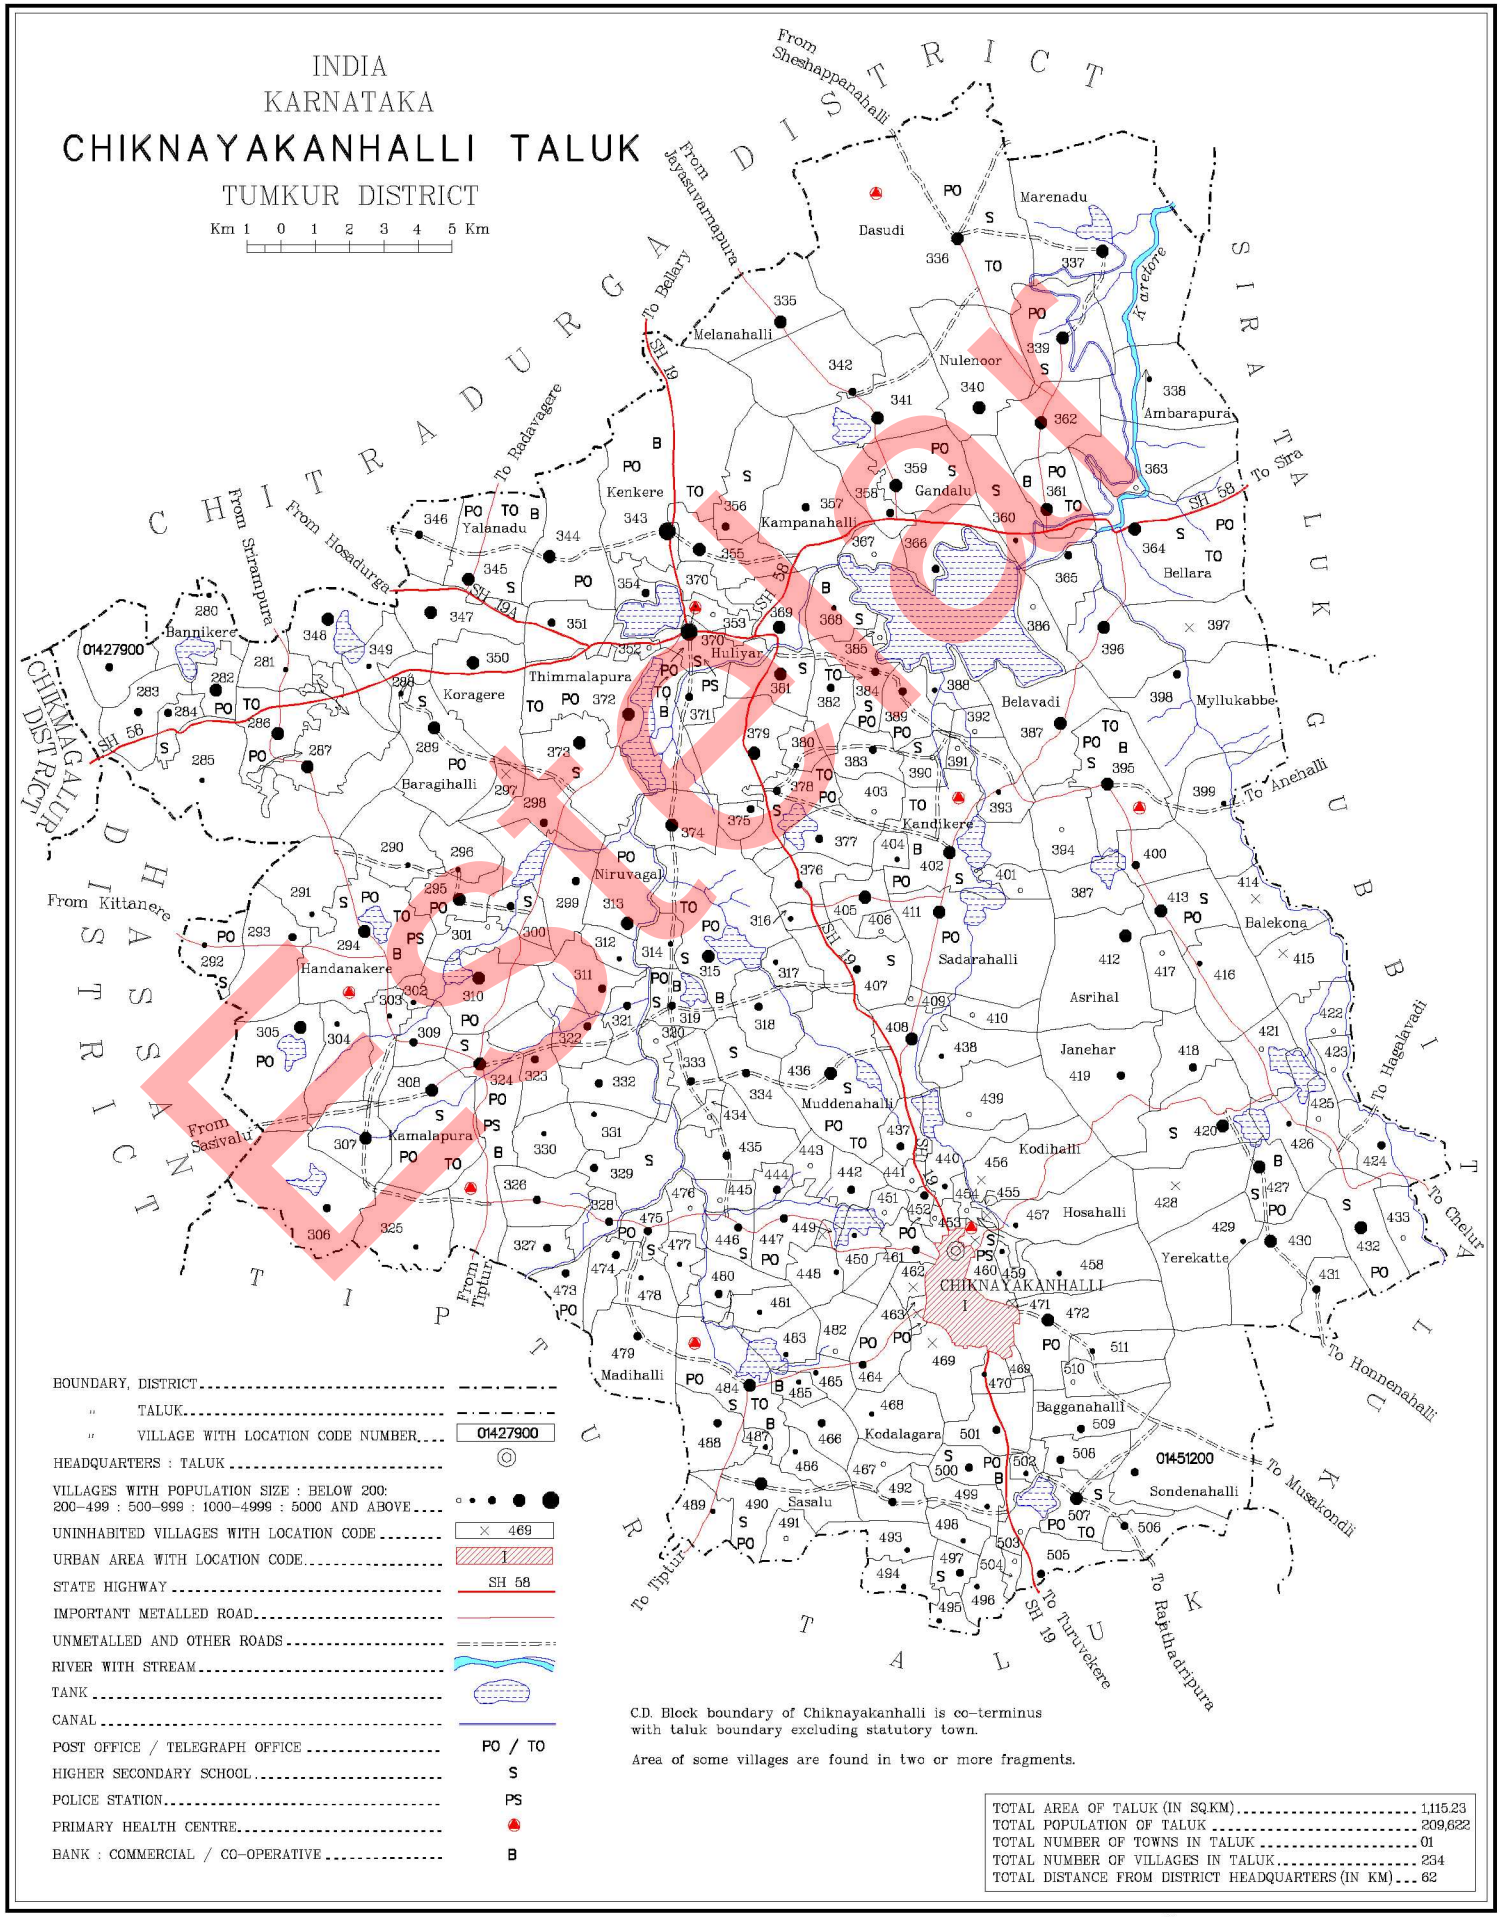

4. TIBETO-BURMESE

1. Adi, 2. Anal, 3. Angami, 4. Ao, 5. Bhotia,6. Bodo/ Boro, 7. Chakesang, 8. Chakru/Chokri, 9. Chang, 10. Deori, 11. Dimasa, 12. Gangte, 13. Garo, 14. Halam,15.Hmar,16.Kabui, 17. Karbi/Mikir,18. Khezha, 19. Khiemnungan,20. Kinnauri, 21. Koch, 22. Kom, 23. Konyak, 24, Kuki, 25. Lahauli, 26. Lakher, 27. Lalung, 28. Lepcha, 29. Liangmei, 30. Limbu, 31.Lotha,32.Lushai/Mizo, 33. Manipuri (S), 34. Mao, 35. Maram, 36. Maring, 37. Miri/Mishing, 38. Mishmi, 39. Mogh, 40. Monpa, 41. Nissi/Dafla, 42. Nocte, 43. Paite, 44.Pawi, 45. Phom, 46.Pochury, 47. Rabha, 48. Rengma, 49. Sangtam, 50. Sema, 51. Sherpa, 52. Tangkhul, 53. Tangsa, 54. Thado, 55. Tibetan, 56. Tripuri, 57. Vaiphei, 58. Wancho, 59. Yimchungre, 60. Zeliang, 61. Zemi, 62. Zou.

5. SEMITO-HAMITIC

1. Arabic/Arbi.
