## Deeg Palaces

Deeg is known for its magnificient Palaces, constructed around the mid 18th Century by Raja Suraj Mal, namely Suraj Bhawan, Gopal Bhawan and Kishan Bhawan. The most impressive of all is the Gopal Bhawan overlooking the Gopal Sagar. In front of the palace is an intricate marble swing. It has a spacious banquet hall with a double row of graceful pillars. In one of the rooms is a black marble bed, meant for the corpses of the Maharajas. The dining hall is of yellow marble with curved sloping window arches. The royal chess room is worth seeing with a low arcade of columns and a sunken section in the center where a huge chess board is laid out. The palace with all its windows of stone lattice work, is flanked by two pavilions, Sawan and Bhadon with curved roofs and ornamental spires. These palaces reflect the royal splendour that was.

District Highlights–2001 Census xv

Important Statistics and Ranking of Tehsils in the District xvii - xix

**Statements 1-9** **xxi - xxviii**

Statement-1 : Name of the Headquarters of the District/Tehsil, their Rural-Urban status and Distance from District Headquarters, 2001 xxi

Statement-2 : Name of the Headquarters of the District/Panchayat Samiti, their Rural-Urban status and Distance from District Headquarters, 2001 xxi

Statement-3 : Population of the District at each Census from 1901 to 2001 xxii

Statement-4 : Area, Number of Villages/ Towns and population in District and Tehsil, 2001 xxiii

Statement-5 : Panchayat Samiti-wise number of villages and rural population, 2001 xxiv

Statement-6 : Population of Urban Agglomerations/Towns, 2001 xxiv

Statement-7 : Villages with population of 5,000 and above at Panchayat Samiti level as per 2001 Census and amenities available xxv

Statement-8 : Statutory Towns with population less than 5,000 as per 2001 Census and amenities available xxvi

Statement-9 : Houseless and Institutional Population of Tehsils, Rural and Urban, 2001 xxvii

Summary Statement : Jurisdiction of Panchayat Samities in each Tehsil, 2001 xxviii

**Analytical Note** **1 - 69**

(i) History and scope of the District Census Handbook 3

(ii) Brief History of the District 6

(iii) Administrative set-up 7

(iv) Physical Features : (1) Location and size (2) Physiography (3) Water resources (4) Climate (5) Natural economic resources 8

(v) Census Concepts 13

(vi) Non Census Concepts 20

(vii) 2001 Census findings-Population, its distribution 24

(viii) Brief analysis of PCA data based on inset tables 1 to 36 25

Page No.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47 50

(x) Brief analysis of the data on houses and household amenities, House-listing Operations, Census of India 2001 based on inset tables 48 to 52 56

(xi) Other Developmental activities 63

(xii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district 63

(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district 65

(xiv) Scope of Village Directory and Town Directory - column heading wise explanation and coverage of data 65

**PART-A : VILLAGE AND TOWN DIRECTORY**

**Section-I : Village Directory** **71 - 486**

(a) Note explaining the abbreviations used in Village Directory 73

(b) List of Villages merged in Towns and Outgrowths at 2001 Census 77

(c) Panchayat Samiti-wise presentation of Village Directory Data

(i) Panchayat Samiti Maps showing Tehsil boundary

(ii) Alphabetical List of Villages alongwith Location Code 1991 and 2001

(iii) Presentation of Village Directory data in prescribed format

1. Panchayat Samiti : Kaman 81
2. Panchayat Samiti : Nagar 127
3. Panchayat Samiti : Deeg 177
4. Panchayat Samiti : Kumher 207
5. Panchayat Samiti : Sewar 237
6. Panchayat Samiti : Nadbai 277
7. Panchayat Samiti : Weir 305
8. Panchayat Samiti : Bayana 341
9. Panchayat Samiti : Rupbas 383

(d) **Appendix to Village Directory**

Appendix-I : Abstract of Educational, Medical and Other Amenities in Villages - Panchayat Samiti level 420

Appendix-IA : Villages by number of Primary Schools 424

Appendix-IB : Villages by Primary, Middle and Secondary Schools 424

Appendix-IC : Villages with different sources of drinking water facilities available 425

Appendix-II : Villages with 5,000 and above population which do not have one or more amenities available 425

Appendix-IIA : Census Towns which do not have one or more amenities 426

Appendix-III : Land utilisation data in respect of Census Towns/Non Municipal Towns 426

Pages No.

Appendix-IV : Panchayat Samitiwise list of inhabited villages where no amenity other than drinking water facility is available 426

Appendix-V : Summary showing number of villages not having Scheduled Castes population 427

Appendix-VI : Summary showing number of villages not having Scheduled Tribes population 427

Appendix-VIIA : List of villages according to the proportion of the Scheduled Castes to the total population by ranges 428

Appendix-VIIB : List of villages according to the proportion of the Scheduled Tribes to the total population by ranges 442

Appendix-VIII : Number of villages under each Gram Panchayat (Panchayat Samiti wise) 447

Urban Primary Census Abstract 734

Annexure-I : Number of villages under each Gram Panchayat 758

Annexure-II : Fertility and Mortality, 1991 Census 802

Annexure-III : Various measures of fertility and mean age at marriage, 1991 Census 803

Annexure-IV : Percentage distribution of Migrants by place of birth/ place of last residence, 1991-2001 Census 804

Annexure-V : Brief account of main religions in the district as per 1991-2001 Census 805

Annexure-VI : Marital status of population as per 1991-2001 census 806

Annexure-VII : Age, Sex and Education in the district, 1991-2001 Census 807

Annexure-VIII : Distribution of different mother tongues returned in 1991-2001 Census 807

# Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri J.L.Modi, Director of Census Operations, Rajasthan. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

**D.K.Sikri**
Additional Secretary &
Census Commissioner, India

# Preface

I am deeply indebted to the State Government of Rajasthan for their unstinted support and cooperation despite all odds and adversaries like famine etc. at all stages of Census Operations of 2001. I am grateful to Shri Inderjit Khanna, the then Chief Secretary of Government of Rajasthan for his prompt response, guidance and cooperation given to the Census Organization. He infused a sense of urgency and seriousness in the minds of District Collectors and Officers of the District Administration, which geared up the entire administrative machinery. The Supervisors and Enumerators, the basic census functionaries worked ceaselessly in the entire period of fieldwork to make Census 2001 successful.

Sarvashri Ashok Pandey and Vinod Zutshi, the then Secretaries in the Department of Cabinet Secretariat and General Administration have been instrumental in making Census 2001 a successful one. I owe my thanks to both of them. I am also thankful to other Departments like Education, Finance, Revenue, Economics and Statistics, Public Relations, Printing and Stationery, Local Self-government and Personnel Department for extending their full cooperation.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his unstinted support and spontaneous, unfailing guidance throughout our endeavours. At the outset I would like to thank Shri D.K. Sikri, Registrar General and Census Commissioner, India for guiding us in bringing out this report. My grateful thanks to Shri K.N. Unni, Ex-DRG (C&T), Shri R.G. Mitra, Ex-DRG (C&T), Shri R.P. Singh, Consultant (Map), Shri Himakar, Additional Director (EDP), Dr. I.C. Agrawal, A.R.G.(SS), Shri S.L. Jain, Deputy Director (SS), Shri C. Chakravorty, Joint Director (DDU) and their colleagues at the headquarter for their ever willing, helping hand and thoughtful suggestions for putting together and shaping the volumes in their present form.

The Director of Census Operations, Rajasthan, Shri J. L. Modi under whose guidance the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before this volume could be made available for the press. I am deeply greatful to Shri H.S. Meena, Ex-Joint Director of Census Operations, Rajasthan for its success.

It may be mentioned a few annexures have been added to this volume with a view to provide an insight into the 1991 and 2001 data on the suggestion of Social Studies Division of the Office of the Registrar General, India. In this connection the contribution of Shri V.K. Gupta, Senior Compiler can not be ignored.

Shri H.C Sharma, Assistant Director incharge of District Census Handbooks and Primary Census Abstract, who was ably assisted by his team of dedicated workers deserve all praise for their perseverance and dedication in preparing Village and Town Directories and in finalization of PCAs and other inset tables. I would like to thank Shri G. Fernandes, Assistant Director who not only coordinated the work but also contributed immensely to the cause of Village and Town Directories.

In view of the increasing demand of the publications in electronic format, it has been decided to publish the DCHB also on CD. I highly appreciate the efforts put in by Smt. Jyoti Luhadiya, DD(EDP) and her team to compile in the electronic format. The efforts put in by Shri Divesh Chawla, DEO Gr-'B' to prepare this is highly commendable. In this connection, the contributions of Shri P.N. Mathur Sr.Supervisor and Shri J.P. Verma, DEO Gr-'B' cannot be ignored.

Shri H.C Sharma, Assistant Director has taken pains in drafting the District Profile and the Analytical Note for the district. The members of the staff in the Map Section did a commendable job under the guidance of Shri Panna Lal, R.O.(Map), ably assisted by Shri R.S. Tyagi, Sr.Geographer in bringing out various maps.

.

# District Highlights - 2001 Census

1. Bharatpur district ranks 8th in terms of population, 26th in area and 2nd in terms of population density.
2. The sex ratio of Bharatpur district (854) is lower than that of the state (921) sex ratio.
3. Bharatpur district has 63.6 per cent literacy rate as compared to 60.4 per cent literacy rate in the state.
4. Only 2 village have population more than 10,000 namely Jagheena (Rural) in Bharatpur Tehsil, and Rupbas in Rupbas Tehsil.
5. Village Rupbas (Rupbas Tehsil) is most populated (12555) and Araji Babekhar in the Weir Tehsil is the least populated (1) village.
6. The economy of the district mainly depends on agriculture.
7. The district has recorded 47.1% work participation rate for male workers.
8. Bharatpur Tehsil and Bayana Tehsil has the highest number of villages (177) each and Nadbai Tehsil has the lowest number of villages (117).
9. In the district the largest village is Bajna in tehsil Bayana with an area of 5163 hectares while the smallest village is Nagla Chewa with an area of 7 hectares in Deeg tehsil.
10. Deeg is an important historical town of Bharatpur district. It is famous for its fountain palace.
11. Keoladeo Ghana is situated adjacent to Bharatpur city. It is famous breeding sanctuary for water bird.

## (i) History and scope of the District Census Handbook

The series of District Census Handbooks has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several new innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Numbers (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from 1 to N. Each village has been assigned an eight digit code. The first six digits represent the code of the village as existing at the present census. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the Permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001, are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

The responses for almost all the questions in the Houselisting Schedule had pre-coded options. This not only helped the enumerators to record the response easily but at a later stage would hopefully facilitate quicker data processing. Apart from the improvements made in the format of the Houselisting Schedule, the scope of Houselisting was considerably expanded with the inclusion of new questions based on requirements of various data users and planners. The new features of the Houselisting Schedule are listed below.

- For the first time, different uses of census houses have been standardized and grouped into ten main uses and assigned code numbers.
- Plastic has been added in the list of material of wall and roof of a census house, as it is often used for shelter in slums and shanties.
- In the previous census, the location of drinking water source was categorized into two locations viz. 'within premises' and 'outside premises'. In the Census of India, 2001, the source 'outside premises' was split into two categories namely 'near the premises' and 'away from the premises'.
- The scope of question of availability of electricity was expanded to include six sources of lighting. Besides no lighting, this included sources like electricity, kerosene, solar, other oil and any other source.
- In 1991 Census, a question on availability of toilet facilities to the household was canvassed while in Census of India, 2001, specific information on availability of latrine within the house by the type of latrine was sought.

In addition to expending the scope of the questions canvassed during the Houselisting Operations in the 1991 Census, the following new questions were added in the Houselist Schedule for Normal Households at the Census of India, 2001.

- If the Census house was used for residential or partly residential purposes, the condition of the census house was categorized as good, livable or dilapidated based on the perception and response of the respondent.
- A question on number of married couple(s) living in the household was canvassed.
- Information was sought on the number of married couple(s) having independent room for sleeping.

- Information as to whether the waste-water outlet of the house is connected to 'closed drainage' or 'open drainage' or has not drainage was collected.
- A question on availability of bathroom within the house was included.
- Information on availability of kitchen within the house was also sought.
- Availability of certain assets to the households namely radio/transistor, television, telephone, bicycle, scooter/motor cycle/moped, car/jeep/van were also included.
- It was also enquired whether any banking service was being availed by the household.

The Household Schedule adopted for the Population Enumeration also primarily had pre-coded options for majority of the questions. The questions for each data item were made as self-explanatory as far as possible for easy understanding. The comprehensive Household Schedule had three parts and two sides A and B. Part I contains the Location Particulars; Part II relates to Individual Particulars and Part III contains questions for Household engaged in Cultivation/Plantation. To facilitate quick tabulation for bringing out Provisional Population Totals, provisions of page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates and workers and their categories by sex. Most of the questions canvassed during the 1991 Census, were retained for the 2001 Census, except the question on ex-serviceman, which was dropped during the Census of India, 2001. However, a number of new questions were added in the Household Schedule in view of the suggestions from policy makers, data users and researchers, while the scope of certain existing questions was enhanced.

These modifications are:

- Age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.
- The type of educational institution attended by a person was enlarged to include school, college, vocational institute, other institute and literacy center.
- The scope of the definition of 'work' was expanded in the Census of India, 2001, to include production of milk for domestic consumption. In the 1991 Census, cultivation of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India, 2001.
- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India, 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census is dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census, is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected are- in seeing, in hearing, in speech, in movement and mental.

- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work is collected under this section.
- The Household Schedule has a new set of questions for Household engaged in cultivation/ plantation (i) Net area of land under cultivation/ plantation, (ii) Net area of land irrigated and (iii) Tenure status. This question was not canvassed at the 1991 Census but was canvassed in the 1981 Census in a slightly different form.
- The signature or thumb impression of the respondent has been taken on the Household Schedule for the first time in the history of Census. This was not only aimed at obtaining correct and complete information but also for giving an opportunity to the respondents to authenticate the information provided by them. The relationship of the respondent with the head of the household was also obtained. This new feature will pave way in carrying out a methodological study in future on the respondent profile in the census.

In 1981 Census, for the first time, an attempt was made in the series to bring out demographic and other data in diglot, Hindi and English, for a more beneficial use by data user of all categories. Hindi being the official language of the State, a Hindi version of the analytical notes was also added with a view to caters to the needs of all sections of readers. The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same.

As a necessary corollary to the Handbooks, Panchayat Samities, the basic administrative units of development, administration and planning, were listed out separately for the first time in 1981 Census in relation to those districts wherein they were not coterminous with their tehsils. As an additional attempt, informations relating to population figures as well as amenities available in each village located in the jurisdiction of each Panchayat Samiti were also presented in a separate volume under the title "Supplement to District Census Handbook". However, for reference in the main District Census Handbook, a list of villages forming part of each non-coterminous Panchayat Samiti was provided along with the abstracts of population and amenities for such Panchayat Samities as a whole in the form of Special Annexures.

In order to cater to the overall needs of the data-users and to facilitate the task of administrators and planners it has now been decided to present the Village Directory and Primary Census data at the Panchayat Samiti level instead of the traditional Tehsil level presentation. It is expected that the presentation of Village Directory and Primary Census Abstract data at Panchayat Samiti level will help the planners in formation of micro-level developmental plans, as the Panchayat Samiti is now the lowest administrative unit for development planning. However, for the convenience of the data users and for the sake of comparability of data at Tehsil level, the Primary Census Abstract has also been presented at the Tehsil/ Town level in the form of an Appendix.

A general note on each district covering information of general interest regarding its history, topography, physiography, administrative set-up and places of tourist and historic importance etc. has also been included with a view to provide comprehensive and more purposeful information about the district as a whole. Population figures of Scheduled Castes and Scheduled Tribes constituting the core of 'Weaker Section' have also been presented at district, panchayat samiti and town level so as to facilitate planning for their welfare both at micro and macro levels.

It is earnestly hoped that this publication will serve its purpose for planners and administrators of welfare schemes and other data users in general.

Prior to 1951, Census Reports were printed for the whole province/state. The idea of preparing the District Census Handbooks separately for each district was conceived during 1951 Census as a part of a plan intended to secure an effective method of preserving the Census data below the district level. The idea was that all the district census tables would be bound together in a single volume called the District Census Handbooks. Since then the District Census Handbooks are being published regularly.

The 1951 Census series of District Census Handbooks was printed in two parts. Part I contained five General Population Tables (A Series), three Economic Tables (B Series), five Household and Age Tables (C Series) and seven Social and Cultural Tables (D Series). In Part II of District Census Handbook "Primary Census Abstract and Village Directory" which showed the basic population figures for each village or town classified by livelihood classes, were included along with some information of general nature.

The 1961 Census series of District Census Handbooks were printed in single volume in which Primary Census Abstract upto village and town/ward level and Village Directory upto village level were given. Besides, some official statistics collected from various state departments, four General Population Tables (A Series), sixteen Economic and Household Tables (B Series), seven Social and Cultural Tables (C Series), four Housing Tables (E Series) and eight Special Tables for Scheduled Castes/Scheduled Tribes were also provided in District Census Handbooks. For the first time in 1961 Census the maps for the district and tehsil were also included in the District Census Handbooks.

In 1971 Census series of District Census Handbooks village-wise 'Village Directory' giving services, facilities or amenities available in the village was given. 'Town Directory' was introduced for the first time giving useful information in respect of every town of the district. Rural Primary Census Abstract upto village level and Urban Primary Census Abstract upto enumeration block level were given in District Census Handbooks. While the District, Tehsil and Town maps were included; the inclusion of Census Tables was dispensed with in the District Census Handbooks in 1971 Census.

The scope of 1981 series of District Census Handbooks was enlarged specially in relation to amenities and land-use pattern. Apart from new items like uses of electricity, details of communication points, information for which was not collected in 1971 Census, a note on each district covering general information on its history, topography, flora, fauna and administrative set up etc. was also added. The format of the Primary Census Abstract was also restructured in the light of changes in economic and other questions canvassed in the 1981 Census but at the same time, all efforts were made to retain comparability with 1971 Census data. The inclusion of Special Primary Census Abstract for Scheduled Castes and Tribes at the Tehsil/Town level was another innovation introduced in 1981 Census series.

The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same as followed in 1981. However, the format of Primary Census Abstract was restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group was included in Primary Census Abstract for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate at the time of the 1991 Census.

One of the most important innovations in the 1991 Census was the Panchayat Samiti level presentation of data in the Village Directory and Primary Census Abstract instead of the traditional Tehsil level presentation.

Deviating from 1991 Census, like 1981 Census four fold industrial classification of main and marginal workers has been presented in 2001 as against nine fold given in 1991.

The mode of presentation of DCHB in 2001 will by and large be same as that of in 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc. pertaining to 1991 Census of the respective district in the DCHB in the form of Annexures II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

## (ii) Brief History of the District

The name of the district is derived after the name of its principal city Bharatpur, which is named as per local tradition and legend after 'Bharat', the younger brother of Lord Ram of Ayodhya. Lakshman, another

younger brother of Lord Ram was worshipped as family deity by the rulers of this state and whose name was engraved in the state coat of arms and seals.

The excavations at Noh (Latitude 27°15'E, Longitude 77°30'-N) about 6.43 km from the city of Bharatpur on the Agra road have revealed the existence of five cultural periods of ceramic industry viz Period I: Ochre coloured ware, Period II: Black and red ware, Period III: Painted grey ware, Period IV: North black polished ware and Period V: Sunga-Kushana phase.*

Explorations at Rupbas, Sewar, Bagadari, Aghapur and Aou and Kaman in the districts showed that last three places were painted greyware sites. In the course of exposing the plinth of the monument called Chaurasi Khamba at Kaman a few sculptures and ornate architectural fragments including a stone inscription of Circa ninth century A.D. were also discovered.*

The close proximity of the district to Mathura in the east and to Bairath (old Virat) in the farther west, lends the area an antiquity of epic age when Matsya inhabited this region. This tribe is mentioned in the Rigveda alongwith other Aryan Tribes.* The discovery of the minor rock edit of Ashoka at Bairath goes to prove this region was included in the Mauryan empire.

It is pertinent to note that the erstwhile rulers of Bharatpur (before the formation of Rajasthan) belonged to the Jats of the Sinsinwar clan and claimed descent from Madan Pal, a Jadon Rajput and the third son of Tajan Pal, who ruled in the eleventh century A.D. at Bayana and subsequently acquired possessions, which later on formed Karauli State. It is said that one of Madan Pal's descendants, Bal Chand, kept a Jat woman as his concubine and by he had two sons, Bijay and Sijay, who were not admitted into Rajput brotherhood but were regarded as Jats. Having no gotra or clan of their own, they took the name of Sinsinwar from their paternal village, Sinsini (13 km south of Deeg). The Chief of Bharatpur traces his descent to them.

The present day district of Bharatpur has been formed in many stages. First of all, as a result of the efforts of Sardar Vallabh Bhai Patel, the states of Bharatpur and Dhaulpur, along with the states of Karauli formed Matsya union on 17th March 1948. Among the princely states of Rajputana, this was the first union to be formed. The Matsya union was merged with the united state of Greater Rajasthan on May 15, 1949 and with Rajasthan on January 26, 1950. Then a separate district of Bharatpur was formed by merging the old jurisdictional boundaries of the states of Bharatpur and Dhaulpur. On 15.4.82, a separate district of Dhaulpur from Bharatpur district comprising of the jurisdictional limits of Dhaulpur sub-division was formed. As a result of this the jurisdictional boundaries of Bharatpur district was restructured upto old state of Bharatpur.

* District Gazetteer, Bharatpur (Rajasthan).

### (iii) Administrative Set-up

There is no change in the geographical area of the district since 1991 which is 5066 sq. km. This accounts 1.48 per cent of the total area of the state. Bharatpur district is under the administrative control of the Divisional Commissioner, Jaipur. The district is headed by the District Collector. The district has 4 sub-divisions, 10 tehsils, 9 panchayat samities, 8 municipalities and 1 municipal council. The distribution of the district its sub-divisions, tehsils and towns is as given below:

| Sub-Division | Tehsil | Town | |
|---|---|---|---|
| 1. Bharatpur | 1. Bharatpur | Bharatpur | (M.Cl.) |
| | 2. Kumher | Kumher | (M) |
| | 3. Nadbai | Nadbai | (M) |
| 2. Bayana | 4. Bayana | Bayana | (M) |
| | 5. Rupbas | - | |
| | 6. Weir | Bhusawar | (M) |
| | | Weir | (M) |
| 3. Deeg | 7. Deeg | Deeg | (M) |
| | 8. Nagar | Nagar | (M) |
| 4. Kaman (from 10.8.1998) | 9. Kaman | Kaman | (M) |
| | 10. Pahari | - | |

For police administration an office of the Deputy Inspector General of Police is functioning at Bharatpur which is being assisted by the District Superintendent of Police.

During the decade 1991-2001, no new tehsil or panchayat samiti has been created in the district. As regards to the number of revenue villages, it has increased from 1454 in 1991 to 1472 in 2001. In fact,

27 new revenue villages were created during the decade 1991-2001 whereas 9 revenue villages have reorganised. Among these reorganised villages, six, one and two belonged to Nagar, Kumher and Bharatpur tehsils respectively. Of the total 1472 revenue villages of the district, 106 are unpopulated villages. The following statement gives the number of villages in 1991 and 2001, number of populated and unpopulated villages and number of newly created and reorganised villages.

| S. No. | Name of Tehsil | Number of villages | | Number of villages in 2001 | | No. of newly created villages | No. of reorganised villages | Remarks |
|---|---|---|---|---|---|---|---|---|
| | | 1991 | 2001 | Populated | Unpopulated | | | |
| 1 | Pahari | 136 | 136 | 132 | 4 | - | - | |
| 2 | Kaman | 122 | 127 | 114 | 13 | 5 | - | |
| 3 | Nagar | 173 | 173 | 164 | 9 | 6 | 6 | |
| 4 | Deeg | 132 | 132 | 119 | 13 | - | - | |
| 5 | Nadbai | 116 | 117 | 114 | 3 | 1 | - | |
| 6 | Kumher | 118 | 124 | 117 | 7 | 7 | 1 | |
| 7 | Bharatpur | 175 | 177 | 157 | 20 | 4 | 2 | |
| 8 | Weir | 150 | 151 | 146 | 5 | 1 | - | |
| 9 | Bayana | 175 | 177 | 161 | 16 | 2 | - | |
| 10 | Rupbas | 157 | 158 | 142 | 16 | 1 | - | |
| | **Total** | **1,454** | **1,472** | **1,366** | **106** | **27** | **9** | |

In the district, 7 panchayat samities are such which are co-terminus with their respective tehsils. These panchayat samities are — Deeg, Kumher, Sewar, Nadbai, Weir, Bayana and Rupbas. There are a total number of 371 gram panchayats in the district. The statement given below presents a comparative picture of panchayat samities and tehsils.

| S. No. | Name of Panchayat Samiti | Number of | | Name of Tehsil | Number of Villages | Remarks |
|---|---|---|---|---|---|---|
| | | Revenue Villages | Gram Panchayats | | | |
| 1 | Kaman | 209 | 44 | Pahari | 82 | - |
| | | | | Kaman | 127 | |
| 2 | Nagar | 227 | 49 | Pahari | 54 | - |
| | | | | Nagar | 173 | |
| 3 | Deeg | 132 | 36 | Deeg | 132 | Co-terminus |
| 4 | Kumher | 124 | 36 | Kumher | 124 | Co-terminus |
| 5 | Sewar | 177 | 33 | Bharatpur | 177 | Co-terminus |
| 6 | Nadbai | 117 | 37 | Nadbai | 117 | Co-terminus |
| 7 | Weir | 151 | 46 | Weir | 151 | Co-terminus |
| 8 | Bayana | 177 | 45 | Bayana | 177 | Co-terminus |
| 9 | Rupbas | 158 | 45 | Rupbas | 158 | Co-terminus |
| | **Total** | **1,472** | **371** | **-** | **1,472** | **-** |

## (iv) Physical Features

### (1) Location and Size

This is the eastern most district of Rajasthan lying between 26°40' and 27°50' north latitudes and 76°53' and 77°45' east longitudes. It forms the boundaries with Gurgaon district of Haryana in the north, Mathura and Agra districts of Uttar Pradesh in the east, Alwar and Dausa in the west and Dhaulpur district in the south.

Bharatpur is situated at a distance of about 180 kms Jaipur, 160 km from Delhi and 55 kms from Agra.

### (2) Physiography

Bharatpur district consists of different types of topography. Where Bharatpur and Nadbai tehsils consist of plain and leveled area, on the other hand, Bayana and Rupbas tehsils have hilly area. The district has no perenial river. Gambhir, Banganga and Ruparel are the main seasonal rivers which create havoc during monsoon by causing flood in the district. The general feature is that of alluvial places, fairly well-wooded and boarded with detached hills in the north.

### (3) Water Resources

For the facility of drinking water and for agricultural purpose there are 25,527 wells in the district of which only 9,372 are brought into use, whereas the number of ponds which are being used in the district are approximately 100 in number. The number of tube wells totalled upto 32,209.

The water supply schemes upto the year 2000 provided handpumps to the extent of 855 local / regional schemes amounted to 324, Panghats were 108, besides this there were 20 piped water schemes that benefited the district.

### (4) Climate

The climate of the district is normally humid and dry. It becomes extremely hot during summer and extremely cold during winter. The maximum and the minimum temperature recorded in 1999 was 46°C and 4°C respectively. The normal annual rainfall of the district is 66.39 cm. The year wise rain fall in the district is as following:

| Year | Rainfall in cms. |
|---|---|
| 1995 | 83.74 |
| 1996 | 85.1 |
| 1997 | 61.64 |
| 1998 | 72.82 |
| 1999 | 62.34 |

**Source :** Statistical Abstract, 1999.

The ground water level of the district varies from 3 meter to 25 meter deep.

### (5) Natural economic resources

### Geology and Minerals

About 3 per cent of the total geographical area of the district possess mineral wealth. Minerals are mainly found in Bayana, Kaman, Weir, Deeg, Rupbas, Nagar Pahari and Bharapur areas of the district. Silica sand, sand stone, mill stone, masonary stone, churt, slate stone, clay etc. are the main minerals found in the district. An income Rupees 2,39,64,521.00 was earned from minerals during the year 2000-2001.

The following data shows the production and sale of different minerals for the year 2000-2001:

| Sl. No. | Name of Mineral | Production in Tones | Total Income (in Rs.) |
|---|---|---|---|
| | **Principal Minerals** | | |
| 1 | Silica sand | 5812.00 | 292,100 |
| 2 | Fire clay | - | 6,950 |
| 3 | Red Akar | - | 232 |
| | **Non-Principal Minerals** | | |
| 1 | Masonary stone | 141585.00 | 8,884,311 |
| 2 | Sand stone | 27030.00 | 8,071,235 |
| 3 | Mill stone | 920.00 | 54,740 |
| 4 | Churt | 581.00 | 81,573 |
| 5 | Slate stone | 255.00 | 138,880 |
| 6 | Brick clay | 537075.00 | 3,079,693 |
| 7 | Bajri | - | 67,705 |

**Source :** District Planning Cell, Bharatpur.

### Forest, Flora and Fauna

Forests in the district are about 7 per cent to district's area. The forests are mainly found in Bayana, Weir, Rupbas, and Bharatpur tehsils of the district. In the year 2000-2001, 354.9 sq. km. of the area was under forests. Of this, 353.43 sq. km. area is of protected forests and 0.92 sq. km. as classified area.

Main produce from forests are word used for houses, fire wood, charcoal, honey, gum and 'khas grass'.

The forest of Bharatpur district fall under Central India Dry Deciduous type Dhok or Dhad (Anogeissus pendula), Khair (Acacia catechew) as the main spices. The other trees found are Arunj (Acacia leucopholea), Dhak (Butea monosperma), Ber (Zizyplus mauritiana), Kachnar (Bauhinia racemosa), Kurchi (Hollrrhena anti dysenterica), Birbira (Dichrosta chys cinerea), Hingot (Balanites Aegyptiaca) and Jharber (Ziziphus mummualaria), Besides this; Babul (Acecia milotica), Kadam (Mitragyan parviflora), Kabuli kikar (Prosopis juliflora), Karil (Kapparis decidua) are also found.

The district has a national park known as 'Keoladeo Ghana' famous as breeding place for Siberian Cranes.

The district is known for its ducks, geese, teals, pintails, Siberian cranes, pelicans and other varieties of birds migrate to this area during winter. Local birds are mainly egrets, painted storks, ibises, cormorant, saras-cranes, spoon bills and open billed storks, darter besides common parakeets, crows, babblers, patridges and weaver birds, The carnivore found in the district consists mainly of hyena, jackal, fox etc. in this area.

### Land use pattern

From the total land cover in Bharatpur district there was 31,378 (6.19 percent) hectares of land that was covered by forest in 1999-2000, whereas land put to non-agricultural use was 15,030 hectares, other uncultivable land excluding follow land accounted for 11,811 hectares and the net area sown in the district was 395,231 hectares (77.95 percent).

### Crop pattern

Bajra, Jawar, Seasamum, Paddy Sugarcane in Kharif and Wheat, Barley, Gram, Mustard, Taramira etc. in Rabi are the main crops grown in the district.

Kharif : In the year 2000-2001, Bajra in 131,533 hectares, Jwar in 48,063 hectares, Seasamum in 5,632 hectares, Paddy in 2,617 hectares, Chilly in 1,283 hectares, Ground nut in 78 hectares, Pulses in 907 hectares, Gwar in 1,111 hectares, Maize in 99 hectares and other crops in 36,538 hectares were sown in the district.Total area sown in kharif was 237,921 hectares.

Rabi : Similarly in the year 2000-2001, Wheat in 171,398 hectares, Barley in 5,263 hectares, Gram in 18,905 hectares, Taramira in 298 hectares, Mustard in 124,647 hectares, Masur in 8,588 hectares and other crops in 4,048 hectares were sown in the district. A total area of 333,139 hectares was sown in Rabi crop.

The area and yield of the crops in the district during the year 2000-2001 was as following:

| Sl. No. | Name of Crop | Area sown (in hectares) | Yield (in tones) |
|---|---|---|---|
| 1 | Bajra | 131,535 | 137,228 |
| 2 | Jwar | 48,065 | 40,634 |
| 3 | Seasamum (Til) | 5,632 | 3,428 |
| 4 | Sugarcane | 223 | NA |
| 5 | Paddy | 2,647 | 4,657 |
| 6 | Chilly | 1,290 | NA |
| 7 | Ground nut | 78 | NA |
| 8 | Pulses | 967 | NA |
| 9 | Wheat | 171,398 | 543,287 |
| 10 | Barley | 5,363 | 13,496 |
| 11 | Gram | 18,905 | 23,045 |
| 12 | Taramira | 298 | 290 |
| 13 | Mustard | 124,647 | 246,655 |

**Source :** District Planning Cell, Bharatpur.

As per the agriculture census of 1999-2000, there were 208,436 agricultural land holdings in the districts. The average size of agriculture land holding is 2.9 hectares.

**Tenancy**

Tenancy in the State is governed by the Rajasthan Tenancy Act, 1955. It is one of the most important and progressive laws relating to agrarian reforms. The provisions of the Act apply in respect of land held by tenants as if the State Government were the land holder acting through the Tehsildars. In relation to the land held by him, every cultivator is either a tenant or a sub-tenant or an allottee or a trespasser. A tenant is one who is required to pay some rent on account of use and occupation of land let out to him for agricultural or allied purposes. Grantee with a favourable rate of rent, ijardar,thekedar or trespasser is not considered a tenant.

There are following classes of tenants:

a) Khatedar tenants,

b) Maliks,

c) Tenant of Khudkasht, and

d) Gair-Khatedar tenants.

A Khatedar tenant is entitled to all the rights conferred and subject to all the liabilities imposed on Khatedar tenant by the Rajasthan Tenancy Act. On the date of coming into force of Rajasthan Tenancy Act, a Zamindar or a Biswedar holding Khudkasht was treated as a Khatedar tenant irrespective of whether he was or not in occupation on the date of vesting.

Malik is a Zamindar or Biswedar who has become Malik or Khudkasht land held by him on abolition of Zamindari and Biswedari in 1959. The word “Malik” was also added to section 14 of the Rajasthan Tenancy Act to classify it as a class of tenant. Section 13 of the Act provides that a Malik is entitled to all the rights conferred and is subject to all the liabilities imposed on Khatedar tenant and so in substance this class of tenancy is nothing but a Khatedar tenant.

As Zamindars and Biswedars holding Khudkasht were treated as Khatedar tenants. A tenant of khudkasht is essentially a sub-tenant in view of the fact that a sub-tenant is also eligible for protection of his cultivatory rights even against Khatedar tenant. Every tenant of land other than a Khatedar tenant, a tenant of Khudkasht or a sub-tenant is a Gair-Khatedar tenant.

A trespasser is a person who takes or retains possession of land without authority or who prevents another person from occupying land duly let out to him by the State. After regularisation, the trespasser becomes an allottee. An allottee is treated as a Gair-Khatedar tenant on whom Sub-Divisional Officer shall suo-moto confer khatedari rights after ten years of allotment provided that the allottee fulfils all the terms and conditions of allotment during this period. Similar is the case of those allottees who were otherwise allotted land by the State Government.

**Irrigation**

From irrigation point of view Bharatpur district has been divided into Deeg and Bharatpur divisions. Nadbai, Kumher, Bharatpur and Weir (partially) tehsils come under Bharatpur division comprising 52 dams

in which rainy water is being collected. In the months of September and October water from these dams is being released through canals and rivers for irrigation. Under Deeg division come 185 villages of Kaman, Pahari, and Deeg tehsils for irrigation. Irrigation department has built 'Gurgaon canal' whose total length is 53 km. Pahari, Deeg and Tail distributes have been taken from 'Gurgaon canal' and total length of their rivers and distributes comes to 276 km. In year 2000-2001, a total area of 22,755 hectares was irrigated for this canal and its distribution:

### Live Stock (Cattle Breeding)

According to the livestock census of 1997 the total cattle wealth was 9.96 lac whereas the poultry wealth was as 0.81 lac. Following is the number of different animals:

| Sl. No. | Animal | Number (in lac) |
|---|---|---|
| 1 | Cows | 1.84 |
| 2 | Buffaloes | 5.20 |
| 3 | Pigs | 0.28 |
| 4 | Camels | 0.50 |
| 5 | Sheep | 0.90 |
| 6 | Goats | 1.50 |
| 7 | Horses and Ponies | 0.10 |
| 8 | Dogs | 0.84 |
| 9 | Other | 0.70 |

**Source :** District Planning Cell, Bharatpur.

The district has 45 veterinary hospitals, 7 veterinary dispensaries, 78 veterinary sub-centers etc. live stock census as per of 1997.

In the year 2000-2001, these institutions artificially inseminated 35,661 cattle, 371,468 and 12,535 cattle were vaccinated and vasectomised respectively.

### Fisheries

Bharatpur district has an important place in fisheries in Rajasthan. In the year 2000-2001, the state government added Rupees 13.61 lac to its exchequer for fisheries. The district produced 1260 metric tones of fisheries as against the target of 1150 metric tones.

### Agricultural Implements and Machinery

When the livestock census was conducted in the year 1997 it was seen that there were 9,806 wooden ploughs, carts were 9,614, sugar cane crushers 9,613, tractors 15,563, diesel engines 46,203, and electric pumps 10,902. In this way there were 92,101 agricultural tools and implements in the district in the year 1997.

### Electricity

Of the total number of 1,472 villages, 1,406 have been electrified upto the year 2000-2001. The district has 10,478 electric pump sets. Following is the distribution of consumption of electricity in 2000-2001.

| Sl. No. | Type of consumption of electricity | Unit consumed (in lac) | Percentage to total consumption |
|---|---|---|---|
| 1 | Domestic | 659.56 | 29.05 |
| 2 | Commercial | 138.17 | 6.07 |
| 3 | Industrial | 676.42 | 29.76 |
| 4 | Public use | 8.55 | 0.39 |
| 5 | Irrigation | 258.87 | 11.39 |
| 6 | Water works | 100.94 | 4.44 |
| 7 | Others | 430.04 | 18.96 |
| | **Total** | **2,272.55** | **100.00** |

**Source :** District Planning Cell, Bharatpur.

### Transport and Communication

Bharatpur district comes under the jurisdiction of Western Railway of Indian Railways. Both, the railway tracks of the Meter gauge and Broad gauge passes through the district. Delhi, Mumbai of Broad gauge and Agra-Bandikui of Meter gauge are the lines passing through Bharatpur. The total length of railway lines passing through the district is 204 km. There are 23 railway stations in the district among which 8 are on meter gauge and the remaining 15 on broad gauge. Another broad gauge line which connects Mathura with Alwar passes through Deeg Sub-division of the district.

In 1999-2000, the total length of the roads in the district were 2039.66 km. of which the following is the classification:

| Sl. No. | Type of Road | Length in Km. | | | | |
|---|---|---|---|---|---|---|
| | | Painted Road | Metta-lled Road | Con-crete Road | Kuc-chha Road | Total |
| 1 | National Highway | 71.00 | - | - | - | 71.00 |
| 2 | State Highway | 237.40 | - | - | - | 237.40 |
| 3 | Major District Roads | 227.00 | - | - | - | 227.00 |
| 4 | Other District Roads | 320.00 | 9.00 | - | - | 329.00 |

**Source :** Public Works Department, Bharatpur.

In the district, 371 Gram Panchayats and 719 villages have been connected with roads. 647 villages are yet to be connected with roads.

The number of different type of vehicles registered by the District Transport Office Bharatpur in the year 1999-2000 is following:

| Sl. No. | Type of Vehicles | Number registered in 2000-2001 |
|---|---|---|
| 1 | 80 C.C. Moped | 9,476 |
| 2 | Scooter | 16,259 |
| 3 | Motor Cycle | 22,104 |
| 4 | Car | 1,565 |
| 5 | Jeep | 2,589 |
| 6 | Pick-up | 30 |
| 7 | Tractor | 30,622 |
| 8 | Tractor Trolly | 1,782 |
| 9 | Three Wheeler (Passenger) | 412 |
| 10 | Taxi Car/Jeep | 82 |
| 11 | Bus - Mini bus | 1,137 |
| 12 | Three Wheeler (Goods) | 160 |
| 13 | Truck - Mini Truck | 4,707 |
| 14 | Other | 88 |
| | **Total** | **91,013** |

**Source :** District Transport Office, Bharatpur.

There are 315 post offices, 1147 letter boxes, one telegraph and 23 sub-telegraph offices. For sending telegrams the district has electronic system, fax system and telex system. The district has 35 electronic exchanges. All the tehsil headquarters of the district have been connected with STD facilities.

## Trade and Commerce

There are 8 metre gauge and 15 broad gauge railway stations in the district which has given an imputs to trade and commerece in the region.

The Krishi Upaj mandis are located in Bharatpur, Kaman, Deeg, Nadbai, Bayana and Nagar which are famous mandies.

the Commercial Banks in the district have issued loans in the agricultural sector to the extent Rs. 926,901 whereas for trade and services Rs. 120,656 and in the small scale sector 107,742 have been advanced by the banks.

In the year 2000 there were 75 country liquor shops, 28 Indian made foreign liquor shops, 20 Bhang shops and 2 opium shops. Besides this there are 34 petrol pumps and 10 cinema halls in the district.

## Industry

The district has five industrial areas setup by the RIICO (Rajasthan Industrial and Investment Corporation Ltd.) in 2000-2001. These industrial areas are (1) Old industrial area Bharatpur, (2) Braj industrial area Bharatpur, (3) Industrial area Bayana, (4) Industrial area Deeg, and (5) Industrial area Jurhara.

## Oil Industry

The district apart from being agriculturally dominated has an important place in oil industry in the state. There are 527 approved oil units in which 2010 persons have been employed and a total of 14.82 crore of rupees has been invested. Major oil units are established 50 in Bharatpur, 7 in Nadbai, 2 in Deeg and one each in Kumher, Jurhera, Sikri and Bayana.

## Registered Factories

In the year 2000-2001, a total number of 125 factories were registered in the district under the Factory Act. The distribution of registered factories is as follows:

| Sl. No. | Classification of factories | Number of factories | | | |
|---|---|---|---|---|---|
| | | At the beginning of the year | Closed during the year | Registered during the year | At the end of year |
| 1 | Oil Mill | 47 | 1 | - | 46 |
| 2 | Sand Machine | 33 | - | - | 33 |
| 3 | Engineering works | 2 | - | - | 2 |
| 4 | Serklin | 3 | 2 | - | 1 |
| 5 | Rolling Mill | 2 | - | - | 2 |
| 6 | Crusher | 1 | - | - | 1 |
| 7 | Dal Mill | 1 | - | - | 1 |
| 8 | Ice Factory & Milk | 10 | 2 | 2 | 10 |
| 9 | Ammunation | 1 | - | - | 1 |
| 10 | Milk & Ghee | 1 | - | - | 1 |
| 11 | Brick Klin | 8 | 1 | 2 | 9 |
| 12 | Petrol | 3 | - | - | 3 |
| 13 | Chemical | 1 | - | - | 1 |
| 14 | Roadways workshop | 2 | - | - | 2 |
| 15 | Fire works | 1 | - | - | 1 |
| 16 | Animal Fodder | 1 | - | - | 1 |
| 17 | Tin containers | 1 | - | - | 1 |
| 18 | Electric Grid (parts) | 6 | - | - | 6 |
| 19 | Tarak Warehouse | 1 | - | - | 1 |
| 20 | Sanitary pipe | 1 | - | - | 1 |
| 21 | Paper | 1 | - | - | 1 |

**Source :** District Planning Cell, Bharatpur.

Three large scale industries viz. The Central India Machinery Manufacturing Co. (CIMCO), General Engineering Industries and Dalmia Dairy Industries existed in Bharatpur district in 1991. These industries are now on the brink of closure in 2001.

**Labour and Employment**

Sub-regional Employment Exchange is functioning in Bharatpur district in the year 2000-2001. 7345 persons registered themselves in the Employment Exchange for want of jobs during 2000-2001. The number of institutions using employment exchange has increased from 10 in 1991 to 14 in 2001. Only 11 persons got employment through Employment Exchange in the year 2000. By the end of the year 2000, 35643 persons were unemployed as per the Employment Exchange in the district.

**Gram Panchayats composition & its role**

The system of Panchayati Raj was inaugurated on 2nd October 1959 in Nagaur district by then Prime Minister Late Shri Jawahar Lal Nehru. Late Shri Balwant Rai Mehta proposed the recommendation for Panchayati Raj. There are three levels of Panchayati Raj:

(1) Gram Panchayat (Village level)

(2) Panchayat Samiti (Block level)

(3) Zila Parishad (District level)

Gram Panchayat is an important institution of self-government. The institution is set for a village or village agglomeration. A Gram Panchayat is created on 2000-8000 population. It covers a maximum area of 6 miles. The villages, which have population below 2000, are merged with the other villages to create a Gram Panchayat. Their tenure is of 5 years.

A Gram Panchayat consist 5 to 20 members. The Head of the Panchayat is called Sarpanch. Panch and Up-Sarpanchs are also elected. It includes a member belonging to backward class and a lady member. There are 371 Gram Panchayats in the district.

The main objectives of Gram Panchayat are to arrange the primary education, sanitation of public places, drinking water and light. It manages also the adult education, livestock and repairing of wells.

During the last years, Gram Panchayats functioned several important jobs like Kam Ke Badley Anaj, Construction of Panchayat Ghar, School buildings, roads and tanks. It organizes also the cattle fair. Gram Panchayat plays an important role in the development of village and its economy.

**(v) Census Concepts**

**Building**

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be

any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

**Permanent houses**

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

**Semi-permanent houses**

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

**Temporary houses**

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

**Room**

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

**Dwelling Room**

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common

dwelling room, then the common room has not been counted for either of the households.

**Census house**

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open

compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

**Village**

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

**Rural-Urban area**

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq.km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b)(ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

**City**

Towns with population of 1,00,000 and above are called cities.

**Urban Agglomeration**

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

**Household**

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

**Institutional household**

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

**Houseless household**

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

**Scheduled Caste and Scheduled Tribe**

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

**Scheduled Castes**

1. Adi Dharmi
2. Aheri
3. Badi
4. Bagri, Bagdi
5. Bairwa, Berwa
6. Bajgar
7. Balai
8. Bansphor, Bansphod
9. Baori
10. Bargi, Vargi, Birgi

11. Bawaria
12. Bedia, Beria
13. Bhand
14. Bhangi, Chura, Mehtar, Olgana, Rukhi Malkana, Halalkhor, Lalbegi, Balmiki, Valmiki, Korar, Zadmalli
15. Bidakia
16. Bola
17. Chamar, Bhambhi, Bambhi, Bhambi Jatia, Jatav, Jatava,Mochi, Raidas, Rohidas, Regar, Raigar, Ramdasia, Asadaru, Asodi, Chamadia, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Telegu Mochi, Kamati Mochi, Ranigar, Rohit, Samgar
18. Chandal
19. Dabgar
20. Dhanak, Dhanuk
21. Dhankia
22. Dhobi
23. Dholi
24. Dome, Dom
25. Gandia
26. Garancha, Gancha
27. Garo, Garura, Gurda, Garoda
28. Gavaria
29. Godhi
30. Jingar
31. Kalbelia, Sapera
32. Kamad, Kamadia
33. Kanjar, Kunjar
34. Kapadia, Sansi
35. Khangar
36. Khatik
37. Koli, Kori
38. Kooch Band, Kuchband
39. Koria
40. Madari, Bazigar
41. Mahar, Taral, Dhegumegu
42. Mahyavanshi, Dhed, Dheda, Vankar, Maru, Vankar
43. Majhabi
44. Mang, Matang, Minimadig
45. Mang, Garodi, Mang Garudi
46. Megh, Meghval, Meghwal, Menghvar
47. Mehar
48. Nat, Nut
49. Pasi
50. Rawal
51. Salvi
52. Sansi
53. Santia, Satia
54. Sarbhangi
55. Sargara
56. Singiwala
57. Thori, Nayak
58. Tirgar, Tirbanda
59. Turi

**Scheduled Tribes**

1. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawara, Vasava, Vasave
2. Bhil Mina
3. Damor, Damaria
4. Dhanka, Tadvi, Tataria, Valvi
5. Garasia (excluding Rajput Garasia)
6. Kathodi, Katkari, Dhor Kathodi, Dhor, Katkari Son Kathodi, Son Katkari
7. Kokna, Kokni, Kukna
8. Koli Dhor, Tokre Koli, Kolcha, Kolgha
9. Mina
10. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
11. Patelia
12. Seharia, Sehria, Sahariya

**Language and Mother tongue**

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each

person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

**Literate**

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

**Literacy rate**

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

**Educational level**

The highest level of education a person has completed

**Work**

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

**Main worker**

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

**Marginal worker**

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

**Non worker**

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

**Cultivator**

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops-tea, coffee, rubber, coconut and betel nuts (areca).

**Agricultural labourer**

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

**Household industry worker**

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

**Other worker**

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

**Work participation rate**

Percentage of workers (main + marginal) to total population.

**Population density**

Population density is the number of persons inhabited per square kilometer of the area.

**Age**

Age is measured in terms of the completed number of years.

**Sex-ratio**

Number of females per 1,000 males in a population.

## (vi) Non Census Concepts

**Improved drinking water**

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

**System of Sewerage**

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

**Type of latrine and method of disposal of night soil**

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides

for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

**Fertility**

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

**Crude birth rate (CBR)**

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

**Crude death rate (CDR)**

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

**Natural growth rate**

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

**Age specific fertility rate (ASFR)**

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

**Age specific marital fertility rate (ASMFR)**

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

**General fertility rate (GFR)**

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

**General marital fertility rate (GMFR)**

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

**Total fertility rate (TFR)**

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

**Total marital fertility rate (TMFR)**

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

**Age-specific mortality rate (ASMR)**

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

**q1**

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

**q2**

Probability of dying between birth and age 2.

**q5**

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

**Infant mortality rate (IMR)**

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

**Neo-natal mortality rate (NMR)**

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

**Early neo-natal mortality rate**

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

**Late neo-natal mortality rate**

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

**Post neo-natal mortality rate (PNMR)**

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

**Peri-natal mortality rate (PMR)**

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

**Still birth rate (SBR)**

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

**Maternal mortality rate (MMR)**

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

**Eligible couple (Couples per 1,000 Population)**

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

**Child woman ratio (0-4)**

Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

**Child woman ratio (5-9)**

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

**Migration**

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got

employment there only, the reason for migration would be 'education' and not 'work/employment'.

**Internal and International migration**

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

**Rural-Urban components of migration**

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

**Civic status of urban units**

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

**Size class of UA/town**

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

**Slum area**

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

**Mega city**

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

**(vii) 2001 Census findings – Population, its distribution**

According to the 2001 census, the total population of Bharatpur district is 2,101,142 comprising 1,133,425 males and 967,717 females and constituting 3.7 percent of State population and area spread over 1.5 per cent in the 10 tehsils of the district, Bharatpur

tehsil is most populous tehsil having population 372,876 while Pahari is the smallest tehsils having a population of 147,174 persons. Other tehsils in order of their population size are Weir (237,261), Bayana (225,348), Rupbas (211,147), Deeg (195,721), Nagar (195,671), Nadbai (182,760), Kumher (175,418) and Kaman (157,766).

Out of the total population of the district 80.5 per cent lives in rural areas while 19.5 per cent lives in urban areas. The corresponding proportions in rural and urban areas of the State are 76.6 per cent and 23.4 per cent respectively.

**(viii) Brief analysis of PCA data based on inset tables 1 to 36 :**

**TABLE 1 : DECADAL CHANGE IN POPULATION OF TEHSILS BY RESIDENCE, 1991-2001**

| Sl. No. | Tehsil | Population | | | | | | Percentage decadal variation 1991-2001 | | | Percentage urban population | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | 1991 | | | 2001 | | | | | | 1991 | 2001 |
| | | Total | Rural | Urban | Total | Rural | Urban | Total | Rural | Urban | | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |
| 1 | Pahari | 108,017 | 108,017 | 0 | 147,174 | 147,174 | 0 | 36.3 | 36.3 | 0.0 | 0.0 | 0.0 |
| 2 | Kaman | 118,302 | 94,112 | 24,190 | 157,766 | 126,973 | 30,793 | 33.4 | 34.9 | 27.3 | 20.4 | 19.5 |
| 3 | Nagar | 150,065 | 133,830 | 16,235 | 195,671 | 174,321 | 21,350 | 30.4 | 30.3 | 31.5 | 10.8 | 10.9 |
| 4 | Deeg | 159,710 | 125,627 | 34,083 | 195,721 | 154,862 | 40,859 | 22.5 | 23.3 | 19.9 | 21.3 | 20.9 |
| 5 | Nadbai | 144,794 | 127,668 | 17,126 | 182,760 | 161,111 | 21,649 | 26.2 | 26.2 | 26.4 | 11.8 | 11.8 |
| 6 | Kumher | 145,414 | 129,059 | 16,355 | 175,418 | 155,122 | 20,296 | 20.6 | 20.2 | 24.1 | 11.2 | 11.6 |
| 7 | Bharatpur | 290,443 | 133,563 | 156,880 | 372,876 | 167,641 | 205,235 | 28.4 | 25.5 | 30.8 | 54.0 | 55.0 |
| 8 | Weir | 189,931 | 160,526 | 29,405 | 237,261 | 202,199 | 35,062 | 24.9 | 26.0 | 19.2 | 15.5 | 14.8 |
| 9 | Bayana | 178,339 | 151,810 | 26,529 | 225,348 | 191,632 | 33,716 | 26.4 | 26.2 | 27.1 | 14.9 | 15.0 |
| 10 | Rupbas | 166,569 | 166,569 | 0 | 211,147 | 211,147 | 0 | 26.8 | 26.8 | 0.0 | 0.0 | 0.0 |
| | **District Total** | **1,651,584** | **1,330,781** | **320,803** | **2,101,142** | **1,692,182** | **408,960** | **27.2** | **27.2** | **27.5** | **19.4** | **19.5** |

The district has registered a percentage decadal variation of 27.2 during the decade 1991-2001. The urban areas of the district has attained a higher decadal variation of 27.5 per cent as compared to that of rural area at 27.2 per cent. At tehsil level, it varies from the lowest of 20.6 per cent in Kumher tehsil to a maximum of 36.3 per cent in Pahari tehsil in total areas.

There is an increase in the percentage of urban population to total population from 19.4 in 1991 to 19.5 in 2001. At the tehsil level in Bharatpur it has increased from 54.0 percent in 1991 to 55.0 percent in 2001.

**TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001**

| Sl. No. | District/Panchayat Samiti | Total number of inhabited villages | Total rural population | | | Number and percentage of villages | Population less than 200 | | Number and percentage of villages |
|---|---|---|---|---|---|---|---|---|---|

Population Density (Rural) of the district: 343

The density of population of the rural areas of the district is 343. Of the total number of inhabited villages i.e. 1366 in the district, 44.2 per cent have population density ranging from 301 to 500, followed by 21.4 per cent in the range of 201-300. Apart from these 28 villages have population density upto 50.

**TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001**

| Census year | State | | | District | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1901 | 905 | 898 | 947 | 859 | 854 | 886 |
| 1911 | 908 | 904 | 936 | 841 | 841 | 843 |
| 1921 | 896 | 896 | 897 | 820 | 823 | 805 |
| 1931 | 907 | 906 | 903 | 837 | 835 | 853 |
| 1941 | 906 | 907 | 897 | 840 | 837 | 858 |
| 1951 | 921 | 919 | 928 | 846 | 847 | 839 |
| 1961 | 908 | 913 | 882 | 859 | 864 | 827 |
| 1971 | 911 | 919 | 875 | 855 | 858 | 838 |
| 1981 | 919 | 930 | 877 | 848 | 847 | 852 |
| 1991 | 910 | 919 | 879 | 832 | 826 | 857 |
| 2001 | 921 | 930 | 890 | 854 | 851 | 864 |

**Note:** Sex ratio has been defined here as the number of females per 1000 males.

The district has witnessed a fluctuating trend in sex ratio since 1901. From 859 in 1901 it declined to 841 in 1911. It again increased to 859 in 1961 and declined to 855 in 1971 and so forth. During the last decade i.e. 1991-2001 it has increased from 832 in 1991 to 854 in 2001.

From 1981 to 2001, the sex ratio in urban areas has been higher than that of in rural areas. The district has always registered lower sex ratio as compared to that of state since 1901 to 2001.

**TABLE 6 : SEX RATIO BY TEHSILS, 2001**

\+ To be arranged in alphabetical order.
^ The names of constituent units of U.A. are given separately.
* In case of the towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

In contrast to the rural areas of the district only 28 per cent of the urban population are as workers (main + marginal). Apart from this much variation is also seen in the percentage of male and female workers, which are 44.3 and 9.2 respectively. Among the towns, the percentage of workers varies from 34.3 in Weir (M) to 25.8 in Bayana (M).

| | | | | **(33.0)** | **(68.2)** | **(20.9)** | **(1.7)** | **(9.1)** |

**Note:** Percent of worker to total worker are given in brackets.

Cultivators are the main working force in the district as they form 61.1 per cent of total workers. It is followed by other workers (24.1 per cent), agricultural labourers (13.0 per cent) etc. Males (217,810) outnumber females (303,631) as cultivators. Much variations in the percentages of male workers (33.0) and female workers (9.1) classified as other workers is seen in the district.

At tehsil level, the percentage of cultivators to total workers varies from 73.2 in Pahari tehsil followed by 70.6 in Nagar tehsil to 31.1 in Bharatpur tehsil. For Household Industry workers, it varies from 2.8 per cent in Bharatpur tehsil to 1.0 per cent in Pahari tehsil. In case of 'other workers' the highest percentage of 57.1 has been registered by Bharatpur tehsil while the lowest of 12.2 per cent in Pahari tehsil.

**Note:** Percent of worker to total worker are given in brackets.

43.6 per cent of the total rural population of the district is engaged in economic activities being workers. Of the total workers, most are engaged in agricultural activities i.e. 69.0 per cent are as cultivators and 14.3 per cent as agricultural labourers. Only 1.2 per cent of the workers are engaged in household industries whereas the significantly 15.5 per cent in other works.

Kaman, Deeg, Nadbai and Weir Panchayat Samities where percentage of other workers one lower than that of workers engaged an agricultural labourers.

Sex wise, percentage of female workers is higher in cultivators and agricultural labourers where there percentage is 70.8 and 21.2 as compared to males at 67.7 and 9.5 at the district level.

**Note:** Percentage of workers to total workers are given in brackets.
+ To be arranged in alphabetical order.
^ The names of constituent units of U.A. are given separately.
* In case of the towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

The percentage of workers to total population of urban areas is significantly quite low being only 28.0 per cent as compared to that of rural areas of the district being 43.6 per cent. Here too, the percentage of workers engaged in four economic categories is just the reverse as compared to rural workers where majority i.e. 79.3 per cent of the total urban workers are as 'other workers' followed by 10.7 and 5.1 per cent as cultivators and household industry workers respectively.

Almost similar trend is visible in all the municipal towns except in Bharatpur (MCL) where the percentage of household industry workers is higher than that of agricultural labourers and cultivators.

Sex wise percentage of male workers as other workers is higher than that of female other workers being 84.4 and 50.9 per cent respectively. On the other hand, percentage of female cultivators (22.9 per cent) is much higher than that of male cultivator's (8.6) at the district level for urban areas.

## (ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

**TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001**

**Note :** Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total (1,366) inhabited villages, 1,300 (95.2 per cent) have educational facilities. In case of medical amenities only 35.2 per cent of inhabited villages have such amenities. A significant number i.e. 1324 (96.9 per cent) villages have improved drinking water amenities. In the communication field only 26.3 per cent of villages have post office facilities while 45.5 per cent have telephone facilities. In the banking field the picture is gloomy as only 85 (6.2 per cent) villages have banks. More than 60.3 per cent i.e. (824) are linked with pucca approach roads whereas 90.7 per cent have power supply.

At Panchayat Samiti level, Kumher Panchayat Samiti have the higher percentage i.e. 98.3 of villages having educational facilities. For medical amenities it is Nadbai Panchayat Samiti, which have highest percentage of 57.0. Much variation is seen among the Panchayat Samiti having telephone facilities. Nadbai panchayat Samiti has the highest percentage of villages i.e. 76.3, which have telephone facilities whereas Kaman Panchayat Samiti has the minimum percentage of 18.0 for such facility.

**Note :** Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Almost entire (99.6 per cent) rural population of the district is being served by educational amenities. It varies from 100 per cent in Deeg Panchayat Samiti to 99.9 per cent in Kumher Panchayat Samiti. The highest percentage (76.2) of population availing medical amenities has been found in Nadbai Panchayat Samiti while lowest of 41.2 in Nagar Panchayat Samiti. Deeg and Nadbai Panchayat Samiti at the top where cent per cent of the population has access to improved drinking water while again Kaman Panchayat Samiti is at the bottom with 93.4 per cent. Nadbai Panchayat Samiti is in the forefront in the field by telephone facilities where 82.3 per cent of the population has been served by this facility while Bayana Panchayat Samiti is at bottom with 27.8 per cent. Only 18.1 per cent of the rural population is being served with banking facilities whereas 95.2 per cent have access to power supply. Just below the hundred percent (99.8 per cent) of the population of Sewar Panchayat Samiti is being served with power supply.

**TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001**

| Village not having the amenity of | Distance range of place from the villages where the amenity is available | | | |
|---|---|---|---|---|

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total inhabited village's (1366), majority (401) of them have population range of 1000-1999. It is followed by 391 villages in the range of 500-999. There are 21 and 2 such villages, which have population range of 5000-9999 and 10000+ respectively.

**TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001**

| Sl. No. | Name of Panchayat Samiti | Number of inhabited villages | Total area | Percentage of cultivable area to total area | Percentage of irrigated area to total cultivable area |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Kaman | 194 | 53,169 | 79.2 | 47.1 |
| 2 | Nagar | 216 | 60,341 | 87.6 | 30.3 |
| 3 | Deeg | 119 | 46,039 | 85.5 | 32.6 |
| 4 | Kumher | 117 | 42,872 | 92.3 | 48.5 |
| 5 | Sewar | 157 | 43,846 | 83.2 | 67.0 |
| 6 | Nadbai | 114 | 43,499 | 92.8 | 70.2 |
| 7 | Weir | 146 | 57,197 | 73.9 | 65.0 |
| 8 | Bayana | 161 | 78,391 | 53.3 | 53.0 |
| 9 | Rupbas | 142 | 53,529 | 83.4 | 57.6 |
| | **District Total** | **1,366** | **478,883** | **79.2** | **51.7** |

**Note :** Cultivable area = irrigated area + unirrigated area

Of the total rural area of the district (of inhabited villages) 79.2 per cent is cultivable. Apart from this only 51.7 per cent of the total cultivable area is being irrigated. At the panchayat samiti level the highest percentage of cultivable area to total area is found at 92.8 per cent in Nadbai Panchayat Samiti followed by 92.3 per cent in Kumher and the lowest of 53.3 per cent each in Bayana Panchayat Samiti. As regards to irrigated area, the highest percentage of 70.2 is found in Nadbai Panchayat Samiti whereas 30.3 in Nagar Panchayat Samiti.

**TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS**

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

**Note:**

Permanent: 1. Permanent houses refers to those houses whose wall and roofs are made of pucca materials i.e. where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi-permanent: 2. Semi-permanent houses refer to those houses made of other types of materials.

Temporary: 3. Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

Of the total number of households (315,103), 256,578 are living in permanent, 20,565 in semi permanent and 37,953 in temporary houses. At the tehsil level, the maximum number of households (52,638) living in permanent houses is in Bharatpur tehsil, whereas the minimum of 14,329 (5.58 per cent) has been found in Pahari tehsil. In the rural areas of the district, the maximum number of households (25,339) living in permanent houses has been found in Rupbas tehsil whereas the lowest of 14,157 households in Kaman tehsil. In the urban areas the maximum (32,395) and the minimum (2,971) number of households living in permanent houses has been recorded in Bharatpur and Kumher tehsils respectively.

**Data source:** Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

**Note:** Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

**Improved drinking water :** Of the total number of household only 37.6 per cent household have drinking water facility in the district. For rural and urban areas, these percentages are 24.8 and 86.2 respectively. At tehsil level, for rural areas, the highest percentage (33.7) of households availing this facility has been found in Kaman tehsil whereas for urban areas it is 94.1 per cent in Nadbai tehsil.

**Electricity :** More than 50 per cent i.e. 54.4 per cent of households are using electricity. However there is much wide gap in the percentage of households using electricity in the rural (46.2 per cent) and urban (85.5 per cent) areas of the district. At tehsil level it varies from a maximum of 76.7 per cent to a minimum of 37.6 per cent of households using electricity.

**Bathroom :** Only 18.9 per cent of the households have bathrooms in the district. Here too much wider gap is seen in the percentage of households having bathroom in rural and urban areas, as these are 10.5 per cent and 50.9 per cent respectively. Similar trend is seen in all the tehsils of the district.

**Toilet :** In case of toilets, the picture is not so good especially in rural areas of the district. Only 7.2 per cent of households of the rural areas have toilet facility as against 62.7 per cent in the urban areas. The highest percentage (45.4) of households having toilet facility is found in Bharatpur tehsil whereas the lowest of 7.3 per cent in Pahari tehsil.

**Drainage :** 48.1 of households have drainage in their houses. In rural areas 38.9 per cent of households have drainage system as against 82.6 per cent in urban areas.

**Data source:** Census of India 2001, H-series: "Tables on Houses, Household Amenities and Assets."

Majority of the households (40.9 per cent) of the district is using crop residual as fuel followed by fire-wood (33.4 per cent), cooking gag (12.6 per cent), and cow dung cake (12.3 per cent). In the rural and urban areas of the district, much deviation is seen in the percentage of households using crop residual and cooking gas as 49.2 per cent and 3.0 per cent of households of rural areas are using these respectively in comparison of 9.3 per cent and 48.7 per cent of urban areas respectively. Similar trend is seen at tehsil level also.

**Data source :** Census of India 2001, H-series: "Tables on Houses, Household Amenities and Assets."

**Banking services:** Only 33.3 per cent of the total household's (315,103) are availing Banking services whereas in rural and urban areas this percentage is 30.1 and 45.5 respectively. At tehsil level, the highest number of households (26,277) availing this facility has been found in Bharatpur tehsil, while the lowest (4,737) in Pahari tehsil.

**Radio/Transistor:** Of the total household's (315,103) of the district, 31.9 per cent are in possession of Radio/Transistor. Similarly in rural and urban areas of the district, the percentage of households having radio/ transistor is 32.1 and 31.1 per cent respectively.

**Television:** In case of Television, the percentage of households possessing it is much higher i.e. 59.6 in urban areas than that of in rural areas at 21.5 per cent only.

**(xi) Other Development Activities**

Following are the development activities being carried out by various government agencies in the year 2000-2001:

**DRDA (District Rural Development Agency)**

(i) Indira Avas Yojna : Under the scheme 501 houses were built by the end of March 2001, of which 271, 22 and 208 were for the people of scheduled castes, scheduled tribes and general respectively. Rupees 76.20 lac were spent on these houses.

(ii) Thirty two districts : Thirty two works Scheme - Under the scheme Rs.49.13 lac were allocated in the year 2000-2001. For this 122 incomplete works were approved, of this 55 were completed by spending Rs.11.05 lac by the end of March 2001.

(iii) Rojgar Guarantee Yojna : This scheme has been transferred Zila Parishad. As per new directives, 70 per cent of the amount will be transferred to Panchayat Samities and the rest 30 per cent to Zila Parishad. For the year 2000-2001, a sum of Rs.248.08 lac were allocated for the district.As against only Rs.179.40 lac were spent and 220 old and new works were completed.

(iv) Rural Development Programme Center : Under the scheme of the approved 18 incomplete projects, 6 were completed by spending an amount of Rs.7.30 lac in the district.

(v) Swarn Jayanti Shahari Rojgar Yojna (Swarn Jayanti Urban Employment Scheme) : This scheme was implemented in the district w.e.f.1.4.99. For the year 2000-2001, financial targets of Rs.670.00lac were received from government. As against this, by the end of March 2001 an assistance of Rs.161.87lac as grants and Rs.804.20lac as Bank loans were provided to 2801 families. For which 7066 loan applications were received to be sponsored by Banks.

(vi) Saansad Sthaniya Kshetra Yojna (Member of Parliament Local Area Scheme) : By the end of March 2001, 343 works of an estimated costs of Rs.529.40lac were approved. By the end of year Rs.439.26lac were spent completing 342 works.

(vii) Vidhayak Sthaniya Kshetra Yojna (MLA Local Area Scheme) : Of the total 727 works, 227 were in progress and 271 were completed under the scheme. A sum of Rs.277.23lac were spent by the end of March 2001.

**Nehru Rojgar Yojna**

This scheme is in force in the urban area of the district since 1999-2000. Two schemes i.e. 1. Swaraj Yojna and 2. Vetnic Rojgar Yojna come under this scheme.

(i) Swaraj Yojna : Under the scheme 120 persons were benefited and sanctioned amount of Rs.2,13,000 were spent.

(ii) Vetnic Rojgar Yojna : Under this scheme of the sanctioned 254 works, 11 were completed. For which Rs.5,37,000 were spent and 2,656 man days were created. Apart from this, 164 persons were trained and Rs.2,97,000 were spent on training.

**Rajasthan Scheduled Caste, Scheduled Tribe Finance and Development Corporation**

The corporation implements various schemes and programmes for the upliftment of the persons of scheduled castes and scheduled tribes living below the poverty line.

In the year 2000-2001, under various Banking Schemes 1,243 persons were benefited by receiving loans through banks to the amount of Rs.14.96 lac and Rs.58.50 lac as grants.

Under the non-banking schemes 109 persons were benefited who received an amount of Rs.23.45 lac as grants.

**Banking**

Punjab National Bank is the Lead Bank of the district. The district has 130 branches of Scheduled Banks, of which 58, 37 and 35 are functioning in the rural, semi-urban and urban areas of the district respectively. The number of 'Accounts' in these branches is 275,024. In the financial year 2000-2001, an amount of Rs.518.19 crores were deposited and Rs.331.54 crores were lend as loans for the extension of banking facilities.

**(xii) Brief description of places of Religious, Historical, Archaeological Importance and Tourist Interest :**

Archaeological excavations have been carried out in the district at Noh, Bachhawa Mandi, Bayana,

Kaman, Rupbas and Aghapur. Besides this, there are a number of places of tourist interest in the district.

**Bharatpur**

Important buildings of the city are two temples, one of Lakshmanji, the deity of the ex-ruling family and the other dedicated to Ganga, a mosque called Jama Masjid, Moti Mahal (the residential house of the prince of Bharatpur) and the Victoria Hospital. In the north-western part of the city stands the historical masonry stone fort of square dimensions with high walls surrounded by a moat, about 61 metres wide and very deep. Roads leading to the fort through its two gates cross the moat by masonry bridges. The doors of the gates towards Gopalgarh side are built of ashtadhatu, an alloy of eight metals.

**Bayana**

This town is situated at a distance of 45 km. south by south west of Bharatpur. The famous fort known as Bijaygarh (Vijaygarh) situated near the town has been the scene of many strategic and historical events. Bayana is a curious medley of Hindu and Mohammadan relics, the most important being a red sandstone pillar called Bhim Lat. The ancient name of Bayana was Sripatha or Shriprastha. An inscription of Akbar from Bayana gives a record of the Emperor's journey through Bayana in 1601-02 A.D. after his conquest of Khandesh.

**Bund Baretha**

It is a dam which lies in a valley, about 57 km. from Bharatpur and nine km. from Bayana. Its construction was completed in 1897. A good picnic spot has been developed around the bund and facilities for boating are available.

**Deeg**

Deeg is an important historical town of Bharatpur district. It is located at a distance of 34 km. from Bharatpur and is connected by a metalled road with Alwar - Mathura and Delhi. It is said that Deeg was called 'Dirgha' meaning large of 'Dirghapura' and is mentioned in the Skanda Purana and Bhagawat mahatmya. Deeg is famous for its fountain palaces called 'Bhawans'. These 'Bhawans' were built by Maharaja Suraj mal of Bharatpur between the years 1755-1763. The main building of the west is called Gopal Bhawan, and is the largest of all the palaces, being two-storeyed on three sides, with an extensive, lofty hall between them. The fort of Deeg was built about the years 1730.

**Keoladeo Ghana**

Keoladeo Ghana is situated adjacent to Bharatpur City. It is a famous breeding water-bird sanctuary. This is a very important centre for scientific investigations on the biology of water birds. The sanctuary starts attracting birds as soon as the Monsoon sets in. Besides the Siberian birds, other birds are Paddy birds, Night Herons etc.

For Indian as well as foreign tourists, the State Government has built a Hotel known as Saras on Fatehpur Sikri Road. The Government of India has also developed a Forest Lodge. The Rajasthan Tourism Development Corporation also running the Shahi Rail named 'Palace on Wheels' ever since 26th January, 1982 which passes through Bharatpur. Tourists could stay at various Hotels/Lodges in Bharatpur; which become very busy tourist attraction during the winter season.

**Social-Cultural Activities**

Bharatpur district being a part of 'Braj' area and having close proximity to Mathura bears an influence of 'Braj' on its social and cultural life as reflected in Raslila, Phag, Rasiya, Languriya and Nautanki.

**Fairs and Festivals**

The important festivals held in the district are:

(i) Jaswant Pradarshani Fair : The fair is held from Ashvina Sudi 1 to 10. A cattle fair is held on this occasion in which the estimated congregation is of 18,000 persons.

(ii) Kans Ka Mela : The fair is held at Kumher for two days. This is also held as cattle fair. The estimated congregation varies from 12000 to 15000 persons.

(iii) Teejon Ka Mela : This fair is held at Kumher and continues for four days. This is also held as a cattle fair. About 10,000 persons participate in it.

(iv) Jheel Ka Mela : This fair is held at Jheel Ka Bara, 15 km. from Uchhain towards Bayana on Navratras. About 20,000 to 25,000 people gather there.

The main festivals of Hindus observed in the district are Janmashtmi, Deepawali, Holi, Makar

Sankaranti, Raksha Bandhan, Dashehra etc. Mohrram, Idul-Fitra, Idul-Zuha are the festivals being observed by Muslims.

**(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district :**

Bharatpur was ruled by Jat rulers from the 17th centuary onwards. The town is signified by the Fort of Lohagarh which took eight years to build and was constructed in 1733 A.D. by Raja Suraj Mal. The Keoladeo Park is a special attraction in Bharatpur which is a home to Siberian Cranes who come and nest there in the winter season.

**(xiv) Scope of Village and Town Directory :**

In Part-A of the District Census Handbook, entitled as Village and Town Directory, an attempt has been made to present information regarding various amenities/facilities available in every rural/ urban unit of the State. The unit of the rural areas is village and that of urban area is town/urban agglomeration. Information regarding rural areas and Census Towns has been gathered through Patwaries while that in respect of urban areas other than Census Towns has been collected through the concerned municipality/Cantonment Board/Notified Area Committee. In order to have the aforesaid information authenticated the concerned departments and agencies were also contacted to furnish information available with them. All the information gathered about amenities relate to year 1999 and those pertaining to land-use pattern pertain to Samvat Year 2055 i.e. the agricultural year ending on the 30th June, 1999.

**Village Directory**

It will be helpful at the outset to have an idea of the items for which information has been included in the Village Directory. Information in respect of each village has been presented through a twenty three column format in which villages have been presented in order of their names and Permanent Location code Number (PLCN) at State level. The first four columns (2-5) give general information i.e. Name of village and Permanent location code number, area in hectares, population and number of households residing in villages as per Census 2001.The amenities available in the village have been shown in columns 6-18. The information regarding land-use pattern has been given in columns 19-23. As a special feature for Census-2001 some new columns 10-12 and 17-18 are first time incorporated viz. commercial and cooperative Bank, Agricultural/non Agricultural and other credit societies, Recreational and cultural facilities, News Paper/Magazine and most important commodity manufactured in the village. In case of uninhabited villages, the information has been given relating to columns 1-3 and 19-23 only and in the remaining columns the word 'uninhabited' has been mentioned. At the end of entries of each Panchayat Samiti the totals relating to columns 3-11, 13-14, 16-17,19 and 21-23 (total area, amenities and land-use break-up) have also been given.

Various amenities like drinking water, communication, post and telegraphs etc. have been shown against the name of the referent village if they are available within the village with the help of various codes. The Code Structure relating to various columns has been given in the beginning of Section-I to Part-A of this book. The number of each type of amenity has been indicated in parentheses after the suitable code in case of educational, medical and post & telegraph facilities.

If any amenity is not available within the village a dash (–) has been shown in the relevant column and next to it, the distance of the nearest place from the referent village where the facility is available has been given in broad distance ranges viz. <5 km, 5-10 km & 10+ km.

The following pattern has been adopted for indicating the educational institutions:

(i) Schools up to Class V have been treated as primary schools. They include Nursery Schools, Kindegarten Schools, Pre-basic and Pre-primary Schools and Junior Basic Schools upto Class V.

(ii) All schools having Classes VI to VIII have been treated as Middle Schools.

(iii) All schools having Classes IX and X have been treated as Secondary Schools.

(iv) All schools having Classes XI and XII have been treated as Higher Secondary Schools. They include Senior Cambridge Schools, Schools under 10+2 scheme, Intermediate, Pre-University and Junior College etc.

In case of composite schools relevant groups of classes have been treated separately, e.g. a school having classes I to XII, has been shown as having one primary, one middle, one secondary and one higher secondary school. The term 'College' includes all types of colleges whether Arts/Science/Commerce/ Medical/Engineering/Agriculture and others imparting education at Graduate or Post-Graduate level. Institutions other than industrial schools, training schools and adult literacy classes/ centres have been shown under 'others'.

In case of Medical institutions, Hospitals and Dispensaries, Allopathic, Ayurvedic, Unani and Homeopathy have been shown separately. Other institutions include all types of Yogic, Naturopathy, Hospitals/Dispensaries, Leprosy Centres etc.

In case there are more than one source of drinking water facility available in the village all such sources have been shown separately. Postal amenities include Post Office, Telegraph Office and Telephone, which are shown separately.

In case there are more than one communication facilities these have been indicated separately by relevant codes. Approach to the village refers to the state of roads etc. leading to the village from the communication centres i.e. bus-stand/railway station etc. This is to give an idea whether the village is easily approachable in all types of weather or becomes inaccessible for sometime in the year. Where there are more than one approach roads these have been indicated separately by relevant codes.

Information regarding the nearest town indicates the name of such town along with the distance from the referent village irrespective of the fact whether such town is located within Rajasthan or in some other adjoining states. In case of town situated in states other than Rajasthan, the concerned State has been mentioned against its name in parentheses with the help of abbreviations. The term 'town' here refers to one of those urban centres, which have been treated, as towns in the concerned state during 2001 Census.

In order to give an idea about the uses which electricity is put to, the information has been given under the head "power supply" if it is available in the village.

**Land-Use Pattern**

The land-use pattern has been presented under the following five headings:

I. Forest :

It denotes those lands, which have been termed as 'forest' by the competent authority.

II. Irrigated land :

It relates to land, which has actually been irrigated in the referent year. The source-wise break-up has not been presented, as no such information was available in respect of the net irrigated area.

III. Unirrigated land :

The term covers all the unirrigated land cultivated during the referent year and land lying fallow upto four years.

IV. Culturable waste :

It includes Gaucher i.e. pasture and grazing land and tree-groves.

V. Area not available for cultivation :

It refers to land, which has not been classified in any of the above mentioned types and also includes house sites, roads, rivers, nullahs, hillocks etc.

The following nine appendices have also been provided to present the position obtaining in Panchayat Samiti and district as a whole regarding various Amenities available in rural areas, villages classified by characteristics of the population and land-use pattern in Census Town in connection with the Village Directory:

(i) Panchayat Samiti wise Abstract of educational, medical and other amenities in villages.

  (a) Villages by number of Primary schools.

  (b) Villages by number of Primary, Middle and Secondary schools.

  (c) Villages with different sources of drinking water facilities available.

(ii) Villages with 5000 and above population, which do not have one or more amenities.

  (a) Census towns which do not have one or more amenities.

(iii) Land utilisation data in respect of Census Town.

(iv) Panchayat Samiti wise lists of inhabited villages where no amenity other than drinking water facility is available.

(v) Summary showing number of villages not having Scheduled Castes population.

(vi) Summary showing number of villages not having Scheduled Tribes population.

(vii) Panchayat Samiti wise list of villages according to the proportion of Scheduled Castes/Scheduled Tribes population to total population by ranges. It consists of two parts: Part-A relates to Scheduled Castes and Part-B to Scheduled Tribes.

(viii) Panchayat Samiti wise number of villages under each Gram Panchayat.

(ix) Statement showing number of girl's schools in the villages.

**Town Directory**

Particulars about each town have been presented in the form of seven statements. In towns where there are slums Statement-VII has also been given in which information regarding civic and other amenities available in the slums have been shown. In each statement towns have been arranged in alphabetical order.

As has been explained earlier, urban agglomerations are of two types: first those constituted by two or more independent towns and second those where the urban characteristics have developed in the adjoining rural areas, which have developed as outgrowth of the referent town.

Where an urban agglomeration includes two or more independent towns, the names of towns constituting the agglomeration have been indicated in the alphabetical arrangement but their names have also been repeated in the alphabetical order under the name of the agglomeration after the name of the main or core town and information relating to these has been shown here. The particulars of the constituent units of the agglomerations have not been repeated wherever they occur separately in the alphabetical order and a note "See referent agglomeration" has been given against such names. The lines relating to the information regarding urban agglomeration as a whole have not been numbered but the constituent units as and when they occur in the alphabetical order have been numbered so that the last number agrees with the total number of towns in the district concerned. In respect of Statements II, III and VI in the lines relating to agglomeration a note "See constituent units" has been shown and information has been provided separately in respect of all the constituents below it.

In case of towns having out growths, an asterisk mark has been placed against their names. Information in respect of out growths has been included in the concerned town and has not been shown separately.

The amenities and other data have been indicated by codes. A list of column wise code structure and other abbreviations used in each statement has been provided at the beginning of Section-II of Part-A of this book. We may now discuss the various Town Directory statements.

**Statement-I**

It deals with the status and growth history of the town. Columns 2 to 7 give information regarding class, name and civic status of the town, its location code number, name of the tehsil/panchayat samiti in which it is situated, its area in sq. km and number of households including houseless households residing in the town as per 2001 Census. The class of the town has been determined on the basis of its population as per Census 2001 and the civic administration status relates to the year 2000. Columns 8 to 18 show the population of the town in different decennial censuses beginning from 1901 upto 2001. The growth rate in terms of percentage in respect of previous censuses has been shown below the population figures pertaining to each Census beginning from Column 9 onwards.

A 'dash' under these columns indicates that the referent town did not have an urban status in the referent Censuses. Density of Population per sq. km as per Census 2001 has been shown in column 19 and sex ratio (number of females per 1,000 males) have been indicated for three censuses viz. 1981 to 2001 in columns 20 to 22.

**Statement II**

This statement gives information about the physical aspects and locations particulars of the town in 1999. First two columns give the serial number,

class, name and civic status of the town. Columns 3 to 13 deal with the physical aspects viz. rainfall and temperature. Rainfall figures are the average of the rainfall for the last one year ending 1999-2000. If the information in respect of rainfall is not available for any town it has been given for the nearest place for which it is available. Rainfall has been shown in millimeters per annum. Maximum and minimum temperatures have been given in centigrade. If the information regarding temperature is not available in respect of any town it has been given for the nearest place for which it is available and the name of the centre has been shown in footnote.

The location of the town with respect to various administrative headquarters and nearest city is indicated in columns 6 to 10. While showing the location of the referent town with respect to various administrative headquarters, names and their distance from the referent town in kilometer have been given in parentheses below the name of the place where it is situated. In case the referent town itself happens to be the seat of the administrative headquarters, this distance has been shown zero. Information regarding the nearest city of population one Lac or more and population 5 Lacs or more have been given in respect of its situation within the State or even if this city may be situated in other State. In case the nearest city happens to be situated in other State, the name of the concerned State has been shown against the name of the city in parentheses. How the referent town is approachable is given in columns 11 to 13 which indicate the availability of communication facilities viz. railway station, bus facilities and navigable river/canal within 10 km. There is no navigable river or canal in Rajasthan.

**Statement III**

It gives information about the finances of the civic body controlling the local civil administration and it has been presented in '000 rupees. A 'dash' in this Statement indicates that no receipt or expenditure has occurred under the particular head and 'N' represents negligible amount. First two columns give general information, columns 3 to 9 present receipt under broad categories and total receipt and columns 10 to 16 present expenditure under broad categories and total expenditure. The receipt and expenditure has been presented under six broad categories each. While receipt through taxes implies all receipts from taxes obligatory or others and revenue derived from municipal properties and power apart from taxation, it also includes income derived from holding of fairs and exhibitions, supply of milk, license fee, cattle-ponds, fines and penalties, transport services, places of entertainment, allotment/sale/lease of land and rent etc. Government grants include per capita grant, grant from Public Works Department and grant from the Social Welfare and other departments. Other sources of receipts have been specified, wherever possible but generally they are of miscellaneous nature.

Expenditure on general administration covers salary and wages of staff, contingent expenditure on staff, grants loans and advances to the staff etc. Expenditure on public safety cover fire-fighting, light, water and lease facilities, regulating the dangerous/ hazardous trades/works/occupation, water supply, registration of births and deaths, disposal of garbage, rubbish and night-soil. Public health and conveniences cover all types of medical aid and maintenance of the destitute etc. Public works include maintenance and construction of roads and buildings and relief works in times of famine and scarcity. Expenditure in public institutions covers all types of social, cultural, educational, religious institutions etc. Which are run or patronised by the municipality. Other sources of expenditure have been specified where possible but mostly these are of miscellaneous nature.

**Statement IV**

This statement deals with the civic and other type of public amenities and provides information about total population, scheduled castes and scheduled tribes population, road length, system of sewerage, number and types of latrines, method of disposal of night-soil, water supply, availability of fire-lighting service and electrification besides general information. In case of water supply the source of water as also the system of its storage have been shown. The storage capacity has been shown in Kiloliters. In case of disposal of night soil and protected water supply particulars have been given in respect of two methods/sources in order of their importance if more than one exist in the town. In case fire-fighting service is not available in the town the name of the nearest place if in the same

district or the name of the nearest district if in the same state or other state where available along with distance from the referent town has been mentioned.

**Statement V**

Particulars of medical, educational, recreational and cultural facilities available in the town have been given in this statement and the number of each type of these facilities has also been shown in parentheses is along with the appropriate code.

In case of medical facilities the number of beds wherever available has also been shown Allopathic, Ayurvedic, Unani and Homeopathic hospitals/ dispensaries have been shown separately. No code has been provided for allopathic institutions and the numbers have been shown only in figures. Thus beside H, code for hospital means an Allopathic Hospital. Separate codes have been provided for other three systems of medicine.

If a medical or educational facility is not available in the town, the name of the nearest place, if the same district or the name of the nearest district in the same State or other State where available and its distance (in km) from the referent town has been mentioned. Details of medical institutions shown under 'Others' have also been explained.

Arts, Science and Commerce Colleges have been shown separately. While showing the educational institutions upto Higher Secondary level the same procedure as adopted in case of Village Directory, has been followed. In case of composed schools relevant classes have been treated separately e.g. a school having classes I to XII has been treated as being composed of one Primary, one Middle, one Secondary and one Higher Secondary School.

All other types of educational institution which are not covered in column 6 to 14 have been shown in column 15 under 'Others' and include technical/ vocational and training institutions like Applied Art Painting College, Pharmacy College, Agricultural College, Teacher's Training College/Institution, Music/ Dance School etc. Janchetna Kendra is also included in others.

**Statement VI**

This statement contains particulars regarding trade, commerce, industry and banking. It gives names of three most important commodities, exported and manufactured in the town besides the number of banks, agricultural and non-agricultural credit societies functioning in the town. A list of the outgrowths, if any, along with their population and name of the core town has also been provided at the end of the Town Directory as an Appendix.

**Statement VII**

Information about all slums whether notified or not and for all towns has been shown in this statement in order to give an idea about the amenities available to the slum dwellers. Particulars about paved roads, systems of sewerage, number and types of latrines, method of disposal of night soil, number of tap points/ public hydrants for supply of protected water and electrification have been provided in respect of every slum in each town, if there are any.

# PART-A : VILLAGE AND TOWN DIRECTORY

BLANK

## Section-I

# Village Directory

**NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY**

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:

**Column 1 : Serial Number**

Self explanatory. All the villages within the Panchayat Samiti are presented serially in the ascending order of their location code number.

**Column 2 : Name and Location Code Number of village**

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

**Column 3 : Area of the village**

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

**Column 4 : Total population**

The total population of the village as per 2001 Census is given against this column.

**Column 5 : Number of households**

The number of households as per 2001 Census is given in this column.

**Amenities :**

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

**Column 6 : Educational**

Classes upto class V included in Primary School. This will include nursery school, kindergarten school, Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

| | | |
|---|---|---|
| (i) | Primary School | P |
| (ii) | Middle School | M |
| (iii) | Secondary School | S |
| (iv) | Senior Secondary School | PUC |
| (v) | College | C |
| (vi) | Industrial School | I |
| (vii) | Training School | Tr |
| (viii) | Adult literacy class/centre | AC |
| (ix) | Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc. | O |

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

**Column 7 : Medical**

Availability of medical facility within the village is indicated by following codes :

| | | |
|---|---|---|
| (i) | Allopathic Hospital | H |
| | Ayurvedic Hospital | HA |
| | Unani Hospital | HU |
| | Homeopathic Hospital | H Hom |
| (ii) | Allopathic Dispensary | D |
| | Ayurvedic Dispensary | DA |
| | Unani Dispensary | DU |
| | Homeopathic Dispensary | D Hom |
| (iii) | Maternity & Child Welfare | MCW |
| (iv) | Maternity Home | MH |
| (v) | Child Welfare Centre | CWC |
| (vi) | Health Centre | HC |
| (vii) | Primary Health Centre | PHC |
| (viii) | Primary Health Sub-Centre | PHS |
| (ix) | Family Welfare Centre | FWC |
| (x) | T.B. Clinic | TB |
| (xi) | Nursing Home | NH |
| (xii) | Registered Private Medical Practitioner | RMP |
| (xiii) | Subsidised Medical Practitioner | SMP |
| (xiv) | Community Health Worker | CHW |
| (xv) | Others | O |

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

**Column 8 : Drinking Water**

The type of the drinking water supply sources available within the village are indicated by codes as follows:

| | | |
|---|---|---|
| (i) | Tap Water | T |
| (ii) | Well Water | W |
| (iii) | Tank Water | TK |
| (iv) | Tubewell Water | TW |
| (v) | Handpump | HP |
| (vi) | River Water | R |
| (vii) | Canal | C |
| (viii) | Lake | L |
| (ix) | Spring | S |
| (x) | Others | O |
| (xi) | Summer Source | SS |

**Column 9 : Post, Telegraph and Telephone**

It is indicated by codes as shown below whether within the village exists the following amenities:

| | | |
|---|---|---|
| (i) | Post Office | PO |
| (ii) | Telegraph Office | TO |
| (iii) | Post & Telegraph Office | PTO |
| (iv) | Telephone Connection | PH |

**Column 10 : Commercial and Co-operative Banks**

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

| | | |
|---|---|---|
| (i) | Commercial Bank | CM |
| (ii) | Co-operative Bank | CP |

**Column 11 : Credit Societies**

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

| | | |
|---|---|---|
| (i) | Agricultural Credit Society | ACS |
| (ii) | Non-Agricultural Credit Society | NCS |
| (iii) | Other Credit Society | OCS |

**Column 12 : Recreational and Cultural facilities**

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

| | | |
|---|---|---|
| (i) | Cinema/Video Hall | CV |
| (ii) | Sports Club | SP |
| (iii) | Stadium/Auditorium | ST |

**Column 13 : Communications**

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

| | | |
|---|---|---|
| (i) | Bus | BS |
| (ii) | Railway Station | RS |
| (iii) | Navigable Waterway | NW |

**Column 14 : Approach to village**

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

| | | |
|---|---|---|
| (i) | Paved Road | PR |
| (ii) | Mud Road | MR |
| (iii) | Foot Path | FP |
| (iv) | Navigable River | NR |
| (v) | Navigable Canal | NC |
| (vi) | Navigable Waterways other than River, Canal | NW |

**Column 15 : Nearest Town and distance**

The distance is given in kilometers in brackets against the name of the town nearest to the village.

**Column 16 : Power Supply**

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

| | | |
|---|---|---|
| (i) | Electricity for domestic use | ED |
| (ii) | Electricity for agricultural use | EAG |
| (iii) | Electricity for other purposes | EO |
| (iv) | Electricity for all purposes | EA |

**Column 17 : News Paper/Magazine**

If village receives any News Paper/Magazines the same is noted in this column using following codes:

| | | |
|---|---|---|
| (i) | News Paper | N |
| (ii) | Magazine | M |

**Column 18 : Most important commodities manufactured**

The name of three most important commodities manufactured in the village is recorded against this column.

**Column 19 to 23 : Land use i.e. area under different types of land use**

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

| | | |
|---|---|---|
| (i) | Government Canal | GC |
| (ii) | Private Canal | PC |
| (iii) | Well (without electricity) | W |
| (iv) | Well (with electricity) | WE |
| (v) | Tubewell (without electricity) | TW |
| (vi) | Tubewell (with electricity) | TWE |
| (vii) | Tank | TK |
| (viii) | River | R |

| | | |
|---|---|---|
| (ix) | Lake | L |
| (x) | Waterfall | WF |
| (xi) | Others | O |
| (xii) | Total | T |

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages Panchayat Samiti wise of the district.

Appendix-I-A Indicates number of villages Panchayat Samiti wise having one or more primary schools.

Appendix-I-B Indicates number of villages Panchayat Samiti wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages Panchayat Samiti wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/Non-Municipal Towns.

Appendix-IV Panchayat Samiti wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII The appendix shows the list of villages according to proportion of the VII A, VII B Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates Panchayat Samiti wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

## LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

## APPENDIX IX - Village Directory

### STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

| Sl. No. | Name of Panchayat Samiti | Village Location Code Number | Name of village | Number of girls school | | | |
|---|---|---|---|---|---|---|---|
| | | | | Primary School | Middle School | Matriculation/Secondary School | Higher Secondary/PUC/ Intermediate/Junior College |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| N.A. | | | | | | | |

**Note:** N.A. stands for information not available.

## Section-II

# Town Directory

**NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY**

**Town Directory statements (I to VII)**

**Statement I : Status and Growth History**

**Column 2 : Class, name and civic administration status of town**

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

| Population | Class |
|---|---|
| 100,000 and above | I |
| 50,000 - 99,999 | II |
| 20,000 - 49,999 | III |
| 10,000 - 19,999 | IV |
| 5,000 - 9,999 | V |
| Below 5,000 | VI |

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

| | | |
|---|---|---|
| (i) | Municipal Corporation | M. Corp. |
| (ii) | Municipal Committee | MC |
| (iii) | Municipal Council | M.Cl. |
| (iv) | City Municipal Council | CMC |
| (v) | Town Municipal Council | TMC |
| (vi) | Municipal Board | MB |
| (vii) | Municipality | M |
| (viii) | Cantonment Board/Cantonment | CB |
| (ix) | Notified Area | NA |
| (x) | Notified Town | NT |
| (xi) | Notified Area Committee/ Notified Area Council | NAC |
| (xii) | Notified Town Area | NTA |
| (xiii) | Industrial Notified Area | INA |
| (xiv) | Industrial Township | ITS |
| (xv) | Township | TS |
| (xvi) | Town Panchayat | TP |
| (xvii) | Nagar Panchayat | NP |
| (xviii) | Town Committee/Town Area Committee | TC |
| (xix) | Small Town Committee | ST |
| (xx) | Estate office | EO |
| (xxi) | Gram Panchayat | GP |
| (xxii) | Census Town | CT |

Others columns need no comments.

**Statement II : Physical Aspects and Location of towns, 1999**

**Column 3 to 5 : Physical Aspects**

In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

**Column 6, 7 and 8**

Name of the State headquarters, District headquarters and Tehsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

**Column 9 and 10**

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

**Column 11, 12 and 13**

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

**Statement III : Municipal Finance 1998–1999**

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

**Statement IV : Civic and Other amenities, 1999**

**Column 1 to 5 : Self explanatory**

**Column 6 : Road length (in kms.)**

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

| | | |
|---|---|---|
| (i) | Pucca Road | PR |
| (ii) | Kutcha Road | KR |

**Column 7 : System of Sewerage**

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

| | | |
|---|---|---|
| (i) | Sewer | S |
| (ii) | Open Surface Drains | OSD |
| (iii) | Box Surface Drains | BSD |
| (iv) | Sylk Drains | SD |
| (v) | Cesspool method | CP |
| (vi) | Pit System | Pt |
| (vii) | Others | O |

**Column 8 to 11 : Number of latrines**

Number of various types of latrines both Public and Private are given in these columns.

**Column 12 : Method of disposal of night soil**

The various prevalent method of disposal of night soil are given below with codes :

| | | |
|---|---|---|
| (i) | Head Loads | HL |
| (ii) | Basket | B |
| (iii) | Wheel Barrows | WB |
| (iv) | Septic Tank | ST |
| (v) | Pit System | Pt |
| (vi) | Sewerage | S |
| (vii) | Others | O |

**Column 13 and 14 : Water supply**

Source and capacity of storage system. The following codes are used in these columns:

**Column 13**

| | | |
|---|---|---|
| (i) | Tap water | T |
| (ii) | Tube-well water | TW |
| (iii) | Tank Water | TK |
| (iv) | Well Water | W |

**Column 14**

| | | |
|---|---|---|
| (v) | Over Head Tank | OHT |
| (vi) | Service Reservoir | SR |
| (vii) | River Infiltration Gallery | RIG |
| (viii) | Bore Well Pumping System | BWP |
| (ix) | Pressure Tank | PT |

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

**Column 15 : Fire Fighting Service**

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

**Column 16 to 20 : Electrification (Number of connections)**

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

**Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999**

**Column 1 to 3 : Self explanatory**

**Column 4 & 5**

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or primary health centres, may be treated as independent units and counted separately using following codes :

| | | |
|---|---|---|
| (i) | Hospital | H |
| (ii) | Dispensary | D |
| (iii) | Health Centre | HC |
| (iv) | Family Welfare Centre | FWC |
| (v) | T.B. Clinic | TB |
| (vi) | Nursing Home | NH |
| (vii) | Others | O |

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

| | |
|---|---|
| Ayurvedic | A |
| Unani | U |
| Homoeopathic | Hom |

**Column 6 to 9**

The codes used for these columns are as follows:

| | | |
|---|---|---|
| (i) | Arts only | A |
| (ii) | Science only | S |
| (iii) | Commerce only | C |
| (iv) | Arts & Science only | AS |
| (v) | Arts & Commerce only | AC |
| (vi) | Combined for all categories-Arts, Science and Commerce | ASC |

| | | |
|---|---|---|
| (vii) | Law | L |
| (viii) | University | U |
| (ix) | Others | O |

**Column 10 : Recognized shorthand, typewriting and vocational training institutes**

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

| | | |
|---|---|---|
| (i) | Vocational Training Institute | VT |
| (ii) | Shorthand | SH |
| (iii) | Typewriting | Type |
| (iv) | Shorthand & Typewriting | SH Type |
| (v) | Others | O |

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

**Column 11 to 14**

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

**Column 15 : Adult literacy class/centres**

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

**Column 16 : Working Women's hostels with number of seats**

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

**Column 17 to 19 : Recreational and Cultural Facilities**

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

**Column 20 : Public Libraries, Reading Rooms**

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

| | | |
|---|---|---|
| (i) | Public Library | PL |
| (ii) | Reading room | RR |

**Statement VI : Trade, Commerce, Industry and Banking, 1999**

**Column 3 to 8**

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

**Column 9 : Number of Banks**

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

**Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

**Statement VII : Civic and other Amenities in Slums, 1999**

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

**STATEMENT**

**STATUS AND**

| Sl. No. | Class, name and civic status of town | Location code number | Name of Tehsil | Name of Panchayat Samiti | Area (in sq. km.) | Number of households incl. Houseless households (2001 Census) | Population and growth rate | | |

# PART-B : PRIMARY CENSUS ABSTRACT

# Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

**Data Processing**

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

**Task Force on Quality Assurance**

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

**Primary Census Abstract**

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

**Level of presentation in District Census Handbooks**

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

| | Name of the Primary Census Abstract | Level of presentation |
|---|---|---|
| 1. | District Primary Census Abstract | District/Panchayat Samiti/UA/City/Town |
| 2. | Primary Census Abstract for Scheduled Castes | District/Panchayat Samiti/Town |
| 3. | Primary Census Abstract for Scheduled Tribes | District/Panchayat Samiti/Town |
| 4. | Village Primary Census Abstract | Panchayat Samiti/Village wise |
| 5. | Urban Primary Census Abstract | Town/Ward level |

The PCA Data for villages was presented Panchayat Samiti wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Panchayat Samiti is presented both for rural and urban areas separately. All the villages within the Panchayat Samiti constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Panchayat Samiti. In case a Panchayat Samiti is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Panchayat Samiti is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

**Area Figures**

The area figures supplied by local revenue authorities of the district in respect of tehsils, and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares. The area figures of the Panchayat Samiti is the total of the village areas coming under each Panchayat Samiti. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tehsils/ Panchayat Samiti within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Tehsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and Panchayat Samiti level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

* Gram Panchayat names were not mentioned.

**ANNEXURE-II : FERTILITY-MORTALITY MEASURES**

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever-married women and last question related to currently married women.

**AGE SPECIFIC MARITAL FERTILITY LEVEL, 1991 CENSUS**

| Age-Group | District Bharatpur | | | Rajasthan State | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 15-19 | 179.49 | 169.59 | 242.08 | 99.82 | 99.10 | 103.46 |
| 20-24 | 284.66 | 288.20 | 268.85 | 217.18 | 227.01 | 182.20 |
| 25-29 | 263.28 | 273.15 | 227.27 | 197.71 | 214.81 | 144.55 |
| 30-34 | 192.66 | 210.00 | 126.73 | 141.09 | 158.38 | 85.69 |
| 35-39 | 132.09 | 147.93 | 72.05 | 90.43 | 104.11 | 47.40 |
| 40-44 | 82.91 | 92.12 | 42.93 | 53.37 | 61.51 | 25.15 |
| 45-49 | 39.93 | 42.98 | 27.47 | 27.36 | 30.37 | 15.81 |

The ASMFR has been calculated at seven different age-group for both the rural as well as urban areas of the district. The ASMFR has been found to be higher in all the age-group in rural and urban areas of the district as compared to state level. The higher ASMFR of 284.66 has been recorded in the age-group 20-24 as can be seen from the table.

The ASMFR increases from 179.49 in the age-group 15-19 to 284.66 in the age group 20-24. It then starts gradually decreasing with the increase of age-group i.e. 25-29 to 30-34 to 45-49. Identical pattern has been observed in rural and urban areas of the district as is visible.

**ESTIMATES OF CHILD MORTALITY, 1991 CENSUS**

| Mortality Indicators | District Bharatpur | | | Rajasthan State | | |
|---|---|---|---|---|---|---|
| | Persons | Males | Females | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| q2 | 101 | 89 | 114 | 97 | 95 | 99 |
| q3 | 111 | 97 | 128 | 100 | 98 | 106 |
| q5 | 126 | 110 | 145 | 110 | 103 | 117 |

Information on the question of children even born and children surviving convassed for ever married women has been tabulated by age-group of mother. From this estimates of child mortality have been worked out by using brass techniques. From this estimates of child mortality (Number of death by age 2, 3 and 5 as q2, q3 and q5) it is observed that the child martality rates for q2, q3 and q5 are higher at the district level being 101, 111 and 126 respectively an against 97, 100 and 110, the respective rates at the state level. It is important to note that the child mortality rates for females at all levels i.e. q2, q3 and q5 are much higher as compared to that of males as can be observed from the table.

**Source :** Occasional paper No.1 of 1997 office of the Registrar General India and Rajasthan state district profile 1991.
**Note:** * newly created districts after 1991 Census.

The G.F.R. on the gross fertility rate of Bharatpur district comes out to be 169 which is higher than that of the state's average of 162. Similarly the GMFR, TFR and TMFR of the district at 194, 5.30 and 6.03 are also higher than that of states respective rates at 184, 5.01and 5.59. However the crude birth rate of the district (34.96) is lower than that of state (35.75).

The number of children even born per 1000 women in the age group 45-49 in the district comes out to be 5.35 which is higher than that of states average (5.07) similar trend is visible in rural and urban areas of the district as is seen from table.

The mean age at marriage of females at the district level comes our to be 17.21 year which is higher than of state's average of 16.67 years. Similar trend has been observed in rural and urban areas of the district.

**ANNEXURE-IV(a) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991-2001**

| Place of Birth | 1991 Census | | | 2001 Census | | |
|---|---|---|---|---|---|---|
| | Persons | Males | Females | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| (A) Migrants born within the state of Enumeration | 281,374 (67.20) | 39,929 (67.83) | 241,445 (67.10) | 384,114 (75.70) | 53,887 (78.52) | 330,227 (75.26) |
| (i) Migrants born elsewhere in district of Enumeration | 201,285 (48.07) | 31,551 (53.60) | 169,734 (47.17) | 321,508 (63.36) | 47,409 (69.08) | 274,099 (62.47) |
| (ii) Migrants born in other district of the State | 80,089 (19.13) | 8,378 (14.23) | 71,711 (19.93) | 62,606 (12.34) | 6,478 (09.44) | 56,128 (12.79) |
| (B) Migrants born in other states of India | 132,292 (31.59) | 16,300 (27.69) | 115,992 (32.23) | 121,351 (23.92) | 13,795 (20.10) | 107,556 (24.51) |
| (C) Migrants born in other countries | 5,060 (1.21) | 2,640 (4.48) | 2,420 (0.67) | 1,940 (0.38) | 948 (1.38) | 992 (0.23) |
| **Total Migrants** | **418,726 (100.00)** | **58,869 (100.00)** | **359,857 (100.00)** | **507,405 (100.00)** | **68,630 (100.00)** | **438,775 (100.00)** |

## (a) By Place of Birth

It was seen that a sizeable portion of migrants in Bharatpur District i.e. 67.20 percent in 1991 and 75.70 percent in 2001 were migrants whose place of birth was within the state of enumeration. Out of this major portion where migrants who were born elsewhere in the district of enumeration.

The migrant whose place of birth was in other states of India was 31.59 percent in 1991 and 23.92 percent in 2001 Census.

Migrant to the district whose place of birth was in other countries was 1.21 percent in 1991, whereas the proportion was marginally less i.e. 0.38 percent in 2001 Census. It can be seen from the table.

**ANNEXURE-IV(b) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS**

| Place of Birth | Total/ Rural/ Urban | Place of Enumeration | | |
|---|---|---|---|---|
| | | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 |
| Total Internal Migrants within the State | Total | 281,374 (100.00) | 215,798 (76.69) | 65,576 (23.31) |
| | Rural | 236,734 (84.13) | 193,908 (68.91) | 42,826 (15.22) |
| | Urban | 37,570 (13.35) | 15,870 (5.64) | 21,700 (7.71) |
| In other states of India | Total | 132,292 (100.00) | 96,862 (73.22) | 35,430 (26.78) |
| | Rural | 106,909 (80.81) | 86,992 (65.76) | 19,917 (15.05) |
| | Urban | 23,713 (17.92) | 8,780 (6.63) | 14,933 (11.29) |

## (b) Internal Migrants (Rural/Urban)

Majority of the internal migrants i.e. 84.13 per cent were these who were born in the rural areas of the state. Among them 68.91 percent were enumerated in rural areas and the rest 15.22 percent in urban areas of the state. Like wise, 13.35 internal migrants were those whose places of birth were urban areas of the state. Similar situation exists in case of migrants born in other states of India as is visible from the table.

**ANNEXURE-IV(c) : INTERSTATE MIGRANTS, 1991-2001 CENSUS**

| Place of Birth | 1991 Census | | Place of Birth | 2001 Census | |
|---|---|---|---|---|---|
| | Migr-ants | Perce-ntage to Total migrant | | Migr-ants | Perce-ntage to Total migrant |
| **1** | **2** | **3** | **4** | **5** | **6** |
| Uttar Pradesh | 101,136 | 76.45 | Uttar Pradesh | 91,410 | 75.33 |

| Total | 132,292 | 100.00 | Total | 121,351 | 100.00 |

## (c) Inter-state Migrants

In the case of Inter-state migrants they are mainly from Uttar Pradesh and Haryana as their percentages are 76.45 and 16.51 respectively in 1991 census. In 2001census main migrants are from Uttar Pradesh and Haryana and their percentage are 75.33 and 18.39 respectively. Percentage of six states to total migrants is 97.75 in 2001.

**ANNEXURE-IV (d) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE, 1991-2001 CENSUS**

| Place of Last Residence | 1991 Census | | | 2001 Census | | |
|---|---|---|---|---|---|---|
| | Persons | Males | Females | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| (A) Within the State of Enumeration but outside the place of | 287,596 (67.65) | 41,611 (68.73) | 245,985 (67.47) | 416,828 (77.03) | 71,573 (81.88) | 345,255 (76.10) |
| (i) Elsewhere in the District of Enumeration | 206,185 (48.50) | 32,461 (53.62) | 173,724 (47.65) | 353,407 (65.31) | 63,157 (72.25) | 290,250 (63.97) |
| (ii) In other districts of the state of Enumeration | 81,411 (19.15) | 9,150 (15.11) | 72,261 (19.82) | 63,421 (11.72) | 8,416 (09.63) | 55,005 (12.12) |
| (B) States in India beyond the state of Enumeration | 132,710 (31.22) | 16,418 (27.12) | 16,292 (31.90) | 122,677 (22.67) | 15,008 (17.17) | 107,669 (23.73) |
| (C) Last Residence outside India | 4810 (1.13) | 2510 (4.15) | 2300 (0.63) | 1,623 (0.30) | 835 (0.96) | 788 (0.17) |
| **Total Migrants** | **425,116 (100.00)** | **60,539 (100.00)** | **364,577 (100.00)** | **541,128 (100.00)** | **87,416 (100.00)** | **453,712 (100.00)** |

## (d) Migration by Place of Last Residence

In the percentage distribution of migrants by place of last residence in the district it was seen that in 1991 census, the highest propotion of migrants i.e 67.65 percent were from within the state of enumeration but outside the place of enumeration.In 2001 Census this proportion was higher to 77.03 percent in the same category. Suprisingly it was seen that the proportion of female migrants were lower than the male migrants in both censuses.

The migrants in the district that were from states in India beyond the state of enumeration was 31.22 percent in 1991 as compared to 22.67 percent in 2001 census.

Persons whose last residence was outside India were 1.13 percent in 1991 census while there was a marginal reduction to 0.30 percent in 2001 census.

**ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS**

| Place of Last Residence | Total/ Rural/ Urban | Place of Enumeration | | |
|---|---|---|---|---|
| | | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 |
| Total Internal Migrants within the State | Total | 287,596 | 219,888 | 67,708 |
| | | (100.00) | (76.46) | (23.54) |
| | Rural | 241,996 | 198,298 | 43,698 |
| | | (84.14) | (68.95) | (15.19) |
| | Urban | 39,430 | 16,360 | 23,070 |
| | | (13.71) | (5.69) | (8.02) |
| In other states of India | Total | 132,710 | 97,942 | 34,768 |
| | | (100.00) | (73.80) | (26.20) |
| | Rural | 107,307 | 87,722 | 19,585 |
| | | (80.86) | (66.10) | (14.76) |
| | Urban | 23,933 | 9,360 | 14,573 |
| | | (18.03) | (7.05) | (10.98) |

## (e) Migration by Place of Last Residence (Rural/Urban)

Majority of the internal migrants i.e. 84.14 percent had their place of last residence belong to rural areas of Rajasthan. The same trends also reflects in case of migrants whose place of case residence were in other state of India as can be seen from the table.

## RELIGION

Religion is an important basic cultural characteristic of the population. It provides an interesting picture of the society. The data on religion projects the unity and diversity of the country. The data is great importance to the public as well as Government,NGO and Minorities Commission.

Among the followers of six major religions in Bharatpur District it was seen that the proportion of Hindus had mirginally decreased from 87.17 percent in 1991 to 85.89 percent in 2001 Census. Whereas the proportion of Muslims increased from 11.07 to 12.60 percent,it is also true in the case of Jain Community during the same period but the Sikh community showed a marginal decreased. The Christian community also registered a marginal decreased from 0.03 to 0.02 from 1991-2001

At the state level, it was seen that the decreased among the Hindus and Muslims in the state the same as was observed at the district level.

## MARITAL STATUS OF POPULATION

The total population of the district is 1,651,584 of which 52.10 percent are never married, 44.31 percent married.Widowed personsin absolute numbers are 58,195 which is 3.52 percent to total population.Sex wise males have higher proportion of never married population than that of femlaes being 56.70 percent and 46.57 percent respectively. Oviously females have higher proportion of married population 48.91 percent than that of males 40.49. The widows have out number widowers being 33,510 and 24,685 respectively.In 2001 census 54.02 is never married.There after comes married persons whose percentage to total population comes to 42.52 widowed persons in absolute numbers are 70,823, which is 3.37 percent to total population.Sex wise, males have higher population of never married i.e. 58.44 percent as compared to females whose population is 48.85 percent. On the other hand females have higher proportion of married 46.30 percent than males 39.30 percent. Females have a phanomenal higher number 46,078 of widows than male widowers 24,745 in the district.It can be seen from Annexure VI.

## ANNEXURE-VI : MARITAL STATUS OF POPULATION AS PER, 1991-2001 CENSUS

1991

**AGE, SEX AND EDUCATIONAL LEVEL,1991-2001**

Literacy in the age-group 10-14 years in1991 in the district was 61.1 percent in the total which was higher among the males 80.3 percent and females 35.9 percent. In the total in the age-group 15-19 years the literacy slightly lower in the total i.e. 60.6 percent and the same trend was found as in the earlier age group except that the female literacy in this age group 15-19 years was as low as 30.2 percent. In general it was seen that the literacy rate in the urban areas was much higher both among males and females. The proportion of metric but below graduate was however not very high. In the total there were 9.0 percent metric but below graduate persons. Here also the male proportion was higher i.e. 14.6 percent compared to females 2.6 percent. Graduate and above in the age group 20 + years followed the same trend. In 2001 census the total population of the Bharatpur district was 2,101,142 which 63.57 percent are literates.As per the definition of literacy in the 2001 Census the entire population in the age-group 0-6 was considered to be illiterates. The total literacy rate in the district Bharatpur in the age-group 10-14 years was 84.6 percent and among males and females it was 93.2 and 74.0 percent respectively which is higher as compared to the state in the same age group. Similarly literacy rate in the age group of 15-19 years 92.3 percent males and 61.7 percent females were reported in the district which is also higher than that of the state.

It is a general trend of the literacy at the state as well as district level, female literacy is lower than the male literacy. The parentage showed a decline at Metric but below Graduate 15.07 percent as male and 3.4 percent as female while at the graduate and above level 5.6 percent males and 1.7 percent are females. It can be seen from the Annexure VII.
