VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

लोकाभिमुख
PEOPLE ORIENTED

H. C. SHARMA
Deputy Director
Directorate of Census Operations, Rajasthan

Indira Gandhi Nahar Pariyojana (IGNP)

The Indira Gandhi Nahar Pariyojana is an attempt in bringing the Himalayan waters into the Thar Desert. The initiative was taken by the ruler of Bikaner State Rao Ganga Singh by the construction of the Gang Canal to irrigate the parched land of Ganganagar District and to extend it later to the other regions of the Thar Desert. The original source from where the water is released is the Bhakra Nangal Dam on the River Sutlej. In 1955, an inter state agreement on sharing of the surplus Ravi-Beas waters between Punjab, Haryana and Rajasthan was reached and Rajasthan was allotted 9864 mm^3 of water which increased to 10603 mm^3 in 1981. The canal was subsequently renamed as Indira Gandhi Nahar Project. In 1987 waters were released into the Indira Gandhi Main Canal thus piercing the heart of the desert.

With the availability of irrigation facility from the Canal the sandy but fertile tract of the region has been transformed into green fields. Besides food grains bumper and cash crops of great value are being produced. The project also aims at dealing with drought on a permanent basis. The project has provided a major source of employment to the people of the District and raised the socio-economic status of the people.

District Highlights–2001 Census xv

Important Statistics and ranking of tehsils in the district xvii

Statements 1-9

Statement-1 : Name of the Headquarter of the District/Tehsil, their Rural-Urban status and Distance from District Headquarter, 2001 xxi

Statement-2 : Name of the Headquarter of the District/Panchayat Samiti, their Rural-Urban status and Distance from District Headquarter, 2001 xxi

Statement-3 : Population of the District at each Census from 1901 to 2001 xxii

Statement-4 : Area, Number of Villages/Towns and population in District and Tehsil, 2001 xxiii

Statement-5 : Panchayat Samiti-wise number of villages and rural population, 2001 xxiv

Statement-6 : Population of Urban Agglomerations/Towns, 2001 xxiv

Statement-7 : Villages with population of 5,000 and above at Panchayat Samiti level as per 2001 Census and amenities available xxv

Statement-8 : Statutory Towns with population less than 5,000 as per 2001 Census and amenities available xxvi

Statement-9 : Houseless and Institutional Population of Tehsils, Rural and Urban, 2001 xxvii

Summary Statement : Jurisdiction of Panchayat Samities in each Tehsil, 2001 xxviii

Analytical Note

(i) History and scope of the District Census Handbook 3

(ii) Brief History of the District 6

(iii) Administrative set-up 7

(iv) Physical Features : (1) Location and size (2) Physiography (3) Water resources (4) Climate (5) Natural economic resources 8

(v) Census Concepts 14

Page Nos.

(vi) Non Census Concepts 20
(vii) 2001 Census findings-Population, its distribution 24
(viii) Brief analysis of PCA data based on inset tables 1 to 36 24
(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47 47
(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48 to 52 53
(xi) Other Developmental activities 60
(xii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district 61
(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district 61
(xiv) Scope of Village Directory and Town Directory - column heading wise explanation and coverage of data 61

PART-A : VILLAGE AND TOWN DIRECTORY

Section-I : Village Directory

(a) Note explaining the abbreviations used in Village Directory 69
(b) List of Villages merged in Towns and Outgrowths at 2001 Census 73
(c) Panchayat Samiti-wise presentation of Village Directory Data
(i) Panchayat Samiti Maps showing Tehsil boundary
(ii) Alphabetical List of Villages alongwith Location Code 1991 and 2001
(iii) Presentation of Village Directory data in prescribed format
1. Panchayat Samiti : Karanpur 77
2. Panchayat Samiti : Ganganagar 129
3. Panchayat Samiti : Sardulshahar 187
4. Panchayat Samiti : Padampur 241
5. Panchayat Samiti : Raisinghnagar 295
6. Panchayat Samiti : Anupgarh 383
7. Panchayat Samiti : Suratgarh 613

(d) Appendix to Village Directory

Appendix-I : Abstract of Educational, Medical and Other Amenities in Villages - Panchayat Samiti level 708
Appendix-IA : Villages by number of Primary Schools 712
Appendix-IB : Villages by Primary, Middle and Secondary Schools 712
Appendix-IC : Villages with different sources of drinking water facilities available 712
Appendix-II : Villages with 5,000 and above population which do not have one or more amenities available 713
Appendix-IIA : Census Towns which do not have one or more amenities 713

Page Nos.

Appendix-III : Land utilisation data in respect of Census Towns/Non Municipal Towns 714

Appendix-IV : Panchayat Samitiwise list of inhabited villages where no amenity other than drinking water facility is available 714

Appendix-V : Summary showing number of villages not having Scheduled Castes population 723

Appendix-VI : Summary showing number of villages not having Scheduled Tribes population 723

Appendix-VIIA : List of villages according to the proportion of the Scheduled Castes to the total population by ranges 724

Appendix-VIIB : List of villages according to the proportion of the Scheduled Tribes to the total population by ranges 752

Appendix-VIII : Number of villages under each Gram Panchayat (Panchayat Samiti wise) 756

Appendix-IX : Statement showing number of girls schools in the villages 814

7. Panchayat Samiti : Suratgarh 1176

Urban Primary Census Abstract 1230

Annexure-I : Number of villages under each Gram Panchayat, 2001 Census 1260

Annexure-II : Fertility and Mortality, 1991 Census 1321

Annexure-III : Various measures of fertility and mean age at marriage, 1991 Census 1322

Annexure-IV : Percentage distribution of Migrants by place of birth/ place of last residence, 1991-2001 Census 1323

Annexure-V : Brief account of main religions in the district as per 1991-2001 Census 1325

Annexure-VI : Marital status of population as per 1991-2001 Census 1326

Annexure-VII : Age, Sex and Education in the district, 1991-2001 Census 1328

Annexure-VIII : Distribution of different mother tongues returned in 1991-2001 Census 1329

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri J.L.Modi, Director of Census Operations, Rajasthan. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Additional Secretary &
Census Commissioner, India

Preface

I am deeply indebted to the State Government of Rajasthan for their unstinted support and cooperation despite all odds and adversaries like famine etc. at all stages of Census Operations of 2001. I am grateful to Shri Inderjit Khanna, the then Chief Secretary of Government of Rajasthan for his prompt response, guidance and cooperation given to the Census Organization. He infused a sense of urgency and seriousness in the minds of District Collectors and Officers of the District Administration, which geared up the entire administrative machinery. The Supervisors and Enumerators, the basic census functionaries worked ceaselessly in the entire period of fieldwork to make Census 2001 successful.

Sarvashri Ashok Pandey and Vinod Zutshi, the then Secretaries in the Department of Cabinet Secretariat and General Administration have been instrumental in making Census 2001 a successful one. I owe my thanks to both of them. I am also thankful to other Departments like Education, Finance, Revenue, Economics and Statistics, Public Relations, Printing and Stationery, Local Self-government and Personnel Department for extending their full cooperation.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his unstinted support and spontaneous, unfailing guidance throughout our endeavours. At the outset I would like to thank Shri D.K. Sikri, Registrar General and Census Commissioner, India for guiding us in bringing out this report. My grateful thanks to Shri K.N. Unni, Ex-DRG (C&T), Shri R.G. Mitra, Ex-DRG (C&T), Shri R.P. Singh, Consultant (Map), Shri Himakar, Additional Director (EDP), Dr. I.C. Agrawal, A.R.G.(SS), Shri S.L. Jain, Deputy Director (SS), Shri C. Chakravorty, Joint Director (DDU) and their colleagues at the headquarter for their ever willing, helping hand and thoughtful suggestions for putting together and shaping the volumes in their present form.

The Director of Census Operations, Rajasthan, Shri J. L. Modi under whose guidance the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before this volume could be made available for the press. I am deeply greatful to Shri H.S. Meena, Ex-Joint Director of Census Operations, Rajasthan for its success.

It may be mentioned a few annexures have been added to this volume with a view to provide an insight into the 1991 and 2001 data on the suggestion of Social Studies Division of the Office of the Registrar General, India. In this connection the contribution of Shri V.K. Gupta, Senior Compiler who has also really worked very hard in preparing CRC of various districts can not be ignored.

In view of the increasing demand of the publications in electronic format, it has been decided to publish the DCHB also on CD. I highly appreciate the efforts put in by Smt. Jyoti Luhadiya, DD(EDP) and her team to compile in the electronic format. The efforts put in by Shri Divesh Chawla, DEO Gr-'B' to prepare this is highly commendable. In this connection, the contributions of Shri P.N. Mathur Sr.Supervisor and Shri J.P. Verma, DEO Gr-'B' cannot be ignored.

Shri G..Fernandes Assistant Director, deserves all credit who not only coordinated the work but contributed immensely in timely finalization of Primary Census Abstract and Village and Town Directory.

Shri H.C. Sharma, Deputy Director has taken pains in drafting the District Profile and the Analytical Note for the district. The members of the staff in the Map Section did a commendable job under the guidance of Shri Autar Singh, R.O.(Map), ably assisted by Shri R.S. Tyagi, Sr.Geographer in bringing out various maps.

In the last but not the least, I owe my gratitude to Shri Anand Nigam Ex.-Dy.Director Controlling officer of this Directorate for his valuable guidance by his in-depth knowledge of computer technology in bringing out this volume.

District Highlights - 2001 Census

1. Ganganagar district ranks 15th in terms of population,10 th in terms of area and 22nd in terms of population density.
2. The sex ratio of Ganganagar district (873) is significantly lower than the State (921) sex ratio.
3. The literacy rate in Ganganagar district is 64.7 percent which is higher than the literacy rate in the State 60.4 percent and it ranks 6th among the other districts of the State. 3Only 2 village have population more than 10,000. There are 184 uninhabited villages in the district.
4. 8LLG (Lalgarh) (Tehsil Sadulshahar) is most populous (18,222) village of the districtwhereas4A,2a GG (Tehsil Gangnagar),49 NP,1 MGM,18 SAD (Tehsil Raisinghnagar), 4 KSD-A (Tehsil Gharsana) and 22 KD (Tehsil Gharsana) are the least populated (1) villages.
5. The economy of the district is mainly dependent on agriculture.
6. The district has recorded the (53.5 percent) work participation rate for male workers.
7. Suratgarh Tehsil has the highest number of villages (467) whereas Sadulshahar Tehsil has the lowest number of village (213).
8. In the district Thukrana village in the Tehsil Suratgarh has the largest area (8906.0 hectare) whereas villages 6 RM in Tehsil Suratgarh has the smallest area (24.0 hectare).

ANALYTICAL NOTE

Analytical Note

History and scope of the District Census Handbook

The series of District Census Handbooks has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several new innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Numbers (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from 1 to N. Each village has been assigned an eight digit code. The first six digits represent the code of the village as existing at the present census. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001, are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

The responses for almost all the questions in the Houselisting Schedule had pre-coded options. This not only helped the enumerators to record the response easily but at a later stage would hopefully facilitate quicker data processing. Apart from the improvements made in the format of the Houselisting Schedule, the scope of Houselisting was considerably expanded with the inclusion of new questions based on requirements of various data users and planners. The new features of the Houselisting Schedule are listed below.

- For the first time, different uses of census houses have been standardized and grouped into ten main uses and assigned code numbers.
- Plastic has been added in the list of material of wall and roof of a census house, as it is often used for shelter in slums and shanties.
- In the previous census, the location of drinking water source was categorized into two locations viz. 'within premises' and 'outside premises'. In the Census of India, 2001, the source 'outside premises' was split into two categories namely 'near the premises' and 'away from the premises'.
- The scope of question of availability of electricity was expanded to include six sources of lighting. Besides no lighting, this included sources like electricity, kerosene, solar, other oil and any other source.
- In 1991 Census, a question on availability of toilet facilities to the household was canvassed while in Census of India, 2001, specific information on availability of latrine within the house by the type of latrine was sought.

In addition to expending the scope of the questions canvassed during the Houselisting Operations in the 1991 Census, the following new questions were added in the Houselist Schedule for Normal Households at the Census of India, 2001.

- If the Census house was used for residential or partly residential purposes, the condition of the census house was categorized as good, livable or dilapidated based on the perception and response of the respondent.
- A question on number of married couple(s) living in the household was canvassed.
- Information was sought on the number of married couple(s) having independent room for sleeping.

- Information as to whether the waste-water outlet of the house is connected to 'closed drainage' or 'open drainage' or has not drainage was collected.
- A question on availability of bathroom within the house was included.
- Information on availability of kitchen within the house was also sought.
- Availability of certain assets to the households namely radio/transistor, television, telephone, bicycle, scooter/motor cycle/ moped, car/jeep/van were also included.
- It was also enquired whether any banking service was being availed by the household.

The Household Schedule adopted for the Population Enumeration also primarily had pre-coded options for majority of the questions. The questions for each data item were made as self-explanatory as far as possible for easy understanding. The comprehensive Household Schedule had three parts and two sides A and B. Part I contains the Location Particulars; Part II relates to Individual Particulars and Part III contains questions for Household engaged in Cultivation/Plantation. To facilitate quick tabulation for bringing out Provisional Population Totals, provisions of page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates and workers and their categories by sex. Most of the questions canvassed during the 1991 Census, were retained for the 2001 Census, except the question on ex-serviceman, which was dropped during the Census of India, 2001. However, a number of new questions were added in the Household Schedule in view of the suggestions from policy makers, data users and researchers, while the scope of certain existing questions was enhanced.

These modifications are:

- Age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.
- The type of educational institution attended by a person was enlarged to include school, college, vocational institute, other institute and literacy center.
- The scope of the definition of 'work' was expanded in the Census of India, 2001, to include production of milk for domestic consumption. In the 1991 Census, cultivation of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India, 2001.
- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India, 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census is dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census, is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected are - in seeing, in hearing, in speech, in movement and mental.

- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work is collected under this section.
- The Household Schedule has a new set of questions for Household engaged in cultivation/ plantation- i) Net area of land under cultivation/ plantation, ii) Net area of land irrigated and iii) Tenure status. This question was not canvassed at the 1991 Census but was canvassed in the 1981 Census in a slightly different form.
- The signature or thump impression of the respondent has been taken on the Household Schedule for the first time in the history of census. This was not only aimed at obtaining correct and complete information but also for giving an opportunity to the respondents to authenticate the information provided by them. The relationship of the respondent with the head of the household was also obtained. This new feature will pave way in carrying out a methodological study in future on the respondent profile in the census.

In 1981 Census, for the first time, an attempt was made in the series to bring out demographic and other data in diglot, Hindi and English, for a more beneficial use by data user of all categories. Hindi being the official language of the State, a Hindi version of the analytical notes was also added with a view to caters to the needs of all sections of readers. The manner of presentation of the District Census Handbooks for the 1991 Census is by and large the same.

As a necessary corollary to the Handbooks, Panchayat Samities, the basic administrative units of development, administration and planning, were listed out separately for the first time in 1981 Census in relation to those districts wherein they were not coterminous with their tehsils. As an additional attempt, informations relating to population figures as well as amenities available in each village located in the jurisdiction of each Panchayat Samiti were also presented in a separate volume under the title "Supplement to District Census Handbook". However, for reference in the main District Census Handbook, a list of villages forming part of each non-coterminous Panchayat Samiti was provided along with the abstracts of population and amenities for such Panchayat Samities as a whole in the form of Special Annexures.

In order to cater to the over-all needs of the data-users and to facilitate the task of administrators and planners it has now been decided to present the Village Directory and Primary Census data at the Panchayat Samiti level instead of the traditional Tehsil level presentation. It is expected that the presentation of Village Directory and Primary Census Abstract data at Panchayat Samiti level will help the planners in formation of micro-level developmental plans, as the Panchayat Samiti is now the lowest administrative unit for development planning. However, for the convenience of the data users and for the sake of comparability of data at Tehsil level, the Primary Census Abstract has also been presented at the Tehsil/ Town level in the form of an Appendix.

A general note on each district covering information of general interest regarding its history, topography, physiography, administrative set-up and places of tourist and historic importance etc. has also been included with a view to provide comprehensive and more purposeful information about the district as a whole. Population figures of Scheduled Castes and Scheduled Tribes constituting the core of 'Weaker Section' have also been presented at district, panchayat samiti and town level so as to facilitate planning for their welfare both at micro and macro levels.

It is earnestly hoped that this publication will serve its purpose for planners and administrators of welfare schemes and other data users in general.

Prior to 1951, Census Reports were printed for the whole province/state. The idea of preparing the District Census Handbooks separately for each district was conceived during 1951 Census as a part of a plan intended to secure an effective method of preserving the Census data below the district level. The idea was that all the district census tables would be bound together in a single volume called the District Census Handbooks. Since then the District Census Handbooks are being published regularly.

The 1951 Census series of District Census Handbooks was printed in two parts. Part I contained five General Population Tables (A Series), three Economic Tables (B Series), five Household and Age Tables (C Series) and seven Social and Cultural Tables (D Series). In Part II of District Census Handbook "Primary Census Abstract and Village Directory" which showed the basic population figures for each village or town classified by livelihood classes, were included along with some information of general nature.

The 1961 Census series of District Census Handbooks were printed in single volume in which Primary Census Abstract upto village and town/ward level and Village Directory upto village level were given. Besides, some official statistics collected from various state departments, four General Population Tables (A Series), sixteen Economic and Household Tables (B Series), seven Social and Cultural Tables (C Series), four Housing Tables (E Series) and eight Special Tables for Scheduled Castes/Scheduled Tribes were also provided in District Census Handbooks. For the first time in 1961 Census the maps for the district and tehsil were also included in the District Census Handbooks.

In 1971 Census series of District Census Handbooks village-wise 'Village Directory' giving services, facilities or amenities available in the village was given. 'Town Directory' was introduced for the first time giving useful information in respect of every town of the district. Rural Primary Census Abstract upto village level and Urban Primary Census Abstract upto enumeration block level were given in District Census Handbooks. While the District, Tehsil and Town maps were included; the inclusion of Census Tables was dispensed with in the District Census Handbooks in 1971 Census.

The scope of 1981 series of District Census Handbooks was enlarged specially in relation to amenities and land-use pattern. Apart from new items like uses of electricity, details of communication points, information for which was not collected in 1971 Census, a note on each district covering general information on its history, topography, flora, fauna and administrative set up etc. was also added. The format of the Primary Census Abstract was also restructured in the light of changes in economic and other questions canvassed in the 1981 Census but at the same time, all efforts were made to retain comparability with 1971 Census data. The inclusion of Special Primary Census Abstract for Scheduled Castes and Tribes at the Tehsil/Town level was another innovation introduced in 1981 Census series.

The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same as followed in 1981. However, the format of Primary Census Abstract was restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group was included in Primary Census Abstract for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate at the time of the 1991 Census.

One of the most important innovations in the 1991 Census was the Panchayat Samiti level presentation of data in the Village Directory and Primary Census Abstract instead of the traditional Tehsil level presentation.

Deviating from 1991 Census, like 1981 Census four fold industrial classification of main and marginal workers has been presented in 2001 as against nine fold given in 1991.

The mode of presentation of DCHB in 2001 will by enlarge be same as that of in 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc pertaining to 1991 Census of the respective district in the DCHB in the form of Annexures II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

(ii) Brief History of the District

The northern part of the princely state of Bikaner, which was adjacent to enstohile Punjab, is called the present day Ganganagar district. The district is named after its headquarters. It was the foresightedness and

perfect planning of Maharaja Shri Ganga Singhji the erstwhile ruler of Bikaner that the water of the rivers of Punjab was brought in this area through Bikaner canal. This irrigation system developed and become famous as Gang Canal in the thirsty and arid land of this area. In the initial stages the village of Ramnagar touching Punjab border was developed in a phased manner and its later became the headquarters of Gang canal project. This very Ramnagar later on became popular as Ganganagar.

The explorations and excavations done by archaeological experts in this area proves that the Indus valley civilization was in developed state. The remnants of clay pottery and tools famed under mounds locally in the course of Ghaggar river testify the existence of developed civilization.

This region must had been developed even in vedic period. The holy river of Aryans the Sarasavati used to flow through this region which is now Modern Ghaggar river is known as the miniature of the river sarasvati. The region of the earwhile state of Bikaner was know by the name Jangali in Mahabharat period. Due to this reason the rulers of this region now called Jangaladhar Badshah even since the medieval times. Ganganagar was divided into small principalities, among which most were ruled by Jat rulers proved to the establishment of Bikaner by Rao Bikaji. Among Jats, the princepalites of the rulers of Godara, Kaswa, Saran, Sihag, Beniwal and Punia clans were prominent. The coins of Kushan rulers found from the mounds of Suratgarh and Rungmahal by sir A stein proves that kushans might have also ruled over this area.

During the medieval period the region of erstwhile Prithi Raj III (1178-92 AD) of the chauhan dynasty. After the establishment of Bikaner (1488 AD) by Rao Bika of Rathore dynasty subjugated small principalities under his control. A part from Mohils and Turks, among this pervinatules principalities of Godara, Punia, Saran, Sihag, Kaswa and Beniwal of Jat clans were included. Thus the existence of the erstwhile Bikaner state founded by Rao Bika remained upto 1949 when it merged into greater Rajasthan. The present district of Ganganagar was founded on 30th March 1949 which remained status quo upto 12th July 1994 at the time of the formation of Hanumangarh district.

(iii) Administrative set-up

After the formation of Hanumangarh district, 4 sub divisions and 9 tehsils were left in Ganganagar district. Complete tehsils were included in the district and not any type of inter tehsil transfer or change were at the time of division of the district. In the year 1996, Anupgarh was made new sub-division in which Anupgarh and Gharsana tehsils of Raisinghnagar subdivision were included.

The description of administration units of the district is as following :

Sl. No.	Sub-Division	Tehsil	Sub-Tehsil	Muncipality
1	2	3	4	5
1	Ganganagar	Ganganagar	HindumalKot	Ganganagar
		Sadulshahar	Chunawad	Sadulshahar
2	Karanpur	Karanpur	Kesrisinghpur	Karanpur
				Kesringhpur
		Padampur	Beenjh Mamla	Padampur
			Gajsinghpur	Gajsinghpur
3	Raisingh-nagar	Raisingh-nagar	Muklawa	Raisinghnagar
		Vijaynagar		Vijaynagar
4	Anupgarh	Anupgarh	-	Anupgarh
		Gharsana		
5	Suratgarh	Suratgarh	-	Suratgarh

District Collector is head of the district for revenue and Law and order matters. For his assistance, Addition District Magistrate an officer of Rajasthan Administration Service functions under him. Sub-divisional Officer/Magistrates are the officers responsible for implementation of law and order and revenue matters in their respective sub-divisions. Similarly, Tehsildars are responsible for maintaining law & order and implementation of revenue matters in their respective tehsils.

Zila Pramukh is the head of Zila Parishad where as Pradhan is head of Panchayat Samiti under Panchyati Raj. There is one Chief Executive Officer and one Additional Chief Executive officer in Zila Parishad. Block Development Officer or Vikas Adhikari is the Controlling Officer of Panchayat Samiti for Government Side, For the executive, coordination and monitoring of Developmental program there is District Rural Development Authority (DRDA) whose head is Zila Pramukh, Besides District Collector as its Executive Director there is one Project Director.

There composition of Panchayat Samities of the district is as given below:

Sl. No.	Name of Panchayat Samiti	No. of Villages	No. of Gram Panchayat	Tehsil
1	2	3	4	5
1	Ganganagar	273	44	Ganganagar
2	Sadulshahar	252	32	Sadulshahar
3	Karanpur	237	35	Karanpur
4	Padampur	247	36	Padampur
5	Raisinghnagar	407	47	Raisinghnagar
6	Anupgarh	1,131	88	Anupgarh Vijaynagar Gharsana
7	Suratgarh	467	38	Suratgarh
	Total	**3,014**	**320**	

Judicial Administration

A part from the District and Sessions Judge, the courts of ADJ 1, ADJ 2, ADJ 3, CJM (Chief Judicial Magistrate) ACJM are functioning at the district headquarter. Courts of Civil Judge (Junior Division), Additional Civil Judge (Junior Division) No.1 and Additional Civil Judge (Junior Division) No.2 are also functioning. A part from these, special courts of Scheduled Castes/Tribes, women Atrocities, Labour among Consumers are also functioning. Recently a fast track court has been setup at Anupgarh.

Out side the district headquarter, the courts of ADJ and ACJM in Raisinghnagar and of ACJM in Suratgarh and Karanpur are functioning, a part from these the courts of Civil Judge (Junior Division) and Judicial Magistrate are functioning at each tehsil headquarter.

Police

The Superintendent of Police at the district headquarter and Additional Superintendents of Police at Ganganagar and Raisinghnagar have been posted under Police Administration. There are 6 circles of Deputy Superintendents of Police, 23 Police Stations and 27 Police beats in the district. The Deputy Inspector General of Police range is Bikaner.

(iv) Physical Features

(1) Location and Size

Ganganagar district is situated on the northern region boundary of the state. It is located between $28^0$54' and $30^0$12' north latitude and between $72^0$39' and $74^0$18' east longitude. It is bounded by Punjab state on the north, Hanumangarh district on the east, Bikaner on the south and 212 km long international boundary adjoining Pakistan on the west.

(2) Physiography

The whole of the district is plain of extensive desert of Thar. The district has no hill, plateau etc. Ghaggar the only rainy river which enters near Rangmahal of Suratgarh tehsil into Hanumangarh district and enters into Pakistan from Binjor Sector of Anupgarh tehsil.

The area of the district is 10978 sq.km (as per district authorities) and ranks at 10^{th} among other district of the state. The district extends 180 km from North to South and 120 km from east to west in length.

Sand dunes exist in the southern part of the district being some times 10 to 15 meters in height. The average height of the district varies between 168 and 227 meters above the mean sea level. The natural slope of the land of the district is from east to west and north to south. Ghaggar the only river of the district flows for east to south west of the district. It divides the district into two natural divisions i.e. Northern and Southern divisions.

The district can be divided into three parts from geographical point of vies. Northern region of Gang and Bhakra Canal, flow area of Ghaggar river (Nalibad) and sandy tract of south.

The region comprising five tehsils of the district viz Karanpur, Ganganagar, Sadulshahar and Raisinghnagar is known as northern region of Gang and Bhakra canal. The entire region has become as plain and is being irrigated. Relatively this area is more developed and is green (forded).

Center of the district flow area of Ghaggar, which is locally known as Nali region. Northern parts of Suratgarh, Vijaynagar and Anupgarh tehsils come under Nali region. Ghaggar river spreads the (fertile soil) alluvial soil along with the flood water in its flow area. After the completion of Ghaggar flood control project in 1970, it has become the highest yielding area.

Southern area, the third part of the district is of sand dunes. Suratgarh, Vijaynagar, Anupgarh and Gharsana tehsils come under this area. This entire area is being irrigated from the Suratgarh and Anupgarh branches of the Indra Gandhi Canal Project. Artificial

lakes of Ghaggar flood control project do exist in the area. Due to the seepage of water from these artificial lakes the problem of dampness so erupted has changed lakes as curse from bone.

(4) Climate

This district comes under dry and low rainy area. Much variation is found in the temperature recorded. Following table the unevenness in the temperature.

Year	Temperature in Celsius		Average humidity Percentage
	Maximum	Minimum	
1	2	3	4
1993	43.0	5.1	52.1
1994	48.0	0.6	61.0
1995	48.0	1.0	69.1
1996	47.5	-0.5	59.0
1997	44.8	1.5	63.0
1998	48.8	1.5	61.0

During winters in the months of December-January, the entire district is being covered by fog. Sun was not visible continuously for a month in 1998.

Western hot winds in the summer and Northern cold winds during winter blow in the district. Sometimes sandstorms to which local people call as 'Andheri' also below in summers. The day time appears like night at the arrival of sandstorms. But the occurrence of sandstorms has been minimized due to the development of canal system and increase in the growth of vegetation and crops.

This district is low rainy area. Its annual average rainfall is 211 m.m. The rainy season remain active from July to mid September in the district. The south west monsoon tacks place during this period. The maximum rainfall occurred was in 1997 of 447 m.m. and the minimum in 2000 of 137 m.m. during the decade as is evident from the following table.

Year	Rainfall (in m.m)	Deviation from average rainfall
1	2	3
1991	231	20
1992	359	148
1993	236	25
1994	358	47
1995	291	80
1996	280	60
1997	447	236
1998	222	11
1999	148	-63
2000	137	-74

Source: O/o District Collector, Ganganagar

The dry climate of the district is appropriate for production of cotton Narma. The presence of humidity and moisture in the air assists in paddy production. The temperature in winter is favorable for crops of wheat, barley, mustard and gram.

However the acute coldness sometimes hampers mustard. Presence of fog for longer period comes increase in diseases in crops.

(5) Natural economic resources

Soil

The soil of the district is mainly of alluvial (Jalod) class. As per soil classification the district can be divided into three parts. Ghaggar basin region (central region), Northern and Southern parts. Alluvial (Jalod) clay is found in the basin of Gaggar. This area is better for paddy, wheat, mustard and cotton. In the northern part of the district, clay loom is found in Karanpur, Sadulshahar, Ganganagar, Padampur and Raisinghnagar tehsils. Its capacity for water conservaion and maintaing moisture is also good. Here the field of Narma, Cotton, Wheat, Mustard, Taramira crops etc is high. Suratgarh, Anupgarh and Gharsana tehsils are in the southern part of the district where sandy loom is found. The sand of this area in being concerned with the sand dunes of sand loom soil brought out by high winds. These sand dunes are being made of small Biotite and magnetite of quartz of recent and sub recent period.

The alluvial and clay loom soils of this district are also being used for manufacturing of bricks, tiles, pots, toys etc.

Minerals and Mining

The prime mineral of the district is Gypsum. It is found in Suratgarh and Gharsana tehsils. This is very important mineral which is being used for cement, fertilizers, plaster of Paris and in making fabulous film sets. It is also used in textile industry and building construction. The clay which is useful for brick construction in the district is found in the Ghaggar basin.

Forest, Flora and Fauna

Ganganagar district being in arid zone and because adverse climatic conditions and of low rain area, the forest wealth is negligible in the district. There has been a significant increase in the number of trees and plants after the development of first the Ganga canal

then Bhakra and now Indira Gandhi Canal System in the district. The total forest area of the district is 63.34 sq.km. of which 23.8 sq.km. is of rescued forest and 39.5 sq.km. is of unclassified forest. Forestation in the district is mainly done along canals and roads and on boundaries of cultivation lands done by cultivators.

Species like Shisham (Dalbergia sissoo), Mulberry and Eucalyptus are planted on the banks of canals. Protected forest area extends in several hectares of Shisham and Toot plantation. Along Rajasthan Feeder and Rajasthan Canal of plantation consist of Babul, Shisham and Khejra. Other important trees found in the district are Kikar (a kind of Acacia arabica), Neem (Azadirachta indica), Kair (Capparis aphylla). The vegetation of sand dunes are Phog (Calligonum polygonoides), Bui (Aerna tomentosa), Ak (Calotropis procera), Bawli (Acacia jacquemonti), Khimp (Leptadenia spartium), etc. In the alluvium soil of Ghaggar bed the species viz., Motha (Cyperus rotundus), Bathua (Chenopodium spp.), Lani (Haloxylon recurvum), Lana (Haloxylon seli ornis) etc are available. In order to meet the requirements of irrigated plantations there are several nurseries in the distrrict.

The birds most commonly found in the district are pigeons, crows, sparrows, peacocks and parrots. Poultry birds like cocks and hens are also available. Among the game birds are Batbar (Pterocles exustus & Pterocles orientalis) and Titar (Francolinus pondicerianus). Imperial and Desi Sandgrouses, quails, Kunj and Tillor. In the canals and distributaries the species of fish viz. labeo rohit, mastacembelus armatus, ophiocephalus, barilius bendelises, chela clupeodes and barbus tor are found while toads (Bufo) and frogs (Rana) are common especially after rainy season.

Land use pattern

The total geographical area of the district as per Survey of India is 12,650 Sq.Km. The reported area for the land utilization in 1999-2000 was 9,49,946 hectares.

Crop pattern

The alluvial, clay loom and sandy loom soils found in the district are fertile. The district has become the highest producing food grains in agriculture field of the state. This district is called as Punjab of Rajasthan. The cultivable land and the area sown in the district is as following:

Sl. No.	Classification of the land use	Area (in hectares) (1999-2000)
1	2	3
1	Total agricultural land	960,149
2	Cultivable land	73,667
3	Total area sown	949,946
4	Area sown more than once	282,055
5	Actual area sown	667,891
6	Irrigated area	861,446
7	Un irrigated area	98,703

Source: District Collector (LR) Ganganagar

The area of Ghaggar is must fertile in the districts whereas the southern part of the district, where sand dunes exist are less fertile and has uncultivable barren and sandy land.

Rabi and Kharif, both are the main crops in the district wheat, mustard, cotton, gram, paddy, sugarcane, bajra, barley, gawar are the main crops from production point of view in the district. The details of cropwise sown area in the year 2000-01 is as given below:

Sl. No.	Crop	Area (in hectares)	Production (in metric tonnes)
1	2	3	4
1	**Food Grain**		
	Wheat	218,400	654,642
	Paddy	4,588	17,205
	Bajra	2,938	2,668
	Barley	21,759	43,245
	Maize	71	71
2	**Pulses**		
	Gram	63,759	50,973
	Moong	3,626	1,620
	Others	633	224
3	**Oilseeds**		
	Mustard	145,463	144,770
	Groundnut	527	527
	Taramira	4,254	2,391
4	**Other Commercial Crops**		
	Cotton	217,252	217,252
	Sugarcane	2,843	93,819

Source: Zila Sankhikiya Rooprekha-2001

District tops in the production of wheat, sugarcane and mustard in the state. The drought condition and scarcity of water in canals prevailed in the year 2000-01. the irrigation department prohibited sowing of wheat in Rabi crop in Indira Gandhi Nahar Pariyojana. This badly affected the wheat production in this year.

The agriculture department is continuousely

encouraging horticulture and gardening in the district. "Ganganagri Kinnu" produced in the district is becoming famous in the country and in abrod. Kinnu, Maltta, Grapes, Lemon, Ber, Mango, Pome grarala, Gnawa etc are main fruits among the fruits produced in the district. Apart from these, vegetable are also being produced in ample quantity in the district.

Potato, Cabbage-cauliflower, Tomato, Onion, Cucumber, Shaljam, Chilly, lady finger, tinda, peanut, spinge, carrot, reddish, are among main vegetables.

Regional research center and horticulture center are functioning in Ganganagar to enhance agriculture production and to prepare high quality of crops in the district. There are central state farm in Suratgarh and cooperative agriculture farms in Sardargarh and Jetsau for agriculture work by scientific procedures. More than a dozen 'krishi upaj mandi' have been setup by the state agriculture marketing department for the regular sell and marketing of agriculture produce. Certified seeds, fertilizers, pesticides and agricultural implements are being made available to farmers in these mandies. Ganganagar, Karanpur, Sadulshahar, Padampur, Kesrisinghpur, Gajsinghpur, Raisinghnagar, Suratgarh, Vijaynagar, Anupgarh, Gharsana and Ramla are among the main Krishi Upaj Mandies of the district.

Tenancy

Tenancy in the State is governed by the Rajasthan Tenancy Act, 1955. It is one of the most important and progressive laws relating to agrarian reforms. The provisions of the Act apply in respect of land held by tenants as if the State Government were the land holder acting through the Tehsildars. In relation to the land held by him, every cultivator is either a tenant or a sub-tenant or an allottee or a trespasser. A tenant is one who is required to pay some rent on account of use and occupation of land let out to him for agricultural or allied purposes. Grantee with a favourable rate of rent, ijardar, thekedar or trespasser is not considered a tenant.

There are following classes of tenants:

a) Khatedar tenants,

b) Maliks,

c) Tenant of Khudkasht, and

d) Gair-Khatedar tenants.

A Khatedar tenant is entitled to all the rights conferred and subject to all the liabilities imposed on Khatedar tenant by the Rajasthan Tenancy Act. On the date of coming into force of Rajasthan Tenancy Act, a Zamindar or a Biswedar holding Khudkasht was treated as a Khatedar tenant irrespective of whether he was or not in occupation on the date of vesting.

Malik is a Zamindar or Biswedar who has become Malik or Khudkasht land held by him on abolition of Zamindari and Biswedari in 1959. The word "Malik" was also added to section 14 of the Rajasthan Tenancy Act to classify it as a class of tenant. Section 13 of the Act provides that a Malik is entitled to all the rights conferred and is subject to all the liabilities imposed on Khatedar tenant and so in substance this class of tenancy is nothing but a Khatedar tenant.

As Zamindars and Biswedars holding Khudkasht were treated as Khatedar tenants. A tenant of khudkasht is essentially a sub-tenant in view of the fact that a sub-tenant is also eligible for protection of his cultivatory rights even against Khatedar tenant. Every tenant of land other than a Khatedar tenant, a tenant of Khudkasht or a sub-tenant is a Gair-Khatedar tenant.

A trespasser is a person who takes or retains possession of land without authority or who prevents another person from occupying land duly let out to him by the State. After regularisation, the trespasser becomes an allottee. An allottee is treated as a Gair-Khatedar tenant on whom Sub-Divisional Officer shall suo-moto confer khatedari rights after ten years of allotment provided that the allottee fulfils all the terms and conditions of allotment during this period. Similar is the case of those allottees who were otherwise allotted land by the State Government.

Irrigation

Canal irrigation facility is available in this district since princely state period. Bikaner canal now known as Gangnahar system was built by Mharaja Ganga Singh of erstwhile Bikaner state in 1927. It is still called as Bikaner canal in Punjab state. Its total length is 129 km and established capacity is 2720 cusec. Gang canal system has 110 distributaries whose total length is 1153 km. This system has 60 percent irrigation potential. The actual irrigation potential has remained between 102.53 to 129.88 percent during the decade 1990-91 to 1999-2000 because of the irrigation done by cultivators along with tube well water. The irrigation area of this system is 307754 hectors. The Bhakra

canal system was developed in the 5th–6th decade of last century. Presently, under the Bhakra system irrigation is being done only in Sadulshahar tehsil. The area of Bhakra is now in newly created Hanumangarh district. The maximum area irrigation in the district is under INGP (Indira Gandhi Nahar Pariyojana). In some parts of the district irrigation is done through tube wells especially in bed area of Ghaggar. Irrigation is also done in Gang canal area by tube wells not as independent mean but as supplementary mean. The number of agriculture tube well was 6800.

The area irrigation by different mens of irrigation in 2000-01 in the district is as give below :

Source of irrigation	Area irrigated (in hectares)
1	2
Gang canal system	424,855
Bhakra canal system	117,530
IGNP	317,689
Tube well	1,372
Total	**861,446**

Animal Husbandry

This district is in developed state in animal husbandry. As per the cattle census of 1997 there are a total of 1351748 cattle in the district. Following is the number of cattle category wise:

Sl. No.	Type of animals	Number (year 1997)
1	2	3
1	Cows-Bullock	411,197
2	Buffaloes	331,891
3	Sheep	269,087
4	Goats	301,437
5	Camels	28,753
6	Pigs	5,403
7	Horses-Ponies	984
8	Donkeys-Mulls	2,996
9	**Total**	**1,351,748**
10	Hen	115,572
11	Duck	1,138
	Total	**1,468,458**

Source: Zila Sankhikiya Rooprekha-2001.

Camel, Ox are mainly useful in cultivation which are being used for pouching and transportation of agricultural produce. Horses, Donkeys, Ponies and Mules are being used in urban areas for short distance transportation and as goods carrier. Cows-Buffaloes are mainly used for milk production for own consumption and sale. Cows of Rathi, Hariyanis, Jersi and Holstein breeds are mainly found in the district whereas buffaloes of murrah and desi breed are found. Goats and sheep are mainly reused for production of wool and meat. Rearing of pigs is done for meat, Poultry rearing in for eggs and meat, consumption of eggs, meat and milk is done in the district itself. Military cantonments based in the district are their main uses, whereas wool goes to Bikaner mandi for sale. Fish fanning is also done in the artificial lakes of Indira Gandhi Nahar Pariyojana in the district. Its main center is Suratgarh. It is also used at local level.

Agriculture Implements & Machinery

As per livestock census of 1997 following are the main agricultural equipments and implements being used in the district by number:

Sl. No.	Name of equipment	Number
1	2	3
1	Seed cum fertilizer drill (man operated)	8,793
2	Seed drill (man operated)	10,012
3	Thresher (man operated)	1,265
4	Wooden plough	36,285
5	Iron plough	39,242
6	Cultivator (Tripholy)	33,597
7	Seed drill (Animal operated)	20,687
8	Animal cart	43,301
9	Oil Engine Pump set	3,575
10	Electric Pump set	1,960
11	Tractors (for agriculture)	26,135
12	Cultivator (Trailer)	23,071
13	Thresher (Power operated)	12,332
14	Leveler/Scraper (Animal operated)	12,501
15	Leveler/Scraper (Tractor operated)	10,655

Electricity

Much work has been done in the field of power generation in the district during last two years. Both the units of the Suratgarh Thermal Power Project have started functioning prior to the target date with derated capacity 500,000 kW. The district has 2 power houses of Anupgarh Hydel Station, at Anupgarh with derated capacity of 9000 kW. Similarly there is one power house as Suratgarh Mini Hydel Power house at Lakhuwali in the district with derated capacity of 4000 kW. (Source-RRVVNL Jaipur)

The consumption of electricity in the district during the year 2000-01 is as given below:

Sl. No.	Uses	Consumption in Million KW
1	2	3
1	Domestic Consumption	140.43
2	Commercial Consumption	32.58
3	Industrial Consumption	
4	Small	15.99
5	Medium	12.03
6	Large	78.98
7	Public Lighting	1.77
8	Public Water Works	14.95
9	Agriculture Consumption	75.92
10	Other Consumption	49.56
	Total	**422.20**

Transport and Communication

Roads: The total length of different type of roads in the district is 3488 km in the year 1999-2000. The National Highway No.15, which passes through district, has a total length of 124 km. The length of painted (B.T.) metalled (WBM) and concrete cemented roads is 3128 km, 146 km and 90 km respectively. In all 1349 villages were connected by roads. (Source: Supdt Engineer PWD, Ganganagar).

Rail: Ganganagar is directly linked to Jaipur & Delhi through metre and broad gauge of rail line. It is an important railway station from strategic point of view. There are in all 43 railway stations in the district.

Registration of Vehicles: In all 162733 vehicles of different categories were registered upto March 2001 in the district. The details of the vehicles registered is as given below:

Sl. No.	Vehicles Registered	Number
1	Motor Rickshaw	8
2	Two wheeler	78,159
3	Auto Rickshaw	1,234
4	Tempo	413
5	Cars	3,974
6	Jeeps	9,992
7	Tractors	52,171
8	Trailer	3,393
9	Bus	2,247
10	Truck	10,838
11	Taxi (Car-Jeep)	209
12	Other	95
	Total	**162,733**

Post, Telegraph and Telephones

During the year 2000-2001, Ganganagar district had 328 post offices, 93 telegraph offices, 105 telephone exchanges and 1118 public call offices (Rural).

Trade and Commerce

Ganganagar district's economy mainly revolves around agriculture. Wheat, gram, cotton, cotton textile, timber etc are the main commodities exported from the district while cement, fertilizers, leather and leather goods, salt, medicines and drugs, agricultural implements are being imported in the district.

Fourteen (14) Krishi Upaj Mandi Samities viz. (i)Ganganagar (ii)Raisinghnagar (iii)Karanpur (iv)Vijaynagar (v)Padampur (vi)Suratgarh (vii)Kesrisinghpur (viii)Sadulshahar (ix)Gajsinghpur (x)Anupgarh (xi)Gharsana (xii)Ridmalsar (xiii)Jetsar and (xiv) Rawla are functioning in the district during the year 1999-2000. Besides constructing markets/ yards at various places are also constructing link roads in villages.

There were 291 shops of country liquor, 52 of Foreign Liquor, 2 of Bhang, 2 of Opium and 20 other (Post Doda) functioning in the district.

The consumption of Sprit and Liquor manufactured in India, Country Liquor, Opium, Bhang and Doda was 2308000 liters, 5062000 liters, 10.19 kg, 120 kg and 270567 kg respectively in the district during the year 1999-2000.

In all 58 Petrol Pumps were operating at 29 different destinations in the district during the year 1999.

(**Source**: Office of Assistant Director, Agriculture Marketing Board, Ganganagar)

Gram Panchayats composition & its role

The system of Panchayati Raj was inaugurated on 2nd October 1959 in Nagaur district by then Prime Minister Late Shri Jawahar Lal Nehru. Late Shri Balwant Rai Mehta proposed the recommendation for Panchayati Raj. There are three levels of Panchayati Raj:

(1) Gram Panchayat (Village level)

(2) Panchayat Samiti (Block level)

(3) Zila Parishad (District level)

Gram Panchayat is an important institution of self-government. The institution is set for a village or village

agglomeration. A Gram Panchayat is created on 2,000-8,000 population. It covers a maximum area of 6 miles. The villages, which have population below 2,000, are merged with the other villages to create a Gram Panchayat. Their tenure is of 5 years.

A Gram Panchayat consist 5 to 20 members. The Head of the Panchayat is called Sarpanch. Panch and Up-Sarpanchs are also elected. It includes a member belonging to backward class and a lady member. There are 151 Gram Panchayats in the district.

The main objectives of Gram Panchayat are to arrange the primary education, sanitation of public places, drinking water and light. It manages also the adult education, livestock and repairing of wells.

During the last years, Gram Panchayats functioned several important jobs like *Kam Ke Badley Anaj*, Construction of Panchayat Ghar, School buildings, roads and tanks. It organizes also the cattle fair. Gram Panchayat plays an important role in the development of village and its economy.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as

store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one

census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc. even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/hotel building was treated as one census house, but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g. the main house, the servant's quarter, the garage, etc. only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban

spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential

Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1. Adi Dharmi
2. Aheri
3. Badi
4. Bagri, Bagdi
5. Bairwa, Berwa
6. Bajgar
7. Balai
8. Bansphor, Bansphod
9. Baori
10. Bargi, Vargi, Birgi
11. Bawaria
12. Bedia, Beria
13. Bhand
14. Bhangi, Chura, Mehtar, Olgana, Rukhi Malkana, Halalkhor, Lalbegi, Balmiki, Valmiki, Korar, Zadmalli
15. Bidakia
16. Bola
17. Chamar, Bhambhi, Bambhi, Bhambi Jatia, Jatav, Jatava,Mochi, Raidas, Rohidas, Regar, Raigar, Ramdasia, Asadaru, Asodi, Chamadia, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Telegu Mochi, Kamati Mochi, Ranigar, Rohit, Samgar
18. Chandal
19. Dabgar
20. Dhanak, Dhanuk
21. Dhankia
22. Dhobi
23. Dholi
24. Dome, Dom
25. Gandia
26. Garancha, Gancha
27. Garo, Garura, Gurda, Garoda
28. Gavaria
29. Godhi
30. Jingar
31. Kalbelia, Sapera
32. Kamad, Kamadia
33. Kanjar, Kunjar
34. Kapadia, Sansi
35. Khangar
36. Khatik
37. Koli, Kori
38. Kooch Band, Kuchband
39. Koria
40. Madari, Bazigar
41. Mahar, Taral, Dhegumegu
42. Mahyavanshi, Dhed, Dheda, Vankar, Maru, Vankar
43. Majhabi
44. Mang, Matang, Minimadig
45. Mang, Garodi, Mang Garudi
46. Megh, Meghval, Meghwal, Menghvar
47. Mehar
48. Nat, Nut
49. Pasi
50. Rawal
51. Salvi
52. Sansi
53. Santia, Satia
54. Sarbhangi
55. Sargara
56. Singiwala
57. Thori, Nayak
58. Tirgar, Tirbanda
59. Turi

Scheduled Tribes

1. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawara, Vasava, Vasave
2. Bhil Mina
3. Damor, Damaria
4. Dhanka, Tadvi, Tataria, Valvi
5. Garasia (excluding Rajput Garasia)
6. Kathodi, Katkari, Dhor Kathodi, Dhor, Katkari Son Kathodi, Son Katkari

7. Kokna, Kokni, Kukna
8. Koli Dhor, Tokre Koli, Kolcha, Kolgha
9. Mina
10. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
11. Patelia
12. Seharia, Sehria, Sahariya

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main-worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any econom ically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting

and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc. in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude Birth Rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude Death Rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age Specific Fertility Rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age Specific Marital Fertility Rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General Fertility Rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General Marital Fertility Rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total Fertility Rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total Marital Fertility Rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-Specific Mortality Rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant Mortality Rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal Mortality Rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early Neo-natal Mortality Rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late Neo-natal Mortality Rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Neo-natal Mortality Rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal Mortality Rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still Birth Rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal Mortality Rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child Woman Ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child Woman Ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types— (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration) (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic Status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs/ towns. These Class I UAs/towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum Area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) Are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City

The concept of 'Mega City' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding - population, its distribution

According to the 2001 census, the total population of Ganganagar district is 1,789,423 comprising 955,378 males and 834,045 females and constituting 3.2 percent of State population and area spread over 3.2 per cent in the 9 tehsils of the district, Ganganagar tehsil is most populous tehsil having population 424,206 while Vijainagar is the smallest tehsils having a population of 125,709 persons. Other tehsils in order of their population size are Suratgarh (275,023), Raisinghnagar (185,070), Gharsana (175,987), Anupgarh (174,413), Padampur (147948), Sadulshahar (144,124) and Karanpur (136,943).

Out of the total population of the district 74.7 per cent lives in rural areas while 25.3 per cent lives in urban areas. The corresponding proportions in rural and urban areas of the State are 76.6 per cent and 23.4 per cent respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF TEHSILS BY RESIDENCE, 1991-2001

Sl. No.	District/Tehsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

9	Suratgarh	202,882	157,012	45,870	275,023	213,384	61,639	35.6	35.9	34.4	22.6	22.4
	District Total	**1,402,444**	**1,068,255**	**334,189**	**1,789,423**	**1,336,066**	**453,357**	**27.6**	**25.1**	**35.7**	**23.8**	**25.3**

The district has registered a percentage decadal variation of 27.6 during the decade 1991-2001. The urban areas of the district has attained a higher decadal variation of 35.7 per cent as compared to that of rural area at 25.1 per cent. At tehsil level, it varies from the lowest of 12.1 per cent in Karanpur tehsil to a maximum of 57.6 per cent in Gharsana tehsil in total areas.

There is a little increased in the percentage of urban population to total population from 23.8 in 1991 to 25.3 in 2001. All the tehsils have registered the same trend as that of district whose percentage of urban population has increased from 1991 to 2001 except in Raisinghnagar, Anupgarh Vijaynagar and Suratgarh tehsils where it has declined from 15.09,17.16,14.72and 22.6 per cent in 1991 to 15.00,17.00,14.20 and 22.4 per cent in 2001.

Of the total 3014 villages, 2830 are inhabited villages. Anupgarh Panchayat Samiti has the highest number of villages i.e. 1090 where as Karanpur Panchayat Samiti with lowest of 207 villages. Again, Anupgarh Panchayat Samiti is the most populous with 417746 persons while again Karanpur is the least populous Panchayat Samiti with a population of 103094 persons. The maximum numbers of villages i.e. 1171 are those which lie in the population range of less then 200. It is followed by 31.0 per cent of the inhabited villages, which have population range of 500-999. As regards to large size villages in the district, 7 are such which lie in the population range of 5000-9999 and 2 are such which have population more than 10000.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

		Name of Towns
(a)	**New**	
(i)	Statutory town	Nil
(ii)	Census town	1. 3 STR 2. 1 SGM
(b)	**Denotified**	Nil
(i)	Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
(ii)	Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
(iii)	Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c)	**Declassified***	Nil
(d)	**Wholly merged with other town (s)**	Nil

* Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Only two Census towns has emerged namely 3 STR and 1 SGM respectively.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5

District Total	**2,830**	**100.0**	**1,336,066**	**100.0**

Population Density (Rural) of the district: 122

The density of population of the rural areas of the district is 122. Of the total number of inhabited villages i.e. 2830 in the district, 24.5 per cent have population density ranging from 101 to 200, followed by 21.3 per cent in the range of 51-100. Apart from these 934 villages have population density upto 50.

TABLE 5: SEX RATIO OF STATE AND DISTRICT , 1991-2001

Census year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	905	898	947	853	854	819
1911	908	904	936	818	817	873
1921	896	896	897	857	857	850
1931	907	906	903	797	809	636
1941	906	907	897	814	824	713
1951	921	919	928	829	844	752
1961	908	913	882	841	855	769
1971	911	919	875	862	877	803
1981	919	930	877	860	875	808
1991	910	919	879	865	871	847
2001	**921**	**930**	**890**	**873**	**883**	**845**

Note: Sex ratio has been defined here as the number of females per 1000 males.

The district has witnessed a fluctuating trend in sex ratio since 1901. From 853 in 1901 it declined to 818 in 1911. It again increased to 857 in 1921 and declined to 797 in 1931 and so forth. During the last decade i.e. 1991-2001 it has increased from 865 in 1991 to 873 in 2001.

In comparison to rural areas of the district the sex ratio in urban areas has been lower except 1911. The district has always registered lower sex ratio as compared to that of state since.

TABLE 6 : SEX RATIO BY TEHSILS, 2001

Sl. No.	Name of Tehsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Karanpur	895	897	887
2	Ganganagar	856	887	829
3	Sadulshahar	846	841	874
4	Padampur	902	906	883
5	Raisinghnagar	904	913	855
6	Anupgarh	893	903	848
7	Gharsana	889	890	864
8	Vijainagar	884	887	868
9	Suratgarh	840	839	842
	District Total	**873**	**883**	**845**

The district has registered a sex ratio of 873 in 2001. Where as for rural and urban areas it is 883 and 845 respectively. At the tehsil level, the highest sex ratio of 904 has been registered by Raisinghnagar tehsil and the lowest of 840 by Suratgarh tehsil for total and rural areas. In case of urban areas the highest sex ratio of 887 has been attained by Karanpur tehsil and the lowest of 829 by Ganganagar tehsil.

TABLE 7 : SEX RATIO BY PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Sex ratio
1	2	3

District (Rural) Total	**2,830**	**100.0**	**231,136**	**100.0**
Sex ratio (Rural) for District:		861		

Of the total inhabited villages (2830) of the district 58.9 per cent are such which have sex ratio below 900. Even among them 758 and 165 villages have sex ratio less than 700 and 700 to 749 respectively. It is significant to note that more than one fourth (30.2 per cent) of the total inhabited villages have sex ratios favouring females i.e. 1000 or more. Among them 528 villages have sex ratios even more than 1100.

		Urban	**453,357**	**92,216**	**10,761**	**20.3**	**2.4**

The proportion of scheduled castes and scheduled tribes population to the total population of the district is found to be 33.7 per cent and 0.8 per cent respectively. For rural areas the respective proportions for scheduled castes and scheduled tribes comes out to be 38.3 per cent and 0.3 per cent. Similarly in urban areas of the district the percentage of scheduled castes population and the scheduled tribes population to the total population is found to be 20.3 and 2.4 respectively.

As tehsil level, the proportion of scheduled castes to total population varies for 41.4 per cent in Anupgarh tehsil to 24.7 per cent in Ganganagar tehsil. In case of scheduled tribes this proportion varies from 1.2 per cent in each Karanpur and Ganganagar tehsils to 0.4 per cent in Sadulshahar tehsil.

\+ To be arranged in alphabetical order.

* In case of towns having outgrowth an astrik mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

Among the towns of Scheduled Tribe of Ganganagar district, the highest literacy rate of 76.2 per cent has been attained by 1 SGM (CT) whereas the lowest literacy rate of 47.7 per cent has recorded in Vijainagar (M). It is significant to note that among the male highest literacy rate is cent per cent in 1 SGM (CT) and lowest literacy rate of 62.3 per cent in Kesrisinghpur (M). Among the females the highest literacy rate of 54.5 per cent in 1 SGM (CT) and lowest rate of 37.2 per cent in Kesrisinghpur (M). The highest gap 45.5 per cent in 1 SGM (M) and lowest 23.2 per cent in Padampur (M).

In the district, 40.2 per cent of the total population comprises of total workers (main + marginal) and the rest 59.8 per cent as non-workers. Of the total workers (40.2 percent), 30.9 per cent are as main workers and the rest 9.3 per cent as marginal workers. Sex wise, more than (53.5) 50 per cent of male population is that of workers whereas for females this percentage is 25.0. At the tehsil level, Sadulshahar tehsil has recorded the highest percentage of total workers for both males and females being 56.5 per cent and 36.8 per cent respectively. On the other hand, Gharsana tehsil has recorded the lowest percentage of total workers for males being 52.7 per cent and 14.2 per cent for females.

More than 40per cent of the rural population consists of workers i.e. 43.4. There is a much difference in the work participation rates of males and females being 54.5 per cent and 30.8 per cent respectively for the rural areas of the district. Like at tehsil level, at Panchayat Samiti level too, the highest percentage of male and female workers has been recorded in Karanpur Panchayat Samiti at 58.2 and 42.3 respectively. However, the lowest percentages for males have been registered by Anupgarh Panchayat Samiti at 53.0 and 22.6 for females by Ganganagar panchayat samiti.

\+ To be arranged in alphabetical order

^ The names of constituens units of U.A. are given separately

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

In contrast to the rural areas of the district only 30.9 per cent of the urban population is as workers (main + marginal). Apart from this much variation is also seen in the percentage of male and female workers, which are 51.1 and 7.1 respectively. Among the towns, the percentage of workers varies from 56.3 in 1 SGM (CT) to 27.5 in Suratgarh (M).

				(25.0)	**(39.7)**	**(32.4)**	**(2.5)**	**(25.4)**

Note: Percentage of workers to total workers are given in brackets.

Cultivators are the main working force in the district as they form 37.7 per cent of total workers. It is followed by other workers (37.1 per cent), agricultural labourers (23.0 per cent) etc. Male (188628) outnumber females (82606) as cultivators. Much variations in the percentages of male workers (41.9) and female workers (25.4) classified as other workers is seen in the district.

At tehsil level, the percentage of cultivators to total workers varies from 49.5 in Gharsana tehsil followed by 47.2 in Raisinghnagar tehsil to 46.4 in Vijainagar tehsil. For Household Industry workers, it varies from 3.3 per cent in Ganganagar tehsil to 1.5 per cent in each Vijainagar and Suratgarh tehsils. In case of 'other workers' the highest percentage of 58.7 has been registered by Ganganagar tehsil while the lowest of 24.8 per cent in Raisinghnagar tehsil.

Note: Percentage of workers to total workers are given in brackets.

More than 40.0 per cent (43.4) of the total rural population of the district is engaged in economic activities being workers. Of the total workers, most are engaged in agricultural activities i.e. 46.4 per cent are as cultivators and 27.9 per cent as agricultural labourers. Only 1.8 per cent of the workers are engaged in household industries whereas the 24.0 per cent in other works.

Almost similar trend has been observed in all the panchayat samities.

Sex wise, percentage of male workers is higher in all the four economic categories except cultivators where their percentage is 48.2 as compared to that of females at 42.7 at the district level.

\+ To be arranged in alphabetical order.

^ The names of constituent units of U.A.are given separately

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

The percentage of workers to total population of urban areas is significantly quite low being only 30.9 per cent as compared to that of rural areas of the district being 43.4 per cent. Here too, the percentage of workers engaged in four economic categories is just the reverse as compared to rural workers where majority i.e. 91.5 per cent of the total urban workers are as 'other workers' followed by 3.9 and 2.8 per

cent as cultivators and household industry workers and agricultural labour respectively.

Almost similar trend is visible in all the municipal towns except in Karanpur (M), Ganganagar (UA) and its components, Padampur (M), Gajsinghpur (M), Raisinghnagar (M), Anupgarh (M) and Suratgarh (M) where the percentage of household industry workers is higher than that of agricultural labourers and cultivators.

Sex wise percentage of male workers as other workers is almost close to the female other workers being 92.6 and 82.4 per cent respectively. On the other hand, percentage of female cultivators (1.5 per cent) is also very close to male cultivator's (1.8) at the district level for urban areas.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Sl. No.	Name of Panchayat Samiti	Number of inhabited villages	Type of amenity available

		(100)	**(59.1)**	**(23.1)**	**(76.9)**	**(12.7)**	**(45.8)**	**(53.2)**	**(2.9)**	**(16.1)**	**(64.0)**	**(64.2)**

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total (2830) inhabited villages, 1672 (59.1 per cent) have educational facilities. In case of medical amenities only 23.1 per cent of inhabited villages have such amenities. A significant number i.e. 2175 (76.9 per cent) villages have improved drinking water amenities. In the communication field only 12.7 per cent of villages have post office facilities while 45.8 per cent have telephone facilities. In the banking field the picture is gloomy as only 82 (2.9 per cent) villages have banks. More than 60 per cent i.e. (1812) are linked with pucca approach roads whereas 64.2 per cent have power supply.

At tehsil level, Karanpur tehsil has the higher percentage i.e. 82.6 of villages having educational facilities. For medical amenities it is Padampur tehsil, which have highest percentage of 38.9. Much variation is seen among the tehsils having telephone facilities. Karanpur tehsil has the highest percentage of villages i.e. 74.9, which have telephone facilities whereas Anupgarh has the minimum percentage of 29.9 for such facility. Ganganagar tehsil has the 94.2 percent villages having power supply.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It is significant to note that the 86.5 percent of rural population of the district is being served by educational amenities. It varies from 96.2 per cent in Karanpur Panchayat Samiti to 78.1 per cent in Anupgarh Panchayat Samiti. The highest percentage (77.2) of population availing medical amenities has been found in Sadulshahar Panchayat Samiti while lowest of 37.9 in Anupgarh Panchayat Samiti. Ganganagar Panchayat Samiti at the top where 98.6 per cent of the population has access to improved drinking water while Suratgarh Panchayat Samiti is at the bottom with 78.7 per cent. Sadulshahar Panchayat Samiti is in the forefront in the field by telephone facilities where 92.0 per cent of the population has been served by this facility while Anupgarh Panchayat Samiti is at bottom with 54.3 per cent. Only 14.2 per cent of the rural population is being served with banking facilities whereas 81.0 per cent have access to power supply. Almost cent percent (99.5) of the population of Ganganagar Panchayat Samiti is being served with power supply.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001 ***(Contd)***

(b) Cooperative Bank	426	791	1,561	2,778
7. Agricultural Credit Societies	1,165	746	462	2,373

There are 1177 villages in the district, which do not have primary schools, of these, in 1001 villages this amenity is available in less than 5 kilometers. In case of middle schools, 2294 villages do not have this amenity. Of these, for 1547 villages this amenity is available at a distance of less than 5 km, for 640 villages at a distance of 5-10 km. None of the villages in the district have a degree college. For most of the villages i.e. 2438, the degree colleges are available at a distance beyond 10 km.

Likewise, none of the villages have hospitals. For this in most of the villages i.e. 2291 one has to go for more than 10 km. Similarly post office amenity is not available to 2472 villages. Of these, for 1362 villages, this amenity is available at a distance less than 5 km. Of the total 2830 villages, Bus services are not available in 1330 villages. Among these, this facility is available at a distance of less than 5 km and 5 to 10 km for 914 and 327 villages respectively.

As regards to banking services, 2772 and 2778 villages do not have commercial banks and cooperative banks respectively. For most of the villages i.e. 1147 and 1561 one has to go for more than 10 km for commercial banks and cooperative banks respectively.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Of the total inhabited village's (2830), majority (2047) of them have population range of 1 - 499. It is followed by 465 villages in the range of 500-999. There are 7 and 2 such villages, which have population range of 5000-9999 and 10000+ respectively.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of Panchayat Samiti	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Karanpur	207	72,003	91.4	86.6
2	Ganganagar	257	80,273	90.4	95.4
3	Sadulshahar	237	85,061	91.8	78.0
4	Padampur	239	80,465	93.2	82.8
5	Raisinghnagar	367	118,277	91.9	70.4
6	Anupgarh	1,090	326,807	73.0	75.2
7	Suratgarh	433	273,499	74.2	31.7
	District Total	**2,830**	**1,036,385**	**81.2**	**67.7**

Note : Cultivable area = irrigated area + unirrigated area

Of the total rural area of the district (of inhabited villages) 81.2 per cent is cultivable. Apart from this 67.7 per cent of the total cultivable area is being irrigated. At the panchayat samiti level the highest percentage of cultivable area to total area is found at 93.2 per cent in Padampur Panchayat Samiti followed by 91.9 per cent in Raisinghnagar and the lowest of 73.0 per cent in Anupgarh Panchayat Samiti. As regards to irrigated area, the highest percentage of 95.4 is found in Ganganagar Panchayat Samiti whereas 31.7 in Suratgarh Panchayat Samiti.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name and urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Anupgarh (M)	602.0	108.0	494.0	602.0	195.0	134.0	268.0	0.0	6.0
2	V Gajsinghpur (M)	689.0	336.0	353.0	646.0	90.0	165.0	147.0	0.0	243.0
3	I Ganganagar (MCL)	385.0	312.0	73.0	363.0	100.0	138.0	115.0	0.0	11.0

5	IV Kesrisinghpur (M)	634.0	105.0	529.0	634.0	272.0	117.0	69.0	0.0	176.0
6	IV Padampur (M)	724.0	237.0	487.0	689.0	274.0	173.0	91.0	151.0	0.0
7	III Raisinghnagar (M)	705.0	112.0	593.0	700.0	442.0	0.0	157.0	0.0	100.0
8	III Sadulshahar (M)	657.0	187.0	470.0	640.0	150.0	177.0	221.0	0.0	93.0
9	II Suratgarh (M)	560.0	264.0	296.0	535.0	29.0	150.0	149.0	0.0	207.0
10	IV Vijainagar (M)	550.0	314.0	236.0	546.0	58.0	154.0	94.0	6.0	234.0
	District Total	**494.0**	**253.0**	**241.0**	**473.0**	**129.0**	**134.0**	**133.0**	**6.0**	**71.0**

The per capita receipt by the statutory towns of the district amounts to Rs.494.0. Of this, Rs.253.0 is being received through taxes and the remaining Rs.241.0 from all other sources. The highest per capita of Rs.725.0 has been attained by Padampur (M) followed by Rs.705.0 by Raisinghnagar (M). The lowest per capita receipt of Rs.385.0 has been registered by Ganganagar (M.Cl).

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary/ Middle	Secondary/ Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Anupgarh (M)	3.0	6.4	1.4	0.7	0.7
2	Gajsinghpur (M)	3.1	3.1	2.1	3.1	1.0
3	Ganganagar (MCL)	1.9	2.4	0.6	0.5	0.1
4	Karanpur (M)	7.2	2.9	1.9	1.9	0.5
5	Kesrisinghpur (M)	11.4	6.8	3.0	2.3	0.8
6	Padampur (M)	4.7	4.1	0.6	0.6	0.0
7	Raisinghnagar (M)	2.2	5.4	1.4	1.1	0.7
8	Sadulshahar (M)	1.8	0.4	0.9	0.9	0.0
9	Suratgarh (M)	1.4	0.3	0.2	0.3	0.2
10	Vijainagar (M)	3.9	7.3	1.1	1.1	0.0
	District Total	**2.7**	**2.9**	**0.9**	**0.8**	**0.3**

The number of primary, middle and secondary schools per 10000 of population is 2.7, 2.9 and 0.9 respectively. As regards to senior secondary and college, this number is 0.8 and 0.3 respectively. At the town level, the maximum number of primary schools per 10000 population is found in Kesrisinghpur (M) at 11.4 followed by Karanpur (7.2), Padampur (4.7) etc. It varies from the highest number of middle schools per 10000 populations at 7.3 in Vijainagar (M) to a lowest of 0.3 in Suratgarh (M). As regards to colleges, the highest number i.e. 0.7 is found each in Anupgarh and Raisinghnagar, whereas the number '0' has been recorded in Padampur (M) and Vijainagar (M).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town+	Number of beds in medical institutions per 10,000 population
1	2	3
1	1 Sgm(CT)	0
2	3 Str(CT)	16
3	Anupgarh(M)	17
4	Gajsinghpur(M)	6
5	Ganganagar(M.Cl.)	43
6	Karanpur(M)	24
7	Kesrisinghpur(M)	5
8	Padampur(M)	7
9	Raisinghnagar(M)	25
10	Sadulshahar(M)	22
11	Suratgarh(M)	10
12	Vijainagar(M)	17
	District Total	**29**

+ To be arranged in alphabetical order.

The number of beds in medical institutions in towns per 10000 population is found to be only 29. The highest number of beds per 10000 population is recorded at 43 in Ganganagar (MCL) followed by Raisinghnagar (M) (25) Karanpur (M) (24), Sadulshashar (M) (22) etc. It is found the lowest '0' in 1 SGM (CT).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town+	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Gajsinghpura	9,630	3,000	31.2
2	Ganganagar	222,858	32,510	14.6
3	Karanpur	20,694	21,000	101.5
4	Padampur	16,956	6,842	40.4
5	Sadulshahar	22,326	8,500	38.1
6	Vijay Nagar	17,873	1,838	10.3
	District Total	**310,337**	**73,690**	**23.7**

+ To be arranged in alphabetical order.

About one fourth of urban population of the district lives in slums. At the town level it varies from a maximum of in Karanpur (M) to a lowest of 10.3 per cent in Vijai Nagar town.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town+	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	1 Sgm (CT)		Cotton Wheat Rice
2	3 Str (CT)	Gram Mustard Cotton	Cotton Cotton Seeds Wheat
3	Anupgarh (M)	Cotton Seeds Vegetable Oil Agri. Equipments	Cotton Vegetable Oil Wheat
4	Gajsinghpur (M)	Cotton Oil Oil Cake	Oil Seed Cotton
5	Ganganagar (M.Cl.)	Cloth Sugar Liquor (Imfl)	Cotton Sugar Malta Fruit
6	Karanpur (M)	Furniture Mustard Oil Soap	Wheat Cotton Mustard
7	Kesrisinghpur (M)	Cotton Bales Mustard Oil Khal	Wheat Mustard Cotton
8	Padampur (M)	Cotton Bread Plastic Pipe	Cotton Wheat Mustard
9	Raisinghnagar (M)	Mustard Oil Agri. Equipments Cotton	Cotton Mustard Gram
10	Sadulshahar (M)	Cotton Mustard Oil Gram	Cotton Mustard Oil Wheat
11	Suratgarh (M)	Ginned Cotton Ice Soap	Cotton Rice Gram
12	Vijainagar (M)	Cotton Bricks Soap	Rice Wheat Oil Seeds

+ To be arranged in alphabetical order.

Food grain which includes Grom, wheat, Rice, Mustered oil etc are mainly manufactured in manufactured in all the towns. Other commodities being manufactured in various towns are – Briks Soap etc.

Staple food, which include Grom, Wheat etc are the main commodities being exported from various towns. Apart from these, Cotton, Mustered Oil and Vegitable Oil are the other main commodity being exported from various towns of Ganganagar district. Malta Fruit is also exported from the Ganganagar (M.Cl.).

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house. Drainage means closed and open drainage.

(i) Improved drinking water : Majority of the households i.e. 75.6 per cent have drinking water facility in the district. For rural and urban areas, these percentages are 68.2 and 96.0 respectively. At tehsil level, for rural areas, the highest percentage 82.1 of households availing this facility has been found in Sadulshahar tehsil whereas for urban areas it is 99.1 per cent in also Sadulshahar tehsil.

(ii) Electricity : Majority of the household i.e.63.28 per cent are using electricity. However there is much wide gap in the percentage of households using electricity in the rural 54.3 per cent and urban 87.9 per cent areas of the district. At tehsil level it varies from a maximum of 82.8 per cent to a minimum of 36.1 per cent of households using electricity.

(iii) Bathroom : More than half i.e. 71.1 per cent of the households have bathrooms in the district. There is no wide gap is seen in the percentage of households having bathroom in rural and urban areas, as these are 67.4 per cent and 81.4 per cent respectively. Similar trend is seen in all the tehsils of the district.

(iv) Toilet : In case of toilets, the picture is good in rural as well as urban areas of the district i.e. 77.2 and 91.0 per cent respectively. The highest percentage 93.6 of households having toilet facility is found in Sadulshahar tehsil whereas the lowest of 70.7 per cent in Karanpur tehsil.

(v) Drainage : In case of usage of drainage, the position is poor. Only 31.6 of households have drainage in their houses. In rural areas the position is even worse, where only 14.6 per cent of households have drainage system as against 78.1 per cent in urban areas.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."
Percentage in brackets.

Majority of the households 44.3 per cent of the district is using firewood as fuel followed by crop residual 35.2 per cent, cooking gas 14.1 per cent, and Kerosen 5.2 per cent. In the rural and urban areas of the district, much deviation is seen in the percentage of households using fire wood and cooking gas as 48.2 per cent and 3.6 per cent of households of rural areas are using these respectively in comparison of 33.6 per cent and 42.9 per cent of urban areas respectively. Similar trend is seen at tehsil level also.

Data source: Census of India 2001.H-Series:" Tables on Houses, Household amenities and Assests"

(i) Banking services : Only 31.4 per cent of the total household's 2,94,285 are availing Banking services whereas in rural and urban areas this percentage is 27.2 and 43.1 respectively. At tehsil level, the highest number of households 27,946 availing this facility has been found in Ganganagar tehsil, while the lowest 5,953 in Vijainagar tehsil.

(ii) Radio/Transistor : Of the total household's 2,94,285 of the district, 44.3 per cent are in possession of Radio/Transistor. Similarly in rural and urban areas of the district, the percentage of households having radio/transistor is 46.8 and 37.5 per cent respectively.

(iii) Television : In case of Television, the percentage of households possessing it is much higher i.e. 70.6 in urban areas than that of in rural areas at 30.5 per cent only.

(iv) Telephone : Only 13.7 per cent of the total household's 2,94,285 of the district have telephones. The gap is much wider in rural and urban areas of the district where 8.2 per cent and 28.9 per cent of their

respective total households have telephones respectively.

(v) Auto mobiles : In case of two wheelers, only 14.6 per cent of the households have either motor cycle or scooter or moped. For rural and urban areas these percentage are 10.3 and 26.3 respectively. The picture is somewhat better in case of rural areas where 3.1 per cent have four wheelers in comparison to two wheelers. In urban areas only 4.6 per cent of households have four wheelers.

It is very significant that more than one fourth of the households i.e. 27.6 per cent do not have any of the specified assets. In rural areas this percentage is even higher i.e. 32.0 as compared to that of in urban areas at 15.3.

(xi) Other Developmental Activities during 1999-2000

The details of progress made by District Rural Development Authority, Ganganagar for Rural Development is given as under :

Swaran Jayanti Gram Swarojgar Yojna

Prior to 1.4.99 this scheme was known as Integrated Rural Development Program (IRDP). Under this scheme during the year 1999-2000 in all 2143 families were benefited including 1180 belonging to scheduled caste. An amount of Rs.395.01 Lac was spent in the form of grants.

Jawahar Gram Samridhi Yojana

This program was known as Jawahar Rojgar Yojana prior to 1.4.99. Under this program, 0.23 Lac of man-days were generated for 6 works and 0.8 Lac of rupees were spent. Indira Avas Yojana is also included in this program. Under the Indira Avas Yojana, 1055 families belonging to scheduled castes were benefited and an expenditure of Rs.109.46 Lac was incurred on them.

Swaran Jayanti Shahri Rojgar Yojana

Under this program for self-employment, a target of 565 works was kept during the year 1999-2000 whereas only 200 works could available and an amount of Rs.4.68 Lac was spent on them. Similarly 210 persons were trained under the scheme during the year 1999-2000.

Sansad Kshetriya Vikas Kosh Yojana

Of the total 409 works sanctioned only 205 were completed and Rs.374.25 Lac were spent during the year 1999-2000 under this program.

Social and Cultural Activities

The entertainment sources are folk dances, organization of dramas and arrangements of various types of in-door games. Institutions like Rashtriya Kala Mandir and Ganganagar Mahavir Dal are run at Gananagar City of which the former institution is engaged in imparting training in classical music and the latter entertains by organizing programs like dramas etc. Folk dances are usually organized at the changing season. Among the popular dances, mention may be made of Dandia-Ras-Nritya, Ghumer, Bhangra and Giddha.

Fairs and Festivals

Some of the important fairs held in the district are as follows:

Gangaur Fair

This fair is organized at Ganganagar town in the month of Chaitra (March-April). Both married and maidens celebrate the Gauri, their deity. Married women offer worship for the welfare, health and long life of their husbands while the latter for being blessed with good nature husbands of their choice. This festival commences on the first day of Chaitra and continues upto the fourth day of the second half of the month. All the images of Isar and Gauri made of clay are consigned to waters in some tank or well on the last day.

Budha Johar Fair

A fair is held on every Amavasya at the Gurudwara in village Budha Johar of Raisinghnagar tehsil. The main fair takes place on Bhanon ki Amawasya (August). The story goes that Mahtab Singh was one among the party of Budhasingh Jathedar of Sikhs, returned to Budha Johar on Bhadon ki Amawasya with the head of Massa Ranghar after killing him at Amritsar, who was a Muslim adventurer of Punjab. It is believed that on this occasion i.e. their triumphant return from Amritsar, an annual fair is being held since then.

Among the other fairs held in the district mention may be made of Fojjuwala, Hanumanji fair at Suratgarh, Birbalsingh Shaheed fair at Raisinghnagar, Dada Pemji

fair at Vijainagar, Vijaya Dashmi fair at Ganganagar and cattle fairs at Padampur, Karanpur and Sadulshahar.

The main festivals of Hindus are Deewali, Holi, Dashera, Gangaur, Sheetla Ashtami, Akshaya Tritya, Raksha Bandhan, Makar Sankrani etc. The birth days of all the ten Gurus are celebrated by the Sikhs but the birth days of first Guru Nanak and the tenth Guru Govind Singh are celebrated on a larger scale. Muhammadan festivals are Bara Wafat, Shab-e-barat, Ramzan, Moharrum, Idul Fitar and Idul-Juha.

(xii) Places of Religious,Historical and Archaeological Importance and Tourist Interest

Following places are of great importance in the district:

Ganganagar

Being the district headquarters, it has a population of 161482 according to 1991 Census. Prior to the opening of Gang Canal, this was a small village called Ramnagar in Mirzewala tehsil of erstwhile State of Bikaner. After the advent of Gang Canal in 1927, a Mandi was established here and named 'Ganganagar' after Maharaja Gangasingh. This City has, since then, developing rapidly due to the increase in irrigational facilities and the resultant growth of trade and industry in the area. Important industrial concerns are functioning at this place. It is well connected by rail to various important places. Several orchards are flourishing in the vicinity of the City which are famous for red blood variety of citrus (Malta). Shivpur Headworks is a beautiful picnic spot near the City where the Gang Canal branches off into distributaries.

Suratgarh

It has a population of 45870 according to 1991 Census and ranks third in population amongst the other urban units of the district. It is situated on the bank of the river Ghaggar in the southern part of the district. A Central Mechanized Farm with the assistance of erstwhile Union of Soviet Socialist Republic was set up near the town in 1956 where agricultural activities are done mechanically. The ruins of Rang Mahal, which is said to have been the capital of a Johiya Chief, are found at a distance of about 6 km to the north east of this town. It is famous for its archaeological excavations made by the Swedish mission, which show that the place was flourishing in or about 500 BC. At about 4 km from the town is a temple of Hanumanji where a fair is held annually in the month of Kartika (Oct-Nov).

(xiii) Major characteristics of the district contribution of the district in the form of any historical figure associated with the district:

The northern part of the princely state of Bikaner, which was adjacent to enstohile Punjab, is called the present day Ganganagar district. The irrigation system developed and become famous as Gang Canal in the thirsty and arid land of this area. In the initial stages the village of Ramnagar touching Punjab border was developed in a phased manner and its later became the headquarters of Gang canal project. This very Ramnagar later on became popular as Ganganagar.

This region must had been developed even in vedic period. The holy river of Aryans the Sarasavati used to flow through this region which is now Modern Ghaggar river is known as the miniature of the river sarasvati.

During the medieval period the region of erstwhile Prithi Raj III (1178-92 AD) of the chauhan dynasty. The present district of Ganganagar was founded on 30th March 1949 which remained status quo upto 12th July 1994 at the time of the formation of Hanumangarh district.

(xiv) Scope of Village and Town Directory:

In Part-A of the District Census Handbook, entitled as Village and Town Directory, an attempt has been made to present information regarding various amenities/facilities available in every rural/ urban unit of the State. The unit of the rural areas is village and that of urban area is town/urban agglomeration. Information regarding rural areas and Census Towns has been gathered through Patwaries while that in respect of urban areas other than Census Towns has been collected through the concerned municipality/Cantonment Board/Notified Area Committee. In order to have the aforesaid information authenticated the concerned departments and agencies were also contacted to furnish information available with them. All the information gathered about amenities relate to year 1999 and those pertaining to land-use pattern pertain to Samvat Year 2055 i.e. the agricultural year ending on the 30th June, 1999.

Village Directory

It will be helpful at the outset to have an idea of the items for which information has been included in the Village Directory. Information in respect of each village has been presented through a twenty three column format in which villages have been presented in order of their names and Permanent Location code Number (PLCN) at State level. The first four columns (2-5) give general information i.e. Name of village and Permanent location code number, area in hectares, population and number of households residing in villages as per Census 2001.The amenities available in the village have been shown in columns 6-18. The information regarding land-use pattern has been given in columns 19-23. As a special feature for Census-2001 some new columns 10-12 and 17-18 are first time incorporated viz. commercial and cooperative Bank, Agricultural/non Agricultural and other credit societies, Recreational and cultural facilities, News Paper/Magazine and most important commodity manufactured in the village. In case of uninhabited villages, the information has been given relating to columns 1-3 and 19-23 only and in the remaining columns the word 'uninhabited' has been mentioned. At the end of entries of each Panchayat Samiti the totals relating to columns 3-11, 13-14, 16-17,19 and 21-23 (total area, amenities and land-use break-up) have also been given.

Various amenities like drinking water, communication, post and telegraphs etc. have been shown against the name of the referent village if they are available within the village with the help of various codes. The Code Structure relating to various columns has been given in the beginning of Section-I to Part-A of this book. The number of each type of amenity has been indicated in parentheses after the suitable code in case of educational, medical and post & telegraph facilities.

If any amenity is not available within the village a dash (-) has been shown in the relevant column and next to it, the distance of the nearest place from the referent village where the facility is available has been given in broad distance ranges viz. <5 km, 5-10 km & 10+ km.

The following pattern has been adopted for indicating the educational institutions:

(i) Schools up to Class V have been treated as primary schools. They include Nursery Schools, Kindegarten Schools, Pre-basic and Pre-primary Schools and Junior Basic Schools upto Class V.

(ii) All schools having Classes VI to VIII have been treated as Middle Schools.

(iii) All schools having Classes IX and X have been treated as Secondary Schools.

(iv) All schools having Classes XI and XII have been treated as Higher Secondary Schools. They include Senior Cambridge Schools, Schools under 10+2 scheme, Intermediate, Pre-University and Junior College etc.

In case of composite schools relevant groups of classes have been treated separately, e.g. a school having classes I to XII, has been shown as having one primary, one middle, one secondary and one higher secondary school. The term 'College' includes all types of colleges whether Arts/Science/Commerce/ Medical/Engineering/Agriculture and others imparting education at Graduate or Post-Graduate level. Institutions other than industrial schools, training schools and adult literacy classes/centres have been shown under 'others'.

In case of Medical institutions, Hospitals and Dispensaries, Allopathic, Ayurvedic, Unani and Homeopathy have been shown separately. Other institutions include all types of Yogic, Naturopathy, Hospitals/Dispensaries, Leprosy Centres etc.

In case there are more than one source of drinking water facility available in the village all such sources have been shown separately. Postal amenities include Post Office, Telegraph Office and Telephone, which are shown separately.

In case there are more than one communication facilities these have been indicated separately by relevant codes. Approach to the village refers to the state of roads etc. leading to the village from the communication centres i.e. bus-stand/railway station etc. This is to give an idea whether the village is easily approachable in all types of weather or becomes inaccessible for sometime in the year. Where there are more than one approach roads these have been indicated separately by relevant codes.

Information regarding the nearest town indicates the name of such town along with the distance from

the referent village irrespective of the fact whether such town is located within Rajasthan or in some other adjoining states. In case of town situated in states other than Rajasthan, the concerned State has been mentioned against its name in parentheses with the help of abbreviations. The term 'town' here refers to one of those urban centres, which have been treated, as towns in the concerned state during 2001 Census.

In order to give an idea about the uses which electricity is put to, the information has been given under the head "power supply" if it is available in the village.

Land-Use Pattern

The land-use pattern has been presented under the following five headings:

I. Forest

It denotes those lands, which have been termed as 'forest' by the competent authority.

II. Irrigated land

It relates to land, which has actually been irrigated in the referent year. The source-wise break-up has not been presented, as no such information was available in respect of the net irrigated area.

III. Unirrigated land

The term covers all the unirrigated land cultivated during the referent year and land lying fallow upto four years.

IV. Culturable waste

It includes Gaucher i.e. pasture and grazing land and tree-groves.

V. Area not available for cultivation

It refers to land, which has not been classified in any of the above mentioned types and also includes house sites, roads, rivers, nullahs, hillocks etc.

The following nine appendices have also been provided to present the position obtaining in Panchayat Samiti and district as a whole regarding various Amenities available in rural areas, villages classified by characteristics of the population and land-use pattern in Census Town in connection with the Village Directory:

(i) Panchayat Samiti wise Abstract of educational, medical and other amenities in villages.

  (a) Villages by number of Primary schools.

  (b) Villages by number of Primary, Middle and Secondary schools.

  (c) Villages with different sources of drinking water facilities available.

(ii) Villages with 5000 and above population, which do not have one or more amenities.

  (a) Census towns which do not have one or more amenities.

(iii) Land utilisation data in respect of Census Town.

(iv) Panchayat Samiti wise lists of inhabited villages where no amenity other than drinking water facility is available.

(v) Summary showing number of villages not having Scheduled Castes population.

(vi) Summary showing number of villages not having Scheduled Tribes population.

(vii) Panchayat Samiti wise list of villages according to the proportion of Scheduled Castes/ Scheduled Tribes population to total population by ranges. It consists of two parts: Part-A relates to Scheduled Castes and Part-B to Scheduled Tribes.

(viii) Panchayat Samiti wise number of villages under each Gram Panchayat.

(ix) Statement showing number of girl's schools in the villages.

Town Directory

Particulars about each town have been presented in the form of seven statements. In towns where there are slums Statement-VII has also been given in which information regarding civic and other amenities available in the slums have been shown. In each statement towns have been arranged in alphabetical order.

As has been explained earlier, urban agglomerations are of two types: first those constituted by two or more independent towns and second those where the urban characteristics have developed in the adjoining rural areas, which have developed as outgrowth of the referent town.

Where an urban agglomeration includes two or more independent towns, the names of towns constituting the agglomeration have been indicated in the alphabetical arrangement but their names have also been repeated in the alphabetical order under the name of the agglomeration after the name of the main or core town and information relating to these has been shown here. The particulars of the constituent units of the agglomerations have not been repeated wherever they occur separately in the alphabetical order and a note "See referent agglomeration" has been given against such names. The lines relating to the information regarding urban agglomeration as a whole have not been numbered but the constituent units as and when they occur in the alphabetical order have been numbered so that the last number agrees with the total number of towns in the district concerned. In respect of Statements II, III and VI in the lines relating to agglomeration a note "See constituent units" has been shown and information has been provided separately in respect of all the constituents below it.

In case of towns having out growths, an asterisk mark has been placed against their names. Information in respect of out growths has been included in the concerned town and has not been shown separately.

The amenities and other data have been indicated by codes. A list of column wise code structure and other abbreviations used in each statement has been provided at the beginning of Section-II of Part-A of this book. We may now discuss the various Town Directory statements.

Statement I

It deals with the status and growth history of the town. Columns 2 to 7 give information regarding class, name and civic status of the town, its location code number, name of the tehsil/panchayat samiti in which it is situated, its area in sq. km and number of households including houseless households residing in the town as per 2001 Census. The class of the town has been determined on the basis of its population as per Census 2001 and the civic administration status relates to the year 2000. Columns 8 to 18 show the population of the town in different decennial censuses beginning from 1901 upto 2001. The growth rate in terms of percentage in respect of previous censuses has been shown below the population figures pertaining to each Census beginning from Column 9 onwards.

A 'dash' under these columns indicates that the referent town did not have an urban status in the referent Censuses. Density of Population per sq. km as per Census 2001 has been shown in column 19 and sex ratio (number of females per 1,000 males) have been indicated for three censuses viz. 1981 to 2001 in columns 20 to 22.

Statement II

This statement gives information about the physical aspects and locations particulars of the town in 1999. First two columns give the serial number, class, name and civic status of the town. Columns 3 to 13 deal with the physical aspects viz. rainfall and temperature. Rainfall figures are the average of the rainfall for the last one year ending 1999-2000. If the information in respect of rainfall is not available for any town it has been given for the nearest place for which it is available. Rainfall has been shown in millimeters per annum. Maximum and minimum temperatures have been given in centigrade. If the information regarding temperature is not available in respect of any town it has been given for the nearest place for which it is available and the name of the centre has been shown in footnote.

The location of the town with respect to various administrative headquarters and nearest city is indicated in columns 6 to 10. While showing the location of the referent town with respect to various administrative headquarters, names and their distance from the referent town in kilometer have been given in parentheses below the name of the place where it is situated. In case the referent town itself happens to be the seat of the administrative headquarters, this distance has been shown zero. Information regarding the nearest city of population one Lac or more and population 5 Lacs or more have been given in respect of its situation within the State or even if this city may be situated in other State. In case the nearest city happens to be situated in other State, the name of the concerned State has been shown against the name of the city in parentheses. How the referent town is approachable is given in columns 11 to 13 which indicate the availability of communication facilities viz. railway station, bus facilities and

navigable river/canal within 10 km. There is no navigable river or canal in Rajasthan.

Statement III

It gives information about the finances of the civic body controlling the local civil administration and it has been presented in '000 rupees. A 'dash' in this Statement indicates that no receipt or expenditure has occurred under the particular head and 'N' represents negligible amount. First two columns give general information, columns 3 to 9 present receipt under broad categories and total receipt and columns 10 to 16 present expenditure under broad categories and total expenditure. The receipt and expenditure has been presented under six broad categories each. While receipt through taxes implies all receipts from taxes obligatory or others and revenue derived from municipal properties and power apart from taxation, it also includes income derived from holding of fairs and exhibitions, supply of milk, license fee, cattle-ponds, fines and penalties, transport services, places of entertainment, allotment/sale/lease of land and rent etc. Government grants include per capita grant, grant from Public Works Department and grant from the Social Welfare and other departments. Other sources of receipts have been specified, wherever possible but generally they are of miscellaneous nature.

Expenditure on general administration covers salary and wages of staff, contingent expenditure on staff, grants loans and advances to the staff etc. Expenditure on public safety cover fire-fighting, light, water and lease facilities, regulating the dangerous/ hazardous trades/works/occupation, water supply, registration of births and deaths, disposal of garbage, rubbish and night-soil. Public health and conveniences cover all types of medical aid and maintenance of the destitute etc. Public works include maintenance and construction of roads and buildings and relief works in times of famine and scarcity. Expenditure in public institutions covers all types of social, cultural, educational, religious institutions etc. Which are run or patronised by the municipality. Other sources of expenditure have been specified where possible but mostly these are of miscellaneous nature.

Statement IV

This statement deals with the civic and other type of public amenities and provides information about total population, scheduled castes and scheduled tribes population, road length, system of sewerage, number and types of latrines, method of disposal of night-soil, water supply, availability of fire-lighting service and electrification besides general information. In case of water supply the source of water as also the system of its storage have been shown. The storage capacity has been shown in Kiloliters. In case of disposal of night soil and protected water supply particulars have been given in respect of two methods/sources in order of their importance if more than one exist in the town. In case fire-fighting service is not available in the town the name of the nearest place if in the same district or the name of the nearest district if in the same state or other state where available along with distance from the referent town has been mentioned.

Statement V

Particulars of medical, educational, recreational and cultural facilities available in the town have been given in this statement and the number of each type of these facilities has also been shown in parentheses is along with the appropriate code.

In case of medical facilities the number of beds wherever available has also been shown Allopathic, Ayurvedic, Unani and Homeopathic hospitals/ dispensaries have been shown separately. No code has been provided for allopathic institutions and the numbers have been shown only in figures. Thus beside H, code for hospital means an Allopathic Hospital. Separate codes have been provided for other three systems of medicine.

If a medical or educational facility is not available in the town, the name of the nearest place, if the same district or the name of the nearest district in the same State or other State where available and its distance (in km) from the referent town has been mentioned. Details of medical institutions shown under 'Others' have also been explained.

Arts, Science and Commerce Colleges have been shown separately. While showing the educational institutions upto Higher Secondary level the same procedure as adopted in case of Village Directory, has been followed. In case of composed schools relevant classes have been treated separately e.g. a school having classes I to XII has been treated as being composed of one Primary, one Middle, one Secondary and one Higher Secondary School.

All other types of educational institution which are not covered in column 6 to 14 have been shown in column 15 under 'Others' and include technical/ vocational and training institutions like Applied Art Painting College, Pharmacy College, Agricultural College, Teacher's Training College/Institution, Music/ Dance School etc. Janchetna Kendra is also included in others.

Statement VI

This statement contains particulars regarding trade, commerce, industry and banking. It gives names of three most important commodities, exported and manufactured in the town besides the number of banks, agricultural and non-agricultural credit societies functioning in the town. A list of the outgrowths, if any, along with their population and name of the core town has also been provided at the end of the Town Directory as an Appendix.

Statement VII

Information about all slums whether notified or not and for all towns has been shown in this statement in order to give an idea about the amenities available to the slum dwellers. Particulars about paved roads, systems of sewerage, number and types of latrines, method of disposal of night soil, number of tap points/ public hydrants for supply of protected water and electrification have been provided in respect of every slum in each town, if there are any.

PART-A : VILLAGE AND TOWN DIRECTORY

Section-I

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:

Columns 1 : Serial Number

Self explanatory. All the villages within the Panchayat Samiti are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R

(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages Panchayat Samiti wise of the district.

Appendix-I-A Indicates number of villages Panchayat Samiti wise having one or more primary schools.

Appendix-I-B Indicates number of villages Panchayat Samiti wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages Panchayat Samiti wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV Panchayat Samiti wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII The appendix shows the list of villages according to proportion of the A, VII B Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates Panchayat Samiti wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Section-II

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M.Cl.
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Tehsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 and 10

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory

Column 6 : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well Water	W

Column 14

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory

Column 4 & 5

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or primary health centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC

(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/ Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

PART-B : PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/Panchayat Samiti/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/Panchayat Samiti/Town
3.	Primary Census Abstract for Scheduled Tribes	District/Panchayat Samiti/Town
4.	Village Primary Census Abstract	Panchayat Samiti/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented Panchayat Samiti wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Panchayat Samiti is presented both for rural and urban areas separately. All the villages within the Panchayat Samiti constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Panchayat Samiti. In case a Panchayat Samiti is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Panchayat Samiti is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares. The area figures of the Panchayat Samiti is the total of the village areas coming under each Panchayat Samiti. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tehsils/ Panchayat Samiti within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Tehsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and Panchayat Samiti level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II : FERTILITY-MORTALITY MEASURES

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever-married women and last question related to currently married women.

AGE SPECIFIC MARITAL FERTILITY LEVEL, 1991 CENSUS

Age-Group	Ganganagar			Rajasthan		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	123.56	126.61	106.70	99.82	99.10	103.46
20-24	219.15	229.71	175.18	217.18	227.01	182.20
25-29	151.09	156.96	129.39	197.71	214.81	144.55
30-34	83.55	92.14	54.48	141.09	158.38	85.69
35-39	44.05	45.84	38.11	90.43	104.11	47.4
40-44	21.23	22.29	17.68	53.37	61.51	25.15
45-49	11.74	10.93	14.87	27.36	30.37	15.81

The ASMFR has been calculated at seven different age groups. The highest ASMFR of the district 219.15 has been found in the age group of 20-24 followed by 151.09 in the age group 25-29. The lowest ASMFR of 11.74 has been found in the age-group 45-49. In comparison to state, ASMFR of the district is higher than that of state in all age groups. Similar trends found in rural areas. It can beseen from the table.

ESTIMATES OF CHILD MORTALITY, 1991 CENSUS

Mortality Indicators	District : Ganganagar			Rajasthan State		
	Persons	Males	Females	Persons	Males	Females
q2	64	60	68	97	95	99
q3	68	69	72	100	98	106
q5	73	71	74	110	103	117

Information on the question on children ever born and children surviving canvassed for all ever-married women has been tabulated by age of the mother. From this, estimates of child mortality have been worked out by using Brass Technique.

From the estimates of child mortality (Number of death by ages 2, 3 and 5 given as q2, q3 and q5) it is observed that the child mortality in the Ganganagar district is lower as compared to the state among males and females. It can be seen from the table.

ANNEXURE-III : VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

Source : Occasional paper No.1 of 1997 office of the Registrar General India and Rajasthan state district profile 1991.

Note: * Newly Created districts after 1991 Census.

The gross fertility rate of the district has been reported as 150 as against 162 of the State. Similarly the GMFR and TFR and TMFR of the district are also lower than that of State being 176, 4.22 and 5.11 as against 184, 5.01 and 5.59 of the state respectively. The crude birth rate of the district is also lower than that of the State at 35.75.

However the number of children even born per woman in the age group of 45-49 is 5.22 which is higher than the State average of 5.07. The mean age at marriage of females in the district 17.57 is higher than that of State (16.67) as can be seen from the table. CWR (child woman ratio) 0-4 of the district is lower than state. It can be seen from the table.

ANNEXURE-IV(a) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991-2001

Place of birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Migrants born within the state of Enumeration	704,809	255,509	449,300	555,147	210,833	344,314
	(68.50)	(66.60)	(69.62)	(72.90)	(69.40)	(75.22)
(i) Migrants born elsewhere in district of Enumeration	570,047	201,115	368,932	417,411	157,117	260,294
	(55.40)	(52.42)	(57.17)	(54.81)	(51.72)	(56.87)
(ii) Migrants born in other district of the State	134,762	54,394	80,368	137,736	53,716	84,020
	(13.10)	(14.18)	(12.45)	(18.09)	(17.68)	(18.36)
(B) Migrants born in other states of India	277,356	101,491	175,865	178,857	77,390	101,467
	(26.95)	(26.46)	(27.25)	(23.49)	(25.47)	(22.17)
(C) Migrants born in other countries	46,852	26,622	20,230	27,522	15,575	11,947
	(4.55)	(6.94)	(3.13)	(3.61)	(5.13)	(2.61)
Total Migrants	**1,029,017**	**383,622**	**645,395**	761,526	303,798	457,728
	(100.00)	**(100.00)**	**(100.00)**	(100.00)	(100.00)	(100.00)

(a) By Place of Birth:

It was seen that a sizeable portion of migrants in Ganganagar District i.e68.50 percent in 1991 and 72.90 percent in 2001 were migrants whose place of birth was within the state of enumeration. Out of this major portion where migrants who were born elsewhere in the district of enumeration.

ANNEXURE-IV(b) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	704,809	573,012	131,797
		(100.00)	(81.30)	(18.70)
	Rural	607,563	531,362	76,201
		(86.20)	(75.39)	(10.81)
	Urban	95,726	40,550	55,176
		(13.58)	(5.75)	(7.83)
In other states of India	Total	277,356	192,380	84,976
		(100.00)	(69.36)	(30.64)
	Rural	220,281	174,090	46,191
		(79.42)	(62.77)	(16.65)
	Urban	56,245	17,960	38,285
		(20.28)	(6.48)	(13.80)

(b) Internal Migrants (Rural/Urban):

Majority of the internal migrants i.e.86.20 percent whose places of birth were within Rajasthan belonged to the rural areas of the state. The same trend also holds well in case of migrants born in other state of India as can be seen from the table.

The migrant whose place of birth was in other states of India was 26.95 percent in 1991 and 23.49 percent in 2001 Census.

Migrant to the district whose place of birth was in other countries was 4.55 percent in 1991, whereas the proportion was marginally less i.e. 3.61 percent in 2001 Census.

ANNEXURE-IV(c) : INTERSTATE MIGRANTS, 1991-2001 CENSUS

Place of Birth	1991 Census		Place of Birth	2001 Census	
	Migr-ants	Perce-ntage to Total		Migr-ants	Perce-ntage to Total migrant
1	2	3	4	5	6
Haryana	88,200	31.80	Haryana	29,976	16.76

Other States	**7,760**	**2.80**	**Other States**	**15,324**	8.57
Total	**277,356**	**100.00**	**Total**	**178,857**	100.00

(c) Inter-state Migrants:

In the case of Inter-state migrants they are mainly from Punjab and Haryana as their percentages are 52.85 and 31.80 respectively in 1991 census. In 2001census main migrants are from Haryana and Punjab and their percentage are 16.76 and 53.59 respectively. Percentage of six states to total migrants is 91.43 in 2001.

ANNEXURE-IV (d) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE, 1991-2001 CENSUS

Place of Last Residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Within the State of Enumeration but outside the place of Enumeration	759,367	277,898	481,469	596,683	231,233	365,450
	(72.17)	(71.35)	(72.65)	(76.60)	(74.06)	(78.30)
(i) Elsewhere in the District of Enumeration	620,016	222,054	397,962	462,877	179,036	283,841
	(58.93)	(57.01)	(60.05)	(59.42)	(57.34)	(60.81)
(ii) In other districts of the state of Enumeration	139,351	55,844	83,507	133,806	52,197	81,609
	(13.24)	(14.34)	(12.60)	(17.18)	(16.72)	(17.48)
(B) States in India beyond the state of Enumeration	266,040	96,124	169,916	165,427	71,050	94,377
	(25.28)	(24.68)	(25.64)	(21.24)	(22.76)	(20.22)
(C) Last Residence outside India	26,780	15,470	11,310	16,843	9,930	6,913
	(2.55)	(3.97)	(1.71)	(2.16)	(3.18)	(1.48)
Total Migrants	**1,052,187**	**389,492**	**662,695**	**778,953**	**312,213**	**466,740**
	(100.00)	**(100.00)**	**(100.00)**	**(100.00)**	**(100.00)**	**(100.00)**

(d) Migration by Place of Last Residence

In the percentage distribution of migrants by place of last residence in the district it was seen that in 1991 census,.the highest proportion of migrants i.e. 72.17 percent were from within the state of enumeration but outside the place of enumeration. In 2001 Census this proportion increased to 76.60 percent in the same category. Surprisingly it was seen that the proportions of female migrants were higher than the male migrants in both censuses.

The migrants in the district that were from states in India beyond the state of enumeration was 25.28 percent in 1991 as compared to 21.24 percent in 2001 census.

Persons whose last residence was outside India were 2.55 percent in 1991 census while there was a marginal reduction to 2.16 percent in 2001 census.

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	759,367	617,772	141,595
		(100.00)	(81.35)	(18.65)
	Rural	655,931	574,192	81,739
		(86.38)	(75.62)	(10.76)
	Urban	101,936	42,580	59,356
		(13.42)	(5.61)	(7.81)

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
In other states of India	Total	266,040	184,032	82,008
		(100.00)	(69.17)	(30.83)
	Rural	209,255	165,842	43,413
		(78.66)	(62.34)	(16.32)
	Urban	56,035	17,850	38,185
		(21.06)	(6.71)	(14.35)

(e) Migration by Place of Last Residence (Rural/ Urban)

Majority of the internal migrants i.e 81.35 per cent whose places of last residence were within Rajasthan belonged to rural areas. The same trends also reflects in case of migrants whose place of last residence were in other state of India as can be seen from the table.

ANNEXURE-V : RELIGIONWISE DISTRIBUTION OF TOTAL POPULATION, 1991-2001 CENSUS

RELIGION

Religion is an important basic cultural characteristic of the population. It provides an interesting picture of the society. The data on religion projects the unity and diversity of the country. The data is great importance to the public as well as Government,NGO and Minorities Commission.

Among the followers of six major religions in Ganganagar District it was seen that the proportion of Hindus had marginally decreased from 72.21 percent in 1991 to 72.64 percent in 2001 Census. Whereas the proportion of Muslims increased from 2.12 to 2.37 percent. It is also true In the case of Jain Community during the same period but the Sikh and Christian community showed a marginal decreased., The Buddhist community registered no change during the decade.

At the state level however the proportion of Hindus and, Sikh, decreased whereas those of Muslims Christians, and Buddhists and Jain increased.

ANNEXURE-VI : MARITAL STATUS OF POPULATION AS PER, 1991-2001 CENSUS

MARITAL STATUS OF POPULATION

Majority of the population of the district in1991census is 51.35 percent in married followed by never married and widowed i.e. 4,582 and 2.76 percent respectively. Out of the male total population of the district 54.91 percent males are never married and of female never married is 47.30 percent, the proportion of widowed females is higher 4.11 percent than the males 1.58 percent. Married males are 43.45 percent while 48.51 percent females are married at the district level. Divorced or separated is not so widely practiced, only 0.05 males and 0.07 females are reported in this category which are almost half to the state average. The same trend was found in rural as well as urban areas. In 2001 census 49.96 is never married. There after comes married persons whose percentage to total population comes to 46.79 widowed persons in absolute numbers 55,405 which is 3.10 percent to total population. Sexwise, males have higher population of never married is 53.50 percent as compared to females whose population is 45.91 percent.. On the other hand, females have higher proportion of married 49.00 percent than males 44.85 percent. Females have a phenomenal higher number 41,089 of widows than male widowers 14,316 in the district. It can be seen from Annexure VI.

AGE, SEX AND EDUCATIONAL LEVEL,1991- 2001

Literacy in the age-group 10-14 years in1991 in the district was 58.4 percent in the total, which was higher among the males 71.0 percent and females 44.4 percent. In the total in the age-group 15-19 years the literacy slightly lower in the total i.e. 54.5.percent and the same trend was found as in the earlier age group except that the female literacy in this age group 15-19 years was as low as. 38.5 percent. In general it was seen that the literacy rate in the urban areas was much higher both among males and females. The proportion of metric but below graduate was however not very high. In the total there were 8.7 percent metric but below graduate persons. Here also the male proportion was higher i.e. 13.4 percent compared to females 3.4 percent. Graduate and above in the age group 20 + years followed the same trend but in lesser proportion. In 2001 census the total population of the Ganganagar district was 1,789,423 which 64.74 percent are literates. As per the definition of literacy in the 2001 Census the entire population in the age group 0-6 was considered to be illiterates. The total literacy rate in the district Ganganagar in the age-group 10-14 years was 86.4 percent and among males and females it was 90.3 and 82.0 percent respectively, which is higher as compared to the state in the same age group. Similarly

literacy rate in the age group of 15-19 years 86.9 percent males and 72.5 percent females were reported in the district, which is also lower than that of the state except female.

It is a general trend of the literacy at the state as well as district level, female literacy is lower than the male literacy. The percentage showed a decline at Matric but below Graduate 19.02 percent among male and 7.11 percent as females while at the graduate and above level 6.46 percent males and 3.15 percent are females. It can be seen from the Annexure VII.
