VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

भारत की जनगणना
CENSUS OF INDIA 2001
लोकाभिमुख
PEOPLE ORIENTED

ANAND NIGAM
Deputy Director
Directorate of Census Operations, Rajasthan

Shaheed Smarak

District Jhunjhunun predominates among all the districts in regards to Military personnel. Approximately Sixty Thousand Ex-servicemen and their families reside in the district, whereas approximately Forty five Thousand serving military men are guarding the frontiers of the country, which is the highest figure in the country from any single district, and it is in the forefront of bravery and sacrifice. After Independence there were 360 martyrs in the district from different wars. Since the Kargil war there has been 66 persons who have been martyred in the district whereas 107 army officers have been honoured with gallantry awards. Havaldar Major Peeru Singh who was the second recipient of the Param Veer Chakra in India belonged to Beri Village of this district. The Shaheed Smarak is a testimony of bravery and sacrifice of the district.

District Highlights–2001 Census xv

Important Statistics and Ranking of Tehsils in the District xvii

Statements 1-9

Statement-1 : Name of the Headquarters of the District/Tehsil, their Rural-Urban status and Distance from District Headquarters, 2001 xxi

Statement-2 : Name of the Headquarters of the District/Panchayat Samiti, their Rural-Urban status and Distance from District Headquarters, 2001 xxi

Statement-3 : Population of the District at each Census from 1901 to 2001 xxii

Statement-4 : Area, Number of Villages/ Towns and population in District and Tehsil, 2001 xxiii

Statement-5 : Panchayat Samiti-wise number of villages and rural population, 2001 xxiv

Statement-6 : Population of Urban Agglomerations/Towns, 2001 xxiv

Statement-7 : Villages with population of 5,000 and above at Panchayat Samiti level as per 2001 Census and amenities available xxv

Statement-8 : Statutory Towns with population less than 5,000 as per 2001 Census and amenities available xxvii

Statement-9 : Houseless and Institutional Population of Tehsils, Rural and Urban, 2001 xxviii

Summary Statement : Jurisdiction of Panchayat Samities in each Tehsil, 2001 xxix

Analytical Note

(i) History and scope of the District Census Handbook 3

(ii) Brief History of the District 6

(iii) Administrative set-up 7

(iv) Physical Features : (1) Location and size (2) Physiography (3) Water resources (4) Climate and Rainfall (5) Natural economic resources 8

Page Nos.

(v) Census Concepts 13
(vi) Non Census Concepts 20
(vii) 2001 Census findings-Population, its distribution 24
(viii) Brief analysis of PCA data based on inset tables 1 to 36 24
(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47 49
(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India, 2001 based on inset tables 48 to 52 55
(xi) Other Developmental activities 61
(xii) Brief description of places of religious, historical or archeological importance in villages and places of tourist interest in the towns of the district 62
(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district 63
(xiv) Scope of Village and Town Directory - column heading wise explanation and coverage of data 64

PART-A : VILLAGE AND TOWN DIRECTORY

Section-I : Village Directory

(a) Note explaining the abbreviations used in Village Directory 71
(b) List of Villages merged in Towns and Outgrowths at 2001 Census 75
(c) Panchayat Samiti-wise presentation of Village Directory Data
(i) Panchayat Samiti Maps showing Tehsil boundary
(ii) Alphabetical List of Villages alongwith Location Code 1991 and 2001
(iii) Presentation of Village Directory data in prescribed format
1. Panchayat Samiti Jhunjhunun 79
2. Panchayat Samiti Alsisar 113
3. Panchayat Samiti Chirawa 143
4. Panchayat Samiti Surajgarh 165
5. Panchayat Samiti Buhana 195
6. Panchayat Samiti Khetri 225
7. Panchayat Samiti Nawalgarh 249
8. Panchayat Samiti Udaipurwati 273

(d) Appendix to Village Directory
Appendix-I : Abstract of Educational, Medical and Other Amenities in Villages - Panchayat Samiti level 292
Appendix-IA : Villages by number of Primary Schools 296
Appendix-IB : Villages by Primary, Middle and Secondary Schools 296

Urban Primary Census Abstract 524

Annexure-I : Number of villages under each Gram Panchayat, 2001 Census 560

Annexure-II : Fertility and Mortality, 1991-2001 Census 593

Annexure-III : Various measures of fertility and mean age at marriage, 1991-2001 Census 594

Annexure-IV : Percentage distribution of Migrants by place of birth/ place of last residence, 1991-2001 Census 595

Annexure-V : Brief account of main religions in the district as per 1991-2001 Census 597

Annexure-VI : Marital status of population as per 1991-2001 Census 598

Annexure-VII : Age, Sex and Education in the district, 1991-2001 Census 600

Annexure-VIII : Distribution of different mother tongues returned in 1991-2001 Census 601

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri J.L.Modi, Director of Census Operations, Rajasthan. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Additional Secretary &
Census Commissioner, India

Preface

I am deeply indebted to the State Government of Rajasthan for their unstinted support and cooperation despite all odds and adversaries like famine etc. at all stages of Census Operations of 2001. I am grateful to Shri Inderjit Khanna, the then Chief Secretary of Government of Rajasthan for his prompt response, guidance and cooperation given to the Census Organization. He infused a sense of urgency and seriousness in the minds of District Collectors and Officers of the District Administration, which geared up the entire administrative machinery. The Supervisors and Enumerators, the basic census functionaries worked ceaselessly in the entire period of fieldwork to make Census 2001 successful.

Sarvashri Ashok Pandey and Vinod Zutshi, the then Secretaries in the Department of Cabinet Secretariat and General Administration have been instrumental in making Census 2001 a successful one. I owe my thanks to both of them. I am also thankful to other Departments like Education, Finance, Revenue, Economics and Statistics, Public Relations, Printing and Stationery, Local Self-government and Personnel Department for extending their full cooperation.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his unstinted support and spontaneous, unfailing guidance throughout our endeavours. At the outset I would like to thank Shri D.K. Sikri, Registrar General and Census Commissioner, India for guiding us in bringing out this report. My grateful thanks to Shri K.N. Unni, Ex-DRG (C&T), Shri R.G. Mitra, Ex-DRG (C&T), Shri R.P. Singh, Consultant (Map), Shri Himakar, Additional Director (EDP), Dr. I.C. Agrawal, A.R.G.(SS), Shri S.L. Jain, Deputy Director (SS), Shri C. Chakravorty, Joint Director (DDU) and their colleagues at the headquarter for their ever willing, helping hand and thoughtful suggestions for putting together and shaping the volumes in their present form.

The Director of Census Operations, Rajasthan, Shri J. L. Modi under whose guidance the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before this volume could be made available for the press. I am deeply greatful to Shri H.S. Meena, Ex-Joint Director of Census Operations, Rajasthan for its success.

It may be mentioned a few annexures have been added to this volume with a view to provide an insight into the 1991 and 2001 data on the suggestion of Social Studies Division of the Office of the Registrar General, India. In this connection the contribution of Shri V.K. Gupta, Senior Compiler can not be ignored.

Shri H.C Sharma, Assistant Director incharge of District Census Handbooks and Primary Census Abstract, who was ably assisted by his team of dedicated workers deserve all praise for their perseverance and dedication in preparing Village and Town Directories and in finalization of PCAs and other inset tables. I would like to thank Shri G. Fernandes, Assistant Director who not only coordinated the work but also contributed immensely to the cause of Village and Town Directories.

In view of the increasing demand of the publications in electronic format, it has been decided to publish the DCHB also on CD. I highly appreciate the efforts put in by Smt. Jyoti Luhadiya, DD(EDP) and her team to compile in the electronic format. The efforts put in by Shri Divesh Chawla, DEO Gr-'B' to prepare this is highly commendable. In this connection, the contributions of Shri P.N. Mathur Sr.Supervisor and Shri J.P. Verma, DEO Gr-'B' cannot be ignored.

Shri H.S. Meena, Joint Director has taken pains in drafting the District Profile and the Analytical Note for the district. The members of the staff in the Map Section did a commendable job under the guidance of Shri Panna Lal, R.O.(Map), ably assisted by Shri R.S. Tyagi, Sr.Geographer in bringing out various maps. .

Anand Nigam
Deputy Director of Census Operations,

ANALYTICAL NOTE

Analytical Note

History and scope of the District Census Handbook

The series of District Census Handbooks has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several new innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Numbers (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from 1 to N. Each village has been assigned an eight digit code. The first six digits represent the code of the village as existing at the present census. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001, are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

The responses for almost all the questions in the Houselisting Schedule had pre-coded options. This not only helped the enumerators to record the response easily but at a later stage would hopefully facilitate quicker data processing. Apart from the improvements made in the format of the Houselisting Schedule, the scope of Houselisting was considerably expanded with the inclusion of new questions based on requirements of various data users and planners. The new features of the Houselisting Schedule are listed below.

- For the first time, different uses of census houses have been standardized and grouped into ten main uses and assigned code numbers.
- Plastic has been added in the list of material of wall and roof of a census house, as it is often used for shelter in slums and shanties.
- In the previous census, the location of drinking water source was categorized into two locations viz. 'within premises' and 'outside premises'. In the Census of India, 2001, the source 'outside premises' was split into two categories namely 'near the premises' and 'away from the premises'.
- The scope of question of availability of electricity was expanded to include six sources of lighting. Besides no lighting, this included sources like electricity, kerosene, solar, other oil and any other source.
- In 1991 Census, a question on availability of toilet facilities to the household was canvassed while in Census of India, 2001, specific information on availability of latrine within the house by the type of latrine was sought.

In addition to expending the scope of the questions canvassed during the Houselisting Operations in the 1991 Census, the following new questions were added in the Houselist Schedule for Normal Households at the Census of India, 2001.

- If the Census house was used for residential or partly residential purposes, the condition of the census house was categorized as good, livable or dilapidated based on the perception and response of the respondent.
- A question on number of married couple(s) living in the household was canvassed.
- Information was sought on the number of married couple(s) having independent room for sleeping.

- Information as to whether the waste-water outlet of the house is connected to 'closed drainage' or 'open drainage' or has no drainage was collected.
- A question on availability of bathroom within the house was included.
- Information on availability of kitchen within the house was also sought.
- Availability of certain assets to the households namely radio/ transistor, television, telephone, bicycle, scooter/motor cycle/ moped, car/jeep/van were also included.
- It was also enquired whether any banking service was being availed by the household.

The Household Schedule adopted for the Population Enumeration also primarily had pre-coded options for majority of the questions. The questions for each data item were made as self-explanatory as far as possible for easy understanding. The comprehensive Household Schedule had three parts and two sides A and B. Part I contains the Location Particulars; Part II relates to Individual Particulars and Part III contains questions for Household engaged in Cultivation/Plantation. To facilitate quick tabulation for bringing out Provisional Population Totals, provisions of page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates and workers and their categories by sex. Most of the questions canvassed during the 1991 Census, were retained for the 2001 Census, except the question on ex-serviceman, which was dropped during the Census of India, 2001. However, a number of new questions were added in the Household Schedule in view of the suggestions from policy makers, data users and researchers, while the scope of certain existing questions was enhanced.

These modifications are: -

- Age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.
- The type of educational institution attended by a person was enlarged to include school, college, vocational institute, other institute and literacy center.
- The scope of the definition of 'work' was expanded in the Census of India, 2001, to include production of milk for domestic consumption. In the 1991 Census, cultivation of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India, 2001.
- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India, 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census is dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census, is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census:

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected are - in seeing, in hearing, in speech, in movement and mental.

- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work is collected under this section.
- The Household Schedule has a new set of questions for Household engaged in cultivation/ plantation- i) Net area of land under cultivation/ plantation, ii) Net area of land irrigated and iii) Tenure status. This question was not canvassed at the 1991 Census but was canvassed in the 1981 Census in a slightly different form.
- The signature or thumb impression of the respondent has been taken on the Household Schedule for the first time in the history of census. This was not only aimed at obtaining correct and complete information but also for giving an opportunity to the respondents to authenticate the information provided by them. The relationship of the respondent with the head of the household was also obtained. This new feature will pave way in carrying out a methodological study in future on the respondent profile in the census.

In 1981 Census, for the first time, an attempt was made in the series to bring out demographic and other data in diglot, Hindi and English, for a more beneficial use by data user of all categories. Hindi being the official language of the State, a Hindi version of the analytical notes was also added with a view to caters to the needs of all sections of readers. The manner of presentation of the District Census Handbooks for the 1991 Census is by and large the same.

As a necessary corollary to the Handbooks, Panchayat Samities, the basic administrative units of development, administration and planning, were listed out separately for the first time in 1981 Census in relation to those districts wherein they were not coterminous with their tehsils. As an additional attempt, informations relating to population figures as well as amenities available in each village located in the jurisdiction of each Panchayat Samiti were also presented in a separate volume under the title "Supplement to District Census Handbook". However, for reference in the main District Census Handbook, a list of villages forming part of each non-coterminous Panchayat Samiti was provided along with the abstracts of population and amenities for such Panchayat Samities as a whole in the form of Special Annexures.

In order to cater to the over-all needs of the data-users and to facilitate the task of administrators and planners it has now been decided to present the Village Directory and Primary Census data at the Panchayat Samiti level instead of the traditional Tehsil level presentation. It is expected that the presentation of Village Directory and Primary Census Abstract data at Panchayat Samiti level will help the planners in formation of micro-level developmental plans, as the Panchayat Samiti is now the lowest administrative unit for development planning. However, for the convenience of the data users and for the sake of comparability of data at Tehsil level, the Primary Census Abstract has also been presented at the Tehsil/ Town level in the form of an Appendix.

A general note on each district covering information of general interest regarding its history, topography, physiography, administrative set-up and places of tourist and historic importance etc. has also been included with a view to provide comprehensive and more purposeful information about the district as a whole. Population figures of Scheduled Castes and Scheduled Tribes constituting the core of 'Weaker Section' have also been presented at district, panchayat samiti and town level so as to facilitate planning for their welfare both at micro and macro levels.

It is earnestly hoped that this publication will serve its purpose for planners and administrators of welfare schemes and other data users in general.

Prior to 1951, Census Reports were printed for the whole province/state. The idea of preparing the District Census Handbooks separately for each district was conceived during 1951 Census as a part of a plan intended to secure an effective method of preserving the Census data below the district level. The idea was that all the district census tables would be bound together in a single volume called the District Census Handbooks. Since then the District Census Handbooks are being published regularly.

The 1951 Census series of District Census Handbooks was printed in two parts. Part I contained

five General Population Tables (A Series), three Economic Tables (B Series), five Household and Age Tables (C Series) and seven Social and Cultural Tables (D Series). In Part II of District Census Handbook "Primary Census Abstract and Village Directory" which showed the basic population figures for each village or town classified by livelihood classes, were included along with some information of general nature.

The 1961 Census series of District Census Handbooks were printed in single volume in which Primary Census Abstract upto village and town/ward level and Village Directory upto village level were given. Besides, some official statistics collected from various state departments, four General Population Tables (A Series), sixteen Economic and Household Tables (B Series), seven Social and Cultural Tables (C Series), four Housing Tables (E Series) and eight Special Tables for Scheduled Castes/Scheduled Tribes were also provided in District Census Handbooks. For the first time in 1961 Census the maps for the district and tehsil were also included in the District Census Handbooks.

In 1971 Census series of District Census Handbooks village-wise 'Village Directory' giving services, facilities or amenities available in the village was given. 'Town Directory' was introduced for the first time giving useful information in respect of every town of the district. Rural Primary Census Abstract upto village level and Urban Primary Census Abstract upto enumeration block level were given in District Census Handbooks. While the District, Tehsil and Town maps were included; the inclusion of Census Tables was dispensed with in the District Census Handbooks in 1971 Census.

The scope of 1981 series of District Census Handbooks was enlarged specially in relation to amenities and land-use pattern. Apart from new items like uses of electricity, details of communication points, information for which was not collected in 1971 Census, a note on each district covering general information on its history, topography, flora, fauna and administrative set up etc. was also added. The format of the Primary Census Abstract was also restructured in the light of changes in economic and other questions canvassed in the 1981 Census but at the same time, all efforts were made to retain comparability with 1971 Census data. The inclusion of Special Primary Census Abstract for Scheduled Castes and Tribes at the Tehsil/Town level was another innovation introduced in 1981 Census series.

The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same as followed in 1981. However, the format of Primary Census Abstract was restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group was included in Primary Census Abstract for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate at the time of the 1991 Census.

One of the most important innovations in the 1991 Census was the Panchayat Samiti level presentation of data in the Village Directory and Primary Census Abstract instead of the traditional Tehsil level presentation.

Deviating from 1991 Census, like 1981 Census four fold industrial classification of main and marginal workers has been presented in 2001 as against nine fold given in 1991.

The mode of presentation of DCHB in 2001 will by enlarge be same as that of in 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc pertaining to 1991 Census of the respective district in the DCHB in the form of Annexures II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

(ii) Brief History of the District

The territory now known as district Jhunjhunun was a Nizamat under the erstwhile Jaipur State and was made up of what once used to be called the Thikana of Khetri, Jagirs of Bissau, Nawalgarh, Mandawa, Dundlod and Udaipurwati region of

Bhomias. In 1949, the princely state of Jaipur also merged in the United States of Greater Rajasthan. After the formation of Rajasthan State the district of Jhunjhunun was carved out and since then it continues to be in existence.

At the time of the merger of the former Jaipur State into Rajasthan, this district was reconstituted and the areas of Neem-ka-thana and Bairath which used to be part of this district were transferred to Sikar and Jaipur district respectively.

During the period 1951-61, one village Kot was transferred to Udaipurwati tehsil from Neem-ka-thana tehsil of Sikar district while Gugalwa village from Jhunjhunun tehsil was transferred to Rajgarh tehsil of Churu district. However, within the district several inter-tehsil transfers of villages took place. Among these, transfer of 27 villages of former Churi Ajitgarh tehsil to Jhunjhunun tehsil and nine of its villages to Udaipurwali tehsil is worth mentioning as due to these transfers, the Churi Ajitgarh tehsil lost its existence. While no inter-district or inter tehsil transfers took place in 1961-71, only two villages were transferred from Chirawa tehsil to Jhunjhunun tehsil as a sequel to the inter-tehsil transfers during 1971-81. After 1981 Census, a new tehsil named as Nawalgarh tehsil was formed by transfer of 71 villages and Mukandgarh and Nawalgarh towns from Udaipurwati tehsil.

Regarding urban areas of the district, in 1951, there were fifteen towns namely, Jhunjhunun, Mukandgarh, Surajgarh, Mandawa, Nawalgarh, Udaipurwati, Khetri, Chirawa, Pilani, Bagar, Mandrela, Gudha, Parasrampura, Bissau and Singhana. Of these, five towns namely, Mandrela, Gudha, Parasrampura, Bissau and Singhana were declassified in 1961. On the other hand, Vidyavihar was added to the list of towns in 1961. Bissau which was treated as town till 1961 was declassified but again treated as town in 1971. Similarly, Mandrela which was a town in 1951 was also declassified as town but again treated as such in 1981. Gothra was only place in the district which had been treated census town in 1981 as it fulfilled the criteria laid down for declaring a census town. During 1991, Mandrela has been declassified.

The total number of villages in the district in 1991 were 827, whereas it increased to 859 in 2001 census which includes 4 uninhabited villages. After 1991 census, a new tehsil named as Buhana tehsil was formed through Gazette Notification No. 9 (12) Raj. / Group / 97 dated 23.9.98 by transfer of 122 villages from Khetri tehsil and thus only 80 villages remained in Khetri Tehsil. After 1998, the State Govt. created 4 and 6 new villages in Buhana and Khetri Tehsil respectively. Similarly 2, 1 and 19 new villages were created in Jhunjhunun, Chirawa and Nawalgarh tehsil respectively. Thus altogether 32 villages were created in the district after 1991 census.

After 1991, the names of villages Umedpura and Sedoo Ram Ki Dhani of Jhunjhunun tehsil were changed as Kayasthpura and Adarsh Nagar respectively. Similarly in tehsil Nawalgarh also, the village names of Jhajhar with Bhairoowas and Lohagarh (Lohagat) were changed as Jhanjhar and Lohargal respectively.

(iii) Administrative Set-up

The Collector is the administrative head and is also vested with the powers of the District Magistrate. For the purpose of administration the district is divided into three sub-divisions, six tehsils, eight panchayat samities and thirteen towns (including one census town) as mentioned below :

Sub-divisions	Name of tehsils	Name of Panchayat Samities	Name of Towns
1	2	3	4
1.Jhunjhunun	1.Jhunjhunun	1.Jhunjhunun	1.Jhunjhunun
		2.Alsisar	2.Baggar
			3.Mandawa
			4.Bissau
	2.Chirawa	3.Chirawa	5.Chirawa
		4.Surajgarh	6.Surajgarh
			7.Pilani
			8.Vidyavihar
2. Khetri	3.Khetri	5.Khetri	9.Khetri
	4.Buhana	6.Buhana	10.Gothra (Census Town)
3. Nawalgarh	5.Nawalgarh	7.Nawalgarh	11.Nawalgarh
	6.Udaipurwati	8. Udaipurwati	12.Mukandgarh
			13.Udaipurwati

To maintain Law and Order in the district, Superintendent of Police is posted at the district headquarter and under him three Dy.Superintendent of Police are posted in the Sub-Divisions. Police Circles are located at Jhunjhunun, Chirawa, Khetri and Nawalgarh. Whereas 16 Police Stations and 15 Police Sub-stations (chowkies) are set up in the district.

For the administration of justice, there are Courts of District & Session Judge, Civil Judge-cum-Chief Judicial Magistrate in the District Head Quarter. Additional Distt. & Session Judge at Jhunjhunun and Khetri and also Additional Chief Judicial Magistrate is functioning at Jhunjhunun, Khetri and Nawalgarh. Besides, the courts of Munsif-cum-Judicial Magistrate are functioning at Jhjunjhunun, Udaipurwati, Chirawa and Khetri.

(iv) Physical features

(1) Location and Size

The district is situated in the north-eastern portion of Rajasthan and lies between $27^0$38' and $28^0$31' north latitudes and 75^0 02' and 76^0 06' east longitudes. It is bounded on the north-west by Churu district. On the north-east by Hissar and Mahendragarh districts of Haryana state and on the West, South, and south-east by Sikar district. The total Area of the district is 5928 square kilometre.

(2) Physiography

Most of the district consists of a mass or rolling hills and the remaining part nearer to the south-eastern border contains some offshoots of the Aravalli range of hills, running in south-eastern direction. A range of Aravalli hills enters the district in the extreme south of Udaipurwati tehsil and extends upto Singhana and Khetri in the east. In general, elevation above mean sea level is between 300 to 450 metres. The highest peak 1,051 metres high is in the south of Lohagarh village.

Sand shifting and active dunes are the main hazards to cultivation. Soil erosion is the result of constant deforestation and mining activity which had bared slopes.

(3) Water Resources

The drainage is inland and is related to the Kantli river system which is non-perennial river and flows in the district. This river covers a large area of the district and flows from south to north direction. It originates in the Kiandera block hills of Sikar district and enters this district from the south-western portion of Udaipurwati tehsil. After passing through the area of all the tehsils of the district, it ultimately enters Churu district. Besides, there are four major streams, namely Dohan, Chandravati, Udaipur Lohagarh-ki-Nadi and Sukh Nadi. There is no lake in the district but sacred tanks are in existence for bathing purposes. There is also a Bund of 'Ajit Sagar' under Irrigation Department, which is about 11 km. from Khetri town on Nizampoor road.

(4) Climate and Rainfall

The district has a dry climate. In summer sand storms and normally sand-wind storms are a characteristics feature of the district. The cold season starts by about the middle of November and continues till about the end of March. The maximum temperatures 45^0 C and minimum 1^0 C reached in the district. The hot season starts from April and extends upto the end of June. The south-west monsoon is from July to mid-September. The normal annual rainfall at the district headquarter has been 44.5 cm. On an average there are 27 rainy days in a year. The meteriological observatory in the district is only at Pilani which started functioning in 1958. In the year 1999-2000, the minimum and maximum temperatures at Pilani Centre were recorded as 1.2^0 C and 45. 3^0C respectively. The humidity is recorded 15.20 per cent in the monsoon season.

(5) Natural economic resources

Geology and Minerals

A major part of the district is covered by recent to sub-recent blown sand, however, the small area of eastern part is occupied exclusively by the rocks of Delhi Super Group and later intrusives. The Delhi Super Group is represented by quartzites, marble, schists and phylite of Alwar Group and quartzite, mica schist, gneiss assemblage of the succeeding Ajabgarh Group. The rocks have been intruded by amphibolite, granite and rhyolite which are considered to have provided the material for the base metal mineralisation in the area. The district is a well-known copper district in the country. The following are the most important mineral deposits in the district.

(i) Copper : Investigations have established that out of the total strike length of nearly 80 km., more than half lies in this district. The copper deposits are located at various places in the district, more specially in Khetri tehsil, Silver, gold, nickel and cobalt are also associated in these deposits. There is a copper producing plant of Khetri Copper Complex at a distance of about eleven kilometres from Khetri town. Copper ore from Kolihan deposits is obtained with the help of rope way while that of Madhan Kudan through conveyor belts. Investigation work has already been completed for starting ancillary industries in this Complex. In the year 1995-96, the production of copper was 1577791 tonnes which has decreased to 847552 tonnes.

(ii) Calcite : The small occurences located near village Papurna of Khetri tehsil and Neori and Ponkh villages of Udaipurwati tehsil are under exploitation. The calcite occurs in the form of vein filling.

(iii) Dolomite : This is used as a refractory and flux in the metallurgy of iron. It is also locally used for lime making. Its deposits are in abundance in the district.

(iv) Iron Ore : Small deposits of iron ore are located and worked out on minor scale at Tyonda, Sihor, Jamalpur and Kala Khari, all located in Khetri tehsil.

(v) Other minerals worked out in the district are fluorite, soapstone, clay, nickel, limestone and building stone.

Forest, Flora and Fauna

The forest area of the district is not significant as during the year 1988-89 only 34,332 hectares of land i.e. 5.80 per cent of the total reporting area of the district was under forests. The major species available in the forest area is 'Jant' tree or Khejri (Prospis specigera). It is found in abundance and is utilised for various purposes such as providing fodder to the animals when its leaves are dried up, supplying fuel for domestic purposes and checking soil-erosion. Other species found are Babul (Acacia nilotiea), Shisham (Dalbergia sisso), Neem (Azadirachta indica), Pipal (Ficus religiosa), Jal (Salvadora oleoides) and Bargad (Ficus bengalensis) etc. Mango trees (Mangifera indica) are also found in hilly areas of Udaipurwati and Khetri tehsils. Beri tree (Zizyphus mauritiana) is also available which provides 'Pala' as a fodder to the animals. There is a forest nursery at Jhjunjhunun.

Grasses of a few types also grow in the district. Among the shrubs, Phog (Calligonum polygonoides) is the most predominant. Among the wild animals, Baghera (Panthera pardus), Soor (Susserofa crestatus), Langur (Presbytis entellus), Lakkar-Bagha (Hyaena hyaena), Bhedia (Canis lupus), Gidar (Canis aureus), Lomri (Vulpes bengalensis) etc., are generally found. Snakes, both poisonous and non-poisonous are found in the district.

Land use

The forest cover in the district in the year 1999-2000 was merely 6.69 per cent of the total land cover there was a very marginal increase in the forest area since the past years. The highest proportion of 72.15 per cent was covered by net area sown compared to the earlier year the net area sown had decreased fallowed by 7.85 percent covered by other cultivated land (excluding fallow land). This can be seen from the following table.

Classification of Land Use	Year			
	1998-99		1999-2000	
	Area (In Hectares)	Per-centage	Area (In Hectares)	Per-centage
1. Forest	39,527	6.68	39,620	6.69
2. Not available for cultivation	34,987	5.91	35,386	5.97
(i) Land put to non-agriculture	19,910	3.36	20,040	3.38
(ii) Barren and non agricultural use	15,077	2.55	15,346	2.59
3. Other uncultivated land (excluding fallow land)	46,417	7.84	46,471	7.85
(i) Permanent Pasture land	40,411	6.83	40,385	6.82
(ii) Orchard etc.	85	0.01	83	0.01
(iii) Cultivable waste	5,921	1.00	6,003	1.02
4. Fallow Land	29,364	4.97	43,474	7.34
(i) Other fallow Land	17,555	2.97	18,755	3.16
(ii) Current Fallow land	11,809	2.00	24,719	4.18
5. Net area sown	441,390	74.60	426,731	72.15
Total	591,685	100.00	591,682	100.00

Source : Statistical Abstract, 2001

Crop Pattern

It is seen that due to the shortage of Industries and Services in the district, the main occupation of the people is agriculture in the rural areas.

Of the reported area of 591682 hectares of the district as per village records, 426731 hectares (72.15 per cent) is under net sown area in the year 1999-2000. Approximately 1.30 lakh households of the district are engaged in agricultural pursuits. Of these,

39 thousands and 52 thousand persons are small and marginal cultivators respectively. The size of land holdings and their number has been shown in the following table :

S.No.	Size of land	Number	Area (in hectare)
1	Less than 1 hectare	19,900	10,455
2	1-2 hectare	21,561	33,023
3	2 + hectare	57,329	229,746

Of the total reported area of 72.12 per cent is under cultivation, whereas 27.88 per cent is under forests and fallow land. The main crop of the district is Kharif because cultivation mainly dependends on the monsoons.

The Rabi crops are raised on both sides of the Aravali range in Khetri and Udaipurwati tehsils and also in other areas where irrigational facilities are available.

The main Kharif crops are Bajra, Gwar, Mooth and Moong. In the sandy tracts of the district only one crop is grown where irrigational facilities are available. Whereas in Rabi, Wheat, Barley, Gram and Mustard are mainly raised in the district.

Tenancy

Tenancy in the State is governed by the Rajasthan Tenancy Act, 1955. It is one of the most important and progressive laws relating to agrarian reforms. The provisions of the Act apply in respect of land held by tenants as if the State Government were the land holder acting through the Tehsildars. In relation to the land held by him, every cultivator is either a tenant or a sub-tenant or an allottee or a trespasser. A tenant is one who is required to pay some rent on account of use and occupation of land let out to him for agricultural or allied purposes. Grantee with a favourable rate of rent, ijardar,thekedar or trespasser is not considered a tenant.

There are following classes of tenants:

(a) Khatedar tenant,

(b) Maliks,

(c) Tenant of Khudkasht, and

(d) Ghair-Khatedar tenants.

A Khatedar tenant is entitled to all the rights conferred and subject to all the liabilities imposed on Khatedar tenant by the Rajasthan Tenancy Act. On the date of coming into force of Rajasthan Tenancy Act, a Zamindar or a Biswedar holding Khudkasht was treated as a Khatedar tenant irrespective of whether he was or not in occupation on the date of vesting.

Malik is a Zamindar or Biswedar who has become Malik or Khudkasht land held by him on abolition of Zamindari and Biswedari in 1959. The word “Malik” was also added to section 14 of the Rajasthan Tenancy Act to classify it as a class of tenant. Section 13 of the Act provides that a Malik is entitled to all the rights conferred and is subject to all the liabilities imposed on Khatedar tenant and so in substance this class of tenancy is nothing but a Khatedar tenant.

As Zamindars and Biswedars holding Khudkasht were treated as Khatedar tenants. A tenant of khudkasht is essentially a sub-tenant in view of the fact that a sub-tenant is also eligible for protection of his cultivatory rights even against Khatedar tenant. Every tenant of land other than a Khatedar tenant, a tenant of Khudkasht or a sub-tenant is a Ghair-Khatedar tenant.

A trespasser is a person who takes or retains possession of land without authority or who prevents another person from occupying land duly let out to him by the State. After regularisation, the trespasser becomes an allottee. An allottee is treated as a Ghair-Khatedar tenant on whom Sub-Divisional Officer shall suo-moto confer khatedari rights after ten years of allotment provided that the allottee fulfils all the terms and conditions of allotment during this period. Similar is the case of those allottees who were otherwise allotted land by the State Government.

Irrigation

The main source of irrigation in the district is through wells. So far as increase in irrigation is concerned, 139950 hectare was irrigated through 29767 wells in 1995-96, this increased in 1999-2000, to 235787 hectares, being irrigated from 38167 wells. The detailed information about the number of sources of irrigation and the irrigated area can be seen from the following table:

Details of sources of irrigation in the district – yearwise (Area in hectares)

Sl. No.	Particulars	1995-96		1996-97		1997-98		1998-99		1999-2000	
		Number	Irrigated area	Number	Irrigated area	Number	Irrigated area	Number	Irrigated area	Number	Irrigated area
1	Well	29,767	139,950	33,547	163,299	34,912	174,514	35,999	190,897	38,167	235,787
2	Tube-well	13	-	13	457	13	74	13	92	-	-

5	Lake	4	441	5	400	7	476	3	90	-	-
6	Others	-	-	-	-	-	-	-	-	-	3,436

Livestock (Cattle breeding)

The district is rich in cattle wealth. Alongwith agricultural activities the farmers are also engaged in animal husbandry as a secondary occupation. The livestock plays a significant role in the economic development of the district. The cattle found in the district mostly belong to Haryana breed, which is considered good for milk. Buffaloes of the murrah breed are numerous which give an average of 10 Kg. of milk per day. Bikaneri type of camels are common in the district which is used for ploughing and transportation purpose. Sheep of Nali breed are also found in the district, which are large in size compared to the local breed. The wool of this breed is long and soft in texture. On an average one sheep produces 1.5 Kg. wool annually. Sheep and wool contribute substantially to the districts economy.

The Table indicates that the past five year (1992-1997) there has been 12.56 per cent increase in the livestock population in the district. It is further observed that the number of camels has reduced during the period 1992-97.

For the promotion, growth and eradication of disease of the livestock, 18 and 38 veterinary hospital vigilance units are functioning in Urban & Rural areas respectively. Apart from this, 14 dispensaries and 62 sub-centres are functioning in the rural areas of the district.

According to livestock Census 1997, there was 11.56 lakh livestock in the district. In addition there was about 1.30 lakh poultry. The position of livestock population and number of poultry in the district in 1997 as compared to 1992 is shown in the following table:

Category		Number		Variation in numerical strength over 1992 Actual Number
		1997	1992	
A. Livestock		1,156,233	1,106,125	50,108
1	Cattle	129,813	128,791	842
2	Buffaloes	353,609	250,071	102,538
3	Goats	511,397	444,054	67,343
4	Sheep	222,795	217,724	5,071
5	Horses	538	387	151
6	Ponies & Donkeys	3,043	2,155	888
7	Camels	30,159	32,667	(-) 2508
8	Pigs	5,304	3,194	2,110
9	Rabbits	890	-	890
10	Dogs	29,970	26,902	3,068
B. Poultry		130,285	36,796	93,489
	Total	**1,286,568**	**1,142,981**	**143,597**

Agricultural Implements and Machinery

According to the livestock census conducted in 1997 there were 61805 ploughs in the district besides animal driven carts were 22583, diesel engines were 4300, electric pump sets 31960, tractors were 2737 and sugarcane and oil crushing machines were only 5 and 2 in the district.

Electricity and Power

Prior to the formation of the State of Rajasthan, only two towns viz.,Nawalgarh and Pilani were electrified in the district. During the first & second five year plan only one & two towns were electrified respectively. In the third five year plan, more efforts were made and as a result electricity was made available to 89 villages and one town.

By the year 1989, 667 villages were electrified whereas in 2000-01 all the 855 inhabited villages are being electrified.

There is no source of electricity generation in the district as such all the power used is received from other places.Electricity is mainly used for agricultural and industrial purposes.Besides the development of irrigated cultivated areas and industries, the demand for electricity is growing continuously in the district. Thus, there is an urgent need to increase the existing capacity of lines and electricity production for the smooth supply of electricity.Upto the year 2000-2001, consumption of electricity in the district has been 37557.51 lakh units.

The length of the L.T. lines is 13923.848 km. whereas the transmission of 33 K.V. is 1097.01 and

11 K.V. is 6124. 448 km's long. For the smooth supply of electricity and disposal of problems of the consumers an office of the Regional Chief Engineers is functioning in the district. Following is the number of electricity consumers in the district in the year 2000-01; domestic consumption–147912, electrified industries–30206, commercial consumption–19764 and electrified wells–39836.

Transport and Cummunication

Railways

A meter gauge railway line of the Western Railway passes through Loharu to Jaipur in the middle of the district whose length is 230 km., whereas in the District of Jhunjhunun its length is 95 km., which connects some important towns like Nawalgarh, Mukandgarh, Jhunjhunun, Chirawa and Surajgarh. Besides this Sikar-Churu Railway line runs through the boundary of the district whose length is 9.5 km., and it provides railway facilities to Bissau and Mahansar.

Another railway line from Singhana to Dabla measuring 27 km. is used only by goods train for transporting goods. It also carries purified copper from Khetri Nagar to various parts of the State.

Road Transport

Major portion of the district's area is desert. Hence for transportation, goods movement, and development purposes, the role of roads have special significance. Presently the position of roads is as follows. National Highways – Nil, State Highways – 278 km., District roads – 42 km., other district roads 516 km., and village roads 1768 – km.

According to the 2001 Census out of the 288 gram panchayats in the District, 264 are connected by tarred roads, 17 by metalled roads and 5 grampanchayats by gravel roads.

Communication facilities

The expansion of communication facilities is satisfactory in the district. Presently in the urban areas of the district there, are 30 Post-cum-Telegraph offices and 34 Post offices having no telegraph facilities. In the rural areas of the district there are 84 Post cum Telegraph Offices and 382 post offices without telegraph facilities that are functioning. Besides this, in the urban areas of the district there are 682 P.C.O., 14 telephone offices and 13 telephone centres which are providing facilities whereas in Rural areas 1169 P.C.O., 12 Telephone offices and 58 Telephone centres are functioning. From the centres of Jhunjhunun, Chirawa, Pilani and Khetri Doordarshan programmes are being transmitted. For the smooth functioning of the Telephone facilities, an office of Telecom District Manager (Manager) is established. There is a constant increase in the services provided by the communication department, which reflected in the following table:

Telephone and Post & Telegraph facilities in the District
Year – wise

Particulars	95-96	96-97	97-98	98-99	99-2000	2000-01

Trade and commerce

The main items exported from the district are Rai, Mustard, Bajra, Wheat, Barley, Gram and Ghee etc. whereas items like Rice, Sugar, Jaggery, Kerosene Oil, Edible Oil, Petrol, and Cloth etc.are imported by the district. The district is also a home to some of the biggest industrialists of the country.

Krishi Upaj Mandies in Nawalgarh, Chirawa, Surajgarh and Jhunjhunun are functioning. Primary Distribution Centres are also functioning at Tehsil headquarters and in some large sized villages.

In the year 1999-2000, there were 146 country liquor shops in the district and also 29 shops of Indian made foreign liquor, Bhang shops 41 and Opium shops numbered 16 in the district.

Besides this, there are eight Cinema houses in the district with seating capacity of 3941 persons. These Cinema houses are located in Jhunjhunun, Nawalgarh, Pilani, Chirawa and Khetri towns.

The number of Central Cooperative Banks were 14 in the district in the year 2000. There were 21 Petrol Pumps that were supplying petrol to the whole district and also 545 fair price shops which supplied essential items to the people.

Industry

The district is backward from the industrial point of view. The Hindustan Copper Ltd. is the only heavy industry in the district located at Khetri which is a government undertaking. It is at 70 km. from district headquarter. Right from the work related to extraction of copper to purification is done here. Apart from, copper of electrolyte grade, 1940 tonnes of phosphate fertiliser is being produced in this project established with the cost of Rs.244.01 crores. Employment to 5561 persons is being made available by this.

Apart from this,M/s.Bhagwati Gas Ltd. Vanvas (Khetri Nagar) which was established in 1988 with a cost of Rs.589.67 lakhs is a major medium industry.

During the last five years an increase in the registration of Small scale industrial units has taken place due to the encouragement and soft loans made available by the District Industry Centre. Upto the year 1995-96, 2956 small and handicraft industrial units were registered where it has increased to 4605 in the year 2000-2001. Leather goods, iron goods, furniture, Basket and other goods are being mainly manufactured by different units.

However, houselisting data computed during Census 2001 shows a decline in the number of census houses used as Factory, Workshop, Workshed etc from 4525 in 1991 Census to 3936 in 2001 Census.

Gram Panchayat's composition & its role

1. The system of Panchayati Raj was inaugurated on 2nd October 1959 in Nagaur district by then Prime Minister Late Shri Jawahar Lal Nehru. Late Shri Balwant Rai Mehta proposed the recommendation for Panchayati Raj. There are three levels of Panchayati Raj:

(1) Gram Panchayat (Village level)

(2) Panchayat Samiti (Block level)

(3) Zila Parishad (District level)

2. Gram Panchayat is an important institution of self-government. The institution is set for a village or village agglomeration.A Gram Panchayat is created on 2000-8000 population.It covers a maximum area of 6 miles. The villages, which have population below 2000, are merged with the other villages to create a Gram Panchayat. Their tenure is of 5 years.

3. A Gram Panchayat consists 5 to 20 members. The Head of the Panchayat is called Sarpanch. Panch and Up-Sarpanches are also elected. It includes a member belonging to backward class and a lady member. There are 264 Gram Panchayats in the district.

4. The main objectives of Gram Panchayat are to arrange the primary education, sanitation of public places, drinking water and light. It manages also the adult education, livestock and repairing of wells.

5. During the past years, Gram Panchayats functioned several important jobs like *Kam Ke Badley Anaj*, Construction of Panchayat Ghar, School buildings, roads and tanks. It organizes also the cattle fare. Gram Panchayat plays an important role in the development of village and its economy.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used

as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the vary nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and, therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Rooms

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has

been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However,

if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq.km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b)(ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met,

the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union Territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union Territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union Territories. In pursuance of these provisions, the list of Scheduled Castes and /or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1. Adi Dharmi
2. Aheri
3. Badi
4. Bagri, Bagdi
5. Bairwa, Berwa
6. Bajgar

7. Balai
8. Bansphor, Bansphod
9. Baori
10. Bargi, Vargi, Birgi
11. Bawaria
12. Bedia, Beria
13. Bhand
14. Bhangi, Chura, Mehtar, Olgana, Rukhi Malkana, Halalkhor, Lalbegi, Balmiki, Valmiki, Korar, Zadmalli
15. Bidakia
16. Bola
17. Chamar, Bhambhi, Bambhi, Bhambi Jatia, Jatav, Jatava,Mochi, Raidas, Rohidas, Regar, Raigar, Ramdasia, Asadaru, Asodi, Chamadia, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Telegu Mochi, Kamati Mochi, Ranigar, Rohit, Samgar
18. Chandal
19. Dabgar
20. Dhanak, Dhanuk
21. Dhankia
22. Dhobi
23. Dholi
24. Dome, Dom
25. Gandia
26. Garancha, Gancha
27. Garo, Garura, Gurda, Garoda
28. Gavaria
29. Godhi
30. Jingar
31. Kalbelia, Sapera
32. Kamad, Kamadia
33. Kanjar, Kunjar
34. Kapadia, Sansi
35. Khangar
36. Khatik
37. Koli, Kori
38. Kooch Band, Kuchband
39. Koria
40. Madari, Bazigar
41. Mahar, Taral, Dhegumegu
42. Mahyavanshi, Dhed, Dheda, Vankar, Maru, Vankar
43. Majhabi
44. Mang, Matang, Minimadig
45. Mang, Garodi, Mang Garudi
46. Megh, Meghval, Meghwal, Menghvar
47. Mehar
48. Nat, Nut
49. Pasi
50. Rawal
51. Salvi
52. Sansi
53. Santia, Satia
54. Sarbhangi
55. Sargara
56. Singiwala
57. Thori, Nayak
58. Tirgar, Tirbanda
59. Turi

Scheduled Tribes

1. Bhil, Bhil Garasia,Dholi Bhil,Dungri Bhil, Dungri Garasia,Mewasi Bhil,Rawal Bhil, Tadvi Bhil,Bhagalia,Bhilala,Pawara,Vasava, Vasave
2. Bhil Mina
3. Damor, Damaria
4. Dhanka, Tadvi, Tataria, Valvi
5. Garasia (excluding Rajput Garasia)
6. Kathodi, Katkari, Dhor Kathodi, Dhor, Katkari Son Kathodi, Son Katkari
7. Kokna, Kokni, Kukna
8. Koli Dhor, Tokre Koli, Kolcha, Kolgha
9. Mina
10. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
11. Patelia
12. Seharia, Sehria, Sahariya

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc.

Cultivation does not include the following plantation crops-tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand

flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude Birth Rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude Death Rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age Specific Fertility Rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age Specific Marital Fertility Rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General Fertility Rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General Marital Fertility Rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total Fertility Rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total Marital Fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-Specific Mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as an approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant Mortality Rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-atal Mortality Rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early Neo-natal Mortality Rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late Neo-natal Mortality Rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Neo-natal Mortality Rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal Mortality Rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still Birth Rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal Mortality Rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple(Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA/town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding - population, its distribution

According to the 2001 census, the total population of Jhunjhunun district is 1,913,689 comprising 983,526 males and 930,163 females and constituting 3.4 percent of State population and area spread over 1.7 per cent in the 6 tehsils of the district, Jhunjhunun tehsil is most populous tehsil having population 479,978 while Buhana is the smallest tehsils having a population of 204,411 persons. Other tehsils in order of their population size are Chirawa (420,582), Nawalgarh (291,919), Udaipurwati (263,123) and Khetri (253,676).

Out of the total population of the district 79.4 per cent lives in rural areas while 20.6 per cent lives in urban areas. The corresponding proportions in rural and urban areas of the State are 76.6 per cent and 23.4 per cent respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF TEHSILS BY RESIDENCE, 1991-2001

Sl. No.	District/Tehsil	Population						Percentage decadal variation			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Jhunjhunun	388,203	270,025	118,178	479,978	322,872	157,106	23.6	19.6	32.9	30.4	32.7
2	Chirawa	343,274	265,843	77,431	420,582	323,900	96,682	22.5	21.8	24.9	22.6	23.0
3	Buhana	172,845	172,845	-	204,411	204,411	-	18.3	18.3	-	-	-
4	Khetri	221,001	179,811	41,190	253,676	214,474	39,202	14.8	19.3	-4.8	18.6	15.5
5	Nawalgarh	247,576	181,313	66,263	291,919	217,636	74,283	17.9	20.0	12.1	26.8	25.4
6	Udaipurwati	209,522	187,540	21,982	263,123	235,280	27,843	25.6	25.5	26.7	10.5	10.6
	District Total:	**1,582,421**	**1,257,377**	**325,044**	**1,913,689**	**1,518,573**	**395,116**	**20.9**	**20.8**	**21.6**	**20.5**	**20.6**

Jhunjhunun district has 6 tehsils. Among these, Jhunjhunun is the largest tehsil with a population of 479,978 while Buhana is the smallest with a population of 204,411. The highest decadal growth rate of 25.6 per cent and the lowest of 14.8 per cent have been attained by Udaipurwati and Khetri tehsils respectively. In rural areas it is Udaipurwati tehsil which has registered the highest growth rate of 25.5 per cent while Buhana tehsil at the lowest with 18.3 per cent. In case of urban areas, Jhunjhunun tehsil has registered the highest growth rate of 32.9 per cent whereas Khetri tehsil has registered a negative growth rate of 4.8 per cent during the decade 1991-2001. Jhunjhunun tehsil has the highest percentage of urban population at 32.7 whereas Udaipurwati tehsil with lowest of 10.6 per cent.

	District (Rural) Total	**308,888**	**294,516**	**37 (4.3)**	**129,313**	**124,765**	**6 (0.7)**	**37,318**	**35,205**

Of the total 859 villages, 855 are inhabited, Jhunjhunun Panchayat Samiti has the highest number of inhabited villages i.e 145 whereas Udaipurwati P.S. has the lowest number of 81 villages. Though Udaiparwati P.S.has the lowest number of villages yet it is most populous P.S. with a population of 235,280 followed by Nawalgarh (217,636). Alsisar is the least populous with a population of 141,416. The maximum number of villages i.e.252 (29.5 percent) are those which lie in the population range of 1000-1999. It is followed by 28.8 percent of inhabited villages (246) which have population range of 500-999. As regards to large size villages i.e. having population more than 10,000 these are 6 in number. In case of small size villages, there are 115 villages which have population less than 500 in the district.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

		Name of Town
(a)	**New**	
	(i) Statutory town	Nil
	(ii) Census town	Nil
(b)	**Denotified**	
	(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be as census towns	Nil
	(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
	(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c)	**Declassified***	Nil
(d)	**Wholly merged with other town (s)**	Nil

* Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

No new town has emerged, nor denotified and declassified.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.1	9	0.0
11-20	2	0.2	73	0.0
21-50	3	0.4	1,236	0.1
51-100	26	3.0	15,220	1.0
101-200	249	29.1	253,207	16.7
201-300	320	37.4	561,441	37.0
301-500	197	23.0	464,618	30.6

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
501 +	57	6.7	222,769	14.7
Not known	0	0.0	0	0.0
District Total	**855**	**100.0**	**1,518,573**	**100.0**
Population Density (Rural) of the district		264		

There are a total number of 855 villages in the district. Of these,maximum number of villages i.e. 320 are in the range of population density of 201-300 which account for 37.4 per cent of the total rural population as followed by 249 in the range of 101-200. The least number of villages i.e. 1 lie in the range of 0-10.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	905	898	947	884	858	984
1911	908	904	936	906	883	1002
1921	896	896	897	878	854	985
1931	907	906	903	878	862	948
1941	906	907	897	881	865	954
1951	921	919	928	956	948	983
1961	908	913	882	943	950	911
1971	911	919	875	928	934	903
1981	919	930	877	956	969	910
1991	910	919	879	931	942	889
2001	**921**	**930**	**890**	**946**	**957**	**902**

Note: Sex ratio has been defined here as the number of females per 1000 males.

The sex ratio at the district level had been lower than that of state level from 1901 to 1941. Since 1951 till 2001 the position reversed the sex ratio in favour of district as compared to that of state. In 2001, the district registered a sex ratio of 946 as against 921 of the state. The sex ratio in the rural areas of the district had been lower from 1901 to 1951 as compared to that of urban areas of the district. Since then the sex ratio has gone in favour of rural areas till 2001 than that of urban areas. In 2001, the rural areas of the district registered a sex ratio of 957 as against 902 of urban areas.

TABLE 6 : SEX RATIO BY TEHSILS, 2001

Sl. No.	Name of Tehsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Jhunjhunun	958	983	909
2	Chirawa	925	942	870
3	Buhana	944	944	0
4	Khetri	930	940	877
5	Nawalgarh	961	968	940
6	Udaipurwati	958	963	913
	District Total	**946**	**957**	**902**

The highest sex ratio of 961 has been registered by Nawalgarh tehsil whereas the lowest of 925 by Chirawa tehsil in 2001. In rural areas, the highest sex ratio has been attained by Jhunjhunun tehsil at 983 whereas in urban areas it has been attained by Nawalgarh tehsil at 940.

TABLE 7 : SEX RATIO BY PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Sex ratio
1	2	3
1	Jhunjhunun	977
2	Alsisar	989
3	Chirawa	958
4	Surajgarh	930
5	Buhana	944
6	Khetri	940
7	Nawalgarh	968
8	Udaipurwati	963
	District (Rural) Total	**957**

The District (Rural) has registered a sex ratio of 957 in 2001. At the panchayat samiti level the highest sex ratio 989 has been registered in Alsisar Panchayat Samiti and the lowest of 930 of Surajgarh Panchayat Samiti.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	1	0.1	9	0.1
700-749	2	0.2	883	0.2
750-799	7	0.8	6,241	0.8
800-849	20	2.3	18,115	2.3
850-899	106	12.4	155,159	12.4
900-949	220	25.7	434,566	25.7
950-999	280	32.7	613,688	32.7
1000-1099	188	22.0	271,371	22.0
1100+	31	3.6	18,541	3.6
District Total	**855**	**100.0**	**1,518,573**	**100.0**
Sex ratio (Rural) for District		957		

Of the total number of inhabited villages (855) of the district, the maximum number i.e. 280 comes in the range of sex ratio of 950-999 which account for 32.7 per cent of the total inhabited villages followed by 220 in the range of sex ratio of 900-949. Of the total inhabited villages, 188 are such which accounts for 22.0 per cent of total inhabited villages comes in the range of sex ratio of 1000-1099. Apart from these, there are 31 such villages which have sex ratio more than 1100.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A.^ / Town+*	Urban status of town	Sex ratio
1	2	3	4

District (Rural) Total	**855**	**100.0**	**269,386**	**100.0**
Sex ratio (Rural) for District		865		

Of the total inhabited villages (855) of the district, 65.4 per cent are such which have sex ratio below 900. Even among them, 96 and 68 villages have sex ratio less than 700 and 700-749 respectively. It is significant to note that more than one seventh (15.2 per cent) of the total inhabited villages have sex ratio favouring females i.e. 1000 or more. Among them 48 villages have sex ratio even more than 1100.

Jhunjhunun district is among the front runner districts in the field of literacy. It has registered a literacy rate of 73 per cent in 2001. Among males and females for total areas of the district the literacy rates have been registered at 86.1 per cent and 59.5 per cent respectively. It is significant to note that not much variation in the literacy rates in the rural and urban areas among males and females have been found. The literacy rates for total population in the rural and urban areas have been registered at 72.7 per cent and 74.2 per cent respectively. Among males the literacy rates have been registered as 85.9 per cent and 86.8 per cent respectively in rural & urban area. Similarly for females it is recorded as 59.3 and 60.5 per cent respectively in rural and urban areas.

The literacy rate at tehsil level varies from 76.8 per cent in Buhana tehsil followed by 76.2 per cent in Udaipurwati to 68.8 in Khetri and Nawalgarh tehsil. Among the sexes, the highest literacy rate has been recorded in urban areas of Khetri tehsil at 93.8 and 71.1 for males and females respectively. The corresponding rates in rural areas have been recorded at 89.2 for males and 67.3 in Buhana and Udaipurwati tehsil respectively.

				(32.6)	**(79.2)**	**(7.2)**	**(2.3)**	**(11.3)**

Note: Percentage of workers to total workers are given in brackets.

Cultivators are the main working force in the district as they form 62.1 percent of total workers. It is followed by other workers (28.1 per cent), Agricultural Labours (7.3 per cent) etc. Females (240,214) outnumber males (232,018) as Cultivators. Much variation in the percentage of Male workers (39.2 per cent) and female workers (11.3) classified as other workers is seen in the district.

				(39.1)	**(81.8)**	**(7.4)**	**(1.5)**	**(9.3)**

Note: Percentage of workers to total workers are given in brackets.

Of the total rural population of the district, 43.7 per cent are engaged in economic activities being workers. Most of the total workers are engaged in agricultural activities i.e. 70.1 per cent as Cultivators and 7.9 per cent as Agricultural Labourers. Only 2.0 per cent of the workers are engaged in Household Industries, whereas the significantly 19.9 per cent are in Other work.

Almost similar trend has been observed in all the panchayat samities. Sex wise percentage of male workers is higher in all four economic categories except cultivators where their percentage is 61.0 as compared to that of females at 81.8 at the district level.

\+ To be arranged in alphabetical order.
^ The names of constituent units of U.A. are given separately.
* In case of the towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

The percentage of workers to the total population of urban area is significantly quite low being only 24.7 per cent as compared to that of rural area of the district 43.7 per cent. Here too, the percentage of workers engaged in four economic categories is just the reverse as compared to rural workers where majority i.e. 83.1 per cent of the total urban workers is as other workers followed by 7.4 and 6.8 per cent

as cultivators and household industry workers respectively.

Almost similar trend is visible in all the municipal towns where the percentage of household industry workers is higher than that of agricultural labourers except in Bissau (M) and Udaipurwati (M).

Sex wise percentage of male workers as other workers is higher than that of female workers being 87.6 and 54.3 per cent respectively. On the other hand, percentage of female cultivators, agricultural labourers and household industry workers is much higher than that of male workers i.e. 22.1 per cent, 4.1 per cent and 19.5 per cent respectively at the district level for urban areas.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total (855) inhabited villages, 845 (98.8 per cent) villages have educational facilities. In case of medical amenities, only 44.2 per cent of inhabited villages have such amenities. A significant number i.e. 771 (90.2 per cent) villages have improved drinking water facilities. In the communication field, only 41.6 per cent of villages have post office facilities while 73.2 per cent have telephone facilities. In the banking field, the picture is gloomy as only 39 (4.6 per cent) villages have banks. More than 67 per cent i.e. 579 villages are linked with pucca roads whereas 99.2 per cent have power supply.

At the panchayat samiti level in Surajgarh, Khetri, Nawalgarh and Udaipurwati P.S. where cent per cent education facilities is available. For the medical amenities, it is Udaipurwati panchayat samiti, which have highest percentage of 64.2. Nawalgarh panchayat samiti has the highest percentage of villages i.e. 90.9, which have telephone facilities whereas Buhana has the minimum percentage of 50.8 for such facilities. Chirawa, Surajgarh and Nawalgarh have the distinction of cent per cent villages having power supply.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, Telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Almost (99.8 per cent) rural population of the district is being served by educational amenities. It varies from cent per cent in Chirawa, Surajgarh, Khetri, Nawalgarh and Udaipurwati to 98.7 per cent in Alsisar panchayat samiti. The highest percentage (80.1) of population availing medical amenities has found in Udaipurwati panchayat samiti while lowest of 47.8 per cent in Surajgarh panchayat samiti. Nawalgarh panchayat samiti at the top where cent per cent of the population has acess to improved drinking water while again Alsisar is at the bottom with 86.2 per cent. Nawalgarh panchayat samiti is in the forefront in the field of telephone facilities where 96.3 per cent of the population has been served by this facility while again Buhana panchayat samiti is at the bottom with 63.1 per cent. Only 14.5 per cent of the rural population is being served with banking facilities whereas 99.5 per cent have access to power supply. Cent per cent of the population of Chirawa, Surajgarh and Nawalgarh panchayat samities is being served with power supply.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus rail facility and navigable waterways.

* Based on the improved drinking water source drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premise it is considered as having access to 'Improved' drinking water source. However the concept of improved drinking water is state specific and this is to be considered accordingly.

Of the total inhabited villages (855), majority (252) of them are in the population range of 1000-1999. It is followed by 246 villages in the range of 500-999. There are 37 and 6 such villages, which are in the population range of 5000-9999 and 10000+ respectively.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of Panchayat Samiti	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Jhunjhunun	145	69,699	86.2	23.7
2	Alsisar	124	78,732	87.5	13.7
3	Chirawa	84	49,787	82.5	54.5
4	Surajgarh	122	78,474	86.7	65.8
5	Buhana	126	65,357	82.1	38.9
6	Khetri	85	77,593	52.4	40.1
7	Nawalgarh	88	66,334	82.4	33.5
8	Udaipurwati	81	83,113	65.5	52.9
	District Total	**855**	**569,089**	**77.6**	**39.7**

Note : Cultivable area = irrigated area + unirrigated area

Of the total rural area of the district (of inhabited villages) 77.6 per cent is cultivable. Of this only 39.7 per cent of the total cultivable area is irrigated. At the panchayat samiti level, the highest percentage of cultivable area to total area is found at 87.5 per cent in Alsisar Panchayat Samiti followed by 86.7 per cent in Surajgarh and the lowest of 52.4 per cent in Khetri Panchayat Samiti. As regards to irrigated area, the highest percentage of 65.8 is found in Surajgarh Panchayat Samiti whereas 13.7 in Alsisar Panchayat Samiti.

Data Source : Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets".

Of the total number of households (304,641), 291,378 households (95.7 per cent) have owned houses while 10726 (3.5 per cent) and 2537 (0.8 per cent) households have rented and 'others' houses respectively. In the owned category, the median number of rooms comes to 3 whereas for rented and 'others' category the number of rooms come to 2.

In rural areas of the district,98.5 per cent of the households are living in their owned dwellings whereas in urban areas, this percentage is 83.5. The median number of rooms in owned, rented and others categories are same for rural and urban areas of the district. Almost similar trend is seen for scheduled castes and scheduled tribes.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note:

Permanent: 1. Permanent houses refers to those houses whose wall and roofs are made of pucca materials i.e. where, burnt bricks, G.I. Sheets or other metal sheets, stone,cement concrete is used for walls and tiles slate, shingle, corrugated iron, zinc or

Semi-permanent: 2. Semi-permanent houses refer to those houses made of other types of materials.

Temporary: 3. Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves, reeds, bamboo, hatch, mud, unburnt b

Of the total number of households (304,641) 276,937 are living in permanent, 11,869 in semi-permanent and 15,715 households in temporary houses. At the tehsil level, the highest number of households (69,967) living in permanent houses is in Jhunjhunun tehsil whereas the minimum of 31,912 (11.5 per cent) has been found in Buhana tehsil. In case of semi-permanent, the highest number of households i.e. 3,353 has been found in Chirawa tehsil and the lowest of 1,166 in Buhana tehsil. The highest number of households (3,690) living in temporary houses is in Jhunjhunun tehsil whereas the lowest of 904 households is in Buhana tehsil.Almost similar trend has been observed for rural and urban areas of the district.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source,drinking water supply has been classified as 'Improved' or otherwise.If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

Improved drinking water: Majority of the total households i.e. 75.8 has improved drinking water facility in the district. In case of rural and urban areas, the gap is wider as their percentages are 71.6 and 93.3 respectively. At the tehsil level for rural areas the highest percentage of households having drinking water facility has been found in Chirawa tehsil (76.2 per cent) whereas it is highest in Khetri tehsil (95.6 per cent) for urban areas.

Electricity: Only 62.8 per cent of the households of the district have electricity. In rural areas of the district, this percentage is 56.6 whereas for urban areas it is 88.8. At tehsil level, Jhunjhunun tehsil has the highest percentage of households (70.7) availing electricity facility whereas lowest percentage (51.8) is of Buhana tehsil.

Bathroom: Less than half of the households (48.0 per cent) have bathrooms in the district. Here too much wider gap is seen in the percentage of households having bathroom in rural and urban areas, as these are 42.1 and 72.9 respectively. At tehsil level for rural areas the highest percentage of households having bathroom has been found in tehsil Jhunjhunun at 62.6 per cent whereas for urban areas it is 78.0 per cent in Khetri tehsil.

Toilet: In case of toilets, the picture is not so good as only 34.3 per cent of the households have toilet facility in the district. Wide disparity is seen in the percentage of households, availing toilet facilities among the rural and urban areas of the district being 24.5 and 75.5 per cents respectively. At the tehsil level, the highest percentage of 51.3 has been recorded in Jhunjhunun tehsil whereas the lowest at 13.2 per cent in Buhana tehsil.

Drainage: Little more than of one third i.e. 36.5 per cent of the households have drainage system in their houses in the district. In rural and urban areas of the district the percentage of households having drainage system is 27.5 and 74.4 respectively. At the tehsil level, the highest percentage of households in rural areas having drainage is in Buhana tehsil at 31.5 per cent whereas for urban areas it is 78.5 per cent in Khetri tehsil.

Data Source : Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets".

Majority of the households (71.9 per cent) in the district is using firewood as source of cooking. It is followed by 19.1 per cent of the total households using cooking gas. Apart from a significant number of households i.e. 21712 (7.1 per cent) are also using crop residue for cooking. Almost similar picture emerges for rural areas of the district as 79.3 per cent of the households are using firewood for cooking followed by 11.8 per cent using cooking gas. In case of urban areas of the district, the picture is quite different where the maximum number of households 29108 i.e. 49.7 per cent are using cooking gas followed by firewood 40.9 per cent.

At the tehsil level, the highest percentage of households using firewood has been found in Udaipurwati tehsil in rural as well as in urban areas being 87.4 and 80.4 respectively. In case of crop residue, the highest percentage of households using it has been found in rural areas of Buhana tehsil (19.3). In rural areas,the highest percentage of households(17.1)using LPG has been found in Jhunjhunun tehsil whereas in urban areas, it has been found in Khetri tehsil where 74.3 per cent of the total households are using LPG.

Data Source : Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets".

Banking Services: Only 110,394 household (36.2 per cent) of the total households (304,641) are availing Banking services. In rural and urban areas, the number of households availing banking services are 83,752 (34.0) and 26,642 (45.5) respectively. At the tehsil level, the highest number of households i.e. 30,556 availing Banking services has been found in Jhunjhunun tehsil whereas the lowest of 11,614 in Buhana tehsil.

Radio/Transistor : Of the total households of the district 37.8 per cent (114,995 households) are in possession of Radio/Transistor. The percentage of households having Radio/Transistor in rural areas has been found higher than that of urban areas being 37.9 and 36.9 per cent respectively in the district.

Television: In case of Television the percentage of households possessing it is much higher i.e. 57.9 in urban areas than that of in rural areas at 26.4 per cent of the district.

Telephone: Of the total number households of the district, 25,671 households (8.4 per cent) have Telephones. In rural and urban areas of the district the number of such households are 12,999 (5.3 per cent) and 12,672 (21.6 per cent) respectively. The maximum number of households having telephone i.e. 8806 has been found in Jhunjhunun tehsil whereas the lowest of 818 in Buhana tehsil.

Automobiles: Only 19,836 households in the district, which accounts for 6.5 per cent of the total households, have two wheeler automobiles. Such percentage for rural and urban areas of the district comes out to be 4.6 and 14.4 respectively.

Car, Jeep, Van: In case of 4 wheelers only 6,626 households (2.2 per cent) have car, jeep,van in the district. Of these, 4,897 households are of rural areas and the rest 1,729 of urban areas. The highest number of households having car, jeep, van is found to be 1,699 in Jhunjhunun tehsil and the lowest of 616 in Buhana tehsil.

A significant number of households i.e. 135,816, which accounts for 44.6 per cent to total households of the district do not have any of the specified assets. In rural areas, such households accounts for 48.6 per cent while in urban areas it is 27.8 per cent.

(xi) Other Developmental Activities :

The details of progress made by District Rural Development Authority, Jhunjhunun for rural development is given as under:

Swarn Jayanti Gram Swaraj Yojana

During this period, 26,179 families living below poverty line were provided means of self-employment through integrated rural development program. They were provided a credit of Rs. 3016.70 Lac during the said period and under the same scheme, 1183 shops were built and allotted to the families living below poverty line. An expenditure of Rs. 30.60 Lac was incurred for training to 1153 youths in TRISEM scheme among the families living below poverty line.

Jawahar Gram Smradhi Yojana

During the period 1991-02, 4282 works like construction of Khara, Kharanja, Naali, Single Building and Community Centres etc were carried out in different Gram Panchayats under this scheme. An amount of Rs. 2321.70 Lac was spent on them and 57.57 Lac man-days were created.

Aashwasit Rozgar Yojana

During the referred period, 1593 works were carried out by spending Rs. 2998.18 Lac under this scheme. In this scheme too, 31 water catchment projects in which development of grazing land, nurseries etc have been completed in 13378 by spending an amount of Rs. 680.15 Lac. Construction of water harvesting structure & irrigation and construction of roads were also carried out.

Desert Development Programme

Under this scheme, during the referred period 100 projects were carried out by Forest Department, Soil Conservation Department, Panchayati Raj Institutions & Non-government Organizations. An amount of Rs. 1501.27 Lac was spent on forestry, stability of sand dunes, cattle farm development and pond development works.

Indira Aavas Yojana/Pradhanmantri Gramodaya/ Gramin Aavas (Loan & Grant) Yojana

During the referred period, an amount of Rs. 609.74 Lac was spent on construction and repairing of 5,444 houses, benefitting families living below poverty line. An expenditure of Rs. 10.66 Lac was incurred on construction of 57 houses under Pradhan Mantri Gramodaya Yojana. A grant of Rs. 0.90 Lac was provided by constructing 9 houses under Gramin Aavas Yojana.

Massive/Jeevandhara Yojana

Under Massive Yojana, 932 families of small & marginal farmers were benefitted by providing them Hand Pumps, deepening-up of wells, electric pump sets, diesel pump sets and sprinklers. An amount of Rs. 53.70 Lac was spent in this scheme.

Bio-Gas Yojana

Under this individual benefit scheme, Rs. 44.34 Lac were spent to provide bio-gas plants to 1478 families.

Apna Gaon Apna Kam Yojana

Under this scheme during referred period, 379 works were carried out on the basis of utility of the villagers. An amount of Rs. 594.81 Lac was spent from public cooperation and State's share.

Nirbandh Rashi Yojana

Under this scheme, during referred period, an amount of Rs. 249.99 Lac was spent by carrying out 295 works.

Battis Zile Battis Kam

Under this Scheme, a work of specific nature is being carried out throughout the year. Among this, 510 works like drinking water scheme, construction of roads and tarcoaling etc. were completed. An amount of Rs. 343.17 Lac was spent on them.

Rural Productivity & Rural Development Centre Scheme

Under this scheme, 74 works like construction of shops and their allotment to Gram Panchayats were carried out and Rs.126.69 Lac were spent on it.

Vidhayak Isthaniya Kshetra Vikas Yojana

Under this scheme, on the recommendation of local MLA, 1324 works related to drinking water, construction of roads, school buildings, boundary wall

etc. have been carried out by spending Rs. 617.90 Lac on them.

Sansad Isthaniya Kshetra Vikas Yojana

Under this scheme on the recommendation of M.P's, a total of 1808 works for drinking water, construction of roads, community centres, school buildings, public utility works related to rural and urban development etc. have been carried out and an amount of Rs. 2236.65 Lac was spent on them.

(xii) Brief description of places of Religious, Historical, Archeological Importance and Tourist Interest :

Compulsions of modern living have brought changes in our social life, and yet the traditional fairs and festivals, hallowed by medieval warriors and saints, have not lost their social significance and commercial value. Moreover, they play an important role in attracting tourists, as the fairs are youthful occasions in the life of the rural folk in India. Community dances, religious discourses, exhibitions of feats of strength and skill, sweet-shops, etc-etc. attract rural masses, TV cameramen, foreign correspondents and indologisis. Fairs are a great source of revenue to the State exchequer, besides being the right place to appeal, inform and educate the backward masses, the illiterate aborigines and other classes. The important fairs held in the district are the following:

Ram Deoji-Ka-Mela

This fair is held at Nawalgarh town from Bhadrapada Sudi 9 to 11 (Aug-Sept.) every year. The gathering is over a lakh of people. The shrine of Ram Deoji is the centre of attraction and adoration on the occasion. Other fairs with the same name are organized at village level in Khetri tehsil and Malsisar in Jhunjhunun tehsil.

Sheetlashtami Fair

This fair is held at Jhunjhunun town in honour of Sheetla Mata on Chaitra Budi 8 (March -April) every year. Other fairs with the same name are held at many villages in the district.

Narhar Pirji-Ka-Mela

This fair is held annually at village Narhar on Chirawa-Pilani road on Bhadrapada Budi 8 (Aug-Sept.). It is a religious place famous for its Pir Shakkar Shah Dargah. As all communities join in the celebration it can be said to be a symbol of communal harmony.

Lohagarh Fair

This fair is organized at Lohagarh village in Udaipurwati tehsil on Bhadrapada Budi 15 (Aug.-Sept.) every year. Thousands gather at the site and feel happy and purified by a dip in the holy water there.

Rameshwardasji-Ka-Mela

A fair is held on every Amavasya of the month at village Basai in Khetri tehsil. The shrine of Rameshwardasji is well worth a visit because of the marble slabs on which the whole of Ramayan is inscribed.

In addition to the above, other fairs which deserve a mention are Ram Navami fair at Jhunjhunun town. The Dehimai and Sundardasji at Tateeja and Gadrata villages respectively in Khetri tehsil; and fairs at Dhosi Kund, Bhopalgarh Kund, Shri Bagheshwar Kharkada Kund, Mundana Kund and Kirori. Local cattle fairs are organized within the municipal areas at Beer (Jhunjhunun), Surajgarh, Vidyavihar, Pilani, Nawalgarh, Bissau, and in the Panchayat Samiti areas of Jhunjhunun, Udaipurwati, Nawalgarh, Chirawa, Khetri and Buhana.

The main festivals of the Hindus are Diwali, Holi, Gangaur, Teej and Dushera. The Muslims observe Idul-fiter, Idul-Zuha, Shab-e-Barat, Ramzan, Barabafat and Moharrum. Among the Jains, the principal festivals are Mahavir Jayanti, Paryushan and Samvatsari.

Some of the places of historical and archaeological interests are the following:

Jhunjhunun

The main town of the district with a population of 100,476 in 2001 is 171 km to the north-west of Jaipur city on Sawai Madhopur-Loharu section of the Western Railway. The Dargah of Shaikh Kamrud-din-Shah on a hillock nearby presents a beautiful sight. There is an old Jain temple too. The famous Rani Sati temples are to the north-west of the town. They are magnificent structures sprawling over a vast area with many adjuncts. Akhagarh and Badalgarh are

associated with the Rajput heroes of the region. Jeetmal-Ka-Sagar is a beautiful picnic spot to the north of the town.

Nawalgarh

This fascinating town is a Sub-Divisional headquarters. It is connected with Jhunjhunun by rail and road. It is the second biggest town (population 56,482) of the district. It has a fine college and a clock tower; The town is famous for the 'havelis' (mansions) of 'Seths'. These medieval constructions, numbering over a hundred, are profusely painted in Rajasthani style. A Shiva Temple with a multiheaded 'lingam', a fine tiled cenotaphs near the railway station and the eight Havelies are places worth a visit.

Vidyavihar

According to 2001 Census, the township has a population of 14,366; but the place is most renowned for the contribution it has made to the advancement of scientific and technical education in India. The Birla Institute of Technology and Science (B.I.T.S.) is located here. The very impressive Central Museum of Science and Technology aims at acquainting the young with the marvels of modern achievements, and thus fostering an abiding interest with a view to pursuing still higher ends. The Gandhi Gallery in the B.I.T.S. building is a rare collection of photographs from the Mahatma Era. Another important establishment in Vidyavihar is the Central Electronics Engineering Research Institute of the Govt. of India.

Khetri

This town with a population of 17,377 is about 67 km. from Jhunjhunun. It is a well-laid town situated in the midst of hills. A medieval Rajput fort on one of these hills nearby lends it beauty. The town has a large tank built by Panna Lal Shah. A palace built by a modern prince. The Ramkrishna Mission Centre, the fortress of Bagor and the famous copper plant at Khetri Nagar are some of the other places, which the tourists should visit. The Vivekanand Memorial at Khetri and Ajit Sagar Dam (above 11 km. from Khetri town) are other attractions. This dam is famous for duck shooting.

Lohagarh

This is a small village in Udaipurwati tehsil and is situated about 80 km. from the district headquarters of Jhunjhunun and 29 km. from Nawalgarh town. This place is said to have been visited by Pandavas. They took baths in the holy water of the natural stream. Fairs are also held here twice a year.

Apart from the places mentioned above the other places worth mentioning are Saraswati temple at Pilani and the Chyavan Rishi's Ashram.

(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district :

Jhunjhunun was founded by the Kayamkhani Nawabs in the mid 15th century A.D. and remained under their control until it was taken over by the Rajput ruler Sardul Singh in 1730 A.D. The town has some splendid painted havelis.

Contribution of Soldiers in Army

Jhunjhunun district is the pride of Rajasthan as it contributes the highest number of brave soldiers and has a unique position in the Shekhawati Region. According to district Soldier Board Office, near about 45 thousand soldiers are in service, 360 martyr widow are there and 106 soldiers are awarded different type of Medals. In the Kargil (Operation Vijay) and later on Rakshak Operations, 53 soldiers became martyrs, which is highest among all the districts in Rajasthan.

(xiv) Scope of Village and Town Directory :

In Part-A of the District Census Handbook, entitled as Village and Town Directory, an attempt has been made to present information regarding various amenities/facilities available in every rural/ urban unit of the State. The unit of the rural areas is village and that of urban area is town/urban agglomeration. Information regarding rural areas and Census Towns has been gathered through Patwaries while that in respect of urban areas other than Census Towns has been collected through the concerned municipality/Cantonment Board/Notified Area Committee. In order to have the aforesaid information authenticated, the concerned departments and agencies were also contacted to furnish information available with them. All the information gathered about amenities relate to year 1999 and those pertaining to land-use pattern pertain to Samvat Year 2055 i.e. the agricultural year ending on the 30th June, 1999.

Village Directory

It will be helpful at the outset to have an idea of the items for which information has been included in the Village Directory. Information in respect of each village has been presented through a twenty three column format in which villages have been presented in order of their names and Permanent Location Code Number (PLCN) at State level. The first four columns (2-5) give general information i.e. Name of village and Permanent location code number, area in hectares, population and number of households residing in villages as per Census 2001.The amenities available in the village have been shown in columns 6-18. The information regarding land-use pattern has been given in columns 19-23. As a special feature for Census-2001, some new columns 10-12 and 17-18 are first time incorporated viz. commercial and cooperative Bank, Agricultural/non Agricultural and other credit societies, Recreational and cultural facilities, News Paper/Magazine and most important commodity manufactured in the village. In case of uninhabited villages, the information has been given relating to columns 1-3 and 19-23 only and in the remaining columns, the word 'uninhabited' has been mentioned. At the end of entries of each Panchayat Samiti, the totals relating to columns 3-11, 13-14, 16-17,19 and 21-23 (total area, amenities and land-use break-up) have also been given.

Various amenities like drinking water, communication, post and telegraphs etc. have been shown against the name of the village if they are available within the village with the help of various codes. The Code Structure relating to various columns has been given in the beginning of Section-I to Part-A of this book. The number of each type of amenity has been indicated in parentheses after the suitable code in case of educational, medical and post & telegraph facilities.

If any amenity is not available within the village a dash (–) has been shown in the relevant column and next to it, the distance of the nearest place from the referent village where the facility is available has been given in broad distance ranges viz. <5 km, 5-10 km & 10+ km.

The following pattern has been adopted for indicating the educational institutions:

(i) Schools up to Class V have been treated as primary schools. They include Nursery Schools, Kindegarten Schools, Pre-basic and Pre-primary Schools and Junior Basic Schools upto Class V.

(ii) All schools having Classes VI to VIII have been treated as Middle Schools.

(iii) All schools having Classes IX and X have been treated as Secondary Schools.

(iv) All schools having Classes XI and XII have been treated as Higher Secondary Schools. They include Senior Cambridge Schools, Schools under 10+2 scheme, Intermediate, Pre-University and Junior College etc.

In case of composite schools relevant groups of classes have been treated separately, e.g. a school having classes I to XII, has been shown as having one primary, one middle, one secondary and one higher secondary school. The term 'College' includes all types of colleges whether Arts/Science/Commerce/ Medical/Engineering/Agriculture and others imparting education at Graduate or Post-Graduate level. Institutions other than industrial schools, training schools and adult literacy classes/ centres have been shown under 'others'.

In case of Medical institutions, Hospitals and Dispensaries, Allopathic, Ayurvedic, Unani and Homeopathy have been shown separately. Other

institutions include all types of Yogic, Naturopathy, Hospitals/Dispensaries, Leprosy Centres etc.

In case there are more than one source of drinking water facility available in the village all such sources have been shown separately. Postal amenities include Post Office, Telegraph Office and Telephone, which are shown separately.

In case there are more than one communication facilities these have been indicated separately by relevant codes. Approach to the village refers to the state of roads etc. leading to the village from the communication centres i.e. bus-stand/railway station etc. This is to give an idea whether the village is easily approachable in all types of weather or becomes inaccessible for sometime in the year. Where there are more than one approach roads these have been indicated separately by relevant codes.

Information regarding the nearest town indicates the name of such town along with the distance from the referent village irrespective of the fact whether such town is located within Rajasthan or in some other adjoining states. In case of town situated in states other than Rajasthan, the concerned State has been mentioned against its name in parentheses with the help of abbreviations. The term 'town' here refers to one of those urban centres, which have been treated, as towns in the concerned state during 2001 Census.

In order to give an idea about the uses which electricity is put to, the information has been given under the head "power supply" if it is available in the village.

Land-Use Pattern

The land-use pattern has been presented under the following five headings:

I. Forest :

It denotes those lands, which have been termed as 'forest' by the competent authority.

II. Irrigated land :

It relates to land, which has actually been irrigated in the referent year. The source-wise break-up has not been presented, as no such information was available in respect of the net irrigated area.

III. Unirrigated land :

The term covers all the unirrigated land cultivated during the referent year and land lying fallow upto four years.

IV. Culturable waste :

It includes Gaucher i.e. pasture and grazing land and tree-groves.

V. Area not available for cultivation :

It refers to land, which has not been classified in any of the above mentioned types and also includes house sites, roads, rivers, nullahs, hillocks etc.

The following nine appendices have also been provided to present the position pertaining to Panchayat Samiti and district as a whole regarding various Amenities available in rural areas, villages classified by characteristics of the population and land-use pattern in Census Town in connection with the Village Directory:

(i) Panchayat Samiti wise Abstract of educational, medical and other amenities in villages.

  (a) Villages by number of Primary schools.

  (b) Villages by number of Primary, Middle and Secondary schools.

  (c) Villages with different sources of drinking water facilities available.

(ii) Villages with 5000 and above population, which do not have one or more amenities.

  (a) Census towns which do not have one or more amenities.

(iii) Land utilisation data in respect of Census Town.

(iv) Panchayat Samiti wise lists of inhabited villages where no amenity other than drinking water facility is available.

(v) Summary showing number of villages not having Scheduled Castes population.

(vi) Summary showing number of villages not having Scheduled Tribes population.

(vii) Panchayat Samiti wise list of villages according to the proportion of Scheduled Castes/Scheduled Tribes population to total population by ranges. It consists of two parts: Part-A relates to Scheduled Castes and Part-B to Scheduled Tribes.

(viii) Panchayat Samiti wise number of villages under each Gram Panchayat.

(ix) Statement showing number of girls' schools in the villages.

Town Directory

Particulars about each town have been presented in the form of seven statements. In towns where there are slums Statement-VII has also been given in which information regarding civic and other amenities available in the slums have been shown. In each statement, towns have been arranged in alphabetical order.

As has been explained earlier, urban agglomerations are of two types: first those constituted by two or more independent towns and second those where the urban characteristics have developed in the adjoining rural areas, which have developed as outgrowth of the referent town.

Where an urban agglomeration includes two or more independent towns, the names of towns constituting the agglomeration have been indicated in the alphabetical arrangement but their names have also been repeated in the alphabetical order under the name of the agglomeration after the name of the main or core town and information relating to these has been shown here. The particulars of the constituent units of the agglomerations have not been repeated wherever they occur separately in the alphabetical order and a note "See referent agglomeration" has been given against such names. The lines relating to the information regarding urban agglomeration as a whole have not been numbered but the constituent units as and when they occur in the alphabetical order have been numbered so that the last number agrees with the total number of towns in the district concerned. In respect of Statements II, III and VI in the lines relating to agglomeration a note "See constituent units" has been shown and information has been provided separately in respect of all the constituents below it.

In case of towns having outgrowths, an asterisk mark has been placed against their names. Information in respect of outgrowths has been included in the concerned town and has not been shown separately.

The amenities and other data have been indicated by codes. A list of column wise code structure and other abbreviations used in each statement has been provided at the beginning of Section-II of Part-A of this book. We may now discuss the various Town Directory statements.

Statement-I

It deals with the status and growth history of the town. Columns 2 to 7 give information regarding class, name and civic status of the town, its location code number, name of the tehsil/panchayat samiti in which it is situated, its area in sq. km and number of households including houseless households residing in the town as per 2001 Census. The class of the town has been determined on the basis of its population as per Census 2001 and the civic administration status relates to the year 2000. Columns 8 to 18 show the population of the town in different decennial censuses beginning from 1901 upto 2001. The growth rate in terms of percentage in respect of previous censuses has been shown below the population figures pertaining to each Census beginning from Column 9 onwards.

A 'dash' under these columns indicates that the referent town did not have an urban status in the referent Censuses. Density of Population per sq. km as per Census 2001 has been shown in column 19 and sex ratio (number of females per 1,000 males) have been indicated for three censuses viz. 1981 to 2001 in columns 20 to 22.

Statement II

This statement gives information about the physical aspects and location particulars of the town in 1999. First two columns give the serial number, class, name and civic status of the town. Columns 3 to 13 deal with the physical aspects viz. rainfall and temperature. Rainfall figures are the average of the rainfall for the last one year ending 1999-2000. If the information in respect of rainfall is not available for any town it has been given for the nearest place for which it is available. Rainfall has been shown in millimeters per annum. Maximum and minimum temperatures have been given in centigrade. If the information regarding temperature is not available in respect of any town it has been given for the nearest place for which it is available and the name of the centre has been shown in footnote.

The location of the town with respect to various administrative headquarters and nearest city is indicated in columns 6 to 10. While showing the

location of the referent town with respect to various administrative headquarters, names and their distance from the referent town in kilometer have been given in parentheses below the name of the place where it is situated. In case the referent town itself happens to be the seat of the administrative headquarters, this distance has been shown zero. Information regarding the nearest city of population one Lac or more and population 5 Lacs or more have been given in respect of its situation within the State or even if this city may be situated in other State. In case the nearest city happens to be situated in other State, the name of the concerned State has been shown against the name of the city in parentheses. How the referent town is approachable is given in columns 11 to 13 which indicate the availability of communication facilities viz. railway station, bus facilities and navigable river/canal within 10 km. There is no navigable river or canal in Rajasthan.

Statement III

It gives information about the finances of the civic body controlling the local civil administration and it has been presented in '000 rupees. A 'dash' in this Statement indicates that no receipt or expenditure has occurred under the particular head and 'N' represents negligible amount. First two columns give general information, columns 3 to 9 present receipt under broad categories and total receipt and columns 10 to 16 present expenditure under broad categories and total expenditure. The receipt and expenditure has been presented under six broad categories each. While receipt through taxes implies all receipts from taxes obligatory or others and revenue derived from municipal properties and power apart from taxation, it also includes income derived from holding of fairs and exhibitions, supply of milk, license fee, cattle-ponds, fines and penalties, transport services, places of entertainment, allotment/sale/lease of land and rent etc. Government grants include per capita grant, grant from Public Works Department and grant from the Social Welfare and other departments. Other sources of receipts have been specified, wherever possible but generally they are of miscellaneous nature.

Expenditure on general administration covers salary and wages of staff, contingent expenditure on staff, grants, loans and advances to the staff etc. Expenditure on public safety cover fire-fighting, light, water and lease facilities, regulating the dangerous/ hazardous trades/works/occupation, water supply, registration of births and deaths, disposal of garbage, rubbish and night-soil. Public health and conveniences cover all types of medical aid and maintenance of the destitute etc. Public works include maintenance and construction of roads and buildings and relief works in times of famine and scarcity. Expenditure in public institutions covers all types of social, cultural, educational, religious institutions etc. which are run or patronised by the municipality. Other sources of expenditure have been specified where possible but mostly these are of miscellaneous nature.

Statement IV

This statement deals with the civic and other type of public amenities and provides information about total population, scheduled castes and scheduled tribes population, road length, system of sewerage, number and types of latrines, method of disposal of night-soil, water supply, availability of fire-lighting service and electrification besides general information. In case of water supply, the source of water as also the system of its storage have been shown. The storage capacity has been shown in Kiloliters. In case of disposal of night soil and protected water supply particulars have been given in respect of two methods/sources in order of their importance if more than one exist in the town. In case fire-fighting service is not available in the town the name of the nearest place if in the same district or the name of the nearest district if in the same state or other state where available along with distance from the referent town has been mentioned.

Statement V

Particulars of medical, educational, recreational and cultural facilities available in the town have been given in this statement and the number of each type of these facilities has also been shown in parentheses is along with the appropriate code.

In case of medical facilities the number of beds wherever available has also been shown Allopathic, Ayurvedic, Unani and Homeopathic hospitals/ dispensaries have been shown separately. No code has been provided for allopathic institutions and the numbers have been shown only in figures. Thus,

beside 'H' code for hospital means an Allopathic Hospital. Separate codes have been provided for other three systems of medicine.

If a medical or educational facility is not available in the town, the name of the nearest place, if the same district or the name of the nearest district in the same State or other State where available and its distance (in km) from the referent town has been mentioned. Details of medical institutions shown under 'Others' have also been explained.

Arts, Science and Commerce Colleges have been shown separately. While showing the educational institutions upto Higher Secondary level the same procedure as adopted in case of Village Directory, has been followed. In case of composed schools relevant classes have been treated separately e.g. a school having classes I to XII has been treated as being composed of one Primary, one Middle, one Secondary and one Higher Secondary School.

All other types of educational institutions which are not covered in column 6 to 14 have been shown in column 15 under 'Others' and include technical/ vocational and training institutions like Applied Art Painting College, Pharmacy College, Agricultural College, Teacher's Training College/Institution, Music/ Dance School etc. Janchetna Kendra is also included in others.

Statement VI

This statement contains particulars regarding trade, commerce, industry and banking. It gives names of three most important commodities exported and manufactured in the town besides the number of banks, agricultural and non-agricultural credit societies functioning in the town. A list of the outgrowths, if any, along with their population and name of the core town has also been provided at the end of the Town Directory as an Appendix.

Statement VII

Information about all slums whether notified or not and for all towns has been shown in this statement in order to give an idea about the amenities available to the slum dwellers. Particulars about paved roads, systems of sewerage, number and types of latrines, method of disposal of night soil, number of tap points/ public hydrants for supply of protected water and electrification have been provided in respect of every slum in each town, if there are any.

PART A : VILLAGE AND TOWN DIRECTORY

Section-I

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location code numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural,non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply,availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column are for the village are as follows:-

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the Panchayat Samiti are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages are given in hectares. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available, is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in Higher secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions, if exists, within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc., the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the

distance of nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village, the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazine the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages Panchayat Samiti wise of the district.

Appendix-I-A Indicates number of villages Panchayat Samiti wise having one or more primary schools.

Appendix-I-B Indicates number of villages Panchayat Samiti wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages Panchayat Samiti wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV Panchayat Samiti wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates Panchayat Samiti wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girl's school in a village.

Section-II

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M.Cl.
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Other columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Columns 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Columns 6, 7 and 8

Name of the State headquarters, District headquarters and Tehsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Columns 9 and 10

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Columns 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Columns 1 to 5 : Self explanatory

Column 6 : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewerage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Columns 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Columns 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well Water	W

Column 14

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Columns 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Columns 1 to 3 : Self explanatory

Column 4 & 5

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or primary health centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Columns 6 to 9

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC

(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Columns 11 to 14 : Higher Secondary/ Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in school or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town, the name of nearest place with distance where the facility is available is recorded.

Columns 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Columns 3 to 8

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Columns 10 & 11:Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

PART-B : PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation *(Annexure-II)*. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract Table A-5 for total population gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, A-5 Appendix table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for

Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/Panchayat Samiti/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/Panchayat Samiti/Town
3.	Primary Census Abstract for Scheduled Tribes	District/Panchayat Samiti/Town
4.	Village Primary Census Abstract	Panchayat Samiti/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented Panchayat Samiti wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Panchayat Samiti is presented both for rural and urban areas separately. All the villages within the Panchayat Samiti constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Panchayat Samiti. In case a Panchayat Samiti is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Panchayat Samiti is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares. The area figures of the Panchayat Samiti is the total of the village areas coming under each Panchayat Samiti. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tehsils/ Panchayat Samiti within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Tehsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and Panchayat Samiti level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II : FERTILITY-MORTALITY MEASURES

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever-married women and last question related to currently married women.

AGE SPECIFIC MARITAL FERTILITY LEVEL, 1991 CENSUS

Age-Group	Jhunjhunun			Rajasthan		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	123.93	130.95	91.29	99.82	99.10	103.46
20-24	259.60	274.59	195.14	217.18	227.01	182.20
25-29	215.01	221.47	191.09	197.71	214.81	144.55
30-34	131.76	140.18	99.02	141.09	158.38	85.69
35-39	80.20	85.79	61.97	90.43	104.11	47.40
40-44	45.92	45.49	47.69	53.37	61.51	25.15
45-49	19.97	17.51	30.83	27.36	30.37	15.81

The Age Specific Marital Fertility Levels (ASMFR) has been calculated at seven different age-groups. The highest ASMFR of the district is found 259.60 in the age-group of 20-24 followed by 215.01 in the age-group of 25-29. The lowest ASMFR is reported in the age-group of 45-49 i.e. 19.97

In comparison to the ASMFR at the state level it has been found that in all the age-groups ASMFR in the district is lower except in the age-group 15-19, 20-24 and 25-29 than state level. It can seen from the table.

ESTIMATES OF CHILD MORTALITY, 1991 CENSUS

Mortality Indicators	Jhunjhunun			Rajasthan		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
q2	66	63	69	97	95	99
q3	67	65	71	100	98	106
q5	80	73	88	110	103	117

Information on the questions on children ever born and children surviving canvassed for all ever married women has been tabulated by age of the mother. From this, estimates of child mortality have been worked out by using Brass Technique.

From the estimates of child mortality (Number of death by ages 2, 3 and 5 given as q2, q3 and q5) it is observed that the child mortality in the Jhunjhunun district is lower as compared to the state among males and as well as females. It can be seen from above tables.

ANNEXURE-III : VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

Sl. No.	State/District	CBR	TFR	TMFR	GFR	GMFR	No. of children ever born per woman age group 45- 49	Child-woman Ratio (0-4)	Mean age at marriage of currently married women

Source : Occasional paper No.1 of 1997 office of the Registrar General India and Rajasthan state district profile 1991.
Note: * Newly Created districts after 1991 Census.

Different fertility measures indicate that the fertility level in the Dhaulpur district was higher compared to state average in 1991. The gross fertility rate (GFR) of the district has been reported as 159 as against 162 of the state. Similarly the GMFR (Gross Marital Fertility Rate) and Total Fertility Rate (TFR) of the district are also higher than that of state being 179 and 4.83 as against 184 and 5.01 of the state respectively. The Total Marital Fertility Rate (TMFR) of district is 5.35 is higher than that of state i.e. 5.59. The Crude Birth Rate (CBR) is also higher 34.38 as compared to the state 35.75.

The number of children ever born per woman in the age-group of 45-49 is 5.32 higher than the state average 5.07. The mean age at marriage of the district is 16.42 is slightly higher than the state. It can be seen from the table. Child Woman Ratio (CWR) 0-4 of district is higher than state.

ANNEXURE-IV(a) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991-2001

Place of Birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Migrants born within the state of Enumeration	394,239 (87.96)	53,362 (80.05)	340,877 (89.34)	509,819 (93.01)	69,035 (91.44)	440,784 (93.26)
(i) Migrants born elsewhere in district of Enumeration	296,139 (66.07)	42,622 (63.94)	253,517 (66.44)	429,401 (78.34)	60,344 (79.93)	369,057 (78.08)
(ii) Migrants born in other district of the State	98,100 (21.89)	10,740 (16.11)	87,360 (22.90)	80,418 (14.67)	8,691 (11.51)	71,727 (15.18)
(B) Migrants born in other states of India	53,314 (11.89)	13,020 (19.53)	40,294 (10.56)	38,192 (6.97)	6,380 (8.45)	31,812 (6.73)
(C) Migrants born in other countries	660 (0.15)	280 (0.42)	380 (0.10)	144 (0.03)	81 (0.11)	63 (0.01)
Total Migrants	**448,213 (100.00)**	**66,662 (100.00)**	**381,551 (100.00)**	**548,155 (100.00)**	**75,496 (100.00)**	**472,659 (100.00)**

(a) By Place of Birth:

It was seen that a sizeable portion of migrants in Jhunjhunun District i.e. 87.96 percent in 1991 and 93.01 percent in 2001 were migrants whose place of birth was within the state of enumeration. Out of this major portion where migrants who were born elsewhere in the district of enumeration.

The migrant whose place of birth was in other states of India was 11.89 percent in 1991 and 6.97 percent in 2001 Census.

Migrant to the district whose place of birth was in other countries was 0.15 percent in 1991, whereas the proportion was marginally less i.e. 0.03 percent in 2001 Census.

ANNEXURE-IV(b) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	88,783 (100.00)	73,065 (82.30)	15,718 (17.70)
	Rural	77,772 (87.60)	68,124 (76.73)	9,648 (10.87)
	Urban	9,821 (11.06)	4,011 (4.52)	5,810 (6.54)
In other states of India	Total	3,792 (100.00)	860 (22.68)	2,932 (77.32)
	Rural	1,800 (47.47)	520 (13.71)	1,280 (33.76)
	Urban	1,902 (50.16)	280 (7.38)	1,622 (42.78)

(b) Internal Migrants (Rural/Urban):

Majority of the internal migrants i.e. 87.60 per cent whose places of birth were within Rajasthan belonged to the rural areas of the state. The same trend also holds well in case of migrants born in other states of India as can be seen from the Table.

ANNEXURE-IV(c) : INTERSTATE MIGRANTS, 1991-2001 CENSUS

Place of Birth	1991 Census		Place of Birth	2001 Census	
	Migr-ants	Perce-ntage to Total migrant		Migr-ants	Perce-ntage to Total migrants
1	**2**	**3**	**4**	**5**	**6**
Haryana	37728	70.76	Haryana	31,079	81.38
Uttar Pradesh	4403	8.26	Uttar Pradesh	1,717	4.50
Bihar	1960	3.68	Bihar	542	1.42
Delhi	1190	2.23	Delhi	600	1.57
Tamilnadu	1140	2.14	Tamil Nadu	510	1.34
Punjab	1163	2.18	Madhya Pradesh	494	1.29
Total for six States	47584	89.25	Total for six States	34,942	91.49
Other States	5730	10.75	Other States	3,250	8.51
Total	53314	100.00	Total	38,192	100.00

(c) Inter-state Migrants:

In the case of Inter-state migrants they are mainly from Haryana and Uttar Pradesh as their percentages are 70.76 and 8.26 respectively in 1991 census. In 2001census main migrants are from Haryana and Uttar Pradesh their percentage are 81.38 and 4.50 respectively. Percentage of six states to total migrants is 91.49 in 2001.

ANNEXURE-IV (d) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE, 1991-2001 CENSUS

Place of Last Residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Within the State of Enumeration but outside the place of Enumeration	414,207	57,940	356,267	546,878	86,646	460,232
	(87.50)	(77.33)	(89.41)	(92.86)	(90.20)	(93.38)
(i) Elsewhere in the District of Enumeration	310,509	45,072	265,437	464,587	75,664	388,923
	(65.59)	(60.16)	(66.61)	(78.89)	(78.77)	(78.91)
(ii) In other districts of the state of Enumeration	103,698	12,868	90,830	82,291	10,982	71,309
	(21.91)	(17.17)	(22.80)	(13.97)	(11.43)	(14.47)
(B) States in India beyond the state of Enumeration	58,581	16,727	41,854	41,684	9,105	32,579
	(12.37)	(22.32)	(10.50)	(07.08)	(09.48)	(06.61)
(C) Last Residence outside India	620	260	360	354	309	45
	(0.13)	(0.35)	(0.09)	(00.06)	(00.32)	(00.01)
Total Migrants	**473,408**	**74,927**	**398,481**	**588,916**	**96,060**	**492,856**
	(100.00)	**(100.00)**	**(100.00)**	**(100.00)**	**(100.00)**	**(100.00)**

(d) Migration by Place of Last Residence:

In the percentage distribution of migrants by place of last residence in the district it was seen that in 1991 census, the highest proportion of migrants i.e 87.50 percent were from within the state of enumeration but outside the place of enumeration. In 2001 Census this proportion increased to 92.86 percent in the same category. Suprisingly it was seen that the proportion of female migrants were higher than the male migrants in both censuses.

The migrants in the district that were from states in India beyond the state of enumeration was 12.37 percent in 1991 as compared to 7.08 percent in 2001 census.

Persons whose last residence was outside India were 0.13 percent in 1991 census while there

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	414,207	321,406	92,801
		(100.00)	(77.60)	(22.40)
	Rural	328,706	280,366	48,340
		(79.36)	(67.69)	(11.67)
	Urban	77,641	36,520	41,121
		(18.74)	(8.81)	(9.93)

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
In other states of India	Total	58,581	40,735	17,846
		(100.00)	(69.54)	(30.46)
	Rural	39,791	33,468	6,323
		(67.92)	(57.13)	(10.79)
	Urban	18,450	7,007	11,443
		(31.49)	(11.96)	(19.53)

(e) Migration by Place of Last Residence (Rural/ Urban):

Majority of the internal migrants i.e. 77.60 per cent whose place of last residence were belonged to rural areas of the state. A reverse trend also is reflected in case of migrants whose place of last residence were in other state of India. It can be seen from the Table.

ANNEXURE-V : RELIGIONWISE DISTRIBUTION OF TOTAL POPULATION, 1991-2001 CENSUS

District	Religion	1991					2001

RELIGION

Religion is an important basic cultural characteristic of the population. It provides an interesting picture of the society. The data on religion are projects the unity and diversity of the country. The data is of great importance to the public as well as Government,NGO and Minorities Commission.

Among the followers of six major religions in Jhunjhunun District it was seen that the proportion of Hindus had mirginally decreased from 90.20 percent in 1991 to 89.54 percent in 2001 Census. Whereas the proportion of Muslims increased from 9.65 to 10.33 percent,it is also true in the case of Sikh Community during the same period but the Jain and christion communities community showed a marginal decreased from 1991-2001

At the state level however the proportion of Hindus,Sikh and Jains decreased whereas those of Muslims, and Christions increased.

ANNEXURE-VI : MARITAL STATUS OF POPULATION AS PER, 1991-2001 CENSUS

1991

MARITAL STATUS OF POPULATION

Majority of the population of the district in1991census is 51.12 percent in never married followed by married and widowed i.e. 45.42 and 3.43 percent respectively. Out of the male total population of the district 57.06 percent males are never married and of female never married is 44.73 percent, the proportion of widowed females is higher 5.42 percent than the males 1.57 percent. Married males are 41.33 percent while 46.11 percent females are married at the district level. Divorced or Separated is not so widely practiced, only 0.03 males and 0.03 females are reported in this category which are almost half to the state average. The same trend was found in rural as well as urban areas.In 2001 census 51.76 is never married.There after comes married persons whose percentage to total population comes to 44.47 widowed persons in absolute numbers are 70889 which is 3.70 percent to total population.Sexwise, males have higher population of never married 58.00 percent as compared to females whose population is 45.17 percent. On the other hand females have higher proportion of married 48.63 percent than males 40.55 percent. Females have a phanomenal higher number 57127 of widows than male widowers 13762 in the district.It can be seen from Annexure VI.

AGE, SEX AND EDUCATIONAL LEVEL,1991- 2001

Literacy in the age-group 10-14 years in1991 in the district was 69.6 percent in the total which was higher among the males 84.9 percent and females 52.8 percent. In the total in the age-group 15-19 years the literacy slightly lower in the total i.e. 66.2 percent and the same trend was found as in the earlier age group except that the male literacy in this age group 15-19 years was as high as 86.4 percent. In general it was seen that the literacy rate in the urban areas. The proportion of metric but below graduate was however not very high. In the total there were 9.4 percent metric but below graduate persons. Here also the male proportion was higher i.e. 16.9 percent compared to females 2.0 percent. Graduate and above in the age group 20 + years followed the same trend but in lesser proportion. In 2001 Census the total population of the Jhunjhunun district was 1913689 which 73.04 percent are literates.As per the definition of literacy in the 2001 Census the entire population in the age-group 0-6 was considered to be illiterates. The total literacy rate in the district Jhunjhunun in the age-group 10-14 years was 93.7 percent and among males

and females it was 96.4 and 90.8 percent respectively which is higher as compared to the state in the same age group. Similarly literacy rate in the age group of 15-19 years 96.1 percent males and 84.1 percent females were reported in the district which is also higher than that of the state.

It is a general trend of the literacy at the state as well as district level, female literacy is lower than the male literacy. The parentage showed a decline at Metric but below Graduate 18.51 percent as male and 4.41 percent as female while at the graduate and above level 6.16 percent males and 1.35 percent are females. It can be seen from the Annexure VII.
