MEHRANGARH FORT

One of the most impressive hill forts of Rajasthan is Mehrangarh Fort. It is so well built into the base that it is difficult to judge where the hill ends and the wall begins. It was founded in the 15th Century when they shifted their capital from nearby Mandor to Jodhpur. The fort is approached by seven gates. After having entered the gates one is faced with the Palace with it's astounding beauty. These palaces consist of Moti Mahal with its pierced screen windows overlooking the coronation seat, Janki Mahal the apartments from where the royal women would watch ceremonial events. Besides this there are the Chandan Mahal, Darbar Takhat, Rang Mahal, Sheesh Mahal, Phool Mahal, Ummaid Vilas and Maan Vilas.

The fort from outside is sturdy and magnificent, once inside the fort, one is enchanted by its beauty and splendor.

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri J.L.Modi, Director of Census Operations, Rajasthan. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Census Commissioner, India

Preface

I am deeply indebted to the State Government of Rajasthan for their unstinted support and cooperation despite all odds and adversaries like famine etc. at all stages of Census Operations of 2001. I am grateful to Shri Inderjit Khanna, the then Chief Secretary of Government of Rajasthan for his prompt response, guidance and cooperation given to the Census Organization. He infused a sense of urgency and seriousness in the minds of District Collectors and Officers of the District Administration, which geared up the entire administrative machinery. The Supervisors and Enumerators, the basic census functionaries worked ceaselessly in the entire period of fieldwork to make Census 2001 successful.

Sarvashri Ashok Pandey and Vinod Zutshi, the then Secretaries in the Department of Cabinet Secretariat and General Administration have been instrumental in making Census 2001 a successful one. I owe my thanks to both of them. I am also thankful to other Departments like Education, Finance, Revenue, Economics and Statistics, Public Relations, Printing and Stationery, Local Self-government and Personnel Department for extending their full cooperation.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his unstinted support and spontaneous, unfailing guidance throughout our endeavours. At the outset I would like to thank Shri D.K. Sikri, Registrar General and Census Commissioner, India for guiding us in bringing out this report. My grateful thanks to Shri K.N. Unni, Ex-DRG (C&T), Shri R.G. Mitra, Ex-DRG (C&T), Shri R.P. Singh, Consultant (Map), Shri Himakar, Additional Director (EDP), Dr. I.C. Agrawal, A.R.G.(SS), Shri S.L. Jain, Deputy Director (SS), Shri C. Chakravorty, Joint Director (DDU) and their colleagues at the headquarter for their ever willing, helping hand and thoughtful suggestions for putting together and shaping the volumes in their present form.

The Director of Census Operations, Rajasthan, Shri J. L. Modi under whose guidance the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before this volume could be made available for the press. I am deeply greatful to Shri H.S. Meena, Ex-Joint Director of Census Operations, Rajasthan for its success.

It may be mentioned a few annexures have been added to this volume with a view to provide an insight into the 1991 and 2001 data on the suggestion of Social Studies Division of the Office of the Registrar General, India. In this connection the contribution of Shri V.K. Gupta, Senior Compiler can not be ignored.

Shri H.C Sharma, Assistant Director incharge of District Census Handbooks and Primary Census Abstract, who was ably assisted by his team of dedicated workers deserve all praise for their perseverance and dedication in preparing Village and Town Directories and in finalization of PCAs and other inset tables. I would like to thank Shri G. Fernandes, Assistant Director who not only coordinated the work but also contributed immensely to the cause of Village and Town Directories.

In view of the increasing demand of the publications in electronic format, it has been decided to publish the DCHB also on CD. I highly appreciate the efforts put in by Smt. Jyoti Luhadiya, DD(EDP) and her team to compile in the electronic format. The efforts put in by Shri Divesh Chawla, DEO Gr-'B' to prepare this is highly commendable. In this connection, the contributions of Shri P.N. Mathur Sr.Supervisor and Shri J.P. Verma, DEO Gr-'B' cannot be ignored.

Shri H.C.Sharma, Assistant Director has taken pains in drafting the District Profile and the Analytical Note for the district. The members of the staff in the Map Section did a commendable job under the guidance of Shri Panna Lal, R.O.(Map), ably assisted by Shri R.S. Tyagi, Sr.Geographer in bringing out various maps.

ANALYTICAL NOTE

Analytical Note

History and scope of the District Census Handbook

The series of District Census Handbooks has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several new innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Numbers (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from 1 to N. Each village has been assigned an eight digit code. The first six digits represent the code of the village as existing at the present census. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001, are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

The responses for almost all the questions in the Houselisting Schedule had pre-coded options. This not only helped the enumerators to record the response easily but at a later stage would hopefully facilitate quicker data processing. Apart from the improvements made in the format of the Houselisting Schedule, the scope of Houselisting was considerably expanded with the inclusion of new questions based on requirements of various data users and planners. The new features of the Houselisting Schedule are listed below.

- For the first time, different uses of census houses have been standardized and grouped into ten main uses and assigned code numbers.
- Plastic has been added in the list of material of wall and roof of a census house, as it is often used for shelter in slums and shanties.
- In the previous census, the location of drinking water source was categorized into two locations viz. 'within premises' and 'outside premises'. In the Census of India, 2001, the source 'outside premises' was split into two categories namely 'near the premises' and 'away from the premises'.
- The scope of question of availability of electricity was expanded to include six sources of lighting. Besides no lighting, this included sources like electricity, kerosene, solar, other oil and any other source.
- In 1991 Census, a question on availability of toilet facilities to the household was canvassed while in Census of India, 2001, specific information on availability of latrine within the house by the type of latrine was sought.

In addition to expending the scope of the questions canvassed during the Houselisting Operations in the 1991 Census, the following new questions were added in the Houselist Schedule for Normal Households at the Census of India, 2001.

- If the Census house was used for residential or partly residential purposes, the condition of the census house was categorized as good, livable or dilapidated based on the perception and response of the respondent.
- A question on number of married couple(s) living in the household was canvassed.
- Information was sought on the number of married couple(s) having independent room for sleeping.

- Information as to whether the waste-water outlet of the house is connected to 'closed drainage' or 'open drainage' or has not drainage was collected.
- A question on availability of bathroom within the house was included.
- Information on availability of kitchen within the house was also sought.
- Availability of certain assets to the households namely radio/transistor, television, telephone, bicycle, scooter/motor cycle/ moped, car/jeep/van were also included.
- It was also enquired whether any banking service was being availed by the household.

The Household Schedule adopted for the Population Enumeration also primarily had pre-coded options for majority of the questions. The questions for each data item were made as self-explanatory as far as possible for easy understanding. The comprehensive Household Schedule had three parts and two sides A and B. Part I contains the Location Particulars; Part II relates to Individual Particulars and Part III contains questions for Household engaged in Cultivation/Plantation. To facilitate quick tabulation for bringing out Provisional Population Totals, provisions of page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates and workers and their categories by sex. Most of the questions canvassed during the 1991 Census, were retained for the 2001 Census, except the question on ex-serviceman, which was dropped during the Census of India, 2001. However, a number of new questions were added in the Household Schedule in view of the suggestions from policy makers, data users and researchers, while the scope of certain existing questions was enhanced.

These modifications are:

- Age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.
- The type of educational institution attended by a person was enlarged to include school, college, vocational institute, other institute and literacy center.
- The scope of the definition of 'work' was expanded in the Census of India, 2001, to include production of milk for domestic consumption. In the 1991 Census, cultivation of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India, 2001.
- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India, 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census is dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census, is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected are - in seeing, in hearing, in speech, in movement and mental.

- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work is collected under this section.
- The Household Schedule has a new set of questions for Household engaged in cultivation/ plantation- i) Net area of land under cultivation/ plantation, ii) Net area of land irrigated and iii) Tenure status. This question was not canvassed at the 1991 Census but was canvassed in the 1981 Census in a slightly different form.
- The signature or thump impression of the respondent has been taken on the Household Schedule for the first time in the history of census. This was not only aimed at obtaining correct and complete information but also for giving an opportunity to the respondents to authenticate the information provided by them. The relationship of the respondent with the head of the household was also obtained. This new feature will pave way in carrying out a methodological study in future on the respondent profile in the census.

In 1981 Census, for the first time, an attempt was made in the series to bring out demographic and other data in diglot, Hindi and English, for a more beneficial use by data user of all categories. Hindi being the official language of the State, a Hindi version of the analytical notes was also added with a view to caters to the needs of all sections of readers. The manner of presentation of the District Census Handbooks for the 1991 Census is by and large the same.

As a necessary corollary to the Handbooks, Panchayat Samities, the basic administrative units of development, administration and planning, were listed out separately for the first time in 1981 Census in relation to those districts wherein they were not coterminous with their tehsils. As an additional attempt, informations relating to population figures as well as amenities available in each village located in the jurisdiction of each Panchayat Samiti were also presented in a separate volume under the title "Supplement to District Census Handbook". However, for reference in the main District Census Handbook, a list of villages forming part of each non-coterminous Panchayat Samiti was provided along with the abstracts of population and amenities for such Panchayat Samities as a whole in the form of Special Annexures.

In order to cater to the over-all needs of the data-users and to facilitate the task of administrators and planners it has now been decided to present the Village Directory and Primary Census data at the Panchayat Samiti level instead of the traditional Tehsil level presentation. It is expected that the presentation of Village Directory and Primary Census Abstract data at Panchayat Samiti level will help the planners in formation of micro-level developmental plans, as the Panchayat Samiti is now the lowest administrative unit for development planning. However, for the convenience of the data users and for the sake of comparability of data at Tehsil level, the Primary Census Abstract has also been presented at the Tehsil/ Town level in the form of an Appendix.

A general note on each district covering information of general interest regarding its history, topography, physiography, administrative set-up and places of tourist and historic importance etc. has also been included with a view to provide comprehensive and more purposeful information about the district as a whole. Population figures of Scheduled Castes and Scheduled Tribes constituting the core of 'Weaker Section' have also been presented at district, panchayat samiti and town level so as to facilitate planning for their welfare both at micro and macro levels.

It is earnestly hoped that this publication will serve its purpose for planners and administrators of welfare schemes and other data users in general.

Prior to 1951, Census Reports were printed for the whole province/state. The idea of preparing the District Census Handbooks separately for each district was conceived during 1951 Census as a part of a plan intended to secure an effective method of preserving the Census data below the district level. The idea was that all the district census tables would be bound together in a single volume called the District Census Handbooks. Since then the District Census Handbooks are being published regularly.

The 1951 Census series of District Census Handbooks was printed in two parts. Part I contained five General Population Tables (A Series), three Economic Tables (B Series), five Household and Age Tables (C Series) and seven Social and Cultural Tables (D Series). In Part II of District Census Handbook "Primary Census Abstract and Village Directory" which showed the basic population figures for each village or town classified by livelihood classes, were included along with some information of general nature.

The 1961 Census series of District Census Handbooks were printed in single volume in which Primary Census Abstract upto village and town/ward level and Village Directory upto village level were given. Besides, some official statistics collected from various state departments, four General Population Tables (A Series), sixteen Economic and Household Tables (B Series), seven Social and Cultural Tables (C Series), four Housing Tables (E Series) and eight Special Tables for Scheduled Castes/Scheduled Tribes were also provided in District Census Handbooks. For the first time in 1961 Census the maps for the district and tehsil were also included in the District Census Handbooks.

In 1971 Census series of District Census Handbooks village-wise 'Village Directory' giving services, facilities or amenities available in the village was given. 'Town Directory' was introduced for the first time giving useful information in respect of every town of the district. Rural Primary Census Abstract upto village level and Urban Primary Census Abstract upto enumeration block level were given in District Census Handbooks. While the District, Tehsil and Town maps were included; the inclusion of Census Tables was dispensed with in the District Census Handbooks in 1971 Census.

The scope of 1981 series of District Census Handbooks was enlarged specially in relation to amenities and land-use pattern. Apart from new items like uses of electricity, details of communication points, information for which was not collected in 1971 Census, a note on each district covering general information on its history, topography, flora, fauna and administrative set up etc. was also added. The format of the Primary Census Abstract was also restructured in the light of changes in economic and other questions canvassed in the 1981 Census but at the same time, all efforts were made to retain comparability with 1971 Census data. The inclusion of Special Primary Census Abstract for Scheduled Castes and Tribes at the Tehsil/Town level was another innovation introduced in 1981 Census series.

The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same as followed in 1981. However, the format of Primary Census Abstract was restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group was included in Primary Census Abstract for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate at the time of the 1991 Census.

One of the most important innovations in the 1991 Census was the Panchayat Samiti level presentation of data in the Village Directory and Primary Census Abstract instead of the traditional Tehsil level presentation.

Deviating from 1991 Census, like 1981 Census four fold industrial classification of main and marginal workers has been presented in 2001 as against nine fold given in 1991.

The mode of presentation of DCHB in 2001 will by enlarge be same as that of in 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc pertaining to 1991 Census of the respective district in the DCHB in the form of Annexures II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

(ii) Brief History of the District

The The history of Jodhpur is believed to have started from Stone Age. Fossils of early Stone Age have been found on the banks of Luni River. Instruments of Neolithic age have been found in places

of Luni, Pipar, Pichiyak, Shikarpur etc whereas remnants of old age have been found in places near Bilara.

In ancient period the nearby region of Jodhpur was called as 'Meru Desh' which later on was known as Marwar. Jodhpur had been empire of Rajput rulers of Parihar, Chauhan and Rathor dynasties. The tolerance had been an attribute of Parihar Rajputs as is evident from different temples dedicated to Vishnu, Shiva or Devi. Apart from Jain temples other temples are located in Osian Ghatiyala, Mandore, Buchkala, Pipar and Soyla.

Jodhpur (Mandore) was the capital of earstwhile state of Marwar prior to its merger in 1949. Rao Jodhaji laid down foundation of Jodhpur on 12th May 1459 AD, with the start of building of massive fort on the hills of "Chiriya Nathji Ki Took". During the period of Rao Jodhaji, Jodhpur was confined to a very small area lying within four gates viz. Bhagipole, Puserao Ki Pole, Bhomiyoji Ke Ghatiwali Pole and Singhpole. Its expansion had taken place during Rao Maldeo's period in 16th century AD. A rampart along with 24000 ft long, 9 feet wide and 39 feet high wall around the fort was constructed, in which later on Jalori Gate, Sojati Gate, Merti Gate, Nagori Gate and Siwanchi Gate were built by Maharaja Bakhtsingh.

Remnants of the Gupta and Post Gupta periods of 4th to 8th centuries AD have been found from the archaeological excavations. Stone idols, engraved earthen pot and 30 small coins of Arab triton were among the material found from excavation. Two beautiful pillars are being preserved in the Museum, which shows that, worshipping of Lord Krishna was very popular during 4th-5th century AD.

With the occupation of the area by Rathores, Jodhpur played a prominent role in the mediaeval history. Maldeo, Jodha, Udai Singh, Jaswant Singh and Ajit Singh are the names well known in Indian history. The fort of Jodhpur is unique strategically as well as artistically. The cenotaphs of the Rathore rulers located at Mandore and Jaswant Thada are fine specimens of art and architecture. The city abounds in richly carved temples and baories (step wells), mosques etc. Ummed Bhawan, where the inmates of the royal family still reside is an excellent example of the architecture of the present century.

The district derives its name from its principal city Jodhpur; locally known as 'Jodhana' founded by Rao Jodha in 1459 AD. It was the seat of the Government of Marwar; locally known as 'Nav Koti Marwar', until the merger of Jodhpur state into the United States of Greater Rajasthan. After the merger, in the year 1949, the state was divided into five districts; namely Jodhpur, Pali, Barmer, Jalor and Nagaur. Some portions of its territory were also transferred to the districts of Jaisalmer, Sirohi and Ajmer.

The former Jodhpur state, which became a district after the formation of Rajasthan retained only four tehsils namely: Phalodi, Shergarh, Jodhpur and Bilara. During 1951-61 inter-censal period; one more tehsil, Osian was constituted by transferring 118 villagess from Jodhpur tehsil and 18 villages from Phalodi tehsil of the district. Regarding inter-district transfer of areas during the period under review, mention may be made of the transfer of 33 villages from Bap tehsil of Jaisalmer district to Phalodi tehsil of this district. One town Pokaran together with 47 villages from tehsil Phalodi and 17 villages of Shergarh were combined to constitute the new tehsil of Pokaran in Jaisalmer district. There has been no inter-district transfer of areas during the period 1961 to 1971. However, during 1971-81, one village - Chhayan II of Phalodi tehsil with an area of 79.16 sq. km. was transferred to Pokaran tehsil of Jaisalmer district. During 1981-91 inter-censal period, one more tehsil, Bhopalgarh was constituted by transferring originally 32 villages from Osian and 83 villages from Bilara tehsil vide Gazette Notification No. F.9 (2) Rev/Gr.I-1/79 dated 22 June 1982. Two new villages viz., Melawas Nawa and Deonagar were newly formed, vide Gazette Notification No. F.9 (9) Rev/Gr.1/86 dated 8.11.88. The total area of this new tehsil is 1900.8 sq. km.

(iii) Administrative set-up

The district has been divided into 3 sub-divisions, 7 tehsils, 9 panchayat samities and 339 gram panchayats from administrative point of view. The details are as following:

District	Sub-Division	Tehsil	No. of Villages	Panchayat Samiti	No. of Gram Panchayats
Jodhpur	1. Jodhpur	1. Jodhpur	132	1. Mandor	25
		2. Luni	112	1. Luni	39
		3. Shergarh	232	1. Shergarh	32
				2. Balesar	33
	2. Pipar	1. Bilara	90	1. Bilara	38
		2. Bhopalgarh	119	1. Bhopalgarh	36
	3. Phalodi	1. Osian	142	1. Osian	67
		2. Phalodi	236	1. Phalodi	37
				2. Bap	32
Total	**3**	**7**	**1063**	**9**	**339**

Apart from this, there are three municipalities viz. Bilara, Pipar City and Phalodi in the district. A Municipal Corporation is functioning in the urban area of Jodhpur City.

Like other districts, District Collector is head of District administration, who also performs the duties of District Magistrate. Work of every tehsil has been entrusted to a Tehsildar, who also posses the rights of Executive Magistrate. 4 Sub-tehsils are also functioning in the district. Bap, Balesar, Jhanwar and Tinwar sub-tehsils are attached to Phalodi, Shergarh, Luni and Osian tehsils respectively.

The position of different Police, Revenue and Judicial Offices functioning in the district is as given below:

1. Supdt. of Police	2
2. Police Stations	30
3. Police Chowkis	36
4. Land Revenue Inspector	347
5. District Court	5
6. Additional District Court	6
7. Chief Metropolitan Magistrate	10
8. Civil Judge	14
9. Additional Civil and Judicial Magistrate	14

The commencement of three-tier local-self administration in Rajasthan State took place with the start of Democratic decentralization system in October 1959. Thus in 1959, under the Zila Parishad Act, the Panchayat Samities were established and Zila Parishads were organized at district level. Its Chairman is Zila Pramukh who gives advise, assistance and directions to panchayat samities. Nine Panchayat Samities are functioning in the district. The Pradhan an elected representative by the committee apart from bearing responsibilities about the works related to development, especially agriculture, primary education, medical and health services also perform the work of making available basic local amenities. At the Panchayat Samiti level, Block Development Officer is responsible for the execution of the specific developmental works in the field of agriculture, primary education, medical and health. There are 9 assembly segments, which are being represented by MLAs. One Member of Parliament is also being elected from the District. Shergarh Tehsil is included in the Parliamentary Constituency of Barmer, Jaisalmer.

(iv) Physical Features

(1) Location and Size

The district is located in the western part of Rajasthan. It streches between $26^0 0'$ to $27^0 31'$ north latitude and $72^0 55'$ to $73^0 52'$ east longitude. The maximum length of the district from north to south is about 197 km while the maximum breadth from east to west is 208 km. The district is bounded on the north by Bikaner and Jaisalmer district, on the south by Pali and Barmer districts, on the east by Pali and Nagaur districts and on the west by Jaisalmer district.

The total area of the district as per Surveyor General of India is 22850.00 Sq. Km and is the fourth largest district of the state after Jaisalmer, Barmer and Bikaner district.

(2) Physiography

The district resembles the shape of an irregular rectangle, studded with few small hillocks in Bilara and Osian tehsils. Large parts of the district fall under the area of Indian Thar Desert. In the arid region, sand dunes are commonly visible. The height of the hills in the district ranges between 284 metres in the north to 450 metres in the east.

Luni is the only river, which flows in the south-eastern parts of the district comprising the area of Jodhpur and Bilara Tehsils. It rises near Pushkar in Ajmer district. After flowing through the portions of Nagaur and Pali districts, this river enters the district in village Jhak (Bilara Tehsil). Mithri is the chief

tributary of this river in the district, which joins Luni near village Khejrali Khurd (Jodhpur tehsil) to ultimately form a huge artificial lake known as Jaswant Sagar. The total length of the river in the district is 122 kms. The seasonal streams in the district are Jojri, Golasmi and Gunaimata besides a rivulet Bastua.

(3) Water resources

Balsamand Jheel is located in the north of Jodhpur City. Kailana Tank and Ummed Sagar are notable water reservoirs. There are two natural springs in the district namely the Beri Ganga and Ban Ganga. Besides, some of the important Tanks are Soorpura and Golejor bandhs, Pichiyak (Jaswant Sagar) and Birai Tank, which are maintained by the irrigation department.

(4) Climate

The climate of the district is characterised by extremes of temperature, and uncertain rainfall and dryness. The winter season, which is spread over from November to March, is followed by summer, lasting from April to June. The period from July to mid September forms the south-west monsoon season.

On the whole, the climate of the district is dry but healthy. During, hot season winds blow in the day but nights are generally cool and pleasant. There are two meteorological observatories in the district, one each at Jodhpur and Phalodi which represent the weather conditions of south-eastern and north-western portions of the district.

The maximum, minimum and average temperature and average humidity recorded during last five years i.e. 1997, 1998, 1999, 2000 and 2001 has been shown in the following table:

Year	Temperature in Celsius			Average humidity
	Maximum	Minimum	Average	
1997	43.5	3.2	27.1	48%
1998	48.4	4.7	27.1	47%
1999	46.9	4.6	27.1	48%
2000	46.2	5.4	27.1	46%
2001	45.7	5.0	27.1	41%

The average rainfall of the district is 31.87 cm. Except in the year 1998 or 2001, the average annual rainfalls recorded during the 1997, 1999 and 2000 has been lower than the average rainfall as is shown in the following Table:

Year	Annual rainfall	Normal rainfall	Deviation from Normal rainfall
1997	27.92	31.87	-3.95
1998	35.30	31.87	+3.43
1999	30.29	31.87	-1.58
2000	24.20	31.87	-7.67
2001	41.50	31.87	+9.63

(5) Natural economic resources

Soil

The Central Arid Zone Research Institute (CAZRI) and the State Soil Survey Department has classified eleven types of soil in the district. Main seven types of Soil are given below:

1. Soil which is deep to very deep and has excess of seepage of water. Areas of Sand dunes.
2. Deep Sandy Soil which has excess of seepage of water.
3. Deep light texturised soil, which has a capacity to preserve some moisture but erosion of soil takes place due to wind.
4. Normal to medium deep texturised soil which has sufficient capacity to preserve moisture.
5. Plain shallow rocky soil, which is uncultivable.
6. Deep texturised land with moisture, which is saline and where level of ground water is high.
7. Very deep, light texturised fertile soils.

Geology and minerals

The district has ample stores of mineral wealth. The sand used in construction is found in abundance in Jodhpur Tehsil. Apart from this sand stone, 'Chhitar Stone' and Brown Stone are also found in rich quantity. Chhitar stone is being used mainly for the construction of roofs. Stone slaps, which are being used for construction of buildings, are found near Jodhpur City and Balesar. Some mines of marble stone dolomite are found in Phalodi Tehsil. The mineral and the stone used for Emery Stone is found in Bhopalgarh. White clay is found near Pipar City,

which is being used as a paste to join two stones. There are 156 quarries of lime stone. The lime stone is being used in lime, cement, rubber, steel and chemical works. Apart from this quarries of Jasper are also found in the district.

The data regarding the availability of minerals, their production and sale during last four years is given below:

Sl. No.	Name of Mineral	1997-98		1998-99		1999-2000		2000-2001

Forest, Flora and Fauna

Only 6948 hectares of the total reported area of land use in the district was covered under forests in 1999-2000. The forest area is available around the hills and is classified as any scrub thorn forest.

Due to the sandy soil and dry climate of the district, only shrub and thorny bushes of vegetation are found in the forest areas of the district. The main species of trees are Vilayati Khejri (Prosopis - juliflora) and Kumat.

Land use pattern

The total geographical area of the district as per Survey of India is 22.850 Sq. Km. The reported area for the land utilization in 1999-2000 was 2,256,405 hectares for which the classification is given as below:

Sl. No.	Classification of the land use	Area (in hectares) (1999-2000)	Percentage to total
	1	2	3
1	Forest	6,948	0.31
2	Land put to non-agricultural use	75,119	3.33
3	Barani and uncultivated land Other uncultivated land excluding follow land	146,057	6.48

	TOTAL	**2,256,405**	**100.00**

Crop pattern

Agricultural activities in the district mainly dependent on rains. Kharif is the main crop of the district. Rabi crop is mainly cultivated in Bilara, Bhopalgarh and Osian Tehsils only.

Bajra, Moong, Moth, Sesamum (Til), Jowar and Cotton to some extent are the main crops of Kharif whereas wheat, Barley, Gram, Mustard, Raida, Taramira etc are the main crops of Rabi in the district. Only 15 per cent of the cultivable land are sowed due to scarcity of irrigational facilities.

The total area sown and the production of principal crops in the district during 1999-2000 is given in the following Table:

Sl. No.	Crop	Area (in hectares)	Production (in metric tonnes)
1	2	3	4
1	Bajra	511,288	32,099
2	Jowar	23,371	712

Tenancy

Tenancy in the State is governed by the Rajasthan Tenancy Act, 1955. It is one of the most important and progressive laws relating to agrarian reforms. The provisions of the Act apply in respect of land held by tenants as if the State Government were the land holder acting through the Tehsildars. In relation to the land held by him, every cultivator is either a tenant or a sub-tenant or an allottee or a trespasser. A tenant is one who is required to pay some rent on account of use and occupation of land let out to him for agricultural or allied purposes. Grantee with a favourable rate of rent, ijardar, thekedar or trespasser is not considered a tenant.

There are following classes of tenants:

a) Khatedar tenants,

b) Maliks,

c) Tenant of Khudkasht, and

d) Gair-Khatedar tenants.

A Khatedar tenant is entitled to all the rights conferred and subject to all the liabilities imposed on Khatedar tenant by the Rajasthan Tenancy Act. On the date of coming into force of Rajasthan Tenancy Act, a Zamindar or a Biswedar holding Khudkasht was treated as a Khatedar tenant irrespective of whether he was or not in occupation on the date of vesting.

Malik is a Zamindar or Biswedar who has become Malik or Khudkasht land held by him on abolition of Zamindari and Biswedari in 1959. The word "Malik" was also added to section 14 of the Rajasthan Tenancy Act to classify it as a class of tenant. Section 13 of the Act provides that a Malik is entitled to all the rights conferred and is subject to all the liabilities imposed on Khatedar tenant and so in substance this class of tenancy is nothing but a Khatedar tenant.

As Zamindars and Biswedars holding Khudkasht were treated as Khatedar tenants. A tenant of khudkasht is essentially a sub-tenant in view of the fact that a sub-tenant is also eligible for protection of his cultivatory rights even against Khatedar tenant. Every tenant of land other than a Khatedar tenant, a tenant of Khudkasht or a sub-tenant is a Gair-Khatedar tenant.

A trespasser is a person who takes or retains possession of land without authority or who prevents another person from occupying land duly let out to him by the State. After regularisation, the trespasser becomes an allottee. An allottee is treated as a Gair-Khatedar tenant on whom Sub-Divisional Officer shall suo-moto confer khatedari rights after ten years of allotment provided that the allottee fulfils all the terms and conditions of allotment during this period. Similar is the case of those allottees who were otherwise allotted land by the State Government.

Irrigation

There is no perennial river in the district. The level of ground water does not rise due to low and scanty rains in the district. Due to the excessive extraction of ground water, its level is going down day by day. The natural sources of water viz. river, tanks etc are very few. On the other hand, due to high rate of evaporation irrigation is done with much difficulty. The main sources of irrigation are wells and few tanks constructed during the princely regime. Among the tanks suitable for irrigation purposes, Soorpura tank and Pichiyak (Jaswant Sagar) are worth mentioning, small tanks however, are available in many villages of the district but are dried up due to insufficient rains.

The gross irrigated area by different types of sources in the year 1999-2000 is as given below:

Source of irrigation	Area irrigated (in hectares)
1	2
Tubewell / Well	186,890
Tank	-
Canals	-
Other	-

Livestock cattle breeding and fisheries

Cattle wealth has its own importance in the economic development of the district. Cattle rearing has been adopted as an industry for dairy production. Oxen are being used for ploughing in fields whereas camels for transportation. As per the cattle census of 1997 among the animals, sheep have been found in the largest number i.e. 1560345.

The following Table shows the number of animals by type as per cattle censuses from 1982 to 1997.

Fishery

Not much work has been done in the field of fisheries in the district. Some of the reasons, which can be assigned for it, are (i) lack of rivers and dams (ii) low rainfall (iii) main five tanks (small and big) dry during summer (iv) some of the tanks in which some water remains is being used for drinking water only and people do not allow for fishery (v) public at large is vegetarian and thus not much encouragement for fisheries etc.

Type of fishes and their production during last five years has been shown in the following Table:

Type of Fish	Production in Kg's

Agriculture Implements & Machinery

In the year 1997 there were 33,691 ploughs that were used for Agricultural purposes. Besides this the numbers of Diesel engines were 3,194, sugar cane crushers were 10, Electric pumps 14,169, Tractors 14,093, Oil crushers 198 and vehicles were 13,519 in numbers.

Electricity

Jodhpur district is receiving about 32000 KVA of electricity through Rawat Bhata Atomic Power Plant, Chambal Hydel Power Station Kota and Power Station Bhakra since 1969. Apart from these, the Electricity Board has a diesel generator of 1000 KW capacity and three steam turbine sets each having capacity of 3000 KW at Jodhpur City. But these generators are not in running condition. All the 863 villages (as per 1991 Census), three towns and one city are being electrified.

During the year 1999-2000, there were 298,334 consumers, consuming 1217.964 MKW of electricity in the district. The following table depicts the consumption of electricity in kilowatt and the number of consumers by category in 1999-2000.

Sl. No.	Uses	Consumption in Kilowatt	Number of consumers

Transport and Communication

Jodhpur district is well connected by Road, Rail and Air with major cities of the country being an important centre from defence & tourist point of view.

Rail

Divisional Office of North-western zone of Railway is situated at Jodhpur city. Presently, both meter gauge and broad gauge exist in the district. The work relating to the conversion of meter gauge into broad gauge on all the lines in the district is in final stage. Direct trains from Jodhpur to Jaipur, Delhi, Jammu Tavi, Howrah, Lucknow, Mumbai, Banglore, Chennai, Bhopal, Guwahati, Jaisalmer etc are plying on broad gauge. New railway track from Pipar City to Bar is being laid. This will connect Jodhpur to Ajmer directly.

There are in all 39 railway stations in the district. These are: 1. Jodhpur, 2. Bhagat Ki Kothi, 3. Vasani, 4. Salawas, 5. Hanuwant, 6. Luni, 7. Satlaner, 8.Dhudhanda, 9. Dudia, 10. Rai Ka Bag, 11. Banad, 12. Jajiwal, 13. Asarma, 14. Khedi Salwa, 15. Pipar Road, 16. Kharia Khangar, 17. Sathin Road, 18.Ummed, 19. Silari, 20. Bhaji, 21. Pipar City, 22.Bilara, 23. Mahamandir, 24. Mandor, 25. Daisar, 26. Mabikalab, 27. Marwar Mothania, 28. Tinwari, 29. Osia, 30. Bhikamkor, 31. Saikau, 32. Dhelana, 33. Marwar Lohawat, 34. Shaitansingh Nagar, 35.Khichan Halt 36. Phalodi, 37. Marwar Beethri, 38. Marwar (Khara) 39. Madi Ai.

Air

Jodhpur City has civil aviation facilities. It has military and civil Airport. Direct flights from Jodhpur Airport to major cities like Jaipur, Delhi and Mumbai take place. Apart from this the construction work of an air strip at Phalodi is in progress with an estimated cost of Rs.94 Lac.

Road

The Buses of Rajasthan State Road Transport Corporation (RSRTC) ply directly to major cities like Jaipur, Delhi, Ahmedabad, Himmatnagar, Dungarpur, Bikaner, Ajmer, Ganganagar, Mumbai, Hardwar etc. from Jodhpur.

The district has a good network of roads, All types of roads like National Highways, State Highways, District Highways, Village roads etc. exist in the district. The position and length of different types of roads during last five years is as given below:

Year	National highways	Painted Roads	Metalled Roads	Concrete and cement roads	Kutcha roads	Total	No. of villages linked with roads

Trade and Commerce

Building Stone, Plastic goods, Badla, Shoes, brass utensils, printed saries, salt, chillies, cumminseed, food grains, leather, printed and dyed cloth, wooden toys, match boxes, limestone and handicrafts etc. are the articles which are exported out of the district. The items, which are imported in the district are consumption goods, medicines, petrol, diesel, machinery, iron and steel, timber, kerosene, edible oils, general merchandise goods etc.

Jodhpur City is the main trading centre in the district. It has two Dhan Mandies, each situated near Ghanta Ghar and in Mahamandir areas respectively. The principal commodities brought to the second Mandi (Mahamandir area) are wheat, barley, jowar, maize, gram, moong, moth, gwar, til, chillies, rai, ghee etc from the Panchayat Samiti Mandore, Bilara, Pipar, Phalodi, Jalor, Bhinmal (Jalor district) Pokaran (Jaisalmer district), Balotra (Barmer district) and Merta (Nagaur district). Besides this, betal nut is being brought from Mumbai and Assam, Copra from Tamil Nadu and Kerala, black peeper from Kerala and various other commodities from other parts of the country.

UCO Bank is the lead Bank of the district, which has the responsibility of development in rural areas of the district. There are 177 Banks/Financial Institutions functioning in the district. Among these 25 are regional and rural banks, 16 of State Bank of India group, 106 Nationalized Bank, 11 limited corporations and 19 co-operative and other banks.

The number of cinema halls has reduced from 13 in 1988-89 to 8 in 1999-2000 with a seating capacity of 7980 persons.

Industry

Jodhpur has a distinct place in western Rajasthan. It is connected by Rail, Road and Air and thus provides basic infrastructure. Aleobax, Woolen mill, gwar gum, cotton, synthetic fabric etc are the industrial units functioning in the district. Apart from these in the engineering field, machines, machine parts, pumps, trolly, agricultural implements etc are being manufactured in the district.

At the beginning of the year 1999-2000, there were 847 registered factories in the district. During the year, 87 factories were registered and 16 were closed, and thus the number of registered factories rose to 918 by the end of year 1999-2000. The details

of the registered factories in the district have been provided the following table:

Gram Panchayats composition & its role

The system of Panchayati Raj was inaugurated on 2nd October 1959 in Nagaur district by then Prime Minister Late Shri Jawahar Lal Nehru. Late Shri Balwant Rai Mehta proposed the recommendation for Panchayati Raj. There are three levels of Panchayati Raj:

(1) Gram Panchayat (Village level)

(2) Panchayat Samiti (Block level)

(3) Zila Parishad (District level)

Gram Panchayat is an important institution of self-government. The institution is set for a village or village agglomeration. A Gram Panchayat is created on 2,000-8,000 population. It covers a maximum area of 6 miles. The villages, which have population below 2,000, are merged with the other villages to create a Gram Panchayat. Their tenure is of 5 years.

A Gram Panchayat consist 5 to 20 members. The Head of the Panchayat is called Sarpanch. Panch and Up-Sarpanchs are also elected. It includes a member belonging to backward class and a lady member. There are 151 Gram Panchayats in the district.

The main objectives of Gram Panchayat are to arrange the primary education, sanitation of public places, drinking water and light. It manages also the adult education, livestock and repairing of wells.

During the last years, Gram Panchayats functioned several important jobs like *Kam Ke Badley Anaj*, Construction of Panchayat Ghar, School buildings, roads and tanks. It organizes also the cattle fair. Gram Panchayat plays an important role in the development of village and its economy.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any

one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc. even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/hotel building was treated as one census house, but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g. the main house, the servant's quarter, the garage, etc. only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main-worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any econom ically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself

and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc. in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic

tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude Birth Rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude Death Rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age Specific Fertility Rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age Specific Marital Fertility Rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General Fertility Rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General Marital Fertility Rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total Fertility Rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total Marital Fertility Rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-Specific Mortality Rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant Mortality Rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal Mortality Rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early Neo-natal Mortality Rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late Neo-natal Mortality Rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Neo-natal Mortality Rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal Mortality Rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still Birth Rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal Mortality Rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child Woman Ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child Woman Ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types— (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration) (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic Status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs/ towns. These Class I UAs/towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum Area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) Are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City

The concept of 'Mega City' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding - population, its distribution

According to the 2001 Census, the total population of Jodhpur district is 2,886,505 comprising 1,513,890 males and 1,372,615 females and constituting 5.1 percent of State population and area spread over 6.7 per cent in the 7 tehsils of the district. Jodhpur tehsil is most populous tehsil having population 1,069,654 while Luni is the smallest tehsils having a population of 171,518 persons. Other tehsils in order of their population size are Phalodi (432,050), Osian (352,935), Shergarh (336,835), Bhopalgarh (271,567) and Bilara (251,946).

Out of the total population of the district 66.1 per cent live in rural areas while 33.9 per cent live in urban areas. The corresponding proportions in rural and urban areas of the State are 76.6 per cent and 23.4 per cent respectively.

Note: Sex ratio has been defined here as the number of females per 1000 males.

The district has witnessed a fluctuating trend in sex ratio since 1901. From 905 in 1901 it increased to 908 in 1911. It then declined to 896 in 1921 and increased to 907 in 1931 and so forth. During the last decade i.e. 1991-2001 it has increased from 910 in 1991 to 921 in 2001.

In comparison to rural areas of the district the sex ratio in urban areas has been higher only upto 1921 and therefore it was lower right upto 2001. The district has always registered lower sex ratio as compared to that of state since 1901 to 2001.

Note: Percentage of workers to total workers are given in brackets.

Cultivators are the main working force in the district as they form 49.4 per cent of total workers. It is followed by other workers (37.7 per cent), agricultural labourers (9.9 per cent) etc. Females (60,885) outnumber males (48,686) as agricultural labourers. Much variations in the percentages of male workers (50.8) and female workers (12.0) classified as other workers is seen at the district level.

At tehsil level, the percentage of cultivators to total workers varies from 72.3 in Osian tehsil followed by 69.8 in Luni tehsil to only 13.0 in Jodhpur tehsil. For Household Industry workers, it varies from 4.5 per cent in Jodhpur tehsil to 1.8 per cent in Osian tehsil. In case of 'other workers' the highest percentage of 79.0 has been registered by Jodhpur tehsil while the lowest of 12.6 per cent in Osian tehsil.

Note: Percentage of workers to total workers are given in brackets.

In the district 43.0 per cent of the total rural population of the district is engaged in economic activities being workers. Of the total workers, most are engaged in agricultural activities i.e. 65.3 per cent are as cultivators and 12.7 per cent as agricultural labourers. Only 2.1 per cent of the workers are engaged in household industries whereas 19.8 per cent are in other works.

Almost similar trend has been observed in all the panchayat samities except in Osian panchayat samiti where percentage of other workers is marginally lower than that of workers engaged as agricultural labourers.

Sex wise, percentage of male workers are higher in HHI & OW economic categories i.e. 2.5 and 29.3 and female workers are higher in cultivator & agricultural labour i.e. 75.0 and 17.3.

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

The percentage of workers to total population of urban areas is significantly quite low being only 29.1 per cent as compared to that of rural areas of the district being 43.0 per cent. Here too, the percentage of workers engaged in four economic categories is just the reverse as compared to rural workers where majority i.e. 89.4 per cent of the total urban workers are as 'other workers' followed by 5.4 and 3.4 per cent as HHI and cultivators respectively.

Almost similar trend is visible in all the municipal towns except in Pipar City and Bilara (M), where the percentage of cultivators is higher than that of HHI and agricultural labourers, and in Bilara (M) agricultural labourer is also higher than that of all other towns in the district.

Sex wise percentage of male workers as other workers is higher than that of female other workers being 92.1 and 69.3 per cent respectively. On the other hand, percentage of female cultivators (12.6 per cent) is much higher than that of male cultivator's (2.1) at the district level for urban areas.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total (1058) inhabited villages, 985 (93.1 per cent) have educational facilities. In case of medical amenities only 43.7 per cent of inhabited villages have such amenities. A significant number i.e. 921 (87.1 per cent) villages have improved drinking water amenities. In the communication field only 33.5 per cent of villages have post office facilities while 55.6 per cent have telephone facilities. In the banking field the picture is gloomy as only 77 (7.3 per cent) villages have banks. More than 61 per cent i.e. (653) are linked with pucca approach roads whereas 86.2 per cent have power supply.

At Panchayat Samiti level, Mandor and Bilara Panchayat Samiti each have higher percentage i.e. 99.0 and 97.8 of villages having educational facilities. For medical amenities it is Bilara panchayat samiti, which have highest percentage of 69.7. Much variation is seen among the tehsils having telephone facilities. Bilara Panchayat Samiti has the highest percentage of villages i.e. 75.3, which have telephone facilities whereas Bap has the minimum percentage of 29.6 for such facility. Bilara Panchayat Samiti. has the distinction of cent percent villages having power supply.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

Improved drinking water: Majority of the households i.e. 76.4 per cent have drinking water facility in the district. For rural and urban areas, these percentages are 66.2 and 95.5 respectively. At tehsil level, for rural areas, the highest percentage (87.4) of households availing this facility has been found in Osian tehsil whereas for urban areas it is 98.9 per cent in Phalodi tehsil.

Electricity: 56.6 per cent of households are using electricity. However there is much wide gap in the percentage of households using electricity in the rural (37.5 per cent) and urban (92.1 per cent) areas of the district. At tehsil level it varies from a maximum of 87.0 per cent in Jodhpur tehsil and minimum of 25.2 per cent in Phalodi tehsil of households using electricity.

Bathroom: 48.2 per cent of the households have bathrooms in the district. Here too much wider gap is seen in the percentage of households having bathroom in rural and urban areas, as these are 29.4 per cent and 83.0 per cent respectively. Similar trend is seen in all the tehsils of the district.

Toilet: In case of toilets, the picture is not so good especially in rural areas of the district. Only 9.0 per cent of households of the rural areas have toilet facility as against 83.7 per cent in the urban areas. The highest percentage (74.4) of households having toilet facility is found in Jodhpur tehsil whereas the lowest of 6.2 per cent in Shergarh tehsil.

Drainage: Again, in case of usage of drainage, the position is not satisfactory. Only 43.8 per cent of households have drainage in their houses. In rural areas the position is even worse, where only 21.4 per cent of households have drainage system as against 85.2 per cent in urban areas.

Majority of the households (62.7 per cent) of the district is using firewood as fuel followed by cooking gas (25.6 per cent), kerosene (5.2 per cent), and crop residual (3.1 per cent). In the rural and urban areas of the district, much deviation is seen in the percentage of households using fire wood and cooking gas as 87.3 per cent and 3.2 per cent of households of rural areas are using these respectively in comparison of 17.1 per cent and 67.1 per cent of urban areas respectively. Similar trend is seen at tehsil level also. e.g. Jodhpur tehsil 26.5 firewood and 58.1 LPG.

Banking services: Only 28.6 per cent of the total household's (451,818) are availing Banking services whereas in rural and urban areas this percentage is 20.4 and 44.0 respectively. At tehsil level, the highest number of households (69,959) availing this facility has been found in Jodhpur tehsil, while the lowest (5,402) in Luni tehsil.

Radio/Transistor: Of the total household's (451,818) of the district, 47.5 per cent are in possession of Radio/Transistor. Similarly in rural and urban areas of the district, the percentage of households having radio/transistor is 42.1 and 57.6 per cent respectively.

Television: In case of Television, the percentage of households possessing it is much higher i.e. 69.0 in urban areas than that of in rural areas at 8.8 per cent only.

Telephone: Only 10.5 per cent of the total household's (451,818) of the district have telephones. The gap is much wider in rural and urban areas of the district where 2.4 per cent and 25.4 per cent of their respective total households have telephones respectively.

Auto mobiles: In case of two wheelers, 21.3 per cent of the households have either motor cycle or scooter or moped. For rural and urban areas these percentage are 8.5 and 45.1 respectively. Rural and urban areas 2.8 per cent and 5.6 per cent of households have four wheelers.

It is very significant that 33.3 per cent do not have any of the specified assets. In rural areas this percentage is even higher i.e. 45.1 as compared to that of in urban areas at 11.3.

(xi) Other Developmental Activities during 1999-2000:

The District Rural Development Authority Jodhpur is responsible for implementing various development activities in the rural areas of the district. Following is the brief description of the various development schedules implemented by the DRDA Jodhpur for 1991-92 to 2000-2001.

Integrated Rural Development Program (IRDP)

This programme is basically for eradication of poverty by providing self- employment. During this period, training was given to the poor for self-employment and loans from different banks worth Rs.3959.25 Lac were given. An amount of Rs.1171.86 was given as grants from the loans.

Bio-gas Scheme

For the development of non-conventional sources of power Bio-gas plants have been established. During this period 456 plants were established by incurring expenditure of Rs.22.85 Lac.

Massive Scheme

The main object of this scheme is to increase agriculture production by extending financial assistance for the different works of minor irrigation. Cultivators have been benefited by construction of new wells, deepening of wells, installation of pump sets, and construction of pucca drainage. An amount of Rs.17.94 Lac was spent on 240 families who were benefited during this period.

Jeevan Dhara Yojna

Indira Avas Yojna (IAY)

Under this scheme free residential houses are being built for the poorest among the poor. An assistance of Rs.20,000 for new house and Rs.10,000 for converting kutcha house into pucca house is being provided. Assistance to the tune of Rs.731.67 Lac was given to 7284 families.

Jawahar Gram Swarojgar Yojna

The aim of this scheme is to create meaningful employment for the unemployed and marginally employed males and females in rural areas. Preference is given to the person living below poverty line. Under the scheme an amount of Rs.4166.87 Lac was spent on 10824 works.

Sansad Sthaniya Kshetra Vikas Yojna

(Local Parliamentarian Constituency Development Programme)

As per the decision of the Central Government each Member of Parliament can do the development works on his/her own up to the amount of Rs.Two Crores in his/her constituency. This scheme was started in 1994-95. Under this scheme Rs.1241.84 Lac were spent by completing 751 works.

Vidhayak Sthaniya Kshetra Vikas Yojna
(Local MLA Constituency Development Programme)

This program has been started from the year 1999-2000. Under this scheme each MLA gets Rs.60 Lac by the State Government to carryout constructional works in his/her constituency. During the period 146 works were completed by incurring an expenditure of Rs.266.81 Lac.

Apart from these programmes other like Maru Prasar Lok Karyakram and Maru Vikas Karyakram were also carried out by the DRDA.

(xii) Brief description of places of religious, historical or archaeological importance in village and places of tourist interest in the towns of the district

Fair and Festivals

The important fairs held in the district are briefly described below:

Sheetlamata Fair

It is organized at a place locally known as 'Kaga' in Jodhpur City. This fair to is held on Chaitra Badi 8 (March - April) every year. Nearly thirty thousand people assemble in this fair to pay homage to the image of Sheetla Mata.

Chamunda Mata Fair

The temple of Chamunda Mata is located in Jodhpur Fort. Chamunda Mata is the family deity of

Rathors (the former rulers of Jodhpur State). A fair is held on Ashvina Sudi 9 (September-October) every year. More than 50,000 people, who worship the goddess, congregate in the fair.

Veerpuri Fair at Mandore

A fair is held at Mandore, which is about 8 kms from Jodhpur city, in the memory of the heroes of Rajasthan on the penultimate Monday of Shravana (July-August) every year. Offerings of cash, coconuts and sweets are placed before the idols of deities - Ganesh, Bhairon, Chamunda and Kankali. About fifteen thousand persons of all communities congregate in this fair.

Dashehra Fair at Massoria Hill

The hillock has been developed as a beautiful picnic spot. A fair is organized on Ashvina Sudi 10 (September-October) every year at a place near Masooria hillock known as 'Rawan-Ka-Chabutra'. Lacs of people congregate here on this occasion.

Nau Sati Ka Mela

This fair is held at a place known as Ban Ganga in Bilara town. It takes place on Chaitra Badi Amavasya (March April) every year. It is held in the memory of nine women who became sati at this place. More than 10,000 persons assemble in this fair normally to take a dip in the Ban Ganga River and also take part in singing and dancing.

Rata-Bhakar-Wala-Ka-Mela

This fair is held at a distance of 3 kms from village Balesar Satan (Shergarh Tehsil) in the honour of Saint Jalandharnath. It takes place on Bhadrapada Sudi 2 (August-September) every year. Thousands of persons assemble on this occasion.

Baba-Ramdeo Ka Mela

This fair is held at Jodhpur city on Bhadrapada Sudi 2 (August-September) at Massoria hillock, where the temple of Baba Ramdeo is situated. A large number of people gather on this occasion from various parts of the state. It is locally known as Massoria Baba Ka Mela.

Kaparda

A small village in Bilara tehsil it has a population of 2657. It is at a distance of 52 kms from Jodhpur City. It has a Parasnath Jain Temple, which was built during 1603-1621. This temple has idols of various Tirathankaras. A fair is held here on Chaitra Sukla 5 (March - April) every year.

The other worth-mentioning fairs organized in the district are Nag Panchami Ka Mela. Mandainath and Parikarma fairs at Mandore, Gangaur fair at Pipar and cattle fair organized in the memory of Paramvir Major Shaitan Singh of Phalodi.

As in other parts of the state, the main festivals among Hindus are Holi, Deepawali, Dashera, Raksha-Bandhan, Gangaur, Maker Sankranti while among Jains the principal festivals are Mahavir Jayanti, Paryushan and Samvatsari. Muslims observe Moharram, Barawafat, Shab-be-Raat, Ramzan, Id-ul-Fitr and Id-ul-Zuha.

Places of Religious, Historical and Archaeological importance and Tourist Interests

The following are the places of religious, historical and archaeological importance and tourist interest in the district:

Jodhpur City

Jodhpur City which was founded by Rao Jodha Ji in the year 1459 AD is a historic city of great importance. During 2001 census, it has registered a population of 860818 persons comprising 88.1 per cent of the district's urban population. The city is enclosed by walls, gates and 'baris' (sideways). The main gates being used for entering the old city are known as Nagauri, Mertia, Sojati, Jalori, Siwanchi and Chandpole. With the growing urbanization, the city has expanded beyond the old walls and new colonies have come up. It has a fort located on a hillock, which is known as 'Mayur Dhwaj' or Maherangarh. The main entrance leading to the fort is Fatehpol and Jaipol. It being a private property of the erstwhile Raja, entry to the fort is allowed only through tickets. The fort has royal places decorated with beautifully carved panels, latticed windows of delicate design and screens of red sandstone. It has a durbar hall. The walls are painted by various Indian musical modes and miniature paintings. It is divided into various apartments known as Moti Mahal, Fateh Mahal, Phool Mahal and Srinagar Mahal. Besides these, there are temples of Chamunda, Murli Manohar etc.

In the city another important historic place is 'Jaswant Thada' which was constructed in the memory of late Maharaja Jaswant Singhji. The reflection of this building in the tank nearby presents a fine spectacle of great beauty and charm, especially in a moonlit night.

Ummaid Bhawan, crowning the Chitar hill is also a magnificent building. It has a beautiful park and a fine gate. In the city, there is Sardar Museum in the public part besides Jai Narain Vyas Memorial Town Hall, near the High Court building, which too is worth seeing. The museum not only exhibits the specimens of the local arts and crafts but also displays the inscriptions on slabs, coins and various types of sculptures. Among the temples, Ganga-Shyam has a towering spire while Maha Mandir has a colourful interior and a roof supported by a hundred pillars.

Mandore

It has been the capital of Marwar State and is situated on the banks of a seasonal streamlet Nagadari about 9 kms north of Jodhpur city. The place is not only important for its historical importance but attracts a large number of people who visit this place because of its naltural scenery especially in the rainy season.

Within the extensive gardens, there are cenotaphs of the former rulers of Jodhpur. These monuments are decorated with sculptures and crowned with spires reflect the epoch of Marwar's glory. The cenotaphs stand in a line according to size, running from south to north while the smaller cenotaphs have been built in the honour of other rulers and nobles. The 'Shrine of 330 million gods' is worth seeing. It has figures of divinities and heroes. A group of sixteen colossal figures is seen in the 'Hall of Heroes' which have been carved out of a single rock. The mosques of Pathan Gulam Kalandar Khan and Gama Gaji reflect the culture of the mughal period.

Balsamand

This small artificial lake is located in between Jodhpur City and Mandore, about 10 kms to the north of Jodhpur City. A beautiful garden overlooks the lake, which has a palace on its embankment. The lake's water is utilized for the garden.

Osian

The village is situated at a distance of about 58 kms to the north-west of Jodhpur City. It has a population of 12452 according to 2001 Census. The place is famous for its sixteen Brahmnical and Jain temples, most of which are in ruins.

Among the religious places in the district are 'Latyaliji-Ka-Mandir' at Phalodi, 'Sachiya Mata' Temple at Osian, Ban Ganga at Bilara, Ghanshyamji and Ranchodji-Ka-Mandir in Jodhpur City.

(xiii) Major characteristics of the district contribution of the district in the form of any historical figure associated with the district:

Jodhpur the former capital of Marwar State was founded in 1459 by Rao Jodha after whom the city of Jodhpur was named. He had claimed descent from Lord Rama, the hero of the epic Ramayana. Many impressive forts and palaces famous of which are the Mehrangarh Fort and Umaid Bhawan Palace are located in Jodhpur.

In addition to the places mentioned above, the public part, zoological garden, public library, stadium, all located in Jodhpur City are among other places worth a visit.

(xiv) Scope of Village and Town Directory:

In Part-A of the District Census Handbook, entitled as Village and Town Directory, an attempt has been made to present information regarding various amenities/facilities available in every rural/ urban unit of the State. The unit of the rural areas is village and that of urban area is town/urban agglomeration. Information regarding rural areas and Census Towns has been gathered through Patwaries while that in respect of urban areas other than Census Towns has been collected through the concerned municipality/Cantonment Board/Notified Area Committee. In order to have the aforesaid information authenticated the concerned departments and agencies were also contacted to furnish information available with them. All the information gathered about amenities relate to year 1999 and those pertaining to land-use pattern pertain to Samvat Year 2055 i.e. the agricultural year ending on the 30th June, 1999.

Village Directory

It will be helpful at the outset to have an idea of

the items for which information has been included in the Village Directory. Information in respect of each village has been presented through a twenty three column format in which villages have been presented in order of their names and Permanent Location code Number (PLCN) at State level. The first four columns (2-5) give general information i.e. Name of village and Permanent location code number, area in hectares, population and number of households residing in villages as per Census 2001.The amenities available in the village have been shown in columns 6-18. The information regarding land-use pattern has been given in columns 19-23. As a special feature for Census-2001 some new columns 10-12 and 17-18 are first time incorporated viz. commercial and cooperative Bank, Agricultural/non Agricultural and other credit societies, Recreational and cultural facilities, News Paper/Magazine and most important commodity manufactured in the village. In case of uninhabited villages, the information has been given relating to columns 1-3 and 19-23 only and in the remaining columns the word 'uninhabited' has been mentioned. At the end of entries of each Panchayat Samiti the totals relating to columns 3-11, 13-14, 16-17,19 and 21-23 (total area, amenities and land-use break-up) have also been given.

Various amenities like drinking water, communication, post and telegraphs etc. have been shown against the name of the referent village if they are available within the village with the help of various codes. The Code Structure relating to various columns has been given in the beginning of Section-I to Part-A of this book. The number of each type of amenity has been indicated in parentheses after the suitable code in case of educational, medical and post & telegraph facilities.

If any amenity is not available within the village a dash (-) has been shown in the relevant column and next to it, the distance of the nearest place from the referent village where the facility is available has been given in broad distance ranges viz. <5 km, 5-10 km & 10+ km.

The following pattern has been adopted for indicating the educational institutions:

(i) Schools up to Class V have been treated as primary schools. They include Nursery Schools, Kindegarten Schools, Pre-basic and Pre-primary Schools and Junior Basic Schools upto Class V.

(ii) All schools having Classes VI to VIII have been treated as Middle Schools.

(iii) All schools having Classes IX and X have been treated as Secondary Schools.

(iv) All schools having Classes XI and XII have been treated as Higher Secondary Schools. They include Senior Cambridge Schools, Schools under 10+2 scheme, Intermediate, Pre-University and Junior College etc.

In case of composite schools relevant groups of classes have been treated separately, e.g. a school having classes I to XII, has been shown as having one primary, one middle, one secondary and one higher secondary school. The term 'College' includes all types of colleges whether Arts/Science/Commerce/ Medical/Engineering/Agriculture and others imparting education at Graduate or Post-Graduate level. Institutions other than industrial schools, training schools and adult literacy classes/centres have been shown under 'others'.

In case of Medical institutions, Hospitals and Dispensaries, Allopathic, Ayurvedic, Unani and Homeopathy have been shown separately. Other institutions include all types of Yogic, Naturopathy, Hospitals/Dispensaries, Leprosy Centres etc.

In case there are more than one source of drinking water facility available in the village all such sources have been shown separately. Postal amenities include Post Office, Telegraph Office and Telephone, which are shown separately.

In case there are more than one communication facilities these have been indicated separately by relevant codes. Approach to the village refers to the state of roads etc. leading to the village from the communication centres i.e. bus-stand/railway station etc. This is to give an idea whether the village is easily approachable in all types of weather or becomes inaccessible for sometime in the year. Where there are more than one approach roads these have been indicated separately by relevant codes.

Information regarding the nearest town indicates the name of such town along with the distance from the referent village irrespective of the fact whether

such town is located within Rajasthan or in some other adjoining states. In case of town situated in states other than Rajasthan, the concerned State has been mentioned against its name in parentheses with the help of abbreviations. The term 'town' here refers to one of those urban centres, which have been treated, as towns in the concerned state during 2001 Census.

In order to give an idea about the uses which electricity is put to, the information has been given under the head "power supply" if it is available in the village.

Land-Use Pattern

The land-use pattern has been presented under the following five headings:

I. Forest

It denotes those lands, which have been termed as 'forest' by the competent authority.

II. Irrigated land

It relates to land, which has actually been irrigated in the referent year. The source-wise break-up has not been presented, as no such information was available in respect of the net irrigated area.

III. Unirrigated land

The term covers all the unirrigated land cultivated during the referent year and land lying fallow upto four years.

IV. Culturable waste

It includes Gaucher i.e. pasture and grazing land and tree-groves.

V. Area not available for cultivation

It refers to land, which has not been classified in any of the above mentioned types and also includes house sites, roads, rivers, nullahs, hillocks etc.

The following nine appendices have also been provided to present the position obtaining in Panchayat Samiti and district as a whole regarding various Amenities available in rural areas, villages classified by characteristics of the population and land-use pattern in Census Town in connection with the Village Directory:

(i) Panchayat Samiti wise Abstract of educational, medical and other amenities in villages.
   (a) Villages by number of Primary schools.
   (b) Villages by number of Primary, Middle and Secondary schools.
   (c) Villages with different sources of drinking water facilities available.

(ii) Villages with 5000 and above population, which do not have one or more amenities.
   (a) Census towns which do not have one or more amenities.

(iii) Land utilisation data in respect of Census Town.

(iv) Panchayat Samiti wise lists of inhabited villages where no amenity other than drinking water facility is available.

(v) Summary showing number of villages not having Scheduled Castes population.

(vi) Summary showing number of villages not having Scheduled Tribes population.

(vii) Panchayat Samiti wise list of villages according to the proportion of Scheduled Castes/ Scheduled Tribes population to total population by ranges. It consists of two parts: Part-A relates to Scheduled Castes and Part-B to Scheduled Tribes.

(viii) Panchayat Samiti wise number of villages under each Gram Panchayat.

(ix) Statement showing number of girl's schools in the villages.

Town Directory

Particulars about each town have been presented in the form of seven statements. In towns where there are slums Statement-VII has also been given in which information regarding civic and other amenities available in the slums have been shown. In each statement towns have been arranged in alphabetical order.

As has been explained earlier, urban agglomerations are of two types: first those constituted by two or more independent towns and second those where the urban characteristics have developed in the adjoining rural areas, which have developed as outgrowth of the referent town.

Where an urban agglomeration includes two or more independent towns, the names of towns

constituting the agglomeration have been indicated in the alphabetical arrangement but their names have also been repeated in the alphabetical order under the name of the agglomeration after the name of the main or core town and information relating to these has been shown here. The particulars of the constituent units of the agglomerations have not been repeated wherever they occur separately in the alphabetical order and a note "See referent agglomeration" has been given against such names. The lines relating to the information regarding urban agglomeration as a whole have not been numbered but the constituent units as and when they occur in the alphabetical order have been numbered so that the last number agrees with the total number of towns in the district concerned. In respect of Statements II, III and VI in the lines relating to agglomeration a note "See constituent units" has been shown and information has been provided separately in respect of all the constituents below it.

In case of towns having out growths, an asterisk mark has been placed against their names. Information in respect of out growths has been included in the concerned town and has not been shown separately.

The amenities and other data have been indicated by codes. A list of column wise code structure and other abbreviations used in each statement has been provided at the beginning of Section-II of Part-A of this book. We may now discuss the various Town Directory statements.

Statement I

It deals with the status and growth history of the town. Columns 2 to 7 give information regarding class, name and civic status of the town, its location code number, name of the tehsil/panchayat samiti in which it is situated, its area in sq. km and number of households including houseless households residing in the town as per 2001 Census. The class of the town has been determined on the basis of its population as per Census 2001 and the civic administration status relates to the year 2000. Columns 8 to 18 show the population of the town in different decennial censuses beginning from 1901 upto 2001. The growth rate in terms of percentage in respect of previous censuses has been shown below the population figures pertaining to each Census beginning from Column 9 onwards.

A 'dash' under these columns indicates that the referent town did not have an urban status in the referent Censuses. Density of Population per sq. km as per Census 2001 has been shown in column 19 and sex ratio (number of females per 1,000 males) have been indicated for three censuses viz. 1981 to 2001 in columns 20 to 22.

Statement II

This statement gives information about the physical aspects and locations particulars of the town in 1999. First two columns give the serial number, class, name and civic status of the town. Columns 3 to 13 deal with the physical aspects viz. rainfall and temperature. Rainfall figures are the average of the rainfall for the last one year ending 1999-2000. If the information in respect of rainfall is not available for any town it has been given for the nearest place for which it is available. Rainfall has been shown in millimeters per annum. Maximum and minimum temperatures have been given in centigrade. If the information regarding temperature is not available in respect of any town it has been given for the nearest place for which it is available and the name of the centre has been shown in footnote.

The location of the town with respect to various administrative headquarters and nearest city is indicated in columns 6 to 10. While showing the location of the referent town with respect to various administrative headquarters, names and their distance from the referent town in kilometer have been given in parentheses below the name of the place where it is situated. In case the referent town itself happens to be the seat of the administrative headquarters, this distance has been shown zero. Information regarding the nearest city of population one Lac or more and population 5 Lacs or more have been given in respect of its situation within the State or even if this city may be situated in other State. In case the nearest city happens to be situated in other State, the name of the concerned State has been shown against the name of the city in parentheses. How the referent town is approachable is given in columns 11 to 13 which indicate the availability of communication facilities viz. railway station, bus facilities and navigable river/canal within 10 km. There is no navigable river or canal in Rajasthan.

Statement III

It gives information about the finances of the civic body controlling the local civil administration and it has been presented in '000 rupees. A 'dash' in this Statement indicates that no receipt or expenditure has occurred under the particular head and 'N' represents negligible amount. First two columns give general information, columns 3 to 9 present receipt under broad categories and total receipt and columns 10 to 16 present expenditure under broad categories and total expenditure. The receipt and expenditure has been presented under six broad categories each. While receipt through taxes implies all receipts from taxes obligatory or others and revenue derived from municipal properties and power apart from taxation, it also includes income derived from holding of fairs and exhibitions, supply of milk, license fee, cattle-ponds, fines and penalties, transport services, places of entertainment, allotment/sale/lease of land and rent etc. Government grants include per capita grant, grant from Public Works Department and grant from the Social Welfare and other departments. Other sources of receipts have been specified, wherever possible but generally they are of miscellaneous nature.

Expenditure on general administration covers salary and wages of staff, contingent expenditure on staff, grants loans and advances to the staff etc. Expenditure on public safety cover fire-fighting, light, water and lease facilities, regulating the dangerous/ hazardous trades/works/occupation, water supply, registration of births and deaths, disposal of garbage, rubbish and night-soil. Public health and conveniences cover all types of medical aid and maintenance of the destitute etc. Public works include maintenance and construction of roads and buildings and relief works in times of famine and scarcity. Expenditure in public institutions covers all types of social, cultural, educational, religious institutions etc. Which are run or patronised by the municipality. Other sources of expenditure have been specified where possible but mostly these are of miscellaneous nature.

Statement IV

This statement deals with the civic and other type of public amenities and provides information about total population, scheduled castes and scheduled tribes population, road length, system of sewerage, number and types of latrines, method of disposal of night-soil, water supply, availability of fire-lighting service and electrification besides general information. In case of water supply the source of water as also the system of its storage have been shown. The storage capacity has been shown in Kiloliters. In case of disposal of night soil and protected water supply particulars have been given in respect of two methods/sources in order of their importance if more than one exist in the town. In case fire-fighting service is not available in the town the name of the nearest place if in the same district or the name of the nearest district if in the same state or other state where available along with distance from the referent town has been mentioned.

Statement V

Particulars of medical, educational, recreational and cultural facilities available in the town have been given in this statement and the number of each type of these facilities has also been shown in parentheses is along with the appropriate code.

In case of medical facilities the number of beds wherever available has also been shown Allopathic, Ayurvedic, Unani and Homeopathic hospitals/ dispensaries have been shown separately. No code has been provided for allopathic institutions and the numbers have been shown only in figures. Thus beside H, code for hospital means an Allopathic Hospital. Separate codes have been provided for other three systems of medicine.

If a medical or educational facility is not available in the town, the name of the nearest place, if the same district or the name of the nearest district in the same State or other State where available and its distance (in km) from the referent town has been mentioned. Details of medical institutions shown under 'Others' have also been explained.

Arts, Science and Commerce Colleges have been shown separately. While showing the educational institutions upto Higher Secondary level the same procedure as adopted in case of Village Directory, has been followed. In case of composed schools relevant classes have been treated separately e.g. a school having classes I to XII has been treated as being composed of one Primary, one Middle, one Secondary and one Higher Secondary School.

All other types of educational institution which are not covered in column 6 to 14 have been shown in column 15 under 'Others' and include technical/ vocational and training institutions like Applied Art Painting College, Pharmacy College, Agricultural College, Teacher's Training College/Institution, Music/ Dance School etc. Janchetna Kendra is also included in others.

Statement VI

This statement contains particulars regarding trade, commerce, industry and banking. It gives names of three most important commodities, exported and manufactured in the town besides the number of banks, agricultural and non-agricultural credit societies functioning in the town. A list of the outgrowths, if any, along with their population and name of the core town has also been provided at the end of the Town Directory as an Appendix.

Statement VII

Information about all slums whether notified or not and for all towns has been shown in this statement in order to give an idea about the amenities available to the slum dwellers. Particulars about paved roads, systems of sewerage, number and types of latrines, method of disposal of night soil, number of tap points/ public hydrants for supply of protected water and electrification have been provided in respect of every slum in each town, if there are any.

PART-B : PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/Panchayat Samiti/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/Panchayat Samiti/Town
3.	Primary Census Abstract for Scheduled Tribes	District/Panchayat Samiti/Town
4.	Village Primary Census Abstract	Panchayat Samiti/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented Panchayat Samiti wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Panchayat Samiti is presented both for rural and urban areas separately. All the villages within the Panchayat Samiti constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Panchayat Samiti. In case a Panchayat Samiti is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Panchayat Samiti is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares. The area figures of the Panchayat Samiti is the total of the village areas coming under each Panchayat Samiti. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tehsils/ Panchayat Samiti within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Tehsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and Panchayat Samiti level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II : FERTILITY-MORTALITY MEASURES

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever-married women and last question related to currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to Rajasthan State. The definitions of the Terminology used in computing different fertility and mortality rates are mentioned in the table.

AGE SPECIFIC MARITAL FERTILITY LEVEL, 1991 CENSUS

Age-Group	Jodhpur			Rajasthan		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	78.86	71.18	98.54	99.82	99.10	103.46
20-24	168.76	169.52	167.31	217.18	227.01	182.20
25-29	151.12	171.27	119.11	197.71	214.81	144.55
30-34	112.57	138.86	68.20	141.09	158.38	85.69
35-39	78.20	104.87	36.75	90.43	104.11	47.40
40-44	40.90	54.51	14.63	53.37	61.51	25.15
45-49	26.03	35.70	7.44	27.36	30.37	15.81

The Age specific Marital Fertility levels (ASMFR) have been calculated at seven different age-groups for rural as well as urban areas of the district. The ASMFR has been found lower in all the age group at the district level as compared to that of state. Almost similar trend has been observed in rural and urban areas except in age group of 35-39 and 45-49 of rural areas when the ASMFR at the district level in higher than that of states average as can be seen from table.

The ASMFR increases from 78.86 in the age group 15-19 to 168.76 in the age group 20-24 and than gradually decreasing with the increase of the size of age groups at the district. The maximum ASMFR of 168.76 has been recorded in the age group 20-24 and 167.31 in the age group 20-24 in thr rural and urban areas of the district respectively.

ESTIMATES OF CHILD MORTALITY, 1991 CENSUS

Mortality Indicators	Jodhpur			Rajasthan		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
q2	75	77	71	97	95	99
q3	83	79	89	100	98	106
q5	86	82	96	110	103	117

Information on the questions on children ever born and children surviving canvassed for ever-married women have been tabulated by age of marriage of mother. From this, estimates of child mortality have been worked out by using Brass Technique.

From the estimates of child mortality (Number of deaths by ages 2, 3 and 5 given as q2, q3 and q5) it is observed that the child mortality rates in the Jodhpur district is lower as compared to the state among males and females. It can be seen from the table.

Source : Occasional papter No.1 of 1997 office of the Registrar General India and Rajasthan state district profile 1991.
Note: * newly created districts after 1991 Census.

The GFR or the gross fertility rate of Jodhpur district comes out to be 162 which is equal to that of the states average of 162. Out the other hand the GMFR, TFR and TMFR of the district are higher than that of state being 190, 5.05 and 5.79 as against 184, 5.01 and 5.59 of the state respectively. However the Crude Birth Rate (CBR) of the district (34.67) is lower than that of state 35.75.

The number of children ever born per 1000 women in the age group of 45-49 in the district comes out to be 5.02, which is lower than that of state average 5.07. The mean age at marriage of females in the district (17.55) is higher than that of state (16.67). CWR (Child women ratio) 0-4 of the district is higher than state it can be seen from the table.

ANNEXURE-IV(a) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991-2001

(a) By Place of Birth:

It was seen that a sizeable portion of migrants in Jodhpur District i.e. 92.51 percent in 1991 and 92.77 percent in 2001 were migrants whose place of birth was within the state of enumeration. Out of this major portion where migrants who were born elsewhere in the district of enumeration.

The migrant whose place of birth was in other states of India was 6.36 percent in 1991 and 6.75 percent in 2001 Census.

Migrant to the district whose place of birth was in other countries was 1.13 percent in 1991, whereas the proportion was marginally less i.e. 0.49 percent in 2001 Census.

ANNEXURE-IV(b) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of Enumeration

(d) Migration of Last Residence

In the percentage distribution of migrants by place of last residence in the district it was seen that in 1991 census, the highest propotion of migrants i.e 92.55 percent were from within the state of enumeration but outside the place of enumeration. In 2001 Census this proportion increased to 92.74 percent in the same category. Suprisingly it was seen that the proportion of female migrants were higher than the male migrants in both censuses.

The migrants in the district that were from states in India beyond the state of enumeration was 6.44 percent in 1991 as compared to 6.83 percent in 2001 census.

Persons whose last residence was outside India were 1.01 percent in 1991 census while there was a marginal reduction to 0.42 percent in 2001 census.

RELIGION

Religion is an important basic cultural characteristic of the population. It provides an interesting picture of the society. The data on religion projects the unity and diversity of the country. The data is great importance to the public as well as Government,NGO and Minorities Commission.

Among the followers of six major religions in Jodhpur District it was seen that the proportion of Hindus had mirginally decreased from 88.04 percent in 1991 to 87.58 percent in 2001 Census. Whereas the proportion of Muslims increased from 10.44 to 10.74 percent, but the Sikh, Jain and Christian communities showed a marginal decreased.

At the state level also it was seen that proportion of Hindus declined whereas that of the Muslims and Buddhist showed a marginal increased in the 2001 census as compared to the 1991 census. In the same period the Sikhs and the Christian showed a marginal decreased.

MARITAL STATUS OF POPULATION

Majority of the population of the district in1991census is 50.52 percent in never married followed by married and widowed i.e. 45.68 and 3.71 percent respectively. Out of the male total population of the district 54.81 percent males are never married and of female never married is 45.71 percent, the proportion of widowed females is higher 6.23 percent than the males 1.47 percent. Married males are 43.65 percent while 47.97 percent females are married at the district level. Divorced or Separated is not so widely practiced, only 0.06 males and 0.08 females are reported in this category which are almost half to the state average. The same trend was found in rural as well as urban areas.In 2001 census 51.14 is never married.There after comes married persons whose percentage to total population comes to 45.28 widowed persons in absolute numbers are 101,164 which is 3.50 percent to total population.Sexwise, males have higher population of never married 55.24 percent as compared to females whose population is 46.60 percent. On the other hand females have higher proportion of married (47.40 percent) than males 43.35 percent.Females have a phanomenal higher number 63270 of widows than male widowers 16760 in the district.It can be seen from Annexure VI.
