CENSUS OF INDIA 2001

SERIES-12 **KARNATAKA**

DISTRICT CENSUS HANDBOOK

Part - A & B

UDUPI DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

लोकाभिमुख
PEOPLE ORIENTED

Directorate of Census Operations, Karnataka

F O R E W O R D

1. The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to taluk/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri.H.Shashidhar, Director of Census Operations, Karnataka. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division, Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and other who have contributed to make this publication possible.

MOTIF

St.Mary's Island in Udupi District

St.Mary's Island is located near Malpe a small town of the district. It is said that Vasco-da-Gama landed in 1498 on one of these islands which he called 'El Padron de Santa Maria'. It is from this that these islands got their present name. They are just a few scattered projections of rock rising out of the western or Arabian Sea round about Malpe. The northern-most island is about a square mile in area and not more than 250 yards in width. It has coconut gardens, which make it the shadiest of all the islands and give it a true South Sea colour. Grapes that are sweet and saltish are also grown here. The island is noted for its famous basalt rocks, which have crystallised into columns and split into hexagonal mosaic. Perhaps, this is the only spot in India where basaltic rocks show up in such peculiar formations.

P R E F A C E

In the foreword to the 2001 series of the District Census Handbooks, Sri. D.K. Sikri, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain salient data on the population for every village and town as revealed by 2001 Census. They also contain a wealth of information regarding villages and towns which, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information is also of considerable importance in the context of planned development.

The District Census Handbook is divided into two parts: Part A contains information regarding each village and town (Village Directory and Town Directory collected from various sources) and Part B which contains the data on the population collected during 2001 Census - the Primary Census Abstract. The data published in Part B was collected during February-March 2001 in the Population Census.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in 1999. The Village Directory formats were mailed to the Deputy Commissioners of Districts for obtaining the village wise particulars through Village Accountants. Similarly the Town Directory formats were mailed to the Commissioners of Corporations, Chief Officers of Town Municipal Councils, Town Panchayats, etc. The village wise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1991 District Census Handbooks. The Household Schedules, which were canvassed to collect the population data during 2001 Census, were scanned and data captured was processed electronically. The Primary Census Abstract was generated centrally on the computers by Registrar General, India.

In compilation of the District Census Handbooks, the Census Directorate had the co-operation of various departments of the State/Central Government. The Census Directorate gratefully acknowledge their assistance.

I take this opportunity to offer my grateful thanks to Sri. H. Shashidhar, Director of Census Operations and Sri. S.R. Raghavendra Rao, Deputy Director (Retd.) for their valuable guidance. I am also thankful to all the officers and officials of this Directorate who have been actively involved in the compilation of this volume.

I am highly grateful to Sri. J.K.Banthia, I.A.S., Ex. Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Sri R.G. Mitra, Ex. Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General and Sri S.L.Jain Deputy Director of Social Studies Division and Dr. R.P. Singh, Ex. Deputy Registrar General (Map) for their guidance.

District Highlights - 2001

1. Udupi district is carved out from the erstwhile Dakshina Kannada district during the year 1997 (02-08-1997) and comprises 3 taluks viz, Kundapura, Udupi and Karkal.

2. Moodabidre Firka/Hobli of Karkala taluk was transferred to Mangalore taluk of Dakshina Kannada district during 1998 (26-06-1998).

3. Udupi district which has registered with 1,130 females per 1,000 males (sex ratio) is the highest in the state and stands 1st in rank.

4. The decadal growth rate of population is the least in Udupi district at 7.1 per cent in the state and the last in rank (27th).

5. In literacy, Udupi district stands 3rd in rank among the highest literacy rate districts in the State.

6. Udupi district stands in 24th place among the 27 in population size during 2001 Census.

7. By population density this district stands in 11th place among the high population density districts in the State.

8. Both male and female literacy rates in the district are 88.2 and 75.2 and stands 2nd and 3rd place among the highest sex-wise literacy rates districts in the State.

9. In Udupi district there are 981 female literates for every one thousand male literates compared to 723 in the State.

10. Udupi Urban Agglomeration has 960 female literates for every thousand male literates, which is highest among the cities and urban agglomerations in the State.

IMPORTANT STATISTICS, 2001

Particulars	Persons Males Females	State	Percentage	District	Percentage

18	Percentage of villages having Irrigated Area	96.97	II	100.00	I	100.00	I

ANALYTICAL NOTE

(i) HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

Introduction

The District Census Handbook is the most valuable district level publication brought out by the Census Organization. It contains micro-level data down to the lowest administrative units viz, revenue village in the case of rural areas and Division/Ward level in the case of urban areas. It is extremely useful to the planners, administrators, demographers, sociologists, etc., as it contains resourceful wealth of data regarding basic amenities available in each villages and towns of the district such as educational, medical, drinking water, post and telegraphs, transportation and communication, banks, societies, recreation clubs, power supply, export/import of important commodities and land use besides, the particulars revealed during the latest census enumeration. It is for the first time that the district census hand book series was included in the census publication programme at the 1951 census, in order to satisfy the growing demand by the administrators, the planners, research scholars, demographers and the other such census data users, for micro-level data. The idea of compiling the District Census Handbooks was pioneered by Sri R.A.Gopala Swamy, I.C.S. the then Registrar General, India and Ex-officio Census Commissioner of India, with a view to preserve the Census records prepared for areas below the district level. He proposed that all the district Census tables and Census abstracts prepared during the process of sorting and compilation, should be bound together in a single manuscript volume and named as the District Census Handbook and suggested that the State Government should take up printing and publication at their own cost. Then onwards, the District Census Handbooks were published in each Census with improved pattern with an aim to give the Census and Non-census data at micro level for each village of the taluk as a whole to suit the requirements of various departments.

The data in the District Census Handbook will help not only in local area planning but also in regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. The District Census Hand Book sought to replace “Part IV - Taluk Tables and Part V - Village Tables” of the earlier censuses and to present the basic demographic and economic data in the form of “Primary Census Abstract” in respect of each and every village and town within the jurisdiction of the district. The district census handbook consists of two parts, viz, Part A and Part B. Part A comprises village and Town Directory while Part-B contains Village and Town level Primary Census Abstracts. In addition, these volumes contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

District Census Handbook 1961

It was in 1961 Census that the scope of District Census Hand Book was shaped in the present form by presenting (i) an account of descriptive note on the district, (ii) a set of non-census data tables dealing with the administrative statistics of the district for a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban Primary Census Abstracts depicting the nine fold industrial classification of workers. Information on the availability of certain basic amenities in villages and towns, such as the source of drinking water and educational institutions was also presented in the volumes. However, the district census handbooks of 3 out of then existing 19 districts viz, Bangalore, Dharwad and Mysore were confined to the publication of the village-wise and urban (census enumeration block-wise) Primary Census Abstract only.

District Census Handbook 1971

During the 1971 census, the district census handbook was further refined to present the data in a systematic way. In view of countrywide uniformity in approach and to have a comprehensive coverage, the District Census Hand Books were presented in three parts each, for a district. Part A incorporated the Town and Village Directories. Part-B incorporated the Primary Census Abstract and included data, in the case of rural areas down to the village level and

in the case of urban areas up to the block level. In addition, an introduction was given wherein the changes in jurisdiction, if any, of the district or of the taluks and the changes in the number of villages between 1961 and 1971 were explained. Part-B was essentially demographic in nature and was the end product of the tabulation of the enumeration results. Part C incorporated other census tables and administrative statistics. For convenience, Part-A and Part-B of the District Census Hand Book were presented in one volume and Part-C in a separate volume. In part-C volume, the district and taluk maps were included. These maps were prepared on the basis of maps obtained from the competent authorities concerned.

District Census Handbook 1981

The District Census Hand Book series of 1981, had some new features along with the restructuring of the formats of village and town directories, keeping in view the comparability of 1971 data. All the amenities except power supply in the village were brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place/village where it is available were given. A few new items of information such as adult literacy centres, primary health sub-centres and community health centres/workers, data on the availability of Newspapers, Motor Vehicles, etc., in the village, were introduced in the village directory to meet the requirements of the "Revised Minimum Needs Programmes". A new column "total population and number of households" was introduced to examine the correlation of the amenities with the population and number of households they serve. The contents of Part-A were further enlarged by including two appendices, namely a list of villages not having any amenities and a distribution of villages according to the proportion of Scheduled Castes and Schedules Tribes in the total population of the village. The format of Town Directory were also modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items such as class of town and its population, population of SC & ST, decadal growth rate of population, working women's hostel, adult literacy classes / centres, storage system regarding drinking water supply etc., and also the information about the nearest place and distance having educational, medical and fire-fighting facilities, in case such a facility is not available in the referent town. A new statement on civic and other amenities in slums in Class I and Class II town were included to help the planners to chalk out their programmes of slum improvements.

District Census Handbook 1991

The presentation of the District Census Hand Book for the 1991 Census was more or less similar to the manner followed in 1981. The format of Primary Census Abstract was restructured slightly. Nine-fold industrial classification of main workers was given as against four-fold classification. The sex-wise population in the age-group of 0-6 was included in the Primary Census Abstract for the first time to enable data users to compute more realistic literacy rates as all the children below 7 years of age were treated as illiterate at the 1991 census. One of the important innovations in the 1991 census was the Community Development Block-level presentation of data in the village directory and Primary Census Abstract instead of the traditional taluk/PS level presentation. C.D.Block is the lowest administrative unit for developmental planning. The choice of the C.D. Block as the unit for data presentation was formulated to help the planners in micro-level developmental plans. Another important improvement at the 1991 Census was dissemination of data through magnetic tapes/floppies in which both the computer as well as manual codes for each revenue village were provided along with the corresponding codes of 1981 Census. In the volumes of the District Census Hand Books, the computer codes assigned to the revenue villages in the 1991 Census and the corresponding codes of 1981 Census were presented so that it may facilitate the data users to use the data either from magnetic tapes or computer floppies.

Scope of the 2001 District Census Handbook

Like in the previous censuses, the District Census Hand Book (DCHB) for the 2001 Census is brought out in two parts as usual viz., Part-A The Village and Town Directory, and Part-B the Village and Town Primary Census Abstract.

The District Census Hand Books for the 2001 census is essentially presented in the similar manner

in which the District Census Hand Books of 1991 census were presented. This is because the data would be comparable with the earlier censuses and also to study the changes taken place during the decades and hence the approach in 2001 census is similar to 1991 census. The contents have been slightly enlarged and the formats too are restructured to suit the requirements of the data users. In the village directory for 2001 census certain new amenities like, news papers, magazine received, Income-Expenditure of the local bodies, information on number of banks, credit societies, recreational and cultural facilities, most important commodities imported, manufactured and exported have been included whereas the information regarding the "Day or Days of market/*hat* if any" which was there in 1991 has been excluded. Apart from providing the information about the nearest place and distance in broad ranges for villages not having basic educational and medical facilities, information about the nearest place and distance in broad ranges for villages not having Middle School, College, Hospital (Allopathic), Maternity and Child Welfare Center and Primary Health Center are also provided this time. However, in the town directory there are no changes except in the statement IV-A where this statement is separately numbered as Statement VII in 2001. Except these, the scope of 2001 series of the District Census Hand Book has, by and large remained the same as in 1991. The non-census information collected at the village level and town level was scrutinized and verified. In case of glaring discrepancies the data were cross-checked with data made available by the respective parent departments for validation.

One of the significant changes made in 2001 series of District Census Hand Book is that Primary Census Abstracts are available to the jurisdiction of the Panchayats in the district. With the constitution (73rd Amendment) Act, 1992, it has become necessary for the census organisation to provide population data for the territorial area of a panchayat in order to strengthen panchayat raj system in the country. In view of this, panchayat-wise population figures for total population and for Scheduled Castes and Scheduled Tribes population has been compiled and presented in the form of Annexure-I for each district.

Further another important step taken during the 2001 census, is assigning the Permanent Location Code Numbers (PLCN) to the villages. Location code number is a simple but unique device by which every area in an administrative unit in the State/U.T. can be identified. Thus assigning of Location Code Numbers at various administrative levels, right from State/U.T. to the lowest level namely enumeration block, in census taking is an important step. Each clearly demarcated area can be referred to by a combination of numbers. In a State or U.T. the next administrative area is District, followed by taluk or police station, circle, Development Block or Mandal, etc. Next below this administrative area, in urban areas are cities/towns, further divided into wards/divisions and villages in rural areas. The Location Code Numbers to various administrative areas are assigned in an orderly manner always beginning from northwest point and the numbering proceeds in a serpentine manner, keeping the geographical continuity, ultimately ending at the South-East point.

There was a great demand from different organizations to study the village level data over a time span and hence a scheme of assigning permanent location code numbers to the villages and the higher levels of administrative areas is devised to ensure data comparability over a period of time. In Indian Census, Location Code Numbers are allotted to each village based on traverse system (zigzag) in a serpentine manner at taluk level. These numbers for villages run from '1' to 'N' in each taluk independently. This system was adopted until 1991 census. But, for the Census of India 2001, all the villages in a state/U.T. are assigned with a Location Code Number in one continuous series beginning from "1" to "N" for the entire state/U.T. and it is not confined to a taluk. The field length of the complete PLCN structure for a village has been kept up to 8 digits and therefore the location code number of village in a taluk contains 8 digits number for 2001 Census.

(ii) BRIEF HISTORY OF THE DISTRICT

During 1991 Census, the geographical and political map of Karnataka state depicted the territories of 20 districts. As a sequel to Government of Karnataka's Notification No. RD 42 LRD 87 Part 3, Bangalore dated 2nd August 1997, published in extra-ordinary Gazette No. 894 dated 02-08-1997 seven new districts took their birth showing territorial

changes on the administrative and political map of Karnataka during the 2001 Census, thus raising the numbers to 27 from 20.

The district Udupi is one of these newly formed seven districts of Karnataka carved out from the erstwhile Dakshina Kannada district during 1997. Dakshina Kannada was formerly known as South Kanara which has now completed almost 200 years of existence. Geographically the region is separated from the rest of south interior peninsula by the towering heights of the Western Ghats. Out of 8 Taluks of Dakshina Kannada, 3 taluks were transferred to Udupi district. Headquarter of the district is Udupi and the district is named after its headquarter. The objective of bifurcation of the Dakshina Kannada district was to hasten the pace of development in the region as also to provide an administration responsive to the needs and aspirations of the people.

"Udupi" is derived from the word "Udupa" which means Moon in Sanskrit and is associated with the establishment of the ancient Chandramouleshwara temple. The place where Udupa (Chandra or Moon) performed penance to ward off the curse by Daksha Prajapati and obtained grace is known as "Udupi". Udupi is famous for its temple enshrining Lord Krishna. The district is located at the foot of Western Ghats running along the west coast of Karnataka. Apart from Udupi Sri Krishna temple, the other important temples in the district are Kollur Mookambika, Hattiyangadi Ganapathi, etc. Dravidian form of worship of the Cobra, spirits and trees are prevalent in the district. Jainism spread from its spiritual centres at Sravana belagola, Karkal, Koppala, etc. Its principles of Ahimsa and of spiritual self-reliance had a special appeal. The world famous Gomateshwara statue, which is 41½ feet high and other jain temples are at Karkal in Udupi district.

One among the triad of "three great Acharyas" was Madhwa born in 1238 A.D. near Udupi (Pajaka Kshethra). He taught the Dwaita doctrine, the doctrine characterised by unqualified dualism and devotion to lord Vishnu. He founded eight pontifical seats at Udupi for the worship of Lord Krishna, whose temple also he erected and is famous as "Udupi Sri Krishna temple".

Christianity started to exert its real influence from 17th century onwards, gathering momentum in 19th century. It is said that the earliest Christian settlement appears to have been at Kalyanpur near Udupi, where it is said a Christian Bishop used to reside much earlier. Number of churches were established near Udupi. Prominent among them being the Churches around Kalyanpur, Brahmavar, Shirva and Belman. Perhaps the advent of modern education in this area is attributed to the churches and their activities.

The historic name of the district which was "Tuluva" or "Tulunadu" which was changed to South Kanara and then to Dakshina Kannada, now bifurcated into Dakshina Kannada and Udupi districts. The district, like the rest of the territory between Kanyakumari (cape comorian) in South, and Thana in Maharashtra, in the north claims its origin with the land reclaimed by Parashurama, one of the ten avatars of Vishnu by throwing a hatchet from the peaks of the western ghats to Arabian sea. Parashurama is said to have brought Brahmins from Aryavartha to settle in this tract. The temple of Renuka on the Kunjaragiri hill near Udupi is believed to have been built in honour of his mother by Parashurama himself.

According to the inscriptions, the earliest known rulers of this region were the Chutus (Tulus). Between 200 A.D. and 600 A.D. the Kadambas, the Brahmin Kings of Banavasi ruled over this tract till they were defeated by the Chalukyan King Kirtivarma. But the influence of the Kadambas as feudatory princes under successive dynasties - Chalukyas, Rashtrakutas and Vijayanagar emperors continued for some time. In about 575 A.D. the reign of Western Chalukyas commenced and they appointed the Alupas to rule the region as their feudatories. But the Alupas being powerful asserted their own rights and declared independence. But Pulikeshi II of Western Chalukyas subjugated them. Pallavas ruled the region between 642 AD and 653 AD after which the country went back to the western Chalukyas, with Alupas as their feudatories till 757 A.D. It is said that Alupas continued to remain the feudatories of the new overlords till 770 A.D. Thereafter for nearly a hundred years till the first quarters of the 10th century A.D. nothing much is known about the history of the Alupas. The headquarters of Alupas from Udyawara to Barakuru (Barkur) has taken place during this period of time. For some time this area

was under the Hoysala rule and then under the Vijayanagara rulers. Keladi Nayakas have ruled this area since 1554 A.D. to about 200 years. It was during this period that the fort at Barkur was built by them. In 1763 A.D. Hyder Ali of Srirangapatna conquered this area and established his reign and thereafter his son Tipu Sultan reined till 1799 A.D. After the defeat of Tipu Sultan by the British during 1799 A.D., the district was attached to the Madras province under the British Government, till 1947 when the country got Independence. Thereafter till 1956 it continued in the Madras Province and then became a part of Mysore State when the re-organisation of linguistic states constituted in the country.

(iii) Administrative setup and jurisidictional changes during the decade, 1991-2001

Udupi district belongs to the coastal region and is situated at the foot of Western Ghats running along the west coast of Karnataka. Located 60 Kms north of Mangalore city on the National Highway No.17, in the verdant surroundings of the Western Ghats and the Arabian sea-coast; this district comes under the Mysore Revenue Division, which is one of the four Revenue Divisions into which the state is organised for the purpose of general administration.

Total number of Towns/ Village

The areas of the declassified towns are distributed among the concerned revenue villages from which the towns have been constituted earlier. Thus, there is no increase in the number of revenue villages but only increase in rural area while urban areas is converted into rural and decreased.

Udupi district which is carved out as a separate district from the erstwhile Dakshina Kannada during 1997, now consists of one revenue sub-division, Kundapura and the 3 taluks of Kundapura, Udupi and Karkal minus Moodabidre firka/hobli; comprising in all 248 villages and 6 towns. The 6 towns are Kundapura, Udupi, Saligrama, Mallar, Yenagudda and Karkal. Out of these 6 towns, 4 are statutory towns and 2 are non-statutory towns (Census Towns). The geographical area of the district 3557.43 Sq.Kms (provisional). The changes in the administrative set up in the district since 1991 are (1)The Moodabidre firka/hobli comprising 26 villages and Moodabidre TMC of Karkal taluk has been transferred to Mangalore taluk of Dakshina Kannada district while carving out the new district of Udupi from erstwhile Dakshina Kannada District vide Notification No. D.C.D.K. Order No. ELN(2)/CR 79/98-99 dated 26-06-98, (2) out of 13 towns of 1991, 4 towns viz, Baindur (TMC), Gangolli (NMCT), Hosangadi Colony (NMCT) and Tonse West (NMCT) are declassified into grama panchayaths, 1 town viz Moodabidre (TMC) is transferred to Mangalore Taluk of Dakshina Kannada district and 3 towns viz, Badagabettu 76 (NMCT), Malpe (NMCT) and Puttur (NMCT) have been merged with Udupi CMC, thus remains 5 towns. One more census town viz, Yenagudda has been constituted during 2001 Census. Thus, the district has only 6 towns. The decrease in the number of towns from 13 to 6 in the district is attributed to declassification, transfer, merger of towns with Udupi CMC and constitution of a new town. The statement below will give a clear picture of the towns in the district as of now.

STATEMENT SHOWING THE NUMBER OF VILLAGES / TOWNS IN EACH TALUK OF THE DISTRICT, DECADAL VARIATIONS IF ANY AND REASONS THEREOF

Sl. No.	Name of the Taluk	Total No. of villages as per the list finalised for		Total No. of towns as per the list finalized for		Reasons for variation
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
1	Kundapura	99	95	1	4	The total number of villages which was 95 in 1991 has risen to 99 in 2001 due to addition of villages viz Baindur, Yedathore and Teggarse constituent units of declassified town of Baindur Town Municipal Council and Gangolli Census Town lost its urban status for not satisfying the urban criteria, hence included in the village list of 2001 Census. Further Hosangady Colony, a Census Town in 1991 and part of Hosangadi village also lost its urban status for not satisfying the urban criteria and hence included in the Hosangadi village.

Sl. No.	Name of the Taluk	Total No. of villages as per the list finalised for		Total No. of towns as per the list finalized for		Reasons for variation
		2001 Census	1991 Census	2001 Census	1991 Census	
1	2	3	4	5	6	7
						This has not affected the total number of villages in the taluk.
2	Udupi	99	99	4	7	Though the total number of villages remained same at 99 both in 1991 and 2001 Censuses deletion and addition of villages have occurred during the decade. Yenagudda village satisfied the urban criteria and now treated as an urban unit and consequently its name was deleted from rural frame. Tonse West a Census Town in 1991 lost its urban status for not satisfying the urban criteria and hence included in village list of 2001 Census. Further three urban units of 1991 Census viz, Badagabettu - 76, Malpe and Puttur and two outgrowths namely Shivalli and Herga were completely included in he extended limits of Udupi City vide Government Of Karnataka Notification No. HUD 261 MLR 95 dated 20-10-1995. However this has no effect on total number of villages in the taluk.
t						
3	Karkal	50	76	1	2	Mudbidri firka (26 villages) along with Mudbidri Town Municipal Council was transferred to Mangalore taluk vide Government of Karnataka Notification No. RD 42 LRD 87 Part III Bangalore dated 25-03-1998. Owing to this transfer, the total number of villages, which stood at 76 in 1991, came down to 50 in 2001.
Total		**248**	**270**	**6**	**13**	

Urban local bodies

The statutory urban local bodies are the Municipal Corporations and Municipal Councils. These urban local bodies elect Councilors/ Corporators from each ward and the tenure of the Councilors/Corporators would be for five years. The President or Vice-President of the Municipal Council and the Mayor/Deputy Mayor of the Corporations whose tenure will be for a period one year, are elected from among the elected Councilors/ Corporators. The Chairman of various committees are also elected from among the elected Councilors for a term of one year.

The Chief Officer in Municipal Council and the Commissioner in a City Corporation are responsible for day-to-day administration and the executive authority is vested with them.

Zilla Panchayat and Taluk Panchayat

To promote the development of institution and secure greater measure of participation by the people in the local and governmental affairs by decentralization of power and functions for the purpose of development, planning and implementation of various programmes thereof Zilla Panchayats have been constituted in the State. The jurisdiction of Zilla Panchayat is coterminous with that of the corresponding district but excludes the statutory towns. Accordingly, Zilla Panchayat has been constituted for Udupi district and its jurisdiction extends over the Taluk Panchayats of the district. The jurisdiction of each Taluk Panchayat is coterminous with that of the taluk of the same name but excludes the area incorporated in the statutory towns or cities, if any.

The Zilla Panchayat elects its president and vice-president and chairman of its committees from amongst the elected members. The term of these elected representatives will be for five years. An IAS officer is posted by the State Government as Chief Executive Officer of the Zilla Panchayat. Various departments assist the Panchayat.

Grama Panchayats

The Government of Karnataka enacted the Karnataka Panchayat Raj Act 1993 on 30.4.1993 replacing its previous enactment in this regard for the formation of Gram Panchayat.

STATEMENT SHOWING THE TALUKWISE NUMBER OF GRAMA PANCHAYATS AND HOBLIS/ FIRKAS

Sl. No.	Name of Taluk	No. of Hoblis/Firkas	No. of Grama Panchayats
1	2	3	4
1	Kundapura	3	56
2	Udupi	4	61
3	Karkal	2	29
	Total	**9**	**146**

Details regarding Panchayatwise number of villages are furnished in Annexure I.

The Grama Panchayat is authorized to function on the items listed in Schedule I of the Act namely, preparation of annual plans for the development of Panchayat area, preparation of annual budget, providing reliefs in natural calamities, removal of encroachments on public properties, organising voluntary labour and contribution for community works, maintenance of essential statistics of the village, in addition to matters relating to Agriculture, Animal Husbandry, Fisheries, Social & Farm Forestry, Khadi, Village & Cottage Industries, Rural Housing, Drinking Water, Roads, etc., Rural Electrification, Non-conventional energy sources, Poverty Alleviation Programmes, Markets & Fairs, Rural Sanitation, Public Health & Family Welfare, Women and Child Development, Social Welfare, Welfare of Weaker Sections, Public Distribution System, Maintenance of Community assets, Construction and Maintenance of Dharmashalas, Chatras, Cattle Sheds, Ponds, Cart Stands, Slaughter Houses, Public Parks, Play Grounds, etc. Regulation of manure pits in public places and establishment and control of shandies. Such other functions as may be entrusted.

The Grama Panchayat is also empowered to make provisions for carrying out within its area any other work or measure which is likely to promote the health, safety, education, comfort, convenience or social or economic well being of the inhabitants of the Panchayat area.

(iv) PHYSICAL FEATURES

Udupi district lies in the coastal region and is situated at the foot of Western Ghats running along the West Coast of Karnataka. Udupi is located at the southwest corner of the Karnataka State. It has the greatest extent of 98 kms. from north to south and 66 kms from east to west covering a total geographical area of 3,557.43 sq.kms. The most conspicuous areas of very high and very low area of the district is located at 100 and 500 meters of contour lines above the mean sea level respectively.

(1) Location and size

Udupi district is situated on the western coastal side. It lies between North latitude 13 degrees 8 minutes and 14 degrees and East longitude 74 degrees 30 minutes and 75 degrees 13 minutes. Udupi district is bound on the north by Uttara Kannada district, on the east by Shimoga and Chikmagalur districts, on the south by Dakshina Kannada district and on the west by the Arabian Sea. The district has a coastal line, which is nearly 100 kms. in length with rich marine output; with beautiful beaches, verdant Western Ghats, abundant religious and spiritual centres.

(2) Physiography

The district comprises a long and narrow strip of territory running north by south and is about 100 kms. in length. It has a coastline of about the same length. The breadth varies between 10 kms. at the narrowest northern most tips and is about 40-45 kms. at the broadest portion. This small district is seems to consist of six natural divisions. The coastline, which is lone and sandy, is indented by numerous bays and creeks, which have been formed by river estuaries. The landscape forms a broken lone plateau spreading out from the foot of the Western Ghats towards the Arabian Sea and is characterised by several watercourses and numerous valleys containing rich alluvial soils. In the north, particularly in the Kundapura taluk, the western Ghats are nowhere more than 40 kms. from the sea and at one point there is an extent of only about 10 kms. of plain land and it is here that the northern boundary of this district and

the southern boundary of the Uttara Kannada district meet. The scarp-edge of the Western Ghats, the peaks of which vary in altitude from 910 to 183 meters Mean Sea Level (MSL), forms the eastern boundary of the district. In the northern portion of the mountainous range there are steep cliffs whereas in the southern portion there are parallel ridges intersected by deep valleys. The most important mountains of this district is the peak of Kodachadri, about 27 kms. from Kundapura, which is 1,341 meters (4,400 feet) high.

(3) Drainage

The main drainage of the district is westwards. On account of the situation of Western Ghats on the eastern part of the district, the rivers and streams of this district necessarily flow from east to west. The rainfall of the Southwest monsoon which is very heavy and the broken nature of the area are responsible for the rise of a number of rivers and streams and also the great volume of water in them at monsoon times. During the monsoon, the current in these rivers is rapid rendering them unfavourable as a means of communications. In the dry weather, the rocky character of the riverbeds is exposed and they are not usually navigable for any length above the reach of tidal influence. Varahi, Gangolli, Sitanadi and the Swarna are the important rivers of the district. In the monsoon season, all the rivers and streams become swollen due to heavy rains and some of them overflow their banks, inundating the surrounding areas. But they do not last long, for they retrieve to their normal positions within a short period.

(4) Climate

The climate of this district is marked by heavy rainfall, high humidities and oppressive weather in the hot season. The year may be divided into four seasons. The hot season from March to May is followed by the Southwest monsoon season from June to September. October and November constitute the retreating monsoon or post-monsoon season. December to February may be called the northeast monsoon season, although the rains associated with the northeast monsoon cease after December and the rest of the season is generally dry. May is the hottest month during which the maximum temperature would be around 32.6 degree Celsius and the minimum stays around 26.1 degree Celsius.

(5) Winds

Generally winds are strong and are mainly westerly or southwesterly during the southwest monsoon months. In the rest of the year, winds are mainly from the directions between north and east in the forenoons and westerly or north westerly in the afternoons. The district experiences a special weather conditions during the period April to June where thunderstorms occur for about three to six days in a month and during the post monsoon months of October and November, storms with heavy thunders prolong for five to seven days in a month. During this period the district receives heavy rainfall with high squally winds along the coastal belt.

(6) Rainfall pattern

The District falls under coastal agro-climatic zones of the state. The district has a good network of registered rain gauge stations; 14 in Kundapura taluk, 9 in Karkal taluk and 5 in Udupi taluk. The main rainy season is from June to September. The rainfall increases from the coast towards the Western Ghats on the eastern border of the district. In the coastal strip in the northern part of the district, in the Bhatkal-Baindoor region, the rainfall is heavier than in the southern coastal strip. More than 85 per cent of the annual rainfall is received during the southwest monsoon season; July being the month with the heaviest rainfall. On an average, on 124 days in a year the district gets rainfall. However, the amount of rainfall as also the number of rainy days varies considerably within the district. The weather conditions of the district are well suited for the cultivation of paddy in the fields and for raising plantation crops like Arecanut, Coconut and Banana on the slopes of hills and in the valleys.

The average Rainfall in the district ranges from 3746 mm in Kundapura taluk to 4,731mm in Karkal taluk. The rainfall decreases from southern part of the district towards northern part (Please see Appendix-XI).

Among the taluks in the district the premonsoon rainfall contributes 5 to 7 per cent of the annual rainfall, southwest monsoon contributes 85 to 88 per cent and northeast monsoon contributes 6 to 9 per cent of the annual rainfall.

The coefficient of variation ranges from 70 to 100 per cent for the premonsoon season, the highest variability (100%) being in Kundapura taluk.

The coefficient of variation for southwest monsoon ranges from 17 to 18 per cent, the highest being in Udupi taluk. The coefficient of variation for northeast monsoon ranges from 40 to 53 per cent, the highest being for Udupi taluk.

The coefficient of variation for Annual rainfall ranges from 16 to 17per cent. The taluks of Udupi and Kundapura experiences high variability of rainfall.

TALUK WISE RAINFALL PATTERN, UDUPI DISTRICT

Taluks(No. of Years of Rainfall	Statistical Parameters	Pre Monsoon	South-West Monsoon	North-East Monsoon	Annual Rainfall
1	2	3	4	5	6
Karkal (91)	Average rainfall (mm)	260	4,034	437	4,731
	Minimum rainfall (mm)	13	2,230	118	2,278
	Maximum rainfall (mm)	973	5,984	990	6,599
	Standard Deviation (mm)	183	696	173	764

Kundapura (90)	Average rainfall (mm)	225	3,291	231	3,746
	Minimum rainfall (mm)	0	1,613	31	2,436
	Maximum rainfall (mm)	1,084	4,905	585	5,898
	Standard Deviation (mm)	224	565	113	645
	C.V. (%)	100	17	49	17
Udupi (91)	Average rainfall (mm)	249	3,292	278	3,818
	Minimum rainfall (mm)	0	1,622	46	2,221
	Maximum rainfall (mm)	1,063	5,052	583	6,336
	Standard Deviation (mm)	210	587	148	660
	C.V. (%)	85	18	53	17

A study of the rainfall deficit pattern during the last 20 years compared with the long term data for different seasons indicate increase in rainfall deficiency in the recent past during the premonsoon and northeast monsoon period. Rainfall deficit during last 20 years has been compared with that of long-term data in different seasons and is presented in given below.

TALUKWISE AND SEASONWISE COMPARISION OF RAINFALL DEFICIT DURING LAST 20 YEARS WITH 99 YEARS DATA, UDUPI DISTRICT

	Seasons and no. of years with deficit rainfall							
	Pre Monsoon		Southwest Monsoon		Northeast Monsoon		Annual Rainfall	
Taluks	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs.	Long term	Recent 20 Yrs	Long Term	Recent 20 Yrs.
1	2	3	4	5	6	7	8	9
Karkal (91)	43(47)	13(65)	9(10)	2(10)	31(34)	8(40)	7(8)	2(10)
Kundapura (90)	58(64)	16(80)	13(14)	4(20)	35(39)	4(20)	17(18)	4(20)
Udupi (91)	46(51)	13(65)	13(14)	2(10)	36(40)	8(40)	14(15)	3(15)

Note : Figures in bracket indicate values as percentage of number of years for which data is available or for 20 years depending on the column in which it is given

***Source** : Drought Monitoring Cell (Society of Govt. of Karnataka)*

- The Premonsoon rainfall in the recent 20 years is more deficits compared to the long-term data.
- Southwest monsoon is less deficit in the recent 20years compared to the long-term data, except for Kundapura taluk.
- The rainfall deficit during northeast monsoon is increasing during recent 20 years compared to the long-term data, in Karkal taluk and decreasing in Kundapura taluk.
- The trend analysis of annual rainfall indicates decreasing trend in the taluks of Kundapura and Karkal. The taluk of Udupi indicate no significant change.

(7) Forestry

Geographically the region is separated from the rest of south interior peninsula by the towering heights of the Western Ghats. The slopes of the Western Ghats are clothed with dense forests containing valuable timber species. The heavy rainfall in this area stimulates the growth of the forests, which some times, begin within a few kilometers of the seacoast. Generally, dense forest begins about 30 to 40 kms. from the coast. Six types of forests are found in the State. Of these, the district is naturally blessed with evergreen, semi-evergreen and moist forests. As per the statistics provided by the Directorate of Economics & Statistics, out of the 356,446 hectares of the total geographical area, 99,201 hectares are covered under forest forming about 27.8 per cent of total geographical area. Dense forest areas are more in Kundapura and Karkal taluks.

(8) Geology

Geologically, the district contains rock formation belonging to the earliest period of the earth's history, namely the Archean epoch; except on the coastal strip. The coastal region contains recent and sub-recent deposits and the lateritic formations. The older metamorphic rocks constitute mainly the Dharwars and these are represented by the banded ferruginous quartzites and by the talc and hornblende schists.

(9) Flora and Fauna

Flora : The climatic and soil conditions of the district have promoted the spontaneous growth of plants and trees in almost all parts. The slopes of Western Ghats are clothed with dense vegetation. In the coastal belt however the tree-growth is somewhat sparse. The chief timber trees are the teak, rosewood, Ben teak, kiralbhogi, matti maravu and kada halasu. The flora is luxuriant as well as complex and includes species like Casuarinas, Cashew trees, mango trees, etc. which are not indigenous to the area. Climbers, reeds and canebrakes are found in abundance on the slopes of Western Ghats in the district. The pineapple was perhaps introduced into the district by the Portuguese and now it grows in considerable quantity all over the district. Turmeric is chiefly found in the Karkal taluk but is grown in small patches all over the district. Ginger, Cardamom, Plantains, Pepper are some of the crops which are grown in the district.

Fauna : A large extent of forestlands in the district affords a safe home to wild animals of the type generally found in Southern India. Bison, Sambar, Spotted deer, Wild boars, Monkeys, Rabbits, Foxen, Porcupine, Mongoose, Squirrels, etc. are amongst the important types of animals found in the district. Among the reptiles cobras, python, rat snakes and the harmless green whip snakes are found in all parts of the district. The rivers, streams and the sea abound in a variety of fishes. Among the insects, butterflies and moths are found in great variety. The number of leaf insects and the stick insects is also considerable. The only economically valuable insect is the bee, which builds its nest on the higher branches of the lofty trees or in the clefts of rocks. Birds such as peafowl, jungle fowl and spur fowl are seen in the forests. Partridges are not very common but pigeons of several kinds are found. Domestic animals reared in this district are cattle, goats, buffaloes, sheep, horses and donkeys. Pigs of the common country breed are reared by some people. Fowls are kept by a large number of households. Particular attention is even now paid to the rearing of gamecocks, since cock fighting is a favourite pastime of the people in the rural sector.

(10) Soils

The soils of the district are essentially derived from the coastal strip which is type of soil classified as recent and sub recent deposits and the lateritic formations. The rock formations in the rest of the area belong to the earliest period of the earth's history - the Achaean epoch. The soil in the district is of a lateritic type characterized by a high iron and aluminium content. This variety usually occurs in heavy rainfall zone and is suitable for crops such as paddy, sugarcane, areca nut, coconut, cardamom and plantains. The numerous valleys and ravines however contain fertile alluvial soil.

(11) Cropping pattern

Agriculture is an important livelihood for the people of Udupi besides fishing. According to the figures of the Census of India 2001, 19.9 per cent are cultivators and 18.0 per cent are agricultural labourers, which only highlights that there is a high proportion of cultivators and agricultural labourers in the district.

LAND USE PATTERN FOR 1998-99 IN HECTARES

Name of Taluk	Geographical Area	Forest Area	Land put to Non-agricultural use		Uncultivable Fallow Land			Cultivable Fallow Land	Area Sown			Total Net Area Irrigated

The Land Use Data for the district for the year 1998-99 reveals that the net area sown is 28.1 per cent and the total area sown is 37.19 per cent. The cultivable waste land accounts for 9.09 per cent. The table on land use pattern for Udupi district reveals that considerable extent of land that can be put under cultivation has not been used.

The land holdings for the year 1997-98 of different size are shown in the above table. The size of the agricultural holdings is one of the important factors that determine the productivity of the land. From the above table, it is observed that the number of marginal holdings below one hectare and small holdings of size one to two hectares is high which constitute about 86.9 per cent of the total holdings. Only 675 holders own land more than ten hectares.

AREA, PRODUCTION AND AVERAGE YIELD OF PRINCIPAL CROPS FOR 1998-99 UNDER ALL SEASONS

Principal Crops	Irrigated			Un-irrigated			Total		
	Area in hectare	Production in tones	Yield in Kgs. per hectare	Area in hectare	Production in tones	Yield in Kgs. per hectare	Area in hectare	Production in tones	Yield in Kgs. per hectare

Note : * Data for Irrigated and Un-irrigated area separately are not available

Paddy is the only major cereal crop grown in the district. The soil in the district is of a laterite type characterized by high iron and aluminium content. This variety usually occurs in heavy rainfall zones. This laterite type of soil is suitable for paddy, sugarcane, areca nut and plantation crops like cardamom and plantains. About 69 per cent of the net-cropped area is put under paddy cultivation. The yield of paddy under irrigated area is 2,877 kgs. per hectare and under un-irrigated area it is 2,739 kgs. per hectare. The other oil seed crops grown in the district are groundnuts and sesamum. The total area put under these crops is 3,366 hectares. Sugarcane is the only commercial crop grown in the district. Sizeable hectares of land is put under plantation and horticultural crops. The chief crops grown are cashew nut, mango, banana, sweet potato, sapota, brinjal, papaya, tapioca, lemon, guava, and onion. Total area put under cultivation of plantation and horticultural crops is 21,985 hectares of land. Udupi is also known for growing of coconut and areca nut in plenty. The other condiments and spices produced in the district are dry chillies, turmeric, dry ginger and black pepper. One special variety of brinjal known locally as 'Udupi Gulla' is grown in this district.

AREA, PRODUCTION AND AVERAGE YIELD OF CROPS FOR 1998-99 UNDER ALL SEASONS

Crops	Area in hectares	Production in tones	Yield in Kgs. per hectare

(12) Irrigation

There are no major irrigation projects in the district. The district enjoys an average annual rainfall of 4,239 mm and when compared to other districts it ranks first in the state in receiving the highest rainfall. The district is mostly dependent on southwest monsoon, which receives about 85-88 per cent of rainfall. The peculiar formation of the district

on account of undulations with deep valleys interspersed with ridges and tablelands, makes it difficult for reclamation and cultivation. Moreover, the abundant water available in the rivers and rivulets received from heavy rainfall drains off into the Arabian Sea without being utilized due to lack of facilities for storing the monsoon showers. In the recent past efforts are being made to improve the irrigation facilities and to bring more areas under irrigation. The table below gives a detailed picture on Net Area Irrigated by different sources for the year 1998-99.

NET AREA IRRIGATED BY DIFFERENT SOURCES

Name of Taluk	Net area irrigated for 1998-99 (Area in hectares)						
	Canal	Tank	Wells	Lift Irrigation	Bore Wells	Other sources	Total
1	2	3	4	5	6	7	8
Karkal	-	67	2,284	38	163	5,658	8,210
Kundapura	-	160	4,017	-	670	7,216	12,063
Udupi	-	2,029	5,943	128	35	5,842	13,977
Total	**-**	**2,256**	**12,244**	**166**	**868**	**18,716**	**34,250**

Source : Udupi District at a Glance, 1999-2000, District Statistical Office, Udupi

As per the statistics given in the above table, a considerable proportion of cropped area is being irrigated through wells in the district. It accounts for 35.75 per cent of the total irrigated area. According to the latest statistics published by the Gazetteer department of Government of Karnataka, Udupi has in all 15,273 wells up to the year 1975 which ranks 7th place in the state (Ref: A Handbook of Karnataka – 2001, Gazetteer Department, Government of Karnataka). An area of 2,256 hectares are being irrigated by tanks, of which a major proportion of them is in Udupi taluk.

The greatest irony is that even though the district has bountiful rainfall and has many rivers with plenty of waters received through heavy showers during the monsoon, these rivers are emptying into the sea without their waters being properly utilized. In order to prevent the water being discharged into the sea and also to provide irrigation for the agricultural operations, Varahi Irrigation Project was envisaged and was approved by the government in 1979 as a plan scheme. This project was designed to provide irrigation facility to an extent of 15,702 hectares benefiting Kundapura and Udupi taluks. The project aims at constructing a pick-up dam across river Varahi at Horiyabbe site near Siddapura village in Kundapura taluk by utilizing the daily discharge of tailrace water from Varahi Hydro Electric Project. Initially the height of the dam was proposed at 72 meters but subsequently reduced to 49.5 meters in order to reduce the submergence of forest area to the barest minimum of 275 hectares. In order to provide immediate irrigation facility to the farmers, a Varahi Lift Irrigation Scheme was accorded by the government in 1992.Under this proposal, an extent of 2,723 hectares will be irrigated through this scheme.

(Ref : Irrigation in Karnataka, 2001-2002, Government of Karnataka, Irrigation Department).

(13) Natural Wealth

Prior to the year 1960, the then undivided South Kanara district was considered to be poor in its mineral resources. But according to the results of the mineral survey conducted in 1960, the district has been declared rich in several useful mineral deposits. When compared to other taluks in the district, Kundapura is rich in its mineral wealth. The deposits of bauxite are abundant in Kundapura taluk and especially at Paduvare near Baindoor is quite extensive. Building stones are also quarried in Udupi and Karkal taluks. Lateritic and limonitic iron ore occurrences are reported in Kundapura taluk. Accumulation of lime-shell is found in the backwaters near Kundapura. The same is also reported in Udupi taluk. Pure white to greyish white silica sand is available along the coastal belt of Kundapura and Udupi taluks. The sand occurs as a thin layer, one to three feet in thickness, below the fine-grained brownish sand. About 20,275 MT (MT= Million Tones) and 92,494

MT of silica sand is produced annually in Kundapura and Udupi taluks respectively. No major minerals are found in Karkal except few minor minerals like black dyke, building stone and ordinary sand whose reserve is 882 MT, 92,465 MT and 625 MT respectively. The taluk-wise mineral resources for the district is presented in the following table :

TALUK WISE MINERAL RESOURCES OF THE DISTRICT

Sl.No.	Name of Taluk	Type of Mineral		Remarks
		Major	Minor	
1	2	3	4	5
1	Karkal	-	Building Stone, Black Dyke, Ordinary Sand	-
2	Kundapura	Aluminous Laterite,	Ordinary Sand, Building Stone Silica Sand, Lime Stone	-
3	Udupi	Lime Stone, Silica Sand	Building Stone, Black Dyke, Ordinary Sand	-

(14) Animal Husbandry

Livestock rearing plays an important role in the rural economy in the district. It supplements family income from agriculture and also provides employment. It is more vital wherever agriculture is predominant in the society. Farmers are dependent on animal husbandry activities to utilize agricultural by-products and crop residues to convert them into animal products with good returns. Particularly in this district, the climatic and topographical features have not been conducive for livestock rearing. Despite abundance of green vegetation, the livestock wealth of the district is not quite impressive. While comparing with other districts, Udupi ranks in 22nd place in its livestock population and 8th place in its poultry wealth (Ref : A Handbook of Karnataka–2001, Gazetteer Department, Government of Karnataka).

According to Livestock Census 1997 Provisional figures, the total livestock population in the district is 599,519, which includes cattle, buffaloes, sheep, goats, pigs, rabbits, and dogs. The total poultry stock is 994,000. The following table shows the distribution of various types of livestock in the district for the year 1997.

DISTRIBUTION OF LIVESTOCK POPULATION IN THE DISTRICT

Sl. No.	Name of Livestock	Total Livestock
1	2	3
1	Cattle	378,442
2	Buffaloes	74,582
3	Sheep	134
4	Goats	5,021
5	Pigs	1,634
6	Rabbits	125
7	Dogs	139,581
8	**Total Livestock**	**599,519**
9	**Total Poultry**	**994,000**

Source : A Handbook of Karnataka – 2001, Gazetteer Department, Government of Karnataka.

The milk production in the district is 15 thousand tonnes litres. About 447 lakhs of eggs and 144 tonnes of meat are produced annually in the district. There are thirty-two poultry institutions in the state. Out of which one Poultry Rearing Centre is at Kundapura.

(14A) Veterinary Services

The spread of veterinary services has resulted in overall improvement of animal health. In all Udupi has 92 veterinary institutions of different kinds as detailed below, catering to the needs of the livestock population in the district for the year 2000.

VETERINARY INSTITUTIONS IN THE DISTRICT FOR THE YEAR 2000

Sl. No.	Veterinary Services	No. of Institutions
1	2	3
1	Hospital	8
2	Dispensaries	22
3	Primary Veterinary Centres	55
4	Mobile Insemination Centres	3
5	Artificial Insemination Centres	4
	Total	**92**

Source: Karnataka at a Glance 2000-2001, Directorate of Economics and Statistics, Govt. of Karnataka

(15) Fisheries

Udupi district has rich resources for fisheries development. Its coastal line is about 100 km. Fishing is a major economic activity in the district. Udupi is known for marine fishing and its exports. The marine fish landing of Udupi district constitutes about 58,445.3 MT for the year 1998-99. Eight Fish Landing Centres and Malpe Fishing Harbour with all necessary infrastructures are located in Udupi district. The construction of II stage fishing harbour at Malpe to provide landing and berthing facilities to the increased fleet and deep sea fishing vessels is under progress. Udupi has 69 fishery link roads with the total length of 119.5 kms connecting the scattered remote fishing villages to the coastal high way.

Though in the recent past mechanized fishing is being practiced, a vast majority of the fishermen are still using the traditional fishing gears. The statistics on fishery for the year 1999 reveals that the district has 2,904 mechanized boats and 2,380 non-mechanized boats are being used for fishing purposes. The district has 9,963 various types of fishing nets for the purpose. Out of 89,882 Fishermen population, 39,492 are active fishermen. By way of comparison, it is higher than other districts of the state. The government has introduced various welfare schemes such as Saving-cum-Relief Scheme, Group Accident Insurance for active fishermen, Fisher Women Co-operative Societies, Development of Model Fishermen villages, Motorization of Traditional Fishing Craft, Reimbursement of Central Excise duty on diesel used by mechanized boats below 2- mtrs, subsidy on Sales Tax on diesel used by mechanized fishing boats and Receipt and Payment of Distress Relief Fund to improve the socio-economic conditions of the fishermen in the coastal districts. The following table highlights in brief the fishing activity in the district.

FISHING ACTIVITY IN THE DISTRICT

Fish Seed Stocked	In lakh fingerlings
a) Reservoirs	-

(16) Industries

Though agriculture is a predominant activity in the district, its growth in industrial sector is fast developing. There are no major industries in the district. However, the district is making all efforts to improve the small-scale industries in the region. The traditional industries around Udupi are tile manufacturing, beedi rolling, and cashew curing. The industrial units comprise of few textiles, chemicals and engineering units in the district. There are totally 227 factories in the district giving employment to 14,569 person. In the recent past, lot of small scale

industrial units have come into existence. When the district was newly created in 1997, the total number of units that was registered as on 31.03.1998 numbers to 5,214. The latest statistics as on 31.03.99 shows that it has increased to 5,632. Of these, food and intoxicants alone consist of 1,938 units. 481 mechanical engineering, 417 wood related units, 398 job works & repairs units and 302 textile units are a few to be mentioned. Besides these, there are also other units like automobile, electrical & electronics, chemicals, ferrous & non-ferrous, glass & ceramics, leather, paper & printing, rubber & plastics and other small-scale industrial units, which have registered their growth. The table below gives the taluk-wise details of major factories for the year 1998-99.

TALUKWISE DETAILS OF MAJOR FACTORIES FOR THE YEAR 1998-99

Name of Taluk	Number of Factories in the District					No. Employed
	Textiles	Chemicals	Engineering	Others	Total

Total	**2**	**8**	**12**	**205**	**227**	**14,569**

Source: District at a Glance 1998-99, Udupi, District Statistical Office, Udupi

(17) Trade and Commerce

The trade and commerce particularly the banking industry of the district is worth to be mentioned. Udupi has led the emergence of the banking and insurance sector in the region. Few important banks had their origin in the district. The corporation bank was established in 1906 in the district. The Syndicate bank was started in 1925 and has its headquarters in the district. Beside these, Canara bank, Vijaya bank, and Karnataka bank also had their beginning in the district. The small Udupi district boasts of having more than 200 bank branches. The Canara Mutual Assurance Company set up in 1935, was later merged with the LIC of India established in 1956. A major divisional office of the LIC is still functioning in the district controlling 8 districts in the state. The table below gives the taluk-wise details of banks in the district.

TALUKWISE DETAILS OF BANKS IN THE DISTRICT

Name of Taluk	Number of Banks as on 31.03.1999				
	Commercial Banks	Regional Rural Banks	Urban Co-op Banks	Other Co-op Banks	Primary Land Development Bank
1	2	3	4	5	6
Kundapura	42	4	-	6	1
Udupi	111	3	24	7	1
Karkal	35	4	-	3	1

Source: Udupi District at a Glance 1998-99, Directorate of Economics and Statistics, Udupi, Govt of Karnataka.

Udupi is an important business centre. Some important centres of Kundapura taluk are specialized in the exports of items like coconut, jaggery, firewood, tiles, timber, fish, and coir and its imports include hardware, cutlery, textiles, metal sheets, sugar, chillies, onion, garlic, etc. from other districts and states. The Malpe harbour in Udupi taluk is another main trading centre, which is engaged in the exports and imports of various commodities.

NUMBER OF CO-OPERATIVE SOCIETIES IN THE DISTRICT

Name of Taluk	Co-operation and Agricultural Marketing as on 31.03.99								
	Co-operative Societies					Regulated Markets			
	Agriculture	Milk Producers	Others	Total	Liqui-dated	Main	Sub	Total	Turnover in lakhs

There are also number of Co-operative societies in the district discharging useful functions in different parts of the district and are dealing with various items produced by them. The number of regulated markets are only 5 and the total turnover of these markets are around 101.45 lakhs. The table presented above gives the details of no. of co-operative societies in the district.

(18) Transport and Communication

Udupi is known for its well-managed transport system. It is even called as giant in public transportation. Several transportation companies have emerged from the district. The Canara Public Conveyance (CPC), Hanuman Motor Transport (H.T.Co.), Sri Durgamba Transport, Sri Gajanana Motor Transport, etc. are the private operators which still run the entire public transport in the region. The transportation in the district is excellent as these private operators reach out to the remotest places with a fairly complaint-free service. The private operator's bus service between Mangalore and Udupi offers an exemplary every minute service during the peak hours. There are also more than 200 buses ply to Mumbai and Bangalore every day. Apart from road transport, the district is connected by the railways too. The Udupi railway station became operational in the year 1993. The ambitious Konkan Railway Project connecting the Mangalore with Roha was opened for freight traffic in 1996. As a result, the Mangalore-Udupi line was started first and was extended to Kundapura in 1995. The district is connected to Dakshina Kannada in the South and Uttara Kannada in the North by rail.

Apart from road transport and the railways, water transport that includes inland waterways and ocean transport, that are crucial for economic growth, plays an important role in the district. Navigable portions are found in the Halady, the Kubja, the Chakra and the Kollur rivers in Udupi. The Malpe, Hangarakatta, Kundapura and Baindur ports in the district perform useful functions in the transportation sector. The details of various facilities available under transport and communication for the year 1998-99 are given in the following tables.

DETAILS OF RAILWAY TRANSPORT IN THE DISTRICT AS ON 31.3.1999

Name of Taluk	Length of Railway Line in kms.				Railway Stations
	Broad Gauge	Meter Gauge	Mixed Gauge	Total	
1	2	3	4	5	6
Kundapura	57	-	-	57	5

The district has 366 post offices, 4 telegraph offices, 83 telephone exchanges and a good number of telephone connections. Almost every house enjoys a telephone connection enabling communication with relatives in Mumbai, the Gulf and beyond. Mobile service operators Spice and Airtel have now set up their stations in Udupi. The table below shows talukwise details of post offices, telephone offices, etc.

DETAILS OF COMMUNICATION FACILITIES IN THE DISTRICT

Name of Taluk	Communication Facilities			
	Post Offices	Telegraph Offices	Telephone Exchanges	Telephones

(19) Electricity and Power

Karnataka has a place of pride in the history of power generation in the country. KPTCL – Karnataka Power Transmission Corporation Limited (erstwhile KEB) is mainly vested with the functions of transmission and distribution of power in the entire state. The Corporation has been attaching great importance to electrification of villages and hamlets, tribal colonies and harijan basthis and energisation of irrigation pump sets. Besides, this with a view to benefit weakest among the section of society schemes called Bhagya Jyothi / Kutir Jyothi have been introduced.

Statement given below shows talukwise number of villages electrified and talukwise energisation of IP as on 31.3.1999 in Udupi District.

TALUKWISE NUMBER OF VILLAGES ELECTRIFIED AND ENERGISED IRRIGATION PUMP SETS AS ON 31.3.1999

(v) CENSUS CONCEPT

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum- residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by

different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multistoreyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multistoreyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard, by definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. But if such hostels/ hotels have out houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in nonagricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was

a common kitchen. There may be one member households, two member households or multimember households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mantaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In respect of Karnataka State the Scheduled Castes and Scheduled Tribes as contained in the Scheduled Castes & Scheduled Tribes Orders (Amendment) Act, 1976 are valid for the purpose of Census of India, 2001. With the promulgation of Act 39 of 1991 however, the sub entries Naik, Nayak, Beda, Bedar and Valmiki were added under the main entry at S.No. 38 (Naikda, Nayaka, …..) of the Scheduled Tribes list of the State. There are in all 101 Scheduled Castes and 49 Scheduled Tribes in the State which are listed below:

List of Scheduled Castes

1	Adi Andhra
2	Adi Dravida
3	Adi Karnataka
4	Adiya (in Coorg district)
5	Ager
6	Ajila
7	Anamuk
8	Aray Mala
9	Arunthathiyar
10	Arwa Mala
11	Baira
12	Bakad
13	Bant (in Belgaum, Bijapur, Dharwar and North Kanara districts)

14	Bakuda
15	Balagai
16	Bandi
17	Banjara, Lambani
18	Bathada
19	Beda Jangam, Budga Jangam
20	Bellara
21	Bhangi, Mehtar, Olgana,Rukhi, Malkana, Halalkhor, Lalbegi,Balmiki, Korar, Zadmalli
22	Bhambi. Bhambi, Asadaru, Asodi, Chamadia, Chamar, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Muchi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit, Samgar
23	Bhovi
24	Bindla
25	Byagara
26	Chakkiliyan
27	Chalavadi, Chalvadi, Channayya
28	Chandala
29	Chenna Dasar, Holaya Dasar
30	Dakkal, Dokkalwar
31	Dakkaliga
32	Dhor, Kakkayya, Kankayya
33	Dom, Dombara, Paidi, Pano
34	Ellamalwar, Yellammalawandlu
35	Ganti Chores
36	Garoda, Garo
37	Godda
38	Gosangi
39	Halleer
40	Halsar, Haslar, Hulasvar,Halasvar
41	Handi Jogis
42	Hasla
43	Holar, Valhar
44	Holaya, Holer, Holeya
45	Holeya Dasari
46	Jaggali
47	Jambuvulu
48	Kadaiyan
49	Kalladi
50	Kepmaris
51	Kolupulvandlu
52	Koosa
53	Koracha
54	Korama
55	Kotegar, Metri
56	Kudumban
57	Kuravan
58	Lingader
59	Machala
60	Madari
61	Madiga
62	Mahar, Taral, Dhegu Megu
63	Mahyavanshi, Dhed, Vankar, Maru Vankar
64	Maila
65	Mala
66	Mala Dasari
67	Mala Hannai
68	Mala Jangam
69	Mala Masti
70	Mala Sale, Netkani
71	Mala Sanyasi
72	Mang, Matang, Minimadig
73	Mang Garudi, Mang Garodi
74	Manne
75	Masthi
76	Mavilan
77	Meghval, Menghvar
78	Moger
79	Mukri
80	Mundala
81	Nadia, Hadi
82	Nalkadaya
83	Nalakeyava
84	Nayadi
85	Pale
86	Pallan
87	Pambada
88	Panchama
89	Panniandi
90	Paraiyan, Paraya
91	Paravan
92	Raneyar
93	Samagara
94	Samban
95	Sapari
96	Sillekyathas
97	Sindhollu, Chindollu
98	Sudugadu Siddha
99	Thoti
100	Tigar, Tirbanda
101	Valluvan

List of Scheduled Tribes

1 Adiyan
2 Barda
3 Bavacha, Bamcha
4 Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
5 Chenchu, Chenchwar
6 Chodhara
7 Dubla, Talavia, Halpati
8 Gamit, Gamta, Gavit, Mavchi, Padvi, Valvi
9 Gond, Naikpod, Rajgond
10 Gowdalu
11 Hakkipikki
12 Hasalaru
13 Irular
14 Iruliga
15 Jenu Kuruba
16 Kadukuruba
17 Kammara (in South Kanara district and Kollegal taluk of Mysore district)
18 Kaniyan, Kanyan (in Kollegal taluk of Mysore district)
19 Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari
20 Kattunayakan
21 Kokna, Kokni, Kukna
22 Koli Dhor, Tokre Koli, Kolcha, Kolgha
23 Konda Kapus
24 Koraga
25 Kota
26 Koya, Bhine Koya, Rajkoya
27 Kudiya, Melakudi
28 Kuruba (in Coorg district)
29 Kurumans
30 Maha Malasar
31 Malaikudi
32 Malasar
33 Malayekandi
34 Maleru
35 Maratha (in Coorg district)
36 Marati (in South Kanara district)
37 Meda
38 Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka, Naik, Nayak, Beda, Bedar and Valmiki
39 Palliyan
40 Paniyan
41 Pardhi, Advichincher, Phanse Pardhi
42 Patelia
43 Rathawa
44 Sholaga
45 Soligaru
46 Toda
47 Varli
48 Vitolia, Kotwalia, Barodia
49 Yerava

Language and Mother tongue

As per the Census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if she or he is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betelnuts (areca).

Agricultural labourer

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. A person who has been engaged in the economic activity like above is termed as Household Industry Worker.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household

Industry is termed as an 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1000 males in a population.

(vi) NON-CENSUS CONCEPTS

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a subsoil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of

women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear female population of the same age group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Midyear married female population of the same age group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Midyear female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Midyear married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Midyear population of the same age group}} \times 1{,}000$$

q_1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2

Probability of dying between birth and age 2.

q_5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U_5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during The year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neonatal mortality rate and Post neonatal mortality rate. The neonatal mortality rate also comprises of two parts viz., early neonatal mortality rate and late neonatal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Perinatal mortality rate (PMR)

Number of stillbirths plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1,000$$

Still birth rate (SBR)

$$= \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and stillbirths during the year}} \times 1,000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her

place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/ Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000-4,999,999); M5 (1,000,000-1,999,999); M4 (500,000-999,999); M3(300,000-499,999); M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect

unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its Distribution:

(a) Distribution of population in Rural-Urban Areas:

According to the 2001 Census, the total population of Udupi district is 1,112,243, comprising 522,231 males and 590,012 females. The population of the district forms 2.1 percent of the state population and ranks at 24th place among the districts. Out of the total population of the district 81.4 percent lives in rural areas while 18.6 percent lives in urban areas. Rural population of the district is distributed among 3 taluks and urban population spread over in 6 towns. The total urban population in the district is 206,353 persons comprising 101,175 males and 105,178 females. The total rural population in the district comes to 905,890 persons and is composed of 421,056 males and 484,834 females as per 2001 Census. This rural population is distributed in 248 inhabited villages and there is no un-inhabited village in the district.

(b) Size-class and Civic Status of towns:

The Statement below gives the position and number of urban units according to size-class of population as per 2001 Census:

SIZE-CLASS AND CIVIC STATUS OF TOWNS

Serial number	Size-Class of town	Name and civic status of town		Urban Population		
				Persons	Males	Females
1	2	3		4	5	6
1	III	Kundapura	TMC	28,591	13,919	14,672
2	IV	Saligram	TMC	14,962	6,985	7,977
3	I	Udupi	CMC*	127,124	62,596	64,528
4	VI	Yenagudde	CT	4,508	2,147	2,361
5	V	Mallar	CT	6,052	2,842	3,210
6	III	Karkal	TMC	25,116	12,686	12,430

Population Growth, Density and Sex-ratio:

Population Growth:

Udupi District witnessed a positive growth rate in each decade with 3.4, 2.9, 6.6, 8.7, 13.5, 12.7, 19.6, 22.3, 9.4 and 7.1 percent during the period 1901 to 2001. According to the 1991 Census the total population of the district was 1,038,099. There has been net addition of 74,144 persons during 1991-2001. The decadal growth rate of the district comes to 7.1 percent. The growth rate for the rural and urban areas of the district is 12.0 and (-)9.9 percent respectively.

Density:

The population density of Udupi district is 287 persons per Sq. Km. against the state average of 276 persons. At taluk level, the density varies between 192 persons in Karkal taluk and 570 persons in Udupi taluk. In rural areas it comes to 242 persons per Sq.

Km., while in urban areas it comes to 1,544 persons. In urban areas, the density of population varies between 1,019 persons in Saligram town and 2,041 persons in Kundapura town.

Sex Ratio:

There are 1130 females for every one thousand males in Udupi district. The sex-ratio figures for rural areas and urban areas of the district are 1151 and 1040 respectively. It is also observed that, the proportion of females in rural areas is higher than that of urban areas. Sex-ratio in the age-group 0-6 comes to 958 girls per 1,000 boys in the district as a whole. In rural areas, this proportion is 957, while in urban areas the sex-ratio of Child population works out to 966 girls per 1,000 boys.

Work Participation Rate:

The work participation rate is defined as percentage of total workers to total population. According to 2001 Census, the total workers including main and marginal workers constitute 43.9 percent of total population of the district. Of the total workers, the share of main workers is 85.5 percent and marginal workers is 14.5 percent. The remaining 56.1 percent of population belongs to the category of non-workers.

As per 2001 Census among the main workers male participation rate in the district is 91.4 percent and corresponding proportion of females is 76.9 percent. The proportion of female marginal workers is higher than male marginal workers, as the females are attending to one or more economic activities in addition to their household duties to improve the family income. Majority of the workers are engaged in other activities. Of the total 488,173 workers in the district, 19.9 percent of these total workers are categorized as cultivators, 18.0 percent agricultural labourers, 12.7 percent in household industries and 49.4 percent in other services.

Literacy:

A person who can read and write in any language is considered as literate in Census. All children of age below 7 years are treated as illiterate.

As per 2001 Census, Udupi district has reported 810,584 persons as literates constituting 81.2 percent of the total population excluding the population of 0-6 years. The male and female literacy rates in the district are 88.2 and 75.2 percent respectively. The literacy rate of males is higher than that of females. The gap in the male - female literacy rate is 13.0 in the district.

The total literacy rates of rural and urban area are 79.3 and 89.5 percent respectively. The male and female literacy rates in rural areas are 86.9 and 73.0 percent respectively. In urban areas, these rates are 93.8 and 85.3 percent respectively. The gap in male - female literacy rates in urban areas is 8.5 as against 13.9 in rural areas. It is thus clear that females are better educated in urban areas than their counterparts in rural areas.

(c) Scheduled Castes and Scheduled Tribes Population 2001:

Of the 1,112,243 total population of the district 6.1 percent of the total population belong to Scheduled Castes and 3.7 percent to Scheduled Tribes. The percentage of Scheduled Castes constitute 87.1 percent in rural areas and 12.9 percent in urban areas. The proporation of Scheduled Tribes is 90.7 and 9.3 in rural and urban areas respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36

Following tables, which presents the data on population and amenities available within the district, with a brief notes will provide an overview of the district.

TABLE 1: DECADAL CHANGE IN POPULATION OF TALUKS BY RESIDENCE, 1991-2001

Taluk	Population						Percentage decadal variation 1991-2001			Percentage Urban Population	
	1991			2001							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12
Kundapura	351,673	292,259	59,414	377,420	348,829	28,591	7.32	19.36	-51.88	16.9	7.6
Udupi	495,766	350,136	145,630	529,225	376,579	152,646	6.75	7.55	4.82	29.4	28.8
Karkal	190,660	166,552	24,108	205,598	180,482	25,116	7.83	8.36	4.18	12.6	12.2
Total	**1,038,099**	**808,947**	**229,152**	**1,112,243**	**905,890**	**206,353**	**7.14**	**11.98**	**-9.95**	**22.1**	**18.6**

Data given in Table-1 reveals the taluk-wise decadal variation of population in the district. During the decade 1991-2001 it has grown by 7.14 per cent. Though the overall growth of population has increased, negative growth rate is reported in urban areas particularly in Kundapura taluk where the decline is by 51.88. The percentage of urban population to total population in the district also indicates a declining trend in all the taluks. The magnitude of decline is reported to be high in Kundapura taluk where it has declined by 9.3 per cent.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Kundapura	99	348,829	160,536	188,293	- (0.0)	-	-
2	Udupi	99	376,579	176,451	200,128	- (0.0)	-	-
3	Karkal	50	180,482	84,069	96,413	- (0.0)	-	-
Districts (Rural) Total:		**248**	**905,890**	**421,056**	**484,834**	**0(0.0)**	**-**	**-**

Number and percentage of villages	Population 200-499		Number and percentage of villages	Population 500-999		Number and percentage of villages	Population 1,000-1,999	
	Males	Females		Males	Females		Males	Females
10	11	12	13	14	15	16	17	18
- (0.0)	-	-	3 (3.0)	1318	1512	20 (20.2)	14,493	18,221
- (0.0)	-	-	1 (1.0)	417	417	23 (23.2)	18,138	21,298
- (0.0)	-	-	4 (8.0)	1457	1713	7 (14.0)	4,784	5,568
- (0.0)	**-**	**-**	**8 (3.2)**	**3192**	**3642**	**50 (20.2)**	**37,415**	**45,087**

Number and percentage of villages	Population 2,000-4,999		Number and percentage of villages	Population 5,000-9,999		Number and percentage of villages	Population 10,000 and above	
	Males	Females		Males	Females		Males	Females
19	20	21	22	23	24	25	26	27
60 (60.6)	87,817	104,601	13 (13.1)	38,700	43,873	3 (3.0)	18,208	20,086
56 (56.6)	89,708	102,075	15 (15.2)	46,318	51,989	4 (4.0)	21,870	24,349
29 (58.0)	43,613	51,473	8 (16.0)	23,133	25,590	2 (4.0)	11,082	12,069
145 (58.5)	**221,138**	**258,149**	**36 (14.5)**	**108,151**	**121,452**	**9 (3.6)**	**51,160**	**56,504**

The above table indicates that number of villages having population less than 200 and 200-499 is nil in the district. Number of villages in the population range between 500-999 in the district are 8 and villages whose population ranges between 2,000-4,999 is observed to be more in the district.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS

		Name of Town
(a)	New	
	(i) Statutory Town	**- Nil -**
	(ii) Census Town	**1. Yenagudde (CT)**
(b)	Denotified	
	(i) Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as Census Towns	**1. Baindur (TMC)**
	(ii)Statutory towns of 1991 Census denotified but identifiable as Census Towns based on demographic and economic criteria	**- Nil -**

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS

		Name of Town
	(iii) Census towns of 1991 Census notified as Statutory town in 2001 Census	**- Nil -**
(c)	Declassified	**1. Gangoli (NMCT)**
		2. Hosangadi KPC Project Colony (NMCT)
		3. Tonse West (NMCT)
(d)	Wholly merged with other town(s)	**1. Badagabettu-76 (NMCT)**
		2. Malpe (NMCT)
		3. Puttur (NMCT)

Declassified means the census towns of 1991 Census, which fail to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	**2**	**3**	**4**	**5**
0-10	-	0.0	-	0.0
11-20	1	0.4	2,578	0.3
21-50	3	1.2	7,086	0.8
51-100	16	6.5	38,707	4.3
101-200	49	19.8	141,390	15.6
201-300	56	22.6	190,585	21.0
301-500	44	17.7	166,609	18.4
501 +	79	31.9	358,935	39.6
Not known	-	0.0	-	0.0
District Total:	**248**	**100.0**	**905,890**	**100.0**
Population Density (Rural) of the district:		**263.9**		

Distribution of villages by population density and ranges are presented in the above table. Data reveals that there are quite a few villages with the density of less than 100 persons per sq.km. Villages with the population density of above 500 persons per sq.km. is the maximum in the district. The population density for the rural area is 263.9 persons per sq.km

TABLE 5 : SEX RATIO OF STATE AND DISTRICT 1901-2001

Census Years	State			Census Years	District		
	Total	Rural	Urban		Total	Rural	Urban
1	**2**	**3**	**4**	**5**	**6**	**7**	**8**
1901	983	984	976	1901	1,125	1,128	960
1911	981	984	960	1911	1,112	1,116	1,004
1921	969	975	936	1921	1,099	1,104	1,025
1931	965	972	927	1931	1,120	1,128	1,017
1941	960	965	935	1941	1,123	1,129	1,048
1951	966	974	941	1951	1,150	1,158	1,073
1961	959	973	913	1961	1,165	1,178	1,075
1971	957	971	913	1971	1,140	1,159	1,060
1981	963	978	926	1981	1,130	1,147	1,049
1991	960	973	930	1991	1,134	1,172	1,012
2001	964	976	940	2001	1,130	1,151	1,040

The above table gives the sex-ratio for the rural and urban population of the state as well as that of the district from 1901 to 2001 census.

It is observed that the state has recorded a decrease in the sex-ratio since 1901 census (983). However in 2001 census, the state has registered a better sex-ratio of 965 little higher than the ratio of 1991 Census (960).

For the district, the sex-ratio in 1901 Census was 1125, which kept fluctuating over the decades. However, in 2001 Census, the district has recorded a sex-ratio of 1130 slightly less than that of 1991 Census 1134. It is also observed that the sex-ratio in 2001 Census for the district (1130), is more than that for the state (965). Again, the ratio for the rural women in 2001 Census is comparatively better than, that for the urban women in the state as well as in the district.

TABLE 6 : SEX RATIO BY TALUKS, 2001

Sl. No.	Name of Taluk	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kundapura	1,163	1,173	1,054
2	Udupi	1,108	1,134	1,047
3	Karkal	1,125	1,147	980
District Total:		**1,130**	**1,151**	**1,040**

There are 1,130 females per 1000 males in the district. Higher sex ratio is noticed in rural areas (1,151) whereas in urban area it is 1,040. The sex ratio is favourable for females in the district. Taluk-wise comparison reveals that the sex ratio in Karkal taluk is favourable for men in the urban area. The highest sex ratio is reported from the rural areas of Kundapura taluk.

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Sl. No.	Name of C. D. block	Sex ratio
1	2	3
1	Kundapura	1,173
2	Udupi	1,134
3	Karkal	1,147
	District (Rural) Total :	**1,151**

This table highlights the data on sex ratio by C.D.Block, which includes all villages in the district. The ratio is favourable for women in all the C.D.Blocks. Comparatively, the sex ratio is high in Kundapura followed by Karkal and Udupi C.D.Blocks.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	-	0.0	-	0.0
700-749	-	0.0	-	0.0
750-799	-	0.0	-	0.0
800-849	-	0.0	-	0.0
850-899	-	0.0	-	0.0

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
900-949	2	0.8	5,764	0.6
950-999	-	0.0	-	0.0
1,000-1,099	50	20.2	232,219	25.6
1,100+	196	79.0	667,907	73.7
District Total:	**248**	**100.0**	**905,890**	**100.0**
Sex ratio (Rural) for District:		**1,151**		

The sex ratio of rural population by ranges is given in with corresponding number of villages in each range. It is observed from the table that majority of villages have the sex ratio of 1,100 and above. Nearly 20.2 per cent of villages fall in the range 1,000-1,099. Only two villages have the sex ratio favourable for men in the rural areas of the district.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Kundapura	TMC	1,054
2	Saligram	TMC	1,142
3	Yenagudde	CT	1,100
4	Mallar	CT	1,129
5	Udupi	UA	1,031
6	Udupi	CMC+OG	1,031
7	Udupi	CMC	1,024
8	Karkal	TMC	980
Sex ratio Urban for the district:			**1,040**

The sex ratio for the urban areas of the district is 1,040. Of the six towns, it is above the district urban average in respect of Kundapura (TMC) 1,054, Saligram (TMC) 1,142, Mallar (CT) 1,129, Yenagudde (CT) 1,100 whereas in Udupi UA & Udupi (CMC & OG) it is almost equal. As regards Karkal (TMC) it is 980, which is below the district average urban.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TALUKS, 2001

Sl. No.	Name of Taluk	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Kundapura	Total	41,989	21,452	20,537	957
		Rural	39,205	20,039	19,166	956
		Urban	2,784	1,413	1,371	970
2	Udupi	Total	50,472	25,706	24,766	963
		Rural	36,743	18,751	17,992	960
		Urban	13,729	6,955	6,774	974
3	Karkal	Total	22,120	11,351	10,769	949
		Rural	19,696	10,086	9,610	953
		Urban	2,424	1,265	1,159	916
District Total:		**Total**	**114,581**	**58,509**	**56,072**	**958**
		Rural	**95,644**	**48,876**	**46,768**	**957**
		Urban	**18,937**	**9,633**	**9,304**	**966**

Variations in child sex ratio has been a long observed phenomenon and have undergone considerable debate among the researchers and policy makers from time to time. Although the observed variations in the ratio favouring males is a biological fact, continued decline over the periods causes great concern among the policy makers. The talukwise child sex ratio for the 2001 Census is given in the above table, which reveals that there are 958 females per 1,000 males. More worsening is the situation in urban areas of Karkal taluk, where ratio is 916.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Kundapura	39,205	20,039	19,166	956
2	Udupi	36,743	18,751	17,992	960
3	Karkal	19,696	10,086	9,610	953
	District (Rural) Total:	**95,644**	**48,876**	**46,768**	**957**

The table highlights the data on sex ratio of population in the age group 0-6 by C.D.Blocks, which include only the rural portion of the district. The sex ratio is favourable for males in all the blocks in the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	3	1.2	522	0.5
700-749	2	0.8	403	0.4
750-799	10	4.0	3,147	3.3
800-849	20	8.1	6,928	7.2
850-899	34	13.7	15,052	15.7
900-949	58	23.4	23,911	25.0
950-999	28	11.3	11,873	12.4
1,000-1,099	65	26.2	26,567	27.8
1,100+	28	11.3	7,241	7.6
District (Rural) Total	**248**	**100.0**	**95,644**	**100.0**

Sex ratio (Rural) for District :957

The sex ratio has been given by ranges for the rural population in the above table. Data reveals that except for the population ranges 'Less than 700' and '700-749' in all other ranges, a good number of villages are reported under each range. Though the average sex ratio for the rural district shows 957 females per 1,000 males, it is worth noting that 93 out of 248 inhabited villages have the sex ratio favourable for female child.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

District (Urban) Total			**18,937**	**9,633**	**9,304**	**966**

The child sex ratio for the urban agglomerations/towns is given in the above table. Data reveals that the urban sex ratio for the district is 966 female per 1,000 male. The highest sex ratio for the urban is noticed in Mallar (CT) and lowest in Karkal (TMC).

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TALUKS, 2001

Sl. No.	Name of Taluk	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Kundapura	Total	377,420	20,529	11,183	5.4	3.0
		Rural	348,829	19,249	10,908	5.5	3.1
		Urban	28,591	1,280	275	4.5	1.0
2	Udupi	Total	529,225	29,924	20,117	5.7	3.8
		Rural	376,579	21,501	15,206	5.7	4.0
		Urban	152,646	8,423	4,911	5.5	3.2
3	Karkal	Total	205,598	17,236	10,313	8.4	5.0
		Rural	180,482	15,660	9,748	8.7	5.4
		Urban	25,116	1,576	565	6.3	2.2
	District Total:	**Total**	**1,112,243**	**67,689**	**41,613**	**6.1**	**3.7**
		Rural	**905,890**	**56,410**	**35,862**	**6.2**	**4.0**
		Urban	**206,353**	**11,279**	**5,751**	**5.5**	**2.8**

The taluk-wise Scheduled Castes and Scheduled Tribes population are given in the above table. The total Scheduled Castes and Scheduled Tribes population in the district are 67,689 and 41,613 persons respectively. The rural-urban distribution reveals that 83.3 and 16.7 per cent of Scheduled Castes population live in rural and urban areas respectively. Among the Scheduled Tribes population, 86.2 and 13.8 per cent live in rural and urban areas respectively. The table also indicates the percentage of Scheduled Castes and Scheduled Tribes population to total population in the district.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Kundapura	348,829	19,249	10,908	5.5	3.1
2	Udupi	376,579	21,501	15,206	5.7	4.0
3	Karkal	180,482	15,660	9,748	8.7	5.4
District (Rural) Total:		**905,890**	**56,410**	**35,862**	**6.2**	**4.0**

Similar analysis is presented by C.D. Block-wise, which includes only rural areas in the district. The Scheduled Castes and Scheduled Tribes constitute 6.2 and 4.0 per cent respectively. Highest Scheduled Castes population (8.7 per cent) and Scheduled Tribes population (5.4 per cent) has been reported from Karkal C.D. Block..

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	1	0.4	-	0.0
Less than 5	109	44.0	13,578	24.1

31-40	-	0.0	-	0.0
41-50	-	0.0	-	0.0
51-75	-	0.0	-	0.0
76 and above	-	0.0	-	0.0
District Total	**248**	**100.0**	**56,410**	**100.0**

The proportion of Scheduled Caste population in the villages are given by ranges in the above table. Only one village in the district does not have Scheduled Caste population. It is observed from the above table that percentage of population dwelling in the villages does not exceed more than 20.0 per cent to the total population. Majority of the villages have 'Less than 5' per cent and '5-10' per cent of Scheduled Castes in each village.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	20	8.1	-	0.0
Less than 5	154	62.1	8,617	24.0
5-10	36	14.5	9,015	25.1
11-20	28	11.3	11,739	32.7
21-30	9	3.6	5,887	16.4
31-40	1	0.4	604	1.7
41-50	-	0.0	-	0.0
51-75	-	0.0	-	0.0
76 and above	-	0.0	-	0.0
District Total	**248**	**100.0**	**35,862**	**100.0**

This table indicates the proportion of Scheduled Tribe population by ranges in the villages. Data reveals that, 20 villages do not have ST population. Majority of the villages have less than 5 per cent of Scheduled Tribes population. The details can be seen from the table.

Table Number 18 indicates the urban population and percentage with regard to Scheduled Castes and Scheduled tribes in the district. It can be seen from the table that the Scheduled Castes constitute 5.5 per cent of the total urban population whereas Scheduled Tribes constitute only 2.8 per cent. Highest percentage of Scheduled Castes population is reported from Mallar (CT) 10.8 per cent and lowest 4.4 per cent from Yenagudde (CT) whereas highest Scheduled Tribes population is reported from Udupi (CMC) 4.1 per cent and lowest from Yenagudde (CT) 0.5 per cent.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

As per 2001 Census Udupi ranks in third place among the districts in literacy rates. The literates are more in urban than in rural areas. Male literates out number the female literates in the district. Among the taluks, the highest 85.1 per cent of literates are reported from Udupi taluk. When compared with urban areas the highest 90.3 per cent of literates are reported from Karkal taluk. Udupi taluk has the highest per cent of both male and female literates in the district. The gap in male-female literacy rate is reported to be high in Kundapura taluk.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Kundapura	231,360	117,762	113,598	117,469	42,774	74,695	74.7	83.8	67.2	16.7

3	Karkal	128,691	63,678	65,013	51,791	20,391	31,400	80.0	86.1	74.9	11.2
District (Rural) Total:		**642,903**	**323,245**	**319,658**	**262,987**	**97,811**	**165,176**	**79.4**	**86.9**	**73.0**	**13.9**

Among the districts in the State, Udupi is considered to be highly literate. The percentage of literates by C.D.Blocks in the district accounts for 79.4 per cent, in which male and female literacy rate accounts for 86.9 per cent and 73.0 per cent respectively. Among the C.D.Blocks the highest (83.2 per cent) is reported from Udupi. Genderwise distribution also indicates the highest percentage being reported in Udupi. The highest 16.7 per cent of gap in male-female literacy rate is reported from Kundapura C.D,Block and the lowest of 11.2 per cent from Karkal.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	-	0.0	-	0.0
1-10	-	0.0	-	0.0

District(Urban) Total		**167,681**	**85,890**	**81,791**	**38,672**	**15,285**	**23,387**	**89.5**	**93.8**	**85.3**	**8.5**

Distribution of urban literacy rate by sex is presented in table 24. Data reveals that the urban literacy rate for the district is 89.5 per cent. The urban literacy rate among males is 93.8 per cent. However, in the urban areas of Udupi and Karkal, the literacy rate is reported to be higher than the district urban literacy rate. The gap in male-female literacy rate is 8.5 per cent for the district urban. Highest (15.0 per cent) gap is noticed in Saligram TMC and lowest (6.6 per cent) is noticed in Udupi.

The sex-wise distribution of number of Scheduled Castes literates and illiterates and their percentages are presented by C.D. Blocks in table 25. The percentage of Scheduled Castes literates in the rural area constitute 68.3 per cent. Male and female literates form 75.9 per cent and 61.0 per cent respectively. Among the C.D Blocks, Udupi has recorded highest percentage of literates. The male and female literates are also high in the same C.D. Block. The gap in male/female literacy rate is 15 for the district and the highest gap is observed in Kundapura C.D. Block.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTE LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Sl. No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTE POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	-	0.0	-	0.0
1-10	-	0.0	-	0.0
11-20	-	0.0	-	0.0
21-30	-	0.0	-	0.0
31-40	6	2.4	1,034	1.8
41-50	15	6.1	1,388	2.5
51-60	56	22.7	12,752	22.6
61-70	69	27.9	16,461	29.2
71-80	63	25.5	15,788	28.0
81-90	35	14.2	8,742	15.5
91-99	2	0.8	215	0.4
100	1	0.4	30	0.1
District Total:	**247**	**100.0**	**56,410**	**100.0**
Literacy rate for District (Rural):		**68.3**		

The literacy rate of the Scheduled Castes in the rural district is 68.3 per cent. The range-wise rural literacy rate indicates that the literacy rate for the majority of the villages ranges between 51-60, 61-70 and 71-80. The number of villages reported under these ranges are 56, 69 and 63 covering the population of 12,752; 16,461 and 15,788 persons respectively. Besides these, for 35 villages, the rate ranges between 81-90.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTE LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATION/ TOWNS, 2001

Sl. No	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Distribution of urban literacy rate of the Scheduled Castes population by sex is presented in this table. The literacy rate of the Scheduled Castes in the towns accounts for 79.1 per cent. The male and female literacy rate is 86.3 per cent and 71.9 per cent respectively. Among the towns, Yenagudde (CT) has recorded highest rate of 84.7 per cent and in the same town reported percentage of male and female literates are also high. The gap in male-female literacy rate is 14.4 per cent in urban area of the district and this gap is more in Saligram (TMC).

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBE LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No	Name of C.D. Blocks	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

3	Karkal	6,110	3,247	2,863	3,638	1,554	2,084	72.0	78.4	65.9	12.5
District (Rural) Total:		**21,346**	**11,644**	**9,702**	**14,516**	**6,113**	**8,403**	**68.0**	**75.3**	**61.0**	**14.4**

The sex-wise distribution of number of Scheduled Tribes literates and illiterates and their percentages are presented by C.D. Blocks in table 28. The percentage of Scheduled Tribes literates in the rural area constitute 68.0 per cent. Male and female literates form 75.3 per cent and 61.0 per cent respectively. Among the C.D. Blocks, Udupi has recorded highest percentage of literates. An equally higher percentage is reported in Karkal C.D. Block. Sexwise distribution reveals that little higher percentage of male literates are reported in Udupi C.D. Block and female literates are reported in Karkal C.D. Block. The gap in male-female literacy rate is 14.4 per cent for the district and the highest gap is noticed in Kundapura C.D. Block.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBE POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	2	0.9	11	0.0
1-10	1	0.4	14	0.0
11-20	3	1.3	46	0.1
21-30	2	0.9	43	0.1

71-80	67	29.4	18,115	50.5
81-90	12	5.3	892	2.5
91-99	2	0.9	199	0.6
100	4	1.8	15	0.0
District Total:	**228**	**100.0**	**35,862**	**100.0**
Literacy rate for District (Rural):		**68.0**		

The average literacy rate of the Scheduled Tribes in the rural district is 68.0 per cent. The range-wise rural literacy rate indicates that the rate for the majority of the villages ranges between 51-60, 61-70 and 71-80. The number of villages reported under these ranges are 49, 46 and 67 covering the population of 7,634, 6,277 and 18,115 persons respectively. There are few villages which have the rate ranging between 31-40, 41-50 and 81-90.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBE LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATOIONS/ TOWNS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

Udupi (Urban)		**4,065**	**2,127**	**1,938**	**1,686**	**688**	**998**	**79.3**	**85.0**	**73.8**	**11.3**

Distribution of urban literacy rate of the Scheduled Tribes population by sex is presented in table 30. The literacy rate of the Scheduled Tribes in the towns accounts for 79.3 per cent. The male and female literacy rate is 85.0 and 73.8 per cent respectively. Among the towns, Kundapura (TMC) has recorded highest rate of 87.1 per cent and in the same town, the reported percentage of male and female literates are high. The gap in male-female literacy rate for the district is 11.3 per cent and this gap is more in Udupi (CMC+OG). An important observation is that the female literacy rate among the Scheduled Tribes (62.5 per cent) is more compared to male literacy rate (54.5 per cent) in Yenagudde (CT).

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN TALUKS, 2001

This table provides sex-wise distribution of Main workers, Marginal workers and Non workers of the district for each taluk as per 2001 Census. Percentage of Total workers for the district is 43.9 per cent. Among the taluks percentage of worker is highest (48.7 per cent) in Karkal and percentage female workers is also highest 42.1 per cent in Karkal, whereas it is lowest (31.7 per cent) in Kundapura taluk. Total number of Non workers is 624,070 for the district which is 56.1 per cent of the total population.

Data presented in table 32 is for C.D. Blocks which includes only the rural portion of the district. The trend is same as observed for the taluk, in table 31. Comparing with C.D.Blocks in the district, the percentage of Main workers are more in Karkal while the percentage of Marginal workers are more in Kundapura.

TABLE 32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Note: Percent of Worker to total worker are given in brackets

The taluk-wise details of workers by broad classification of their economic activities is given in table 34. Cultivators and Agricultural labourers together constitute 37.9 per cent of the total workers. The other workers account for 49.4 per cent. Among the taluks agricultural activity seems to be predominant in Kundapura. The percentage of cultivators and agricultural labourers together constitute 50.6 per cent of the total workers. The percentage is significantly higher compared to other taluks. The lowest 30.5 per cent is reported from Udupi taluk. In the same taluk, 57.1 per cent of the workers are involved in other works. The gender-wise comparison reveals that female work participation as cultivators and agricultural labourers is more than males. With respect to work participation in household industrial activities, the percentage of female workers are significantly higher than males, particularly in taluks like Karkal and Udupi.

The distribution of Workers by economic activity is presented for the C.D. Blocks in the district, which includes only the rural portion. The same trend as seen in taluk-wise distribution is observed in table 35 also.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

The sex-wise distribution of Workers by economic activity is presented for the urban areas of the district. The total number of workers, Main and Marginal constitute 38.5 per cent of total urban population. Cultivators and Agricultural Labourers are 9.4 per cent and the Other Workers category constitute 79.7 per cent. Except 'Other works' in all the categories, female have outnumbered the males in the urban areas of the district. Highest percentage of Main and Marginal Workers 44.9 per cent and Cultivators 12.0 per cent has been reported from Saligram (TMC), which are higher than the district urban percentages.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table highlights the number of villages having different types of amenities. It is observed that basic amenities like improved drinking water, power supply, education, transport communication, etc., are available in most of the villages. All villages in the district have power supply and educational facilities. Except one village in Kundapura C.D. Block, the rest have access to improved drinking water facilities. Though all the villages in the district have one or the other source of drinking water, the improved drinking water sources can be taken into account only if the water is supplied through tap or a hand pump/tube well. Accordingly only one village in Kundapura C.D. Block do not have improved drinking water facility. The transport and communication such as bus services, rail facility and navigable waterways are not available for 6 villages in the district. About 97.2 per cent of the villages can be approached by pucca roads. More than 90 per cent of the villages have access to other facilities like medical, post office and telephone. Little higher than 50 per cent of the villages have banking facilities in their villages.

If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.
# Post office includes Post office, telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Rural population that is served by different amenities in the villages have been given in the above table. Amenities like, education, medical, improved drinking water, post office, telephone, transport communication, power supply and pucca road facility are available to more than 90 per cent of the population. Banks serve only 56.1 per cent of the population and Agricultural Credit Societies cater the needs of 23.7 per cent of the population. Among the C.D. Blocks, the rural population in Udupi is better served than the people in other two C.D. Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. **Education :-**				
(a) Primary School	-	-	-	-
(b) Middle School	8	2	0	10
(c) Degree College	44	91	102	237
2. **Medical:-**				
(a) Hospital	24	61	147	232
(b) PHC	108	79	33	220
3. **Post Office**	17	0	-	17
4. **Telephone**	4	3	5	12
5. **Bus Service**	5	1	0	6
6. **Banks**				
(a) Commercial Bank	72	61	10	143
(b) Cooperative Bank	70	57	26	153
7. **Agricultural Credit Societies**	46	58	87	191

Certain amenities are not available within the village. In such cases data on distance range is given in the above table. All the villages in the district has primary school facility. For 102 villages, the degree colleges are located at a distance of more than 10 kms., and 91 villages have this facility ranging between 5-10 kms. Data reveals that health services like hospitals and Primary Health Centres are not available within the village. About 147 villages in the district have hospitals at a distance

of more than 10 kms. Similarly, 108 villages have Primary Health Centres at a distance of less than 5 kms., 79 villages have this facility at a distance of 5-10 kms and for 33 villages it is at a distance of 10 kms away. With regard to facilities like post office, telephone and bus services, less number of villages have been reported in the table which only implies that most of the villages have access to these facilities within their jurisdiction. Though 50 per cent of the inhabited villages do not have banks in their villages, but the same is available at a distance of less than 5 kms and 5-10 kms. About 191 villages in the district do not have agricultural credit societies, but are situated at a distance of less than 5 kms, 5-10 kms and more than 10 kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The villages have been arranged according to the distance in ranges from the nearest statutory town. It is observed that the distance from the statutory town to the village does not exceed more than 50 kms in the district. There are 89 villages which are classified as 'Unspecified' as far as the distance is concerned. The distance from the nearest statutory town to the village has been correlated with the type of amenities available as per 2001 Census. It is observed that, the villages which are less than 5 km away from the nearest statutory town has most of the amenities like education, medical, post office, telephone, transport communication and pucca road facility and only one out of 5 villages do not have banking facility.

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or Otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The rural population has been arranged with reference to ranges and the different amenities available under each range are given in the above table. There are 8 villages having a population of less than 1,000. There are 9 villages which have more than 10,000 population. Maximum number of villages in the district have population ranging between 2,000-4,999. The percentage of villages having banks and agricultural credit societies is less in all the ranges. The other facilities reported under each population range does not reveal any significant changes.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Kundapura	99	154,575	30.3	38.3
2	Udupi	99	83,773	39.4	33.2
3	Karkal	50	104,953	24.1	36.1
	District Total:	**248**	**343,301**	**30.5**	**36.2**

Note : - Cultivable area = irrigated area + unirrigated area

The land use data as per 2001 Census given in table 42 takes into consideration only the cultivable area of the rural district. The cultivable area given in the table includes both irrigated and un-irrigated areas. As such the total cultivable area of the rural portion comprises of 30.5 per cent of the total area. Among the C.D. Blocks, the highest of 39.4 per cent of the area in Udupi C.D. Block is put under cultivation. If the percentage of irrigated area to total cultivable area is considered, Kundapura C.D. Block reports a highest of 38.3 per cent.

The table 43 gives per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for the above towns in the district work out to Rs.471 of which Rs.113 are received through local taxes and remaining Rs.358 from other sources. The total expenditure incurred per town is Rs.454 of which Rs.240 on general administration, Rs. 131 on Public Works, Rs.25 on publication institution and Rs.320 on all other items. The average receipts is highest in Udupi town and the expenditure incurred per head is also highest in Udupi.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	Karkal (TMC)	392	106	286	407	55	-	297	-	16
2	Kundapura (TMC)	377	35	342	310	85	-	94	-	140
3	Saligrama (TMC)	57	15	41	94	22	-	45	-	37
4	Udupi (CMC)	557	144	412	538	338	-	116	39	89
District Total		**471**	**113**	**358**	**454**	**240**	**-**	**131**	**25**	**320**

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Karkal (TMC)	8.4	4.4	3.2	1.2	0.4
2	Kundapura (TMC)	3.8	3.1	1.7	0.3	0.3
3	Saligram (TMC)	4.7	4.7	0.0	0.0	0.0
4	Udupi (CMC)	5.7	3.3	1.4	0.3	0.1
District Total		**5.7**	**3.5**	**1.6**	**0.5**	**0.4**

The educational institutions per 10,000 population in various stationery towns in the district given above indicates that primary schools are the foremost type of educational institution available in the towns. The percentage of Junior Secondary/ Middle school accounts for 3.5 and Secondary/Matriculation institutions accounts for 1.6 per cent. Further, it is also observed that in certain towns particularly in Saligram (TMC), institutions at the level of Secondary/ Matriculation and above is not available.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Karkal(TMC)	48
2	Kundapura(TMC)	23
3	Mallar(CT)	-
4	Saligram(TMC)	-
5	Udupi(CMC*)	182
6	Yenagudde(CT)	-
Distrct Total		**121**

The number of beds in medical institutions in towns is surmised as 180 per 10,000 population. It is arrived at 227 beds per 10,000 population in Kundapura (TMC) which according to the data provided in the above table is the highest in comparison with other towns followed by 197 beds in Udupi (UA). In Saligram (TMC) as well as in two CTs i.e. Mallar and Yenagudde, it is reported that there are no bedded hospitals in these towns.

As may be seen from table 46, among 6.4 per cent of urban population in the district comprises of slum population. This percentage is very high in Kundapura town which works out to 27.6 per cent. In the other three towns namely Karkal, Saligram and Udupi, slum population is 'below the districts' percentage.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Karkal	25,116	1,472	5.9
2	Kundapura	28,591	7,902	27.6
3	Saligram	14,962	697	4.7
4	Udupi	127,124	2,530	2.0
District Total		**195,793**	**12,601**	**6.4**

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Karkal (TMC)	Beedi Snuff Plastic	Cashew nut Coconut Beedi & Snuff
2	Kundapura (TMC)	Tiles & Bricks Wooden Frames	Tiles & Bricks Rice Wooden Frames
3	Mallar (CT)	Beedi	Beedi Coconut
4	Saligram (TMC)	Grinding Wheel Ampoule Making Machine Coconut Oil	Groundnut Sugarcane Paddy
5	Udupi (CMC)	Fish Food Tiles Colour	Fish Food Coconut Tiles
6	Yenagudde (CT)		Coconut

The above table furnishes information about the most important commodities manufactured and exported from the towns of Udupi district. As the district lies on the coastal region, fish production forms the most important commodity manufactured and exported from the district, mainly from Udupi town. Other items that are both manufactured and exported includes beedi, snuff, tiles and bricks wooden frames and coconut.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48 to 52.

Table 48 gives the distribution of households tenure status and the number of dwelling room occupied by them. The data presented in this table is for the Total, Scheduled Castes and Scheduled Tribes population of Udupi district. The rural-urban components and tenure status of the dwelling rooms has also been furnished in the data. It can be seen from the table that dwelling status of the population in the district is quite impressive to the extent that 98.2 per cent of the total households have one or more rooms for dwelling. Also those who own houses are considerably large than other tenure status. Further, the median number of rooms for the total households both in rural as well as urban areas is 3. In case of Scheduled Castes and Scheduled Tribes households it is 2 rooms.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure Status	Number of Dwelling rooms	Number of Households								
		Total			Scheduled Castes			Scheduled Tribes

		35.2	56.5	8.3	28.2	51.9	8.0	7.0	4.6	0.3
	Udupi	**109,718**	**82,357**	**14,122**	**80,442**	**73,576**	**13,330**	**29,276**	**8,781**	**792**
	District	**53.2**	**40.0**	**6.8**	**39.0**	**35.7**	**6.5**	**14.2**	**4.3**	**0.4**

The table gives the distribution of households by the type of Census houses occupied by them with reference to Udupi district. The structures of Census houses occupied by the households for fully and partly residential purpose have been classified into permanent, semi-permanent and temporary. The details can be seen from the table 49 above. Households living in permanent structures in the district accounts for 53.2 per cent. In rural areas, this percentage is 39.0 which is higher than the state figure. Urban households dwelling in permanent structures is 14.2 per cent in the district. Among the taluks, majority of the rural households in Kundapura taluk dwells in permanent structures whereas this percentage is high in case of urban households in Udupi taluk.

The type of fuel used for cooking by the households are given in table-51. The different type of fuel includes, firewood, crop residue, cowdung cake, charcoal, kerosene, cooking gas (LPG), electricity, bio-gas, etc. The table highlights that as high as 72.4 per cent of households use firewood and 22.9 per cent use LPG. Further, in urban areas, though little higher than 52.9 per cent of the households use LPG, about 40.9 per cent are dependent on firewoods. The percentage of households using other types of fuel is negligent. Talukwise details can be seen from the table.

TABLE 52: NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Households availing banking services as well as possessing specified assets are provided in the above table. The households availing banking services in the district is quite extensive compared to the data at the state level. There are not much different between rural and urban households utilizing the services. In terms of percentage, assets like radio/transistor is more or less equally in possession by both rural and urban households. With regard to other assets, more number of urban households have these than rural households. Also there are households who do not possess any of the asset specified in the table.

(xi) Archaeology

The archaeology interest of the then undivided South Kanara was not surveyed fully and systematically. There was no important discovery have been found of any kind of ancient cave or rock-cell sepulchers dating back to the pre-historic period. Nevertheless, the monuments that are in the district have rendered special contributions to the Indian architecture and have a unique place in the Indian architectural gallery. Most of these monuments belong to the Jains who ruled the region from 14th century till the beginning of the British rule. The Jaina archaeology remains of the district can be classified into three categories namely, the Bettas or walled enclosures containing a colossal statue, the Basadis or Bastis (temples) and the Stambhas or pillars.

Of the three Bettas reported in the then Mysore state, one is at Karkal. In its height and weight, this statue is (Gommateswara) considered to be the larger one measuring 41 feet and 5 inches in height and weighs about 80 tones. From the inscriptions found on the statue, it is observed that this might have been completed in 1431 A.D. The statue at Karkal is similar to the Egyptian size and it is more striking because of its posture on top of a big granite hillock on the margin of a lovely little lake.

Few Basadis of the Jains are also found in Karkal taluk. One remarkable feature about these temples is the picturesque site selected for them. The temple particularly in this taluk is though smaller in size, in its plan and appearance differs from other temples found elsewhere in the district. The Chaturmukha Basadi as it is called, is built in the form of a mantapa with a lofty doorway and pillared portico on each of its four sides and a verandah all around. The roof is flat and formed of massive granite slabs. Inside the temple are enshrined twelve large polished black stone standing images of Jaina saints. They are formed in groups of three, each group facing one of the four doorways or four faces of the building. The Neminatha Basadi at Hiriyangadi is about one kilometer to the west of Gommatha hillock and was built in 1329 A.D. The height of the pillar is 54 feet and was carved out of a single piece of granite and was installed in front of a Basadi. There are three important monuments at Katapadi, which is about 25 kms. north of Udupi taluk. The Venkataramana temple in this place belongs to 16th century and was renovated in 1816 A.D. The Janardhana temple, Mattu, belong to 13th century and the Durgadevi and Mahadeva temple, Yenagudde is of about the 13th century A.D.

The Brahmadevara stambha or the pillar at Karkal is another important architecture. This pillar is built of granite and stands in front of Gommata. It has a Brahma seated on top of it. The small sculpture of Brahma excels that of Gommata in fine workmanship and it was set up in the year 1437 A.D. Apart from three categories mentioned above, the palace at Karkal acquires important architectural beauty. The remains of the palace of the Bhairarasas can be seen close to the famous Basti.

(xii) Brief description on places of religious, historical or archaeological and tourist importance

Anegudde (Kundapura Taluk) : This place is situated about 32 kms. north of Udupi and one km from NH 17 has a famous Anegudde Vinayaka temple on top of hill with beautiful natural surroundings.

Arisinagundi (Kundapura Taluk) : Situated about 8 kms. from Kollur, the waterfall at the foot of the Kadalhadri hills is a favourite place for trekkers.

Belakal Theertha (Kundapura Taluk) : It is about 45 kms. north east of Kundapura. The sacred pond and waterfall here attracts devotees for an annual holy dip. It is also a favourite spot for trekkers.

Hattiangadi (Kundapura Taluk) : It is about 8 kms. northeast of Kundapura on the northern bank of the river Varahi, where ancient temples and basadis are situated. The Lokanatha temple dating back to 9th century AD and a famous Vinayaka temple are worth mentioning.

Hosangadi (VARAHI) (Kundapura Taluk) : It is about 40 kms. east of Kundapura, an attractive natural place with historical background. The famous Varahi Hydro Electrical Project is unique here.

Kamala Shila (Kundapura Taluk) : It is 32 kms. from Kundapura, is famous for its temple of Durga Parameshwari. Nine days Navaratri festival (Dasara), a car festival of the temple is held around the month of April are main attractions.

Kodachadri Hills (Kundapura Taluk) : These hills (4,411 ft) constitute one of the largest forest areas in Karnataka and part of this region is designated as the Mookambika Nature Reserve. Kollur is an ideal base to explore the hills. The Mookambika nature camp, a park 4 kms. south of Kollur is a tranquil place. The peak of Kodachadri can be reached by trekking for 4-5 hours.

Kollur (Kundapura Taluk) : About 80 kms. north of Udupi, the Mookambika temple located at the foothills of the Kodachadri hills is one of the most important centres of Shakti worship in South India. Adi Shankaracharya is said to have consecrated the deity, Mookambika, slayer of the demon, Mookasura, on a Shri Chakra, which is installed in a copper roofed gold crested temple, that is said to be 1000 years old.

Maravanthe Beach (Kundapura Taluk) : It is about 12 kms. north of Kundapura town and 50 kms. North of Udupi. It is one of the most beautiful spots of the district. A drive along the west coast highway at sunset bordered by the Arabian Sea on the west and the Sauparnika River to the east with Kodachadri hills in the background is an unforgettable experience. The beauty of this place is that it has the roaring sea on the one side and the quiet Souparnika River on the other. The dividing line between them is the National Highway No.17.

Ottinane (Kundapura Taluk) : About 40 kms. north of Kundapura and 2 kms. from the National Highway, this is a scenic spot on the beach to view sunset.

Tras (Kundapura Taluk) : It is situated 9 kms. to the north of Kundapura and known for a fine beach.

Ambalapadi (Udupi Taluk) : This place situated 4 kms. from Udupi has the temple of Janardhana and was, renovated in stone in 1571 A.D. with the 400 year old attractive idol of Janardhana and also has the Mahakali temple with five-foot wooden image of Kali.

Barkur (Udupi Taluk) : It is situated about 16 kms. north of Udupi and was once the capital of the Alupa rulers and a province of the Vijayanagara empire. Remnants of the two forts built by these rulers are still visible. Amongst the many temples built over the years are the Panchalingeshwara temple (8th century), Bette Vinayaka temple (9th –10th century AD), Ganapathi temple Choulikeri (13th - 14th century AD) and Mudukeri Someshwara temple.

Kaup (Udupi Taluk) : Kaup is a lovely beach situated 12 kms. south of Udupi. An old 100 ft. lighthouse is situated here, which is the guiding star for all navigators, who are warned of presence of dangerous rocks in the sea. There is an old ruined fort also here.

Malpe (Udupi Taluk) : 7 kms. west of Udupi at the mouth of the Malpe river is the natural harbour of Malpe. It is an important port on the Karnataka coast

with fine beach. It is also an important fishing centre. There is an old Vadabhandeshwara temple (Balarama temple). Thousands of devotees used to take holy dip in the Malpe Sea during Yellamavase in the month of January.

Mandarthi (Udupi Taluk) : Is situated 25 kms. north of Udupi and has the Durga Parameshwari temple, an ancient center for Shakti worship. Besides the stone icons of Mahishamardhini and Chamundeshwari, it has nine old masks, depicting the different manifestations of the goddess.

Manipal (Udupi Taluk) : Located 5 kms. to the east of Udupi, Manipal is today an important, progressive educational and medical center. The Academy of education founded in 1942, runs the numerous educational institutions. Venugopal Krishna temples, End point, Heritage village (Hastashilpa), T.M.A. Pai Memorial Museum are the other attractions in and around Manipal.

Mekke Katte (Udupi Taluk) : Located 28 kms. North of Udupi in the village of Shiriyara, this place is supposed to be the site of penance done by rishi Jambukeshwara. It is also famous for its 'Brahmasthana" with its wooden "Bhootha" idols of ranging from 2 ft. to 20 ft. There are more than 150 idols. The Bhootha spirit, after the family spirits that guard the village and public health, are propitiated by ritual dance.

Nilavara (Udupi Taluk) : About 22 kms. northeast of Udupi, Nilavara is on the bank of Seeta River a natural beautiful place with religious importance. On the fifth day of Virichika masa thousands of devotees take holy dip in this place.

Padubidri (Udupi Taluk) : About 26 kms. south of Udupi Padubidri has a fine beach, a Mahalingeshwara temple, a Mahaganapathi temple and a Brahmastana. A religious festival called "dakke bali" is held once in two years.

Pajaka (Udupi Taluk) : About 11 kms. south east of Udupi is the birthplace of the Dwaita philosopher saint Madhwacharya. An image of his has been set up at the place where he was born and known as "Madhwa Matha". Several spots nearby are associated with his miracles. Nearby is the temple of goddess Durga Parameshwari in the Kunjala hills that was worhsipped by Madhwacharya.

Perdur (Udupi Taluk) : About 20 kms. east of Udupi, it is an ancient centre with Shri Anantha Padmanabha temple. This area is well known for the Yakshagana dance drama form, which is locally known as "Perdur mela".

Saligrama (Udupi Taluk) : About 20 kms. north of Udupi, this place is a religious and cultural center for a long time. The temple Yoga Narasimha is believed to be 1000 years old.

St. Mary's Island (Udupi Taluk) : Close to Malpe, this island is said to be the site where Vasco Da Gama first landed in India which he called "El Padran de Santa Marta". The island is noted for its unique basalt rock formations and is a popular excursion for locals and day-trippers.

Surulu (Udupi Taluk) : 30 kms. north east of Udupi, Surulu is a historical place. The old palace belongs to Heggade Chieftains, attracts with its fine wooden carvings. It belongs to Jain community rulers.

Udupi (Udupi Taluk) : Located 60 kms. north of Mangalore, Udupi is one of the most sacred spots in India visited by pilgrims from all over the country. The importance of the place date back to the period of Madhwacharya, the 13th century religious leader who is said to have founded the temple and placed the image of Krishna in it. Madhwacharya lived and preached here and established eight mathas in the area. Anantheshwara, Chandramauleshwara, Vasuki Ananthapadmanabha, Venktramana, Kunjubetta Mahishamardini temples are other attractions around Udupi. Krishna temple has an elaborate system of poojas that begin early in the morning and late in the night. The eight Mathas take turn in administering the temple and the famous Paryaya festival held once in two years in January, marks the handing over rituals. It is colourful spectacle drawing thousand of pilgrims from far and wide.

Udyawara (Udupi Taluk) : Located 5 kms. Northwest of Udupi, Udyavara was the seat of the rulers of Alupa from about the 8th century. The palace and Fort area contain some of the earliest monuments of the district. The Bhairava temple built on a large rock containing ten pillars is the main attraction. The Stambha Kallu (Stone Pillar), bearing inscriptions date back to the 7th century AD.

Attur (Karkal Taluk) : This place is 8 kms. from Karkal has the St. Lawrence Church built in 1845 A.D. People from all religions participate in the religious function held every year in January. The village has a fine temple of Mahalingeshwara, with a copper plated garbhagraha (sanctum).

Bajagoli (Karkal Taluk) : It is situated 10 kms. east of Karkal the Jodukere Kambala also known as the Lava Kusha Kambala (buffalo race) started in 1970 at Bajagoli. It takes place on the first Sunday of February every year on the fields of Bettugadde, which are 140 meters and 15 meters wide. A modern gallery has been built for spectators.

Karkal (Karkal Taluk) : It is a town 30 kms. south east of Udupi and 52 kms. northeast of Mangalore. It is an important Jain pilgrimage centre. The towering 42 ft. monolithic statue of Gomateshwara completed in 1432 A.D. is the major attraction. The Chathurmukha Basadi completed in 1586 A.D. has four identical entries from all sides, life size statue of three Teerthankar's and several smaller images. The Mahamastakabhisheka held once in 12 years to Gomateshwara, Venkataramana temple and Ramasamudra are the other attractions.

Kudlu Thirtha (Karkal Taluk) : About 50 kms. from Udupi and 15 kms. from Hebri, the Kudlu Thirtha where the river Seeta cascades from a height of 150 ft. is an important attraction of this place. This picturesque locale makes a fine picnic spot as well as trekkers delight.

Nandalike (Karkal Taluk) : About 35 kms. Southeast of Udupi, Nandalike is the birthplace of great poet Muddana. It was capital of Heggade chieftains in medieval period. The main attractions herein are the Choukimane with fine wooden carvings and Mahalingeshwara temple.

Somlu Theertha (Karkal Taluk) : Situated 42 kms. from Udupi and 10 kms. from Hebri, this cascade of Seeta river creates a beautiful picnic spot. During *Yellamavase* (January) thousands of devotees take holy dip in it.

(xiii) Scope of Village Directory and Town Directory

Village Directory

Village Directory provides micro-level data which will help the planners in formulation of micro-level developmental plans as the C.D.Block is the lowest administrative unit for developmental planning. Village wise information regarding the availability of certain basic amenities and facilities within the village, as also that on the manner of utilization of the land in the concerned village are furnished in the village directory. The village directory format adopted for the 2001 Census has 23 columns whereas in the 1991 Census there were only 18 columns. When compared with the 1991 Census Village Directory format, column 9 which refers to the day or days of weekly market/hat if any has been now left out. New inclusions are in respect of facilities like banks, agricultural credit societies, non-agricultural credit societies, other cooperative societies, number of recreational and cultural facilities like cinema/video hall, sports club, stadium/ auditorium; receipt of news papers/magazines and the name of the most important commodities manufactured in the village. In all the 23 columns in this tabulation statement, first 3 columns relates to serial number, name of the village with location code and area of village while the next 2 provide information on total population and number of households in the village as per 2001 Census. The next 8 columns relate to basic amenities such as educational; medical; drinking water (potable); post, telegraph and telephone, commercial and cooperative banks, agricultural, non-agricultural and other credit societies, number of recreational and cultural facilities such as cinema/video hall, sports club and stadium/ auditorium and communications (bus service, railway station, waterway). Information in respect of approach to village, nearest town and distance in Kms., power supply, receipt of news paper/magazine, names of the most important commodities manufactured in the village are furnished in columns 14 to 18. Amenities available within the villages are shown in the respective columns and if a particular amenity especially Primary School, Middle School, College, Allopathic Hospital, PHC, MCW, Post Office, Telephone, etc., is not available in the village, the respective abbreviation is given and next to it in brackets the distance in broad ranges viz., <5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility available to that particular village is indicated. The next 5 columns, 19 to 23 provide information regarding land use (i.e., area under

different types of land use in hectares rounded to two decimal places) such as forest, irrigated land by source of irrigation, un-irrigated, cultivable waste (including gauchar and groves) and finally the area not available for cultivation.

Town Directory

The Town Directory section contains seven statements (I to VII) which furnish information on all the statutory towns in the district, on aspects such as growth history, physical aspects and location of towns, municipal finance, civic and other amenities in the town, medical, educational, recreational and cultural facilities, trade, commerce, industry and banking in the towns, civic and other amenities in slum areas of the town. The scope of the various column headings adopted during 1991 Census has remained unchanged in 2001.

Note :

1. The area figure for the district given under column No 3 against " Total" represents "Geographical Area" and has been furnished by the Surveyor General India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D. Blocks/Taluks in this district will not tally with the district figures (except urban), because the area figures for C.D. Blocks/Taluks represents the land-use area based on village wise area figures as reported by the local officers. The total area of the taluk may not tally with the aggregate of the areas of the villages listed for Census purposes for it includes the area of the statutory as well as non-statutory towns, villages which may be fully submerged and reserve forests which may not form part of any revenue village, if any, within the jurisdiction of the concerned taluk. The total area of the C.D. Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2. Out growths of towns in urban agglomerations are denoted by letter "OG".

3. The following abbreviations have been used to indicate the Civic Administration Status of town.

M.Corp	:	*Municipal Corporation*
CMC	:	*City Municipal Council*
TMC	:	*Town Municipal Council*
TP	:	*Town Panchayat*
NAC	:	*Notified Area Committee*
CB	:	*Cantonment Board*
CT	:	*Census Town (Non-Municipal Census Town / Non-Statutory Town)*

STATEMENT 1 : NAME OF THE HEAD QUARTERS OF THE DISTRICT/TALUK, THEIR RURAL-URBAN STATUS AND DISTANCE FROM THE DISTRICT HEAD QUARTERS - 2001

Sl. No.	Name of District/Taluk	Name of District/Taluk Head Quarters	Whether Rural/ Urban	Distance from Taluk Head Quarters to District Head Quarters by Road/Railway (in Kms)
1	2	3	4	5

SECTION – I

VILLAGE DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and cooperative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and un-inhabited villages.

Column 3 : Area of the village

The area of the village in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are treated as equivalent to Pre-University Course.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health SubCentre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Hand pump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If the village receives any News Paper/Magazines, the same is noted in this column using following codes

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Unirrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash ‘‘-” is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water fa cilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix- VII-A, VII-B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Grama Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

(b) LIST OF MERGED VILLAGES IN TOWNS AND OUTGROWTHS AT 2001 CENSUS (AREA IN HECTARES 0.00)

Sl. No.	Name of Taluk	Name of Town	Name of the village with L.C. No.	Total geogra phical area of the village as per revenue records	Rural Compo nent	Urban Compo nent

TOWN DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory Statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 -19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/ Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Itemwise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tubewell water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilolitres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory

Column 4 & 5

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions

have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom

Column 6 to 9

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14

Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, PrePrimary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)Public Library	PL
(ii)Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Cooperative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/ Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Cenus Abstract	Level of presentation
1. District Primary Census Abstract	District/CD Block/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4. Village Primary CensusAbstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/WardLevel

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of taluks, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahasildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the taluks/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Taluk. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Taluks and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE – II

NOTE ON FERTILITY & MORTALITY AND MIGRATION – 1991 & 2001 CENSUS

Fertility levels

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples or number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of surviving children at present, number of children ever born alive and children born alive during the last one year were asked. The first three questions were asked to all evermarried women and the last question related to currently married women.

MIGRATION

What is Migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another state of the country (interstate migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why people migrate?

As in 1981 census, the reasons for migration were elicited in 1991 & 2001 census also. The reasons for migration were broadly categorized as (1) employment (2) business (3) education (4) family moved (5) marriage (6) natural calamities like drought, floods etc. and (7) other reasons. Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration

Growth of population of a particular place depends upon natural increase due to excess of births over deaths and migration. Knowledge of trends in migration helps in future planning of a region.

Marriage and age at marriage are important social phenomena and crucial factors in the analysis of the dynamics of fertility. As such, various measures of fertility estimated based on these crucial factors are highlighted in the above table.

Estimates of General Fertility Rate (GFR) a refined measure of fertility, defined as the number of live births per thousand women in the reproductive age-group 15-49 years is a useful tool for measuring fertility, and this rate is further estimated only for the married women which is defined as General Marital Fertility Rate (GMFR). The GFR and GMFR for the district are 111 and 183 respectively.

The cumulative value of the age-specific fertility rates at the end of the child bearing ages gives a measure of fertility known as Total Fertility Rate (TFR). It indicates average number of children expected to be born per woman during her entire span on reproductive period assuming that the age specific fertility rates to which she is exposed to, continue to be the same and there is no mortality. The same is expected for married women known as Total Marital Fertility Rate (TMFR). The estimated TFR and TMFR for the district are 3.61 and 6.70 respectively. The Crude Birth Rate (CBR) is 30.22.

The most useful indices that can be derived from the question on number of Children born alive is the average number of children ever born per ever married women by age-group. Since most of the women complete their reproduction be the age-group 45-49, this indices is termed as completed fertility. The cat-

egory ever married includes widows, divorced and separated women. As such the completed fertility for the district is 4.6. The child women ratio which is a relative measure to know the fertility performance of a women is 353 in the district.

One of the parameters, presenting female age at marriage relates to all women who live with their husbands, where some of them might have been recently married and some of them decades ago. It can be observed that mean age at marriage of the currently married women of Udupi district is higher than the state figure of 18.00.

The estimates of mortality indicators presented above have been obtained through indirect estimation using the data on the number of children ever born and number of children surviving to ever married women. The information on questions on children ever born and children surviving canvassed for all ever married woman have been tabulated by the age of the mother. This data has been converted into estimates of probability of dying before attaining a given age. These estimates have been worked out using Brass technique where (qi) is the probability of a newborn child dying before the age i = 1, 2, 3 and 5. The table above shows the estimates of infant and child mortality derived for the year 1991 by sex.

The infant mortality rate (q1) for the person is 29 and for male and female are 20 and 30 respectively. The estimates of under 5 mortality (q5) for person is 46 and for male and female are 45 and 47 respectively.

The Anenxure IV(1) presents data of migrants on migration by their place of birth. The majority of migrants are those who are born within the state of enumeration, which constitute 93.61 per cent as per 2001 Census. Among them, migrants born elsewhere in the district are larger than migrants born in other districts of the state. Considerable proportion of population from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (2) - PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF LAST RESIDENCE

The Annexure IV(2) presents data on migration by their place of last residence. As far as the district is concerned, it can be seen that migrants whose place of last residence was within the state of enumeration

but outside the place of enumeration, constitute major proportion of migrant population. As per 2001 Census, their percentage accounts for 93.50 Among them, more is the inflow from within the district. Considerable proportion from other state have migrated to the district. The variations during the decade among different categories can be seen from the annexure.

ANNEXURE IV (3) - INTERSTATE IN-MIGRATION TO UDUPI DISTRICT

Place of Birth	1991 Census		2001 Census	
	Migrants	Percentage of to total migrants	Migrants	Percentage of to total migrants

Total	**95,285**	**100.00**	**22,606**	**100.00**

Source : Migration Tables D-1 of 1991 & 2001 Census

The interstate in-migration to the district by their place of birth provided above, highlights the States with the largest contribution of migrants to the district. According to 2001 Census findings, majority of migrants are from Kerala which is about 39.06 per cent followed by 25.45 per cent from Maharashtra. Migrants from Tamilnadu accounts for 15.6 per cent. Further the category migrants from `Other States' has more than doubled from 5.43 per cent in 1991 to 11.96 per cent in 2001.

ANNEXURE IV(4) - RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH - 1991 AND 2001 CENSUS

Place of Birth	Place of Enumeration-1991			Place of Enumeration-2001		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1. Within the state	691,767	500,873	190,894	344,287	292,908	51,379
	100.0	72.4	27.6	100.0	85.1	14.9
2. In other states of India	95,285	50,770	44,515	22,216	13,675	8,541
	100.0	53.3	46.7	100.0	61.6	38.4

Rural and urban composition of internal migrants by their place of birth is provided in the above statement. The data for both the Census points out that majority of migrants within the State as well as from other states of India have migrated to rural areas of the district.

ANENXURE - V

Brief account of Main Religions in the District / Taluk as per 1991 & 2001 Census

Religion forms an integral part of Indian Social System. For an Indian, it is a way of life rather than a faith. Indian Census, since its inception is collecting data on religion and presenting the same in its reports. In the pre-independence Census reports, the data on religion was being presented for 6 major religions viz., Hindus, Muslims, Christians, Sikhs, Jains and Buddhists. Besides, the minor religions have been classified under the category of 'Others'. The data on religion collected and presented by the Indian Census is the basic data of immense use for the researchers, anthropologists, sociologists, demographers, administrators, planners and even for a common man.

ANNEXURE V(1) - PERCENTAGE DISTRIBUTION OF POPULATION BY MAJOR RELIGIONS IN INDIA AND KARNATAKA DURING 1991 & 2001 AND ITS GROWTH RATE DURING 1981-1991 & 1991-2001

Sl. No.	Religion	India				Karnataka			
		Percentage of Population during 1991	Percentage growth rate 1981-1991	Percentage of Population during 2001	Percentage growth rate 1991-2001	Percentage of Population during 1991	Percentage growth rate 1981-1991	Percentage of Population during 2001	Percentage growth rate 1991-2001

India - State differentials

The comparative data of the country and the state of Karnataka presented in Annexure V(1) reveals that the religion wise concentration of population in the state of Karnataka is of three major religions viz., Hindus, Muslims and Christians. Hindus are returned on the higher side with over three per cent more than the national average. Christians recorded nearly one per cent less whereas the proportion of Muslims in the state to national population was almost the same. There are 85.5 per cent Hindus, 11.6 per cent Muslims and 1.9 per cent Christians in Karnataka as against that of 82.4 per cent Hindus, 11.7 per cent Muslims and 2.3 per cent Christians in India. In regard to concentration of other three major religions viz., Sikhs, Buddhists and Jains it is observed that Jains with 0.7 per cent form the fourth major religion in the state whereas Buddhists with 9.8 per cent is the third major religion in India. In the Indian scene the Sikhs form fifth major group, whereas in Karnataka, Buddhists and Sikhs are placed fifth position.

Religion wise growth in the state during the decade 1981 - 91 reveals that the major religions viz., Hindus, Muslims and Christians recorded a growth rate in lesser degree i.e., 20.7 per cent, 25.7 per cent and 11.1 per cent respectively, against that of 22.3, 26.1 and 16.9 per cent in India as a whole. On the other hand Buddhists, Sikhs and Jains recorded a growth rate of 72.8 per cent, 57.8 per cent and 14.6 pecent respectively for the state against that of 34.0, 24.2 and 3.9 per cent respectively for India. Thus, the Jains recorded a higher growth of nearly 11 per cent in the state than that of India as a whole during the decade 1981 - 91.

Percentage distribution of population during 2001 Census, by major religions in India and Karnataka shows that Hindus form majority of the population with 80.5 and 83.9 per cent respectively, while Muslims form 13.4 and 12.2 per cent for the country and state respectively. The proportion of these religions for the country and state, during 1991 Census was 82.4 per cent and 85.5 per cent for Hindus and 11.7 and 11.6 per cent for Muslims. There is not

much noticeable changes are found in other regions. Persons who have not reported to which religion or faith they belong to has increased in Karnataka, as its proportion to the total population has increased from 0.1 per cent in 1991 Census to 0.3 per cent during 2001 Census.

ANNEXURE V(2) - PERCENTAGE DISTRIBUTION OF POPULATION UNDER EACH RELIGION TO TOTAL POPULATION IN THE DISTRICTS OF KARNATAKA - 1991 CENSUS & 2001 CENSUS

Others	6,325	Ng	115,460	0.22	167	0.02	44	0.00
Religion not stated	36,121	0.10	120,247	0.23	1,150	0.11	216	0.02

The percentage distribution of population by major religion in Karnataka and Udupi district for 1991 and 2001 Censuses are presented in the above table. As may be seen from the table that in Karnataka, Hindus form 85.5 and 83.86 per cent of the total population during 1991 and 2001 Censuses, followed by Muslims and Christians. The corresponding statistics for the district does not differ much as Hindus and Muslims occupy the top two places followed by Christians. These three religion cover more than 90 per cent of the total population of the district. Remarkable increase in the proportion of Buddhists population has been noticed between 1991 and 2001 Censuses in the State.

ANNEXURE V(4) - DISTRIBUTION BETWEEN RURAL AND URBAN AREAS OF MAJOR RELIGIONS IN KARNATAKA AND UDUPI - 1991 & 2001

Sl. No.	Religion	Karnataka				Udupi			
		1991		2001		1991		2001	
		Rural	Urban	Rural	Urban	Rural	Urban	Rural	Urban
1	2	3	4	5	6	7	8	9	10
1	Hindus	73.2	26.8	70.4	29.6	79.0	21.0	82.2	17.8
2	Muslims	44.5	55.5	41.0	59.0	65.3	34.7	75.1	24.9

Rural - Urban differentials

Distribution of major religion by residence for the State and district are presented in the above statement. Majority of Hindus, Jains, Buddhists and those who have not stated their religion are residing in rural areas of the State during both the Censuses. While population belonging to Muslim, Christian and Sikh religion reside in urban areas of the State. As far as the district is concerned, according to 2001 Census data, except Buddhists and Sikhs, all major religions are concentrated in rural areas. Buddhists and Sikhs account for 66.4 and 67.6 per cent respectively in urban areas. A comparative data for 1991 Census is provided in the annexure.

A : Actual, **P**: Percentage

District - Taluk variation

Talukwise distribution of population following major religion is presented above. As far as the district is concerned, majority of the population follow Hindu faith in all the taluks. This is followed by Muslims and Christians in Udupi district. A comparison between 1991 and 2001 Census data expose marginal variations in different faiths persuaded by the population during the decade.

**Note:- ***The data on marital status is being tabulated upto district level only. As such the data for newly created districts could not be recalibrated for 1991 Census. Hence the data of unbifurcated districts are presented for the newly created districts also.

It may be seen from Annexure VI that the percentage of "Never Married" population accounts for 49.24 per cent and 51.52 per cent at state and district levels during 2001 Census, while the same was 52.05 per cent and 56.25 per cent during 1991 Census. Similarly the percentage figures of the district for Married, widowed and Divorced or Separated are 41.96, 6.35 and 0.16 per cent during 2001 Census. Comparative data for 1991 Census is also furnished in the table for ready reference. The percentage variation of all the marital categories between rural and urban is marginal in both state and district population.

The level of education by sex for the district and the State during 1991 and 2001 Census are presented in the above annexure. It can be seen that percentage of illiterates during the decade has decreased vis-a-vis for the State and the district. Though the male literates out number females, the percentage of women folk acquired literacy during the decade is more than the male population. The comparison of data for the two censuses reveals it so for the State and the district. The different educational level attained by the population can be seen in detail in the above annexure.

ANNEXURE - VIII
Distribution of different Mother Tongue returned during 1991 and 2001 Censuses

As a part of census publication program the data on spoken languages/mother tongues will be presented under C series. The table C-7 shows the distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each for district, with total, rural/urban and male/female break ups. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table divided into Part A - scheduled languages with the mother tongues grouped under each and Part B - Non-scheduled languages with the mother tongue grouped under each. The definition of 'Mother Tongue' is the same as in 1991 Census. The instructions to the enumerators in regard to this question read as under:

Record Mother Tongue in full, whatever be the name of the language returned by the person enumerated. The definition of Mother Tongue is the same as in 1991. "Mother Tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the Mother Tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded".

As the above instructions to the enumerators would show, the respondent was made to feel free to return the name of his/her Mother Tongue and the same was recorded faithfully by the enumerators. This naturally leads to recording of a very large number of Mother Tongue names. It is to be mentioned that Mother Tongues as returned in the Census are basically, the designation provided by the respondents. These designations or Mother Tongue labels need not be identical with the actual linguistic mediums. For assessing the correlation between the Mother Tongue designations and actual languages and dialects the raw returns of Census were subjected to thorough scrutiny and rationalization.

The abstract of languages as Mother Tongues and their strength in the district during 1991 and 2001 Census are provided below.

STATEMENT-I
ABSTRACT OF LANGUAGES AS MOTHER TONGUES AND THEIR STRENGTH IN UDUPI DISTRICT-1991 AND 2001 CENSUS

PART A: LANGUAGES SPECIFIED IN THE EIGHTH SCHEDULE TO THE CONSTITUTION

Sl. No.	Language		1991 Census		2001 Census

15	Tibetan	-	-	12	-
16	Total Of Other Languages	1,311	0.12	13,728	1.23

The statement I & II gives a clear picture of the languages spoken in the district. A closer study of data reveals that as many as 23 and 32 languages which returned 10,000 or more speakers at All India level are spoken in the district during 1991 and 2001 Census repectively. The 'Other' category, include Mother Tongues spoken by less than 10,000 speakers at All India level. Majority of the population speak Kannada which constitute 40.41 and 42.35 per cent followed by 13.06 and 12.29 per cent of Konkani speaking population in 1991 and 2001. Among the languages not specified in the Eighth Schedule to the constitution, Tulu is spoken by 31.58 per cent of population during 2001.

Linguistic classification of the languages

The names of the 114 Scheduled and Non-Scheduled languages falling in the five language families are given below with the Scheduled Languages denoted as (S). Of the 18 Scheduled Languages, 13 fall in the Indo-Aryan branch of the Indo-European family, 4 in the Dravidian family and one in the Tibeto-Burmese family.

1. INDO-EUROPEAN

(a) INDO-ARYAN

1. Assamese (S), 2. Bengali (S), 3. Bhili/ Bhilodi, 4. Bishnupuriya, 5. Dogri, 6. Gujarati (S), 7. Halabi, 8. Hindi (S), 9. Kashmiri (S), 10. Khandeshi, 11. Konkani (S), 12. Lahnda, 13. Marathi (S), 14. Nepali (S), 15. Oriya (S), 16. Punjabi (S), 17. Sanskrit (S), 18.Sindhi (S), 19. Urdu (S)

(b) GERMANIC

1. English

2. DRAVIDIAN

1. Coorgi/Kodagu, 2. Gondi, 3. Jatapu, 4. Kannada (S), 5. Khond/Kondh, 6. Kisan, 7. Kolami, 8.Konda, 9. Koya, 10. Kui, 11. Kurukh/Oraon, 12. Malayalam (S), 13.Malto, 14. Parji, 15. Tamil (S), 16. Tulu, 17. Telugu (S)

3. AUSTRO-ASIATIC

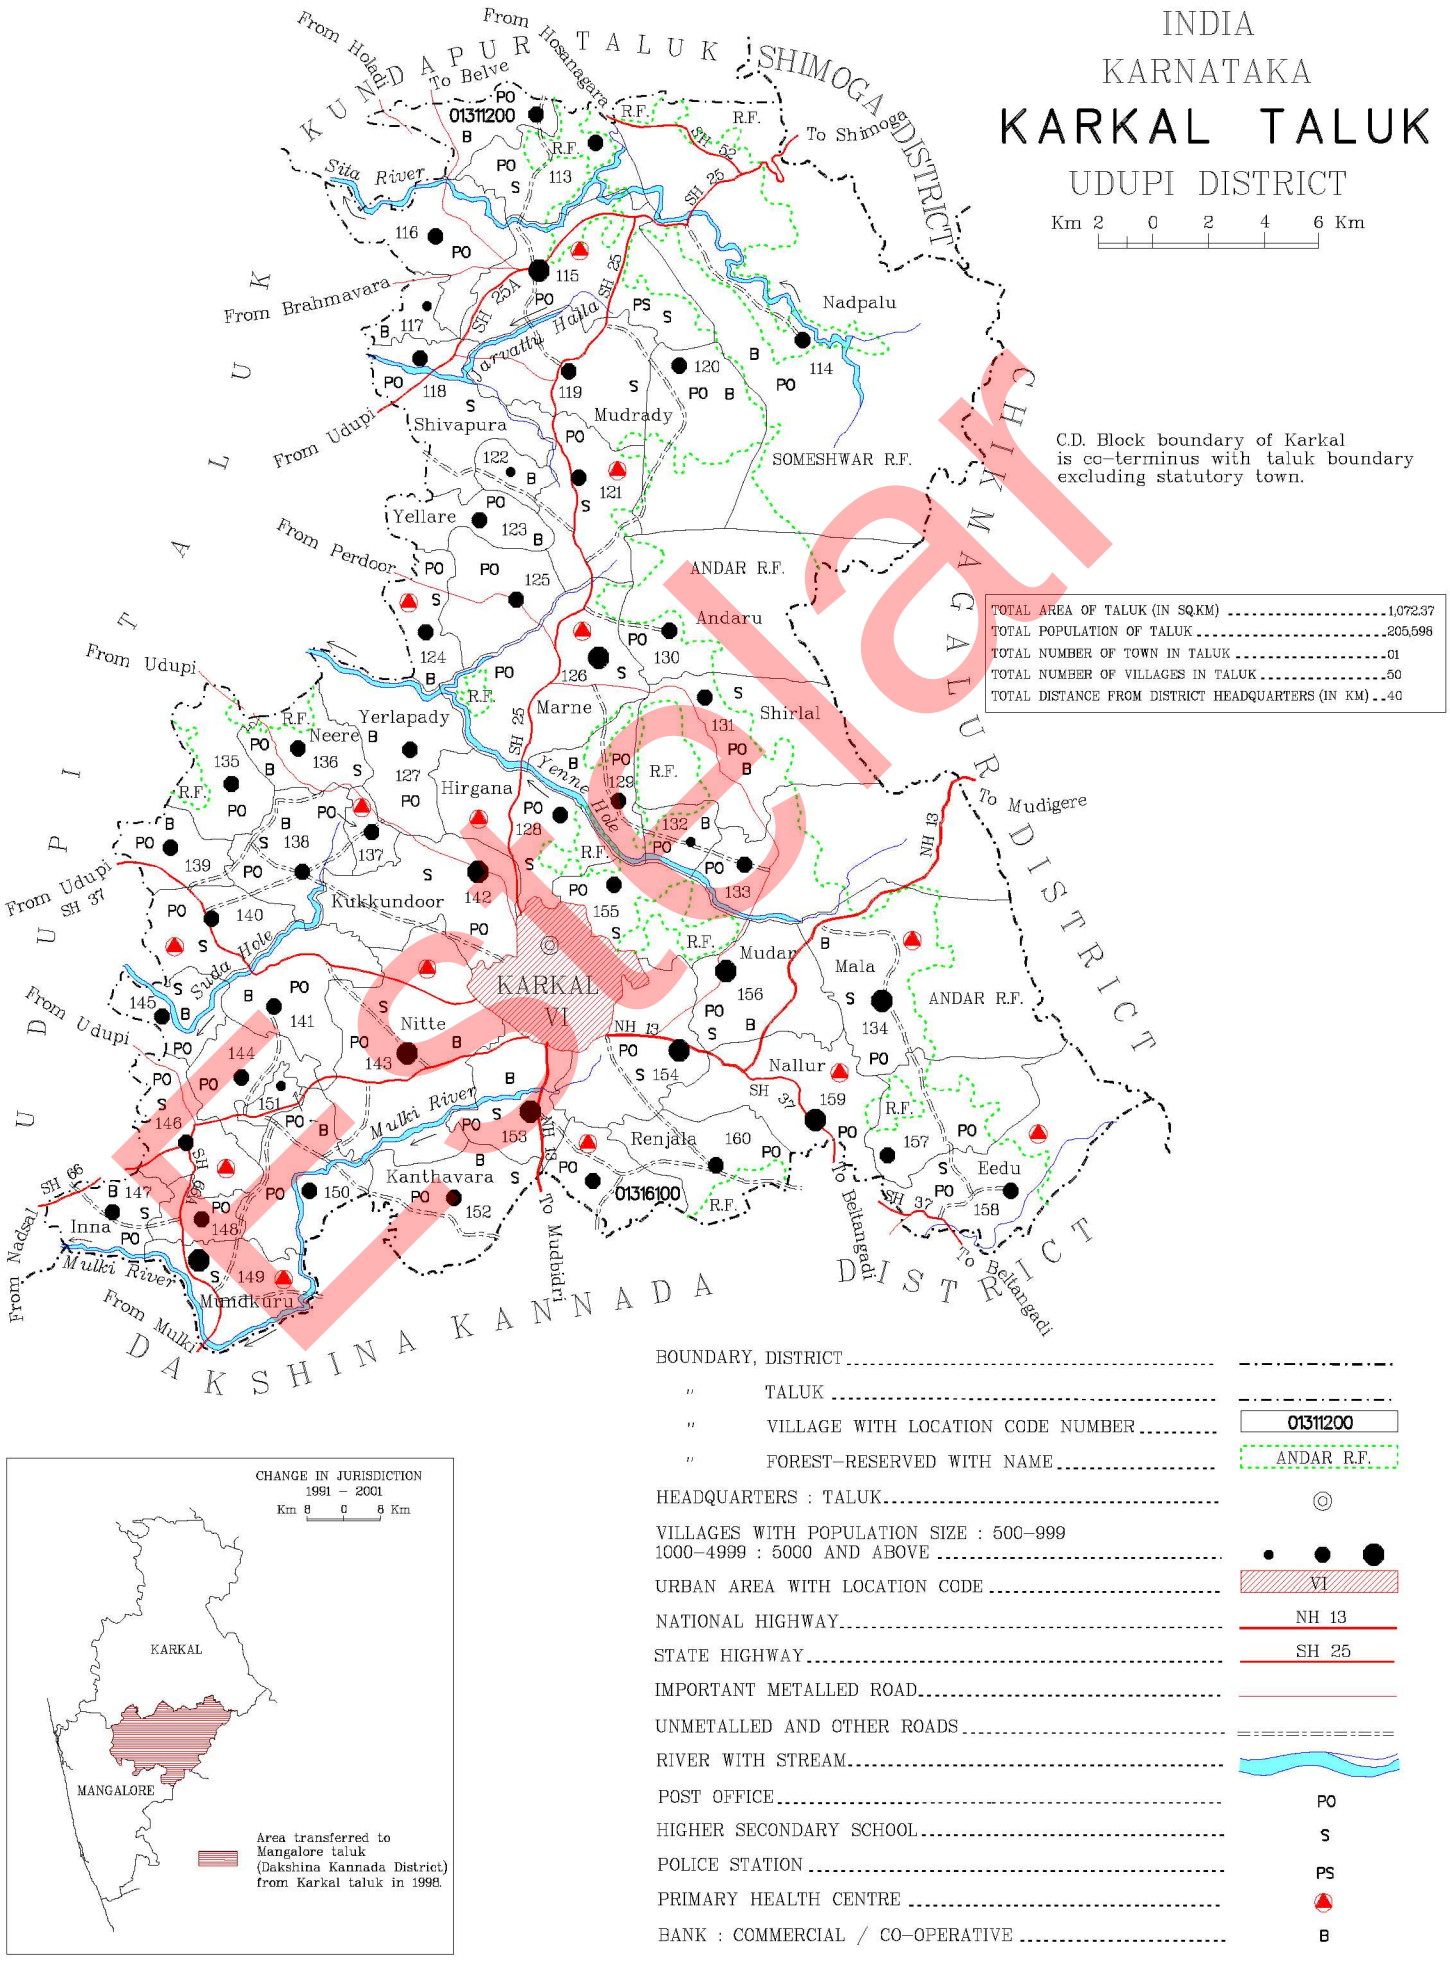

1. Bhumij, 2. Gadaba, 3. Ho, 4. Juang, 5. Kharia, 6. Khasi, 7. Koda/Kora, 8.Korku, 9. Korwa, 10. Munda, 11. Mundari, 12. Nicobarese, 13. Santali, 14. Savara

4. TIBETO-BURMESE

1. Adi, 2. Anal, 3. Angami, 4. Ao, 5. Bhotia, 6. Bodo/Boro, 7. Chakesang, 8. Chakru/ Chokri, 9. Chang, 10. Deori, 11. Dimasa, 12. Gangte, 13. Garo, 14. Halam, 15. Hmar, 16. Kabui, 17. Karbi/Mikir, 18. Khezha, 19. Khiemnungan, 20. Kinnauri, 21. Koch, 22. Kom, 23. Konyak, 24.Kuki,25. Lahauli, 26.Lakher, 27. Lalung, 28. Lepcha, 29. Liangmei, 30. Limbu, 31. Lotha, 32. Lushai/Mizo, 33. Manipuri (S), 34. Mao, 35. Maram, 36. Maring, 37. Miri/ Mishing, 38. Mishmi, 39. Mogh, 40. Monpa, 41. Nissi/Dafla, 42. Nocte, 43. Paite, 44. Pawi, 45. Phom, 46. Pochury, 47. Rabha, 48. Rengma, 49. Sangtam, 50. Sema, 51. Sherpa, 52. Tangkhul, 53. Tangsa, 54. Thado, 55. Tibetan, 56. Tripuri, 57. Vaiphei, 58. Wancho, 59. Yimchungre, 60. Zeliang, 61. Zemi, 62. Zou

5. SEMITO-HAMITIC

1. Arabic/Arbi
