VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

ANAND NIGAM
Deputy Director
Directorate of Census Operations, Rajasthan

Kota Thermal Power Station

Three major Power Plants one each of Nuclear, Hydel and Thermal type have been set up at Rana Pratap Sagar Dam, Jawahar Sagar Dam and Kota Barrage respectively in the periphery of 100 km area of Kota City as Symbols of Development.

Kota Thermal Power Station was established in the year 1968. It has a capacity of 850 megawatt for power generation. For its 5 units, 12500 tonnes of coal is being consumed. The construction work of its sixth unit of 195 megawatt capacity has been started. This project has been rewarded many times for creating records in excellent power generation.

The Kota Thermal Power Station generated 61171.88 Lac units of electricity by using 82 per cent capacity of its 5 units. The five units each of which of this Thermal Power Station has generated 7201.18, 7769.55, 15682.40, 14340.10 and 16178.65 Lac units of electricity.

Primary Census Abstract for Scheduled Tribes 398

Panchayat Samiti wise Village Primary Census Abstract

1. Panchayat Samiti : Itawa 404

2. Panchayat Samiti : Sultanpur 422

3. Panchayat Samiti : Ladpura 440

4. Panchayat Samiti : Khirabad 464

5. Panchayat Samiti : Sangod 488

Urban Primary Census Abstract 512

Annexure-I : Number of villages under each Gram Panchayat, 2001 Census 542

Page Nos.

Annexure-II	:	Fertility and Mortality, 1991 Census	563
Annexure-III	:	Various measures of fertility and mean age at marriage, 1991 Census	564
Annexure-IV	:	Percentage distribution of Migrants by place of birth/ place of last residence, 1991-2001 Census	565
Annexure-V	:	Brief account of main religions in the district as per 1991-2001 Census	567
Annexure-VI	:	Marital status of population as per 1991-2001 Census	569
Annexure-VII	:	Age, Sex and Education in the district, 1991-2001 Census	570
Annexure-VIII	:	Distribution of different mother tongues returned in 1991-2001 Census	571

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre),

drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri J.L.Modi, Director of Census Operations, Rajasthan. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Additional Secretary &
Census Commissioner, India

Preface

I am deeply indebted to the State Government of Rajasthan for their unstinted support and cooperation despite all odds and adversaries like famine etc. at all stages of Census Operations of 2001. I am grateful to Shri Inderjit Khanna, the then Chief Secretary of Government of Rajasthan for his prompt response, guidance and cooperation given to the Census Organization. He infused a sense of urgency and seriousness in the minds of District Collectors and Officers of the District Administration, which geared up the entire administrative machinery. The Supervisors and Enumerators, the basic census functionaries worked ceaselessly in the entire period of fieldwork to make Census 2001 successful.

Sarvashri Ashok Pandey and Vinod Zutshi, the then Secretaries in the Department of Cabinet Secretariat and General Administration have been instrumental in making Census 2001 a successful one. I owe my thanks to both of them. I am also thankful to other Departments like Education, Finance, Revenue, Economics and Statistics, Public Relations, Printing and Stationery, Local Self-government and Personnel Department for extending their full cooperation.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his unstinted support and spontaneous, unfailing guidance throughout our endeavours. At the outset I would like to thank Shri D.K. Sikri, Registrar General and Census Commissioner, India for guiding us in bringing out this report. My grateful thanks to Shri K.N. Unni, Ex-DRG (C&T), Shri R.G. Mitra, Ex-DRG (C&T), Shri R.P. Singh, Consultant (Map), Shri Himakar, Additional Director (EDP), Dr. I.C. Agrawal, A.R.G.(SS), Shri S.L. Jain, Deputy Director (SS), Shri C. Chakravorty, Joint Director (DDU) and their colleagues at the headquarter for their ever willing, helping hand and thoughtful suggestions for putting together and shaping the volumes in their present form.

The Director of Census Operations, Rajasthan, Shri J. L. Modi under whose guidance the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before this volume could be made available for the press. I am deeply greatful to Shri H.S. Meena, Ex-Joint Director of Census Operations, Rajasthan for its success.

It may be mentioned, a few annexures have been added to this volume with a view to provide an insight into the 1991 and 2001 data on the suggestion of Social Studies Division of the Office of the Registrar General, India. In this connection the contribution of Shri V.K. Gupta, Senior Compiler can not be ignored.

Shri H.C Sharma, Assistant Director incharge of District Census Handbooks and Primary Census Abstract, who was ably assisted by his team of dedicated workers deserve all praise for their perseverance and dedication in preparing Village and Town Directories and in finalization of PCAs and other inset tables. I would like to thank Shri G. Fernandes, Assistant Director who not only coordinated the work but also contributed immensely to the cause of Village and Town Directories.

In view of the increasing demand of the publications in electronic format, it has been decided to publish the DCHB also on CD. I highly appreciate the efforts put in by Smt. Jyoti Luhadiya, DD(EDP) and her team to compile in the electronic format. The efforts put in by Shri Divesh Chawla, DEO Gr-'B' to prepare this is highly commendable. In this connection, the contributions of Shri P.N. Mathur Sr.Supervisor and Shri J.P. Verma, DEO Gr-'B' cannot be ignored.

Shri G. L.Verma, Asstt. Director has taken pains in drafting the District Profile and the Analytical Note for the district. The members of the staff in the Map Section did a commendable job under the guidance of Shri Panna Lal, R.O.(Map), ably assisted by Shri R.S. Tyagi, Sr.Geographer in bringing out various maps.

District Highlights - 2001 Census

1. Kota district ranks 2nd in terms of population,16th in terms of area and 4th in terms of population density.

1. Kota district ranks 17th in terms of population,24 th in terms of area and 7th in terms of population density.

2. The sex ratio of Kota district (896) is significantly lower than the State (921) sex ratio.

3. The literacy rate in Kota district is 73.5 percent which is higher than the literacy rate in the State 60.4 percent and it ranks 1st among the other districts of the State.

4. Only 3 village have population more than 10,000. There are 80 uninhabited villages in the district.

5. Itawa (Tehsil Pipalda) is most populous (19,971) village of the district where as Jiyaheri, Bhat Kheri (Tehsil Digod) and Melkheri (Tehsil Sangod) is the least populated (1) villages.

6. The economy of the district is mainly dependent on agriculture.

7. The district has recorded the (48.0 percent) work participation rate for male workers.

8. Sangod Tehsil has the highest number of villages (211) whereas Pipalda Tehsil has the lowest number of village (169).

9. In the district Akhawa village in the Tehsil Ladpura has the largest area (89390.0 hectare) whereas villages Chak Kheri in Tehsil Pipalda has the smallest area (9.0 hectare).

10. The city of Kota is famous for the Kota Barrage, which is a dam, fromwhere electricity is generated and it also a source of irrigation.

11. The famousDarah Game Sanctuory situated inthe Mukandara range of hills 50 kms. from Kota isrich in wild fauna and is visitedby people from different parts of the country.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook:

The series of District Census Handbooks has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several new innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Numbers (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from 1 to N. Each village has been assigned an eight digit code. The first six digits represent the code of the village as existing at the present census. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001, are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

The responses for almost all the questions in the Houselisting Schedule had pre-coded options. This not only helped the enumerators to record the response easily but at a later stage would hopefully facilitate quicker data processing. Apart from the improvements made in the format of the Houselisting Schedule, the scope of Houselisting was considerably expanded with the inclusion of new questions based on requirements of various data users and planners. The new features of the Houselisting Schedule are listed below.

- For the first time, different uses of census houses have been standardized and grouped into ten main uses and assigned code numbers.
- Plastic has been added in the list of material of wall and roof of a census house, as it is often used for shelter in slums and shanties.
- In the previous census, the location of drinking water source was categorized into two locations viz. 'within premises' and 'outside premises'. In the Census of India, 2001, the source 'outside premises' was split into two categories namely 'near the premises' and 'away from the premises'.
- The scope of question of availability of electricity was expanded to include six sources of lighting. Besides no lighting, this included sources like electricity, kerosene, solar, other oil and any other source.
- In 1991 Census, a question on availability of toilet facilities to the household was canvassed while in Census of India, 2001, specific information on availability of latrine within the house by the type of latrine was sought.

In addition to expending the scope of the questions canvassed during the Houselisting Operations in the 1991 Census, the following new questions were added in the Houselist Schedule for Normal Households at the Census of India, 2001.

- If the Census house was used for residential or partly residential purposes, the condition of the census house was categorized as good, livable or dilapidated based on the perception and response of the respondent.
- A question on number of married couple(s) living in the household was canvassed.
- Information was sought on the number of married couple(s) having independent room for sleeping.

- Information as to whether the waste-water outlet of the house is connected to 'closed drainage' or 'open drainage' or has not drainage was collected.
- A question on availability of bathroom within the house was included.
- Information on availability of kitchen within the house was also sought.
- Availability of certain assets to the households namely radio/transistor, television, telephone, bicycle, scooter/motor cycle/ moped, car/jeep/van were also included.
- It was also enquired whether any banking service was being availed by the household.

The Household Schedule adopted for the Population Enumeration also primarily had pre-coded options for majority of the questions. The questions for each data item were made as self-explanatory as far as possible for easy understanding. The comprehensive Household Schedule had three parts and two sides A and B. Part I contains the Location Particulars; Part II relates to Individual Particulars and Part III contains questions for Household engaged in Cultivation/Plantation. To facilitate quick tabulation for bringing out Provisional Population Totals, provisions of page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates and workers and their categories by sex. Most of the questions canvassed during the 1991 Census, were retained for the 2001 Census, except the question on ex-serviceman, which was dropped during the Census of India, 2001. However, a number of new questions were added in the Household Schedule in view of the suggestions from policy makers, data users and researchers, while the scope of certain existing questions was enhanced.

These modifications are:

- Age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.
- The type of educational institution attended by a person was enlarged to include school, college, vocational institute, other institute and literacy center.
- The scope of the definition of 'work' was expanded in the Census of India, 2001, to include production of milk for domestic consumption. In the 1991 Census, cultivation of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India, 2001.
- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India, 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census is dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census, is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected

are - in seeing, in hearing, in speech, in movement and mental.

- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work is collected under this section.
- The Household Schedule has a new set of questions for Household engaged in cultivation/ plantation- i) Net area of land under cultivation/ plantation, ii) Net area of land irrigated and iii) Tenure status. This question was not canvassed at the 1991 Census but was canvassed in the 1981 Census in a slightly different form.
- The signature or thump impression of the respondent has been taken on the Household Schedule for the first time in the history of census. This was not only aimed at obtaining correct and complete information but also for giving an opportunity to the respondents to authenticate the information provided by them. The relationship of the respondent with the head of the household was also obtained. This new feature will pave way in carrying out a methodological study in future on the respondent profile in the census.

In 1981 Census, for the first time, an attempt was made in the series to bring out demographic and other data in diglot, Hindi and English, for a more beneficial use by data user of all categories. Hindi being the official language of the State, a Hindi version of the analytical notes was also added with a view to caters to the needs of all sections of readers. The manner of presentation of the District Census Handbooks for the 1991 Census is by and large the same.

As a necessary corollary to the Handbooks, Panchayat Samities, the basic administrative units of development, administration and planning, were listed out separately for the first time in 1981 Census in relation to those districts wherein they were not coterminous with their tehsils. As an additional attempt, informations relating to population figures as well as amenities available in each village located in the jurisdiction of each Panchayat Samiti were also presented in a separate volume under the title "Supplement to District Census Handbook". However, for reference in the main District Census Handbook, a list of villages forming part of each non-coterminous Panchayat Samiti was provided along with the abstracts of population and amenities for such Panchayat Samities as a whole in the form of Special Annexures.

In order to cater to the over-all needs of the data-users and to facilitate the task of administrators and planners it has now been decided to present the Village Directory and Primary Census data at the Panchayat Samiti level instead of the traditional Tehsil level presentation. It is expected that the presentation of Village Directory and Primary Census Abstract data at Panchayat Samiti level will help the planners in formation of micro-level developmental plans, as the Panchayat Samiti is now the lowest administrative unit for development planning. However, for the convenience of the data users and for the sake of comparability of data at Tehsil level, the Primary Census Abstract has also been presented at the Tehsil/ Town level in the form of an Appendix.

A general note on each district covering information of general interest regarding its history, topography, physiography, administrative set-up and places of tourist and historic importance etc. has also been included with a view to provide comprehensive and more purposeful information about the district as a whole. Population figures of Scheduled Castes and Scheduled Tribes constituting the core of 'Weaker Section' have also been presented at district, panchayat samiti and town level so as to facilitate planning for their welfare both at micro and macro levels.

It is earnestly hoped that this publication will serve its purpose for planners and administrators of welfare schemes and other data users in general.

Prior to 1951, Census Reports were printed for the whole province/state. The idea of preparing the District Census Handbooks separately for each district was conceived during 1951 Census as a part of a plan intended to secure an effective method of preserving the Census data below the district level. The idea was that all the district census tables would be bound together in a single volume called the District Census Handbooks. Since then the District Census Handbooks are being published regularly.

The 1951 Census series of District Census Handbooks was printed in two parts. Part I contained five General Population Tables (A Series), three Economic Tables (B Series), five Household and Age Tables (C Series) and seven Social and Cultural Tables (D Series). In Part II of District Census Handbook "Primary Census Abstract and Village Directory" which showed the basic population figures for each village or town classified by livelihood classes, were included along with some information of general nature.

The 1961 Census series of District Census Handbooks were printed in single volume in which Primary Census Abstract upto village and town/ward level and Village Directory upto village level were given. Besides, some official statistics collected from various state departments, four General Population Tables (A Series), sixteen Economic and Household Tables (B Series), seven Social and Cultural Tables (C Series), four Housing Tables (E Series) and eight Special Tables for Scheduled Castes/Scheduled Tribes were also provided in District Census Handbooks. For the first time in 1961 Census the maps for the district and tehsil were also included in the District Census Handbooks.

In 1971 Census series of District Census Handbooks village-wise 'Village Directory' giving services, facilities or amenities available in the village was given. 'Town Directory' was introduced for the first time giving useful information in respect of every town of the district. Rural Primary Census Abstract upto village level and Urban Primary Census Abstract upto enumeration block level were given in District Census Handbooks. While the District, Tehsil and Town maps were included; the inclusion of Census Tables was dispensed with in the District Census Handbooks in 1971 Census.

The scope of 1981 series of District Census Handbooks was enlarged specially in relation to amenities and land-use pattern. Apart from new items like uses of electricity, details of communication points, information for which was not collected in 1971 Census, a note on each district covering general information on its history, topography, flora, fauna and administrative set up etc. was also added. The format of the Primary Census Abstract was also restructured in the light of changes in economic and other questions canvassed in the 1981 Census but at the same time, all efforts were made to retain comparability with 1971 Census data. The inclusion of Special Primary Census Abstract for Scheduled Castes and Tribes at the Tehsil/Town level was another innovation introduced in 1981 Census series.

The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same as followed in 1981. However, the format of Primary Census Abstract was restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group was included in Primary Census Abstract for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate at the time of the 1991 Census.

One of the most important innovations in the 1991 Census was the Panchayat Samiti level presentation of data in the Village Directory and Primary Census Abstract instead of the traditional Tehsil level presentation.

Deviating from 1991 Census, like 1981 Census four fold industrial classification of main and marginal workers has been presented in 2001 as against nine fold given in 1991.

The mode of presentation of DCHB in 2001 will by enlarge be same as that of in 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc pertaining to 1991 Census of the respective district in the DCHB in the form of Annexures II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

(ii) Brief History of the District:

The district is known after its headquarter town, Kota which was the capital of the erstwhile State of the same name. According to available records, it is said that the grandson of the chief of Bundi, Jait Singh, founded Kota by attacking and ousting some Bhils of Koteah clan from the place, east to Chambal, which

he named as Kotah (Kota). Another version is that Jait Singh captured Akelgarh in Vikram Samvat 1321 (1264 A.D) and occupied Kota, subsequently used as a pargana attached to the Jagir of Bundi.

In ancient days, Kota State was administered by the ruler, then known as the Maharao, who was assisted by a Diwan, During Shatrushal Singh's Kingdom, the work of administration was divided into several departments, important among which were Mahkmakhas, the court of Appeal, Palki Khana, Revenue, Kotwali, Police, Forest, Mint and Army. For administration purposes, the State was divided into parganas which were kept under the charge of a Ziledar. These parganas were redivided in 1863 with a view to make them equal from the point of view of revenue. In 1874, some major changes were effected in the administrative set up of the State when it was divided into eight Nizamats and each Nizamat was further split into two tehsils. Each Nizamat was administered by a Nazim who was assisted in his work by a Naib Nazim. In1901, there were nineteen nizamats and four tehsils which were further reconstituted in 1933 into four Zilas, viz., Kotriyat, Kota, Baran and Aklera and 19 Nizamats.

A separate district by the name 'Kota' came into being when former Kota and Tonk States had joined the former Rajsathan in March, 1948 and intergrated into the United States of Rajasthan in the year 1949. In addition to a large area of Kota State, the district included certain areas of the former Jhalawar State (viz.Kirpapur) and Tonk State, namely Chhipabarod and Sironj. As against this, some areas of Kota State, viz., Asnawar, Aklera, Khanpur, Manohar Thana and Bakani were detatched to form part of the new Jhalawar district.

Consequent upon the reorganization of States in 1956, two of its tehsils, Sironj and Lateri, were transferred to Vidisha district of Madhya Pradesh State. During the intercensal period 1951-61 by way of an inter-tehsil re-adjustment, Baran village (areas 8.5 sq.km.) was transferred from Atru tehsil to Baran tehsil. At the time of 1961 Census, Kota district comprised of four sub-divisions, namely, Kota, Baran, Chhabra and Chechat which were further divided into seventeen tehsils, viz., Itawa, Pipalda, Barod, Mangrol, Digod, Anta, Baran, Kishanganj, Shahbad, Ladpura, Chechat, Ramganj Mandi, Kanwas, Sangod, Atru, Chhipabarod and Chhabra. In 1971 also, the district had four sub-divisions, Ladpura, Baran, Chhabra and Ramganj Mandi but 12 tehsils only, namely Pipalda, Digod, Mangrol, Baran, Kishanganj, Shahbad, Ladpura, Ramganj Mandi, Sangod, Atru, Chhipabarod and Chhabra. No inter district transfer of area took place during 1961-71.

However, tehsils Itawa, Barod, Anta, Chechat and Kanwas lost their existence as tehsils and their area was transferred to Pipalda, Digod, Mangrol, Ramganj Mandi and Sangod tehsils respectively. During 1971-81, 13 villages with an area of 124.16 sq.km were transferred from Sangod tehsil of this district to Jhalrapatan tehsil of Jhalawar district by way of inter district transfers. During the inter-censal period 1981-91, 61 villages and one town Indergarh were transferred from Pipalda tehsil of Kota district to Keshoraipatan tehsil of Bundi district covering an area of 226.24 sq.kam.

At present district Kota has their area 5217 sq. km the new district Baran has been made since 10th April, 1991 from the area of old district Kota. Now district Kota has two Sub-divisions as Kota & Ramganj Mandi, Five tehsils as Ladpura, Pipalda, Digod, Ramganj Mandi & Sangod & Eleven Towns (including 7 Census Towns).

(iii) Administrative set-up

The Collector is the administrative head and is also vested with the powers of the District Magistrate. For the purpose of administration the district is divided into sub-divisions, five tehsils, five panchayat samities and eleven towns as mentioned below:

Sub-division	Name of tehsil	Name of Panchayat Samiti	Name of town
Kota	1- Ladpura	1- Ladpura	1.Kota (M.Cl)
			2.Kaithoon (M)
			3.Sogaria (CT)
	2- Pipalda	2- Itawa	
	3- Digod	3- Sultanpur	
Ramganj Mandi	4- Ramganj Mandi	4- Chechat (Hqr)	4. Chechat (CT)
			5. Modak (CT)
			6. Udpura (CT)
			7. Ramganj Mandi (M)
			8. Satal Kheri (CT)
			9. Suket (CT)
			10. Kumbhkot (CT)
	5- Sangod	5- Sangod	11. Sangod (M)

(iv) Physical Features

(1) Location and Size

District Kota forms Sourth-Eastarn part of Rajasthan State. It has between 24033' to 25051' north latitude & 75037' to 76034' east longitude. It is bounded on the north district Sawai Madhopur & north east Madhya Pradesh State in east newly created district Baran & north west district Bundi in west south Rawat Bhata part of district Chittourgarh & in sourth district Jhalawar & in east side Madhya Pradesh State.

(2) Physiography

The district is located in the south-east of Rajasthan State. Its shape is something like a cross. The land slopes gently from south to north and is drained by the Chambal and its tributaries. Hills are seen in south, north and eastern portions. The Mukandara range of Vindhyan Hills, which is 145 km long, is located in the district. At many placed, it has a curious double formation of two separate ridges, running parallel to each other at a distance of more than two kilometers. The portions lying between these ridges are often covered with dense forests.

The Chambal is the principal perennial river of the district. Its tributaries include the Kali Sindh, the Parwati, the Parwan and the Andheri. The river Chambal enters this district from the west. It is deep and wide near Kota City in all seasons. The Parwati is aboput 64 km in length and it enters the district in the south near village Karaiahat. The tributaries of Parwati are the Sukri, the Banganga and the Kul. The river Kali Sindh rises in the Vindhya hills and enters the district near village Gagraun (Jhalawar district) in the south. The Parwan flows through Chhipabarod, Atru, Sangod and Mangrol tehsils and falls in the Kali Sindh. The Ujar is another tributary of the Kali Sindh.

(3) Climate

The district has a dry climate. The cold season lasts for about three and a half months from November to the end of February. The period from April to the end of June constitutes the hot season. The monsoon season starts in the middle of July. The maximum temperature was recorded 46.00C and minimum 6.90C and average humidity as 41.00 percent during the year 2000.

The annual rainfall has been recorded as follows:

Year	Rainfall in Cms
1996	78.68
1997	104.02
1998	59.75
1999	82.01
2000	75.23

Source: Zila Sankhikiya Rooprekha, 2001

(5) Natural economic resources

Geology and minerals

The rocks of Vindhyan system cover the major part of the district. However, the small areas lying to the eastern sides of Shahbad and Chhabra are an exception in as much as their geological antiquity belongs to Deccan Traps of upper cretaceous to lower eoceneage. The traps have been subjected to various degrees of laterization during recent to sub-recent successions because of which there is a cover of laterite at various places. The stratigraphic succession of the rocks exposed in the district is broadly as follows:

Recent	Alluvium Soil, Kankar
Recent to sub-recent	Laterites, Bauxite
Upper Cretaceous to Lower Eocene	Deccan traps
Paleozoic -	
(a) Upper Vindhyan	Bhandar series, Rewa series, Kaimur series
(b) Lower Vindhyan	Samuri series.

Structurally, vindhyan group of rocks are less disturbed. Over a greater part of the area, the beds are nearly horizontal but at places they show steep dips.

The district is not rich in minerals. The building stone is the most important and main mineral found in it.

Since metamorphic rocks are not found in the district, it is conspicuous by the absence of any significant metallic ore, except Bauxite which is available near Mamoni in Shahbad tehsil. However, deposits of many non-metallic minerals occur in the district out of which the important are sandstone and limestone.

Sandstone is obtained from Semri and lower Bhander formations of the Vindhyan. It is quarried in large quantities near Khemaj, Mukundwara and Kanwas. Suket limestone are exposed between Deoli and suket over an area of about 900 sq. km. These are extensively quarried as slabs for flooring and are well known as Kota Stone.

Forest, Flora and Fauna

The total reported area for land utilization purposes in the district was 521133 hectares in 1999-2000. Of this, 121357 hectares comprising about 23.29 percent were covered by forest. This indicates that the district has a rich forest belt. These forests are concentrated mainly in the south-western and central portions on the Mukundara hills. The main sub-types of forests, viz., (i) Anogeissus Pendula Forest, (ii) Miscellaneous Forest and (iii) Babul (Acacia Arabica Wild) exist in the district.

The main species of flora found in Anogeissus Pendula forests are Dhokra (Anogeissus latifolia wall) mixed with Gurjan (Lannea coromandelica Houtt Merr), Bel (Aegle marmelos), Tendu (Diosoyros) Tomentosa Roxb) etc, miscellaneous forests include Khejra (Acacia leucophlaea Willd), Khair (Accia catechu willd), Bel (Aegle marmelos), Kalam (Kadam) (Staphegyne parvifolia Roxb), Amaltas (Cassia fistula Linn), Kohra (Terminalia arjuna), Bahera (Terminalia belerica Roxb), Gurjan (Lannea coromandelica) etc. likewise, the main flora found in forests of the third sub-type is Babul mixed with Khejra (Acacia leucophloea willd).

A part from the above, there are certain other trees found in the district, namely, Dhau (Anogeissus latifolia wall), Bahera (Terminalia belerica Roxb), Mahuwa (Madhuca indica Grrel), Karaya or Kara (Sterculiaurens Roxb), Salar (Boswelia Serrata Roxb). Chhola (Dhak) (Butea monosperma Lomak), Shisham (Dalbergis sissoo Roxb), Sadaria (Terminalia tomentosa), Gular (Ficus, glomerata), Jamun (Syzygium Cumini), Neem Azadirachta indica), Pipal (Ficus religiosa), Aam (Mangifera indica), and Semal (Salmalia malbarica). Morak and Kanwas rages are famous for many grass Birs. The commonly found grasses which occur in Darah Valley and some blocks of Ladpura range are Lapla (Aristid depressaretz). Polard (Apludamuticalinn), Ratarda (Themeda quadrivulvis Dkata), Surwal (roni) (Heteropogan contortus), Karar (Dichanthium, annulatum Fore, Stapl), Bhalki (Chrvsopogan fulvus spreng Dc Chiov) and (Chlona veriegata).

The major forest produce consists of timber, fire wood and charcoal, Minor produce includes gum, rasins, tandu leaves, honey, was etc.

Among wild animals, mention may be made of panther (Panthera pardus), tiger (Panthera tigres), Chinkara, Chital (Cervus axis), Nilgai (Boselphus tragecamelus), Sambhar, Sloth bear, wild boar and common bare, in addition, common langur, stripped hyena, jackal, Indian fox, jungli cat, Indian porcupine, common mongoose, hedge hog, strippd squirrel, bat and bush rat are also found in the district. Common birds include Baya, Koyal, vulture, parrot, Jungli crow, Bulbul, house sparrow, owl, kite, green and common pigeon sand grouse, peafowl, common-quail, Jungli bush quail, grey partridge, Saras, crane, common sand piper, little egret, common teal, snips, painted partridge, Jungli babblur, blacksrongo, paradis fly catcher, red walted lapuring, magpie robin, Indian myna and hoopoe. The most common poisonous snakes are cobra, russel and viper. It is also interesting to mention that a large, variety of fish is seen in the rivers and tanks of the district. The major carps consist of Catla (Calta Colta), Rohu (Labeo rohita), Mrigal (Cirrhina mrigal), Lobeo Calbasu and Mahaseer (Barbustor), white chal (Chelabuccala), Puthi (Pamtiusticto), Banger (C.reba), Bala (L.pata), and Dera (L.dera) are the important varieties among the minor carp. Singhara (Mystus seenghala), Lanchi (Wallago atta), Magur (Ompoic bimaculatus), Siland (Silonia silondia), Gonch (Rita rita), Girai (Chena marulius), Sawal (C.puntatous), Kabra (Charma striatus), Sate (C.gachua) and Balm (Eel) are some of the kings of cat fish available in the district.

Land use pattern

The total reporting area for land utilization purposes of the district was 521133 hectares as per Village Record during the year 1999-2000 whereas the net sown area was 273494 hectares. The classification of the total area was as follows :

Sl.No.	Classification of Land	Area in hectares	Percentage to total area
1	Forest	1,21,357	23.29
2	Land put to non-agrictural use.	36,463	7
3	Barren and uncultivated land	26,730	5.14
4	Permanent pasture and other grazing land	13,798	2.65
5	Land under miscellaneous trees, crops and groves	676	0.13
6	Fallow land – Fallow land other that current fallow and current fallow	31,857	6.07
7	Land excluding fallow land	16,928	3.25
8	Net area sown	2,73,494	52.47
	Total	**5,21,133**	**100**

Source : Zila Sankhikiya Rooprekha, 2001.

Crop pattern

The district has 3 crop growing seasons, which are sown alongwith the crops grown in each season

Season Months	Crops grown
(a) Kharif (June to September)	Jowar, Maize, Kharif pulses, Groundnut, Til, Cotton, Sugarcane paddy, Soyabeen, Vegetables etc.
(b) Rabi (October to March)	Wheat, Gram, Linseed, Mustard, Barley, Fruits, Vegetables, Coriander, Peas etc.
(c) Zaid (April to June)	Fruits, Vegetables, Fodder, Pulses etc.

The following data show the area and production of main crops in the district during 1999-2000

Sl.No.	Crop	Area (in hectares)	Production (in toones)
1	Bajra	166	83
2	Jowar	12,241	15,064
3	Maize	8,080	8,308
4	What	1,030,111	318,006
5	Barley	695	1,627
6	Rice	8,799	26,392
7	Moong	945	1,259
8	Gram	6,991	10,247
9	Coriender	17,153	17,989
10	Soyabeen	72,979	94,516
11	Rape & Mustard	112,483	127,168

Source : Zila Sankhikiya Rooprekha, 2001.

Tenancy

Tenancy in the State is governed by the Rajasthan Tenancy Act, 1955. It is one of the most important and progressive laws relating to agrarian reforms. The provisions of the Act apply in respect of land held by tenants as if the State Government were the land holder acting through the Tehsildars. In relation to the land held by him, every cultivator is either a tenant or a sub-tenant or an allottee or a trespasser. A tenant is one who is required to pay some rent on account of use and occupation of land let out to him for agricultural or allied purposes. Grantee with a favourable rate of rent, ijardar, thekedar or trespasser is not considered a tenant.

There are following classes of tenants:

a) Khatedar tenants,

b) Maliks,

c) Tenant of Khudkasht, and

d) Gair-Khatedar tenants.

A Khatedar tenant is entitled to all the rights conferred and subject to all the liabilities imposed on Khatedar tenant by the Rajasthan Tenancy Act. On the date of coming into force of Rajasthan Tenancy Act, a Zamindar or a Biswedar holding Khudkasht was treated as a Khatedar tenant irrespective of whether he was or not in occupation on the date of vesting.

Malik is a Zamindar or Biswedar who has become Malik or Khudkasht land held by him on abolition of Zamindari and Biswedari in 1959. The word "Malik" was also added to section 14 of the Rajasthan Tenancy Act to classify it as a class of tenant. Section 13 of the Act provides that a Malik is entitled to all the rights conferred and is subject to all the liabilities imposed on Khatedar tenant and so in substance this class of tenancy is nothing but a Khatedar tenant.

As Zamindars and Biswedars holding Khudkasht were treated as Khatedar tenants. A tenant of khudkasht is essentially a sub-tenant in view of the fact that a sub-tenant is also eligible for protection of his cultivatory rights even against Khatedar tenant. Every tenant of land other than a Khatedar tenant, a tenant of Khudkasht or a sub-tenant is a Gair-Khatedar tenant.

A trespasser is a person who takes or retains possession of land without authority or who prevents another person from occupying land duly let out to him by the State. After regularisation, the trespasser becomes an allottee. An allottee is treated as a Ghair-Khatedar tenant on whom Sub-Divisional Officer shall suo-moto confer khatedari rights after ten years of allotment provided that the allottee fulfils all the terms and conditions of allotment during this period. Similar is the case of those allottees who were otherwise allotted land by the State Government.

Irrigation

During the years 1999-2000 the total irrigated area of the district was 229628 hectares which was irrigated by the following sources :

Sources	In hectares	Percentage
Area irrigated by canals	126,228	55
Area irrigated by Tanks	445	0
Area irrigated by wells & Tube wells	95,730	42
Area irrigated by other sources	7,295	3
Total irrigated area	**229,698**	**100**

Crop-wise irrigated area in the district during 1999-2000 was as follows :

Crops	In hectares
Food crops (other than Sugarcane)	115,179
Area irrigated under :	
(a) Surgarcane	30
(b) Other	114,489
Total	**229,698**

Source: Zila Sankhikiya Rooprekha, 2001.

The principal river is Chambal which has a pernnial flow. Its tributaries, namely, Parvati, Kali-Sindh and Parwan alongwith other rivulets provide an important source of canals irrigation and power supply to the district.

Animal Husbandry

According to livestock figures of 1997 collected during the livestock census, there were 1,81,407 buffaloes, 2,66,368 cows, 29,155 seep, 156,718 goats, 526 horses and ponies, 1,162 mules and donkeys, 3,332 camels and 15,779 pigs during the year 1999-2000. There were 27 veterinary hospitals, one poly clinic, 33 sub centres and 4 Gaushalas in the district.

Electricity

There is a State owned powerhouse with a installed capacity of 430000 KW at Kota. The following data pertains to consumption of electricity during the year 1999-2000 in the district.

Use	Consumption (in Kwh)
Domestic	145.35
Non-Domestic (Commercial)	36.78
Industrial :	
a) Small and Medium	76.12
b) Large	243.47
Public lighting	4.61
Public Water Works	25.44
Agriculture	55.19
Others	81.37
Total	**668.33**

During the year 1999-2000 there were 844 villages and 4 towns electrified.

Industries & Labour

During the years 1999-2000 there were 16 industrial areas in the district covering an area of 2237.42 acres. There are 5 large scale and 9 medium scale industries in Kota employing 32,514 persons. Together with it there are 6134 small scale and artisan units registered with District Industries Centre, Kota.

During the year 2000, there was 1 Employment Exchange at Kota. During the same year, 4,421 applicants were registered. The numbers of vacancies notified during the year were 209. At the end of the year, the names of 30,899 applicants were registered at the Employment Exchange, out of which the following was the distribution according to occupation:

1-	Professional, technical and related workers	405
2-	Administrative, Executive and Managerial workers	3
3-	Clerical and related workers	190
4-	Sale workers	-
5-	Farmers, fisherman, hunters, loggers and related workers	110
6-	Service, Sports & Entertainment workers	235

7-	Production and related workers, Transport equipment operator and labourers	30
8-	Workers not classified elsewhere	29926

Trade and Commerce

The main items of export are cereals, pulses, oil seeds, cotton and hides. The main items of import are salt, yarn, rice, sugar, gur, iron, and other metals. The important trade centers of the district are Kota, and Ramganj Mandi.

During the year 1999-2000 there were 34 offices of Regional Banks, 77 public sector Commercial Banks and 124 All Scheduled Commercial Banks in the district.

During the years 1999-2000 there were 155 shops of country made liquor, 38 shops of Indian made foreign liquor and 32 shops of drug hemps in the district and 9 cinema houses were also functioning the same year in the district.

Transport and Communication

The following was the road length in the district during 1999-2000.

National Highways	148.20 km.
Painted (B.T)	1379.29 km.
Metalled (W.B.M)	93.30 km
Graveled (G.R)	--
Fair weather & dressed up tracks	172.35 km
Total	**1893.14 km.**

Kota is a Railway junction on the Delhi-Jaipur-Bombay Broad gauge line. By road Kota is linked with National Highway No.12.

During the year 1999-2000 there were 209161 vehicles are registered in the district. The details is given below:

1-	Private cars and jeeps	13,732
2-	Motor cycles, tricycles and scooters	1,56,776
3-	Contract and Taxi Carriage	1,347
4-	Stage carriages	2,666
5-	Public and private carriers	10,482
6-	Tractors and Trailers	21,069
7-	Others	1,354

There were 196 post offices, 52 telegraph offices, 52 telephone exchanges, 41 public call offices STD/ PCO 614 and 542 letter boxes in the district during the years 1999-2000.

Gram Panchayats composition & its role

The system of Panchayati Raj was inaugurated on 2nd October 1959 in Nagaur district by than Prime Minister Late Shri Jawahar Lal Nehru. Late Shri Balwant Rai Mehta proposed the recommendation for Panchayati Raj. There are three levels of Panchayati Raj:

(1) Gram Panchayat (Village level)

(2) Panchayat Samiti (Block level)

(3) Zila Parishad (District level)

Gram Panchayat is an important institution of self-government. The institution is set for a village or village agglomeration. A Gram Panchayat is created on 2,000-8,000 population. It covers a maximum area of 6 miles. The villages, which have population below 2,000, are merged with the other villages to create a Gram Panchayat. Their tenure is of 5 years.

A Gram Panchayat consist 5 to 20 members. The Head of the Panchayat is called Sarpanch. Panch and Up-Sarpanchs are also elected. It includes a member belongs to backward class and a lady member. There are 151 Gram Panchayats in the district.

The main objectives of Gram Panchayat are to arrange the primary education, sanitation of public places, drinking water and light. It manages also the adult education, livestock and repairing of wells.

During the last years, Gram Panchayats functioned several important jobs like *Kam Ke Badley Anaj*, Construction of Panchayat Ghar, School buildings, roads and tanks. It organizes also the cattle fare. Gram Panchayat plays an important role in the development of village and its economy.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible

that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used

for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house, but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts

were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1. Adi Dharmi
2. Aheri
3. Badi

4. Bagri, Bagdi
5. Bairwa, Berwa
6. Bajgar
7. Balai
8. Bansphor, Bansphod
9. Baori
10. Bargi, Vargi, Birgi
11. Bawaria
12. Bedia, Beria
13. Bhand
14. Bhangi, Chura, Mehtar, Olgana, Rukhi Malkana, Halalkhor, Lalbegi, Balmiki, Valmiki, Korar, Zadmalli
15. Bidakia
16. Bola
17. Chamar, Bhambhi, Bambhi, Bhambi Jatia, Jatav, Jatava,Mochi, Raidas, Rohidas, Regar, Raigar, Ramdasia, Asadaru, Asodi, Chamadia, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Telegu Mochi, Kamati Mochi, Ranigar, Rohit, Samgar
18. Chandal
19. Dabgar
20. Dhanak, Dhanuk
21. Dhankia
22. Dhobi
23. Dholi
24. Dome, Dom
25. Gandia
26. Garancha, Gancha
27. Garo, Garura, Gurda, Garoda
28. Gavaria
29. Godhi
30. Jingar
31. Kalbelia, Sapera
32. Kamad, Kamadia
33. Kanjar, Kunjar
34. Kapadia, Sansi
35. Khangar
36. Khatik
37. Koli, Kori
38. Kooch Band, Kuchband
39. Koria
40. Madari, Bazigar
41. Mahar, Taral, Dhegumegu
42. Mahyavanshi, Dhed, Dheda, Vankar, Maru, Vankar
43. Majhabi
44. Mang, Matang, Minimadig
45. Mang, Garodi, Mang Garudi
46. Megh, Meghval, Meghwal, Menghvar
47. Mehar
48. Nat, Nut
49. Pasi
50. Rawal
51. Salvi
52. Sansi
53. Santia, Satia
54. Sarbhangi
55. Sargara
56. Singiwala
57. Thori, Nayak
58. Tirgar, Tirbanda
59. Turi

Scheduled Tribes

1. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawara, Vasava, Vasave
2. Bhil Mina
3. Damor, Damaria
4. Dhanka, Tadvi, Tataria, Valvi
5. Garasia (excluding Rajput Garasia)
6. Kathodi, Katkari, Dhor Kathodi, Dhor, Katkari Son Kathodi, Son Katkari
7. Kokna, Kokni, Kukna
8. Koli Dhor, Tokre Koli, Kolcha, Kolgha
9. Mina
10. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
11. Patelia
12. Seharia, Sehria, Sahariya

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language

spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main-worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any econom ically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the

cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water

closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types— (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration) (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal

migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding - Population, its distribution

According to the 2001 census, the total population of Kota district is 1,568,525 comprising 827,128 males and 741,397 females and constituting 2.8 percent of State population and area spread over 1.5 per cent in the 5 tehsils of the district, Ladpura tehsil is most populous tehsil having population 868,213 while Digod is the smallest tehsils having a population of 150,587 persons. Other tehsils in order of their population size are Ramganj Mandi (228,479), Sangod (165,600) and Pipalda (155,646).

Out of the total population of the district 46.5 per cent lives in rural areas while 53.5 per cent lives in urban areas. The corresponding proportions in rural and urban areas of the State are 76.6 per cent and 23.4 per cent respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF TEHSILS BY RESIDENCE, 1991-2001

Sl. No.	District/Tehsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Pipalda	127,120	127,120	0	155,646	155,646	0	22.4	22.4	0.0	0.0	0.0
2	Digod	123,824	123,824	0	150,587	150,587	0	21.6	21.6	0.0	0.0	0.0
3	Ladpura	663,013	109,602	553,411	868,213	144,691	723,522	30.9	32.0	30.7	83.5	83.3
4	Ramganj Mandi	168,360	120,614	47,746	228,479	132,073	96,406	35.7	9.5	101.9	28.4	42.2
5	Sangod	138,188	122,585	15,603	165,600	146,951	18,649	19.8	19.9	19.5	11.3	11.3
	District Total	**1,220,505**	**603,745**	**616,760**	**1,568,525**	**729,948**	**838,577**	**28.5**	**20.9**	**36.0**	**50.5**	**53.5**

The district has registered a percentage decadal variation of 28.5 during the decade 1991-2001. The urban areas of the district has attained a higher decadal variation of 36.0 per cent as compared to that of rural area at 20.9 per cent. At tehsil level, it varies from the lowest of 19.8 per cent in Sangod tehsil to a maximum of 35.7 per cent in Ramganj Mandi tehsil in total areas.

There is a increase in the percentage of urban population to total population from 50.5 in 1991 to 53.5 in 2001. Only Ladpura Tehsil has registered the increase of percentage from 1991 to 2001, while Ramganj Mandi and Sangod tehsils have declined the urban population from 1991 to 2001.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District/Panchayat Samiti	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

1	Itawa	14,405	13,211	1 (0.6)	4,240	3,739	1 (0.6)	10,554	9,417
2	Sultanpur	24,829	22,473	0 (0.0)	0	0	1 (0.6)	7,030	6,312
3	Ladpura	17,043	15,566	1 (0.7)	3,265	2,904	1 (0.7)	8,677	7,496
4	Khairabad	13,680	12,050	2 (1.4)	8,116	7,258	0 (0.0)	0	0
5	Sangod	10,767	10,008	2 (1.0)	6,676	6,220	0 (0.0)	0	0
	Districts (Rural) Total	**80,724**	**73,308**	**6 (0.7)**	**22,297**	**20,121**	**3 (0.4)**	**26,261**	**23,225**

Of the total 892 villages, 812 are inhabited villages. Sangod Panchayat Samiti has the highest number of villages i.e. 197 where as Khairabad Panchayat Samiti with lowest of 144 villages. Itawa Panchayat Samiti is the most populous with 155646 persons while Khairabad is the least populous Panchayat Samiti with a population of 132073 persons. The maximum number of villages i.e.264 are those which lie in the population range of 500 - 999. It is followed by 32.4 per cent of the inhabited villages, which have population range of 200-499. As regards to large size villages in the district, 6 are such which lie in the population range of 5000-9999 and 3 are such which have population more than 10000. In case of small size villages i.e. having population less than 200, such villages are 73 in number in the district.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

		Name of Towns
(a)	**New**	
	(i) Statutory town	Nil
	(ii) Census town	1. Sogaria 2. Chechat 3. Modak 4. Kumbhkot
(b)	**Denotified**	
	(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
	(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
	(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c)	**Declassified***	Nil
(d)	**Wholly merged with other town (s)**	Nil

* Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Four new census towns namely sagaria, Chechat, Modak and Kumbhkot has emerged in the district.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	15	1.8	413	0.1
11-20	8	1.0	1,351	0.2
21-50	51	6.3	18,746	2.6
51-100	130	16.0	62,780	8.6

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
101-200	382	47.0	291,415	39.9
201-300	121	14.9	147,976	20.3
301-500	67	8.3	97,628	13.4
501 +	38	4.7	109,639	15.0
Not known	0	0.0	0	0.0
District Total	**812**	**100.0**	**729,948**	**100.0**
Population Density (Rural) of the district:		158.5		

The density of population of the rural areas of the district is 158.5. Of the total number of inhabited villages i.e. 812 in the district, 47.0 per cent have population density ranging from 101 to 200, followed by 16.0 per cent in the range of 51 - 200. Apart from these 74 villages have population density upto 50.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	905	898	947	940	942	931
1911	908	904	936	937	937	942
1921	896	896	897	926	931	894
1931	907	906	903	931	939	885
1941	906	907	897	919	929	871
1951	921	919	928	926	937	890
1961	908	913	882	884	908	828
1971	911	919	875	873	905	818
1981	919	930	877	877	904	845
1991	910	919	879	881	893	869
2001	**921**	**930**	**890**	**896**	**908**	**886**

Note: Sex ratio has been defined here as the number of females per 1000 males.

The district has witnessed a fluctuating trend in sex ratio since 1901. From 940 in 1901 it declined to 937 in 1911. It again declined to 926 in 1921 and increased to 931 in 1931 and so forth. During the last decade i.e. 1991-2001 it has increased from 881 in 1991 to 896 in 2001.

In comparison to urban areas of the district the sex ratio in rural areas has been higher upto 2001 and district has registered higher sex ratio as compared to that of state since 1901 to 1951.

TABLE 6 : SEX RATIO BY TEHSILS, 2001

Sl. No.	Name of Tehsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Pipalda	906	906	?????
2	Digod	913	913	?????
3	Ladpura	889	903	886
4	Ramganj Mandi	895	905	882
5	Sangod	916	916	915
	District Total	**896**	**908**	**886**

The district has registered a sex ratio of 896 in 2001. Where as for rural and urban areas it is 908 and 886 respectively. At the tehsil level, the highest sex ratio of 916 has been registered by Sangod tehsil and the lowest of 889 by Ladpura tehsil for total and rural areas. In case of urban areas the highest sex ratio of 915 has been attained by again Sangod tehsil and the lowest of 882 by Ramganj Mandi tehsil.

TABLE 7 : SEX RATIO BY PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Sex ratio
1	2	3
1	Itawa	906
2	Sultanpur	913
3	Ladpura	903
4	Khairabad	905
5	Sangod	916
	District (Rural) Total	**908**

At the Panchayat Samiti level (Panchayat Samiti) the pattern is just the same as analyzed for rural areas of tehsil in Table 6 because all the C.D. blocks (Panchayat Samities) are co-terminus with their respective tehsils.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	13	1.6	2,141	0.3
700-749	12	1.5	4,455	0.6
750-799	27	3.3	8,888	1.2
800-849	99	12.2	55,486	7.6
850-899	196	24.1	256,334	35.1
900-949	249	30.7	258,765	35.4
950-999	137	16.9	107,111	14.7
1000-1099	67	8.3	35,053	4.8
1100+	12	1.5	1,715	0.2
District Total	**812**	**100.0**	**729,948**	**100.0**
Sex ratio (Rural) for District		908.0		

Of the total number of inhabited villages (812), the maximum number of 249 villages have sex ratio ranging from 900 to 949 followed by 196 (24.1 per cent) having sex ratio in the range 850 - 899. It is significant to note that only 79 villages are such which have sex ratio favourable to female's i.e. 1000 or more in the district.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Sl. No.	Name of U.A.^/ Town*	Urban status of town	Sex ratio
1	2	3	4
1	Chechat	CT	890
2	Kaithoon	M	924
3	Kota	UA	885

		Urban	**121,101**	**63,711**	**57,390**	**901**

The district has registered a sex ratio in the population of the age group 0-6 of 912, 922 and 901 for the total, rural and urban areas respectively. In rural areas at tehsil level, the highest sex ratio of 942 has been registered by pipalda tehsil and the lowest of 906 by Sangod tehsil. Similarly in the urban areas of tehsils, the highest sex ratio has been registered by Sangod tehsil at 939 and the lowest by Ramganj Mandi tehsil at 897.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Total population in 0-6 age group			Sex ratio for 0-6 age group

31-40	95	11.7	30,511	19.2
41-50	32	3.9	8,868	5.6
51-75	25	3.1	9,394	5.9
76 and above	12	1.5	2,181	1.4
District Total	**812**	**100.0**	**158,891**	**100.0**

Of the total 812 inhabited villages in the district, 95 villages are such where no scheduled castes population exists. The maximum number of villages i.e. 205 which accounts 25.2 per cent of the total inhabited villages have scheduled caste population in the range of 11 to 20 per cent to their total population followed by 183 villages in the range of 21 to 30 per cent. On the higher side, 25 and 12 villages have scheduled castes population ranging from 51 to 75 and 76 and above respectively.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	199	24.5	0	0.0
Less than 5	126	15.5	3,624	3.1
5-10	82	10.1	10,007	8.5
11-20	82	10.1	13,909	11.8

In the district, 34.5 per cent of the total population comprises of total workers (main + marginal) and the rest 65.5 per cent as non-workers. Of the total workers (34.5 percent), 26.8 per cent are as main workers and the rest 7.7 per cent as marginal workers. Sex wise, 48.0 per cent of male population is that of workers whereas for females this percentage is 19.4. At the tehsil level, Ramganj Mandi tehsil has recorded the highest percentage of total workers for males being 50.7 per cent and for females 34.1 per cent. On the other hand, Ladpura tehsil has recorded the lowest percentage of total workers both for males and females being 46.7 per cent and 11.8 per cent respectively.

More than half of the rural population consists of workers i.e. 40.9 per cent. There is little difference in the work participation rates of males and females being 49.9 per cent and 31.0 per cent respectively for the rural areas of the district. Like at tehsil level, at Panchayat Samiti level too, the highest percentage of male workers has been recorded in Khairabad Panchayat Samiti at 52.1 and 37.2 per cent for females in Sangod Panchayat Samiti. However, the lowest percentages have been registered by Itawa Panchayat Samiti at 49.0 for males and 25.9 per cent for females in Ladpura panchayat samiti.

\+ To be arranged in alphabetical order.
^ The names of constituent units of U.A. are given seprately.
* In case of towns having outgrowth an astrrisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

In contrast to the rural areas of the district only 29.0 per cent of the urban population are as workers (main + marginal). Apart from this much variation is also seen in the percentage of male and female workers, which are 46.5 and 9.2 respectively. Among the towns, the percentage of workers varies from 36.7 in Kumbhkot (CT) to 28.2 in Sangod (M).

Note: Percentage of workers to total workers are given in brackets.

Other workers are the main working force in the district as they form 54.8 per cent of total workers. It is followed by cultivators (26.6 per cent), agricultural labourers (15.0 per cent) etc. Much variations in the percentages of male workers (64.2) and female workers (28.8) classified as other workers is seen in the district.

At tehsil level, the percentage of cultivators to total workers varies from 53.3 in Pipalda tehsil followed by 52.5 in Sangod tehsil to 8.8 in Ladpura tehsil. For Household Industry workers, it varies from 5.1 per cent in Ladpura tehsil to 1.9 per cent in Digod tehsil. In case of 'other workers' the highest percentage of 80.3 has been registered by Ladpura tehsil while the lowest of 17.1 per cent in Pipalda and Digod tehsil respectively.

Note: Percentage of workers to total workers are given in brackets.

40.9 per cent of the total rural population of the district is engaged in economic activities being workers. Of the total workers, most are engaged in agricultural activities i.e. 46.5 per cent are as cultivators and 25.8 per cent as agricultural labourers. Only 2.5 per cent of the workers are engaged in household industries whereas the significantly 25.3 per cent in other works.

It has been observed that the Ladpura and Khairabad panchayat samities percentage of other workers is Higher than that of workers engaged as agricultural labourers.

Sex wise, percentage of male workers is higher in all the four economic categories except Agricultural labors where their percentage is 17.0 as compared to that of females at 41.4 at the district level.

\+ To be arranged in alphabetical order.

^ The names of constituent units of U.A.are given separately.

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

The percentage of workers to total population of urban areas is significantly quite low being only 29.0 per cent as compared to that of rural areas of the district being 40.9 per cent. Here too, the percentage of workers engaged in four economic categories is just the reverse as compared to rural workers where majority i.e. 91.0 per cent of the total urban workers are as 'other workers' followed by 5.0 and 2.2 per

cent as household industry and cultivators workers respectively.

Almost similar trend is visible in all the municipal towns except in Sogariya (CT), Suket (M) and Sangod (CT) where the percentage of household industry workers is higher than that of agricultural labourers and cultivators.

Sex wise percentage of male workers as other workers is higher than that of female other workers being 93.4 and 77.7 per cent respectively. On the other hand, percentage of female cultivators (3.5 per cent) is much higher than that of male cultivator's (2.0) at the district level for urban areas.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total (812) inhabited villages, 720 (88.7 per cent) have educational facilities. In case of medical amenities only 27.7 per cent of inhabited villages have such amenities. A significant number i.e. 800 (98.5 per cent) villages have improved drinking water amenities. In the communication field only 18.1 per cent of villages have post office facilities while 42.2 per cent have telephone facilities. In the banking field the picture is gloomy as only 43 (5.3 per cent) villages have banks. More than 50 per cent i.e. (416) are linked with pucca approach roads whereas 90.6 per cent have power supply.

At tehsil level, tehsil have the higher percentage i.e. 91.4 of villages having educational facilities. For medical amenities it is Sultanpur tehsil, which have highest percentage of 36.8. Much variation is seen among the tehsils having telephone facilities. Ladpura tehsil has the highest percentage of villages i.e. 59.3, which have telephone facilities whereas Itawa has the minimum percentage of 27.0 for such facility. Sangod tehsil has the 98.0 percent villages having power supply.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

97.7 per cent rural population of the district is being served by educational amenities. It varies from 98.4 per cent in Sultanpur and Khairabad Panchayat Samities to 96.3 per cent in Itawa Panchayat Samiti. The highest percentage (64.8) of population availing medical amenities has been found in Sultanpur Panchayat Samiti while lowest of 46.3 in Sangod Panchayat Samiti. All the Panchayat Samities has almost cent percent of the population has access to improved drinking water Ladpura Panchayat Samiti is in the forefront in the field by telephone facilities where 78.5 per cent of the population has been served by this facility while Sultanpur Panchayat Samiti is at bottom with 54.2 per cent. Only 23.8 per cent of the rural population is being served with banking facilities whereas 96.9 per cent have access to power supply. 99.9 percent of the population of Khairabad Panchayat Samiti is being served with power supply.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education				
(a) Primary School	84	11	2	97
(b) Middle School	407	152	30	589
(c) Degree College	16	59	736	811
2. Medical				
(a) Hospital	10	44	758	812
(b) PHC	130	184	476	790
3. Post Office	388	213	64	665
4. Telephone	187	116	166	469
5. Bus Service	268	223	139	630
6. Banks				
(a) Commercial Bank	222	293	260	775
(b) Cooperative Bank	92	184	519	795
7. Agricultural Credit Societies	304	194	201	699

There are only 97 villages in the district, which do not have primary schools, of these, in 84 villages this amenity is available in less than 5 kilometers. In case of middle schools, 589 villages do not have this amenity. Of these, for 407 villages this amenity is available at a distance of less than 5 km, for 152 villages at a distance of 5-10 km. None of the villages in the district have a degree college. For most of the villages i.e. 736, the degree colleges are available at a distance beyond 10 km.

Likewise, none of the villages have hospitals. For this in most of the villages i.e. 293 one has to go for more than 5 to10 km. Similarly post office amenity is not available to 665 villages. Of these, for 388 villages, this amenity is available at a distance less than 5 km. Of the total 812 villages, Bus services are not available in 630 villages. Among these, this facility is available at a distance of less than 5 km and 5 to 10 km for 268 and 223 villages respectively.

As regards to banking services, 775 and 795 villages do not have commercial banks and cooperative banks respectively. For most of the villages i.e. 260 and 519 one has to go for more than 10 km for commercial banks and cooperative banks respectively.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

$ Transport communication includes bus service, rail facility and navigable waterways.
* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Of the total inhabited village's (812),majority (336) of them have population range of 1 - 499. It is followed by 264 villages in the range of 500-999. There are 6 and 3 such villages, which have population range of 5000-9999 and 10000+ respectively.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of Panchayat Samiti	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Itawa	163	88,676	73.4	79.2
2	Sultanpur	163	89,073	70.9	86.3
3	Ladpura	145	115,646	31.5	76.8
4	Khairabad	144	67,056	57.1	37.1
5	Sangod	197	100,177	65.2	74.8
	District Total	**812**	**460,628**	**58.2**	**73.5**

Note : Cultivable area = irrigated area + unirrigated area

Of the total rural area of the district (of inhabited villages) 58.2 per cent is cultivable. Apart from this 73.5 per cent of the total cultivable area is being irrigated. At the panchayat samiti level the highest percentage of cultivable area to total area is found at 73.4 per cent in Itawa Panchayat Samiti followed by 70.9 per cent in Sultanpur and the lowest of 31.5 per cent each in Ladpura Panchayat Samiti. As regards to irrigated area, the highest percentage of 86.3 is found in Sultanpur Panchayat Samiti and the lowest of 37.1 per cent in Khairabad Panchayat Samiti.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name and urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)

	District Total	**519.0**	**373.0**	**146.0**	**437.0**	**32.0**	**166.0**	**109.0**	**4.0**	**126.0**

+ To be arranged in alphabetical order
Town has to exclude OG's.

The per capita receipt by the statutory towns of the district amounts to Rs.51.9. Of this, Rs.37.3 is being received through taxes and the remaining Rs.14.6 from all other sources. The highest per capita of Rs.64.3 has been attained by Ramganj Mandi (M) followed by Rs.52.6 by Kota (M. Cop.). The lowest per capita receipt of Rs.24.4 has been registered by Kaithoon (M).

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary/ Middle	Secondary/ Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Kaithoon (M)	1.5	0.5	1.0	1	0.0
2	Kota (M.Corp)	4	2.7	1.6	0.8	0.2
3	Ramganj Mandi (M)	5.5	0.6	0.6	0.6	0.3
4	Sangod (M)	7	5.9	1.1	1.1	0.0
	District Total	**4.1**	**2.6**	**1.5**	**0.8**	**0.1**

The number of primary, middle and secondary schools per 10000 of population is 4.1, 2.6 and 1.5 respectively. As regards to senior secondary and college, this number is 0.8 and 0.1 respectively. At the town level, the maximum number of primary schools per 10000 population is found in Sangod (M) at 7.0 followed by Ramganj Mandi (5.5). It varies from the highest number of middle schools per 10000 populations at 5.9 in Sangod (M) to a lowest of 0.5 in Kaithoon (M). As regards to colleges, the highest number i.e. 0.3 is found in Ramganj Mandi (M), whereas the number '0' has been recorded in Kaithoon and Sangod (M).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

(i) Improved drinking water : Majority of the households i.e. 94.1 per cent have drinking water facility in the district. For rural and urban areas, these percentages are 90.4 and 97.2 respectively. At tehsil level, for rural areas, the highest percentage (95.8) of households availing this facility has been found in Digod tehsil whereas for urban areas it is 98.6 per cent in Ladpura tehsil.

(ii) Electricity : A little less than 80 per cent i.e. 82.2 per cent of households are using electricity.

However there is very little gap in the percentage of households using electricity in the rural (67.7 per cent) and urban (94.7 per cent) areas of the district. At tehsil level it varies from a maximum of 92.3 per cent to a minimum of 57.3 per cent of households using electricity.

(iii) Bathroom : only 42.0 per cent of the households have bathrooms in the district. Here too much wider gap is seen in the percentage of households having bathroom in rural and urban areas, as these are 11.5 per cent and 68.0 per cent respectively. Similar trend is seen in all the tehsils of the district.

(iv) Toilet : In case of toilets, the picture is not so good especially in rural areas of the district. Only 11.1 per cent of households of the rural areas have toilet facility as against 72.1 per cent in the urban areas. The highest percentage (67.7) of households having toilet facility is found in Ladpura tehsil whereas the lowest of 10.10 per cent in Pipalda tehsil.

(v) Drainage : In case of usage of drainage, the position is good, there are 62.5 of households have drainage in their houses. In rural areas the position is also satisfactory, where only 35.3 per cent of households have drainage system as against 85.7 per cent in urban areas.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Majority of the households (36.3 per cent) of the district is using firewood as fuel followed by cooking gas (28.9 per cent), kerosene (14.5 per cent), and crop residual (3.1 per cent). In the rural and urban areas of the district, much deviation is seen in the percentage of households using fire wood and cooking gas as 55.9 per cent and 4.0 per cent of households of rural areas are using these respectively in comparison of 19.67 per cent and 50.13 per cent of urban areas respectively. Similar trend is seen at tehsil level also.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source: Census of India 2001.H-Series:" Tables on Houses, Household amenities and Assests"

(i) Banking services : Only 36.4 per cent of the total household's (273158) are availing Banking services whereas in rural and urban areas this percentage is 25.3 and 45.9 respectively. At tehsil level, the highest number of households (66008) availing this facility has been found in Ladpura tehsil, while the lowest (6864) in Pipalda tehsil.

(ii) Radio/Transistor : Of the total household's (273158) of the district, 34.3 per cent are in possession of Radio/Transistor. Similarly in rural and urban areas of the district, the percentage of households having radio/transistor is 27.3 and 40.2 per cent respectively.

(iii) Television : In case of Television, the percentage of households possessing it is much higher i.e. 76.2 in urban areas than that of in rural areas at 38.00 per cent only.

(iv) Telephone : Only 13.7 per cent of the total household's (273158) of the district have telephones. The gap is much wider in rural and urban areas of the district where 3.6 per cent and 22.4 per cent of their respective total households have telephones respectively.

(v) Auto mobiles : In case of two wheelers, only 26.4 per cent of the households have either motor cycle or scooter or moped. For rural and urban areas these percentage are 12.5 and 38.3 respectively. The picture is somewhat better in case of rural areas where 1.7 per cent have four wheelers in comparison to two wheelers. In urban areas only 5.3 per cent of households have four wheelers.

There are 22.8 per cent household do not have any of the specified assets. In rural areas this percentage is even higher i.e. 35.3 as compared to that of in urban areas at 12.1.

(xi) Other Developmental Activities during 1999-2000:

The District Rural Development Agency (DRDA) is responsible for planning, co-ordinating, monitoring and reviewing progress under various development schemes like Integrated Rural Development Programme (IRDP), Training of youth for self-employment (TRYSEM), Community Lift irrigation scheme, Jawahar Rojgar Yojna, Ravine Reclaimation Programme (RRP) and other Massive Scheme. Under the Intergrated Rural Development Programme, a systematic approach has been adopted through identification of families who are below poverty line.

A Multi Functional Authority known as Command Area Development for Chambal consists of main four functionaries Irrigation, on Farm Development, Agricultural Extension and Agricultural Research.

Under this Programme, not only improvement of land is done but facility for effective management of soil and water is made possible. In the total area of 229 thousand hectares on Farm Development Programme is envisaged in about 167 thousand hectares of land.

The district occupies a prominent place in the field of atomic and thermal power in the State. Chambal project is one of the major irrigation and power projects located partly in Rajasthan and partly in Madhya Pradesh. The project consists of three dams out of which two- Jawahar Sagar and Rana Pratap Sagar dams are in Rajasthan. Kota Barrage is located at Kota, which regulates canal systems. Gopalpura project is another important irrigation project in the district.

Various scheme for the benefit of small farmers, agricultural labourers, low income and unemployed rural masses have been undertaken by the Small Famrers Development Agency in the district. Some details of other developmental activities are given below:

1. Swarn Jayanti Gram Swaraj Yojana

Under this scheme during the year 1999-2000 1354 below poverty line families have benefitted for self employment and Rs.483.19 Lac have been distributed among the families.

2. Jawahar Gram Smradhi Yojana

During the year 1999-2000 under this scheme 955 work have been completed. An amount of Rs.332.65 Lac were spent and 3.83 Lac mandays were created.

3. Indira Avas Yojana

Under this scheme, 1196 houses were constructed and an amount of Rs.136.44 Lac were spent during the year 1999-2000.

4. Sansad Kshetriya Vikas Yojana

Under this scheme 182 work have been completed and amount of Rs. 460.38 Lac were spent during the year 1999-2000.

5. Battis Zile Battis Kam

Under this scheme 35 works have been completed and an amount of Rs.54.06 Lac were spent during the year 1999-2000.

Social and Cultural Activities

Fairs and Festivals

Like other parts of the State, fairs held in Kota district are either religious or social in nature. Many of these are of commercial importance and are held on fixed dates. Important among the fairs are Sita Bari, Mataji, Phalodi Mata, Shivratri, Dussehra, Dudhiya Kheri Mata, Dole, Nahan, Akshya, Mithe Sahib, Balaji, Ramnavmi and Tejaji, each of which enjoys an estimated congregation of 5000 and more people. These fairs are described below one by one.

(1) Phalodi Mata

The fair is held on Magha Sudi 5 at a place called Khairabad in Ramganj Mandi Tehsil. Around 15000 members of different communities gather at this place during the fair.

(2) Shivratri

This fair is held at Kakrawada from Phalgun Badi 13 in Pipalda tehsil. It is a religious-cum-commercial fair lasting for a period of 8 days. The average congregation at this fair is estimated at 10000.

(3) Dussehra

Taking place from Ashvina Sudi 5 to Kartika Badi 15, the fair is religious-cum-commercial in character. It is held at a place known as Kishorepura in Ladpura tehsil where about 10000 people of all communities gather.

(4) Dudhiya Kheri Mata

The fair takes place on Magha Sudi 7 at Goojariyaheri in Sangod tehsil. It is religious in nature. Around 10000 people take part in the fair.

(5) Nahan

Held from Chaitra Badi 3 to 7 for entertainment purpose, the fair is celebrated at Sangod proper in the same tehsil. Its estimated congregation is 10000 comprising of members belonging to all communities.

(6) Akshya

Organised in Pipalda tehsil at a place known as Ayana, the fair is religious in nature. It takes place on Vaisakha Sudi 3 and is visited by around 6000 people belonging to various communities.

(7) Ramnavmi

The fair is held on Chaitra Sudi 9 at Kanwas proper in Sangod tehsil. The average congregation of Hindus, the principal community taking part in it, is 5000.

As in the case of other districts of the State, Raksha Bandhan, Janmasthami, Dussehra, Diwali and Holi comprise the important Hindu festivals, Principal among the Muslim festivals are Idul-fitr and Idul-Zuha, Mahavir jayanti, Paryusan and Samwatsari festival are observed by the Jains.

(xii) Brief description of places of religious, historical or archaeological importance in village and places of tourist interest in the towns of the district

There are numerous places of religious, historical and tourist interest in the district, such as, Chechat, Darah Games Sanctuary, Digod, Itawa, Kaithoon, Kota, Pipalda Kalan, Ramganj Mandi, Sangod, Sultanpur etc. some of these are described below:

Darah Games Sanctuary

From the district headquarter City of Kota, the Darah Games Sanctuary is 50 km away in the Mukandara range of hills. It is rich in wild fauna and is visited by people from different parts of the country.

Kota

It is the district headquarters situated on the banks of river Chambal. The city is enclosed by huge bastioned wall, which have six massive double gates. There are a number of worth seeing places in the city. These include the Garh (fort), Dad Devi temple, Kansuwa temple and Shiva temple. People visited from neighbouring villages during Dussehra when a big fair is held.

(xiii) Scope of Village and Town Directory

In Part-A of the District Census Handbook, entitled as Village and Town Directory, an attempt has been made to present information regarding various amenities/facilities available in every rural/ urban unit of the State. The unit of the rural areas is village and that of urban area is town/urban agglomeration. Information regarding rural areas and Census Towns has been gathered through Patwaries while that in respect of urban areas other than Census Towns has been collected through the concerned municipality/Cantonment Board/Notified Area Committee. In order to have the aforesaid information authenticated the concerned departments and agencies were also contacted to furnish information available with them. All the information gathered about amenities relate to year 1999 and those pertaining to land-use pattern pertain to Samvat Year 2055 i.e. the agricultural year ending on the 30th June, 1999.

Village Directory

It will be helpful at the outset to have an idea of the items for which information has been included in the Village Directory. Information in respect of each village has been presented through a twenty three column format in which villages have been presented in order of their names and Permanent Location code Number (PLCN) at State level. The first four columns (2-5) give general information i.e. Name of village and Permanent location code number, area in hectares, population and number of households residing in villages as per Census 2001.The amenities available in the village have been shown in columns 6-18. The information regarding land-use pattern has been given in columns 19-23. As a special feature for Census-2001 some new columns 10-12 and 17-18 are first time incorporated viz. commercial and cooperative Bank, Agricultural/non Agricultural and other credit societies, Recreational and cultural facilities, News Paper/Magazine and most important commodity manufactured in the village. In case of uninhabited villages, the information has been given relating to columns 1-3 and 19-23 only and in the remaining columns the word 'uninhabited' has been mentioned. At the end of entries of each Panchayat Samiti the totals relating to columns 3-11, 13-14, 16-17,19 and 21-23 (total area, amenities and land-use break-up) have also been given.

Various amenities like drinking water, communication, post and telegraphs etc. have been shown against the name of the referent village if they are available within the village with the help of various codes. The Code Structure relating to various columns has been given in the beginning of Section-I to Part-A of this book. The number of each type of amenity has been indicated in parentheses after the suitable code in case of educational, medical and post & telegraph facilities.

If any amenity is not available within the village a dash (-) has been shown in the relevant column and next to it, the distance of the nearest place from the referent village where the facility is available has been given in broad distance ranges viz. <5 km, 5-10 km & 10+ km.

The following pattern has been adopted for indicating the educational institutions:

(i) Schools up to Class V have been treated as primary schools. They include Nursery Schools, Kindegarten Schools, Pre-basic and Pre-primary Schools and Junior Basic Schools upto Class V.

(ii) All schools having Classes VI to VIII have been treated as Middle Schools.

(iii) All schools having Classes IX and X have been treated as Secondary Schools.

(iv) All schools having Classes XI and XII have been treated as Higher Secondary Schools. They include Senior Cambridge Schools, Schools under 10+2 scheme, Intermediate, Pre-University and Junior College etc.

In case of composite schools relevant groups of classes have been treated separately, e.g. a school having classes I to XII, has been shown as having one primary, one middle, one secondary and one higher secondary school. The term 'College' includes all types of colleges whether Arts/Science/Commerce/ Medical/Engineering/Agriculture and others imparting education at Graduate or Post-Graduate level. Institutions other than industrial schools, training schools and adult literacy classes/ centres have been shown under 'others'.

In case of Medical institutions, Hospitals and

Dispensaries, Allopathic, Ayurvedic, Unani and Homeopathy have been shown separately. Other institutions include all types of Yogic, Naturopathy, Hospitals/Dispensaries, Leprosy Centres etc.

In case there are more than one source of drinking water facility available in the village all such sources have been shown separately. Postal amenities include Post Office, Telegraph Office and Telephone, which are shown separately.

In case there are more than one communication facilities these have been indicated separately by relevant codes. Approach to the village refers to the state of roads etc. leading to the village from the communication centres i.e. bus-stand/railway station etc. This is to give an idea whether the village is easily approachable in all types of weather or becomes inaccessible for sometime in the year. Where there are more than one approach roads these have been indicated separately by relevant codes.

Information regarding the nearest town indicates the name of such town along with the distance from the referent village irrespective of the fact whether such town is located within Rajasthan or in some other adjoining states. In case of town situated in states other than Rajasthan, the concerned State has been mentioned against its name in parentheses with the help of abbreviations. The term 'town' here refers to one of those urban centres, which have been treated, as towns in the concerned state during 2001 Census.

In order to give an idea about the uses which electricity is put to, the information has been given under the head "power supply" if it is available in the village.

Land-Use Pattern

The land-use pattern has been presented under the following five headings:

I. Forest

It denotes those lands, which have been termed as 'forest' by the competent authority.

II. Irrigated land

It relates to land, which has actually been irrigated in the referent year. The source-wise break-up has not been presented, as no such information was available in respect of the net irrigated area.

III. Unirrigated land

The term covers all the unirrigated land cultivated during the referent year and land lying fallow upto four years.

IV. Culturable waste

It includes Gaucher i.e. pasture and grazing land and tree-groves.

V. Area not available for cultivation

It refers to land, which has not been classified in any of the above mentioned types and also includes house sites, roads, rivers, nullahs, hillocks etc.

The following nine appendices have also been provided to present the position obtaining in Panchayat Samiti and district as a whole regarding various Amenities available in rural areas, villages classified by characteristics of the population and land-use pattern in Census Town in connection with the Village Directory:

(i) Panchayat Samiti wise Abstract of educational, medical and other amenities in villages.

  (a) Villages by number of Primary schools.

  (b) Villages by number of Primary, Middle and Secondary schools.

  (c) Villages with different sources of drinking water facilities available.

(ii) Villages with 5000 and above population, which do not have one or more amenities.

  (a) Census towns which do not have one or more amenities.

(iii) Land utilisation data in respect of Census Town.

(iv) Panchayat Samiti wise lists of inhabited villages where no amenity other than drinking water facility is available.

(v) Summary showing number of villages not having Scheduled Castes population.

(vi) Summary showing number of villages not having Scheduled Tribes population.

(vii) Panchayat Samiti wise list of villages according to the proportion of Scheduled Castes/ Scheduled

Tribes population to total population by ranges. It consists of two parts: Part-A relates to Scheduled Castes and Part-B to Scheduled Tribes.

(viii) Panchayat Samiti wise number of villages under each Gram Panchayat.

(ix) Statement showing number of girl's schools in the villages.

Town Directory

Particulars about each town have been presented in the form of seven statements. In towns where there are slums Statement-VII has also been given in which information regarding civic and other amenities available in the slums have been shown. In each statement towns have been arranged in alphabetical order.

As has been explained earlier, urban agglomerations are of two types: first those constituted by two or more independent towns and second those where the urban characteristics have developed in the adjoining rural areas, which have developed as outgrowth of the referent town.

Where an urban agglomeration includes two or more independent towns, the names of towns constituting the agglomeration have been indicated in the alphabetical arrangement but their names have also been repeated in the alphabetical order under the name of the agglomeration after the name of the main or core town and information relating to these has been shown here. The particulars of the constituent units of the agglomerations have not been repeated wherever they occur separately in the alphabetical order and a note "See referent agglomeration" has been given against such names. The lines relating to the information regarding urban agglomeration as a whole have not been numbered but the constituent units as and when they occur in the alphabetical order have been numbered so that the last number agrees with the total number of towns in the district concerned. In respect of Statements II, III and VI in the lines relating to agglomeration a note "See constituent units" has been shown and information has been provided separately in respect of all the constituents below it.

In case of towns having out growths, an asterisk mark has been placed against their names. Information in respect of out growths has been included in the concerned town and has not been shown separately.

The amenities and other data have been indicated by codes. A list of column wise code structure and other abbreviations used in each statement has been provided at the beginning of Section-II of Part-A of this book. We may now discuss the various Town Directory statements.

Statement I

It deals with the status and growth history of the town. Columns 2 to 7 give information regarding class, name and civic status of the town, its location code number, name of the tehsil/panchayat samiti in which it is situated, its area in sq. km and number of households including houseless households residing in the town as per 2001 Census. The class of the town has been determined on the basis of its population as per Census 2001 and the civic administration status relates to the year 2000. Columns 8 to 18 show the population of the town in different decennial censuses beginning from 1901 upto 2001. The growth rate in terms of percentage in respect of previous censuses has been shown below the population figures pertaining to each Census beginning from Column 9 onwards.

A 'dash' under these columns indicates that the referent town did not have an urban status in the referent Censuses. Density of Population per sq. km as per Census 2001 has been shown in column 19 and sex ratio (number of females per 1,000 males) have been indicated for three censuses viz. 1981 to 2001 in columns 20 to 22.

Statement II

This statement gives information about the physical aspects and locations particulars of the town in 1999. First two columns give the serial number, class, name and civic status of the town. Columns 3 to 13 deal with the physical aspects viz. rainfall and temperature. Rainfall figures are the average of the rainfall for the last one year ending 1999-2000. If the information in respect of rainfall is not available for any town it has been given for the nearest place for which it is available. Rainfall has been shown in millimeters per annum. Maximum and minimum temperatures have been given in centigrade. If the

information regarding temperature is not available in respect of any town it has been given for the nearest place for which it is available and the name of the centre has been shown in footnote.

The location of the town with respect to various administrative headquarters and nearest city is indicated in columns 6 to 10. While showing the location of the referent town with respect to various administrative headquarters, names and their distance from the referent town in kilometer have been given in parentheses below the name of the place where it is situated. In case the referent town itself happens to be the seat of the administrative headquarters, this distance has been shown zero. Information regarding the nearest city of population one Lac or more and population 5 Lacs or more have been given in respect of its situation within the State or even if this city may be situated in other State. In case the nearest city happens to be situated in other State, the name of the concerned State has been shown against the name of the city in parentheses. How the referent town is approachable is given in columns 11 to 13 which indicate the availability of communication facilities viz. railway station, bus facilities and navigable river/canal within 10 km.

Statement III

It gives information about the finances of the civic body controlling the local civil administration and it has been presented in '000 rupees. A 'dash' in this Statement indicates that no receipt or expenditure has occurred under the particular head and 'N' represents negligible amount. First two columns give general information, columns 3 to 9 present receipt under broad categories and total receipt and columns 10 to 16 present expenditure under broad categories and total expenditure. The receipt and expenditure has been presented under six broad categories each. While receipt through taxes implies all receipts from taxes obligatory or others and revenue derived from municipal properties and power apart from taxation, it also includes income derived from holding of fairs and exhibitions, supply of milk, license fee, cattle-ponds, fines and penalties, transport services, places of entertainment, allotment/sale/lease of land and rent etc. Government grants include per capita grant, grant from Public Works Department and grant from the Social Welfare and other departments. Other sources of receipts have been specified, wherever possible but generally they are of miscellaneous nature.

Expenditure on general administration covers salary and wages of staff, contingent expenditure on staff, grants loans and advances to the staff etc. Expenditure on public safety cover fire-fighting, light, water and lease facilities, regulating the dangerous/ hazardous trades/works/occupation, water supply, registration of births and deaths, disposal of garbage, rubbish and night-soil. Public health and conveniences cover all types of medical aid and maintenance of the destitute etc. Public works include maintenance and construction of roads and buildings and relief works in times of famine and scarcity. Expenditure in public institutions covers all types of social, cultural, educational, religious institutions etc. Which are run or patronised by the municipality. Other sources of expenditure have been specified where possible but mostly these are of miscellaneous nature.

Statement IV

This statement deals with the civic and other type of public amenities and provides information about total population, scheduled castes and scheduled tribes population, road length, system of sewerage, number and types of latrines, method of disposal of night-soil, water supply, availability of fire-fighting service and electrification besides general information. In case of water supply the source of water as also the system of its storage have been shown. The storage capacity has been shown in Kiloliters. In case of disposal of night soil and protected water supply particulars have been given in respect of two methods/ sources in order of their importance if more than one exist in the town. In case fire-fighting service is not available in the town the name of the nearest place if in the same district or the name of the nearest district if in the same state or other state where available along with distance from the referent town has been mentioned.

Statement V

Particulars of medical, educational, recreational and cultural facilities available in the town have been given in this statement and the number of each type of these facilities has also been shown in parentheses is along with the appropriate code.

In case of medical facilities the number of beds wherever available has also been shown Allopathic, Ayurvedic, Unani and Homeopathic hospitals/ dispensaries have been shown separately. No code has been provided for allopathic institutions and the numbers have been shown only in figures. Thus beside H, code for hospital means an Allopathic Hospital. Separate codes have been provided for other three systems of medicine.

If a medical or educational facility is not available in the town, the name of the nearest place, if the same district or the name of the nearest district in the same State or other State where available and its distance (in km) from the referent town has been mentioned. Details of medical institutions shown under 'Others' have also been explained.

Arts, Science and Commerce Colleges have been shown separately. While showing the educational institutions upto Higher Secondary level the same procedure as adopted in case of Village Directory, has been followed. In case of composed schools relevant classes have been treated separately e.g. a school having classes I to XII has been treated as being composed of one Primary, one Middle, one Secondary and one Higher Secondary School.

All other types of educational institution which are not covered in column 6 to 14 have been shown in column 15 under 'Others' and include technical/ vocational and training institutions like Applied Art Painting College, Pharmacy College, Agricultural College, Teacher's Training College/Institution, Music/ Dance School etc. Janchetna Kendra is also included in others.

Statement VI

This statement contains particulars regarding trade, commerce, industry and banking. It gives names of three most important commodities, exported and manufactured in the town besides the number of banks, agricultural and non-agricultural credit societies functioning in the town. A list of the outgrowths, if any, along with their population and name of the core town has also been provided at the end of the Town Directory as an Appendix.

Statement VII

Information about all slums whether notified or not and for all towns has been shown in this statement in order to give an idea about the amenities available to the slum dwellers. Particulars about paved roads, systems of sewerage, number and types of latrines, method of disposal of night soil, number of tap points/ public hydrants for supply of protected water and electrification have been provided in respect of every slum in each town, if there are any.

PART-A : VILLAGE AND TOWN DIRECTORY

Section-I

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:

Column 1 : Serial Number

Self explanatory. All the villages within the Panchayat Samiti are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R

(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages Panchayat Samiti wise of the district.

Appendix-I-A Indicates number of villages Panchayat Samiti wise having one or more primary schools.

Appendix-I-B Indicates number of villages Panchayat Samiti wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages Panchayat Samiti wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV Panchayat Samiti wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII The appendix shows the list of villages according to proportion of the A, VII B Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates Panchayat Samiti wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

Section-II

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M.Cl.
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Tehsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 and 10

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory

Column 6 : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well Water	W

Column 14

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory

Column 4 & 5

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or primary health centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC

(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

PART-B : PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/Panchayat Samiti/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/Panchayat Samiti/Town
3.	Primary Census Abstract for Scheduled Tribes	District/Panchayat Samiti/Town
4.	Village Primary Census Abstract	Panchayat Samiti/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented Panchayat Samiti wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Panchayat Samiti is presented both for rural and urban areas separately. All the villages within the Panchayat Samiti constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Panchayat Samiti. In case a Panchayat Samiti is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Panchayat Samiti is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares. The area figures of the Panchayat Samiti is the total of the village areas coming under each Panchayat Samiti. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tehsils/ Panchayat Samiti within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Tehsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and Panchayat Samiti level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II : FERTILITY-MORTALITY MEASURES

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever-married women and last question related to currently married women.

AGE SPECIFIC MARITAL FERTILITY LEVEL, 1991 CENSUS

Age-Group	Kota			Rajasthan		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	62.29	64.79	54.42	99.82	99.10	103.46
20-24	163.68	186.03	122.44	217.18	227.01	182.20
25-29	157.14	191.77	106.31	197.71	214.81	144.55
30-34	105.04	132.84	63.50	141.09	158.38	85.69
35-39	60.60	80.54	29.87	90.43	104.11	47.40
40-44	35.62	45.30	17.94	53.37	61.51	25.15
45-49	19.26	23.20	10.66	27.36	30.37	15.81

The ASMFR has been calculated at seven different age groups. The highest ASMFR of the district 163.68 has been found in the age group of 20-24 followed by 157.14 in the age group 25-29. The lowest ASMFR of 19.26 has been found in the age-group 45-49. In comparison to state, ASMFR of the district is lower than that of state in all age groups except in the age group of 45-49. Similar trends found in rural areas. It can be seen from the table.

ESTIMATES OF CHILD MORTALITY, 1991 CENSUS

Mortality Indicators	Kota			Rajasthan		
	Persons	Males	Females	Persons	Males	Females
q2	95	90	98	97	95	99
q3	99	92	101	100	98	106
q5	140	124	124	110	103	117

Information on the question on children ever born and children surviving canvassed for all ever-married women has been tabulated by age of the mother. From this, estimates of child mortality have been worked out by using Brass Technique.

From the estimates of child mortality (Number of death by ages 2, 3 and 5 given as q2, q3 and q5) it is observed that the child mortality in Kota district is lower as compared to the state among males and females. It can be seen from the table.

ANNEXURE-III : VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

Source : Occasional paper No.1 of 1997 office of the Registrar General India and Rajasthan state district profile 1991.
Note: * Newly Created districts after 1991 Census.

The gross fertility rate of the district has been reported as 163 as against 162 of the State. Similarly the GMFR and TFR and TMFR of the district are also lower than that of State being 184, 5.00 and 5.52 as against 184, 5.01 and 5.59 of the state respectively. The crude birth rate of the district is also higher than that of the State at 36.60.

However the number of children even born per woman in the age group of 45-49 is 4.88 which is lower than the State average of 5.07. The mean age at marriage of females in the district 16.29 is lower than that of State (16.67) as can be seen from the table. CWR (child woman ratio) 0-4 of the district is lower than state. It can be seen from the table.

ANNEXURE-IV(a) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Sl. No.	Place of Birth	1991 Census			2001 Census		
		Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8
(A)	Migrants born within the state of Enumeration	498,137 (80.05)	138,075 (74.00)	360,062 (82.64)	401,247 (78.11)	139,548 (74.29)	261,699 (80.32)
(i)	Migrants born elsewhere in district of Enumeration	345,634 (55.54)	79,472 (42.59)	266,162 (61.09)	203,029 (39.53)	62,504 (33.28)	140,525 (43.13)
(ii)	Migrants born in other district of the State	152,503 (24.51)	58,603 (31.41)	93,900 (21.55)	198,218 (38.59)	77,044 (41.02)	121,174 (37.19)
(B)	Migrants born in other states of India	115,213 (18.51)	43,650 (23.39)	71,563 (16.42)	107,654 (20.96)	45,810 (24.39)	61,844 (18.98)
(C)	Migrants born in other countries	8,950 (1.44)	4,860 (2.61)	4,090 (0.94)	4,770 (0.93)	2,477 (1.32)	2,293 (0.70)
	Total Migrants	**622,300 (100.00)**	**186,585 (100.00)**	**435,715 (100.00)**	**513,671 (100.00)**	**187,835 (100.00)**	**325,836 (100.00)**

(a) By Place of Birth

It was seen that a sizeable portion of migrants in Kota District i.e. 80.05 percent in 1991 and 78.11 percent in 2001 were migrants whose place of birth was within the state of enumeration. Out of this major portion where migrants who were born elsewhere in the district of enumeration.

The migrant whose place of birth was in other states of India was 18.51 percent in 1991 and 20.96 percent in 2001 Census.

Migrant to the district whose place of birth was in other countries was 1.44 percent in 1991, whereas the proportion was marginally less i.e. 0.93 percent in 2001 Census.

ANNEXURE-IV(b) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	498,137 (100.00)	319,323 (64.10)	178,814 (35.90
	Rural	409,912 (82.29)	293,739 (58.97)	116,173 (23.32)
	Urban	83,265 (16.72)	22,374 (4.49)	60,891 (12.23)
In other states of India	Total	115,213 (100.00)	41,323 (35.87)	73,890 (64.13)
	Rural	68,993 (59.88)	35,413 (30.74)	33,580 (29.14)
	Urban	45,010 (39.07)	5,670 (4.92)	39,340 (34.15)

(b) Internal Migrants (Rural/Urban)

Majority of the internal migrants i.e.64.10 per cent whose places of birth were within Rajasthan belonged to the rural areas of the state. The same trend also reflects in case of migrants born in other state of India as can be seen from the table.

ANNEXURE-IV(c) : INTER-STATE MIGRANTS, 1991 CENSUS

Place of Birth	1991 Census	
	Migrants	%age to total migrants
1	2	3
Bihar	3,370	2.93
Gujarat	3,080	2.67
Madhya Pradesh	63,337	54.98
Punjab	4,080	3.54
Uttar Pradesh	25,766	22.36
Maharashtra	2,730	2.37
Total for six States	**102,363**	**88.85**
Other States	**12,850**	**11.15**
Total	**115,213**	**100.00**

ANNEXURE-IV(c) : INTER-STATE MIGRANTS, 2001 CENSUS

Place of Birth	2001 Census	
	Migrants	%age to total migrants
1	2	3
Madhya Pradesh	50,939	47.32
Uttar Pradesh	26,246	24.38
Bihar	4,271	3.97
Punjab	4,151	3.86
Gujarat	3,264	3.03
Maharashtra	3,101	2.88
Total for six States	**91,972**	**85.43**
Other States	**15,682**	**14.57**
Total	**107,654**	**100.00**

(c) Inter-state Migrants

In the case of Inter-state migrants they are mainly from Madhya Pradesh and Uttar Pradesh as their percentages are 54.98 and 22.36 respectively in 1991 census. In 2001census main migrants are from Madhya Pradesh and Uttar Pradesh and their percentage are 47.32 and 24.38 respectively. Percentage of six states to total migrants is 73.82 in 2001.

ANNEXURE-IV (d) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE, 1991-2001 CENSUS

Sl.No.	Place of Last Residence	1991 Census			2001 Census		
		Persons	Males	Females	Persons	Males	Females
	1	2	3	4	2	3	4
(A)	Within the State of Enumeration but outside the place of Enumeration	510,417	142,905	367,512	413,962	144,488	269,474
		(81.01)	(75.45)	(83.41)	(78.92)	(75.21)	(81.07)
(i)	Elsewhere in the District of Enumeration	355,144	82,802	272,342	213,860	66,748	147,112
		(56.37)	(43.72)	(61.81)	(40.77)	(34.74)	(44.26)
(ii)	In other districts of the state of Enumeration	155,273	60,103	95,170	200,102	77,740	122,362
		(24.64)	(31.73)	(21.60)	(38.15)	(40.46)	(36.81)
(B)	States in India beyond the state of Enumeration	112,753	42,830	69,923	106,491	45,519	60,972
		(17.90)	(22.61)	(15.87)	(20.30)	(23.69)	(18.34)
(C)	Last Residence outside India	6,870	3,670	3,200	4,066	2,117	1,949
		(1.09)	(1.94)	(0.72)	(0.78)	(1.10)	(0.59)
	Total Migrants	**630,040**	**189,405**	**440,635**	**524,519**	**192,124**	**332,395**
		(100.00)	**(100.00)**	**(100.00)**	**(100.00)**	**(100.00)**	**(100.00)**

(d) Migration by Place of Last Residence

In the percentage distribution of migrants by place of last residence inthe district it was seen that in 1991 census,.the highest proportion of migrants i.e 81.01 percent were from within the state of enumeration but outside the place of enumeration. In 2001 Census this proportion dropped to 78.92 percent in the same category. Suprisingly it was seen that the proportion of female migrants were higher than the male migrants in both censuses.

The migrants in the district that were from states in India beyond the state of enumeration was 17.90 percent in 1991 as compared to 20.30 percent in 2001 census.

Persons whose last residence was outside India were 1.09 percent in 1991 census while there was a marginal reduction to 0.78 percent in 2001 census.

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	510,417	326,243	184,174
		(100.00)	(63.92)	(36.08)
	Rural	416,502	299,519	116,983
		(81.60)	(58.68)	(22.92)
	Urban	90,175	24,274	65,901
		(17.67)	(4.76)	(12.91)

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
In other states of India	Total	112,753	40,793	71,960
		(100.00)	(36.18)	(63.82)
	Rural	65,953	34,763	31,190
		(58.49)	(30.83)	(27.66)
	Urban	45,740	5,830	39,910
		(40.57)	(5.17)	(35.40)

(e) Migration by Place of Last Residence (Rural/ Urban)

Majority of the internal migrants i.e 63.92 per cent whose place of last residence were within Rajasthan belonged to rural areas. The same trends also reflects in case of migrants whose place of last residence were in other state of India as can be seen from the table.

ANNEXURE-V : RELIGIONWISE DISTRIBUTION OF TOTAL POPULATION, 1991-2001 CENSUS

RELIGION

Religion is an important basic cultural characteristic of the population. It provides an interesting picture of the society. The data on religion projects the unity and diversity of the country. The data is great importance to the public as well as Government,NGO and Minorities Commission.

Among the followers of six major religions in Kota District it was seen that the proportion of Hindus had marginally decreased from 86.24 percent in 1991 to 85.73 percent in 2001 Census. Whereas the proportion of Muslims increased from 11.45 to 11.71 percent,. it is also true In the case of Jain Community during the same period but the Sikh community showed a marginal decreased., The Christion community also registered a marginal decreased from 0.34 to 0.33 in 1991-2001 respectively.

At the state level however the proportion of Hindus , Sikh and Jains decreased whereas those of Muslims,Christians and Buddhists increased.

ANNEXURE-VI : MARITAL STATUS OF POPULATION AS PER, 1991 CENSUS

MARITAL STATUS OF POPULATION

Majority of the population of the district in1991census is 48.30 percent in married followed by never married and widowed i.e. 47.99 and 3.56 percent respectively. Out of the male total population of the district 52.14 percent males are never married and of female never married is 43.31 percent, the proportion of widowed females is higher 5.29 percent than the males 2.02 percent. Married males are 45.68 percent while 51.25 percent females are married at the district level. Divorced or separated is not so widely practiced, only 0.16 males and 0.13 females are reported in this category which are almost half to the state average. The same trend was found in rural as well as urban areas. In 2001 census 49.61 is never married. There after comes married persons whose percentage to total population comes to 46.76 widowed persons in absolute numbers 52800 which is 3.37 percent to total population. Sexwise, males have higher population of never married is 53.62 percent as compared to females whose population is 45.14 percent. On the other hand, females have higher proportion of married 49.22 percent than males 44.54 percent. Females have a phenomenal higher number 39335 of widows than male widowers 13465 in the district. It can be seen from Annexure VI.

AGE, SEX AND EDUCATIONAL LEVEL,1991-2001

Literacy in the age-group 10-14 years in1991 in the district was 62.6 percent in the total, which was higher among the males 76.6 percent and females 46.1 percent. In the total in the age-group 15-19 years the literacy slightly lower in the total i.e61.3 percent and the same trend was found as in the earlier age group except that the female literacy in this age group 15-19 years was as low as 40.9 percent. In general it was seen that the literacy rate in the urban areas was much higher both among males and females. The

proportion of metric but below graduate was however not very high. In the total there were 10.5 percent metric but below graduate persons. Here also the male proportion was higher i.e. 15.8 percent compared to females 4.6 percent. Graduate and above in the age group 20 + years followed the same trend but in lesser proportion. In 2001 census the total population of the Kota district was 1568525 which 73.53 percent are literates. As per the definition of literacy in the 2001 Census the entire population in the age group 0-6 was considered to be illiterates. The total literacy rate in the district

Kota in the age-group 10-14 years was 89.7 percent and among males and females it was 93.3 and 85.5 percent respectively, which is lower as compared to the state in the same age group. Similarly literacy rate in the age group of 15-19 years 92.3 percent males and 78.7 percent females were reported in the district, which is also lower than that of the state.

It is a general trend of the literacy at the state as well as district level, female literacy is lower than the male literacy. The percentage showed a decline at Matric but below Graduate 24.36 percent among male and 9.77 percent as females while at the graduate and above level 12.14 percent males and 7.19 percent are females. It can be seen from the Annexure VII.
