Gobind Sagar Lake

Gobind Sagar Lake is one of the biggest man made lake formed by blocking the water of Satluj river at Bhakra, where the highest straight gravity dam in the world has been constructed. Rivers Beas and Satluj have been linked by tunnel near Slapar in Mandi district, as a result of which dimension of the lake has swelled more by submerging 371 villages of the district including the old Bilaspur town. New township of Bilaspur planned and built on modern lines above the old site looks over this vast lake and is seat of district headquarters. The area of the lake is 96.5 sq. kms. with storage capacity of 7.80 million cubic ft. It moves the wheel of four hydro electric power houses of Bhakra, Ganguwal and Kotla Power Plants in Punjab with installed capacity of 1,200 MW of electric power and brings under irrigation 26 Lac hectares of land in the state of Punjab, Haryana and Rajasthan. The lake is very useful for the development of pisciculture and water games within Himachal Pradesh. Besides fish, there is a large scale production of fish seeds in the lake. Memories of old town are nostalgically imbibed in the folk songs of the district and form part of folk culture of the district.

(x) Major characteristics of the district 67-68

(xi) Scope of Village Directory and Town Directory 68-70

PART-A VILLAGE AND TOWN DIRECTORY 71-334

Section-I Village Directory

(a) Note explaining the abbreviations used in Village Directory 73-76

(b) List of villages merged in towns and outgrowths at 2001 Census 76

(c) 1 (i) Maps of Ghumarwin C D block and Ghumarwin Tehsil 77-79
(ii) Alphabetical list of villages alongwith location code 1991 and 2001 81-85
(iii) Village Directory data of Ghumarwin C D block 86-131

2 (i) Maps of Geharwin C D block and Jhanduta Tehsil 133-135
(ii) Alphabetical list of villages alongwith location code 1991 and 2001 137-143
(iii) Village Directory data of Geharwin C D block 144-193

3 (i) Maps of Bilaspur Sadar C D block, Bilaspur Sadar Tehsil and Naina Devi Sub-tehsil 195-199
(ii) Alphabetical list of villages alongwith location code 1991 and 2001 201-209
(iii) Village Directory data of Bilaspur Sadar C D block 210-283

(d) Appendices to Village Directory 284-285

Appendix I Abstract of Educational, Medical and other Amenities in villages - C D block level 286-291

Appendix IA Villages by number of Primary Schools 292

Appendix IB Villages by Primary, Middle and Secondary Schools 292

Appendix IC Villages with different sources of drinking water facilities available 292

Appendix II Villages with 5,000 and above population which do not have one or more amenities available 292

Appendix II A Census Towns 292

Appendix III Land utilisation data in respect of Census Towns/Non-Municipal towns 292

Appendix IV C D block-wise list of inhabited villages where no amenity other than drinking water facility is available 293

Appendix V Summary showing number of villages not having Scheduled Castes population 293

Appendix VI Summary showing number of villages not having Scheduled Tribes population 293

Appendix VII A List of villages according to the proportion of the Scheduled Castes to the total population by ranges 293-310

Appendix VII B List of villages according to the proportion of the Scheduled Tribes to the total population by ranges 310-313

Appendix VIII List of villages under each Gram Panchayat 313

Section-II Town Directory

(a) Note explaining the abbreviations used in Town Directory 317-320

(b) A brief analysis of Town Directory Statements 320-322

Statement I - Status and Growth History 324-325

Statement II - Physical Aspects and Location of Towns 324-325
Statement III - Municipal Finance 326-327
Statement IV - Civic and Other Amenities 326-327
Statement V- Medical, Educational, Recreational and Cultural Facilities 328-331
Statement VI - Trade, Commerce, Industry and Banking 332-333
Statement VII- Civic and Other Amenities in Slums 332-333
(c) Appendix to Town Directory 334

PART-B PRIMARY CENSUS ABSTRACT 335-491
(a) Brief note on Primary Census Abstract 337-339
(b) District Primary Census Abstract (General) 342-347
(c) Appendix to District Primary Census Abstract 351
Primary Census Abstract for Scheduled Castes 354-359
Primary Census Abstract for Scheduled Tribes 362-367
C D Block-wise Village Primary Census Abstract 370-483
Urban Primary Census Abstract 486-491

Annexures 493-507
Annexure I Number of villages under each Gram Panchayat 495
Annexure II Fertility, Mortality and Migration, 1991 Census 495
Annexure III Various measures of Fertility and Mean Age at Marriage, 1991 Census 495
Annexure IV(A) Percentage distribution of Migrants by place of birth, 1991-2001 Censuses 496-497
Annexure IV(B) Migrants by place of last residence, 1991-2001 Censuses 497
Annexure V Brief account of main religions in the district as per 1991-2001 Censuses 498
Annexure VI Sex wise Marital status of population as per 1991-2001 Censuses 498-499
Annexure VII Age, Sex and Educational levels in the district, 1991-2001 Censuses 499-501
Annexure VIII Distribution of different mother tongues returned in 1991 Census 501
List of Educational, Wildlife Sanctuaries, National Parks, Post Offices, Banks and Medical Institutions 502-507

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc

2 The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district Thereafter, at successive censuses, its scope and coverage has been enlarged The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA The 1971 census-DCHB series was in three parts Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages The 1981 census DCHB was in two parts Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels New features alongwith restructuring of the formats of village and town directory were added into it In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme Information on approach to the village was provided for the first time in the Village Directory so-as to give the details on number of inaccessible villages in each district In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns

3 The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit

4 The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village Income and expenditure of gram panchayat, wherever possible, has been provided Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given This includes educational facilities (namely primary, middle, high, higher secondary schools and colleges), medical facilities (viz Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities In Town Directory, the statement on Slums has been modified and

its coverage enlarged by including details on all slums instead of 'notified slums' The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs

5 The village and town level amenity data have been collected, compiled and computerised in prescribed record structured under the supervision of Shri R L Bisotra, Director of Census Operations, Himachal Pradesh Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991 The task of planning, designing and coordination of this publication was carried out by Shri R G Mitra, Deputy Registrar General (C&T) and Dr I C Agrawal, Senior Research Officer of Social Studies Division Dr R P Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables The draft of DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S L Jain, Deputy Director and Shri R K Mehta, Assistant Director, I am thankful to all of them and others who have contributed to make this publication possible

D K Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated 17 10 2006

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with historical background of the District Census Handbooks but also amply elaborated the scope and coverage envisaged for this country-wide project In fact, this is the most important district level publication which provides reliable data at grass root level for the purpose of planning administrative requirements as well as of academic development in socio-demographic field The each of the District Census Handbook contains the salient results on the data gathered at the actual enumeration of head-count and in addition contain a wealth of other non-census information in respect of each village and town of the district

Continuing the tradition of the earlier Censuses, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents Part-A contains Village Directory which provides information on infrastructural amenities and land use data at village level i e name and location of villages, area, population, number of households, important civic amenities/ facilities available in villages like educational, medical, drinking water, post, telegraph and telephone, commercial and co-operative banks, agricultural & non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town & distance, power supply, news paper/magazine and most important commodity manufactured in the villages Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district C D block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans

Part-B in the District Census Handbook contains Village and Town Primary Census Abstract This provides information on area, number of households, sex-wise total population, child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i e cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district

Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages, conditions of housing, assets available with households and demographic profile of population at Tehsil/C D Block level which are of much utility for demarcation of areas of surplus and deficit to reorient the planning process

The District Census Handbook was the joint venture of the Government of Himachal Pradesh and the Census Organisation of the Government of India The design of 2001 District Census Handbooks was evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office In earlier Censuses, the cost of publication of these books were met by the State Government but now these are being printed centrally by the Census Organisation In accomplishing this task, we have had the ready and whole hearted co-operation of the staff at various levels of different departments of the State Government The data so supplied by these field level officers have been cross checked with the data obtained from various departments and an attempt had been made to reconcile the discrepancies to make it more reliable I am grateful to all Heads of Departments of the State Government, officers and staff engaged in the conduct of 2001 Census for their co-operation to accomplish this task

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring We had the honour of having enlightened guidance and encouragement of Sh J K Banthia, I A S , the former Registrar General and Census Commissioner, India and I owe special thanks to Sh J K Banthia I am equally grateful to Sh D K Sikri, I A S , the present Registrar General and Census Commissioner, India for guiding and encouraging for the publication of this District Census Handbook I am also thankful to Dr R P Singh, Consultant (Map), Sh R G Mitra, the former Deputy Registrar General (C & T) and Dr I C Aggarwal, Asstt Registrar General (SS) and Sh S L Jain, Deputy Director of S S Division for providing technical guidance and finalising this report

The 2001 Census Operations in Himachal Pradesh were carried out under the dynamic direction of Dr R L Bisotra, I A S , former Director of Census Operations All credit for successful conduct of Census Operations in the State, despite topographical and climatic conditions in the State, goes to him The work of two District Census Handbooks was initiated under his able guidance he was recalled by the State Government in March, 2004 for taking up another assignment but before this books was finalised I owe my deep sense of gratitude to Dr R L Bisotra, I A S , the former Director of Census Operations for the successful conduct of the Census Operations in the state

The data presented in the District Census Handbook required a concerted team work of officers and staff members of this Directorate who were involved with it at various stages of its planning supervision, field work,computerisation, preparation of manuscript, maps and C R C for printing I express my appreciation for the painstaking dedicated service rendered by all of them and also whose names have been acknowledged separately However, the special mention may be made of S/Shri L R Katiyar and A S Negi, Asstt Directors for preparing the draft report of this publication S/Shri R K Sharma, Statistical Investogator, Gr-II and R D Bali, Statistical Investigator, Gr-III for drafting of analytical notes and checking of Village and Town Directory Primary Census Abstract included in this publication was scrutinized by Census Section under the supervision of Sh C M Azad, Statistical Investigator, Gr-II The whole manuscript of the District Census Handbook was edited and finalised by me Maps appearing in this publication were prepared by Map Section under the guidance of Smt Veena Thakur, Sr Geographer Camera Ready Copy of District Census Handbook was prepared under the supervision of Sh Sohan Lal Quami, Sr Tech Asstt (Ptg) I express my appreciation for the painstaking dedicated service rendered by them and all other my colleagues in the Directorate associated with this project

I shall feel greatly rewarded if the book comes to the expectation of the data users

District Highlights – 2001 Census

1 The population of the district has increased by 15 4 per cent during 1991 - 2001

2 The population of the district constitutes 5 61 per cent of state population and ranks 10th position

3 Bilaspur district ranks 8th position in term of literacy slightly above to the state literacy rate

4 The District occupies 5th position among the districts in registering sex ratio of 990 females per thousand males as against state's average of 968 females

5 Naina Devi and Shah Talai are the famous pilgrimage centres and attract lakhs of pilgrims from neighbouring states

6 Bhakra Dam, the highest straight gravity dam in the World is located in Naina Devi sub-tehsil

7 Gobind Sagar lake occupies the predominant position amongst the places of tourist interest

8 All the villages of district are electrified

9 The economy of the district is mainly agrarian and majority of the population in the district is engaged in cultivation

Note Villages fully covered as out growths (OGs) and such villages therefore are not included under the item, "Number of villages'

Definition of Census Town

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns -

i) A minimum population of 5,000 ; -

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile)

Ranking of Tehsils/Sub-tehsils in the District

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level The District Census Handbook was firstly introduced during the 1951 Census, which brought out the Census data down to the town/village level Till then the census data was presented mostly up to district/tehsil/sub-tehsil/ town level only

The District Census Handbook of 1951, apart from the census data, it contained general information of the district like, physical, economic, socio-cultural and administrative aspects of the district including both types of data, census as well as non-census

The 1951 pattern of District Census Handbook continued uninterrupted till 1961 In 1961 the scope of the District Census Handbook was made more comprehensive by including additional items such as climate, geology, agriculture, industry, forests and number of cross tables picked from various series of census tables Till date it is regarded as a model District Census Handbook The entire presentation was divided into four parts First part dealt with the land and the people and the second part contained census tables Whereas third part contained information regarding agriculture, medical and health while fourth part contained village/town directory

During 1971 it was realized that the combination of census as well as non-census data in a single publication, resulted in unnecessary delay in the publication of census results and in order to avoid inordinate delay, it was decided that census data should be delinked from the non-census data and the publication should be brought out in two volumes Thus, District Census Handbook was splited into two volumes First volume dealt with the village and town directory and also village/town-wise Primary Census Abstract of the district whereas second volume dealt with the non-census data, social, economic and cultural tables

In the 1981 Census in order to streamline and to overcome delay in bringing out the publication, the second part of 1971 District Census Handbook was omitted Thus, 1981 District Census Handbook consists of single volume which contains village/town directory in Part-A and town/village wise Primary Census Abstract of the concerned district in Part-B

In the 1991 Census too, with a view to avoiding delay in bringing out the publication, District Census Handbook was brought out in a single volume in two parts as the data given therein are closely inter related Part-A includes Village and Town Directory, while Part-B includes Village and Town Primary Census Abstract In the 1971 Census as well as in the 1981 Census, the Village Directory format in District Census Handbook Part-A had 20 columns while in 1991 Village Directory, the number of columns has been reduced to 18 by deleting two columns of staple food and remarks Moreover, in 1991 District Census Handbook, village and town directory as well as Primary Census Abstract were published first time at C D Block level instead of tehsil/sub-tehsil level due to demand for framing development plans at block level

In 2001 Census, the same pattern has again been followed though the number of columns in village directory format has been raised to 23 for providing some additional information in the villages The additional non-census data and census data include information on agricultural and non-agricultural credit societies, co-operative societies, recreational and cultural facilities, number of commercial and co-operative banks The number of gram panchayats alongwith their constituent villages, notes on fertility, mortality and migration, main religions, marital status and mother tongues etc based on 1991 Census are-

provided in the form of separate annexure at the end of the book In 2001 District Census Handbook too, Part-A village directory will contain information about the name of the village, location code, total area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communications, number of banks commercial and co-operative banks, agricultural and non-agricultural credit societies, co-operative societies, recreational and cultural facilities, mode of transportation and communication, approach road, nearest town, power supply, availability of newspapers and most important articles, commodity manufactured This part also contains information about land use in the village, forests, agriculture, irrigational sources, culturable wastes etc Similarly, the town directory contains seven statements which would deal with area of the town, number of households, population, rate of growth of the town during the last nine decades, density of population of the town, sex-ratio, status of civic administration, its finances and other socio-cultural, educational, and developmental activities and the amenities that might have been undertaken or provided Part-B would contain the town/village wise Primary Census Abstract which includes information/ data about the total area of the village, total number of households, population and its sex-wise break-up, also the break-up of Scheduled Castes and Scheduled Tribes, literacy The break-up of the working population by sex into four industrial categories viz (i) cultivators, (ii) agricultural labourers, (iii) workers in household industries, and (iv) other workers Apart from the aforesaid data, the Primary Census Abstract will contain the data on the marginal workers and non-workers also

It would be pertinent to mention here that the sources of information for the town and the village directory have been mainly the heads of urban bodies and the revenue agency supplemented by the concerned departments The information so collected from the various sources have been thoroughly scrutinized so as to ensure its authenticity It is hoped that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by scholars and planners alike A number of new tables based on P C A are also included and an effort has been made to correlate the data with the geography of the district These endeavours should make the District Census Handbook definitely more useful than even before The village and town directory as also the primary census abstract included in this handbook should quench the thirst of the planners involved in micro level planning Similarly additional data revealing civic and other amenities in towns is oriented to minimum need programme Scholars and planners alike should benefit from the data on amenities by size of the town

(ii) Brief history of the district Himachal Pradesh came into being as a part 'C' State of the Indian Union on 15th April, 1948 as a result of merger of 30 Punjab and Shimla Hill States in the India Union viz , Bhaghat, Bhajji, Baghal, Beja, Balson, Koti, Kumarsain, Kunihar, Kuthar, Mandi, Bushahr, Chamba, Darkoti, Delath, Dhadi, Dhami, Ghund, Jubbal, Khaneti, Keonthal, Madhan, Mahlog, Mangal, Ratesh, Rawringarh, Sangri, Sirmaur, Suket, Tharoach and Theog At that time the State had 4 districts viz , Chamba, Mahasu, Mandi and Sirmaur and its area was 2,716,850 hectares The State was taken over under the Central Administration on the 12th October,1948 By an act of Parliament the 31st State of Bilaspur which was till then a separate entity under the control of Chief Commissioner, was integrated with Himachal Pradesh on 1st July, 1954 there by adding one more district with an area of 106, 848 hectares

The state of Bilaspur was originally known as Kahlur, after a fort of that name built by Raja Kahal Chand, sixth of his line, and called after himself Kot Kahlur Raja Deep Chand who succeeded to the '*gaddi*' about 1653 A D founded Byaspur, the present capital in honour of Rishi Byasji, hence named as Bilaspur

The erstwhile ruling family of Bilaspur claims its descent from Chandervanshi Rajputs who reigned at Chanderi in the Bundel khand region of Madhya Pradesh The place now forms parts of Guna district It is said that the seventh ruler of Chanderi kingdom Harihar Chand had a dream of Goddess Jawalamukhi Thereafter, he decided to seek his fortune in a shrine

As a result of this, he handed over the kingdom to his youngest son Govind and then proceeded towards Jawalamukhi along with his remaining four sons and established themselves at Jindbari where they constructed a fort and settled there for some time before proceeding to Jawalamukhi They paid a visit to Nadaun

the then capital of Kangra The Raja of Kangra arranged a tent pegging contest and promised his daughter to the man who succeeds in taking a certain peg In reality this peg was the trunk of a tree Sabir Chand the youngest son of the Chanderi King entered the fray Sabir Chand lost the control of his horse and was killed and the deception practised by the Kangra Raja was discovered Thereafter the battle ensued and the Kangra forces were defeated Kangra Tikka and the Chanderi King Hari Chand were both among the slain

The Capital of ruling dynasty continued to be located at Kotkahlur till 1600 A D when the heir apparent Bir Chand fled to Sunhani across the river Satluj along with his mother where he settled His father, the then ruler, Gyan Chand embraced Islam at the behest of Mughal ruler at Sirhand who was so impressed with his fine appearance that he gave his own daughter in marriage He returned to Kotkahlur after conversion After the death of Raja Gyan Chand, Bir Chand returned to Kotkahlur and got himself installed as the King He kept his capital at Sunhani on the right side of river Satluj In 1650 A D when Deep Chand of the same dynasty succeeded as Raja of Kahlur state, he decided to shift his capital as he developed strong disliking for the place It is generally said that accompanied by 2 Hindus and 2 Mohammedan faquirs he sought new site for the capital and finally settled at a place on the left bank of Satluj river traditionally called "Beas gufa" after the name of Rishi Vyas He built a palace called 'Dholar' over looking the river and founded town on the river bank which was named after the Vyas gufa and was later on called Bilaspur Since then the capital of Bilaspur continued to be at Bilaspur though the original town which was established by the Chandel dynasty was submerged in the 'Govind Sagar' on 1st July, 1954 A new township above the old one has come up at an elevation of 673 metres above sea level

The district is situated in Satluj valley in the outer hills and covers an area of 1,167 Sq kms Its boundary touches Una, Hamirpur, Mandi and Solan districts Satluj is the main river which passes through the middle of the district and divides it into almost equal parts Initially, it consisted of two tehsils namely Ghumarwin and Bilaspur Sadar In January, 1980 the State Government created a separate Sub-tehsil called Naina Devi with headquarters at Swarghat out of Bilaspur Sadar tehsil In 1984 one new Sub-tehsil namely, Jhanduta was created by carving out some areas of tehsil Ghumarwin which has been up graded to tehsil in 1997 Administratively, the district is divided into two Sub-divisions, & 3 tehsils, one Sub-tehsil, 3 Community Development blocks, 132 Panchayats, 2 Municipal Councils and 2 Nagar Panchayats

Bilaspur had been a town in 1891 and 1901 Censuses but was declassified thereafter in the year 1911 In 1931 Census, it was again classified as town and has been continuing as such since then Naina Devi a place of religious importance was declared as a town for the first time in 1953 A small town committee was set up to look after the affairs of this place till 1960 In the year 1961 it was notified as Municipal Committee After 1981 Census, one more place Shah Talai has been classified as Notified Area Committee

It would be essential to go into the historical perspective of the district and to quote the previous history given by William Moor Croft who traveled through Bilaspur in 1820 The details are given in the 'History of Punjab Hill States Vol II edited by Hutchison & Ph Vogel The extract is reproduced below

"Bilaspur is not unpicturesquely situated upon the left bank of Satluj, which is here a rapid stream The Raja's dwelling whitened and decorated with flowers in fresco, is neat, but not large His garden containing chiefly pear and apricot trees, rose bushes, and beads of narcissus had been suffered to fall into neglect The bazar was in a ruinous state, more than half the shops being deserted This was ascribed to the town having been twice plundered by the Gurkhas within a few years, but it appeared that the Raja devoted almost his whole time to his private pleasures, and left the management of the public affairs entirely to his officers, by whom the people were pillaged and oppressed The Raja was formerly of great political importance in the Western Himalaya and enumerated twelve Thakurs, or feudal chieftains, as subject to its authority These Lordship have now for the most part either become independent or have merged into more recent territorial Sub-division" Vigne who passed through Bilaspur in 1835 and again in 1839 thus described its situation

" Bilaspur stands about 2,000 feet above the level of sea The situation is very picturesque, open, cultivated land, comparatively level stands on both sides of the river The verdure is of the richest description, the mountains, bold and elevated surround the outskirts of the landscape and the noble river sweeps round the angle of the bank on which the town is built with rapidity that would evince its eagerness for the notoriety it has so long deserved and has hitherto failed to obtain"

Prior to the merger of Bilaspur princely state into Himachal Pradesh on the 1st July, 1954, the state was divided into twelve '*Parganas*' These still exist, but have no administrative significance They have been merged into the erstwhile tehsils of Bilaspur Sadar and Ghumarwin at the time of formation of Bilaspur district, the boundary of which remained intact till the date '*Parganas*' which were included in Bilaspur Sadar are Bilaspur, Bahadurpur, Rattanpur, Fattehpur and Kot Kahlur '*Parganas*' of Baseh, Bachertu, Ghumarwin, Sunhani, Ajmerpur, Tuini and Saryun were included in Ghumarwin tehsil The composition of administrative units of Bilaspur district since 1951 Census is given below -

Census Year	No of tehsil/ sub-tehsil	No of towns	No of villages		
			Inhabited	Uninhabited	Total
1	2	3	4	5	6
1951	2	1	928	N A	928
1961	2	2	926	73	999
1971	2	3	911	107	1 018
1981	3	3	942	74	1 016
1991	4	4	950	94	1 044

During 1951 Census Bilaspur district was comprised of 2 tehsils having 928 inhabited villages and one town of Bilaspur The number of tehsils remained unchanged but one town of Shri Naina Devi was added in 1961 Census The Town Committee was set up in Shri Naina Devi in 1953 to look after the pilgrims and local population During 1961-71 no jurisdictional changes took place at district and tehsil level However, Ghumarwin was declared as Notified Area Committee in January, 1970 thereby raising the number of towns to three in 1971 Census During 1971-81, one new sub-tehsil of Shri Naina Devi was created by transferring 139 villages and one town of Naina Devi from Bilaspur Sadar tehsil vide Notification No GAD (GI)-6 (F)-12/73- GAC-1 dated the 24th January, 1980 The number of tehsils/sub-tehsils rose to the three in 1981 Census The total number of revenue villages were 1,016 out of which 74 were uninhabited villages

During 1981-91, an other new sub-tehsil of Jhanduta was carved out of Ghumarwin tehsil by transferring 169 villages vide notification No GAD (GI)-1- (A)-2/76- GAC dated the 22nd February, 1984 The number of tehsils/sub-tehsils rose to four in 1991 Census Besides this one NAC of Talai was also created in Ghumarwin tehsil by including villages of Changer Talai and Seyn vide notification No LSG (4)-30/82 dated 23 3 1984 and number of towns rose to four in 1991 Census

At district level no jurisdictional changes took place during 1991-2001 However, eight Patwar circles consisting of 100 villages and Shah Talai Nagar Panchayat were transferred to Jhanduta vide Notification No GAB-1(A)7/85 dated 29 11 1997 The status of Jhanduta sub-tehsil has also been upgraded to full fledged tehsil vide this notification The number of villages which were 1,044 in 1991 Census has increased to 1,061 in 2001 Census due to the completion of settlement in the district The following statement gives the number of villages and towns in respect of each tehsil/sub-tehsil during 1991-2001

Statement showing changes in number of villages and towns in district during 1991-2001

Serial number	Name of district/ tehsil/sub-tehsil	Number of villages						Number of towns	
		Inhabited		Uninhabited		Total			
		1991	2001	1991	2001	1991	2001	1991	2001
1	2	3	4	5	6	7	8	9	10
	Bilaspur district	**950**	**965**	**94**	**96**	**1,044**	**1,061**	**4**	4

3	Naina Devi sub-tehsil	145	150	23	19	168	169	1	1
4	Bilaspur Sadar tehsil	272	278	7	7	279	285	1	1

100 villages and one town Shah Talai transferred to Jhanduta tehsil from Ghumarwin tehsil vide Notification GAB-1(A) 7/85 dated 29-11-1997

People The early inhabitants of this area were Rajputs, Brahmans and Kanets The other sections of the people are mostly Rathis, Gujjars, Jats, Chamars and Kolis Chamars and Kolis are the Scheduled Castes There is sprinkling of other castes Badhis, Kabir Panthies, Lohars, Julaha, Doomnas and Bhanjre Rajputs claim their origin from Chandel clan and off shoots of the ruling family They are usually classified as Kahluriya, Mians and Chandels

The Kahluriya Mians are those who descended from Rajas and have adopted the same name-Ajmer Chandia, Tara Chandia and Kalyan Chandia The Chandels are other Rajputs, whose connection with the ruling family is noted in history Their families are named according to the villages held by their founders The Kahluriya Mians do not touch the plough so as the Rajputs, war was the only occupation and their only weapon was the sword The main branches of the Brahmans are the Shukals and Krishans The Shukals are divided into Sasani and Dharebar and the Krishans into Acharaj, Bedwa and Panda The Sasanis are strict and orthodox They serve as priests to the higher castes, and are nearly all 'muafidars' They don't inter-marry with any of the Brahmans of the higher hills, and not even with 'Parasramis' Sasanis accept Dharebar girls in marriage but they don't give their own daughters in marriage to Dharebar The Dharebar are the priests of Kanets and practise all their peculiar customs such as '*reet*' and widow remarriage They are by profession cultivators In fact, their wearing of the sacred thread is practically the only distinguishing mark of their being Brahmans

The Acharajes, 'Bedwas' and 'Pandas' belonging to Krishan class of Brahmans are considered inferior to Sasanis and Dharebars They accept alms from all the classes particularly *the 'Ant danam, Kirya dan'* etc performed at the time of deaths and are found to be occasionally indulging in 'witchcraft' also

The Kanets are in large numbers They are said to be divided into about 80 sub-divisions, the more important being Noiru, Maliaru, Dodhwalu, Bhadogu, Dalgawal, Katwal, Dagsechi, Jablianı, Sahreli and Kasoli Some of them claim to be descendants of various Rajas-the Maliarus, whose ancestor is said to have been Tegh Chand, third son of Raja Kahan Chand the 11th Raja The Kanets are now fast appropriating to be at par with them

The Rathis of Bilaspur are believed to be the descendants of Rajputs and Kanet mothers Their sub-divisions are Maharani, Baroti, Bandri, Dhuli Bharol, Lohtri, Rajnal, Gharial, Sin, Basahri, Ikthania, Tania and Kharial

The Hindu Gujjars have settled on land and engaged in agriculture besides the pastoral activities In their case, the rearing of cattle is really a subsidiary occupation, agriculture being the primary one The Hindu Gujjars in the Bilaspur district do not have any of the characteristics of the nomadic Gujjar tribes who migrate from place to place

The Chamars-who previously carried trade in leather and the Kolis who were mostly weavers have now switched over to other occupations Since then tremendous change have taken place and lot of change is discernible in the caste structure particularly in the observance of inter-caste relationship The rigidity with which it was followed earlier has to some extent softened The inter-caste marriages are now acceptable Economic factors have now taken a preferential order in the society There is a diversification in the occupational structure also Those who thought ploughing below their dignity have now willingly accepted it as a respectable occupation Similarly among other castes the occupational barriers are fast losing rigidity The rigid attitude adopted towards the lower castes is now on the wane The legislation adopted in the post independent era has brought about revolutionary changes in removing the caste barriers

Language The spoken dialect of the people is Kahluri which is an off shoot of Punjabi Grierson calls it 'Rude Punjabi" similar to that spoken in Hoshiarpur district The written script is "Devnagri" In the Royal Asiatic Society Park Street Calcutta Volume XVII Rev T Grahme Bailey describes Bilaspur as, "There are in all six dialects spoken in Bilaspur" or Kahlur as the State is some time called In the centre of the State extending to a distance of six or seven miles in every direction from the capital is the standard dialect of Bilaspuri or Kahluri Immediately to the west of this, in the portion of the

State which just out westwards and is bounded north by the district of Kangra, we find dialect which we may call western Bilaspuri To the north of the standard dialect are found two minor dialects that to the west near the Kangra border, to which we may give the name northern Bilaspuri, while that on the east near the Mandi border is the same as Mandiali which has been treated in the Language of the Himalayas Immediately south of the area of the standard dialect the people speak a slightly different dialect which I have called southern Bilaspuri Its area is a narrow strip of country on the Nalagarh border, and to the east of this in south-east Bilaspur is found a dialect locally, known as Dami It extends over the border into Arki State and beyond it commences the Kiunthali dialect which is spoken all over the Central Simla States"

"The Bilaspur dialects are so closely allied that one might call them one dialect Bilaspuri or Kahluri I have preferred the former name as the State is much better known to the outside world as Bilaspur, the name Kahlur hardly being known to any one who has not visited the State"

Food and Dress The inhabitants of the district have their staple food in maize, rice and occasionally wheat Maize is their favourite food and constantly eaten from September to May Rice may also be taken once a day The agricultural classes have three meals a day Early in the morning they have some maize or wheat bread left over the day before This is called 'Datialu' and forms the breakfast The mid-day meal consists of maize or wheat bread taken with some pulses and chhachh (Buttermilk) In the evening rice is taken if one can afford it otherwise the maize bread is again served with some dal and vegetables Meat is not taken so frequently The habit of taking morning tea is common among all classes of people

Bilaspur being situated in a temperate zone, the clothing requirement is light Ordinarily clothing for men consist of a shirt and pyjama The turban has now been replaced by Gandhi cap More often people now go bare headed The economically better of classes have started using bushirts and trousers In winter people use woollen clothes made of home-spun wool which is locally woven but the ready made woollen garments are now-a-days becoming more popular among the middle and upper class people In summer 'Khadar' or mill made cotton cloth is used When villagers attend any fair or festival they are attired in their best

Churidars have been replaced by *Salwar-Kameej* The older women wear a long shirt and 'suthan' The head is covered with a coloured 'dupatta' Now the Punjabi kameez-salwar is a common item of dress Cheap rayons or nylons are used for 'dupatta'

Housing In rural Bilaspur, the houses are mostly built of mud, stone and brick plastered inside and outside with clay The modern trend is now to build pucca houses with R C C structure in the rural areas also They are generally double storeyed with windows Thatched roofs have been almost replaced by slates or G I sheets or concrete slabs The upper and lower floors are used for living and storing Cattle sheds are built separately

The traditional household furniture is made up of string cots and 'manjris' or rice stalks or palms The traditional furniture have, however, now been supplemented by modern furniture consisting of wooden cots, chairs, tables and sofa sets etc by the middle and upper class people, wooden vessels are fast on the decline Household utensils are of brass and bronze Earthenwares are mostly used One or two wooden boxes or steel trunks are kept and used for keeping valuables and clothes

(iii) Administrative Set-up

Bilaspur district which forms the north-western portion of the southern Himachal Pradesh is located between 31° 12' 30" and 31° 35' 45" north latitude and 76° 23' 30" and 76° 55' 40" east longitude On the north and north-west of Bilaspur has the districts of Hamirpur and Una while on the north-east and east falls the district of Mandi This district is enclosed by Solan district from south and south-east and by state of Punjab from the western portion of the district The district is predominantly located on the lower basin of the Satluj river It is about 47 kms in length from east to west and 42 kms in breadth from north to south

For administrative purposes, the district is divided into two Sub-divisions namely Bilaspur and Ghumarwin Bilaspur Sub-division comprises of tehsil

Bilaspur Sadar, sub-tehsil Naina Devi and Ghumarwin Sub-division comprises of tehsils Ghumarwin and Jhanduta There are two Municipal Councils i e Bilaspur and Naina Devi in addition to two Nagar Panchayats viz Ghumarwin and Talai There are 136 Gram Panchayats 3 Panchayat Samitees and one Zila Parishad presently functioning in the district For the development activities the district is divided into three Community Development blocks namely Bilaspur, Ghumarwin and Geharwin

The administrative head of the district is Deputy Commissioner who is assisted by one Additional Deputy Commissioner and a Assistant Commissioner in discharging the administrative and other executive functions At sub-divisional level, Sub-Divisional Officer (Civil) is incharge of sub-division while tehsil/ sub-tehsil level, Tehsildar and Naib-Tehsildar is responsible for discharging executive and revenue related functions respectively Block Development Officer is posted in each C D block to co-ordinate and supervise the developmental activities assigned to Gram Panchayats in their areas

The district has judicial officers in the rank of District & Session Judge, a Sr Sub-Judge-cum CJM and a Sub-Judge- cum- JM The head of the district police force is Superintendent of Police and is assisted by one Additional Superintendent of Police (ASP) and a Deputy Superintendent of Police (Hqrs) in maintaining the law and order in the district

The Public Works Department of the district is looked after by Superintending Engineer, Irrigation & Public Health by Executive Engineer and State Electricity Board is having one SE (Operation) and another SE (M&T) Every department maintains its senior officers and staff at district level to implement the developmental schemes pertaining to it The forests in the district is managed by one Conservator of Forests, two Divisional Forest Officers and Range Officer Education Department is having one Deputy Director for Secondary and another Deputy Director for Primary Education in the district

Zila Parishad and Panchayat Samitees

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in development plans and in local and government affairs by decentralization of powers and functions, Zila Parishad and Panchayat Samitees have been established in the districts of Himachal Pradesh in the year 1994 under Himachal Pradesh Panchayati Raj Act, 1994 The jurisdiction of the Zila Parishad and Panchayat Samitees corresponds to the district and tehsil boundaries except that the towns are not covered by them

The Zila Parishad elects its President, Vice-President and Chairman of its committees from amongst the elected councillors The term of office of the councilors is five years An officer in the senior scale of I A S is deputed by the State Government as the Executive Officer to the Zila Parishad The Parishad is also assisted by various departments and the heads of those departments at the district level are officers of class-I or II service under the State Governments At the Block level, the Panchayat Samitees have an elected Chairman and Deputy Chairman The Block Development Officer works as Secretary to the Panchayat Samitee The executive authority for the purpose of carrying out the provisions of the Himachal Pradesh Zila Parishad and Panchayat Samitees Act rests in the Executive Officer and the Block Development Officers The Deputy Executive Officer works as Secretary of the General Body of the Zila Parishad

Urban Local Bodies

The statutory Urban Local Bodies are Nagar Panchayats, Municipal Councils, Cantonment Boards and Municipal Corporations The urban local bodies elect a councillor from each of the wards and his term is 5 years The President of the Municipal Council or the Mayor of the Corporation as also their Deputy are elected from amongst elected councillors and their term is for one year The Chairmen of various Committees are also elected from councillors with a term of five years Although for day to day administration the Executive Officer is responsible in a Municipal Council, he works under the administrative Control of the President of Municipal Council In Corporation, a senior IAS/HAS Officer is deputed by the State Government as Municipal Commissioner who is responsible for day to day administration and the executive authority lies in him

(iv) Physical Features

The district is situated in the lower Satluj valley in the outer hills It lies between 31° 12' 30" and 31° 35' 45" north latitude and between 76° 23' 30" and 76° 55' 40" east longitudes The total area of the district is 1,167 km² as per the Surveyor General of India which accounts for 2 10 per cent of the total area of the State and ranks 11th amongst the districts of the state

Configuration . The whole district is verdant and fertile, bounded by low hills, forests, grazing lands, rivulets and streams

Hills The district is entirely hilly and located at an altitude ranging between 560 metres and 1,879 metres above the mean sea level Bahadurpur Dhar attains a maximum height of 1,879 metres in this region The region has many low hill ranges known as Dhars These are Dhar Naina Devi, Dhar Kot, Dhar Tuini, Dhar Bandla, Dhar Jhinjiar, Dhar Ratanpur and Dhar Bahadurpur

Valleys The hill system just described has given rise to the formation of various smaller or bigger vales and dales as also to the basins of river or streamlets Nevertheless whatever smaller or bigger valleys have been formed are comparatively, especially in their extremities, more fertile, better cultivated and more populated than the summits, shoulders and sides of the hills

Physiography The district is entirely hilly and located at an altitude ranging between 560 metres above the mean sea level It comprises several sub-mountains (Dhars) and of which Naina Devi Ki Dhar, Kot ki Dhar, Ratanpur Dhar, Bahadurpur Dhar, Chhaiawan Dhar, Dangwil Dhar, Bandla Dhar, Tuini Dhar, Jhanjhiar Dhar and Sariun Dhar are important The Satluj is the main river which enters the district from the east at village Kasol and after flowing about 90 kms it crosses over the district boundary and then enters the state of Punjab Several tributaries like Sir, Sukar, Ali, Gambhar and Sarhyali join it at different places in the district The climate of the district varies between sub-tropical to temperate The summers are invariably hot and winters are very cold The maximum rainfall of the year is received during the monsoon season

The geology of the major portion of the district is predominantly composed of comparatively younger strata representing tertiary and quarternary rocks The eastern portion of the district consists of the older rock structure possessing faults/thrusts contact with tertiary formations The district is having Siwalik Murree Series and Shali-Deoban and Largi groups of rocks containing alluvium with sand beds and boulders and older alluvium with gravel terraces and sand beds, sand stone, lime stone, conglomerates and quartzites types The soil of the district as classified by the N B S S & L U P (I C A R), Nagpur, is Udalfs-Ochrepts (24) in the south-eastern portion of the district whereas the western and northern portions are covered by Ochrepts-Orthents (72) and Ochrepts-Psamments (73) types of soil Two distinct viz , the upper slopes thickly covered by Chir forests and the lower slopes covered by Bamboos and scrubs

The district has been divided into 2 sub-micro regions on the basis of physiography, climate, soils natural vegetation and geology which are described below -

1 **Satluj Basin** Satluj Basin is situated in the southern part of the district covering whole of Bilaspur Sadar tehsil, Naina Devi sub-tehsil, western and eastern parts of Jhanduta tehsil and south-western and southern tip of Ghumarwin tehsil More than 2/3rd of the total area of the district is covered by this region It makes its boundaries with Una and Hamirpur districts in the north-west Bilaspur- Siwalik and Mandi district in the north, north-east and east, state of Punjab and Solan district in the south-west, south and south-east

This basin is formed by Satluj river which flows through the middle of this region and enters in the region near Kasol village in north-east after traversing a course of about 90 kms, leaves the district near Nella village in south-west and then enters the state of Punjab In this region, Satluj river is joined by several tributaries from both sides, Balohi Khad which rises in Mandi district and Sukar Khad, and Sarhyali Khad which rises in the Hamirpur district, all join the Satluj from north and north-west while Ali Khad, Gambhar river and Gamrola Khad rise in Solan district and join it from the south Ali Khad forms another valley known as Jukhala valley which is lying

between Bandla Dhar and Chhabiawan Dhar Areas adjoining banks of these rivers/khads are plain and contain alluvial soil which is quite fertile The region has many low hill ranges known as Dhars such as Naina Devi ki Dhar, Kot ki Dhar, Rattanpur Dhar, Bandla Dhar, Tuini Dhar, Chhaiawan Dhar, Dangwil Dhar, Nauna Dhar, Sariun Dhar and Bahadurpur Dhar Tuini Dhar and Sariun Dhar also run parallel to each other in the north-west of Satluj river The slope of the region is from north-east to south-west and varies in elevation between 560 metres and 1,879 metres above the mean sea level Bahadurpur Dhar attains a maximum height of 1,879 metres in the region The Chir forests are found in upper areas of Dhars on north-eastern part The scrub jungles contain many species like Sheesham and Tun growing at lower elevation near the cultivated land and also on the banks of the Satluj river The Bamboo forests are mainly found in Naina Devi ki Dhar

The geological structure of the region predominantly pertains to Siwalik formations In the eastern portion, it has Shali-Deoban and Largi groups and Murree Series formations The soil cover Udalfs-Ochrepts (24) cover the eastern part and Ochrepts-Orthents (72) and Ochrepts-Psamments (73) the western part of this region

2 Bilaspur-Siwalik : This region is situated longitudinally in the northern part of the district It occupies major portion of Ghumarwin tehsil and some areas in the south-western part of Jhanduta tehsil It makes its boundaries with Hamirpur district in the north-west and north, Mandi district in the north-east while Satluj Basin enclosed it from south and south-east

This region is comparatively low hilly and has also plain and fertile valleys Elevation in this region varies between 614 metres and 1,239 metres above the mean sea level Tuini Dhar and Jhanjhiar Dhar are the main hill ranges Tuini Dhar lying in north-east direction, separates this region from Mandi district The lower ridge of Tuini Dhar also forms the eastern boundary of this region and attains maximum height of 1,239 metres The Jhanjhiar Dhar is located in between Sir Khad and Sukar Khad serve as a main drainage system of this region In this region, Sir Khad flows almost in the centre from north-east to south-west direction Sir Khad rises in Sarkaghat area of Mandi district and traverses whole of Siwalik region and joins Satluj river at Serimatla, a few kilometres downwards from Bilaspur town Sukai Khad rises in Hamirpur district, and after flowing from north to south direction it joins Sir Khad at Bagla It also forms the boundary line between Bilaspur district and Hamirpur district In this region the valley of these Khads are almost flat and fertile The climate of this region is temperate to sub-tropical Maximum rainfall in this region is recorded during monsoon period The geological structures of Siwalik formations are mainly found in the western part while in the eastern part, it has Murree Series formations The soil of this region are Udalfs-Ochrepts (24) and Ochrepts-Orthents (72), they are humid, shallow black, brown and alluvial soils of northern region and of recent origin Jhanjhiar Dhar and western slope of Tuini Dhar are thickly covered with Chir forests while in the other parts of this region, vegetation is scattered and is of scrub types

Drainage

River System Satluj river is the only river which passes through the district It enters the district near Kasol in pargana Sadar in the north-east Principal tributaries that join it from the south-east are Ali, Gamrola and Gambhar streams On the other bank i e from the north-west, Moni and Seer streams are its tributaries

The Satluj is joined by several tributaries from both side The main three tributaries are Ali Khad, Gamrola Khad and Seer Khad The length of Ali Khad is about 26 kms It rises in the Shimla district and after passing through Bahadurpur Dhar joins the river Satluj at Bilaspur Its water is utilized for irrigation and running gharats at various places Gamrola Khad also rises in the Shimla district and after draining the Ratanpur Dhar joins the river about 5 kms from Bilaspur town Seer Khad takes its origin at Awah Devi 10 kms from Sarkaghat in Mandi district After draining Kot ki Dhar and a greater portion of Ghumarwin tehsil it joins Satluj river at village Serimatla 15 kms from Bilaspur town Two other Khads Sukar and Saryali rise in the Hamirpur district and join this khad at village Balgar after draining the western portion of the district

Moni Khad and Gambhar Khad are tributaries of the river Moni Khad chiefly flows in Mandi district

and joins the river at a place in Mandi It only touches the district at village Palaila, where the water is used for irrigating land Gambhar Khad rises in Solan district The river bed is deep and is not used for irrigation

Climate The climate of this district is generally temperate as compared to the plains of the Punjab although the heat in summer is sometimes tiring The terrain is mountainous particularly in the portion to the south-west of the Satluj The portion to the north and west of the Satluj is slightly hilly with elevations generally between 500 and 700 metres with some well-defined ridges going up to higher elevations

The year may be divided into four seasons The summer is from March to the end of June The south-west monsoon starts thereafter and last till about the third week of September October and November constitute the post-monsoon season and the period from December to February is the cold season

Rainfall The rainfall is unevenly distributed The rain starts in the middle of June and continues nearly for three-four months of the monsoon which occurs in July, August and September, while the retreating monsoon extends up to the winter months of December and January as post monsoon rains The annual rainfall recorded during the year 1999 was 1,399 9 mm and month-wise rain fall is given in following statement

STATEMENT-A

The following statement shows the normal annual rainfall in milimetres from 1990 to 1999

STATEMENT-B

NORMAL RAINFALL FOR 10 YEARS

Year	Normal Rainfall (Milimetres)
1	2
1990	1,235 7
1991	867 2
1992	1,039 9
1993	903 2
1994	1,698 7
1995	1,491 9
1996	2,051 6
1997	1,940 1
1998	2,191 7
1999	1,399 9
Total	14,819 9
Average	1,482

Source District Statistical Abstract-2000

Forest The forests of the district is neither very rich nor extensive, as it lies in the sub-topical zone Topographically forested areas lie in the inner Siwaliks and outer Himalayas The Chil and Bamboo forests are found mainly on the Siwalik formation Scrub forests situated on the Siwalik formation are superior than scrub forest growing on other formations such as Karol series where carisea spinarum is predominating Chil forest are mainly restricted to the northern and eastern slopes, while southern and western slopes are occupied by scrub forest According to the annual report of the State Forest Deptt , the total area under forests is 428 km ^{2} which constitute 36 7 per cent of the total geographical area of the district (1999)

Forests have been classified as reserve, un-demarcated, protected and demarcated forest

Excluding Bahadurpur forest, which contain Ban and Deodar, the remaining forests may be divided into three classes - (1) Chil forests, (2) Scrub jungle and (3) Bamboo forests The Chil forests are found at an elevation of 610 to 1,524 metres on the north and north-east slopes of the main ridges Scrub jungles contain a valuable species of which the most important are Sheesham and Tun These occur at low elevations generally in or near cultivated lands and on the banks of the Satluj The bamboo forests are found at an elevation of 366 to 914 metres Mostly these forests cover a large portion of the northern slope of Naina Devi Ki Dhar There are two main varieties of the bamboo- the small- khinj and the large-bans A third species called 'nal' bans extensively cultivated by the Zamindars, a few clumps being found near the most of the villages

The principal marketable forest products are Chil timber, bamboo, resin, Bhabar grass and Katha Bhabar grass is found in Naina Devi Ki Dhar and used for making ropes, rafting timber and thatching Timber used to be floated down the Satluj and its tributaries, Gambhar and Seer Khads but it has been stopped due to construction of dams and is exported by roads now

Flora The district is rich in flora The details of common trees, shrubs and climbers are found in the forests of Bilaspur are as (a) Trees Chhal (Anogeissus Latifolia, Khair (Accacia Catechu), Kulam (stephegyne Parrifolia), Bil (Aegle marmelos), Keor (Holarrhena antidys enterca), Semal (bombax malabaricum) Jaman (Eugenia Jambsolana), Barnah (Limonia acidissima), Chamror (Ehretia lacvis), Ber (Zizyphus Jujuba), Amb Mangifera indica), Alis (Cassiafistula) Ratela (Wendlandia Fxerta) Amla (phyllanthus emblica), Plakhan (Ficus rumphic), Bar (ficus bengalensis), Goela (Caseaia tomentosa), Gaj (Bauhinia retusa), Balodhar (Sapium in signe), Dakanan (Diospyros cordifolia), Ruer (Accacia Leucophloea), Kikar (Acacia Arabica) and Pipal (ficus religiosa)

(b) Bush-wood Garna (Carissa spinarim) Mendu (Dodonaea Viscosa), Dhamin (woodfordia floribunda), Bassooti (Adhatoda vasica), Gandhela (Murraya Koenigii), Koori (Nyctanthes arbortristis), Kamal (Mallotus philippinensia) Chhoin (Euphorbia royleana), Ber (Zizyphus nummulaiia), and Pardesi Buti (Lantana camara)

(c) Grasses Bagar (Ischaemum angustifolium), Ghor bagar (Eripohorum comosum), Khabbal (Cynodon dactylon), Dhaulu (Chrysopogon montanus), Sardula (Hetropogon controtus), Palman (Botheriochloa intermedia), Alunji (Themeda anathera), Khawi (Cyomopogon marthi), and Tanbanu (Aristida depressa)

The common fruit trees are pears 'jaman', 'ber' banana, payaya, mango and 'shahtoot' 'Kikar is commonly met with-in-village common lands with shallow and rocky soils Bamboo thrives at lower elevations Some citrus species are also cultivated

The following statement shows forest area according the classification from 1990-91 to 1999-2000

STATEMENT-C

Source District Statistical Abstract

Fauna The district is fairly rich in wild life which one comes across

1 Leopard or panther
2 Striped Hyaena (Jhirak or Lakar Bagha)
3 Jackal (Gidhar, Shial)
4 Small fox or hill fox (Lomri)
5 Indian Wild Boar (Suar)
6 Goral
7 Himalayan Langur
8 Rhesus monkey or common bunder
9 Common jungle cat (Jungli billi)
10 Common Grey mangoose (Newal, Neyol)
11 Long tailed mangoose
12 Indian muntja ghural

Leopards are a constant menace to the cattle, goats and sheep Wild pigs are numerous and destructive Monkeys and wild cats are common Among other carnivorous animals, jackals, fox and the mangoose are common Goral and barking deer are found through out the district Other common animals are porcupine, himalayan langur, rats and mice

Birds There is a variety of birds in the district Apart from peasant, chikor and peacocks, there are rare birds and aquatic birds like ducks and geese which would come from far off places to make their homes in Gobindsagar It is a pretty common sight to see partridge, pigeons, green parrots, and quails

Reptiles Snakes are fairly common in the district, in the valleys and along the river and khads The better known snakes are the Cobra, spotted Agama Indian Chameleon, Common Krait, harmless Krait, rat snake water snakes and other common grass snakes Of the lizards, the familiar are geckos We may distinguish the common house gecko seen on the walls Common Indian crocodile (magar) is also found in the Satluj

Afforestation All possible efforts have been made in order to increase substantially the forest/tree cover in the region It is through massive afforestation and social

forestry programmes the green leave chopping has been curbed in order to preserve the forest wealth Various new types of plants have been introduced such as Lusenia, Drek, Eucalyptus, Poplar, Mulberry etc Special programme has been launched in the district under National Social Forestry Project Its main features are

1 Agro-Forestry
2 Tree tenure for poor and landless
3 Community plantations
4 Departmental plantations

Farm Forestry Programme · The programme envisages extensive plantations on the public waste land, school compounds, private farm land etc Schemes have been launched where by rural folks are encouraged to plant more trees and protect the existing growth in order to enable them to meet the bonafide requirement of fodder, fuel and small timber Landless farmers who desire to raise plantations are being provided with Govt land to raise plants and tree-patta for the plants is also given Fencing material and plants are supplied to them by the department

The steps have been taken for popularising the farm forestry and other type of forestries

1 Public meeting are conducted in villages emphasising the importance of forestry and its impact on the environment etc
2 Visual aids are used
3 Seeding of various fuel, fodder, small timber, species are distributed at nominal costs
4 Fuels saving devices like Dhauladhar Chullahas and pressure cookers are distributed at the subsidised rates among the farmers
5 Training camps for the progressive farmers of the area are organised

Mines and Minerals As per the Industrial Survey report clay quartzites, lime stone, etc are important mineral deposits in the district but they are lying dormant because of non-exploitation The lime stone mining is being done at Bandla, Barmana, Beri, Kothipura and Logad The HPMIDC is engaged in the Mining projects in the district The limestone is being supplied to Barmana for ACC Factory Sand and Bajri deposits are found along the basin of river Satluj Some deposits of Gold Pyrites and Gypsum are reportedly present in Malyawar forests of Jhanduta block Similarly bolder stones are found on commercial scale in Ghumarwin tehsil The production and value of minor minerals for the different areas of the district is as under -

Source District Statistical Abstract-2000

The State Government has been receiving income from the extraction of these minor minerals by ways of royalty and permit fee levied annually During 1999-2000, income from exploitation of these minerals was Rs 9,523,386/- which rose to Rs 2,0559,281/- during financial year of 2000-2001

The following statement gives annual income as a royalty and permit fees from the auction of these minerals

STATEMENT-G

Year	Amount (Rs)	Year	Amount (Rs)

-1995-96	22,149,341	2000-2001	20,559,281

Source District Mining Officer, Bilaspur

Soil and Cropping Pattern The soil as can be expected from an area mostly covered by most soft rocks of Siwalik system, are usually sandy, particularly towards the west of Bilaspur town Even on the eastern portion, the soft tertiaries produce sandy soil However, in certain higher portion, soil is not sandy, and is a weathered product of calcareous quartzites of cherty limestones or sometimes pink quartzities The soil capping usually is thin, because of high degree of denudation during rains

The soil in the mid-hill zone is poor In the valleys the soils are moderately fertile, as there is less erosion and it is enriched by the detritus washed down from higher levels These soils produce a good quantity of paddy, wheat and other crops The texture of the soil is sandy loam to loam and calcium carbonate exists in these soils

Land use Pattern and Tenancy The word tenancy denotes occupation of land from landlord on rent on certain conditions Before the introduction of the Himachal Pradesh Abolition of Big Landed Estates and Land Reforms Act, 1953, there were three types of tenancy system existing in the district viz (i) Zamindari (ii) Pattedari (iii) Bhaichara, but with the promulgation of the said act Zamindari system has been abolished and the actual cultivators of the land have been given the proprietary rights and in order to do away with uneconomical holdings, the state government took certain steps for the consolidation of the holdings under the Consolidation and Holding Act and thus bulk of the uneconomical holdings have been done away with The land holdings in hills are small in size, scattered, fragmented and comprised of terraced fields in the major part of the cultivated area

Agriculture Agriculture is the mainstay of the people and 80% of the total population depends on it The soil is mostly light and some what sandy This is inter mixed with patches of stiff clay The land is only moderately fertile Kharif is the principal harvest and maize the chief crop, and the staple food Rice is produced both on irrigated and un-irrigated lands Kulth is grown on inferior lands Wheat and grams are the Rabi crops These are mixed together and sown The main cash crops are ginger and peas Amongst the vegetables which are grown during the Kharif season are Tomato, Shimla Mirch, Brinjal and Lady finger

According to village papers, the total geographical area for the year 1999-2000 was 115,445 hectares Out of which 30,239 hectares was net sown area and 57,622 hectares was total cropped area sown The average cropped area sown was 0 102 hectares per person According to District Statistical Abstract of the district, the total cropped area was 56,714 hectares during the year 1998-99 Out of which 26,305 hectares area was sown more than once The net area sown was 30,409 hectares The area under food-grains was 5,4597 which includes 26,863 hectares under wheat, 24,830 hectares under maize, 2,068 hectares under rice and 325 hectares under barley, 4 hectares under other crops and 196 hectares under gram and 34 hectares under other pulses

During the period 1998-99, there was a record production of principal crops through out the district During the referent period, 58,513 metric tonnes food-grains including both cereals and pulses were produced which includes 11,045 M T of wheat, 44,998 M T maize, 2,384 M T of rice, 22 M T of barley, 45 M T gram and 69 M T of other pulses Regarding other crops sugar cane worth 518 M T , Ginger (Green) worth 341 M T were produced in the district

As per District Statistical Abstract-2000 tehsil-wise area under principal crops were as under

Name of tehsil	Area (in hectares) under principal crop
1	2
Bilaspur Sadar (T)	13,946
Ghumarwin (T)	21,720
Jhanduta (T)	13,893
Naina Devi (ST)	6,849

STATEMENT-H

AREA UNDER MAJOR CROPS FOR YEAR 1999-2000

Name of crop	Area (Hectares)	Production (M T)
1	2	3
Rice	2,740	2,740
Maize	26,710	51 200
Wheat	26,310	55,250
Barley	470	770
Gram	580	400
Ginger	100	125
Other Pulses	770	535
Tomato/Veg.	1,110	13,375

The area under cash crops like potato, onion, tomato, chillies, ginger, edible oil seeds is much less as compared to other crops

Horticulture Bilaspur falls in sub-tropical zone and fruits like Mango Citrus, Grapes Litchi, Pear, Peach and Plum can be grown successfully Horticulture Department is making vigorous efforts to bring more and more mango orchards because mango is drought resistant needs less water and profitable In addition, efforts are being made to develop sub-tropical fruits like Citrus Galgal, Lemon, Litchi and Guava etc The popularisation of horticulture in this district is due to 6 Progeny-cum-Demonstration Farms, 2 Fruit Plant Nurseries and 4 Horticulture Extension Centres These farms provide better plants to the farmers and also provides with regard to the latest horticulture techniques

Area under different fruit plants was 7,628 4 hectares during 1990-91 which declined to 6,263 36 hectares during 1999-2000 The table given below depicts area under different fruit crops in hectares

STATEMENT-I

AREA (in hectares) UNDER DIFFERENT FRUIT-CROPS

Year	Apple	Other temperate fruits	Wall nuts & dry fruits	Citrus	Other sub-tropical fruits	Total

Source District Statistical Abstract, 2000

The area under fruit crops continued to rise from 1990-96 to 1996-97 when it was 9,610 3 hectares there after it declined all of sudden to 5,862 6 hectares in 1997-98 and perhaps fruit plants could not stand due to lack of irrigation facilities The production of fruits which was 4,820 metric tonnes in 1990-91 declined to 3,105 metric tonnes during 1998-99 However during the subsequent year it rose to 5160 metric tonnes The Statement-J gives year-wise production of fruit crops in metric tonnes

STATEMENT-J

PRODUCTION OF FRUIT CROPS (in Metric tonnes)

Source District Statistical Abstract, 2000

Fertilizers are supplied to the growers through co-operative societies Pesticides are procured by the Horticulture Department and these are sold/ distributed through extension centres to the growers Nurseries located at Lalda and Manjhari provide plants to the growers at subsidised rate through extension centre Departmental Progeny-cum-Demonstration Orchards are situated at Niharı, Nihal, Baroha, Kot Kahloor, Guru Ka Lahore and Salva Department of Horticulture provides free technical knowledge to the fruit growers through the staff posted at block headquarters and in the extension centres

Irrigation The net irrigated area in the district during 1998-99 was 3,164 hectares The 'kuhls' constitute the major source of irrigation in the district which accounted for 72 41 per cent of the net irrigated area during 1998-99 These small water channels called 'kuhls' are made by making notches on the river and other water sources and water is thus lead to the fields for irrigation The irrigation by wells and tubewells was available to 194 hectares and 679 hectares of irrigated land was irrigated by other sources of irrigation in the district during 1998-99 The following statement gives the breakup of net irrigated area and percentage net irrigated area to total net cropped area at tehsil/sub-tehsil level

Source District Statistical Abstract-2000

Animal Husbandry The cattle wealth of the people consists of cows, bullocks, buffaloes and goats and sheep Livestock is the main wealth next to agriculture of a large chunk of rural population Livestock plays an important role in the economy of the district which is agrarian Animal husbandry constitutes as subsidiary occupation of 90 per cent of the rural population Every household in rural areas invariably keeps a few cows or buffaloes, sheep and goats, pig and poultry birds These animals are kept for milk as well as for other purposes in addition to provide manure to the fields According to 1992 Cattle Census, the total live stocks in the district were 236,617, out of which there were 60,461 cattle, 86,858 buffaloes, 24,615 sheep, 63,372 goats and 1,131 other types of livestock The total poultry birds in the district were 59,654 The tehsil-wise detail of livestock as per 1992 cattle Census is shown as under

STATEMENT-M
NUMBER OF LIVESTOCK AND POULTRY IN EACH TEHSIL/SUB-TEHSIL ACCORDING TO 1992 CATTLE CENSUS

Source District Statistical Abstract, 2000

The Animal Husbandry Department has taken up various schemes to develop better breeds of cattles, poultry farms in the district During the year 2000-01, there are 20 veterinary hospitals, 88 dispensaries functioning in the district During the period, 31,145 cattles were inseminated

Dairy Because of the small size of holdings and low income, majority of the rural population is living below the poverty line Other means of supplementary income are absolutely essential for them Dairy farming and other allied activities, therefore, have great significance in economic upliftment of the rural masses The department of Animal Husbandry is providing training to farmers for dairy farming Loans are provided by the banks for purchase of good quality cattle There is one Jersey cow breeding livestock farm at Kothipura Keeping in view, the per capita demand for milk and its availability, there is a good scope for this activity in the district Further it has a large scale of employment-potential in case all the infrastructural requirements are provided for small as well as large commercial dairy farms

Non availability of good quality animal and shortage of fodder etc are the limiting factors Almost half of the demand of milk is met from neighbouring districts/ states

Poultry In the district, there is a good scope/demand for poultry products which is being met from the out

side supplies Because of certain factors such as lack of technical knowledge, non-availability of cheap feed, high transportation costs etc smaller units are not viable and bigger units should be encouraged alongwith provision for infrastructural support However some small boiler units have been set up in Ghumarwin and Jhanduta tehsils

Other allied activities Other allied activities being carried out in the district are sheep rearing, goat rearing, pig rearing and bullock/mules etc for transportation Assistance for these activities is provided through DRDA and other sponsoring agencies During the recent years sericulture, floriculture and mushroom production activities have been started under the Gold Mine Project

Fisheries Bilaspur district with its net work of rivers and streams has vast potentialities for the development of riverine fisheries These rivers and streams are rich in fish-fauna The much efforts have been made to develop pisciculture in the district Gobind Sagar lake with an area of 16,000 hectares and various other khads provide vast breeding place for fishes in the district This lake has a great potential for developing pisciculture Important fishing grounds along the river Satluj are Bilaspur, Dehar, Auhar, Berighat, Serimatla and Gah Besides Gobind Sagar, fishing is also carried out along Sir Khad, Ali-Khad, Gambhar and Gambhrola streams Fishing is allowed only under a licence which can be have for a period of a year or month or a week The fishermen are mostly belonging to communities of Jeehwar and Daulas

For the oustees of Dam and other weaker sections, a scheme was launched for encouraging them to adopt fishing as profession About 1,500 families living on the side of the Gobind Sagar are engaged in fishing activity In order to improve the quality of fish products, improved variety seeds have been released into the Gobind Sagar Mostly the fish found in Gobind Sagar are Katla, Rohu, Mirgal, Singhara, Silver Carp Mahashir, Gid, Bata, Grass Carp, Kalwasu etc The production of fish from the Gobind Sagar was 4,243 metric tonnes during the years from 1997-98 to 2000-2001 valued Rs 9 30 crores and the State Govt got Rs 139 63 lacs in form of royalty

A mirror carp hatchery was set up at Deoli 14 kms on the bank of Ali Khad by the State Govt Besides, Mirror Carp fingerlings are exported to other places out side Himachal Pradesh The main function of this hatchery is to keep up a constant supply of fingerlings to Gobind Sagar lake and other streams as well as to the farmers for development of pond fisheries Fish seedlings are released to Gobind Sagar from this farm directly from nursery ponds and breeding tanks through common releasing channels into Ali Khad which ultimately feeds Gobind sagar This method of releasing the fingerlings into lakes and rivers reduce the mortality which would have occurred in transportation

As stated above fishing in the district is allowed only under a licence There is size restriction on catching important species The use of dynamite, other explosive and poisoning of fish is prohibited There are also restrictions on the size of meshnets, use of weirs, erection of dams and diversion of water for the purpose of killing fish The management and development of fisheries in the district is looked after by the Assistant Director of Fisheries

Inland pond pisciculture has not been a success in the district so far A new scheme called 'Running-water Fish Culture' is being implemented by the department in the district The State Government distribute subsidy for setting up fish ponds to the fishermen in the form of nets, boats, tents etc Indian Major Carp and Gold fish are being produced successfully The following statement shows the fishing activities in the district from 1994-95 to 1999-2000

Source District Statistical Abstract 2000 and Assistant Director of Fisheries Bilaspur

Industries The economic development of the place is directly related with the industrilisation of that area The people of Bilaspur district have earned their reputation for honesty, sincerity and their industrious nature Presently, the economy of the district is confined mainly to agriculture There is only one large scale industry at Barmana engaged in production of cement

Due to availability of raw material, Associated Cement Company has set up a cement factory on a large scale in private sector at Barmana At Barmana M/C Associated Cement Companies Ltd , has two cement units with investment of Rs 59,120 lacs and installed capacity of 30 lacs tonnes These units have provided employment to 1,065 persons Another medium scale industrial unit with investment of Rs 128 lacs and producing flexible packaging material is located in industrial area of Bilaspur It provided employment to 167 persons During 1999, 90 industrial units on small scale were registered in the district, such as match splint unit, hosiery, ayurvedic drug manufacturing units, tyre retreating, paint and varnish making unit and stone crushers etc Besides these, there are few artisannary units like handloom, leather shoe making, pottery, black smithy and wooden ware etc A resin and turpentine factory is also functioning in the public sector near Bilaspur town Furniture factory established by Himachal Pradesh General Industries Corporation Ltd , is also functioning in the district

The cottage industries like weaving , basketry, rope making, mat making, earthen-ware, black smithy, carpentry, rice mills, oil mills, seed crushing, leather work, gold and silver smithy which are essential for the self sufficiency of rural area are scattered all over the district The Khadi and Village Industries Board is also helping the people in the establishment of village industries The Board distributed loans worth Rs 37,57,000 as well as grant worth Rs 16,00,000 to village industries numbering 11 during the period 1999-2000

During the year 1999-2000, a sum of Rs 7 08 lacs was sanctioned by the banks as loans to 20 small scale industrial units

To inculcate the spirit of industrilisation in the minds of the people, government have established two Industrial Training Institutes in Bilaspur district which provide training in 13 trades like Tailoring and Cutting, Electrician, Fitter, Motor Mechanic, Draughtsman (civil), Carpentry, Bleeching and Dying, Steno (Hindi), Hand Weaving, Motor Driving & Computer etc

The department of Industry is trying to create requisite infrastractural facilities for the industrial sector To encourage the entrepreneurs to establish industries, the department is providing various incentives such as allotment of land in industrial area electric power charges concessions, capital investment subsidy on fixed assets, interest subsidy, freight subsidy, sales tax incentives, subsidy on feasibility report etc Besides it the KVIC/KVIB also provides margin money subsidy for establishing small industrial units The pace of industrial growth is slow in the district In 1991 there were 86 registered factories whose number rose to 90 in 1999

Himachal Pradesh Khadi & Village Industries Board is engaged in setting up of village industries by providing loans, subsidy and other incentives The Board provides loan/margin money at prescribed rate of intrest of Khadi Commission The following statement gives the number of village industries units amount of subsidy and loan for setting up village industrial units, from 1990-91 to 1999-2000 -

Source District Statistical Abstract-2000

Sericulture Sericulture is an agro-based labour intensive industry The climatic conditions are also congenial for the growth of this industry Sericulture has been given the status of priority industry and is admissible for all those facilities, which are being given to the priority industries in the Pradesh Silk-worm rearers are given silk seed and mulberry saplings at highly subsidised rates Bilaspur district has eight sericulture farms/centres through which sericulture related activities are being disseminated/propagated These farms /centres are located at Kothi Majher, Barthi, Aur, Ghumarwin, Ledda, Panjgain, Harlog and Kandarur

Trade, Commerce and Banking There are no organized trading centre in the district Bulk of the trade is confined to Bilaspur and Ghumarwin towns The important commodities imported are cloth, food grains, utensils, building material, petrol, diesel, kerosene etc Most of these commodities are being imported from adjoining area of Punjab The items which are exported from the district are forest based resins and turpentine oil, katha, timber, cement, ginger and fish

In rural areas of the district, shops according to the size of villages are available with the stock of almost all essential foods according to the consumer's requirements Besides this, certain focal points/centres have developed along the main routes/roads which cater the needs of rural areas

In Bilaspur district total number of nationalized banks as per annual credit plan, 2001-2002, 62 branches of banks are operating in this district out of which, 17 branches relate to Himachal Pradesh Co-operative Bank and 3 Agriculture Development Bank United Commercial Bank has been declared as the Lead Bank in the district The Lead Bank prepares credit plan of the district to be implemented for the developmental activities by various government departments and also identifies places for opening up new branches The bank-wise branches in the district are detailed below -

STATEMENT-P

NUMBER OF BANKS OPERATING IN THE DISTRICT

Electricity and power The development of agriculture and industry can hardly be accelerated without the availability of power In addition to it, the use of electricity has became indispensable in the modern times Bhakara Dam has two power plants on the left and right bank of Satluj river The entire district meets its power requirement from Ganguwal Hydro Electric Power House and Dehar Power House of Northern Power Grid

The provision of cheap and undisrupted electric supply is essential for the economic upliftment of the people, the district remained in the forefront of rural electrification in the state By the end of 2000-01 all inhabited villages numbering 965 were electrified The statement given below shows the number of electricity consumers in the district from 1990-1999

STATEMENT- S

Source District Statistical Abstract-2000

Gram Panchayats With the implementation of Panchayati Raj Act, 1953, two tier system of Panchayati Raj viz Gram Panchayat and Nayaya Panchayat was introduced through out the country Gram Panchayat was empowered to settle the petty disputes whereas Nayaya Panchayat was envisaged to deal with the local judiciary matters and empowered to impose fine up to Rs 500/- but with the passes of time, the Nayaya Panchayats were abolished due to one reason or the other

With the introduction of Revised Panchayati Raj Bill in Parliament in mid 80s, this system was made three tier system with Gram Panchayat, Block Samiti and Zila Parishad to accelerate the developmental activities at the village level In Himachal Pradesh also, 73 Constitution Amendment Act was introduced under Himachal Pradesh Panchayati Raj Act 1994 from 23rd April, 1994 The main aim and object of introducing 73 Constitution Amendment Act, 1992 and Himachal Pradesh Panchayati Raj Act, 1994 was to made Panchayati Raj Institution as an unit of Local Self Government and take to strength the Gram Panchayats

Composition and its Jurisdiction A Gram Panchayat is constituted by one Pradhan, one Up-Pradhan and five members duly elected by straight election or elected unanimously by the voice of vote A Secretary is provided by the State Government to each of Gram Panchayat to look after the official matters A village with a population of 600-1,000 or more has a single Gram Panchayat whereas in case of smaller villages, a group of two or three villages constitute single Gram Panchayat In the district there are 136 Panchayats, 3 Panchayat Samittees and a Zila Parishad as on December, 1999

Role of Panchayat in Developmental Activities The Gram Panchayat settles the petty disputes of villagers, prepares plans for economic developments and social justice of the villages under their jurisdiction It sends plans and projects of developmental activities to Block Samittee, Zila Parishad and Deputy Commissioner for sanction and budget allotment It also monitors the function of village level officials in the field of education, health, drinking water transportation, public distribution system, electricity, social welfare, agriculture, horticulture and animal husbandry

Source of Income of Gram Panchayat The main source of Gram Panchayat is its own income from taxes, fees, fines, grant from the state/central Govt , raising advance, loan from the banks and other financial agencies

(v) Concepts and Definitions

Census Concepts

Building

A 'Building' is generally a single structure on the ground Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc

Usually a structure will have four walls and a roof But in some areas the very nature of construction of houses is such that there may not be any wall Such is the case of conical structures where entrance is also provided but they may not have any walls Therefore, such of the conical structures are also treated as separate buildings

Permanent Houses

Houses, the walls and roof of which are made of permanent materials The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent Houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material

Temporary Houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway, a roof and should be wide and long enough for a person to sleep in i e it should have a length of not less than 2 meters and a breadth of at least 1 5 meters and a height of 2 meters A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms Kitchen bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc , is regarded as a dwelling room In a situation where a census house is used as a shop or office etc and the household also stays in it then the room is not considered as a dwelling room But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household Tent or conical shaped hut if used for living by any household is also considered as dwelling room A dwelling room, which is shared by more than one household, has not been counted for any of them If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase etc It may be occupied or vacant It may be used for residential or non- residential purpose or both In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure These different units are practically independent of one another and are likely to have been built at different times and owned by different persons In such cases, though the whole structure with all the

adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses
On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats In these cases while the structure looks like one building, different persons own the flats In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees Each such building was treated as a separate building But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house Some times it becomes difficult to apply the definition of census house strictly in certain cases For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard By definition, this has to be treated as five census houses If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house But if each room was occupied by an independent household, then each such room was treated as a separate census house In case of hostels, hotels, etc , even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/Hotel building was treated as one census house but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts located in a compound, whether enclosed or unenclosed, is occupied by one household While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed etc , these were treated as separate census houses On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e g , the main house, the servant's quarter, the garage, etc , only one building number was given for this group and each of the constituent a separate census house number Only cases where a structure with roof and pillars has come up was treated as a building

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village

Rural-Urban Area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas In the Census of India 2001 the definition of urban area adopted is as follows a) All places with a municipality, corporation, cantonment board or notified town area committee, etc b) A place satisfying the following three criteria simultaneously i) A minimum population of 5,000, ii) at least 75 per cent of male working population engaged in non-

agricultural pursuits, and iii) a density of population of at least 400 per sq km (1,000 per sq mile) For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq km and having at least 75 per cent of male working population engaged in non-agricultural activity were considered To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations' Examples of out growths are railway colonies, university campuses, port areas, military camps, etc , that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns

City

Towns with population of 100,000 and above are called cities

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns In some cases railway colonies, university campuses, port areas, etc , may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites (a) The core town or atleast one of the constituent towns of an urban agglomeration should necessarily be a statutory town , and(b) The total population of all the constituents (i e towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census) With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted i) a city or town with one or more contiguous outgrowths , ii) two or more adjoining towns with their outgrowths , and iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so Persons in a household may be related or unrelated or a mix of both However if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household Each such person was to be treated as a separate household The important link in finding out whether it was a household or not was a common kitchen There may be one member households, two member households or multi-member households

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen

Houseless Household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc , are treated as Houseless Households

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union

territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories In pursuance of these provisions, the list of Scheduled Castes and Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Mazhabi or Sikligar Caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below

Scheduled Castes

1 Ad Dharmi
2 Badhi Nagalu
3 Balmiki, Bhangi, Chuhra, Chura, Chuhre
4 Bandhela
5 Bangali
6 Banjara
7 Bansi
8 Barad
9 Barar, Burar, Berar
10 Batwal
11 Bauria, Bawaria
12 Bazigar
13 Bhanjra, Bhanjre
14 Chamar, Jatia Chamar Rehgar, Raigar Ramdasi, Ravidasi, Ramdasia, Mochi
15 Chanal
16 Chhimbe, Dhobi
17 Dagi
18 Darain
19 Darai, Daryai
20 Daule, Daole
21 Dhaki, Toori
22 Dhanak
23 Dhaogri, Dhuai
24 Dhogri, Dhangri, Siggi
25 Doom, Doomna, Dumna, Dumne, Mahasha
26 Gagra
27 Gandhila, Gandil, Gondola
28 Hali
29 Hesi
30 Jogi
31 Julaha, Julahe, Kabirpanthi Keer
32 Kamoh, Dagoli
33 Karoack
34 Khatik
35 Kori, Koli
36 Lohar
37 Marija Marecha
38 Mazhabi
39 Megh
40 Nat
41 Od
42 Pasi
43 Perna
44 Phrera,Pherera
45 Rehar,Rehara

46 Sanhai

47 Sanhal

48 Sansi, Bhedkut, Manesh

49 Sansoi

50 Sapela

51 Sarde, Sarera, Sarare, Siryare, Sarehde

52 Sikligar

53 Sipi

54 Sirkiband

55 Teli

56 Thathiar,Thathera

Scheduled Tribes

1 Bhot,Bodh

2 Gaddi [excluding the territories specified in sub-section (1) of section 5 of the Punjab Reorganisation Act, 1966 (31 of 1966), other than the Lahaul & Spiti district]

3 Gujjar [excluding the territories specified in sub-section (1) of section 5 of the Punjab Reorganisation Act,1966 (31 of 1966)]

4 Jad, Lamba, Khampa

5 Kanaura, Kinnara

6 Lahaula

7 Pangwala

8 Swangla

Language and Mother tongue .

As per the census concept, each language is a group of mother tongues The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue It is not necessary that the language spoken as mother tongue should have a script The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate A person who can only read but cannot write is not literate It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard Literacy could also have been achieved through adult literacy classes or through any non-formal educational system People who are blind and can read in Braille are treated as literates

Literacy Rate

Literacy rate of the population is defined as the percentage of literates in the age- group seven years and above For different age groups the percentage of literates in that age group gives the literacy rate

Educational Level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit Such participation may be physical and/or mental in nature Work involves not only actual work but also includes effective supervision and direction of work It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity All persons engaged in 'work as defined above are workers Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers Reference period for determining a persons as worker and non-worker is one year preceding the date of enumeration

Main Worker

A person who has worked for major part of the reference period (i e six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'

Marginal Worker

A person who worked for less than six months of the reference period (i e in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal Worker'

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i e last one year preceding the date of enumeration) is termed as 'Non-Worker'

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share Cultivation includes effective supervision or direction in cultivation A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc , and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc , and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel-nuts (areca)

Agricultural Labourer

A person who works on another person's land foi wages in money or kind or share is regarded as an agricultural labourer She/he has no risk in the cultivation, but merely works on another person's land for wages An agricultural labourer has no right of lease or contract on land on which she/he works

Household Industry Worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas The larger proportion of workers in household industry should consist of members of the household including the head The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc or merely trade or business, even if such professions, trade or services are run at home by members of the household

Other Worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)' The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workeis, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'

Work Participation Rate

percentage of workers (main + marginal) to total population

Population Density

Population density is the number of persons inhabited per square kilometre of the area

Age

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1,000 males in a population

(vi) Non-Census Concepts

Improved Drinking Water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water It may be mentioned that such uniform definition may not be valid across all states

System of Sewerage

Generally; a sewerage system would mean a network of mains and branches of underground

conduits for the conveyance of sewerage to the point of disposal Sewers that carry only household and industrial wastage are called separate sewers, those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc , in these towns

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging The system of underground sewerage provided for the street sewerage which are connected to the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing) Through this sewer the faecal matter is transported without the need for scavenging This system generally exists in cities and big towns Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them These wells are cleaned at periodic intervals by a suitable device The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age The definitions of the terminology used in computing different fertility rates are mentioned below

Crude Birth Rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year population}} \times 1,000$$

Crude Death Rate (C D R)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population

$$C\,D\,R = \frac{\text{Number of deaths during the year}}{\text{Mid-year population}} \times 1,000$$

Natural Growth Rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration

Age Specific Fertility Rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1,000$$

Age Specific Marital Fertility Rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General Fertility Rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General Marital Fertility Rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total Fertility Rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1{,}000}$$

Age-specific Mortality Rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1 This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year

q2

Probability of dying between birth and age 2

q5

Probability of dying between birth and age5 This indicator is also known as Under Five Mortality Rate (U5MR)

Infant Mortality Rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz , Neo-natal mortality rate and Post neo-natal mortality rate The neo-natal mortality rate also comprises of two parts viz , Early neo-natal mortality rate and late neo-natal mortality rate These are defined as

Neo-natal Mortality Rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal Mortality Rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal Mortality Rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal Mortality Rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal Mortality Rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still Birth Rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal Mortality Rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age-group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group15-44 years per 1,000 persons of all ages

Child woman ratio (0-4)

1 Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years

Child woman ratio (5-9)

2 Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years

Migration

Migration is the third component of population change, the other two being mortality and fertility

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration

(i) Migration of persons in search of job is high in the country In many cases such migrants are only seasonal in nature People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months All such workers are treated as migrants Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides She/he is not considered as migrant

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives house is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother

A new response category 'Moved after birth' was added in Census of India 2001 in the question on

'reasons for migration' to bring out additional migration patterns Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others' The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country The first two streams together constitute internal migration, while the last type of movement is called international migration The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that The flow of migrants consists of four streams viz rural to rural, rural to urban, urban to rural and urban to urban

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e g , Municipal Corporation/ Corporation, Municipal Committee/Municipal council Municipality etc

Size-class of UA/town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/ towns These Class I UAs/towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town These are M7 (5,000,000 and above) M6 (2,000,000 to 4,999,999), M5 (1,000,000-1,999,999) M4 (500,000-999,999), M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5 000 population are Class VI towns

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt defined slums as a) Areas where buildings are in any respect unfit for human habitation, or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities In 2001 Census, cities with 10 millions and above population have been treated as Mega cities

(vii) 2001 Census findings-Population, its distribution

(a) Distribution of population in rural-urban areas

According-to 2001 Census, the total population of Bilaspur district is 340,885 comprising 171,263 males and 169,622 females This population of the district

forms 5 61 per cent of the state population and ranks at 10th place among the districts Out of total population of the district, 93 6 per cent is distributed in rural areas while 6 4 per cent lives in urban areas The rural population of the district is distributed among 4 tehsils and urban population is spread over in 4 towns The total urban population in the district is 21,951 persons constituting 11,775 males and 10,176 females The total population of rural areas in the district is 318,934 persons with 159,488 males and 159,446 females This rural population is spread over in 965 villages Out of total 1,061 villages in the district, 965 are inhabited villages while 96 are uninhabited villages

(b) Size-class and civic status of towns The statement below gives the position and number of urban units in size-class as per 2001 Census

Serial number	Size-Class of town	Name and Civic Status of town	Urban population		
			P	M	F
1	2	3	4	5	6
1	IV	Bilaspur M Cl	13,058	6,964	6,094
2	V	Ghumarwin NP	5,721	3,016	2,705

Population Growth, Density and Sex-ratio

Population Growth According to the 1991 Census the total population of the district was 295,387 persons which rose to 340,885 persons in 2001 Census showing net addition of 45,498 persons during 1991-2001 The decadal growth rate of the district comes to 15 4 per cent during this decade The growth rate in the rural population is 14 5 per cent while the urban population has grown by 31 2 per cent during 1991-2001

Density The density of population in Bilaspur district is 292 persons per sq km against the state average of 109 persons At tehsil/sub-tehsil level, the density of population varies between 426 persons in Ghumarwin tehsil and 155 persons in Naina Devi sub-tehsil In rural areas, the density of population works out 277 persons per sq km while the density of 1,262 persons per sq km have been worked out in urban areas

Sex-ratio There are 990 females per 1,000 males in Bilaspur district The Sex-ratio figures for rural and urban areas of the district are 1,000 and 864 females per 1,000 males respectively It is also seen that the proportion of females in rural areas is higher than that of urban areas Sex-ratio in age-group 0-6 comes to 882 females per 1,000 males in the district, as a whole In rural areas this proportion is 884 females while in urban areas the sex-ratio of child population comes to 837 females per 1,000 males

Work participation rate The work participation rate is defined as percentage of total workers to total population Similar procedure has been adopted to define main workers and marginal workers

According to 2001 Census, the total workers including main & marginal workers comes to 48 9 per cent of the total population of the district Of the total workers, 32 5 and 16 4 per cent is shared by the main and marginal workers respectively The remaining 51 1 per cent of total population is occupied by the category of non-workers As per 2001 Census, the main workers participation among males is 40 5 and for females is 24 4 per cent Males and females have 11 7 and 21 2 per cent in the category of marginal workers The proportion of female marginal workers is considerably higher than that of males as the females are attending to one or more economic activities in addition to their household duties to increase the family income It is observed that the proportion of male main workers is higher than that of female workers in the district

Literacy A person who can read and write in any language is considered as literate in Census All the children of age-group 0-6 years have been recorded as illiterate As per 2001 Census, Bilaspur district reported 231,733 persons as literates constituting 77 8 per cent of the total population The proportion of male and female literates in the district is 86 0 and 69 6 per cent respectively The literacy rate of males is higher than females in the district The total literacy rates of rural and urban areas are 77 0 and 89 1 per cent The proportion of male & female literates in rural areas is 85 6 and 68 5 per cent respectively The proportion of male & female in urban areas is 92 3 and 85 4 per cent The difference between male and female literacy rates in urban areas is about 7 points as against 17 points in rural areas It is observed from the above statistics that females are better educated in urban areas than that of rural areas

Availability of university education in the district There are 3 degree colleges in the district situated 2 in Ghumarwin and one in Bilaspur One Sanskrit College is functioning in Naina Devi sub-tehsil These colleges cater the needs of the rural as well as the urban areas of the district

(c) Scheduled Castes and Scheduled Tribes population Of the total population of 340,885 persons recorded in Bilaspur district, 25 4 per cent population belongs to Scheduled Castes and only 2 7 per cent to Scheduled Tribes Percentage of Scheduled Castes population constitute 25 8 per cent in rural areas and 19 3 per cent in urban areas of the district 2 8 and 1 2 per cent represents the Scheduled Tribes population in rural and urban areas of the district respectively The Scheduled Tribes population in the district is mainly concentrated in Ghumarwin (T), Jhanduta (T) and Naina Devi (ST)

Brief Analysis of PCA data

TABLE 1 DECADAL CHANGE IN POPULATION OF TEHSILS/SUB-TEHSIL BY RESIDENCE, 1991-2001

Table 2 This table shows number and percentage of inhabited villages in specified population size ranges with the related population as per 2001 Census The total rural population of Bilaspur is 318,934 persons comprising of 159,488 males and 159,446 females This population is distributed in 965 inhabited villages At district level, the population size of 439 or 45 5 per cent villages is less than 200 persons while size of population in 357 or 37 0 per cent villages varies between 200 to 499 persons which clearly shows that the majority of villages are of small size The population range of 500–999 persons claims 123 villages contributing 12 7 per cent of total inhabiting villages The next range of 1,000-1,999 has only 3 6 per cent villages The remaining 11 villages forming 1 1 per cent villages in the size of 2,000-4,999 population The other ranges of 5,000 and above population do not have any of inhabited villages The pattern of distribution of villages according to the size of population at C D block is also most similar with slight variation Ghumarwin block has 122 or 46 6 per cent villages in the size of less than 200 persons, 90 or 34 4 per cent villages in size of 200-499 population, 35 or 13 4 per cent villages in the size of 500-999 persons, 10 or 3 8 per cent villages in the size of 1,000-1,999 and in remaining 5 or 1 9 per cent villages population varies between 2,000-4,999 Geharwin C D block has 103 or 37 5 per cent villages contain less than 200 persons each, population range of 200-499 persons while range of 500-999 contains 114 or 41 5 per cent villages, next range of 500-999 claims 41 or 14 9 per cent villages, range of 1,000-1,999 has 15 or 5 5 per cent villages while there are only two villages having size of population between 2,000-4,999 Bilaspur Sadar block, lower ranges claim largest number of villages 214 villages accounting for half of the total villages have population less than 200 persons In 153or 35 7 villages population varies between 200-499 persons while range of 500-999 claims 47 or 11 0 per cent of the total villages The ranges of 1,000-1,999 and 2,000-4,999 population have 10 and 4 villages respectively forming small proportion of total villages There is no village which falls in higher ranges of 5,000 and above population

TABLE 3 NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWN IN 2001 CENSUS

Nil

Table 3 It relates to new towns, denotified, declassified and merged town in 2001 Census During the decade 1991-2001, no new town has been added or denotified or declassified or merged with other towns in the district

TABLE 4 DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	13	1 3	73	0 0
11-20	12	1 2	318	0 1
21-50	26	2 7	1 453	0 5
51-100	36	3 7	5,071	1 6
101-200	134	13 9	29 995	9 4
201-300	155	16 1	48,505	15 2
301-500	346	35 9	146,496	45 9
501 +	243	25 2	87,023	27 3
Not known	-	0 0	-	0 0
District Total	**965**	**100 0**	**318,934**	**100 0**
Population Density (Rural) of the district		**306 3**		

Table 4 The table shows the distribution of villages by eight population density ranges The maximum number of villages i e 346 accounting for 35 9 per cent of total inhabited villages of the district fall in the density range of 301-500 persons having 45 9 per cent rural population of the district The lowest ranges of 0-10 and 11-20 persons per sq km together containing 0 1 per cent population covers 25 villages (2 5 per cent) 243 or 25 2 per cent villages fall in the density range of 501+ persons per sq km accounting for 27 3 per cent of the total rural population The lower ranges of 21–50 to 201–300 persons per sq km contain 351 or 36 4 per cent of the total 965 inhabited villages having 26 7 per cent rural population of the district On the whole, majority of villages of the district have high density of population

1991	976	990	831	1,002	1 013	836
2001	968	989	795	990	1,000	864

Note Sex-ratio has been defined here as the number of females per 1 000 males

Table 5 This table shows trend in sex ratio of the state and district during 1901-2001 As per 2001 Census, the sex-ratio of 990 females per 1,000 males has been recorded in the district against the state average of 968 The sex-ratio of the district was high as compared to state average since 1931-2001 The lowest value of sex ratio 840 females per thousand males was recorded in 1901 in the district which continued to rise gradually in subsequent years and crossed the equality line by two points in 1981 and 1991 showing significant improvement But during 1991-2001, the sex ratio in district has declined to 990 females in 2001 against 1,002 females in 1991 Census It becomes clear from this table that the proportion of females in rural areas is considerably higher than that of urban areas in both state and district

Table 6 It gives sex-ratios for total, rural and urban areas at tehsil/sub-tehsil level There are 990 females per 1,000 males in Bilaspsui district, as a whole At tehsil/sub-tehsil level, sex ratio varies between 917 females in Naina Devi sub-tehsil and 1,052 in Ghumarwin tehsil Jhanduta tehsil too has high sex ratio of 1,003 females The proportion of rural males and females is equal in the district reflecting ideal situation but rural areas of Naina Devi sub-tehsil and Bilaspur Sadar have the sex ratio below the equality line The sex-ratio in rural areas of the district varies from 929 to 1,061 and in urban areas it varies between 580 to 897 females per 1,000 males Naina Devi (ST) has the lowest sex-ratios 929 and 580 females in both rural and urban areas respectively The highest sex-ratio has been recorded in Ghumarwin (T) i e 1,061 and 897 females in rural and urban areas of the district respectively

TABLE 6 SEX RATIO BY TEHSILS, 2001

Note Per cent of Worker to total worker are given in brackets

Table 35 It presents C D block-wise distribution of workers by sex in four categories of economic activity In the rural areas of the district, the proportion of total workers (main + marginal) is 49 7 per cent of total population Among these total workers, cultivators constitute 71 5 per cent, 1 8 per cent as agricultural labourers, 1 6 per cent engaged in household industry and 25 1 per cent workers are employed as other workers The agricultural sector plays a major role in providing employment to the

working force of rural population despite the fact that this sector is not commercially profitable Household industries also could not make much progress in rural areas in the district as this sector absorbs only 1 6 per cent of total workers 25 1 per cent of total workers are engaged in other activities in rural areas of this district

Among cultivators, the percentage of females (92 5 per cent) is higher than males (52 6 per cent) in the rural areas Females play a major role in rural economy of the district The proportion of cultivators at C D block level varies from 77 3 per cent in Geharwin C D block to 66 4 per cent in Bilaspur Sadar C D block The percentage of agricultural labourers in Ghumarwin and Geharwin C D blocks have been recorded as 2 0 per cent in each The lowest percentage of 1 5 per cent of agricultural labourers is recorded in Bilaspur Sadar C D block The proportion of household industry workers varies from 2 1 per cent in Ghumarwin to 1 4 per cent in Bilaspur Sadar, C D block Other workers at C D block level are 25 1 per cent in Ghumarwin, 19 2 per cent in Geharwin and 30 7 per cent in Bilaspur Sadar C D block holding first position among the C D blocks

* Based on the improved drinking water source, drinking water supply has been classified as Improved or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to Improved drinking water source However the concept of improved drinking water is state specific and this is to be considered accordingly

Table 41 It depicts the distribution of villages by population ranges and amenities available therein. In Bilaspur district, out of total 965 inhabited villages, 796 villages fall in population range of less than 500 persons Of these, 388 villages (48 7 per cent) have the educational facility, 142 villages (17 8 per cent) have been provided with medical facility, 794 (99 7per cent) villages have been provided with improved drinking water facility 112 villages (14 1 per cent) have post office facility, 506 villages (63 6 per cent) have telephone facility 479 (60 2 per cent) have transport communications facility Banks and agricultural credit societies are available to 12 (1 5 per cent) and 14 (1 8 per cent) villages respectively 375 villages (47 1 per cent) are linked with pucca road 795 (99 9) villages have power connections

123 villages fall in the population range of 500-999 persons Of these, 111 villages (90 2 per cent) have educational, 51 (41 5 per cent) have medical facility All villages have improved drinking water facility 46 villages (37 4 per cent) have post office, 102 villages (82 9 per cent) have telephone and 110 villages (89 4 per cent) have the transport communications facility Bank and agricultural credit societies are available to 8 villages (6 5 per cent) each 95 villages (77 2 per cent) have been linked with pucca road 121 villages (98 4 per cent) have the power connections

35 villages fall in the population range of 1,000-1,999 persons In this range, all villages have educational, improved drinking water and electricity facilities 28 villages (80 0 per cent) have medical, 23 villages (65 7 per cent) have post office, 32 villages with 91 4 per cent have telephone and 33 villages (94 3 per cent) have transport facilities 5 and 6 villages or 14 3 and 17 1 per cent have facility of banking and agricultural credit societies respectively 32 villages (91 4 per cent) have been linked by pucca road

11 villages fall in the 2,000-4,999 population range All villages have been provided with educational, improved drinking water, post office, telephone, transport communications and power supply facilities 9 villages (81 8 per cent) have medical, 5 villages (45 5 per cent) have banking and 4 villages (36 4 per cent) have the facility of agricultural credit societies There is no village in the district having population of 5,000 and above

TABLE 42 DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C D block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Ghumarwin	262	20,281	51 1	11 2
2	Geharwin	275	33 919	31 2	2 7
3	Bilaspur Sadar	428	49,920	22 1	17 9
	District Total	**965**	**104,120**	**30 7**	**10 7**

Note Cultivable area = irrigated area + unirrigated area

Table 42 It deals C D block-wise distributions of villages according to land use It also gives the detail of cultivable area available in the district and at C D block level The cultivable area includes irrigated as well as unirrigated area It further elaborates that what is the extent of cultivable area under irrigation There are 965 inhabited villages in Bilapsur district having a total area of 104,120 hectares as per village paper Of this, 30 7 per cent is cultivable and 10 7 per cent of total cultivable area has got the irrigation facility The area figures have been collected from the revenue record maintained for each village by the state government

At C D block level shows that Ghumarwin block with 262 villages have a total area of 20,281 hectares Of this, 51 1 per cent of land is cultivable and 11 2 per cent is irrigated land In Geharwin block, all the 275 villages have a total area of 33,919 hectares 31 2 per cent land is cultivable and of this, 2 7 per cent land is irrigated The C D block, Bilaspur Sadar has a total 49,920 hectares area of 428 villages The percentage of cultivable area accounts for 22 1 per cent and better position with 17 9 per cent area is under irrigation

TABLE 43 PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)

Data source Census of India 2001 H series Tables on Houses Household amenities and Assets

* Based on the improved drinking water source drinking water supply has been classified as Improved or otherwise If the household as access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to Improved drinking water source However the concept of improved drinking water is state specific and this is to be considered accordingly

Note percentage is given in brackets after the number of households
Bathroom means bathroom within the house
Toilet means toilet within the house
Drainage means closed and open drainage

Table 50 It shows that 88 6 per cent households in the district have been provided with improved drinking water facility through a tap or a hand pump/tube-well and 97 9 per cent have electricity in their houses The bathroom facility is available to 33 2 per cent households within their premises In rural areas, 29 0 per cent households have bathroom facility, whereas this proportion in urban areas comes to 80 4 per cent 97 8 per cent in rural areas have been provided with electricity as against 98 6 per cent of households have this facility in the urban areas of the district Toilet and drainage facilities in the district are available to 38 4 and 25 1 per cent of households respectively in the district The percentage of facilities for different amenities available to the households at tehsil/sub-tehsil level is almost conform to the district pattern analysed

Data source Census of India 2001, H-series Tables on Houses, Household amenities and Assets

Table 52 Table 52 represents the data for total, rural and urban areas at district/tehsil/sub-tehsil level about households availing banking facility, possession of valuable assets by the households, such as radio/transistor, telephone, bicycle, scooter and car etc There are 67,195 households in the district and among them 37,271 households are availing banking facility 28,403 households have radio/transistors Television is possessed by 37,566 households Telephone is installed in 9,950 households For transportation purposes, 5,330 households have bicycle, 5,276 have scooter, motor cycle and moped Car, Jeep and Van one or the other is possessed by 1,653 households 20,515 have none of these specified assets The data in use of banking services and possession of assets by the household at tehsil/sub-tehsil level is almost similar as analysed above for the district as a whole

(viii) Major Social and Cultural events, natural and administrative developments and significant activities during the decade

Major social and cultural events - fairs and festivals Various fairs and festivals are traditional means of amusement and recreation for the people It is rather a cultural heritage of the people Various types of fairs and festivals are celebrated almost around the year are given below

Lohri (Makar Sakranti) It falls on 13th and 14th January This is observed by igniting fires, distributing "reories, gachak and ground nuts" etc On this day, people mostly take "Khichri" with pure ghee Among Hindus, take holy dip in the sacred rivers

Basant Panchami It is a festival of colours People usaully put on yellow clothes, cook yellow rice

and other sweet preperations This festival bids fare well to winter and welcomes the spring

Shivratri The festival is generally observed by Hindus in every household Lord Shiva is worshipped in various temples by offering water mixed milk on the Shivlingas

Holi Holi is festival of colours It usually falls in March Men, women and childern form small groups and throw coloured water on one another They sing and dance People also use abir and gulal They rub on the foreheads of the people This festival is observed by igniting fires

Baisakhi It falls on the 13th April It is celebrated all over the district by all classes of people They put on new clothes and prepare halwa and lassi A fair is held at many places Women buy bangles and children prefer to buy toys etc

Janam Ashtmi Janam Ashtmi the birth day of Lord Krishna is celebrated in the month of August/ September every year People worship in the temples and religious songs are sung

Dussehra Dussehra is one of the great festival of Hindus They celebrate it with gaiety in honour of Shri Ram's victory over Ravan, the demon king of Lanka Dussehra is celebrated in form of a drama called Ramlila for ten days On the 10th day i e Vijay Dashmi, huge effigies of Ravan, Kumbh Karna and Meghnath are stalled on the ground and set on fire after sun set It shows the victory of goodness over the evil

Diwali Diwali is a festival of lights To commemorate the return of Lord Sri Ram to Ayodhya after victory over Ravan This festival is held in the month of October/November Diwali is celebrated with great pomp and show People whitewash their houses and shops On the night of Diwali, houses and shops are illuminated with electric bulbs, candles and lamps Shopkeepers close their old accounts They open new ones for the new year It is believed that Goddess Lakshmi visit their houses on this day Children burn fire works on this festival People gift sweets and convey best wishes to neighbours, relatives and friends

Natural and administrative developments during the decade

1 At the distance of 2 kms from Bilaspur district headquarters, the beautiful bridge was constructed over Ali Khad during 1999-2000 It is one of the biggest bridge in the district The distance between sub-division and the tehsil headquarter Ghumarwin has been reduced by 10 kms

2 The proposal to construct 800 MW Kol Dam Project by the National Thermal Plant of India at Harnora was inaugurated by the Hon'ble Prime Minister, a place near Slapper during the year 2000

3 The Jhanduta sub-tehsil was upgraded to tehsil level during 1998

4 The Naina Devi temple was linked with Raju Ropeway during 1999

5 During the decade 1991-2001 the District Hospital Bilaspur was upgraded to the Regional Hospital Bilaspur

6 The Degree College at Ghumarwin has also started functioning during the decade

7 The Industrial Training Institute has started functioning at Berthin during the decade 1991-2001

8 Big indoor Stadium is being constructed at Luna in Bilaspur Town

9 Water sports was organised in Gobind Sagar lake during 1997

10 Paragliding was organised at Bandla Dhar

11 The detailed position of roads constructed during the decade as given below

Motorable	Jeepable	Metalled
149 54 kms	14 34 kms	194 77 kms

12 Very old arch bridge of 30 metres span at Gambhrolla on NH-21, collapsed during mansoon period of 1998 and traffic on this important national highway was disrupted Construction of new bridge was completed in the month of April, 2000 at the cost of Rs 253 90 lacs

13 Another important bridge called Mandwa bridge on Bhagher Bijay was constructed and completed in the month of November, 2000 at the cost of 208 62 lacs

14 "Bal Vikas Pariyojana" was started at 107 "Angan Badi Kendra" in the district

(ix) Places of religious, historical or archaeological importance and Tourist interest-

Places of Religious interest

Markand It is situated at a distance of 19 kms from Bilaspur It is believed that this place and Vyas Guffa at Bilaspur were once linked by an underground passage and Maharishi Vyas and Maharishi Markandey could contact each other through this passage At present there is no trace of this passage There is a natural spring and married couples come to have a dip in the sacred water which is believed to cure certain infant disease and sterility is changed into fertility

Shri Naina Devi Shri Naina Devi Ji is a famous religious place The temple of Naina Devi Ji is situated on a ridge at an altitude of 3,595 feet which is visible from Ropar, Nalagarh and Una In April, August and October every year fairs are held in honour of Goddess Durga Majority of the pilgrims from plains attend the August fair Sikhs constitute about half the number of pilgrims The people have unflinching faith in the Goddess and many devotees cover the distance from their home in the dandwat (prostrate) position It is also believed that Guru Gobind Singh, the 10th Guru of Sikhs performed a great hawan and was blessed by the Goddess Before taking over the management of the temple by the government a small town Committee was looking after the needs of the pilgrims and sanitation of the town The government and various Social Organisations make arrangement during the fairs The place is approachable both from Kiratpur and Bhakra

Jhanda temple at village Bolu Another place of religious importance is Jhanda temple which is situated at village Bolu 16 kms east of Bilaspur Here a fair is held every year in Asarh (June)

Googa peer at Geharwin This place is famous for the shrine of Googa Peer A large fair is held here in Bhadrapad (August/September) Groups of singers praise the heroic deeds of Googa

Devat Sidh The temple of Devat Sidh baba is situated near Chakmoh at a distance of 51 kms from Bilaspur and is approachable by motor road Thousands of people visit the temple in March and April

Goat and sheep sacrifices are often made A goat is usually sacrifices in the name of Kali during Dussehra No sacrifice is, however, performed before the image of Vishnu

Place of historical interest

Fort of Kotkahlur The fort is situated at a distance of few kms from Ganguwal Hydro Electric Station Amongst the places of historical interest, the Fort of Kotkahlur occupies the 1st position Raja Bir Chand, the founder ruler of this area got it constructed It is in ruins now The state was called Kahlur till such time the seat of Government was shifted to Bilaspur Among the local population, the district is still known as Kahlur

There are seven small ancient fortresses in the district at Bacchretur Bahadurpur, Basseh, Fatehpur, Sariyun, Swarghat and Tumi Sunhani, a small village on the bank of Seer Khad is yet another place which claims the distinction of being a state headquarters for some period

Places of Tourist Interest

Bhakra Dam Bhakra Dam, the highest straight gravity dam in the world situated in Naina Devi sub-tehsil about 14 kms from Nangal town occupies the predominant position amongst the places of tourist interest

The idea for the construction of this dam was conceived by Sir Louis Dane, the then Lieutenant Governor of Punjab, who travelled from Suni to Bilaspur and then onward to Ropar The project could not make headway due to prohibitive cost of construction In the year 1938-39, the district of Rohtak and Hissar of the then Punjab state experienced severe drought resulting in great loss of human life and cattle The scheme was again mooted out but was not executed due to second world war It was only after independence in March, 1948 that the work was taken in hand for execution On the historic day of 17th November, 1955, late Prime Minister Shri Jawahar Lal Nehru placed the first bucket of concrete at the foundation The construction of dam was completed in October, 1962

The height of dam is 226 metres, length at the top is 518 metres and width 9 metres It has a length of 99 metres at the bottom and width 402 metres The project derives its name from two villages Bhakra and Nangal situated on the foot hills of the low Himalayan ranges

Bhakra occupies a very important place on the India's tourist map and has rightly been described a "New Temple of Resurgent India" by the last Prime Minister Mr Nehru The project authorities have set up a Public Relation Office in Nangal Township which provides necessary help and guidance to the tourists

Gobind Sagar Lake This is a big man made lake behind the Dam It has been named after Guru Gobind Singh Partial storage of water giving birth to Gobind Sagar was started on 3rd July, 1958 by closing the left diversion tunnel In all 371 villages including Bilaspur town have been submerged in the lake out of which 256 from Bilaspur district alone The area of the lake is 96 5 Sq km with storage capacity of 7 80 million cubic ft The water which once caused havoc through floods have proved boon for the agriculture and industrial development of Punjab, Haryana and Rajasthan It moves the wheels of four hydro electric power houses of Bhakra, Ganguwal and Kotla Power Plants with installed capacity of 1200 MW of electric power and brings under irrigation 26 lac hectares of land in the state of Punjab, Haryana, Rajasthan The lake is very useful for the development of fisheries within Himachal Pradesh

New Bilaspur Town After submerging the old Bilaspur town which was set up in about 1650 A D , the new planned township has come up which is the seat of District headquarters The places of interest where fairs are held are the temple of Raghu Nath Ji, Gopal Ji, Khanmukheshwar and Deomati

Kandror Bridge The construction of the bridge, the second highest in Asia, was started in April,1959 and after completion in 1965, it has provided a link between Bilaspur, Ghumarwin and Hamirpur district

Deoli The village is situated at a distance of 15 kms from New Bilaspur township towards Mandi just below the Shimla-Mandi road There are 2 tanks and hatchery of the nursery ponds, built at a cost of Rs 3 68 lacs Apart from exporting mirror carp, finger lings out of the state, the main function of this hactchery is to keep a constant supply of finger lings to Gobind Sagar

Namhol Namhol is located at about 24 kms from Bilaspur on the Bilaspur-Shimla road There is a Thakurdwara which was built by Raja Amar Chand in 1883 A D Brass idols of Ram, Lakshman, Sita and Hanuman are installed in the temple The place is the main centre of ginger trade

Swarghat At an elevation of 1,128 metres from the sea level, Swarghat is situated at a distance of about 42 kms from Bilaspur on the Bilaspur-Kiratpur Road Surrounded by pine trees, it is a beautiful place and is elevated to the status of a sub-tehsil headquarters of Naina Devi There is Lakshmi Narain temple in the village

The important places of tourist interest are

	Name of place	Distance from district headquarters (in kms)
	1	2
1	Naina Devi	76
2	Talai	64
3	Ladraur	52
4	Bhakra	80
5	Nauni	8
6	Brahmpukhar	16
7	Namol	24
8	Ghagas	12
9	Kandraur	22
10	Ghumarwin	32
11	Kuthera	42
12	Bharari	46
13	Berthin	46
14	Jhanduta	42
15	Geharwin	42
16	Swarghat	42
17	Markand via Ghagas	22
18	Hatwar	64

(x) Major Characteristics of the district Bilaspur district is endowed with two economic resources viz agricultural land and fishery The district is a well known centre of pilgrimage Naina Devi Ji and Shah Talai are the famous pilgrimage centre Fair and festivals are interwoven in the daily lives of the people of this district Bhakra Dam, the highest straight gravity dam in the world is situated in Naina Devi sub-tehsil Kandror bridge, the second highest bridge

in the Asia and Gobind Sagar lake occupies the predominant position amongst the places of tourist interest Limestone is available in abundance One cement plant has been set up by the A C C Pvt Ltd , at Barmana Gold, pyrite and gypsum are found in Malyawar forests Quartzite's in Sungal, Bandla and Chamlok etc Livestock is the main wealth next to agricultural of a large chunk of rural population Road transport is the life of the economy of the district All the important places are linked with roads Bilaspuri or Kahluri is principal mother tongue of about 80 per cent of the population The inhabitants of the district have their staple food is maize, rice and occasionally wheat Bilaspur being situated in temperate zone, the clothing requirement is light Several special dishes are prepared during the festival season Diwali, Holi, Ramnavami, Naina Devi fair, Janamashtami etc are the famous festivals of the people

Contribution of the District : The district has provided the saints like Maharishi Vyas and Maharishi Markandey The district has also provided the renowned freedom fighters Famous Bhakra Dam is situated in the district

(xi) Scope of Village Directory and Town Directory

Village Directory The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction The format of village directory has 23 columns providing village-wise data of location, area, population, land use pattern and amenities etc

The details of each column of village directory are explained as below

Column-1 Serial number of the village is indicated in this column

Column-2 gives the name of the village and permanent location code number with Hadbast No in brackets (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district In the state of Himachal Pradesh first PLCN 00,000,100 has been assigned to village 'R F LUJ' in Pangi tehsil of Chamba district which happens to be first village, tehsil and district while the last PLCN of 02 011,800 has been assigned to the last village 'DHAR CHALING GAARH' of the state in Sangla tehsil of Kinnaur district which happen to be last as per procedure adopted for assigning location code number The district census handbook of 1991 Census as well as updated district and tehsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages The last two zeros will be used if new villages are created out of existing villages in subsequent census Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tehsildar of each tehsil

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department

Columns–4 & 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz upto 5 kms , 5-10 kms and 10+ kms of the nearest place

where the facility is available has been given This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development The abbreviations used to indicate these amenities have been explained separately in the subsequent section The list of colleges, senior secondary schools, hospitals, post & telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end

Column-10 shows the number of banks – Commercial banks and Co-operative banks In addition to this, the list of banks procured from the lead bank of the district has also been added in this book

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies

Column-12 shows the number of recreational and cultural facilities viz Cinema/video hall, sports club, stadium/auditorium facility available in the villages

Column-13 Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village

Column-14 refers to the state of roads etc leading to the village This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways

Column-15 gives the information of the nearest town and its distance in kms from the village in brackets from the referent village In case, the nearest town is located in another state, the name of the state has also been furnished

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations

Column-17 gives the information as to whether newspapers/magazines are received in the village

Column-18 gives the information of most important commodities manufactured in the village

Columns- 19 to 23 give the details about land utilization The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories These are as follows -

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area

Columns 20 and 21 show area irrigated by different sources of irrigation and un-irrigated area These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands In case of irrigated land, the source of irrigation has also been indicated

Column-22 Culturable waste This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession Such lands may be either fallow or covered with shrubs and jungles which are not put to any use Lands under thatching grasses, bamboo bushes and other groves for fuel etc , which are not included under orchards or forests come under this column All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column

Column- 23 Area not available for cultivation This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost

Column- 2 & 1 Indicate the name of the village and serial number of village respectively

Town Directory The Town Directory is presented for each town in the district covering different aspects of urban life Seven statements (I to VII) have been included for presentation of this data The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities It covers all the towns in the district statutorily notified as well as non-municipal towns All the towns in the district are arranged in alphabetical order

The data collected in these statements have largely been furnished by the municipal bodies For non-municipal towns, the cantonment executive officers supplied the information

Statement-I Status and Growth History The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001 Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tehsil/sub-tehsil to which town belongs While column 5 shows the name of C D block, area of each town in sq km is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001 Column 19 of the statement shows density of towns as per the 2001 Census Columns 20 to 22 depict the sex ratio from 1981 to 2001 Censuses

Statement-II Physical Aspects and Location of Towns In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5 Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/ canal (if within 10 kms)

Statement-III Municipal Finance This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads There are in all 16 columns in the statement showing receipt and expenditure under different heads

Statement IV Civic and Other Amenities The statement displays information under 20 columns The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc

Statement-V Medical, Educational, Recreational and Cultural Facilities This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution Educational facilities by level/type of courses and recreational and cultural facilities

Statement-VI Trade, Commerce, Industry and Banking This statement presents information under 11 columns in respect of each town Columns 3 to 8 indicate three most important commodities exported and manufactured in the town Information on number of banks available in the town appears under column 9 Columns 10 and 11 shows number of agricultural and non-agricultural credit societies operating in each town respectively

Statement-VII Civic and other amenities in Slums There are no slum areas notified in Himachal Pradesh Hence no information is collected in this regard

PART-A
VILLAGE AND TOWN DIRECTORY

Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village

Village is a statutory recognized unit having a definite boundary and separate land records In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component The villages which are considered as a Census Town, the amenities data are shown in the Town Directory For those villages which have partly merged in an outgrowth of U A , the amenities data are shown in the Village Directory for that particular village

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i e , Serial number, Name of village, location code number with Hadbast number in brackets and area of the village 'Uninhabited'is indicated against column no 4 to 18 The land use data for such villages are shown in col 19 to 23

The Village Directory format has 23 columns and the details given under each column for the village are as follows

Column 1 Serial Number

Self explanatory All the villages within the CD Block are presented serially in the ascending order of their location code number

Column 2 Name, Hadbast Number and Location Code Number of village

The name, hadbast number and location code number of the village are shown against this column This also includes the forest and uninhabited villages

Column 3 : Area of the village

The area of the villages in hectares are given Wherever the area figures was not furnished by the concerned department the column is left blank

Column 4 Total population

The total population of the village as per 2001 Census is given against this column

Column 5 Number of households

The number of households as per 2001 Census is given in this column

Amenities

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communications, power, approach road etc in each village has been depicted with appropriate codes against the column concerned Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz <5 kms , 5-10 kms and 10+ kms of the nearest place where the facility is available is given Column wise details are given below

Column 6 Educational

Classes upto class V included in Primary School This will include nursery school, kindergarten school pre-basic school, pre-primary school, junior basic school upto class V

Classes from VI to VIII are included in the middle school

Classes from IX and X included in High secondary school Classes XI and XII are included in senior secondary school

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e g Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e g P(3), M(4), etc

Column 7 Medical

Availability of medical facility within the village is indicated by following codes

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre/Community Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T B Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e g H(3), D(4), etc

Column 8 Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 Post & Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc the same is indicated in codes mentioned below along with the

number of banks in brackets If not available the distance of nearest place where the facility exist is given

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 Credit Societies

If the village enjoys the services of Credit Societies i e Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets In case the facility is not available within the village the distance of the nearest place where such facility exist is given

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village The same is recorded in these columns If not available the particulars of the nearest place with the facility is recorded The information is indicated in codes mentioned below along with the number of such facilities in brackets

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 Approach to village

Approach to village refers to the state of road leading to village The approach to the village is indicated in following codes

(i)	Paved Road	PR
(ii)	Mud Road	MR
(iii)	Foot Path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village

Column 16 Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes

(i)	News Paper	N
(ii)	Magazine	M

Column 18 Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column

Column 19 to 23 Land use i e area under different types of land use

Land use data maintained by the State Govts is furnished against these columns The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns The area figures are given in hectares up to one decimal Desh '-' is recorded wherever the information is not made available by the concerned department The codes used for different types of irrigation facilities available in the village are indicated below

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W

(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Appendix-V Summary showing number of villages having or not having Scheduled Castes population

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population

Appendix-VII The appendix shows the list of villages according to proportion of the Scheduled Castes (VIIA) and Scheduled Tribes (VII B) to the total population by ranges

Appendix-VIII Appendix VIII shows the List of villages under each Gram Panchayat This appendix could not be genrated because Himachal Pradesh a few villages fall in more than one panchayat

List of villages merged in towns and outgrowths at 2001 Census

In Bilaspur district no village was merged in any town and no outgrowth was reported in town during decade 1991-2001

Appendices to Village Directory

Appendix-I of the village directory depicts C D block wise abstract of educational, medical and other amenities like protected drinking water, post & telegraph, transport and communication, power supply, credit societies, recreational facilities and number of news paper/magazines available in 965 total inhabited villages of Bilaspur district

Of the total 965 inhabited villages, 544 villages have 637 primary schools, 168 villages have 179 middle schools, 78 have 81 matriculation/secondary schools 24 villages have the same number of senior secondary/PUC/Intermediate/Junior College A single village in the district has a degree college i e in Ghumarwin C D block There are 421 villages in the district which do not have any type of educational institution Hospital facility is available only in one village in the district There are 73 villages with 74 dispensaries, 22 villages have the same number of Primary Health Centres/Health Centres 135 villages have been provided with same number of primary health sub-centres 31 villages have got 38 maternity child welfare centres There are as many as 735 villages in the district where people of these villages have to travel to other places to avail the medical care

Of the 965 villages, 963 have the facility of improved drinking water through tap, 278 villages have well, 123 have this facility through tank 409 villages are served with fountain-water There are 755 villages in the district, which have more than one source of drinking water There is not a single village in the district which is deprived of this facility

The post office facility is available in 192 villages 19 villages have telegraph and 6 villages have both post office and telegraph facilities There are 18 villages with telegraph and telephone facilities Only 6 villages have these three facilities like post, telegraph and telephone as a single unit As many as 651 villages have telephone connections In the district, there are 574 and 185 villages with bus and navigable waterway facility as a means of transport and communications facilities Bank facility is available in 30 villages in the district having 39 commercial and co-operative banks respectively Of the 965 inhabited villages in the district 962 villages have the power supply while two villages in Ghumarwin C D block and one village in Bilaspur Sadar have been deprived of power supply connections There are 32 villages in district have the same number of Agricultural Credit Societies 7 non-agricultural societies are functioning in 7 villages while 10 villages have 11 other credit societies Recreational facility like cinema/video hall is available in 2 villages A single village has a sports-club Another single village has the stadium/auditorium/ community hall facility 559 and 358 villages have news paper and magazine facilities respectively, while 340 villages have both these facilities

Appendix I A

Appendix IA deals with the C D blockwise villages by number of Primary schools Of the 965 villages, there are 421 villages in the district which are deprived of any primary school facility In 479 villages in the district have one primary school each in every village Two primary schools are functioning in 46 villages There are 3 schools each in 11 villages There are 8 villages have four and above primary schools each in a village

Appendix I B

Appendix IB reflects the information regarding different type of educational institutions There are 421 villages which do not have any type of educational institutions 376 villages have at least one primary school and no middle school 168 villages enjoy this facility with at least one primary and middle school each 78 villages in the district have at least one middle and secondary school each

Appendix I C

Appendix IC deals with the different sources of drinking water facilities In the entire district, there is not a single village which has an independent source of water supply like well, tube-

well and handpump There 494 villages in the district have more than one source through tap, well, tube-well or handpump Tap is the only source of drinking water in 209 villages of the district

Appendix II

Appendix II depicts the villages with 5,000 and above population which do not have one or more amenities in the district The district has no such village with this population range in its jurisdiction

Appendix II A

Appendix IIA of village directory reflects the informations regarding the census town in the district which do not have one or more amenities The district has no such census town, hence the data of this appendix is nil

Appendix III

No census town exists in the district, hence the data is 'Nil'

Appendix IV

Appendix IV gives the C D blockwise list of inhabited villages where no amenity other than drinking water facility is available in the villages In the entire district there is no such village which is having only drinking water facility

Appendix V

Appendix V of village directory deals with C D blockwise summary showing the number of villages not having Scheduled Castes population in the district Out of 1,061 villages in the district, 96 villages are uninhabited Of the remaining 965 inhabited villages, 156 villages have no Scheduled Castes population 809 villages have this category of population

Appendix VI

Appendix VI shows the C D block wise summary of villages not having Scheduled Tribes population The district has 1,061 total villages Of this, 96 are uninhabited villages Of the remaining inhabited villages, 826 villages have no Scheduled Tribes population, 139 inhabited villages have some Scheduled Tribes population

Appendix VII A

Appendix VIIA of the Village Directory reflects C D blockwise the list of villages according to the proportion of Scheduled Castes to the total population by ranges viz less than 5, 5-10, 11-20, 21-30, 31-40, 41-50, 51-75 and 76 and above

Appendix VII B

Appendix VIIB deals with C D blockwise list of villages according to the proportion of Scheduled Tribes to total population by ranges viz less than 5, 5-10, 11-20, 21-30, 31-40, 41-50, 51-75 and 76 and above

Appendix VIII

Appendix VIII shows the list of villages under each Gram Panchayat This appendix could not be generated because in Himachal Pradesh a few villages fall in more than one panchayat

APPENDIX I-

SECTION-II
TOWN DIRECTORY

SECTION- II
TOWN DIRECTORY

Note explaining the abbreviations used in Town Directory ·

Statement I Status and Growth History

Column (2) Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels It is presented according to 2001 Census Population of the town as follows

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city

The civic administration status of the towns is indicated within bracket against the name of the town The following abbreviations are used to denote civic status of town

(i)	Municipal Corporation	M Corp
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Statement II - Physical Aspects and Location of towns, 1999

Column 3 to 5 Physical Aspects

In these columns the Rainfall and Maximum & Minimum Temperature of the town is recorded

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal, its name is to be mentioned If not available, then the name of nearest place with distance, where such facility exists is to be mentioned

Statement III Municipal Finance 1998-1999

Itemwise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded

Statement IV Civic and Other amenities, 1999

Column (1 to 5) Self explanatory

Column (6) Road length (in kms)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers

The codes used for different types of drainage system are as follows

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 Number of latrines

Number of various types of latrines both Public and Private are given in these columns

Column 12 Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 Water supply

Source and capacity of storage system The following codes are used in these columns

Column 13

(i)	Tap water	T
(ii)	Tubewell water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15

Column 15 Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded If the facility is not available within the town The name of the nearest place having this facility with its distance from the referent town has been recorded

Column 16 to 20 Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i e Domestic, Industrial, Commercial, Road lighting (points) & others

Statement V Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 Self explanatory

Column 4 & 5

The data covers all such medical institutions run by or aided by Government/Semi Government/ Local bodies and Charitable institutions or Social

agencies like the Missionaries Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T B Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e g D(3), NH(8), etc The institutions have further been distinguished by providing additional codes within the bracket as given below

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc of the government or semi government or autonomous bodies, public sector undertakings etc

The following codes are used

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B Ed College, Teacher's Training Institute, Music/Dance School, Nursing School etc are covered under 'Others'

Column 11 to 14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation Middle Schools/ Junior Secondary and Primary Schools

School up to class V are treated as Primary or elementary schools These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV

Schools upto VIII are considered as Middle school or Junior Secondary

Schools upto class X are considered as Matriculation or Secondary schools

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre-University/Junior College etc This would cover 10+2 classes whether held in schools or college

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e g P(4), M(3)

Column 15 Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission There are number of Adult Education Centres which are included in these columns

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned

Column 16 Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded

Column 17 to 19 Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities The particulars of permanent recreational facilities are considered for these columns

Column 20 Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and name of three most important commodities manufactured in the town are recorded

Column 9 . Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column

Column 10 & 11 Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns

Statement VII Civic and other amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc

A brief analysis of statements of Town Directory

Statements I to VII of the Town Directory deals with the different aspects of the urban areas in the district and brief analysis of each statement is given as below

Statement I

It shows the status and growth history of the towns in the district In Bilaspur district there are 4 statutory towns Of these, two towns of Bilaspur and Naina Devi are municipal councils, Ghumarwin and Talai are nagar panchayats According to population size, 2 towns of Naina Devi M Cl and Talai NP fall in class-VI Bilaspsur M Cl is a class-IV and Ghumarwin, NP falls in Class-V category of towns As regards the population increase during the decade 1991-2001, Ghumarwin NP has an increase of 54 3 per cent and is followed by 33 8 per cent in Naina Devi M Cl Bilaspur M Cl has an increase of 23 1 per cent, Talai NP recorded an increase of 29 7 per cent of population The total increase of population in urban areas of the district comes to 31 2 per cent The proportion of urban population has recorded an upward trend i e 5 7 per cent in 1991 to 6 4 per cent in 2001 Census The density per sq km recorded for Bilaspur M Cl (1,232 persons) Ghumarwin NP (1,845 persons), Naina Devi M Cl (1,451 persons) and Talai NP has a density of 693 persons per sq km The decrease in sex ratio has been noticed in the towns of Ghumarwin NP and Naina Devi M Cl In 2001 Census, the sex ratio of Ghumarwin comes to 897 females per 1,000 males against 927 females per 1,000 males in 1991 Census The decrease in the sex ratio in Naina Devi town i e 580 females in 2001 Census and 676 females per 1,000 males in 1991 Census Bilaspur town and Talai, Nagar Panchayat has recorded a sex ratio of 875 and 897 females per 1,000 males

Statement II

This statement reveals the physical aspects and location of each town from state, district, tehsil and community development block headquarters All the towns are well connected with the headquarters by buses *The nearest city with one lakh or above* population is Shimla the State headquarters from Bilaspur, M Cl and Ghumarwin, NP For Naina Devi, M Cl it is Chandigarh (U T) and Hoshiarpur (Pb) is

the nearest city for Talai, NP The distance ranges between 90 to 115 kms from the towns of this district The towns are not linked with railway lines The nearest railway facility is available at Kiratpur (Pb), Anandpur Sahib (Pb) and at Naya Nangal (Pb) within the range of 10 to 96 kms from the respective town Each town of the district is linked by different bus routes of near by states and state/ district/tehsil/c d block headquarters

Statement III

It represents the municipal finance (1998-99) of each local body of the district The receipt and expenditure amount has been recorded in Rs '000 for each town Bilaspur M Cl has a total receipt of Rs 9,310 thousands and an expenditure of Rs 4,939 thousands A largest amount of Rs 4,500 thousands has been derived through taxes and followed by an amount of Rs 4,110 thousands received from goernment grant A sum of Rs 3,205 thousands has been spent on general administration which is the largest for Bilaspur town A total sum of Rs 2,550 thousands has been received in Ghumarwin NP The total expenditure is Rs 2,400 thousands Of the total receipt, a sum of Rs 150 thousands and 850 thousands has been received through taxes and municipal properties and remaining Rs 1,550 thousands have been received from other sources as specified in the statement Of the total expenditure of Rs 2,400 thousands of Ghumarwin NP, Rs 1,500 thousands have been spent on public works Rs 700 thousands and Rs 200 thousands have been incurred on public health and conveniences and general administration respectively In Naina Devi M Cl total sum of Rs 6,890 thousands have been received and the same amount has been incurred in different items for the town The maximum amount of Rs 1,865 thousands has been received from government grant Rs 1,153 thousands have been derived from municipal properties and power apart from taxation Rs 111 thousands received through taxes and remaining amount of Rs 3,761 thousands have been received from other sources of the town For expenditure a sum of Rs 1,401 thousands have been spent on public works followed by Rs 626 thousands which has been spent on public health and conveniences Rs 445 thousands were spent for general administration A maximum amount of Rs 4,254 thousands has been incurred on other miscellaneous works for the benefit of the public Talai NP has a total receipt of Rs 2,189 thousands Of this a sum of Rs 1,148 thousands has been received from government grant and the remaining amount of Rs 1,041 thousands has been derived from municipal properties and power apart from taxation and other sources Of the above total receipt a sum of Rs 200,000, Rs 250,000 and Rs 305,000 have been spent on different items viz public safety, public health and convenience and public works in the town

Statement IV

It shows the civic and other amenities provided by the local bodies in their respective town in 1999 In Bilaspur, M Cl with a population of 13,058 persons, Scheduled Castes constitute 18 2 per cent and Scheduled Tribes 0 7 per cent of the total population Ghumarwin, NP with a population of 5,721 persons, the Scheduled Castes and Scheduled Tribes constitute 21 2 and 0 5 per cent respectively Naina Devi with a total population of 1,161 persons, the percentage of Scheduled Castes and Scheduled Tribes is 9 2 and 1 1 per cent of the total population

All the towns of Bilaspur district are served with open surface drains for sewerage Bilaspur and Naina Devi have also sewer facility for sewerage The town of Bilaspur has 2,776 water borne latrines, Ghumarwin NP has 755 such latrines Naina Devi M Cl is provided with 240 water-borne, 9 service and 114 other types of latrines Lastly Talai, NP in provided with 235 water-borne and 35 other latrines within its municipal limits Septic Tank serves the purpose for the disposal of night-soil in the towns Supply of drinking water is through tap, tank, handpump and well There are two types systems of sewerage viz service reservoir and borewell pumping system in Bilaspur town with a capacity of 72 8 and 22 0 kilolitres each Remaining 3 towns i e Ghumarwin, Naina Devi and Talai have one system of storage of water through service reservoir with a capacity 471 5, 310 0 and 180 0 kilolitres each Only Bilaspur town has the facility of fire fighting service Remaining towns like Ghumarwin gets this facility at the neaiest place i e Bilaspur (30 kms), Naina Devi and Talai gets this facility from Nangal Dam (Pb) and Naya Nangal (Pb) within a distance of 30 and 10 kms from the town respectively All the towns have been

provided with different types of electric connections and road light points

Statement V

It deals with the medical, educational recreational and cultural facilities available in the towns during the reference year mentioned in the statement If these facilities are not available in the towns then the nearest place with distance has been recorded, where such facility is available Each town in Bilaspur district has one or other type of medical and health care centers with number of beds available in the medical institution(s) Bilaspur M Cl have the maximum number of beds 230 Ghumarwin, NP is provided with 50 beded hospital Naina Devi, M Cl has 13 beded hospital and Talai has been provided with 6 beded health center In educational facilities except Talai, NP, all the 3 towns have college facility For medical and engineering college and technical education like polytechnics etc no such institutions are located in these towns These facilities are available at the nearest place from the town within the distance ranges of 40 to 145 kms

Primary level to senior secondary level education facilities are available in every town of the district Bilaspur town has 2 each of senior secondary and secondary, 4 middle and 6 primary schools Ghumarwin, Nagar Panchayat has been provided with one each of senior secondary and secondary, 4 middle and 5 primary schools Naina Devi has one senior secondary and 2 each of secondary, middle and primary schools one each sr sec secondary/matriculation, middle/junior secondary and primary school is available in Talai Nagar Panchayat

Working women hostel facility with 52 seats is available at Bilaspur M Cl other has to move a distance of 30 to 70 kms to the nearest place to get this facility 2 towns viz Bilaspur M Cl and Ghumarwin NP have the recreational and cultural facilities Naina Devi M Cl and Talai NP of the district are two towns which do not have any type of such facilities

Statement VI

It deals with the trade commerce industry and banking facilities in the town during 1999 The most important items manufactured are Ayurvedic Medicines, Fruit Juice and Ready made garments in Bilaspur town

The manufactured items in Ghumarwin town are wooden furniture, Rolling shutters and washing soap In two towns viz Naina Devi and Talai there is not a single item is manufactured in the municipal limits The most important items exported out of the towns are fish metal splints and ginger from Bilaspur M Cl Fish, washing soap and wooden furniture are exported out from Ghumarwin, Nagar Panchayat The items exported out of Talai Nagar Panchayat are citrus fruits galgal and lemon No items are exported out of Naina Devi Municipal Council

Statement VII

It deals with the amenities available in the slum areas in the towns, 1999 Since there is no recognized/notified slum in any town of the district hence no information recorded in this statement

TOWN DIRECTORY STATEMENTS

PART-B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872 Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B Part I contained the Location Particulars, Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration The Census Schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the Schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census For Census 2001, about 202 million Schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain This has to be done mainly through the process of internal consistency comparison with similar data in the past and also through validation with likewise data if available from external sources Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner India The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population In the earlier censuses, the total Scheduled Castes and Scheduled Tribes population were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA This is because the Scheduled Castes status had to be determined in relation to the religion of the individual Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population are presented by sex and rural-urban residence This data is presented at different levels, namely, India, States/Union Territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union Territory

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract This practice was continued in 1991 also In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included In 1981 Census only main workers were presented in to four categories One of the novel features of the primary census abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also This will help the data users in better analysis and understanding of this literacy data

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels The level of presentation of Primary Census Abstracts are as under

	Name of the Primary Census Abstract	Level of presentation
1	District Primary Census Abstract	District/CD Block/UA/City/Town
2	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4	Village Primary Census Abstract	CD Block/Village wise
5	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block-wise for the first time in 1991 Census This practice is continued in 2001 Census also The data for each CD Block is presented both for rural and urban areas separately All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s)

The District Primary Census Abstract is presented in 59 columns The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometres The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares The area figures of the CD Block is the total of the village areas coming under each CD Block The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level The total area figures of all the tehsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tehsil The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the tehsils and P S level the same may not be covered under the area of the villages Apart from this it may also differ due to varying methods of computation adopted at different levels

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town

ANNEXURES

ANNEXURE-I

STATEMENT SHOWING NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Owing to the fact that a few villages in Himachal Pradesh fall in more than one Panchayat, this annexure could not be generated

ANNEXURE-II

NOTE ON FERTILITY, MORTALITY AND MIGRATION- 1991 CENSUS

Fertility Levels Births, deaths and migration are three components of population change in any geographical unit Fertility, is a major factor which affects population growth In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table on fertility The first three questions were asked to all ever married women and the last question related to currently married women Various measures of fertility worked out here are based on the district level estimates of fertility and child mortality for 1991

Different fertility measures reveal a higher level of fertility in the state compared to district Age at marriage for females in the State is also higher as compared to the district Child Woman Ratio in the district is higher in comparison to the State average

The following table gives Age- specific Marital Fertility levels for 1991

Age-group	Bilaspur District			Himachal Pradesh		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	140	140	140	142	142	140
20-24	263	262	286	259	260	239
25-29	161	161	156	170	172	152
30-34	66	66	66	79	81	61
35-39	32	32	18	38	39	28
40-44	13	13	10	17	18	9
45-49	5	5	3	9	9	9

It can be seen from the table that fertility levels in the district are lower as compared to State figures in all the age groups except age group 20-24 In case of district and state rural fertility rates are higher in comparison to urban rates Among the age groups, the higher fertility rates are observed in the age group 20-24, followed by age group 25-29 in both State and district

Child Mortality Rates, 1991 Information relating to children ever born and children surviving was asked for all ever married women From this, estimates of child mortality have been worked out

Persons Males/ Females	Estimates of child mortality, 1991							
	Bilaspur district				Himachal Pradesh			
1	2	3	4	5	6	7	8	9
	q(1)	q(2)	q(3)	q(5)	q(1)	q(2)	q(3)	q(5)
Persons	71	73	75	82	82	86	92	95
Males	70	74	77	80	84	90	95	98
Females	71	72	74	84	81	82	89	92

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given above as q(1), q(2), q(3) and q(5) it is observed that the level of child mortality in the district is substantially lower as compared to the State A notable feature in above statement is that female child mortality in q(2) and q(3) is lower and higher in q(1) and q(5) as compared to males child mortality rate in the district The female child mortality is lower in the State as compared to male

ANNEXURE-III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

State/ District	CBR	TFR	TMFR	GFR	GMFR	Child-Woman Ratio	Mean age at Marriage	Number of children ever born to each married women in the age group of 45-49

Shimla	28 92	3 47	5 72	119	162	43 9	18 56	4 43
Solan	29 81	3 51	4 94	122	160	47 1	17 42	4 80
Sirmaur	34 25	4 49	5 96	150	190	56 2	17 79	4 66
Kinnaur	30 52	4 00	6 23	136	192	50 8	19 66	4 77

The Annexure-III reflects the crude birth rate, various fertility rates, child woman ratio mean age at marriage at district level in the state

Migration (Movement of population)

Migration is the third component of population change, the other two being Mortality and Fertility A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth Similarly, a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence

Internal and International Migration

The migrational movements are of three types -

(i) Migration within the State itself with its components

(a) Migration within the district of enumeration (intra-district migration)

(b) Migration from one district of State to another district of State (inter-district migration)

(ii) Migration from one State to another State of the country (inter-state migration), and

(iii) Migration from one country to another country

The first two streams together constitute internal migration, while the last type of movement is called international migration

Why people migrate - For the first time in the Census, reasons for migration were elicited in 1981 The reasons for migration were broadly categorized as (1) Employment (2) Business (3) Education (4) Marriage (5) Moved after Birth (6) Moved with house hold (7) Any other reason

Reasons for migration have been elicited only with reference to movement from place of last residence

Impact of Migration - Growth of the population of a particular place depends upon natural increase due to excess births over deaths and migration Knowledge of trends of migration helps in future planning of a region

ANNEXURE-IV(A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH - 1991-2001 CENSUSES

Place of Birth	Percentage distribution of Migrants by place of Birth in district					
	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Migrants born within the state of enumeration	93,705 (93 35)	16 441 (85 55)	77 264 (95 20)	71 672 (62 85)	7 401 (48 51)	64 271 (66 26)
(i) Migrants born elsewhere in district of enumeration	71 921 (71 65)	12 301 (64 01)	59 620 (73 46)	47 726 (42 52)	4 071 (26 68)	43 655 (45 01)
(ii) Migrants born in other district of the State	21 784 (21 70)	4 140 (21 54)	17 644 (21 74)	23 946 (21 33)	3 330 (21 82)	20 616 (21 25)
(B) Migrants born in other States of India	6 366 (6 34)	2 550 (13 27)	3 816 (4 70)	39 979 (35 62)	7 433 (48 72)	22 546 (33 55)
(C) Migrants born in other countries	305 (0 31)	227 (1 18)	78 (0 10)	601 (0 54)	424 (2 78)	177 (0 18)
Total Migrants	**100,376 (100 00)**	**19,218 (100 00)**	**81,158 (100 00)**	**112,252 (100 00)**	**15,258 (100 00)**	**96,994 (100 00)**

Annexure-IV(A) presents percentage distribution of migrants by place of birth during 1991 and 2001 Censuses in the district In 1991 Census there were 100,376 total migrants comprising 19,218 males 81,158 females Out of these total migrants, 93,705 993 35 per cent) were born within the state of enumeration, 6,366 (6 34 per cent) born in other states of India and 305 (0 31 per cent) were born in other countries Whereas in 2001 Census 112,252 persons constituting 15,258 males and 96,994

females were recorded as total migrants in the district Of these total migrants 71,672 (63 85 per cert) constituting 7,401 (48 51 per cent) males and 64,271 (66 26 per cent) females were born within the state og enumeration, 39,979 (35 62 per cent) consisting 7,433 (48 72 per cent) males and 32,456 (33 55 per cent) females born in other states of India and 601 (0 54 per cent) persons consisting of 424 (2 78 per cent) and 177 (0 18 per cent) were those who were born in other countries

On the basis of comparison of data pertaining to 1991 and 2001 Censuses slight variation in migration pattern has been noticed In the category of migrants born within the state of enumeration the percentage has shifted down from 93 35 per cent in 1991 to 63 85 per cent in 2001 Whereas percentage of migrants born in other states of India has gone up from 6 34 per cent to 35 62 per cent Similarly in the category of migrants born in other countries The percentage have risen from 0 31 per cent in 1991 to 0 54 per cent in 2001 Census

ANNEXURE-IV (B)

MIGRANTS BY PLACE OF LAST RESIDENCE - 1991-2001 CENSUSES

Place of Last residence	Percentage distribution of Migrants by place of Last residence in district					
	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Last residence within the state of enumeration	96 336 (92 68)	17 877 (82 53)	78,459 (95 35)	73 401 (63 84)	8,446 (50 28)	64,995 (66 16)
(i) Last residence else where in district of enumeration	73,420 (70 63)	12 713 (58 69)	60,707 (73 78)	49,076 (42 68)	4,348 (25 88)	44,728 (45 56)
(ii) Last residence in other district of the State	22,916 (22 05)	51 64 (23 84)	17,752 (21 57)	24,325 (21 16)	4 098 (24 39)	20,227 (20 60)
(B) Last residence in other States of India	7,372 (7 09)	3,586 (16 56)	3 786 (4 60)	41 057 (35 71)	7,986 (47 54)	33,071 (33 69)
(C) Last residence in other countries	235 (0 22)	197 (0 91)	38 (0 05)	518 (0 45)	367 (2 18)	151 (0 15)
Total Migrants	**103,943** (100 00)	**21,660** (100 00)	**82,283** (100 00)	**114,976** (100 00)	**16,799** (100 00)	**98,177** (100 00)

The Annexure-IV(B) depicts migrants by place of last residence during 1991 and 2001 Censuses In 1991 Census Bilaspur district returned 103,943 persons comprising 21,660 males and 82,283 females as total migrants Out of these total migrants 96,636 (92 68 per cent) reported their last residence within the state of enumeration, 7,372 (7 09 per cent) reported their last residence in other state of India and the remaing 235 (0 22 per cent) returned their last residence in other countries

Similarly in 2001 Census, Bilaspur has returned 114,976 persons constituting 16,799 males and 98,177 females as total migrants Out of total migrants in the district 73,401 (63 84 per cent) persons consisting 8,446 (50 28 per cent) males and 64,995 (66 16 per cent) females have reported their last residence within the state of enumeration, 41,057 (35 71 per cent) consisting 7,986 (47 54 per cent) males and 33,071 (33 60 per cent) females in other states of India and 518 (0 45 per cent) consisting of 367 (2 18 per cent) males and 151 (0 15 per cent) females have their last residence in other countries

During both the Censuses it is observed, that females having last residence within the state of enumeration dominated in the migration whereas males dominated the categories viz place of last residence in other states and in other countries

ANNEXURE-V
BRIEF ACCOUNT OF MAIN RELIGIONS IN THE DISTRICT AS PER 1991-2001 CENSUSES

Serial number	Religion	1991 Census: No of followers	1991 Census: Percentage to total population	1991 Census: Proportion Rural	1991 Census: Proportion Urban	2001 Census: No of followers	2001 Census: Percentage to total population	2001 Census: Proportion Rural	2001 Census: Proportion Urban

A person who can read and write with understanding in any language is taken as a literate A person who can merely read but can not write is not considered literate In Census, to be a literate, it is not essential that a person should have received any formal education or passed any prescribed examination It is better to distinguish between literacy and educational level Literacy means the proportion of literates to total population whereas educational level relates to stage of schooling or college or other training attained by a person

In Census, children below seven years of age are treated as illiterate and excluded from the total population for working out the literacy rate This is known as effective literacy rate The data collected on literacy and educational level help in measuring the progress of literacy as well as the quality of education

The literacy rate of State and districts in 1991-2001 Censuses is given below -

Serial number	State/ District	Literacy rate 1991	Rank in literacy rate among districts of State	Literacy rate 2001	Rank in literacy rate among districts of State
