ANAND NIGAM
Deputy Director
Directorate of Census Operations, Rajasthan

Garh Palace

The erstwhile State of Jhalawar (land of the Jhalas) was created in 1938. The fort, which was constructed in 1940, stands in the centre of the town. It presently houses the Collectorate and other district offices. Some portions of this palace are still in a very good condition with mirror work and exquisite paintings in Zanana Khas, which is of particular tourist interest.

The Garh Palace is constructed in a square shape, each side of the palace is 735 feet in length, and 25 to 35 feet in height. There are many sections/portions in the palace which are put to different uses like Zanana Khas, Darbar Hall, Courts of the King, Guest rooms, Store houses, armourery etc.

Annexure-VIII	:	Distribution of different mother tongues returned in 1991-2001 Census	785

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri J.L.Modi, Director of Census Operations, Rajasthan. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Additional Secretary &
Census Commissioner, India

Preface

I am deeply indebted to the State Government of Rajasthan for their unstinted support and cooperation despite all odds and adversaries like famine etc. at all stages of Census Operations of 2001. I am grateful to Shri Inderjit Khanna, the then Chief Secretary of Government of Rajasthan for his prompt response, guidance and cooperation given to the Census Organization. He infused a sense of urgency and seriousness in the minds of District Collectors and Officers of the District Administration, which geared up the entire administrative machinery. The Supervisors and Enumerators, the basic census functionaries worked ceaselessly in the entire period of fieldwork to make Census 2001 successful.

Sarvashri Ashok Pandey and Vinod Zutshi, the then Secretaries in the Department of Cabinet Secretariat and General Administration have been instrumental in making Census 2001 a successful one. I owe my thanks to both of them. I am also thankful to other Departments like Education, Finance, Revenue, Economics and Statistics, Public Relations, Printing and Stationery, Local Self-government and Personnel Department for extending their full cooperation.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his unstinted support and spontaneous, unfailing guidance throughout our endeavours. At the outset I would like to thank Shri D.K. Sikri, Registrar General and Census Commissioner, India for guiding us in bringing out this report. My grateful thanks to Shri K.N. Unni, Ex-DRG (C&T), Shri R.G. Mitra, Ex-DRG (C&T), Shri R.P. Singh, Consultant (Map), Shri Himakar, Additional Director (EDP), Dr. I.C. Agrawal, A.R.G.(SS), Shri S.L. Jain, Deputy Director (SS), Shri C. Chakravorty, Joint Director (DDU) and their colleagues at the headquarter for their ever willing, helping hand and thoughtful suggestions for putting together and shaping the volumes in their present form.

The Director of Census Operations, Rajasthan, Shri J. L. Modi under whose guidance the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before this volume could be made available for the press. I am deeply greatful to Shri H.S. Meena, Ex-Joint Director of Census Operations, Rajasthan for its success.

It may be mentioned a few annexures have been added to this volume with a view to provide an insight into the 1991 and 2001 data on the suggestion of Social Studies Division of the Office of the Registrar General, India. In this connection the contribution of Shri V.K. Gupta, Senior Compiler can not be ignored.

Shri H.C Sharma, Assistant Director incharge of District Census Handbooks and Primary Census Abstract, who was ably assisted by his team of dedicated workers deserve all praise for their perseverance and dedication in preparing Village and Town Directories and in finalization of PCAs and other inset tables. I would like to thank Shri G. Fernandes, Assistant Director who not only coordinated the work but also contributed immensely to the cause of Village and Town Directories.

In view of the increasing demand of the publications in electronic format, it has been decided to publish the DCHB also on CD. I highly appreciate the efforts put in by Smt. Jyoti Luhadiya, DD(EDP) and her team to compile in the electronic format. The efforts put in by Shri Divesh Chawla, DEO Gr-'B' to prepare this is highly commendable. In this connection, the contributions of Shri P.N. Mathur Sr.Supervisor and Shri J.P. Verma, DEO Gr-'B' cannot be ignored.

Shri K.S.Bhatnagar, DDCO has taken pains in drafting the District Profile and the Analytical Note for the district. The members of the staff in the Map Section did a commendable job under the guidance of Shri Panna Lal, R.O.(Map), ably assisted by Shri R.S. Tyagi, Sr.Geographer in bringing out various maps. .

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The series of District Census Handbooks has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several new innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Numbers (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from 1 to N. Each village has been assigned an eight digit code. The first six digits represent the code of the village as existing at the present census. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001, are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

The responses for almost all the questions in the Houselisting Schedule had pre-coded options. This not only helped the enumerators to record the response easily but at a later stage would hopefully facilitate quicker data processing. Apart from the improvements made in the format of the Houselisting Schedule, the scope of Houselisting was considerably expanded with the inclusion of new questions based on requirements of various data users and planners. The new features of the Houselisting Schedule are listed below.

- For the first time, different uses of census houses have been standardized and grouped into ten main uses and assigned code numbers.
- Plastic has been added in the list of material of wall and roof of a census house, as it is often used for shelter in slums and shanties.
- In the previous census, the location of drinking water source was categorized into two locations viz. 'within premises' and 'outside premises'. In the Census of India, 2001, the source 'outside premises' was split into two categories namely 'near the premises' and 'away from the premises'.
- The scope of question of availability of electricity was expanded to include six sources of lighting. Besides no lighting, this included sources like electricity, kerosene, solar, other oil and any other source.
- In 1991 Census, a question on availability of toilet facilities to the household was canvassed while in Census of India, 2001, specific information on availability of latrine within the house by the type of latrine was sought.

In addition to expending the scope of the questions canvassed during the Houselisting Operations in the 1991 Census, the following new questions were added in the Houselist Schedule for Normal Households at the Census of India, 2001.

- If the Census house was used for residential or partly residential purposes, the condition of the census house was categorized as good, livable or dilapidated based on the perception and response of the respondent.
- A question on number of married couple(s) living in the household was canvassed.
- Information was sought on the number of married couple(s) having independent room for sleeping.

- Information as to whether the waste-water outlet of the house is connected to 'closed drainage' or 'open drainage' or has not drainage was collected.
- A question on availability of bathroom within the house was included.
- Information on availability of kitchen within the house was also sought.
- Availability of certain assets to the households namely radio/transistor, television, telephone, bicycle, scooter/motor cycle/ moped, car/jeep/van were also included.
- It was also enquired whether any banking service was being availed by the household.

The Household Schedule adopted for the Population Enumeration also primarily had pre-coded options for majority of the questions. The questions for each data item were made as self-explanatory as far as possible for easy understanding. The comprehensive Household Schedule had three parts and two sides A and B. Part I contains the Location Particulars; Part II relates to Individual Particulars and Part III contains questions for Household engaged in Cultivation/Plantation. To facilitate quick tabulation for bringing out Provisional Population Totals, provisions of page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates and workers and their categories by sex. Most of the questions canvassed during the 1991 Census, were retained for the 2001 Census, except the question on ex-serviceman, which was dropped during the Census of India, 2001. However, a number of new questions were added in the Household Schedule in view of the suggestions from policy makers, data users and researchers, while the scope of certain existing questions was enhanced.

These modifications are:

- Age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.
- The type of educational institution attended by a person was enlarged to include school, college, vocational institute, other institute and literacy center.
- The scope of the definition of 'work' was expanded in the Census of India, 2001, to include production of milk for domestic consumption. In the 1991 Census, cultivation of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India, 2001.
- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India, 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census is dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census, is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected are - in seeing, in hearing, in speech, in movement and mental.

- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work is collected under this section.
- The Household Schedule has a new set of questions for Household engaged in cultivation/ plantation- i) Net area of land under cultivation/ plantation, ii) Net area of land irrigated and iii) Tenure status. This question was not canvassed at the 1991 Census but was canvassed in the 1981 Census in a slightly different form.
- The signature or thump impression of the respondent has been taken on the Household Schedule for the first time in the history of census. This was not only aimed at obtaining correct and complete information but also for giving an opportunity to the respondents to authenticate the information provided by them. The relationship of the respondent with the head of the household was also obtained. This new feature will pave way in carrying out a methodological study in future on the respondent profile in the census.

In 1981 Census, for the first time, an attempt was made in the series to bring out demographic and other data in diglot, Hindi and English, for a more beneficial use by data user of all categories. Hindi being the official language of the State, a Hindi version of the analytical notes was also added with a view to caters to the needs of all sections of readers. The manner of presentation of the District Census Handbooks for the 1991 Census is by and large the same.

As a necessary corollary to the Handbooks, Panchayat Samities, the basic administrative units of development, administration and planning, were listed out separately for the first time in 1981 Census in relation to those districts wherein they were not coterminous with their tehsils. As an additional attempt, informations relating to population figures as well as amenities available in each village located in the jurisdiction of each Panchayat Samiti were also presented in a separate volume under the title "Supplement to District Census Handbook". However, for reference in the main District Census Handbook, a list of villages forming part of each non-coterminous Panchayat Samiti was provided along with the abstracts of population and amenities for such Panchayat Samities as a whole in the form of Special Annexures.

In order to cater to the over-all needs of the data-users and to facilitate the task of administrators and planners it has now been decided to present the Village Directory and Primary Census data at the Panchayat Samiti level instead of the traditional Tehsil level presentation. It is expected that the presentation of Village Directory and Primary Census Abstract data at Panchayat Samiti level will help the planners in formation of micro-level developmental plans, as the Panchayat Samiti is now the lowest administrative unit for development planning. However, for the convenience of the data users and for the sake of comparability of data at Tehsil level, the Primary Census Abstract has also been presented at the Tehsil/ Town level in the form of an Appendix.

A general note on each district covering information of general interest regarding its history, topography, physiography, administrative set-up and places of tourist and historic importance etc. has also been included with a view to provide comprehensive and more purposeful information about the district as a whole. Population figures of Scheduled Castes and Scheduled Tribes constituting the core of 'Weaker Section' have also been presented at district, panchayat samiti and town level so as to facilitate planning for their welfare both at micro and macro levels.

It is earnestly hoped that this publication will serve its purpose for planners and administrators of welfare schemes and other data users in general.

Prior to 1951, Census Reports were printed for the whole province/state. The idea of preparing the District Census Handbooks separately for each district was conceived during 1951 Census as a part of a plan intended to secure an effective method of preserving the Census data below the district level. The idea was that all the district census tables would be bound together in a single volume called the District Census Handbooks. Since then the District Census Handbooks are being published regularly.

The 1951 Census series of District Census Handbooks was printed in two parts. Part I contained five General Population Tables (A Series), three Economic Tables (B Series), five Household and Age Tables (C Series) and seven Social and Cultural Tables (D Series). In Part II of District Census Handbook "Primary Census Abstract and Village Directory" which showed the basic population figures for each village or town classified by livelihood classes, were included along with some information of general nature.

The 1961 Census series of District Census Handbooks were printed in single volume in which Primary Census Abstract upto village and town/ward level and Village Directory upto village level were given. Besides, some official statistics collected from various state departments, four General Population Tables (A Series), sixteen Economic and Household Tables (B Series), seven Social and Cultural Tables (C Series), four Housing Tables (E Series) and eight Special Tables for Scheduled Castes/Scheduled Tribes were also provided in District Census Handbooks. For the first time in 1961 Census the maps for the district and tehsil were also included in the District Census Handbooks.

In 1971 Census series of District Census Handbooks village-wise 'Village Directory' giving services, facilities or amenities available in the village was given. 'Town Directory' was introduced for the first time giving useful information in respect of every town of the district. Rural Primary Census Abstract upto village level and Urban Primary Census Abstract upto enumeration block level were given in District Census Handbooks. While the District, Tehsil and Town maps were included; the inclusion of Census Tables was dispensed with in the District Census Handbooks in 1971 Census.

The scope of 1981 series of District Census Handbooks was enlarged specially in relation to amenities and land-use pattern. Apart from new items like uses of electricity, details of communication points, information for which was not collected in 1971 Census, a note on each district covering general information on its history, topography, flora, fauna and administrative set up etc. was also added. The format of the Primary Census Abstract was also restructured in the light of changes in economic and other questions canvassed in the 1981 Census but at the same time, all efforts were made to retain comparability with 1971 Census data. The inclusion of Special Primary Census Abstract for Scheduled Castes and Tribes at the Tehsil/Town level was another innovation introduced in 1981 Census series.

The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same as followed in 1981. However, the format of Primary Census Abstract was restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group was included in Primary Census Abstract for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate at the time of the 1991 Census.

One of the most important innovations in the 1991 Census was the Panchayat Samiti level presentation of data in the Village Directory and Primary Census Abstract instead of the traditional Tehsil level presentation.

Deviating from 1991 Census, like 1981 Census four fold industrial classification of main and marginal workers has been presented in 2001 as against nine fold given in 1991.

The mode of presentation of DCHB in 2001 will by enlarge be same as that of in 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc pertaining to 1991 Census of the respective district in the DCHB in the form of Annexures II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

(ii) Brief History of the District

Jhalawar is known as the land of Jhalas, the latter being the name of the ruling clan of the former Jhalawar State. Jhalawar State was carved out from the State of Kota, less than a century and half ago.

In the remote past, the area formed part of Malwa and so its early history is connected with Ujjain and the area around it. The major portion of Jhalawar continued to be a part of Malwa during the Mughal period. According to Abul Fazal, Jhalawar was included in the Subah of Malwa and Raghav Dev Jhala, received, as early as 1420 A.D. this program in Jagir from the rule of Mandu, Upto this period, the history of Jhalawar is largely associated with the kingdom of Malwa.

However, there is unknown connected early history of this region. Inscriptions, coins, archeological remains and literary references have brought to light some names of local chieftains. These are, however, of little consequence for our purpose. The Jhalas were descendents of the Rajdhar, a petty century, Chief of Halwad in Kathiawar. The ninth successor in the line, Madho Singh left the native place and sought service with the Maharao of Kota. His work earned him a jagir and the post of the Commander of the army and the fort. Giving his sister in marriage to the heir – apparent of Kota, Arjun Singh, he succeeded in making his post hereditary in his family. Madho Singh was followed by Madan Singh and then by Himmat Singh and when the latter died in 1758, by his adopted son, Zalim Singh.

Zalim Singh was one of the most memorable personalities of the period. In 1761, he lead the Kota troops and routed the formidable forces of Jaipur State in the battle of Bhetwara and thus establish his reputation for bravery. By improving administration, especially revenue collection he earned the esteem of the people. By befriending Ameer Khan, the Pindari freebooter, and by playing sums demanded by the Marathas he shielded his subjects from their ravages. He was one of the first person in Rajasthan to co-operate with Birtish. In 1817, he persuaded his master, Maharao Ummed Singh to conclude a treaty with the British by which the Kota ruler and his descendents were recognized as rulers of the State and its administration was vested in Zalim Singh and his successors. The death of Zalim Singh in 1824 and the succession of his son brought the conflict of interest between the nominal ruler and his defecto hereditary Diwan or Chief Minister i.e. Jhalawar Chiefs in to the open. In 1834, matters came to such a pass that a public rising for the explusion of the Diwan was imminent. The British, with the consent of a Kota ruler, decided to dismember the state to creat a new state of Jhalwar for the successors of Zalim Singh. This was achieved by the treaty of April 1838. The new rulers of Jhalwar helped the British at the time of 1857 upheavel in Northern India. The last ruler to merge with the State in Indian Union was Harish Chandar who had succeeded to the gaddi in 1943 after the death of his father Rajendra Singh.

After independence, the initiative for the formation of a Union of States in Rajasthan came from the rulers of Kota, Dungarpur and Jhalawar. The first Union of 10 States in Rajasthan namely Kota, Bundi, Tonk, Jhalawar, Banswara, Pratapgarh, Kushalgarh and Kishangarh with its capital at Kota was inaugurated on 25th March, 1948 by Shri N. V. Gadgil. Later on, with the re-organization of State in 1956, the Sunel enclave of Madhya Bharat was also incorporated. Thus the present District of Jhalwara is nearly six times as large as the former State, but is some what smaller than the original principality created in 1838.

Among various famous places, Jhalrapatan is one of the most famous places in this district. This is known as the city of bells. This is situated on the foot of a small hill. There are many places of archeological importance like Padhnath temple, Shantinath Jain temple, Sri Dwarkadhis Mandhi, Shitala Devi temple etc.

(iii) Administrative set-up

At present, the district has three sub-divisions, seven tehsils and eight municipalities as shown below:

Sub-Division	Tehsil	Town
1. Aklera	1. Aklera	1. Aklera (M)
	2. Manohar Thana	2. Manoharthan (CT)
	3. Khanpur	
2. Jhalawar	1.Jhalrapatan	1. Manohar Thana
		2. Jhalrapatan (M)
		3. Bakani (CT)
	2. Pirawa	1. Pirawa (M)
3. Bhawani Mandi	1. Gangdhar	1. Kolvi @ Rajendrapura (CT)
	2. Panchpahar	2. Bhawani Mandi (M)

The Tehsil Manohar Thana has been created from the eastwhile Aklera thesil comprising 190 villages during the period 1991-2001.

The Collector is the chief administrator of the district who is also the District Magistrate. Each Sub-division is under the charge of a Sub-divisional Officer, while each tehsil is under the charge and supervision of a Tehsildar who is also vested with the power of an Executive Magistrate.

With the introduction of the Panchayati Raj in the State, six Panchayat Samities and 253 Gram Panchayats have been created in the district.

(iv) Physical Features

(1) Location and Size

The district is located in the south-east corner of Rajasthan at the edge of the Malwa plateau. The state of Madhya Pradesh borders Jhalawar on the south-west and in the eastof Jhalwar district, while to the north-west, north and north-east are Ramganj Mandi, Sangod, Atru and Chhipabarod tehsils of Kota District. To the north, the Mukandara Range, running from norhth-west to east, forms a rough boundary between the two districts, but Khanpur tehsil is beyond the main range. The district is situated between $23^0 45' 20''$ and $24^0 52' 17''$ north latitudes and $73^0 27' 35''$ and $76^0 56' 48''$ east longitudes. The total area of the district is 6219.08 sq. km. as against the total area of 3,42,339.73 sq.k. of the state it's rank 20th among the districts in respect area.

(2) Physiography

The district lies at the edge of the Malwa Plateau, an area of low hills and shallow plains. However, in places sharp geophysical distributions in ages long past have thrown up hills which are in reality an extension of Vindhyachal range. As as result the district falls in the following physical division:

i) The Mukandara range which enters the district from the south-east, two ridges passing close to Jhalrapatan and continuing north-west towards former Chechat tehsil of Kota district and another forming the boundary of Khanpur with Chhipabarod tehsil of Kota district.

ii) The hills of Dag, extending upto Pirawa.

iii) The plateau region with low rounded hills covering most of the southern half of the district.

iv) The central plain of Pachpahar and Jhalrapatan, extending upto the village of Aklera and Manoharthana across the ridges.

v) The palain of Khanpur is between two armas of the Mundara. The Munadara hills which take their name from the famous pass in Kota district and was the scene of Col. Monsoon's defeat by Holker in 1804, enter the district at the border of thesil Aklera and former Bakani tehsil and proceeding north-wards, bifurcate at the northen boundary of Aklera, the main range going north west-ward pass Jhalrapatan branch north-wards into Chhipabarod. Another similar branch runs parallel to the main range and south of it, forming the boundary between Asnawar and Bakani. The hills of Dag reach their highest point near the village of Tankra in the extreme south of the tehsil.

The whole of wouth Jhalwar has the characetistics of the Malwa plateau, an area of rounded bare hills interspersed by plains. The Jhalawar plain stretches in a wide belt from Bhawani Mandi in the west almost upto Asnawar in the east and is bounded on the northern, eastern and southern sided by the Mukunadara hills. This is fertile, well watered region crossed by the Ahu and Kalisingh rivers and a number lesser streams.

(3) Drainage

The rivers and streams of the district belong to the Chambal system. Except in Gangdhar tehsil, the general flow is from south to north. Thor the sake of convenience, the rivers of Jhalawar may be divided in two groups- the western group and eastern group. The western rivers are Ahu, Piplaj, Kyasri, Kantali, Rawa, Kalisingh and Chandrabhaga. The eastern rivers are Parwan, Andheri, Newaj, Ghar and Ujar. There are artificial lakes Kadila and Mansarowar. Generally speaking, the Jhalawar rivers have deep beds with the result that the water is below that of the surrounding countryside and hence canals cannot be dug for irrigation.

(4) Climate

On an average the climate is fairly dry and healthy. The year may be divided into four seasons- the hot season from March to the middle of June, the monsoon season from mid June to September, post monsoon season from October to November and the cold season from December to February. The minimum and maximum temperature recorded at Jhalawar centre during the year 200 was 4.7 ^{0}C and

45.40C. the normal rainfall in the district is about 98.3 cms. while actual rainfall at the district headquarters during the year 2000 is 72.6 cms.

(4) Natural economic resources

Soil

Soil is one of the important factor affecting land in general and transportation on land in particular. All types of soils in the district are deep to moderately deep.

Minerals and Mining

Jhalrapatan stand on Vindhyan Strata at the northern edge of the great spread of basaltic rocks known as Deccan trap formation, the northern area of which is also called the Malwa trap. These Vindhyan starts below to the upper division in the geological survey classification of the Indian rock system. The beds around Jhalrapatan are considered as belonging to the Rewa of middle group of them, and consist of sandstones and shales with a band of limestone. Over the greater part of Vindhyan area, the starta are quite undistributed and their have it is to weather into scarped plateaus of ridges, having one face steep and the other sloping. These are capped by sandstone, the low ground being eroded out of the shales. There are many varieties of the basaltic rocks hard, amorphous and soft. There are vast deposits of sandstone lying in an area of eight square miles in horizontal starta near about Jhalrapatan and Jhalawar. In the tehsil of Gangdhar, Pachpahar and Pirawa, there are no quarries as are found in the north of the district. Instead of sandstone, bloack rocks of volcanic origin called Kala Tal are used as building material. Superimposed on the black rock in many places are layers of soft stones also used for building purposes. Apart from sand stones near Jhalawar the main deposits are laterite, copper, calcite, cheledoney of agate and kankar. The laterite is found at Sarod in tehsil Pachpahar, limestone for building purposes at Mangrol in Jhalrapatan tehsil, and limestone at Jhakadiya and Chhatrapura in Pirawa and Pachpahar tehsils. Sandstone is found in the whole of the district.

Forest

During the year 1999-2000, 119705 hectares of land out of the total area of 632235 hectares, was under forest, which is about 18.93 percent of the total area of land utilization in the district. The forest are largely of Kaldi (Anogeissus pendula) sub type. Anogeissus pendula generally occupies the lower and gentler slope of hills but also extends to the tops of small hillocks and ridges particularly if the soil is good.

As regards flora, the district falls into two main sub-divisions – southern tropical dry deciduous forests and the subsidiary edaphic type of dry tropical forest. The forest, which is characterized by scattered crop of teak (tectoma grandis), occurs in the Manoharthana and Aklera forest ranges. The common associates of teak are the following :

1	Dhokra	(Anogeissus Latifolia)
2	Tendu	(Diospyros Malanoxylon)
3	Gurjan	(Lannea Caromandelica)
4	Khair	(Acacia Catechu)
5	Bahera	(Terminalla bellerica)
6	Salaran	(Boswellia Serata)
7	Mohwa	(Bassia Latifolia)
8	Beel	(Aeglemarmelos)
9	Achar	(Buchanania Latifolial)
10	Kulk	(Streceulia)
11	Salar	(Termnalia Tomntosa)
12	Gatbor	(Zizyphus Xylopyra)

The grasses found are Ratada, Khhas, Posad and Sum. Due to sufficient forest area in the district, various fauna are available. Tigers are still to be found in the Muknadara range of hills and Panthers are fairly common through out the forest area. There are also large numbers of sambhar, cheetal, wild pig, blue bull and chinkara (ravine deer). The black buck has been easily accessible for shikaries. There are no birds peculiar to the area except the Gagraun parrots, which grows to an unusually large size and is said to take little time learning the human voice. Amoung game birds, the most commom is the grey partridge, which is found in large number every-where; the black variety is less common. Jungle fowl found in the Mukandara hills. Green pegions are also common.

Land use pattern

Total geographical area of the district during 1999-2000 was 632235 hectares. The classification of land-use in the district during the same period is as under:

Classification of land use	Area (in hectares)	Percentage to total area
Area under forest	119,705	18.93
Land not available for cultivation	62,607	9.90
Permanent Pastures and other grazing land	51,701	8.18
Land under miscellaneous trees crops and groves not included in the net area sown	1,516	0.24
Cultivable waste land included fallow land	82,955	13.12
Net area sown	313,751	49.63
Total	**632,235**	**100.00**

Source : Zila Sankhikiya Rooprekha-2001.

The highest percentage to total area is 49.63 for net area sown, which is followed by 18.93 per cent for forest area to the total area of the district.

Crop pattern

There are two main crop seasons namely – Kharif and Rabi. The kharif season begins in June and ends in September-October. The Rabi season starts in October and ends in April. In Kharif season the main crops are Jowar, Bazra, Cotton, Maize, Groundnut, Til and Sugarcane, whereas Wheat, Barley, Gram, Linseed, Coriander and Opium are the chief crops in Rabi season. All pulses except masoor are sown with the Kharif crops and masoor is sown in winter along with Wheat and Gram. The sowing of coriander, linseed and gram begins in the middle of September and ends in the middle of October.

As per statistics available for the year 1999-2000, the area and production of cereals and pulses are given below :

S.No.	Name of crop	Area (in hectares)	Production (in metric tones)
1	Jowar	10,584	5,025
2	Wheat	74,907	134,242
3	Maize	42,271	33,036
4	Rice	241	171
5	Gram	48,567	65,287
6	Bazra	39	37
7	Barley	310	338

Source: Zila Sankhikiya Rooprekha-2001.

Tenancy

The Rajasthan Tenancy Act, 1955, governs tenancy in the State. It is one of the most important and progressive laws relating to agrarian reforms. The provisions of the Act apply in respect of land held by tenants as if the State Government were the landholder acting through the Tehsildar. In relation to the land held by him, every person is either a tenant or a sub-tenant, or an allottee or a trespasser. A tenant is one who is required to pay some rent on account of use and occupation of land let out to him for agricultural or allied purposes. Grantee with a favorable rate of rent, ijardar, thekedar or trespasser is not considered a tenant.

There are following classes of tenants:

(a) Khatedar tenant,
(b) Maliks,
(c) Tenants of Khudkast, and
(d) Ghair-Khatedar tenants

A Khatedar tenant is entitled to all the rights conferred and subject to all the liabilities imposed on Khatedar tenant by the Rajasthan Tenancy Act. On the date of coming into force of RajasthanTenancy Act, a Zamidar or a Biswedar holding Khudkasht was treated as a Khatedar tenant irrespective of whether he was or not in occupation on the date of vesting.

Malik is Zamidar or Biswedar who has become Malik or Kudkasht land held by him on abolition of Zamindar and Biswedari in 1959. The word 'Malik' was also added to Section 14 of the Rajasthan Tenancy Act to classify it as a class of tenant. Section 13 of the Act provides that a Malik is entitled to all the rights conferred and is subject to all the liabilities imposed on khatedar tenant and so in substance, this class of tenancy is nothing but a Khatedar tenant.

As Zamidar and Biswedar holding Khudkasht were treated as Khatedar tenants, a tenant of Khudkasht is essentially a sub-tenant in view of the fact that a sub-tenant is also for protection of his cultivatory rights even against Khatedar tenants. Every tenant of land other than a Khatedar tenant, a tenant of Khudakasht or a sub-tenant is a Ghair-Khatedar tenant.

A trespasser is a person who takes or retains possession of land without authority or who prevents another person from occupying land duly let-out to him by the State. After regulazation the trespasser becomes an allottee. An allottee is treated as a Ghair-Khatedar tenant on whom Sub-Divisional Officer shall suo moto confer khatedari rights after ten years of

allotment provided that the allottee fulfills all the terms and conditions of allotment during this period. Similar is the case of those alloottee who were otherwise allotted land by the State Government.

Irrigation

The district has a large number of rivers and streams but as their blanks are usually high and the water level below that of the surrounding countryside, they have, in the past, been very little utilized for irrigation. The total net irrigated area during 1999-2000 was 180666 hectares, which constituted 57.58 per cent of total net area sown in the district. The different sources of irrigation during the same period is distributed as follows :

S.No.	Source of irrigation	Area (in hectares)
1	Well	154,628
2	Tube wells	9,412
3	Tanks	693
4	Canals	13,697
5	Other sources	2,236
	Total	**180,666**

Source : *Statistical Abstract - 2001.*

Irrigation through wells is the most important and the canals are the next most important source of irrigation in the district. The remaining irrigated area comes under tube wells and others sources and tanks are very few percent with comparison to the above source of irrigation.

The following data shown the area (in hectares) of the main crops sown in the irrigated area :

Year	Kharif	Rabi	Jayad Rabi
1995-1996	14,680	141,826	302
1996-1997	5,272	164,873	341
1997-1998	3,417	168,807	683
1998-1999	5,572	154,919	515
1999-2000	4,857	179,198	1

Agriculture

The net cultivated area in the district was 313751 hectares and the area cropped more than twice was 195302 hectares during the period 1999-2000. as regards the agricultural implements and machinery in the district, 107155 ploughs, 41533 animal carts, 31469 diesel engines, 356 sugar cane crushers, 23878 electric pump sets , 51 ghanies and 2596 tractors were available in the year 1997.

Livestock cattle breeding

Animal husbandry

According to the livestock census of 1997, there were 430740 cattle, 228614 buffaloes, 250134 goats, 16878 sheep, 1890 horses and ponies, 3206 mules and donkeys, 1092 camels and 8983 pigs in the district. There were 29 hospitals, 2 dispensaries, 9 village based center and 40 artificial insemination centers for the benefit of animals during 1999-2000 in the district.

Fishery

There are many species of fishes in the district. The variety and production of fishes during the periods 1999-2000 is given below:

S.No.	Variety of fishes	Production in kg.
1	Major	193,351
2	Cat-fish	39,514
3	Minor	219,404
	Total	**452,269**

Education

Among the educational institutional institutions available in the district during the year 1999-2000, there were 1047 primary schools, 331 middle schools, 91 higher secondary/ secondary schools, 2 schools for physical Education and 3 colleges for general education in the district. During this period 218689 students (137365 boys and 81324 girls) were getting education in various types of institutions and 6660 trained teachers (5057 males and 1603 females) were engaged in teaching profession.

Medical and Health

The number of medical facilities available by the Government in the district during 1999-2000 is indicated below:

S.No.	Type of facilities	Numbers
1	Allopathic Hospitals	3
2	Ayurvedic, Unani & Homeopathic Hospitals	5
3	Primary Health Center & Maternity Home	30
4	M.C.W. Center	8
5	T. B. Hospital	1

Power and Electricity

Power, electricity and water facilities are basic requirements for economic development, as these are required mostly for industrial, irrigational, agricultural development and for the upliftment of standard of living. The electricity by different type's uses and their consumption of electricity and number of consumers during 1999-2000 in the district is given below:

S.No.	Type of uses	Number of consumers	Consumption (in million Kwh.)
1	Domestic Consumption	67,301	128.44
2	Commercial Consumption	7,558	51.82
3	Industrial Consumption	2,608	353.61
4	Public Lighting	88	2.9
5	Public water works	174	17.22
6	Irrigation (Agriculture)	21,190	644.58
7	Other	100	4.52
	Total	99,019	1203.09

Transport and Communication

Jhalawar has been the most backward district both for Rail and Road transport since long. Prior to 19th century, the area, not known as Jhalawar district, was both commercially un-important and away from the main trade routes. The building of Jhalrapatan, at the end of 18th century by the Kota Regent, Zalim Singh, was a turning point in the commercial history of the area. So rapidly did the town grown that Tod speaks of it as follows:

"Jhalrapatan is now the grand commercial mart of upper Malwa and has swallowed up all commerce of the central towns between its own latitude and Indore."

Jhalawar district falls on National Highway from Kota to Bhopal. Besides there are State Highways between Jhalawar-Indore route, Jhalawar-Neemuch route etc. in the district.

There was 1343 km. length of roads during 1999-2000. The classification of roads of communication in the district during the same period is as under:

S.No.	Roads	In kilometers
1	National highways	94
2	Painted roads	936
3	Metalled roads	135
4	Gravelled roads	158
5	Fair dressed up roads	20
	Total	1,343

The total no. of villages connected with roads is 395 during 1999-2000.

S.No.	Category	No. of vehicles
1	Private cars and jeeps	1,614
2	Private bus	521
3	Motor cycles and Auto rickshaw	18,764
4	Taxi and Trolly pm contract	236
5	Stage carriage	1,166
6	Public and private carriers	1,919
7	Tractors	4,722
8	Others	--
	Total	28,942

The number of vehicles registered in various categories during 1999-2000 is given below:

There were only four Railway Stations on the track between Delhi and Bombay in the district so far. Besides this, 250 post offices, 16 telegraph offices, 32 telephone exchanges, 702 public call offices and 488 letterboxes were there during 1999-2000 in the district.

Trade and Commerce

The main items of export are agricultural products such as food grains, cottonseeds and Khali (oil cake). There is a small exports in hide, skin and bones which are obtained from the slaughtered of dead cattle. Forest product such a tendu leaves and catechu and fruits (guavas and oranges) are exported to Kota and neighboring areas of Madhya Pradesh. Agricultural products exported include onion, garlic, coriander, chillies, and oil seeds such as till, linseed and poppy seed and food grains such as Jowar, gram, maize and barley.

Weekly markets in the town and big villages are common features of trade in the area. However, there are no regulated markets in the districts in the real sense, shops dealing in the commodities of daily use, exists in almost in most of the villages in the district.

During the year 2000 there were 3 shops dealing in Bhang and Doda Post hemp drugs and 17 Indian made foreign liquor and 147 shops of country liquor and 13 petrol pumps in the district. There were 6 Cinemas halls in the district, of these 1 located at Jhalwar, 2 located at Jhalrapatan and rest 3 located at Bhawani Mandi.

Industry

Jhalawar district has very few industries due to lack of means of transport, raw material, and skilled

labour. Many of the cottage industries such as cloth dyeing and printing, flour-grinding, rice husking, oil pressing, gur manufacturing, pottery and the working on brass, copper, and silver have also long been established, but some of these have declined due to the import of cheaper products.

There were 1879 persons registered with employment exchange during the year 2000 as per its live register and total no. of 11087 persons was registered at the end of the year 2000. A total of 163 vacancies were notified and 42 could get employment.

Gram Panchayats composition & its role

The system of Panchayati Raj was inaugurated on 2nd October 1959 in Nagaur district by then Prime Minister Late Shri Jawahar Lal Nehru. Late Shri Balwant Rai Mehta proposed the recommendation for Panchayati Raj. There are three levels of Panchayati Raj:

(1) Gram Panchayat (Village level)

(2) Panchayat Samiti (Block level)

(3) Zila Parishad (District level)

Gram Panchayat is an important institution of self-government. The institution is set for a village or village agglomeration. A Gram Panchayat is created on 2,000-8,000 population. It covers a maximum area of 6 miles. The villages, which have population below 2,000, are merged with the other villages to create a Gram Panchayat. Their tenure is of 5 years.

A Gram Panchayat consist 5 to 20 members. The Head of the Panchayat is called Sarpanch. Panch and Up-Sarpanchs are also elected. It includes a member belonging to backward class and a lady member. There are 151 Gram Panchayats in the district.

The main objectives of Gram Panchayat are to arrange the primary education, sanitation of public places, drinking water and light. It manages also the adult education, livestock and repairing of wells.

During the last years, Gram Panchayats functioned several important jobs like *Kam Ke Badley Anaj*, Construction of Panchayat Ghar, School buildings, roads and tanks. It organizes also the cattle fair. Gram Panchayat plays an important role in the development of village and its economy.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house, but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.
b) A place satisfying the following three criteria simultaneously:
   i) a minimum population of 5,000;
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements,

in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1. Adi Dharmi
2. Aheri
3. Badi
4. Bagri, Bagdi
5. Bairwa, Berwa
6. Bajgar
7. Balai
8. Bansphor, Bansphod
9. Baori
10. Bargi, Vargi, Birgi
11. Bawaria
12. Bedia, Beria
13. Bhand
14. Bhangi, Chura, Mehtar, Olgana, Rukhi Malkana, Halalkhor, Lalbegi, Balmiki, Valmiki, Korar, Zadmalli
15. Bidakia
16. Bola
17. Chamar, Bhambhi, Bambhi, Bhambi Jatia, Jatav, Jatava,Mochi, Raidas, Rohidas, Regar, Raigar, Ramdasia, Asadaru, Asodi, Chamadia, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Telegu Mochi, Kamati Mochi, Ranigar, Rohit, Samgar
18. Chandal
19. Dabgar
20. Dhanak, Dhanuk
21. Dhankia
22. Dhobi
23. Dholi
24. Dome, Dom
25. Gandia
26. Garancha, Gancha
27. Garo, Garura, Gurda, Garoda
28. Gavaria
29. Godhi
30. Jingar
31. Kalbelia, Sapera
32. Kamad, Kamadia
33. Kanjar, Kunjar
34. Kapadia, Sansi
35. Khangar
36. Khatik
37. Koli, Kori
38. Kooch Band, Kuchband
39. Koria
40. Madari, Bazigar
41. Mahar, Taral, Dhegumegu
42. Mahyavanshi, Dhed, Dheda, Vankar, Maru, Vankar

43. Majhabi
44. Mang, Matang, Minimadig
45. Mang, Garodi, Mang Garudi
46. Megh, Meghval, Meghwal, Menghvar
47. Mehar
48. Nat, Nut
49. Pasi
50. Rawal
51. Salvi
52. Sansi
53. Santia, Satia
54. Sarbhangi
55. Sargara
56. Singiwala
57. Thori, Nayak
58. Tirgar, Tirbanda
59. Turi

Scheduled Tribes

1. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawara, Vasava, Vasave
2. Bhil Mina
3. Damor, Damaria
4. Dhanka, Tadvi, Tataria, Valvi
5. Garasia (excluding Rajput Garasia)
6. Kathodi, Katkari, Dhor Kathodi, Dhor, Katkari Son Kathodi, Son Katkari
7. Kokna, Kokni, Kukna
8. Koli Dhor, Tokre Koli, Kolcha, Kolgha
9. Mina
10. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
11. Patelia
12. Seharia, Sehria, Sahariya

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main-worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding

the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any econom ically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude Birth Rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude Death Rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural Growth Rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age Specific Fertility Rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age Specific Marital Fertility Rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General Fertility Rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General Marital Fertility Rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total Fertility Rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total Marital Fertility Rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-Specific Mortality Rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant Mortality Rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal Mortality Rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Neo-natal Mortality Rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal Mortality Rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still Birth Rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a

reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types— (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration) (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic Status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum Area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City

The concept of 'Mega City' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding - population, its distribution

According to the 2001 census, the total population of Jhalawar district is 1,180,323 comprising 612,804 males and 567,519 females and constituting 2.1 percent of State population and area spread over 1.8 per cent in the 7 tehsils of the district, Jhalrapatan tehsil is most populous tehsil having population 291,137 while Manohar Thana is the smallest tehsils having a population of 116,076 persons. Other tehsils in order of their population size are Pirawa (183,082), Khanpur (153,370), Pachpahar (152,385), Gangdhar (142,281) and Aklera (141,992).

Out of the total population of the district 85.7 per cent lives in rural areas while 14.3 per cent lives in urban areas. The corresponding proportions in rural and urban areas of the State are 76.6 per cent and 23.4 per cent respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE,1991-2001

Sl. No.	District/Tehsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Khanpur	129,170	118,513	10,657	153,370	153,370	0	18.7	29.4	-100.0	8.3	0.0
2	Jhalrapatan	231,512	169,774	61,738	291,137	205,042	86,095	25.8	20.8	39.5	26.7	29.6
3	Aklera	112,039	97,549	14,490	141,992	123,820	18,172	26.7	26.9	25.4	12.9	12.8
4	Manohar Thana	92,542	85,381	7,161	116,076	106,848	9,228	25.4	25.1	28.9	7.7	7.9
5	Pachpahar	122,365	92,625	29,740	152,385	116,690	35,695	24.5	26.0	20.0	24.3	23.4
6	Pirawa	150,904	129,946	20,958	183,082	171,897	11,185	21.3	32.3	-46.6	13.9	6.1
7	Gangdhar	118,439	112,220	6,219	142,281	134,414	7,867	20.1	19.8	26.5	5.3	5.5
	District Total	**956,971**	**806,008**	**150,963**	**1,180,323**	**1,012,081**	**168,242**	**23.3**	**25.6**	**11.4**	**15.8**	**14.3**

The district has registered a percentage decadal variation of 23.3 during the decade 1991-2001. The rural areas of the district has attained a higher decadal variation of 25.6 per cent as compared to that of urban area at 11.4 per cent. At tehsil level, it varies from the lowest of 18.7 per cent in Khanpur tehsil to a maximum of 26.7 per cent in Aklera tehsil in total areas.

There is a decline in the percentage of urban population to total population from 15.8 in 1991 to 14.3 in 2001. At the tehsil level in Jhalarapatan, Manohar Thana and Gangdhar it has increased from 26.7, 7.7 and 5.3 per cent in 1991 to 29.6, 7.9 and 5.5 per cent in 2001.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Of the total 1600 villages, 1477 are inhabited villages. Bakani Panchayat Samiti has the highest number of villages i.e. 289 where as Khanpur Panchayat Samiti with lowest of 193 villages. Jhalrapatan Panchayat Samiti is the most populous with 205868 persons while Bakani is the least populous Panchayat Samiti with a population of 152329 persons. The maximum number of villages i.e. 558 are those which lie in the population range of 200 - 499. It is followed by 30.3 per cent of the inhabited villages, which have population range of 500-999. As regards to large size villages in the district, 7 are such which lie in the population range of 5000-9999 and 3 are such which have population more than 10000. In case of small size villages i.e. having population less than 200, such villages are 209 in number in the district.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

		Name of Towns
(a)	**New**	
	(i) Statutory town	Nil
	(ii) Census town	1. Bakani
(b)	**Denotified**	
	(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census	1.Sunel
	(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
	(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c)	**Declassified***	Nil
(d)	**Wholly merged with other town (s)**	Nil

* Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Only one census town namely Bakani has emerged, Sunel town has denotified and Khanpur town declassified, no other town merged with other town.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	12	0.8	121	0.0

21-50	61	4.1	12,284	1.2
51-100	225	15.2	83,214	8.2
101-200	685	46.4	436,143	43.1
201-300	326	22.1	274,535	27.1
301-500	124	8.4	139,195	13.8
501 +	30	2.0	65,756	6.5
Not known	0	0.0	0	0.0
District Total	**1,477**	**100.0**	**1,012,081**	**100.0**

Population Density (Rural) of the district: 165.1

The density of population of the rural areas of the district is 165. Of the total number of inhabited villages i.e. 1477 in the district, 46.4 per cent have population density ranging from 101 to 200, followed by 22.1 per cent in the range of 201-300. Apart from these 87 villages have population density upto 50.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	905	898	947	932	923	1,003
1911	908	904	936	927	916	1,039
1921	896	896	897	920	913	989
1931	907	906	903	920	915	974
1941	906	907	897	928	927	948
1951	921	919	928	954	951	977
1961	908	913	882	928	929	914
1971	911	919	875	919	922	894
1981	919	930	877	926	930	901
1991	910	919	879	918	921	904
2001	**921**	**930**	**890**	**926**	**930**	**904**

Note: Sex ratio has been defined here as the number of females per 1000 males.

The district has witnessed a fluctuating trend in sex ratio since 1901. From 932 in 1901 it declined to 927 in 1911. It again declined to 920 in 1921 and 1931 and so forth. During the last decade i.e. 1991-2001 it has increased from 918 in 1991 to 926 in 2001.

In comparison to rural areas of the district the sex ratio in urban areas has been higher upto 1951 and favouring females. From 1961 to 2001, the sex ratio in rural areas has been higher than that of in urban areas. The district has always registered higher sex ratio as compared to that of state since 1901 to 2001.

TABLE 6 : SEX RATIO BY TEHSILS, 2001

Sl. No.	Name of Tehsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Khanpur	914	914	0
2	Jhalrapatan	922	929	905
3	Aklera	911	912	904
4	Manohar Thana	930	931	919
5	Pachpahar	922	934	883
6	Pirawa	939	939	945
7	Gangdhar	948	951	906
	District Total	**926**	**930**	**904**

The district has registered a sex ratio of 926 in 2001. Where as for rural and urban areas it is 930 and 904 respectively. At the tehsil level, the highest sex ratio of 948 has been registered by Gangdhar tehsil and the lowest of 911 by Aklera tehsil for total and rural areas. In case of urban areas the highest sex ratio of 945 has been attained by Pirawa tehsil and the lowest of 883 by Pachpahar tehsil.

TABLE 7 : SEX RATIO BY PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Sex ratio
1	2	3
1	Khanpur	914
2	Jhalrapatan	926
3	Manohar Thana	924
4	Bakani	927
5	Pirawa	939
6	Dag	949
	District (Rural) Total	**930**

At the panchayat samiti level the highest sex ratio of 949 has been registered by Dag Panchayat samiti and the lowest of 914 by Khanpur panchayat samiti.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	19	1.3	989	0.1
700-749	12	0.8	2,495	0.2
750-799	38	2.6	13,479	1.3
800-849	143	9.7	61,994	6.1
850-899	270	18.3	162,678	16.1
900-949	423	28.6	425,770	42.1
950-999	302	20.4	228,311	22.6
1000-1099	225	15.2	107,007	10.6

District Total:	**717**	**100.0**	**135,841**	**100.0**
Literacy rate for District (Rural)		50.5		

The literacy rate of the scheduled tribes population in the rural areas of the district is 49.7 per cent. There are only 717 villages in the district where scheduled tribes population reside. It is significant to note that 15 (2.1 per cent) of the total inhabited villages (717) have 100 per cent literacy rate. Apart from these 72 villages are such where literacy rate ranges from 71 to 80 per cent. Population wise, 51.1 per cent i.e. bulk of scheduled tribes population have literacy rate up to 50 per cent. Among these 19.3 per cent have literacy rate ranging between 41 to 50 per cent.

In the district, 47.0 per cent of the total population comprises of total workers (main + marginal) and the rest 53.0 per cent as non-workers. Of the total workers (47.0 percent), 33.8 per cent are as main workers and the rest 13.2 per cent as marginal workers. Sex wise, 53.9 per cent of male population is that of workers whereas for females this percentage is 39.6. At the tehsil level, Gangdhar tehsil has recorded the highest percentage of total workers for males and Manoharthana for females being 57.5 per cent and 51.2 per cent respectively. On the other hand, Khanpur tehsil has recorded the lowest percentage of total workers for males and Pachpahar for females being 51.0 per cent and 31.0 per cent respectively.

Less than half (49.9 per cent) of the rural population consists of workers. There is much difference in the work participation rates of males and females being 55.0 per cent and 44.6 per cent respectively for the rural areas of the district. At Panchayat Samiti level, Dag Panchayat samiti has recorded the highest percentage for males and female Manoharthana for being 57.9 per cent and 52.8 per cent respectively. However, the lowest percentages of male workers has been registered Khanpur Panchayat samiti at 51.0 and of female workers at 33.5 percent by Dag panchayat samiti.

* In case of towns having outgrowth an astrrisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

In contrast to the rural areas of the district only 29.3 per cent of the urban population are as workers (main + marginal). Apart from this much variation is also seen in the percentage of male and female workers, which are 47.7 and 9.0 respectively. Among the towns, the percentage of workers varies from 34.1 in Kolvi @ Mandi Rajendrapur (CT) 25.0 in Aklera (M).

Note: Percentage of workers to total workers are given in brackets.

Cultivators are the main working force in the district as they form 59.5 per cent of total workers. It is followed by agricultural labourers (21.3 per cent) other workers (17.3 per cent) etc. Females (73003) outnumber males (45353) as Agricultural labourers. Much variations in the percentages of male workers (25.4) and female workers (5.4) classified as other workers is seen in the district.

At tehsil level, the percentage of cultivators to total workers varies from 77.3 in Manoharthana tehsil followed by 67.1 in Aklera tehsil to 51.8 in Jhalrapatan tehsil. For Household Industry workers, it varies from 2.3 per cent in Jhalrapatan tehsil to 1.5 per cent in Aklera tehsil. In case of 'other workers' the highest percentage of 28.3 has been again registered by Jhalrapatan tehsil while the lowest of 7.1 per cent in Manohar Thana tehsil.

				(44.6)	**(62.1)**	**(33.0)**	**(1.3)**	**(3.6)**

Note: Percentage of workers to total workers are given in brackets.

Less than half i.e. 49.9 per cent of the total rural population of the district is engaged in economic activities being workers. Of the total workers, most are engaged in agricultural activities i.e. 64.7 per cent are as cultivators and 23.0 per cent as agricultural labourers. Only 1.6 per cent of the workers are engaged in household industries whereas the significantly 10.8 per cent in other works.

Almost similar trend has been observed in all the panchayat samities.Sex wise, percentage of male workers is higher in all the four economic categories except Agricultural labourers where their percentage is 15.4 as compared to that of females at 33.0 at the district level.

\+ To be arranged in alphabetical order.

^ The names of constituent units of U.A.are given separately.

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

The percentage of workers to total population of urban areas is significantly quite low being only 29.3 per cent as compared to that of rural areas of the district being 49.9 per cent. Here too, the percentage of workers engaged in four economic categories is just the reverse as compared to rural workers where majority i.e. 83.9 per cent of the total urban workers are as 'other workers' followed by 6.2 and 5.1 per cent as cultivators and household industry workers respectively.

Almost similar trend is visible in all the municipal towns except in Jhalawar (M), and Jhalrapatan (M) where the percentage of household industry workers is higher than that of agricultural labourers and cultivators.

Sex wise percentage of male workers as other workers is higher than that of female other workers being 88.0 and 60.1 per cent respectively. On the other hand, percentage of female cultivators (12.2 per cent) is much higher than that of male cultivator's (5.2) at the district level for urban areas.

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total (1477) inhabited villages, 1174 (79.5 per cent) have educational facilities. In case of medical amenities only 14.5 per cent of inhabited villages have such amenities. A significant number i.e. 1438 (97.4 per cent) villages have improved drinking water amenities. In the communication field only 14.4 per cent of villages have post office facilities while 28.8 per cent have telephone facilities. In the banking field the picture is gloomy as only 48 (3.2 per cent) villages have banks. Less than 50.0 per cent i.e. (393) are linked with pucca approach roads whereas 80.2 per cent have power supply.

At Panchayat Samiti level, Pirawa Panchayat samiti each have the higher percentage i.e. 88.8 of villages having educational facilities. For medical amenities it is Khanpur panchayat samiti, which have highest percentage of 18.7. Much variation is seen among the panchayat samiti having telephone facilities.

Khanpur panchayat samiti has the highest percentage of villages i.e. 47.7, which have telephone facilities whereas Manohar Thana has the minimum percentage of 16.2 for such facility. Pirawa panchayat samiti has the 99.5 percent villages having power supply.

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Almost entire (93.8 per cent) rural population of the district is being served by educational amenities. It varies from 97.3 per cent in Pirawa Panchayat Samiti to 87.0 per cent in Bakani Panchayat Samiti. The highest percentage (46.9) of population availing medical amenities has been found in Khanpur Panchayat Samiti while lowest of 21.1 in Manohar Thana Panchayat Samiti. Pirawa Panchayat Samiti at the top where 99.7 per cent of the population has access to improved drinking water while Bakani Panchayat Samiti is at the bottom with 97.8 per cent. Khanpur Panchayat Samiti is in the forefront in the field by telephone facilities where 60.7 per cent of the population has been served by this facility while Manohar Thana Panchayat Samiti is at bottom with 29.5 per cent. Only 15.1 per cent of the rural population is being served with banking facilities whereas 90.3 per cent have access to power supply. Nearly hundred percent (99.9) of the population of Pirawa Panchayat Samiti is being served with power supply.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Of the total inhabited village's (1477), majority (767) of them have population range of 1 - 499. It is followed by 448 villages in the range of 500-999. There are 7 and 3 such villages, which have population range of 5000-9999 and 10000+ respectively. All the amenities are available to almost all the villages in population range of 5000 – 9999 and 10,000+.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of Panchayat Samiti	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Khanpur	193	90,491	62.4	68.7
2	Jhalrapatan	285	123,001	53.8	40.1
3	Manohar Thana	284	92,187	42.1	51.5
4	Bakani	289	81,488	42.3	48.5
5	Pirawa	205	102,821	61.6	43.8
6	Dag	221	111,919	46.8	36.9
	District Total	**1,477**	**601,907**	**51.8**	**47.8**

Note : Cultivable area = irrigated area + unirrigated area

Of the total rural area of the district (of inhabited villages) 51.8 per cent is cultivable. Apart from this only 47.8 per cent of the total cultivable area is being irrigated. At the panchayat samiti level the highest percentage of cultivable area to total area is found at 62.4 per cent in Khanpur Panchayat Samiti followed by 61.6 per cent in Pirawa and the lowest of 42.1 per cent in Manohar Thana Panchayat Samities. As regards to irrigated area, the highest percentage of 68.7 is found in Khanpur Panchayat Samiti whereas 36.9 in Dag Panchayat Samiti.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name and urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Bhawani Mandi (M)	483.0	56.0	427.0	435.0	46.0	141.0	0.0	0.0	248.0
2	III Jhalawar (M)	298.0	38.0	260.0	285.0	51.0	136.0	79.0	0.0	19.0
3	III Jhalrapatan (M)	464.0	69.0	395.0	452.0	34.0	50.0	169.0	0.0	199.0
4	IV Aklera (M)	175.0	0.0	175.0	144.0	30.0	55.0	14.0	6.0	39.0
5	IV Pirawa (M)	137.0	0.0	137.0	134.0	41.0	93.0	0.0	0.0	0.0
	District Total	**351.0**	**41.0**	**309.0**	**328.0**	**43.0**	**106.0**	**64.0**	**1.0**	**115.0**

The per capita receipt by the statutory towns of the district amounts to Rs.351.0. Of this, Rs.41.0 is being received through taxes and the remaining Rs.309.0 from all other sources. The highest per capita of Rs.483.0 has been attained by Bhawani Mandi (M) followed by Rs.464.0 by Jhalrapatan (M). The lowest per capita receipt of Rs.137.0 has been registered by Pirawa (M).

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary/ Middle	Secondary/ Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Aklera (M)	1.7	1.1	1.1	1.1	0.0
2	Bhawani Mandi (M)	5.9	2.2	0.6	0.6	0.6
3	Jhalawar (M)	5.0	5.2	1.0	0.4	0.6
4	Jhalrapatan (M)	8.3	1.3	1.0	1.0	0.0
5	Pirawa (M)	2.7	0.9	0.9	0.9	0.0
	District Total	**5.3**	**2.8**	**0.9**	**0.7**	**0.3**

The number of primary, middle and secondary schools per 10000 of population is 5.3, 2.8 and 0.9 respectively. As regards to senior secondary and college, this number is 0.7 and 0.3 respectively. At the town level, the maximum number of primary schools per 10000 population is found in Jhalrapatan (M) at 8.3 followed by Bhawani Mandi (5.9), Jhalawar (5.0) etc. It varies from the highest number of middle schools per 10000 populations at 5.2 in Jhalawar (M) to a lowest of 0.9 in Pirawa (M). As regards to colleges, the highest number i.e. 0.6 each in Bhawani Mandi and Jhalawar, whereas the number '0' has been recorded in Aklera (M), Jhalrapatan and Pirawa (M).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town+	Number of beds in medical institutions per 10,000 population
1	2	3
1	Aklera(M)	85
2	Bakani(CT)	38
3	Bhawani Mandi(M)	27
4	Jhalawar(M)	45
5	Jhalrapatan(M)	79
6	Kolvi @ Mandi Rajendrapur(CT)	8
7	Manohar Thana(CT)	14
8	Pirawa(M)	27
	District Total	**47**

+ To be arranged in alphabetical order.

The number of beds in medical institutions in towns per 10000 populations is found to be only 47. The highest number of beds per 10000 population is recorded at 85 in Aklera (M) followed by Jhalrapatan (79), Jhalawar (45), etc. It is found the lowest at 8 each in Kolvi @ Mandi Rajendrapur (CT).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town+	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Bhawani Mandi	35,695	1,118	3.1
2	Jhalawar	48,054	850	1.8
	District Total	**837,49**	**1,968**	**4.9**

+ To be arranged in alphabetical order.

Only 2.3 per cent of urban population of the district lives in slums. At the town level it varies from a maximum of 3.1 per cent in Bhawani Mandi (M) to a lowest of 1.8 per cent in Jhalawar towns.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town+	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Aklera (M)	-	Poppy Seeds
			Soyabeen
			Corriander
2	Bakani (CT)	-	Coriander
			Soyabeen
			Garlic
3	Bhawani Mandi (M)	Synthetic Yarn	Synthetic Yarn
		Polished Stone	Orange
		Oil	Coriander
4	Jhalawar (M)	Kota Stone	Kota Stone
		Polished Stone	Soyabeen
		Soyabeen Oil	Orange
5	Jhalrapatan (M)	Iron @ Steel Goods	Soyabeen
		Polish Stone	Orange
		Oil Soyabeen	Motor Parts
6	Kolvi @ Mandi Rajendrapur (CT)	-	-
7	Manohar Thana (CT)	Furniture	Wooden Furniture
		Bidi	Bidi
		Edible Oil	Edible Oil
8	Pirawa (M)	Chilli	Soyabeen
		Mahua	Gram

+ To be arranged in alphabetical order.

Polished stone and Kota stone are mainly manufactured in Bhawani Mandi (M), Jhalawar (M) and Jhalrapatan. Besides it edible Oil/ Oil one being also manufactured in Manoher Thana (CT), Pirawa, Bhawani Mandi, Jhalawar and Jhalarapatan. Other commodities being manufactured in various towns are furniture, Bidi and Chilli etc.

Soyabeen and Kota stone etc are the main commodities being exported from various towns. Apart from these, Orange is the other main commodity being exported from various towns of Jhalawar district. Corriander is also exported from the Aklera, Bakani (CT) and Bhawani Mandi municipalities.

Note:

Permanent: 1. Permanent houses refers to those houses whose wall and roofs are made of pucca materials i.e. where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi-permanent: 2. Semi-permanent houses refer to those houses made of other types of materials.

Temporary: 3. Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

Of the total number of households (202515), 94932 are living in permanent, 102247 in semi permanent and 5266 in temporary houses. At the tehsil level, the maximum number of households (36320) living in permanent houses is in Jhalrapatan tehsil, whereas the minimum of 4528 (4.8 per cent) has been found in Gangdhar tehsil. In the rural areas of the district, the maximum number of households (23234) living in permanent houses has been found in Jhalrapatan tehsil whereas the lowest of 3445 households in Gangdhar tehsil. In the urban areas the maximum (13086) and the minimum (1083) number of households living in permanent houses has been again recorded in Jhalrapatan and Gangdhar tehsils respectively.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house. Toilet means toilet within the house.
Drainage means closed and open drainage.

(i) Improved drinking water : Majority of the households i.e. 64.8 per cent have drinking water facility in the district. For rural and urban areas, these percentages are 62.2 and 80.5 respectively. At tehsil level, for rural areas, the highest percentage (83.6) of households availing this facility has been found in Khanpur tehsil whereas for urban areas it is 92.9 per cent in Jhalrapatan tehsil.

(ii) Electricity : More less than 50 per cent i.e. 55.8 per cent of households are using electricity. However there is much wide gap in the percentage of households using electricity in the rural (50.1per cent) and urban (90.8 per cent) areas of the district. At tehsil level it varies from a maximum of 82.2 per cent to a minimum of 33.3 per cent of households using electricity.

(iii) Bathroom : Less than a quarter i.e.16.2 per cent of the households have bathrooms in the district. Here too much wider gap is seen in the percentage of households having bathroom in rural and urban areas, as these are 9.1 per cent and 58.8 per cent respectively. Similar trend is seen in all the tehsils of the district.

(iv) Toilet : In case of toilets, the picture is not so good especially in rural areas of the district. Only 7.0 per cent of households of the rural areas have toilet facility as against 65.8 per cent in the urban areas. The highest percentage (24.2) of households having toilet facility is found in Jhalrapatan tehsil whereas the lowest of 5.4 per cent in Manohar Thana tehsil.

(v) Drainage : Again, in case of use of drainage, the position is some wheat better than for toilets. 35.2 per cent of households have drainage in their houses. In rural areas of the district 27.3 per cent of households have drainage system as against 82.7 per cent in urban areas.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."
Percentage in brackets.

Majority of the households (77.2 per cent) of the district is using firewood as fuel followed by cooking gas (7.1 per cent), Cow dung coke (5.6 per cent) kerosene (5.4 per cent), and crop residuel (4.1 per cent). In the rural and urban areas of the district, much deviation is seen in the percentage of households using fire wood and cooking gas as 84.3 per cent and 2.0 per cent of households of rural areas are using these respectively in comparison of 31.6 per cent and 38.2 per cent of urban areas respectively. Similar trend is seen at tehsil level also.

Data source: Census of India 2001.H-Series:" Tables on Houses, Household amenities and Assests"

(i) Banking services : Only 23.4 per cent of the total household's (202515) are availing Banking services whereas in rural and urban areas this percentage is 20.2 and 42.7 respectively. At tehsil level, the highest number of households (13056) availing this facility has been found in Jhalrapatan tehsil, while the lowest (3372) in Manohar Thana tehsil.

(ii) Radio/transistor : Of the total household's of the district, 29.0 per cent are in possession of Radio/transistor. Similarly in rural and urban areas of the district, the percentage of households having radio/ transistor is 27.6 and 37.7 per cent respectively.

(iii) Television : In case of Television, the percentage of households possessing it is much higher i.e. 65.2 in urban areas than that of in rural areas at 18.1 per cent only.

(iv) Telephone : Only 4.3 per cent of the total household's of the district have telephones. The gap is much wider in rural and urban areas of the district where 2.2 per cent and 16.8 per cent of their respective total households have telephones respectively.

(v) Auto mobiles : In case of two wheelers, only 8.3 per cent of the households have either motor cycle or scooter or moped. For rural and urban areas these percentage are 6.1 and 21.6 respectively. In rural areas 0.8 per cent have four wheelers in urban areas only 3.0 per cent of households have four wheelers.

It is very significant that less than half of the households i.e. 42.1 per cent do not have any of the specified assets. In rural areas this percentage is even higher i.e. 45.5 as compared to that of in urban areas at 21.4.

(xi) Social and Cultural Activities

Fairs and Festivals

At the time of big festivals and other important occasions, fairs in the district are organized at various places and people celebrate them with enthusiasm. Several cattle fairs are held in Jhalawar which are attended by traders from various parts of Rajasthan, Mumbai and Madhya Pradesh. Two of these, the Chandrabhaga Kartik fair and the Gomati Sagar, Baisakhi fair both are held at Jhalrapatan. The two, the Basant Panchami fair at Bhawani Mandi and the Yashwani Navratras fair at Gangdhar, are the most important. The Kartik Cattle fair concludes with the religious mela held on the banks of the Chandrabhaga River on the night of the last day of Kartik when thousands of person's assemble to bathe in the sacred waters. The livestock brought on this occasion include cows, bullocks, buffaloes and camels. Other fairs organized in the district are as follow :

Name of fair	Place
Ram Navami	Gangdhar
Shiv Ratri	Manohar Thana
Kelkhera	Ghatoli (Aklera tehsil)
Basant Panchami	Aklera
Baisakhi	Asnawar
Mahavirji	Raipur
Hanumanji	Pirawa

The festivals, observed in the districts, are also those, commonly observed by different communities in other parts of Rajasthan like Raksha Bandhan, Janmashtami, Dashera, Diwali, Holi, Gangaur, Shiv Ratri, Teej and Ganesh Chaturthi etc., by Hindus and Moharrum, Idul Fitre etc. by Muslims.

(xii) Brief description of places of religious, historical or archaeological importance in village and places of tourist interest in the towns of the district

There are several places of historical and archeological importance in the district. The important places in the district are Aklera, Asnawar, Awar, Bakani, Bhawani Mandi, etc. there are many caves and stoops at various places in Dag Tehsil, which are carved out of the soft stone, found in the locality.

Kolvi caves

Kolvi is a village 3 km in the west of Kyasara, reached from Chaumahla or Bhawani Mandi Railway Station, which are at a distance of 26 km. and 61 km. respectively from Dag. On the top of the hill to the south west of the village, there are 15 old Buddhist caves excavated in the soft stone on the north, south and east sides. The stupas and temples are ornamented with carvings of chakras and bells, but the stupas have entirely worn out and are merely huge masses of rock. A temple and an assembly hall stand to the east and west respectively of the group.

Binaika

Binaika is a small village in Dag tehsil reached from Bhawani Mandi and Chaumahla Railway stations by roads. It consists Buddhists caves cut in the side of a hillock to the east of the village. The cave includes eleven rocks cut temple and run from east to west on the south side of the hillock. The temple which stands at the eastern end of the caves deserves special mention. Other stupas and caves are at Hathigol.

Chandravati

South of the town of Jhalrapatan at a distance of about 1.5 km lie the ruins of the old city of Chandravati. It is said that it have been founded by Chandrasen, a Parmar king of Malwa, who according to Abul Fazal, was the successor of Vikramaditya. Punchmarked coins of both silver and copper found here indicate that this area was populated during the Mauryan period. According the General Chunningham, this may have been the capital of ptolemy's district of Sandrabatis. The ruins of the old city, destroyed by Aurengzeb, lie on the left bank of the Chandrabhaga River. The main items of interest are Sitaleshwar Mahadeo temple, Kalika Devi-ka-Mandir, the temple of Shiva, Vishnu and Varaha.

Chaumahala

Chaumahala is a railway station on the main Delhi-Mumbai line. It is situated on the west of Gangdhar across the Chhoti Kalisindh River. It is a thriving export center.

Dag

Dag is another important place in the district having a large masonry tank known as Kalyan Sagar, constructed by Kalyan Singh Chandrawat in 1611 A.D. There is also a masonry wall built by Maria Khan of Kota in 1812. Other interesting items are Dageshwari Mata's temple, Rani-ka-Maqbara and Kaya Varneshwar Mahadeo temple.

Gangdhar

Gangdhar is another important place, which is the headquarters of the tehsil with the same name. There is a tank of Dal Sagar to the east of the town on the borders of which were some cenotaphs of 17th century. The town contains a large fort close to the banks of the river.

Jhalrapatan

Jhalrapatan or the "city of bells" is a very prominent place of the district. It is the headquarters of the tehsil of the same name. The present city is situated at the foot of a low range of hills running from south-east to north-west. In Tod's time it was flourishing city. There are several places of archeological interest in Jhalrapatan. They include Padma Nath Temple, Sheetladevi Temple, Navlakha Fort, Gateway near Tamarind tree, Juna Mandir, Stone inscriptions of 1086 A.D.

Other places of tourist interest in the district are Jhalawar, Manoharthana, Pachpahar, Khanpur, Pirawa and Sunel. Besides, Kedila Lake, Ratedei hamlet and Rani Basera etc. are other worth visiting places.

(xiii) Scope of Village and Town Directory

In Part-A of the District Census Handbook, entitled as Village and Town Directory, an attempt has been made to present information regarding various amenities/facilities available in every rural/ urban unit of the State. The unit of the rural areas is village and that of urban area is town/urban agglomeration. Information regarding rural areas and Census Towns has been gathered through Patwaries while that in respect of urban areas other than Census Towns has been collected through the concerned municipality/Cantonment Board/Notified Area Committee. In order to have the aforesaid information authenticated the concerned departments and agencies were also contacted to furnish information available with them. All the information gathered about amenities relate to year 1999 and those pertaining to land-use pattern pertain to Samvat Year 2055 i.e. the agricultural year ending on the 30th June, 1999.

Village Directory

It will be helpful at the outset to have an idea of the items for which information has been included in the Village Directory. Information in respect of each village has been presented through a twenty three column format in which villages have been presented in order of their names and Permanent Location code Number (PLCN) at State level. The first four columns (2-5) give general information i.e. Name of village and Permanent location code number, area in hectares, population and number of households residing in villages as per Census 2001.The amenities available in the village have been shown in columns 6-18. The information regarding land-use pattern has been given in columns 19-23. As a special feature for Census-2001 some new columns 10-12 and 17-18 are first time incorporated viz. commercial and cooperative Bank, Agricultural/non Agricultural and other credit societies, Recreational and cultural facilities, News Paper/Magazine and most important commodity manufactured in the village. In case of uninhabited villages, the information has been given relating to columns 1-3 and 19-23 only and in the remaining columns the word 'uninhabited' has been mentioned. At the end of entries of each Panchayat Samiti the totals relating to columns 3-11, 13-14, 16-17,19 and 21-23 (total area, amenities and land-use break-up) have also been given.

Various amenities like drinking water, communication, post and telegraphs etc. have been shown against the name of the referent village if they are available within the village with the help of various codes. The Code Structure relating to various columns has been given in the beginning of Section-I to Part-A of this book. The number of each type of amenity has been indicated in parentheses after the suitable code in case of educational, medical and post & telegraph facilities.

If any amenity is not available within the village a dash (-) has been shown in the relevant column and next to it, the distance of the nearest place from the referent village where the facility is available has been given in broad distance ranges viz. <5 km, 5-10 km & 10+ km.

The following pattern has been adopted for indicating the educational institutions:

(i) Schools up to Class V have been treated as primary schools. They include Nursery Schools, Kindegarten Schools, Pre-basic and Pre-primary Schools and Junior Basic Schools upto Class V.

(ii) All schools having Classes VI to VIII have been treated as Middle Schools.

(iii) All schools having Classes IX and X have been treated as Secondary Schools.

(iv) All schools having Classes XI and XII have been treated as Higher Secondary Schools. They include Senior Cambridge Schools, Schools under 10+2 scheme, Intermediate, Pre-University and Junior College etc.

In case of composite schools relevant groups of classes have been treated separately, e.g. a school having classes I to XII, has been shown as having one primary, one middle, one secondary and one higher secondary school. The term 'College' includes all types of colleges whether Arts/Science/Commerce/ Medical/Engineering/Agriculture and others imparting education at Graduate or Post-Graduate level. Institutions other than industrial schools, training schools and adult literacy classes/ centres have been shown under 'others'.

In case of Medical institutions, Hospitals and Dispensaries, Allopathic, Ayurvedic, Unani and Homeopathy have been shown separately. Other institutions include all types of Yogic, Naturopathy, Hospitals/Dispensaries, Leprosy Centres etc.

In case there are more than one source of drinking water facility available in the village all such sources have been shown separately. Postal amenities include Post Office, Telegraph Office and Telephone, which are shown separately.

In case there are more than one communication facilities these have been indicated separately by relevant codes. Approach to the village refers to the state of roads etc. leading to the village from the communication centres i.e. bus-stand/railway station etc. This is to give an idea whether the village is easily approachable in all types of weather or becomes inaccessible for sometime in the year. Where there are more than one approach roads these have been indicated separately by relevant codes.

Information regarding the nearest town indicates the name of such town along with the distance from the referent village irrespective of the fact whether such town is located within Rajasthan or in some other adjoining states. In case of town situated in states other than Rajasthan, the concerned State has been mentioned against its name in parentheses with the help of abbreviations. The term 'town' here refers to one of those urban centres, which have been treated, as towns in the concerned state during 2001 Census.

In order to give an idea about the uses which electricity is put to, the information has been given under the head "power supply" if it is available in the village.

Land-Use Pattern

The land-use pattern has been presented under the following five headings:

I. Forest

It denotes those lands, which have been termed as 'forest' by the competent authority.

II. Irrigated land

It relates to land, which has actually been irrigated in the referent year. The source-wise break-up has not been presented, as no such information was available in respect of the net irrigated area.

III. Unirrigated land

The term covers all the unirrigated land cultivated during the referent year and land lying fallow upto four years.

IV. Culturable waste

It includes Gaucher i.e. pasture and grazing land and tree-groves.

V. Area not available for cultivation

It refers to land, which has not been classified in any of the above mentioned types and also includes house sites, roads, rivers, nullahs, hillocks etc.

The following nine appendices have also been provided to present the position obtaining in Panchayat Samiti and district as a whole regarding various Amenities available in rural areas, villages classified by characteristics of the population and land-use pattern in Census Town in connection with the Village Directory:

(i) Panchayat Samiti wise Abstract of educational, medical and other amenities in villages.

  (a) Villages by number of Primary schools.

  (b) Villages by number of Primary, Middle and Secondary schools.

  (c) Villages with different sources of drinking water facilities available.

(ii) Villages with 5000 and above population, which do not have one or more amenities.

  (a) Census towns which do not have one or more amenities.

(iii) Land utilisation data in respect of Census Town.

(iv) Panchayat Samiti wise lists of inhabited villages where no amenity other than drinking water facility is available.

(v) Summary showing number of villages not having Scheduled Castes population.

(vi) Summary showing number of villages not having Scheduled Tribes population.

(vii) Panchayat Samiti wise list of villages according to the proportion of Scheduled Castes/ Scheduled Tribes population to total population by ranges. It consists of two parts: Part-A relates to Scheduled Castes and Part-B to Scheduled Tribes.

(viii) Panchayat Samiti wise number of villages under each Gram Panchayat.

(ix) Statement showing number of girl's schools in the villages.

Town Directory

Particulars about each town have been presented in the form of seven statements. In towns where there are slums Statement-VII has also been given in which information regarding civic and other amenities available in the slums have been shown. In each statement towns have been arranged in alphabetical order.

As has been explained earlier, urban agglomerations are of two types: first those constituted by two or more independent towns and second those where the urban characteristics have developed in the adjoining rural areas, which have developed as outgrowth of the referent town.

Where an urban agglomeration includes two or more independent towns, the names of towns constituting the agglomeration have been indicated in the alphabetical arrangement but their names have also been repeated in the alphabetical order under the name of the agglomeration after the name of the main or core town and information relating to these has been shown here. The particulars of the constituent units of the agglomerations have not been repeated wherever they occur separately in the alphabetical order and a note "See referent agglomeration" has been given against such names. The lines relating to the information regarding urban agglomeration as a whole have not been numbered but the constituent units as and when they occur in the alphabetical order have been numbered so that the last number agrees with the total number of towns in the district concerned. In respect of Statements II, III and VI in the lines relating to agglomeration a note "See constituent units" has been shown and information has been provided separately in respect of all the constituents below it.

In case of towns having out growths, an asterisk mark has been placed against their names. Information in respect of out growths has been included in the concerned town and has not been shown separately.

The amenities and other data have been indicated by codes. A list of column wise code structure and other abbreviations used in each statement has been provided at the beginning of Section-II of Part-A of this book. We may now discuss the various Town Directory statements.

Statement I

It deals with the status and growth history of the town. Columns 2 to 7 give information regarding class, name and civic status of the town, its location code number, name of the tehsil/panchayat samiti in which it is situated, its area in sq. km and number of households including houseless households residing in the town as per 2001 Census. The class of the town has been determined on the basis of its population as per Census 2001 and the civic administration status

relates to the year 2000. Columns 8 to 18 show the population of the town in different decennial censuses beginning from 1901 upto 2001. The growth rate in terms of percentage in respect of previous censuses has been shown below the population figures pertaining to each Census beginning from Column 9 onwards.

A 'dash' under these columns indicates that the referent town did not have an urban status in the referent Censuses. Density of Population per sq. km as per Census 2001 has been shown in column 19 and sex ratio (number of females per 1,000 males) have been indicated for three censuses viz. 1981 to 2001 in columns 20 to 22.

Statement II

This statement gives information about the physical aspects and locations particulars of the town in 1999. First two columns give the serial number, class, name and civic status of the town. Columns 3 to 13 deal with the physical aspects viz. rainfall and temperature. Rainfall figures are the average of the rainfall for the last one year ending 1999-2000. If the information in respect of rainfall is not available for any town it has been given for the nearest place for which it is available. Rainfall has been shown in millimeters per annum. Maximum and minimum temperatures have been given in centigrade. If the information regarding temperature is not available in respect of any town it has been given for the nearest place for which it is available and the name of the centre has been shown in footnote.

The location of the town with respect to various administrative headquarters and nearest city is indicated in columns 6 to 10. While showing the location of the referent town with respect to various administrative headquarters, names and their distance from the referent town in kilometer have been given in parentheses below the name of the place where it is situated. In case the referent town itself happens to be the seat of the administrative headquarters, this distance has been shown zero. Information regarding the nearest city of population one Lac or more and population 5 Lacs or more have been given in respect of its situation within the State or even if this city may be situated in other State. In case the nearest city happens to be situated in other State, the name of the concerned State has been shown against the name of the city in parentheses. How the referent town is approachable is given in columns 11 to 13 which indicate the availability of communication facilities viz. railway station, bus facilities and navigable river/canal within 10 km. There is no navigable river or canal in Rajasthan.

Statement III

It gives information about the finances of the civic body controlling the local civil administration and it has been presented in '000 rupees. A 'dash' in this Statement indicates that no receipt or expenditure has occurred under the particular head and 'N' represents negligible amount. First two columns give general information, columns 3 to 9 present receipt under broad categories and total receipt and columns 10 to 16 present expenditure under broad categories and total expenditure. The receipt and expenditure has been presented under six broad categories each. While receipt through taxes implies all receipts from taxes obligatory or others and revenue derived from municipal properties and power apart from taxation, it also includes income derived from holding of fairs and exhibitions, supply of milk, license fee, cattle-ponds, fines and penalties, transport services, places of entertainment, allotment/sale/lease of land and rent etc. Government grants include per capita grant, grant from Public Works Department and grant from the Social Welfare and other departments. Other sources of receipts have been specified, wherever possible but generally they are of miscellaneous nature.

Expenditure on general administration covers salary and wages of staff, contingent expenditure on staff, grants loans and advances to the staff etc. Expenditure on public safety cover fire-fighting, light, water and lease facilities, regulating the dangerous/ hazardous trades/works/occupation, water supply, registration of births and deaths, disposal of garbage, rubbish and night-soil. Public health and conveniences cover all types of medical aid and maintenance of the destitute etc. Public works include maintenance and construction of roads and buildings and relief works in times of famine and scarcity. Expenditure in public institutions covers all types of social, cultural, educational, religious institutions etc. Which are run or patronised by the municipality. Other sources of expenditure have been specified where possible but mostly these are of miscellaneous nature.

Statement IV

This statement deals with the civic and other type of public amenities and provides information about total population, scheduled castes and scheduled tribes population, road length, system of sewerage, number

and types of latrines, method of disposal of night-soil, water supply, availability of fire-lighting service and electrification besides general information. In case of water supply the source of water as also the system of its storage have been shown. The storage capacity has been shown in Kiloliters. In case of disposal of night soil and protected water supply particulars have been given in respect of two methods/ sources in order of their importance if more than one exist in the town. In case fire-fighting service is not available in the town the name of the nearest place if in the same district or the name of the nearest district if in the same state or other state where available along with distance from the referent town has been mentioned.

Statement V

Particulars of medical, educational, recreational and cultural facilities available in the town have been given in this statement and the number of each type of these facilities has also been shown in parentheses is along with the appropriate code.

In case of medical facilities the number of beds wherever available has also been shown Allopathic, Ayurvedic, Unani and Homeopathic hospitals/ dispensaries have been shown separately. No code has been provided for allopathic institutions and the numbers have been shown only in figures. Thus beside H, code for hospital means an Allopathic Hospital. Separate codes have been provided for other three systems of medicine.

If a medical or educational facility is not available in the town, the name of the nearest place, if the same district or the name of the nearest district in the same State or other State where available and its distance (in km) from the referent town has been mentioned. Details of medical institutions shown under 'Others' have also been explained.

Arts, Science and Commerce Colleges have been shown separately. While showing the educational institutions upto Higher Secondary level the same procedure as adopted in case of Village Directory, has been followed. In case of composed schools relevant classes have been treated separately e.g. a school having classes I to XII has been treated as being composed of one Primary, one Middle, one Secondary and one Higher Secondary School.

All other types of educational institution which are not covered in column 6 to 14 have been shown in column 15 under 'Others' and include technical/ vocational and training institutions like Applied Art Painting College, Pharmacy College, Agricultural College, Teacher's Training College/Institution, Music/ Dance School etc. Janchetna Kendra is also included in others.

Statement VI

This statement contains particulars regarding trade, commerce, industry and banking. It gives names of three most important commodities, exported and manufactured in the town besides the number of banks, agricultural and non-agricultural credit societies functioning in the town. A list of the outgrowths, if any, along with their population and name of the core town has also been provided at the end of the Town Directory as an Appendix.

Statement VII

Information about all slums whether notified or not and for all towns has been shown in this statement in order to give an idea about the amenities available to the slum dwellers. Particulars about paved roads, systems of sewerage, number and types of latrines, method of disposal of night soil, number of tap points/ public hydrants for supply of protected water and electrification have been provided in respect of every slum in each town, if there are any.

PART-A : VILLAGE AND TOWN DIRECTORY

Section-I

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:

Column 1 : Serial Number

Self explanatory. All the villages within the Panchayat Samiti are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R

(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages Panchayat Samiti wise of the district.

Appendix-I-A Indicates number of villages Panchayat Samiti wise having one or more primary schools.

Appendix-I-B Indicates number of villages Panchayat Samiti wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages Panchayat Samiti wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV Panchayat Samiti wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII The appendix shows the list of villages according to proportion of the A, VII B Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates Panchayat Samiti wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

N.A.

Note: N.A. stands for information not available.

Section-II

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M.Cl.
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Tehsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 and 10

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory

Column 6 : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well Water	W

Column 14

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory

Column 4 & 5

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or primary health centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC

(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/ Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART-B : PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/Panchayat Samiti/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/Panchayat Samiti/Town
3.	Primary Census Abstract for Scheduled Tribes	District/Panchayat Samiti/Town
4.	Village Primary Census Abstract	Panchayat Samiti/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented Panchayat Samiti wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Panchayat Samiti is presented both for rural and urban areas separately. All the villages within the Panchayat Samiti constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Panchayat Samiti. In case a Panchayat Samiti is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Panchayat Samiti is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares. The area figures of the Panchayat Samiti is the total of the village areas coming under each Panchayat Samiti. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tehsils/ Panchayat Samiti within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Tehsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and Panchayat Samiti level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II : FERTILITY-MORTALITY MEASURES

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever-married women and last question related to currently married women.

AGE SPECIFIC MARITAL FERTILITY LEVEL, 1991 CENSUS

Age-Group	Jhalawar			Rajasthan		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	82.63	80.27	105.57	99.82	99.1	103.46
20-24	220.22	214.62	254.21	217.18	227.01	182.2
25-29	195.88	203.29	158.99	197.71	214.81	144.55
30-34	148.01	154.79	114.47	141.09	158.38	85.69
35-39	94.01	97.75	73.23	90.43	104.11	47.4
40-44	41.42	44.13	26.02	53.37	61.51	25.15
45-49	26.59	30.01	4.27	27.36	30.37	15.81

The ASMFR has been calculated at seven different age groups. The highest ASMFR of the district 220.22 has been found in the age group of 20-24 followed by 195.88 in the age group 25-29. The lowest ASMFR of 26.59 has been found in the age-group 45-49. In comparison to state, ASMFR of the district is higher than that of state in all age groups except in 15-19,25-29,40-44 and 45-49 age groups. Similar trends found in rural areas. It can be seen from the table.

ESTIMATES OF CHILD MORTALITY, 1991 CENSUS

Mortality Indicators	Jhalawar			Rajasthan		
	Persons	Males	Females	Persons	Males	Females
q2	111	113	110	97	95	99
q3	118	119	117	100	98	106
q5	121	122	128	110	103	117

Information on the question on children ever born and children surviving canvassed for all ever-married women has been tabulated by age of the mother. From this, estimates of child mortality have been worked out by using Brass Technique.

From the estimates of child mortality (Number of death by ages 2, 3 and 5 given as q2, q3 and q5) it is observed that the child mortality in the Jhalawar district is higher as compared to the state among males and females. It can be seen from the table.

ANNEXURE-III : VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

Sl. No.	State/District	CBR	TFR	TMFR	GFR	GMFR	No. of children ever born per woman age group 45- 49	Child-woman Ratio (0-4)	Mean age at marriage of currently married women

Source : Occasional paper No.1 of 1997 office of the Registrar General India and Rajasthan state district profile 1991.
Note: * Newly Created districts after 1991 Census.

The gross fertility rate of the district has been reported as 143 as against 162 of the State. Similarly the GMFR and TFR and TMFR of the district are also higher than that of State being 158 4.47 and 4.82 as against 184, 5.01 and 5.59 of the state respectively. The crude birth rate of the district is also lower than that of the State at 32.62.

However the number of children even born per woman in the age group of 45-49 is 4.87 which is lower than the State average of 5.07. The mean age at marriage of females in the district (15.65) is lower than that of State (16.67) as can be seen from the table. CWR (child woman ratio) 0-4 of the district is lower than state. It can be seen from the table.

ANNEXURE-IV(a) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991-2001

Place of Birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Migrants born within the state of Enumeration	205,796 (74.62)	37,178 (77.86)	168,618 (73.94)	252,227 (74.57)	32,261 (73.57)	219,966 (74.71)
(i) Migrants born elsewhere in district of Enumeration	167,896 (60.88)	29,418 (61.61)	138,478 (60.72)	210,970 (62.37)	25,372 (57.86)	185,598 (63.04)
(ii) Migrants born in other district of the State	37,900 (13.74)	7,760 (16.25)	30,140 (13.22)	41,257 (12.20)	6,889 (15.71)	34,368 (11.67)
(B) Migrants born in other states of India	69,509 (25.21)	10,280 (21.53)	59,229 (25.98)	85,804 (25.37)	11,471 (26.16)	74,333 (25.25)
(C) Migrants born in other countries	480 (0.17)	290 (0.61)	190 (0.08)	232 (0.07)	120 (0.27)	112 (0.04)
Total Migrants	**275,785 (100.00)**	**47,748 (100.00)**	**228,037 (100.00)**	**338,263 (100.00)**	**43,852 (100.00)**	**294,411 (100.00)**

(a) By Place of Birth:

It was seen that a sizeable portion of migrants in Jhalawar District i.e. 74.62 percent in 1991 and 74.57 percent in 2001 were migrants whose place of birth was within the state of enumeration. Out of this major portion where migrants who were born elsewhere in the district of enumeration.

The migrant whose place of birth was in other states of India was 25.21 percent in 1991 and 25.37 percent in 2001 Census.

Migrant to the district whose place of birth was in other countries was 0.17 percent in 1991, whereas the proportion was marginally less i.e. 0.07 percent in 2001 Census.

ANNEXURE-IV(b) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	205,796 (100.00)	168,879 (82.06)	36,917 (17.94)
	Rural	185,416 (90.10)	161,189 (78.33)	24,227 (11.77)
	Urban	19,400 (9.43)	6,840 (3.33)	12,560 (6.10)
In other states of India	Total	69,509 (100.00)	54,210 (77.99)	15,299 (22.01)
	Rural	57,027 (82.04)	49,857 (71.73)	7,170 (10.31)
	Urban	12,292 (17.68)	4,243 (6.10)	8,049 (11.58)

(b) Internal Migrants (Rural/Urban):

Majority of the internal migrants i.e.82.06 per cent whose places of birth were within Rajasthan belonged to the rural areas of the state. The same trend also reflects in case of migrants born in other state of India as can be seen from the table.

ANNEXURE-IV(c) : INTERSTATE MIGRANTS, 1991-2001 CENSUS

Place of Birth	1991 Census

Total	85,804	100.00

(c) Inter-state Migrants:

In the case of Inter-state migrants they are mainly from Madhya Pradesh and Uttar Pradesh as their percentages are 93.89 and 2.59 respectively in 1991 census. In 2001census main migrants are also from Madhya Pradesh and Uttar Pradesh and their percentage are 92.68 and 3.97 respectively. Percentage of six states to total migrants is 98.79 in 2001.

ANNEXURE-IV (d) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE, 1991-2001 CENSUS

Place of Last Residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Within the State of Enumeration but outside the place of Enumeration	210,733 (75.09)	38,278 (78.81)	172,455 (74.31)	257,619 (74.92)	33,733 (74.59)	223,886 (74.97)
(i) Elsewhere in the District of Enumeration	172,473 (61.46)	30,238 (62.26)	142,235 (61.29)	216,360 (62.92)	26,748 (59.15)	189,612 (63.49)
(ii) In other districts of the state of Enumeration	38,260 (13.63)	8,040 (16.55)	30,220 (13.02)	41,259 (12.00)	6,985 (15.45)	34,274 (11.48)
(B) States in India beyond the state of Enumeration	69,482 (24.76)	10,040 (20.67)	59,442 (25.62)	86,011 (25.01)	11,378 (25.16)	74,633 (24.99)
(C) Last Residence outside India	420 (0.15)	250 (0.52)	170 (0.07)	221 (0.06)	113 (0.25)	108 (0.04)
Total Migrants	**280,635 (100.00)**	**48,568 (100.00)**	**232,067 (100.00)**	**343,851 (100.00)**	**45,224 (100.00)**	**298,627 (100.00)**

(d) Migration by Place of Last Residence:

In the percentage distribution of migrants by place of last residence inthe district it was seen that in 1991 census,.the highest proportion of migrants i.e 75.09 percent were from within the state of enumeration but outside the place of enumeration. In 2001 Census this proportion dropped to 74.92 percent in the same category. Suprisingly it was seen that the proportion of female migrants were higher than the male migrants in both censuses.

The migrants in the district that were from states in India beyond the state of enumeration was 24.76 percent in 1991 as compared to 25.01 percent in 2001 census.

Persons whose last residence was outside India were 0.15 percent in 1991 census while there was a marginal reduction to 0.06 percent in 2001 census.

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	210,733	172,466	38,267
		(100.00)	(81.84)	(18.16)
	Rural	188,784	164,247	24,537
		(89.58)	(77.94)	(11.64)
	Urban	20,889	7,319	13,570
		(9.91)	(3.47)	(6.44)
In other states of India	Total	69,482	54,813	14,669
		(100.00)	(78.89)	(21.11)
	Rural	57,270	50,540	6,730
		(82.42)	(72.74)	(9.68)
	Urban	12,012	4,163	7,849
		(17.29)	(5.99)	(11.30)

(e) Migration by Place of Last Residence (Rural/ Urban):

Majority of the internal migrants i.e 84.01 per cent whose place of last residence were within Rajasthan belonged to rural areas. The same trends also reflects in case of migrants whose place of last residence were in other state of India as can be seen from the table.

RELIGION

Religion is an important basic cultural characteristic of the population. It provides an interesting picture of the society. The data on religion projects the unity and diversity of the country. The data is great importance to the public as well as Government,NGO and Minorities Commission.

Among the followers of six major religions in Jhalawar District it was seen that the proportion of Hindus had marginally decreased from 92.20 percent in 1991 to 92.2 percent in 2001 Census. Whereas the proportion of Muslims increased from 6.63 to 6.7 percent,. In the case of Jain Community decreased during the same period and the Sikh community showed a marginal increased., The Christion community also registered a marginal decreased from 0.03 to 0.02 in 1991-2001 respectively.

At the state level however the proportion of Hindus Sikhs, and Jains decreased whereas those of Muslims Christians, and Buddhists increased

AGE, SEX AND EDUCATIONAL LEVEL,1991- 2001

Literacy in the age-group 10-14 years in1991 in the district was 46.7 percent in the total, which was higher among the males 62.9 percent and females 28.2 percent. In the total in the age-group 15-19 years the literacy slightly lower in the total i.e. 43.2.percent and the same trend was found as in the earlier age group except that the female literacy in this age group 15-19 years was as low as 23.2 percent. In general it was seen that the literacy rate in the urban areas was much higher both among males and females. The proportion of metric but below graduate was however not very high. In the total there were 5.1 percent metric but below graduate persons. Here also the male proportion was higher i.e. 8.2 percent compared to females 1.8 percent. Graduate and above in the age group 20 + years followed the same trend but in lesser proportion. In 2001 census the total population of the Jhalawar district was 1180323 which 57.32 percent are literates. As per the definition of literacy in the 2001 Census the entire population in the age group 0-6 was considered to be illiterates. The total literacy rate in the district

Jhalawar in the age-group 10-14 years was 79.3 percent and among males and females it was 89.5 and 67.5 percent respectively, which is lower as compared to the state in the same age group. Similarly literacy rate in the age group of 15-19 years 85.3 percent males and 54.7 percent females were reported in the district, which is also lower than that of the state.

It is a general trend of the literacy at the state as well as district level, female literacy is lower than the male literacy. The percentage showed a decline at Matric but below Graduate 11.2 percent among male and 3.3 percent as females while at the graduate and above level 4.8 percent males and 1.6 percent are females. It can be seen from the Annexure VII.
