VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

ANAND NIGAM
Deputy Director
Directorate of Census Operations, Rajasthan

Jawai Bandh

The construction of the Jawai Bandh was started in the year 1946 and was completed in the year 1956-57. The total cost of construction came up to 2.60 crores. It is situated 3.2 kms away from Jawai Railway Station. The water retaining capacity is 7327 M.C.F.T. live storage is 6831 M.C.F.T. The total irrigated area from the Bandh waters is 38671 hectares, which covers a command area of 33 villages in Pali District and 24 villages in Jalor district. The length of the main canal is 23 kms and of its tributaries is 207 kms. The main Jawai Canal was constructed between the years 1952-56 and it is made up of lime and concrete. Over the years the lining of the canal has been damaged, resulting in the problem of excess seepage.

With the assistance of the World Bank, The Rajasthan Water Area Management Reconstruction Project has ventured on the reconstruction of the canals, outlets and tributaries.

District Highlights–2001 Census xv

Important Statistics and ranking of tehsils in the district xvii

Statements 1-9

Statement-1 : Name of the Headquarter of the District/Tehsil, their Rural-Urban status and Distance from District Headquarter, 2001 xxi

Statement-2 : Name of the Headquarter of the District/Panchayat Samiti, their Rural-Urban status and Distance from District Headquarter, 2001 xxi

Statement-3 : Population of the District at each Census from 1901 to 2001 xxii

Statement-4 : Area, Number of Villages/Towns and population in District and Tehsil, 2001 xxiii

Statement-5 : Panchayat Samiti-wise number of villages and rural population, 2001 xxiv

Statement-6 : Population of Urban Agglomerations/Towns, 2001 xxiv

Statement-7 : Villages with population of 5,000 and above at Panchayat Samiti level as per 2001 Census and amenities available xxv

Statement-8 : Statutory Towns with population less than 5,000 as per 2001 Census and amenities available xxvii

Statement-9 : Houseless and Institutional Population of Tehsils, Rural and Urban, 2001 xxviii

Summary Statement : Jurisdiction of Panchayat Samities in each Tehsil, 2001 xix

Analytical Note

(i) History and scope of the District Census Handbook 3

(ii) Brief History of the District 6

(iii) Administrative set-up 7

(iv) Physical Features: (1) Location and size (2) Physiography (3) Drainage (4) Climate (5) Natural economic resources 8

(v) Census Concepts 16

Page Nos.

(vi) Non Census Concepts 23
(vii) 2001 Census findings-Population, its distribution 27
(viii) Brief analysis of PCA data based on inset tables 1 to 36 28
(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47 53
(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48 to 52 60
(xi) Other Developmental activities 67
(xii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district 68
(xiii) Scope of Village and Town Directory - column heading wise explanation and coverage of data 70

PART-A : VILLAGE AND TOWN DIRECTORY

Section-I : Village Directory

(a) Note explaining the abbreviations used in Village Directory 77
(b) List of Villages merged in Towns and Outgrowths at 2001 Census 81
(c) Panchayat Samiti-wise presentation of Village Directory Data
(i) Panchayat Samiti Maps showing Tehsil boundary
(ii) Alphabetical List of Villages alongwith Location Code 1991 and 2001
(iii) Presentation of Village Directory data in prescribed format
1. Panchayat Samiti : Jaitaran 85
2. Panchayat Samiti : Raipur 111
3. Panchayat Samiti : Sojat 139
4. Panchayat Samiti : Rohat 167
5. Panchayat Samiti : Pali 189
6. Panchayat Samiti : Marwar Junction 211
7. Panchayat Samiti : Rani 245
8. Panchayat Samiti : Sumerpur 265
9. Panchayat Samiti : Bali 283
10. Panchayat Samiti : Desuri 307

(d) Appendix to Village Directory
Appendix-I : Abstract of Educational, Medical and Other Amenities in Villages - Panchayat Samiti level 326
Appendix-IA : Villages by number of Primary Schools 330
Appendix-IB : Villages by Primary, Middle and Secondary Schools 330
Appendix-IC : Villages with different sources of drinking water facilities available 331
Appendix-II : Villages with 5,000 and above population which do not have one or more amenities available 331
Appendix-IIA : Census Towns which do not have one or more amenities 332

Page Nos.

Appendix-III : Land utilisation data in respect of Census Towns/Non Municipal Towns 333

Appendix-IV : Panchayat Samitiwise list of inhabited villages where no amenity other than drinking water facility is available 333

Appendix-V : Summary showing number of villages not having Scheduled Castes population 334

Appendix-VI : Summary showing number of villages not having Scheduled Tribes population 334

Appendix-VIIA : List of villages according to the proportion of the Scheduled Castes to the total population by ranges 335

Appendix-VIIB : List of villages according to the proportion of the Scheduled Tribes to the total population by ranges 346

Appendix-VIII : Number of villages under each Gram Panchayat (Panchayat Samiti wise) 352

Appendix-IX : Statement showing number of girls schools in the villages 376

Section-II : Town Directory

Note explaining the abbreviations used in Town Directory

Town Directory Statements (I to VII) 377

Statement-I : Status and Growth History 380

Statement-II : Physical Aspect and location of Towns 384

10. Panchayat Samiti : Desuri 556

Urban Primary Census Abstract 568

Annexure-I : Number of villages under each Gram Panchayat, 2001 Census 598

Annexure-II : Fertility and Mortality, 1991 Census 627

Annexure-III : Various measures of fertility and mean age at marriage, 1991 Census 628

Annexure-IV : Percentage distribution of Migrants by place of birth/ place of last residence, 1991-2001 Census 629

Annexure-V : Brief account of main religions in the district as per 1991-2001 Census 631

Annexure-VI : Marital status of population as per 1991-2001 Census 632

Annexure-VII : Age, Sex and Education in the district, 1991-2001 Census 634

Annexure-VIII : Distribution of different mother tongues returned in 1991-2001 Census 635

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre),

drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri J.L.Modi, Director of Census Operations, Rajasthan. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Additional Secretary &
Census Commissioner, India

Preface

I am deeply indebted to the State Government of Rajasthan for their unstinted support and cooperation despite all odds and adversaries like famine etc. at all stages of Census Operations of 2001. I am grateful to Shri Inderjit Khanna, the then Chief Secretary of Government of Rajasthan for his prompt response, guidance and cooperation given to the Census Organization. He infused a sense of urgency and seriousness in the minds of District Collectors and Officers of the District Administration, which geared up the entire administrative machinery. The Supervisors and Enumerators, the basic census functionaries worked ceaselessly in the entire period of fieldwork to make Census 2001 successful.

Sarvashri Ashok Pandey and Vinod Zutshi, the then Secretaries in the Department of Cabinet Secretariat and General Administration have been instrumental in making Census 2001 a successful one. I owe my thanks to both of them. I am also thankful to other Departments like Education, Finance, Revenue, Economics and Statistics, Public Relations, Printing and Stationery, Local Self-government and Personnel Department for extending their full cooperation.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his unstinted support and spontaneous, unfailing guidance throughout our endeavours. At the outset I would like to thank Shri D.K. Sikri, Registrar General and Census Commissioner, India for guiding us in bringing out this report. My grateful thanks to Shri K.N. Unni, Ex-DRG (C&T), Shri R.G. Mitra, Ex-DRG (C&T), Shri R.P. Singh, Consultant (Map), Shri Himakar, Additional Director (EDP), Dr. I.C. Agrawal, A.R.G.(SS), Shri S.L. Jain, Deputy Director (SS), Shri C. Chakravorty, Joint Director (DDU) and their colleagues at the headquarter for their ever willing, helping hand and thoughtful suggestions for putting together and shaping the volumes in their present form.

The Director of Census Operations, Rajasthan, Shri J. L. Modi under whose guidance the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before this volume could be made available for the press. I am deeply greatful to Shri H.S. Meena, Ex-Joint Director of Census Operations, Rajasthan for its success.

It may be mentioned a few annexures have been added to this volume with a view to provide an insight into the 1991 and 2001 data on the suggestion of Social Studies Division of the Office of the Registrar General, India. In this connection the contribution of Shri V.K. Gupta, Senior Compiler can not be ignored.

Shri H.C Sharma, Assistant Director incharge of District Census Handbooks and Primary Census Abstract, who was ably assisted by his team of dedicated workers deserve all praise for their perseverance and dedication in preparing Village and Town Directories and in finalization of PCAs and other inset tables. I would like to thank Shri G. Fernandes, Assistant Director who not only coordinated the work but also contributed immensely to the cause of Village and Town Directories.

In view of the increasing demand of the publications in electronic format, it has been decided to publish the DCHB also on CD. I highly appreciate the efforts put in by Smt. Jyoti Luhadiya, DD(EDP) and her team to compile in the electronic format. The efforts put in by Shri Divesh Chawla, DEO Gr-'B' to prepare this is highly commendable. In this connection, the contributions of Shri P.N. Mathur, Sr.Supervisor and Shri J.P. Verma, DEO Gr-'B' cannot be ignored.

Shri S. K. Chatturvedi, SI-III has taken pains in drafting the District Profile and the Analytical Note for the district. The members of the staff in the Map Section did a commendable job under the guidance of Shri Panna Lal, R.O.(Map), ably assisted by Shri R.S. Tyagi, Sr.Geographer in bringing out various maps.

✧

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

ANAND NIGAM
Deputy Director
Directorate of Census Operations, Rajasthan

Jawai Bandh

The construction of the Jawai Bandh was started in the year 1946 and was completed in the year 1956-57. The total cost of construction came up to 2.60 crores. It is situated 3.2 kms away from Jawai Railway Station. The water retaining capacity is 7327 M.C.F.T. live storage is 6831 M.C.F.T. The total irrigated area from the Bandh waters is 38671 hectares, which covers a command area of 33 villages in Pali District and 24 villages in Jalor district. The length of the main canal is 23 kms and of its tributaries is 207 kms. The main Jawai Canal was constructed between the years 1952-56 and it is made up of lime and concrete. Over the years the lining of the canal has been damaged, resulting in the problem of excess seepage.

With the assistance of the World Bank, The Rajasthan Water Area Management Reconstruction Project has ventured on the reconstruction of the canals, outlets and tributaries.

Annexure-VIII : Distribution of different mother tongues returned in 1991-2001 Census 635

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre),

drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri J.L.Modi, Director of Census Operations, Rajasthan. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Additional Secretary &
Census Commissioner, India

Preface

I am deeply indebted to the State Government of Rajasthan for their unstinted support and cooperation despite all odds and adversaries like famine etc. at all stages of Census Operations of 2001. I am grateful to Shri Inderjit Khanna, the then Chief Secretary of Government of Rajasthan for his prompt response, guidance and cooperation given to the Census Organization. He infused a sense of urgency and seriousness in the minds of District Collectors and Officers of the District Administration, which geared up the entire administrative machinery. The Supervisors and Enumerators, the basic census functionaries worked ceaselessly in the entire period of fieldwork to make Census 2001 successful.

Sarvashri Ashok Pandey and Vinod Zutshi, the then Secretaries in the Department of Cabinet Secretariat and General Administration have been instrumental in making Census 2001 a successful one. I owe my thanks to both of them. I am also thankful to other Departments like Education, Finance, Revenue, Economics and Statistics, Public Relations, Printing and Stationery, Local Self-government and Personnel Department for extending their full cooperation.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his unstinted support and spontaneous, unfailing guidance throughout our endeavours. At the outset I would like to thank Shri D.K. Sikri, Registrar General and Census Commissioner, India for guiding us in bringing out this report. My grateful thanks to Shri K.N. Unni, Ex-DRG (C&T), Shri R.G. Mitra, Ex-DRG (C&T), Shri R.P. Singh, Consultant (Map), Shri Himakar, Additional Director (EDP), Dr. I.C. Agrawal, A.R.G.(SS), Shri S.L. Jain, Deputy Director (SS), Shri C. Chakravorty, Joint Director (DDU) and their colleagues at the headquarter for their ever willing, helping hand and thoughtful suggestions for putting together and shaping the volumes in their present form.

The Director of Census Operations, Rajasthan, Shri J. L. Modi under whose guidance the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before this volume could be made available for the press. I am deeply greatful to Shri H.S. Meena, Ex-Joint Director of Census Operations, Rajasthan for its success.

It may be mentioned a few annexures have been added to this volume with a view to provide an insight into the 1991 and 2001 data on the suggestion of Social Studies Division of the Office of the Registrar General, India. In this connection the contribution of Shri V.K. Gupta, Senior Compiler can not be ignored.

Shri H.C Sharma, Assistant Director incharge of District Census Handbooks and Primary Census Abstract, who was ably assisted by his team of dedicated workers deserve all praise for their perseverance and dedication in preparing Village and Town Directories and in finalization of PCAs and other inset tables. I would like to thank Shri G. Fernandes, Assistant Director who not only coordinated the work but also contributed immensely to the cause of Village and Town Directories.

In view of the increasing demand of the publications in electronic format, it has been decided to publish the DCHB also on CD. I highly appreciate the efforts put in by Smt. Jyoti Luhadiya, DD(EDP) and her team to compile in the electronic format. The efforts put in by Shri Divesh Chawla, DEO Gr-'B' is highly commendable.

Shri S. K. Chatturvedi, SI-III has taken pains in drafting the District Profile and the Analytical Note for the district. The members of the staff in the Map Section did a commendable job under the guidance of Shri Panna Lal, R.O.(Map), ably assisted by Shri R.S. Tyagi, Sr.Geographer in bringing out various maps.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook:

The series of District Census Handbooks has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several new innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Numbers (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from 1 to N. Each village has been assigned an eight digit code. The first six digits represent the code of the village as existing at the present census. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001, are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

The responses for almost all the questions in the Houselisting Schedule had pre-coded options. This not only helped the enumerators to record the response easily but at a later stage would hopefully facilitate quicker data processing. Apart from the improvements made in the format of the Houselisting Schedule, the scope of Houselisting was considerably expanded with the inclusion of new questions based on requirements of various data users and planners. The new features of the Houselisting Schedule are listed below.

- For the first time, different uses of census houses have been standardized and grouped into ten main uses and assigned code numbers.
- Plastic has been added in the list of material of wall and roof of a census house, as it is often used for shelter in slums and shanties.
- In the previous census, the location of drinking water source was categorized into two locations viz. 'within premises' and 'outside premises'. In the Census of India, 2001, the source 'outside premises' was split into two categories namely 'near the premises' and 'away from the premises'.
- The scope of question of availability of electricity was expanded to include six sources of lighting. Besides no lighting, this included sources like electricity, kerosene, solar, other oil and any other source.
- In 1991 Census, a question on availability of toilet facilities to the household was canvassed while in Census of India, 2001, specific information on availability of latrine within the house by the type of latrine was sought.

In addition to expending the scope of the questions canvassed during the Houselisting Operations in the 1991 Census, the following new questions were added in the Houselist Schedule for Normal Households at the Census of India, 2001.

- If the Census house was used for residential or partly residential purposes, the condition of the census house was categorized as good, livable or dilapidated based on the perception and response of the respondent.
- A question on number of married couple(s) living in the household was canvassed.
- Information was sought on the number of married couple(s) having independent room for sleeping.

- Information as to whether the waste-water outlet of the house is connected to 'closed drainage' or 'open drainage' or has not drainage was collected.
- A question on availability of bathroom within the house was included.
- Information on availability of kitchen within the house was also sought.
- Availability of certain assets to the households namely radio/transistor, television, telephone, bicycle, scooter/motor cycle/ moped, car/jeep/van were also included.
- It was also enquired whether any banking service was being availed by the household.

The Household Schedule adopted for the Population Enumeration also primarily had pre-coded options for majority of the questions. The questions for each data item were made as self-explanatory as far as possible for easy understanding. The comprehensive Household Schedule had three parts and two sides A and B. Part I contains the Location Particulars; Part II relates to Individual Particulars and Part III contains questions for Household engaged in Cultivation/Plantation. To facilitate quick tabulation for bringing out Provisional Population Totals, provisions of page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates and workers and their categories by sex. Most of the questions canvassed during the 1991 Census, were retained for the 2001 Census, except the question on ex-serviceman, which was dropped during the Census of India, 2001. However, a number of new questions were added in the Household Schedule in view of the suggestions from policy makers, data users and researchers, while the scope of certain existing questions was enhanced.

These modifications are:

- Age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.
- The type of educational institution attended by a person was enlarged to include school, college, vocational institute, other institute and literacy center.
- The scope of the definition of 'work' was expanded in the Census of India, 2001, to include production of milk for domestic consumption. In the 1991 Census, cultivation of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India, 2001.
- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India, 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census is dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census, is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected

are - in seeing, in hearing, in speech, in movement and mental.

- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work is collected under this section.
- The Household Schedule has a new set of questions for Household engaged in cultivation/ plantation- i) Net area of land under cultivation/ plantation, ii) Net area of land irrigated and iii) Tenure status. This question was not canvassed at the 1991 Census but was canvassed in the 1981 Census in a slightly different form.
- The signature or thump impression of the respondent has been taken on the Household Schedule for the first time in the history of census. This was not only aimed at obtaining correct and complete information but also for giving an opportunity to the respondents to authenticate the information provided by them. The relationship of the respondent with the head of the household was also obtained. This new feature will pave way in carrying out a methodological study in future on the respondent profile in the census.

In 1981 Census, for the first time, an attempt was made in the series to bring out demographic and other data in diglot, Hindi and English, for a more beneficial use by data user of all categories. Hindi being the official language of the State, a Hindi version of the analytical notes was also added with a view to caters to the needs of all sections of readers. The manner of presentation of the District Census Handbooks for the 1991 Census is by and large the same.

As a necessary corollary to the Handbooks, Panchayat Samities, the basic administrative units of development, administration and planning, were listed out separately for the first time in 1981 Census in relation to those districts wherein they were not coterminous with their tehsils. As an additional attempt, informations relating to population figures as well as amenities available in each village located in the jurisdiction of each Panchayat Samiti were also presented in a separate volume under the title "Supplement to District Census Handbook". However, for reference in the main District Census Handbook, a list of villages forming part of each non-coterminous Panchayat Samiti was provided along with the abstracts of population and amenities for such Panchayat Samities as a whole in the form of Special Annexures.

In order to cater to the over-all needs of the data-users and to facilitate the task of administrators and planners it has now been decided to present the Village Directory and Primary Census data at the Panchayat Samiti level instead of the traditional Tehsil level presentation. It is expected that the presentation of Village Directory and Primary Census Abstract data at Panchayat Samiti level will help the planners in formation of micro-level developmental plans, as the Panchayat Samiti is now the lowest administrative unit for development planning. However, for the convenience of the data users and for the sake of comparability of data at Tehsil level, the Primary Census Abstract has also been presented at the Tehsil/ Town level in the form of an Appendix.

A general note on each district covering information of general interest regarding its history, topography, physiography, administrative set-up and places of tourist and historic importance etc. has also been included with a view to provide comprehensive and more purposeful information about the district as a whole. Population figures of Scheduled Castes and Scheduled Tribes constituting the core of 'Weaker Section' have also been presented at district, panchayat samiti and town level so as to facilitate planning for their welfare both at micro and macro levels.

It is earnestly hoped that this publication will serve its purpose for planners and administrators of welfare schemes and other data users in general.

Prior to 1951, Census Reports were printed for the whole province/state. The idea of preparing the District Census Handbooks separately for each district was conceived during 1951 Census as a part of a plan intended to secure an effective method of preserving the Census data below the district level. The idea was that all the district census tables would be bound together in a single volume called the District Census Handbooks. Since then the District Census Handbooks are being published regularly.

The 1951 Census series of District Census Handbooks was printed in two parts. Part I contained five General Population Tables (A Series), three Economic Tables (B Series), five Household and Age Tables (C Series) and seven Social and Cultural Tables (D Series). In Part II of District Census Handbook "Primary Census Abstract and Village Directory" which showed the basic population figures for each village or town classified by livelihood classes, were included along with some information of general nature.

The 1961 Census series of District Census Handbooks were printed in single volume in which Primary Census Abstract upto village and town/ward level and Village Directory upto village level were given. Besides, some official statistics collected from various state departments, four General Population Tables (A Series), sixteen Economic and Household Tables (B Series), seven Social and Cultural Tables (C Series), four Housing Tables (E Series) and eight Special Tables for Scheduled Castes/Scheduled Tribes were also provided in District Census Handbooks. For the first time in 1961 Census the maps for the district and tehsil were also included in the District Census Handbooks.

In 1971 Census series of District Census Handbooks village-wise 'Village Directory' giving services, facilities or amenities available in the village was given. 'Town Directory' was introduced for the first time giving useful information in respect of every town of the district. Rural Primary Census Abstract upto village level and Urban Primary Census Abstract upto enumeration block level were given in District Census Handbooks. While the District, Tehsil and Town maps were included; the inclusion of Census Tables was dispensed with in the District Census Handbooks in 1971 Census.

The scope of 1981 series of District Census Handbooks was enlarged specially in relation to amenities and land-use pattern. Apart from new items like uses of electricity, details of communication points, information for which was not collected in 1971 Census, a note on each district covering general information on its history, topography, flora, fauna and administrative set up etc. was also added. The format of the Primary Census Abstract was also restructured in the light of changes in economic and other questions canvassed in the 1981 Census but at the same time, all efforts were made to retain comparability with 1971 Census data. The inclusion of Special Primary Census Abstract for Scheduled Castes and Tribes at the Tehsil/Town level was another innovation introduced in 1981 Census series.

The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same as followed in 1981. However, the format of Primary Census Abstract was restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group was included in Primary Census Abstract for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate at the time of the 1991 Census.

One of the most important innovations in the 1991 Census was the Panchayat Samiti level presentation of data in the Village Directory and Primary Census Abstract instead of the traditional Tehsil level presentation.

Deviating from 1991 Census, like 1981 Census four fold industrial classification of main and marginal workers has been presented in 2001 as against nine fold given in 1991.

The mode of presentation of DCHB in 2001 will by enlarge be same as that of in 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc pertaining to 1991 Census of the respective district in the DCHB in the form of Annexures II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

(ii) Brief History of the District:

The present day Pali District was carved out from the erstwhile princely State of Jodhpur of which it was an integral part. The district is named after its main town Pali which is diminutive of Palika whose references are found in old inscriptions. The region was rich in heritage and prosperous as is seen from

Jain monuments at Ranakpur and elsewhere. Pali was an important business centre and had its business ties upto very remote areas of China and Middle East.

The authentic history of Pali is being traced way back from 10th Century AD with the establishment of Chauhan dynasty at Nadol by Rawal Lakha whose influence was felt in various parts of Gujarat and Mewar. Anhilla the eight ruler of the line is said to have fought a war with Mahmud of Ghazni in 1025 A.D. near Somnath. Another heir of this dynasty Jayatsimha fought against Qutbuddin Aibak at Ajmer. The Rathors came on the scene in 1294 A.D. But because of the absence of authentic records the history during 13th and 14th centuries is obscure because of controversies. At that period Rathore and Muslim invaders were often at war and sometimes a valiant personality attracted the attention of the public. One such personality was Jodhaji, the founder of Jodhpur in 1459 AD. After the death of Jodhaji in 1489 his son established independent principalities in the surrounding region.

The history of the next four centuries i.e. till the end of 18th century, is a lengthy account of indifferent successors and their fights among themselves or muslim commanders of Delhi. Sovereigns Maldeo was the most notable-ruler among them who expanded his kingdom enormously during (1532-62) and brought in contact with the imperial territories of Agra and Delhi. This was during the time of Sher Shah. After the death of Maldeo however, Jodhpur was again overrun by the Mughals.

The Mughal empire began to disintegrate with the death of Aurangzeb in 1707 and the new aspirants of hegemony in North India made Rajputana a battle field to try their strength. The rulers of Mewar and Marwar, the Marathas and the Pindaries, the Mughal governors of Malwa and Gujarat made inroads and spread devastation and misery all round. The incursions in Rajputana stopped only after 1818 A.D. when Chhater Singh of Jodhpur signed a treaty with the British.

After that the reign of Takhat Singh (1843-1837) was comparatively longer. His period is noteworthy for two events viz (i) the help given to the British by the ruler at the time of the Indian Mutiny of 1857, in recognition of which he was rewarded with a "Sanad" in 1862, recognizing his right of Adoption (ii) the "Durbar" held by Lord Mayo, the Viceroy at Ajmer in 1870 which the Jodhpur ruler did not attend. This marked the beginning of his conflict with the British. Takhat Singh was succeeded by Jaswant Singh II (1873-1895) whose rule was marked by reforms and modernization of administration. He was followed by two minors in quick succession, Sardar Singh and Sumer Singh). Then came Umaid Singh who ruled up to June, 1947.

In 1949, at the time of formation of Pali district, there were 4 sub divisions in it viz. Jaitaran, Pali, Bali & Sojat. These four sub division had 6 tehsils namely Jaitaran, Pali, Bali, Sojat, Desuri and Sendra. Later on Sendra tehsil was de-recognised between 1951 and 1961, Raipur and Kharchi tehsils were constituted. A new tehsil Raipur was constituted by transferring. Which areas of former Sendra tehsil and by transfer of 69 villages of Jaitaran tehsil and Raipur town. Similarly, taking 120 villages from Sojat tehsil, Kharchi tehsil was constituted. Lastly in 1998-99, two tehsils Rohat and Sumerpur were constituted. The present administrative set up of the district is as follows :

Sl.No.	Sub Division	Tehsil	Cesus Town	No. of villages
1	1. Jaitaran	1. Jaitaran	1. Jaitaran	113
		2. Raipur	-	113
2	2. Sojat	3. Sojat	2. Sojat	117
			3. Sojat Roat (CT)	
3	3. Bali	4. Marwar Junction	4.Marwar Junction (CT)	14
		5. Bali	5 Falna	93
4	4. Pali	6. Sumerpur	6. Sumerpur	67
			7. Takhatgarh	
		7. Desuri	8. Rani	139
			9. Sadri	
		8. Pali	10. Pali	105
		9. Rohat	-	79

(iii) Administrative set-up

As per administrative set up of the State, Collector is the administrative head of the districts. The district has one Additional District Magistrate and two Assistant Collectors and Magistrate. Out of which one is posted at the district headquarter and another at Desuri Tehsil in Bali sub division. Four sub divisional officers nine tehsildars are functioning in respective sub divisions and tehsils. At tehsil level, Naib

tehsildars, Kanoongo and Patwaris are working under tehsildar, which are most important link worker in administrative set-up.

The main institution, responsible for development activities in the district is District Rural Development Authority. This authority is functioning under Additional Collector (Development). The additional Collector (Development) is also functions as Ex-Officio project Director. There is one Zila Parishad, 10 Panchayat Samities and 220 Gram Panchayats in the district. All the work of Zila Parishad is being executed by Chief Executive Officer Block Development Officers (Vikasadhi karn) execute the work of Panchayat Samitis. Zila Paramukh is the head of council.

The District Superintendent of Police is the head of police force in the district, who is being assisted by the Additional Superintendent of Police, 5 Deputy Superintendents of Police. There are 6 Police Circles, 25 Police Stations and 36 Police Chowkies in the district. The district has one post of Dy. Commandent of Home Guards. At sub division level, sub jail facility is available. There are four sub jails in the district.

To provide justice to common man, the district judiciary has one District and Session Judge, two Upper District Judges, one Chief Judicial Magistrate, three Additional Chief Judicial Magistrates, eight Munsif Magistrates, two Additional Civil Judges and Special Judge (SC/ST) are functioning in the district.

(iv) Physical Features

(1) Location and Size

The total area of Pali district is 12330.79 sq. km. The district has expanded more in length and less in width. The maximum length of district from east to west has expanded 192 kms app. and maximum width of the district from east to west is app. 166 kms. The boundaries of the district touch 8 other districts of the State. The district is bounded by Jodhpur in north, Jalor in south-west, Sirohi in south and Udaipur in south east. It also touches the boundary of Ajmer, Nagaur, Rajsamand and Siwana tehsil of Barmer district. The district is almost Snail like in shape and resembles an irregular triangle with undulted plains. It lies between 240 45. and 260 29. north latitutes and 72.47 and 74.18 east longitudes.

(2) Physiography

The area of Pali district may be called sub mountainous and has undulated plains with scattered hills here and there. A long chain of Aravalli hills from Ajmer, Rajsamnd, Udaipur and Sirohi districts connect Pali districts. The highest hill peak of Aravali in the district is 1099 meter high. The plains of district are about 1809 meter to 500 meter high and main town of the district Pali is 212 meter high. The soil of the district is mostly sandy loam and the water table in general is within 15 meter from ground level. The lower level of the sand is made of rocks of calcium carbonate. The soils of Pali, Desuri and Rani Panchayat Samities have good permeability and therefore appropriate for agricultural operations. On the other hand, soil of Kharchi, Sojat and Rohat panchayat Samities have less permeability and is saline in nature. Because of salinity, the land unusable for cultivation is increasing. Most of the rivers are flowing from east to west in the district.

(3) Drainage

There is no perennial river in the district. Four tributaries of river Luni- viz. Sukri, Luni, Bandi and Jawal flow in the district. There is no lake or natural spring in the district for irrigation purposes a number of big and small tanks have been constructed. The M.C.M. capacity of Jawai Tank is 198.2176 ltr and water tank capacity is 0.1699 MCM ltrs. Out of these, the water capacity of Jawai tank is maximum, which is located in Bali tehsil, whereas water is smallest tank.

The main dams which are being used for irrigation are Jawai, Raipur, Loonu, Hemwas Kharda and Biratia Khord dam.

(4) Climate

The climate of the district is dry and has extremes. It is very hot during summer and very cold in winter. During year 2001, the maximum temperature of 44.60 degree and minimum temperature of 2.90 degree were recorded. The average temperature of the district was recorded as 27.70 degree cnt. during winter, January is coldest month and in May and June are hottest months in the district.

The district has an average yearly rainfall of 53.82 cms. The average number of rainy days (days with rainfall of 25 mm or more) are 25 in a year. The

humidity during south west monsoon period is normally very high, which remains quite low during the rest of the year. In 2001, the average percentage of humidity in the district was 49.60.

The table given below indicates the average rainfall, temperature, and humidity of the district year wise during the decade 1991-2001.

Year	Rainfall	Temperature (in celcius)			Average
	(in cm)	Maximum	Minimum	Average	humidity.
1991	30.36	42.60	5.80	25.10	63.00
1992	75.68	43.03	7.10	26.00	69.00
1993	41.37	45.02	2.00	27.60	45.30
1994	82.77	48.50	1.50	28.03	48.20
1995	57.93	48.00	3.00	25.50	67.29
1996	63.4	44.01	0.40	24.60	55.00
1997	65.24	40.60	2.90	25.00	59.00
1998	41.85	43.30	2.90	26.50	49.00
2000	35.73	44.20	(-) 3.1	26.00	49.00

(5) Natural economic resources

Geology and minerals

The geological formation of the district is represented by different igneous sedimentary and meta sedimentary rocks. The Delhi Super Group rocks represented by Ajabgarh Group occur near the eastern border of the district and consists of schists, phyllite, marble and basic volcanics. They are intruded by granites and rhyolites, the predominant of which is the Erinpura Granite which covered the south and south eastern parts of the district. The Jalor type of granites are exposed south of Pali town and are generally pink in colour. The Melani rhyolite (volcanic) cover only small areas restricted to the south west of Pali. The rocks of the Marwar Super Group occur in the northern part of the district and are arepresented by limestone, dolomite, sandstone and shales.

Rich deposits of the minerals like lime stone, gypsum, asbestos, calcite, felspar, clay, gypsum are found in the district. Phylite and marble are found near the eastern border of the district, whereas granite and rhyolite in the south east part of the district. Asbestos is used in the industries engaged in the manufacturing of spun pipe and fittings. Calcite of high quality is found in the district which is used in ceramic and pottery industries. Large deposits of high grade limestone used for the cement manufacture are found in Sojat, Kharchi etc. The contents of calcium carbonate in lime are as high as 96.21. Granite is found in Desuri, Kharchi, Bali, Raipur and Pali tehsils. Clay deposits are found in Jaitaran tehsil. Felspar is found in Raipur tehsils and Thandi Beri, Birathiya Khurd and Bera. Calcite is also found in abundance in Raipur tehsil and Thandi Beri, Biratia Khurd and Bera. Thus Pali district is rich in minerals whose extraction is done on contract basis. Felspar, Quartz, Asbestos, Calcite, Gypsum, white clay and other clay, soap stone, Magnesite and Bali clay are considered to be principal (main) minerals of the district. On the other hand limestone, Rhyolite, Marble, Masonry stone, Brick clay, sand and Granite are considered to be secondary minerals.

During year 1991-2000 73.54 thousand tones total mining of main minerals were carried out. The following table shows total production, sale and average employment provided in these minerals are shown hereunder :

Name of mineral	Unit	Production	Sales value (in 000 Rs)	Nos. of average employed persons (per day)
A. Minerals				
Gypsum	000 tones	37.93	5,311	43.00
Quartz	000 tones	26.38	1,793	170.00
Limestone	000 tones	2,242.63	145,730	26.36
Chaina clay	000 tones	5.55	1,526	45.00
Absestos	000 tones	3.68	644	50.00
B- Secondary Minerals				
Limestone (burning)	000 tones	457.50	38,887	650.00
Marble	000 tones	40.50	3,645	610.00
Railite	000 tones	18.43	1,331	170.00
Masonary stone	000 tones	22.82	1,027	806.00
Grenite	000 tones	3.97	1,390	421.00
Kankar, Bajri	000 tones	1,054.86	42,194	85.00

Source: Office of the Director, Agriculture and Geology, Pali.

Forest, Flora and Fauna

Prior to July 1971, the forest area of the district was comes under divisional forest officers and its headquarter was in Jodhpur. After 1971, it was came in the control of Dy. Conservator of Forest, Pali. Five categories of forest are found in the district which are located at Sadri, Desuri, Beejaji Ka Guda, Sendrl and Pali. The maintenance of these forests are being

carried out by the range officers with assistance of forest security officials.

The forest of the district constitute about 6.28 percent to the total area. The forest come under subsidiary edaphic type of dry tropical forests. These are widely scattered over hillocks and ridges and those in the plains are known as grass birs. The forests have fewer and driest species along the border of Ajmer district whereas, the forests are denser and have more species along the borders of Sirohi and Udaipur district.

In 1999-2000, the district have a total area of 332.64 sq. kms as forests, out of which reserve, protected and unclassified forests area were 200.01 sq. kms, 85.57 sq kms and 47.06 sq kms respectively. During tree plantation programme in 1999-2000, 60,000 plants were planted out of these 40,000 plants are surviving.

Dhokra (Anogeissus pendula) and Salar (Boswellia Serrata) in group with other associate species from the main flora of the district. Anogessus pendula in its pure form and sometimes in misture with its associates is found between a height of 300-650 metres above mean sea level, while Boswellia serrata forests with its associates are ound on higher reaches of the Aravalli Hills.

Khejra (Prosopis spicigera), Babul (Acacia Arabica), Dhak (Butea monosperma), Gular (Ficus glomerata), Bar (Ficus bengalenis), Peepal (Ficus religiosa) and Jamun (Euginea Jambolana) are the main species found along the nullaha. Dhak (Butea monosperma), Beri (Zizyphus jujube), Khejra prosopis spicigera), Kuntha (Acacia Senegal) are the species found on plateaus.

Vitex nigundo, Adhatoda Vasica, Tamerix dioica, Adhatoda xanthium Strumariun are the shrubs found along nallahs, while the shrubs found on pleateau are Capparis sparia, Clerododendron phlomodies Grevic species. The shrubs found on poorer sites are Cassia auriculata, Calotropis and Euphorbia nivulia etc.

The grass Birs which are met with in the Sadri and Desuri ranges are composed of sparsely grown trees mixed with grass like Eragrostis species, Cenchirus ciliaris, Cenchrus setigerus, Lasirus indicus, Pichanthium annulatum Schima nurussum and Eremopogon faveolatus.

Wild Boar (Suscriatasus), Common Langoor (Semnopithecus entellus), Panther (Panthera Pardus), Wolf (Canis lupus), Hyena (Hyaena Hyaena), Jungle cat (Felis chaus), Fox (Vulpes bengalensis), Jackal (Canis anrous), Sambhar (Rose unicollor), Indian Gazelle (Gezelle benetti), Bushrat (Golunda ellioti), Common Hare (Lupus davanus), Mongoose (Herpastes edwaridisi), squirrel (Fanambrilus spp), Hedge Hog (Hemiechuins collaris) are the wild animals found in the forest of the district. Nilgai (Blue Bulls) are commonly found in the grass Birs. The reptiles like lizards and snakes are common throughout the forest area.

In Pali district the birds like bulbul, myna, pigeon, partridge, sand grouse, blue rock pigeon, green pigeon, quails, peafowls, jungle fowls, parakeets, sparrows, teals, crow pheasant, blue jar and the night jar are found in the district. Also birds like darters, cormorants, saras egrets, ibis, storks and lapwings are found near water reservoirs.

The main varieties of fish found in various bandhs of the district are currinus mrigle, myptus singhala, wallago altu, lebeo bata, chola bacalle, cureuic reba, notoptres netroteies and oplincephatus stratus and D Puties.

Soil

There are three kinds of soils available in Pali district. The first is loam to heavy loam soil which is found in Bali, Desuri and Rani Panchayat Samities. The second kind of soil is sandy loam. It is found in Kharchi, eastern part of Sojat, northern part of Pali, and Sumerpur and eastern part of Rohat. The third kind of soil is sundak loam which is found in Jaitaran, southern part of Raipur and western part of Pali and Rohat panchayat samities.

A total area of 1,233,079 hectare were reported for agricultural use during the period 1999-2000 in the district. The land classification in 1999-2000 in district was as follows :

Sl.No.	Classification of the land use	Area (in hect)	Percentage
1	Forests	77,529	6.45
2	Land put to non-agriculture use	57,903	4.69
3	Barren & uncultivated land	147,005	11.92
4	Other uncultivated land excluding fallow land	137,216	11.12
5	Cultivable land	140,547	11.40
6	Fallow land	125,297	10.16
7	Net area shown	545,582	44.84
	Total	**1,233,079**	**100.00**

Crop pattern

The western part of Rajasthan is having less productivity but Pali district enjoys comparatively more favourable condition for agricultural activities than other districts of western Rajasthan. The main crops of the district are Kharif and Rabi. Kharif crops are primarily supported by rainy water whereas Rabi crops are irrigated by other water resources. The Kharif crops are sown prior to monsoon in the month of June-July whereas Rabi crops are shown in the month of October-November and harvested in February-March. The main crops of Kharif are - Jwar, Bajra, Maize, Chillies, Groundnut, Til and Cotton. The main crops of Rabi are wheat, Barley, Gram, Rai and Mustard. The area of crops for main crops alongwith their production in 1999-2000 were reported as under :

Crops	Area (In Hectares)	Production (Metric tones)
A. Cereals		
Bajra	98,253	576
Jawar	97,660	342
Maize	22,429	2,475
Wheat	72,500	75,685
Barley	3,506	3,963
Rice	17	8
Small milletes	15	465
B. Pulses		
Gram	15,803	4,124
Other Kharif pulses	28,393	113
Tur	181	-
Other Rabi pulses	-	-
C. Sesamum		
Lin seed	54,073	152
Rai mustard	91,183	62,953
Alsi	6	1
Ground nut	6,145	374
Arandi	9,669	1,072

At the time of harvesting of these crops their market rates were comparable higher than of previous year. The price of wheat was Rs. 798 per qntl. Barley Rs. 657 per qntl, Gram Rs. 1156 per qntl. Jawar Rs. 697 per qntal, Bajra Rs. 650 per quntal and Maize Rs. 648 per qntl.

Tenancy

Tenancy in the State is governed by the Rajasthan Tenancy Act, 1955. It is one of the most important and progressive laws relating to agrarian reforms. The provisions of the Act apply in respect of land held by tenants as if the State Government were the land holder acting through the Tehsildars. In relation to the land held by him, every cultivator is either a tenant or a sub-tenant or an allottee or a trespasser. A tenant is one who is required to pay some rent on account of use and occupation of land let out to him for agricultural or allied purposes. Grantee with a favourable rate of rent, ijardar, thekedar or trespasser is not considered a tenant.

There are following classes of tenants:

a) Khatedar tenants,

b) Maliks,

c) Tenant of Khudkasht, and

d) Gair-Khatedar tenants.

A Khatedar tenant is entitled to all the rights conferred and subject to all the liabilities imposed on Khatedar tenant by the Rajasthan Tenancy Act. On the date of coming into force of Rajasthan Tenancy Act, a Zamindar or a Biswedar holding Khudkasht was treated as a Khatedar tenant irrespective of whether he was or not in occupation on the date of vesting.

Malik is a Zamindar or Biswedar who has become Malik or Khudkasht land held by him on abolition of Zamindari and Biswedari in 1959. The word “Malik” was also added to section 14 of the Rajasthan Tenancy Act to classify it as a class of tenant. Section 13 of the Act provides that a Malik is entitled to all the rights conferred and is subject to all the liabilities imposed on Khatedar tenant and so in substance this class of tenancy is nothing but a Khatedar tenant.

As Zamindars and Biswedars holding Khudkasht were treated as Khatedar tenants. A tenant of

khudkasht is essentially a sub-tenant in view of the fact that a sub-tenant is also eligible for protection of his cultivatory rights even against Khatedar tenant. Every tenant of land other than a Khatedar tenant, a tenant of Khudkasht or a sub-tenant is a Gair-Khatedar tenant.

A trespasser is a person who takes or retains possession of land without authority or who prevents another person from occupying land duly let out to him by the State. After regularisation, the trespasser becomes an allottee. An allottee is treated as a Ghair-Khatedar tenant on whom Sub-Divisional Officer shall suo-moto confer khatedari rights after ten years of allotment provided that the allottee fulfils all the terms and conditions of allotment during this period. Similar is the case of those allottees who were otherwise allotted land by the State Government.

Irrigation

During year 1999-200, total 181862 hectares are were reported as irrigated areas in Pali district. The total area was 545282 hectares. During 1999-2000, the wells are main sources of irrigation in the district which irrigates nearly two third part of irrigation area. During this period 103 tanks and 679 tube wells existed in the district. The district having total 49414 wells out of which 34335 wells have been found useful and 15089 wells were found as unuseful. The maximum wells are in the Desuri tehsil whereas minimum wells are found in Rohat tehsil. The following table shows the irrigated areas by various sources :

	Total irrigated area (In hectare)
Tank	16,875
Tube well	18,597
Wells	146,394
Canal	-
Total	181,866

Wheat and sesamum (Tic) are the major crops sown in irrigated areas of Pali district. The following tables shows the irrigated areas as per the crops sown in year 1999-2000 :

S. No.	Name of Crops	Area irrigated (in hectares)	Total ares sown (in hectares)	Percentage of irrigated area to total area sown per crop
1	2	3	4	5
1	Jawar	519	97,660	0.53
2	Bajra	975	98,253	0.92
3	Maize	5,232	22,429	23.33
4	Barley	3,427	3,506	97.75
5	Wheat	70,326	72,500	97.00
6	Other cereals and food grain	4	15	26.67
	Pulses			
7	Gram	1,111	15,803	7.03
8	Sugar cane	3	3	100.00
9	Spices	1,762	1,762	100.00
10	Fruits and Vegetable	82	82	100.00
11	Sesamum	62,727	161,076	38.94
12	Cotton	15,732	15,837	99.36
13	Jute & mesta	3	45	6.66
14	Colours	-	62,312	-
15	Medicines and intoxicants	-	-	-
16	Fodder	-	42,459	-
17	Paddy	17	17	100.00
	Total	**161,920**	**593,959**	**27.26**

Agricultural implements and Machinery

During two live stock censuses conducted in the district in 1992 and 1997 respectively. There is decline in animal driven carts in agricultural implements due to decline in number of animals and due to modernization. The number of diesel/electric driven engines have been increased manifold. The comparative numbers of agricultural implements is shown in table given under :

Agriculture implements	Year	
	1992	1997
1. Ploughs	47,340	48,660
2. Animal driven carts	21,467	15,907
3. Diesel engines	16,187	19,068
4. Sugar Grane Crushers	38	43
5. Electric pumps	14,147	17,664
6. Tractors	5,911	8,670
7. Ghanis	614	371
Total	**105,704**	**110,383**

Animal Husbandry

Pali district is a rich district from the point of cattle wealth. District has a live stock of 5 percent of

the State. On every live stock census an increasing trend was found in the numbers of cattles. The following table shows comparison between 1992 & 1997 livestock census.

Sl.No.	Animal	Year	
		1992	1997
1	2	3	4
1	Cow/Ox	423,875	416,034
2	He buffalo/she buffalo	226,256	313,531
3	Sheep	377,223	1,369,119
4	Goat	664,588	605,755
5	Horse/mute	912	983
6	Donkey	8,652	6,239
7	Camel	15,772	13,297
8	Pig	10,299	13,429
9	Dog	-	65,508
10	Poultry	29,794	42,904
	Total :	**1,757,371**	**2,846,799**

It is clear from above table that the numbers of some cattles have been reduced but there is sufficient increase in buffalo, sheep and poultry.

Rajasthan's famous cow breed Kankrej and Nagauri Ox are found in the district. Buffalo of murra breed and marwari breed of sheep, camel and goat are also found in the district.

For the health, safety and protection from various epidemics among the cattles, there are total 114 veterinary units functioning in the district, which are as follows :

Sl.No.	Institution	Numbers
1	Veterinary hospital, Pali Gr. I	1
2	Veterinary hospital, Pali Gr. II	59
3	Veterinary health centres	31
4	Mobile units	-
5	Veterinary dispensaries	13
6	District veterinary laboratory	-
7	Village based programmes	10
8	Intensive poultry development division	-
	Total	114

During session 1999-2000, total 322243 cattles were treated and given medicines in the district. 25373 cattles were sterilized and 12725 cattles were artificially inseminated.

Electricity

At present, Pali district having total 919 villages and 13 towns, which are fully electrified. This significant achievement was achieved by the district in the year 1990. There are one electric station of 220 k.v., 9 station of 132 k.v. and 62 stations of 33 k.v. are functioning in the district.

The following table depict the distribution of electricity by its various uses during decade 1989-90 to 1999-2000 :

Sl. No.	Type of use	1989-90		
		Units	Percentage	Nos. of consumers
1	Domestic	19,749	13.77	91,693
2	Commercial	14,617	10.19	15,218
3	Industrial	48,403	33.74	3,557
4	Public lighting	1,380	0.96	253
5	Public water works	8,944	6.23	559
6	Irrigation (Agriculture)	48,870	34.07	14,993
7	Others	1,485	1.04	155
	Total	**143,448**	**100.00**	**126,428**

Sl. No.	Type of use	1999-2000		
		Units	Percentage	Nos. of consumers
1	Domestic	111,215	26.64	220,565
2	Commercial	31,266	7.49	26,866
3	Industrial	181,795	43.54	5,748
4	Public lighting	2,544	0.61	347
5	Public water works	16,300	3.9	793
6	Irrigation (Agriculture)	71,114	17.03	22,697
7	Others	3,253	0.78	281
	Total	**417,487**	**100.00**	**227,297**

In the district, one office of Superintendent Engineer is functioning at Pali and three offices of Executive Engineer of RSEB are functioning at Pali, Falna and Sojat. With three offices, continuous electric supply and its management is being carried out. The electric consumption in the district are as under :

Year	Classification					
	Domestic	Non-domestic	Agriculture	Indistries	Others	Total
2000-2001	759.97	213.52	1658.92	1372.73	170.89	4176.03

Industries and Labour

District Industry office in 1956 in the district were set up. Prior to independence, traditional industries related to handloom, dying and printing of cloth, leather work and smithy and making of furniture were in existence in the district. After 1971, industrial areas were developed in Pali, Sojat, Marwar Junction, Pipasiya and Sumerpur. A branch office of Rajasthan Financial Corporation was also established in the district in 1979. The raw materials and other facilities were provided to boost up industries. Many programmes were also drawn for extension of rural and urban cottage industries.

The following industrial areas have been developed by RIICO :

1. First, second, third and four phase in Pali
2. Sumerpur
3. Marwar Junction
4. First, second and third phase in Sojat.

Pali is the main centre for the industries in the district. Sumerpur is the second main industrial centre, where process of cotton, production of edible oil, engineering goods, steel furniture and powerloom cloths are being manufactured. In Sojat city lime-stone are found in huge quantity. Many chemical and building construction based industries are there. Mehandi is also produced here which has registered its international identity. Falna is famous industrial centre for umbrellas, whereas Rani is famous for stone used in flooring and manufacturing of different kind of machinery. In the district, Maharaja Shri Ummed Mills Ltd. in Pali, and M/s G.G. Foils Ltd in Raipur tehsils Pipasiya are heavy and medium range industries where cloth and coppers foils are produced respectively.

During 1999-2000, total 8187 industries were registered in the district, in which 32853 persons were deployed. The following tables shows the different types of factories registered their number, employment and capital invested in them :

S.N.	Type of industry	No. of Units	No. of persons employed	Capital investment (in lac)
1	2	3	4	5
1	Agriculture based (food grains)	1,189	3,233	593.24
2	Mineral based	672	4,513	2,172.37
3	Leather based	2,288	5,568	175.62
4	Agricultural	212	1,088	287.02
5	Forest based (water & furniture)	626	1,731	199.72
6	Chemical based (dying, printing)	205	711	344.46
7	Textiles (cloth)	973	8,875	2,231.50
8	Repairing	469	1,326	100.36
9	Cement based (pipe, jails)	77	414	1,059.98
10	Iron based (iron implements)	547	2,114	395.71
11	Other industries (various)	929	3,280	1,235.57
	Total :	**8,187**	**32,853**	**8,795.55**

There is ample scope for the development of mineral based industries in the district. Industries units related to marble cutting and polishing can be established as marble is found near Sendra and in Dujana, Sindra and Jadri village of Raipur tehsil. The industries based on lime stone such as manufacture of calcium carbide, bleaching power and mini cement plants can be established as lime stone of commercial grade of 96.2 percent purity is found in Sojat area. Industries based on minerals like gypsum, asbestos, china clay, granite, quartz, felsper can also be established as these minerals are found here in plenty.

At the end of year 2000, there were 15399 persons registered in employment office, out of which 2839 persons were registered in the same year. During this period 117 vacancies were notified. During the end of year 2000, the persons registered for various professions are shown in the following table :

Sl. No.	Type of employment desired	No. of persons	
		1999	2000
1	2	3	4
1	Professional and other related technical services	2,148	1,763
2	Administrative and Managerial	41	8
3	Clerical	20	15
4	Selling and related services	-	-
5	Agricultural, fishery, hunting etc.	165	210
6	Service related	6	7
7	Transport service & Messengers	565	686
8	Unclassified services	18,295	12,710
	Total	**21,240**	**15,399**

It can be seen clearly from above table that during the decade persons have shown less interest in getting them selves registered with employment office, the reason behind it might be less opportunities. At the end of year 2000, the educational status of 15399 registered persons were as follows :

1.	Secondary/Matric	3,142
2.	Hr. Secondary/Sr. Secondary	3,971
3.	Graduate	1,590
4.	Post Graduate	86
5.	Technical and others	6,608
	Total	**15,397**

Trade and Commerce

Wool, sheep, goat, hides, skins, woolen cloth, wood charcoal, cumin seed, sesamum, chillies, mehandi and ajwain are the main items being exported from the district. Wool is exported to countries like England and America. The items which are imported into the district are fine cloth, ivory, raw material, general provisions, sugar, kerosene and fruits etc.

To provide trade and commerce in the district and to give them financial support 153 branches of various banks and their branches are functioning.

Sl.No.	Banks	No. of functioning branches
1	2	3
1	Commercial Bank	43
2	Regional Rural Bank	72
3	Co-Operative Bank	39
4	Land Development Bank	4
5	Urban Co-Operative Bank	5

To provide financial facilities, Rajasthan Khadi Gramodyog Commission is also playing a significant role in the district.

Transport and Communication

The district is well connected by the Western Railway. The Delhi-Ahmedabad metro-guage railway line passes from Sendra railway station to Nana via Sojat Road, Marwar Junction, Phalna and Mori Bera. A part of this district is also served by the western railway from Marwar Junction to Phulad. There are 31 railway stations in the district. Another northern railway metre-guage line also passes through the district from Marwar Junction to Rohat. All important places of the district are connected with bus routes.

Four state highways traverse the Pali district at different points. Besides it three major district roads are also running across Pali. The national highway, state highways and the major roads are maintained by State Public Works Department.

For smooth facility of public transport the State Public Works Department has prepared 1700 kms. of gravel roads connecting 57 villages and 87 hamlets and various religious places under their departmental scheme IRDF and with co-operation of M.P and M.L.A. region development schemes. Apart from above metal roads, tar coal roads and many small bridges have also been made during this decade.

The following details shows the detailsa of roads, which are maintained by Public Works Department at the end of March, 2000:

Year	National highway	Painted roads	Metallic roads	Concrette/cemented roads	Kucha roads	Total	No. of villages connected by roads
1	2	3	4	5	6	7	8
1999-2000	219	2,855	419	1,037	78	4,608	920

At the end of year 1988-89, total 19948 vehicles were registered in the district, which were increased significantly and in year 1999-2000, there were 68882 vehicles were registered in the district. The details of registered vehicle in year 1999 - 2000 were shown as under :

Type of vehicles	Numbers
1	2
1. Private cars & jeeps	4,452
2. Private buses	419
3. Motor cycles/auto rickshaws	50,293
4. Taxies and carriages	773
5. Government vehicles	472
6. Public & private carriers	1,903
7. Tractors	10,362
8. Others	208

The Rajasthan State Road Transport Corporation is conducting its bus services on two national highways in the district. First, Jodhpur-Pali Sumerpur-Sirohi and Second Jodhpur-Pali, Beawar-Ajmer. Apart from it, the district people have private and government bus services on the other routes of the district also.

At the end of year 1999-2000, the district had 378 post offices and 2 telegraph office, beside, the services of 129 telephone exchanges and 1209 STD/ PCO were also available there. A total 1084 letter box were established for collecting Dak in the district.

Local bodies & Co-Operative Movement

The district have 9 municipalities namely, Pali, Bali, Sojat, Sumerpur, Jaitaran, Takhagarh, Sadri, Falna and Rani. Sojat road and Marwar Junction are two census town. In year 1989-90, Raipur and Nimaz were also municipalities in the district, but due to non-fulfilment of norms both were declassified and were became gram panchayats.

After abolition of octori by State Government which was main source of income of municipalities. The income of these have been reduced and now they are wholly depend on the grant of government. The main item of their expenses are public sanitary and health, water, construction work, public lighting and other departmental works.

In district, there were 790 co-operative societies were in existence in the year 1999-2000, having a membership of 3058 members with 1633.44 lack as share capital and Rs. 4548.09 as working capital Rs. 4983.33 lack were given as loan and recovery was Rs. 4004.23 lack. At the end of year a sum of Rs. 7294.96 lack were outstanding against loan. In year 1999-2000, 213 agriculture credit co-operative societies, 4 primary land development bank and 362 milk co-operative societies were functioning in the district.

Gram Panchayats composition & its role

The system of Panchayati Raj was inaugurated on 2nd October 1959 in Nagaur district by than Prime Minister Late Shri Jawahar Lal Nehru. Late Shri Balwant Rai Mehta proposed the recommendation for Panchayati Raj. There are three levels of Panchayati Raj:

(1) Gram Panchayat (Village level)

(2) Panchayat Samiti (Block level)

(3) Zila Parishad (District level)

Gram Panchayat is an important institution of self-government. The institution is set for a village or village agglomeration. A Gram Panchayat is created on 2,000-8,000 population. It covers a maximum area of 6 miles. The villages, which have population below 2,000, are merged with the other villages to create a Gram Panchayat. Their tenure is of 5 years.

A Gram Panchayat consist 5 to 20 members. The Head of the Panchayat is called Sarpanch. Panch and Up-Sarpanchs are also elected. It includes a member belongs to backward class and a lady member. There are 151 Gram Panchayats in the district.

The main objectives of Gram Panchayat are to arrange the primary education, sanitation of public places, drinking water and light. It manages also the adult education, livestock and repairing of wells.

During the last years, Gram Panchayats functioned several important jobs like *Kam Ke Badley Anaj*, Construction of Panchayat Ghar, School buildings, roads and tanks. It organizes also the cattle fare. Gram Panchayat plays an important role in the development of village and its economy.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops,

worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and

the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house, but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room,

baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1. Adi Dharmi
2. Aheri
3. Badi
4. Bagri, Bagdi
5. Bairwa, Berwa
6. Bajgar
7. Balai
8. Bansphor, Bansphod
9. Baori
10. Bargi, Vargi, Birgi
11. Bawaria
12. Bedia, Beria
13. Bhand
14. Bhangi, Chura, Mehtar, Olgana, Rukhi Malkana, Halalkhor, Lalbegi, Balmiki, Valmiki, Korar, Zadmalli
15. Bidakia
16. Bola
17. Chamar, Bhambhi, Bambhi, Bhambi Jatia, Jatav, Jatava,Mochi, Raidas, Rohidas, Regar, Raigar, Ramdasia, Asadaru, Asodi, Chamadia, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Telegu Mochi, Kamati Mochi, Ranigar, Rohit, Samgar
18. Chandal
19. Dabgar
20. Dhanak, Dhanuk
21. Dhankia
22. Dhobi
23. Dholi
24. Dome, Dom
25. Gandia
26. Garancha, Gancha
27. Garo, Garura, Gurda, Garoda
28. Gavaria
29. Godhi
30. Jingar
31. Kalbelia, Sapera
32. Kamad, Kamadia
33. Kanjar, Kunjar
34. Kapadia, Sansi
35. Khangar
36. Khatik
37. Koli, Kori
38. Kooch Band, Kuchband
39. Koria
40. Madari, Bazigar
41. Mahar, Taral, Dhegumegu
42. Mahyavanshi, Dhed, Dheda, Vankar, Maru, Vankar
43. Majhabi
44. Mang, Matang, Minimadig
45. Mang, Garodi, Mang Garudi
46. Megh, Meghval, Meghwal, Menghvar
47. Mehar
48. Nat, Nut
49. Pasi
50. Rawal
51. Salvi
52. Sansi
53. Santia, Satia
54. Sarbhangi
55. Sargara
56. Singiwala
57. Thori, Nayak
58. Tirgar, Tirbanda
59. Turi

Scheduled Tribes

1. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawara, Vasava, Vasave
2. Bhil Mina
3. Damor, Damaria
4. Dhanka, Tadvi, Tataria, Valvi
5. Garasia (excluding Rajput Garasia)
6. Kathodi, Katkari, Dhor Kathodi, Dhor, Katkari Son Kathodi, Son Katkari
7. Kokna, Kokni, Kukna
8. Koli Dhor, Tokre Koli, Kolcha, Kolgha
9. Mina
10. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
11. Patelia
12. Seharia, Sehria, Sahariya

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main-worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any econom ically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit

growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having

water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types— (i) Migration within the state itself with its components (a) Migration within the district of

enumeration (intra district migration), (b) Migration from one district of state to another district of state (inter district migration) (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding - Population, its distribution

According to the 2001 census, the total population of Pali district is 1,820,251 comprising 918,856 males and 901,395 females and constituting 3.2 percent of State population and area spread over 3.6 per cent in the 9 tehsils of the district, Pali tehsil is most populous tehsil having population 307,412 while Rohat is the smallest tehsils having a population of 102,599 persons. Other tehsils in order of their population size are Bali (223,027), Desuri (215,722), Jaitaran (206,266), Sojat (205,950), Marwar Junction (191,981), Raipur (182,004) and Sumerpur (185,290).

Out of the total population of the district 78.5 per cent lives in rural areas while 21.5 per cent lives in urban areas. The corresponding proportions in rural and urban areas of the State are 76.6 per cent and 23.4 per cent respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF TEHSILS BY RESIDENCE, 1991-2001

Sl. No.	District/Tehsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Jaitaran	164,036	134,851	29,185	206,266	186,938	19,328	25.7	38.6	-33.8	17.8	9.4

9	Bali	180,832	149,232	31,600	223,027	183,802	39,225	23.3	23.2	24.1	17.5	17.6
	District Total	**1,486,432**	**1,163,085**	**323,347**	**1,820,251**	**1,429,364**	**390,887**	**22.5**	**22.9**	**20.9**	**21.8**	**21.5**

The district has registered a percentage decadal variation of 22.5 during the decade 1991-2001. The rural areas of the district has attained a higher decadal variation of 22.9 per cent as compared to that of urban area at 20.9 per cent. At tehsil level, it varies from the lowest of 16.7 per cent in Marwar Junction tehsil to a maximum of 26.2 per cent in Rohat tehsil in total areas.

There is a marginally decline in the percentage of urban population to total population from 21.8 in 1991 to 21.5 in 2001. All the tehsils have registered the up trend as that of district whose percentage of urban population has increased from 1991 to 2001 except in Jaitaran and Marwar Junction tehsils where it has decline from 17.8 and 5.9 per cent in 1991 to 9.4 and 5.5 per cent in 2001 respectively.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Of the total 949 villages, 936 are inhabited villages. Marwar Junction Panchayat Samiti has the highest number of villages i.e. 142 where as Sumerpur Panchayat Samiti with lowest of 63 villages. Jaitaran Panchayat Samiti is the most populous with 186,938 persons while Pali is the least populous Panchayat Samiti with a population of 89,939 persons. The maximum number of villages i.e. 283 are those which lie in the population range of 1000-1999. It is followed by 28.8 per cent of the inhabited villages, which have population range of 500-999. As regards to large size villages in the district, 38 are such which lie in the population range of 5000-9999 and 4 are such which have population more than 10000. In case of small size villages i.e. having population less than 500, such villages are 188 in number in the district.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

	Name of Towns
(a) New	
(i) Statutory town	Nil
(ii) Census town	Nil
(b) Denotified	
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	1. Nimaj
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c) Declassified*	1. Raipur
(d) Wholly merged with other town (s)	Nil

* Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

No new town has emerged, but Nimaj (M) has denotified and Raipur (CT) of 1991 has been declassified.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	4	0.4	82	0.0
11-20	6	0.6	527	0.0
21-50	82	8.8	50,997	3.6
51-100	297	31.7	327,264	22.9
101-200	372	39.7	689,291	48.2
201-300	113	12.1	244,573	17.1
301-500	45	4.8	93,955	6.6
501 +	17	1.8	22,675	1.6
Not known	0	0.0	0	0.0
District Total	**936**	**100.0**	**1,429,364**	**100.0**
Population Density (Rural) of the district:		119.8		

The density of population of the rural areas of the district is 119.8 of the total number of inhabited villages i.e. 936 in the district, 39.7 per cent have population density ranging from 101 to 200, followed by 31.7 per cent in the range of 51-100. Apart from these 92 villages have population density upto 50.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	905	898	947	946	937	1024
1911	908	904	936	938	931	100
1921	896	896	897	934	930	977
1931	907	906	903	954	948	1016
1941	906	907	897	943	942	955
1951	921	919	928	946	948	933
1961	908	913	882	943	948	897
1971	911	919	875	950	959	881
1981	919	930	877	946	961	886
1991	910	919	879	956	972	902
2001	**921**	**930**	**890**	**981**	**1000**	**915**

Note: Sex ratio has been defined here as the number of females per 1000 males.

The district has witnessed a fluctuating trend in sex ratio since 1901. From 946 in 1901 it declined to 938 in 1911. It again declined to 934 in 1921 and again increased to 954 in 1931 and so forth. During the last decade i.e. 1991-2001 it has increased from 956 in 1991 to 981 in 2001.

In comparison to rural areas of the district the sex ratio in urban areas has been higher upto 1941 and favoring females. Form 1951 to2001, the sex ratio in rural areas has been higher than that of in urban areas. The district has always registered higher sex ratio as compared to that of state since 1901 to 2001.

TABLE 6 : SEX RATIO BY TEHSILS, 2001

Sl. No.	Name of Tehsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Jaitaran	963	968	915
2	Raipur	985	985	0
3	Sojat	988	1,009	927
4	Rohat	965	965	0
5	Pali	930	995	890
6	Marwar Junction	1,006	1,011	928
7	Desuri	1,036	1,047	982
8	Sumerpur	977	995	926
9	Bali	999	1,012	940
	District Total	**981**	**1,000**	**915**

The district has registered a sex ratio of 981 in 2001. Where as for rural and urban areas it is 1,000 and 915 respectively. At the tehsil level, the highest sex ratio of 1,036 has been registered by Desuri tehsil and the lowest of 930 by Pali tehsil for total areas. In rural areas the highest sex ratio of 1,047 has been registered by Desuri Tehsil and lowest of 968 by rohat tehsil. In case of urban areas the highest sex ratio of 982 has been attained by Desuri tehsil and the lowest of 890 by Pali tehsil.

TABLE 7 : SEX RATIO BY PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Sex ratio
1	2	3
1	Jaitaran	968
2	Raipur	985
3	Sojat	1,009
4	Rohat	965

		Rural	35,840	18,426	17,414	945
		Urban	6,550	3,428	3,122	911
	District Total:	**Total**	**337,864**	**175,535**	**162,329**	**925**
		Rural	**271,769**	**141,009**	**130,760**	**927**
		Urban	**66,095**	**34,526**	**31,569**	**914**

The district has registered a sex ratio in the population of the age group 0-6 of 925, 927 and 914 for the total, rural and urban areas respectively. In rural areas at tehsil level, the highest sex ratio of 945 has been registered by Bali tehsil and the lowest of 903 by Sumerpur tehsil. Similarly in the urban areas of tehsils, the highest sex ratio has been registered by Jairtaran tehsil at 957 and the lowest by Sumerpur tehsil at 896.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females

	District (Rural) Total	**271,769**	**141,009**	**130,760**	**927**

At the Panchayat Samiti level the pattern of sex ratio in the age group 0-6 is just the same as analyzed for rural areas of tehsils in Table 10.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	44	4.7	3,332	1.2
700-749	36	3.8	7,007	2.6
750-799	94	10.0	17,941	6.6
800-849	92	9.8	27,381	10.1
850-899	120	12.8	46,502	17.1
900-949	142	15.2	52,503	19.3
950-999	122	13.0	53,246	19.6
1000-1099	172	18.4	46,266	17.0
1100+	114	12.2	17,591	6.5
District (Rural) Total	**936**	**100.0**	**271,769**	**100.0**
Sex ratio (Rural) for District:		927		

Of the total inhabited villages (936) of the district 41.2 per cent are such which have sex ratio below 900. Even among them 44 and 36 villages have sex ratio less than 700 and 700 to 749 respectively. It is significant to note that 286(30.6 per cent) of the total inhabited villages have sex ratios favouring females i.e. 1000 or more. Among them 114 villages have sex ratios even more than 1100.

		Urban	**390,887**	**60,022**	**10,676**	**15.4**	**2.7**

The proportion of scheduled castes and scheduled tribes population to the total population of the district is found to be 17.8 per cent and 5.8 per cent respectively. For rural areas the respective proportions for scheduled castes and scheduled tribes comes out to be 18.4 per cent and 6.7 per cent. Similarly in urban areas of the district the percentage of scheduled castes population and the scheduled tribes population to the total population is found to be 15.4 and 2.7 respectively.

As tehsil level, the proportion of scheduled castes to total population varies for 19.8 per cent in Rohat tehsil to 14.0 per cent in Raipur tehsil. In case of scheduled tribes this proportion varies from 22.6 per cent in Bali tehsil to 0.1 per cent in Jaitaran and Sojat tehsils respectively.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN PANCHAYAT SAMITIES, 2001

Sl. No.	Name of Panchayat Samiti	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

	District (Rural) Total	**1,429,364**	**263,430**	**95,138**	**18.4**	**6.7**

The percentage of scheduled castes population to total population at Panchayat Samiti level varies from 21.4 in Sojat Panchayat Samiti to 14.0 in Raipur Panchayat Samiti. In case of scheduled tribes the highest proportion of 26.9 has been recorded in Bali Panchayat Samiti. Whereas the lowest of 0.1 per cent each has been recorded in Jaitaran and Sojat Panchayat Samities respectively.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	82	8.8	0	0.0
Less than 5	71	7.6	1,726	0.7
5-10	105	11.2	12,249	4.6

76 and above	4	0.4	903	0.3
District Total	**936**	**100.0**	**263,430**	**100.0**

Of the total 936 inhabited villages in the district, 82 villages are such where no scheduled castes population exists. The maximum number of villages i.e. 340 which accounts 36.3 per cent of the total inhabited villages have scheduled caste population in the range of 11 to 20 per cent to their total population followed by 223 villages in the range of 21 to 30 per cent. On the higher side, 11 and 4 villages have scheduled castes population ranging from 51 to 75 and 76 and above respectively.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	529	56.5	0	0.0
Less than 5	192	20.5	4,400	4.6
5-10	73	7.8	11,812	12.4

In the district, 39.8 per cent of the total population comprises of total workers (main + marginal) and the rest 60.2 per cent as non-workers. Of the total workers (39.8 percent), 28.5 per cent are as main workers and the rest 11.4 per cent as marginal workers. Sex wise, 48.5 per cent of male population is that of workers whereas for females this percentage is 30.9. At the tehsil level, Rohat tehsil has recorded the highest percentage of total workers for males of 50.4 per cent and the lowest of 46.7 per cent by Desuri tehil. On the other hand, Jaitaran tehsil has recorded the highest percentage of total workers for females of 39.9 per cent and the lowest by Pali tehsil of 19.6 per cent.

Less than half (42.2 per cent) of the rural population consists of workers. There is much difference in the work participation rates of males and females being 48.5 per cent and 35.9 per cent respectively for the rural areas of the district. Like at tehsil level, at Panchayat Samiti level too, the highest percentage of male workers has been recorded in Rohat Panchayat Samiti at 50.4 percentand the lowest has been recorded in Rani Panchayat Samiti of 45.6 per cent. However, the highest percentages of femal total workers has been registered by Jaitaran of 42.3 per cent and the lowest in sumerpur Panchayat samiti of 29.7 per cent.

\+ To be arranged in alphabetical order.
^ The names of constituent units of U.A. are given seprately.
* In case of towns having outgrowth an astrrisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

In contrast to the rural areas of the district only 31.1 per cent of the urban population are as workers (main + marginal). Apart from this much variation is also seen in the percentage of male and female workers, which are 48.6 and 12.0 respectively. Among the towns, the percentage of workers varies from 36.6 in Sadri (M) to 28.5 in Marwar Junction (CT).

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN TEHSILS, 2001

Note: Percent of Worker to total worker are given in brackets

Other workers are the main working force in the district as they form 38.9 per cent of total workers. It is followed by cultivators (36.8 per cent), agricultural labourers (20.0 per cent) etc. Females (98,826) outnumber males (46,451) as agricultural labors. Much variation in the percentages of male workers (50.1) and female workers (20.9) classified as other workers is seen in the district.

At tehsil level, the percentage of cultivators to total workers varies from 52.5 in Rohat tehsil followed by 50.2 in Jaitaran tehsil to 20.3 in Pali tehsil. For Household Industry workers, it varies from 5.3 per cent in Marwar Junction tehsil to 2.6 per cent in Rohat tehsil. In case of 'other workers' the highest percentage of 63.7 has been registered by Pali tehsil while the lowest of 21.5 per cent in Rohat tehsil.

				(35.9)	**(41.4)**	**(37.0)**	**(3.8)**	**(17.8)**

Note: Percentage of workers to total workers are given in brackets.

Less than half i.e. 42.2 per cent of the total rural population of the district is engaged in economic activities being workers. Of the total workers, most are engaged in agricultural activities i.e. 42.8 per cent are as cultivators and 23.0 per cent as agricultural labourers. Only 4.0 per cent of the workers are engaged in household industries whereas the significantly 30.2 per cent in other works.

The percentage of workers as 'other workers' is higher than that of agricultural laborers in all the Panchayat Samities except in Jaitaran,Sojat and Rohat Panchayat Samities wher it is just the opposite.

Sex wise, percentage of male workers is higher in all the four economic categories except agricultural laborers where their percentage is 12.7 as compared to that of females at 37.0 at the district level.

\+ To be arranged in alphabetical order.
^ The names of constituent units of U.A.are given separately.
* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

The percentage of workers to total population of urban areas is significantly quite low being only 31.1 per cent as compared to that of rural areas of the district being 42.2 per cent. Majority of the workers i.e. 81.9 percent are as other workers followed by cultivators (7.3 percent).

Almost similar trend is visible in all the municipal towns except in Jaitaran (M), sojat Road (CT), Sadri (M)and Takhtgarh (M) where the percentage of agricultural laborers is higher than that of household industry workers.

Sex wise percentage of male workers as other workers is 87.8 whereas it is 55.9 per cent for female workers. On the other hand, percentage of female cultivators (15.7 per cent) is higher than that of male cultivator's (5.4) at the district level for urban areas.

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total (936) inhabited villages, 908 (97.0 per cent) have educational facilities. In case of medical amenities only 48.2 per cent of inhabited villages have such amenities. A significant number i.e.894 (95.5percent) villages have improved drinking water amenities. In the communication field only 37.1 per cent of villages have post office facilities while 79.0 per cent have telephone facilities. In the banking field the picture is gloomy as only 115 (12.3 per cent) villages have banks. More than 60 per cent i.e. (615) are linked with pucca approach roads whereas 94.3 per cent have power supply.

At Panchayat Samiti level, Sojat Panchayat samiti have the higher percentage i.e. cent percent of villages having educational facilities. For medical amenities it is Sumerpur Panchayat Samiti , which have highest percentage of 61.9. Much variation is seen among the Panchayat Samiti having telephone facilities. Sumerpur Panchayat Samiti has the highest percentage of villages i.e. 93.7, which have telephone facilities whereas Jaitaran has the minimum percentage of 59.2 for such facility. Rohat and Rani Panchayat Samiti has the distinction of 98.7 cent percent villages having power supply.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Almost entire (99.6 per cent) rural population of the district is being served by educational amenities. It varies from 100.0 per cent in Sojat Panchayat Samiti to 98.9 per cent in Pali Panchayat Samiti. The highest percentage (82.7) of population availing medical amenities has been found in Bali Panchayat Samiti while lowest of 53.1 in Rohat Panchayat Samiti. Raipur, Rani and Bali Panchayat Samiti at the top where cent per cent of the population has access to improved drinking water while Pali Panchayat Samiti is at the bottom with 94.0 per cent. Sumerpur Panchayat Samiti is in the forefront in the field by telephone facilities where 97.7 per cent of the population has been served by this facility while Rohat Panchayat Samiti is at bottom with 78.1 per cent. Only 34.0 per cent of the rural population is being served with banking facilities whereas 97.9 per cent have access to power supply. 99.9 percent of the population of Rani Panchayat Samiti is being served with power supply.

There are only 30 villages in the district, which do not have primary schools, of these, in 27 villages this amenity is available in less than 5 kilometers. In case of middle schools, 507 villages do not have this amenity. Of these, for 331 villages this amenity is available at a distance of less than 5 km, for 165 villages at a distance of 5-10 km. Only 2 villages in the district have a degree college. For most of the villages i.e. 870, the degree colleges are available at a distance beyond 10 km.

Likewise, 14 villages have hospitals. For this in most of the villages i.e. 703 one has to go for more than 10 km. Similarly post office amenity is not available to 589 villages. Of these, for 351 villages, this amenity is available at a distance less than 5 km. Of the total 936 villages, Bus services are not available in 300 villages. Among these, this facility is available at a distance of less than 5 km and 5 to 10 km for 175 and 104 villages respectively.

As regards to banking services, 868 and 851 villages do not have commercial banks and cooperative banks respectively. For most of the villages i.e. 318 and 401 one has to go for more than 10 km for commercial banks and cooperative banks respectively.

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Of the total inhabited village's (936), majority (283) of them have population range of 1000-1999. It is followed by 270 villages in the range of 500-999. There are 38 and 4 such villages, which have population range of 5000-9999 and 10000+ respectively. As the size of villages increases the type of amenities are being available to majority of the village. All the amenities are available to almost all the villages in the population range of 5000 - 9999 and 10000 +. While in case of small size of villages i.e. in the range of 500 - 999, though educational amenities is available to 267 villages of the total 270, medical, post office, Banks etc are available to only 64, 34 and 4 villages respectively.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of Panchayat Samiti	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Jaitaran	103	132,941	67.2	34.9
2	Raipur	109	108,375	45.7	45.1
3	Sojat	115	159,108	61.3	20.2
4	Rohat	79	140,764	73.8	11.8
5	Pali	80	124,155	66.9	14.1
6	Marwar Junction	142	138,992	53.8	38.4
7	Rani	76	76,991	64.1	31.6
8	Sumerpur	63	91,540	63.2	49.9
9	Bali	91	137,744	39.3	33.1
10	Desuri	78	82,403	43.6	43.4
	District Total	**936**	**1,193,013**	**58.3**	**29.3**

Note : Cultivable area = irrigated area + unirrigated area

Of the total rural area of the district (of inhabited villages) 58.3 per cent is cultivable. Apart from this only 29.3 per cent of the total cultivable area is being irrigated. At the panchayat samiti level the highest percentage of cultivable area to total area is found at 73.8 per cent in Rohat Panchayat Samiti followed by 67.2 per cent in Jaitaran and the lowest of 39.3 per cent in Bali Panchayat Samiti. As regards to irrigated area, the highest percentage of 49.9 is found in Sumerpur Panchayat Samiti whereas 11.8 in Rohat Panchayat Samiti.

5	Pali(MCL)	22
6	Rani(M)	20
7	Sadri(M)	14
8	Sojat(M)	30
9	Sojat Road(CT)	5
10	Sumerpur(M)	44
11	Takhatgarh(M)	25
	District Total	**27**

+ To be arranged in alphabetical order.

The number of beds in medical institutions in towns per 10,000 population is found to be only 27. The highest number of beds per 10000 population is recorded at 59 in Falna (M) followed by Sumerpur (M) (44), Marwar Junction (34), Bali (32) etc. It is found the lowest at 5 in Sojat Road (CT).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town+	Total popu-lation	Slum popu-lation	Percentage of slum population to total population
1	2	3	4	5
1	Bali	18,201	2,520	13.8
2	Falna	21,024	3,150	15.0
3	Jaitaran	19,328	1,623	8.4
4	Pali	187,641	33,820	18.0
5	Rani	12,392	640	5.2
6	Sadari	24,413	7,341	30.1
7	Sojat	38,883	2,000	5.1
8	Sumerpur	31,482	5,045	16.0
9	Takhat Garh	15,809	1,733	11.0
	District Total	**369,173**	**57,872**	**15.7**

+ To be arranged in alphabetical order.

About 15.7 of urban population of the district lives in slums. At the town level it varies from a maximum of 30.1 per cent in Sadri (M) to a lowest of 5.1 per cent in Sojat (M) towns.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town+	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bali (M)	Cotton Handloom Cloth Mustard Oil	Raw Cotton Oilseeds
2	Falna (M)	Umbrella Pick Axes Shared Dish Antenna	Umbrella Pick Axes Shared Dish Antenna
3	Jaitaran (M)	Mustard Oil Earthen Pot Chilli Powder	Cumin Sead Oil Seed Mustard
4	Marwar Junction (CT)	Plastic Pipe Elect.Woodn Board Lather Mojari	Chilli Cotton Oil Seeds
5	Pali (MCL)	Dying Printing Plastics Bangles Granites	Printed Cloth Plastic Bangles Granites
6	Rani (M)	Pick Axe Iron Angles Iron Goods	Pick Axe Spades Iron Tor
7	Sadri (M)	Iron Goods Lather Shoes Wooden Furniture	Vegatables Oil Seeds Cotton
8	Sojat (M)	Mahandi Powder Lime Stone Plastic Pipe	Mehandi Lime Stone Ajwain
9	Sojat Road (CT)	Lime Cloth Lather Mojari	Myrtle Lime Lime Stone
10	Sumerpur (M)	Domestic Steel Conta Edible Oil Stainles Steel Fabri	Grains Mustard Steel Furniture
11	Takhatgarh (M)	Jhula Pump Antenna Disk	Oil Seed Pump Jhula

+ To be arranged in alphabetical order.

Iron goods which includes pick Axes and Dish Antens are mainly manufactured in Falna (M) and Rani (M). Besides it, Mustured oil, Chilli powder and Mehandi powder etc. is being also manufactured in Bali (M), Jaitaran (M) and Sojat (M). Other commodities being manufactured in various towns are - Lime stone, Plastic Bangles and Leather Mojari's etc.

Edible Oil, Oil Seeds, Pick Axes are the main commodities being exported from various towns. Apart from these, Iron Tor, Printed Cloth is the other main items being exported from various towns of Pali district. Cotton is also exported from the Marwar Junction and Sadri municipalities.

Data source: Census of India 2001.H-Series:" Tables on Houses, Household amenities and Assests"

Of the total households (353,940) of the district, majority i.e. 325,516 (92.0 per cent) are living in their owned houses whereas only 23398 households (6.6 per cent) have rented houses. In the owned and rented categories, the median number of rooms a household possess are 2 and in other category, the medium number of rooms is 1. As regards to rural areas of the district, 95.5 per cent of the households are living in their owned dwellings whereas in urban areas this percentage is 77.8. The median number of rooms in owned, rented and others categories are the same for rural and urban areas of the district. In urban areas the medium number of rooms in 'rented' category is 1 and for other categories it is same as that of in rural areas. The households belonging to scheduled tribes has higher percentage (95.4) having owned dwellings as compared to scheduled castes households (93.5).

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note:

Permanent: 1. Permanent houses refers to those houses whose wall and roofs are made of pucca materials i.e. where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi-permanent: 2. Semi-permanent houses refer to those houses made of other types of materials.

Temporary: 3. Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

Of the total number of households (353,940), 250,430 are living in permanent, 83,788 in semi permanent and 19,707 in temporary houses. At the tehsil level, the maximum number of households (44,103) (17.6 percent) living in permanent houses is in Pali tehsil, whereas the minimum of 5,919 (2.40 per cent) has been found in Rohat tehsil. In the rural areas of the district, the maximum number of households (28,484) living in permanent houses has been found in Desuri tehsil whereas the lowest of 5,919 households in Rohat tehsil. In the urban areas the maximum (29,494) and the minimum (1801) number of households living in permanent houses has been recorded in Marwar Junction tehsils.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

(i) **Improved drinking water :** Majority of the households i.e. 60.4 per cent have drinking water facility in the district. For rural and urban areas, these percentages are 53.5 and 88.1 respectively. At tehsil level, for rural areas, the highest percentage (72.6) of households availing this facility has been found in Sumerpur tehsil whereas for urban areas it is 98.7 per cent in Marwar Junction tehsil.

(ii) **Electricity :** More than 65 per cent i.e. 66.4 per cent of households are using electricity. However there is much wide gap in the percentage of households using electricity in the rural (61.4 per cent) and urban (86.3 per cent) areas of the district. At tehsil level it varies from a maximum of 78.7 per cent to a minimum of 50.9 per cent of households using electricity.

(iii) **Bathroom :** About one third i.e. 33.8 per cent of the households have bathrooms in the district. Here too much wider gap is seen in the percentage of households having bathroom in rural and urban areas, as these are 26.9 per cent and 61.7 per cent respectively. Similar trend is seen in all the tehsils of the district.

(iv) **Toilet :** In case of toilets, the picture is not so good especially in rural areas of the district. Only 11.6 per cent of households of the rural areas have

toilet facility as against 59.0 per cent in the urban areas. The highest percentage (42.0) of households having toilet facility is found in Pali tehsil whereas the lowest of 4.7 per cent in Rohat tehsil.

(v) **Drainage :** In case of use of drainage, the position is some what better than toiletes as 46.8 per cent of households have drainage in the houses. In rural areas of the district, 39.1 per cent of households have drainage system as against 77.7 per cent in urban areas.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."
Percentage in brackets.

Majority of the households (81.7 per cent) of the district is using firewood as fuel followed by cooking gas (10.4 per cent), kerosene (4.0 per cent), and crop residue (2.6 per cent). In the rural and urban areas of the district, much deviation is seen in the percentage of households using fire wood and cooking gas as 91.4 per cent and 3.7 per cent of households of rural areas are using these respectively in comparison of 42.8 per cent and 37.5 per cent of urban areas respectively. Similar trend is seen at tehsil level also.

Data source: Census of India 2001.H-Series:" Tables on Houses, Household amenities and Assests"

(i) **Banking services :** Only 30.6 per cent of the total household's (353,940) are availing Banking services whereas in rural and urban areas this percentage is 28.6 and 38.6 respectively. At tehsil level, the highest number of households (17,118) availing this facility has been found in Pali tehsil, while the lowest (4348) in Rohat tehsil.

(ii) **Radio/Transistor :** Of the total household's of the district, 37.7 per cent are in possession of Radio/Transistor. Similarly in rural and urban areas of the district, the percentage of households having radio/transistor is 37.5 and 38.6 per cent respectively.

(iii) **Television :** In case of Television, the percentage of households possessing it is much higher i.e. 50.9 per cent in urban areas than that of in rural areas at 14.3 per cent only.

(iv) **Telephone :** Only 8.9 per cent of the total household's of the district have telephones. The gap is much wider in rural and urban areas of the district where 6.4 per cent and 19.3 per cent of their respective total households have telephones respectively.

(v) **Auto mobiles :** In case of two wheelers, only 13.3 per cent of the households have either motor cycle or scooter or moped. For rural and urban areas these percentage are 10.4 and 25.0 respectively. In rural areas 2.0 percent of households have four whealers whereas in urban areas 4.1 percent of households have four wheelers.

It is very significant that one third half of the households i.e. 33.9 per cent do not have any of the specified assets. In rural areas this percentage is even higher i.e. 37.4 as compared to that of in urban areas at 19.4 percent.

(xi) Other Developmental Activities during 1999-2000 :

Desert Development Programme

Pali district being situated in semi desert part of western Rajasthan, always faces famines and droughts. On the recommendations of National Agriculture Commission, programmes related to desert development were implemented in 1977-78 under these programmes, includes coil conservation, forest conservation, tree plantation, irrigation, horticulture and sheep and wool development. During the year 1999-2000, a sum of Rs. 439.99 laks were spent on desert development programme.

Integrated rural development programme

Under the integrated rural development programme, it is being tried to uplift the poorest among poor above the poverty line during the year 1999-2000. A total of 2709 persons were benefited under this scheme, out of which 897 persons were belonging to schedule caste, 109 persons of scheduled tribe and 930 women were benefited. Similarly, for the self employment for the families, technical training were provided to them by trained technicians under Trysem Scheme. This scheme was closed in 1999-2000. In year 1998-99, 342 youths were trained under this scheme.

Scheduled Caste/Scheduled Tribe Development Programme :

For the welfare and economic development of Scheduled Castes, in the district, many schemes separately for urban and rural areas has been launched by the Rajasthan Scheduled Caste/Scheduled Tribe Co-Operative Finance and Development Corporation. Package of programmes shop scheme, auto rickshaw scheme are the schemes for urban areas. Similarly, for rural areas, the schemes are agricultural implements schemes shop scheme, artisan schemes, collective boring blast, and electrification etc. During the year 1999-2000, a total 1823 persons were benefited in various schemes. Besides for the upliftment of SC/ST MADA and scattered tribal programmes are also functioning there.

Ration facility

In order to provide essential commodities to the masses, fair prices shops are run by the government in rural and urban area of the district. In rural area, 524 shops are providing this facility to 291591 ration card holder and in urban area, 136 shops are providing this facility to 83691 ration card holders.

(a) M.P. area development found scheme

In this scheme, during 5 years 1996 to 2000 total 716 works were sanctioned, out of which 368 works have been completed. A sum of Rs. 500 laks were sanctioned for these works, out of which 296.22 laks were spent.

(b) M.L.A. area development scheme

In this scheme, during year 1999-2000, 261 works were sanctioned, out of which only 65 works have been completed for this scheme. Rs. 200 laks were sanctioned out of which only Rs. 30.94 laks were spent on these works. Invisaged in about 167 thousand hectares of land.

Social and Cultural Activities

Fairs and Festivals

The major part of population resides in the district area Hindu, but devotee of others religions also live here, accoardingly festivals are being celebrated in the district. The main festivals of hindus are deepawali, holi, gangaur, teej, navratri, dussehara, makar sankranti, basant panchmi, janmasthami, raksha bandhan, sheetla ashtimi and sawan somwar. Guru Nank and Guru Govind Singh birthday and Lohiri are main festivals of sikh community. Moharrum, Id-ul-zuha, Id-ul-fitr and Barawafat are main festivals celebrated by muslim community. Mahavir jayanti is main festival of Jain community. The christians celebrate Christmas.

In social life, fairs and festivals are important source of enjoyment and entertainment to the people. Beside local fairs, depict social and cultural heritage of the area. These fairs are also income source for local bodies. The main fairs and festivals taking place in the district are mentioned as under :

Baba Ramdeoji Fair

The fair is held at Boratiya in Raipur tehsil on Bhadrapad Sudi 21 (August-September) every year. About 65000 people assemble at the old temple of Ramdeoji to worship him and perform "Mundan" ceremony of their children. Sendra is the nearest railway station to it. The fair is also held at Sawrad in Marwar Junction tehsil.

Sheetla Saptami Fair

It is the main fair of the district which is held at Sojat on Chaitra Budi 7 (March-April) every year. About 20,000 people assemble in this fair to worship Sheetla Mata. The people put "Pujapa" and other offerings in the temple in the honour of the Mata on this day. people are eating meal prepared a day before. The common belief among the people is that by doing so, their children are safe guarded by "Mata" against small pox. The fairs of Sheetla Mata are also held at Bayad in Pali Tehsil, Isali in Marwar junction and at Chawd in Bali tehsil.

Barkana Parasnath Fair

The fair is held in the village Barkana of Desuri tehsil on Posh Badi 10 (December-January) every year. There is a temple dedicated to the diety of Parasnath. A congregation of about 10000 assemble in this fair for worship of lord Parasnath.

Sewari Cattle Fair

This fair is held near village Sewari of Bali tehsil for five days from Posh Badi 2 to Posh Badi 6 (December-January) every year. Sale and purches of animals take place in the fair and nearly 15000 people gather here. The nearest railway station is Phalana for this fair.

Apart from these main festivals, other festivals are also celebrated in the district which have their local importance.

Name of fair/festival	Place	Date	People congregated
Ranakpur fair	Ranakpur	Phalgun Shukla 4&5	36,000
Parushram Mahdeo	Parushram Mahadeo	Shrawan Krishna 6&7	58,000
Nimbo ka Nath	Nimbo Ka Nath	Shiv Rati	20,000
Chontila Peer	Peer Duhey Shah Dargah	Kartik Krishna 1 & 2	21,000
Sonana Khetalji	Sonana Sarangwas	Chaitra Shukla 1	75,000
Gangaur	Aavwa	Chatra Sudi 3	10,000
Nimbaj cattle fair	Nimbaj	Feb-08	18,000

(xii) Brief description of places of religious, historical or archaeological importance in village and places of tourist interest in the towns of the district

The district possesses several places of religious and historical importance which have been at one time or another important in the history of this region. Some of these are.

Auwa

Auwa is situated 12 km south of Marwar Junction. This was a part of Sojat district of Jodhpur emperor in pre-independence period. This place came into prominence during the upheaval of 1857 when Thakur Kushal Singh of Auwa revolted against British army. An ancient tample of lord Mahadeo is situated here, which is said to be built in 11th century.

Bali

Bali is the headquarter of the sub-division, tehsil and Panchayat Samiti of the same name and is situated 8 km southeast of Phalna Railway Station on the left bank of a stream called the Mitri. Prior to the formation of Rajasthan it was part of Jodhpur state. It possesses an old fort and many Jain and hindu temples. About 12 kms to the south-west of Bali town is situated a village namely Beejapur in proximity of which is a site where remains of an ancient city called Hatundi of Hastikundi were excavated. The place is also known for its Jain temple of Rata Mahavirji.

Ghanerao

Ghanerao is a village in Desuri tehsil and is situated south-west of Desuri on the road leading to Sadri. It was held by a first class jagirdar in the erstwhile state of Jodhpur. The village has many Hindu and Jain temples in it and in its vicinity. Some of them are quite old. The Gajanan Temple is a beautiful place. A mosque is also situated in the village.

Nadol

Nadol is situated in north west of Desuri on Rani Desuri road. The ancient ruins still speak of the past glory which this place enjoyed. Mohhmad of Gaznavi on his march against Somnath temple is said to have passed through Nadol. It was capital of Shakambhari Rajputs in middle age era. In this village and its nearby area, there are many famous Jain and Hindu temples. Out of these, the main temples are - Padma Prabhunath Jain temple, Somenath Rikheshwar Mahadeo, Aashapurna Matani and Hanuman Mandir etc.

About 9 km away from Nadol, is a village known as Barkana on Desuri-Rani road where a beautiful Parasnathji Jain temple counted among the Panch Tirth of Jains in the district is situated and is said to be very old.

Pali

Pali was an international city in pre middle age. In the past, it was a very important trade centre, where the goods from China and middle east were exchanged. Later on many battles took place for Godwar area between rulers of Mewar and Marwar. Presently Pali is the headquarter of district, sub division, tehsil and panchayat samiti. It is situated on the right bank of Bandi river on Jodhpur, Marwar Junction railway line. It is said that Paliwal Brahmins take their name from this town. Since it being the headquarter of the district administration, various important offices of the state and central government are located here. Many temples are situated here. The ancient temple of Somnath and Naulakha are also here in which very beautiful embroidery work can be seen.

Ranakpur

Ranakpur is a world famous place. The Jain religion grew here in the past. The temples spread out around Ranakpur prove it. Ranakpur situated about 101 km south east of Bali town and about 9 km south of Sadri town amidst the hills of the Aravali range in Desuri tehsil is famous for its Jain temples. The temple covers a vast area and consists of 29 halls containing over 1444 pillars. The specialiy of these pillars are that all these pillars are different to earh other. The light, shade and decoration on ceiling of the temple is beautiful. The temple was built during the reign of Rana Kumbha of Mewar in 15th centuary. There are Jain temples of Neminath and Parshwanath also, and one surya temple. Tourist are visiting this place in large numbers and boarding and lodging facility are provided by tourism department.

Sojat

Sojat city, the headquarter of the sub-division, tehsil and Panchayat Samiti of the same name is situated on the left bank of the Sukri river about 40 km norty-east of the Pali town. In ancient times the place is said to have been known as Tamravati; named perhaps owing to the large number of copper mines then found here. The town has a fort, a big reservoir and several temples. There are hillocks near the town and old temple of Chamunda Mata is located on the top of one of the hillocks. Dargah of Pir Mastan in the town attracts a large number of visitors on Urs.

Jawai-Dam

Jawai-dam is situated near Sumerpur which is the largest dam of western Rajasthan. It is a modern development which attracts tourist in large number. The dam is fulfilling drinking water demand of hundreds of villages of Jodhpur and Pali town, beside, it provides irrigation facility to thousand acre of land of Pali and Jalore district.

Besides above many other worth visiting places of tourist interest are in the district. These are the Nimbo-Nath temple, which is situated at the bottom of hillock on Phalna-Sanderao road, which is said to be of Pamdava age. It is said that Pandav's mother Kunti worshipped lord Shiva here. In the east, 14 km away from Sadri, cave of Parushram is situated 3995 feet high from sea level, which is known as Parushram Mahadev. It is said that Parushramji worshiped lord Shiva here. The surrounding area has been declared a bird sanctuary by the State Government. The Samadhi of Sant Marodhar Kesri and 108 storyed Kirti Stambh is also worth visiting in Pawan Dhan Jaitaran. Besides Samadhis, Siriyals, in June Khera, Marwar-Mewar area in Desuri tehsil, Karni Mata mandir in Pali, Ajayab ghar, Nawal Khan pilgrim in Pali and on the bank of Badi river Dargah of Mastan Baba. These all are of tourist interest.

(xiii) Scope of Village and Town Directory

In Part-A of the District Census Handbook, entitled as Village and Town Directory, an attempt has been made to present information regarding various amenities/facilities available in every rural/ urban unit of the State. The unit of the rural areas is village and that of urban area is town/urban agglomeration. Information regarding rural areas and Census Towns has been gathered through Patwaries while that in respect of urban areas other than Census Towns has been collected through the concerned municipality/Cantonment Board/Notified Area Committee. In order to have the aforesaid information authenticated the concerned departments and agencies were also contacted to furnish information available with them. All the information gathered about amenities relate to year 1999 and those pertaining to land-use pattern pertain to Samvat Year 2055 i.e. the agricultural year ending on the 30th June, 1999.

Village Directory

It will be helpful at the outset to have an idea of the items for which information has been included in the Village Directory. Information in respect of each village has been presented through a twenty three column format in which villages have been presented in order of their names and Permanent Location code Number (PLCN) at State level. The first four columns (2-5) give general information i.e. Name of village and Permanent location code number, area in hectares, population and number of households residing in villages as per Census 2001.The amenities available in the village have been shown in columns 6-18. The information regarding land-use pattern has been given in columns 19-23. As a special feature for Census-2001 some new columns 10-12 and 17-18 are first time incorporated viz. commercial and cooperative Bank, Agricultural/non Agricultural and other credit societies, Recreational and cultural facilities, News Paper/Magazine and most important commodity manufactured in the village. In case of uninhabited villages, the information has been given relating to columns 1-3 and 19-23 only and in the remaining columns the word 'uninhabited' has been mentioned. At the end of entries of each Panchayat Samiti the totals relating to columns 3-11, 13-14, 16-17,19 and 21-23 (total area, amenities and land-use break-up) have also been given.

Various amenities like drinking water, communication, post and telegraphs etc. have been shown against the name of the referent village if they are available within the village with the help of various codes. The Code Structure relating to various columns has been given in the beginning of Section-I to Part-A of this book. The number of each type of amenity has been indicated in parentheses after the suitable code in case of educational, medical and post & telegraph facilities.

If any amenity is not available within the village a dash (-) has been shown in the relevant column and next to it, the distance of the nearest place from the referent village where the facility is available has been given in broad distance ranges viz. <5 km, 5-10 km & 10+ km.

The following pattern has been adopted for indicating the educational institutions:

(i) Schools up to Class V have been treated as primary schools. They include Nursery Schools, Kindegarten Schools, Pre-basic and Pre-primary Schools and Junior Basic Schools upto Class V.

(ii) All schools having Classes VI to VIII have been treated as Middle Schools.

(iii) All schools having Classes IX and X have been treated as Secondary Schools.

(iv) All schools having Classes XI and XII have been

treated as Higher Secondary Schools. They include Senior Cambridge Schools, Schools under 10+2 scheme, Intermediate, Pre-University and Junior College etc.

In case of composite schools relevant groups of classes have been treated separately, e.g. a school having classes I to XII, has been shown as having one primary, one middle, one secondary and one higher secondary school. The term 'College' includes all types of colleges whether Arts/Science/Commerce/ Medical/Engineering/Agriculture and others imparting education at Graduate or Post-Graduate level. Institutions other than industrial schools, training schools and adult literacy classes/ centres have been shown under 'others'.

In case of Medical institutions, Hospitals and Dispensaries, Allopathic, Ayurvedic, Unani and Homeopathy have been shown separately. Other institutions include all types of Yogic, Naturopathy, Hospitals/Dispensaries, Leprosy Centres etc.

In case there are more than one source of drinking water facility available in the village all such sources have been shown separately. Postal amenities include Post Office, Telegraph Office and Telephone, which are shown separately.

In case there are more than one communication facilities these have been indicated separately by relevant codes. Approach to the village refers to the state of roads etc. leading to the village from the communication centres i.e. bus-stand/railway station etc. This is to give an idea whether the village is easily approachable in all types of weather or becomes inaccessible for sometime in the year. Where there are more than one approach roads these have been indicated separately by relevant codes.

Information regarding the nearest town indicates the name of such town along with the distance from the referent village irrespective of the fact whether such town is located within Rajasthan or in some other adjoining states. In case of town situated in states other than Rajasthan, the concerned State has been mentioned against its name in parentheses with the help of abbreviations. The term 'town' here refers to one of those urban centres, which have been treated, as towns in the concerned state during 2001 Census.

In order to give an idea about the uses which electricity is put to, the information has been given under the head "power supply" if it is available in the village.

Land-Use Pattern

The land-use pattern has been presented under the following five headings:

I. Forest

It denotes those lands, which have been termed as 'forest' by the competent authority.

II. Irrigated land

It relates to land, which has actually been irrigated in the referent year. The source-wise break-up has not been presented, as no such information was available in respect of the net irrigated area.

III. Unirrigated land

The term covers all the unirrigated land cultivated during the referent year and land lying fallow upto four years.

IV. Culturable waste

It includes Gaucher i.e. pasture and grazing land and tree-groves.

V. Area not available for cultivation

It refers to land, which has not been classified in any of the above mentioned types and also includes house sites, roads, rivers, nullahs, hillocks etc.

The following nine appendices have also been provided to present the position obtaining in Panchayat Samiti and district as a whole regarding various Amenities available in rural areas, villages classified by characteristics of the population and land-use pattern in Census Town in connection with the Village Directory:

(i) Panchayat Samiti wise Abstract of educational, medical and other amenities in villages.

  (a) Villages by number of Primary schools.

  (b) Villages by number of Primary, Middle and Secondary schools.

  (c) Villages with different sources of drinking water facilities available.

(ii) Villages with 5000 and above population, which do not have one or more amenities.

(a) Census towns which do not have one or more amenities.

(iii) Land utilisation data in respect of Census Town.

(iv) Panchayat Samiti wise lists of inhabited villages where no amenity other than drinking water facility is available.

(v) Summary showing number of villages not having Scheduled Castes population.

(vi) Summary showing number of villages not having Scheduled Tribes population.

(vii) Panchayat Samiti wise list of villages according to the proportion of Scheduled Castes/ Scheduled Tribes population to total population by ranges. It consists of two parts: Part-A relates to Scheduled Castes and Part-B to Scheduled Tribes.

(viii) Panchayat Samiti wise number of villages under each Gram Panchayat.

(ix) Statement showing number of girl's schools in the villages.

Town Directory

Particulars about each town have been presented in the form of seven statements. In towns where there are slums Statement-VII has also been given in which information regarding civic and other amenities available in the slums have been shown. In each statement towns have been arranged in alphabetical order.

As has been explained earlier, urban agglomerations are of two types: first those constituted by two or more independent towns and second those where the urban characteristics have developed in the adjoining rural areas, which have developed as outgrowth of the referent town.

Where an urban agglomeration includes two or more independent towns, the names of towns constituting the agglomeration have been indicated in the alphabetical arrangement but their names have also been repeated in the alphabetical order under the name of the agglomeration after the name of the main or core town and information relating to these has been shown here. The particulars of the constituent units of the agglomerations have not been repeated wherever they occur separately in the alphabetical order and a note "See referent agglomeration" has been given against such names. The lines relating to the information regarding urban agglomeration as a whole have not been numbered but the constituent units as and when they occur in the alphabetical order have been numbered so that the last number agrees with the total number of towns in the district concerned. In respect of Statements II, III and VI in the lines relating to agglomeration a note "See constituent units" has been shown and information has been provided separately in respect of all the constituents below it.

In case of towns having out growths, an asterisk mark has been placed against their names. Information in respect of out growths has been included in the concerned town and has not been shown separately.

The amenities and other data have been indicated by codes. A list of column wise code structure and other abbreviations used in each statement has been provided at the beginning of Section-II of Part-A of this book. We may now discuss the various Town Directory statements.

Statement I

It deals with the status and growth history of the town. Columns 2 to 7 give information regarding class, name and civic status of the town, its location code number, name of the tehsil/panchayat samiti in which it is situated, its area in sq. km and number of households including houseless households residing in the town as per 2001 Census. The class of the town has been determined on the basis of its population as per Census 2001 and the civic administration status relates to the year 2000. Columns 8 to 18 show the population of the town in different decennial censuses beginning from 1901 upto 2001. The growth rate in terms of percentage in respect of previous censuses has been shown below the population figures pertaining to each Census beginning from Column 9 onwards.

A 'dash' under these columns indicates that the referent town did not have an urban status in the referent Censuses. Density of Population per sq. km as per Census 2001 has been shown in column 19 and sex ratio (number of females per 1,000 males) have been indicated for three censuses viz. 1981 to 2001 in columns 20 to 22.

Statement II

This statement gives information about the physical aspects and locations particulars of the town in 1999. First two columns give the serial number, class, name and civic status of the town. Columns 3 to 13 deal with the physical aspects viz. rainfall and temperature. Rainfall figures are the average of the rainfall for the last one year ending 1999-2000. If the information in respect of rainfall is not available for any town it has been given for the nearest place for which it is available. Rainfall has been shown in millimeters per annum. Maximum and minimum temperatures have been given in centigrade. If the information regarding temperature is not available in respect of any town it has been given for the nearest place for which it is available and the name of the centre has been shown in footnote.

The location of the town with respect to various administrative headquarters and nearest city is indicated in columns 6 to 10. While showing the location of the referent town with respect to various administrative headquarters, names and their distance from the referent town in kilometer have been given in parentheses below the name of the place where it is situated. In case the referent town itself happens to be the seat of the administrative headquarters, this distance has been shown zero. Information regarding the nearest city of population one Lac or more and population 5 Lacs or more have been given in respect of its situation within the State or even if this city may be situated in other State. In case the nearest city happens to be situated in other State, the name of the concerned State has been shown against the name of the city in parentheses. How the referent town is approachable is given in columns 11 to 13 which indicate the availability of communication facilities viz. railway station, bus facilities and navigable river/canal within 10 km.

Statement III

It gives information about the finances of the civic body controlling the local civil administration and it has been presented in '000 rupees. A 'dash' in this Statement indicates that no receipt or expenditure has occurred under the particular head and 'N' represents negligible amount. First two columns give general information, columns 3 to 9 present receipt under broad categories and total receipt and columns 10 to 16 present expenditure under broad categories and total expenditure. The receipt and expenditure has been presented under six broad categories each. While receipt through taxes implies all receipts from taxes obligatory or others and revenue derived from municipal properties and power apart from taxation, it also includes income derived from holding of fairs and exhibitions, supply of milk, license fee, cattle-ponds, fines and penalties, transport services, places of entertainment, allotment/sale/lease of land and rent etc. Government grants include per capita grant, grant from Public Works Department and grant from the Social Welfare and other departments. Other sources of receipts have been specified, wherever possible but generally they are of miscellaneous nature.

Expenditure on general administration covers salary and wages of staff, contingent expenditure on staff, grants loans and advances to the staff etc. Expenditure on public safety cover fire-fighting, light, water and lease facilities, regulating the dangerous/ hazardous trades/works/occupation, water supply, registration of births and deaths, disposal of garbage, rubbish and night-soil. Public health and conveniences cover all types of medical aid and maintenance of the destitute etc. Public works include maintenance and construction of roads and buildings and relief works in times of famine and scarcity. Expenditure in public institutions covers all types of social, cultural, educational, religious institutions etc. Which are run or patronised by the municipality. Other sources of expenditure have been specified where possible but mostly these are of miscellaneous nature.

Statement IV

This statement deals with the civic and other type of public amenities and provides information about total population, scheduled castes and scheduled tribes population, road length, system of sewerage, number and types of latrines, method of disposal of night-soil, water supply, availability of fire-fighting service and electrification besides general information. In case of water supply the source of water as also the system of its storage have been shown. The storage capacity has been shown in Kiloliters. In case of disposal of night soil and protected water supply particulars have been given in respect of two methods/

sources in order of their importance if more than one exist in the town. In case fire-fighting service is not available in the town the name of the nearest place if in the same district or the name of the nearest district if in the same state or other state where available along with distance from the referent town has been mentioned.

Statement V

Particulars of medical, educational, recreational and cultural facilities available in the town have been given in this statement and the number of each type of these facilities has also been shown in parentheses is along with the appropriate code.

In case of medical facilities the number of beds wherever available has also been shown Allopathic, Ayurvedic, Unani and Homeopathic hospitals/ dispensaries have been shown separately. No code has been provided for allopathic institutions and the numbers have been shown only in figures. Thus beside H, code for hospital means an Allopathic Hospital. Separate codes have been provided for other three systems of medicine.

If a medical or educational facility is not available in the town, the name of the nearest place, if the same district or the name of the nearest district in the same State or other State where available and its distance (in km) from the referent town has been mentioned. Details of medical institutions shown under 'Others' have also been explained.

Arts, Science and Commerce Colleges have been shown separately. While showing the educational institutions upto Higher Secondary level the same procedure as adopted in case of Village Directory, has been followed. In case of composed schools relevant classes have been treated separately e.g. a school having classes I to XII has been treated as being composed of one Primary, one Middle, one Secondary and one Higher Secondary School.

All other types of educational institution which are not covered in column 6 to 14 have been shown in column 15 under 'Others' and include technical/ vocational and training institutions like Applied Art Painting College, Pharmacy College, Agricultural College, Teacher's Training College/Institution, Music/ Dance School etc. Janchetna Kendra is also included in others.

Statement VI

This statement contains particulars regarding trade, commerce, industry and banking. It gives names of three most important commodities, exported and manufactured in the town besides the number of banks, agricultural and non-agricultural credit societies functioning in the town. A list of the outgrowths, if any, along with their population and name of the core town has also been provided at the end of the Town Directory as an Appendix.

Statement VII

Information about all slums whether notified or not and for all towns has been shown in this statement in order to give an idea about the amenities available to the slum dwellers. Particulars about paved roads, systems of sewerage, number and types of latrines, method of disposal of night soil, number of tap points/ public hydrants for supply of protected water and electrification have been provided in respect of every slum in each town, if there are any.

PART-A : VILLAGE AND TOWN DIRECTORY

Section-I

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:

Column 1 : Serial Number

Self explanatory. All the villages within the Panchayat Samiti are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R

(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages Panchayat Samiti wise of the district.

Appendix-I-A Indicates number of villages Panchayat Samiti wise having one or more primary schools.

Appendix-I-B Indicates number of villages Panchayat Samiti wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages Panchayat Samiti wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV Panchayat Samiti wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII The appendix shows the list of villages according to proportion of the A, VII B Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates Panchayat Samiti wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

Section-II

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M.Cl.
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Tehsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 and 10

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory

Column 6 : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well Water	W

Column 14

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory

Column 4 & 5

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or primary health centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC

(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

PART-B : PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/Panchayat Samiti/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/Panchayat Samiti/Town
3.	Primary Census Abstract for Scheduled Tribes	District/Panchayat Samiti/Town
4.	Village Primary Census Abstract	Panchayat Samiti/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented Panchayat Samiti wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Panchayat Samiti is presented both for rural and urban areas separately. All the villages within the Panchayat Samiti constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Panchayat Samiti. In case a Panchayat Samiti is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Panchayat Samiti is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares. The area figures of the Panchayat Samiti is the total of the village areas coming under each Panchayat Samiti. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tehsils/ Panchayat Samiti within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Tehsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and Panchayat Samiti level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II : FERTILITY-MORTALITY MEASURES

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever-married women and last question related to currently married women.

AGE SPECIFIC MARITAL FERTILITY LEVEL, 1991 CENSUS

Age-Group	Pali			Rajasthan		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	130.24	124.20	155.47	99.82	99.10	103.46
20-24	257.25	264.02	233.56	217.18	227.01	182.20
25-29	245.96	258.44	205.58	197.71	214.81	144.55
30-34	181.91	195.57	135.21	141.09	158.38	85.69
35-39	122.93	137.17	73.02	90.43	104.11	47.40
40-44	86.11	94.26	51.32	53.37	61.51	25.15
45-49	31.63	32.85	25.68	27.36	30.37	15.81

The ASMFR has been calculated at seven different age groups. The highest ASMFR of the district 257.25 has been found in the age group of 20-24 followed by 245.96 in the age group 25-29. The lowest ASMFR of 31.63 has been found in the age-group 45-49. In comparison to state, ASMFR of the district is higher than that of state in all age groups. Similar trends found in rural areas. It can be seen from the table.

ESTIMATES OF CHILD MORTALITY, 1991 CENSUS

Mortality Indicators	Pali			Rajasthan		
	Persons	Males	Females	Persons	Males	Females
q2	128	123	136	97	95	99
q3	137	124	152	100	98	106
q5	156	140	174	110	103	117

Information on the question on children ever born and children surviving canvassed for all ever-married women has been tabulated by age of the mother. From this, estimates of child mortality have been worked out by using Brass Technique.

From the estimates of child mortality (Number of death by ages 2, 3 and 5 given as q2, q3 and q5) it is observed that the child mortality in the Pali district is higher as compared to the state among males and females. It can be seen from the table.

ANNEXURE-III : VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

Sl. No.	State/District	CBR	TFR	TMFR	GFR	GMFR	No. of children ever born per woman age group 45- 49	Child-woman Ratio (0-4)	Mean age at marriage of currently married women

Source : Occasional paper No.1 of 1997 office of the Registrar General India and Rajasthan state district profile 1991.
Note: * Newly Created districts after 1991 Census.

The gross fertility rate of the district has been reported as 153 as against 162 of the State. Similarly the GMFR and TFR and TMFR of the district are also lower than that of State being 176, 4.88 and 5.55 as against 184, 5.01 and 5.59 of the state respectively. The crude birth rate of the district is also lower than that of the State at 33.84.

However the number of children even born per woman in the age group of 45-49 is 5.07 which is same to the State average of 5.07. The mean age at marriage of females in the district (17.43) is higher than that of State (16.67) as can be seen from the table. CWR (child woman ratio) 0-4 of the district is lower than state. It can be seen from the table.

ANNEXURE-IV(a) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991-2001

Place of Birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Migrants born within the state of Enumeration	407,821 (96.83)	72,621 (92.66)	335,200 (97.78)	537,486 (96.69)	96,063 (92.38)	441,423 (97.68)
(i) Migrants born elsewhere in district of Enumeration	283,562 (67.33)	46,708 (59.60)	236,854 (69.09)	393,742 (70.83)	64,558 (62.08)	329,184 (72.84)
(ii) Migrants born in other district of the State	124,259 (29.50)	25,913 (33.06)	98,346 (28.69)	143,744 (25.86)	31,505 (30.30)	112,239 (24.84)
(B) Migrants born in other states of India	12,441 (2.95)	5,241 (6.69)	7,200 (2.10)	17,699 (03.18)	7,526 (07.24)	10,173 (02.25)
(C) Migrants born in other countries	920 (0.22)	510 (0.65)	410 (0.12)	729 (0.13)	403 (0.39)	326 (0.07)
Total Migrants	**421,182 (100.00)**	**78,372 (100.00)**	**342,810 (100.00)**	**555,914 (100.00)**	**103,992 (100.00)**	**451,922 (100.00)**

(a) By Place of Birth

It was seen that a sizeable portion of migrants in Pali District i.e. 96.83 percent in 1991 and 96.69 percent in 2001 were migrants whose place of birth was within the state of enumeration. Out of this major portion where migrants who were born elsewhere in the district of enumeration.

The migrant whose place of birth was in other states of India was 2.95 percent in 1991and 3.18 percent in 2001 Census.

Migrant to the district whose place of birth was in other countries was 0.22 percent in 1991, whereas the proportion was marginally less i.e.0.13 percent in 2001 Census.

ANNEXURE-IV(b) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	407,821 (100.00)	309,568 (75.91)	98,253 (24.09)
	Rural	350,892 (86.04)	283,148 (69.43)	67,744 (16.61)
	Urban	55,029 (13.49)	24,890 (6.10)	30,139 (7.39)
In other states of India	Total	12,441 (100.00)	4,440 (35.69)	8,001 (64.31)
	Rural	4,310 (34.64)	1,980 (15.91)	2,330 (18.73)
	Urban	8,071 (64.87)	2,410 (19.37)	5,661 (45.50)

(b) Internal Migrants (Rural/Urban)

Majority of the internal migrants i.e.75.91 per cent whose places of birth were within Rajasthan belonged to the rural areas of the state. The opposite trend is found in case of migrants born in other state of India as can be seen from the table.

ANNEXURE-IV(c) : INTER-STATE MIGRANTS, 1991 CENSUS

Place of Birth	1991 Census	
	Migrants	%age to total migrants
1	2	3
Gujarat	4,380	35.21
Haryana	390	3.13
Kerala	470	3.78
Madhya Pradesh	1,380	11.09
Maharashtra	1,390	11.17
Uttar Pradesh	2,300	18.49
Total for six States	10,310	82.87
Other States	2,131	17.13
Total	12,441	100.00

ANNEXURE-IV(c) : INTER-STATE MIGRANTS, 2001 CENSUS

Place of Birth	2001 Census	
	Migrants	%age to total migrants
1	2	3
Gujarat	6,013	33.97
Uttar Pradesh	3,338	18.86
Madhya Pradesh	1,709	9.66
Maharashtra	1,666	9.41
Bihar	1,106	6.25
Haryana	517	2.92
Total for six States	14,349	81.07
Other States	3,350	18.93
Total	17,699	100.00

(c) Inter-state Migrants

In the case of Inter-state migrants, they are mainly from Gujarat and Uttar Pradesh as their percentages are 35.21 and 18.49 respectively in 1991 census. In 2001census main migrants are also from Gujarat and Uttar Pradesh and their percentage are 33.97 and 18.86 respectively. Percentage of six states to total migrants is 81.07 in 2001.

ANNEXURE-IV (d) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE, 1991-2001 CENSUS

Place of Last Residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Within the State of Enumeration but outside the place of Enumeration	413,492	74,312	339,180	547,901	100,444	447,457
	(96.81)	(92.22)	(97.88)	(96.40)	(91.22)	(97.64)
(i) Elsewhere in the District of Enumeration	288,383	48,019	240,364	404,790	68,746	336,044
	(67.52)	(59.59)	(69.36)	(71.22)	(62.43)	(73.33)
(ii) In other districts of the state of Enumeration	125,109	26,293	98,816	143,111	31,698	111,413
	(29.29)	(32.63)	(28.52)	(25.18)	(28.79)	(24.31)
(B) States in India beyond the state of Enumeration	12,900	5,850	7,050	19,854	9,331	10,523
	(3.02)	(7.26)	(2.03)	(03.49)	(08.47)	(02.30)
(C) Last Residence outside India	730	420	310	611	341	270
	(0.17)	(0.52)	(0.09)	(00.11)	(00.31)	(00.06)
Total Migrants	**427,122**	**80,582**	**346,540**	**568,366**	**110,116**	**458,250**

(d) Migration by Place of Last Residence

In the percentage distribution of migrants by place of last residence in the district it was seen that in 1991 census, the highest proportion of migrants i.e. 96.81 percent were from within the state of enumeration but outside the place of enumeration. In 2001 Census this proportion dropped to 96.40 percent in the same category. Surprisingly it was seen that the proportion of female migrants were higher than the male migrants in both censuses.

The migrants in the district that were from states in India beyond the state of enumeration was 3.02 percent in 1991 as compared to 3.49 percent in 2001 census.

Persons whose last residence was outside India were 0.17 percent in 1991 census while there was a marginal reduction to 0.11 percent in 2001 census.

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	413,492	313,648	99,844
		(100.00)	(75.85)	(24.15)
	Rural	356,272	287,408	68,864
		(86.16)	(69.51)	(16.65)
	Urban	56,150	25,330	30,820
		(13.58)	(6.13)	(7.45)

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
In other states of India	Total	12,900	5,390	7,510
		(100.00)	(41.78)	(58.22)
	Rural	3,930	1,930	2,000
		(30.46)	(14.96)	(15.50)
	Urban	8,880	3,380	5,500
		(68.84)	(26.20)	(42.64)

(e) Migration by Place of Last Residence (Rural/ Urban)

Majority of the internal migrants i.e 75.85 per cent whose place of last residence were within Rajasthan belonged to rural areas. The opposite trends is reflected in case of migrants whose place of last residence were in other state of India as can be seen from the table.

RELIGION

Religion is an important basic cultural characteristic of the population. It provides an interesting picture of the society. The data on religion projects the unity and diversity of the country. The data is of great importance to the public as well as Government,NGO and Minorities Commission.

Among the followers of six major religions in Pali District it was seen that the proportion of Hindus had marginally decreased from 92.13 percent in 1991 to 87.68 in Census. Whereas the propertion of Muslim & decreased from 10.27 to 5.78 percent. It is also true in the case of Christian, Sikh and Buddhist during the same period decreased. The Jain community registered the same between the decade.

At the state level however the proportion of Hindus, Sikh and Jains decreased whereas those of Muslims and Christians increased.

MARITAL STATUS OF POPULATION

Majority of the population of the district in 1991 census is 47.54 percent in never married followed by married and widowed i.e. 47.49 and 4.86 percent respectively. Out of the male total population of the district 52.68 percent males are never married and of female never married is 42.16 percent, the proportion of widowed females is higher 7.66 percent than the males 2.17 percent. Married males are 45.02 percent while 50.01 percent females are married at the district level. Divorced or separated is not so widely practiced, only 0.12 males and 0.09 females are reported in this category which are almost half to the stage average. The same trend was found in rural as well as urban areas. In 2001 census 48.69 is never married. There after comes married persons whose percentage to total population comes to 46.37 widowed persons in absolute numbers are 86,833 which is 4.77 percent to total population. Sexwise, males have higher population of never married (53.59) percent as compared to females whose population is 43.69 percent. On the other hand females have higher proportion of married (48.53 percent) than males (44.25 percent) females have a phenomenal higher number 68481 of widows than male widowers 18,352 in the district. It can be seen from Annexure VI.

AGE, SEX AND EDUCATIONAL LEVEL,1991-2001

Literacy in the age-group 10-14 years in 1991 in the district was 58.0 percent in the total which was higher among the males 79.7 percent and females 33.1 percent. In the total in the age-group 15-19 years the literacy was lower in the total i.e. 54.2 percent and the same trend was found as in the earlier age group except that the female literacy in this age group 15-19 years was as low as 28.7 percent. In general it was seen that the literacy rate in the urban areas was much higher both among males and females. The

proportion of metric but below graduate was however not very high. In the total there were 5.8 percent metric but below graduate persons. Here also the male proportion was higher i.e. 10.5 percent compared to females 1.4 percent. Graduate and above in the age group 20+ years followed the same trend but on lesser proportion. In 2001 census the total population of the Pali district was 1,820,251 which 54.39 percent are literates. As per the definition of literacy in the 2001 Census the entire population in the age-group 0-6 was considered to be illiterates. The total literacy rate in the district Pali in the age-group 10-14 years was 79.5 percent and among males and females it was 91.7 and 66.0 percent respectively which is lower as compared to the state in the same age group except in males. Similarly literacy rate in the age group of 15-19 years 88.5 percent males and 55.6 percent females were reported in the district which is also the same as reported in the age group of 10-14.

It is a general trend of the literacy at the state as well as district level, female literacy is lower than the male literacy. The percentage showed a decline at Metric but below Graduate 13.7 percent as male and 3.0 percent as female while at the graduate and above level 5.9 percent males and 1.2 percent are females. It can be seen from the Annexure VII.
