Folk dance

About 60 fairs and festivals are celebrated in the district at different places round the year Renuka fair is the biggest fair associated with Renukaji, the mother of Lord Parshuram Every fair and festival is accompanied by community dance The folk dance in which males and females together take active part The folk dances and the folk songs also form important part of marriages, custom and rituals performed at various parts of the district These folk dances and folk songs conjure up legends, god and goddesses besides providing entertainment and glamour Artistic movements of hands, shoulders, waist and legs in sitting or standing postures characterise the folk dance which is generally known as Nati The musical instruments used on such occasion are the Karnal, Narsingha, Shehnai, Dhol etc Thus the folk dances and folk songs are the integral part of the cultural being of the people

(c) Appendix to District Primary Census Abstract 383-384

Primary Census Abstract for Scheduled Castes 386-391

Primary Census Abstract for Scheduled Tribes 394-399

C D Block-wise Village Primary Census Abstract 402-521

Urban Primary Census Abstract 524-529

Annexures **531-544**

Annexure I Number of villages under each Gram Panchayat 533

Annexure II Fertility, Mortality and Migration 1991 Census 533

Annexure III Various measures of Fertility and Mean Age at Marriage, 1991 Census 533-534

Annexure IV (A) Percentage distribution of Migrants by place of birth,1991-2001 Censuses 534-535

Annexure IV (B) Migrants by place of last residence,1991-2001 Censuses 535

Annexure V Brief account of main religions in the district as per 1991-2001 Censuses 535-536

Annexure VI Sex wise marital status of population as per 1991-2001 Censuses 536

Annexure VII Literates by Educational levels in the district, 1991-2001 Censuses 537-539

Annexure VIII Distribution of different mother tongues returned in 1991-2001 Censuses 539

List of Educational, Wildlife Sanctuaries, National Parks, Post Offices, Banks and Medical Institutions 540-544

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village wise and town-wise of the district alongwith the status of availability of civic amenities infrastructural facilities etc

2 The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district Thereafter at successive censuses, its scope and coverage has been enlarged The DCHB published at the 1961 census provided a descriptive account of the district administrative statistics, census tables and a village and town directory including PCA The 1971 census DCHB series was in three parts Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages The 1981 census DCHB was in two parts Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels New features alongwith restructuring of the formats of village and town directory were added into it In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village the distance in broad ranges from the nearest place having such an amenity, was given Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns

3 The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit

4 The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village Income and expenditure of gram panchayat, wherever possible, has been provided Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given This includes educational facilities (namely primary, middle, high, higher secondary schools and colleges), medical facilities (viz Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone) communication bank credit societies and recreational facilities In Town Directory, the statement on Slums has been modified and

its coverage enlarged by including details on all slums instead of 'notified slums' The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs

5 The village and town level amenity data have been collected, compiled and computerised in prescribed record structured under the supervision of Shri R L Bisotra, Director of Census Operations, Himachal Pradesh Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991 The task of planning, designing and coordination of this publication was carried out by Shri R G Mitra Deputy Registrar General (C&T) and Dr I C Agrawal, Senior Research Officer of Social Studies Division Dr R P Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables The draft of DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S I Jain, Deputy Director and Shri R K Mehta, Assistant Director, I am thankful to all of them and others who have contributed to make this publication possible

D K Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated 17 10 2006

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications not only provided the reader with historical background of the District Census Handbooks but also amply elaborated the scope and coverage envisaged for this country-wide project In fact, this is the most important district level publication which provides reliable data at grass root level for the purpose of planning administrative requirements as well as of academic development in socio-demographic field The each of the District Census Handbook contains the salient results on the data gathered at the actual enumeration of head-count and in addition contain a wealth of other non-census information in respect of each village and town of the district

Continuing the tradition of the earlier Censuses the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents Part A contains Village Directory which provides information on infrastructural amenities and land use data at village level i e name and location of villages, area, population number of households, important civic amenities/ facilities available in villages like educational, medical, drinking water, post, telegraph and telephone commercial and co-operative banks, agricultural & non-agricultural credit societies, recreational and cultural facilities communications approach to the village, nearest town & distance, power supply, news paper/magazine and most important commodity manufactured in the villages Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district C D block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans

Part-B in the District Census Handbook contains Village and Town Primary Census Abstract This provides information on area, number of households, sex-wise total population child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates workers, non-workers and divisions of workers into four industrial categories i e cultivators agricultural labourers, workers in household industries and other workers in respect of each village and town of the district

Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages, conditions of housing, assets available with households and demographic profile of population at Tehsil/C D Block level which are of much utility for demarcation of areas of surplus and deficit to reorient the planning process

The District Census Handbook was the joint venture of the Government of Himachal Pradesh and the Census Organisation of the Government of India The design of 2001 District Census Handbooks was evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office In earlier Censuses, the cost of publication of these books were met by the State Government but now these are being printed centrally by the Census Organisation In accomplishing this task, we have had the ready and whole hearted co-operation of the staff at various levels of different departments of the State Government The data so supplied by these field level officers have been cross checked with the data obtained from various departments and an attempt had been made to reconcile the discrepancies to make it more reliable I am grateful to all Heads of Departments of the State Government, officers and staff engaged in the conduct of 2001 Census for their co-operation to accomplish this task

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring We had the honour of having enlightened guidance and encouragement of Sh J K Banthia, I A S , the former Registrar General and Census Commissioner, India and I owe special thanks to Sh J K Banthia I am equally grateful to Sh D K Sikri, I A S , the present Registrar General and Census Commissioner, India for guiding and encouraging for the publication of this District Census Handbook I am also thankful to Dr R P Singh, Consultant (Map), Sh R G Mitra, the former Deputy Registrar General (C & T) and Dr I C Aggarwal, Asstt Registrar General (SS) and Sh S L Jain, Deputy Director of S S Division for providing technical guidance and finalising this report

The 2001 Census Operations in Himachal Pradesh were carried out under the dynamic direction of Dr R L Bisotra, I A S , former Director of Census Operations All credit for successful conduct of Census Operations in the State, despite topographical and climatic conditions in the State, goes to him The work of two District Census Handbooks was initiated under his able guidance he was recalled by the State Government in March, 2004 for taking up another assignment but before this books was finalised I owe my deep sense of gratitude to Dr R L Bisotra, I A S , the former Director of Census Operations for the successful conduct of the Census Operations in the state

The data presented in the District Census Handbook required a concerted team work of officers and staff members of this Directorate who were involved with it at various stages of its planning, supervision, field work,computerisation, preparation of manuscript, maps and C R C for printing I express my appreciation for the painstaking dedicated service rendered by all of them and also whose names have been acknowledged separately However, the special mention may be made of S/Shri L R Katiyar and A S Negi, Asstt Directors for preparing the draft report of this publication S/Shri R K Sharma, Statistical Investogator, Gr-II and R D Bali, Statistical Investigator, Gr-III for drafting of analytical notes and checking of Village and Town Directory Primary Census Abstract included in this publication was scrutinized by Census Section under the supervision of Sh C M Azad, Statistical Investigator, Gr-II The whole manuscript of the District Census Handbook was edited and finalised by me Maps appearing in this publication were prepared by Map Section under the guidance of Smt Veena Thakur, Sr Geographer Camera Ready Copy of District Census Handbook was prepared under the supervision of Sh Sohan Lal Quami, Sr Tech Asstt (Ptg) I express my appreciation for the painstaking dedicated service rendered by them and all other my colleagues in the Directorate associated with this project

I shall feel greatly rewarded if the book comes to the expectation of the data users

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level The District Census Handbook was firstly introduced during the 1951 Census, which brought out the Census data down to the town/village level Till then the census data was presented mostly up to district/tehsil/sub-tehsil/ town level only

The District Census Handbook of 1951, apart from the census data, it contained general information of the district like, physical, economic, socio-cultural and administrative aspects of the district including both types of data, census as well as non-census

The 1951 pattern of District Census Handbook continued uninterrupted till 1961 In 1961 the scope of the District Census Handbook was made more comprehensive by including additional items such as climate, geology, agriculture, industry, forests and number of cross tables picked from various series of census tables Till date it is regarded as a model District Census Handbook The entire presentation was divided into four parts First part dealt with the land and the people and the second part contained census tables Whereas third part contained information regarding agriculture, medical and health while fourth part contained village/town directory

During 1971 it was realized that the combination of census as well as non-census data in a single publication, resulted in unnecessary delay in the publication of census results and in order to avoid inordinate delay, it was decided that census data should be delinked from the non-census data and the publication should be brought out in two volumes Thus, District Census Handbook was splited into two volumes First volume dealt with the village and town directory and also village/town-wise Primary Census Abstract of the district whereas second volume dealt with the non-census data, social, economic and cultural tables

In the 1981 Census in order to streamline and to overcome delay in bringing out the publication, the second part of 1971 District Census Handbook was omitted Thus, 1981 District Census Handbook consists of single volume which contains village/town directory in Part-A and town/village wise Primary Census Abstract of the concerned district in Part-B

In the 1991 Census too, with a view to avoiding delay in bringing out the publication, District Census Handbook was brought out in a single volume in two parts as the data given therein are closely inter related Part-A includes Village and town Directory, while Part-B includes Village and Town Primary Census Abstract In the 1971 Census as well as in the 1981 Census, the Village Directory format in District Census Handbook Part-A had 20 columns while in 1991 Village Directory, the number of columns has been reduced to 18 by deleting two Columns of staple food and remarks Moreover, in 1991 District Census Handbook, village and town directory as well as Primary Census Abstract were published first time at C D Block level instead of tehsil/sub-tehsil level due to demand for framing development plans at block level

In 2001 Census, the same pattern has again been followed though the number of columns in village directory format has been raised to 23 for providing some additional information in the villages The additional non-census data and census data include information on agricultural and non-agricultural credit societies, co-operative societies, recreational and cultural facilities, number of commercial and co-operative banks The number of gram panchayats alongwith their constituent villages, notes on fertility mortality and migration, main religions, marital status and mother tongues etc based on 1991 Census are

provided in the form of separate annexure at the end of the book In 2001 District Census Handbook too, Part-A village directory will contain information about the name of the village, location code total area of the village, total population and number of households in the village, amenities like education, medical drinking water post and telegraphs, communications, number of banks commercial and co-operative banks, agricultural and non-agricultural credit societies, co-operative societies, recreational and cultural facilities, mode of transportation and communication, approach road, nearest town, power supply, availability of newspapers and most important articles, commodity manufactured This part also contains information about land use in the village forests, agriculture irrigational sources, culturable wastes etc Similarly, the town directory contains seven statements which would deal with area of the town, number of households, population, rate of growth of the town during the last nine decades density of population of the town, sex ratio, status of civic administration, its finances and other socio-cultural, educational, and developmental activities and the amenities that might have been undertaken or provided Part-B would contain the town/village wise Primary Census Abstract which includes information/ data about the total area of the village total number of households, population and its sex-wise break-up also the break-up of Scheduled Castes and Scheduled Tribes, literacy The break-up of the working population by sex into four industrial categories viz (i) cultivators, (ii) agricultural labourers, (iii) workers in household industries, and (iv) other workers Apart from the aforesaid data, the Primary Census Abstract will contain the data on the marginal workers and non-workers also

It would be pertinent to mention here that the sources of information for the town and the village directory have been mainly the heads of urban bodies and the revenue agency supplemented by the concerned departments The information so collected from the various sources have been thoroughly scrutinized so as to ensure its authenticity It is hoped that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by scholars and planners alike A number of new tables based on P C A are also included and an effort has been made to correlate the data with the geography of the district These endeavours should make the District Census Handbook definitely more useful than even before The village and town directory as also the primary census abstract included in this handbook should quench the thirst of the planners involved in micro level planning Similarly additional data revealing civic and other amenities in towns is oriented to minimum need programme Scholars and planners alike should benefit from the data on amenities by size of the town

(ii) Brief History of the District

Sirmaur district was formerly a princely state bearing the same name It remained princely state for several centuries and the extent did not change since the year 1833 down to the present day On its merger, after independence, the erstwhile Sirmaur state was reconstituted administratively into a separate district of Himachal Pradesh by the Government of India Ministry of States notification No 1858, dated 15th April 1948

As regards the origin of the name of Sirmaur, there are several theories though none of interpretations can be said perfect One view was that the state derived its name as a Siramur because of the senior position it held amongst the princely hill states Another theory is that at the earliest times, the state capital was at Sirmaur at a distance of 14 kms north-west of Paonta Sahib on the right bank of river Giri and the state was so called after the name of the capital Another version is that the state was founded by the Raja Rasaloo of Jaisalmer whose one of the ancestor's name was Sirmaur and he might have chosen the name from his ancestors

The early history of Sirmaur is mingled with legend In 1139 (1046 A D) Samvat, Madan Singh a Surajbansi Rajput was King of Sirmaur Sirmaur was his capital and the kingdom was known as Sirmaur or Silmur after it During Madan Singh's reign, a woman, expert in necromancy presented herself before the Raja and boasted of her skill of acrobat He was sceptical of her powers and challenged her to cross the Giri river between the Ioka and Poka ranges by means of an acrobat's rope called 'bharat in the tumbler's language promising her half of his kingdom if she crossed the river and

returned by this means She succeeded in crossing, and was returning on the rope when one of the Raja's officials treacherously cut the rope to prevent her claiming half the kingdom, and the woman fell into the river and was drowned This act of treachery resulted in a flood which swept away the town, and the Raja with all his kin perished The country was thus left without a ruler

In Samvat 1152 (1059 A D) Ugar Sain Rawal, of Jaisalmer, visited Hardwar, and there met Hoshang Rai Nath, a Bhat by caste, of Sirmaur, who sang his praises and invited him to assume the sovereignty of the kingdom The Rawal sent a force under his son Sobha Rawal to conquer Sirmaur Sobha subdued the country, and made Rajban his capital taking the title of Subhans Parkash His rule lasted only four years, and he died in Samvat 1156 (1099 A D) Ever since the title Parkash continued to be suffixed with the names of the descendants of Sobha Rawal who rulled over Sirmaur state till the lapse of paramounting in 1947 His successors are shown in the following list

Samvat	Head Office List/ Name of Raja	A D	Length of Reign in Years	Mahant's List
1	2	3	4	5
1152-1156	Subhans Parkash	1095-1099	4	
1156-1159	Salvahan Parkash	1099-1102	3	
1159-1165	Balak Chand Parkash	1102-1108	6	18

1968-1990	Amar Parkash	1911-1933	22	22
1990	Rajandar Parkash The Ruling Maharaha	1933		

The earliest mention of Sirmaur by the Mohammadan historians occurs in the Taba-quat-i-Nasiri under the year 634 H , when the Nizam-ul-Mulk, Mohammad Junaidi, who had rebelled against the Sultana Raziyya, the daughter of Altamas, took refuge in the hills of Sirmaur-Bardari, where he died

The chronicles of the State do not mention the events of 655-H , when Qutlugh Khan in his retreat form Hindustan to Lahore sought a refuge in Santurgarh and the Hindu Chief's afforded him an asylum There upon Mahmud Shah I attacked Santu and Ulugh-Khan-Azam penetrated as far as the fort and territory of Silmur and devastated the Kohi-Silmur of hill tract of Sirmaur The fort and territory of Sirmaur were then apparently in possession of that great Rai, Rana Ranpal of Santur, and he fled before the Mohammadans who plundered the market place and town of Sirmaur The historian observes that before this time no Mohammadan army had ever penetrated this territory

In the year 781 H , the Sultan Firoz Shah III made a progress through Ambala and entered the hills of Saharanpur After taking tribute from the Rais of Sirmaur and other hill States he returned to Delhi

The Raja Malhi Parkash (1108 to 1117 A D) was a good ruler, religious and charitable He wrested the fort of Malda from the Raja of Srinagar in Garhwal His descendant Raja Udit Parkash shifted his capital from Rajban to Kalsi in Dehra Dun, and abdicated his throne in favour of his son Raja Somer Parkash captured the fort of Ratesh, now in Keonthal, and made it his capital, but Suraj Parkash returned to Kalsi, where his subjects rose in revolt and attacked his palace, which was vigorously defended by his daughter, who fell in the struggle Upon this, Suraj Parkash hastened from Kalsi and subdued the rebels and also overcame the Thakurs of Jubbal, Balsan, Kumharsain Ghond, Sahri Theog, Rawain and Kotgarh, making them pay tribute, and appointing his brother Kalyan Chand as their incharge Kalsi continued to be the capital of the State Raja Birbal Parkash abdicated the throne in order to devote himself to a religious life Under Raja Jagat Parkash, the Thakurs of Jubbal, Balsan, Kumharsain, Sahri, Rawain and other chiefs revolted, owing to the Raja's mal-administration, but Bir Parkash, an energetic ruler, reduced them to obedience, and built the fort of Hatkoti on the boundary of Sahri, Rawain and Jubbal Jagat Parkash made Neri his capital, but during the times of subsequent rulers, the capital of the state shuttled between Neri, Garbh Kot and Gajari (Gargah) in Ratesh pargana, they so continued until Budh Parkash moved to Kalsi again Karam Parkash founded Nahan who ruled the state from 1616 to 1630 A D In 1678 Samvat (1621 A D) this gallant Chief became the spiritual disciple to Bawa Banwari Das, whose descendants still hold the temple of Jagannath at Nahan In the 8th year of the reign of Shah Jahan, Nijabat Khan, faujdar of the country at the foot of the Kangra hills, offered to conquer Srinagar in Gharwal, and asked for 2,000 horses to effect this

objective The request was accepted by providing horses and army Nijabat Khan accompanied by the army of the Raja of Sirmaur, marched to Srinagar On the way he took the fort of Shergar, which had been erected by the Zamindar of Srinagar on the bank of Yamuna in his own territory He also took the fort of Kalsi and made it over to the Zamindar of Sirmaur, its rightful owner, who complained that the fort of Bairat had also been wrested from him by the Zamindar of Srinagar, and declared that if forces were given to him he could recover it Troops were accordingly given to him, and the fort was taken and made over to him Nijabat Khan then marched on, took Santur and entrusted it to Jagtu, the Zamindar of Lakhanpur

Nijabat Khan's troops met with disaster in his invasion of Garhwal He lost his position of mansab and jagir, which were bestowed upon Mirza Khan, son of Shah Nawaz Khan and grandson of Abdu-ur-rahim Khan, who became faujdar in his place

Raja Mandhata was a contemporary of the emperor Shah Jahan, who by a farman, dated 28th Jamat-us-sani 1064 H , advised the Raja that he has deputed Iraj Khan Faujdar of Jammu and Kangra to conquer Srinagar in Garhwal and invited the Raja and the Zamindars of the hills to assist, promising that the adjacent territories of Kamaun would be conferred upon the Zamindars of that country, and those adjacent to his own dominions upon the Raja in addition to his own possessions, while the Dehra Dun was to be added to the imperial dominions By a second farman of dated the 24th Moharram 1065 H , Khalil-ullah Khan was nominated commander, vice Bairam Khan, 10,000 troops being placed under his command Srinagar was conquered in the reign of Subhag Parkash, who, in recognition of his services received a farman, dated the 11th of Rabu-us-Sani, 1065 H , confirming the promised grant of territory and granting the Raja whatsoever Khalil-ullah might propose in his favour In consequence by an imperial farman, dated the 22nd of Jamad-ul-Awal, 1065 H , the Raja was granted the illaqa of Kotaha, and the Raja accordingly expelled the Zamindar of Kotaha and annexed that territory Before his accession in 1068 H , Alamgir sent the Raja a farman, through Prince Mohammad Sultan, to notify his resumptions of power This farman bears the seal of Alamgir as prince, not as emperor

Raja, Subhag Parkash, was a good administrator, and improved and encouraged agriculture This led the emperor Alamgir to confer upon him in the third year of his reign, the illaqa of Kalakhar by farman, on the ground that its Zamindars had mismanaged it This was modern illaqa of Kolagadh, which lies near Dehra Dun, and is still held by the State in proprietorship

Raja Subhag Parkash left two sons Behari Mal and Hari Singh, of whom the former succeeded him under the title of Budh or Bidhi Chand Parkash receiving a farman, dated 10th Safar (1078H) in the 10th year of the reign of Alamgir in which that emperor recognized his succession By a farman, dated the last day of Safar in the 17th year of Alamgir's reign (1085 H), the Raja was required to expel Suraj Chand, a son of the late Zamindar who had usurped the Pinjaur pargana, which formed part of the estate of Nawab Fida Khan, the emperor's foster-brother This farman was duly executed by the Raja, who took possession of Pinjaur, Sahwana, and the forts of Jagatgarh and Muzaffargarh, now in the Ambala District The farmans addressed to Suraj Chand appear to have been taken in these operations, and these are preserved in the State archives In 1098 H , the Raja represented to the Emperor that the Raja of Srinagar had seized some of his paraganas, and the Emperor accordingly dispatched force to aid him in recovering them In consequence, the Raja of Srinagar surrendered the fort of Bairath Kalsi to Raja Budh Parkash In 1100 H , the Raja received a farman acknowledging his letter of thanks and directing him not to interfere with the Raja of Srinagar in future The Raja also carried on a curiously interesting correspondence with the Begam Jahan Ara to whom he used to sent musk, wild pomegranates and game, receiving valuable Khillats in return The Begum's fondness for jungle fowl and pheasant is expressed in her letters Ice or snow was also sent to her, being stored at the foot of the hills in ice-pits, and which was sent to Delhi in the hot weather The Begum once complained of its bad quality, and in reply, the Raja told that her darogha (steward) was careless and omitted to pay the labourers honestly whereupon the Begum warned the darogha

Jog Raj, son of Budh Parkash, succeeded his father under the title of Mat or Medni Parkash, receiving recognition and a khillat from the mughal Emperor and ruled between 1684 to 1701 A D In his reign Guru Govind Singh came to Paonta Sahib in this State, and made it as his residence

The Guru resided in Anandpur, and then in the Kahlur State, but on refusing to surrender an elephant to Raja Bhim Chand and Hari Chand of Bilaspur he was compelled by them to quit that place and went to Toka Then he was brought to Nahan by the Raja, Mat Parkash, and from there he proceeded to Paonta Sahib Meanwhile the Raja of Kahlur had gone to Srinagar to celebrate the marriage of his son with the daughter of Fateh Shah Raja of Srinagar found that the Guru had sent wedding presents to Raja Fateh Shah He compelled the latter to return these presents, as the Guru was his enemy Upon this, the Guru was made ready for war and Hari Chand with Fateh Shah advanced to attack him The opposing forces met at Bhangani on the Jumna, and the Guru was completely victorious, both Fateh Shah and Hari Chand were killed The Ranis of both the fallen leaders became sati, and their eight tombs are still at Bhangani The Guru pitched his flag of victory here also, and a Gurudwara still marks the spot Mat Parkash died childless in 1761 Samvat Hari Parkash, the second son of Budh Parkash, now ascended the throne, being recognized by the farman, of Alamgir, dated the 2nd of Rabu-ul-Akhir, 1115H He ruled for eight years which ended in 1769 Samvat, and he was succeeded by his son Bija Parkash a title which he chose in preference to that of Bhim Parkash suggested to him by the Emperor Bahadur Shah He was succeeded in 1793 Samvat, by Partap Parkash, whose weak rule caused his feudatories to rebel His eldest son and successor, Kirat Parkash, effected great reforms He was victorious over the Raja of Srinagar, and after routing him turned his arms against the Sikhs, taking Naraingarh, Rampur, Thanadhar, Ramgarh, Morni, Pinjaur and Jagatgarh Having consolidated his power and secured internal peace, he entered in to an alliance with Raja Amar Singh of Patiala, and recovered Saifabad from him Again, when Ghulam Quadir Khan, Rohilla, invaded Kahlur, Kirat Parkash sent an army to its assistance, and he led his forces in person to aid the Garhwal Raja against the Gurkhas In this campaign, however, his ally abandoned the field, leaving the Sirmaur forces without provisions, but Kirat Parkash was, nevertheless, able to make headway against the Gurkhas single-handed, and concluded with them a treaty which fixed the Ganges as the boundary between their kingdoms Unhappily the Raja died suddenly on the return march at Lakarghat in Samvat 1827

He was succeeded by his sons Jagat Parkash and Dharam Parkash The latter's reign was an eventful one Raja Ram Singh of Nalagarh encroached on the lands of his tributaries, and Dharam Parkash marching against him made the Rana Jagat Chand of Bhagal prisoner and halted at Pinjaur where he levied the tribute due from his feudatories There he received intelligence that Kanwar Prakram Shah of Srinagar had seized the fort of Khushalpur near Dehra Dun, and dispatched an army under Kanwar Isri Singh to recover it This was affected after a pitched battle in which Prakram Shah was wounded

About this time Sansar Chand Katoch, the Raja of Kangra invaded the dominions of Maha Chand of Kahlur and took possession of his strongholds north of the Satluj Maha Chand there upon sent men to Dharam Parkash to solicit help promising to pay him one lakh of rupees as nazrana, and Dharam Parkash accordingly marched at the head of his own troops and those of Kahlur with his Thakuar allies and Ram Singh of Hindur, to Chararatu on the north bank of the Satluj and on the boundary of the Katoch territory In the engagement, which ensued, he met Sansar Chand in single combat and fell by his hand This event occurred in 1850 Samvat

Dharam Parkash left no issue and was succeeded by his brother Karam Parkash, whose indolence and inexperience were disastrous to the State The most influential of Dharam Parkash's officials, Ajib Singh, Prem Singh and Kishen Singh, conspired with Kanwar Ratan Singh, the Raja's brother, whom they desired to place on the throne They besieged the Raja at Kangra, a fort, now in ruins, in the Dun, some 32 miles from Nahan In the fighting that ensued one Cholu Mian, who closely resembled Karam Parkash in appearance was killed and the rumour spread that

the Raja had been slain Taking advantage of this, the Raja managed to escape with his family from the fort and reached Tanoru, when, aided by Jhanju headman, he fled to Kalsi Ratan Parkash then seized the throne, but Karam Parkash appealed to Kaji Ranjor Thapa, the Gurkha chief, for aid promising to acquiesce in the Gurkha's seizure of the Dehra Dun, though it lay west of the Ganges The Gurkhas promptly seized the opportunity and invaded Sirmaur, expelled Ratan Parkash and established their own government, leaving Karam Parkash in no better position than before The officials of Kotaha, Ramgarh, Laharpur, Morni, Pinjaur, Jagatgarh and other places threw off their allegiance to the State and these chiefs were thus lost to it for ever Kanwar Gopal Singh, the heir-apparent, died about this time, but the Goler Rani bore three sons, named Fateh Parkash, Man Singh and Jai Singh to the Raja, and thus saved his line from extinction The Raja was at this period a refugee in Subathu in the ilaqa of Ramgarh, which had been granted for faithfull service to Khushal Singh, but his sons Maldeo and Narain wazir, Mauji Ram Mahta, were compelled to seek an asylum at Buria The Goler Rani, a wise and courageous woman now took upon herself the direction of the Raja's affairs and appealed to Colonel Ochterlony, then political agent at Ludhiana

This appeal coincided with the British declaration of war against the Gurkhas, and a force advanced to recover Nahan from them Having driven the enemy out of Kalingar fort in the Dun, the British encamped at Nahan, while Kaji Ranjor Thapa shut himelf up in Jaitak, a fort which stood on a lofty peak, seven miles from Nahan On the 7th December 1814, the British attacked this strong hold The Gurkha evacuated, but fell suddenly upon the British troops exhausted and disorganized by the difficulties of the ascent The result was a severe reverse for the British, whose loss was heavy Jaitak held out for four months until Kaji Ranjor evacuated it in pursuance of the treaty entered into by the Nepal Government with the British in 1815

Sirmaur was in the same year restored to its ancient rulers, but Karam Parkash was not reinstated, the sanad being granted to his son Fateh Parkash and the Goler Rani being appointed regent during his minority The pargana of Jaunsar with the forts of Morni, Jagatgarh, and the Kiarda Dun were, however, retained by the British Government, and that of Hanro Gurchari made over to Keonthal

Karam Parkash continued to reside at Buria till his death in 1826 He had four daughters, one married to Sukhdarshan Shah of Garhwal, two to Raja Bije Chand of Nalagarh and the fourth to Raja Kharak Chand of Bilaspur The proposed marriage of Raja Fateh Parkash with a daughter of the Raja of Garhwal was not carried out as the expense would have been too great, and General Ochterlony had stopped the levy of the phanti-biahlari or benefice, levy to meet the cost of marrying the Raja's children Under the Goler Rani's regency the affairs of the State were not well administered, owing to the self-seeking apathy of the officials, but Mian Devi Singh and Dalip Singh, sons of the Mian Khushal Singh and Ram Deo of Ramgarh executed a deed of allegiance in 1823, thus attaching of Ramgarh firmly to the State In 1827 Fateh Parkash was vested with full powers under a proclamation of General Ochterlony, and in 1838 the Kiarda Dun was restored to him on payment of Rs 50,000

Raja Fateh Parkash died in Jeth, Samvat 1907, after a reign of thirty-five years He was an able administrator He was succeeded by his elder son Raja Raghbir Parkash Raja Raghbir Parkash left three sons, of whom the youngest Kanwar Devi Singh (an illegitimate son)became an Extra Assistant Conservator of Forests, and two daughters of whom the younger was the mother of Major Raja Jai Chand of Lambagraon

The next Raja, Shamsher Parkash, inaugurated a new era in the State During his minority the administration was carried on by the State officials He was married to a daughter of the Raja of Keonthal, a lady of great beauty and ability, who used to conduct the judicial and administrative business of the State in his absence On her death, he abandoned the palace, making the Shamsher Villa, which he had built his residence In her memory he laid out the garden known as the Rani Tal Bagh at Nahan

Raja Shamsher Parkash's policy was to modernize the administration of the State He toured incognition

throughout India, making himself minutely acquainted with the administration of public offices He established regular police, judicial and revenue courts, a district board and a public works department, and gave Nahan a municipality Dispensaries, schools and post-offices were opened and an attempt made to develop the iron mine at Chehta, but this proving unremunerative he established the foundry at Nahan where the well-known equipments and tools were manufactured His greatest achievement, however, was the colonization of the Kiarda Dun, hitherto a wild and densely forested tract The land revenue of the State was also settled and properietary right conferred on the zamindars The forests were preserved and became a sources of revenue

Raja Shamsher Parkash received a khillat for services rendered in 1857 In Lord Lytton's Viceroyalty he was oppointed a member of the Imperial Legislative Council He received the K C S I in 1876 and the GC S I in 1886, his salute was raised to 13 guns as a personal distinction He was also accorded the honour of a return visit from the Viceroy In 1896 the State was removed from the political control of the Superintendent, Simla, Hill States, and placed under that of the Commissioner of Delhi

After a reign of forty-two years, during the last three of which he suffered from ill health induced by his strenuous devotion to his State, Raja Shamsher Parkash died in October 1898 Raja Surendra Bikram Parkash, who was installed by Sir Mackworth Young on October 27th of that year, succeeded him The Raja had been carefully educated in the late Raja's time Born in 1867, he had been raised by degrees to the position of Muawan of the State and had married a daughter of the late Raja of Suket by whom he had one son Maharaja Amar Parkash and one daughter In 1901 the Raja received the K C S I and in 1902 he was appointed a member of the Imperial Legislative Council The Raja made a present of 20,000 lbs , of tea to the Government for the soldiers engaged in the South African War, and at later date he detailed his Sappers at Khushalgarh in Kohat Frontier where they were usefully employed for a period of one year in the extension of Railway He was a strict disciplinarian and effectively checked bribery and corruption by his personal vigilance Cleanliness and order were his watch-words and the reforms enunciated during Raja Shamsher Parkash's rule were polished during his time Accounts of his various reforms are found in the accounts of the Department concerned but out of many the inauguration of the Water Works and the installation of plague posts at the frontier are the most prominent After a reign of 12 ½ years Raja Sir Surendra Bikram Parkash died after about 3 months illness, at Mussoorie on 4th July,1911 His remains were taken to Hardwar where they were cremated with due solemnity, the British Government having shown their last homage by firing of 11 Guns at Dehra Dun, when the remains were entrained there for Hardwar

Maharaja Amar Parkash assumed the Gaddi on the death of his father in July, 1911 and was formally installed by Sir Louis Dane, Lt -Governor of the Punjab, on the 24th October,1911 He was educated by private tutors of ability and character under the personal supervision of his father and was trained in the administrative work during his father's life time He was married in 1910 to the eldest daughter of His Excellence Maharaja Deb Shamsher Jung Bahadur of Nepal, the Maharani who was distinguished for her high education, sharp intellect, polished manners and Charitable disposition He was blessed with one son and two daughters from the Maharani After this one of the Maharani's daughters Mahima Kumari Devi died in 1929 The Mahima Library which owes its origin to the munificence of the Maharani, was constructed in 1930 and stands as a memorial after her name

Maharaja Amar Parkash maintained the policy of the reforms introduced by his distinguished grandfather Anxious to promote the welfare and prosperity of his subjects and to keep his administration up to a high level, he practically accomplished what his predecessors had started and developed Out of the many qualities of head and heart of His Highness, his simple living, his great frankness, his punctuality, his hardworking nature and his love to do justice, between man and man rank uppermost The Maharajas's relations with the other ruling Chiefs were cordial and his loyalty to the British Crown was unrivalled

During the Great War, he offered his personal services together with all the resources of his State

to the British Government His smart little army 400 strong, of sappers and Miners was sent in 1914 to Mesopotamia to fight for the King Emperor They were besieged by the Turks at Kutal-amarah while fighting heroically for the Crown under Lieut F Mayao who was then Assistant Commander of the Forces A second corps was then organized and sent as a relief on active service As a reward for their good services many members of the Sirmaur Regiment received distinctions, Lieut F Mayo received M C and the rank of Captaincy in the British Army

The Supreme Government was not slow to appreciate his Highness service and honour after honour came to him in quick succession In 1915 the Maharaja received the distinction of K C S I in 1918 he was made a Lieut Col and was the recipient of the hereditary title of Maharaja, the distinction which places him uppermost in the long line of rulers of Sirmaur In 1921 he earned the title of K C I E , and in 1931 his salute was raised from 11 Gunds to 13 as a personal distinction

Of the many improvements and reforms introduced during the Maharaja's reign are the completion of the Surendra Water Works, Nahan, inaugurated by his father, the grant of free primary education throughout the State, the building of hostel for the students, the additions to the high school buildings, the inauguration of the Mahima Library and the metalling of Nahan Kala Amb road which was completed in the year 1927 One of the important events of his rule is the revision of the settlement completed in 1931 which had been overdue for more than 10 years and which has not only given the State a reliable and upto-date record of rights, but has increased the land revenue of the State by over 25 per cent On the 13th August 1933, Maharaja Amar Parkash breathed his last far from home in foreign land beyond the seas under tragic circumstances

Maharaja Rajendra Parkash, the last ruler was born on 11th January 1913 He has been educated at home under eminent private tutors and has had the advantage of having an educated and talented mother He was a great sportsman and was especially fond of Hockey, Polo, Cricket and Tennis He also received Military training in the State forces During his father's absence in Europe, His Highness worked with the Council of Administration and gained administrative experience On the demise of his father he succeeded to his ancestral Gaddi and was installed on the 22nd November, 1933, by the then Agent to Governor General

The Maharaja of Sirmaur ranked sixth among the Punjab Princes and was the senior of the Rajput Rulers of the Shimla Hills The most important aspect of his administration was the promulgation of Usurious Loans Act One of the most interesting activities during the reign of last ruler was the increased activity of the freedom fighters in the state in which Praja Mandal played the predominant role in mobilizing public opinion against the state and the British India Government, which ultimately culminated into state's succession to the Union of India and final merger in Himachal Pradesh The erstwhile princely state of Sirmaur as stated earlier was merged in Himachal Pradesh on 15th April 1948 and was accorded the status of the district There were four tehsils namely Pachhad, Renuka, Nahan and Paonta having 974 villages and Nahan Municipal Committee at the time of the formation of Sirmaur district and its district boundary remained unchanged till the date Nahan attained status of Municipal Committee since 1881 There was no change in number of tehsils during 1951 Census, but Paonta M C was formed in 1951 Census The number of tehsils and urban areas remained unchanged during 1961 Census 140 villages from Pachhad and 65 villages from Renuka tehsil were transferred to create Rajgarh and Shalai sub-tehsils respectively on 22nd June 1965 and Sarahan N A C was formed on 25th Feb , 1970 increasing the number of tehsils/sub-tehsils from four to six and urban areas from two to three in 1971 Census The number of villages decreased from 974 in 1961 to 967 in 1971 Census as three partly merged villages of Nahan M C and 2 partly merged villages of Paonta M C were fully merged in these urban areas and two villages owing to creation of Sarahan N A C There was no change in number of rural and urban components in 1981 Census except raising the status of Rajgarh and Shalai sub-tehsils to tehsils Four sub-tehsils and one Rajgarh N A C were created during 1991 Census resulting the increase in the number of tehsils/sub-tehsils from 6 in 1981 Census to 10 in 1991 Census and 3 urban areas to 4 towns 71 villages of Rajgarh were transferred to form Pajota sub-tehsil, 60 villages of Renuka and 14 villages of Nahan tehsils to form Dadahu sub-tehsil, 40

villages of Renuka tehsil to form Nohra sub-tehsil and 45 villages of Paonta Sahib tehsil to form Kamrau sub-tehsil There were 6 tehsils, 4 sub-tehsils and 2 Municipal Committees and 2 Notified Area Committees in the district during the 1991 Census

People · Population of Sirmaur district is predominantly Hindus and next come Mohammedans and third being the Sikhs There is a sprinkling of Jains and Christians in the district The people in the Trans-Giri region mostly have come from the neighbouring areas of Jubbal and Chopal In the case of the plains of Kiar-da-dun valley, some of them have migrated from plains of Punjab particularly from Ludhiana, Hoshiarpur and Patiala districts There is considerable population of Hindus and Mohammedans Gujjar in the district who attained the tribal status The Mohammedans Gujjars are believed to have come from Jammu in search of pastures to tend their cow/ buffalow herds Of the aforesaid population of Hindus, the Gaddis, Gorkhas and Gujjars are most mobile because in summer they shift to the higher ranges of Trans-Giri region and Shimla district and in winter they settle down to Kiar-da-dun valley and around Nahan Amongst the Hindus, the predominant castes are the Brahmins and Khas/Kanets The Brahmins are generally known as Bhatt who are mostly inhabited in Trans-Cis-Giri area In the Cis-Giri area, the Bhatts are of Saraswat and Gaur Sects The Gaur Brahmins claims their descent from Bengal though generally it is believed that they migrated from Ambala district towards the hills The Saraswat Brahmins claim their descent from the basins of Ganga and Mythical Saraswati rivers The Trans Giri Brahmins are called Pabuck and are mostly vegetarian The Bhatt Brahmins of Trans Giri area have mostly lost their original distinctiveness and they do not now hesitate in inter-marriage with Kanets and are mainly engaged in agriculture though in the past they were mainly engaged in narrating the genealogical dates in the history of the rulers

The Panwars, Tanwars, Kashyaps, Chauhans and Pandiars etc are the predominant classes of Rajput in the district They are inhabited in the Cis-Giri area and follow the Rajput customs of the Rajputana though originally there has been thin distinction between the Rajputs and Kanets now, they have become one through common customs, habits and marital relations The Scheduled Castes communities like Koli, Dumna, Chanal, Chamar, Lohar, Badhi etc are also inhabited mainly in Cis and Trans Giri area In Kiar-da-dun valley, Jats, Sainis, Labanas, Banjaras, Gujjars and Telis etc are inhabited who are also generally the migrants from the plains Sikh population also is predominantly inhabited in this valley

Dress : In Cis-Giri Tract and Nahan tehsil, the dress of the people is usually the same as in the plains In Trans Giri area, the traditional dress of men consisted of a white woollen unbuttoned coat called 'Lohiya', black woollen tight 'pyjama' and a woollen cap but the majority go without 'pyjama' wearing only a small loin cloth However, now a days they have switched over to the shirt and 'pyjama' instead of the woollen cap, Gandhi cap is more in use The women have now switched to 'salwar and 'kamiz' instead of 'lehenga' and 'kurti' which they used to wear in the past Similarly they are gradually changing over to 'dupatta' as the head gear instead do the traditional colourful triangular piece of cloth called 'dhattus' The 'dhattu' is however still being largely used and is copected to hold its own against 'dupatta' because of its economical and colourful value

Food and Drinks . Maize and wheat are the staple food of the people They also take rice occasionally In hot weather, they use maize sattus – maize grains parched before grinding People take three or four meals a day The morning meal is called 'Jathalru', the mid day one 'cheeli', and super 'bailu' 'Sattu' is eaten twice a day during the hot weather but it is used at all time in the Sain and Dharti illaqas where bread made of maize flour is eaten Butter milk and curds are always used Meat, fish, chicken and eggs are also taken 'Patande' is much liked in the hills which is practically the same as the 'mande' or 'pura' of the plains, but contains no sugar or salt, is prepared on festive occasions The practice of taking tea in the morning and evening is gaining

popularity Tobacco is smoked extensively in the shape of traditional 'hukkah', beedi and cigarettes Local made liquor, country liquor and Indian made foreign liquor is consumed by the men folks on ceremonial and festive occasions

House . The houses in Sirmaur generally in the lower area of Kiar-da-dun and Cis-Giri area is one storey and made of stone and mud In the Trans-Giri area, the houses are invariably of two or three storeyed made of stone and wood These are built of squared stones on a rectangular foundation, beams of deodars or some other timber being inserted after every foot or so to ensure strength In the Cis-Giri and Dun valley, the animal sheds are generally separate from the residence whereas in the Trans-Giri area the ground storey of the house is often used as cowshed and stocking of wood However, with the spread of education and improved Socio-economic conditions, people are shifting to R C C houses in the Cis and Dun valley area and to some extent in the Trans-Giri part of the district too In the towns as well as villages, the newly constructed buildings are very much similar in style and structural design to those being built in plains Even in the interior areas this trend is visible, although the majority of the local inhabitants are forced by the financial limitations to follow the traditional design of houses with minor modernization here and there

Furniture The household furniture consists of cots and mates of rice stalks or date palms Very few in the rural areas keep chairs, tables and modern item of furniture Bed steads are not used in Trans – Giri area as floor of the house is made of planed wooden planks However in Cis-Giri area, bed steads are commonly used Cloths are generally kept in the wooden chest in the hills and in trunks and boxes in the Cis-Giri area In the towns, the houses of well to do people are furnished with modern style furnitures, equipments and articles like carpets, 'durries', tables, chairs, sofa sets etc , while commoners may not have more than a couple of chairs and tables etc With the passage of time and modernization, the distinction is getting narrower and any well to do house anywhere in the district has modern furniture available in the house

Language . In the Trans-Giri area, the inhabitants use to speak Giri Pahari and in Cis-Giri area, they use to speak Sirmauri or what is popularly known as 'Dharthi' No authoritative research, of course, has been done nevertheless the Linguist Survey Report of India by G R Garierson in 1917 However, according to the classification of languages, made by the Linguistic Survey of India, Sirmauri has been shown as one of the several dialects under Western Pahari The Western Pahari has been classified as sub-group under Pahari Group Inner sub-branch of Indo-Aryan branch and Aryan sub-family under the broader Indo-European family of languages (Census of India 1961 Vol I India Part II-C(ii) Language Tables P(LXX) With the wide spread linking up of the communication in the entire district and the spread of education amongst the bulk of the masses in recent years, the predominant population of the district now can speak Hindi, Punjabi and Pahari in all over the district

(iii) Administrative set-up

Sirmaur district is located in Southern Himachal Pradesh micro region which forms part of Northern mountains regions of Himachal Pradesh Himalaya sub-region Sirmaur district is further divided into four sub-micro regions viz Upper Sirmaur forested region, Cis-Giri region, Sirmaur Shiwalik and Kiar-dun valley The district is comprised of three sub-divisions (Rajgarh, Nahan and Paonta Sahib) consisting of six tehsils and four sub-tehsils For the uniform and balanced development of the areas, the district is divided into six Community Development blocks (Pachhad, Nahan, Paonta Sahib, Sangrah, Shalai and Rajgarh) Rajgarh sub-division's jurisdiction extends over two tehsils of Rajgarh and Pachhad in addition to Rajgarh Nagar Panchayat Nahan sub-division is comprised of Renuka, Nahan tehsils and sub-tehsils of Nohra and Dadahu besides Nahan Municipal Council Sub-division of Paonta Sahib has 4 tehsils/ sub-tehsils of Shalai, Paonta Sahib, Kamrau and Ronhat and Paonta Sahib (M Cl)

For the administrative convenience, Deputy Commissioner is administrative head of the district and is assisted by Additional Deputy Commissioner and Assistant Commissioner in discharging the administrative and regulatory functions For maintainance of law and order, the district has a Superintendant of Police, Additional Superintendant of Police, Dy Superintendent of Police and judicial

officers such as a District Session Judge, Sr Sub-Judge-cum-C J M and Additional C J M Besides these Chief functionaries, each department of the state has its own district officers in the district to look after and coordinate developmental activities of their departments Sub-Divisional Magistrate is incharge of sub-division while at tehsil/sub-tehsil level, Tehsildar and Naib-Tehsildar, Office Kanungo and other officers are discharging regulatory and other functions Block Development Officer is incharge of C D block who process and finalise the development plans submitted by the Panchayats of block for the development of their area

The district has a total area of 2,825 sq kms and total number of 971 villages The area of the district remained unchanged as no jurisdictional changes at district level took place during 1991-2001 However, one new sub-tehsil Ronhat has been carved out during the decade 1991-2001 by transferring 22 village from Shalai tehsil while one urban area namely Sarahan (N A C) was denotified during this decade One sub-tehsil Pajota was carved out prior to 1991 Census by transferring 71 villages from Rajgarh tehsil, but creation of this sub-tehsil was challenged in the court of law and got stayed from the court which is not still vacated On account of this stay orders, all 71 villages which were transferred to create Pajota sub-tehsil have been treated as a part of Rajgarh tehsil during the 2001 Census Eight villages from Renuka tehsil have been transferred to Nohra sub-tehsil while its three villages were transferred to Shalai tehsil The statement given below indicates the jurisdictional changes which occurred at tehsil/ sub-tehsils level after 1991 Census i e in the number of villages, towns in each tehsil/sub-tehsils and also the reasons for variation in brief

Zila Prishad and Panchayat Samitis etc With a view to promote development of democratic institutions and to secure greater measure of participation of the people in development plans and in local and government affairs by decentralization of powers and functions, Zila Parishad and Samitis have been established in the districts of Himachal Pradesh in the year 1994 under the Himachal Pradesh Zila Parishad and Panchayat Samitis Act,1994 The jurisdictions of the Zila Parishad and the Panchayat Samities are co-terminus to the district and block boundaries excluding of Municipal towns and other notified urban areas

(iv) Physical features

Size and Location Sirmaur district falls in the south-eastern parts of Himachal Pradesh which constitutes a part of southern Himachal Pradesh of Himachal Pradesh Himalaya region The district is further sub-divided into four sub micro regions of Upper Sirmaur Forested Region, Cis-Giri Region, Sirmaur Shiwalik and Kiar-dun valley It lies between 30° 22' 30" and 31° 01' 20" north latitude and 77° 01' 12" and 77° 49' 40" east longitude Shimla district bounds it in the north, Solan district in the North-

West, state of Haryana in the west and south while state of Uttaranchal and Uttar Pradesh make its eastern boundary According to the Surveyor General of India, the district has total area of 2,825 km ^{2} which is 5 07 per cent of the total area of the state It ranks 8th position among districts in terms of area in the state It has a total number of 971 villages, of which 968 are inhabited

Physiography · The terrain of this district physiographically is predominantly mountainous with deep valleys lying between Shiwalik ranges of varying elevations between 358 metres and 3,544 metres above the mean sea level The Kiar-dun valley in Paonta Sahib tehsil is flat and fertile and remaining areas of this district are mostly rugged This district has many dhars/ranges and prominent among them are Chur Dhar or popularly known as Chur Chandani-ki-Dhar, Nohra Dhar, Haripur Dhar, Juni Dhar, Shalai Dhar, Kamrau Dhar etc All these Dhars/ranges are located in Trans Giri region of this district Sain Dhar and Dharati Dhar are other important Dhars, which are located in Cis-Giri region Chur Dhar attains maximum height of 3,544 metres in this region

The terrain of Upper Sirmaur Forested Region is very rugged and mountainous with elevation ranging from 518 metres to 3,544 metres above the mean sea level Among the mountain ranges/dhars, Chur Dhar is a prominent, which also forms boundary between Shimla and Sirmaur districts From this lofty mountain extends two ranges of which one in the north-west direction called Dhar Taproli Jadol and other Dhar Nohra in the south-east direction toward Haripur Fort from where it is again divided into two ranges, one of which runs towards to the Tons valley These ranges separate the district as well as region from Shimla district in the northern part Juni, Shalai and Kamrau Dhars are located in the eastern part of this region The Cis-Giri Region is rugged and undulating and contains generally fertile valleys of rivers/streams The elevation of this region generally varies between 622 metres and 2,278 metres above the mean sea level The main hill ranges in this region are Sain Dhar and Dharati Dhar Sain Dhar stretches parallel to the Giri river from north-west to south-east direction and terminates on left bank of the Giri river at Dadahu Dharti Dhar runs parallel to Sain Dhar and continues along the boundary of this region towards south-east, north-eastern part of this region is relatively higher in elevation The terrain of Sirmaur Shiwalik is undulating with altitude ranging from 355 metres to 1,442 metres above the mean sea level Important hill ranges in this region are Dharati Dhar and Kaluwala ki Dhar Dharati Dhar lies in northern part of this region and runs in north-west to south-east direction It attains maximum height of 1,442 metres on its western part and is densely covered by Chil forests while eastern part of this Dhar where the elevation rises upto 1,344 metres is covered by Sal forests Kaluwala ki Dhar is quite a low range at 631 metres It lies in western part and runs in south-easterly direction The Kiar-dun valley region spreads in southern and central parts of Paonta Sahib tehsil This valley is wider in the middle and becomes narrower in the corners Area adjoining the state of Haryana is hilly with the maximum height of 619 metres The remaining area of this valley is smooth, flat and fertile These areas have been cultivated extensively

Geology The greater part of the district lies on the rocks of tertiary age with beds belonging to the carboniferous system The geological structure of the district is composed of Shiwalik, Murree Series, Krol Series, Mandhali – Chand pur groups and Jutogh group The geology of Upper Sirmaur Forested region consists mainly of Jutogh group, Rampur, Banjar formations, Nagthat group, Shali – Deoban and Largi groups and Granites (unclassified) formations Small tracts of Krol Series, Shimla group and Shiwalik structure are also observed in this region The geology of Cis-Giri region is mainly formed of Murree Series, Krol Series and Balaini formations Small tracts of Subathu beds and Mandhali – Chandpur groups and Shimla group are also observed The geological structure of Sirmaur Shiwalik region is mainly of Shiwalik formation and contains huge deposites of lime stone The geology of Kiardun valley region is mainly composed of Shiwalik formations containing thick alluvium soil of brown and black colour The formations of the district generally belong to sub-Himalayan and Himalayan groups Sub-Himalayan group comprises of unmetamorphosed tertiary rocks and Himalayan group contains metamorphosed formation of pretertiary age ranging down to Archaeans

Drainage · The district is drained by a number of rivers, rivulets and streams Of these, river Giri is the biggest river in the district, which is tributary of river Yamuna The main rivers of the district are Giri, Bata, Yamuna, Tons, Ghagghar and Markanda Only Bata, Ghagghar and Markanda rivers rise in the district The Giri river takes south-easterly course and merges in Yamuna river at Bata Mandi Bata and Yamuna rivers flow south-westerly directions Tons river, a tributary of Yamuna river forms eastern boundary while Yamuna river forms its south-eastern boundary and they separate this district from Dehradun district of Uttaranchal Pradesh River Giri originates at Kupar Tibba in Jubbal tehsil of Shimla district and passes through the hills of Kotkhai and Theog of Shimla district and enters Sirmaur district at village Mariog from north side It flows almost in the middle of the district and merges with Yamuna river at Rampura Ghat Jalal river an important tributary of Giri river joins it on its right bank at Dadahu In the sub-micro region of Upper Sirmaur Forested region, the Nora river flows from west to east direction forming the boundary of Kamrau sub-tehsil and Shalai tehsil Tons river enters in this region in east at Kharkan and flows from north to south direction and ultimately merges with Yamuna river in south Tons river also forms its eastern boundary and separate it from Uttaranchal Pradesh Sainj river is a tributary of Tons river and joins it in this region Giri river and its tributary Basari river form its north-western boundary and Giri river also makes its extreme southern boundary The Giri river, the life belt of Cis-Giri region enters in north-west at Nalsar Anoti and flows almost in the centre of this region and then towards south-easterly direction This river then leaves this region at Hiyon Nar and enters into Kamrau sub-tehsil The principal tributary of this river is Jalal river which originates in this region and flows between Sain Dhar and Dharati Dhar and ultimately merges in Giri river at Dadahu Other tributaries of Giri river are Pervi, Nait, Palor and Jagat Nals and they join the Giri river on its left bank while Kamali Nal meets it on its right bank Ghagghar river also originate in north-western part forming district boundary and flows in westerly direction It leaves the district as well as this region at Prit Nagar and enters into Haryana state The main river in Sirmaur Shiwalik region is Markanda which originates from the south-eastern part of Nahan tehsil and flows in south-westerly direction It forms its own valley named Markanda valley in this region which is flat and fertile It leaves this region at Kala Amb and enters into Haryana Bata river takes birth in this region and takes easterly course The Kiar-dun valley region is mainly drained by Bata river which enters this region in extreme west near Kolar and flows south-easterly direction before merging with Yamuna river at Bata Mandi Giri river and Yamuna river have their own valleys in this region Yamuna river enters the district as well as this region in extreme east at Majri Paharuwala, taking south-westerly course and leaves the district as well as this region at Behral which attains the minimum height of 358 metres Giri river which is a major tributary to Yamuna river meets it on its right bank at Rampur Ghat All these rivers provide irrigation facilities to this valley

Lakes The only lake in the district is at Renuka This is associated with Renuka Devi, mother of Lord Parshuram, an incarnation of God This sacred lake slumbers in picturesque surroundings in the northern area of Giri Par It is situated close to Dadahu mirroring in its still waters, the heavens and the mountain wilderness that surrounds it

Climate . The district possesses a variety of climate varying according to elevation Summer months are extremely and exceedingly hot in Kiar-dun valley and water is scarce The hilly areas have a temperate climate though Dharati range is hot The Trans Giri tract, Pajota and Sain are cool even in the hot weather In Trans Giri area, snow falls every winter while in Dharati it falls rarely The climate of upper Sirmaur forested region is cool in summer and cold in winters Maximum parts of this region receive snow fall in winter In upper area of Cis-Giri region, the climate is cold in winters and mild in summer while lower areas are hot in summer and cool in winter This region receives sufficient rain falls Though Sirmaur Shiwalik region contains hills of varying altitudes it has hot and moist climatic conditions The Kiar-dun valley region is exceedingly hot during summer months and has a considerable rainfall in this valley

The rainy season usually begins in the middle of June and lasts till the middle of September A shower or two are received in April and May The April and May rains may also bring hailstorms The snowfall

on higher ridges begin in December and lasts in March Chur Dhar remains snow claded for major part of the year During monsoon, rains are more active in the month of July and August About 80 per cent of the rainfall is received by the district during July and August months During the year 1999, the average rainfall was 1400 2 m m The cold season starts from December to about middle of March The hot season which follows lasts till the middle of June Upto middle of September is monsoon season and October and November constitutes the post monsoon season In cold, summer and post monsoon seasons, the air is dry particularly in the afternoon while during the monsoon season, the air is humid Skies are generally clear or lightly clouded except during monsoon season when they are heavily clouded to overcast Winds are light to moderate but during the monsoon season they become stronger In monsoon season, winds are from the directions between south-west to north-west, the westerly being more frequent In post monsoon season they are predominately from the north-east or east Easterlies and south easterlies are common in the cold season By the end of March, westerlies and north-westerlies appear and these predominate in summer

STATEMENT-A

STATEMENT SHOWING THE RAINFALL DATA IN SIRMAUR DISTRICT FOR THE PERIOD FROM 1994 TO 2000

Name of the district	Year	(Rainfall in M M)
1	2	3
Sirmaur	1994	1,536 7
	1995	1,845 5
	1996	1,919 5
	1997	1 583 8
	1998	1,671 1
	1999	1,394 4
	2000	1,217 6
District Average		**1,595 5**

Source Directorate of Land Records (statistical out line Himachal Pradesh 1997, 2000-2001 page 51 and 43

Soil and Cropping Pattern : The soil in the district varies from light sandy to heavy clay and in Paonta Sahib valley it ranges from sandy to sandy loam The soils are essentially derived from different rocks and climatic conditions which shows variation in texture and structure They vary from deep black soils in the river valleys to swallow muram red or grey in the hilly areas Reddish brown soils are found on hilly slopes and in undulating areas in heavy rainfall region of the district These are residual soils and are usually structureless and sandy loamy in texture Deep black soils occur particularly in areas having assured rainfall This is clayey texture and gramular to crumb structure These are fertile soils highly retentive of moisture and yield good crops Medium deep soils occur in the areas where the rainfall is low They are reddish brown in colour and have clayey texture and gramular in blocky structure Shallow soils are light brown to reddish brown in colour They are loamy sands to sandy clay in texture and usually structure less Deep soils occur in low rainfall areas They are dark brown in colour and have a sandy loamy texture and blocky structure

As classified by the N B S S & L U P (I C A R) Nagpur, the district has Udalfs and Udalfs Ochrepts types of soils cover in south and eastern parts and in remaining parts Ochrepts – Orthents soil cover The soils in Upper Sirmaur forested region are mainly categorized as Ochrepts Orthents type and Udalfs Ochrepts type found in eastern and southern parts The agro – climatic conditions are suitable for cultivation of apples, stone fruits as well as off season vegetable crops Cis – Giri region contains mainly Ochrept Orthents soil cover while soils of Udalfs type occur in eastern portion and Ochrepts Orthents type in western part of Sirmaur Shiwalik region This valley contains almost flat and fertile area and agriculture is the mainstay in this region Maize, wheat and paddy are main crops Ginger is main cash crop The geology of Kiar-dun valley region is mainly composed of Shiwalik formations containing thick alluvium soil of brown and black colour The soils are Udalfs and Udalfs - Ochrepts type Agriculture is the main occupation of the people in this region High quality of paddy, wheat and sugarcane are the main crops grown in this region on commercial scale The agro – climatic conditions are quite suitable for tropical and sub tropical fruits

Forest : Forests play a vital role in shaping the climatic conditions of the area The forests provide valuable timber, medicinal herbs, and raw materials for large and small scale industries, provide employment and also play a vital role in conserving the soil and ensure timely and sufficient rains The forests range between scrub, sal and bamboo forests of the low hills to the fur and alpine forests to the higher hills situated at higher elevations The area under forests in the district during the year 1999-2000 is 167,799 hectares Of these, 106,557 hectares are under reserved forests, 5,658 hectares as protected, 2,046 hectares unclassified and 55,538 hectares in categorized as other forests according to the State Forest Report of 1999(FSI) Moreover, there is an area of 426 hectares of forest land not under the control of forest department which are occupied by the institutions and households According to "Forests types of India and Burma" by H G Champion, the belt and patches of forests that can be recognized in the tract are Dry Shiwalik Sal, Moist Shiwalik Sal, Moist High Level Alluvial Sal, Sub Tropical Pine (Cuir Forests) Khair – Sissu Forests and Ban Oak Forests

Dry Shiwalik Sal is ill distributed and is met with all over the Shiwalik in sand and conglomerate out crops at an elevation of 1,000 to 2,500 feet Moist Shiwalik Sal also occurs mainly in Shiwaliks where the soil and moisture conditions are better This type is found at altitudinal range of 1,000 to 2,500 feet Moist high level alluvial Sal is found mainly on deep, rich and old soil of the Dun and is well represented by forests like Gorakhpur, Rajban Lamotua, Kukron and Bias Khair Sissu forests are found along all the big rivers like Yamuna and Giri on new sandy or alluvium soil Ban Oak forests occur at an elevation of 5,000 to 6,000 feet There is a wide overlap in sheter wood places with sal and in spurs with Chir at altitudes from 300 to 5,000 feet Chir pine forests are found on the Dharati ridge which runs parallel to the Sain Dhar in the south Chir pine by its nature forms almost pure forests of its own In shady places, low level Oak Casia fistula, Ano – grassius latifolla and other broad leaved species are found, though its universal associates are carrissa – spinarum and Adhatoda Vasica To the south of Chur Dhar, high level forest containing, Oaks, Firs, Yew, birch and blue pine form a belt of about 32 kilometres length and of width varying from 2 to 8 kilometres They provide some grazing pasture for the buffaloes of the right holders

Deodar forests mixed with Kail Oak and Chir pine are found to the south of the alpine forests and to the north of the Giri river Sain Dhar forests are situated between the Giri river in the north and the Jalal stream in the south The spur is generally denuded to the valuable forests and is covered with scrub jungle, chir pine being found in small patches The timbers mostly in demand are Sal, Sain, Chir, Sissu, Tun and Khair In Dharati ranges and the Cis-Giri area, Cheel and Pine forests are of great value for extraction of the resin The resin extracted from the cheel forests is supplied to the Himachal Resin and Turpendtine Factory, Nahan Other minor forests products are bhabbar grass, gum, hides, horns and Munj grass Forests need to be managed properly and scientifically in order to ensure proper ecological and environmental preservation and also to cater to economic needs of the people Various departmental programmes/schemes have been implemented for raising plantations thereby creating permanent assest Soil conservation measures have also been taken to arrest soil erosion in the catchment areas of the important river basins

STATEMENT-B

STATEMENT SHOWING THE CLASSIFICATION OF LAND UNDER FOREST (IN HECTARES) IN SIRMAUR DISTRICT DURING THE YEAR 1999-2000

Year	Reserved forest	Protected forest	Unclassified forest	Other forest	Total forest	Other forest*	Total forests

Source Conservator of Forest Nahan Statistical Abstract of Sirmaur

Flora The district possesses a variety of vegetation which represents both tropical and temperate species As the climate of Sirmaur derives its character from different elevations soils and flora varies with the conditions of the locality in which the various species thrive

The various species of the plants and trees are found upto the height of 3,400 metres in Sirmaur district as detailed below -

I Northern dry mixed deciduous forests contain the following type of species

(a) Botanical names of species

1	Anogeissus latifolia	14	Shorea robnsta
2	Flaconiritia remontchii	15	Dendro calamns strictus
3	Terminalia Chebnla	16	Carissaopacca
4	Syzyquum cuminii	17	Wood Fordia floribunola
5	Mallotus philippinesis	18	Murraya Koenigii
6	Lanea grandis	19	Adhatoda Vassica
7	Terminalia tomentosa	20	Colebrookia
8	Accacia catechu	21	Enphorbia royleans
9	Limonia acidissima	22	Bauhminia Vahilli
10	Dalberqia Sissu	23	Puerariatubevosa
11	Cassia fistula	24	Caesalinia Sepiaria
12	Qugeinia dalsergioides	25	Combretum decandorum
13	Aegle marmelos		

(b) Elevation Upto 1,250 metres

II. Lower or Siwalik Chil pine forests are founded upto 100 metres of elevation and comprised of following species of trees ·

(a)Botanical names of species

1	Pinus roxbuighic	7	Carissa opaca
2	Mauotus philippnensis	8	Rubus ellipticus
3	Pyrus pashia	9	Myrsine africana
4	Emblica offcinalis	10	Colebrookia oppositifolia
5	Acacia catechu	11	Murraya Koinigii
6	Terminalia tomentosa	12	Adhatoda Vassica

(b) Elevation Upto 100 metres

III Upper or Himalayan Chilpine forests

(Elevation from 1,200 to 2,800 metres)

Botanical names of species

1	Syzyginm cuminii	11	Pyrus pashia
2	Lanea grandis	12	Carissa opacca
3	Acer oblongum	13	Rubus nivens
4	Quercus glauca	14	Rhusperviflora
5	Qnercus incana	15	Flemingia Prostrata
6	Rhododendron arborium	16	Lannea grandis
7	Pieris oralifolia	17	Bauhinia variegata
8	Myrica nagi	18	Spinm insigne
9	Plectran thus rugosus	19	Euphorbia royleana
10	Meriandra strobilifaria		

IV Ban Oak forest (Qnercus incana)

(Elevation 1,800 metres to 2,300)

Botanical names of species

1	Rhododendron arborinm	8	Rubns nivens
2	Pieris ovalifolia	9	Desmodinm tilaefolenm
3	Litsea umbrosa	10	Barbris chitria
4	Myrica, nagi	11	Prinsepia utilis
5	Myrsine a fricana	12	Hedera helix
6	Boenna hansenia albiflora	13	Similax parvifolia
7	Indigofera geravdiana	14	Vitis trifolia

V. Moru oak forest (Qnercus dilatata)

(Elevation 1,800 to 2,500 metres)

Botanical names of species

1	Pinus smithiana	3	Qnercus incana
2	Qnercus dilatata	4	Pinus Wallichiana

VI. Moist deodar forest (Cedrus):

(Elevation 1,800 to 2,800 metres)

Botanical names of species

1	Qnercus incana	8	Rnbns nivens
2	Rhododendron arborinm	9	Prinsepia utilis
3	Lnnicera anqnstifolia	10	Hedera helix
4	Viburnum colonifolinm	11	Vitis parvifolia
5	Berberis chitria	12	Jasminum Offcinale
6	Daphne cannabina	13	Clematis Montana
7	Indigofera pnlchalla	14	Rosa moschatta

VII Western mixed conderons forests contain following species

(Elevation 2,400 to 3,000 metres)

Botanical names of species

1	Taxus Baccatta	10	Violaserpens
2	Qnevcus Semicarbifolia	11	Valeriana hardwikii
3	Qnevcus incana	12	Geranium walli chianum
4	Qnevcus diatata	13	Rubns niven
5	Viburnum nevvosum	14	Anislia aptera
6	Skimmia laureloa	15	Hadera nepalemsis
7	Deutzia corymbosa	16	Vitis species
8	Arundinaria falcate	17	Jasminum officinale
9	Fragaria vesica		

VIII Moist temperature deciduous forest are

(Elevation 1,800 to 2,780 metres)

	Botanical names of species		
1	Aesculus Indica	8	Qnevcus incana
2	Acer caesium	9	Viburnum foetens
3	Acer pictum	10	Rubus nivens
4	Betnla alnoides	11	Spiraea Sorbifolia
6	Juglans regi		
7	Qnevcus Semi Carnifolia		

IX Low level blue pipe forests are

(Elevation Upto 2,400 metres)

	Botanical names of species		
1	Qnercus incana	6	Berberis chitria
2	Qnercus dilatata	7	Desmodinm tiliaefolinm
3	Rhododendron arborinm	8	Myrsine Africana
4	Berbeeis lycinm	9	Prin Sepia ntilis
5	Rnbns nivens		

X Kharsn oak forest (Qnercus Semican pifolia)

(Elevation 2,500 to 3,300 metres)

	Botanical names of species		
1	Abies Pindrono	7	Sarcococca saligna
2	Picea Smythiana	8	Salix vaginata
3	Betula alnoides	9	Geraninm Wallichiana
4	Taxns laccata	10	Viola canescens
5	Viburnum foetens	11	Anemone rivularins
6	Coloneastev Lacillaris	12	Skimmia laureole

XI West Himalayan Upper Oak-fir forest

(Elevation 2,600 to 3,400 metres

	Botanical names of species		
1	Abies pindrono	5	Salix elegans
2	Qnercus Semicarpifolia	6	Skimmia lanreloa
3	Betula alnoides	7	Rumex nepalents
4	Rhododendron campanulatum	8	Lonieera angnstifolia

XII. Moist alpine scrub

	Botanical names of species		
1	Rhododendron anthopogon	4	Rosa Sericea
2	Salix flabeliaris	5	Ranunculus diffuses
3	Rotentilla argyrophylla	6	Anemone abtusiloba

XIII Dry deciduons scrub forest

Botanical names of species

1	Lanea grandis	5	Enphobia royleana
2	Acacia catechu	6	Sapinm insigne
3	Aegle marmelos	7	Wood fordia floribnnda
4	Carrissaopaca	8	Nyctanthes arbortristis

XIV Khair-Sissm forests upto 125 metres

(a) Botanical names of species

1	Zizyplnis jujube	3	Adhotada vasica
2	Mnrraya Koenigii		

XV. Himalayan Sub-tropical scrub forests

Botanical names of species

1	Sapinminsigne	3	Rhns parviflora
2	Enphorbia royleana	4	Carissa opacca

XVI Sub-tropical enphorbia scrub forests

(a) Botanical names of species

1 Enphorbia royleans

(b) (Elevation As is of chil forests)

XVII Oak-scrub forest

(a) Botanical names of species

1	Rhododendron arbroinm	3	Pyris paslna
2	Pieris oralifolia		

(b) (Elevation As is of oak forests)

XVIII Low level blue pine forests

(Elevation 1,500 to 2,400 metres)

Botanical names of species

1	Qnevcus incana	5	Desmodinm tiliaefolinm
2	Rhododendron arborinm	6	Prinsepia ntilis
3	Rnbus nivens	7	Myrsine Africana
4	Berberis lyceum	8	Viola

XIX Dwarf Rhododendron scrub forests

Botanical names of species

1	Rhododendron	3	Lonicera
2	Salix		

Fauna : Due to wide variations in the altitude a large variety of fauna is found in the forests of the district, though due to increased poaching and indiscriminate lopping of the forests, there is decrease of the fauna in the district, and some of the species are almost at the verge of extinction. The musk deer or Kastura is found in the highest altitude of Chur Peak in Pajota, Chursa and Nohra forests. So, also the black bear, which generally is found in the thick forests of deodar, fur and spurce on the elevation of 3,660 metres during summer and generally it, comes down to the valleys of the altitude of 1,525 metres during winter. It lives on the roots, corns of oaks, grain nuts and the bark of the trees and honey. Most omnipresent (commonly found) animal is porcupine, which is found almost in the entire district. This animal mostly feeds on the forest nurseries, walnut plant, chir and deodar. The Himalayan goat (Ghoral) is found from 900 to 2,700 metres elevation. It is a stocky goat like animal which is found in groups of 4 to 6 grazing on the hill side and in the forests. Another interesting animal is barking-deer (Kakar) which is found in the chir and ban forests of Sarahan, Rajgarh and Habban range. In the lower portion of Sarahan, Renuka, Jamta and Rajgarh ranges, pigs are found which generally live on the crop roots, rubber, insects and snakes etc. They cause a considerable damage to the crops. The pigs are generally found in the herds of 2 to 15 or even more. Monkeys of Rhesus, Maigna and Langoors are quite common in the entire district.

In the Habban, Rajgarh and Sarahan ranges, plenty of beautiful birds like monal are available. The koklas are found in the deodar and some time in the fir forests and prefer a moist wooded forests with under growth. They are commonly found in the parts of Habban, Rajgarh, Nohra and Sangrah ranges. The black partridge are found upto 1,800 metres elevation and frequent in the grassy and scrub peaks. The hill partridge is found beyond chir forests mostly in ban and oak forests and occasionally in deodar forests. Chakor is an another specie of the pigeon group which is found generally between 1,500 to 3,000 metres elevation in Rajgarh, Sangrah and Shalai ranges.

Minerals and Mining : The district covering an area of 2,825 sq.kms. is fairly rich in mineral wealth. The important minerals found are limestone, gypsum and barytes. These are being used by local industries as well as the sugar and paper industries of the adjoining states. The approximately 4,500 hectares of land has been leased out in the disrict to exploit the mineral resources of the district. 1,437,135 M.T. of limestone, 108,225 M.T. Bajri and sand each, 78,450 M.T. of Bolder (stone), 35,721 M.T. of sand stone, 1,095 M.T. of barytes and 833 M.T. of soil mud (silt) have been extracted in the district during the year 1999-2000. An account of the main minerals found in the district are given as below:-

(i) Lime Stone : Huge deposits of limestone varying from cement grade to chemical grade occur at Sataun, Manal, Hyona to Kamrau, Tilor Dhar to Lalag, Paonta Sahib to Bharli, Barthal, Kanor, Borli, Sangrah, Nohra and Bhangri. Its total reserves are of the order of 200 million tonnes. To exploit the mineral wealth of the district, a CCI cement plant at Rajban with a capacity of 600 metric tonnes per day and eight mini cement plants in private sector have been set up. The limestone produced is used in the manufacture of cement, ordinary lime, hydrated lime and in sugar and paper industries.

(ii) Barytes : Barytes occur in the pockets at Kandi Mashwa, Tatyana and Ashnong. Three mines have been sanctioned for its production and it is mostly used in the paint industry. The mineral is white in colour and fine grained. It is associated with Krol limestone, dolomite, crystalline dolomite and calcite at these places.

(iii) Gypsum : Deposites of gypsum occur at Bharli and Korga, though at present the Bharli deposit is being exploited. Only one mine has been sanctioned for its production and recently the Korga deposit has also been applied for lease. It is used by the cement factory at Rajban.

(iv) Copper : Malachite (copper carbonate) stains are noted at the function of Blaini boulder bed and subathus in a nala cast of Sataun village.

V Iron-Pyrites · Occurrences of pyrite are recorded in the form of lenses and veins in the limestone and slates at Sayash and Diyandon

VI Mica . Some traces of mica are available near the Chur Dhar at village Chhog Tali In village Jogar of Renuka on the hill of Baira, mica mixed Clay is found which suggests the existence of some mica there On the southern slopes of the Chur mountains, there are several places like Kanda and Kaura, Baleri, Tango, Chur etc where pegmatites are seen enclosing variable sizes of blocks of muscovite of somewhat greenish tint Along with it tourmaline also occurs in abundance in crystals of variable sizes

VII Slates At village Siyun and Balara situated in Renuka, there are slate quarries exploited by local inhabitants and the slates used to cover the roofs of their houses

STATEMENT - C
STATEMENT SHOWING MINERALS AND MINING PRODUCE AND ITS VALUE (QUANTITY IN M T AND VALUE IN RUPEES) DISTRICT DURING THE YEAR 1999-2000

Serial number	Mineral and Mining produce	Quantity (in Metric Tonnes)	Value (Rupees per M T)
1	2	3	4
1	Lime Stone	1,437,135	130 00
2	Bajri	108,225	30 00
3	Sand	108,225	30 00
4	Stone (Bolder)	78,450	30 00
5	Sand stone	35,721	40 00
6	Barytes	1,095	175 00
7	Shell (Mud)	833	30 00

Source District Statistical Abstract, Sirmaur -2001

Land and land use patterns, tenancy There were three kinds of land tenures system prevalent in the district These were Zamindari, Pattidari and Bhaichara Zamindari system of land tenures was those that were either owned by a single proprietor or jointly by more than one Pattadari were those in which each proprietor owns not the particular fields which he cultivates, but a specific ancestral share in the whole estate In Bhaichara system of land tenure, every man was the owner of only as much land as is in his possession or as it is commonly put, possession is the measure of rights in such system Zamindari system no longer exists in the district

Most of the district is spread over in deep valleys and high elevations and cultivation is possible only in small holdings in the deep valleys or in the river basins The rest of the land is either covered under shrubs or alpine trees, small nallahs, rivelets and waste land It is the only Kiar-da-dun valley where land is flat and fertile With the promulgation of Himachal Pradesh Tenancy and Land Reforms Act in 1972 the majority of the tenants have acquired proprietary rights Prior to the introduction of this act, Himachal Pradesh abolition of Big Landed Estates and Land Reforms Act, 1963 was in force in the district The local terminology for the tenancy was known as galla/ batai where the tenant was required to pay a fixed share of one fourth of the grains or equivalent in cash

In order to do away with the uneconomical holdings, the state government took certain steps for the consolidation of the holdings under the consolidation and holding act and thus bulk of uneconomical holdings have been done away Still the small holdings comprise the major share because land holdings in hills are scattered and fragmented and comprised terraced fields in major part of the cultivated areas

Agriculture The district can be divided taken into three distinct regions from agriculture point of view One, the hilly parts of tehsils Pachhad, Rajgarh, Renuka and Paonta Sahib Two, Nahan Tehsil which can be divided in Dharthi range and valley of Nahan and Paonta Sahib Third, Kiar-da-dun valley In the high elevation, maize is the predominant crop Apart from this the ginger and turmeric are grown in summer Still in higher elevations, potato and wheat are grown The Kiar-da-dun valley is known for wheat and quality rice At one time poppy used to be grown in the district which has been banned by the government by law

Agriculture is the main stay of economy of the district and about eighty per cent of the population is mainly dependent on the agriculture Sirmaur district has about eighty five per cent small and marginal farmer families and the holdings are very small and

scattered. The yield of crops is below the norm. Major food crops are grouped in three categories namely cereals, pulses and other food crops like chillies, ginger, sugarcane and turmeric. Non food crops are of two kinds viz. oil seeds and other crops such as cotton, tobacco and fodder etc. During the decade 1991-2001, the agriculture production of various crops has increased two to three folds. Maize, potato and off season vegetable crops have become popular in the district. With a view to increase the production of wheat, maize, paddy, gram, lentil, sugarcane, soyabean, sunflower, toria, til etc., their high yielding varieties have been introduced in the district. The cultivation of vegetables like peas, tomato, cabbage, cauliflower and potato has become more popular in the district. Improved varities of peas, tomato and potato have been introduced. Besides, various schemes have been taken up for insect and pest control. The district has earned a name for itself as producer and supplier of ginger.

In order to encourage the cultivation of sugarcane in the district, the state government has started a Khandsari plant at Paonta Sahib so as to provide market for the sugarcane product and also regulated marketing committee which was established at Paonta Sahib in 1973 to ensure fair return to the cultivators. There are five seed Multiplication Farms at Bhagani and Daula Kuan in Paonta Sahib block, Bagpashog in Pachhad block, Andheti in Sangrah block and Hubi in Nahan block. There are two Potato Development Station at Khwagadhar and Thiambagh in Pachhad and Renuka blocks respectively. The total area sown in the district during the year 1999-2000 is 77,464 hectares. The net are sown is 41,626 hectares constituting 53.73 per cent of the total area sown in the district. Another 35,835 hectares are sown by more than one time. There is 14,405 hectares of land, which were irrigated during the year 1999-2000. The production of wheat during 1999-2000 has been 45,739 metric tonnes, maize (77,137 M.T.), rice (8,199 M.T.), barley (2,916 M.T.), millets and ragi (251 and 317 M.T. respectively), pulses (2,343 M.T.) Potato (24,298 M.T.), sugarcane (44,990 M.T.), ginger (1,842 M.T.), chillies (125 M.T.) and 345 metric tonnes of edible oil seeds like til, toria and mustard.

Horticulture : The topography and agro-climatic condition of the district are quite suitable for the raising of the various fruits. The topography of the district can be grouped into three categories namely high hill areas located at higher elevation, mid hill areas and low lying valley areas. Fruits of different varieties depending upon the terrain, climatic conditions and soil, ranging from apples in the higher slope areas to mango, lichi, mandarins, sweets oranges, lime, lemon and guava in the lower hill and valley areas are grown

in the district Some fruits like almond and walnut are grown in the mid hill areas Apple cultivation has made tremendous progress during the last four decades The Rajgarh tehsil has acquired a dominating position not only in the district but in whole of the state for growing different varieties of apples like royal, golden and delicious royal Plum is being grown in Rajgarh as well as in Pachhad tehsil, popular variety being cantra-roza and marri-roza Walnuts are grown all over the district and of late commercial varieties of walnuts have found great favour Paonta Sahib area grows Kagzi lemon which has been further propagated in lower areas of Nahan and Pachhad tehsils particularly Dun valley has taken up the cultivation of Kagzi lemon in a big way Orange cultivation has also not lagged behind and the popular variety being Kinnu The Dusehri and Langra varieties of mango has also found favour with the people in the valley Wherever there is no assured irrigational facilities in Nahan, Paonta Sahib and Ghinni areas of Pachhad, mango cultivation received a boost by resorting to inside method With a view to provide assured remuneration to the orchardists, three fruit canning units at Dhaula Kuan, Bagthan and Rajgarh have been set up by the government In addition, three privately run fruit processing units at Rajgarh, Sarahan and Paonta Sahib are also functioning

The area brought under fruit cultivation has increased to 15,249 hectares during the year 1999-2000 as compared to 12,732 hectares in 1991-92 An area of 3,839 hectares has been covered under apple cultivation, 5,161 hectares under other temperate fruits, 1,628 hectares under nuts and dry fruits, 1,651 hectares under sub-tropical fruits and 3,970 hectares under other fruits at the end of year 1999-2000 in the district The production of 1,010 M T of apple, 901 M T of other temperate fruits, 1,760 M T of nuts and dry fruits, 3 714 M T of sub-tropical fruits and 11,013 M T of other fruits has been recorded in district during 1999-2000 1,549 tonnes of apples packed in 83,730 crates have been exported from the district during the year 1999-2000 The horticulture department has initiated various measures like providing technical knowhow, subsidies loans horticultural inputs etc to the farmers so that the pace of horticultural activities does not slow down Bee keeping and mashroom plantations are also being encouraged because of favourable conditions for their growth in the district

Source District Statistical Abstract, Sirmaur

Animal Husbandry Livestock is the chief wealth next to agriculture only to the predominant population of the district Every house invariably keeps a few cows or buffaloes, sheep, goats, pigs and ponies The rearing of different animals and poultry is carried out on commercial lines by some people Besides rearing of animals by the individual households, a large number of sheep and goats etc are added to the existing stock of animals in the district which are brought by inhabitants of Kinnaur and Chamba districts during winter months when these districts become snowbound as provision of fodder becomes extremely difficult due to unfavourable weather In addition, Gujjars who mostly are migrants also bring large flocks of buffaloes and cows to the Dun valley and adjacent areas of Nahan during the winter months The livestock census shows that the growth of livestock is gradual and steady According to livestock census in 1966 there were 389,889 animals including mules and camels in the district This number according to 1982 and 1992 census rose to 410,276 and 437,668 respectively There were 40,059 buffaloes, 234,405 cows, 27,621 sheep, 115,892 goats, 2,310 pigs, 2,826 other animals and 34,287 poultry birds in the district according to 1992 cattle census

The improvement of breed livestock is the main concern of the department of animal husbandry in the district which indeed has taken a considerable stride in its improvement There were 26 veterinary hospital, 90 veterinary dispensaries, one mobile veterinary dispensary, five C V D and 18 other veterinary institutions functioning in the district as on 31 3 2000 There are as many as 12 artificial insemination centres in the district which provided insemination to 15,298 cows and 4,654 buffaloes in the year 1999-2000

Dairy In order to improve the over all standard of living of people, the Animal Husbandry Department has been focusing its attention on dairy milk in the district The dairy development activities in the district are being carried out on the line of Anand pattern of dairy co-operative which is an organization collectively owned operated controlled and managed by the primary milk producers by joining their hands for the procurement, processing and marketing milk for their own benefit, thus ensuring equitable distribution of all economic gains accruing there on In all, 29 Anand pattern co-operative societies have been formed under sub unit Nahan with a total membership of 2,600 The Himachal Pradesh Milk Federation is supplying

balanced cattle feed to the societies at a subsidized rate The Himachal Pradesh Milk Federation is also supplying mini kits of fodder seeds to its members free of cost

Poultry For the first time in December,1960, central poultry farm was established by the Animal Husbandry Department with a view to rear improved breed/strains of poultry birds and distributed these birds to the farmers of the district It is fast emerging as an important activity for enhancing nutrition and providing employment in the district One central poultry farm at Nahan and one poultry extension centre at Paonta Sahib is functioning in the district in addition to six poultry farms located at or around Nahan, Paonta Sahib, Kolar, Moginand, Sarahan and Rajgarh area Before the opening of the hatchery at Nahan, the farmers were solely dependent on hatcheries of the adjoining states of Punjab, Haryana and Union Territory of Chandigarh Training in poultry farming is also imparted at Nahan and Paonta Sahib

Fisheries The Sirmaur district has been extensively criss-crossed by the rivers and the streams and most of them having perennial water flow of considerable volume with the result, fishing in the rivers and the streams has been a pretty old activity in the district It is stated that the rivers Yamuna and Giri were known for their abundance of fish though, the other streams were also not far behind The fishing grounds in Yamuna river are Naoghat and Ganguwal in Paonta Sahib tehsil where Mullee, Mahseer and Gid varieties of fish are available Mirror carp was introduced in the pucca tank of Nahan for the first time in 1955 and it has spread considerably ever since With the result, Himachal Pradesh is one of the big suppliers of this fishes to the rest of the country This variety of fish has been extended to other districts also where the finger lines have been distributed

The major attempt for fishing activity in the district has been the management of riverine fisheries resources extending over 250 kms River/stream length of Yamuna river 35 kms , the Giri river 90 kms , the Bata river 30 kms and other rivulets and seasonal rivulets 100 kms through effective enforcement of legislation restricting fishing to the maximum sustained yield only The fishing in Renuka lake and certain areas in Yamuna river have been prohibited under the fishing act At the moment, around 700 to 800 fishermen have been subsisting their income by fishing During 1999-2000, there were 737 registered fishermen in the district who had estimated yield of 804 metric tonnes of fish of the value of about Rs 18,400,000/- The fisheries department had detected 94 offences of unauthorized fishing and received a sum of Rs 15,055/- as a fine from them during the year 1999-2000 There are about 50 hectares of water sheds seasonal and perennial scattered all over the district Some of the panchayats took up fish culture in about 15 hectares of water sheds, but due to lack of personal interest insignificant benefit has been derived so far However, with the multiplication of water supply schemes in the villages and construction of irrigation canals and channels and also adoption of policy by the government to subsidies pisci-culture by individuals to augment their earnings, the development of fisheries appears to be indeed brightening

Source District Statistical Abstract, Sirmaur-2001

Industries The district indeed has not much of industrial past and a few industries were introduced during the time of Raja Shamsher Singh, one of them is the Nahan Foundry Ltd which was set up for the first time in 1875 A D which has now been taken over by the Himachal Pradesh Government in 1964 The main items of the production of this factory are cane, crusher, cast iron and black sheets panes, flour mills, centrifugal mono blocks pump sets and other agricultural implements and accessories But this factory was running into losses due to old and abolete plant and machinery The state Govt decided to convert it into H P P W D & I P H state workshop and transferred all operational assets within factory premises to the said workshop in 1988 Resin and turpentine factory in Nahan is another oldest factory, which has its raw material from the extraction of chil trees, which are in abundance in the district This factory was opened in 1945 and come into operation from 1949 onwards The control and administration of the factory has been completely taken over by the State Government in 1957

The cement corporation of India has set up cement factory at Rajban with an installed capacity of 600 metric tonnes per day that has generated an employment to about 750 persons Other important factories being Himachal Mineral and Chemical, Paonta Sahib, Himachal Shoddy Mill Ltd , Paonta Sahib, Nahan Ceramics, Paonta Sahib, Farm Fresh Fruit Pvt Ltd , Bata Mandi, Paonta Sahib, Himachal Pradesh Surgical, Paonta Sahib, Govt Ayurvedic Pharmacy, Majra, Himachal Turpentine Products Ltd , Kala Amb, Himachal Mine Quartts, Bata Mandi There are numerous units in the district registered with the Industries Department which includes industries like saw mills, leather units, utensil repairs and making, weaving and atta chakkies etc

There were 24 large scale industrial units registered with the Industries Department with the capital investment of Rs 45,285 97 lacs and 4,608 industrial workers in these units as on 31 3 2001 Apart from these, 87 Small Scale Serviceable units were also functioning in the district with capital investment capacity of Rs 64 56 Lacs and 178 skilled workers During the year 2000-2001, as many as 1,199 small scale units were registered with capital investment of Rs 9,026 65 lacs and 6,449 workers In order to accelerate the pace of the industrialization, three growth centres/industrial areas namely Kala Amb Dhaula Kuan and Paonta Sahib have been set up in the district during the early nineties

To provide technical skill in industrialization amongst the youth, the government has started training institutions at various places so that the pace of industrialization can be accelerated in the district There are industrial tailoring institutes for girls at Nahan and other centers at Trilokpur, Paonta Sahib, Rajgarh, Badaur in Renuka and Bajon in Shalai and Baragat at Sangrah There is an Industrial Training Institute at Nahan which imparts training in various fields like fitter, turner, electrician, radio, T V, Mechanic, draughtsman etc The rural industrial training institutes at Paonta Sahib and other places have been transferred to Himachal Pradesh Village and Khadi Board The Government has set up sericulture centres farms at Dhaula Kuan, Devinagar, Katesan Devi, Parduni, Karonda Wali Ghatti, Sainwala and Puruwala The Government with the intention to popularize silk farming provide subsidy and loan to the individuals for rearing cocoon The traditional cottage industries indeed play their vital role in the rural economy which are ban making handloom weaving, basket making etc

Trade, Commerce and Banking The Sirmaur district has never been a great trading centre The trade and commerce is confined to the local requirements The chief centres of wholesale business are Nahan, Paonta Sahib, Dadahu and Sarahan, where the local cash agricultural products such as ginger, potato and sugarcane are exported The Dun valley is only surplus in producing the grains and exporting it to other places including interior parts of the district Exports of apples and stone fruits have also picked

up considerably during the decade The cement produced by the ACC Cement plant at Rajban is another item of export from the district

The goods produced by the local industries in small quantity are disposed for sale in various urban centres like Nahan, Poanta Sahib and the Himachal Emporium at Shimla also arranges sale of goods produced in the district by the small scale industries Most of items for the local consumption are imported to district from the other markets of plain areas In the mela days, lot of temporary shopping complexes are established where considerable transaction takes place in all important centres of the district

The first bank in Sirmaur called as Nahan National Bank was established in 1893 which later on was renamed as Bank of Sirmaur in 1944 The bank of Sirmaur was merged with Himachal Pradesh State Co-operative Bank Ltd in 1955 and the branches of the bank of Sirmaur in Sirmaur district likewise were made the branches of the Himachal Pradesh State Co-operative Bank At present the United Commercial Bank has been declared as lead bank in district, which acts as a laison between the public and the other banks on the one hand and between the government and the beneficiaries on the other The lead bank prepares the credit plan of the district to be implemented for the developmental activities by various departments, and identification of the places for opening the new branches There are 67 branches of various banks functioning in the district These banks have the deposit capital of Rs 30 734 lacs, advance capital of Rs 13,535 lacs and the credit deposit proportion of 44 per cent in the district during the year 1999-2000 A sum of Rs 2,825 lacs as a loan was disbursed by the various commercial banks functioning in the district during the same period for agricultural, Rs 1,813 lacs, for the developmnent of small industries and Rs 1 919 lacs of other primary sector purposes

STATEMENT SHOWING THE ROADS INCLUDING NATIONAL HIGHWAYS DURING THE YEAR 1999-2000

	Classification and nature of raods						
Year	Motorable double lane roads (in kms)	Motorable single lane roads (in kms)	Jeepable Road (in kms)	Not jeepable roads (in kms)	Total	Pucca Roads (in kms)	Kutcha Roads (in kms)
1	2	3	4	5	6	7	8
1999-2000	201	1,630	21	300	2 152	803 37	1 105 54

Source District Statistical Abstract, Sirmaur-2001

Electricity and Power : The development of agriculture and industry cannot be accelerated without the availability of power In addition to it, the use of electricity has become indispensable in the modern times Hydro electric power station was completed across the Giri river in the year 1978-79 with an installed capacity of 60 MW This power house generated 244,042 MKWts of energy during the year 1989-90 The peak load recorded on this power house is 60 MW The power from the station is being transmitted by four 132 KV lines There were in all 80,159 consumers in the district as on 31 3 2000 Of these, 69,075 were domestic, 8,304 commercial, 1,845 industrial, 777 agricultural consumption, 39 public lighting and 119 misc points Besides 2 lines namely, 220 KV Khodri Majri Line and 132 KV D/C Giri Kala Amb line are under execution and the later is being financed by the world bank All the inhabited villages in Sirmaur district have been eletrified upto the 31 3 1998

STATEMENT-O

STATEMENT SHOWING THE CLASSIFICATION OF ELEFCTRICITY CONSUMERS AND NUMBER OF VILLAGES ELECTRIFIED UPTO THE 31ST MARCH 2000

	Number of connections							
Year	Domestic	Commercial	Industrial	Agricultural	Public Lighting	Misc	Total consumers	Number of village eletrified and percentage
1	2	3	4	5	6	7	8	9
As on 31 3 2000	69,075	8,304	1,865	777	39	119	80 119	971 (100%)

Source District Statistical Abstract, Sirmaur-2001

Gram Panchayats : With the implementation of Panchayati Raj Act, 1953, two-tier system of Panchayati Raj viz Gram Panchayat and Nayaya Panchayat was introduced throughout the country Gram Panchayat was impowered to settle pity disputes whereas Nayaya Panchayat was envisaged to deal

with the local judiciary matter and empowered to impose fine upto Rs 500/- In the passage of time, the Nayaya Panchayat system was abolished due to one reason or the other

With the introduction of Revised Panchayati Raj Bill in Parliament in mid eighties, this system was made three tier system with Gram Panchayat, Block Samiti and Zila Parishad to accelerate the developmental activities at the grassroot level In Himachal Pradesh also, 73rd constitution amendment bill was introduced under Himachal Pradesh Panchayati Raj Act, 1994 from 23rd April,1994 The main aim and objectives of introducing 73rd constitutional amendment act, 1992 and Himachal Pradesh Panchayati Raj Act,1994 was to made Panchayati Raj Institutions as unit of local self-government and take necessary steps to strengthen the Gram Panchayats

A Gram Panchayat is constituted by one Pradhan, one Up-Pradhan and five members duly elected by straight election or elected unanimously by the voice vote A secretary is provided by the state to each Gram Panchayat to look after the official business A village with a population of 600-1,000 or more has a single Gram Panchayat whereas more than one village with less population becomes a part of particular Gram Panchayat

There are 217 Gram Panchayats functioning in Sirmaur district as on 31 12 1999 The main role of the Gram Panchayat is to settle down the pity dispute of villagers and prepares plans for economic developments and social justice of the villages under their jurisdiction It sends plans and projects of developmental activities to Block Samiti, Zila Parishad and Deputy Commissioner for sanction and budget allotment It also monitors the function and working of village level officials in the field of eduction, health, drinking water, transportation, public distribution system, electricity and power, social welfare, agriculture, horticulture and animal husbandary etc The main source of income of a Gram Panchayat is its own income from taxes, fee, fines, grant from state/central governments and raising advance/loans from the banks and other financial agencies

(v) Concepts and Definitions

Census Concepts

Building

A 'Building' is generally a single structure on the ground Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc Usually a structure will have four walls and a roof But in some areas the very nature of construction of houses is such that there may not be any wall Such is the case of conical structures where entrance is also provided but they may not have any walls Therefore, such of the conical structures are also treated as separate buildings

Permanent Houses

Houses, the walls and roof of which are made of permanent materials The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete Roof may be made of from any one of the following materials, namely, tiles slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent Houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material

Temporary Houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud plastic or polythene

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway, a roof and should be wide and long enough for a person to sleep in, i e it should have a length of not less than 2 meters and a breadth

of at least 1 5 meters and a height of 2 meters A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc , is regarded as a dwelling room In a situation where a census house is used as a shop or office etc and the household also stays in it then the room is not considered as a dwelling room But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household Tent or conical shaped hut if used for living by any household is also considered as dwelling room A dwelling room, which is shared by more than one household, has not been counted for any of them If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc It may be occupied or vacant It may be used for residential or non-residential purpose or both

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure These different units are practically independent of one another and are likely to have been built at different times and owned by different persons In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats In these cases while the structure looks like one building, different persons own the flats In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees Each such building was treated as a separate building But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house Sometimes it becomes difficult to apply the definition of census house strictly in certain cases For example, in an urban area, if a flat has five rooms each room having direct entrance from the common staircase or courtyard By definition, this has to be treated as five census houses If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses In such a case 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house But if each room was occupied by an independent household, then each such room was treated as a separate census house In case of hostels, hotels, etc , even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/Hotel building was treated as one census house but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound,

whether enclosed or unenclosed, is occupied by one household While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc , these were treated as separate census houses On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e g , the main house, the servant's quarter, the garage, etc , only one building number was given for this group and each of the constituent a separate census house number Only cases where a structure with roof and pillars has come up was treated as a building

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village

Rural-Urban Area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas In the Census of India 2001, the definition of urban area adopted is as follows a) All places with a municipality, corporation, cantonment board or notified town area committee, etc b) A place satisfying the following three criteria simultaneously i) A minimum population of 5,000, ii) at least 75 per cent of male working population engaged in non-agricultural pursuits, and iii) a density of population of at least 400 per sq km (1,000 per sq mile) For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq km and having at least 75 per cent of male working population engaged in non-agricultural activity were considered To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations' Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc , that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns

City

Towns with population of 100,000 and above are called cities

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns In some cases railway colonies, university campuses, port areas, etc , may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites (a) The core town or atleast one of the constituent towns of an urban agglomeration should necessarily be a statutory town, and (b) The total population of all the constituents (i e , towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census) With these two basic criteria having

been met, the following are the possible different situations in which Urban Agglomerations would be constituted i) a city or town with one or more contiguous outgrowths, ii) two or more adjoining towns with their outgrowths and iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so Persons in a household may be related or unrelated or a mix of both However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household Each such person was to be treated as a separate household The important link in finding out whether it was a household or not was a common kitchen There may be one member households, two member households or multi-member households

Institutional Household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen

Houseless Household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc , are treated as Houseless Households

Scheduled Castes and Scheduled Tribes :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories In pursuance of these provisions, the list of Scheduled Castes and Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Mazhabi or Sikligar Caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below

Scheduled Castes :

1 Ad Dharmi
2 Badhi Nagalu
3 Balmiki, Bhangi, Chuhra, Chura, Chuhre
4 Bandhela
5 Bangali
6 Banjara
7 Bansi
8 Barad
9 Barar, Burar, Berar
10 Batwal
11 Bauria, Bawaria

12 Bazigar
13 Bhanjra, Bhanjre
14 Chamar, Jatia Chamar, Rehgar, Raigar Ramdasi, Ravidasi, Ramdasia, Mochi
15 Chanal
16 Chhimbe, Dhobi
17 Dagi
18 Darain
19 Darai, Daryai
20 Daule, Daole
21 Dhaki, Toori
22 Dhanak
23 Dhaogri, Dhuai
24 Dhogri, Dhangri, Siggi
25 Doom, Doomna, Dumna, Dumne, Mahasha
26 Gagra
27 Gandhila, Gandil, Gondola
28 Hali
29 Hesi
30 Jogi
31 Julaha, Julahe, Kabirpanthi, Keer
32 Kamoh, Dagoli
33 Karoack
34 Khatik
35 Kori, Koli
36 Lohar
37 Marija, Marecha
38 Mazhabi
39 Megh
40 Nat
41 Od
42 Pasi
43 Perna
44 Phrera,Pherera
45 Rehar,Rehara
46 Sanhai
47 Sanhal
48 Sansi, Bhedkut, Manesh
49 Sansoi
50 Sapela
51 Sarde,Sarera,Sarare,Siryare,Sarehde
52 Sikligar
53 Sipi
54 Sirkiband
55 Teli
56 Thathiar,Thathera

Scheduled Tribes

1 Bhot,Bodh
2 Gaddi [excluding the territories specified in sub section (1) of section 5 of the Punjab Reorganisation Act, 1966 (31 of 1966), other than the Lahaul & Spiti district]
3 Gujjar [excluding these territories specified in sub-section (1) of section 5 of the Punjab Reorganisation Act,1966 (31 of 1966)]
4 Jad, Lamba, Khampa
5 Kanaura, Kinnara
6 Lahaula
7 Pangwala
8 Swangla

Language and Mother-tongue

As per the census concept, each language is a group of mother tongues The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue It is not necessary that the language spoken as mother tongue should have a script The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate A person who can only read but cannot write is not literate It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard Literacy could also have been achieved through adult literacy classes or through any non-formal educational system People who are blind and can read in Braille are treated as literates

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above For different age groups the percentage of literates in that age group gives the literacy rate

Educational Level :

The highest level of education a person has completed

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit Such participation may be physical and/or mental in nature Work involves not only actual work but also includes effective supervision and direction of work It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity All persons engaged in 'work' as defined above are workers Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration

Main Worker :

A person who has worked for major part of the reference period (i e six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'

Marginal Worker :

A person who worked for less than six months of the reference period (i e in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal Worker'

Non-worker :

A person who has not worked at all in any economically productive activity during the reference period (i e last one year preceding the date of enumeration) is termed as 'Non-Worker'

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share Cultivation includes effective supervision or direction in cultivation A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc , and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc , and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel-nuts (areca)

Agricultural Labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer She/he has no risk in the cultivation, but merely works on another person's land for wages An agricultural labourer has no right of lease or contract on land on which she/he works

Household Industry Worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas The larger proportion of workers in household industry should consist of members of the household including the head The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc or merely trade or business, even if such professions, trade or services are run at home by members of the household

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)' The

type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc In fact, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'

Work Participation Rate ·

Percentage of workers (main + marginal) to total population

Population Density

Population density is the number of persons inhabited per square kilometre of the area

Age ·

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1,000 males in a population

(vi) Non-Census Concepts

Improved Drinking Water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water It may be mentioned that such uniform definition may not be valid across all states

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal Sewers that carry only household and industrial wastage are called separate sewers, those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc , in these towns

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well and (iii) dry type of latrines with manual scavenging The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing) Through this sewer the faecal matter is transported without the need for scavenging This system generally exists in cities and big towns Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid. bacterially innocuous by the slow process of filtration through the soil traversed Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them These wells are cleaned at periodic intervals by a suitable device The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age The definitions of the terminology used in computing different fertility rates are mentioned below

Crude Birth Rate (CBR)

Ratio of the number of live births in a year to the

mid year population, normally expressed per 1,000 population

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year population}} \times 1,000$$

Crude Death Rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year population}} \times 1,000$$

Natural Growth Rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration

Age Specific Fertility Rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women

$$ASFR = \frac{\text{Number of live births in a particular age group}}{\text{Mid-year female population of the same age group}} \times 1,000$$

Age Specific Marital Fertility Rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Mid-year married female population of the same age group}} \times 1,000$$

General Fertility Rate (GFR)

Number of live births per 1,000 women in the reproductive age group (15-49) years in a given year

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age group (15-49) years}} \times 1,000$$

General Marital Fertility Rate (GMFR) .

Number of live births per 1,000 married women in reproductive age group (15-49) years in a given year

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age group (15-49) years}} \times 1,000$$

Total Fertility Rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1,000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1,000}$$

Age-specific Mortality Rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Mid-year population of the same age group}} \times 1,000$$

q1

Probability of dying between birth and age 1 This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year

q2

Probability of dying between birth and age 2

q5

Probability of dying between birth and age5 This indicator is also known as Under Five Mortality Rate (U5MR)

Infant Mortality Rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz Neo-natal mortality rate and Post neo-natal mortality rate The neo-natal mortality rate also comprises of two parts viz , Early neo-natal mortality rate and late neo-natal mortality rate These are defined as

Neo-natal Mortality Rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal Mortality Rate .

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal Mortality Rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal Mortality Rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal Mortality Rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still Birth Rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal Mortality Rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year

$$MMR = \frac{\text{Number of maternal deaths to in the women age group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group15-44 years per 1,000 persons of all ages

Child-woman ratio (0-4) ·

1 Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years

Child-woman ratio (5-9)

2 Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years

Migration

Migration is the third component of population change, the other two being mortality and fertility

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration

(i) Migration of persons in search of job is high in the country In many cases such migrants are only seasonal in nature People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months All such workers are treated as migrants Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides She/he is not considered as migrant

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others' The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country The first two streams together constitute internal migration, while the last type of movement is called international migration The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded

Rural-Urban components of migration .

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that The flow of migrants consists of four streams viz rural to rural, rural to urban, urban to rural and urban to urban

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e g , Municipal Corporation/ Corporation, Municipal Committee/Municipal council Municipality etc

Size-class of UA/town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/ towns These Class I UAs/towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town These are M7 (5,000,000 and above), M6 (2,000,000 to 4,999,999), M5 (1,000,000-1,999,999) M4 (500,000-999,999), M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns

Slum area .

The Slum Areas (Improvement and Clearance) Act, 19 for human habitation, or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets lack of ventilation, light or

sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city Whereas, for the purpose of inclusion in Centrally Sponsored *Scheme for Infrastructure Development in Mega* cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities In 2001 Census, cities with 10 millions and above population have been treated as Mega cities

(vii) Census Findings-Population, its Distribution

(a) Distribution of Population in Rural-Urban Areas : According to the 2001 Census, the total population of Sirmaur district is 458,593 persons comprising 241,299 males and 217,294 females This population of the district forms 7 5 per cent of the State population and ranks at 6th place among the districts Out of the total population of the district 89 6 per cent lives in rural areas while 10 4 per cent lives in urban areas Rural population of the district is distributed among 10 tehsils/sub-tehsils and the urban population is spread over in 3 towns The urban population in the district is 47,670 persons comprising 25,643 males and 22,027 females The total rural population comes to 410,923 persons comprising 215,656 males and 195,267 females as recorded in 2001 Census The rural population is distributed in 966 villages Out of total 971 villages in the district, 966 are inhabited villages while 5 villages are uninhabited The concentration of villages are mainly on undulating slopes and valleys of rivers/streams

(b) Size, Class and Civic Status of Towns : The statement shows the position and number of urban units by size class for 2001 Census

Serial number	Size class of town	Name and civic status of town	Urban population		
			P	M	F
1	2	3	4	5	6
1	III	Nahan M Cl	26,053	13,982	12,071
2	IV	Paonta Sahib M Cl	19,090	10,246	8,844
3	VI	Rajgarh NP	2,527	1,415	1,112

Population Growth, Density and Sex Ratio

Population Growth : According to the 1991 Census the total population of the district was 379,695 persons which rose to 458,593 persons as per 2001 Census There has been net addition of 78,898 persons during 1991-2001 The decadal growth rate of district comes to 20 8 per cent The growth rates for rural and urban areas of the district are 20 3 and 25 2 per cent respectively The growth rate in urban population is high in the district due to development in the industrial field

Density : The density of population in Sirmaur district comes to 162 persons per sq km against state average of 109 persons At tehsil/sub-tehsil level Paonta Sahib tehsil ranks Ist with 589 persons per sq km Rajgarh tehsil ranks 10th in term of density of population occupying the lowest position with 107 persons per sq km among the tehsils/sub-tehsils in the district The density of population varies between 589 persons to 107 persons per sq km In rural areas the density of population works out 146 persons per sq km while in urban areas it comes to 2,802 persons

Sex ratio : There are 901 females for every thousand males in Sirmaur district The sex ratio in rural and urban areas of Sirmaur district comes to 905 and 859 females per thousand males respectively It is observed that the proportion of females in rural areas is slightly higher than that of urban areas Sex-ratio in the age group of 0-6 years comes to 934 females per 1,000 males in the district as a whole In the rural and urban areas the ratio comes to 944 and 834 females per 1,000 males respectively

Work Participation Rate : The work participation rate is defined as percentage of total workers to total population In the same way it is defined for main-workers and marginal workers According to 2001 Census, the total workers including main and

marginal workers constitute 49 3 per cent of the total population of the district, as a whole Of the total workers the share of the main workers is 38 4 per cent and the marginal workers come to 10 9 per cent The remaining 50 7 per cent of the population belongs to the category of non-workers

According to 2001 Census, the participation rate of male main workers in the district comes to 48 8 per cent and that of females is 26 7 per cent The percentage of males and females marginal workers is 7 6 and 14 6 per cent respectively The proportion of female marginal workers is higher than that of males as the females have engaged in one or more economic activities in addition to their daily household duties to improve the family economy The percentage of main workers among males is 49 2 per cent while in case of females it is 28 6 per cent in rural areas The proportion of male and female main workers in urban areas is comparatively low which comes to 45 4 and 9 7 per cent at district level respectively

Literacy : A person who can both read and write in any language with understanding is taken as literate in Census All the children in the age group 0-6 years have been treated as illiterates As per 2001 Census Sirmaur district has reported 274,643 persons as literate constituting 70 4 per cent of total population excluding the population of age group of 0-6 years The proportion of male and female literates is 79 4 and 60 4 per cent respectively The literacy rate of males is much higher than that of females resulting wide gap of 19 points between male and female literacy The total literacy rates of rural and urban areas are 68 3 and 87 8 per cent respectively The proportion of male and female literates in rural areas is 77 8 and 57 7 per cent while in urban areas this proportion is 91 7 and 83 2 per cent respectively The difference between male and female literacy rates in urban areas is 8 5 points as against 20 1 points in rural areas Thus it is clear that the females in urban areas are better educated than their counterparts in the rural areas of the district

Availability of University Education in the District : There are four Degree colleges in the district Two situated in Nahan the district headquarters and one each in Paonta Sahib and Pachhad tehsil For higher education, the students of this district have to go either to Shimla or Dehradun in Uttaranchal Pradesh

(c) Scheduled Castes and Scheduled Tribes Population, 2001 : Of the 458,593 total population of the district, 29 6 per cent of the total population belongs to Scheduled Castes and only 1 3 per cent to Scheduled Tribes The percentage of Scheduled Castes population constitute 30 8 per cent in rural population and 19 1 per cent in urban population of the district The proportion of Scheduled Tribes is 1 4 per cent and 0 3 per cent in rural and urban population of the district respectively The Scheduled Castes population in the district is mainly concentrated in Paonta Sahib, Nahan, Rajgarh, Pachhad, Renuka tehsils and Kamrau sub-tehsil

Brief analyis of PCA data

TABLE 1 DECADAL CHANGE IN POPULATION OF TEHSILS/SUB-TEHSILS BY RESIDENCE, 1991-2001

Table 2 · It depicts C D blockwise population, number and percentage of inhabited villages in specified population range by sex in the district Out of 966 inhabited villages, 397 villages (41 1 per cent) fall in the small sized population of less than 200 persons but these villages claim only 11 2 per cent rural population of the district 318 villages forming 32 9 per cent are covered by the range of 200-499 population and contains 24 4 per cent population There are 158 villages with 16 4 per cent have the population between 500 to 999 persons constituting 27 0 per cent rural population of the district In the population range of 1,000 - 1,999 have 77 villages constituting 8 0 per cent of the total villages with 25 1 per cent rural population Only 16 villages having 1 7 per cent fall in the population range of 2,000-4,999 persons and claims 12 3 per cent population There is not a single village in the population range of 5,000 and above in the district

TABLE 3 NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWN IN 2001 CENSUS

This table relates to new town added, towns declassified or wholly merged with other town during the decade 1991-2001 In the district only one town namely Sarahan, Notified Area Committee in Pachhad tehsil has been declassified and did not satisfy the criteria to be treated as Census town Therefore this has been merged in rural area

TABLE 4 DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0 1	143	0 0
11-20	2	0 2	31	0 0
21-50	48	5 0	4 267	1 0
51-100	212	21 9	40,163	9 8
101-200	390	40 4	139,188	33 9
201-300	113	11 7	67,622	16 5
301-500	85	8 8	52,064	12 7
501 +	115	11 9	107 445	26 1
Not known	-	0 0	-	0 0
District Total	**966**	**100 0**	**410,923**	**100 0**
Population Density (Rural) of the district		**185 7**		

Table 4 This table shows the distribution of villages according to density ranges of population in the district The inhabited villages of the district as a whole have been grouped under 8 different ranges of population density per sq kilometre

The maximum number of villages i e 390 accounting for 40 4 per cent of the total inhabited villages of the district fall in the 101-200 population density range having 33 9 per cent population In the medium density range of 51-100 persons per sq km account for 21 9 per cent of the inhabited villages with 9 8 per cent population This range have 212 villages within its limit In the high density range of 501+ persons, there are 115 villages forming 11 9 per cent of inhabited villages and 26 1 per cent of population The lowest density ranges i e 0-10, 11-20 and 21-50 together have 51 villages i e 5 3 per cent with only 1 0 per cent population In the density range of 201 to 500 there are 198 villages having 20 5 per cent inhabited villages and 29 2 per cent population The density of rural areas of the district based on the area of inhabited villages comes to 186 persons per sq km area

TABLE 5 SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census year	Himachal Pradesh			Sirmaur District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	884	899	600	798	801	732
1911	889	905	499	822	825	744
1921	890	908	490	824	826	777
1931	897	915	521	803	809	703
1941	890	907	542	818	820	770
1951	912	932	664	800	806	719
1961	938	961	650	828	835	734
1971	958	976	749	836	837	821
1981	973	989	795	874	876	851
1991	976	990	831	897	899	874
2001	968	989	795	901	905	859

Note Sex ratio has been defined here as the number of females per 1,000 males

Table 5 This table reflects the changing pattern of sex ratio since 1901 in the state and the district As per 2001 Census sex ratio of 901 females per 1,000 males has been recorded in the district against the state average of 968 The sex ratio of the district was very low as compared to the state average since 1901 to 2001 censuses It has been observed that the proportion of females in rural areas is higher than that of urban areas in both district and state The sex ratio of the district was 798 in 1901 Census which continued to increase gradually by a few points and could reach the level of only 901 females in 2001

TABLE 6 SEX RATIO BY TEHSILS/SUB-TEHSILS, 2001

Serial number	Name of Tehsil/Sub-tehsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Rajgarh (T)	947	957	786
2	Nohra (ST)	970	970	-
3	Pachhad (T)	930	930	-

10	Ronhat (ST)	892	892	-
	District Total	**901**	**905**	**859**

Table 6 It gives sex ratio for total, rural and urban areas at tehsil/sub-tehsil level There are 901 females per 1,000 males in Sirmaur district It becomes clear from the table that sex ratio in rural areas is slightly higher than that of urban areas of the district The sex ratio among rural and urban population is 905 and 859 females per 1,000 males respectively The total sex ratio in tehsils/sub-tehsils varies between 869 in Shalai tehsil and 970 females in Nohra sub-tehsil The total as well as rural sex ratio in Rajgarh (T), Nohra (ST), Pachhad (T), Renuka (T) and Dadahu (ST) is higher than district average sex ratio In urban areas of Nahan (T) and Paonta Sahib (T) it is higher than the sex ratio of district urban sex ratio (859) and lowest sex ratio of 786 has been recorded in urban areas of Rajgarh Nagar Panchayat

TABLE 7 SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Rajgarh	957
2	Pachhad	930
3	Nahan	898
4	Paonta Sahib	875
5	Sangrah	960
6	Shalai	878
	District (Rural) Total	**905**

Table 7 This table presents C D blockwise sex ratio for rural population in the district The sex ratio in rural areas of the district as a whole comes to 905 females per 1,000 males Among the C D blocks, the highest sex ratio of 960 females per 1,000 males is found in Sangrah C D block The lowest sex ratio of 875 females per thousand males is recorded in Paonta Sahib C D block The sex ratio of Sangrah, Rajgarh and Pachhad C D blocks is higher than that of the district rural average of 905 females

TABLE 8 SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	27	2 8	14 942	3 6
700-749	18	1 9	3 989	1 0
750-799	52	5 4	16 155	3 9
800-849	90	9 3	40 149	9 8
850-899	151	15 6	88 983	21 7
900-949	199	20 6	112 557	27 4
950-999	152	15 7	64 545	15 7
1,000-1,099	171	17 7	51,308	12 5
1,100+	106	11 0	18 295	4 5
District Total	**966**	**100 0**	**410,923**	**100 0**
Sex ratio (Rural) for District		**905**		

Table 8 Presents the distribution of villages by 9 sex ratio ranges The maximum number of villages i e199 accounting for 20 6 per cent of total inhabited villages and population of 27 4 per cent in the district fall in the sex ratio range of 900-949 It is followed by sex ratio range of 1 000-1 099 which contains 171 or 17 7 per cent villages and 12 5 per cent population The highest sex- ratio range of 1,100 and above claims 106 or 11 0 per cent villages and 4 5 per cent population The sex ratio range of 950-999 claims 152 or 15 7 per cent villages and 15 7 per cent population In remaining sex ratio ranges of 850-899,800-849,750-799 700-749 and less than 700 the

villages and population are distributed as 151 villages (15 6 per cent) and 21 7 per cent population, 90 villages (9 3 per cent) and 9 8 per cent population, 52 villages (5 4 per cent) and 3 9 per cent population, 18 villages (1 9 per cent) and 1 0 per cent population and 27 villages (2 8 per cent) and 3 6 per cent population respectively In brief, the sex ratio in majority of villages is quite low

TABLE 9 SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of Town	Urban status of town	Sex ratio
1	2	3	4
1	Rajgarh	NP	786
2	Nahan	M Cl	863
3	Paonta Sahib	M Cl	863
Sex ratio (Urban) for the district			**859**

Table 9 This table shows the sex ratio of the towns in Sirmaur district The sex ratio in urban areas comes to 859 females per 1,000 males Among the 3 towns of the district, the sex ratio varies between 786 to 863 females per 1,000 males Rajgarh (NP) has the lowest sex ratio of 786 while both towns of Nahan (M Cl) and Paonta Sahib (M Cl) has sex ratio of 863 females per 1,000 males

5	Sangrah	965	500
6	Shalai	878	-
	District (Rural) Total :	**931**	**870**

Table 19 : This Table presents the C.D. blockwise sex ratio for the Scheduled Castes and Scheduled Tribes in rural areas of Sirmaur district. The sex ratio for the Scheduled Castes for the district, as a whole, comes to 931 females per 1,000 males. The highest sex ratio of 975 females has been recorded in Rajgarh C.D. block. It is followed by 965 females in Sangrah, 934 females in Nahan, 929 females in Pachhad, 906 females in Paonta Sahib and lastly 878 females in Shalai C.D. blocks. In the case of Scheduled Tribes, the sex ratio for the district as a whole comes to 870 females per 1,000 males. The sex ratio of 884 females in Paonta Sahib C.D. block is the highest in the district whereas the lowest sex ratio is 414 in Rajgarh C.D. block. It is observed that the sex ratio among Scheduled Castes and Scheduled Tribes is below the equality line in all the C.D. blocks of the district (rural).

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Rajgarh (NP)	868	-
2	Nahan (M Cl)	943	857
3	Paonta Sahib (M Cl)	902	789
	Sex ratio (Urban) for the district :	**924**	**824**

Table 20 : It represents townwise sex ratio for the Scheduled Castes and Scheduled Tribes in urban areas of Sirmaur district. The sex ratio for the Scheduled Castes for the district as a whole comes to 924 females per thousand males. It is 943 females in Nahan (M Cl) which is the highest in the district (urban) whereas the lowest sex ratio of 868 females has been recorded in Rajgarh (NP). In the case of Scheduled Tribes, the sex ratio as a whole for the district (urban) comes to 824 females per 1,000 males. The highest sex ratio of 857 females is found in Nahan (M Cl) and it is followed by 789 females in Paonta Sahib (M Cl). It is observed that the sex ratio in both the towns is below the equality line. Rajgarh (NP) has recorded Nil Scheduled Tribes females.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TEHSILS/SUB-TEHSILS, 2001

Note Per cent of Worker to total worker are given in brackets

Table 34 : It can be seen from this table that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 71 5 per cent of the total workers and remaining 28 5 per cent of total workers are engaged as agricultural labourers (2 6 per cent), Household industry workers (1 1 per cent) and others workers (24 8 per cent) in this district

The distribution of workers by four categories of economic activity at tehsil/sub-tehsil shows very high dependence of population on agriculture sector absorbing large number of workers The proportion of cultivators varies between 46 6 per cent in Paonta Sahib tehsil and 91 0 per cent in Nohra (ST) These variations within the district may be due to cropping and land holding patterns The percentage of female

cultivators is 88 9 per cent which is very high as compared to 60 1 per cent of male cultivators in the district The percentage of agricultural labourers and household industry workers is very low in the district as stated above The workers in other activities occupy the second position next to agriculture in the district as well as in each tehsil/sub-tehsil The highest percentage of 46 6 per cent of other workers is recorded in Nahan tehsil while the lowest proportion of 7 9 per cent is found in Nohra sub-tehsil

Note Per cent of Worker to total worker are given in brackets

Table 35 : It presents C D blockwise distribution of workers by sex in four categories of economic activity In the rural areas of the district total workers (main+marginal) form 51 4 per cent of total population Among these workers cultivators constitute 76 3 per cent, agricultural labourers 2 7 per cent, household industry workers 1 2 per cent and other workers 19 8 per cent The agriculture sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 1 2 per cent workers of the total working force Therefore

surplus working force has to depend on primary activities Among cultivators the proportion of females (91 1 per cent) is higher than males (65 9 per cent) in the rural areas of the district The females play a main role in rural economy of the district The proportion of cultivators and other workers differ considerably from one C D block to other The proportion of cultivators varies between 59 9 per cent in Paonta Sahib C D block to 89 2 per cent in Sangrah C D block Similarly for other workers, the lowest proportion is 8 6 per cent in Sangrah C D block while 33 9 per cent is the highest in Paonta Sahib C D block The percentage of agricultural labourers and household industry workers together is quite low i e only 3 9 per cent in the district The percentage of agricultural labourers is highest 4 6 in Paonta Sahib block followed by Rajgarh 3 4 In other C D blocks, this proportion is quite insignificant Similarly, household industry workers varies in C D blocks between 0 5 per cent in Rajgarh C D block and 1 9 per cent in Nahan C D block

TABLE 36 DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

				(10 3)	**(3 7)**	**(0 7)**	**(0 6)**	**(95 1)**

Table 36 : It presents townwise distribution of workers by sex in four categories of economic activity in the urban areas of the district Total workers (main+marginal workers) constitute 30 4 per cent of the total population Among these workers cultivators are 2 1 per cent, agricultural labourers 0 6 per cent, household industry workers constitute 0 9 per cent and proportion of other workers claims 96 4 per cent The proportion of other workers is much higher than other economic activities The proportion of cultivators varies between 0 8 per cent in Nahan (M Cl) to 11 5 per cent in Rajgarh (NP) Similarly for other workers, the lowest proportion is 85 4 per cent in Rajgarh (NP) while 97 8 per cent is the highest in Nahan (M Cl) followed by 96 3 per cent in Paonta Sahib (M Cl)

The agricultural labourers and household industry together is quite low ie 1 5 per cent for the district The agricultural labourers in Rajgarh (NP) is 1 0 per cent, in Nahan (M Cl) with 0 5 per cent and in Paonta Sahib (M Cl) it is 0 7 per cent The household industry workers in the towns varies from 2 0 per cent in Rajgarh (NP) to 0 8 per cent each in Paonta Sahib (M Cl) and Nahan (M Cl)

Brief analysis of the Village Directory and Town Directory Data

TABLE 37 DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C D block	Number of inhabited villages	Type of amenity available

Note Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

\# Post office includes Post office, telegraph office and Post & telegraph office

$ Transport communications includes bus service, rail facility and navigable waterways

Table 37 It deals with the C D block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport communications, agricultural credit societies, approach by pucca road and power supply within the village Out of 966 inhabited villages in the district 694 villages or 71 8 per cent have been provided with the education facility of one type or the other Similarly 254 villages in the district constituting 26 3 per cent have medical facility of one type or the other Improved drinking water facility is available in 951 or 98 4 per cent villages As regards, postal facility which include facilities of post office, telegraph office and post & telegraph 192 villages constituting 19 9 per cent villages have been provided with post office facility within the village 606 or 62 7 per cent villages have been provided with the telephone facility, 523 or 54 1 per cent with transport facility, 42 or 4 3 per cent villages with bank facility and 91 or 9 4 per cent with agricultural credit societies Similarly there are 317 or 32 8 per cent villages which have been linked with the pucca road 964 or 99 8 per cent villages have been provided with the electricity Almost similar pattern of distribution of villages by availability of amenities in the villages at C D block level has been found with slight variation Shalai C D block has the highest 96 0 per cent villages where educational facility is available and lowest 51 5 per cent is found in Pachhad C D block Medical facility is highest in Paonta Sahib (39 7 per cent) and lowest in Nahan (21 5 per cent) C D block Improved drinking water is available in cent-per cent villages in Rajgarh, Nahan, Paonta Sahib and Shalai C D blocks while in other blocks it is 95 0 per cent and above Telephone facility is highest in Rajgarh (84 3 per cent) while lowest 24 0 per cent in Shalai C D block Transport communications is less developed in Pachhad where only 43 1 per cent villages are covered by this facility whereas 67 9 per cent villages of Paonta Sahib C D block are availing this facility In the field of power supply 99 8 per cent villages have been covered in the district

TABLE 38 NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

(b) PHC	275	237	431	943
3 Post Office	629	121	24	774
4 Telephone	188	63	109	360
5 Bus Service	319	71	53	443
6 Banks				
(a) Commercial Bank	210	268	451	929
(b) Cooperative Bank	106	159	685	950
7 Agricultural Credit Societies	295	200	380	875

Table 39 This table presents distribution of villages not having certain amenities within the village at district level They have to go out of their village to avail these facilities Such villages have been presented according to various distance ranges in this table Out of 966 inhabited villages as many as 272 villages do not have primary schools within the village The children of such 267 villages have to travel a distance of less than 5 kms to attend the primary school and remaining 5 villages fall between 5-10 kms range 739 villages are deprived of middle school and 965 of degree college Of these 514 avail the facility of middle school at a distance of less than 5 kms , 205 at a distance of 5-10 kms and the remaining 20 at a distance of 10+ kms In respect of degree college 23 avail this facility at a distance of less than 5 kms , 34 between 5 to 10 kms and rest 908 villages at a distance of 10+ kms

Similarly there are 963 villages in the district which have been devoid of Hospital facility and 943 villages are deprived of PHC facility Of these 58 villages have the facility of Hospital available within 5 kms while in respect of 92 villages the inhabitants have to cover a distance of 5-10 kms in order to avail this facility Similarly overwhelming number i e 813 villages have this facility at a distance of 10+kms As regards PHC 275 avail this facility at a distance of less than 5 kms , 237 at a distance of 5-10 kms and the remaining 431 have to travel a distance of more than 10 kms to avail this facility

Regarding Post Office, 774 villages do not have this facility in the village itself Of these, majority i e 629 have this facility at a distance of less than 5 kms , another 121 villages avail it at a distance of 5-10 kms In the remaining 24 villages habitants have to travel a distance of 10+ kms

As regards Telephones, there are 360 villages in the district which are without telephone facility Of these 188 villages avail this facility at a distance of less than 5 kms , 63 at a distance of 5-10 kms and remaining 109 have to traverse a distance of 10+ kms

For Bus service out of 443 villages which do not have facility, 319 villages avail this facility at a distance of less than 5 kms , 71 at a distance between 5-10 kms and 53 at a distance of 10+ kms

In the entire district 929 villages are deprived of Commercial Bank and 950 villages of Co-operative Bank Of these 929 villages which are deprived of Commercial Banks, 210 villages avail this facility at a distance of less than 5 kms , 268 between 5-10 kms and the remaining 451 at a distance of 10+ kms Regarding Co-operative Banks out of 950 villages 106 villages avail this facility at a distance of less than 5 kms , 159 at a distance of 5-10 kms and remaining 685 at a distance of 10+ kms

875 villages do not have agricultural credit societies To 295 villages this facility is available at a distance of less than 5 kms , 200 at a distance of 5-10 kms and the remaining 380 at a distance of 10+ kms

TABLE 40 DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communica-tions $	Banks	Agricultural Credit Societies	Approach by pucca road

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However the concept of improved drinking water is state specific and this is to be considered accordingly

Table 41 : It deals with the distribution of villages by population ranges and amenities available therein In Sirmaur district out of a total 966 inhabited villages overwhelming 715 have a population of less than 500 persons Of these 455 villages (63 6 per cent) have education facility, 110 (15 4 per cent) have medical facility, 702 (98 2 per cent) have improved drinking water facility 79 villages (11 0 per cent) have post office facility 430 (60 1 per cent) have telephone facility 328 (45 9 per cent) have been linked by bus service 13 (1 8 per cent) have bank facility 34 villages (4 8 per cent) have been provided with the agricultural credit societies, 186 villages (26 0 per cent) have been linked with pucca road 713 (99 7 per cent) villages have power supply

Out of 158 villages which fall in the population range of 500-999 persons, 148 villages (93 7 per cent) have been provided with the education facility, 79 (50 0 per cent) with medical facility, 156 villages (98 7 per cent) have improved drinking water facility 57 villages (36 1 per cent) have been provided with post office facility, 105 villages (66 5 per cent) with telephone facility, 119 villages (75 3 per cent) with transport facility, 9 villages (5 7 per cent) with bank facility, 28 villages (17 7 per cent) with agricultural credit societies and lastly 73 villages (46 2 per cent) have approach by pucca road Power supply is available to all villages

77 villages fall in the population range of 1,000-1,999 persons 75 villages (97 4 per cent) have education and cent percent villages have improved drinking water facility Whereas 49 villages (63 6 per cent) enjoy the medical facility, 41 villages (53 2 per cent) have post office facility, 56 villages (72 7 per cent) have telephone facility, 62 villages (80 5 per cent) have transport communications facility, 12 villages (15 6 per cent) have bank facility, 20 villages (26 0 per cent) have agricultural credit societies and 44 villages (57 1 per cent) have approach by pucca road The electricity is available to all villages

There are 16 villages in the district which are covered under 2,000-4,999 population range In this range, all the villages enjoy the facility of education medical, improved drinking water and power supply facilities 15 villages (93 8 per cent) have post office and telephone facilities 14 villages (87 5 per cent) have bus and approach by pucca road facilities 8 villages (50 0 per cent) have banking facility while 9 villages (56 2 per cent) have agricultural credit societies There is no village in the district having a population of 5,000 persons or above

TABLE 42 DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C D block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Rajgarh	140	41 050	14 6	29 5
2	Pachhad	262	40,628	15 3	21 7
3	Nahan	209	28,651	23 6	28 1
4	Paonta Sahib	184	36,498	41 7	42 9
5	Sangrah	121	47,269	15 8	27 0
6	Shalai	50	27,209	19 5	25 1
	District Total	**966**	**221,305**	**21 2**	**31 7**

Note Cultivable area = irrigated area + unirrigated area

Table 42 : It presents C D blockwise distribution of villages according to land use It also gives details of available cultivable area Cultivated area includes irrigated as well as unirrigated area It further elaborates that what is the extent of cultivable area under irrigation There are total 966 inhabited villages in the district having a total area of 221,305 hectares Of this, 21 2 per cent is cultivable and 31 7 per cent of total cultivable area has got the irrigation facilities The area figures have been collected from the revenue record maintained for each village by the State Government

A look at the land use pattern at C D block level shows that Rajgarh block with 140 villages have a total area of 41,050 hectares Of this 14 6 per cent of land is cultivable and of the aforesaid area 29 5 per cent is irrigated In Pachhad block, all the 262 villages have a total land area of 40,628 hectares Of this 15 3 per cent of land is cultivable and of the aforesaid area 21 7 per cent is irrigated In Nahan block all the 209 villages have a total area of 28,651 hectares Of this, cultivable area is 23 6 per cent and 28 1 per cent of cultivable area is irrigated In Paonta Sahib block, all the 184 villages have a total area of 36,498 hectares Of this, cultivable area is 41 7 per cent Of cultivable area 42 9 per cent is irrigated Sangrah block with 121 villages have a total land area of 47,269 hectares Of this 15 8 per cent is cultivable area and out of this cultivable area 27 0 per cent is irrigated Shalai block with 50 villages has a total land area of 27,209 hectares Of this 19 5 per cent is cultivable area, out of which 25 1 per cent is irrigated

TABLE 43 PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Nahan (M Cl)	744 5	4 3	740 2	613 4	173 5	164 2	192 8	0	82 9
2	IV Paonta Sahib (M Cl)	597 0	63 9	533 1	597 0	57 5	64 9	22 2	0	452 4
3	VI Rajgarh (NP)	377 1	20 6	356 5	95 8	26 9	10 3	36 4	0	22 2

Table 43 : It shows per capita receipt and expenditure in the statutory towns of the district For the district as a whole, per capita receipts comes to Rs 666 0 This receipt is derived through taxes (Rs 29 1) and from all other sources (Rs 636 9) The total expenditure comes to Rs 579 4 This expenditure has been incurred in general administration (Rs 119 3), public health and conveniences (Rs 116 3), public works (Rs 116 2) and on others, it is Rs 227 6

TABLE 44 SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior-Secondary / Middl	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Nahan (M Cl)	6 1	3 1	2 7	1 9	0 8
2	Paonta Sahib (M Cl)	6 3	3 1	3 1	1 0	0 5
3	Rajgarh (NP)	11 9	7 9	4 0	4 0	0 0
	District Total	**6 5**	**3 4**	**2 9**	**1 7**	**0 6**

Table 44 : It shows the number of Schools/Colleges per 10,000 population in statutory towns in Sirmaur district In the district, as a whole, there are 6 5 (Primary schools), 3 4 (Middle schools), 2 9 (Secondary/Matriculation) and 1 7 Senior Secondary schools and 0 6 College per 10,000 population of the towns in the district A close look at the table would reveal that smaller town like Rajgarh, NP is having better educational facilities at school level than the bigger towns of the district

TABLE 45 NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Nahan (M Cl)	100
2	Paonta Sahib (M Cl)	73
3	Rajgarh (NP)	198
	District Total	94

Table 45 : It depicts the number of beds available per 10,000 population in the medical institutions of the towns In the district as a whole, the number of beds comes to 94 Townwise break-up reveals that

Rajgarh Nagar Panchayat has 198 beds per 10,000 population followed by Nahan(MCl) with 100 beds and Paonta Sahib(MCl) with 73 beds

TABLE 46 PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
		NIL		

There is no notified/recognized slum in the urban areas of this district, hence no information recorded

TABLE 47 MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Nahan (M Cl)	Manhole Cover, Foundry Products Turpentine Resin	Manhole Cover, Foundry Products Turpentine Resin

TABLE 47 MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
2	Paonta Sahib (M Cl)	Lime Fire Bricks Bakery Products	Bakery Products Lime Fire Bricks
3	Rajgarh (NP)	Jam Sauce Pickle	Tomatoes Potatoes Peas

Table 47 . It deals with the three most important commodities manufactured and exported in the towns Nahan (MCl) manufactures and exports Manhole covers, foundary products, Turpentine and Resin In Paonta Sahib (MCl), lime, Fire bricks and bakery products are manufactured and exported out of the town Rajgarh (NP) manufactures Jam, Sauce and Pickle while it exports Tomatos, Potatos and Peas

Data source Census of India 2001, H- series "Tables on Houses, Household amenities and Assets

Note Eight houses are un-classifiable

Permanent 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i e , where, burnt bricks, GI Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof

Semi permanent 2 Semi-permanent houses refer to those houses made of other types of materials

Temporary 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i e where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass leaves reeds bamboo hatch mud unburnt bricks, wood etc are used for roofs

Table 49 : The data presented in this table reveals that 77 6 per cent of households of the district are living in houses made of pucca materials, residences of 17 1 per cent households are of semi-permanent nature and houses of only 5 3 per cent households are made of temporary materials

In the rural areas, however, the percentage of households living in permanent houses is 75 3 per cent, 18 9 per cent in semi-permanent and only 5 8 per cent in temporary houses Districtwise percentage in urban areas indicates that majority of households i e 94 8 per cent are living in houses constructed of pucca materials, 4 0 per cent in semi-permanent structure and percentage of households in temporary houses is 1 2 constructed of kutcha materials At tehsil/sub-tehsil level, the lowest percentage of 48 3 households

occupying permanent structure is found in Pachhad tehsil while highest percentage of 97 0 is seen in Nohra, sub-tehsil Again semi-structure houses is high in Pachhad tehsil and low in Nohra (ST) The proportion of temporary houses is quite low in all tehsils/sub-tehsils and highest is 12 0 per cent in Paonta Sahib tehsil followed by Pachhad (7 2 per cent) tehsil, Nahan (2 7 per cent) tehsil, Renuka (2 4 per cent) tehsil and Rajgarh (1 0 per cent) tehsil while in remaining tehsils/sub-tehsils, it is below one per cent

Data source Census of India 2001, H- series "Tables on Houses, Household amenities and Assets "

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However the concept of improved drinking water is state specific and this is to be considered accordingly

Note
Percentage is given in brackets after the number of households
Bathroom means bathroom within the house
Toilet means toilet within the house
Drainage means closed and open drainage

Table 50 : This table indicates that 81 0 per cent households in the district have been provided with improved drinking water supplied from a tap or a handpump/tubewell, 87 2 per cent households have provision of electricity in their houses The bathroom facility is available to only 36 4 per cent households within their premises As regards rural areas, 30 1 per cent households are having bathroom facility, whereas this proportion in urban areas comes to 82 7 per cent 85 6 per cent rural households have facility of electricity against 99 2 per cent in urban areas Toilet and drainage facilities in the district are available to 30 7 per cent and 33 2 per cent households respectively Their percentage is higher in urban areas as compared to rural areas The trend of these amenities available to the households at tehsil/ sub-tehsil level is almost conform to the district pattern as analysed However, improved drinking water is available to 64 9 per cent households in Pachhad against the 88 2 per cent such households in Kamrau (ST) which is highest in the district Similarly the proportion of households having electricity is highest in Nahan (96 7 per cent) tehsil while the lowest is in Renuka (64 1 per cent) tehsil

Data source Census of India 2001, H- series "Tables on Houses, Household amenities and Assets"

Table 51 : The percentage distribution of households by type of fuel used for cooking purposes is given in this table There are nine types of fuel used for which data have been presented in the table It is observed that wood is the most predominant fuel used for cooking by 69 7 per cent households in the district In the tehsils/sub-tehsils, this proportion varies between 92 9 per cent in Ronhat (ST) and 48 1 per cent in Nahan tehsil In rural areas use of wood for cooking is very high while in urban areas it is used by less of population due to availability of L P G The next cooking fuel is gas which is used by 22 4 per cent households in the district This proportion in urban and rural areas is 82 1 and 14 2 per cent respectively In rural areas use of gas for cooking is very low as compared to urban areas at tehsil/sub-tehsil level There are 5 3 per cent households using kerosene in the district Use of kerosene for cooking by urban households comes to 9 0 per cent while rural areas its proportion is only 4 8 per cent, as a whole The percentage of households using other types of fuel such as crop residue, cow dung cakes, electricity, coal, biogas etc is insignificant In rural areas wood is main fuel and in urban areas cooking gas is used as predominant fuel

Table 52 : This table presents data for total, rural and urban areas at district/tehsil/sub-tehsil level about households availing banking services and possession of assets such as radio/transistor, television, telephone, bicycle, scooter and car etc by the households There are 82,543 households in the district and among them, 41,444 households have been availing banking services 36,834 households have Radio/Transistor Television is possessed by 32,026 households Telephone is available in 10,423 households Bicycle as means of transportation is available in 14,594 households Scooter, Motor cycle, Moped and Car,Jeep,Van are used by 7,256 and 1,796 households respectively The picture in use of banking services and possession of assets by households at tehsil level is almost similar as analysed above for the district as a whole

(viii) Major social and cultural events, natural and administrative development and significant activities durintg the decade

Social and cultural events

Fairs and festivals . The people of the Sirmaur district celebrate various types of festivals with considerable gusto almost around the year Not even a single month passes when one or the other type of festival is not celebrated in one or the other part of the district in one form or the other Bishu fair is celebrated every year in the month of March-April and Haryali in June-July Diwali coincides with the government calendar Magh festival is the greatest of all the festivals, which is celebrated by all sections of people with tremendous enthusiasm Janamashtmi, the birthday of Lord Krishna, is also celebrated in the month of August/September every year

Two fairs namely Bawandwadshi fair and Guga Naumi fair are celebrated at Nahan which are the main attractions for the local folks The Hola Mohalla and Baisakhi fairs in Paonta Sahib attract a large number of Sikhs from the far off villages besides local people A new festival named 'Sharad Mahotsva' is being celebrated every year at Paonta Sahib in the memory of Yamunaji on Sharad Purnima since 1982 Baisakhi fair is also celebrated at Rajgarh where people from far and near places come in large number to witness the local folk dances A fair is held at Trilokpur twice a year in the months of Chaitra and Asvina A large number of pilgrims visit this fair Trilokpur fair is one of the famous fairs of the district

The Renuka Lake is visited by thousands of pilgrims every year on Kartika-Ekadashi On this occasion, the famous historic Renuka fair is celebrated, which is one of the main attraction for the people of this place To this fair the brass idol of Parshuram is brought from village Jamu, his permanent abode, in a silver palki accompanied by musical instruments with great pomp and show The place remains full to capacity during the days of the fair and offers a spectacular variegated activities Considering the importance of Renuka fair, it was given the status of state level fair five year ago Renuka fair apart from its essential religious character provides a wonderful insight into cultural heritage of Sirmaur

Administrative developments during the decade.

One sub-tehsil Ronhat has been created and Sarahan N A C denotified during the decade One sub-tehsil Pajota lost its identity due to stay in the court One private Engineering College came into existence at Kala Amb

(ix) Places of historical, religious, archaeological and tourist interest

Places of historical interest

1.Nahan : In Samvat 1678 Raja Karam Prakash founded Nahan Situated on an isolated ridge in the Shiwalik at an elevation of 3,057 feet above mean sea level is a picturesque town of Nahan It can be approached either from Ambala City or Brara Railway Station which are connected with Nahan by motorable roads and daily bus service is available The Ambala-Nahan road is 40 miles in length and Brara to Nahan is 38 miles A direct bus from Ambala Cantt to Nahan is also available which comes via Shahabad

It is believed that the hill, on which the town now stands, was once the stronghold of Bhera Rangar, a notorious dacoit There is a proverb, "Bhera Lai na, chaure Kaunts aur Saher", which means that the cattle seized by Bhera had a kund or pit of stone on the Lai hill, where he used to light a fire of cotton seeds and oil After his raids the beacon guided him back to his lair He built a Devi Temple on the summit of this hill which still exists His cattle shed lay by the Kutcha tank in the town

Bawa Banwari Das, a well known Sadhu, lived on this hill Once Raja Karam Prakash arrived at this hill from Kalsi for hunting The Bawa advised him to build a town at this place The Raja did so and constructed a baradari on the spot where the Sadhu lived The baradari stood on a high Tibba In those days tigers abounded in Nahan, and the Bawa had reared several of them The name Nahan is derived either from 'Nahan' which in Sanskrit means 'Tiger' or Nah (King) and ain (abode)

Nahan besides being a district headquarters, is an important educational place having a degree college, an arts college, a girls higher secondary school, a high school for boys, industrial technical institute, a district hospital, a veterinary hospital police

station, and district police lines, post and telegraph office, Nahan Foundry and Rosin and Turpentine factory It has facilities for the visitors such as circuit house, a rest house and a sarai besides a municipal rest house On a clear night after rains, one can have an excellent panoramic view of the plains sprawled at the foot of the Shiwalik, so much so that lights of paper mills at Abdullapur are also clearly visible

2 Sirmuri Tal Sirmuri Tal is situated about 16 kms north-west of Paonta Sahib on the right bank of river Giri It is the site of the ancient Capital of Sirmaur The ruins of the town, which is believed to have been destroyed in 1139 Bikrami are still visible Close by is a Tank which is now under cultivation Rajban lying about a mile to the south-east of the ruins of this town was made the capital of the state in 1095 A D by Raja Subhansh Parkash, the founder of the ruling family of Sirmaur It is also now in ruins Among the ruins of Sirmuri Tal is a stone with a deep hole lying on the top of the small hillock on the southern bank of the Giri In this hole the pole is said to have been fixed for the rope on which the Juggler girl used to dance and by whose curse the town was destroyed A similar stone is pointed out on the other side of the Giri

3 Majra . Majra lies about 32 kms east of Nahan It was the headquarters of the tehsil till 1893 when it was transferred to Paonta Sahib The famous Jambu Khala bungalow is located closely and it was originally built for Lord Lytton who came here on a tiger hunt

4 Rajgarh Rajgarh fort is situated in tehsil Rajgarh on a natural terrace It is square, with a tower at each corner about forty feet high It was nearly demolished by Gurkhas in 1814, about half mile from the fort is the Rajgarh village Rajgarh is the headquarters of the forest division of that name Areas in the vicinity of Rajgarh have become famous for quality apple orchards in the district

5 Haripur . Haripur was formerly a fort on the border of the Jubbal State The height of the place is 8,802 feet

6. Jaitak · The fortress of Jaitak is now in ruins During the war in 1814, the Gurkhas occupied position herewith a garrison of 2,200 men They were attacked by two British detachments but without success It was not until after a tedious series of operations that the fort was finally captured in the following year

Brief description of Places of religious interest

1 Renuka Lake : The sacred lake of Renuka is an important place of religious and tourist interest It is situated at a distance of about 42 kms from Nahan, and is linked by an all weather motorable road The sacred Parashuram Tal (Tank) is located near the lake There is a rest house, tourist inn, a forest sanctuary and pretty surroundings

2 Paonta Sahib Paonta Sahib is situated at a distance of about 45 kms from Nahan on the Nahan-Dehra Dun road It is an important pilgrim centre for the Sikhs Guru Gobind Singh, the 10th Guru of Sikhs, resided here for about three years from 1742 to 1745 Bikrami and therefore, the place is considered sacred The town houses a famous Gurdwara where fairs are held on the occasion of Hola in March and Baisakhi in April The Gurdwara is visited by thousands of pilgrims on the occasion of the Hola festival It also has a fine Hindu temple, built by the daughter of Raja Fateh Parkash on the bank of the Jamuna On her request, she was cremated here and a fine temple was built on the spot

3. Tirlokpur Tirlokpur is situated on an isolated hillock at a distance of about 13 kms from Nahan The place is famous for its temple – of goddess Bala Sundari, who was manifested with Shakti An annual fair is held at this place in April in her honour

4 Katsan Devi The Katsan Devi pass lies at a distance of 15 kms from Nahan The elevation of the place above mean sea level is 2,500 feet The Devi's temple lies in a thick forest of sal trees with no habitation near it The place was once a resort of tigers, but none are now found

5 Mangarh . Mangarh is a village in tehsil Pachhad about 16 kms off Sarahan It has an ancient Hindu temple that traditionally connects with the Pandwas

6 Baghani · Situated about eight miles from Paonta Sahib, Baghani is another centre of religious interest to Sikhs Guru Gobind Singh is said to have defeated

the combined forces of some hill Rajas there after a grim battle

Places of tourist interest

1 **Sarahan** Sarahan is headquarters of tehsil Pachhad and Community Development Block and lies on Shimla-Nahan road There is a High School, a Primary Health Centre, a Post Office, a Weaving Centre, a Tailoring Centre, a Police Station, and a Rest House The village is electrified

2 **Dadahu** Dadahu is worthy of special mention by virtue of its being headquarters of Rainka tehsil The place has a higher secondary school, a dispensary, a police station and bazar It is a big marketing place for potatoes, green ginger and chilies

3 **Sangrah** Sangrah was the headquarters of Palvi tehsil till 1948 Bikrami It commands a fine view of the Sain range The place has a Senior Secondary School, a Post Office and a Police Post, besides a P W D rest house and various tehsil level offices

4 **Dhaulakuan** · Dhaulakuan is about sixteen miles east of Nahan on the Nahan-Paonta Sahib road Its agricultural, horticultural and sericultural farms have made significant contribution for the development of agriculture, horticulture and sericulture in the district

5 **Kolar** It is a village in tehsil Paonta Sahib about 5 miles from Nahan There is a Senior Secondary School and a branch Post Office

6 **Kala Amb** Kala Amb is situated at a distance of 17 kms from Nahan It has a Senior Secondary School a Veterinary Dispensary and a Police Post It is important industrial focal point in the district and private engineering college has been set up here to cater the needs of technical education in the state

7 **Rajana** The Rajana village is situated in tehsil Renuka at a height of 5,500 feet above the mean sea level and at a distance of 9 miles from Dadahu It has a population of 850 persons There is a Primary School and a branch Post Office

8 **Kamrau** The village Kamrau is in sub-tehsil Kamrau, about 45 miles from Nahan and 18 miles off Paonta Sahib There is a Primary School, a Senior Secondary School, a Branch Post Office and a Ayurvedic Dispensary, besides sub-tehsil office and other offices

9. **Mahipur** . It is about 26 kms from Nahan It has some pretty water falls It is situated on a plateau between lofty hills on three sides The plateau is intersected by a hill stream which makes it very fertile

10. **Banehti** It is situated on the Sarahan road at a distance of 17 kms from Nahan The place commands a fine view of the Nahan Shiwalik It lies at an elevation of 4,643 feet above the mean sea level

11 **Bhujjal** Bhujjal is of interest merely by virtue of being a comping ground It lies on a plateau and cammands a fine view of the Jubbal hills The chur peak has two stages from this camping ground

12. **Shalai** · It is a big village in tehsil Shalai at a distance of 45 kms from Paonta Sahib Headquarters of Shalai Community Development block is located here It has an Allopathic Dispensary, a Post Office and a High School

13. **Chur Peak** Also called Chur Chandni i e , the peak of Silver bangle is 11,982 feet high It is the highest summit among the mountains which occupy the Sub-Himalayan tract At the foot of the peak. there is a temple and a spring The peak remains snow clad from December to April and in clear days it is visible even from Ambala

(x) Major characteristics of the district

Sirmaur district is endowed with two economic resources viz-agricultural land and rich dense forest The district is well known for its quarries and huge deposites of natural wealth There are various industrial units like Nahan Foundary, Resin and Turpentine factory, Cement factory and allied serviceable industries The district exports ginger, apple, potato, sugarcane and vegetables etc to the other districts of the state and other states The district has the great potentiality of hydrolic energy With a view to create employment in rural sector, various industrial, tailoring, craft and weaving centres have been established in the rural sectors The milk production is another characteristics of district The farmers had started a co-operative milk dairy and milk is supplied to the urban centres and other trading places The excess milk produced is converted into butter and ghee during the slack season

Sirmauri is the principal dialect and is the mother tongue of about eighty per cent of the population Apart from Sirmauri, Gorkhali, Punjabi, Pahari and Jaunsari languages/dialects are also spoken Among the Hindus, Khash Rajputs form the biggest group A large number of rural dwellings have hardly any touch of architectural beauty or interior decoration As opposed to these, houses in urban areas offer a better sight They have got better architectural designs and are built with bricks or stones with cement or lime Broadly speaking, the pattern of food is the same in all the tehsils/sub-tehsils of Sirmaur district The staple food of the people generally consist of wheat, rice, maize, pulses and vegetables Special dishes are prepared on the festive and ceremonial occasions Most of the people of the district are meat eaters and relish on meat They are addicted to consume locally made alcohal and country liquor and Indian made foreign liquor is also consumed by them in the fairs, festivals and on arrival of guests and relatives Diwali, Dushehra, Holi, Budi Diwali etc are the main fairs and festivals in the district besides the locally organized fairs like Renuka fair etc

Contribution of the district : The district has given many saints, freedom fighters and heros to the nation Dr Yashwant Singh Parmar, the first Chief Minister of Himachal Pradesh belongs to Bagthan village of Nahan tehsil of Sirmaur district Tenth Sikh Guru Gobind Singh stayed at Paonta Sahib for more than four years and established the famous Paonta Sahib Guirudwara at the bank of river Yamuna Renuka is the birth place of Lord Parshurama and sacred grove of his father Saga Jamdagni The only lake Renuka named after the name of the mother of Lord Parshurama is also situated in the district The history of the popular uprising Pajota Andolan of 1942 was started under the aegis of the Kisan Sabha in which Shri Laxmi Singh and Vaid Surat Singh played prominent parts It was so well organized that Martial Law had to be declared in the Pajota area The dwellers of the Trans-Giri and Cis-Giri claim their descent from the Pandavas and Kaurvas of Mahabharta In winter, they organize thoda game in which they compete by the name of Pasha and Satha team, symbolising Pandavas and Kaurvas team The district has so many tals like Sirmuri Tal, Rani Tal etc

(xi) Scope of Village Directory and Town Directory

Village Directory : The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction The format of village directory has 23 columns providing village-wise data of location, area, population, land use pattern and amenities etc

The details of each column of village directory are explained as below -

Column-1 Serial number of the village is indicated in this column

Column-2 gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district In the state of Himachal Pradesh first PLCN 00,000,100 has been assigned to village 'R F LUJ' in Pangi tehsil of Chamba district which happens to be first village, tehsil and district while the last PLCN of 02,011,800 has been assigned to the last village 'DHAR CHALING GAARH' of the state in Sangla tehsil of Kinnaur district which happen to be last as per procedure adopted for assigning location code number The district census handbook of 1991 Census as well as updated district and tehsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages The last two zeros will be used if new villages are created out of existing villages in subsequent census Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas The district handbook of 1991

Census has been used as basis for filling up the name of the village including the forest and uninhabited villages But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tehsildar of each tehsil

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department

Columns–4 & 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz upto 5 kms , 5-10 kms and 10+ kms of the nearest place where the facility is available has been given This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development The abbreviations used to indicate these amenities have been explained separately in the subsequent section The list of colleges, senior secondary schools, hospitals, post & telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end

Column-10 shows the number of banks – Commercial banks and Co-operative banks In addition to this, the list of banks procured from the lead bank of the district has also been added in this book

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies

Column-12 shows the number of recreational and cultural facilities viz Cinema/video hall, sports club, stadium/auditorium facility available in the villages

Column-13 Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village

Column-14 refers to the state of roads etc leading to the village This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways

Column-15 gives the information of the nearest town and its distance in kms from the village in brackets from the referent village In case, the nearest town is located in another state, the name of the state has also been furnished

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations

Column-17 gives the information as to whether newspapers/magazines are received in the village

Column-18 gives the information of most important commodities manufactured in the village

Columns- 19 to 23 give the details about land utilization The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories These are as follows -

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area

Column 20 and 21 show area irrigated by different sources of irrigation and un-irrigated area These two columns cover all agricultural land which equals

to net cropped area sown with crops and orchards including current and other fallow lands In case of irrigated land, the source of irrigation has also been indicated

Column-22 Culturable waste This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession Such lands may be either fallow or covered with shrubs and jungles which are not put to any use Lands under thatching grasses, bamboo bushes and other groves for fuel etc , which are not included under orchards or forests come under this column All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column

Column- 23 Area not available for cultivation This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost

Column- 2 & 1 indicate the name of the village and serial number of village respectively

Town Directory : The Town Directory is presented for each town in the district covering different aspects of urban life Seven statements (I to VII) have been included for presentation of this data The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities It covers all the towns in the district statutorily notified as well as non-municipal towns All the towns in the district are arranged in alphabetical order

The data collected in these statements have largely been furnished by the municipal bodies For non-municipal towns, the cantonment executive officers supplied the information

Statement-I Status and Growth History : The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001 Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tehsil/sub-tehsil to which town belongs While column 5 shows the name of C D block, area of each town in sq kms is depicted under column 6 Column 7 deals with the number of households including houseless households as per the 2001 Census Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001 Column 19 of the statement shows density of towns as per the 2001 Census Columns 20 to 22 depict the sex ratio from 1981 to 2001 Censuses

Statement-II Physical Aspects and Location of Towns : In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5 Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/ canal (if within 10 kms)

Statement-III Municipal Finance : This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads There are in all 16 columns in the statement showing receipt and expenditure under different heads

Statement IV Civic and Other Amenities : The statement displays information under 20 columns The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc

Statement-V Medical, Educational, Recreational and Cultural Facilities : This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and

number of hospital beds available in each institution Educational facilities by level/type of courses and recreational and cultural facilities

Statement-VI Trade, Commerce, Industry and Banking This statement presents information under 11 columns in respect of each town Columns 3 to 8 indicate three most important commodities exported and manufactured in the town Information on number of banks available in the town appears under column 9 Columns 10 and 11 shows number of agricultural and non-agricultural credit societies operating in each town respectively

Statement-VII Civic and other amenities in Slums There are no slum areas notified in Himachal Pradesh Hence no information is collected in this regard

PART-A
VILLAGE AND TOWN DIRECTORY

Section-I
Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village

Village is a statutory recognized unit having a definite boundary and separate land records In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component The villages which are considered as a Census Town, the amenities data are shown in the Town Directory For those villages which have partly merged in an outgrowth of U A , the amenities data are shown in the Village Directory for that particular village

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i e , Serial number, Name of village, location code number with Hadbast number in brackets and area of the village 'Uninhabited'is indicated against column no 4 to 18 The land use data for such villages are shown in col 19 to 23

The Village Directory format has 23 columns and the details given under each column for the village are as follows

Column 1 . Serial Number

Self explanatory All the villages within the CD Block are presented serially in the ascending order of their location code number

Column 2 Name, Hadbast Number and Location Code Number of village

The name, hadbast number and location code number of the village are shown against this column This also includes the forest and uninhabited villages

Column 3 Area of the village

The area of the villages in hectares are given Wherever the area figures was not furnished by the concerned department the column is left blank

Column 4 . Total population

The total population of the village as per 2001 Census is given against this column

Column 5 . Number of households

The number of households as per 2001 Census is given in this column

Amenities

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communications, power, approach road etc in each village has been depicted with appropriate codes against the column concerned Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz <5 kms , 5-10 kms and 10+ kms of the nearest place where the facility is available is given Column wise details are given below

Column 6 Educational

Classes upto class V included in Primary School This will include nursery school, kindergarten school pre-basic school, pre-primary school, junior basic school upto class V

Classes from VI to VIII are included in the middle school

Classes from IX and X included in High secondary school Classes XI and XII are included in senior secondary school

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e g Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e g P(3), M(4), etc

Column 7 Medical

Availability of medical facility within the village is indicated by following codes

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre/Community Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T B Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e g H(3), D(4), etc

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post & Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc the same is indicated in codes mentioned below along with the

number of banks in brackets. If not available the distance of nearest place where the facility exist is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud Road	MR
(iii)	Foot Path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State Govts. is furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectares up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W

(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Blockwise of the district

Appendix-I-A Indicates number of villages CD Blockwise having one or more primary schools

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Appendix-V Summary showing number of villages not having Scheduled Castes population

Appendix-VI Summary showing number of villages *not having Scheduled Tribes* population

Appendix-VII The appendix shows the list of villages according to proportion of the Scheduled Castes (VIIA) and Scheduled Tribes (VIIB) to the total population by ranges

LIST OF VILLAGES UNDER EACH GRAM PANCHAYAT
Name of the District Sirmaur

N A

SECTION-II
TOWN DIRECTORY

Section- II
Town Directory

Note explaining the abbreviations used in Town Directory :

Statement I · Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels It is presented according to 2001 Census Population of the town as follows

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city

The civic administration status of the towns is indicated within bracket against the name of the town The following abbreviations are used to denote civic status of town

(i)	Municipal Corporation	M Corp
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum & Minimum Temperature of the town is recorded

Column 6, 7 and 8 ·

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero

Column 9 & 10 ·

Name of the nearest city with one lakh and more and five lakh and more population are recorded

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal, its name is to be mentioned If not available, then the name of nearest place with distance, where such facility exists is to be mentioned

Statement III : Municipal Finance 1998-1999

Itemwise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) . Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) . System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers

The codes used for different types of drainage system are as follows

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system The following codes are used in these columns

Column 13:

(i)	Tap water	T
(ii)	Tubewell water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14

(v)	Over Head Tank	CHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded

Column 16 to 20 · Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i e Domestic, Industrial, Commercial, Road lighting (points) & others

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

The data covers all such medical institutions run by or aided by Government/Semi Government/ Local bodies and Charitable institutions or Social

agencies like the Missionaries Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	TB Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e g D(3), NH(8), etc The institutions have further been distinguished by providing additional codes within the bracket as given below

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 · Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc of the government or semi government or autonomous bodies, public sector undertakings etc

The following codes are used

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B Ed College, Teacher's Training Institute, Music/Dance School, Nursing School etc are covered under 'Others'

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools

School up to class V are treated as Primary or elementary schools These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV

Schools upto VIII are considered as Middle school or Junior Secondary

Schools upto class X are considered as Matriculation or Secondary schools

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre-University/Junior College etc This would cover 10+2 classes whether held in schools or college

If there are composite schools like middle schools with-primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively For example, if in a town, there are two Primary Schools and one Middle school with Primary classes the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e g P(4), M(3)

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission There are number of Adult Education Centres which are included in these columns

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities The particulars of permanent recreational facilities are considered for these columns

Column 20 . Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and name of three most important commodities manufactured in the town are recorded

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns

Statement VII : Civic and other amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town Area Committee etc

Paonta Sahib (M Cl) a class-IV town is the second town in the district Paonta Sahib was notified as town for the first time in 1951 Census with a population of 946 and an area of 6 2 sq kms During the 2001 Census this population rose to 19,090 persons with a growth rate of 44 5 per cent during 1991-2001 Paonta Sahib urban area has been growing at a faster rate due to industrial growth in this town The density of the town during 2001 Census is 3,079 persons per sq km with sex ratio of 863 females per 1 000 males

Rajgarh, Nagar Panchayat was declared an urban area in 1991 Census and had a population of 1,780 persons which rose to 2,527 persons in 2001 Census showing an increase of 42 0 per cent during 1991-2001 It has an area of 2 1 sq kms with density of population of 1,203 persons per sq km as per 2001 Census The sex ratio of this town was 750 in 1991 Census which rose to 786 females per 1,000 males during 2001 Census

Statement II : It deals with the physical aspects and location of towns as in 1999 Nahan town is connected with the bus route and is 135 kms away from Shimla, the state headquarters It is also a district headquarters of Sirmaur district The nearest railway station for this town is Barara at a distance of 58 kms The nearest cities with one lakh and

more and 5 lakh and above for the town is Ambala (Haryana) and Chandigarh (U T) at a distance of 70 and 90 kms respectively Nahan town is having the tehsil as well as sub-divisional headquarters Nahan town experiences annual rainfall of 1,105 m m Average maximum and minimum temperature of this town for the reference period is not available

Paonta Sahib town a class IV town is situated at a distance of 182 kms from Shimla, the state headquarters Nahan the district headquarters is away from Paonta Sahib town at a distance of 45 kms The nearest cities of Dehradun (Uttaranchal) and Chandigarh (U T) are situated at a distance of 51 and 125 kms respectively The nearest railway station is at Dehradun (Uttaranchal) at a distance of 51 kms The town is linked with bus service and navigable water way within a distance of 0 km Paonta Sahib town experiences an annual rainfall of 1,433 m m with an average maximum and minimum temperature of 40°c and 5°c respectively

Rajgarh Nagar Panchayat a class VI town is situated at a distance of 100 kms away from the state headquarters, Shimla The district headquarters Nahan is 130 kms away from Rajgarh town The nearest cities with a population of 1 lakh and 5 lakh and above are Shimla and Chandigarh (U T) at a distance of 100 kms from the town The nearest railway station is at Solan 40 kms away from Rajgarh (NP) Rajgarh (NP) experiences an annual rainfall of 95 4 m m

Statement III : It deals with the maunicipal finances as in 1998-99 Nahan Municipal Council has a total receipt of Rs 19,397,000 and an expenditure of Rs 15,982,000 A largest amount of Rs 17,898,000 has been derived through Government grant and followed by an amount of Rs 1,085,000 derived as revenue from municipal properties and power a part from taxation A sum of Rs 5,023,000 has been spent on public works which is the largest for Nahan, M Cl The expenditure on general administration was Rs 4,521,000 on public safety, Rs 2,159,000 and 4,279,000 on public health and conveniences

A total receipt of Paonta Sahib M Cl was Rs 11,397,000 during 1998-99 The total expenditure was Rs 11,397,000 Of the total receipt, a sum of Rs 7,827,000 and Rs 1,220,000 has been received through Government Grant and through taxes respectively Remaining Rs 2,350,000 have been received from municipal properties (Rs 975,000) and other sources (Rs 1,375,000) Of the total expenditure of Rs 11,397,000 of Paonta Sahib, M Cl, Rs 1,240,000 have been spent on Public Health and conveniences Rs 796,000 and Rs 423,000 have been incurred on public safety and public works and Rs 1,097,000 on general administration respectively The remaining amount accounting Rs 7,841,000 have been spent on other items

Rajgarh Nagar Panchayat has a total receipt of Rs 953,000 during 1988-99 The maximum amount of this receipt Rs 901,000 come through Government grant Sum of Rs 52,000 has been derived from taxes In the case of total expenditure of Rs 2,42,000 sum of Rs 68,000 has been incurred on general administration followed by Rs 92,000 spent on public works and Rs 56,000 on public safety A minimum amount of Rs 26,000 has been incurred on public health and conveniences

Statement IV : It deals with civic and other amenities available in each town of the district as per the reference year 1999 Nahan town has Scheduled Castes population of 5,516 and Scheduled Tribes population is 130 persons out of the total 26,053 population Nahan Municipal Council has a pucca road length of 35 6 kms and kutcha road of 25 0 kms The system of sewerage is box surface drains and sewer There are 2,817 water borne and 536 other types of latrines in the town The night soil is disposed through wheel barrow and septic tanks The water supply is through taps and stored in service reservoir and over head tanks with a capacity of 1,910 7 and 1,499 4 Kilolitres each The town has a fire fighting service of its own There are 7,123 domestic, 56 industrial and 1,637 commercial connections in the town in addition to 1,165 road light points

Paonta Sahib Municipal Council has pucca road length of 10 5 kms and kutcha road lenght of 1 0 km The town has population of 19,090 persons out of which 2,855 persons belong to Scheduled Castes and 34 to Scheduled Tribes as per 2001 Census The sewerage system in the town is sewer and open surface drains There are 738 latrines all water borne

The method of disposal of night soil is septic tank and head load Source of water is tap and well and the system of storage of drinking water is over head tank with a storage capacity of 765 0 kilolitres The town has its own fire fighting service The town has 3,970 domestic, 236 industrial, 1,030 commercial and 500 road lighting points

Rajgarh Nagar panchayat has a pucca road length of 3 5 kms and 2 5 kms kutcha road The population of Rajgarh town is 2,527 persons comprising 723 persons of Scheduled Castes and only 2 persons of Scheduled Tribes It has sewer and open drains as sewerage systems There are 479 water borne and 40 service latrines in the town

The night soil is disposed of through wheel barrow and septic tank The drinking water is made available through the taps and tank and has a service reservoir having a capacity of 496 0 kilolitres The fire fighting service is available at Solan at a distance of 40 kms from the town In case of electricity, the town has 907 domestic, 10 industrial, 351 commercial connections and 78 road lighting points There are 142 other electric points in the town

Statement V : It deals with medical, educational recreational and cultural facilities as available in 1999

Nahan town has 3 hospitals, one dispensary, a family welfare center, T B clinic etc with 260 beds It has one arts, science and commerce college and one sanskrit college The facilities of medical and engineering college are available at Chandigarh (U T) and Kala Amb at a distance of 90 and 18 kms respectively For polytechnic the nearest place is at Chandigarh (U T) 6 vocational training and training in shorthand-cum-typing institutions are functioning in the town Nahan town has 5 higher secondary, 7 secondary, 8 junior secondary and 16 primary schools The facility of adult literacy center is available in the town The town is without a working women hostel and this facility is available at Chandigarh (U T) at a distance of 90 kms The town has one stadia, one cinema, one auditoria each There is one public library and a reading room each available in the town

Paonta Sahib town has one hospital, one dispensary, a family welfare center and one TB clinic equipped with 140 beds The facility of college is available in the town Medical College, engineering college and polytechnic institute are available at Chandigarh (U T) and Dehradun (Uttaranchal) at a distance of 125 and 48 kms respectively There are 2 higher secondary, 6 secondary, 6 junior secondary and 12 primary schools in the town For adult literacy classes the nearest place is Nahan at a distance of 45 kms One can avail the facility of working women hostel at Chandigarh (U T) at a distance of 125 kms The town has one stadia, cinema and auditoria each

Rajgarh town has one allopathic and leprosy hospital, one family welfare center and one T B clinic with 50 beds Degree college education is available at Solan at a distance of 40 kms from the town The nearest medical college is available at Shimla at a distance of 100 kms and engineering college at Chandigarh (U T) at a distance of 100 kms For polytechnic the nearest place is Kandaghat at a distance of 55 kms The vocational training is available within the town There is a higher secondary and secondary school each, 2 junior secondary schools besides 3 primary schools The nearest working women hostel is at Solan which is 40 kms away from the town the town has no recreational places

Statement VI : It deals with the trade, commerce, industry and banking in the urban areas of the district Nahan town exports foundry products, turpentine and rosin Three most important commodities manufactured in the town are manhole cover, turpentine and rosin There are 8 banks, one agricultural and 10 non-agricultural credit societies in the town

Paonta Sahib town exports bakery products, lime and fire-bricks The three most important items like lime, fire-bricks and bakery products are manufactured in the town Town has 9 banks, one agricultural and three non-agricultural credit societies

Rajgarh town mainly exports tomatoes, potatoes and peas Jam, sauce and pickle are the main three items manufactured in the town There are 3 banks in Rajgarh Nagar Panchayat

Statement-VII : It deals with the Civic and other amenities in slums, 1999 There is no recognized/ notified slum in this district Hence the statement shows nil information

PART-B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872 Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B Part I contained the Location Particulars, Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration The Census Schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the Schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census For Census 2001, about 202 million Schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October 2002

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population In the earlier censuses, the total Scheduled Castes and Scheduled Tribes population were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA This is because the Scheduled Castes status had to be determined in relation to the religion of the individual Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled *Castes/Tribes returns The Scheduled Castes and the* Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division Data Processing Division Data Dissemination Division and Map Division

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population are presented by sex and rural-urban residence This data is presented at different levels, namely, India, States/Union Territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union Territory

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract Appendix to District Primary Census Abstract Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract This practice was continued in 1991 also In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included In 1981 Census only main workers were presented in to four categories One of the novel features of the primary census abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also This will help the data users in better analysis and understanding of this literacy data

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels The level of presentation of Primary Census Abstracts are as under

	Name of the Primary Census Abstract	Level of presentation
1	District Primary Census Abstract	District/CD Block/UA/City/Town
2	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4	Village Primary Census Abstract	CD Block/Village wise
5	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census This practice is continued in 2001 Census also The data for each CD Block is presented both for rural and urban areas separately All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s)

The District Primary Census Abstract is presented in 59 columns The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometres The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares The area figures of the CD Block is the total of the village areas coming under each CD Block The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level The total area figures of all the tehsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tehsil The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and P S level the same may not be covered under the area of the villages Apart from this it may also differ due to varying methods of computation adopted at different levels

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town

ANNEXURES

ANNEXURE-I

STATEMENT SHOWING NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Owing to the fact that a few villages in Himachal Pradesh fall in more than one Panchayat, this annexure could not be generated

ANNEXURE - II

NOTE ON FERTILITY, MORTALITY AND MIGRATION-1991 CENSUS

Fertility Levels : Births, deaths and migration are three components of population change in any geographical unit Fertility is a major factor which affects population growth In the 1991 Census, questions on fertility relating to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table on fertility The first three questions were asked to all ever married women and the last question was asked to currently married women Various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 1991

Different fertility measures reveal higher levels of fertility in the district compared to state Age at marriage of females in the State is also higher as compared to district Child Woman Ratio in the district is higher in comparison to the State average

The following table gives Age specific Marital Fertility levels for 1991

Age-group	Sirmaur District			Himachal Pradesh		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	161	158	214	142	142	140
20-24	307	308	301	259	260	239
25-29	220	222	206	170	172	152
30-34	114	120	66	79	81	61
35-39	58	60	38	38	39	28
40-44	32	36	3	17	18	9
45-49	14	14	10	9	9	9

It may be seen from the above table that fertility level in the district are higher as compare to state figures in all the age groups Rural fertility rates are higher compared to urban rates except age groups 15-19 in the district Among the age groups, the higher fertility rates are observed in the age group 20-24, followed by age group 25-29 at both state and district level

Child Mortality Rates, 1991

Information on the questions on children ever born and children surviving canvassed for all ever married women From this, estimates of child mortality have been worked out

Persons / Males / Females	Estimates of child mortality, 1991							
	Sirmaur district				Himachal Pradesh			
1	2	3	4	5	6	7	8	9
	q(1)	q(2)	q(3)	q(5)	q(1)	q(2)	q(3)	q(5)
Persons	94	107	109	118	82	86	92	95
Males	94	111	116	124	84	90	95	98
Females	93	104	102	111	81	82	89	92

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given above as q(1), q(2), q(3) and q(5), it is observed that the level of child mortality in the district is substantially higher as compared to the state The notable feature is that female child mortality rate is low as compared to male child mortality rate both at the district as well as at the state level

ANNEXURE-III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

State/ District	CBR	TFR	TMFR	GFR	GMFR	Child-Woman Ratio	Mean age at Marriage	Number of children ever born to each married women in the age group of 45-49

The Annexure-III reflects the crude birth rate, various fertility rates, child woman ratio, mean age at marriage at district level in the state

Migration (Movement of population)

Migration is the third component of population change, the other two being Mortality and Fertility A person is considered as migrant by place of birth if the place in which she/he is enumerated during the Census is other than the place of her/his birth Similarly, a person is considered as migrant by place of last residence if the place in which she/he is enumerated during the Census is other than her/his place of immediate last residence

Internal and International Migration

The migrational movements are of three types -

(i) Migration within the State itself with its components
   (a) Migration within the district of enumeration (intra-district migration)
   (b) Migration from one district of State to another district of State (inter-district migration)
(ii) Migration from one State to another State of the country (inter-state migration), and
(iii) Migration from one country to another country

The first two streams together constitute internal migration, while the last type of movement is called international migration

Why people migrate - For the first time in the Census, reasons for migration were elicited in 1981 The reasons for migration were broadly categorized as (1) Employment (2) Business (3) Education (4) Marriage (5) Moved after Birth (6) Moved with house hold and (7) Any other reason

Reasons for migration have been elicited only with reference to movement from place of last residence

Impact of Migration - The growth of population of a particular place depends upon natural increase due to excess births over deaths and migration Knowledge of trends of migration helps in future planning of a region

ANNEXURE-IV(A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH - 1991 2001 CENSUSES

Place of Birth	Percentage distribution of Migrants by place of Birth in the district					
	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Migrants born within the state of enumeration	95,546 (75 78)	21,311 (59 74)	74,235 (82 11)	105 858 (74 31)	18 503 (52 76)	87 355 (81 35)
(i) Migrants born elsewhere in district of enumeration	84,970 (67 39)	16,580 (46 48)	68,390 (75 64)	95,579 (67 10)	14 349 (40 91)	81 230 (75 65)
(ii) Migrants born in other district of the State	10,576 (8 39)	4,731 (13 26)	5 845 (6 47)	10 279 (7 22)	4,154 (11 84)	6 125 (5 70)
(B) Migrants born in other States of India	26,674 (21 16)	11 638 (32 63)	15 036 (16 63)	32 943 (23 13)	14 091 (40 18)	18 852 (17 56)
(C) Migrants born in other countries	3 857 (3 06)	2 721 (7 63)	1 136 (1 26)	3 648 (2 56)	2 177 (7 06)	1 171 (1 09)
Total Migrants	**126,077 (100 00)**	**35,670 (100 00)**	**90,407 (100 00)**	**142,449 (100 00)**	**35,071 (100 00)**	**107,378 (100 00)**

Annexure-IV(A) depicts the percentage distribution of migrants by place of birth during 1991 and 2001 Censuses in Sirmaur district In 1991 Census, there were 126,077 total migrants, comprising 35,670 males and 90,407 females Of these migrants ,95,546 (75 78 per cent) were born within the state of enumeration On the other hand, 26,674 (21 16 per cent) consisting of 11 638 (32 63 per cent) males and 15 036 (16 63 per cent) females were born in other states of India and 3,857 (3 06 per cent) consisting of 2,721 (7 63 per cent) males and 1,136 (1 26 per cent) females were those who were born in other countries Whereas in 2001 Census 142,449 persons constituting 35 071 males and 107 378 females were recorded as total migrants in the

district. Out of these total migrants 105,858 (74 31 per cent) constituting 18,503 (52 76 per cent) males and 87,355 (81.35 per cent) females are migrants who were born within the state of enumeration, 32,943 (23 13 per cent) comprising 14,091 (40.18 per cent) males and 18,852 (17 56 per cent) females were born in other states of India and 3,648 (2 56 per cent) consisting of 2,477 (7.06 per cent) males and 1,171 (1 09 per cent) females were born in other countries

On comparison of 1991 and 2001 Censuses data, slight variation in migration pattern has been noticed In the categories of migrants born within the state of enumeration and migrants born in other countries the percentage has gone down from 75 78 per cent to 74 31 per cent and from 3 06 per cent in 1991 to 2 56 per cent respectively whereas the same has been risen from 21 16 per cent to 23 13 per cent in the category of migrants born in other states of India Further, it is interesting to note that during 1991 and 2001 Censuses females dominated in the category of migrants born within the state of enumeration while males dominated in the categories of migrants born in other states of India and migrants born in other countries

ANNEXURE-IV (B)

MIGRANTS BY PLACE OF LAST RESIDENCE, 1991-2001 CENSUSES

Place of Last residence	Percentage distribution of Migrants by place of Last residence in the district					
	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Last residence within the state of enumeration	101,447 (78 51)	24,366 (65 58)	77,081 (83 73)	112,015 (76 33)	21,814 (58 39)	90,201 (82 46)
(i) Last residence elsewhere in district of enumeration	89,437 (69 22)	18,716 (50 37)	70,721 (76 82)	101,028 (68 85)	17,168 (45 95)	83 860 (76 66)
(ii) Last residence in other district of the State	12,010 (9 29)	5,650 (15 21)	6 360 (6 91)	10 987 (7 49)	4 646 (12 44)	6 341 (5 80)
(B) Last residence in other States of India	25,458 (19 71)	11,139 (29 98)	14,319 (15 55)	31,674 (21 58)	13,470 (36 05)	18,204 (16 64)
(C) Last residence in other countries	2,305 (1 78)	1,649 (4 44)	656 (0 72)	3,058 (2 08)	2,078 (5 56)	980 (0 90)
Total Migrants	**129,210 (100 00)**	**37,154 (100 00)**	**92,056 (100 00)**	**146,747 (100 00)**	**37,362 (100 00)**	**109,385 (100 00)**

Annexure-IV(B) depicts migrants by place of last residence during 1991 and 2001 Censuses in Sirmaur district At the 1991 Census, out of the total 129,210 migrants, 101,447 (78 51 per cent) reported their place of last residence within the state of enumeration, 25,458 (19 71 per cent) reported their place of last residence in other states of India and 2,305 (1 78 per cent) reported their place of last residence in other countries Similarly in 2001 Census, out of total 146,747 migrants persons, 112,015 (76 33 per cent), 31,674 (21 58 per cent) and 3,058 (2 08 per cent) have reported their place of last residence within the state of enumeration in other states of India and in other countries respectively Females having last residence within the state of enumeration dominated in the migration whereas males dominated in the categories of place of last residence in other states of India and in other countries

ANNEXURE-V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE DISTRICT AS PER 1991-2001 CENSUSES

A person who can merely read but can not write is not considered literate In Census, to be a literate, it is not essential that a person should have received any formal education or passed any prescribed examination It is better to distinguish between literacy and educational level Literacy means the proportion of literates to total population whereas educational level relates to stage of schooling or college or other training attained by a person

In Census, children below 7 years of age are treated as illiterates and excluded from the total population for working out the literacy rate This is known as effective literacy rate The data collected on literacy and educational level help in measuring the progress of literacy as well as quality of education

The litracy rate of State and Districts are given below -

Serial number	State/ District	Literacy rate 1991	Rank in literacy rate among districts, of State	Literacy rate 2001	Rank in literacy rate among districts of State
1	2	3	4	5	6
	Himachal Pradesh	**63 86**	-	**76 5**	-
