Textile Industry

Bhilwara, the Textile Town, has emerged as one of the major synthetic fabric manufacturing centres in India. The growth of the Textile Industry dates back to 1966 a first unit was set up to manufacture synthetic yarn in 1961.

In Bhilwara there are about 350 units which have their own manufacturing plants and rest of these are merchant traders who have their designated manufacturers having a fixed number of looms ear marked for their production. The cloth produced are made from a blend of polyester and viscose.

The production of the P.V.Industry has grown from 327 million meters in 1999-2000 to 360 million meters in 2001-2002. The average annual rate of growth has been 5%.

The making of synthetic filaments and fibres are manufactured by a totally new technology and is done in machines which are totally imported. Indian yarns fabric and garments are exported all over the world. The P.V. fabric market is estimated to have grown from Rs.1785 crores in 1999-2000 to Rs.2007 crores in 2001-2002.

The export of P.V. fabric from Bhilwara has accentuated from Rs.25 crores in 1999-2000 to about Rs.31 crores in 2001-2002. Bhilwara exports constitute about 5.5% of All India P.V. Exports.

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri J.L.Modi, Director of Census Operations, Rajasthan. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Additional Secretary &
Census Commissioner, India

Preface

I am deeply indebted to the State Government of Rajasthan for their unstinted support and cooperation despite all odds and adversaries like famine etc. at all stages of Census Operations of 2001. I am grateful to Shri Inderjit Khanna, the then Chief Secretary of Government of Rajasthan for his prompt response, guidance and cooperation given to the Census Organization. He infused a sense of urgency and seriousness in the minds of District Collectors and Officers of the District Administration, which geared up the entire administrative machinery. The Supervisors and Enumerators, the basic census functionaries worked ceaselessly in the entire period of fieldwork to make Census 2001 successful.

Sarvashri Ashok Pandey and Vinod Zutshi, the then Secretaries in the Department of Cabinet Secretariat and General Administration have been instrumental in making Census 2001 a successful one. I owe my thanks to both of them. I am also thankful to other Departments like Education, Finance, Revenue, Economics and Statistics, Public Relations, Printing and Stationery, Local Self-government and Personnel Department for extending their full cooperation.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his unstinted support and spontaneous, unfailing guidance throughout our endeavours. At the outset I would like to thank Shri D.K. Sikri, Registrar General and Census Commissioner, India for guiding us in bringing out this report. My grateful thanks to Shri K.N. Unni, Ex-DRG (C&T), Shri R.G. Mitra, Ex-DRG (C&T), Shri R.P. Singh, Consultant (Map), Shri Himakar, Additional Director (EDP), Dr. I.C. Agrawal, A.R.G.(SS), Shri S.L. Jain, Deputy Director (SS), Shri C. Chakravorty, Joint Director (DDU) and their colleagues at the headquarter for their ever willing, helping hand and thoughtful suggestions for putting together and shaping the volumes in their present form.

The Director of Census Operations, Rajasthan, Shri J. L. Modi under whose guidance the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before this volume could be made available for the press. I am deeply greatful to Shri H.S. Meena, Ex-Joint Director of Census Operations, Rajasthan for its success.

It may be mentioned a few annexures have been added to this volume with a view to provide an insight into the 1991 and 2001 data on the suggestion of Social Studies Division of the Office of the Registrar General, India. In this connection the contribution of Shri V.K. Gupta, Senior Compiler who has also really worked very hard in preparing CRC of various districts can not be ignored.

In view of the increasing demand of the publications in electronic format, it has been decided to publish the DCHB also on CD. I highly appreciate the efforts put in by Smt. Jyoti Luhadiya, DD(EDP) and her team to compile in the electronic format. The efforts put in by Shri Divesh Chawla, DEO Gr-'B' to prepare this is highly commendable. In this connection, the contributions of Shri P.N. Mathur Sr.Supervisor and Shri J.P. Verma, DEO Gr-'B' cannot be ignored.

Shri G..Fernandes Assistant Director, deserves all credit who not only coordinated the work but contributed immensely in timely finalization of Primary Census Abstract and Village and Town Directory.

Shri K.C. Gupta, S.I.Grade-I has taken pains in drafting the District Profile and the Analytical Note for the district. The members of the staff in the Map Section did a commendable job under the guidance of Shri Autar Singh, R.O.(Map), ably assisted by Shri R.S. Tyagi, Sr.Geographer in bringing out various maps.

In the last but not the least, I owe my gratitude to Shri Anand Nigam Ex.-Dy.Director Controlling officer of this Directorate for his valuable guidance by his in-depth knowledge of computer technology in bringing out this volume.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The series of District Census Handbooks has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several new innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Numbers (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from 1 to N. Each village has been assigned an eight digit code. The first six digits represent the code of the village as existing at the present census. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001, are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

The responses for almost all the questions in the Houselisting Schedule had pre-coded options. This not only helped the enumerators to record the response easily but at a later stage would hopefully facilitate quicker data processing. Apart from the improvements made in the format of the Houselisting Schedule, the scope of Houselisting was considerably expanded with the inclusion of new questions based on requirements of various data users and planners. The new features of the Houselisting Schedule are listed below.

- For the first time, different uses of census houses have been standardized and grouped into ten main uses and assigned code numbers.
- Plastic has been added in the list of material of wall and roof of a census house, as it is often used for shelter in slums and shanties.
- In the previous census, the location of drinking water source was categorized into two locations viz. 'within premises' and 'outside premises'. In the Census of India, 2001, the source 'outside premises' was split into two categories namely 'near the premises' and 'away from the premises'.
- The scope of question of availability of electricity was expanded to include six sources of lighting. Besides no lighting, this included sources like electricity, kerosene, solar, other oil and any other source.
- In 1991 Census, a question on availability of toilet facilities to the household was canvassed while in Census of India, 2001, specific information on availability of latrine within the house by the type of latrine was sought.

In addition to expending the scope of the questions canvassed during the Houselisting Operations in the 1991 Census, the following new questions were added in the Houselist Schedule for Normal Households at the Census of India, 2001.

- If the Census house was used for residential or partly residential purposes, the condition of the census house was categorized as good, livable or dilapidated based on the perception and response of the respondent.
- A question on number of married couple(s) living in the household was canvassed.
- Information was sought on the number of married couple(s) having independent room for sleeping.

- Information as to whether the waste-water outlet of the house is connected to 'closed drainage' or 'open drainage' or has not drainage was collected.
- A question on availability of bathroom within the house was included.
- Information on availability of kitchen within the house was also sought.
- Availability of certain assets to the households namely radio/transistor, television, telephone, bicycle, scooter/motor cycle/ moped, car/jeep/van were also included.
- It was also enquired whether any banking service was being availed by the household.

The Household Schedule adopted for the Population Enumeration also primarily had pre-coded options for majority of the questions. The questions for each data item were made as self-explanatory as far as possible for easy understanding. The comprehensive Household Schedule had three parts and two sides A and B. Part I contains the Location Particulars; Part II relates to Individual Particulars and Part III contains questions for Household engaged in Cultivation/Plantation. To facilitate quick tabulation for bringing out Provisional Population Totals, provisions of page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates and workers and their categories by sex. Most of the questions canvassed during the 1991 Census, were retained for the 2001 Census, except the question on ex-serviceman, which was dropped during the Census of India, 2001. However, a number of new questions were added in the Household Schedule in view of the suggestions from policy makers, data users and researchers, while the scope of certain existing questions was enhanced.

These modifications are:

- Age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.
- The type of educational institution attended by a person was enlarged to include school, college, vocational institute, other institute and literacy center.
- The scope of the definition of 'work' was expanded in the Census of India, 2001, to include production of milk for domestic consumption. In the 1991 Census, cultivation of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India, 2001.
- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India, 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census is dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census, is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected are - in seeing, in hearing, in speech, in movement and mental.

- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work is collected under this section.
- The Household Schedule has a new set of questions for Household engaged in cultivation/ plantation- i) Net area of land under cultivation/ plantation, ii) Net area of land irrigated and iii) Tenure status. This question was not canvassed at the 1991 Census but was canvassed in the 1981 Census in a slightly different form.
- The signature or thump impression of the respondent has been taken on the Household Schedule for the first time in the history of census. This was not only aimed at obtaining correct and complete information but also for giving an opportunity to the respondents to authenticate the information provided by them. The relationship of the respondent with the head of the household was also obtained. This new feature will pave way in carrying out a methodological study in future on the respondent profile in the census.

In 1981 Census, for the first time, an attempt was made in the series to bring out demographic and other data in diglot, Hindi and English, for a more beneficial use by data user of all categories. Hindi being the official language of the State, a Hindi version of the analytical notes was also added with a view to caters to the needs of all sections of readers. The manner of presentation of the District Census Handbooks for the 1991 Census is by and large the same.

As a necessary corollary to the Handbooks, Panchayat Samities, the basic administrative units of development, administration and planning, were listed out separately for the first time in 1981 Census in relation to those districts wherein they were not coterminous with their tehsils. As an additional attempt, informations relating to population figures as well as amenities available in each village located in the jurisdiction of each Panchayat Samiti were also presented in a separate volume under the title "Supplement to District Census Handbook". However, for reference in the main District Census Handbook, a list of villages forming part of each non-coterminous Panchayat Samiti was provided along with the abstracts of population and amenities for such Panchayat Samities as a whole in the form of Special Annexures.

In order to cater to the over-all needs of the data-users and to facilitate the task of administrators and planners it has now been decided to present the Village Directory and Primary Census data at the Panchayat Samiti level instead of the traditional Tehsil level presentation. It is expected that the presentation of Village Directory and Primary Census Abstract data at Panchayat Samiti level will help the planners in formation of micro-level developmental plans, as the Panchayat Samiti is now the lowest administrative unit for development planning. However, for the convenience of the data users and for the sake of comparability of data at Tehsil level, the Primary Census Abstract has also been presented at the Tehsil/ Town level in the form of an Appendix.

A general note on each district covering information of general interest regarding its history, topography, physiography, administrative set-up and places of tourist and historic importance etc. has also been included with a view to provide comprehensive and more purposeful information about the district as a whole. Population figures of Scheduled Castes and Scheduled Tribes constituting the core of 'Weaker Section' have also been presented at district, panchayat samiti and town level so as to facilitate planning for their welfare both at micro and macro levels.

It is earnestly hoped that this publication will serve its purpose for planners and administrators of welfare schemes and other data users in general.

Prior to 1951, Census Reports were printed for the whole province/state. The idea of preparing the District Census Handbooks separately for each district was conceived during 1951 Census as a part of a plan intended to secure an effective method of preserving the Census data below the district level. The idea was that all the district census tables would be bound together in a single volume called the District Census Handbooks. Since then the District Census Handbooks are being published regularly.

The 1951 Census series of District Census Handbooks was printed in two parts. Part I contained five General Population Tables (A Series), three Economic Tables (B Series), five Household and Age Tables (C Series) and seven Social and Cultural Tables (D Series). In Part II of District Census Handbook "Primary Census Abstract and Village Directory" which showed the basic population figures for each village or town classified by livelihood classes, were included along with some information of general nature.

The 1961 Census series of District Census Handbooks were printed in single volume in which Primary Census Abstract upto village and town/ward level and Village Directory upto village level were given. Besides, some official statistics collected from various state departments, four General Population Tables (A Series), sixteen Economic and Household Tables (B Series), seven Social and Cultural Tables (C Series), four Housing Tables (E Series) and eight Special Tables for Scheduled Castes/Scheduled Tribes were also provided in District Census Handbooks. For the first time in 1961 Census the maps for the district and tehsil were also included in the District Census Handbooks.

In 1971 Census series of District Census Handbooks village-wise 'Village Directory' giving services, facilities or amenities available in the village was given. 'Town Directory' was introduced for the first time giving useful information in respect of every town of the district. Rural Primary Census Abstract upto village level and Urban Primary Census Abstract upto enumeration block level were given in District Census Handbooks. While the District, Tehsil and Town maps were included; the inclusion of Census Tables was dispensed with in the District Census Handbooks in 1971 Census.

The scope of 1981 series of District Census Handbooks was enlarged specially in relation to amenities and land-use pattern. Apart from new items like uses of electricity, details of communication points, information for which was not collected in 1971 Census, a note on each district covering general information on its history, topography, flora, fauna and administrative set up etc. was also added. The format of the Primary Census Abstract was also restructured in the light of changes in economic and other questions canvassed in the 1981 Census but at the same time, all efforts were made to retain comparability with 1971 Census data. The inclusion of Special Primary Census Abstract for Scheduled Castes and Tribes at the Tehsil/Town level was another innovation introduced in 1981 Census series.

The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same as followed in 1981. However, the format of Primary Census Abstract was restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group was included in Primary Census Abstract for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate at the time of the 1991 Census.

One of the most important innovations in the 1991 Census was the Panchayat Samiti level presentation of data in the Village Directory and Primary Census Abstract instead of the traditional Tehsil level presentation.

Deviating from 1991 Census, like 1981 Census four fold industrial classification of main and marginal workers has been presented in 2001 as against nine fold given in 1991.

The mode of presentation of DCHB in 2001 will by enlarge be same as that of in 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc pertaining to 1991 Census of the respective district in the DCHB in the form of Annexures II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

(ii) Brief History of the District

The history of Bhilwara District which came out from ruins & old record s proves that it is very old

. The antiquity of the region can be traced back to the hoaruy past . The excavations at Bagor have revealed the existence of a stone age culture spread over two phases- the earlier datable to 5000 BC-2800 BC ,and the latter belonging to iron age. It is one of the richest lithic sites of India.. The district is also studded with mounds of the proto-historic affiliations located on the old river beds of Kothari ,Khari etc amongst than the notable once being cites of Agoocha (Hurda Tehsil),Ojayana (Asind Tehsil) and Hurda itself. The inscribed sacrificial post (Yupa Stambha) from Nandsa (Raipur Tehsil) refereeing to the performance of Sasthiratra sacrifice eloquently proves the revival of Vadik ritis during the 3rd century AD. Old inscriptions from the region tell the story of its glorious past. The rock of Bijoliya is inscribed with an important epigraph of the Gupt period (4th-5th century AD).

The district is extremely rich in old temples ranging in time from the 9th to 12th Century AD. The mediaeval temples at Bijoliya, Tilaswan, Dhor, Menal & Mandalgarh etc are example to exquisite Art and architecture. The multi-storied pound of Bhinay near Kachola is one of its kind.

In ancient times Bhilwara district was a part of Guhil & Chauhan Rajput kingdom. After merger of Mewar State & Shahpura Thikana into Rajasthan Bhilwara district was constituted with Banera & Badnor chief ship of Mewar State and merger of Mandalgarh & Shahpura Thikana the district came into existence in 1949. Mandalgarh, Mandal, Pur & Sanganer places of the district was used as defence Chowkis during the time of Mughal attacks.

A mint of Mewar State was also located in Bhilwara, in which Bhilri coins of Mewar were produced. This mint was closed in the year 1870.

During the period 1951-61, by an inter district transfer village Setooriya (10.1 sq. Kms) from Rashmi Tehsil and Dowani (4.9 sq.kms) from Begun tehsil of Chittorgarh district were added to the district. Besides, during the period under review, four tehsils , namely, Badnor, Kareda,Phulia and Arwar lost their existence in the process of inter-tehsil readjustments. No inter-district transfer took place in the territory during 1961-71.However, tehsil Banera and Raipur which were abolished in 1962 again came into existence in 1965 & 1969 respectively. During decade period of 1991-2001, the State Government has issued a notification on 18.8.98 forming Bijoliya Kalan as new tehsil.In this new tehsil 120 villages of Mandalgarh tehsil were transferred.

During the period 1991-2001, total 125 new villages were created in the district..In 1991 there were total 1620 villages in the district, which were became 1745 in the year 2001.The tehsilwise narration of newly created villages are given hereunder. No new village was created in the tehsil Banera.

The three towns of district namely-Bhilwara,Shahpura & Gangapur which were constituted as towns in 1951, were remain towns in 1961, 1971,1981,1991 & 2001, remaining 4 tows of 1951 namely-Banera, Gulabpura, Jahazpur & Pur were declared as rural area in place of urban area in 1961.Jahazpur was classified as Town in 1971 . Asind & Mandal were also classified as Town in 1981. In 1981 , Gulabpura & Mandalgarh were treated as Municipal Towns & Bijoliya Kalan was treated as Census Town. In year 2001, Mandal was declassified from the list of towns.

(iii) Administrative set-up

From the administrative point of view, the district having 5 Sub-Divisions,12 Tehsils and 7 towns including Bhilwara City.There are 11 Panchayat Samities & four Sub-tehsils namely Badnor, Phulia,Kareda & hamirgarh.The details of which are given as under :—

Sl. No.	Name of sub-division	Panchayat Samiti	Name of tehsil	Name of town

(iv) Physical Features

(1) Location and Size

The district is situated between 29.4 and 25.58 north latitudes and 74.1 and 75.28 east longitudes in the south-eastern portion of the State. It is bounded on the north by Ajmer district, on the north-west,,west and south-west by Rajsamand District on the south and south-east by Chittorgarh District and on the east and north-east by Bundi and Tonk districts. The total length of the district from west to north is 144 kilometers , whereas total width from North to south is 104 kilometers.

The area of the district is 10455 sq. kilometers ,which comprise 3-05 percent of total 342239 sq. kilometer area of Rajasthan . From the point of area, the district ranks thirteen number amongst 32 districts of the State. Jaisalmer district with largest area of 38401 sq. kilometers ranks in first number, whereas Dholpur district with an area of 3033 sq. kilometers stands in the bottom .

(2) Physiography

A research work conducted in 1982 which was based on the interpretation of satellite Mosaic and ground trugh data classified the region into thirteen geomorphic regions according to hypsographic, geologic, drainage slope and relief characteristics. Generally, the district is rectangular in shape except for its western portion which is comparatively broader than the eastern one. The north and south western portion of the district is almost an open plain with a few hillowcks rising intermittently while in the south and north –eastern portion of the district there are undulating lands and hills.

Aravali ranges intersect the district at several places. Most of these are located in the tehsil area of Mandalgarh.A separate hillock is situated in north –western part up to Jahazpur town..Bijoliya-Mandalgarh region of the district is termed as “Upermal” due to its situation on a plateau.

Some of important hillocks of the district are – 581 meter high hillock of Daragarh near Banera village, 529 meter high. hillock in the north-eastern region near Jahazpur. .570 meter high hillock in the south-eastern region of sourth Bijoliya . and Highest hillock of 689 meter high in the south of Gangapur .

(3) Drainage

The important rivers which flows in the district are the Banas and its tributaries- Barach,Kothari and Khari. Other small rivers are Mansi,Menali, Chandrabhaga, Mez, Aeru & Nagota

The river Banas rises in the Aravali hills in the north in Udaipur district and enters Bhilwara district near village Duriya (Bhilwara Tehsil). This river flows towards the north and then north-east directions along with western side of the Jahazpur tehsil and enters in the Tonk district.

There is no any natural lake in the district. Nahar Sagar, Ummed Sagar, Mandal, Guria, Paten, Govta, Nagdepaten, Arjungarh and Karera are men made lakes and the water of these lakes is utilized for irrigation as well as for domestic use.

(4) Climate

While the temperature continuously rise the hot from March to June in the district, it goes down after mid-November it declines upto the month of January. In the year 1997 the minimum and maximum tempreture recorded at Bhilwara centre was 4.0 C and 44.0 C respectively, while average temperature and humidity were recorded as 23.3 C and 65.0 percent respectively. A meteorological observatory is working at Bhilwara city which provides the information regarding climate of the district.

The climate of the district is moderate and healthy,. The district has a hot dry summer and a bracing cold season. The climate conditions of north-eastern portion of the district vary from the eastern to south-eastern hilly tract. Generally the summer season starts in the district from March and continue upto June and winter season period runs from December to February every year.

The rainy season in the district is generally runs between July to September. The 94 percent of total rainfall took place between this period. The average rainfall of the district is 69.90 Cms, whereas in the year 2000, the actual rainfall took place in the district was recorded as 46.06 Cms, which is (-) 23.84 Cms of average yearly rainfall.

(5) Natural Economic Resources

Soils

The brown yellow soil are found in Jahazpur,Kotri,Mandalgarh and Shahpura areas, brown soil are found in Sahara, Mandal, Asind, Hurda, Shahpura, Kotri , Suwana, Banera and Raipur areas and hilly soil are found in Mandal, Asind, Kotri, Raipur, Banera, Jhazpur, Mandalgarh and Bijoliya tehsil area. The area of the soil are given as under : -

Sl. No.	Soil	Area(In Hectares)
1	2	3
1	Brown and Yellow Soil	211,206
2	Brown soil	560,804
3	Hilly soil	273,840

(5) Geology and Minerals

From the minerals point of view, Bhilwara district has an important place in the country. The main minerals found in the district are given as under.

1. **Mica** :- The district is a leading Mica mining center which produces about 70 % of total Mica produced in the state. A reserve of 6.30 lakhs tons of Mica is available in the district . Mica is mined at various places among which centres of Bhanas and Pratapura of Asind tehsil. Danta of Bhilwara tehsil are important ones. It is one of the important minerals in the state in terms of export potential and royalty. In the year 1990-2000 a total of 77.292 metric tones of Mica was produced in the district.

2. **Building stone**:- The stone locally termed as 'Balua" is mined at Mandalgarh and is available in the form of slabs of different colors. Village Bijoliya (tehsil Bijoliya) is well known for its stone slabs used for building construction and has a high demand of its slabs locally and in the neighboring districts of the state. In the year 1999-2000, 75038 metric tones of building stones was mined in the district.

3. **Soap stone**:- In the main minerals of the district – soapstone has an important place known for its good quality in the country. It is found associated with Dolomitic limestone at Chainpura (Asind tehsil) , Bagwasa and Kishangarh (Jahazpur tehsil) etc. Its

main industry of grinding is Udampur Minerals Development Syndicate Ltd.. In the year 1999-2000, 90.583 metric tones of soapstone was produced and averagely 859 persons were provided with employment , a total of Rs. 166.24 lakhs were earned by selling of this produce.

Other main minerals which are produced in the district are Lead, Copper, Zinc, China clay, Garnet , Silver, Asbestos, etc. Garnet mineral is found in Agucha (tehsil Hoda) , Kodu-kota and Samori (Bhilwara tehsil) and Deori ((Asind tehsil). Asbestos are found in ultra basic rocks near village Barana (Asind tehsil). Lead, zinc and copper minerals are found in pre-Aravali series of rocks in Pur-Banera region.

As a result of drilling work carried out by Hindustan Zinc Ltd.,It is estimated that there is a big stock of Copper,Zinc and Silver available in the district. In the category of non-important Minerals , Sand stone are found in a huge quantity in Mandalgarh tehsil. Some quantity of Marble phylites, zeast and Bajri are also available in the district.

The granite found in Bhilwara and Shahpura tehsils known as Bhilwara multicolours and Shahpura multicolours have a big demand in Mumbai City , where it is used in modern buildings, Hotels,and Hospitals and commercial buildings.

Forest, Flora and Fauna

Bhilwara district is situated in the southern part of Rajasthan.The climate conditions of north-eastern part of the district is vary from east & south-eastern hilly region. The average rainfall is higher in eastern and south-eastern parts of the district than of its northern region. The forest areas of the district are mainly confined in the eastern and southern region of Jahazpur, Mandalgarh & Bijoliya tehsils. Exploitable forests are available in Mandalgarh tehsil while isolated hills of Aravali series occur all over the district. The forest area of Jahazpur tehsil is of a degraded type and is preserved only for improving the growing stock.

According to village bulletin of Collector (Land Transfer) Bhilwara, total 73,778 hectares area was found as forest in the year 1999-2000 in the district which comprise 7.04 percent of total area of the distric, whereas in the year 1988-89, it was recorded as 5.6 percent only.

In the year 1999-2000, out of above area, 59 percent was found as reserve forests, 37 percent was found as preserved forests, and remaining 4 percent was found as unclassified forest.

Land Use Pattern

According to village letter, the total geographical area of the district is reported as 1047057 hectares in the year 1999-2000, whereas the same was 1040057 hectares in 1988-89. The following table indicate the classifications of land use in the district for the year 1999-2000 and 1988-89 .

Sl. No.	Classification of the land use	1999-2000		1988-89

	Total	**1,047,451**	**100.00**	**1,040,057**	**100.00**

There was a significant increase in forest land in the district during year 1988-89 to 1999-2000 whereas a decline of 3.40 percent in culturable land perhaps 0.32 percent increase was shown in total area sown.

Crop Pattern

Agriculture is the primary source of livelihood of the majority of the population residing in the district. There are three units located in Bhilwara , Shahpura and Mandalgarh, working under the Office of the Deputy Director, Water catchments development and land development. By this office 11 water collection areas have been selected and work related to land development and increasing in agriculture production is being carried out.

All the three types of crops viz. Kharif, Rabi & Jayad are grown in the district. In the year 1999-2000, total 309279 hectares of Kharif crops were grownm, whereas Rabi's 131184 , and Jayad 's 1116

hectares were grown. Food, vegetables and oilseeds crops are getting more popularity in the district.

A table given below shows the gross area utilized in the year 1988-89 and 1999-2000 . It can be seen that in comparision to year 1988-89 a total area sown has been declined upto 11.36 per cent in the year 1999-2000 . Out of total area sown in the district, 82.56 per cent are sown as food crops , the remaining 17.44 per cent of crops were of non- food crops. In these non-food crops, oilseeds are the main crop.

Production of Jute and cotton has been shown in bundles which is not included in the total.

Out of the total area of 63638 hectares sown for food grains, wheat crop has the highest percentage of 56.34. The second rank in production comes of Maize, and in pulses, gram is produced 58.35 percent and in commercial crops rape seed and mustard is 58.74 percent.

Tenancy

Tenancy in the State is governed by the Rajasthan Tenancy Act, 1955. It is one of the most important and progressive laws relating to agrarian reforms. The provisions of the Act apply in respect of land held by tenants as if the State Government was the landholder acting through the Tehsildars. In relation to the land held by him every cultivator is either a tenant or a sub-tenant or an allottee or a trespasser. A tenant is one who is required to pay some rent on account of use and occupation of land let out to him for agricultural or allied purposes. Grantee with a favourable rate of rent, ijardar, thekedear or trespasser is not considered a tenant.

There are following classes of tenant:

(a) Khatedar tenants
(b) Maliks
(c) Tenants of Khudkasht and
(d) Gair-Khatedar tenants.

A Khatedar tenant is entitled to all the rights conferred and is subject to all the liabilities imposed on Khatedar tenant by the Rajasthan Tenancy Act, 1953. On the date of coming into force of Rajasthan Tenancy Act, a Zamindar or a Biswedar holding Khudkasht was treated as a Khatedar tenant irrespective of whether he was or not in Occupation on the date of vesting.

Malik is a Zamindar or Biswedar who has become malik of Khudkasht land held by him on

abolition of Zamindari & Biswedari in 1959. The word 'Malik' was also added to section 14 of the Rajasthan Tenancy Act to classify it as a class of tenants. Section 13 of the Act provides that a Malik is entiled to all the rights conferred upon & is subject to all the liabilities imposed on Khatedar tenant and in substance, this class of tenancy is nothing but a Khatedar tenant.

As Zamindars & Biswedars holding Khudkasht were treated as Khatedar tenants a tenant of Khudkasht is essentially a subtenant in view of the fact that a sub-tenant is also eligible for protection of his cultivatory rights even against Khatedar tenants. Every tenant of land other than a Khatedar tenant, tenant of Khudkasht or a sub-tenant is Gair Khatedar tenant.

A trespasser is a person who takes or retains possession of land without authority or who prevents another person from occupying land duly let out to him by the state. After regularization, the trespasser becomes an allottee. An allottee is treated as a Gair Khatedar tenant on whom Sub-Divisional Officer shall shomoto confer Khatedari rights after ten years of allotment, provided that the allottee fulfills all the terms & conditions of allotment during his period. Similar is the case of other allottees who were otherwise allotted land by the state government.

Irrigation

Wells and tanks are the main sources of irrigation in the district. A total of 143661 hectares of area was irrigated in the district during 1999-2000 as compared to 1,12,655 hectares during 1988-89. During 1999-2000, 83.36 per cent was irrigated by wells, 8.26 percent by tanks, 5.83 percent by canals and 2.55 percent was irrigated from hand-pumps and other sources.

Out of total irrigated area during 1999-2000, 65.93 percent area was under food crops, 4.51 percent was under pulses, 11.44 percent under oilseeds, 7.64 percent under cotton and remaining 10.48 percent was covered under other crops like- sugarcane, tobacco, red chilies etc .

Animal Husbandry

In the year 1997 there was a total of 26,36,748 livestock were reported in the district as compared to 24,10,272 in 1988, thus resulting in an increase of 9.39 percent during the period 1988-1997. The details of total livestock in the district are given as under: - , Sheep (32.06), Cattle (741154 (28.11), Goats – 641706 (34.34), buffaloes –280394 (14.43) and remaining were horses, camels, ponies, mules & donkeys- 28112 (1.06).

The rearing of cattle is the important source of livelihood in the district. Towards improving the economy of the villagers, the increased production of milk has brought about a "White revolution: in the district. During 1999-2000, total 654 milk producers co-operative societies and collection centers were functioning in the district by which purchasing and selling of milk is carried out. There were 39522 members of village families functioning in these societies. There is as milk-chilling plant is also working in the district with a capacity of collection of 30000 liters of milk. During 1999-2000 , 58 animal hospital, 21 animal dispensaries and 75 artificial insemination centers of Animal Husbandry Department were functioning . Two mobile and emergency hospitals are also functioning. During 1999-2000 the department treated about 80000 animals. .

According to data reported in 1997, there was a total poultry in the district was 1,15,5990 as against 59966 in 1988. . There was an increase of about 94 per cent between 1988-97. A intensive poultry development unit is functioning in Bhilwara which is carried out the work related to selling, purchasing, treatment and collection of poultry.

During 1999-2000, 6 co-operative Sheep & Wool societies were functioning.

These societies not only provide financial help to the sheep breeders for getting their local sheep inseminated through foreign male breed but also assist them in getting the quality of their wool improved.

Fisheries

For the up-liftmernt of poor and backward population, fisheries development programme is playing a important role in the district. Due to below average rainfall since last three years, fish production has declined as 245.99 metric tones in 1999-2000 as compare to 825.67 metric tones in 1996-97. Similarly, fish breeding centres are also declined as 3 in place of 10. Presently, fish breeding is being carried out in 24 lakes. For the reasons given above fisherman are getting less income this year as compare to previous years.

Agricultural Implements

According to data received by the district in the year 1997, the following agricultural implements were available: Plough- 101260, Animal drawn carts – 50285, Diesel Engines- 29355, Electric pumps- 21265, Tractors- 4355, Sugarcane crushers- 471 and Ghanis 493, . In comparison to year 1988, there was an increase of 180 per cent in tractors and 86 percent in electric/Diesel pumps in the year 1997

Power and Electricity

Since there is no major river in the district which can be hamessed for multi purpose projects, hydro-electric power is not produced in the district but it is received from Gandhi Sagar Dam (Chambal Project) The consumption of electricity in the district during 1999-2000 was 4765.37 million kwh as per detail given below.

Sl. No.	Type of uses	Consumption (in million KWH)
1	2	3
1	Domestic	987.62
2	Commercial	237.75
3	Industrial	
	(a). Small & Medium voltage	748.91
	(b) High voltage	2240.88

At the end of March,2000, total 99335 vehicles were registered in the district , out of these, main vehicles were Motor Cycles and Auto Rickshaws 58.13 per cent, Two Wheelers , Scooters etc 15.29 per cent, Tractors 11.24 per cent, Private Cars & Jeeps 6.85 per cent , Public and Private loading vehicles 4.26 percent, Private Buses 1.08 percent and remaining 3.15 were taxies,loading vehicles and vikrams vehicle etc. There are 41 Petrol Pumps in the district for filling up petrol/diesel in these vehicles. Out of which the highest numbers of 11 are located in Bhilwara district head quarter. Bus routes connect all the main places of the district.

The district is connected by the Western Railway Ajmer- Khandwa meter gauge lines enters at the district at Gulabpura and leaves the district at village Hamirgarh(Bhilwara tehsil). The total railway tract length in the district is 81 kms, and there are 17 railway stations in the district. The railway Department is preparing to convert meter gauge line into broad gauge line .

During the year 1999-2000, 351 Post-Offices, 41 Telegraph Offices, 71, Telephone Centers, 1249 Public Message Offices, 91 Local Offices, 499 STD/ PCO and 1149 letter boxes were existed in the district.

Trade and Commerce

In order to provide good value to the farmers for their products, efforts for proper marketing are being made with the help of 4 Krishi Upaj Mandi Samities working here. These samities have carried out a business of 11547.97 lacs rupees and their net income was 123.08 lacs rupees. Along with this there are 11 Primary Vipanan Sahakari Samities with a membership of 8418 members were functioning in the year 1999-2000.

For the purpose of storage of agriculture produces of the district, there are 9 ware houses working in Gulabpura, Bhilwara and Mandalgarh and three ware houses of Food Corporation of India was also functioning there.. The storage capacity of all these ware houses are 28630 metric tones.

By the end of year 2000, there were 150 branches were functioning for providing banking families in the district, out of these , the branches of commercial banks were 88, regional rural banks were 33, co-operative banks were 17, land development banks were 6 asnd 6 branches of urban & other banks were functioning there.

By the end of March 2000, there were 270 shops of country liquor, 22 shops of Indian made foreign liquor , 23 shops of hempdrug , 22 shops of opium and beer and 14 other shops which had been doubled in comparision to year 1988-89.

By the end of March 2999, there are 7 cinema halls , having a seating capacity of 5508. The district administration earns an amount of Rs. 7823000 from these cinama halls as entertainment tax.

Industries

Industrially, Bhilwara is considered to be one of the leading district of the State. The district has a significant place in production of Synthetic Yarn not only in the Country but in foreign countries also. Large, Medium and Small industries are functioning here. Among them – Cotton textiles, Synthetic yarn, carpet yarn and C.D. Yarns are produced by 402 textile Industrial units which produced upto 2 crore meters of synthetic cloth per month with the heop of 8259 persons. An investment of 800 crore rupees have been made in these industries. Thousands of persons are getting employment in these industries. Two large-scale industries are functioning there.

Shri Mewar Textile Ltd.

It is the largest industrial establishment in the district. It was started functioning in 1938 with an authorized capital of Rs. 50 lacs Its hosiery brand known as " Metex" has earned a name of itself for producing quality hosiery items. Nearly more than 1000 persons are employed in this mill.

Rajasthan Spinning & Weaving Mills Ltd.

This is the second largest industry in the district. It started its production in November 1962.. Its main production is Cotton Thread while: Terelyne: thread is also being produced in the mill.

Upto March 2000, there were 11889 registered small industries were functioning as compared to 7078 in 1987. Among them food based (1215), wood based (1684), Leather and Leather based (2785), Minerals and alloy based (1204), Cotton and Cotton based production (1013), Metal based (455), were functioning . An fixed investment of Rs. 14914.91 lacs of rupees have been made in these industries and nearly 30000 persons are engaged in these industries.

Among the cottage Industries in the district mention may be made of traditional rural cottage industries concerning black-smithy, gold smithy, pottery, weaving, bangle making, leather tanning etc. Of the pottery articles water vassals locally called: Matki: are mainly produced. Flowerpots and clay toys are other articles manufactured by the potters in the rural areas.

In the co-operative sector, two mills have been established at Gangapur and Gulabpura, which produce cotton yarn. Total 45 hand weaving committees are registered in the district in which nearly 1808 weavers are registered.

To boost industrial development, the work of Growth Centre Scheme is in progress and fifth Inland Container Depot is working at Bhilwara, it helps to exporters of cloth industries in getting solutions of their problems.

At the end of 2000, 17419 persons were registered in the employment offices of the district. Out of which 6982 were up to the level of Metric/Secondary, 5628 were up to the level of Hr/Sr. Secondary and 38\962 were up to the level of graduation / post graduation level and other were 847.

During the year 2000, 95 persons were provided with the employment, out of which53 persons were got job in private sector and remaining were provided with jobs in State/Local body government.

Gram Panchayats composition & its role

The system of Panchayati Raj was inaugurated on 2nd October 1959 in Nagaur district by then Prime

Minister Late Shri Jawahar Lal Nehru. Late Shri Balwant Rai Mehta proposed the recommendation for Panchayati Raj. There are three levels of Panchayati Raj:

(1) Gram Panchayat (Village level)
(2) Panchayat Samiti (Block level)
(3) Zila Parishad (District level)

Gram Panchayat is an important institution of self-government. The institution is set for a village or village agglomeration. A Gram Panchayat is created on 2,000-8,000 population. It covers a maximum area of 6 miles. The villages, which have population below 2,000, are merged with the other villages to create a Gram Panchayat. Their tenure is of 5 years.

A Gram Panchayat consist 5 to 20 members. The Head of the Panchayat is called Sarpanch. Panch and Up-Sarpanchs are also elected. It includes a member belonging to backward class and a lady member. There are 151 Gram Panchayats in the district.

The main objectives of Gram Panchayat are to arrange the primary education, sanitation of public places, drinking water and light. It manages also the adult education, livestock and repairing of wells.

During the last years, Gram Panchayats functioned several important jobs like *Kam Ke Badley Anaj*, Construction of Panchayat Ghar, School buildings, roads and tanks. It organizes also the cattle fair. Gram Panchayat plays an important role in the development of village and its economy.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for

sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g. the main house, the servant's quarter, the garage, etc. only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) a minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Main-worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any econom ically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc.,

and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc. in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these

sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude Birth Rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude Death Rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age Specific Fertility Rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age Specific Marital Fertility Rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General Fertility Rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General Marital Fertility Rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total Fertility Rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total Marital Fertility Rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-Specific Mortality Rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant Mortality Rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal Mortality Rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early Neo-natal Mortality Rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late Neo-natal Mortality Rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Neo-natal Mortality Rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal Mortality Rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still Birth Rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal Mortality Rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child Woman Ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child Woman Ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the

reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types—(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration) (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic Status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs/towns. These Class I UAs/towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum Area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) Are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City

The concept of 'Mega City' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding - population, its distribution

According to the 2001 census, the total population of Bhilwara district is 2,013,789 comprising 1,026,650 males and 987,139 females and constituting 3.6 percent of State population and area spread over 3.1 per cent in the 12 tehsils of the district, Bhilwara tehsil is most populous tehsil having population 444,132 while Beejoliya is the smallest tehsils having a population of 80,640 persons. Other tehsils in order of their population size are Asind (206,469), Mandal (197,500), Jahazpur (186,597), Shahpura (176,747), Mandalgarh (151,583), Kotri (148,702), Hurda (115,450), Sahara (115,123), Banera (106,222) and Raipur (84,354).

Out of the total population of the district 79.4 per cent lives in rural areas while 20.6 per cent lives in urban areas. The corresponding proportions in rural and urban areas of the State are 76.6 per cent and 23.4 per cent respectively.

The district has registered a percentage decadal variation of 26.4 during the decade 1991-2001. The rural areas of the district has attained a lower decadal variation of 24.7 per cent as compared to that of urban area at 33.3 per cent. At tehsil level, it varies from the lowest of 14.7 per cent in Sahara tehsil to a maximum of 31.8 per cent in Beejoliya tehsil in total areas.

There is an increase in the percentage of urban population to total population from 19.5 in 1991 to 20.6 in 2001. Asind, Hurda and Bhilwara tehsile have registered the same trend as that of district. Whose percentage of urban population has increased from 1991 to 2001 and Shahpura, Shahra, Jhahazpur and Mandelgarh tehsils where it has declined from 1991 to 2001.

Of the total 1,745 villages, 1,693 are inhabited villages. Mandalgarh Panchayat Samiti has the highest number of villages i.e. 281 where as Hurda Panchayat Samiti with lowest of 70 villages. Again, Mandalgarh Panchayat Samiti is the most populous with 199,935 persons while Raipur is the least populous Panchayat Samiti with a population of 84,354 persons. The maximum numbers of villages i.e. 524 are those which lie in the population range of 500-999. It is followed by 30.5 per cent of the inhabited villages, which have population range of 200-499. As regards to large size villages in the district, 18 are such which lie in the population range of 5000-9999 and 3 are such which have population more than 10,000. In case of small size villages i.e. having population less than 200, such villages are 172 in number in the district.

The density of population of the rural areas of the district is 158. Of the total number of inhabited villages i.e. 1,693 in the district, 53.1 per cent have population density ranging from 101 to 200, followed by 19.1 per cent in the range of 201-300. Apart from these 76 villages have population density upto 50.

More than half of the rural population consists of workers i.e. 50.1 per cent. There is not much difference in the work participation rates of males and females being 55.2 per cent and 48.8 per cent respectively for the rural areas of the district. At Panchayat Samiti level the highest percentage of male and female workers has been recorded in Suwana Panchayat Samiti at 60.6 and 52.6 respectively. However, the lowest percentages have been registered by Jahazpur Panchayat Samiti for males at 51.4 percent and Raipur Panchayat samiti for females at 36.0 percent respectively.

^ The names of constituent units of U.A. are given separately.

* In case of the towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns

In contrast to the rural areas of the district only 33.5 per cent of the urban populations are as workers (main + marginal). Apart from this much variation is also seen in the percentage of male and female workers, which are 51.5 and 13.6 respectively. Among the towns, the percentage of workers varies from 41.8 in Mandalgarh (M) to 30.9 in Gulabpura (M).

Note: Percent of Worker to total worker are given in brackets

Cultivators are the main working force in the district as they form 56.7 per cent of total workers. It is followed by other workers (33.0 per cent), agricultural labourers (7.3 per cent) etc. Males (267,706) outnumber females (264,891) as cultivators. Much variations in the percentages of male workers (44.6) and female workers (16.0) classified as other workers is seen in the district.

At tehsil level, the percentage of cultivators to total workers varies from 74.9 in Mandelgarh tehsil followed by 74.1 in Kotri tehsil to 28.9 in Bhilwara tehsil. For Household Industry workers, it varies from 3.7 per cent in Banera tehsil to 1.2 per cent in Beejoliya tehsil. In case of 'other workers' the highest percentage of 63.0 has been registered by Bhilwara tehsil while the lowest of 17.9 per cent in Mandalgarh tehsil.

Note : Percent of Worker to total worker are given in brackets

More than half i.e. 50.1 per cent of the total rural population of the district is engaged in economic activities being workers. Of the total workers, most are engaged in agricultural activities i.e. 64.8 per cent are as cultivators and 8.1 per cent as agricultural labourers. Only 2.7 per cent of the workers are engaged in household industries whereas the significantly 24.4 per cent in other works.

Almost similar trend has been observed in all the panchayat samities

Sex wise, percentage of male workers is higher in the economic categories of Household Industry workers and other workers except cultivators and Agricultural laborers where their percentages are 58.5 and 5.1 as compared to that of females at 72.8 and 11.9 at the district level.

+ To be arranged in alphabetical order.
^ The names of constituent units of U.A. are given separately.

The percentage of workers to total population of urban areas is significantly quite low being only 33.5 per cent as compared to that of rural areas of the district being 50.1 per cent. Here too, the percentage of workers engaged in four economic categories is just the reverse as compared to rural workers where majority i.e. 82.7 per cent of the total urban workers are as 'other workers' followed by 9.7 and 5.0 per cent as cultivators and household industry workers respectively.

Almost similar trend is visible in all the municipal towns except in Asind (M), Gangapeor (M), Mandalgarh and Beejoliya Kalan (CT) where the percentage of household industry workers is lower than that of agricultural laborers.

Sex wise percentage of male workers as other workers is 88.7 percent than 55.1 percent that of female other workers. On the other hand, percentage of female cultivators (25.0 per cent) is much higher than that of male cultivator's (6.0) at the district level for urban areas.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total (1,693) inhabited villages, 1,528 (90.3 per cent) have educational facilities. In case of medical amenities only 27.9 per cent of inhabited villages have such amenities. A significant number i.e. 1,661 (98.1 per cent) villages have improved drinking water amenities. In the communication field only 20.6 per cent of villages have post office facilities while 49.7 per cent have telephone facilities. In the banking field the picture is gloomy as only 86 (5.1 per cent) villages have banks. Less than 50 per cent i.e. (696) (41.1 percent) are linked with pucca approach roads whereas 91.8 per cent have power supply.

At Panchayat Samiti level, Raipur Panchayat Samiti each has the higher percentage i.e. 97.8 of villages having educational facilities. For medical amenities it is Banera Panchayat samiti which have highest percentage of 47.0. Much variation is seen among the Panchayat samiti having telephone facilities. Hurda Panchayat samiti has the highest percentage of villages i.e. 84.3, which have telephone facilities whereas Kotri has the minimum percentage of 35.4 for such facility. Banera and Sahara Panchayat samities have the distinction of cent percent villages having power supply.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

(i) Improved drinking water : Majority of the households i.e. 73.3 per cent have drinking water facility in the district. For rural and urban areas, these percentages are 63.9 and 94.6 respectively. At tehsil level, for rural areas, the highest percentage (83.0) of households availing this facility has been found in Sahara tehsil whereas for urban areas it is 97.7 per cent in Asind tehsil.

(ii) Electricity : More than 50 per cent i.e. 57.2 per cent of households are using electricity. However there is much wide gap in the percentage of households using electricity in the rural (49.2 per cent) and urban (88.9 per cent) areas of the district. At tehsil level it varies from a maximum of 85.1 per cent to a minimum of 40.5 per cent of households using electricity.

(iii) Bathroom : Lass than a quarter i.e. 21.2 per cent of the households have bathrooms in the district. Here too much wider gap is seen in the percentage of households having bathroom in rural and urban areas, as these are 10.5 per cent and 63.8 per cent respectively. Similar trend is seen in all the tehsils of the district.

(iv) Toilet : In case of toilets, the picture is not so good especially in rural areas of the district. Only 8.2 per cent of households of the rural areas have toilet facility as against 65.4 per cent in the urban areas. The highest percentage (47.5) of households having toilet facility is found in Bhilwara tehsil whereas the lowest of 7.3 per cent in Kotri tehsil.

(v) Drainage : Again, in case of use of drainage, the position is some what better than for toilets 41.8 percent of households have drainage in their houses. In rural areas of the district 31.5 per cent of households have drainage system as against 82.7 per cent in urban areas.

(xiii) Major characteristics of the district contribution of the district in the form of any historical figure associated with the district:

The antiquity of the region can be traced back to the hoaruy past . The excavations at Bagor have revealed the existence of a stone age culture spread over two phases- the earlier datable to 5000 BC-2800 BC ,and the latter belonging to iron age. It is one of the richest lithic sites of India.. The district is also studded with mounds of the proto-historic affiliations located on the old river beds of Kothari ,Khari etc.The inscribed sacrificial post (Yupa Stambha) from Nandsa (Raipur Tehsil) refereeing to the performance of Sasthiratra sacrifice eloquently proves the revival of Vadik ritis during the 3rd

century AD. Old inscriptions from the region tell the story of its glorious past. The rock of Bijoliya is inscribed with an important epigraph of the Gupt period (4th-5th century AD).

The district is extremely rich in old temples ranging in time from the 9th to 12th Century AD. The mediaeval temples at Bijoliya, Tilaswan, Dhor, Menal & Mandalgarh etc are example to exquisite Art and architecture. The multi-storied pound of Bhinay near Kachola is one of its kind.

In ancient times Bhilwara district was a part of Guhil & Chauhan Rajput kingdom. .

A mint of Mewar State was also located in Bhilwara, in which Bhilri coins of Mewar were produced. This mint was closed in the year 1870.

(xiv) Scope of Village and Town Directory:

In Part-A of the District Census Handbook, entitled as Village and Town Directory, an attempt has been made to present information regarding various amenities/facilities available in every rural/ urban unit of the State. The unit of the rural areas is village and that of urban area is town/urban agglomeration. Information regarding rural areas and Census Towns has been gathered through Patwaries while that in respect of urban areas other than Census Towns has been collected through the concerned municipality/Cantonment Board/Notified Area Committee. In order to have the aforesaid information authenticated the concerned departments and agencies were also contacted to furnish information available with them. All the information gathered about amenities relate to year 1999 and those pertaining to land-use pattern pertain to Samvat Year 2055 i.e. the agricultural year ending on the 30th June, 1999.

Village Directory

It will be helpful at the outset to have an idea of the items for which information has been included in the Village Directory. Information in respect of each village has been presented through a twenty three column format in which villages have been presented in order of their names and Permanent Location code Number (PLCN) at State level. The first four columns (2-5) give general information i.e. Name of village and Permanent location code number, area in hectares, population and number of households residing in villages as per Census 2001.The amenities available in the village have been shown in columns 6-18. The information regarding land-use pattern has been given in columns 19-23. As a special feature for Census-2001 some new columns 10-12 and 17-18 are first time incorporated viz. commercial and cooperative Bank, Agricultural/non Agricultural and other credit societies, Recreational and cultural facilities, News Paper/Magazine and most important commodity manufactured in the village. In case of uninhabited villages, the information has been given relating to columns 1-3 and 19-23 only and in the remaining columns the word 'uninhabited' has been mentioned. At the end of entries of each Panchayat Samiti the totals relating to columns 3-11, 13-14, 16-17,19 and 21-23 (total area, amenities and land-use break-up) have also been given.

Various amenities like drinking water, communication, post and telegraphs etc. have been shown against the name of the referent village if they are available within the village with the help of various codes. The Code Structure relating to various columns has been given in the beginning of Section-I to Part-A of this book. The number of each type of amenity has been indicated in parentheses after the suitable code in case of educational, medical and post & telegraph facilities.

If any amenity is not available within the village a dash (-) has been shown in the relevant column and next to it, the distance of the nearest place from the referent village where the facility is available has been given in broad distance ranges viz. <5 km, 5-10 km & 10+ km.

The following pattern has been adopted for indicating the educational institutions:

(i) Schools up to Class V have been treated as primary schools. They include Nursery Schools, Kindegarten Schools, Pre-basic and Pre-primary Schools and Junior Basic Schools upto Class V.

(ii) All schools having Classes VI to VIII have been treated as Middle Schools.

(iii) All schools having Classes IX and X have been treated as Secondary Schools.

(iv) All schools having Classes XI and XII have been treated as Higher Secondary Schools. They include Senior Cambridge Schools, Schools under 10+2 scheme, Intermediate, Pre-University and Junior College etc.

In case of composite schools relevant groups of classes have been treated separately, e.g. a school having classes I to XII, has been shown as having one primary, one middle, one secondary and one higher secondary school. The term 'College' includes all types of colleges whether Arts/Science/Commerce/ Medical/Engineering/Agriculture and others imparting education at Graduate or Post-Graduate level. Institutions other than industrial schools, training schools and adult literacy classes/centres have been shown under 'others'.

In case of Medical institutions, Hospitals and Dispensaries, Allopathic, Ayurvedic, Unani and Homeopathy have been shown separately. Other institutions include all types of Yogic, Naturopathy, Hospitals/Dispensaries, Leprosy Centres etc.

In case there are more than one source of drinking water facility available in the village all such sources have been shown separately. Postal amenities include Post Office, Telegraph Office and Telephone, which are shown separately.

In case there are more than one communication facilities these have been indicated separately by relevant codes. Approach to the village refers to the state of roads etc. leading to the village from the communication centres i.e. bus-stand/railway station etc. This is to give an idea whether the village is easily approachable in all types of weather or becomes inaccessible for sometime in the year. Where there are more than one approach roads these have been indicated separately by relevant codes.

Information regarding the nearest town indicates the name of such town along with the distance from the referent village irrespective of the fact whether such town is located within Rajasthan or in some other adjoining states. In case of town situated in states other than Rajasthan, the concerned State has been mentioned against its name in parentheses with the help of abbreviations. The term 'town' here refers to one of those urban centres, which have been treated, as towns in the concerned state during 2001 Census.

In order to give an idea about the uses which electricity is put to, the information has been given under the head "power supply" if it is available in the village.

Land-Use Pattern

The land-use pattern has been presented under the following five headings:

I. Forest

It denotes those lands, which have been termed as 'forest' by the competent authority.

II. Irrigated land

It relates to land, which has actually been irrigated in the referent year. The source-wise break-up has not been presented, as no such information was available in respect of the net irrigated area.

III. Unirrigated land

The term covers all the unirrigated land cultivated during the referent year and land lying fallow upto four years.

IV. Culturable waste

It includes Gaucher i.e. pasture and grazing land and tree-groves.

V. Area not available for cultivation

It refers to land, which has not been classified in any of the above mentioned types and also includes house sites, roads, rivers, nullahs, hillocks etc.

The following nine appendices have also been provided to present the position obtaining in Panchayat Samiti and district as a whole regarding various Amenities available in rural areas, villages classified by characteristics of the population and land-use pattern in Census Town in connection with the Village Directory:

(i) Panchayat Samiti wise Abstract of educational, medical and other amenities in villages.

(iv) Panchayat Samiti wise lists of inhabited villages where no amenity other than drinking water facility is available.

(v) Summary showing number of villages not having Scheduled Castes population.

(vi) Summary showing number of villages not having Scheduled Tribes population.

(vii) Panchayat Samiti wise list of villages according to the proportion of Scheduled Castes/ Scheduled Tribes population to total population by ranges. It consists of two parts: Part-A relates to Scheduled Castes and Part-B to Scheduled Tribes.

(viii) Panchayat Samiti wise number of villages under each Gram Panchayat.

(ix) Statement showing number of girl's schools in the villages.

Town Directory

Particulars about each town have been presented in the form of seven statements. In towns where there are slums Statement-VII has also been given in which information regarding civic and other amenities available in the slums have been shown. In each statement towns have been arranged in alphabetical order.

As has been explained earlier, urban agglomerations are of two types: first those constituted by two or more independent towns and second those where the urban characteristics have developed in the adjoining rural areas, which have developed as outgrowth of the referent town.

Where an urban agglomeration includes two or more independent towns, the names of towns constituting the agglomeration have been indicated in the alphabetical arrangement but their names have also been repeated in the alphabetical order under the name of the agglomeration after the name of the main or core town and information relating to these has been shown here. The particulars of the constituent units of the agglomerations have not been repeated wherever they occur separately in the alphabetical order and a note "See referent agglomeration" has been given against such names. The lines relating to the information regarding urban agglomeration as a whole have not been numbered but the constituent units as and when they occur in the alphabetical order have been numbered so that the last number agrees with the total number of towns in the district concerned. In respect of Statements II, III and VI in the lines relating to agglomeration a note "See constituent units" has been shown and information has been provided separately in respect of all the constituents below it.

In case of towns having out growths, an asterisk mark has been placed against their names. Information in respect of out growths has been included in the concerned town and has not been shown separately.

The amenities and other data have been indicated by codes. A list of column wise code structure and other abbreviations used in each statement has been provided at the beginning of Section-II of Part-A of this book. We may now discuss the various Town Directory statements.

Statement I

It deals with the status and growth history of the town. Columns 2 to 7 give information regarding class, name and civic status of the town, its location code number, name of the tehsil/panchayat samiti in which it is situated, its area in sq. km and number of households including houseless households residing in the town as per 2001 Census. The class of the town has been determined on the basis of its population as per Census 2001 and the civic administration status relates to the year 2000. Columns 8 to 18 show the population of the town in different decennial censuses beginning from 1901 upto 2001. The growth rate in terms of percentage in respect of previous censuses has been shown below the population figures pertaining to each Census beginning from Column 9 onwards.

A 'dash' under these columns indicates that the referent town did not have an urban status in the referent Censuses. Density of Population per sq. km as per Census 2001 has been shown in column 19 and sex ratio (number of females per 1,000 males) have been indicated for three censuses viz. 1981 to 2001 in columns 20 to 22.

Statement II

This statement gives information about the physical aspects and locations particulars of the town

in 1999. First two columns give the serial number, class, name and civic status of the town. Columns 3 to 13 deal with the physical aspects viz. rainfall and temperature. Rainfall figures are the average of the rainfall for the last one year ending 1999-2000. If the information in respect of rainfall is not available for any town it has been given for the nearest place for which it is available. Rainfall has been shown in millimeters per annum. Maximum and minimum temperatures have been given in centigrade. If the information regarding temperature is not available in respect of any town it has been given for the nearest place for which it is available and the name of the centre has been shown in footnote.

The location of the town with respect to various administrative headquarters and nearest city is indicated in columns 6 to 10. While showing the location of the referent town with respect to various administrative headquarters, names and their distance from the referent town in kilometer have been given in parentheses below the name of the place where it is situated. In case the referent town itself happens to be the seat of the administrative headquarters, this distance has been shown zero. Information regarding the nearest city of population one Lac or more and population 5 Lacs or more have been given in respect of its situation within the State or even if this city may be situated in other State. In case the nearest city happens to be situated in other State, the name of the concerned State has been shown against the name of the city in parentheses. How the referent town is approachable is given in columns 11 to 13 which indicate the availability of communication facilities viz. railway station, bus facilities and navigable river/canal within 10 km. There is no navigable river or canal in Rajasthan.

Statement III

It gives information about the finances of the civic body controlling the local civil administration and it has been presented in '000 rupees. A 'dash' in this Statement indicates that no receipt or expenditure has occurred under the particular head and 'N' represents negligible amount. First two columns give general information, columns 3 to 9 present receipt under broad categories and total receipt and columns 10 to 16 present expenditure under broad categories and total expenditure. The receipt and expenditure has been presented under six broad categories each. While receipt through taxes implies all receipts from taxes obligatory or others and revenue derived from municipal properties and power apart from taxation, it also includes income derived from holding of fairs and exhibitions, supply of milk, license fee, cattle-ponds, fines and penalties, transport services, places of entertainment, allotment/sale/lease of land and rent etc. Government grants include per capita grant, grant from Public Works Department and grant from the Social Welfare and other departments. Other sources of receipts have been specified, wherever possible but generally they are of miscellaneous nature.

Expenditure on general administration covers salary and wages of staff, contingent expenditure on staff, grants loans and advances to the staff etc. Expenditure on public safety cover fire-fighting, light, water and lease facilities, regulating the dangerous/ hazardous trades/works/occupation, water supply, registration of births and deaths, disposal of garbage, rubbish and night-soil. Public health and conveniences cover all types of medical aid and maintenance of the destitute etc. Public works include maintenance and construction of roads and buildings and relief works in times of famine and scarcity. Expenditure in public institutions covers all types of social, cultural, educational, religious institutions etc. Which are run or patronised by the municipality. Other sources of expenditure have been specified where possible but mostly these are of miscellaneous nature.

Statement IV

This statement deals with the civic and other type of public amenities and provides information about total population, scheduled castes and scheduled tribes population, road length, system of sewerage, number and types of latrines, method of disposal of night-soil, water supply, availability of fire-lighting service and electrification besides general information. In case of water supply the source of water as also the system of its storage have been shown. The storage capacity has been shown in Kiloliters. In case of disposal of night soil and protected water supply particulars have been given in respect of two methods/sources in order of their importance if more than one exist in the town. In case fire-fighting service is not available in the town the name of the nearest place if in the same district or the name of the nearest district if in the

same state or other state where available along with distance from the referent town has been mentioned.

Statement V

Particulars of medical, educational, recreational and cultural facilities available in the town have been given in this statement and the number of each type of these facilities has also been shown in parentheses is along with the appropriate code.

In case of medical facilities the number of beds wherever available has also been shown Allopathic, Ayurvedic, Unani and Homeopathic hospitals/ dispensaries have been shown separately. No code has been provided for allopathic institutions and the numbers have been shown only in figures. Thus beside H, code for hospital means an Allopathic Hospital. Separate codes have been provided for other three systems of medicine.

If a medical or educational facility is not available in the town, the name of the nearest place, if the same district or the name of the nearest district in the same State or other State where available and its distance (in km) from the referent town has been mentioned. Details of medical institutions shown under 'Others' have also been explained.

Arts, Science and Commerce Colleges have been shown separately. While showing the educational institutions upto Higher Secondary level the same procedure as adopted in case of Village Directory, has been followed. In case of composed schools relevant classes have been treated separately e.g. a school having classes I to XII has been treated as being composed of one Primary, one Middle, one Secondary and one Higher Secondary School.

All other types of educational institution which are not covered in column 6 to 14 have been shown in column 15 under 'Others' and include technical/ vocational and training institutions like Applied Art Painting College, Pharmacy College, Agricultural College, Teacher's Training College/Institution, Music/ Dance School etc. Janchetna Kendra is also included in others.

Statement VI

This statement contains particulars regarding trade, commerce, industry and banking. It gives names of three most important commodities, exported and manufactured in the town besides the number of banks, agricultural and non-agricultural credit societies functioning in the town. A list of the outgrowths, if any, along with their population and name of the core town has also been provided at the end of the Town Directory as an Appendix.

Statement VII

Information about all slums whether notified or not and for all towns has been shown in this statement in order to give an idea about the amenities available to the slum dwellers. Particulars about paved roads, systems of sewerage, number and types of latrines, method of disposal of night soil, number of tap points/ public hydrants for supply of protected water and electrification have been provided in respect of every slum in each town, if there are any.

PART-B : PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/Panchayat Samiti/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/Panchayat Samiti/Town
3.	Primary Census Abstract for Scheduled Tribes	District/Panchayat Samiti/Town
4.	Village Primary Census Abstract	Panchayat Samiti/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented Panchayat Samiti wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Panchayat Samiti is presented both for rural and urban areas separately. All the villages within the Panchayat Samiti constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Panchayat Samiti. In case a Panchayat Samiti is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Panchayat Samiti is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares. The area figures of the Panchayat Samiti is the total of the village areas coming under each Panchayat Samiti. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tehsils/ Panchayat Samiti within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Tehsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and Panchayat Samiti level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II : FERTILITY-MORTALITY MEASURES

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever-married women and last question related to currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to Rajasthan State. The definitions of the Terminology used in computing different fertility and mortality rates can see in the table.

AGE SPECIFIC MARITAL FERTILITY LEVEL, 1991 CENSUS

Age-Group	Bhilwara			Rajasthan		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	48.44	46.24	61.79	99.82	99.10	103.46
20-24	148.64	151.16	138.87	217.18	227.01	182.20
25-29	146.90	154.83	118.50	197.71	214.81	144.55
30-34	122.93	134.04	76.72	141.09	158.38	85.69

45-49	19.32	21.76	7.19	27.36	30.37	15.81

The ASMFR has been calculated at seven different age groups. The highest ASMFR 148.64 has been found in the age group 20-24 followed by 146.90 in the age group 25-29. The lowest ASMFR of 19.32 has been found in the age group 45-49.

In comparison to the ASMFR at the state level it has been found lower in the age group of 15-19 and 20-24 being 48.44 (99.82) and 148.64 (217.16 state) respectively at district level in the remaining age group i.e. 25-29, 30-34, 35-39, 40-44 and 45-49 the ASMFR is lower at the state level compared to that of district level this can be seen from the following table.

ESTIMATES OF CHILD MORTALITY, 1991 CENSUS

Mortality Indicators	District : Bhilwara			Rajasthan State		
	Persons	Males	Females	Persons	Males	Females
q2	125	134	123	97	95	99
q3	129	137	127	100	98	106
q5	143	111	142	110	103	117

Information on the question on children even born and children surviving censed for even married women has been tabulated by age of the mother. From this estimated of child mortality have been out by using basis technique.

From the estimates of child mortality (number of death) by ages 2, 3 and 5 as q2, q3 and q5 it is observed that the child mortality in the district is higher as compared to the state for the Sexes i.e. males and females as is evident from the table.

Note: * Newly Created districts after 1991 Census.

Different fertility measures indicates that the fertility level in the Bhilwara district the gross fertility rate of the district has been reported as 150 as against 162 of the State. Similarly the GMFR and TFR of the district are also lower than that of State being 164 and 4.80 as against 184 and 5.01 of the state. Respectively. The crude birth rate of the district is also lower than that of the state of 35.23

However the number of children even borne per 1000 women in the age group of 45-49 each 4.31 is lower than the state average 5.07. The mean age at marriage of females in the district (15.32) is also lower than that of state (16.67) as can be seen from the table.

RELIGION

Religion is an important basic cultural characteristic of the population. It provides an interesting picture of the society. The data on religion projects the unity and diversity of the country. The data is great importance to the public as well as Government,NGO and Minorities Commission.

Among the followers of six major religions in Bhilwara District it was seen that the proportion of Hindus had marginally decreased from 92.78 percent in 1991 to 92.36 percent in 2001 Census. Whereas the proportion of Muslims increased from 5.29 to 5.60 percent,. it is also true In the case of Jain Community during the same period but the Sikh community showed a marginal increased., The Christian community also registered no change during the decade.

At the state level however the proportion of Hindus, and Jains decreased whereas those of Muslims Christians, Sikhs, and Buddhists increased.

AGE, SEX AND EDUCATIONAL LEVEL,1991- 2001

Literacy in the age-group 10-14 years in1991 in the district was 49.5 percent in the total, which was higher among the males 67.5 percent and females 29.7 percent. In the total in the age-group 15-19 years the literacy slightly lower in the total i.e. 44.8.percent and the same trend was found as in the earlier age group except that the female literacy in this age group 15-19 years was as low as 25.0 percent. In general it was seen that the literacy rate in the urban areas was much higher both among males and females. The proportion of metric but below graduate was however not very high. In the total there were 5.8 percent metric but below graduate persons. Here also the male proportion was higher i.e. 9.1 percent compared to females 2.3 percent. Graduate and above in the age group 20 + years followed the same trend but in lesser proportion. In 2001 census the total population of the Bhilwara district was 2013789 which 50.74 percent are literates. As per the definition of literacy in the 2001 Census the entire population in the age group 0-6 was considered to be illiterates. The total literacy rate in the district Bhilwara in the age-group 10-14 years was 72.7 percent and among males and females it was

87.5 and 56.6 percent respectively, which is lower as compared to the state in the same age group. Similarly literacy rate in the age group of 15-19 years 84.2 percent males and 48.2 percent females were reported in the district, which is also lower than that of the state.

It is a general trend of the literacy at the state as well as district level, female literacy is lower than the male literacy. The percentage showed a decline at Matric but below Graduate 13.61 percent among male and 4.32 percent as females while at the graduate and above level 6.39 percent males and 2.61 percent are females. It can be seen from the Annexure VII.
