KUMBHALGARH FORT

Built by Rana Kumbha between 1443 and 1458 A.D. this impregnable fort perches itself on top of 13 mountain peaks of the Aravalli range. The battlements of the fort are 36 kms. long, whereas a steep climb up a narrow road leads to the entrance. It was here that prince Udai took refuge after being smuggled out of Chittaurgarh by his maid nurse Panna Dhai and it is from this fort he ruled before the new capital at Udaipur was established. The fort of Kumbhalgarh also encloses within itself Badal Mahal, the ancient Jain temples dating back to Mauryan period, and Medieval Hindu temples.

Annexure-IV : Percentage distribution of Migrants by place of birth/ place of last residence, 1991-2001 Census 563

Annexure-V : Brief account of main religions in the district as per 1991-2001 Census 565

Annexure-VI : Marital status of population as per 1991-2001 Census 566

Annexure-VII : Age, Sex and Education in the district, 1991-2001 Census 568

Annexure-VIII : Distribution of different mother tongues returned in 1991-2001 Census 569

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri J.L.Modi, Director of Census Operations, Rajasthan. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Additional Secretary &
Census Commissioner, India

Preface

I am deeply indebted to the State Government of Rajasthan for their unstinted support and cooperation despite all odds and adversaries like famine etc. at all stages of Census Operations of 2001. I am grateful to Shri Inderjit Khanna, the then Chief Secretary of Government of Rajasthan for his prompt response, guidance and cooperation given to the Census Organization. He infused a sense of urgency and seriousness in the minds of District Collectors and Officers of the District Administration, which geared up the entire administrative machinery. The Supervisors and Enumerators, the basic census functionaries worked ceaselessly in the entire period of fieldwork to make Census 2001 successful.

Sarvashri Ashok Pandey and Vinod Zutshi, the then Secretaries in the Department of Cabinet Secretariat and General Administration have been instrumental in making Census 2001 a successful one. I owe my thanks to both of them. I am also thankful to other Departments like Education, Finance, Revenue, Economics and Statistics, Public Relations, Printing and Stationery, Local Self-government and Personnel Department for extending their full cooperation.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his unstinted support and spontaneous, unfailing guidance throughout our endeavours. At the outset I would like to thank Shri D.K. Sikri, Registrar General and Census Commissioner, India for guiding us in bringing out this report. My grateful thanks to Shri K.N. Unni, Ex-DRG (C&T), Shri R.G. Mitra, Ex-DRG (C&T), Shri R.P. Singh, Consultant (Map), Shri Himakar, Additional Director (EDP), Dr. I.C. Agrawal, A.R.G.(SS), Shri S.L. Jain, Deputy Director (SS), Shri C. Chakravorty, Joint Director (DDU) and their colleagues at the headquarter for their ever willing, helping hand and thoughtful suggestions for putting together and shaping the volumes in their present form.

The Director of Census Operations, Rajasthan, Shri J. L. Modi under whose guidance the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before this volume could be made available for the press. I am deeply greatful to Shri H.S. Meena, Ex-Joint Director of Census Operations, Rajasthan for its success.

It may be mentioned a few annexures have been added to this volume with a view to provide an insight into the 1991 and 2001 data on the suggestion of Social Studies Division of the Office of the Registrar General, India. In this connection the contribution of Shri V.K. Gupta, Senior Compiler can not be ignored.

Shri H.C Sharma, Assistant Director incharge of District Census Handbooks and Primary Census Abstract, who was ably assisted by his team of dedicated workers deserve all praise for their perseverance and dedication in preparing Village and Town Directories and in finalization of PCAs and other inset tables. I would like to thank Shri G. Fernandes, Assistant Director who not only coordinated the work but also contributed immensely to the cause of Village and Town Directories.

In view of the increasing demand of the publications in electronic format, it has been decided to publish the DCHB also on CD. I highly appreciate the efforts put in by Smt. Jyoti Luhadiya, DD(EDP) and her team to compile in the electronic format. The efforts put in by Shri Divesh Chawla, DEO Gr-'B' to prepare this is highly commendable. In this connection, the contributions of Shri P.N. Mathur Sr.Supervisor and Shri J.P. Verma, DEO Gr-'B' cannot be ignored.

Smt. Pragya Kewalani, DDCO has taken pains in drafting the District Profile and the Analytical Note for the district. The members of the staff in the Map Section did a commendable job under the guidance of Shri Panna Lal, R.O.(Map), ably assisted by Shri R.S. Tyagi, Sr.Geographer in bringing out various maps. .

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The series of District Census Handbooks has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several new innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Numbers (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from 1 to N. Each village has been assigned an eight digit code. The first six digits represent the code of the village as existing at the present census. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001, are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

The responses for almost all the questions in the Houselisting Schedule had pre-coded options. This not only helped the enumerators to record the response easily but at a later stage would hopefully facilitate quicker data processing. Apart from the improvements made in the format of the Houselisting Schedule, the scope of Houselisting was considerably expanded with the inclusion of new questions based on requirements of various data users and planners. The new features of the Houselisting Schedule are listed below.

- For the first time, different uses of census houses have been standardized and grouped into ten main uses and assigned code numbers.
- Plastic has been added in the list of material of wall and roof of a census house, as it is often used for shelter in slums and shanties.
- In the previous census, the location of drinking water source was categorized into two locations viz. 'within premises' and 'outside premises'. In the Census of India, 2001, the source 'outside premises' was split into two categories namely 'near the premises' and 'away from the premises'.
- The scope of question of availability of electricity was expanded to include six sources of lighting. Besides no lighting, this included sources like electricity, kerosene, solar, other oil and any other source.
- In 1991 Census, a question on availability of toilet facilities to the household was canvassed while in Census of India, 2001, specific information on availability of latrine within the house by the type of latrine was sought.

In addition to expending the scope of the questions canvassed during the Houselisting Operations in the 1991 Census, the following new questions were added in the Houselist Schedule for Normal Households at the Census of India, 2001.

- If the Census house was used for residential or partly residential purposes, the condition of the census house was categorized as good, livable or dilapidated based on the perception and response of the respondent.
- A question on number of married couple(s) living in the household was canvassed.
- Information was sought on the number of married couple(s) having independent room for sleeping.

- Information as to whether the waste-water outlet of the house is connected to 'closed drainage' or 'open drainage' or has not drainage was collected.
- A question on availability of bathroom within the house was included.
- Information on availability of kitchen within the house was also sought.
- Availability of certain assets to the households namely radio/transistor, television, telephone, bicycle, scooter/motor cycle/ moped, car/jeep/van were also included.
- It was also enquired whether any banking service was being availed by the household.

The Household Schedule adopted for the Population Enumeration also primarily had pre-coded options for majority of the questions. The questions for each data item were made as self-explanatory as far as possible for easy understanding. The comprehensive Household Schedule had three parts and two sides A and B. Part I contains the Location Particulars; Part II relates to Individual Particulars and Part III contains questions for Household engaged in Cultivation/Plantation. To facilitate quick tabulation for bringing out Provisional Population Totals, provisions of page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates and workers and their categories by sex. Most of the questions canvassed during the 1991 Census, were retained for the 2001 Census, except the question on ex-serviceman, which was dropped during the Census of India, 2001. However, a number of new questions were added in the Household Schedule in view of the suggestions from policy makers, data users and researchers, while the scope of certain existing questions was enhanced.

These modifications are:

- Age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.
- The type of educational institution attended by a person was enlarged to include school, college, vocational institute, other institute and literacy center.
- The scope of the definition of 'work' was expanded in the Census of India, 2001, to include production of milk for domestic consumption. In the 1991 Census, cultivation of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India, 2001.
- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India, 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census is dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census, is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected are - in seeing, in hearing, in speech, in movement and mental.

- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work is collected under this section.
- The Household Schedule has a new set of questions for Household engaged in cultivation/ plantation- i) Net area of land under cultivation/ plantation, ii) Net area of land irrigated and iii) Tenure status. This question was not canvassed at the 1991 Census but was canvassed in the 1981 Census in a slightly different form.
- The signature or thump impression of the respondent has been taken on the Household Schedule for the first time in the history of census. This was not only aimed at obtaining correct and complete information but also for giving an opportunity to the respondents to authenticate the information provided by them. The relationship of the respondent with the head of the household was also obtained. This new feature will pave way in carrying out a methodological study in future on the respondent profile in the census.

In 1981 Census, for the first time, an attempt was made in the series to bring out demographic and other data in diglot, Hindi and English, for a more beneficial use by data user of all categories. Hindi being the official language of the State, a Hindi version of the analytical notes was also added with a view to caters to the needs of all sections of readers. The manner of presentation of the District Census Handbooks for the 1991 Census is by and large the same.

As a necessary corollary to the Handbooks, Panchayat Samities, the basic administrative units of development, administration and planning, were listed out separately for the first time in 1981 Census in relation to those districts wherein they were not coterminous with their tehsils. As an additional attempt, informations relating to population figures as well as amenities available in each village located in the jurisdiction of each Panchayat Samiti were also presented in a separate volume under the title "Supplement to District Census Handbook". However, for reference in the main District Census Handbook, a list of villages forming part of each non-coterminous Panchayat Samiti was provided along with the abstracts of population and amenities for such Panchayat Samities as a whole in the form of Special Annexures.

In order to cater to the over-all needs of the data-users and to facilitate the task of administrators and planners it has now been decided to present the Village Directory and Primary Census data at the Panchayat Samiti level instead of the traditional Tehsil level presentation. It is expected that the presentation of Village Directory and Primary Census Abstract data at Panchayat Samiti level will help the planners in formation of micro-level developmental plans, as the Panchayat Samiti is now the lowest administrative unit for development planning. However, for the convenience of the data users and for the sake of comparability of data at Tehsil level, the Primary Census Abstract has also been presented at the Tehsil/ Town level in the form of an Appendix.

A general note on each district covering information of general interest regarding its history, topography, physiography, administrative set-up and places of tourist and historic importance etc. has also been included with a view to provide comprehensive and more purposeful information about the district as a whole. Population figures of Scheduled Castes and Scheduled Tribes constituting the core of 'Weaker Section' have also been presented at district, panchayat samiti and town level so as to facilitate planning for their welfare both at micro and macro levels.

It is earnestly hoped that this publication will serve its purpose for planners and administrators of welfare schemes and other data users in general.

Prior to 1951, Census Reports were printed for the whole province/state. The idea of preparing the District Census Handbooks separately for each district was conceived during 1951 Census as a part of a plan intended to secure an effective method of preserving the Census data below the district level. The idea was that all the district census tables would be bound together in a single volume called the District Census Handbooks. Since then the District Census Handbooks are being published regularly.

The 1951 Census series of District Census Handbooks was printed in two parts. Part I contained five General Population Tables (A Series), three Economic Tables (B Series), five Household and Age Tables (C Series) and seven Social and Cultural Tables (D Series). In Part II of District Census Handbook "Primary Census Abstract and Village Directory" which showed the basic population figures for each village or town classified by livelihood classes, were included along with some information of general nature.

The 1961 Census series of District Census Handbooks were printed in single volume in which Primary Census Abstract upto village and town/ward level and Village Directory upto village level were given. Besides, some official statistics collected from various state departments, four General Population Tables (A Series), sixteen Economic and Household Tables (B Series), seven Social and Cultural Tables (C Series), four Housing Tables (E Series) and eight Special Tables for Scheduled Castes/Scheduled Tribes were also provided in District Census Handbooks. For the first time in 1961 Census the maps for the district and tehsil were also included in the District Census Handbooks.

In 1971 Census series of District Census Handbooks village-wise 'Village Directory' giving services, facilities or amenities available in the village was given. 'Town Directory' was introduced for the first time giving useful information in respect of every town of the district. Rural Primary Census Abstract upto village level and Urban Primary Census Abstract upto enumeration block level were given in District Census Handbooks. While the District, Tehsil and Town maps were included; the inclusion of Census Tables was dispensed with in the District Census Handbooks in 1971 Census.

The scope of 1981 series of District Census Handbooks was enlarged specially in relation to amenities and land-use pattern. Apart from new items like uses of electricity, details of communication points, information for which was not collected in 1971 Census, a note on each district covering general information on its history, topography, flora, fauna and administrative set up etc. was also added. The format of the Primary Census Abstract was also restructured in the light of changes in economic and other questions canvassed in the 1981 Census but at the same time, all efforts were made to retain comparability with 1971 Census data. The inclusion of Special Primary Census Abstract for Scheduled Castes and Tribes at the Tehsil/Town level was another innovation introduced in 1981 Census series.

The manner of presentation of the District Census Handbooks for the 1991 Census was by and large the same as followed in 1981. However, the format of Primary Census Abstract was restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group was included in Primary Census Abstract for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate at the time of the 1991 Census.

One of the most important innovations in the 1991 Census was the Panchayat Samiti level presentation of data in the Village Directory and Primary Census Abstract instead of the traditional Tehsil level presentation.

Deviating from 1991 Census, like 1981 Census four fold industrial classification of main and marginal workers has been presented in 2001 as against nine fold given in 1991.

The mode of presentation of DCHB in 2001 will by enlarge be same as that of in 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc pertaining to 1991 Census of the respective district in the DCHB in the form of Annexures II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

(ii) Brief History of the District

The history of Rajsamand, like that of the rest of Rajasthan, can be traced back to the pre-historical period. Archaeological explorations carried out in the valleys of Berach & Banas rivers & their tributaries,

revealed stone age cultures. The distribution of these sites reveals that the stone age men preferred to live along the river valleys & plains & avoided the hilly & thickly forested zone of the Aravallis, the archevlian site at Nathdwara being the only exception. Evidence of chaleolithic culture, also known as Ahar or Banas culture, flourishing in the entire Mewar region in the 3rd & 2nd millenium BC has been gathered from the 90 sites of this culture discovered, out of which three i.e. Ahar, Gilund & Balathal have been unearthed. Gilund, located on the bank of Banas in Rajsamand district, is the biggest known site. These excavations have revealed that Ahar culture people were the first farmers of Mewar. They, for the first time, started domestication of animals, lived in permanent houses made of stone & mud bricks, used a variety of beautiful pottery (black & red ware with white paintings), miscroliths, as well as copper technology & developed trade & cultural contacts with Harappans of north Gujarat. With the beginning of the 6th century BC, the outline of the culture of the historical period becomes a bit distinct in Mewar. Explorations followed by excavations at a number of places in Mewar region as well as other places confirm that Brahmonical & Buddhist cultures flourished here at least upto 3rd century BC. The Indo-Greeks in order to safeguard their rear captured Madhyamika or Nagri near Chittaurgarh. It is evident that Rajsamand region being close to Madhyamika definitely formed a part of Sbi Janpad & later came under the influence of Malvas. The inscriptions from Chittaur also mention that this region was ruled by a Maurya ruler till as late as 8th Century AD, when the Arab invasion had its impact on the history of Mewar, because it considerably weakened the ruling Mauryana & paved they may for the establishment of the Grhil dynasty.

The administrative history of Rajasthan is coterminous with the administrative history of the erstwhile Udaipur State. Before 1940, the area of Rajsamand formed part of the erstwhile districts of Khamnor, Bhim & Kumbhalgarh, plus the thikanas of Nathdwara, Kankroli, Amet, Sardargarh & Deogarh. The regioon has played its own role in the cultural heritage of Rajasthan under the aegis of the celebrated Guhilas who produced personalities like Kumher, Sanga & Pratap. The period of Maharana Kumbha is known as the golden period of Mewar in all respect. He expanded the boundaries of Mewar in all directions, was a great lover of art & cultural and erected & repaired several temples. He also constructed several forts including the renowned fort of Kumbhalgarh. He had no religions prejudices & patromised all religions belief. During this period Jainism continued to spread its influence in Mewar & several Jain temples including those of Delwara village near Nagda were constructed during his region. The successive rulers viz. Rana Sanga is renowned & glorified in the history for his bravery & organisational skills; Maharana Pratap has come to be regarded as a great source of inspiration for freedom & liberty. After Pratap followed a long series of kings among which, during Rana Raj Sinmgh's rule, literary, cultural & artistic activities flourished. His most notable construction work was the gigantic Rajsamand lake, impounding the waters of river Gomti near the village Kankroli. The lake was called 'Rajsamudra' or Rajsamand from which the district derives its name.

Rajsamand district has played an important role in the freedom struggle too; the common masses played an important role in the 1857 muting. In 1858 AD when the rebellious forces were fighting the British troops in several parts of the country, the rebel leaders Tantia Tope followed by Rao Saheb entered Mewar. They were in acute short supply of food & fodder & got sufficient provisions at Kankroli & Nathdwara. The Mewar Prajamandal also played on important role in the freedom struggle in the district wherein Nathdwara, Kankroli, Kumbhalgarh, Deogarh, Amet & Mohi hold special significance. Subsequently, when India now independence & the Maharana acceded to the merger of Mewar with the Unite State of Rajasthan in 1948, the area of Rajsamand became a part of Udaipur district in the Rajasthan state & finally, on April 10, 1991, Rajsamand as a district was constructed.

(iii) Administrative set-up

Administratively, the district is divided into three sub-divisions and seven tehsils as under:

Sl. No.	Name of Sub-Division	Name of Tehsil
1	2	3
1	Bhim	1. Bhim
		2. Deogarh
2	Rajsamand	1. Amet
		2. Rajsamand
		3. Kumbhalgarh
3	Nathdwara	1. Nathdwara
		2. Railmagra

The Collector is the administrative head of the district and is also vested with the powers of District Magistrate. Each sub-division is under the charge of a Sub-Divisional Officer and each tehsil under a Tehsildar who are also vested with powers of an Executive Magistrate. The seven Panchayat Samities depict the democratic decentralization in the district. The Panchayat Samities are guided by the Zila Parishad under the Chairmanship of the Zila Pramukh but supervised by the Collector of the district, who is also the Ex-officio District Development Officer. The Panchayat Samities have been entrusted with the implementation of development activities at the block level.

The following table shows the names of the Panchayat Samities together with their tehsil jurisdiction:

Sl. No.	Name of Panchayat Samiti	Name of Tehsil in which the jurisdiction of the Panchayat Samiti
1	2	3
1	Bhim	Bhim
2	Deogarh	Deogarh
3	Rajsamand	Rajsamand
4	Kumbhalgarh	Kumbhalgarh
5	Amet	Amet
6	Khamnor	Nathdwara
7	Railmagra	Railmagra

(iv) Physical Features

(1) Location and size

Rajsamand district is located between latitudes $24^0$46' to $26^0$01' north & longitudes $73^0$28' to $74^0$18' east, bounded in the north by Ajmer & Pali districts, in the south by Udaipur, in the east by Bhilwara & Chittaurgarh and in the west by Pali. The area of this district stretches from Haldighati in the south to Jassa Kheda (Bhim) in the north, a distance of 140 Km and from Kumbhalgarh, the highest fortress of Rajasthan, in the west to Gilund in the east, a distance of 87 Km. The district headquarter is situated at Rajsamand, 67 Km north of Udaipur & 209 Km south of Ajmer in National Highway No.8 and the total area of the district is 3860 sq. km.

(2) Physiography

Rajsamand district is located between latitudes $24^0$46' to $26^0$01' north & longitudes $73^0$28' to $74^0$18' east, bounded in the north by Ajmer & Pali districts, in the south by Udaipur, in the east by Bhilwara & Chittaurgarh and in the west by Pali. The area of this district stretches from Haldighati in the south to Jassa Kheda (Bhim) in the north, a distance of 140 Km and from Kumbhalgarh, the highest fortress of Rajasthan, in the west to Gilund in the east, a distance of 87 Km. The district headquarter is situated at Rajsamand, 67 Km north of Udaipur & 209 Km south of Ajmer in National Highway No.8 and the total area of the district is 3860 sq. km.

(3) Climate

Rajsamand district forms part of sub-humid southern plains and the Aravalli hills. This is a region of low Aravalli hills with the inter mountain plateau deeply dissected by streams & rivers. The district has a moderately warm climate in summers & mild winters. The winter season sets in after about the middle of November, when both day & night temperatures begin to drop steadily. January is the coldest month with the mean daily maximum temperature at 24.2^0c & the mean daily minimum at 7.8^0c. The minimum temperatures sometimes reach the freezing point of water and frosts occur occasionally. The range of temperature is large, particularly in the winter & summer months. Both day & night temperatures rise rather rapidly after the end of February till May, which is the hottest month of the year. The mean daily maximum temperature in that month is 38.6^0c. The summer is milder than what it is in the desert regions of Rajasthan & by the third or fourth week of June when the south-west monsoon winds reach the district, temperature drop appreciably.

In the south-west monsoon season specially in July & August, skies are often cluded to overcast. During the rest of the year skies are generally clear or lightly clouded. The rainfall during the months from June to September constitutes about 90.6 per cent of the annual rainfall. July is the month with the maximum rain which is a little over one third of the annual rainfall. Rainfall generally decreases from the south-west to the north-east in the district. Nathdwara on the south-western border of the district gets annually 481.4 MM., while the annual rainfall at Kumbhalgarh is 650.8 MM. The variation in the annual rainfall from year to year is erratic, nevertheless the average annual rainfall in the district is 556.1 MM. On an average the number of rainy days (days with rainfall of 2.5 MM or more) in a year are 21.

Geology and Minerals

Rajsamand district is endowed with the pre-Aravalli, Aravalli & Delhi rock formations, i.e. all the geologically ancient rocks. According to the Mines & Geological Department of the state government, the litho-stratigraphic sequence of the rocks in the district generalised & modified after Dr. Heron & other workers is classified as under:

Sl.	Name of minerals
	Principals minerals
1	Granite
2	Impure Limestone, Calcogneisses, Calc-Schists.
3	Schists
4	Quaatzitox, at places arkoee
5	Dolomitic limostone (marble) Garnetiferous schists
6	Ultrabasics
7	Quartzite Interbands Schists
8	Phyllite & Schists, Siliceous dolomites & associated rocks conglomerate, metavolcanics, quartzite.
9	Amphibolites, Granites
10	Granite gneisses, Mignatite, Schists.

Rajsamand occupies a fairly good place on the mineral map of Rajasthan. It is endowed with good deposits of base metals & some industrial mineral along with notable deposits of marble. The important metallic minerals include ores of lead, zinc, copper, manganese, iron, silver & cadmium. The deposit of Rajpura Dariba extends over 16 Km between Dariba and Betunmi, worked by the Hindustan Zinc Ltd. Geological Survey of India has proved 20,000 million tonnes of lead, zinc & copper ores in main block with additional reserves of inferred categories. Existence of small copper occurrence has also been proved by the State Department of Mines & Geology at Karoli, Gopaknda Majera, Kotri etc in the district. Among non-metallic minerals located in the district are soapstone, rock phosphate, calcite, asbestos, barytes, emerald, limestone & marble.

In Rajsamand district soap-stone occurs within lower Aravalli; silicon dolomitic limestone has developed due to regional metamorphion. It mainly occur in Nathdwara tehsil near siavi, Kagamadar, Rabcha, Unwas, Somal, Oden, Kaloda, Karoli, Katar, Usan, Ghode, Machind Nala, Kundoli etc. Small deposits are also found in south west of sunarkudi of Bhim tehsil associated with ophiolites in cale silicate impure limestone. Pyrophyllite, a hydrous aluminium silicate having identical physical properties & most of the uses as soapstone, is found near Delwara, Kotri, Sisvi & Karoli in Nathdwara tehsil.

The district is the leading producer of asbestos in Rajasthan. The important asbestos deposits are at Amet, Deogarh, Kuanthal etc. Calcite resources of this district are located in Rajsamand & Kumbhalgarh. Barytes occurs at Karoli-Kesuli in Nathdwara tehsil. China clay is found at Kharbaria Ka Gudha which is being used by M/s RSMDC. The workable quartz felspar deposits are located around Deogarh. Magnesite deposits are located at Gaon Gudha in Nathdwara tehsil.

Emerald production from Rajsamand is known since long. The Kalaguman emerald mine is one of the best deposits of India. Besides Kalaguman, emerald occurrences have been reported from Gadhbore, Dabkucia, Thona, Tikhi, Gaon, Gurha etc. Dolomite deposits are found in Kotharia, Rajnagar, Kelwa, Amet & Sardargarh areas. Besides these, red & yellow ochre occurs at Nathdwara. Manganese is found near Negaria & Eklingpura. In the district there are 3 leases for Mica, one near Viyari in Rajsamand tehsil, one near Ganeshpura in Railmagra & another near Bagpura of Amet tehsil, where it occur associated with pegmatite. In Rajsamand district, limestone deposits occur in Kotharia area of Nathdwara tehsil & north of Bhim in Bhim tehsil. Low grade & micaccous limestone was also prospected in Jaswantpura - Hathun area by the Department of Mines & Geology in the district.

Marble is crystalline limestone, generally medium to five grained, white or with various shades, with stripes or spots & takes good polish. Occurrence of marble in Rajsamand district is entirely dolomitic & is being mined in Rajsamand & Amet tehsils. In Rajsamand tehsil main producers are Janjhar, Kelwa, Umti, Talai, Morbar etc areas and in Amet tehsils are Agaria, Valla Chach Ka Guda, Parvati etc. Agaria, Kelwa fort, Sudul Kheda and Dholi Khan areas produce white marble and at other places adanga or spotted marble occurs. The serpentine rock formed due to metamorphism of ultra basic rock in Dulavton Ka Gudha & Bllutala, south of Kalthar, is also used as green marble and has got a good market.

Forest, Flora and Fauna

The forests of the district are mainly traceable within the hills of Aravalli Mountains. Sporadic forest area &

blocks are also present in comparatively flat areas, but these are mostly open & scrub forests and grasslands. The thick forests with good density are confined to Aravalli Mountain chain of the district. These forests comprise 10.97% of the total area of Rajsamand, out of which 64.93% is covered by Reserve forests and 34.98% by protected; most of them falling in the mountain ranges of Kumbhalgarh, Nathdwara, Bhim and Deogarh tehsils. Of the eight floristic regions in the country, the district falls under 'Central India' region, the forests being of Tropical Dry Deciduous type.

Rajsamand has a large variety of flora and among the common species found are: Aam (Mangifera Indica), Amaltas (Cassia fistula lim), Babul (Acacia arabica), Bargad or Banyan (Ficus bengalensis), Bel, Dhak, Kaith (Fronia Lumonia), Indrok-Dhav (Anogissus sericea), Jamun (Syzygium Cumini), Dhokra (Anogeissus pendula), Salar (Boswellia serrata) etc. Bans (Dendrocalamus strictys) is also available on higher hills. The shrubs & herbs observed in the district are Ak (Colotropis procera), Anwala (Cassia auriculata), Ber (Lizyphus manstiania), Gugal (Commiphora Wightii), Indraju & Vatanjot (Jatropha curcas) & Safed Musali (Chlorophytum Indicum) etc.

The grasslands in the district are found both in hilly & flat areas, the vegetative composition of each of them is vather distinctive. The grasslands of the plain area have dhak as the main tree in heavy & ill drained soils. The common grasses are surwala, buhari, bhangti or phulia dab, khuo (Desmostochya bipinneta), lapla, Arthraon quartimianus, Sporobolous diander & Eragotis spp. As grazing becomes indiscriminate & continuous, only the last four grasses which have poor palatibility dominate. Thaderi bushes which provide pala (dry leaves) are heven year after year. Often they are interspersed with cultivation and are better known as birs (grasslands) and are meant to cater to the grazing nuds of the cattle.

Rajsamand is endowed with a variety of habitats. It has the oldest mountain chain of India i.e. Aravallis which support thick & deuse forests as well as open scrub & grasslands; munerous waterholes in the form of rivers, tanks and lakes also exist alongside. These biotopes, quite different from one another support a variety of fauna which include mor, bandar, langur, baghera and kala hiran. The district abounds in the state animal - Chinkara & the national bird - Peacock. It has the striped beauty of the jungle - the tiger. One can easily encounter the sly panther, cunning fox, noisy jackals, hairy bear, spiny porcupine and many others. The district has its importance in providing refuge to the wildlife which is threatened with extinction in India, (as published by the International Union for Conservation of Nature : I.C.U.N. & United Nations Organization : U.N.O.), viz; Baghera, Bhedia or Indian Wolf (Canis lupus pallipes), Bhalu, Selvi : Scaly ant-eater, Kala hiran, Chausingha : Four horned antelope or ghantali, Chinkara, Chakotari : red-spur fowl or jungli murghi, Pahadi Kachhua : starred tortoise & Ajgar. In fact the two wildlife sanctuaris located in the district, namely Kumbhalgarh & Bhim Todgarh - Raoli serve as gene-pool of the wild animals.

Land use

Total geographical area of the district is 3860.14 sq. kms and the reporting area of land utilisation in the district was 4,55,093 hectares during 1999-2000. The classification of land-use in the district during the same period is as under:

Crop pattern

Cropping pattern in Rajsamand consists of Kharif, Rab and Zaid Rabi. Kharif is mainly rainfed crop, whereas Rabi & Zaid Rabi are irrigated crops. Kharif season crops are grown in the monsoon period, rabi season crops are grown in winter & zaid crops are grown during summer season. The important crops of Kharif season include maize, serghum, bajra, rice, graundnut, seasamum, soyabean, urd, moong, cotton, chillies & vegetables. Rabi season crops include wheat, barley, rape and mustard, gram, vegetables & fodder crops. Zaid season crops include vegetables, fodder crops, groundnut & moong. In the following table area & production of crops in 1998-99 has been given:

Sl. No.	Name of crop	Area sown (in hectare)	Production (in tones)
1	Cereals	96,811	59,926
2	Pulses	9,220	6,562
3	Oilseeds	13,379	5,943
4	Cotton	1,363	4,249
5	Sugarcane	1,650	10,400

Tenancy

Tenancy in the State is governed by the Rajasthan Tenancy Act, 1955. It is one of the most important and progressive laws relating to agrarian reforms. The provisions of the Act apply in respect of land held by tenants as if the State Government was the landholder

acting through the Tehsildars. In relation to the land held by him every cultivator is either a tenant or a sub-tenant or an allottee or a trespasser. A tenant is one who is required to pay some rent on account of use and occupation of land let out to him for agricultural or allied purposes. Grantee with a favourable rate of rent, ijardar, thekedear or trespasser is not considered a tenant.

There are following classes of tenant:

(a) Khatedar tenants
(b) Maliks
(c) Tenants of Khudkasht and
(d) Gair-Khatedar tenants.

A Khatedar tenant is entitled to all the rights conferred and is subject to all the liabilities imposed on Khatedar tenant by the Rajasthan Tenancy Act, 1953. On the date of coming into force of Rajasthan Tenancy Act, a Zamindar or a Biswedar holding Khudkasht was treated as a Khatedar tenant irrespective of whether he was or not in Occupation on the date of vesting.

Malik is a Zamindar or Biswedar who has become malik of Khudkasht land held by him on abolition of Zamindari & Biswedari in 1959. The word 'Malik' was also added to section 14 of the Rajasthan Tenancy Act to classify it as a class of tenants. Section 13 of the Act provides that a Malik is entiled to all the rights conferred upon & is subject to all the liabilities imposed on Khatedar tenant and in substance, this class of tenancy is nothing but a Khatedar tenant.

As Zamindars & Biswedars holding Khudkasht were treated as Khatedar tenants a tenant of Khudkasht is essentially a subtenant in view of the fact that a sub-tenant is also eligible for protection of his cultivatory rights even against Khatedar tenants. Every tenant of land other than a Khatedar tenant, tenant of Khudkasht or a sub-tenant is Gair Khatedar tenant.

A trespasser is a person who takes or retains possession of land without authority or who prevents another person from occupying land duly let out to him by the state. After regularization, the trespasser becomes an allottee. An allottee is treated as a Gair Khatedar tenant on whom Sub-Divisional Officer shall shomoto confer Khatedari rights after ten years of allotment, provided that the allottee fulfills all the terms & conditions of allotment during his period. Similar is the case of other allottees who were otherwise allotted land by the state government.

Agricultural Implements and Machinery

Use of agricultural implements affects agricultural productivity Intensive & widespread use of implements like diesel engines & tractors shows machanisation of agriculture. As per the animal census of year 1997, number of different implements used in Rajsamand is given in the following table:

Sl. No.	Name Of Impliments	Number of used
1	2	3
1	Ploughs	58141
2	Carts	13626
3	Diesel Engines	10893
4	Sugarcane Crushers	3899
5	Electric Pumps	8621
6	Tractors & Power Tiller	1101
7	Oil Ghanis	1050

Irrigation

Irrigation in the district is dependent on rivers, canals, wells, tube-wells and other sources. Around 91 per cent of average annual rainfall are received during June-September. As a result, crops during rest of the year need irrigation. Efforts have been made to provide irrigation by harvesting surface & ground water potential. The proportion of net irrigated area to net sown area in Rajsamand was 44.76 during the year 1993-94. This is substantially high as compared to the state average of 25-30 per cent. However, there are variations at tehsil level. Rajsamand is the most irrigated tehsil with 60.76 per cent sown area being irrigated while Relmagra is the least irrigated with only 29.27 per cent net sown area being covered by irrigation.

The important sources of irrigation in Rajsamand are wells, ponds & canals. The source-wise irrigation during 1998-99 is given below:

Sl. No.	Source of Irrigation	Area (in hectare)
1	Wells/Tubewell (all)	33,831
2	Ponds/Canals	1,858
3	Electirified Wells	16,429
4	Diesel Engine Wells	5,550
5	Tubewells	98
6	Rahat etc.	17,852
	Total	**75,618**

Animal Husbandry

In Rajsamand district for the all round progress & development of animal activities animal hospital, sub-centres & artificial incemination centres are being run by the District Animal Husbandary Officer. According to the 1997 Census there are 309137 cows, 221765 buffaloes, 219118 sheep, 476785 goats, 777 horses/ mules, 3313 donkeys, 4688 camels, 2382 pigs, 30278 poultry and other 24397.

Industries and Labour

In Rajsamand is located Hindustan time Ltd. at Rajpura Dariba based on the lead & zinc produced in the district. Asia's major tyre factory, J.K.Tyres is also located in Kankroli. Apart from this a number of marble units provide employment to hundreds of local people. In the district, there are 4783 small & medium industries and two (2) large scale industries. There are 3 industrial estates in the district, (Rajnagar, Dhoinda & Upli Oden) providing employment to 25282 persons.

Power and Electricity

There has been rapid progress towards rural electrification in the district, 955 villages have been electrified upto 1998-99. In the year 1998-99 there were 80235 domestic & 4353 Industrial/commercial & 9882 agricultural connections. From the point of power arrangement, Rajsamand is divided into Exectutive Engineer (I Division Kankroli & II Division Amet). In the year 1998-99 there were 6 Sub-Divisions under I Division & 3 Sub-Divisions under II Division; also there are 23 electric sub-stations. Under these, 33 KV line is of 4033.96 Kms, 11 KV line is of 2640.854 Km & Lt line of 3752.54 Km. In 1998-99 the annual consumption of electicity has been 2446.24 Lac units

Trade and Commerce

24. The main commodities being exported from the district are cotton, wool & woolen products, Tobacco, timber, hides, wheat, barley, bamboo, honey etc. Main imports include textile, tea, and sugar rice, terracotta articles, soap, machinery electric goods, petrol, glass & ironware. There are 40 commercial, 20 rural and 8 cooperative banks in the district, also there is a branch of Rajasthan Finance Corporation and Khadi Gramodyog each which provide financial aid in trade and commerce. There are agricultural marketing mandies in Rajsamand, Amet, Deogarh and Nathdwara. In the district there are 367 fair price shops, 14 petrol and diesel pumps and 15 barrel points providing service.

Transport and Communication

National Highway No.8 passes through the district whose length is 155 km in during the year 1999-2000 whereas in rural areas the length of B.T. Roads 1283 km, W.B.M. 214 km and Gravelled Road was 231 km in the referred period and 952 villages connected with the Roads in the district.

According to the District Transport Office Rajsamand, in 1999-2000 there were registered 2358 private cars and jeeps, 233 private buses, 18472 motor cycles and auto rickshaw, 318 taxi and carriages, 1942 tractors, 962 public and private luggage carriers and 861 other type of vehicles were registered in the district.

Railway

Meter gauge railway line passes through the district whose length is 104 km. The Nathdwara, Kankroli, Lava Sardargarh, Amet, Deogarh, Madaria and Kumlighat railway stations come on the railway route in the district. There is no air service throughout the district.

There were 210 post offices, 50 telegraph offices, 50 telephone exchanges, 1497 STD/PCO, and 894 letterboxes in the district during the year 1999-2000. Fax facility is available in the district headquarter also.

Gram Panchayats composition & its role

The system of Panchayati Raj was inaugurated on 2nd October 1959 in Nagaur district by then Prime Minister Late Shri Jawahar Lal Nehru. Late Shri Balwant Rai Mehta proposed the recommendation for Panchayati Raj. There are three levels of Panchayati Raj:

(1) Gram Panchayat (Village level)

(2) Panchayat Samiti (Block level)

(3) Zila Parishad (District level)

Gram Panchayat is an important institution of self-government. The institution is set for a village or village agglomeration. A Gram Panchayat is created on 2,000-8,000 population. It covers a maximum area of 6 miles. The villages, which have population below 2,000, are

merged with the other villages to create a Gram Panchayat. Their tenure is of 5 years.

A Gram Panchayat consist 5 to 20 members. The Head of the Panchayat is called Sarpanch. Panch and Up-Sarpanchs are also elected. It includes a member belonging to backward class and a lady member. There are 151 Gram Panchayats in the district.

The main objectives of Gram Panchayat are to arrange the primary education, sanitation of public places, drinking water and light. It manages also the adult education, livestock and repairing of wells.

During the last years, Gram Panchayats functioned several important jobs like *Kam Ke Badley Anaj*, Construction of Panchayat Ghar, School buildings, roads and tanks. It organizes also the cattle fair. Gram Panchayat plays an important role in the development of village and its economy.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a

separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house, but if such

hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:
   i) a minimum population of 5,000;
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may

not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the

same footing with regard to the recognition of the Scheduled Castes.The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1. Adi Dharmi
2. Aheri
3. Badi
4. Bagri, Bagdi
5. Bairwa, Berwa
6. Bajgar
7. Balai
8. Bansphor, Bansphod
9. Baori
10. Bargi, Vargi, Birgi
11. Bawaria
12. Bedia, Beria
13. Bhand
14. Bhangi, Chura, Mehtar, Olgana, Rukhi Malkana, Halalkhor, Lalbegi, Balmiki, Valmiki, Korar, Zadmalli
15. Bidakia
16. Bola
17. Chamar, Bhambhi, Bambhi, Bhambi Jatia, Jatav, Jatava,Mochi, Raidas, Rohidas, Regar, Raigar, Ramdasia, Asadaru, Asodi, Chamadia, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Telegu Mochi, Kamati Mochi, Ranigar, Rohit, Samgar
18. Chandal
19. Dabgar
20. Dhanak, Dhanuk
21. Dhankia
22. Dhobi
23. Dholi
24. Dome, Dom
25. Gandia
26. Garancha, Gancha
27. Garo, Garura, Gurda, Garoda
28. Gavaria
29. Godhi
30. Jingar
31. Kalbelia, Sapera
32. Kamad, Kamadia
33. Kanjar, Kunjar
34. Kapadia, Sansi
35. Khangar
36. Khatik
37. Koli, Kori
38. Kooch Band, Kuchband
39. Koria
40. Madari, Bazigar
41. Mahar, Taral, Dhegumegu
42. Mahyavanchi, Dhed, Dheda, Vankar, Maru, Vankar
43. Majhabi
44. Mang, Matang, Minimadig
45. Mang, Garodi, Mang Garudi
46. Megh, Meghval, Meghwal, Menghvar
47. Mehar
48. Nat, Nut
49. Pasi
50. Rawal
51. Salvi
52. Sansi
53. Santia, Satia
54. Sarbhangi
55. Sargara
56. Singiwala
57. Thori, Nayak
58. Tirgar, Tirbanda
59. Turi

Scheduled Tribes

1. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawara, Vasava, Vasave
2. Bhil Mina
3. Damor, Damaria
4. Dhanka, Tadvi, Tataria, Valvi
5. Garasia (excluding Rajput Garasia)
6. Kathodi, Katkari, Dhor Kathodi, Dhor, Katkari Son Kathodi, Son Katkari
7. Kokna, Kokni, Kukna
8. Koli Dhor, Tokre Koli, Kolcha, Kolgha
9. Mina
10. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
11. Patelia
12. Seharia, Sehria, Sahariya

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each

person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main-worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non-worker

A person who has not worked at all in any econom ically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the

cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration

through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude Birth Rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

CrudeDeath Rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural Growth Rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age Specific Fertility Rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age Specific Marital Fertility Rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General Fertility Rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General Marital Fertility Rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total Fertility Rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be

born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total Marital Fertility Rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-Specific Mortality Rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant Mortality Rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-Natal Mortality Rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early Neo-Natal Mortality Rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late Neo-Natal Mortality Rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Neo-Natal Mortality Rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal Mortality Rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still Birth Rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal Mortality Rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types— (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra

district migration), (b) Migration from one district of state to another district of state (inter district migration) (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding - population, its distribution

According to the 2001 census, the total population of Rajsamand district is 987,024 comprising 493,459 males and 493,565 females and constituting 1.7 percent of State population and area spread over 1.1 per cent in the 7 tehsils of the district, Nathdwara tehsil is most populous tehsil having population 209,421 while Deogarh is the smallest tehsils having a population of 94,370 persons. Other tehsils in order of their population size are Rajsamand (196,207), Bhim (137,578), Kumbhalgarh (131,346), Railmagara (113,268) and Amet (104,834).

Out of the total population of the district 87.0 per cent lives in rural areas while 13.0 per cent lives in urban areas. The corresponding proportions in rural and urban areas of the State are 76.6 per cent and 23.4 per cent respectively.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF TEHSILS BY RESIDENCE, 1991-2001

Sl. No.	District/Tehsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Bhim	104,066	104,066	0	137,578	137,578	0	32.2	32.2	0.0	0.0	0.0
2	Deogarh	77,737	63,804	13,933	94,370	77,865	16,505	21.4	22.0	18.5	17.9	17.5
3	Amet	86,171	71,557	14,614	104,834	88,162	16,672	21.7	23.2	14.1	17.0	15.9
4	Kumbhalgarh	112,626	112,626	0	131,346	131,346	0	16.6	16.6	0.0	0.0	0.0
5	Rajsamand	147,357	108,526	38,831	196,207	140,520	55,687	33.2	29.5	43.4	26.4	28.4
6	Railmagra	100,294	100,294	0	113,268	110,435	2,833	12.9	10.1	0.0	0.0	2.5
7	Nathdwara	194,470	163,592	30,878	209,421	172,395	37,026	7.7	5.4	19.9	15.9	17.7
	District Total	**822,721**	**724,465**	**98,256**	**987,024**	**858,301**	**128,723**	**20.0**	**18.5**	**31.0**	**11.9**	**13.0**

The district has registered a percentage decadal variation of 20.0 during the decade 1991-2001. The rural area of the district has attained a lower decadal variation of 18.5 per cent as compared to that of urban area at 31.0 per cent. At tehsil level, it varies from the lowest of 7.7 per cent in Nathdwara tehsil to a maximum of 33.2 per cent in Rajsamand tehsil in total areas.

There is an increase in the percentage of urban population to total population from 11.9 in 1991 to 13.0 in 2001. All the tehsils have registered the same trend as that of district whose percentage of urban population has increase from 1991 to 2001 except in Deogarh and Amet tehsils where it has declined from 17.9 and 17.0 per cent in 1991 to 17.5 and 15.9 per cent in 2001 respectively.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District/Panchayat Samiti	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

Of the total 987 villages, 973 are inhabited villages. Khamnor Panchayat Samiti has the highest number of villages i.e. 187 where as Railmagra Panchayat Samiti with lowest of 91 villages. Again, Khamnor Panchayat Samiti is the most populous with 172,395 persons while Deogarh is the least populous Panchayat Samiti with a population of 77,865 persons. The maximum numbers of village i.e.292 (30.0 percent) are those which lie in the population range of 200 - 499. It is followed by (288) 29.6 per cent of the inhabited villages, which have population range of 500-999. As regards to large size villages in the district, 8 are such which lie in the population range of 5000-9999. None of the village has population more than 10,000. In case of small size villages i.e. having population less than 200, such villages are 105 in number in the district.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

	Name of Towns
(a) New	
(i) Statutory town	Nil
(ii) Census town	Nil
(b) Denotified	
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c) Declassified*	Nil
(d) Wholly merged with other town (s)	Nil

* Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Only one Census town has emerged namely Dariba, none of the town denitrified nor any town merged.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	2	0.2	63	0.0

Not known	0	0.0	0	0.0
District Total	**973**	**100.0**	**858,301**	**100.0**
Population Density (Rural) of the district:	230			

The density of population of the rural areas of the district is 230. Of the total number of inhabited villages i.e. 973 in the district, 45.0 per cent have population density ranging from 101 to 200, followed by 24.4 per cent in the range of 201-300. Apart from these 19 villages have population density up to 50.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	905	898	947	920	920	923
1911	908	904	936	932	930	963
1921	896	896	897	940	943	900
1931	907	906	903	943	943	939
1941	906	907	897	943	944	924
1951	921	919	928	948	948	952
1961	908	913	882	933	935	904
1971	911	919	875	971	974	930
1981	919	930	877	995	1,002	941
1991	910	919	879	991	1,000	924
2001	**921**	**930**	**890**	**1,000**	**1,012**	**926**

The district has witnessed a fluctuating trend in sex ratio since 1901. From 920 in 1901 it increased to 932 in 1911. It again increased to 940 in 1921 and 943 in 1931 and 1941 and so forth. During the last decade i.e. 1991-2001 it has increased from 991 in 1991 to 1,000 in 2001.

In comparison to rural areas of the district the sex ratio in urban areas has been higher only in 1901, 1911 and 1951 respectively. From 1961 to 2001, the sex ratio in rural areas has been higher than that of in urban areas. The district has always registered higher sex ratio as compared to that of state since 1901 to 2001.

TABLE 6 : SEX RATIO BY TEHSILS, 2001

Sl. No.	Name of Tehsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Bhim	1024	1,024	0
2	Deogarh	1026	1,042	955
3	Amet	993	1,000	954
4	Kumbhalgarh	1033	1,033	0
5	Rajsamand	958	974	919
6	Railmagra	1016	1,019	879
7	Nathdwara	989	1,005	916
	District Total	**1000**	**1,012**	**926**

The district has registered a sex ratio of 1,000 in 2001. Where as for rural and urban areas it is 1,012 and 926 respectively. At the tehsil level, the highest sex ratio of 1,033 has been registered by Kumbhalgarh tehsil and the lowest of 958 by Rajsamand tehsil for total areas. In case of rural areas the highest sex ratio of 1,042 has been attained by Deogarh tehsil and the lowest of 974 by Rajsamand. In case of urban areas the highest sex ratio of 955 has been attained by Deogarh tehsil and the lowest of 879 by Railmagra tehsil.

TABLE 7 : SEX RATIO BY PANCHAYAT SAMITIES, 2001

Literacy rate for District (Rural):		32.5		

The literacy rate of the scheduled tribe population in the rural areas of the district is 32.5 per cent. There are only 755 villages in the district where scheduled tribes population reside. It is significant to note that 4 (0.5 per cent) of the total inhabited villages (755) have 100 per cent literacy rate. Apart from these 14 villages are such where literacy rate ranges from 71 to 80 per cent. Population wise, 90.0 per cent i.e. bulk of scheduled tribes population have literacy rate up to 50 per cent. Among these 32.0 per cent have literacy rate ranging between 21 to 30 per cent.

\+ To be arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

Among the towns of Scheduled Tribe of Rajsamand district, the highest literacy rate of 83.2 per cent has been attained by Dariba (CT) whereas the lowest literacy rate of 38.7 per cent has recorded in Rajsamand (M). Similarly among the male highest literacy rate is 94.3 per cent in Dariba and lowest literacy rate of 55.1 per cent in Rajsamand. Among the females the highest literacy rate of 69.1 per cent in Dariba (CT) and lowest rate of 20.6 per cent in Rajsamand (M). The highest gap 39.6 per cent in Amet (M) and lowest 21.0 per cent in Deogarh (CT).

In the district, 40.7 per cent of the total population comprises of total workers (main + marginal) and the rest 59.3 per cent as non-workers. Of the total workers (40.7 percent), 28.0 per cent are as main workers and the rest 12.8 per cent as marginal workers. Sex wise, 51.4 per cent of male population is that of workers whereas for females this percentage is 30.0. At the tehsil level, Railmagra tehsil has recorded the highest percentage of total workers in males (53.8) per cent and Deogarh tehsil in females (41.4) percent respectively. On the other hand, Bhim tehsil has recorded the lowest percentage of total workers in males (45.4) percent and Amet and Rajsamand tehsil in females (19.7) percent each respectively.

Less than half (42.3 percent) of the rural population consists of workers. There is much difference in the work participation rates of males and females being 51.7 per cent and 33.1 per cent respectively for the rural areas of the district. Like at tehsil level, at Panchayat Samiti level too, the highest percentage in males (54.0) percent each in Deogarh and Railmagra tehsils respectively and again Deogarh tehsil in females (47.0) percent. However, the lowest percentage has been recorded by Bhim (45.4) percent in males and Amet tehsil (21.1) percent in females respectively.

\+ To be arranged in alphabetical order.

^ The names of constituent units of U.A.are given seprately.

* In case of towns having outgrowth an astrrisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

In contrast to the rural areas of the district only 30.0 per cent of the urban populations are as workers (main + marginal). Apart from this much variation is also seen in the percentage of male and female workers, which are 49.8 and 8.7 respectively. Among the towns, the percentage of workers varies from 31.8 in Deogarh (M) to 27.4 in Dariba (CT).

Note: Percentage of workers to total workers are given in brackets.

Other workers are the main working force in the district as they form 42.3 per cent of total workers. It is followed by Cultivators (40.9 per cent), agricultural labourers (13.4 per cent) etc. Females (34839) outnumber males (19088) as Agricultural laborers. Much variations in the percentages of male workers (55.2) and female workers (20.1) classified as other workers is seen in the district.

At tehsil level, the percentage of cultivators to total workers varies from 54.6 in Kumbhalgarh tehsil followed by 53.2 in Deogarh tehsil to 23.1 in Rajsamand tehsil. For Household Industry workers, it varies from 5.1 per cent in Nathdwara tehsil to 2.0 per cent in Bhim tehsil. In case of 'other workers' the highest percentage of 63.6 has been registered by Rajsamand tehsil while the lowest of 22.3 per cent in Kumbhalgarh tehsil.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN PANCHAYAT SAMITIES, 2001

Note: Percentage of workers to total workers are given in brackets.

Less than half i.e. 42.3 per cent of the total rural population of the district is engaged in economic activities being workers. Of the total workers, most are engaged in agricultural activities i.e. 44.7 per cent are as cultivators and 14.7 per cent as agricultural laborers. Only 3.1 per cent of the workers are engaged in household industries whereas the significantly 37.4 per cent in other works.

Sex wise, percentage of female workers is higher in all the four economic categories except other workers where their percentage is 18.3 as compared to that of males at 49.8 at the district level

				(8.7)	**(15.1)**	**(4.6)**	**(10.3)**	**(70.1)**

The percentage of workers to total population of urban areas is significantly quite low being only 30.0 per cent as compared to that of rural areas of the district being 42.3 per cent. Here too, the percentage of workers engaged in four economic categories is just the reverse as compared to rural workers where majority i.e. 87.8 per cent of the total urban workers are as 'other workers' followed by 5.7 and 5.3 per cent as Household industry workers and cultivators.

Almost similar trend is visible in all the municipal towns except in Deogarh (M) Rajsamand (M) where the percentage of cultivators is higher than that of Household industry workers..

Sex wise percentage of males workers as other workers is Higher to than female other workers being 90.7 and 70.1 per cent respectively. On the other hand, percentage of female cultivators (15.1 per cent) is much higher than that of male cultivator's (3.8) at the district level for urban areas.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Of the total (973) inhabited villages, 889 (91.4 per cent) have educational facilities. In case of medical amenities only 25.8 per cent of inhabited villages have such amenities. A significant number i.e. 965 (99.2 per cent) villages have improved drinking water amenities. In the communication field only 20.3 per cent of villages have post office facilities while 55.1 per cent have telephone facilities. In the banking field the picture is gloomy as only 38 (3.9 per cent) villages have banks. More than 50 per cent i.e. (487) are linked with pucca approach roads whereas 97.3 per cent have power supply.

At Panchayat samiti level, Bhim tehsil each have the higher percentage i.e. 97.0 of villages having educational facilities. For medical amenities it is Railmagra panchayat samaiti, which have highest percentage of 39.6. Much variation is seen among the panchayat samaiti having telephone facilities. Rajsamand panchayat samiti has the highest percentage of villages i.e. 84.8, which have telephone facilities whereas Kumbhalgarh has the minimum percentage of 33.5 for such facility. Amet and railmagra panchayat samaities the distinction of cent percent villages having power supply.

$ Transport communication includes bus service, rail facility and navigable waterways.

Almost entire (98.6 per cent) rural population of the district is being served by educational amenities. It varies from 99.7 per cent in Bhim Panchayat Samiti to 96.6 per cent in Deogarh Panchayat Samiti. The highest percentage (71.0) of population availing medical amenities has been found in Railmagra Panchayat Samiti while lowest of 35.2 in Deogarh Panchayat Samiti. Deogarh, amet and Rajsamand Panchayat Samities at the top where cent per cent of the population has access to improved drinking water while Bhim Panchayat Samiti is at the bottom with 99.0 per cent. Rajsamand Panchayat Samiti is in the forefront in the field by telephone facilities where 92.4 per cent of the population has been served by this facility while Kumbhalgarh Panchayat Samiti is at bottom with 49.1 per cent. Only 15.6 per cent of the rural population is being served with banking facilities whereas 98.7 per cent have access to power supply. Hundred percent of the population of Amet, Rajsamand and Railmagra Panchayat Samities are being served with power supply.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

There are 103 villages in the district, which do not have primary school's of these in 77 villages this amenity is available in less than 5 Kms. In case of middle schools, 666 villages do not have this amenity. Of these, for 440 villages this amenity is available at a distance of less than 5 km, for 217 villages at a distance of 5-10 km. None of the villages in the district have a degree college. For most of the villages i.e. 854, the degree colleges are available at a distance beyond 10 km.

Likewise, only one village has hospitals. For this in most of the villages i.e. 791 village people have to go for more than 10 km. Similarly post office amenity is not available to 775 villages. Of these, for 448 villages, this amenity is available at a distance less than 5 km. Of the total 973 villages, Bus services are not available in 458 villages. Among these, this facility is available at a distance of less than 5 km and 5 to 10 km for 266 and 174 villages respectively.

As regards to banking services, 941 and 959 villages do not have commercial banks and cooperative banks respectively. For most of the villages i.e. 402 and 649 village people have to go for more than 10 km for commercial banks and cooperative banks respectively.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

\# Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.
* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Of the total inhabited village's (973), majority (397) of them have population range of 1 - 499. It is followed by 288 villages in the range of 500-999. There are 8 such villages, which have population range of 5000-9999. All the amenities are available to almost all the villages in the population range of 5000 – 9999.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of Panchayat Samiti	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Bhim	132	69,093	18.9	48.5
2	Deogarh	131	56,577	20.8	35.9
3	Amet	136	50,275	23.7	32.8
4	Kumbhalgarh	164	77,150	15.4	40.4
5	Khamnor	187	77,347	22.8	32.6
6	Rajsamand	132	56,740	31.2	26.3
7	Railmagra	91	55,092	48.6	28.0
	District Total	**973**	**442,274**	**25.0**	**33.6**

Note : Cultivable area = irrigated area + unirrigated area

Of the total rural area of the district (of inhabited villages) 25.0 per cent is cultivable. Apart from this 33.6 per cent of the total cultivable area is being irrigated. At the panchayat samiti level the highest percentage of cultivable area to total area is found at 48.6 per cent in Railmagra Panchayat Samiti followed by 31.2 per cent in Rajsamand and the lowest of 15.4 per cent each in Kumbhalgarh Panchayat Samiti. As regards to irrigated area, the highest percentage of 48.5 is found in Bhim Panchayat Samiti whereas 26.3 in Rajsamand Panchayat Samiti.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name and urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Amet (M)	255.0	53.0	202.0	218.0	70.0	148.0	0.0	0.0	0.0
2	IV Deogarh (M)	367.0	68.0	299.0	960.0	85.0	330.0	333.0	0.0	212.0
3	III Nathdwara (M)	356.0	151.0	205.0	316.0	36.0	148.0	25.0	7.0	100.0
4	II Rajsamand (M)	520.0	276.0	244.0	347.0	252.0	0.0	51.0	0.0	44.0
	District Total	**416.0**	**182.0**	**234.0**	**402.0**	**143.0**	**106.0**	**74.0**	**2.0**	**77.0**

The per capita receipt by the statutory towns of the district amounts to Rs.416.0. Of this, Rs.182.0 is being received through taxes and the remaining Rs.234.0 from all other sources. The highest per capita of Rs.520.0 has been attained by Rajsamand (M) followed by Rs.367.0 by Deogarh (M). The lowest per capita receipt of Rs.255.0 has been registered by Amet (M).

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary/ Middle	Secondary/ Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Amet (M)	2.4	1.2	1.2	1.2	0.6
2	Deogarh (M)	4.2	4.2	1.2	1.2	0.0
3	Nathdwara (M)	3.2	3	1.4	0.8	0.3
4	Rajsamand (M)	4.1	2.7	1.4	1.3	0.4
	District Total	**3.7**	**2.8**	**1.4**	**1.1**	**0.3**

The number of primary, middle and secondary schools per 10,000 of population is 3.7, 2.8 and 1.4 respectively. As regards to senior secondary and college, this number is 1.1 and 0.3 respectively. At the town level, the maximum number of primary schools per 10,000 population is found in Deogarh (M) at 4.2 followed by Rajsamand (4.1). It varies from the highest number of middle schools per 10,000 populations at 4.2 in Deogarh (M) to a lowest of 1.2 in Amet (M). As regards to colleges, the highest 0.6 is found in Amet, whereas the '0' has been found in Deogarh (M).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town+	Number of beds in medical institutions per 10,000 population
1	2	3
1	Amet(M)	22
2	Dariba(CT)	131
3	Deogarh(M)	10
4	Nathdwara(M)	39
5	Rajsamand(M)	32
	District Total	**32**

+ To be arranged in alphabetical order.

The number of beds in medical institutions in towns per 10,000 population is found to be only 32. The highest number of beds per 10,000 population is recorded at 131 in Dariba (CT). It is found the lowest at 10 in Deogarh (M).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town+	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Nathdwara	37,026	105	0.3
	District Total	**37,026**	**105**	**0.3**

+ To be arranged in alphabetical order.

Only 0.3 percent of urban population of the district lives in slums. At the town level only one town Nathdwara has slam population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town+	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Amet (M)	Readymade Garments	Ghee
		Cotton	Marble
		Groundnut Oil	Chilli
2	Dariba (CT)		Zinc
			Lead
3	Deogarh (M)	Blancet	Marble
		Carpet	Wheat
		Furniture	Vegetable
4	Nathdwara (M)	Painting	Handicraft
			Painting
			Silver Ornament
5	Rajsamand (M)	Tyre	Tyre
		Marble Slab	Marble Slab
		Iron Goods	Iron Goods

+ To be arranged in alphabetical order.

Marble, Painting and Furniture's are mainly manufactured in Rajsamand (M), Nathdwara (M) and Deogarh (M). Ground nut oil and carpets are being also manufactured in Amet (M) and Deogarh (M). Other commodities being manufactured in various towns are Cotton, Blanket, Iron goods and Tyres etc.

Marble is the main commodities being exported from various towns. Zinc, Wheat and Handicraft are the other commodities being exported form various towns.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the houshold has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

(i) Improved drinking water : Majority of the households i.e. 71.9 per cent have drinking water facility in the district. For rural and urban areas, these percentages are 68.6 and 95.9 respectively. At tehsil level, for rural areas, the highest percentage (91.3) of households availing this facility has been found in Railmagra tehsil whereas for urban areas it is cent per cent in Railmagra tehsil.

(ii) Electricity : More than 50 per cent i.e. 58.7 per cent of households are using electricity. However there is much wide gap in the percentage of households using electricity in the rural (54.2 per cent) and urban (91.3 per cent) areas of the district. At tehsil level it varies from a maximum of 77.5 per cent to a minimum of 35.9 per cent of households using electricity.

(iii) Bathroom : Less than a quarter i.e.19.7 per cent of the households have bathrooms in the district. Here too much wider gap is seen in the percentage of households having bathroom in rural and urban areas, as these are 12.4 per cent and 72.1 per cent respectively. Similar trend is seen in all the tehsils of the district.

(iv) Toilet : In case of toilets, the picture is not so good especially in rural areas of the district. Only 9.2 per cent of households of the rural areas have toilet facility as against 73.0 per cent in the urban areas. The highest percentage (30.1) of households having toilet facility is found in Rajsamand tehsil whereas the lowest of 6.2 per cent in Kumbhalgarh tehsil.

(v) Drainage : Again, in case of use of drainage, the position is poor. Only 32.3 of households have drainage in their houses. In rural areas the position is even worse, where only 25.0 per cent of households have drainage system as against 84.9 per cent in urban areas.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."
Percentage in brackets.

Majority of the households (82.8 per cent) of the district is using firewood as fuel followed by cooking gas (10.3 per cent), kerosene (3.7 per cent), and crop residual (2.4 per cent). In the rural and urban areas of the district, much deviation is seen in the percentage of households using fire wood and cooking gas as 90.3 per cent and 4.7 per cent of households of rural areas are using these respectively in comparison of 28.8 per cent and 50.7 per cent of urban areas respectively. Similar trend is seen at tehsil level also.

		Urban	6,656	3,599	2,559	4,951	1,507	2,064	1,946	241	1,003

Data source: Census of India 2001.H-Series:" Tables on Houses, Household amenities and Assests"

(i) Banking services : Only 26.0 per cent of the total household's (199,676) are availing Banking services whereas in rural and urban areas this percentage is 22.6 and 50.6 respectively. At tehsil level, the highest number of households (11,520) availing this facility has been found in Nathdwara tehsil, while the lowest (4,036) in Amet tehsil.

(ii) Radio/Transistor : Of the total household's (199,676) of the district, 28.7 per cent are in possession of Radio/Transistor. Similarly in rural and urban areas of the district, the percentage of households having radio/transistor is 27.2 and 39.6 per cent respectively.

(iii) Television : In case of Television, the percentage of households possessing it is much higher i.e. 68.2 in urban areas than that of in rural areas at 16.0 per cent only.

(iv) Telephone : Only 6.5 per cent of the total household's (199,676) of the district have telephones. The gap is much wider in rural and urban areas of the district where 4.1 per cent and 23.9 per cent of their respective total households have telephones respectively.

(v) Auto mobiles : In case of two wheelers, only 12.5 per cent of the households have either motor cycle or scooter or moped. For rural and urban areas these percentage are 9.5 and 33.9 respectively. In rural areas 1.4 percent of households have four wheelers whereas in urban areas only 5.9 percent of households have four wheelers.

It is very significant that less than half of the households i.e. 43.4 per cent do not have any of the specified assets. In rural areas this percentage is even higher i.e. 47.0 as compared to that of in urban areas at 17.2.

Other Developmental Activities

Various poverty alleviation, social welfare, schedule caste development and rural development related schemes are been conducted in the district. District Rural Development Agency under Integrated Rural Development programme provided Rs.133.96 Lac subsidy and Rs.448.98 Lac loan to 1871 persons. Rs.14.00 Lac was provided as subsidy under the **TRYSEM scheme.**

In the year 1998-99 under **Jawahar Rozgar Yojana** 752 works worth Rs.287.58 Lac were sanctioned and 5.22 Lac man days generated,while 596 houses were completed by spending Rs.180.16 Lac under **Assure Employment Scheme** Rs.180.00 Lac Rs.12.45 Lac from united fund, Rs.27.16 Lac under (32 districts, 32 works) **Battis Zile Battis Kaam** and Rs.29.18 Lac were obtained and spend in the form of public contribution under **Apna Gaon Apna Kaam** and various permanent assets created. From the Member of Parliament (MP) quote 55 works worth Rs.48 Lac were sanctioned. Zila Parishad too provided under rural sanitation scheme to 380 BPL and 496 non-BPL families safe toilets, 2680 unnat chulha, handpump facility (34), residential aid (43) and allotment at concessional rate (959). Schedule Caste Development Corporation too provided loan/subsidy through banks. Alongwith this under **social welfare scheme old** age, widow and handicapped pensions were duly sanctioned. Also a new programme of poverty alleviation, DPIP has been sanctioned and various development schemes are being conducted by the women and Child Development Department and MADA.

Social and Cultural Activities

Fairs and Festivals

The fairs and festivals play an important role in the cultural, religious and social life of the people various regions of the district. While most of the fairs are generally seasonal and religious in character, these fairs are becoming increasingly important from commercial and tourist point of view in recent years. Such fairs, as in the past, continue to be an important source of enjoyment and entertainment of the public in general besides being a source of income to the individeual local bodies. Some of the important fairs are Annakut and Janmashtami at Nathdwara, Pratap Jayanti at Haldighati and Kumbhalgtarh, jalijhoolni Ekadashi at Charbhujayi, Karni Mata animal fair at Deogarh, janhira Bhernji animal fair at Kunwaria and Gangaur fair at Kankroli and Nathdwara.

As in other parts of the state, the main festivals among Hindus are Deepavali, Holi, Dussehra, Gangaur, Teej, Raksha bandhan, Makar Sankrani and janmashtmi; while Muslims observe Ramzan, Id-ul-Fiter, Id-ul-zuha and Muharram.

Places of Religious, Historical and Archaeological Importance and Tourist Interest

Following Places in the district are of special interest:

Rajsamand Lake

In 1662 AD there was a sever famine in Mewar. In order to alleviate the suffering of the starving people of the region, Rana Raj Singh decided to construct a dam near the village of Kankroli impounding the water of Gomti river between two hills. The construction work was completed in 1670 AD and the Consecration Ceremony performed in January 1676 AD. The dam is of a bon shape, about 6.4 km long, 2 km broad and having a maximum depth of about 1676 cms. Two temples dedicated to Amba Mata and Gherav mata are situated on its embankment. The embankment has beautiful ghats and three edifices (pavilions) known as 'Nawchokis' which are all richly sculptured in different patterns. Images of various gods, dancing angels, birds and animals etc have been skillfully carved on the pillars and ceiling of these pavilions in a very artistic and attractive style. Another importance of the Nauchoki is a large inscription "Rajprasasti" engraved on 25 slabs and placed in the niches of various ghats on it. It is one of the biggest inscriptions of the country and deals with the history of Mewar in general, and gives detailed narrative of Rana Raj Singh' history and details regarding the construction of the dam.

Kankroli

Situated near the Rajsamand lake, is located an important Vaishnava temple devoted to Lord Krishna and ranks very high among the temples of the Vallabhaachaarya seet. The temple building is magnificently massive in structure and is better known as Dwarkadish shrine. Other temples at this place are those of Mahadeoji, Sriramsya, Sakshigopal and sheetla Mata; also there is a mosque in the town.

Nathdwara

Nathdwara is one of the most famous vaishnave centre in India, with lord Krishna as the presiding deity. When Aurengzeb embarked on a policy of xx destruction of Hindu temples, the custodians of the idol of Shrinathji of Goverdhan, near Mathura, left that place with the idol in search of a new haven and it was Maharana Raj Singh of Mewar who provided refuge. In 1672 Shrinathji was installed in a new temple built in village sihad, now called Nathdwara, on the banks of the Banas. Ever since, Nathdwara is a place of great sanctity for the Vaishnava of the pushtimargi or vallabha sect. Among other things, Nathdwara is known for its pichhwais (large paintings on cloth depicting legends from the life or lord krishna), inlay work on silver and gold, x x x x rosary beads & Haveli music (devotional music, skin to Dhrupad - singing, with compositions meant for various seasons, festivals and section of the day). This place is visited by a fairly large number of devotes throughout the year from all parts of the country, the largest being from Gujarat State.

Haldighati

Haldighati (the turmeric coloured vale) which is situated about 18 km south - west of Nathdwara, is a hallowed spot of immense historic importance associated with the memory of the great ruler Maharana Pratap of Mewar. The famous battle between him and the forces of the Mughal emperor Akbar was fought here in 1576 AD. It is a picturesque site surrounded by hillocks. Nearby in a village named Baghicha, lie the famous Chetak smarak where Rana

Pratap's famous steede succumbed to his inferies after the battle.

Kumbhalgarh.

The place derives its name from the well known fort of Kumbhalgarh built by Rana Kumbha during the period 1443-1458 AD. Situated in Aravalli lhills about 48 kms to the west of Rajsamand, perched upon the extreme hill of the ranges, it commands a magnificent view of the wild and rugged Aravallies and the sandy deserts of Mewar in the distance. It is defended by a series of walls with battlements and bastions built on the slope of the hill and contains a number of beautiful, majestic and historic buildings which are reached through serval gateways along a winding approach. 'Badal Mahal' or the cloud place at the top offers a scenic view of the surrounding countryside. A temple of Neelkanth Mahadeo and an alter are also located within the fort. There are serval other temples in dilapidated condition like Mataji ka Mandir, Mamadev ka Kund (where Rana Kumbha was assassinated by his son Uda, when the former was in meditation), Kumbha swami temple, surya (sun) temple, Bawan Jinalaya and several other Jain temples. At Kumbha swami temple near Mamodev Kund, Rana Kumbha had placed five slabs of an inscription containing the genealogy and history of the rulers of Mewar and a brief narrative of his own region. These inscriptions provide valuable information with regard to Mewar history. The fort is now a protected monument under the Archaeological Department. Kumbhalgarh is also known for its wildlife sancturary.

Charbhuja Temple

About 32 kms north of Rajsamand lies the famous temple of Charbhuja Nath, a Vishnu temple rebuilt in 1444 AD by Ras Mahipal and his family belonging to Kharwar clan of Rajputs, as per the inscription placed inside the temple. In the Charbhuja inscription, the name of the village is mentioned a Badari because the deity of Charbhuja is considered as a form of Badrinath. This deity of Charbhujanath is considered to be a miracuflous one. Hundreds of pilgrims visit it and make pledges before it inorder to enjoy the favour of the deity. The town is called Charbhuja after the name of the deity. The temple was built on the style of temple architecture prevalent in medieval age; glass work in the inner temple imparting it a beautiful look. On Bhadra Shukla 11, a grand fair is held every year which is attended by thousands of devotees. About 5 km away from Charbhuja, is another old temple of Vishnu called Roopnarayan temple at Sevantre Village.

Bodhisthal

The Jain religious shrine of Bodhisthal lies at kelwa, the former jagir village of the Rathore in Mewar. Kelwa in 13 km from Rajsamand. In 1760 AD a new sect called Terapanth was initiated at Kelwa. It was founded by Saint Bhikanji, soon his preachings were accepted by Jains on a large scale, gradually spreading throughout India and forming one of the firmest Jain sects in the country. The place where Bhikanji meditated and made his first preaching of a new panth came to be known as Bodhi-sthal.

Gilund

Gilund, an important protected archaeological site is located in Railmagra, about 46 km east of Rajsamand. The site was excavated in 1959-60 by B.B. Lal of the Archaeological survey of India. The excavations revealed a three fold cultural sequence. The earliest Chalocolithic culture compare well with the excaqvations at Ahar and Balathal in Udaipur district and Ojiyana in Bhilwara district. The next cultural phase started 500 BC and is marked by the presence of Sunga-Kushan pottery. The last cultural phase belongs to early medieval age attested by an inscribed pot shred in 9th century characters.

Khamnor

Khamnor village is situated 33 km south of Rajsamand. It is an ancient place having some old but dilapidatd temples. The path leading towards the Haldighati passes by the side of this village. The letter post of the famous battle of "haldighati" was fought just a little distance away from this village in theopen space now called Rakta Talai (pound of blood). Several ruins of old village known as Jaigarh are visible between Khamnor and Molela. These are said to be the capital place of Khuman singh who later founded Khamnor. There is an old memorial built by Karna Singh grandson of Maharana Pratap, in the memory of Shalivahan, son of Ramshah, ruler of Gwalior. Shalivahan died fighting against the Mughals in the battle of haldighati.

Molela

The village of Molela lies 6.5 km in the north of Khamnor on the northern side of the Banas river. The Mughal forces halted and laid their tents after arriving here from Mandalgarh via Mohi and Kankroli in the Chhaper (open plain area) known as "kala Gora ka Chhapar". It was towards this side that the Mughal soldiers field on the initial onslaught of the Mewar troops. Terracotta pottery of Molela village is quite famous.

(xiii) Scope of Village and Town Directory

In Part-A of the District Census Handbook, entitled as Village and Town Directory, an attempt has been made to present information regarding various amenities/facilities available in every rural/ urban unit of the State. The unit of the rural areas is village and that of urban area is town/urban agglomeration. Information regarding rural areas and Census Towns has been gathered through Patwaries while that in respect of urban areas other than Census Towns has been collected through the concerned municipality/Cantonment Board/Notified Area Committee. In order to have the aforesaid information authenticated the concerned departments and agencies were also contacted to furnish information available with them. All the information gathered about amenities relate to year 1999 and those pertaining to land-use pattern pertain to Samvat Year 2055 i.e. the agricultural year ending on the 30th June, 1999.

Village Directory

It will be helpful at the outset to have an idea of the items for which information has been included in the Village Directory. Information in respect of each village has been presented through a twenty three column format in which villages have been presented in order of their names and Permanent Location code Number (PLCN) at State level. The first four columns (2-5) give general information i.e. Name of village and Permanent location code number, area in hectares, population and number of households residing in villages as per Census 2001.The amenities available in the village have been shown in columns 6-18. The information regarding land-use pattern has been given in columns 19-23. As a special feature for Census-2001 some new columns 10-12 and 17-18 are first time incorporated viz. commercial and cooperative Bank, Agricultural/non Agricultural and other credit societies, Recreational and cultural facilities, News Paper/Magazine and most important commodity manufactured in the village. In case of uninhabited villages, the information has been given relating to columns 1-3 and 19-23 only and in the remaining columns the word 'uninhabited' has been mentioned. At the end of entries of each Panchayat Samiti the totals relating to columns 3-11, 13-14, 16-17,19 and 21-23 (total area, amenities and land-use break-up) have also been given.

Various amenities like drinking water, communication, post and telegraphs etc. have been shown against the name of the referent village if they are available within the village with the help of various codes. The Code Structure relating to various columns has been given in the beginning of Section-I to Part-A of this book. The number of each type of amenity has been indicated in parentheses after the suitable code in case of educational, medical and post & telegraph facilities.

If any amenity is not available within the village a dash (-) has been shown in the relevant column and next to it, the distance of the nearest place from the referent village where the facility is available has been given in broad distance ranges viz. <5 km, 5-10 km & 10+ km.

The following pattern has been adopted for indicating the educational institutions:

(i) Schools up to Class V have been treated as primary schools. They include Nursery Schools, Kindegarten Schools, Pre-basic and Pre-primary Schools and Junior Basic Schools upto Class V.

(ii) All schools having Classes VI to VIII have been treated as Middle Schools.

(iii) All schools having Classes IX and X have been treated as Secondary Schools.

(iv) All schools having Classes XI and XII have been treated as Higher Secondary Schools. They include Senior Cambridge Schools, Schools under 10+2 scheme, Intermediate, Pre-University and Junior College etc.

In case of composite schools relevant groups of classes have been treated separately, e.g. a school having classes I to XII, has been shown as having one primary, one middle, one secondary and one higher

secondary school. The term 'College' includes all types of colleges whether Arts/Science/Commerce/ Medical/Engineering/Agriculture and others imparting education at Graduate or Post-Graduate level. Institutions other than industrial schools, training schools and adult literacy classes/ centres have been shown under 'others'.

In case of Medical institutions, Hospitals and Dispensaries, Allopathic, Ayurvedic, Unani and Homeopathy have been shown separately. Other institutions include all types of Yogic, Naturopathy,

IV. Culturable waste

It includes Gaucher i.e. pasture and grazing land and tree-groves.

V. Area not available for cultivation

It refers to land, which has not been classified in any of the above mentioned types and also includes house sites, roads, rivers, nullahs, hillocks etc.

The following nine appendices have also been provided to present the position obtaining in Panchayat Samiti and district as a whole regarding various Amenities available in rural areas, villages classified by characteristics of the population and land-use pattern in Census Town in connection with the Village Directory:

(i) Panchayat Samiti wise Abstract of educational, medical and other amenities in villages.

  (a) Villages by number of Primary schools.

  (b) Villages by number of Primary, Middle and Secondary schools.

  (c) Villages with different sources of drinking water facilities available.

(ii) Villages with 5000 and above population, which do not have one or more amenities.

  (a) Census towns which do not have one or more amenities.

(iii) Land utilisation data in respect of Census Town.

(iv) Panchayat Samiti wise lists of inhabited villages where no amenity other than drinking water facility is available.

(v) Summary showing number of villages not having Scheduled Castes population.

(vi) Summary showing number of villages not having Scheduled Tribes population.

(vii) Panchayat Samiti wise list of villages according to the proportion of Scheduled Castes/ Scheduled Tribes population to total population by ranges. It consists of two parts: Part-A relates to Scheduled Castes and Part-B to Scheduled Tribes.

(viii) Panchayat Samiti wise number of villages under each Gram Panchayat.

(ix) Statement showing number of girl's schools in the villages.

Town Directory

Particulars about each town have been presented in the form of seven statements. In towns where there are slums Statement-VII has also been given in which information regarding civic and other amenities available in the slums have been shown. In each statement towns have been arranged in alphabetical order.

As has been explained earlier, urban agglomerations are of two types: first those constituted by two or more independent towns and second those where the urban characteristics have developed in the adjoining rural areas, which have developed as outgrowth of the referent town.

Where an urban agglomeration includes two or more independent towns, the names of towns constituting the agglomeration have been indicated in the alphabetical arrangement but their names have also been repeated in the alphabetical order under the name of the agglomeration after the name of the main or core town and information relating to these has been shown here. The particulars of the constituent units of the agglomerations have not been repeated wherever they occur separately in the alphabetical order and a note "See referent agglomeration" has been given against such names. The lines relating to the information regarding urban agglomeration as a whole have not been numbered but the constituent units as and when they occur in the alphabetical order have been numbered so that the last number agrees with the total number of towns in the district concerned. In respect of Statements II, III and VI in the lines relating to agglomeration a note "See constituent units" has been shown and information has been provided separately in respect of all the constituents below it.

In case of towns having out growths, an asterisk

mark has been placed against their names. Information in respect of out growths has been included in the concerned town and has not been shown separately.

The amenities and other data have been indicated by codes. A list of column wise code structure and other abbreviations used in each statement has been provided at the beginning of Section-II of Part-A of this book. We may now discuss the various Town Directory statements.

Statement I

It deals with the status and growth history of the town. Columns 2 to 7 give information regarding class, name and civic status of the town, its location code number, name of the tehsil/panchayat samiti in which it is situated, its area in sq. km and number of households including houseless households residing in the town as per 2001 Census. The class of the town has been determined on the basis of its population as per Census 2001 and the civic administration status relates to the year 2000. Columns 8 to 18 show the population of the town in different decennial censuses beginning from 1901 upto 2001. The growth rate in terms of percentage in respect of previous censuses has been shown below the population figures pertaining to each Census beginning from Column 9 onwards.

A 'dash' under these columns indicates that the referent town did not have an urban status in the referent Censuses. Density of Population per sq. km as per Census 2001 has been shown in column 19 and sex ratio (number of females per 1,000 males) have been indicated for three censuses viz. 1981 to 2001 in columns 20 to 22.

Statement II

This statement gives information about the physical aspects and locations particulars of the town in 1999. First two columns give the serial number, class, name and civic status of the town. Columns 3 to 13 deal with the physical aspects viz. rainfall and temperature. Rainfall figures are the average of the rainfall for the last one year ending 1999-2000. If the information in respect of rainfall is not available for any town it has been given for the nearest place for which it is available. Rainfall has been shown in millimeters per annum. Maximum and Minimum temperatures have been given in centigrade. If the information regarding temperature is not available in respect of any town it has been given for the nearest place for which it is available and the name of the centre has been shown in footnote.

The location of the town with respect to various administrative headquarters and nearest city is indicated in columns 6 to 10. While showing the location of the referent town with respect to various administrative headquarters, names and their distance from the referent town in kilometre have been given in parentheses below the name of the place where it is situated. In case the referent town itself happens to be the seat of the administrative headquarters, this distance has been shown zero. Information regarding the nearest city of population one Lac or more and population 5 Lacs or more have been given in respect of its situation within the State or even if this city may be situated in other State. In case the nearest city happens to be situated in other State, the name of the concerned State has been shown against the name of the city in parentheses. How the referent town is approachable is given in columns 11 to 13 which indicate the availability of communication facilities viz. railway station, bus facilities and navigable river/canal within 10 km. There is no navigable river or canal in Rajasthan.

Statement III

It gives information about the finances of the civic body controlling the local civil administration and it has been presented in '000 rupees. A 'dash' in this Statement indicates that no receipt or expenditure has occurred under the particular head and 'N' represents negligible amount. First two columns give general information, columns 3 to 9 present receipt under broad categories and total receipt and columns 10 to 16 present expenditure under broad categories and total expenditure. The receipt and expenditure has been presented under six broad categories each. While receipt through taxes implies all receipts from taxes obligatory or others and revenue derived from municipal properties and power apart from taxation, it also includes income derived from holding of fairs and exhibitions, supply of milk, license fee, cattle-ponds, fines and penalties, transport services, places of entertainment, allotment/sale/lease of land and rent etc. Government grants include per capita grant, grant from Public Works Department and grant from the Social Welfare and other departments. Other sources of receipts have been specified, wherever possible but generally they are of miscellaneous nature.

Expenditure on general administration covers

salary and wages of staff, contingent expenditure on staff, grants loans and advances to the staff etc. Expenditure on public safety cover fire-fighting, light, water and lease facilities, regulating the dangerous/ hazardous trades/works/occupation, water supply, registration of births and deaths, disposal of garbage, rubbish and night-soil. Public health and conveniences cover all types of medical aid and maintenance of the destitute etc. Public works include maintenance and construction of roads and buildings and relief works in times of famine and scarcity. Expenditure in public institutions covers all types of social, cultural, educational, religious institutions etc. Which are run or patronised by the municipality. Other sources of expenditure have been specified where possible but mostly these are of miscellaneous nature.

Statement IV

This statement deals with the civic and other type of public amenities and provides information about total population, scheduled castes and scheduled tribes population, road length, system of sewerage, number and types of latrines, method of disposal of night-soil, water supply, availability of fire-lighting service and electrification besides general information. In case of water supply the source of water as also the system of its storage have been shown. The storage capacity has been shown in Kiloliters. In case of disposal of night soil and protected water supply particulars have been given in respect of two methods/ sources in order of their importance if more than one exist in the town. In case fire-fighting service is not available in the town the name of the nearest place if in the same district or the name of the nearest district if in the same state or other state where available along with distance from the referent town has been mentioned.

Statement V

Particulars of medical, educational, recreational and cultural facilities available in the town have been given in this statement and the number of each type of these facilities has also been shown in parentheses is along with the appropriate code.

In case of medical facilities the number of beds wherever available has also been shown Allopathic, Ayurvedic, Unani and Homeopathic hospitals/ dispensaries have been shown separately. No code has been provided for allopathic institutions and the numbers have been shown only in figures. Thus beside H, code for hospital means an Allopathic Hospital. Separate codes have been provided for other three systems of medicine.

If a medical or educational facility is not available in the town, the name of the nearest place, if the same district or the name of the nearest district in the same State or other State where available and its distance (in km) from the referent town has been mentioned. Details of medical institutions shown under 'Others' have also been explained.

Arts, Science and Commerce Colleges have been shown separately. While showing the educational institutions upto Higher Secondary level the same procedure as adopted in case of Village Directory, has been followed. In case of composed schools relevant classes have been treated separately e.g. a school having classes I to XII has been treated as being composed of one Primary, one Middle, one Secondary and one Higher Secondary School.

All other types of educational institution which are not covered in column 6 to 14 have been shown in column 15 under 'Others' and include technical/ vocational and training institutions like Applied Art Painting College, Pharmacy College, Agricultural College, Teacher's Training College/Institution, Music/ Dance School etc. Janchetna Kendra is also included in others.

Statement VI

This statement contains particulars regarding trade, commerce, industry and banking. It gives names of three most important commodities, exported and manufactured in the town besides the number of banks, agricultural and non-agricultural credit societies functioning in the town. A list of the outgrowths, if any, along with their population and name of the core town has also been provided at the end of the Town Directory as an Appendix.

Statement VII

Information about all slums whether notified or not and for all towns has been shown in this statement in order to give an idea about the amenities available to the slum dwellers. Particulars about paved roads, systems of sewerage, number and types of latrines, method of disposal of night soil, number of tap points/ public hydrants for supply of protected water and electrification have been provided in respect of every slum in each town, if there are any.

PART-A : VILLAGE AND TOWN DIRECTORY

Section-I

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:

Column 1 : Serial Number

Self explanatory. All the villages within the Panchayat Samiti are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non-Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R

(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages Panchayat Samiti wise of the district.

Appendix-I-A Indicates number of villages Panchayat Samiti wise having one or more primary schools.

Appendix-I-B Indicates number of villages Panchayat Samiti wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages Panchayat Samiti wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV Panchayat Samiti wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII The appendix shows the list of villages according to proportion of the A, VII B Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates Panchayat Samiti wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Section-II

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M.Cl.
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Tehsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 and 10

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory

Column 6 : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well Water	W

Column 14

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory

Column 4 & 5

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or primary health centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC

(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/ Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

NIL

PART-B : PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/Panchayat Samiti/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/Panchayat Samiti/Town
3.	Primary Census Abstract for Scheduled Tribes	District/Panchayat Samiti/Town
4.	Village Primary Census Abstract	Panchayat Samiti/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented Panchayat Samiti wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Panchayat Samiti is presented both for rural and urban areas separately. All the villages within the Panchayat Samiti constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Panchayat Samiti. In case a Panchayat Samiti is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Panchayat Samiti is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tehsildars in acres have been converted and shown in hectares. The area figures of the Panchayat Samiti is the total of the village areas coming under each Panchayat Samiti. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tehsils/ Panchayat Samiti within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Tehsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tehsils and Panchayat Samiti level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

DISTRICT PRIMARY

ANNEXURE-II : FERTILITY-MORTALITY MEASURES

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever-married women and last question related to currently married women.

AGE SPECIFIC MARITAL FERTILITY LEVEL, 1991 CENSUS

40-44	53.39	58.46	25.55	53.37	61.51	25.15
45-49	28.38	30.62	14.63	27.36	30.37	15.81

The ASMFR has been calculated at seven different age groups. The highest ASMFR of 201.32 has been found in the age group of 20-24 followed by 193.69 in the age group of 25-29. The lowest ASMFR of 28.38 has been found in the age group 45-49.

In comparison to the ASMFR at the state level it has been found much higher in the age group of 15-19 and 20-24 in the being 81.51 & (99.82) 201.32 and (217.18)in the district and state respectively. In the remaining age groups i.e. 25-29, 30-34, 35-39. The ASMFR is higher at the state level compared to that of district level. It can see from the table.

ESTIMATES OF CHILD MORTALITY, 1991 CENSUS

Mortality Indicators	District : Rajsamand			Rajasthan State		
	Persons	Males	Females	Persons	Males	Females
q2	113	103	127	97	95	99
q3	120	111	139	100	98	106
q5	129	122	146	110	103	117

Information on the question on children ever born and children surviving canvassed for all ever-married women has been tabulated by age of the mother. From this, estimates of child mortality have been worked out by using Brass Technique.

From the estimates of child mortality (Number of death by ages 2, 3 and 5 given as q2, q3 and q5) it is observed that the child mortality in the Rajsamand district is higher as compared to the state among males and females. It can be seen from the table.

ANNEXURE-III : VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

Sl. No.	State/District	CBR	TFR	TMFR	GFR	GMFR	No. of children ever born per woman age group 45- 49	Child-woman Ratio (0-4)	Mean age at marriage of currently married women

Source : Occasional paper No.1 of 1997 office of the Registrar General India and Rajasthan state district profile 1991.

Note: * Newly Created districts after 1991 Census.

For the analysis of fertility measures the data related to Udaipur district has been taken in to consideration for Rajsamand district as it was formed after 1991 census after being caused out from Rajsamand district.

The gross fertility rate of the district has been reported as 145 as against 162 of the state similarly the GMFR and TFR of the district are also lower than that of state being 167 and 4.62 as against 184 and 5.01 of the state respectively. The crude birth rate of the district is also lower than that of the state of 34.69.

However the number of children ever born per 1000 women in the age group of 45-49 is 4.60, which is lower than the state average of 5.07. The mean age at marriage of females in the district (16.79) is also higher than that of state (16.67) as can be seen from the table.

ANNEXURE-IV(a) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991-2001

Place of birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Migrants born within the state of Enumeration	770,026 (93.85)	123,605 (86.52)	646,421 (95.40)	295,173 (96.96)	34,212 (89.85)	260,961 (97.98)
(i) Migrants born elsewhere in district of Enumeration	633,854 (77.25)	89,295 (62.50)	544,559 (80.37)	204,650 (67.22)	17,967 (47.19)	186,683 (70.09)
(ii) Migrants born in other district of the State	136,172 (16.60)	34,310 (24.02)	101,862 (15.03)	90,523 (29.74)	16,245 (42.66)	74,278 (27.89)
(B) Migrants born in other states of India	46,612 (5.68)	17,143 (12.00)	29,469 (4.35)	9,077 (2.98)	3,763 (9.88)	5,314 (2.00)
(C) Migrants born in other countries	3,820 (0.47)	2,120 (1.48)	1,700 (0.25)	178 (0.06)	101 (0.27)	77 (0.03)
Total Migrants	**820,458 (100.00)**	**142,868 (100.00)**	**677,590 (100.00)**	**304,428 (100.00)**	**38,076 (100.00)**	**266,352 (100.00)**

(a) By Place of Birth:

It was seen that a sizeable portion of migrants in Rajsamand District i.e. 93.85 percent in 1991 and 96.96 percent in 2001 were migrants whose place of birth was within the state of enumeration. Out of this major portion where migrants who were born elsewhere in the district of enumeration.

The migrant whose place of birth was in other states of India was 5.68 percent in 1991 and 2.98 percent in 2001 Census.

Migrant to the district whose place of birth was in other countries was 0.47 percent in 1991, whereas the proportion was marginally less i.e. 0.6 percent in 2001 Census.

ANNEXURE-IV(b) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	770,026 (100.00)	656,200 (85.22)	113,826 (14.78)
	Rural	704,067 (91.43)	629,860 (81.80)	74,207 (9.63)
	Urban	63,419 (8.24)	24,020 (3.12)	39,399 (5.12)
In other states of India	Total	46,612 (100.00)	20,090 (43.10)	26,522 (56.90)
	Rural	24,760 (53.12)	15,520 (33.30)	9,240 (19.82)
	Urban	21,732 (46.62)	4,480 (9.61)	17,252 (37.01)

(b) Internal Migrants (Rural/Urban):

Majority of the internal migrants i.e. 91.43 per cent whose places of birth were within Rajasthan belonged to the rural areas of the state. The same trend also holds well in case of migrants born in other states of India as can be seen from the table.

ANNEXURE-IV(c) : INTERSTATE MIGRANTS, 1991-2001 CENSUS

Place of Birth	1991 Census		Place of Birth	2001 Census	
	Migr-ants	Perce-ntage to Total		Migr-ants	Perce-ntage to Total migrant
1	2	3	4	5	6
Madhya Pradesh	9,429	20.23	Madhya Pradesh	2,488	27.41
Uttar Pradesh	7,040	15.1	Uttar Pradesh	1,463	16.12
Gujarat	15,178	32.56	Gujarat	1,282	14.12
Bihar	2,100	4.51	Bihar	728	8.02

Kerala	2,060	4.42	Andhra Pradesh	488	5.38
Total for six States	**38,407**	**82.4**	**Total for six States**	**7,071**	**77.90**
Other States	**8,205**	**17.6**	**Other States**	**2,006**	**22.10**
Total	**46,612**	**100**	**Total**	**9,077**	**100.00**

(c) Inter-state Migrants:

In the case of Inter-state migrants they are mainly from Gujarat and Madhya Pradesh as their percentages are 32.56 and 20.23 respectively in 1991 census. In 2001census main migrants are from Madhya Pradesh and Uttar Pradesh and their percentage are 27.41 and 16.12 respectively. Percentage of six states to total migrants is 77.90 in 2001.

ANNEXURE-IV (d) : PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE, 1991-2001 CENSUS

Place of Last Residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Within the State of Enumeration but outside the place of Enumeration	783,486	127,555	655,931	301,776	36,864	264,912
	(93.88)	(85.87)	(95.60)	(96.60)	(87.63)	(98.00)
(i) Elsewhere in the District of Enumeration	646,734	92,705	554,029	211,538	20,340	191,198
	(77.49)	(62.41)	(80.75)	(67.72)	(48.35)	(70.73)
(ii) In other districts of the state of Enumeration	136,752	34,850	101,902	90,238	16,524	73,714
	(16.39)	(23.46)	(14.85)	(28.89)	(39.28)	(27.27)
(B) States in India beyond the state of Enumeration	47,172	18,583	28,589	10,458	5,111	5,347
	(5.65)	(12.51)	(4.17)	(3.35)	(12.15)	(1.98)
(C) Last Residence outside India	3,950	2,400	1,550	154	91	63
	(0.47)	(1.62)	(0.23)	(0.05)	(0.22)	(0.02)
Total Migrants	**834,608**	**148,538**	**686,070**	**312,388**	**42,066**	**270,322**
	(100.00)	**(100.00)**	**(100.00)**	**(100.00)**	**(100.00)**	**(100.00)**

(d) Migration by Place of Last Residence:

In the percentage distribution of migrants by place of last residence in the district it was seen that in 1991 census,.the highest proportion of migrants i.e. 93.88 percent were from within the state of enumeration but outside the place of enumeration. In 2001 Census this proportion increased to 96.60 percent in the same category. Surprisingly it was seen that the proportions of female migrants were higher than the male migrants in both censuses.

The migrants in the district that were from states in India beyond the state of enumeration was 5.65 percent in 1991 as compared to 3.35 percent in 2001 census.

Persons whose last residence was outside India were 0.47 percent in 1991 census while there was a marginal reduction to 0.05 percent in 2001 census.

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total Internal Migrants within the State	Total	783,486	666,330	117,156
		(100.00)	(85.05)	(14.95)
	Rural	711,077	637,560	73,517
		(90.76)	(81.38)	(9.38)
	Urban	69,669	26,360	43,309
		(8.89)	(3.36)	(5.53)

ANNEXURE-IV(e) : RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF LAST RESIDENCE, 1991 CENSUS

Place of last Residence	Total/ Rural/ Urban	Place of Enumeration		
		Total	Rural	Urban
1	2	3	4	5
In other states of India	Total	47,172	21,520	25,652
		(100.00)	(45.62)	(54.38)
	Rural	23,690	15,150	8,540
		(50.22)	(32.12)	(18.10)
	Urban	23,332	6,320	17,012
		(49.46)	(13.40)	(36.06)

(e) Migration by Place of Last Residence (Rural/ Urban):

Majority of the internal migrants i.e 90.76 per cent whose place of last residence were within Rajasthan belonged to rural areas. The same trends also reflects in case of migrants whose place of last residence were in other state of India as can be seen from the table.

ANNEXURE-V : RELIGIONWISE DISTRIBUTION OF TOTAL POPULATION, 1991-2001 CENSUS

RELIGION

Religion is an important basic cultural characteristic of the population. It provides an interesting picture of the society. The data on religion projects the unity and diversity of the country. The data is great importance to the public as well as Government,NGO and Minorities Commission.

Among the followers of six major religions in Rajsamand District it was seen that the proportion of Hindus had marginally increased from 94.76 percent in 1991 to 95.22 percent in 2001 Census. Whereas the proportion of Muslims increased from 2.41 to 2.60 percent. It is also true In the case of Sikh Community during the same period but the Jain community showed a marginal decreased., The Christian community registered no change during the decade.

At the state level however the proportion of Hindus, Sikhs, and Jains decreased whereas those of Muslims Christians, and Buddhists increased.

ANNEXURE-VI : MARITAL STATUS OF POPULATION AS PER, 1991-2001 CENSUS

MARITAL STATUS OF POPULATION

Majority of the population of the district in1991census is 49.79 percent in married followed by never married and widowed i.e. 45.98 and 4.00 percent respectively. Out of the male total population of the district 49.63 percent males are never married and of female never married is 42.19 percent, the proportion of widowed females is higher 5.74 percent than the males 2.32 percent. Married males are 47.82 percent while 51.83 percent females are married at the district level. Divorced or separated is not so widely practiced, only 0.22 males and 0.23 females are reported in this category which are almost half to the state average. The same trend was found in rural as well as urban areas. In 2001 census 50.38 is married. There after comes married persons whose percentage to total population comes to 44.12 widowed persons in absolute numbers are 51084, which is 5.17 percent to total population. Sexwise, males have higher population of never married 48.64 percent as compared to females whose population is 39.61 percent.. On the other hand, females have higher proportion of married 52.41 percent than males 48.35 female have a phenomenal higher number 37796 of widows than male widowers 13288 in the district.. It can be seen from Annexure VI.

AGE, SEX AND EDUCATIONAL LEVEL,1991- 2001

Literacy in the age-group 10-14 years in1991 in the district was 49.9 percent in the total, which was higher among the males 66.6 percent and females 32.4 percent. In the total in the age-group 15-19 years the literacy slightly lower in the total i.e. 47.3.percent and the same trend was found as in the earlier age group except that the female literacy in this age group 15-19 years was as low as 27.3 percent. In general it was seen that the literacy rate in the urban areas was much higher both among males and females. The proportion of metric but below graduate was however not very high. In the total there were 6.7 percent metric but below graduate persons. Here also the male proportion was higher i.e. 10.5 percent compared to females 2.9 percent. Graduate and above in the age group 20 + years followed the same trend but in lesser proportion. In 2001 census the total population of the Rajsamand district was 987024 which 55.65 percent are literates. As per the definition of literacy in the 2001 Census the entire population in the age group 0-6 was considered to be illiterates. The total literacy rate in the district

Rajsamand in the age-group 10-14 years was 83.4 percent and among males and females it was 94.1 and 71.7 percent respectively, which is lower as compared to the state in the same age group. Similarly literacy rate in the age group of 15-19 years 91.2 percent males and 56.1 percent females were reported in the district, which is also lower than that of the state except male.

It is a general trend of the literacy at the state as well as district level, female literacy is lower than the male literacy. The percentage showed a decline at Matric but below Graduate 13.3 percent among male and 3.6 percent as females while at the graduate and above level 4.7 percent males and 1.5 percent are females. It can be seen from the Annexure VII.

0-6 was considered to be illiterates. The total literacy rate in the district Rajsamand in the age-group 10-14 years was 70.2 percent and among males and females it was 87.9 and 50.7 percent respectively which is lowerr as compared to the state in the same age group.
