Dharam Stoop (Religious Tower) Churu

At the district headquarter Churu close to Indramani Park at the main crossroad in the town, the Dharam Stoop is situated. It was constructed by the renowned institution 'Shrisarva Hitkarani Sabha' Churu, a prominent institution in the field of education and social work. A symbol of religious harmony, the Dharam Stoop was constructed by Seth Jugal Kishore Birla at his mother's home town in the year 1925, which is an example of fine Architecture.

The Dharam Stoop is made of red stone. On the area surrounding the first floor shloks of the Vedas and the Geeta are inscribed on makrana marble in the devnagari script. On the Dharam Stoop, statues of Lord Krishna, Buddha, Mahaveer, Gurunanak, Jagdamba and Shankaracharya are installed. The Dharam Stoop also relates incidents of the Freedom struggle.

Annexure-VII : Age, Sex and Education in the district, 1991 Census 627

Annexure-VIII : Distribution of different mother tongues returned in 1991 Census 627

Foreword

The District Census Handbook (DCHB) is brought out for each district since the first Census after Independence and is one of the most widely used publications compiled and prepared by the Census Organisation on behalf of the State Governments and the Union territory Administrations. This publication provides Primary Census Abstract (PCA) data up to village level for the rural areas and provides similar details ward-wise for each city or town, and also provides the present status on availability of important civic amenities/infrastructural facilities in villages and towns of the district concerned. This publication has proved to be of immense utility, as it is considered as an essential and basic document for the purpose of delimitation of constituencies, formulation of local level and regional plan and also as an aid to district administration.

The publication of District Census Handbook (DCHB) was first introduced during the 1951 Census which contained a few important Census tables and PCA for each village and town of the district. Thereafter, at each successive Censuses, the scope and coverage of this publication was enlarged. The DCHB published at the 1961 Census provided a comprehensive descriptive account of the district, administrative statistics, Census tables and a village and town directory including PCA. The 1971 Census-DCHB series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States, Part-C was confined to district Census tables and in a few cases altogether given up due to delay in compilation and printing. At the 1981 Census, new features along with the restructuring of the formats of village and town directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised village and town directories, the PCA of village and town (ward-wise) including the Scheduled Castes and the Scheduled Tribes PCA up to tehsil/town level were provided in Part-B. In restructuring the format of Village Directory, all the amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as Adult Literacy Centres, Primary Health sub-Centres and Community Health Workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Similarly information on approach to the village was also provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, another statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and the Scheduled Tribes population and another on Adult Literacy classes/centres were added in the Statements IV and V respectively.

The manner of presentation of the DCHBs of the 1991 Census was by and large the same as followed in the 1981 Census. The format of PCA was, however restructured slightly in the 1991 Census. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. Another important addition in the DCHB of the 1991 Census was the Community Development Block level presentation of village directory and PCA data instead of the traditional Tehsil/Taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, as the CD block is the lowest administrative unit for developmental planning. Further, in order to facilitate the administrators, planners and researchers

intending to use village directory and PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village were provided for the 1991 Census along with the corresponding codes of the 1981 Census.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the village concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demand of data users.

This publication is a collaborative task of the State Government and the Census Organisation. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the direction of Shri Jayanti Lal Modi, Director of Census Operations, Rajasthan on behalf of the State. At the same time, much effort has been made to ensure comparability with the corresponding 1991 Census data and also similar information brought out by the respective State Governments in annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft of District Census Handbook manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all who have contributed in this project.

J.K. Banthia
Registrar General &
Census Commissioner, India

New Delhi
24th November, 2003

Preface

I am deeply indebted to the State Government of Rajasthan for their unstained support and cooperation despite all odds and adversaries like famine etc at all stages of Census Operations of 2001. I am grateful to Shri Inderjit Khanna, the then Chief Secretary of Government of Rajasthan for his prompt response, guidance and cooperation given to the Census Organization. He infused a sense of urgency and seriousness in the minds of District Collectors and Officers of the District Administration, which geared up the entire administrative machinery. The Supervisors and Enumerators, the basic census functionaries worked ceaselessly in the entire period of fieldwork to make Census 2001 successful.

Sarvashri Ashok Pandey and Vinod Zutshi, the then Secretaries in the Department of Cabinet Secretariat and General Administration have been instrumental in making Census 2001 a successful one. I owe my thanks to both of them. I am also thankful to other Departments like Education, Finance, Revenue, Economics and Statistics, Public Relations, Printing and Stationery, Local Self-government and Personnel Department for extending their full cooperation.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance throughout our endeavours. At the outset I would like to thank Shri D. K. Sikri, Registrar General and Census Commissioner, India for guiding us in bringing out this report. My grateful thanks to Shri R.G. Mitra, DRG (C&T), Shri R.P. Singh, DRG (Map), Shri Himakar, Additional Director (EDP), Dr.I.C. Agrawal, S.R.O.(SS), Shri S.L. Jain, Deputy Director (SS), Shri C. Chakravorty, Joint Director (DDU) and their colleagues at the headquarter for their ever willing, helping hand and thoughtful suggestions for putting together and shaping the volumes in their present form.

The Director of Census Operations, Rajasthan, Shri J. L. Modi under whose guidance the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before this volume could be made available for the press.

Shri H.S. Meena, Joint Director, incharge of District Census Handbooks and Primary Census Abstract, who was ably assisted by Shri H.C. Sharma, Assistant Director and their team of dedicated workers deserve all praise for their perseverance and dedication in preparing Village and Town Directories and in finalization of PCAs and other inset tables.

Shri K.S. Bhatnagar, Deputy Director (DDE) and his team of devoted workers desserve all praise for timely processing of Household Schedules through “Image based data capturing Technology” i.e. Scanning.

Shri K.S.Singh,Statistical Grade I has taken pains in drafting the District Profile and the Analytical Note for the district. The members of the staff in the Map Section did a commendable job under the guidance of Shri Panna Lal, R.O.(Map) ably assisted by Shri R.S. Tyagi, Sr.Geographer in bringing out various maps. Shri K.S. Bhatnagar officer incharge of printing has ensured the timely release of volumes and all credit goes to him for getting through the press.

District Highlights - 2001 Census

1. Churu district ranks 11th in terms of population, 6th in terms of area and 29th in terms of population density.
2. The sex-ratio of Churu district (948) is significantly higher than the (921) State sex-ratio.
3. The literacy rate of Churu district (66.8) is significantly higher than the State literacy rate (60.4).
4. There are 33 uninhabited villages in the district. Only 3 villages have a population more than 10,000 namely Sahwa in Tehsil Taranagar, Momasar in Tehsil Dungargarh and Parihara in Tehsil Ratangarh.
5. Village Sahwa in Tehsil Taranagar is the most populated (12,657) and Beer Rajgarh in Tehsil Rajgarh is the least populated (2) village
6. The economy of the district mainly depends on agriculture.
7. The district has recorded 50% work participation rate for male workers.
8. Rajgarh Tehsil has the highest number of villages (215) and Dungargarh has the lowest number of villages (97).
9. In the district, Momasar village of Tehsil Dungargarh has the largest area (11,147.0 hectare) and in Dhani Doongarsinghpura of Tehsil Churu is the smallest area (6.0 hectare).
10. Churu is the 3rd lowest district in terms of proportion of ST population is 0.5 (10,063) among the 32 districts of the state.
11. Churu district is a part of Thar desert.
12. The district headquarter Churu, has a vast variation in its temperature, in summar season temperature goes upto 49°C, whereas in winter season it dips upto -1°C.

Analytical Note

(i) History and scope of the District Census Handbook

The series of District Census Handbooks has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several new innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Numbers (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from 1 to N. Each village has been assigned an eight digit code. The first six digits represent the code of the village as existing at the present census. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the Permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001, are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

The responses for almost all the questions in the Houselisting Schedule had pre-coded options. This not only helped the enumerators to record the response easily but at a later stage would hopefully facilitate quicker data processing. Apart from the improvements made in the format of the Houselisting Schedule, the scope of Houselisting was considerably expanded with the inclusion of new questions based on requirements of various data users and planners. The new features of the Houselisting Schedule are listed below.

- For the first time, different uses of census houses have been standardized and grouped into ten main uses and assigned code numbers.
- Plastic has been added in the list of material of wall and roof of a census house, as it is often used for shelter in slums and shanties.
- In the previous census, the location of drinking water source was categorized into two locations viz. 'within premises' and 'outside premises'. In the Census of India, 2001, the source 'outside premises' was split into two categories namely 'near the premises' and 'away from the premises'.
- The scope of question of availability of electricity was expanded to include six sources of lighting. Besides no lighting, this included sources like electricity, kerosene, solar, other oil and any other source.
- In 1991 Census, a question on availability of toilet facilities to the household was canvassed while in Census of India, 2001, specific information on availability of latrine within the house by the type of latrine was sought.

In addition to expending the scope of the questions canvassed during the Houselisting Operations in the 1991 Census, the following new questions were added in the Houselist Schedule for Normal Households at the Census of India, 2001.

- If the Census house was used for residential or partly residential purposes, the condition of the census house was categorized as good, livable or dilapidated based on the perception and response of the respondent.
- A question on number of married couple(s) living in the household was canvassed.
- Information was sought on the number of married couple(s) having independent room for sleeping.

- Information as to whether the waste-water outlet of the house is connected to 'closed drainage' or 'open drainage' or has not drainage was collected.
- A question on availability of bathroom within the house was included.
- Information on availability of kitchen within the house was also sought.
- Availability of certain assets to the households namely radio/transistor, television, telephone, bicycle, scooter/motor cycle/moped, car/jeep/van were also included.
- It was also enquired whether any banking service was being availed by the household.

The Household Schedule adopted for the Population Enumeration also primarily had pre-coded options for majority of the questions. The questions for each data item were made as self-explanatory as far as possible for easy understanding. The comprehensive Household Schedule had three parts and two sides A and B. Part I contains the Location Particulars; Part II relates to Individual Particulars and Part III contains questions for Household engaged in Cultivation/Plantation. To facilitate quick tabulation for bringing out Provisional Population Totals, provisions of page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates and workers and their categories by sex. Most of the questions canvassed during the 1991 Census, were retained for the 2001 Census, except the question on ex-serviceman, which was dropped during the Census of India, 2001. However, a number of new questions were added in the Household Schedule in view of the suggestions from policy makers, data users and researchers, while the scope of certain existing questions was enhanced.

These modifications are:

- Age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.
- The type of educational institution attended by a person was enlarged to include school, college, vocational institute, other institute and literacy center.
- The scope of the definition of 'work' was expanded in the Census of India, 2001, to include production of milk for domestic consumption. In the 1991 Census, cultivation of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India, 2001.
- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India, 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census is dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census, is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected are- in seeing, in hearing, in speech, in movement and mental.

- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work is collected under this section.
- The Household Schedule has a new set of questions for Household engaged in cultivation/ plantation (i) Net area of land under cultivation/ plantation, (ii) Net area of land irrigated and (iii) Tenure status. This question was not canvassed at the 1991 Census but was canvassed in the 1981 Census in a slightly different form.
- The signature or thump impression of the respondent has been taken on the Household Schedule for the first time in the history of Census. This was not only aimed at obtaining correct and complete information but also for giving an opportunity to the respondents to authenticate the information provided by them. The relationship of the respondent with the head of the household was also obtained. This new feature will pave way in carrying out a methodological study in future on the respondent profile in the census.

In 1981 Census, for the first time, an attempt was made in the series to bring out demographic and other data in diglot, Hindi and English, for a more beneficial use by data user of all categories. Hindi being the official language of the State, a Hindi version of the analytical notes was also added with a view to caters to the needs of all sections of readers. The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same.

As a necessary corollary to the Handbooks, Panchayat Samities, the basic administrative units of development, administration and planning, were listed out separately for the first time in 1981 Census in relation to those districts wherein they were not coterminous with their tehsils. As an additional attempt, informations relating to population figures as well as amenities available in each village located in the jurisdiction of each Panchayat Samiti were also presented in a separate volume under the title "Supplement to District Census Handbook". However, for reference in the main District Census Handbook, a list of villages forming part of each non-coterminous Panchayat Samiti was provided along with the abstracts of population and amenities for such Panchayat Samities as a whole in the form of Special Annexures.

In order to cater to the overall needs of the data-users and to facilitate the task of administrators and planners it has now been decided to present the Village Directory and Primary Census data at the Panchayat Samiti level instead of the traditional Tehsil level presentation. It is expected that the presentation of Village Directory and Primary Census Abstract data at Panchayat Samiti level will help the planners in formation of micro-level developmental plans, as the Panchayat Samiti is now the lowest administrative unit for development planning. However, for the convenience of the data users and for the sake of comparability of data at Tehsil level, the Primary Census Abstract has also been presented at the Tehsil/ Town level in the form of an Appendix.

A general note on each district covering information of general interest regarding its history, topography, physiography, administrative set-up and places of tourist and historic importance etc. has also been included with a view to provide comprehensive and more purposeful information about the district as a whole. Population figures of Scheduled Castes and Scheduled Tribes constituting the core of 'Weaker Section' have also been presented at district, panchayat samiti and town level so as to facilitate planning for their welfare both at micro and macro levels.

It is earnestly hoped that this publication will serve its purpose for planners and administrators of welfare schemes and other data users in general.

Prior to 1951, Census Reports were printed for the whole province/state. The idea of preparing the District Census Handbooks separately for each district was conceived during 1951 Census as a part of a plan intended to secure an effective method of preserving the Census data below the district level. The idea was that all the district census tables would be bound together in a single volume called the District Census Handbooks. Since then the District Census Handbooks are being published regularly.

The 1951 Census series of District Census Handbooks was printed in two parts. Part I contained five General Population Tables (A Series), three Economic Tables (B Series), five Household and Age Tables (C Series) and seven Social and Cultural Tables (D Series). In Part II of District Census Handbook "Primary Census Abstract and Village Directory" which showed the basic population figures for each village or town classified by livelihood classes, were included along with some information of general nature.

The 1961 Census series of District Census Handbooks were printed in single volume in which Primary Census Abstract upto village and town/ward level and Village Directory upto village level were given. Besides, some official statistics collected from various state departments, four General Population Tables (A Series), sixteen Economic and Household Tables (B Series), seven Social and Cultural Tables (C Series), four Housing Tables (E Series) and eight Special Tables for Scheduled Castes/Scheduled Tribes were also provided in District Census Handbooks. For the first time in 1961 Census the maps for the district and tehsil were also included in the District Census Handbooks.

In 1971 Census series of District Census Handbooks village-wise 'Village Directory' giving services, facilities or amenities available in the village was given. 'Town Directory' was introduced for the first time giving useful information in respect of every town of the district. Rural Primary Census Abstract upto village level and Urban Primary Census Abstract upto enumeration block level were given in District Census Handbooks. While the District, Tehsil and Town maps were included; the inclusion of Census Tables was dispensed with in the District Census Handbooks in 1971 Census.

The scope of 1981 series of District Census Handbooks was enlarged specially in relation to amenities and land-use pattern. Apart from new items like uses of electricity, details of communication points, information for which was not collected in 1971 Census, a note on each district covering general information on its history, topography, flora, fauna and administrative set up etc. was also added. The format of the Primary Census Abstract was also restructured in the light of changes in economic and other questions canvassed in the 1981 Census but at the same time, all efforts were made to retain comparability with 1971 Census data. The inclusion of Special Primary Census Abstract for Scheduled Castes and Tribes at the Tehsil/Town level was another innovation introduced in 1981 Census series.

The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same as followed in 1981. However, the format of Primary Census Abstract was restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group was included in Primary Census Abstract for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate at the time of the 1991 Census.

One of the most important innovations in the 1991 Census was the Panchayat Samiti level presentation of data in the Village Directory and Primary Census Abstract instead of the traditional Tehsil level presentation.

Deviating from 1991 Census, like 1981 Census four fold industrial classification of main and marginal workers has been presented in 2001 as against nine fold given in 1991.

The mode of presentation of DCHB in 2001 will by and large be same as that of in 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc. pertaining to 1991 Census of the respective district in the DCHB in the form of Annexures II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

(ii) Brief History of the District

The ancient Jangal Pradesh & part of princely state of Bikaner, Churu lies in the heart of sand dunes of the Thar Desert. In princely times Churu was divided into two Nizamats-Sujangarh and Reni. It is

believed to have derived its district headquarter name after its founder, a Jat named as "Churu" who perhaps founded it around 1620 A.D. Churu district came under Bikaner Division, and since 1977 it possess an independent parliamentary constituency. It is located in North of Rajasthan.

(iii) Administrative Set-up

Churu district was constituted in 1949 A.D. It was further reconstituted in three sub divisions, after its constitution, which are as under:

Sl. No.	Sub-Division	Tehsil	Municipalities	Panchayat Samiti
1	Churu	1. Churu	1. Churu	1. Churu
		-	2. Ratannagar	-
		2. Sardarshahar	3. Sardarshahar	2. Sardarshahar
2	Rajgarh	3. Rajgarh	4. Rajgarh	3. Rajgarh
		4. Taranagar	5. Taranagar	4. Taranagar
3	Ratangarh	5. Ratangarh	6. Ratangarh	5. Ratangarh
		-	7. Rajaldesar	-
		6. Dungargarh	8. Dungargarh	6. Dungargarh
		7. Sujangarh	9. Sujangarh	7. Sujangarh
			10. Chhapar	
			11. Bhadesar	

After the creation of district, in 1949, No any new Tehsil, Panchayat Samiti or Sub-division has been created, although some Sub-Tehsils have been created. At present, Sidhhmukh in Rajgarh, Bhanipura in Sardarshahar and Bidasar in Sujangarh are functioning as Sub-Tehsils.

During the decade 1991-2001, the State Government has made certain geographical changes in the district. Sub-Division Ratangarh's Tehsil Dungargarh of the district was transferred in Bikaner district but this territorial change was affected w.e.f. 1.4.2001, hence for the purpose of census, Dungargarh Tehsil is treated as part of the Churu district.

Under democratic decentralization, there are one Zila Parishad, and seven Panchayat Samities are functioning in the district. The Chairman of Zila Parishad is working as Zila Pramukh and Pradhan of Panchayat Samiti. To accelerate developmental activities, Zila Gramin Vikas Abhikaran is working. Zila Pramukh is the Chairman of this Abhikaran (Agency) and District Collector is the Ex-Officio District Development Officer. The Project Director of this Abhikaran, is also working as Ex-officio Chief Executive Officer. For the disposal of Zila Parishad work an additional Chief Executive Officer has been appointed whereas in Panchayat Samities the work is being executed by Development Officer.

In Judicial administration, a District & Session Court is established. Beside this an Additional District & Session Judge, Chief Judicial Magistrate & Civil Judge (Ka-Kha) are also functioning in the District Headquarter. At Rajgarh headquarter an Upper Chief Judicial Magistrate & Civil Judge (Ka-Kha) Courts are functioning. There are Civil Judges (Ka-Kha) functioning at Sardarshahar, Taranagar, Dungargarh, Ratangarh & Sujangarh. A Consumer Forum is also functioning at district headquarter.

In Police Administration, Superintendent of Police and one Additional Superintendent of Police are posted in the District Headquarter. Circle offices are functioning at Churu, Rajgarh, Ratangarh and Sujangarh under Deputy Superintendent of Police. In the District, 16 police stations and 15 police chowkis are established. The district comes under the Deputy Inspector General of Police Bikaner Range.

There are 11 municipalities, (including district headquarter). 279 Gram Panchayats & 979 villages in the district. Tehsilwise details is given below:

Sl. No.	Tehsil	Panchayat Samiti	Gram Panchayat	Villages	
				In-habited	Un-inhabited
1	Churu	Churu	35	105	1
2	Sardarshahar	Sardarshahar	48	170	14
3	Rajgarh	Rajgarh	55	213	2
4	Taranagar	Taranagar	28	110	11
5	Ratangarh	Ratangarh	32	101	-
6	Dungargarh	Dungargarh	30	92	5
7	Sujangarh	Sujangarh	51	155	-
	Total		**279**	**946**	**33**

(iv) Physical Features

(1) Location and Size

Churu district lies in the north-east of Rajasthan State at an attitude of 286.207 metres above the mean sea level between 27°24' to 29°00' north latitude and 73°40' to 75°41' east longitude. It is bounded by Hanumangarh in north, Bikaner in west, Nagaur in south and Sikar, Jhunjhunun districts and boundaries of Haryana State in the east.

The total area of Churu district consists of 16,830 sq.kms., which is 5 per cent of the area of Rajasthan

and comes 6th place of the state. It is second bigger district in Bikaner division. The district is extended up to 150 kms in east to west and 120 kms in north to south. The district headquarter Churu is situated in the southeast boundary of the district, from which 10 kms southeast the boundary of Jhunjhunun district is situated. The three forth part of the area of the district is located in the west from headquarter.

(2) Physiography

Churu district is part of Thar Desert sand dunes ranging from 6 to 30 meters high are found here, which are located at Dungargarh, Ratangarh, Sardarshahar and Churu tehsils. The district can be divided into three divisions for psysiography purpose.

(a) Desert Area: Complete part of Dungargarh and Sardarshahar & major part of Churu and Ratangarh Tehsil comes under this region.

(b) Plains of Matiyars: This region consists of complete area of Rajgarh and Taranagar tehsils and northeast part of Churu tehsil.

(c) Taal Area: This region consists of complete area of Sujangarh Tehsil and southeast part of Ratangarh Tehsil.

The district has no hilly or rocky area. There is no river or stream, which flow throughout year. River Katli is the only river, which starts from Triveni of Jaipur district and passing through Khardela hills of Sikar district, Udaipurwati-Gudha area of Jhunjhunun district and ends at Rajgarh tehsil of the district. At padihara of Ratangarh tehsil and Taal-Chhapar area of Sujangarh are pond area, where rainy water is found.

In this desert district, some rocks of volcanic categories are found, for which Randhisar, Gopalpura, Doongras and Lodhasar are important. Concrete is being supplied from Randhisar hills to Bikaner division for construction of roads and buildings.

Due to the geography, topography nature and location, the district headquarters Churu is having a vast variation in its temperature. In summer season temperature goes as high as 49°C, whereas in winter season it is declines up to -1°C.

(3) Water Resources

The district depends on rainy water and ground water for drinking water and irrigation. In rural areas, water is being stored traditionally in "Tankas" and is being used for drinking. Beside this, the whole district depends on ground water for drinking, which is used through wells and tube-wells.

The drinking water is supplied through Gandheli-Sahaba Water Supply Scheme by Rawatsar branch of Indira Gandhi Canal Project. Through this scheme drinking water is being provided in two towns and 124 villages. "Apni Yojana" which is a part of Indira Gandhi Canal Project is in progress at present. This significant scheme of 645 crores starts from Dhannasar village of Hanumangarh district and drinking water facilities will be provided to the districts Hanumangarh, Churu and Jhunjhunun. This project is financially supported by German Government. In the first phase of the scheme three tehsils of Churu district viz. Taranagar, Sardarshahar and Rajgarh will be provided drinking water facility. In second phase other tehsils of the district will be benefited. On the completion of this project people as well as cattle will be provided with safe drinking water in place of salty water, which they are compelled to use since many years.

(4) Climate

The climate of Churu district is dry with scanty rainfall. Temperature of the district is not constant. In summer season average temperature is vary from 37.54 to 24.94°C and in winter season the temperature is vary from 29.05 to 9.15°C. The maximum temperature is 49°C and minimum temperature comes one degree below to freezing point. In the months of may-June western hot winds blows. Western and southern-western winds generally blow in rest of the period. The July-September is Monsoon season. In the month of May-June sandy winds are affecting road and rail traffic for some time's cold northern winds blow in December-January months. Frost is common in the nights of January.

The rainfall in the district is very low. Rainfall takes place here in the month of July-September due to south-west monsoon. In the month of May-June,

sometimes pre-monsoon also tooks place. In winter season some rainfall takes place due to Cyclone from the Bay of Bengal. The average annual rainfall in the district is 378 mm. In last decade average annual rainfall in the district was recorded as under:

Year	Rainfall (in mm)
1991	262
1992	450
1993	338
1994	362
1995	485
1996	421
1997	542
1998	460
1999	224
2000	240

(5) Natural economic resources

Soil

Being a desert district, Sandy soil is found here in plenty of quantity, but Domat, Chikni & Kshareeya Soil are also found here. Sandy soil is found in Dungargarh, Sardar Shahar, Churu, Ratangarh and Sujangarh. Domat soil is found in Rajgarh and Taranagar. In some areas of Sujangarh Kshareeya soil is found.

Geology and Minerals

The geology of the district is obscured by the wind blown sand. The Delhi Super Group of rocks is represented by Ajabgarh group covering phyllite, slate and quartzite and is exposed near Dungras, Gopalpura, Challu and Biramsar. The later Malani ingenious suite is mainly represented by an effusive phase comprising of rhyolites and volcanic tuffs is exposed in Ranidsar hill and in the hill south of Lodasar.

Churu is not rich in minerals. While small isolated patches of gypsum are seen at several places around Takhatgarh, its occurrence near Been Bhalan, Bhanin, Deogarhia and Sathon are also promising. Halite was intercepted at 553 m. at Lakhasar while efflorescence of saltpetre (potassium nitrate) is found on the soil in some places in Rajgarh tehsil. Ground water in greater part of the district is saline.

Sand stone slate and quartzite are quarried at Bidasar, Biramsar, Dungars and Gopalpura. Due to lack of transportation facilities these are generally used locally for construction purposes. Rhyolite is extensively quarried from Ramjisar hill for use both as road construction and building material. Magnesium and limestone are found in Sujangarh, Dungargarh, Rajgarh and Churu tehsils in small deposits and are used locally. The prime mineral of the district is limestone. The other minerals quarried in the district are brick-sand and masonry stone.

Forest, Flora and Fauna

There is no forest as such, there are some grass reserves. Non-availability of adequate water is the main obstacle in the implementation of afforestation schemes. Afforestation on the Banjar land of the district is being carried out by the forest department. The plants so grown under afforestation scheme do not live long, due to the scarcity of water. Of the total 81.56 sq.km of forests 7.19 sq. km were reserved forests whereas the protected forests were 31.78 sq. km and the rest of the 47.207 sq. km can be called unclassified forests.

Important trees found in the district are – Prosopis spicigera (Khejra), Acacia nilotica (Kikar), Azadirachte indica (Neem), Balanites rox burghil (Hingota), Capparis Aphylla (Ker), Dalbergia Sisoo (Shisham), Salvadora oleoides (Jal-Pilu), Salvadora persica (Jal Khera) and Tecomela undulata (Rohira). Important shrubs of the area which deserve mention are Arehna tomentosa (Bhui), Argemone mexicane (Kut Kartalia), Calligonum polygonoides (Phog), Calotropis procera (Aak), Crotoleria burhia (Senia), Euphoriba royleana (Thor), Laptadenia spartium (Kheenp), Lycium europoeum (Morali) and Zizyphus mauritiana (Ber). Several types of grasses are found in this region viz. Cenchrus catharticus (Bhurat), Lasiurus sindicus (Sewan), Cymbopogon Jwarincosa (Bura), Aristida mutica (Lampra), Saccharum griffithii (Kucha) and Panicum turgidum (Murat).

Fox (Vulpas Leucopus), common hare (Lepus Ruficaudatus), Jackal (Canis Aureus), Porcupine (Hystrise Cristata indica), bats (Megalderma lyra) and phino poma (hard wichi) and bush rats (Gebil) are the common fauna found in the district. The birds commonly found are Bulbul (Molpastes cafer), owl (Bubobuo), kite (Milvus migrans), pigeon (columba livia), Sandgrouse (Pterocles excustus), grey partridge

(Francolinus pondicerianus), Godavan or Gurahu (Great Indian Bustard).

At Talchhapar there is a game sanctuary for preservation of black-buck (Kala Hiran).

Land use pattern

The total Geographical area of the district is 1,686,279 hectares according to revenue records and as per "Economic & Social Review Survey Report" during the year 1999-2000 of Churu district, the land use of total area of the district is classified as under:

Sl. No.	Classification of the land use	Area (in hectares)	Percentage to total area
1	Forest Area	8,156	0.48
2	Land put to non agricultural use	74,221	4.40
3	Barren & uncultivated land	59,885	3.55
4	Other uncultivated land excluding fallow land	332,602	19.72
5	Net area sown	1,211,415	71.85
	Total	**1,686,279**	**100.00**

Source: Office of the Collector (L.R.) Churu.

This district is entirely desert district. Rajgarh and Taranagar tehsils of the district are having plane land, whereas remaining five tehsils viz. Churu, Sardarshahar, Ratangarh, Dungargarh and Sujangarh having sand dunes area. According to land found in the district, Thick Grain & Cereals crops are suitable.

Crop pattern

The main crop of the district is kharif, which is wholly dependent on rain. The last three years i.e. 1998, 1999 & 2000 were draught years hence, the agriculture production of the district has been badly effected. The main production of kharif is Bajra, Moth, Moong, Guwar and Groundnut. Rabi crops containing Chana, Sarson, Wheat and Tarameera, which are produced in Rajgarh, Taranagar, Churu (partly) and Sardarshahar (partly) tehsils. According to Agriculture Department the sowed area with estimated production for kharif & rabi seasons for the year 1999-2000 is as under:

Sl. No.	Crop	Sowed (Seeded) Area	Production (in metric tonnes)
1	Bajra	407,278	48,243
2	Cereals (Moth, Moong Chola)	177,503	6,510
3	Gowar	593,674	21,658
4	Til	1,121	224
5	Groundnut	13,470	7,856
6	Wheat	23,878	31,624
7	Mustard	25,037	20,005
8	Gram	27,168	11,242

Source: Zila Sankhikiya Rooprekha-2001.

The Crop is mainly dependent on rain. Groundnut in kharif and Wheat, Mustard and Tarameera in rabi are irrigated crops. The main sources of irrigation are electrified wells and tube-wells. Irrigation in Rajgarh and Taranagar tehsils are being done by electric pump sets, whereas some tube-wells are found in some areas of Ratangarh and Dungargarh tehsils. According to Revenue Department, 5541 electrified wells and 387 tube-wells existed in the district in 1999-2000.

Tenancy

Tenancy in the State is governed by the Rajasthan Tenancy Act, 1955. It is one of the most important and progressive laws relating to agrarian reforms. The provisions of the Act apply in respect of land held by tenants as if the State Government were the land holder acting through the Tehsildars. In relation to the land held by him, every cultivator is either a tenant or a sub-tenant or an allottee or a trespasser. A tenant is one who is required to pay some rent on account of use and occupation of land let out to him for agricultural or allied purposes. Grantee with a favourable rate of rent, ijardar,thekedar or trespasser is not considered a tenant.

There are following classes of tenants:

a) Khatedar tenants,

b) Maliks,

c) Tenant of Khudkasht, and

d) Ghair-Khatedar tenants.

A Khatedar tenant is entitled to all the rights conferred and subject to all the liabilities imposed on Khatedar tenant by the Rajasthan Tenancy Act. On the date of coming into force of Rajasthan Tenancy Act, a Zamindar or a Biswedar holding Khudkasht was treated as a Khatedar tenant irrespective of whether he was or not in occupation on the date of vesting.

Malik is a Zamindar or Biswedar who has become Malik or Khudkasht land held by him on abolition of Zamindari and Biswedari in 1959. The word "Malik" was also added to section 14 of the Rajasthan Tenancy Act to classify it as a class of tenant. Section 13 of the Act provides that a Malik is entitled to all the rights conferred and is subject to all the liabilities imposed on Khatedar tenant and so

in substance this class of tenancy is nothing but a Khatedar tenant.

As Zamindars and Biswedars holding Khudkasht were treated as Khatedar tenants. A tenant of khudkasht is essentially a sub-tenant in view of the fact that a sub-tenant is also eligible for protection of his cultivatory rights even against Khatedar tenant. Every tenant of land other than a Khatedar tenant, a tenant of Khudkasht or a sub-tenant is a Ghair-Khatedar tenant.

A trespasser is a person who takes or retains possession of land without authority or who prevents another person from occupying land duly let out to him by the State. After regularisation, the trespasser becomes an allottee. An allottee is treated as a Ghair-Khatedar tenant on whom Sub-Divisional Officer shall suo-moto confer khatedari rights after ten years of allotment provided that the allottee fulfils all the terms and conditions of allotment during this period. Similar is the case of those allottees who were otherwise allotted land by the State Government.

Irrigation

Out of total 1,559,058 hectares of agriculture land, only 625 hectares are irrigated, which is only 4.02 per cent of total agriculture land. The main irrigated crops are wheat, mustard, tarameera and groundnut. The main sources of irrigation are electrified pump-sets and tube wells, which were found in the district in 1999-2000 as 5541 and 387 respectively. No irrigation is done through canal, ponds etc. Some villages of Rajgarh and Taranagar tehsils will be provided irrigation facility after completion of Sidhhmukh Project of Bhakhra Canal System and Sahiba Lift Canal of Indira Gandhi Canal Project.

Livestock (Cattle breeding)

Cattle's breeding is also a profession of most of population in the district beside agriculture. According to Cattle census of 1997, the district having livestock as follows:

S.No.	Name of Animal	Numbers
1	Cows	333,100
2	Buffaloes	211,009
3	Sheep	654,010
4	Goats	849,922
5	Camels	74,651
6	Horse & Ponnies	8,638
7	Pig	3,685
8	Poultry	21,423
	Total	**2,156,438**

The animals useful in agriculture are camel, ox and buffalo, which are used for ploughing and transportation work. In towns and cities horse, pony and ass are being used for local transport. Cows and buffaloes are main milk providing animals. Milk of goat is being used for domestic purpose. Sheep and Goat are fostering for wool and meat. Pigs are being fostered by poor people for meat. Cock and hen are being fostered for meat and eggs, in which hen and drake fostering are main. In 1997, the total numbers of cocks in the district was 10,573. There were 52 Veterinary Hospitals, 8 Dispensaries, One Veterinary Sub-Centre and 2 Mobile Treatment Units were functioning during the year 1999-2000.

Agricultural Implements and Machinery

According to livestock census 1997, there were 109,136 ploughs, 45,651 carts, 7 sugarcane crushers, 672 diesel engines, 2,622 electric pump sets, 3,606 tractors and 102 oil crushing units in the district.

Electricity

This district is having an important place in electric transmission. Two sub-stations of 220 KV Grid are working at Rajgarh and Ratangarh. In Ratangarh, a 400 KV grid sub-station is under construction, which will transmit the electricity produced by Suratgarh Thermal Power Station to Northern Grid. Beside this, 132, 66 and 33 KV grid stations are working at various places of the district. All towns, 914 villages and 7,616 wells/tube wells were electrified during the year 2000-2001.

Transport and Communication

In respect of Rail and Road Transportation, district can be counted as an advanced district. The main rail routes, which passing across district are – Delhi-Jodhpur, Jaipur-Bikaner, Jaipur-Sri Ganganagar. Three Railway Junctions are existing in the district namely – Ratangarh, Churu and Sadulpur. All tehsil headquarters except Taranagar are connected with rail route. All rail route are of meter gauge, change in broad gauge is expected.

In road route, two National Highways pass through the district. National Highway No.11 - Bikaner to Agra and National Highway No.65 - Jodhpur-Delhi are passing across the district. Besides it, State Highway No.6 is passing from Dungargarh-

Sardarshahar-Taranagar-Rajgarh and reaches Hisar, Highway No.7 runs from Sujangarh-Ratangarh, Sardarshahar and reach Hanumangarh. Highway No.20 runs through Nokha, Sandwa, Bidasar-Sujangarh-Salasar to Sikar, Highway No.13 runs through Rajgarh-Pilani and Highway No.64 runs through Taranagar-Sahwa-Nohar and Hanumangarh.

There are two Depots of Rajasthan Rajya Path Parivahan Nigam working at Churu and Sardarshahar. In the district 3,184 private Cars-Jeeps, 920 Buses, 1,576 Goods Carriers, 5,084 Tractors, 82 Taxies, 9,109 Two wheelers and 2,583 other vehicles were registered during the year 1999-2000. The total length of pucca roads was 2,990 kms in the district.

The district had two main post offices including 390 other post offices, 89 telegraph offices, 83 telephone exchanges, 1,093 letter boxes and 553 STD/ PCO during the year 1999-2000 and District Headquarters connected with Fax facility.

Trade and Commerce :

Churu district generally faces famine and drought. The bulk of population depends upon agriculture and animal husbandry. There is no big trade centre in the district. Mooth, Gwar, Gwar gum, Wool etc. are exported to other districts of the state and country. Deshi Ghee, Sheep and Goats also exported from the district. The main items which are imported Cloth, Medicine, Iron related articles, Cement etc. During the year 1999-2000, there were 17 Diesel Petrol Pumps in the district and 9 Cinema Houses were showing movies.

There were 147 shops of Indian and 27 shops of Indian made foreign liquor, 7 Bhang shops and 16 other (hemp drugs, lanced poppy heads) in the district during the year 1999-2000.

Industry

Churu district is industrially backward. Large scale or medium scale industries are non-existent, here only small-scale industries are functioning. There were 114 registered factories in the district in the year 2000. The Rajasthan Industrial and Investment Corporation the agency responsible for the industrial development in the state has developed six industrial areas at Churu, Rajgarh, Sardarshahar, Sujangarh, Dungargarh and Sadulpur.

Gram Panchayats composition and its role

The system of Panchayati Raj was inaugurated on 2nd October 1959 in Nagaur district by than Prime Minister Late Shri Jawahar Lal Nehru. Late Shri Balwant Rai Mehta proposed the recommendation for Panchayati Raj. There are three levels of Panchayati Raj:

(1) Gram Panchayat (Village level)

(2) Panchayat Samiti (Block level)

(3) Zila Parishad (District level)

Gram Panchayat is an important institution of self-government. The institution is set for a village or village agglomeration. A Gram Panchayat is created on 2,000-8,000 population. It covers a maximum area of 6 miles. The villages, which have population below 2,000, are merged with the other villages to create a Gram Panchayat. Their tenure is of 5 years.

A Gram Panchayat consist 5 to 20 members. The Head of the Panchayat is called Sarpanch. Panch and Up-Sarpanchs are also elected. It includes a member belongs to backward class and a lady member. There are 279 Gram Panchayats in the district.

The main objectives of Gram Panchayat are to arrange the primary education, sanitation of public places, drinking water and light. It manages also the adult education, livestock and repairing of wells.

During the past years, Gram Panchayats performed several important jobs like *Kam Ke Badley Anaj*, Construction of Panchayat Ghar, School buildings, roads and tanks. It also organizes the cattle fare. Gram Panchayat plays an important role in the development of village and its economy.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-

residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted

for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq.km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b)(ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and /or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1. Adi Dharmi
2. Aheri
3. Badi
4. Bagri, Bagdi
5. Bairwa, Berwa
6. Bajgar
7. Balai
8. Bansphor, Bansphod
9. Baori
10. Bargi, Vargi, Birgi

11. Bawaria
12. Bedia, Beria
13. Bhand
14. Bhangi, Chura, Mehtar, Olgana, Rukhi Malkana, Halalkhor, Lalbegi, Balmiki, Valmiki, Korar, Zadmalli
15. Bidakia
16. Bola

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language

spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops-tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age

span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which

they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA/town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding – Population, its distribution

According to the 2001 census, the total population of Churu district is 1,923,878 comprising 987,781 males and 936,097 females and constituting 3.4 percent of State population and area spread over 4.9 per cent in the 7 tehsils of the district, Sujangarh tehsil is most populous tehsil having population 385,069 while Taranagar is the smallest tehsils having a population of 178,072 persons. Other tehsils in order of their population size are Rajgarh (319,043), Sardarshahar (304,373), Churu (265,070), Dungargarh (227,839) and Ratangarh (224,412).

Out of the total population of the district 72.1 per cent lives in rural areas while 27.9 per cent lives in urban areas. The corresponding proportions in rural and urban areas of the State are 76.6 per cent and 23.4 per cent respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF TEHSILS BY RESIDENCE, 1991-2001

Sl. No.	Tehsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Taranagar	145,580	124,103	21,477	178,072	151,006	27,066	22.3	21.7	26.0	14.8	15.2
2	Rajgarh	265,067	221,371	43,696	319,043	267,403	51,640	20.4	20.8	18.2	16.5	16.2
3	Sardarshahar	242,913	174,959	67,954	304,373	222,979	81,394	25.3	27.4	19.8	28.0	26.7
4	Churu	215,490	123,292	92,198	265,070	152,178	112,892	23.0	23.4	22.4	42.8	42.6
5	Dungargarh	170,061	133,598	36,463	227,839	182,819	45,020	34.0	36.8	23.5	21.4	19.8
6	Ratangarh	200,064	125,447	74,617	244,412	158,090	86,322	22.2	26.0	15.7	37.3	35.3
7	Sujangarh	304,036	194,402	109,634	385,069	253,207	131,862	26.7	30.2	20.3	36.1	34.2
District Total		**1,543,211**	**1,097,172**	**446,039**	**1,923,878**	**1,387,682**	**536,196**	**24.7**	**26.5**	**20.2**	**28.9**	**27.9**

The district has registered a percentage decadal variation of 24.7 during the decade 1991-2001. The rural areas of the district has attained a higher decadal variation of 26.5 per cent as compared to that of urban area at 20.2 per cent. At tehsil level, it varies from the lowest of 20.4 per cent in Rajgarh tehsil to a maximum of 34.0 per cent in Dungargarh tehsil in total areas.There is a decline in the percentage of urban population to total population from 28.9 in 1991 to 27.9 in 2001.

All the tehsils have registered the same trend as that of district whose percentage of urban population has declined from 1991 to 2001 except in Taranagar tehsil where it has increased from 14.8 per cent in 1991 to 15.2 per cent in 2001.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Sl. No.	District/Panchayat Samiti	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females

Of the total 979 villages, 946 are inhabited villages. Rajgarh Panchayat Samiti has the highest number of villages i.e. 213 where as Dungargarh Panchayat Samiti with lowest of 92 villages. Again, Rajgarh Panchayat Samiti is the most populous with 267,403 persons while Taranagar is the least populous Panchayat Samiti with a population of 151,006 persons. The maximum number of villages i.e. 321 are those which lie in the population range of 1,000-1,999. It is followed by 25.1 per cent of the inhabited villages, which have population range of 500-999. As regards to large size villages in the district, 15 are such which lie in the population range of 5,000-9,999 and 3 are such which have population more than 10,000. In case of small size villages i.e. having population less than 500, such villages are 170 in number in the district.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

		Name of Towns
(a)	**New**	
	(i) Statutory town	Nil
	(ii) Census town	Nil
(b)	**Denotified**	
	(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
	(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
	(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c)	**Declassified***	Nil
(d)	**Wholly merged with other town (s)**	Nil

* Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

No new town has emerged, nor denotified and declassified.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	21	2.2	1,341	0.1
11-20	11	1.2	2,342	0.2
21-50	130	13.7	123,854	8.9
51-100	399	42.2	575,750	41.5
101-200	333	35.2	587,813	42.4
201-300	39	4.1	75,596	5.4
301-500	12	1.3	19,982	1.4
501 +	1	0.1	1,004	0.1
Not known	0	0.0	0	0.0
District Total	**946**	**100.0**	**1,387,682**	**100.0**
Population Density (Rural) of the district:		83		

The density of population of the rural areas of the district is 83. Of the total number of inhabited villages i.e. 946 in the district, 42.2 per cent have population density ranging from 51 to 100, followed by 35.2 per cent in the range of 101-200. Apart from these 162 villages have population density upto 50.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	905	898	947	932	899	1,060
1911	908	904	936	922	889	1,058
1921	896	896	897	926	887	1,027
1931	907	906	903	924	892	1,000
1941	906	907	897	908	901	923
1951	921	919	928	939	902	1,011
1961	908	913	882	938	917	985
1971	911	919	875	946	935	973
1981	919	930	877	954	956	948
1991	910	919	879	937	942	925
2001	**921**	**930**	**890**	**948**	**953**	**935**

Note: Sex ratio has been defined here as the number of females per 1000 males.

The district has witnessed a fluctuating trend in sex ratio since 1901. From 932 in 1901 it declined to 922 in 1911. It again increased to 926 in 1921 and declined to 924 in 1931 and so forth. During the last decade i.e. 1991-2001 it has increased from 937 in 1991 to 948 in 2001.

In comparison to rural areas of the district the sex ratio in urban areas has been higher upto 1971 and favouring females except in 1951 and 1971. From 1981 to 2001, the sex ratio in rural areas has been higher than that of in urban areas. The district has always registered higher sex ratio as compared to that of state since 1901 to 2001.

TABLE 6 : SEX RATIO BY TEHSILS, 2001

Sl. No.	Name of Tehsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Taranagar	939	940	935
2	Rajgarh	929	933	906
3	Sardarshahar	944	953	920
4	Churu	945	959	926
5	Dungargarh	948	947	954
6	Ratangarh	966	975	950
7	Sujangarh	961	968	948
	District Total	**948**	**953**	**935**

The district has registered a sex ratio of 948 in 2001. Where as for rural and urban areas it is 953 and 935 respectively. At the tehsil level, the highest sex ratio of 966 has been registered by Ratangarh tehsil and the lowest of 929 by Rajgarh tehsil for total and rural areas. In case of urban areas the highest sex ratio of 954 has been attained by Dungargarh tehsil and the lowest of 906 by Rajgarh tehsil.

TABLE 7 : SEX RATIO BY PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Sex ratio
1	2	3
1	Taranagar	940
2	Rajgarh	933
3	Sardarshahar	953
4	Churu	959
5	Dungargarh	947
6	Ratangarh	975
7	Sujangarh	968
	District (Rural) Total	**953**

At the Panchayat Samiti the pattern is just the same as analyzed for rural areas of tehsil in Table 6 because all the Panchayat Samities are co-terminus with their respective tehsils.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	10	1.1	317	0
700-749	3	0.3	681	0
750-799	12	1.3	5,439	0
800-849	29	3.1	20,872	2
850-899	120	12.7	148,139	11
900-949	286	30.2	495,360	36
950-999	278	29.4	468,596	34
1000-1099	176	18.6	226,050	16
1100+	32	3.4	22,228	2
District Total	**946**	**100.0**	**1,387,682**	**100**
Sex ratio (Rural) for District			953	

Of the total number of inhabited villages (946), the maximum number of 286 villages have sex ratio ranging from 900 to 949 followed by 278 (29.4 per cent) having sex ratio in the range 950-999. It is significant to note that 208 villages are such which have sex ratio favourable to female's i.e. 1,000 or more in the district.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Sl. No.	Name of U.A.^/ Town+*	Urban status of town	Sex ratio
1	2	3	4

		Urban	**95,538**	**50,126**	**45,412**	**906**

The district has registered a sex ratio in the population of the age group 0-6 of 911, 913 and 906 for the total, rural and urban areas respectively. In rural areas at tehsil level, the highest sex ratio of 937 has been registered by Sardarshahar tehsil and the lowest of 883 by Rajgarh tehsil. Similarly in the urban areas of tehsils, the highest sex ratio has been registered by Dungargarh tehsil at 1005 and the lowest by Rajgarh tehsil at 833.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Taranagar	28,989	15,132	13,857	916
2	Rajgarh	48,536	25,780	22,756	883
3	Sardarshahar	49,073	25,335	23,738	937
4	Churu	30,213	15,969	14,244	892
5	Dungargarh	43,153	22,330	20,823	933
6	Ratangarh	33,556	17,672	15,884	899
7	Sujangarh	54,856	28,528	26,328	923
	District (Rural) Total	**288,376**	**150,746**	**137,630**	**913**

At the P.S. level the pattern of Sex ratio in the age group 0-6 is just the same as analyzed for rural areas of tehsils in Table 10 as all the Panchayat Samities are co-terminus with their respective tehsils.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	67	7.1	5,841	2.0
700-749	31	3.3	6,171	2.1
750-799	76	8.0	19,930	6.9

1100+	94	9.9	14,503	5.0
District (Rural) Total	**946**	**100.0**	**288,376**	**100.0**
Sex ratio (Rural) for District		913		

Of the total inhabited villages (946) of the district 46.2 per cent are such which have sex ratio below 900. Even among them 67 and 31 villages have sex ratio less than 700 and 700 to 749 respectively. It is significant to note that more than one fourth (25.1 per cent) of the total inhabited villages have sex ratios favouring females i.e. 1,000 or more. Among them 94 villages have sex ratios even more than 1,100.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS /TOWNS, 2001

		Rural	253,207	74,400	280	29.4	0.1
		Urban	131,862	22,578	194	17.1	0.1
	District Total	**Total**	**1,923,878**	**407,207**	**10,063**	**21.2**	**0.5**
		Rural	**1,387,682**	**337,733**	**6,203**	**24.3**	**0.4**
		Urban	**536,196**	**69,474**	**3,860**	**13.0**	**0.7**

The proportion of scheduled castes and scheduled tribes population to the total population of the district is found to be 21.2 per cent and 0.5 per cent respectively. For rural areas the respective proportions for scheduled castes and scheduled tribes comes out to be 24.3 per cent and 0.4 per cent. Similarly in urban areas of the district the percentage of scheduled castes population and the scheduled tribes population to the total population is found to be 13.0 and 0.7 respectively.

At tehsil level, the proportion of scheduled castes to total population varies for 25.2 per cent in Sujangarh tehsil to 17.8 per cent in Churu tehsil. In case of scheduled tribes this proportion varies from 1.2 per cent in Rajgarh tehsil to 0.1 per cent in Dungargarh and Sujangarh tehsils respectively.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN PANCHAYAT SAMITIES, 2001

More than half of the rural population consists of workers i.e. 50.9 per cent. There is not much difference in the work participation rates of males and females being 52.0 per cent and 49.7 per cent respectively for the rural areas of the district. Like at tehsil level, at Panchayat Samiti level too, the highest percentage of male and female workers has been recorded in Dungargarh Panchayat Samiti at 59.8 and 60.0 respectively. However, the lowest percentages have been registered by Sujangarh Panchayat Samiti at 48.4 and 43.4 respectively for males and females.

\+ To be arranged in alphabetical order.

^ The names of constituent units of U.A. are given separately.

* In case of the towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

In contrast to the rural areas of the district only 27.6 per cent of the urban population are as workers (main + marginal). Apart from this much variation is also seen in the percentage of male and female workers, which are 44.9 and 9.1 respectively. Among the towns, the percentage of workers varies from 34.1 in Taranagar (M) to 24.8 in Churu (M).

Note: Percentage of workers to total workers are given in brackets.

Cultivators are the main working force in the district as they form 72.4 per cent of total workers. It is followed by other workers (20.8 per cent), agricultural labourers (4.5 per cent) etc. Females (315,400) outnumber males (302,953) as cultivators. Much variations in the percentages of male workers (31.6) and female workers (5.9) classified as other workers is seen in the district.

At tehsil level, the percentage of cultivators to total workers varies from 81.5 in Rajgarh tehsil followed by 81.2 in Dungargarh tehsil to 61.1 in Sujangarh tehsil. For Household Industry workers, it varies from 3.2 per cent in Churu tehsil to 1.0 per cent in Rajgarh tehsil. In case of 'other workers' the highest percentage of 30.8 has been registered by Churu tehsil while the lowest of 12.0 per cent in Dungargarh tehsil.

Note: Percentage of workers to total workers are given in brackets.

More than half i.e. 50.9 per cent of the total rural population of the district is engaged in economic activities being workers. Of the total workers, most are engaged in agricultural activities i.e. 84.6 per cent

are as cultivators and 5.0 per cent as agricultural labourers. Only 1.2 per cent of the workers are engaged in household industries whereas the significantly 9.2 per cent in other works.

Almost similar trend has been observed in all the panchayat samities except in Dungargarh panchayat samiti where percentage of other workers is lower than that of workers engaged as agricultural labourers.

Sex wise, percentage of male workers is higher in all the four economic categories except cultivators where their percentage is 78.7 as compared to that of females at 91.0 at the district level.

Note: Percentage of workers to total workers are given in brackets.

\+ To be arranged in alphabetical order.

^ The names of constituent units of U.A. are given separately.

* In case of the towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

The percentage of workers to total population of urban areas is significantly quite low being only 27.6 per cent as compared to that of rural areas of the district being 50.9 per cent. Here too, the percentage of workers engaged in four economic categories is just the reverse as compared to rural workers where majority i.e. 76.0 per cent of the total urban workers are as 'other workers' followed by 14.4 and 7.1 per

cent as cultivators and household industry workers respectively.

Almost similar trend is visible in all the municipal towns except in Churu (M), Sardarshahar (M), and Sujangarh (M) where the percentage of household industry workers is higher than that of agricultural labourers and cultivators.

Sex wise percentage of male workers as other workers is almost double than that of female other workers being 82.7 and 41.1 per cent respectively. On the other hand, percentage of female cultivators (39.3 per cent) is much higher than that of male cultivator's (9.6) at the district level for urban areas.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total (946) inhabited villages, 909 (96.1 per cent) have educational facilities. In case of medical amenities only 44.7 per cent of inhabited villages have such amenities. A significant number i.e. 699 (73.9 per cent) villages have improved drinking water amenities. In the communication field only 37.1 per cent of villages have post office facilities while 56.6 per cent have telephone facilities. In the banking field the picture is gloomy as only 76 (8.0 per cent) villages have banks. More than 60 per cent villages i.e. (573) are linked with pucca approach roads whereas 92.8 per cent have power supply.

At Panchayat samiti level, Rajgarh and Churu Panchayat Samiti each have the higher percentage i.e. 98.1 of villages having educational facilities. For medical amenities it is Ratangarh Panchayat Samiti, which have highest percentage of 65.3. Much variation is seen among the Panchayat Samiti having telephone facilities. Ratangarh Panchayat Samiti has the highest percentage of villages i.e. 93.1, which have telephone facilities whereas Sardarshahar has the minimum percentage of 42.4 for such facility. Churu Panchayat Samiti has the distinction of cent percent villages having power supply.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Almost entire (99.1 per cent) rural population of the district is being served by educational amenities. It varies from 99.9 per cent in Dungargarh Panchayat Samiti to 98.3 per cent in Sardarshahar Panchayat Samiti. The highest percentage (85.9) of population availing medical amenities has been found in Ratangarh Panchayat Samiti while lowest of 47.6 in Sardarshahar Panchayat Samiti. Ratangarh Panchayat Samiti at the top where 93.0 per cent of the population has access to improved drinking water while again Sardarshahar Panchayat Samiti is at the bottom with 52.5 per cent. Ratangarh Panchayat Samiti is in the forefront in the field by telephone facilities where 98.0 per cent of the population has been served by this facility while yet again Sardarshahar Panchayat Samiti is at bottom with 54.2 per cent. Only 21.0 per cent of the rural population is being served with banking facilities whereas 96.8 per cent have access to power supply. Hundred percent of the population of Churu Panchayat Samiti is being served with power supply.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Of the total inhabited village's (946), majority (321) of them have population range of 1,000-1,999. It is followed by 237 villages in the range of 500-999. There are 15 and 3 such villages, which have population range of 5,000-9,999 and 10,000+ respectively.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of Panchayat Samiti	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Taranagar	110	172,194	93.4	0.0
2	Rajgarh	213	216,926	89.1	9.2
3	Sardarshahar	170	374,145	91.4	1.0
4	Churu	105	155,481	89.1	3.0
5	Dungargarh	92	290,909	89.3	3.7
6	Ratangarh	101	163,910	93.1	2.3
7	Sujangarh	155	257,686	91.2	3.1
	District Total	**946**	**1,631,251**	**90.8**	**3.1**

Note : Cultivable area = irrigated area + unirrigated area

Of the total rural area of the district (of inhabited villages) 90.8 per cent is cultivable. Apart from this only 3.1 per cent of the total cultivable area is being irrigated. At the panchayat samiti level the highest percentage of cultivable area to total area is found at 93.4 per cent in Taranagar Panchayat Samiti followed by 93.1 per cent in Ratangarh and the lowest of 89.1 per cent each in Rajgarh and Churu Panchayat Samities. As regards to irrigated area, the highest percentage of 9.2 is found in Rajgarh Panchayat Samiti whereas '0' in Taranagar Panchayat Samiti.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Data Source : Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets".

Of the total households (294,471) of the district, majority i.e. 284,951 (96.8 per cent) are living in their owned houses whereas only 7,030 households (2.4 per cent) have rented houses. In the owned category, the median number of rooms a household possess is 3 while in case of rented it is 2. As regards to rural areas of the district, 99.0 per cent of the households are living in their owned dwellings whereas in urban areas this percentage is 90.8. The median number of rooms in owned, rented and others categories are the same for rural and urban areas of the district. The households belonging to scheduled castes has higher percentage (98.4) having owned dwellings as compared to scheduled tribe households (91.7).

Note:

Permanent: 1. Permanent houses refers to those houses whose wall and roofs are made of pucca materials i.e. where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi-permanent: 2. Semi-permanent houses refer to those houses made of other types of materials.

Temporary: 3. Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

Of the total number of households (294,471), 226,653 are living in permanent, 19,964 in semi permanent and 46,743 in temporary houses. At the tehsil level, the maximum number of households (46,240) living in permanent houses is in Sujangarh tehsil, whereas the minimum of 20,000 (8.8 per cent) has been found in Dungargarh tehsil. In the rural areas of the district, the maximum number of households (36,564) living in permanent houses has been found in Rajgarh tehsil whereas the lowest of 14,549 households in Dungargarh tehsil. In the urban areas the maximum (18,228) and the minimum (3,428) number of households living in permanent houses has been recorded in Sujanrgarh and Taranagar tehsils respectively.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

Improved drinking water: Majority of the households i.e. 62.2 per cent have drinking water facility in the district. For rural and urban areas, these percentages are 51.5 and 90.7 respectively. At tehsil level, for rural areas, the highest percentage (65.7) of households availing this facility has been found in Ratangarh tehsil whereas for urban areas it is 98.2 per cent in Churu tehsil.

Electricity: A little less than 50 per cent i.e. 49.4 per cent of households are using electricity. However there is much wide gap in the percentage of households using electricity in the rural (37.7 per cent) and urban (80.8 per cent) areas of the district. At tehsil level it varies from a maximum of 64.3 per cent to a minimum of 41.7 per cent of households using electricity.

Bathroom: About half i.e. 49.6 per cent of the households have bathrooms in the district. Here too much wider gap is seen in the percentage of households having bathroom in rural and urban areas, as these are 39.5 per cent and 76.3 per cent respectively. Similar trend is seen in all the tehsils of the district.

Toilet: In case of toilets, the picture is not so good especially in rural areas of the district. Only 23.9 per cent of households of the rural areas have toilet facility as against 78.9 per cent in the urban areas. The highest percentage (53.7) of households having toilet facility is found in Churu tehsil whereas the lowest of 30.5 per cent in Rajgarh tehsil.

Drainage: Again, in case of usage of drainage, the position is poor. Only 29.2 percent of households have drainage in their houses. In rural areas the position is even worse, where only 14.0 per cent of households have drainage system as against 69.6 per cent in urban areas.

Data Source : Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets".

Majority of the households (80.5 per cent) of the district is using firewood as fuel followed by cooking gas (12.6 per cent), kerosene (2.5 per cent), and crop residue (2.4 per cent). In the rural and urban areas of the district, much deviation is seen in the percentage of households using fire wood and cooking gas as 93.4 per cent and 1.8 per cent of households of rural areas are using these respectively in comparison of 46.2 per cent and 41.4 per cent of urban areas respectively. Similar trend is seen at tehsil level also.

Data Source : Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets".

Banking services: Only 27.4 per cent of the total household's (294,471) are availing Banking services whereas in rural and urban areas this percentage is 22.9 and 39.4 respectively. At tehsil level, the highest number of households (15,811) availing this facility has been found in Rajgarh tehsil, while the lowest (6,515) in Taranagar tehsil.

Radio/Transistor: Of the total household's (294,471) of the district, 35.8 per cent are in possession of Radio/Transistor. Similarly in rural and urban areas of the district, the percentage of households having radio/transistor is 34.9 and 38.2 per cent respectively.

Television: In case of Television, the percentage of households possessing it is much higher i.e. 52.8 in urban areas than that of in rural areas at 13.4 per cent only.

Telephone: Only 5.9 per cent of the total household's (294,471) of the district have telephones. The gap is much wider in rural and urban areas of the district where 2.4 per cent and 15.2 per cent of their respective total households have telephones respectively.

Auto mobiles: In case of two wheelers, only 3.4 per cent of the households have either motor cycle or scooter or moped. For rural and urban areas these percentage are 1.4 and 8.8 respectively. The picture is somewhat better in case of rural areas where 1.5 per cent have four wheelers in comparison to two wheelers. In urban areas only 2.0 per cent of households have four wheelers.

It is very significant that more than half of the households i.e. 52.2 per cent do not have any of the specified assets. In rural areas this percentage is even higher i.e. 59.6 as compared to that of in urban areas at 32.5.

(xi) Other Developmental Activities :

For the development of rural areas the District Rural Development Authority (D.R.D.A.) has been established under the Department of Special Schemes and Integrated Rural Development on the basis of local resources and geographical conditions. The families living below the poverty line are being provided with employment by eradication lack of resources and unemployment by this authority. Many schemes are being executed for rural development.

Under the eradication of poverty programme schemes the main achievements in the district during the year 1999-2000 are given below:

(1) Swarn Jayanti Gram Swarojgar Yojana

Under this scheme 437 scheduled castes and 6 scheduled tribe families were provided with 328.73 Lac as loan and 94.48 Lac as Grant in the referent year.

(2) Jawahar Gram Smridhi Yojana

The objective of this scheme is to develop basic infra structural facilities in the rural areas to generate employment avenues to the poor for their livelihood through community assets. In the referent year 3.27 Lac mandays were created and an amount of Rs.345.50 Lac was spent on 1020 SC/ST families were benefited to provide them Indira Avas.

(3) Swarn Jayanti Urban Rojgar Yojana

Under this scheme employment is provided to unemployed persons living in urban areas. During the year 1999-2000 self-employment was given to 551 persons on which an amount of Rs. 13.50 Lac was spent. Under wages (vatnic) Rojgar Scheme 20,309 mandays were created and an amount of Rs. 56.52 Lac was spent.

(4) Sansad Kshetria Vikas Yojanakosh

Under this scheme a Member of Parliament can recommended constructional works to the tune of Rs.2 Crores for the development in his constituency to District Collector. In the referent years 595 works were completed and an amount of Rs. 666.22 Lac was spent in the district.

(5) Besides these schemes in the districts various schemes executed by the Social Welfare Department, Dairy Development Scheme, Bio gas Scheme, Schemes related to Women & Child Development, Drinking Water (safe) Schemes etc. are being executed during the year 1999-2000 in the district.

(xii) Brief description of places of Religious, Historical, Archaeological Importance and Tourist Interest :

Churu is a place of historical importance. There are some places of tourist attractions in Churu, namely Jain temple built by Yati Ridhi Karan and old mansions with exuberant wall paintings and cenotaphs. Other places of interest in the vicinity of Churu are Bhau Nath-ka-Dhora famous for its large sized idols and scenic beauty, and about 3 km away from Churu the famous Sethani-ka-Zola and Prathana-ka-Zola are centre for tourist attraction.

Other historical place is Taranagar, which was known as Reni. It was conquered by the founder of Bikaner State in fifteenth century AD. A fort was constructed by Maharaja Surat Singh (1788-1826). There is also a beautiful Jain temple built in 942 AD famous for its masonry work. A fair dedicated to Ramdeoji is also held there annually. Sarva, 10 km away from Taranagar, is famous for its Gurudwara belonging to Sikhs. A fair is also held there in honour of Ramdeoji in the month of Kartika. Monuments of Kandhalji and Nathdera located near the tank are also places of interest.

Dedrewa, the birth of Gogaji Chauhan is 16 km away from Rajgarh. A famous Hanuman temple is located at Salasar where devotees come from far and wide seeking fulfillment of their wishes. About 11 km from Dungargarh in village Toliyasar stands a famous temple of Bhaironji.

A cenotaph of Rao Bidha in village Gopalpura about 9 km from Sujangarh is a place of tourist attraction and a picnic-spot. According to a legend, the village is said to be the site of once famous Dronpura founded by Dronacharya, the Guru of Pandavas. At another nearby place, Chhapar, there is a game sanctuary, which abounds in black bucks and a lake called Tal Chhapar where salt is manufactured.

(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district :

The district is birth place (Dedrewa) of a famous

Saint Gogaji Chauhan. The Saint is widely worshipped throughout Rajasthan. Churu is place of historical importance being the scene of many encounters between Thakurs of Churu and ruler of erstwhile Bikaner state until it was annexed the later in 1818 AD. There is a small fort which was built in 1739 AD by Thakur Kushal Singh.

(xiv) Scope of Village and Town Directory :

In Part-A of the District Census Handbook, entitled as Village and Town Directory, an attempt has been made to present information regarding various amenities/facilities available in every rural/ urban unit of the State. The unit of the rural areas is village and that of urban area is town/urban agglomeration. Information regarding rural areas and Census Towns has been gathered through Patwaries while that in respect of urban areas other than Census Towns has been collected through the concerned municipality/Cantonment Board/Notified Area Committee. In order to have the aforesaid information authenticated the concerned departments and agencies were also contacted to furnish information available with them. All the information gathered about amenities relate to year 1999 and those pertaining to land-use pattern pertain to Samvat Year 2055 i.e. the agricultural year ending on the 30th June, 1999.

Village Directory

It will be helpful at the outset to have an idea of the items for which information has been included in the Village Directory. Information in respect of each village has been presented through a twenty three column format in which villages have been presented in order of their names and Permanent Location code Number (PLCN) at State level. The first four columns (2-5) give general information i.e. Name of village and Permanent location code number, area in hectares, population and number of households residing in villages as per Census 2001.The amenities available in the village have been shown in columns 6-18. The information regarding land-use pattern has been given in columns 19-23. As a special feature for Census-2001 some new columns 10-12 and 17-18 are first time incorporated viz. commercial and cooperative Bank, Agricultural/non Agricultural and other credit societies, Recreational and cultural facilities, News Paper/Magazine and most important commodity manufactured in the village. In case of uninhabited villages, the information has been given relating to columns 1-3 and 19-23 only and in the remaining columns the word 'uninhabited' has been mentioned. At the end of entries of each Panchayat Samiti the totals relating to columns 3-11, 13-14, 16-17,19 and 21-23 (total area, amenities and land-use break-up) have also been given.

Various amenities like drinking water, communication, post and telegraphs etc. have been shown against the name of the referent village if they are available within the village with the help of various codes. The Code Structure relating to various columns has been given in the beginning of Section-I to Part-A of this book. The number of each type of amenity has been indicated in parentheses after the suitable code in case of educational, medical and post & telegraph facilities.

If any amenity is not available within the village a dash (–) has been shown in the relevant column and next to it, the distance of the nearest place from the referent village where the facility is available has been given in broad distance ranges viz. <5 km, 5-10 km & 10+ km.

The following pattern has been adopted for indicating the educational institutions:

(i) Schools up to Class V have been treated as primary schools. They include Nursery Schools, Kindegarten Schools, Pre-basic and Pre-primary Schools and Junior Basic Schools upto Class V.

(ii) All schools having Classes VI to VIII have been treated as Middle Schools.

(iii) All schools having Classes IX and X have been treated as Secondary Schools.

(iv) All schools having Classes XI and XII have been treated as Higher Secondary Schools. They include Senior Cambridge Schools, Schools under 10+2 scheme, Intermediate, Pre-University and Junior College etc.

In case of composite schools relevant groups of classes have been treated separately, e.g. a school having classes I to XII, has been shown as having one primary, one middle, one secondary and one higher secondary school. The term 'College' includes all types of colleges whether Arts/Science/Commerce/ Medical/Engineering/Agriculture and others imparting education at Graduate or Post-Graduate level.

Institutions other than industrial schools, training schools and adult literacy classes/ centres have been shown under 'others'.

In case of Medical institutions, Hospitals and Dispensaries, Allopathic, Ayurvedic, Unani and Homeopathy have been shown separately. Other institutions include all types of Yogic, Naturopathy, Hospitals/Dispensaries, Leprosy Centres etc.

In case there are more than one source of drinking water facility available in the village all such sources have been shown separately. Postal amenities include Post Office, Telegraph Office and Telephone, which are shown separately.

In case there are more than one communication facilities these have been indicated separately by relevant codes. Approach to the village refers to the state of roads etc. leading to the village from the communication centres i.e. bus-stand/railway station etc. This is to give an idea whether the village is easily approachable in all types of weather or becomes inaccessible for sometime in the year. Where there are more than one approach roads these have been indicated separately by relevant codes.

Information regarding the nearest town indicates the name of such town along with the distance from the referent village irrespective of the fact whether such town is located within Rajasthan or in some other adjoining states. In case of town situated in states other than Rajasthan, the concerned State has been mentioned against its name in parentheses with the help of abbreviations. The term 'town' here refers to one of those urban centres, which have been treated, as towns in the concerned state during 2001 Census.

In order to give an idea about the uses which electricity is put to, the information has been given under the head "power supply" if it is available in the village.

Land-Use Pattern

The land-use pattern has been presented under the following five headings:

I. Forest :

It denotes those lands, which have been termed as 'forest' by the competent authority.

II. Irrigated land :

It relates to land, which has actually been irrigated in the referent year. The source-wise break-up has not been presented, as no such information was available in respect of the net irrigated area.

III. Unirrigated land :

The term covers all the unirrigated land cultivated during the referent year and land lying fallow upto four years.

IV. Culturable waste :

It includes Gaucher i.e. pasture and grazing land and tree-groves.

V. Area not available for cultivation :

It refers to land, which has not been classified in any of the above mentioned types and also includes house sites, roads, rivers, nullahs, hillocks etc.

The following nine appendices have also been provided to present the position obtaining in Panchayat Samiti and district as a whole regarding various Amenities available in rural areas, villages classified by characteristics of the population and land-use pattern in Census Town in connection with the Village Directory:

(i) Panchayat Samiti wise Abstract of educational, medical and other amenities in villages.

  (a) Villages by number of Primary schools.

  (b) Villages by number of Primary, Middle and Secondary schools.

  (c) Villages with different sources of drinking water facilities available.

(ii) Villages with 5000 and above population, which do not have one or more amenities.

  (a) Census towns which do not have one or more amenities.

(iii) Land utilisation data in respect of Census Town.

(iv) Panchayat Samiti wise lists of inhabited villages where no amenity other than drinking water facility is available.

(v) Summary showing number of villages not having Scheduled Castes population.

(vi) Summary showing number of villages not having Scheduled Tribes population.

(vii) Panchayat Samiti wise list of villages according to the proportion of Scheduled Castes/Scheduled Tribes population to total population by ranges. It consists of two parts: Part-A relates to Scheduled Castes and Part-B to Scheduled Tribes.

(viii) Panchayat Samiti wise number of villages under each Gram Panchayat.

(ix) Statement showing number of girl's schools in the villages.

Town Directory

Particulars about each town have been presented in the form of seven statements. In towns where there are slums Statement-VII has also been given in which information regarding civic and other amenities available in the slums have been shown. In each statement towns have been arranged in alphabetical order.

As has been explained earlier, urban agglomerations are of two types: first those constituted by two or more independent towns and second those where the urban characteristics have developed in the adjoining rural areas, which have developed as outgrowth of the referent town.

Where an urban agglomeration includes two or more independent towns, the names of towns constituting the agglomeration have been indicated in the alphabetical arrangement but their names have also been repeated in the alphabetical order under the name of the agglomeration after the name of the main or core town and information relating to these has been shown here. The particulars of the constituent units of the agglomerations have not been repeated wherever they occur separately in the alphabetical order and a note "See referent agglomeration" has been given against such names. The lines relating to the information regarding urban agglomeration as a whole have not been numbered but the constituent units as and when they occur in the alphabetical order have been numbered so that the last number agrees with the total number of towns in the district concerned. In respect of Statements II, III and VI in the lines relating to agglomeration a note "See constituent units" has been shown and information has been provided separately in respect of all the constituents below it.

In case of towns having out growths, an asterisk mark has been placed against their names. Information in respect of out growths has been included in the concerned town and has not been shown separately.

The amenities and other data have been indicated by codes. A list of column wise code structure and other abbreviations used in each statement has been provided at the beginning of Section-II of Part-A of this book. We may now discuss the various Town Directory statements.

Statement-I

It deals with the status and growth history of the town. Columns 2 to 7 give information regarding class, name and civic status of the town, its location code number, name of the tehsil/panchayat samiti in which it is situated, its area in sq. km and number of households including houseless households residing in the town as per 2001 Census. The class of the town has been determined on the basis of its population as per Census 2001 and the civic administration status relates to the year 2000. Columns 8 to 18 show the population of the town in different decennial censuses beginning from 1901 upto 2001. The growth rate in terms of percentage in respect of previous censuses has been shown below the population figures pertaining to each Census beginning from Column 9 onwards.

A 'dash' under these columns indicates that the referent town did not have an urban status in the referent Censuses. Density of Population per sq. km as per Census 2001 has been shown in column 19 and sex ratio (number of females per 1,000 males) have been indicated for three censuses viz. 1981 to 2001 in columns 20 to 22.

Statement II

This statement gives information about the physical aspects and locations particulars of the town in 1999. First two columns give the serial number, class, name and civic status of the town. Columns 3 to 13 deal with the physical aspects viz. rainfall and temperature. Rainfall figures are the average of the rainfall for the last one year ending 1999-2000. If the

information in respect of rainfall is not available for any town it has been given for the nearest place for which it is available. Rainfall has been shown in millimeters per annum. Maximum and minimum temperatures have been given in centigrade. If the information regarding temperature is not available in respect of any town it has been given for the nearest place for which it is available and the name of the centre has been shown in footnote.

The location of the town with respect to various administrative headquarters and nearest city is indicated in columns 6 to 10. While showing the location of the referent town with respect to various administrative headquarters, names and their distance from the referent town in kilometer have been given in parentheses below the name of the place where it is situated. In case the referent town itself happens to be the seat of the administrative headquarters, this distance has been shown zero. Information regarding the nearest city of population one Lac or more and population 5 Lacs or more have been given in respect of its situation within the State or even if this city may be situated in other State. In case the nearest city happens to be situated in other State, the name of the concerned State has been shown against the name of the city in parentheses. How the referent town is approachable is given in columns 11 to 13 which indicate the availability of communication facilities viz. railway station, bus facilities and navigable river/canal within 10 km. There is no navigable river or canal in Rajasthan.

Statement III

It gives information about the finances of the civic body controlling the local civil administration and it has been presented in '000 rupees. A 'dash' in this Statement indicates that no receipt or expenditure has occurred under the particular head and 'N' represents negligible amount. First two columns give general information, columns 3 to 9 present receipt under broad categories and total receipt and columns 10 to 16 present expenditure under broad categories and total expenditure. The receipt and expenditure has been presented under six broad categories each. While receipt through taxes implies all receipts from taxes obligatory or others and revenue derived from municipal properties and power apart from taxation, it also includes income derived from holding of fairs and exhibitions, supply of milk, license fee, cattle-ponds, fines and penalties, transport services, places of entertainment, allotment/sale/lease of land and rent etc. Government grants include per capita grant, grant from Public Works Department and grant from the Social Welfare and other departments. Other sources of receipts have been specified, wherever possible but generally they are of miscellaneous nature.

Expenditure on general administration covers salary and wages of staff, contingent expenditure on staff, grants loans and advances to the staff etc. Expenditure on public safety cover fire-fighting, light, water and lease facilities, regulating the dangerous/ hazardous trades/works/occupation, water supply, registration of births and deaths, disposal of garbage, rubbish and night-soil. Public health and conveniences cover all types of medical aid and maintenance of the destitute etc. Public works include maintenance and construction of roads and buildings and relief works in times of famine and scarcity. Expenditure in public institutions covers all types of social, cultural, educational, religious institutions etc. Which are run or patronised by the municipality. Other sources of expenditure have been specified where possible but mostly these are of miscellaneous nature.

Statement IV

This statement deals with the civic and other type of public amenities and provides information about total population, scheduled castes and scheduled tribes population, road length, system of sewerage, number and types of latrines, method of disposal of night-soil, water supply, availability of fire-lighting service and electrification besides general information. In case of water supply the source of water as also the system of its storage have been shown. The storage capacity has been shown in Kiloliters. In case of disposal of night soil and protected water supply particulars have been given in respect of two methods/sources in order of their importance if more than one exist in the town. In case fire-fighting service is not available in the town the name of the nearest place if in the same district or the name of the nearest district if in the same state or other state where available along with distance from the referent town has been mentioned.

Statement V

Particulars of medical, educational, recreational and cultural facilities available in the town have been given in this statement and the number of each type of these facilities has also been shown in parentheses is along with the appropriate code.

In case of medical facilities the number of beds wherever available has also been shown Allopathic, Ayurvedic, Unani and Homeopathic hospitals/ dispensaries have been shown separately. No code has been provided for allopathic institutions and the numbers have been shown only in figures. Thus beside H, code for hospital means an Allopathic Hospital. Separate codes have been provided for other three systems of medicine.

If a medical or educational facility is not available in the town, the name of the nearest place, if the same district or the name of the nearest district in the same State or other State where available and its distance (in km) from the referent town has been mentioned. Details of medical institutions shown under 'Others' have also been explained.

Arts, Science and Commerce Colleges have been shown separately. While showing the educational institutions upto Higher Secondary level the same procedure as adopted in case of Village Directory, has been followed. In case of composed schools relevant classes have been treated separately e.g. a school having classes I to XII has been treated as being composed of one Primary, one Middle, one Secondary and one Higher Secondary School.

All other types of educational institution which are not covered in column 6 to 14 have been shown in column 15 under 'Others' and include technical/ vocational and training institutions like Applied Art Painting College, Pharmacy College, Agricultural College, Teacher's Training College/Institution, Music/ Dance School etc. Janchetna Kendra is also included in others.

Statement VI

This statement contains particulars regarding trade, commerce, industry and banking. It gives names of three most important commodities, exported and manufactured in the town besides the number of banks, agricultural and non-agricultural credit societies functioning in the town. A list of the outgrowths, if any, along with their population and name of the core town has also been provided at the end of the Town Directory as an Appendix.

Statement VII

Information about all slums whether notified or not and for all towns has been shown in this statement in order to give an idea about the amenities available to the slum dwellers. Particulars about paved roads, systems of sewerage, number and types of latrines, method of disposal of night soil, number of tap points/ public hydrants for supply of protected water and electrification have been provided in respect of every slum in each town, if there are any.

PART-A : VILLAGE AND TOWN DIRECTORY

Section-I

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:

Columns 1 : Serial Number

Self explanatory. All the villages within the Panchayat Samiti are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R

(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages Panchayat Samiti wise of the district.

Appendix-I-A Indicates number of villages Panchayat Samiti wise having one or more primary schools.

Appendix-I-B Indicates number of villages Panchayat Samiti wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages Panchayat Samiti wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV Panchayat Samiti wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII The appendix shows the list of villages according to proportion of the A, VII B Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates Panchayat Samiti wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

Section-II

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M.Cl.
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Tehsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 and 10

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory

Column 6 : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well Water	W

Column 14

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory

Column 4 & 5

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or primary health centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC

(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART-B : PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/Panchayat Samiti/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/Panchayat Samiti/Town
3.	Primary Census Abstract for Scheduled Tribes	District/Panchayat Samiti/Town
4.	Village Primary Census Abstract	Panchayat Samiti/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented Panchayat Samiti wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Panchayat Samiti is presented both for rural and urban areas separately. All the villages within the Panchayat Samiti constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Panchayat Samiti. In case a Panchayat Samiti is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Panchayat Samiti is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares. The area figures of the Panchayat Samiti is the total of the village areas coming under each Panchayat Samiti. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tehsils/ Panchayat Samiti within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Tehsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and Panchayat Samiti level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II : FERTILITY-MORTALITY MEASURES

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever-married women and last question related to currently married women.

AGE SPECIFIC MARITAL FERTILITY LEVEL, 1991 CENSUS

Age-Group	Churu			Rajasthan		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	96.52	104.57	70.18	99.82	99.10	103.46
20-24	198.91	222.18	139.49	217.18	227.01	182.20
25-29	177.05	193.60	138.64	197.71	214.81	144.55
30-34	116.63	131.81	82.49	141.09	158.38	85.69
35-39	69.15	81.24	42.37	90.43	104.11	47.40
40-44	42.26	46.23	32.65	53.37	61.51	25.15
45-49	15.78	18.75	8.68	27.36	30.37	15.81

The ASMFR (Age Specific Marital Fertility Rate) has been calculated at seven different age-groups. The highest ASMFR of the district is found 198.91 in the age-group of 20-24 followed by 177.05 in the age-group of 25-29. The lowest ASMFR is reported in the age-group 45-49 i.e.15.78. In comparison to the ASMFR at the state level it has been found lower in the age-group of 15-19, 96.52 (99.82 state) and 20-24, 198.91 (217.18 state) respectively at the district level. In the remaining age-group i.e. 25-29, 30-34, 35-39, 40-44 and 45-49 the ASMFR of the district is lower at the state level. It can be seen from the table.

ESTIMATES OF CHILD MORTALITY, 1991 CENSUS

Mortality Indicators	Churu			Rajasthan		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
q2	75	72	77	97	95	99
q3	79	76	82	100	98	106
q5	83	79	91	110	103	117

Information on the questions on children ever born and children surviving canvassed for all ever-married women has been tabulated by age of the mother. From this, estimates of child mortality have been worked out by using Brass Technique. From the estimates of child mortality (Number of deaths by ages 2, 3 and 5 given as q2, q3 and q5) it is observed that the child mortality in the Churu district is lower as compared to the state among males as well as females. It can be seen from the table.

ANNEXURE-III : VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

Source : Occasional papter No.1 of 1997 office of the Registrar General India and Rajasthan state district profile 1991.
Note: * newly created districts after 1991 Census.

Different fertility measures indicates that the fertility level in the Churu district was lower compared to the state average. The GFR (Gross Fertility Rate) of the district has been reported as 133 against 162 of the state. Similarly, GMFR (Gross Marital Fertility Rate) and TFR (Total Fertility Rate) of the district are also lower than that of state being 148 and 4.14 as against 184 and 5.01 of the state respectively. The TMFR (Total Marital Fertility Rate) of district is 4.57 is lower than that of state 5.59. The CBR (Crude Birth Rate) is also lower 28.53 as compared to the state 35.75.

However the number of children ever born per woman in the age group of 45-49 is 5.71 which is higher than the state average 5.07.

The mean age at marriage of currently married women in the district 16.01 is slightly lower than that of the state. It can be seen from the table. CWR (Child Women Ratio) 0-4 of the district is higher than state. It can be seen from the table.

ANNEXURE-IV (a) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	1991 Census		
	Persons	Males	Females
1	2	3	4
(A) Migrants born within the state of Enumeration	3,84,195 (91.85)	59,044 (91.44)	3,25,151 (91.93)
(i) Migrants born elsewhere in district of Enumeration	2,56,721 (61.37)	43,974 (68.10)	2,12,747 (60.15)
(ii) Migrants born in other districts of the State	1,27,474 (30.48)	15,070 (23.34)	1,12,404 (31.78)
(B) Migrants born in other states of India	33,227 (7.94)	5,240 (8.11)	27,987 (7.91)
(C) Migrants born in other countries	860 (0.21)	290 (0.45)	570 (0.16)
Total Migrants	**4,18,282 (100.00)**	**64,574 (100.00)**	**3,53,708 (100.00)**

(a) By Place of Birth

A total number of 418,282 persons were found as migrants by place of birth. Among these 384,195 migrants were those who were born in Rajasthan. This accounted for 91.85 per cent of total migrants. A large chunk of the migrants 61.37 per cent were those whose places of birth was within the district of enumeration. A significant i.e. 30.48 per cent of migrants were those place of birth in other district of the Rajasthan. A meagre number of migrants i.e. 860 (0.21 per cent) were those whose places of birth were out side India it can be seen from the Table.

ANNEXURE - IV (b) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	3,84,195 (100.00)	2,82,153 (73.44)	1,02,042 (26.56)
	Rural	2,97,795 (77.51)	2,49,003 (64.81)	48,792 (12.70)
	Urban	77,310 (20.12)	24,450 (6.36)	52,860 (13.76)
In other States of India	Total	33,227 (100.00)	25,047 (75.38)	8,180 (24.62)
	Rural	26,990 (81.23)	23,410 (70.46)	3,580 (10.77)
	Urban	6,107 (18.38)	1,527 (4.60)	4,580 (13.78)

(b) Internal Migrants (Rural/Urban)

Majority of the internal migrants i.e. 77.51 per cent whose places of birth were within Rajasthan belonged to the rural areas of the state. The same trend also reflects in case of migrants born in other states of India as can be seen from the Table.

ANNEXURE-IV(c) : INTERSTATE MIGRANTS, 1991 CENSUS

Place of Birth	1991 Census	
	Migrants	Percentage to Total migrants
1	2	3
1. Bihar	580	1.75
2. Haryana	27,317	82.21
3. Punjab	750	2.26
4. Uttar Pradesh	1,690	5.09
5. West Bengal	560	1.68
6. Assam	480	1.44
Total for six States	31,377	94.43
Other States	1,850	5.57
Total	**33,227**	**100.00**

(c) Inter-state Migrants

In case of Inter-state migrants, the migrants are mainly from bordering states of Haryana and Utter Pradesh as their percentages are 82.21 and 5.09 respectively. It is followed by migrants having place of birth in Punjab with 2.26 percent as can be seen from the Table.

ANNEXURE - IV (d) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of Last Residence	1991 Census		
	Persons	Males	Females
1	2	3	4
(A) Within the State of Enumeration but outside the place of Enumeration	410,305 (91.48)	63,714 (89.29)	346,591 (91.89)
(i) Elsewhere in the District of Enumeration	274,701 (61.25)	47,274 (66.25)	227,427 (60.30)
(ii) In other districts of the state of Enumeration	135,604 (30.23)	16,440 (23.04)	119,164 (31.59)
(B) States in India beyond the state of Enumeration	37,487 (8.36)	7,320 (10.26)	30,167 (8.00)
(C) Last Residence outside India	730 (0.16)	320 (0.45)	410 (0.11)
Total Migrants	**448,522 (100.00)**	**71,354 (100.00)**	**377,168 (100.00)**

(d) Migration by Place of Last Residence

A total number of 448,522 persons were found as migrants by place of last residence. Among these 410,305 migrants were those whose place of last residence were within the state of enumeration but out side the place of enumeration. This accounted 91.48 per cent of total migrants by place of last residence. Similarly a total number of 37,487 (8.36 percent) persons were found, as migrants whose place of last residence were states in India beyond the state of enumeration. Only 730 persons were found whose place of last residence was outside the India. It can be seen from the table.

ANNEXURE-IV (e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of Last Residence	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	410,305	306,053	104,252
		(100.00)	(74.59)	(25.41)
	Rural	321,415	271,273	50,142
		(78.34)	(66.12)	(12.22)
	Urban	81,890	28,010	53,880
		(19.96)	(6.83)	(13.13)
In other states of India	Total	37,487	28,787	8,700
		(100.00)	(76.79)	(23.21)
	Rural	29,210	25,750	3,460
		(77.92)	(68.69)	(9.23)
	Urban	8,167	2,967	5,200
		(21.79)	(7.92)	(13.87)

(e) Migration by Place of Last Residence (Rural/Urban)

Majority of the internal migrants i.e. 78.34 per cent whose place of last residence were belonged to rural areas of the state. Similar trend also reflects in case of migrants whose place of last residence were in other state of India as can be seen from the Table.

ANNEXURE-V : RELIGIONWISE DISTRIBUTION OF TOTAL POPULATION, 1991 CENSUS

District	Religion	Population	Percentage to total population	Percentage		Percentage to total population Rajasthan
				Rural	Urban	
1	2	3	4	5	6	7
Churu	Total Population	1,543,211	100.00	71.10	28.90	100.00
	Hindu	1,359,941	88.12	77.43	22.57	89.08
	Muslim	163,406	10.59	25.48	74.52	8.01
	Sikh	282	0.02	49.65	50.35	1.48
	Jain	18,184	1.18	9.19	90.81	1.28
	Christian	290	0.02	21.38	78.62	0.11
	Buddhist	7	N	-	100.00	0.01
	Other Religions and persuations	35	N	85.71	14.29	N
	Religion not stated	1,066	0.07	60.60	39.40	0.03

Religion

Religion is an important basic cultural characteristic of the population. It provides an interesting picture of the society. The religion data are provides the diversity of the country. The data is of great importance for the public, Government, NGOs and Minorities Commission.

Among the followers of six major religions in

Churu district as per 1991 Census, Hindus are the main forces with 88.12 per cent to the total population. It is followed by Muslims 10.59 per cent and Jains 1.18 per cent.

If we compare these datas to the state level the percentage population of Hindus are higher and the percentage population of Muslims are lower than the district. It can be seen from the Table.

ANNEXURE-VI : MARITAL STATUS OF POPULATION AS PER, 1991 CENSUS

Age Group	Total Population		Marital Status

Age, Sex and Educational Level

The total population of the District Churu in 1991 was 1,543,211 of which 34.78 percent are literates. As per the definition of literacy in the 1991 Census the entire population in the age group 0-6 was considered to be illiterates. The total literacy rate in the district Churu in the age group of 10-14 years was 48.9 percent and among males and females it was 67.2 percent and 28.9 percent respectively which is lower as compared to the state in the same age group. Similarly literacy rate in the age group of 15-19 year 65.5 percent males and 23.0 percent females were reported in the district which is also lower than that of the state. It is general trend of the literacy of the state as well as district females literacy is lower than the male literacy. The percentage showed a decline at Matric but below Graduate 10.7 percent as male and 1.7 percent are female, while at the graduate and above level 4.4 percent males and 0.7 percent are females. It can be seen from the table.
