Pushkar Fair

Most The most easily identifiable of Rajasthan's many fairs, Pushkar, has come to symbolise the heartbeat of the people in the state. It is held in the month of Kartik Poornima. Pushkar, the temple town is just 11 km. away from Ajmer. The fair is held in the vast stretching desert around the famous Lord Brahma Temple. The highlight of the fair is the trading of camels particularly of camels. It is probably the world's largest camel fair where camels are bought, sold, decked up and paraded on the sand dunes, presenting a picturesque sight. The camel, horse and donkey races are the events, which attract large gathering of people.

The Pushkar Fair brings together a large number of people from different parts of the country, which includes pilgrims and tourist who are on a pilgrimage or to enjoy the festivities of the fair.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The series of District Census Handbooks has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several new innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Numbers (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from 1 to N. Each village has been assigned an eight digit code. The first six digits represent the code of the village as existing at the present census. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001, are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

The responses for almost all the questions in the Houselisting Schedule had pre-coded options. This not only helped the enumerators to record the response easily but at a later stage would hopefully facilitate quicker data processing. Apart from the improvements made in the format of the Houselisting Schedule, the scope of Houselisting was considerably expanded with the inclusion of new questions based on requirements of various data users and planners. The new features of the Houselisting Schedule are listed below.

- For the first time, different uses of census houses have been standardized and grouped into ten main uses and assigned code numbers.
- Plastic has been added in the list of material of wall and roof of a census house, as it is often used for shelter in slums and shanties.
- In the previous census, the location of drinking water source was categorized into two locations viz. 'within premises' and 'outside premises'. In the Census of India, 2001, the source 'outside premises' was split into two categories namely 'near the premises' and 'away from the premises'.
- The scope of question of availability of electricity was expanded to include six sources of lighting. Besides no lighting, this included sources like electricity, kerosene, solar, other oil and any other source.
- In 1991 Census, a question on availability of toilet facilities to the household was canvassed while in Census of India, 2001, specific information on availability of latrine within the house by the type of latrine was sought.

In addition to expending the scope of the questions canvassed during the Houselisting Operations in the 1991 Census, the following new questions were added in the Houselist Schedule for Normal Households at the Census of India, 2001.

- If the Census house was used for residential or partly residential purposes, the condition of the census house was categorized as good, livable or dilapidated based on the perception and response of the respondent.
- A question on number of married couple(s) living in the household was canvassed.
- Information was sought on the number of married couple(s) having independent room for sleeping.

- Information as to whether the waste-water outlet of the house is connected to 'closed drainage' or 'open drainage' or has not drainage was collected.
- A question on availability of bathroom within the house was included.
- Information on availability of kitchen within the house was also sought.
- Availability of certain assets to the households namely radio/transistor, television, telephone, bicycle, scooter/motor cycle/ moped, car/jeep/van were also included.
- It was also enquired whether any banking service was being availed by the household.

The Household Schedule adopted for the Population Enumeration also primarily had pre-coded options for majority of the questions. The questions for each data item were made as self-explanatory as far as possible for easy understanding. The comprehensive Household Schedule had three parts and two sides A and B. Part I contains the Location Particulars; Part II relates to Individual Particulars and Part III contains questions for Household engaged in Cultivation/Plantation. To facilitate quick tabulation for bringing out Provisional Population Totals, provisions of page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates and workers and their categories by sex. Most of the questions canvassed during the 1991 Census, were retained for the 2001 Census, except the question on ex-serviceman, which was dropped during the Census of India, 2001. However, a number of new questions were added in the Household Schedule in view of the suggestions from policy makers, data users and researchers, while the scope of certain existing questions was enhanced.

These modifications are:

- Age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.
- The type of educational institution attended by a person was enlarged to include school, college, vocational institute, other institute and literacy center.
- The scope of the definition of 'work' was expanded in the Census of India, 2001, to include production of milk for domestic consumption. In the 1991 Census, cultivation of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India, 2001.
- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India, 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census is dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census, is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected are - in seeing, in hearing, in speech, in movement and mental.

- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work is collected under this section.
- The Household Schedule has a new set of questions for Household engaged in cultivation/ plantation- i) Net area of land under cultivation/ plantation, ii) Net area of land irrigated and iii) Tenure status. This question was not canvassed at the 1991 Census but was canvassed in the 1981 Census in a slightly different form.
- The signature or thump impression of the respondent has been taken on the Household Schedule for the first time in the history of census. This was not only aimed at obtaining correct and complete information but also for giving an opportunity to the respondents to authenticate the information provided by them. The relationship of the respondent with the head of the household was also obtained. This new feature will pave way in carrying out a methodological study in future on the respondent profile in the census.

In 1981 Census, for the first time, an attempt was made in the series to bring out demographic and other data in diglot, Hindi and English, for a more beneficial use by data user of all categories. Hindi being the official language of the State, a Hindi version of the analytical notes was also added with a view to caters to the needs of all sections of readers. The manner of presentation of the District Census Handbooks for the 1991 Census is by and large the same.

As a necessary corollary to the Handbooks, Panchayat Samities, the basic administrative units of development, administration and planning, were listed out separately for the first time in 1981 Census in relation to those districts wherein they were not coterminous with their tehsils. As an additional attempt, informations relating to population figures as well as amenities available in each village located in the jurisdiction of each Panchayat Samiti were also presented in a separate volume under the title "Supplement to District Census Handbook". However, for reference in the main District Census Handbook, a list of villages forming part of each non-coterminous Panchayat Samiti was provided along with the abstracts of population and amenities for such Panchayat Samities as a whole in the form of Special Annexures.

In order to cater to the over-all needs of the data-users and to facilitate the task of administrators and planners it has now been decided to present the Village Directory and Primary Census data at the Panchayat Samiti level instead of the traditional Tehsil level presentation. It is expected that the presentation of Village Directory and Primary Census Abstract data at Panchayat Samiti level will help the planners in formation of micro-level developmental plans, as the Panchayat Samiti is now the lowest administrative unit for development planning. However, for the convenience of the data users and for the sake of comparability of data at Tehsil level, the Primary Census Abstract has also been presented at the Tehsil/ Town level in the form of an Appendix.

A general note on each district covering information of general interest regarding its history, topography, physiography, administrative set-up and places of tourist and historic importance etc. has also been included with a view to provide comprehensive and more purposeful information about the district as a whole. Population figures of Scheduled Castes and Scheduled Tribes constituting the core of 'Weaker Section' have also been presented at district, panchayat samiti and town level so as to facilitate planning for their welfare both at micro and macro levels.

It is earnestly hoped that this publication will serve its purpose for planners and administrators of welfare schemes and other data users in general.

Prior to 1951, Census Reports were printed for the whole province/state. The idea of preparing the District Census Handbooks separately for each district was conceived during 1951 Census as a part of a plan intended to secure an effective method of preserving the Census data below the district level. The idea was that all the district census tables would be bound together in a single volume called the District Census Handbooks. Since then the District Census Handbooks are being published regularly.

The 1951 Census series of District Census Handbooks was printed in two parts. Part I contained five General Population Tables (A Series), three Economic Tables (B Series), five Household and Age Tables (C Series) and seven Social and Cultural Tables (D Series). In Part II of District Census Handbook "Primary Census Abstract and Village Directory" which showed the basic population figures for each village or town classified by livelihood classes, were included along with some information of general nature.

The 1961 Census series of District Census Handbooks were printed in single volume in which Primary Census Abstract upto village and town/ward level and Village Directory upto village level were given. Besides, some official statistics collected from various state departments, four General Population Tables (A Series), sixteen Economic and Household Tables (B Series), seven Social and Cultural Tables (C Series), four Housing Tables (E Series) and eight Special Tables for Scheduled Castes/Scheduled Tribes were also provided in District Census Handbooks. For the first time in 1961 Census the maps for the district and tehsil were also included in the District Census Handbooks.

In 1971 Census series of District Census Handbooks village-wise 'Village Directory' giving services, facilities or amenities available in the village was given. 'Town Directory' was introduced for the first time giving useful information in respect of every town of the district. Rural Primary Census Abstract upto village level and Urban Primary Census Abstract upto enumeration block level were given in District Census Handbooks. While the District, Tehsil and Town maps were included; the inclusion of Census Tables was dispensed with in the District Census Handbooks in 1971 Census.

The scope of 1981 series of District Census Handbooks was enlarged specially in relation to amenities and land-use pattern. Apart from new items like uses of electricity, details of communication points, information for which was not collected in 1971 Census, a note on each district covering general information on its history, topography, flora, fauna and administrative set up etc. was also added. The format of the Primary Census Abstract was also restructured in the light of changes in economic and other questions canvassed in the 1981 Census but at the same time, all efforts were made to retain comparability with 1971 Census data. The inclusion of Special Primary Census Abstract for Scheduled Castes and Tribes at the Tehsil/Town level was another innovation introduced in 1981 Census series.

The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same as followed in 1981. However, the format of Primary Census Abstract was restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group was included in Primary Census Abstract for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate at the time of the 1991 Census.

One of the most important innovations in the 1991 Census was the Panchayat Samiti level presentation of data in the Village Directory and Primary Census Abstract instead of the traditional Tehsil level presentation.

Deviating from 1991 Census, like 1981 Census four fold industrial classification of main and marginal workers has been presented in 2001 as against nine fold given in 1991.

The mode of presentation of DCHB in 2001 will by enlarge be same as that of in 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc pertaining to 1991 Census of the respective district in the DCHB in the form of Annexures II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

(ii) Brief History of the District

Geologically the hills around Pushkar and Ajmer City are one of the oldest in India. Recent finds of microliths at Khera and Kaderi indicate that human beings inhabited the area ever since the dawn of

civilzation. Links of Mohanjodaro coulture with Rajasthan have been detected and it is possible that the lead found in the shape of small dishes, plumb-bobs and ingots was brought from Ajmer and the black and white schists used for weights were obtained from other parts of the Aravalli hills.

Fragments of painted grayware, non-megalithic black and red ware and northern black polished ware have been found at Chosla (Kekri tehsil) and only non-magalithic black and red ware at Sameliya (Sarwar tehsil). On of the earliest Brahmi inscriptions of pre-Ashokan period has been found in the Bhilot Mata temple in village Badli (kekri tehsil). These finds sub-stantiate the traditional stories connected with Pushkar and the part played by this area in the proto-historic period.

The references to Pushkar in Ramayana, Mahabharat and the Puranas as well as the coins of the period suggest that the local chiefs played a significant role in dealings with the invading Kushans, Sakas, etc., in the first five centuries of the Christain era i.e. till the rise of the Chauhans.

Though the origin of the Chauhans in the 6th century A.D. is variously given by eminent scholars like Col. Tod, Dr. D.R. Bhandarkar, Dr. R.C. Majumdar, Dr. Dasharatha Sharma, G.H. Ojha and others, the result of the exercise of giving a connected account of the ruling house for the next five centuries is pretty confused, and what we finally know for certain is the names of kings like Vasudev, Samant Raj, Durlabh Raj-I, Simha Raj, Vigraha Raj, Prithivi Raj, Ajai Raj, e.t.c. who ruled upto the 12th century. It is only when we come to year 1192 A.D. and find Mohammad Ghori attacking Ajmer and defeating him that the clear picture of historical narration begins.

After defeating Prithviraj Chauhan, this district was made a part of the Islamic conquests of Delhi sultans in India. Qutub-ud-din Aibak inherited the Indian conquests of Ghori in 1206 A.D. After the death of Balban in 1287 A.D. most of the area of Ajmer district was regained by Hammir Dev Chauhan of Ranthambhor. In 1301 A.D. i.e. after Hammir's defeat and death, the district again became a part of the Sultanate. In the last decade of the 15th century, it was in the hands of Mallu Khan, in 16th century. Akbar made Ajmer the capital of an important suba of the Mughal empire. Upto 1712 A.D. the district was under the Mughals and after that it came under the Rathores and the Marathas. In 1801 A.D. it came under the British rule, and Mons. Perron became the first subedar of Ajmer, and appointed Mr. Low its adminstrator. With the passage of the Government of India Act of 1935 A.D. Ajmer-Merwara was put unde the administrative control of the Home Department on April 1, 1937. On 26th January, 1950 the district was merged with the Union of Madhya Bharat. With the passage of Par 'C' States Bill in 1951, the region was included in the Part'C' State of Ajmer and a legislature was set up.

The district derives its name from the headquarter town of Ajmer. Before independence. Ajmer-Merwara was an isolated province of British India in Rajputana. The town, Ajmer takes its name from Raja Ajai or Ajaya, a Chauhan prince of the 12th century A.D. but according to some scholars, from another Chauhan prince, Jayapala, of the early 7th century A.D. Ajmer remained under the Central Government as Part 'C' (Centrally administered) State till 31st October, 1956 when it was merged with Rajasthan according to the recommendations of the State Reorganisation Commission and became a separate deistrict.

At the time of 1951 Census, the district comprised of three tehsil viz. Ajmer, Beawar and Kekri. As for urban areas there was one city alongwith six towns namely Beawar, Nasirabad, kekri, Pushkar, Vijainagar and Deoli. During 1951-61 inter-censal period four entire tehsils- Kishangarh, Arain, Sarwar and Rupnagar were transferred from Jaipur district and one village, Mankhand from Todarasingh tehsil of Tonk district. During the period under review, the district lost in the torritory by getting transferred one village, three hamlets and one town, Deoil, to Deoli tehsil of Tonk district. During 1961-71 though no inter district transfer took place in the district, however, as inter-tehsil transfers, former entire tehsil of Rupnagar and Arain were merged in Kishangarh tehsil and 34 villages were transferred from kekri tehsil to Sanwar tehsil. During 1981-91 no territorial changes have been taken place between districts. During inter censal period of 1981-91, Nasirabad was formed as new tehsil constituting 69 villages of Ajmer tehsil and Nasirabad contonment board, with an area of 656.12 sq.km. Similarly Alamboo, a village of Sarwar tehsil

was transferred to Kekri tehsil of the district. During decade 1991-2001, three new tehsils were constituted by inter-tehsil changes Peesangan tehsil was constituted by transferring 49 villages from Ajmer tehsil and caring 7 new village, Masuda tehsil was constituted by transferring 142 villages from Beawar and caring 1 new village, and Bhinaya Tehisl was constituted by transferring 84 villages from Kekri tehsil and carving 7 new villages tehsil Sarvar tehsil of Kishangarh Sub-division has been transferred to Kekri sub-division. Now kishangarh is only tehsil in kishangarh sub-division.

(iii) Administrative set-up

The district has 4 sub-divisions and 9 tehsils

	Sub-divisions	Tehsils
1	Ajmer	Ajmer, Peesangan, Nasirabad
2	Beawar	Beawar, Masuda
3	Kekri	Kekri, Bhinay, Sarwar
4	Kishangarh	Kishangarh

As in other district the Collector is the administrative head of the district and, is also the District Magistrate. Each sub-division is under the charge of a Sub-Divisional Officer while each tehsil is under the charge and supervision of a Tehsildar, who is also vested with the powers of Executive Magistrate. Besides the Collector, Sub-Divisional Officers and Tehsildars, District and Session Judge, and Additional District Sessions Judge, Civil Judge-cum-Chief Judicial Magistrate and Additional Civil Judge-cum-Judical Magistrate. Besides this munsif cum Judical Magistrate courts are functioning in the district.

With the advent of democratic decentralisation is 1959 in Rajasthan, eight Panchayat Samities were formed in Ajmer district. These Samities are guided by the Zila Parishad under the Chairmanship of the Zila Pramukh and supervised by the Collector of the district, who is also an ex-officio District Development Officer. The ulitimate aim of the government is to make the Panchayat Samities, the sole egency of all developmental activities at the block level.

(iv) Physical Features

(1) Location & Size

The district is located in the centre of the State between 25^0 38' and 26^0 58' north latitudes and 73^0 54' and 75^0 22'east longitudes. It is bounded on the north by Nagaur district, on the sourth by Bhilwara district, on the east by Jaipur and Tonk district and on the west by Pali district. The Geographical area of the district is 8481 sq.km.

(2) Physiography

The district is triangular in shape. It is generally a level plain intersperesed with low hills, which run in the north-westerly direction in the upper part of Ajmer sub-division. The Beawar sub-division is an irregular terrain lying in the south-west of the district and is composed of two detached blocks. This track is generally hilly. The Kekri sub-division forms the south-eastern portion of the district. It is a compact area composed of two blocks separated by the territory of Kishangarh sub-division. This tract is a level plain. The Kishangarh sub-division forms the eastern portion of the district and is sandy except for a few small isolated patches.

Aravalli range which divides the plains of Marwar from the high table-land of Mewar passes through the district. The range comes into prominence near Ajmer City, were it appeas in a parallel succession of hills. The highest point is about 870 metres above the sea level near Ajmer City on which Taragarh Fort is situated. The 'Nagpahar' at a distance of about 5 kms. West of Ajmer City, attains a scarcely low elevation. The range of hills between Ajmer and Nasirabad marks the dividing watershed of the continent of India. The rain which falls on the sourthern Nasirabad side, finds its way through the Chambal into the Bay of Bengal and that which fall on the other side is discharged by the Luni into the Gulf of Kutch. The range of hills (on which Taragarh For stands) passing through the district merges into the Vindhyan system near Abu. There are four well known passes in Beawar tehisl viz. Barr, Pakheria, Sheopura Ghata and the Sura Ghata pass.

(3) Drainage

There are five rivers which flows through the district viz. Banas, Khari, Sagarmati, Saraswati, and Rupnagar. All rivers are mere rivultes in hot weather but become torrents in the rains. The river Banas with rises in the Aravalli hills enters this district near village Jeetapura in Kekri tehsil. The Khari river rises in the hills near the village Birjal and after forming

the boundary between Udaipur and Ajmer districts for a short distance falls into Banas. The river Sagarmati rises near the Bisala tank in Ajmer.

And meets river Saraswati at the extreme north of village Govindgarh (Ajmer tehsil). Another rive Rupnagar flows in the major part of Kishangarh tehisl.

There are natural lakes viz. Pushkar and Budha Pushkar near Ajmer City and Sargaon and Karantia near Beawar town. Among the important tanks in the district are Foy Sagar, Phool Sagar, Bisala, Ramsar, Dilwar, Kalinjr, Jawaja, Makreda etc. Be-sides several small reservoirs are also found in the district.

(4) Climate

The district has a hot dry summer and very cold winter. The winter season extends from December to February while the summer season extended from March to end of June. The rainy season is comparatively short in this region and lasts only till mid of September. The maximum and minimum temprature recorded in 2000 at Ajmer centre was 42.9^0 and 5.7^0 respectively. The average temperature was 27.10 in this spam. The average annual rainfall was recorded as 52.73 cm while the actual rainfall was 37.98 cm in 2000. The rainfall generally increases from the north-west to the south-east Kekri gets more rain than other parts of the district about 90 percent of the annual rainfall is received during the period June to September. July and August being the rainiest months. The variation in annual rain fall from year to year in very high on an average there are 26 rainy days in a year. During the south-west mansoon season the relative humidity is generally 43 percent and during the rest of year the air remains dry.

Geology and Minerals

The geology of the district is that of the Aravalli range which extends through out the district except for the north-western part, which is flat and plain and mostly covered by sand dunes. The oldest rocks exposed in the district are the pre-Aravalli banded Genissic Complex over 2500 million years old. These comprise schist, genisses and amphibolite. These are the rocks of Delhi Subper Group comprising of quartzite, conglomerate, amphibolite and mica schist (Alwar Group) and calc-schists, dolomitic marble, calc-genisses, amphibolite and phylite (Ajabgarh Group). The post-Delhi intrusive s, granities and Alkaline rocks, i.e. nepheline syenties and its associates rocks are seen near Kishangarh.

The district is endowed with a lage number of non metallic minerals which add several lakhs of rupees to the stat's treasury. The main mineras found in the district are as under.

(i) Asbestos – Chrysolite asbastos is found at Kanwalali (Ajmer tehsil and Nal Khurd (Beawar tehsil) whereas the amplibole variety occurs near Kotra (Beawar tehsil), Arjunpura (Ajmer tehsil) and Kotri (Sarwar tehsil). It is chiefly used in the manufacture of heat and fire resistant materials.

(ii) Beryl/emerald – Beryl is found in pegmaties near Lohagarh and Makreda, Emerald of the gemvariety is quarried from Rajgarh and Bubani-Mahmi mines where it occurs within the ultra basic rocks.

(iii) Felspar – It occurs in the pegmatite at Kadea (Kekri tehsil), Buburgarh, Taragarh hills (Beawar tehsil), Jeewan mines near Rajgarh, Makreda near Ajmer and Lohagarh it is used in the China ware and glass industries.

(iv) Garnet – Lilac to pink coloured garnet is found within the mica schist neal Sarwar it is used mostly as an abrasive and partly as a gem-stone.

(v) Mica – Muscovite mica associated in the pegmatite veins is mined near Dadiya (Kishargarh tehsil), Basundni (Kekri tehsil) mines near Sarwar and Arain.

(vi) Vermiculite – The mineral occurs near Gudas within the ultra-basic rocks. Since it swells up to 10 times on heating, it finds use where extreme lightness and low heat conductivity are required.

Besides these calcite, china clay, kyanite, limestone, soapstone and buliding stone are also produced on a minor scale and occurrences of lead zinc-copper are reported from Lohakhan, Taragarh and Sarwar (Kekri tehsil).

Forest,Flora and Fauna

6.06 percent of the total area available for land utilization is covered under forest. Owing to its geographical position and limited rainfall, the flora of the district is not rich. The forest crop is mainly xerophytic species common to the more and tracts

of India. The district is completely outside the timber line i.e. Teak, Sal and Sisso Zone of the tropical and sub-tropical India. The main species found in the district are Dhokra (Anogeissus pendula), Kumpta (Acacia rupestris), Salar (Boswellia serrata), Khejri (Prosopis spicigera), Khair (Acacia catechu), Ber (Zizyphus jujuba), Jinja (Buhinia racemosa), Koulassi (Dichrostachys cineria), Aranja (Acaci leucophoea),Gol (Lannea grandis), Tambolia (Ehretia laevis), Sainjora (Moringa concanensis), Thor (Euphorbia nivulia), Grangan (Grewia populifolia), Jharbor (Zizphus nummutlria), Dassen (Rhus mysorensis), Firangan (Grewia pillosa), Salepan (Securinega obovata), Arni (Clerodendron phlomoides), Neem (Azadirachta indica), Semal (Salmalia malabaricum), Pipal (Ficus religiosa), Golla dhau (Anogerissus latifolia), Lambaba (Bridelia retusa), Timbru (Diospyros melanoxylon), Umbia (Saccopetalum tomentosum), Ghatolan (Randia dumetorum), Kalia (Albizzia onoratissima), Kar (Sterculia urens), Khirni (Wrightia tomentosa), Kankaran (Flacourtia sapida), Bahera (Terminalia bellerica), Amaltas (Cassia fistula) and Bijasar (Symida febrifuga) etc. The most common grasses found in the district are cenchrus cillaris, Schima marvoss, Dichanthium annulatum, Chloris barbata, Chrysopason montanus and Eremonopogon fovealatus etc. The forests play a very important role in the economy of the district. They meet the requirements of villagers in respect of agricultural implements and timber for their hutments and provide grazings. The wood is used as fuel in towns and villages.

Among the wild animals black buck (antelope bezoritca), revine deer (gazella bennettii) and nilgai (portax pictus) are commonly found while tigers are occasionally seen in the forests of Beawar. Leopards and hyneas are found in the hills of Nagpahar. Besides, wild pig and sambhar (rura aristoteli) are also found. Among small games, geese, duck and snipe are found around the tanks in cold weather. Hares and grey partridges are seen in every season. Small sand grouse in found in abundance while Indian bustard is occasionally seen.

Land use

The reported geographical area of the district is 842,345 hectares, where as for land use in 1999-2000 was mentined as 649,072 hectares during the year land use was classified as under :

Classification of land use	Area (in hectares)	Percentage to total area (in hectares)
Forest	51,028	6.06
Agriculture waste land	142,245	16.88
Barren and uncultivated land	156,078	18.53
Other uncultivated land and excluding fallow land	130,388	15.47
Current fellow land	-	-
Net area sown	362,606	43.06

Source : Office of the District Collector (Land Record) Ajmer

Crop Pattern

The crop pattern has remained largely unchanged over the years. As in the other districts of the State, there are two major crop seasons in the district. The major Kharif crops sown during the month of June-July and harvested in September-October are Bajra, Jawar, Pulses, Maize, and groundnut. Main Rabi crops for which sowing operations start during October-Novermber and harvested in March-April include wheat, barley, pulses, gram and oil seeds.

As the district does not grow enough grain to feed the increasing population and therefore emphasis must be given to increase grain production. The crops like cotton, tobacco, spices, fruits and vegetables require more irrigation which is not available in sufficient measures in the district. As regards the introduction of new crops, seeds of better variety of wheat, barley, maize cotton, groundnut and sugarcane are being distributed among the farmers besides fertilizers are also being provided to them.

During year 1999-2000, the important crops in order of production in the district were wheat, barley, maize and cotton. The final figures relating to area and principal crops in the district during the said period is given as under :

S.No.	Name of Crop	Area in hectares	Production (in tones)
1	Bajra	64,826	1,745
2	Jawar	123,767	777
3	Wheat	34,279	58,136
4	Barley	10,190	16,155
5	Maize	41,324	3,924
6	Rice	31	6
7	Pulses	-	-
8	Gram	9,614	6,438
9	Other kharif Pulses	49,707	2,134
10	Oil seed	5,114	115
11	Rape & mustard	9,313	20,616
12	Ground nut	2,661	495
13	Arndi	596	32
14	Tara meera	1,409	1,720
15	Cotton	8,155	7,732
16	Sugar cane	31	1,199
17	Chillies	2,109	1,243

Tenancy

Tenancy in the State is governed by the Rajasthan Tenancy Act, 1955. It is one of the most important and progressive laws relating to agrarian reforms. The provisions of the Act apply in respect of land held by tenants as if the State Government were the land holder acting through the Tehsildars. In relation to the land held by him, every cultivator is either a tenant or a sub-tenant or an allottee or a trespasser. A tenant is one who is required to pay some rent on account of use and occupation of land let out to him for agricultural or allied purposes. Grantee with a favourable rate of rent, ijardar,thekedar or trespasser is not considered a tenant.

There are following classes of tenants:

a) Khatedar tenant,

b) Maliks,

c) Tenant of Khudkasht, and

d) Ghair-Khatedar tenants

A Khatedar tenant is entitled to all the rights conferred and subject to all the liabilities imposed on Khatedar tenant by the Rajasthan Tenancy Act. On the date of coming into force of Rajasthan Tenancy Act, a Zamindar or a Biswedar holding Khudkasht was treated as a Khatedar tenant irrespective of whether he was or not in occupation on the date of vesting.

Malik is a Zamindar or Biswedar who has become Malik or Khudkasht land held by him on abolition of Zamindari and Biswedari in 1959. The word “Malik” was also added to section 14 of the Rajasthan Tenancy Act to classify it as a class of tenant. Section 13 of the Act provides that a Malik is entitled to all the rights conferred and is subject to all the liabilities imposed on Khatedar tenant and so in substance this class of tenancy is nothing but a Khatedar tenant.

As Zamindars and Biswedars holding Khudkasht were treated as Khatedar tenants. A tenant of khudkasht is essentially a sub-tenant in view of the fact that a sub-tenant is also eligible for protection of his cultivatory rights even against Khatedar tenant. Every tenant of land other than a Khatedar tenant, a tenant of Khudkasht or a sub-tenant is a Ghair-Khatedar tenant.

A trespasser is a person who takes or retains possession of land without authority or who prevents another person from occupying land duly let out to him by the State. After regularisation, the trespasser becomes an allottee. An allottee is treated as a Ghair-Khatedar tenant on whom Sub-Divisional Officer shall suo-moto confer khatedari rights after ten years of allotment provided that the allottee fulfils all the terms and conditions of allotment during this period. Similar is the case of those allottees who were otherwise allotted land by the State Government.

Agricultural implements and machinery

India is an agriculture dominated country and crops are being produced in traditional way cattle Census report 1997 indicate that district is turning slowly to adopt new implements and machinary in the field of agriculture in place of traditional equipments. In 1992 there were 56078 plough in the district, which recuded in 42564 in 1997. Similarly in 1992 there were 33193 carts, whereas in 1997 cattle census they were recorded as 26705 on the other had, use of modernagricultural equipment are increesing significantly. There were 10680 diesel engine were available in 1992, which reaches to 24098 in 1997, electric pumps 9151 to 11245, and number of tractors were increased from 1969 to 4473.

Irrigation

Most of farmers of the district are mostly depend on rain crops, they are mainly depend on kharif crop. If we see the sources of irrigation, we will found that most of the land is being irrigated by wells. The total irrigated area in the district, in 1999-2000 was 74572 hectares, out of which 62790 hectares land were irrigated by well. Total 75320 well were found in the district out of which, 44728 were found useful and 30592 were found as un-useful well. Similarily total 2908 ponds were found in the district out of which 2685 ponds were found useful and 223 ponds were found as un-useful.

According to various measures of irrigation, irrigated area in categorised as under in 1999-2000.

S.No.	Measures of irrigation	Total irrigated area (in hectares)	Net irrigated area
1	Tube well/wells	82,529	62,790
2	Ponds	8,285	7,786
3	Canals	1,737	1,722
4	Other sources	2,460	2,274
	Total	**95,011**	**74,572**

Animal Husbandry

According to Cattle Census held in 1‘997 in Ajmer district the numbers of pet animals & poultry was recorded as under.

S.No.	Name of animal	Number
1	Cattle (Cow, Ox etc.)	474,233
2	Buffaloes	312,927
3	Sheeps	714,007
4	Goats	563,546
5	Horse & Ponys	546
6	Ass & Mules	4,050
7	Camels	4,155
8	Pigs	20,900
9	Poultry	1,498,089
	Total	**3,592,453**

Facilities for animal Husbendary

During the year 1999-2000, there were 49 Vetenary hospitals, 15 dispensaries, 10 animal sub-centre, 82 artifical insemination centers in the district, in the district on the other hand 4 slaughter houses are also functioning for fishing development, there were one fishery Farm,29 fishery nursuries, 10 fishery salling market, 3 fish breeding centre and 75 fish ponds were available in the referent year.

Electrification

The district has no Generating power house and for electric supply district in wholly depends on chambal & bhakhra projects. There were 1001 villages, 8 towns and 16627 wells/tube wells were electrified in the district upto the year 1999-2000. In year 1999-2000 electric comsuption in various categories in the district was recorded as under:

S.No.	Electric consumption/ type of consumers	Electric consumption in million (k.w.)	No. of electric consumers
1	Domestic & residential	1,747	200,930
2	Commercial	452	41,252
3	Industrial	3,402	8,535
4	Public lighting	45	349
5	Public water supply	500	447
6	Irrigation	508	15,447
7	Others	250	1,536

Industry

There were 977 registered factories in the district upto 2000,whose concerned with cotton ginning, cleaning, spinning and weaving, weaving of cotton textile by power-looms, oil mills, sawing & planing of woods, printing & publishing, wool cleaning, thread & thread ball-making, manufacturing of structural stone goods, stone crushing and dressing, manufacturing of hume pipes and other cement products.

The main small scale and cottage industries of the district are cotton ginning and balling, wool and

cotton pressing, spinning and weaving, manufacturing of 'Bidi', 'Gota', shoe and toy making, dyeing and printing, pottery, lac bangle making, carpentry, black smithy, gold smithy etc. Most of the wool cleaning factories are centralised at Beawar because it is an important 'mandi' for the wool trade. Cotton spinning and weaving is anancient handicraft of the district but it is now declining due to the competition of mill made cloth. Kishangarh is the other industrical centre in the district. Now, in kishangarh, marble industry is growing very fast, and many factories of a marble cutting & polishing are working here.

The district abounds in mineral wealth and more minerals including the radio-active ones are being discovered. There is sufficient scope for more industries to be established in the district. The district has efficient communications and is connected by rail and road to most centres of the country, Labour is available in plenty.

The railway establishment, which is the biggest industrial employer in the district, besides this there is a Shri Cement Industry in large scale level also established in Beawar Town.

Trade and commerce

In ancient times. Ajmer was an entrepot for the trade between Bombay and Upper India. As early as in 1614 A.D. an agency was established there for the East India Company by one Mr. Edwards of the Surat factory and for many years the city was the principal market for the exchange of European goods and the products of Rajputana and Northern India. But the magnitude of the trade is not known. It seems to have been at all times hampered by various coustoms duties and many of these continued until after the British occupationof the district.

The transit trade of the district was formely entirely carried on by camels and banjara bullocks. It is now mostly rail-borne or done by motor trucks. There is still a certain part of goods transported by bullock carts in the interior of the district. With the coming of the railways, the trade in the district increased and now National Highway No.8 which passes through Kishangarh, Ajmer and Beawar towns of the district has further given a filip. Due to availability of broad guage Rly line in Ajmer, more increase on trade is expected.

The articles which are exported out of the district are foodgrains, cotton, wool, mica, felspar and quartz, while the imports includes grain and pulses, sugar, jaggery, salt and oilseeds.

Ajmer, Beawar, Kishangarh (Madanganj), Vijaynagar, Kekri and Nasirabad are the main trading centres in the district. Beawar town is a flourishing 'Mandi' for raw cotton and wool, which is exported to Mumbai, Panipat, Kanpur and Mirzapur etc. while cotton is sent to Mumbai and Ahmedabad facilities of local market are also exist in certain villages.

In year 2000, 115 branches of commercial banks, 20 Rural Banks and 153 Scheduled Banks were functioning in the district and 59 Petrol Pumps were located at various places. In years 1999-2000 there were 15 Cinema Houses, having a capacity of 9039 seats out of which six in Ajmer and one each in Nasirabad, Vijaynagar, Sarwar and Kekri were available in the district. In 1999-2000 there were 258 shops of country liquor, 39 shops of Gnaja-bhanj and 59 shops of India made forein Liquior were functioning.

Transport and Communication

This district is comparatively better with regards to roads then many other district in the state. All the important places in the district are connected by roads. National Highway No.8 running between Delhi & Mumbai passes through the district of the total 2832 k.m. length of roads in the district in 1999-2000, 145 km were covered by the National Highway, 2727 km by painted roads, 71 km by metalled roads and 34 km by concrete and cement. Total 1003 villages of the district were connected by these roads. During this period 186884 motor vehicles were registered in the district, out of which 13026 were private cars and jeeps, 1052 were private buses, 152735 were motor-cycles, and outo, 3658 were taxies and carrers, 5365 were public and private weight carriers, 10179 were tractors and 871 other vehicles were registered.

During year 2000, 1280 road accidents have taken place in the district in which 2765 motor vehicles have been demaged and 340 persons were dead, whereas 1635 persons were wounded.

Beside road transportation, Railway is also a main factor of transhporation in the district. During the reviewing year there were 23 railway stations were available in the district.

In year 1999-2000, 431 post offices, 26 telegraph offices, 84 telephone exchange, 1440 letter boxes and 1732 public message offices were existed.

Gram Panchayats composition & its role

The system of Panchayati Raj was inaugurated on 2nd October 1959 in Nagaur district by then Prime Minister Late Shri Jawahar Lal Nehru. Late Shri Balwant Rai Mehta proposed the recommendation for Panchayati Raj. There are three levels of Panchayati Raj:

(1) Gram Panchayat (Village level)

(2) Panchayat Samiti (Block level)

(3) Zila Parishad (District level)

Gram Panchayat is an important institution of self-government. The institution is set for a village or village agglomeration. A Gram Panchayat is created on 2,000-8,000 population. It covers a maximum area of 6 miles. The villages, which have population below 2,000, are merged with the other villages to create a Gram Panchayat. Their tenure is of 5 years.

A Gram Panchayat consist 5 to 20 members. The Head of the Panchayat is called Sarpanch. Panch and Up-Sarpanchs are also elected. It includes a member belonging to backward class and a lady member. There are 151 Gram Panchayats in the district.

The main objectives of Gram Panchayat are to arrange the primary education, sanitation of public places, drinking water and light. It manages also the adult education, livestock and repairing of wells.

During the last years, Gram Panchayats functioned several important jobs like *Kam Ke Badley Anaj*, Construction of Panchayat Ghar, School buildings, roads and tanks. It organizes also the cattle fair. Gram Panchayat plays an important role in the development of village and its economy.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic,

polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which arenot normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically

independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house, but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

a) The core town or at least one of the constituenttowns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1. Adi Dharmi
2. Aheri
3. Badi
4. Bagri, Bagdi
5. Bairwa, Berwa
6. Bajgar
7. Balai
8. Bansphor, Bansphod
9. Baori
10. Bargi, Vargi, Birgi
11. Bawaria
12. Bedia, Beria

13. Bhand
14. Bhangi, Chura, Mehtar, Olgana, Rukhi Malkana, Halalkhor, Lalbegi, Balmiki, Valmiki, Korar, Zadmalli
15. Bidakia
16. Bola

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a

script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main-worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any econom ically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing,

vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads orshoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude Birth Rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude Death Rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural Growth Rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age Specific Fertility Rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age Specific Marital Fertility Rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General Fertility Rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General Marital Fertility Rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total Fertility Rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total Marital Fertility Rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-Specific Mortality Rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant Mortality Rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal Mortality Rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Neo-natal Mortality Rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal Mortality Rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still Birth Rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education

and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types—(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration) (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic Status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum Area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City

The concept of 'Mega City' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding - population, its distribution

According to the 2001 census, the total population of Ajmer district is 2,181,670 comprising 1,129,920 males and 1,051,750 females and constituting 3.9 percent of State population and area spread over 2.5 per cent in the 9 tehsils of the district, Ajmer tehsil is most populous tehsil having population 689,976 while Bhinay is the smallest tehsils having a population of 108,180 persons. Other tehsils in order of their population size are Kishangarh (334,984), Beawar (283,882), Masuda (187,295), Kekri (175,056), Nasirabad (162,176), Sarwar (131,231) and Peesangan (108,890).

Out of the total population of the district 59.9 per cent lives in rural areas while 40.1 per cent lives in urban areas. The corresponding proportions in rural and urban areas of the State are 76.6 per cent and 23.4 per cent respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF TEHSILS BY RESIDENCE, 1991-2001

Sl. No.	Tehsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Kishangarh	257,747	175,799	81,948	334,984	218,762	116,222	30.0	24.4	41.8	31.8	34.7
2	Ajmer	560,960	146,754	414,206	689,976	184,665	505,311	23.0	25.8	22.0	73.8	73.2
3	Peesangan	85,079	85,079	0	108,890	108,890	0	28.0	28.0	0	0	0
4	Beawar	226,357	119,636	106,721	283,882	157,901	125,981	25.4	32.0	18.0	47.1	44.4
5	Masuda	148,400	127,797	20,603	187,295	159,600	27,695	26.2	24.9	34.4	13.9	14.8
6	Nasirabad	116,478	74,270	42,208	162,176	113,046	49,130	39.2	52.2	16.4	36.2	30.3
7	Bhinay	86,638	86,638	0	108,180	108,180	0	24.9	24.9	0.0	0.0	0.0
8	Sarwar	106,952	94,636	12,316	131,231	115,029	16,202	22.7	21.5	31.6	11.5	12.3
9	Kekri	140,596	115,023	25,573	175,056	140,921	34,135	24.5	22.5	33.5	18.2	19.5
	District Total	**1,729,207**	**1,025,632**	**703,575**	**2,181,670**	**1,306,994**	**874,676**	**26.2**	**27.4**	**24.3**	**40.7**	**40.1**

The district has registered a percentage decadal variation of 26.2 during the decade 1991-2001. The rural area of the district has attained a higher decadal variation of 27.4 per cent as compared to that of urban area at 24.3 per cent. At tehsil level, it varies from the lowest of 22.7 per cent in Sarwar tehsil to a maximum of 39.2 per cent in Nasirabad tehsil in total areas.

There is a decline in the percentage of urban population to total population from 40.7 in 1991 to 40.1 in 2001. Ajmer,Beawar and Nasirabad tehsils have registered the same trend as that of district whose percentage of urban population has declined from 1991 to 2001 and Kishangarh, Masuda, Sarwar and Kekri tehsils where it has increased from 31.8,13.9,11.5 and 18.2 per cent in 1991 to 34.7,14.8,12.3 and 19.5 per cent in 2001 respectively.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001 - *Contd*.

Sl. No.	District/Panchayat Samiti	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females

Of the total 1030 villages, 1025 are inhabited villages. Jawaja Panchayat Samiti has the highest number of villages i.e. 199 where as Srinagar Panchayat Samiti with lowest of 96 villages. While, Peesangan Panchayat Samiti is the most populous with 236459 persons and Arain is the least populous Panchayat Samiti with a population of 133386 persons. The maximum numbers of villages i.e. 295 are those which lie in the population range of 500 - 999. It is followed by 26.7 per cent of the inhabited villages, which have population range of 1000 - 1999. As regards to large size villages in the district, 21 are such which lie in the population range of 5000-9999 only 2 are such which have population more than 10000. In case of small size villages i.e. having population less than 500, such villages are 276 in number in the district.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

		Name of Towns
(a)	**New**	
(i)	Statutory town	Nil
(ii)	Census town	1. Kiranipura
(b)	**Denotified**	Nil
(i)	Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
(ii)	Statutory towns of 1991 census denotified but identified as census towns based on demographic and	Nil
(iii)	Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c)	**Declassified***	Nil
(d)	**Wholly merged with other town (s)**	Nil

* Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Only one Census town has emerged namely Kiranipura.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	5	0.5	281	0.0
11-20	5	0.5	726	0.1
21-50	16	1.6	4,337	0.3
51-100	192	18.7	136,949	10.5
101-200	458	44.7	617,542	47.2
201-300	184	18.0	315,461	24.1
301-500	119	11.6	158,597	12.1
501 +	46	4.5	73,101	5.6
Not known	0	0.0	0	0.0
District Total	**1,025**	**100.0**	**1,306,994**	**100.0**

Population Density (Rural) of the district: 160.4

The density of population of the rural areas of the district is 160.4. Of the total number of inhabited villages i.e. 1025 in the district, 44.7 per cent have population density ranging from 101 to 200, followed by 18.7 per cent in the range of 51-100.Apart from these only 26 villages have population density upto 50.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	905	898	947	898	897	899
1911	908	904	936	885	905	837
1921	896	896	897	836	894	731
1931	907	906	903	903	942	828
1941	906	907	897	902	930	850
1951	921	919	928	925	946	895
1961	908	913	882	913	934	879
1971	911	919	875	910	931	877
1981	919	930	877	922	948	888
1991	910	919	879	918	935	895
2001	**921**	**930**	**890**	**931**	**951**	**901**

Note: Sex ratio has been defined here as the number of females per 1000 males.

The district has witnessed a fluctuating trend in sex ratio since 1901. From 898 in 1901 it declined to 885 in 1911. It again declined to 836 in 1921 and increased to 903 in 1931 and so forth. During the last decade i.e. 1991-2001 it has increased from 918 in 1991 to 931 in 2001.

In comparison to urban areas of the district the sex ratio in rural areas has been higher upto 1971 except 1901. The district has always registered higher sex ratio as compared to that of state in the year 1961.

TABLE 6 : SEX RATIO BY TEHSILS, 2001

Sl. No.	Name of Tehsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kishangarh	927	941	903
2	Ajmer	913	922	909
3	Peesangan	950	950	0
4	Beawar	955	983	921
5	Masuda	948	954	916
6	Nasirabad	876	943	739
7	Bhinay	963	963	0
8	Sarwar	958	960	940
9	Kekri	952	957	935
	District Total	**931**	**951**	**901**

The district has registered a sex ratio of 931 in 2001. Where as for rural and urban areas it is 951 and 901 respectively. At the tehsil level, the highest sex ratio of 963 has been registered by Bhinay tehsil and the lowest of 913 by Ajmer tehsil for total and rural areas. In case of urban areas the highest sex ratio of 940 has been attained by Sarwar tehsil and the lowest of 739 by Nasirabad tehsil.

TABLE 7 : SEX RATIO BY PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Sex ratio
1	2	3
1	Kishangarh	935
2	Arain	961

		Urban	16,202	2,493	532	15.4	3.3

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TEHSILS, 2001 - *Contd.*

Sl. No.	Name of Tehsil	Total/ Rural/ Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
9	Kekri	Total	175,056	38,487	18,009	22.0	10.3
		Rural	140,921	32,080	17,790	22.8	12.6
		Urban	34,135	6,407	219	18.8	0.6
	District Total	**Total**	**2,181,670**	**386,298**	**52,634**	**17.7**	**2.4**
		Rural	**1,306,994**	**210,754**	**40,398**	**16.1**	**3.1**
		Urban	**874,676**	**175,544**	**12,236**	**20.1**	**1.4**

The proportion of scheduled castes and scheduled tribes population to the total population of the district is found to be 17.7 per cent and 2.4 per cent respectively. For rural areas the respective proportions for scheduled castes and scheduled tribes comes out to be 16.1 per cent and 3.1 per cent. Similarly in urban areas of the district the percentage of scheduled castes population and the scheduled tribes population to the total population is found to be 20.1 and 1.4 respectively.

As tehsil level, the proportion of scheduled castes to total population varies for 22.0 per cent in Kekri tehsil to 11.7 per cent in Masuda tehsil. In case of scheduled tribes this proportion varies from 10.3 per cent in Kekri tehsil to 0.5 per cent in Beawar tehsil.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

11-20	318	31.0	83,740	39.7
21-30	179	17.5	73,201	34.7
31-40	61	6.0	25,132	11.9
41-50	10	1.0	3,959	1.9
51-75	6	0.6	2,450	1.2
76 and above	7	0.7	2,065	1.0
District Total	**1,025**	**100.0**	**210,754**	**100.0**

Of the total 1025 inhabited villages in the district, 131 villages are such where no scheduled castes population exists. The maximum number of villages i.e. 318, which accounts 31.0 per cent of the total inhabited villages have scheduled caste population in the range of 11 to 20 per cent to their total population followed by 179 villages in the range of 21 to 30 per cent. On the higher side, only 6 and 7 villages have scheduled castes population ranging from 51 to 75 and 76 and above respectively.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	551	53.8	0	0.0
Less than 5	276	26.9	8,274	20.5
5-10	100	9.8	10,563	26.1
11-20	61	6.0	8,529	21.1
21-30	11	1.1	1,606	4.0
31-40	8	0.8	3,045	7.5
41-50	3	0.3	764	1.9

45.7 percent of the (main + Marginal) rural population are as workers. There is a little difference in the work participation rates of males and females being 51.2 per cent and 39.9 per cent respectively for the rural areas of the district. Like at tehsil level, at Panchayat Samiti level too, the highest percentage of male and female workers has been recorded in Bhinay Panchayat Samiti at 55.5 and 48.7 respectively. However, the lowest percentages have been registered by Jawaja Panchayat Samiti at 46.2 for males and 28.1 percent for females in Srinagar Panchayat Samiti.

\+ To be arranged in alphabetical order.

^ The names of constituent units of U.A.are given seprately.

* In case of towns having outgrowth an astrrisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

In contrast to the rural areas of the district only 29.6 per cent of the urban population are as workers (main + marginal). Apart from this much variation is also seen in the percentage of male and female workers, which are 47.7 and 9.6 respectively. Among the towns, the percentage of workers varies from 36.8 in Nasirabad (CB) to 27.7 in Kiranipura (M).

Note: Percentage of workers to total workers are given in brackets.

Other workers are the main working force in the district as they form 48.3 per cent of total workers. It is followed by Cultivators (37.7 per cent), agricultural labourers (10.1 per cent) etc. Much variation in the percentages of male workers (61.6) and female workers (22.8) classified as other workers is seen in the district.

At tehsil level, the percentage of cultivators to total workers varies from 60.0 in Bhinay tehsil followed by 58.2 in Sarwar tehsil to 51.6 in Kekri tehsil. For Household Industry workers, it varies from 6.1 per cent in Beawar tehsil to 2.1 per cent in Sarwar tehsil. In case of 'other workers' the highest percentage of 77.6 has been registered by Ajmer tehsil while the lowest of 23.1 per cent in Sarwar tehsil.

Note: Percentage of workers to total workers are given in brackets.

45.7 per cent of the total rural population of the district is engaged in economic activities being workers. Of the total workers, most are engaged in agricultural activities i.e. 53.3 per cent are as cultivators and 14.1 per cent as agricultural labourers. Only 2.7 per cent of the workers are engaged in household industries whereas the 29.9 per cent in other works.

Almost similar trend has been observed in all the panchayat samities.

Sex wise, percentage of male workers is higher in the economic categories of Household industries and other workers except cultivators and Agricultural labors where their percentages are 47.8 and 8.4 as compared to that of females at 60.8 and 21.7 at the district level.

\+ To be arranged in alphabetical order.

^ The names of constituent units of U.A.are given separately.

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

The percentage of workers to total population of urban areas is significantly quite low being only 29.6 per cent as compared to that of rural areas of the district being 45.7 per cent. Here too, the percentage of workers engaged in four economic categories is just the reverse as compared to rural workers where majority i.e. 90.6 per cent of the total urban workers are as 'other workers' followed by 6.8 and 1.8 per cent as household industry and cultivator workers respectively.

Almost similar trend is visible in all the municipal towns except in Sarwar (M) where the percentage of household industry workers is lower than that of agricultural labourers and cultivators.

Sex wise percentage of male workers as other workers is 93.8 percent than 72.6 percent that of female other workers being. On the other hand, percentage of female cultivators (5.0 per cent) is higher than that of male cultivator's (1.2) at the district level for urban areas.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total (1025) inhabited villages, 972 (94.8 per cent) have educational facilities. In case of medical amenities only 34.3 per cent of inhabited villages have such amenities. A most significant numbers i.e. 1021 (99.6 percent) villages have improved drinking water amenities. In the communication field only 30.9 per cent of villages have post office facilities while 72.7 per cent have telephone facilities. In the banking field the picture is gloomy as only 76 (7.4 per cent) villages have banks. More than 60 percent i.e. (632) are linked with pucca approach roads whereas 94.2 per cent have power supply.

At tehsil level, Bhinay tehsil have the cent percent of villages having educational facilities. For medical amenities it is peesangan tehsil, which have highest percentage of 47.7. In the telephone facilities, Arain tehsil has the highest percentage of villages i.e. 89.6, which have telephone facilities whereas Masuda has the minimum percentage of 63.3 for such facility Masuda tehsil has the 97.8 percent villages having power supply.

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Almost entire (99.4 per cent) rural population of the district is being served by educational amenities. It varies from cent percent in Peesangan and Bhinay Panchayat Samiti to 97.1 per cent in Jawaja Panchayat Samiti. The highest percentage (73.1) of population availing medical amenities has been found in Kekri Panchayat Samiti while lowest of 41.9 in Jawaja Panchayat Samiti. Entire rural area of the district has almost cent percent facility of improved drinking water. It varies from cent percent to 99.2. Arain Panchayat Samiti is in the forefront in the field by telephone facilities where 94.8 per cent of the population has been served by this facility while yet again Jawaja Panchayat Samiti is at bottom with 67.9 per cent. Only 22.4 per cent of the rural population is being served with banking facilities whereas 97.9 per cent have access to power supply. While 99.4 percent of the population of Masuda Panchayat Samiti is being served with power supply.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education				
(a) Primary School	49	6	0	55
(b) Middle School	474	140	6	620
(c) Degree College	36	162	825	1,023
2. Medical

+ To be arranged in alphabetical order.
Town has to exclude OG's

The per capita receipt by the statutory towns of the district amounts to Rs.542.0. Of this, Rs.253.0 is being received through taxes and the remaining Rs.289.0 from all other sources. The highest per capita of Rs.1318.0 has been attained by Nasirabad (CB) followed by Rs.807.0 by Sarwar (M). The lowest per capita receipt of Rs.423.0 has been registered by Beawar (MCL).

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary/ Middle	Secondary/ Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Ajmer (M. Cl)	2.5	1.1	0.8	0.7	1.0
2	Beawar (M. Cl)	3.5	3.0	1.0	1.0	0.2
3	Kekri (M)	2.9	1.2	0.9	0.6	0.6
4	Kishangarh (M)	5.2	6.2	0.3	0.3	0.3
5	Nasirabad (CB)	2.8	1.0	0.6	0.8	0.2
6	Pushkar (M)	2.0	0.7	1.4	1.4	0.7
7	Sarwar (M)	3.1	1.2	0.6	0.6	0.0
8	Vijainagar (M)	6.1	2.2	0.7	0.7	0.4
	District Total	**3.2**	**2.1**	**0.8**	**0.7**	**0.7**

+ To be arranged in alphabetical order.

The number of primary, middle and secondary schools per 10000 of population is 3.2, 2.1 and 0.8 respectively. As regards to senior secondary and college, this number is 0.7 and 0.7 respectively. At the town level, the maximum number of primary schools per 10000 population is found in Vijainagar (M) at 6.1 followed by Kishangarh (M) (5.2).

It varies from the highest number of middle schools per 10000 populations at 6.2 in Kishangarh (M) to a lowest of 0.7 in Pushakar (M). As regards to colleges, the highest number i.e. 0.7 is found in Pushkar, whereas the number '0' has been recorded in Sarwar (M).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town+	Number of beds in medical institutions per 10,000 population
1	2	3
1	Ajmer(M. Cl)	35
2	Beawar(M. Cl)	25
3	Kekri (M)	21
4	Kiranipura (CT)	0
5	Kishangarh (M)	14
6	Nasirabad (CB)	89
7	Pushkar (M)	20
8	Sarwar (M)	15
9	Vijainagar (M)	20
	District Total	**32**

+ To be arranged in alphabetical order.

The number of beds in medical institutions in towns per 10000 population is found to be only 32. The highest number of beds per 10000 population is recorded at 89 in Nasirabad (CB) followed by Ajmer (MCL) (35), Beawar MCL (25) and Kekri (M) (21) etc. It is found the lowest at 14 in Kishangarh (M). Where as the number '0' has been recorded in Kiranipura (CT).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town+	Total popu-lation	Slum popu-lation	Percentage of slum population to total population
1	2	3	4	5
1	Ajmer	485,575	131,400	27.1
2	Beawar	125,981	1,932	1.5
3	Kekri	34,135	4,250	12.5
4	Kishangarh	116,222	25,845	22.2
5	Pushkar	14,791	1,402	9.5
6	Vijaynagar	27,695	3,050	11.0
	District Total	**804,399**	**167,879**	**20.9**

+ To be arranged in alphabetical order.

About one fifth of urban population of the district lives in slums. At the town level it varies from a maximum of 27.1 per cent in Ajmer (M) to a lowest of 1.5 per cent in Beawar.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town+	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Ajmer (M. Cl)	-	Ghee
		-	Sugar
		-	Juggary
2	Beawar (M.Cl)	Bidi	Snuf

Data source: Census of India 2001.H-Series:" Tables on Houses, Household amenities and Assests"

Of the total households (376877) of the district, majority i.e. 332322 (88.18 per cent) are living in their owned houses whereas only 38910 households (10.32 per cent) have rented houses. In the owned category, the median number of rooms a household possess is 2 while in case of rented it is 2. As regards to rural areas of the district, 96.49 per cent of the households are living in their owned dwellings whereas in urban areas this percentage is 74.89. The median number of rooms in owned, rented and others categories are the same for rural and urban areas of the district. The households belonging to scheduled castes has higher percentage (90.44) having owned dwellings as compared to scheduled tribe households (87.09).

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note:

Permanent: 1. Permanent houses refers to those houses whose wall and roofs are made of pucca materials i.e. where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi-permanent: 2. Semi-permanent houses refer to those houses made of other types of materials.

Temporary: 3. Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

Of the total number of households (376877), 304597 are living in permanent, 32205 in semi permanent and 40035 in temporary houses. At the tehsil level, the maximum number of households (110972) living in permanent houses is in Ajmer tehsil, whereas the minimum of 8827 (2.9 per cent) has been found in Sarwar tehsil. In the rural areas of the district, the maximum number of households (28364) living in permanent houses has been found in Ajmer tehsil whereas the lowest of 6782 households in Sarwar tehsil. In the urban areas the maximum (82608) and the minimum (2045) number of households living in permanent houses has been recorded in Ajmer and Sarwar tehsils respectively.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

(i) Improved drinking water : Majority of the households i.e. 76.95 per cent have drinking water facility in the district. For rural and urban areas, these percentages are 64.15 and 97.40 respectively. At tehsil level, for rural areas, the highest percentage (82.56) of households availing this facility has been found in Peesangan tehsil whereas for urban areas it is 98.71 per cent in Nasirabad tehsil.

(ii) Electricity : More than 50 per cent i.e. 66.04 per cent of households are using electricity. However there is much wide gap in the percentage of households using electricity in the rural (49.39 per cent) and urban (92.64 per cent) areas of the district. At tehsil level it varies from a maximum of 89.09 per cent to a minimum of 32.90 per cent of households using electricity.

(iii) Bathroom : 36.66 per cent of the households have bathrooms in the district. Here too much wider gap is seen in the percentage of households having bathroom in rural and urban areas, as these are 12.83 per cent and 74.74 per cent respectively. Similar trend is seen in all the tehsils of the district.

(iv) Toilet : In case of toilets, the picture is not so good especially in rural areas of the district. Only 10.58 per cent of households of the rural areas have toilet facility as against 81.06 per cent in the urban areas. The highest percentage (68.32) of households having toilet facility is found in Ajmer tehsil whereas the lowest of 14.39 per cent in Peesangan tehsil.

(v) Drainage : Again, in case of usage of drainage, the position is poor. Only 49.59 of households have drainage in their houses. In rural areas the position is even worse, where only 26.89 per cent of households have drainage system as against 85.88 per cent in urban areas.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."
Percentage in brackets.

Majority of the households (64.4 per cent) of the district is using firewood as fuel followed by cooking gas (26.3 per cent), kerosene (4.9 per cent), and crop residual (2.5 per cent). In the rural and urban areas of the district, much deviation is seen in the percentage of households using fire wood and cooking gas as 89.8 per cent and 4.0 per cent of households of rural areas are using these respectively in comparison of 23.9 per cent and 61.98 per cent of urban areas respectively. Similar trend is seen at tehsil level also.

Data source: Census of India 2001.H-Series:" Tables on Houses, Household amenities and Assests"

(i) Banking services : Only 34.43 per cent of the total household's (376877) are availing Banking services whereas in rural and urban areas this percentage is 26.42 and 47.23 respectively. At tehsil level, the highest number of households (116858) availing this facility has been found in Ajmer tehsil, while the lowest (19381) in Bhinay tehsil.

(ii) Radio/Transistor : Of the total household's (376877) of the district, 34.39 per cent are in possession of Radio/Transistor. Similarly in rural and urban areas of the district, the percentage of households having radio/transistor is 29.77 and 41.77 per cent respectively.

(iii) Television : In case of Television, the percentage of households possessing it is much higher i.e. 73.43 in urban areas than that of in rural areas at 16.30 per cent only.

(iv) Telephone : Only 12.11 per cent of the total household's (376877) of the district have telephones. The gap is much wider in rural and urban areas of the district where 4.15 per cent and 24.83 per cent of their respective total households have telephones respectively.

(ii) Auto mobiles : In case of two wheelers, only 21.40 per cent of the households have either motor cycle or scooter or moped. For rural and urban areas these percentage are 10.99 and 38.05 respectively. In case of rural areas where 1.53 per cent have four wheelers in comparison to two wheelers. In urban areas only 4.81 per cent of households have four wheelers.

It is very significant that more than half of the households i.e. 28.91 per cent do not have any of the specified assets. In rural areas this percentage is even higher i.e. 38.48 as compared to that of in urban areas at 13.62.

(xi) Other Developmental Activities during 1999-2000

Various socio-economic developmental schemes have been initiated by the state government for the development of the district. Certain special schemes have been taken up for drinking water in drought-affected and rainfall deficient areas of the district. For the purpose, old wells are being repaired and the work of installing hand pumps has been taken up in the rural and urban areas of the district. For the drinking water, Beesalpur project is a landmark. The project after completion will feed Ajmer, Beawar, Kishangarh, Nasirabad, Kekri and Sarwar towns of the district. The availablity of water will be 132 million litres per day for these urban areas R.64.37 crores are expected to be spent on this project.

Social and Cultural activities

Fairs and Festivals

Some of the important fairs held in the district are given below :

Kartika Mela at Pushkar

Pushkar is located at 11 km. To the north-west of Ajmer City. It is famous for its ancient temples and a lake. A fair is helf annually on Kartika Sudi 11-15 (Oct-Nov) on the banks of the lake which is considered one of the principal places of pilgrimage. A cattle fair is also held at the place at that time. Another fair is held here on Vaisakha Sudi 11-15 (April-May). The metalled road connecting Ajmer with Merta passes through Pushkar. The nearest railway station for the fair is Ajmer. Other fairs held at Pushkar are Suda Bai, Nag Panchami, Savitri, Agastya Rishi and Papmochani.

Urs Khwaja Sahib

The Dargh of Khawaja Muinud-din-Chishti at Ajmer City is one of the holiest Muslim sanctuaries in India which is called 'Ajmer Sharif' by the Muslim world. A fair is held here annually in the Muslim month of Rajab from 1st to 6th. Mohammedans come from all parts of the country as well as from abroad to attend the Urs.The shrine of Khwaja Sahib is venerated and visited by Hindus, Muslims and other Indians irrespective of their religion.Khwaja Sahib is also known as 'Garib Nawaj'(the helper of the poor).

Tejaji Fair

The fair of Tejaji is held at Beawar town on Bhadrapara Sudi 1-11 (Aug-Sept.) every year. Several thousand persons congregate at the fair. The largest congregation is on Bhadrapada Sudi 10 (Aug-Sept.) which is known as Teja Dashmi. Beawar has a large bus stand and a railway station. The fairs in honour of Tejaji are also held at several other places, almost in every tehsil in the district.

Among other fairs held in Ajmer city are Jaizhulni Ekadashi, Sheel Saptami, Anter-ka-Mela, Chamunda-ka-Mela, Ajaipal-ka-Mela, Bajrang Garh-ka-Mela, Babugarh-ka-Mela, Koteshwar Mahadeo-ka-Mela, Dashera Fair and Baijnath Fair, Besides, a local fair of the peasant classes is held at village Dorai in Ajmer tehsil.

(xii) Brief description of Places of religious, historical or archaeological importance in village and places of tourist interest in the towns of the district :

Ajmer

Ajmer is the fifth largest city of Rajasthan and has a population of 485575 according to 2001 Census. It is at a distance of about 132 km. To the south-west of Jaipur city. It dervies its name, it is said, from Ajayameru (the invincible hill). It is believed to have been founded by Ajaipal Chauhan in the 7th century A.D. The city is situated in a beautiful valley and lies between $26^0$27' north latitude, and $74^0$34' east longitude at the foot of the Taragarh hill. Ajmer is well known for its old institutions. The Government College is the oldest college of Rajasthan. It has also a loco workshop and the office of the Divisional Superintendent of the Railway. The offices of the Board of Revenue and the Board of Secondary Education for Rajasthan and Rajasthan Public Service Commission are also located in the city. Archaeologically, Ajmer is one of the richest district in the whole of Rajasthan. There are as many as eight objects of national interest in the district. During the rainy season, it becomes a city of festivals and fairs. The city is connected with some historial events among which the presentation of the credentials to Jahangir in 1616 by Sir Thomas Roe, the ambassador of King James-I of England is by far the best known. Besides, Dara Shikoh, the eldest son of Shahjahan was born here, and the battle which brought Aurangzeb

to the throne was fought at Dorai not far from the city of Ajmer.

Adhal-din-ka-Jhonpra

It is situated at the foot of the Taragarh hill and is described as one of the most perfect and ancient specimen of Hindu architecture. It consists of a quadrangle cloistered on all the four sides. As you enter you see in front a wall with seven pointed arches. This building is believed to have been originally constructed for a Sanskrit College (Pathshala)while the temple was added to it by Visaldev Vigrahraj-II in 1153. It was converted into a mosque by Muhammead Ghori who attacked Ajmer in 1192. During an excavation in 1875-76 six tablets containing fragments of two important Sanshrit dramas, Harkeli Natak and Lalit Vigrahraj Natak in Devnagri characters were discovered at the site. The tablets are now exhibited in the Ajmer Museum. Several interesting and typical sculptured objects have been collected from this mosque.

Dargah Khwaja Sahib

The construction of the Dargah was commenced in the reign of Shams-ud-din Aitmash (1211-1236 A.D.) and completed in the time of Mughal Emperor Humayun at the beginning of the 16th century A.D. It comprises the musoleum of Khwaja Muin-ud-din Chisti, two mosques, an assembly hall (Mahfil Khana) and an imposing gateway (Buland Darwaza). The red sandstone mosque near the main entrance was built by Akbar. The Buland Darwaza, which is about 23 metres high, stands inside the main gateway of the Dargah. There are two giant cauldrons (degs) positioned on either side of this gate. During the annual Urs festival, a deinty preparation of rice is cooked in them of general districbution. The saint's tomb is richly adorned with gold and silver. Being the holiest of all Muslim shrines in India (next in importance to the one in Mecca) it attracts pilgrims from all parts of the country. The shrine of Khwaja Sahib is venerated and visited by all Indian communities.

Ana Sagar

It is a lovely artificial lake and is one of the finest beauty spots in India. It was constructed by the Chauhan King Arnoraj or Anaji, grandfather or Prithviraj-III, in the middle of the 12th century. It is said that Anaji killed a number of his enemies at this spot and later on in order to wash the battle-field of the horrible bloodshed, he got the lake made at the site by damming up a rivulet. This attracted the attention of the Mughal emperor when they came to Ajmer. Jahangir was so fascinated by beauty of the spot that he laid out a garden, Daulat Bagh, below the embankment. Shahjahan further added a 378 metre long marble parapet on the embankment and erected fir admirable marble pavillions.

Foy Sagar

It is a tank which was constgructied in 1981-92 by the Municipal Committee of Ajmer as a famine relief work. The present water supply of Ajmer city is made from this tank. It was constructed by damming up the river known as Badi Nadi and is named after Mr. Foy, an executive engineer. It is over seven metres deep and has a capacity of 46 million cubic metres and water spread of over million meters. Its catchment area is about 14 sq.km. There is a small graden to the north of the embankment. The scenery is very picturesque and boating facilities are also available to the visitors.

Bajrang Garh

It is a sacred place of the Hindus and stands on a hill at the head of the Ana Sagar lake. Here an old idol of Hanumanji is worshipped by hundreds of people daily. It commands a fine view of the Ana Sagar Lake and the Daulat Bagh. A big annual fair is held here on Bhadrapada Badi 3rd (Aug-Sept.).

Taragarh Fort

It is situated on a hill top about 213 metres high in the south-west of Ajmer City. It was known as Ajaya Meru-Durg in old days. The picturesque Taragarh with its impressive environs, occupies the crest of an extension of the famous Aravalli range. It has several massive gates viz. Lakshmipole, Phuta Darwaja, Gagudi-ki—Phatak and the Gate of Victory. The situation of the gates makes the fortress impregnable. Bhawani Pole and Hathi Pole are among minor poles which deserves mention.

Abdullah Khan's Tomb

It is situated near the Railway Station of Ajmer City. It is a white stone building of the later Mughal period built in 1710 A.D. Opposite to it is the tomb

of Abdullan Kahn's wife, an example of purity of design and exquisite worksmanship.

Nasiyan (Red-Temple)

It is a Digamber Jain temple which was completed in 1885 A.D. It has a double storeyed hall richly painted in beautiful colours. There is the Svarna Nagri Hall behind the temple. The wall and the celling of the hall are covered with glass mosaic work. Hereare the representations illustrative of the birth and life of Rishabdeva, the first propagator of Jainsim. A 26 metres high Manstambha (Pillar) was erected in the Nasiyan in 1937 A.D.

Magazine

It is the most important Mughal building of archaeological interest. It is situated in the heart of the city not very far from the Railway Station. It is a fort built by Emperor Akbar and is a massive square structure with bastions at each comer. In the central building of the fort is a museum which has fine collection of sculptures, inscriptions, coins and paintings.

Chavanda Mata

A temple dedicated to the goddess Chavanda stands on the slope of the hill. There is a pretty spot, well wooded and restful with water running down the hill during the rains. A fair is held here on Savan Sudi 8th (Aug-sept).

Anted-ki-Mata

The temple of Anted-ki-Mata is located in a small valley between two hills at a distance of about 2.5 km. From the Old Residency to the north of Ana Sagar Lake. It is a picturesque picnic spot. A fair is held here on Raksha Bandhan (August) ever year.

Pushkar

Pushkar town is located on the bank of lake about 11 km. To the north-west of Ajmer city. It has a population of 14791 to 2001 Census. It is one of the holy places of pilgrimage. Colonel Tod considered it as much Holy as Mansarowar. The town is picturesquely situated beside the lake with hills on three sides. Bathing Ghats have been constructed all round the lake. There are several temples of which the temple of Brahma is the most ancient and is one of the largest temples dedicated to the god. A temple of Savitri, the consort of Brahma, is on the top of a steep hill on the western side of the holy lake. The temple of Vaikunthanathji, also known as Rangji, is another notewarthy shrine built in the typical South Indian style of architecture. Other temples are dedicated to Badri Narayana, Varaha and Shiva Atmateswar. It is popular Hindu belief that a visit to Pushkar is a stepping stone to salvation. A famous fair takes place every year on the occasion of Kartika Purnima (Oct-Nov.).

Kishangarh lies at a distanced of 28 km from Ajmer on the road to Jaipur. It was an independent princely state before 1947, and there after it was made a part of Jaipur district, in 1956 when Ajmer was integrated with Rajasthan, Kishangarh was made a part of Ajmer district. It is now a sub-division headquarter of the district having as well as tehsil headquarter. It is well known for its metal works. There is a Police Training School. The town's name is associated with a famous style of Rajput painting known all over the world. Now very big Marble Market is developed here.

Beawar

Beawar is the chief town of the area previously known as Marwar. It was founded by Col. Dixon, an extra Assitant Commissioner of the area in 1838. The town is surrounded by Shaharpanah which essentaily consists of ramparts defended by thirty-two massive bastions and has four gateways. It is the second most important wool exporting centre of India. There are some Power loom Industries established on small scale level in the town. 'Til-Patti' is a special delivery of Beawar, which is sent to various places in India and abroad. Besides, three is a big cotton mill i.e. Krishna Mills, The Edward Mills and Mahalaxmi also established there is a large number of small factories in the town. There is a postgraduate college and a training school for teachers. Some of the picnic spots and places of interests in and around Beawar town are Mataji-ki-Dungri, Chang-ki-Dhani, Balad's Jain Temple and Sheopura Ghata. Makreda and Jalia water works are famous as picnic spots while Todgarh is an old fort. Nearby, there is a picturesque place known

as Dhundaleshwar. A temple of Pipaj Mata, about 3 km from todgarh is worth a visit.

A part from the places mentioned above, the other famous in the district are Arain (the old place and seat to Parmaras), village Baghera (Kekri tehsil) being the place of archaeological and antiquarian interest village Govindgarh of tehsil Kishangarh, a meeting place of rivers Saraswati and Sagarmati and Masooda an ancient village funded by Salazer Ghaz. Commander-in-Chief of Shahbudding Ghori, and named after his daughter Masud Ghazi. Nasirabad is a cantonment in the district while village Nosal (Kishangarh tehsil) is famous for the temple of Anandi Mata, the tutelary goodess of Lavadiyas. Village Pisangan has its significance because it is this place where two rivers Kalesra and Sagarmati meet. The village is widely known for its chilles which are exported to far-flung places. Other places of tourist interest in the district are Rupangarh, Rajgarh, Ramsar, Salemabad, Shreenagar and Sarwar. While the fort of Bhinay is a good specimen of the forts build by the local chiefs remains of Nad, Arain and Sakrai are also important.

(xiii) Scope of Village and Town Directory

In Part-A of the District Census Handbook, entitled as Village and Town Directory, an attempt has been made to present information regarding various amenities/facilities available in every rural/ urban unit of the State. The unit of the rural areas is village and that of urban area is town/urban agglomeration. Information regarding rural areas and Census Towns has been gathered through Patwaries while that in respect of urban areas other than Census Towns has been collected through the concerned municipality/Cantonment Board/Notified Area Committee. In order to have the aforesaid information authenticated the concerned departments and agencies were also contacted to furnish information available with them. All the information gathered about amenities relate to year 1999 and those pertaining to land-use pattern pertain to Samvat Year 2055 i.e. the agricultural year ending on the 30th June, 1999.

Village Directory

It will be helpful at the outset to have an idea of the items for which information has been included in the Village Directory. Information in respect of each village has been presented through a twenty three column format in which villages have been presented in order of their names and Permanent Location code Number (PLCN) at State level. The first four columns (2-5) give general information i.e. Name of village and Permanent location code number, area in hectares, population and number of households residing in villages as per Census 2001.The amenities available in the village have been shown in columns 6-18. The information regarding land-use pattern has been given in columns 19-23. As a special feature for Census-2001 some new columns 10-12 and 17-18 are first time incorporated viz. commercial and cooperative Bank, Agricultural/non Agricultural and other credit societies, Recreational and cultural facilities, News Paper/Magazine and most important commodity manufactured in the village. In case of uninhabited villages, the information has been given relating to columns 1-3 and 19-23 only and in the remaining columns the word 'uninhabited' has been mentioned. At the end of entries of each Panchayat Samiti the totals relating to columns 3-11, 13-14, 16-17,19 and 21-23 (total area, amenities and land-use break-up) have also been given.

Various amenities like drinking water, communication, post and telegraphs etc. have been shown against the name of the referent village if they are available within the village with the help of various codes. The Code Structure relating to various columns has been given in the beginning of Section-I to Part-A of this book. The number of each type of amenity has been indicated in parentheses after the suitable code in case of educational, medical and post & telegraph facilities.

If any amenity is not available within the village a dash (-) has been shown in the relevant column and next to it, the distance of the nearest place from the referent village where the facility is available has been given in broad distance ranges viz. <5 km, 5-10 km & 10+ km.

The following pattern has been adopted for indicating the educational institutions:

(i) Schools up to Class V have been treated as primary schools. They include Nursery Schools,

Kindegarten Schools, Pre-basic and Pre-primary Schools and Junior Basic Schools upto Class V.

(ii) All schools having Classes VI to VIII have been treated as Middle Schools.

(iii) All schools having Classes IX and X have been treated as Secondary Schools.

(iv) All schools having Classes XI and XII have been treated as Higher Secondary Schools. They include Senior Cambridge Schools, Schools under 10+2 scheme, Intermediate, Pre-University and Junior College etc.

In case of composite schools relevant groups of classes have been treated separately, e.g. a school having classes I to XII, has been shown as having one primary, one middle, one secondary and one higher secondary school. The term 'College' includes all types of colleges whether Arts/Science/Commerce/ Medical/Engineering/Agriculture and others imparting education at Graduate or Post-Graduate level. Institutions other than industrial schools, training schools and adult literacy classes/ centres have been shown under 'others'.

In case of Medical institutions, Hospitals and Dispensaries, Allopathic, Ayurvedic, Unani and Homeopathy have been shown separately. Other institutions include all types of Yogic, Naturopathy, Hospitals/Dispensaries, Leprosy Centres etc.

In case there are more than one source of drinking water facility available in the village all such sources have been shown separately. Postal amenities include Post Office, Telegraph Office and Telephone, which are shown separately.

In case there are more than one communication facilities these have been indicated separately by relevant codes. Approach to the village refers to the state of roads etc. leading to the village from the communication centres i.e. bus-stand/railway station etc. This is to give an idea whether the village is easily approachable in all types of weather or becomes inaccessible for sometime in the year. Where there are more than one approach roads these have been indicated separately by relevant codes.

Information regarding the nearest town indicates the name of such town along with the distance from the referent village irrespective of the fact whether such town is located within Rajasthan or in some other adjoining states. In case of town situated in states other than Rajasthan, the concerned State has been mentioned against its name in parentheses with the help of abbreviations. The term 'town' here refers to one of those urban centres, which have been treated, as towns in the concerned state during 2001 Census.

In order to give an idea about the uses which electricity is put to, the information has been given under the head "power supply" if it is available in the village.

Land-Use Pattern

The land-use pattern has been presented under the following five headings:

I. Forest

It denotes those lands, which have been termed as 'forest' by the competent authority.

II. Irrigated land

It relates to land, which has actually been irrigated in the referent year. The source-wise break-up has not been presented, as no such information was available in respect of the net irrigated area.

III. Unirrigated land

The term covers all the unirrigated land cultivated during the referent year and land lying fallow upto four years.

IV. Culturable waste

It includes Gaucher i.e. pasture and grazing land and tree-groves.

V. Area not available for cultivation

It refers to land, which has not been classified in any of the above mentioned types and also includes house sites, roads, rivers, nullahs, hillocks etc.

The following nine appendices have also been provided to present the position obtaining in Panchayat Samiti and district as a whole regarding various Amenities available in rural areas, villages classified by characteristics of the population and land-use pattern in Census Town in connection with the Village Directory:

(i) Panchayat Samiti wise Abstract of educational, medical and other amenities in villages.

(a) Villages by number of Primary schools.

(b) Villages by number of Primary, Middle and Secondary schools.

(c) Villages with different sources of drinking water facilities available.

(ii) Villages with 5000 and above population, which do not have one or more amenities.

(a) Census towns which do not have one or more amenities.

(iii) Land utilisation data in respect of Census Town.

(iv) Panchayat Samiti wise lists of inhabited villages where no amenity other than drinking water facility is available.

(v) Summary showing number of villages not having Scheduled Castes population.

(vi) Summary showing number of villages not having Scheduled Tribes population.

(vii) Panchayat Samiti wise list of villages according to the proportion of Scheduled Castes/ Scheduled Tribes population to total population by ranges. It consists of two parts: Part-A relates to Scheduled Castes and Part-B to Scheduled Tribes.

(viii) Panchayat Samiti wise number of villages under each Gram Panchayat.

(ix) Statement showing number of girl's schools in the villages.

Town Directory

Particulars about each town have been presented in the form of seven statements. In towns where there are slums Statement-VII has also been given in which information regarding civic and other amenities available in the slums have been shown. In each statement towns have been arranged in alphabetical order.

As has been explained earlier, urban agglomerations are of two types: first those constituted by two or more independent towns and second those where the urban characteristics have developed in the adjoining rural areas, which have developed as outgrowth of the referent town.

Where an urban agglomeration includes two or more independent towns, the names of towns constituting the agglomeration have been indicated in the alphabetical arrangement but their names have also been repeated in the alphabetical order under the name of the agglomeration after the name of the main or core town and information relating to these has been shown here. The particulars of the constituent units of the agglomerations have not been repeated wherever they occur separately in the alphabetical order and a note "See referent agglomeration" has been given against such names. The lines relating to the information regarding urban agglomeration as a whole have not been numbered but the constituent units as and when they occur in the alphabetical order have been numbered so that the last number agrees with the total number of towns in the district concerned. In respect of Statements II, III and VI in the lines relating to agglomeration a note "See constituent units" has been shown and information has been provided separately in respect of all the constituents below it.

In case of towns having out growths, an asterisk mark has been placed against their names. Information in respect of out growths has been included in the concerned town and has not been shown separately.

The amenities and other data have been indicated by codes. A list of column wise code structure and other abbreviations used in each statement has been provided at the beginning of Section-II of Part-A of this book. We may now discuss the various Town Directory statements.

Statement I

It deals with the status and growth history of the town. Columns 2 to 7 give information regarding class, name and civic status of the town, its location code number, name of the tehsil/panchayat samiti in which it is situated, its area in sq. km and number of households including houseless households residing in the town as per 2001 Census. The class of the town has been determined on the basis of its population as per Census 2001 and the civic administration status relates to the year 2000. Columns 8 to 18 show the population of the town in different decennial censuses beginning from 1901 upto 2001. The growth rate in terms of percentage in respect of previous censuses has been shown below the population figures pertaining

to each Census beginning from Column 9 onwards.

A 'dash' under these columns indicates that the referent town did not have an urban status in the referent Censuses. Density of Population per sq. km as per Census 2001 has been shown in column 19 and sex ratio (number of females per 1,000 males) have been indicated for three censuses viz. 1981 to 2001 in columns 20 to 22.

Statement II

This statement gives information about the physical aspects and locations particulars of the town in 1999. First two columns give the serial number, class, name and civic status of the town. Columns 3 to 13 deal with the physical aspects viz. rainfall and temperature. Rainfall figures are the average of the rainfall for the last one year ending 1999-2000. If the information in respect of rainfall is not available for any town it has been given for the nearest place for which it is available. Rainfall has been shown in millimeters per annum. Maximum and minimum temperatures have been given in centigrade. If the information regarding temperature is not available in respect of any town it has been given for the nearest place for which it is available and the name of the centre has been shown in footnote.

The location of the town with respect to various administrative headquarters and nearest city is indicated in columns 6 to 10. While showing the location of the referent town with respect to various administrative headquarters, names and their distance from the referent town in kilometer have been given in parentheses below the name of the place where it is situated. In case the referent town itself happens to be the seat of the administrative headquarters, this distance has been shown zero. Information regarding the nearest city of population one Lac or more and population 5 Lacs or more have been given in respect of its situation within the State or even if this city may be situated in other State. In case the nearest city happens to be situated in other State, the name of the concerned State has been shown against the name of the city in parentheses. How the referent town is approachable is given in columns 11 to 13 which indicate the availability of communication facilities viz. railway station, bus facilities and navigable river/canal within 10 km. There is no navigable river or canal in Rajasthan.

Statement III

It gives information about the finances of the civic body controlling the local civil administration and it has been presented in '000 rupees. A 'dash' in this Statement indicates that no receipt or expenditure has occurred under the particular head and 'N' represents negligible amount. First two columns give general information, columns 3 to 9 present receipt under broad categories and total receipt and columns 10 to 16 present expenditure under broad categories and total expenditure. The receipt and expenditure has been presented under six broad categories each. While receipt through taxes implies all receipts from taxes obligatory or others and revenue derived from municipal properties and power apart from taxation, it also includes income derived from holding of fairs and exhibitions, supply of milk, license fee, cattle-ponds, fines and penalties, transport services, places of entertainment, allotment/sale/lease of land and rent etc. Government grants include per capita grant, grant from Public Works Department and grant from the Social Welfare and other departments. Other sources of receipts have been specified, wherever possible but generally they are of miscellaneous nature.

Expenditure on general administration covers salary and wages of staff, contingent expenditure on staff, grants loans and advances to the staff etc. Expenditure on public safety cover fire-fighting, light, water and lease facilities, regulating the dangerous/ hazardous trades/works/occupation, water supply, registration of births and deaths, disposal of garbage, rubbish and night-soil. Public health and conveniences cover all types of medical aid and maintenance of the destitute etc. Public works include maintenance and construction of roads and buildings and relief works in times of famine and scarcity. Expenditure in public institutions covers all types of social, cultural, educational, religious institutions etc. Which are run or patronised by the municipality. Other sources of expenditure have been specified where possible but mostly these are of miscellaneous nature.

Statement IV

This statement deals with the civic and other type of public amenities and provides information about total population, scheduled castes and scheduled tribes population, road length, system of sewerage, number and types of latrines, method of disposal of night-soil, water supply, availability of fire-lighting service and electrification besides general information. In case of water supply the source of water as also the system of its storage have been shown. The storage capacity has been shown in Kiloliters. In case of disposal of night soil and protected water supply particulars have been given in respect of two methods/ sources in order of their importance if more than one exist in the town. In case fire-fighting service is not available in the town the name of the nearest place if in the same district or the name of the nearest district if in the same state or other state where available along with distance from the referent town has been mentioned.

Statement V

Particulars of medical, educational, recreational and cultural facilities available in the town have been given in this statement and the number of each type of these facilities has also been shown in parentheses is along with the appropriate code.

In case of medical facilities the number of beds wherever available has also been shown Allopathic, Ayurvedic, Unani and Homeopathic hospitals/ dispensaries have been shown separately. No code has been provided for allopathic institutions and the numbers have been shown only in figures. Thus beside H, code for hospital means an Allopathic Hospital. Separate codes have been provided for other three systems of medicine.

If a medical or educational facility is not available in the town, the name of the nearest place, if the same district or the name of the nearest district in the same State or other State where available and its distance (in km) from the referent town has been mentioned. Details of medical institutions shown under 'Others' have also been explained.

Arts, Science and Commerce Colleges have been shown separately. While showing the educational institutions upto Higher Secondary level the same procedure as adopted in case of Village Directory, has been followed. In case of composed schools relevant classes have been treated separately e.g. a school having classes I to XII has been treated as being composed of one Primary, one Middle, one Secondary and one Higher Secondary School.

All other types of educational institution which are not covered in column 6 to 14 have been shown in column 15 under 'Others' and include technical/ vocational and training institutions like Applied Art Painting College, Pharmacy College, Agricultural College, Teacher's Training College/Institution, Music/ Dance School etc. Janchetna Kendra is also included in others.

Statement VI

This statement contains particulars regarding trade, commerce, industry and banking. It gives names of three most important commodities, exported and manufactured in the town besides the number of banks, agricultural and non-agricultural credit societies functioning in the town. A list of the outgrowths, if any, along with their population and name of the core town has also been provided at the end of the Town Directory as an Appendix.

Statement VII

Information about all slums whether notified or not and for all towns has been shown in this statement in order to give an idea about the amenities available to the slum dwellers. Particulars about paved roads, systems of sewerage, number and types of latrines, method of disposal of night soil, number of tap points/ public hydrants for supply of protected water and electrification have been provided in respect of every slum in each town, if there are any.

PART-A : VILLAGE AND TOWN DIRECTORY

Section-I

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:

Column 1 : Serial Number

Self explanatory. All the villages within the Panchayat Samiti are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R

(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages Panchayat Samiti wise of the district.

Appendix-I-A Indicates number of villages Panchayat Samiti wise having one or more primary schools.

Appendix-I-B Indicates number of villages Panchayat Samiti wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages Panchayat Samiti wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV Panchayat Samiti wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII The appendix shows the list of villages according to proportion of the A, VII B Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates Panchayat Samiti wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

Section-II

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M.Cl.
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Tehsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 and 10

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory

Column 6 : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well Water	W

Column 14

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory

Column 4 & 5

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or primary health centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC

(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/ Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART-B : PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/Panchayat Samiti/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/Panchayat Samiti/Town
3.	Primary Census Abstract for Scheduled Tribes	District/Panchayat Samiti/Town
4.	Village Primary Census Abstract	Panchayat Samiti/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented Panchayat Samiti wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Panchayat Samiti is presented both for rural and urban areas separately. All the villages within the Panchayat Samiti constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Panchayat Samiti. In case a Panchayat Samiti is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Panchayat Samiti is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares. The area figures of the Panchayat Samiti is the total of the village areas coming under each Panchayat Samiti. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tehsils/ Panchayat Samiti within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Tehsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and Panchayat Samiti level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II : FERTILITY-MORTALITY MEASURES

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever-married women and last question related to currently married women.

AGE SPECIFIC MARITAL FERTILITY LEVEL, 1991 CENSUS

Age-Group	Ajmer			Rajasthan		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	66.06	66.22	65.48	99.82	99.10	103.46
20-24	170.74	190.46	138.75	217.18	227.01	182.2
25-29	155.55	192.58	104.02	197.71	214.81	144.55
30-34	114.81	151.29	65.92	141.09	158.38	85.69
35-39	71.82	97.76	36.59	90.43	104.11	47.4
40-44	33.36	48.97	10.65	53.37	61.51	25.15
45-49	18.94	29.13	2.44	27.36	30.37	15.81

The ASMFR has been calculated at seven different age groups. The highest ASMFR of the district 170.74 has been found in the age group of 20-24 followed by 155.55 in the age group 25-29. The lowest ASMFR of 18.94 has been found in the age-group 45-49. In comparison to state, ASMFR of the district is lower than that of state in all age groups. Similar trends found in rural areas. It can be seen from the table.

ESTIMATES OF CHILD MORTALITY, 1991 CENSUS

Mortality Indicators	Ajmer			Rajasthan		
	Persons	Males	Females	Persons	Males	Females
q2	118	122	116	97	95	99
q3	126	129	121	100	98	106
q5	130	134	124	110	103	117

Information on the question on children ever born and children surviving canvassed for all ever-married women has been tabulated by age of the mother. From this, estimates of child mortality have been worked out by using Brass Technique.

From the estimates of child mortality (Number of death by ages 2, 3 and 5 given as q2, q3 and q5) it is observed that the child mortality in the Ajmer district is higher as compared to the state among males and females. It can be seen from the table.

ANNEXURE-III : VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

Sl. No.	State/District	CBR	TFR	TMFR	GFR	GMFR	No. of children ever born per woman age group 45- 49	Child-woman Ratio (0-4)	Mean age at marriage of currently married women

Source : Occasional paper No.1 of 1997 office of the Registrar General India and Rajasthan state district profile 1991.
Note: * Newly Created districts after 1991 Census.

The gross fertility rate of the district has been reported as 152 as against 162 of the State. Similarly the GMFR and TFR and TMFR of the district are also lower than that of State being 178, 4.75 and 5.41 as against 184, 5.01 and 5.59 of the state respectively. The crude birth rate of the district is also lower than that of the State at 34.99.

However the number of children even born per woman in the age group of 45-49 is 4.80 which is lower than the State average of 5.07. The mean age at marriage of females in the district (16.41) is lower than that of State (16.67) as can be seen from the table. CWR (child woman ratio) 0-4 of the district is lower than state. It can be seen from the table.

ANNEXURE-IV(a) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991-2001 CENSUS

	Place of Birth	1991 Census			2001 Census		
		Persons	Males	Females	Persons	Males	Females
	1	2	3	4	5	6	7
(A)	Migrants born within the state of Enumeration	420,379 (87.43)	75,645 (75.51)	344,734 (90.57)	505,965 (89.31)	79,431 (76.88)	426,534 (92.08)
(i)	Migrants born elsewhere in district of Enumeration	266,060 (55.34)	42,900 (42.82)	223,160 (58.63)	330,928 (58.41)	43,038 (41.66)	287,890 (62.15)
(ii)	Migrants born in other district of the State	154,319 (32.09)	32,745 (32.69)	121,574 (31.94)	175,037 (30.90)	36,393 (35.22)	138,644 (29.93)
(B)	Migrants born in other states of India	46,337 (9.64)	17,559 (17.53)	28,778 (7.56)	53,354 (9.42)	20,409 (19.75)	32,945 (7.11)
(C)	Migrants born in other countries	14,082 (2.93)	6,975 (6.96)	7,107 (1.87)	7,229 (1.28)	3,479 (3.37)	3,750 (0.81)
	Total Migrants	**480,798 (100.00)**	**100,179 (100.00)**	**380,619 (100.00)**	**566,548 (100.00)**	**103,319 (100.00)**	**463,229 (100.00)**

(a) By Place of Birth:

It was seen that a sizeable portion of migrants in Ajmer District i.e. 87.43 percent in 1991 and 89.31 percent in 2001 were migrants whose place of birth was within the state of enumeration. Out of the major portion where migrants who were born elsewhere in the district of enumeration.

The migrant whose place of birth was in other states of India was 9.64 percent in 1991 and 9.42 percent in 2001 Census.

Migrant to the district whose place of birth was in other countries was 2.93 percent in 1991, whereas the proportion was marginally less i.e. 1.28

ANNEXURE - IV(b) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	420,379 (100.00)	281,246 (66.90)	139,133 (33.10)
	Rural	337,966 (80.40)	260,022 (61.86)	77,944 (18.54)
	Urban	79,483 (18.91)	18,754 (4.46)	60,729 (14.45)
In other states of India	Total	46,337 (100.00)	3,710 (8.01)	42,627 (91.99)
	Rural	13,959 (30.12)	1,590 (3.43)	12,369 (26.69)
	Urban	32,058 (69.18)	2,060 (4.44)	29,998 (64.74)

(b) Internal Migrants (Rural/Urban):

Majority of the internal migrants i.e.66.90 percent whose places of birth were within Rajasthan belonged to the rural areas of the state. The same trend also reflects in case of migrants born in other state of India as can be seen from the table.

ANNEXURE-IV(c) : INTERSTATE MIGRANTS, 1991 CENSUS

Place of Birth	1991 Census	
	Migrants	Percentage to total migrants
1	**2**	**3**
Gujarat	4,870	10.51
Haryana	3,280	7.08
Madhya Pradesh	8,460	18.26
Maharashtra	3,060	6.6
Uttar Pradesh	14,118	30.47
Delhi	2,660	5.74
Total for six States	**36,448**	**78.66**
Other States	**9,889**	**21.34**
Total	**46,337**	**100.00**

ANNEXURE-IV(c) : INTERSTATE MIGRANTS, 2001 CENSUS

Place of Birth	2001 Census	
	Migrants	Percentage to total migrants
1	**2**	**3**
Gujarat	14,729	27.61
Haryana	9,226	17.29
Madhya Pradesh	5,342	10.01
Maharashtra	3,468	6.50
Uttar Pradesh	3,213	6.02
Delhi	2,775	5.20
Total for six States	**38,753**	**72.63**
Other States	**14,601**	**27.37**
Total	**53,354**	**100.00**

(c) Inter-state Migrants:

In the case of Inter-state migrants they are mainly from Uttar Pradesh and Madhya Pradesh as their percentages are 30.47 and 18.26 respectively in 1991 census. In 2001census main migrants are from Uttar Pradesh and Madhya Pradesh and their percentage are 27.61 and 17.29 respectively. Percentage of six states to total migrants is 72.63 in 2001.

ANNEXURE-IV (d) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE, 1991-2001 CENSUS

Place of Last Residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Within the State of Enumeration but outside the place of Enumeration	431,124 (87.82)	78,835 (76.17)	352,289 (90.93)	515,281 (89.51)	82,572 (77.43)	432,709 (92.25)
(i) Elsewhere in the District of Enumeration	274,113 (55.84)	44,930 (43.41)	229,183 (59.15)	340,954 (59.22)	46,263 (43.38)	294,691 (62.83)
(ii) In other districts of the state of Enumeration	157,011 (31.98)	33,905 (32.76)	123,106 (31.78)	174,327 (30.28)	36,309 (34.05)	138,018 (29.42)
(B) States in India beyond the state of Enumeration	46,837 (9.54)	18,069 (17.46)	28,768 (7.42)	53,412 (9.28)	20,643 (19.36)	32,769 (6.99)
(C) Last Residence outside India	12,982 (2.64)	6,595 (6.37)	6,387 (1.65)	7,004 (1.22)	3,422 (3.21)	3,582 (0.76)
Total Migrants	**490,943 (100.00)**	**103,499 (100.00)**	**387,444 (100.00)**	**575,697 (100.00)**	**106,637 (100.00)**	**469,060 (100.00)**

(d) Migration by Place of Last Residence:

In the percentage distribution of migrants by place of last residence in the district it was seen that in 1991 census,.the highest proportion of migrants i.e. 87.82 percent were from within the state of enumeration but outside the place of enumeration. In 2001 Census this proportion increased to 89.51 percent in the same category. Surprisingly it was seen that the proportions of female migrants were higher than the male migrants in both censuses.

The migrants in the district that were from states in India beyond the state of enumeration was 9.54 percent in 1991 as compared to 9.28 percent in 2001 census.

Persons whose last residence was outside India were 2.64 percent in 1991 census while there was a marginal reduction to 1.22 percent in 2001 census.

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	431,124 (100.00)	287,078 (66.59)	144,046 (33.41)
	Rural	352,428 (81.74)	270,034 (62.63)	82,394 (19.11)
	Urban	77,146 (17.89)	15,914 (3.69)	61,232 (14.20)
In other states of India	Total	46,837 (100.00)	4,110 (8.78)	42,727 (91.22)
	Rural	13,119 (28.01)	1,660 (3.54)	115 (24.47)
	Urban	33,448 (71.41)	2,420 (5.17)	31,028 (66.24)

(e) Migration by Place of Last Residence (Rural/ Urban):

Majority of the internal migrants i.e. 66.59 per cent whose place of last residence were belonged to rural areas of the states. Similar trend also reflects in case of migrants whose places of last residence were in other state of India. As can be seen from the table.

RELIGION

Religion is an important basic cultural characteristic of the population. It provides an interesting picture of the society. The data on religion projects the unity and diversity of the country. The data is great importance to the public as well as Government,NGO and Minorities Commission.

Among the followers of six major religions in Ajmer District it was seen that the proportion of Hindus had marginally decreased from 86.76 percent in 1991 to 85.67 percent in 2001 Census. Whereas the proportion of Muslims increased from 9.87 to 11.20 percent. It is also true In the case of Sikh, and Buddhist Communities during the same period but the Jain community showed a marginal decreased., The Christian community registered no change in percentage during the decade.

At the state level however the proportion of Hindus, Christians, Buddhist and Jain decreased whereas those of Muslims and Sikhs, are increased.

MARITAL STATUS OF POPULATION

Majority of the population of the district in1991census is 50.04 percent in married followed by never married and widowed i.e. 45.07 and 4.71 percent respectively. Out of the male total population of the district 49.39 percent males are never married and of female never married is 40.37 percent, the proportion of widowed females is higher 7.20 percent than the males 2.42 percent. Married males are 47.99 percent while 52.27 percent females are married at the district level. Divorced or separated is not so widely practiced, only 0.19 males and 0.16 females are reported in this category which are almost half to the state average. The same trend was found in rural as well as urban areas. In 2001 census 48.31 is never married. There after comes never married persons whose percentage to total population comes to 46.69 widowed persons in absolute numbers 103595 which is 4.75 percent to total population. Sexwise, males have higher population of never married is 50.99 percent as compared to females whose population is 42.06 percent.. On the other hand, females have higher proportion of married than males 46.62 percent. Females have a phenomenal higher number 79667 than male widowers 23928 in the district. It can be seen from Annexure VI.

AGE, SEX AND EDUCATIONAL LEVEL, 1991- 2001

Literacy in the age-group 10-14 years in1991 in the district was 67.1 percent in the total, which was higher among the males 83.8 percent and females 47.8 percent. In the total in the age group 15-19 years the literacy lower in the total i.e. 64.8.percent and the same trend was found as in the earlier age group

except that the female literacy in this age group 15-19 years was as low as 46.3 percent. In general it was seen that the literacy rate in the urban areas was much higher both among males and females. The proportion of metric but below graduate was however not very high. In the total there were 12.0 percent metric but below graduate persons. Here also the male proportion was higher i.e. 17.3 percent compared to females 6.4 percent. Graduate and above in the age group 20 + years followed the same trend but in lesser proportion. In 2001 census the total population of the Ajmer district was 2181670 which 64.7 percent are literates. As per the definition of literacy in the 2001 Census the entire population in the age group 0-6 was considered to be illiterates. The total literacy rate in the district Ajmer in the age-group 10-14 years was 80.6 percent and among males and females it was 91.2 and 68.6 percent respectively, which is higher as compared to the state in the same age group. Similarly literacy rate in the age group of 15-19 years 89.5 percent males and 63.4 percent females were reported in the district, which is also lower than that of the state.

It is a general trend of the literacy at the state as well as district level, female literacy is lower than the male literacy. The percentage showed a decline at Metric but below Graduate 21.0 percent among male and 8.6 percent as females while at the graduate and above level 10.9 percent males and 6.1 percent are females. It can be seen from the Annexure VII.
