MOTIF

SANT SWAMI KALYANDEO JI MAHARAJ

Among the great sages, '*munis*' and '*sants*' of the country, Sant Swami Kalyandeo ji Maharaj is one who is said to be born in1876. Spontaneous instinct for '*vairagya*' arose in his heart in his childhood. At the age of 10 years being ambiguous for '*vairagya*' with intensive curiosity, he left his house for '*tapasya*' in Uttara-khand hills. In 1900, getting '*diksha of sanyas*' in the form of '*Reti of Muni*' from the most respectable Sant Shiromani Swami Purnanand ji Maharaj he earned the name as *Swami Kalyandeo*. Inspired by the Nation's father – Mahatma Gandhi, he served the poor day and night, pity and helpless ones, bare-footed visiting them from village to village. For renovation of '*Shuka - teerth*' (*Shuktar*), Swami ji constituted Shri Shukdev Ashram Society and to develop the sacred pilgrimage *Shuktar* (*Shukratal*), he constructed temples, '*yagya shala*', '*Bhagwat Bhawan*', Sanskrit vidyalaya, cow-sheds, hermitages etc in a handsome number and also with his efforts the facilities of roads, electricity, post office, telecommunication, police statipon, various inns, *ashrams* etc could be attained. With his devotion to mankind and hard labour, near about 300 institutions have been established and his dream of making the *Shukratal*, the "*Heaven of the today's earth*", came true. Swami ji realizes that service to mankind is the worship of God. He believes in simple living and high thinking and likes to accept food and other eatables from the poor and farmers in place of accepting valuables and precious gifts from the rich section of the society. On account of his meritorious social services rendered towards the nation he was honoured with '*Padmashri*' and with '*Padambhushan*' by the

Annexures I to VII

Annexure I Number of villages under each Gram Panchayat 730
Annexure II Fertility and Mortality, 1991 Census 730
Annexure III Various measures of fertility and mean age at marriage, 1991 Census 731
Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991Census 732
Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 734
Annexure VI Marital status of population as per 1991 Census 735
Annexure VII Age, Sex and Education in the district, 1991 Census 739
Annexure VIII Distribution of different mother tongues returned in 1991 Census 741

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is

given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The District Census Handbooks were first published after 1951 Census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 Census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District :

The district is named after its headquarters town, Muzaffarnagar, which was founded in the reign of Shahjahan at the site of an old town known as Sarot or Sarwat. Abdul Muzaffar Khan, a minister of the emperor Shahjahan, received from him in jagir forty villages in Parganas Khatauli and Sarwat, along with the title Khan-i-Jahan Shah-Jahani. Sarwat was the chief town of his possessions but it was at that time almost deserted. Khan-i-Jahan started building a new town near Sarwat on lands taken from Sujru and Khera. It was, however, completed by his son, Abdul Mansur Khan and named Muzaffarnagar after his late father Abdul Muzaffar Khan. The name did not remain restricted to the town only and in course of time the district also came to be called Muzaffarnagar.

The early history of the district is associated with Rigveda when the entire region of doab of Ganga and Yamuna was called Madhyadesha. It

came into prominence when the Aryans settled here and developed their culture and civilization. According to the traditional history as gleamed from Purans and the epics, the earliest known king who ruled over this part was Pureravas Aila, progenitor of the Lunar dynasty. During Mahabharata about 1400 BC, the district was part of Kuru empire under Parikshita, grand son of Arjun, the third of the five Pandav brothers. It may be surmised from Buddha literature that the area of the district in the 6th century B.C. was forming a part of Kuru Mahajanpad. The coins and archaeological findings conjecture that the district was dominated by Mauryan rulers, Shungas and Kushanas.

In the middle of the seventh century A.D. it was included in the principalities under the king Harsha. These territories were visited by Chinese pilgrim Hiuen Tsiang. During the Muslim rulers, the area formed part of Delhi Sultanate and was ruled by Mohammad Ghauri and then ruled by Mohammad Tughlaq. After the battle of Taraori in 1192 A.D., Prithvi Raj chauhan was defeated and the domination of the district came under the sway of Shahab-ud-din Ghauri. He left Qutab-ud-din Aibak as incharge of his conquered territories to hold over his possession including the area covered by this district. But the Jats who by now had risen into prominence in the district did not allow the Muslim conquerors to establish themselves in 1398-99 A.D., the district was over run by invading hordes of Temur from Central Asia. Towards the later half of the 14th century Saiyeds of Bahra influenced the local history of the district. In the Mughal period, Babar in his fifth expedition passed down the doab through this district. In the days of Akbar, the entire district belonged to Sarkar of Saharanpur with the exception of pargana Kandhla, which was then part of Sarkar of Delhi. At that time pargana of Muzaffarnagar was known as Sarvat, later on this was changed to Muzaffarnagar in the empire of Shahjahan when Sarvat and Khatauli were bestowed upon Saiyed Muzaffar Khan Khan-i-jahan, in the honour of whom the town Muzaffarnagar was founded. Sikhs came next plundering the towns of Bhat, Saharanpur and Ambahta. After the capture of Meerut and execution of Ghulam Qadir in 1788 the Marathas marched northwards through doab and annexed the northern districts of which Ghani Bahadur of Banda became the first Governor. After the conquest in 1803 by the British, the district was attached to Moradabad. In August 1804 the area comprising the present district of Muzaffarnagar was assigned to Saharanpur. For the first two years the part of the district was administered by resident of Delhi. It was in 1824 when the district was formed by creating a sub-collectorship at Muzaffarnagar with revenue jurisdiction over the parganas of Muzaffarnagar, Baghara, Shamli, Bidauli, Jhinjhana, Charthawal, Khatauli, Jauli, Purchhapar, Gordhanpur, Bhokarhedi, Jansath, Shoron and Lahukheri. In 1826 sub-collectorship was converted into regular district and further changes took place. Consequent upon the settlement of 1838-40 the next great series of change took place in 1841. In 1853 settlement villages from Meerut transferred to Muzaffarnagar district and the process continued to the next successive settlements of 1860-68. The historical accounts of the first freedom movement during the 1857 reveals about the large scale disturbances in the district. During that period British property was destroyed and treasury was looted. British officers and soldiers were killed. But this reprisal against British rule was ruthlessly crushed.

The district has a history of active participation in freedom struggle during twentieth century. The people of the district took part in all the movements initiated by the great national leaders. In 1939 the 10th district political conference was held at Muzaffarnagar on 23rd December, under the President-ship of Purshottam Das Tandon who appealed participants to suspend all aid to British government.

(iii) Administrative Setup

The seat of the district administration is at Muzaffarnagar. The district comprises of 5 Tahsils, 20-Statutory Towns, 1 Census Town and 14 Community Development Blocks. Total number. of villages in the district are 1025.

Jurisdictional Changes –

The following jurisdictional changes occurred during 1991-2001 Census.

122 villages and 4 towns of Kairana tahsil were transferred to newly created tahsil Shamli, 23 villages

of Kairana Tahsil were transferred to Budhana Tahsil. 30 villages and 1 town of Budhana Tahsil were transferred to the newly created Tahsil Shamli.

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, district level officers of different departments and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate, Finance and Revenue i.e. ADM (F& R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Zila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanoongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer looks after developmental activities in the district. The other district level officers like- Health, Panchayat Raj, Transport, Irrigation, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, horticulture, PWD, etc. are responsible for their respective department and assist district administration. Community Development Officers and Village Development Officers look after departmental activities at village level.

Under the police set-up Senior Superintendent of Police Superintendent of Police and down the line of the district are incharge. Additional Supdt. of Police (ASP) and Circle Officer are in-charge of their respective area. Deputy Superintendent of Police (DSP) looks after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area. The judiciary system of the district consists of District Judge, Additional District Judge and Session Judge, Civil Judge, Assistant Session Judge and Munsif Magistrate.

The nucleus of the district for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchyat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

Location and size:-

Muzaffarnagar is located on the western border of the state. It is roughly rectangular in shape. The district is situated in the doab of the Ganga and the Yamuna between the districts of Saharanpur on the north and Meerut, Bhagpat on the south. On the west the Yamuna separates it from district Karnal of Haryana State, and on the east the Ganga forms the boundary between this district and the district of Bijnor. The district at present comes under the Saharanpur division lying between north latitude 29° 11' and 29° 43' and east longitude 77° 04' and 78° 07'. Its extreme length from east to west is about 98 kms while the extreme breadth from north to south is about 58 kms. The average length and breadth are 84 kms and 50 kms respectively. The height of the district from the sea level is 273 metres. The area of the district is 4008 sq kms. The district is subject to fluvial action of Ganga and Yamuna giving rise to frequent changes in its area.

Physiography:

The district lies in the doab of the river Ganga and Yamuna. The district can be divided into four fairly distinct tract. On the extreme east there is a riparian tract of the Ganga containing the whole of the Gordhanpur and portions of Bhokarheri and Bhuma Sambalhera. Moving westwards, next comes the area between the Ganga and the Kali Nadi (west) through which runs the main Ganga canal, and then the doab of Kali Nadi (west) and the Hindon River. Lastly, the remaining tract comprises the portion of the district which extends from Hindon to Yamuna. The eastern part of which is traversed by Yamuna canal. On the basis of geology, soils, topography, climate and natural vegetation, the district is divided into five sub micro regions.

Yamuna Khadar

This region extends along Yamuna river in the north-south direction. It is flat and fertile plain with gentle slope towards southern side. Katha nala is the main stream in the region originating from a local depression in Saharanpur district which joins Yamuna river in the north of Kairana. This is a non-perennial stream. The main topographical features are ox-bow lakes, meanders and bhurs.

Shamli Plain

This region is situated in the western part of the district and covers the largest area as compared to other regions. It is a flat and fertile plain with least

physiographic variation. The general slope is towards south. Although the region is closer to Yamuna river yet it is least influenced in drain pattern. Therefore, the Hindon and Krishni flow parallel for a long distance before joining the Yamuna, which is beyond the region. Geologically, the region falls under recent alluvium.

Muzaffarnagar Plain

It is a flat and fertile tract sloping towards south with least topographic variation. Towards east of Muzaffarnagar town, a series of elongated sand dunes (bhurs) are located. Kali is the main stream which drains in the region and joins Hindon on the border of the district.

Bhur Tract

The bhur tract of Muzaffarnagar district is situated parallel to Ganga river in an elongated shape spreading from north to south. It is narrow in the north and wider in south. The series of bhurs on the western side of the region indicated the left course of Ganga. The relative height of these sand dunes varies from one to three metres. The slope is gentle and lean towards southern direction.

Ganga Khadar

This region extends parallel to the Ganga river in an elongated shape. It is wider in the north and narrow in the south. Old Channels and Shallow depressions are the main physiographic features of the region. The region is subject to inundation frequently.

Drainage

The district is almost a level alluvial plain with straight slope from north to south. The chief rivers of the district are the Ganga, the Kali (east), Kali (west) the Hindon and the Yamuna. The main tributaries of the Ganga are the Kali Nadi (east), the Saloni and the Banganga. Among the tributaries of the Yamuna the important ones are the Katha and the Hindon. The Yamuna flows in the western side of the district from north to south direction, while the Ganga flows in the eastern side of the district from north to south direction. Kali Nadi (east) locally is called Nagin probably because of its serpentine course, and the Kali Nadi (east) to distinguish it from the Kali Nadi (west), the tributary of the Hindon. It is the main arterial line of drainage for the whole of the eastern doab. In the Ganga Khadar tract there are large swamps representing the old bed of the Ganga. Till 1852, the whole line of the Saloni was almost a chain of lakes and marshes. Most of them have been silted up because of floods in the river Saloni, but the Jogawali Lake close to the point of junction still remains unchanged. Besides the marshy land of the Ganga Khadar there are a few lakes worth mentioning in this district. The most important is the Mamaur lake in Tahsil Kairana.

Climate

The climate of the district is healthy. Unlike the southern and eastern districts, the extent of cold during winter is much more in this district. So the temperature during the summer is not much high. The maximum and the minimum temperature in the district in the year 1997-98 was recorded as 43.4 and 0.2 degree celsius. The rains largely occur during monsoon season. Winter rains are very low in the district. The normal rainfall in the year 1997 was 753mm while actual rainfall was 1636 mm. The air is very humid during the monsoon season.

Winds are generally light and a little strong in the summer and monsoon seasons. During October and April they are mostly westerly or north westerly. From May they become easterly and during the southwest monsoon season they are pre- dominantly easterly or south easterly. Dust storms and thunderstorms in summer are often accompanied with violent squalls. With the western disturbances, a few thunderstorms occur also in the cold season when sometimes the mornings are foggy.

Natural Economic Resources

Forestry

District forms part of northern sub-tropical deciduous type of vegetation division. The total area under forest as per district statistics 1998-99 was 17,839 hectares which is only 4.33 percent of the total area of the district. Patches of Dhak forests are found in the north-western part of the district. It provides gum, used in manufacturing of indigo. Its flower produce a red dye and its wood is used as fuel and for manufacturing charcoal. The trees generally found in the district are amaltas, arjun, ashok, guava, aonla, babool, bargad, bel, cheonkar, dhak, gular, golmohar, eucalyptus hybrid imli, jamun, kanji, khair, khajoor, neem, naspati, bara nimbu,

pakar, paptia , pipal, siris and sheesham etc. Among the shrubs which generally grow in the khadar tracts are arusa, ber, bhang, jaharberi, karonda and makoh, The climbers found here are dudhibel, hins and makoh. The grasses growing are dub, kans, moonj and patera.

Among fauna, nilgai is found in the khadar area, wild pig is also found in the khadar of Ganga. Black buck, and spotted dear are found in small herds. The birds of the district call for little mention as mostly the same species occur as are found in other plain districts. Wild life of the district has greatly imperiled because of indiscriminate and constant hunting. There are two forest amusement parks at khalanli and shukrateal, which attracts large number of tourists.

Mineral and Mining

As regards mineral and mining, the district is not important one. Geologically, the district forms a part of Indo-Gangetic alluvium which consists of sands of various grades. Kankar and Reh are found in the district.

Soil

The soil is fertile and rich. Good ordinary loam or dumat land suitable for wheat, barley and sugarcane is locally known as Rausli; stiff clay soil is often found in the rice tracts which is called Dakar while the low-lying parts yielding rice are called Dahar.

Besides these, there is a hard and stiff soil, which has at one time been the bed of jhils known as dabar or jot, and which is also suitable for rice cultivation Bhur or bhudda is the usual name for all light dry soils which have a larger proportion of sand. High ridges of sand are locally called ghur and are usually not fertile. Pargana kandala has a greater proportion of first-class soil than others, and next in order comes Shamli, Baghra, and Shikarpur. Apart from minor peculiarities , the soil possess as the same general characteristics throughout the district.

Land and Land use Patterns

Most of the people of Muzaffarnagar depend largely upon land for their livelihood. The spread of cultivation, was mainly due to high level of fertility of the soil and the stimulas given by the availability of the irrigation facilities. The land in the district is level plain with a gentle slope from north-west to south east. The whole of the district is extensively cultivated plain except some uneven areas of ravines of the rivers and scattered bhur lands. The district statistics 1997-98 reveals that out of the total recorded area of 412,335 hectare, forest covered an area of 7,839 hectare while cultivable, barren land was 3,189 (0.77 percent) hectare. Current fallow 4,620 hectare, other fallow 3,295 hectare, barren and uncultivable land 6,500 hectare, land used for other than agriculture is 48,491 hectare, net area sown was 326,781 hectare. Meadow covered an area of 449 hectare. Gardens etc. covered an area of 1,171 hectare and area sown more than once was 159,953 hectare. The land holding are generally small in size.

Agriculture and Crop Pattern

The method of agriculture in the district is the same as in the other districts of doab. Kharif, Rabi and Zaid are the usual harvests. The Kharif crops are sown in Asadha- Sravana and reaped in Asvina-Kartika after the cessation of rains usually well before the preparation of fields for Rabi sowings which begin in October-November and are harvested in March-April or even in May. The Zaid are intermediate crops comprise a few minor crops like maize, melons, vegetables, spices and tobacco. Melons are mostly grown in Kachhars on the sandy banks of the river. The main crops of Kharif are rice, maize and that of Rabi are wheat, barley, gram and pea. The main cash crops of the district are sugarcane, cotton, oil seeds, groundnut, tubers, cucurbits, sunn hemp and tobacco. None of the crops other than wheat, paddy and sugarcane, has gained importance in the district in terms of sown area and produce.

During 1997-98, paddy was grown in 39,413 hectare which occupied 8.10 percent area while wheat was grown in 129,534 (26.62 percentage). Maize 2,061 hectare (0.42 percent), pulses 8,725 hectare (1.79 percent), cotton 683 hectare (0.14 percent) and other crops 98,445 hectare (20.23 per cent). The prime place was occupied by sugarcane with 207,556 hectare (42.67 percent) cropped area. The area under sugarcane is gradually growing in the district. The per capita gross value of agriculture produce in the district is Rs. 5,200, which is highest in the administrative division of the state. The average

produce per hectare in the district is considerably high i.e. 29.74 quintals in case of paddy, wheat 32.80 quintals, sugarcane 678.36 quintals, and 154.27 quintals for potato during 1997-98.

The agriculture in the district has progressed immensely in the district with regard to implementation of new methods, crops density and rotation of crops. The district is lagging behind in terms of crops density in comparison to other districts of the division. The main reason is the dominance of crop of sugar cane which takes one year to ripe.

Crops protection and soil conservation measures are being taken up in the district. The cultivators of the district could avail the services of 88 seed godowns /fertilizer depot, 85 rural godowns, 15 insecticide depots, two seed farms, 31 cold storages and 6 agriculture service centres till 1998-99. During the same period, the district had 43 warehousing godowns managed by Food Corporation of India (12), central warehousing godowns (20) and those under state government (11)

Irrigation

Irrigation network in the district is very rich. The main source is tube well and canal. Tube well alone accounted for 66.90% area of the cultivated land while 33.08% area was irrigated by canal and 0.02% by other means as per Statistical Bulletin 1,999. The length of the canal was 1,154 km. The number of government tube wells were 486, while private tube well and pump sets were 34,453 and 48,737 respectively during 1998-1999. The net irrigated area in the district was 301,814 hectares. The private tube wells in the district were more popular than government tube wells and canals.

Animal husbandry

Animal husbandry is one of the substitutes of agriculture. From this substitute nutritional food, agricultural investment and leather is obtained as raw material. On the basis of 'Animal Census-1997' the total number of animals were 1,184,870, out of which Cows were 212,292 bovines cross breed 96,114, Buffaloes were 598,745, Sheep 27,302 and Goats 46,999, Horses and Ponies 10,417, Pigs were 66,927 and others were 126,079. There were 193,513 hens and cocks and 197,694 poultry birds. To encourage poultry farming as a subsidiary industry in the rural areas government also arranges supply of birds of improved breeds. In the year 1998-99, 39 veterinary hospitals, 88 artificial insemination centres and sub centers, 8 pigs development centres and 44 animal development centres were established in the district. The district produces enough fodder for its animals. Fodder like Chari and Barseem are grown in the district while leaves of sugar cane plants are fed to the animals.

Fishery

The rivers, canals and lakes in the district abound in fish. About 30 species of fish are found in the district. Ganga, Yamuna and Hindon being the chief repositories. The most common varieties are rohu, naini, bhakur, karaunch, mahaseer, chilwa, goonch, saul, mola, anwari, bata, tengra and those belonging to the carp family. The government has taken up a few schemes for the development of fisheries in the district. Pradeshik Matsya Palan Vikas Abhikaran scheme was started in the year 1982-83. Under this scheme ponds of Gram Samaj are given for long period on patta (lease) through revenue department. After the development in ponds, fingerlings are supplied for rearing of fishes in the district. In the year 1998-99, there were 8 departmental ponds in the district and fisheries department had distributed 12765 thousand fingerlings to the fishermen.

Industry

Industry plays an important role in the socio-economic development of the district. The district being agriculture dominated has agriculture based industries. The main industry in the district is sugar mills. The number of sugar mill in the district are 7. They are located in Shamli, Rohana, Khatauli, Mansoorpur, Morna, Titavi and Gagaur. Morna sugar mill is under the Co-operative sector, one sugar mill is under the sugar corporation and the rest five mills are in the private sector. Under the small scale industries crusher and Kolhu are established in private sector to manufacture Gur and Khand. As per District Statistics 1990-91, there were 779 registered units under the Factory Act, 1948, out of this 301 units were operational and 299 of them had filed their returns. Small scale industries figure 28,711 units consisting engineering goods, chemical, handicrafts, silk, etc during 1998-99.Other industries

established in the district are 20 steel mills, 10 paper mills, 12 flour mills and one vegetable ghee plant. Rolling mills and paper mills are increasing from time to time. The main reason for increase is the greater demand of iron and paper in the district due to development. Of the old time industries and manufactures, the hand-spun and hand-woven woollen blanket industry still survives, providing employment in various branches. This trade was carried out mainly at Miranpur, Gangeru, Lank, Purqazi and Morna.

The district has units of distilery, condensed milk and manufacturing of aluminum utensils. Muzaffarnagar, Shamli and Khatauli are the industrial estates. In three industrial estates, the number of industrial sheds were eight with 124 plots allotted by the year 1998-99.

Trade and Commerce

Being situated in doab, the district has been mainly agricultural from time immemorial. Hence agricultural produce has constituted the main articles of both internal and external trade of the district. The proximity to country's capital viz, Delhi, also contributes to its ever-increasing trade activities. Exports of the district were mainly wheat and gur, handicrafts and engineering goods, for which it is fairly reputed and yield considerable returns.

In the trade, banks play an important role in the socio economic development of the district. Punjab National Bank is the lead bank in the district. It has 46 branches in the district, it has branches of other commercial bank, co-operative bank, gramin bank and land development banks. There are branches of co-operative societies also.

Transport

Communications is an important aspect of developing economy. Transport facilities can broadly be classified into two categories-Rail transport and Road transport. During 1998-99 the length of the broad gauge railway track was 85 kms. There is no meter gauge track in the district. The number of railway stations including halts were 15. The main line of communication passing through the district is Delhi-Saharanpur section of Northern Railway. By Road transport, the services of buses of State Road Transport Corporation are provided on the important routes and on the other small and undeveloped routes the services of private buses are provided. Services of taxis are also available in the district. 355 bus stations/ bus stops were in the district during 1998-99. The length of the Pucca (metalled) road was 2,532 kms out of which 1683 kms Pucca road was constructed by P.W.D. during 1997-98. 469 km. roads are maintained by local bodies and 380 km. roads are under the jurisdiction of government departments. The length of road per lac population was 83.9 kms. According to the statistics available for 1996-97, nearly 88.40 per cent villages are connected with main roads.

Electricity and Power

Electricity is the primary infrastructural facility required for the development of an economy. Now a days necessity of electricity has become part and parcel of the life of people everywhere. The facility of electricity has been provided in all the statutory towns of the district. The number of electrified villages were 886. The number of electrified scheduled caste colonies were 829. The consumption of electricity in the district during 1998-1999, for different uses in different categories is given below.

Sr. no.	Category	Consumption of electricity per thousand kw per hour
1.	Domestic use	177,737
2.	Commercial	42,606
3.	Industry	140,450
4.	Street light	8,996
5.	Rail/taction	300
6.	Agriculture	253,370
7.	Public water works and sewerage	3,313
	Total	**626,772**

Per capita consumption of electricity in the district during 1997-98 was 262 kwh.

Gram Panchayat, its composition, jurisdiction and role in village development

A Gram Panchayat acts as the executive of the Gram Sabha. The members of the village or Gram Panchayats are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7 to 15 members from among themselves who constitute the Village Panchayat. It is necessary that the Village Panchayat should have a member belonging to the scheduled

caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body which looks after the various problems of the village and takes steps to improve the condition of the villagers. Formerly the term of the Gram Panchayat differed from state to state. It ranged between three to five years. But the new Panchayat Raj Act of 1993 has fixed a uniform five year term for every Panchayat.

It can also be dissolved earlier by the state government, if it fails to perform its duties faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained before hand. The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch. Decisions are taken by the majority vote. In case of a tie the Sarpanch can also use his casting vote. In order to be elected to a Village Panchayat, a candidate should possess the following qualifications:

(1) He should be a resident of the village concerned and his name should be in the voter's list of the village.
(2) He should be twenty-five years old.
(3) He should be mentally and physically sound.
(4) He should not be a proclaimed offender.

The members of the Gram Panchayat elect a Sarpanch and a Vice-Sarpanch from amongst its own members. They may have some elderly members forming a special committee to make the working of the Panchayat more smooth and meaningful. All these people are honorary and do not get any pay. A paid secretary to the Panchayat is appointed by the district authorities in consultation with the Panchayat concerned. A Treasurer may also be appointed if the Panchayat is larger and many accounts have to be maintaned. A Gram Panchayat is entrusted with various social, economic and judicial responsibilties while are as under:

(1) It provides civic amenities to the people of the village.

(2) It gets a primary school opened in the village and supervises its work.

(3) It looks after the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.

(4) It suggests local body to establish health unit in the village. The Panchayat has also to provide land and building for such a centre.

(5) It gets metalled roads built from the village to the nearest main road leading to a market place with the help of the Public Works Department of the district.

(6) It arranges for sufficient irrigational facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.

(7) It manages and maintains the common property of the village.

(8) In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fines upto Rs. 100. The state government determines the number of Panchs according to the population of the village e.g. in Uttar Pradesh the number of Panchs is between 15-30.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made

of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case

of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number will be given for this group and each of the constituent will bear a separate census house number.

Only cases where a structure with roof and pillars has come up will be treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km and having at least 75 per cent of male working population engaged in non-agricultural activity were considered To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no

person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1	Agariya	37	Gual
2	Badhik	38	Habura
3	Badi	39	Hari
4	Baheliya	40	Hela
5	Baiga	41	Kalabaz
6	Baiswar	42	Kanjar
7	Bajaniya	43	Kapariya
8	Bajgi	44	Karwal
9	Balahar	45	Khairaha
10	Balai	46	Kharwar (excluding Banbasi)
11	Balmiki	47	Khatik
12	Bangali	48	Khorot
13	Banmanus	49	Kol
14	Bansphor	50	Kori
15	Barwar	51	Korwa
16	Basor	52	Lalbegi
17	Bawariya	53	Majhwar
18	Beldar	54	Mazhabi
19	Beriya	55	Musahar
20	Bhantu	56	Nat
21	Bhuiya	57	Pankha
22	Bhuyiar	58	Parahiya
23	Boria	59	Pasi, Tarmali
24	Chamar, Dhusia, Jhusia, Jatawa	60	Patari
25	Chero	61	Rawat
26	Dabgar	62	Saharya
27	Dhangar	63	Sanaurhiya
28	Dhanuk	64	Sansiya
29	Dharkar	65	Shilpkar
30	Dhobi	66	Turaiha
31	Dom		**Scheduled Tribes**
32	Domar	1	Bhotia
33	Dusadh	2	Buksa
34	Gharami	3	Jaunsari
35	Ghasiya	4	Raji
36	Gond	5	Tharu

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves

not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz.,

Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where

she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population.Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings:

Population Distribution:

The total population of the district is 3,543,362 in which 2,639,480 live in rural and rest 903,882 in urban parts. There are 5 tahsils in district namely Shamli, Kairana, Muzaffarnagar, Budhana and Jansath which sans urban population. The most populous tahsil is Muzaffarnagar (11,69,979) while Budhana (430,700) is least populated tahsil. The urban population in the district is 25.5 percent. The urban population is maximum at 32.0 percent in Muzaffarnagar tahsil. There are 1,025 villages out of which 132 are un-inhabited. The total rural population of 2,639,480 is spread over 14 CD blocks. The most populous CD Block is Muzaffarnagar with a population of 266,414 but the maximum number of inhabited villages 102 are in Un CD Block. More than half of populated villages have a population in the size of 1000-1999 and 2000-4999 and such villages form as high as 62.6 percent or 559 of total populated villages. Although the population density in the rural district excluding area of uninhabited villages is 681 highest proportion (68.9 percent) of villages are with a population density range of 501+ per square kilometer. Such villages contain as much as 86.7 percent of total rural population.

Size-class and status of towns

In the total urban population of 903,882 live in Muzaffarnagar the big town is Muzaffar Nagar with a population of 316,729 next is Shamli with 90,055 population. The above two are class I and II towns having the civic status of Municipal Board (NPP). The other II class towns are Khatauli and Kairana, NPP. Rest of 15 towns are Nagar Panchayat (N.P.) and one C.T. Out of total 6 towns are class III, 11 towns are class IV, There is no class V or VI town in the district. Kairana tahsil contains 4 towns, Shamli, tahsil 6 towns, Muzaffarnagar tahsil has 3 towns, Budhana has 3 towns and Jansath tahsil 5.

Population growth :

At the present territorial jurisdication the population of the district was 2,842,543 at 1991 Census and growing by 24.7 percent during the decade 1991-2001 it is 3,543,362 at 2001 Census. The decadal growth at 24.7 percent in the district is less than the state i.e. 25.8 percent.

Population Density:

The district has an area of 4,008 square kilometer. The population density in the district is 884 In the rural areas of the district the density is 681.

Sex-Ratio:

The sex-ratio in the district at 871 is much less than 898 at the state level. Indeed the sex-ratio has been all along lower in the district as against the state since 1901 sex ratio in urban areas has been higher than that in rural areas in the district since 1971. Among tahsils, highest sex-ratio 883 is in Jansath and lowest 856 in Shamli. Among CD Blocks the sex-ratio is highest in Jansath at 888 and lowest in Kandhla at 834 Out of 893 inhabited villages in the district there are 43.0 percent villages (with 51.5 percent of rural population) which are in sex-ratio range of 850-899. In urban parts of district the sex-ratio is 885 with highest 913 in Khatauli and lowest 824 in Ailum. The sex-ratio of population in the age-group 0-6 is 859 in the district which is lower than the state. As against a sex-ratio of 860 in the age-group 0-6 of rural population of the district, it is highest at 894 in Morna Block and lowest at 799 in Shamli C.D. Block. It may be noted that out of 893 inhabited villages in the district in over 20.4 percent of villages with 30.0 percent of rural population the sex-ratio in the age-group 0-6 is between 850-899. As against the 0-6 age-group sex-ratio of 860 in the rural area of the district it is 857 in urban areas among towns this sex-ratio is highest at 923 in Kandhla and lowest at 761 in Ailum.

Work Participation Rate:

In the total population of the district of Muzaffarnagar 33.1 percent are workers and rest of population i.e. 66.9 percent are non-workers. Among workers 25.4 percent are main workers and rest of 7.7 percent are marginal workers.In absolute terms females are out numbered by males

as main workers while marginal workers are more among female workers. The extent of main workers is highest at 27.6 percent in Jansath tahsil and lowest at 24.1 percent in Budhana tahsil. In case of marginal workers the population is again highest in Jansath tahsil at 9.4 percent and lowest 5.4 percent in Kairana tahsil. In the district, among workers 33.8 percent are cultivators and 37.8 percent other workers. 33.1 percent of female workers are engaged as cultivators.

Literacy:

In the district 60.7 percent population is literate. The literacy is 65.9 percent in urban areas and 58.8 percent in rural areas. The male literacy is 71.9 percent as against 47.8 percent female literacy, and therefore the gap in male/female literacy rate is 24.1 percentage points. In rural areas among 14 CD Blocks, the highest literacy is at 64.9 percent in Khatauli and lowest at 49.2 percent in Kairana. The literacy among males in rural areas is 71.2 percent in comparison to 44.5 percent among females. The lowest female literacy of 33.4 percent is in Kairana CD Block. The gap in male/female literacy rate is highest in Kairana CD Block which is 28.9 percentage points. In 38.7 percent of villages covering 39.6 percent of rural population the literacy range is 61 - 70. Among urbanites in the district, as much as 73.8 percent males are literates as against 57.0 percent females. The highest urban literacy is in Muzaffarnagar 75.3 percent and lowest in Kairana at 37.9 percent. The maximum male literacy is found in Muzaffarnagar at 81.3 percent and lowest at 46.7 percent in Kairana. The highest female literacy is also in Muzaffarnagar at 68.6 percent and also lowest at 27.9 percent in Kairana However, the maximum gap in male-female literacy rate at 27.8 percentage points is found in Un. The literacy among scheduled castes is 54.9 percent, in the countryside and 60.7 percent in towns. Among Scheduled Tribe population literates in rural areas account for 55.3 percent while in urban literacy is 86.8 percent though in Muzaffarnagar only.

(viii) Brief Analysis of Primary Census Abstract Data Based on inset Tables 1 to 36 :

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Kairana	NA	NA	NA	491,788	346,389	145,399	NA	NA	NA	NA	29.6
2	Shamli	NA	NA	NA	683,068	494,037	189,031	NA	NA	NA	NA	27 7
3	Muzaffarnagar	NA	NA	NA	1,169,979	795,102	374,877	NA	NA	NA	NA	32.0
4	Budhana	NA	NA	NA	430,700	365,318	65,382	NA	NA	NA	NA	15 2
5	Jansath	NA	NA	NA	767,827	638,634	129,193	NA	NA	NA	NA	16.8
	District Total:	**2,842,543**	**2,143,313**	**6,444,230**	**3,543,362**	**2,639,480**	**903,882**	**24.7**	**23.1**	**4.0**	**22.6**	**25.5**

The growth rate of Muzaffarnagar district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 24.6 per cent during 1991-2001. The growth rate for rural and urban areas of the district are 23.1 and 4.0 per cent respectively. Out of the total population of the district 74.5. per cent population lives in rural areas while 25.5 per cent lives in urban areas of the district. Urban population is spread over in all tahsils Muzaffarnagar (tahsil) has highest decadal growth rate of 32.0 per cent, while Budhana has shown the lowest growth rate of 15.2 per cent for the total population. 1991 census population for tahsils have not been reckasted.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Sl No	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Un	102	199,758	107,505	92,253	2 (2.0)	91	49

Table-2 gives C D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of 893 inhabited villages, 51 (5.7. per cent) are small size villages with population below 200 persons. In the size of 200 to 499 persons there are 58 villages having 6 5 per cent villages of the district while in the size class of 500-999 population fall 80 villages or 9.0 per cent of the total villages in the district. 239 villages (26.8. per cent) are in the size class of 1,000-1,999 and 320 villages (35.8. per cent) are in the size class of 2,000-4,999. There are 120 (13.4) villages in the population range of 5000-9999 while 25 (2.8) villages are in further higher range.

TABLE 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New

(i) Statutory town – NIL (ii) Census town - NIL

(b) Denotified - NIL

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns"- NIL

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL

(iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified - NIL (d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY , 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population

Not known	0	0 0	0	0 0
District Total:	893	100 0	2,639,480	100.0

Population Density (Rural) of the district : 681

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i e 615 accounting for 68 9 per cent of the

total inhabited villages of the district fall in the density range of 501 persons having 86.7 per cent population. The lowest ranges of 0-10 & 11-20 persons per sq. km. cover 27 villages (3.0 per cent) and 7 villages (0.8 per cent) 125 villages (14.0 per cent) have very high density with more than 301-500 persons per sq. km. while the corresponding proportion in the lower range of 0 to10 is 3.0 per cent of the total inhabited villages having 1.7 per cent population of the district. In the medium density ranges of 21 to 50 and 51-100 persons account for 1.8 per cent each of inhabited villages. Both these ranges account for 0.3 per cent rural population.

TABLE : 5 SEXRATIO OF STATE AND DISTRICT1901-2001

Census year	UTTAR PRADESH			MUZAFFARNAGAR		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	869	867	883
1911	916	922	866	817	820	803
1921	908	918	834	829	830	822
1931	903	916	813	828	838	779
1941	907	922	824	825	834	784
1951	908	922	827	826	831	798
1961	907	921	817	841	846	812
1971	876	884	826	831	828	846
1981	882	889	850	843	837	865
1991	876	879	864	860	852	883
2001	898	904	876	871	866	885

As per 2001 Census sex-ratio of 871 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district has been lower as compared to the state average figures from 1901 to 2001. The lowest sex ratio of 817 females per 1000 males was recorded in the district during 1911 against the state average of 916. It is also observed that the proportion of females in rural areas is higher than that of urban areas in the district from 1911 to 1961 but from 1971 to 2001 it is less than that of urban area.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Sl. No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kairana	859	851	879
2	Shamli	856	851	869
3	Muzaffarnagar	876	868	892
4	Budhana	874	872	882
5	Jansath	883	881	894
	District Total:	**871**	**866**	**885**

Table-6 gives sex-ratio for total, rural and urban areas at tahsil level as per 2001 census. There are 871 females for every one thousand males in Muzaffarnagar district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 866 and 885 respectively. The rural sex-ratio in tahsils varies between 851 in Kairana and Shamli tahsils and 881 in Jansath tahsil. The rural sex-ratio in Muzaffarnagar, Budhana and Jansath tahsils is higher than district rural average (866). In urban areas the highest sex-ratio 894 is recorded in Jansath and the lowest 869 is in Shamli.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Sl. No.	Name of C.D. block	Sex ratio
1	2	3
1	Un	858

12	Morna	874
13	Jansath	888
14	Khatauli	881
	District (Rural) Total:	**866**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 866 females per 1,000 males. Among C.D. blocks the highest sex-ratio of 888 is found in Jansath C.D. block and is followed by Charthawal (882.) while the lowest 834 is recorded in Kandhla block. The sex-ratio in 8 C.D. blocks is higher than the district rural average of 866 while in remaining 6 blocks, it is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	25	2.8	5,290	0.2
700-749	14	1.6	11,800	0.4

District Total:	**893**	**100.0**	**2,639,480**	**100.0**

Sex ratio (Rural) for District, 866

Table 8 presents sex ratio of rural population by the distribution of villages by ranges based on 2001 Census. The maximum number of villages i.e. 384 accounting for 43.0 per cent of the total villages having largest population of 51.5 per cent in the district fall in sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849 which consists of 230 villages (25.8 per cent) and 25.3 per cent population. The highest range of 1,100 & above falls in 2 villages (0.2 per cent). This range shares only 22 people of the district while in the sex-ratio range of 900-949, there are 151 villages (16.9 per cent). In remaining sex-ratio ranges of 750-799, 700-749 and less than 700, the number of villages are 54 (6.0 per cent), 14 (1.6 per cent), 25 (2.8 per cent). In higher range 950-999

and 1000-1099 the corresponding figures are 25 (2.8. per cent) and 8 (0.9. per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 384. having maximum population (43.0 per cent) fall in the higher sex-ratio ranges of 850-899 and above showing that in majority of villages the sex-ratio is significantly higher.

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district.Total population in age-group 0-6 is 677,902 persons comprising 364,637 males and 313,265 females. The total sex-ratio in this age-group works out as 859 females for every one thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 860 and 857 females in this age-group respectively. The rural sex-ratio in tahsil varies between 834 in Shamli tahsil and 876 in Jansath tahsil. The sex-ratio 874 in Kairana and 876 in Jansath higher than district rural average (860). In urban areas, the highest sex-ratio 880 is recorded in Kairana and the lowest 840 in Budhana.

Sex ratio (Rural) for District: 873

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e.182. (20.4 per cent) having largest population (30.0 per cent) in the district (rural) fall in the sex-ratio range of 850-899 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 800-849 which is in 170 villages (19.0 per cent) and has 21.1 per cent population. Next to it, 109 villages (12.2. per cent) are in the range of 900-949 with 18.3 per cent population. 74 villages (8.3. per cent) having 7.8. per cent population fall in sex-ratio range of 950-999. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, 1000-1099 have less number of villages and these are distributed as 83 (9.3. per cent), 79 (8.8. per cent), 100 (11.2 per cent), and 63 (7.1. per cent).

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of 3,543,362 total population of the district, 13.5 per cent of the total population belong to the Scheduled Castes and Scheduled Tribes number only 87. The percentage of Scheduled Castes population constitutes 15.3 per cent in rural population and 8.2 per cent in urban population of the district. The highest 16.4 percentage of total Scheduled Castes population is recorded in Jansath tahsil while the lowest .7 is found in Kairana tahsil. The proportion of Scheduled Tribes population is almost zero. Scheduled Tribes population in the district is mainly concentrated in tahsil of Shamli 44 and Muzaffarnagar 43.

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 15.3 per cent of rural population of the district belongs to Scheduled Castes. At C.D. block level, Scheduled Castes population varies between 5.5 per cent in Kairana and 24.8 per cent in Purquazi C.D. block.. The other C.D. block containing a higher percentage of Scheduled Castes are Khatauli (20.2), Charthawal (19.4.) and Muzaffarnagar (19.1). The highest number 35 of Scheduled Tribes population is counted in Kandhla C.D. block and is followed by 7 in Un C.D. block. The lowest number of Scheduled Tribes is recorded one each in Mufaffarnagar and Baghara. It is preceded by 2 in Shamli C.D. block. The Scheduled Tribes population in the district is mainly concentrated in Kandhla C.D. block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

District Total	**893**	**100.0**	**404,595**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 69 villages accounting for 7.7 per cent of total 893 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 112.villages (12.5 per cent). In 174 villages, it varies between 5-10.per cent while the next range of 11-20 per cent accounts for 270 villages constituting 30.2 per cent of the total villages. The range 21-30.and 31-40.per cent contains 142 and 57 villages respectively. Both these ranges together account for 22.3 per cent villages of the district. 24 villages fall in the range of 41-50.and above per cent. 24 villages are such where the proportion of Scheduled Castes is in the range of 51-75. per cent. These villages contain 4.0 per cent Scheduled Castes population of the district. The maximum 34.9 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES,2001

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in Table-21 The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 60.7 per cent in the district. This proportion in rural area is 58 8 per cent against 65 9 per cent in urban areas In the district the literacy rate of males (71.9 per cent) is much higher than that of females (47.8 per cent) Among tahsils, Muzaffarnagar tops with 63.9 per cent literates very closely followed by Shamli (63 8 per cent) Kairana tahsil with 49.6 per cent literates stands at the bottom in the district. Among five tahsils, literacy rates of 3.tahsils are higher than that of district average. It is observed that in urban areas of the district the literacy rates are higher than the rural areas. However in case of Kairana tahsil proportion of urban litrates is less than that of rural.

The gap between male and female literacy is very high which comes to 24 1 per centage points in the district, as a whole The situation at tahsil level is not much different. However this gap in urban literacy is lower which comes to 16.9 percentage points against the rural areas, where the gap between male and female literacy is 26 7 percentage points

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

District (Rural) Total:		**1,246,724**	**808,167**	**438,557**	**1,392,756**	**606,054**	**786,702**	**58.8**	**71.2**	**44.5**	**26.7**

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 58.8. per cent of the total rural population excluding the age-group of 0-6 years is literate in the district (rural). The proportion of male and female literates comes to 71.2 and 44.5.per cent respectively which shows a very wide gap of 26.7. percentage points in male and female literacy. At C.D. block level, Khatauli C.D. block has the highest rural literacy rate of 64.9 per cent while 78.0 per cent males and 50.1 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Un. C.D. block (55.8 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 28.9 percentage points is found in Kairana C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	2	0.2	430	0.0

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of 2639480 total rural population of the district, 25.9 per cent has been categorised as main workers and the marginal workers constitute 9.2 per cent and the remaining 64.9 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 43.0 per cent males and 6.2. per cent females are in the category of main workers. Male and female marginal workers account for 7.1 and 11.7 per cent respectively. The percentage of female marginal workers is higher than that of male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 35.1. per cent. At the C.D. block level, Baghara has highest proportion of total workers forming 53.7 per cent of the total population. It is followed by Morna. (49.0 per cent), Shamli (39.3. per cent), Jansath. (35.3 per cent), Kandhla (33.9 per cent) and Shahpur (33.1 per cent). The lowest percentage of 27.8. is recorded in Muzaffarnagar C.D. block.

The table 33 indicates that as against 23.8 per cent of main workers in the urban areas of the district, such workers are as high as 28.7 per cent in Sisauli town. Similarly the extent of marginal workers also is higher per cents, and it is 11.3 per cent second highest in the district in this town.

				(14.9)	**(33.1)**	**(31.5)**	**(6.1)**	**(29.4)**

It can be seen from table 34, that the economy of the district is primarily agricultural as supported by the facts that cultivators constitute 33.8 per cent of the total workers and remaining 66.2 per cent are engaged as agricultural labourers (24.7 per cent), Household industry workers (3.6. per cent) and other workers (37.8. per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil/sub-tahsil shows very high dependence of population on agriculture sector ,absorbing a large number of workers. The proportion of cultivators varies between 28 5 per cent in Muzaffarnagar tahsil and 40.3 per cent in Budhana tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of female cultivators is 33.1 per cent which is less as compared to 34.0 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as stated above. The workers in other activities occupy the top position with 37.8 per cent followed by those engaged as agricultural labours in the district as well as in each tahsil. The highest proportion of 47.6 per cent of other workers is recorded in Muzaffarnagar tahsil while the lowest proportion of 28.6 per cent is found in Kairana tahsil.

Note Percentage of workers to total workers are given in brackets.

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) constitue 35.1 per cent of total population. Among these workers, cultivators constitute 40.6 per cent, 28.4 per cent are agricultural labourers, 3.5 per cent household industry workers and 27.5 per cent other workers The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 3 5 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities Among cultivators, the percentage of females (35.5 per cent) is less than that of males (42.2 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to another the proportion of cultivators varies between 24.7 per cent in Muzaffarnagar C.D. block to 47.1 per cent in Un C.D. block However for other workers, the lowest proportion, 16.2 per cent in Un C.D. block while 53 5 per cent, highest in Muzaffarnagar C.D. block. The percentage of household industry workers is quite low i e. only 3.5 per cent in the district The percentage of agricultural labourers is highest in Thana Bhawan (39 3) block and is followed by Un (34 6) In other C D blocks, it scales down and reaches lowest 18 9 percent in Muzaffarnagar C.D block Similarly, percentage of household industry workers varies in C.D blocks between 2 0 per cent in Un and 4 9 per cent in Shamli

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district Muzaffarnagar. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers At the district urban areas,highest percentage goes to other workers (76.6), followed by agricultural labourers with 10.6 per cent (9.9 per cent males and 16.7 per cent females). If we observe each town, the table reveals that highest percentage of cultivators (40.0) is recorded in Ailum.In the agriculture labourers category Muzaffarnagar and Khatauli NPP recorded lowest percentage (1.0 and 0.9) respectively. Household industry workers are lowest (1.3 per cent) in Banat N.P, 1.6 per cent in Ailum and 2.3 per cent in Budhana. As the usual trend recorded in the urban areas, other workers are in high percentage (93.7 per cent in Muzaffarnagar, 92.6 per cent in Khatauli and 90.2 per cent in Shamli).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47 :

One of the major part of the District Census Handbook is Village and Town Directories. These non-census data contain showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

			Type of amenity available					Type of amenity available

		(100)	(89.5)	(56.7)	(97.3)	(30.9)	(75.1)	(41.4)	(12.9)	(11.3)	(91.5)	(95.2)

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 893 inhabited villages in the district 799 villages or 89.5 per cent have been provided with the education facilities of one type or the other. Similarly 506 villages in the district constituting 56.7 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 869or 97.3 per cent villages. As regards post office facility which includes facilities like telegraph office and post & telegraph, 276 villages constituting 30.9 per cent of villages have been provided within the village. 671 or 75.1 per cent villages have been provided with the telephone facility, 370 or 41.4 per cent with transport facility, 115 or 12.9 per cent villages with bank facility and 101or 11.3 per cent with agricultural credit societies. Similarly there are 817 or 91.5 per cent villages which have been linked with the pucca road. 850 in 95.2 per cent villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Muzaffarnagar C.D. block has the highest 100 per cent villages where educational facility is available and lowest 73.2 per cent is found in Purquazi Medical facility is highest in Baghara (89.8 per cent) and lowest (35.8 per cent) in Charthawal C.D. block. Improved drinking water is available to cent-percent villages in Thana Bhawan, Shamli Baghara, Charthawal and Muzaffarnagar blocks while in other blocks, it is above 90 per cent. Telephone facility is highest in Muzaffarnagar (98.1 per cent) while it is lowest 48.4 percent in Jansath C.D. block. Transport and communications is less developed in Morna where only 27.1 per cent villages are covered by this facility whereas 60.5. per cent villages of Shamli C.D. block are availing this facility. In the field of power supply all villages have been covered under five C.D. blocks having all villages electrified and only one Jansath C.D.block not having reached 90 percent mark.

TABLE 38 : NUMBER AND PERCENT AGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D block	Total population of inhabited villages	Type of amenity available					Type of amenity available				
			Edu-cation	Medical	Improved drinking water	Post Office	Tele-phone	Transport communica tions S	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

	District Total.	2,639,480	2,599,358	2,037,638	2,634,532	1,495,911	2,297,641	1,400,936	719,063	573,220	2,566,765	2,607,999

Note Percentage are given in brackets

Table 38 depicts the number and proportion of rural population served by different kinds of amenities. Out of total rural population of 2,639,480 persons in the district, 2,599,358 or 98.5 per cent have educational facility of one or the other type. Similarly 2,037,638 or 77.2 per cent population has medical facilities while 2,634,532 or 99.8 per cent have got improved drinking water facility. Post office facilities are available to 1,495,911or 56.7 per cent population. Telephone facility is available to 2,297,641 or 87.0 per cent.Transport communications facility is available to 1,400,936or 53.1 per cent villages. Bank facility is available to 719,063 or 27.2 per cent villages. 573,220 or 21.7 per cent villages have been provided with the facility of agricultural credit societies. Whereas 2,566,765 persons or 97.2 per cent have been provided with the facility of approach by pucca road. Power supply is available to 2,607,999 or98.8 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level.In all C.D. blocks facilities of education, medical and improved drinking water are available to larger proportion of population

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

	Distance range of place from the villages where the amenity is available			
Village not having the amenity of	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	92	5	0	97
(b) Middle School	440	122	24	586

(b) PHC	351	313	177	841
3. Post Office	439	143	35	617
4. Telephone	132	59	31	222
5. Bus Service	350	147	37	534
6. Banks				
(a) Commercial Bank	478	239	71	788
(b) Cooperative Bank	300	364	203	867
7. Agricultural Credit Societies	474	262	56	792

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 97 villages do not have primary school in their villages and out of these villages, children of 92 villages have to travel less than 5 kms. for schooling Out of 893 inhabited villages as many as 586 are deprived of middle school and 871 of degree colleges. Of these 440 avail the facility of middle school at a distance of less than 5 kms., 122 at a distance 5-10 kms. and the remaining 24.at a distance of 10+ kms. In respect of degree college 221 avail this facility at a distance of less than 5 kms., 243.between 5 to 10 kms. and rest 407 villages at a distance of 10+ kms.

Similarly there are 854 villages in the district which have been devoid of Hospital facility and 841 villages are deprived of PHC facilities. Of these 213 villages have the facility of Hospital available within 5 kms. while in respect of 277 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 364 villages have this facility at a distance of 10+ kms As regards PHC 351 avail this facility at a distance of less than 5 kms., 313 at a distance of 5-10 kms. and the remaining 177 have to travel a distance of more than 10 kms. to avail this facility

Regarding Post Office, 617 villages do not have this facility in the village itself. Of these majority i.e.439 have this facility at a distance of less than 5 kms , another 143 villages avail it at a distance of 5-

10 kms. In the remaining 35 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 222 villages in the district which are without telephone facilitiy. Of these 132 avail this facility at a distance of less than 5 kms., 59 at a distance of 5-10 kms. and remaining 31 have to traverse a distance of 10+ kms.

For Bus service out of 534 villages which do not have facility, 350 villages avail this facility at a distance of less than 5 kms., 147 at a distance between 5-10 kms. and 37 at a distance of 10+ kms.

In the entire district 788 villages are deprived of Commercial Banks & 867 of Co-operative Banks. Of these 788 villages which are deprived of Commercial Banks 478 villages avail this facility at a distance of less than 5 kms., 239 between 5-10 kms. & the remaining 71 at a distance of 10+ kms. Regarding Co-operative Banks out of 867 villages 300 villages avail this facility at a distance of less than 5 kms., 364 at a distance of 5-10 kms. and remaining 203 at a distance of 10+ kms. 792 villages do not have agricultural credit societies. This facility to 474 villages is available at a distance of less than 5 kms., 262 at a distance of 5-10 kms. and the remaining 56 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available				Type of amenity available			
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 893 inhabited villages in the district, there are 199 villages which have nearest towns upto a distance of 5 kms. Of these 176 villages forming 88.4 per cent of these total villages, are having the educational facility of one type or the other and 110 villages constituting 55.3 per cent, have medical facilities within the village, 58 villages forming 29 1 per cent have the facility of post office within the village and 143 or 71 9 per cent have the facility of telephone. 90 villages constituting 45.2 per cent of the total villages have been linked by transport service. 28 villages or 14.1 per cent have been provided bank facilities, while 26 villages constituting only 13 1 per cent of the total villages have been provided with agricultural credit societies. 184 villages comprising 92.5 per cent have been provided with pucca road.

There are 634 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 579 villages constituting 91.3 per cent have been provided with educational facilities. 373 villages or 58.8 per cent have been provided with medical facilities. 204 villages constituting 32 2 per cent enjoy the post office facility. 490.villages forming 77.3 per cent of total villages have been provided the telephone facility. 261 villages constituting 41.2 per cent have been linked with transport communications. 84 villages consisting 13.2 per cent have bank facility. 70 villages constituting 11.0 per cent are having agricultural credit societies, while 591 villages or 93.2 per cent of the total villages in the district are

approachable by pucca road. 40 villages fall in the distance range of 16-50 kms. Of these, 60 per cent villages have educational facility, 22.5 per cent medical, 15.0 per cent with post office, 52.5 per cent with telephone and transport & communications facility is available to 27.5 per cent villages. Banks and agricultural credit societies facilities are available to 2.5. and 5.0 per cent of villages respectively. 23 villages (57.5 per cent) are approchable by pucca road.

There is no village in the district which is situated beyond 50 kms. from the statutory town.

TABLE 41:DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available					Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Muzaffarnagar district out of a total 893 inhabited villages, 109 have a population of less than 500 persons. Of these, 36 villages (33.0. per cent) have education facility,10 (9.2 per cent) medical facility, and 86 (78.9 per cent) improved drinking water facility. No village (Nil per cent) has post office facility. However, 29 (26.6 per cent) have telephone facility. While 39 (35.8 per cent) have been linked by bus service, 6. (5.5 per cent) have Bank facility. No village (Nil per cent) has been provided with the agricultural credit societies. 69 villages (63.3 per cent) have been linked with pucca road. 81 villages (74.3 per cent) have been provided with electricity.

Out of 80 villages, which fall in the population range of 500-999 persons, 67 villages (83.8 per cent) have been provided with education facility, 20(25.0 per cent) with medical facility, all the 80 villages have improved drinking water facility. 5 villages (6.3 per cent) have been provided with post office facilities, 47 villages (58.8 per cent) telephone facility, 20 villages (25.0 per cent) transport facilities, 01 village (1.3 per cent) bank facility, 2 villages (2.5 per cent) agricultural credit societies & 68villages (85.0 per cent) have approach by pucca road. 73 villages (91.3 percent) in this range have electricity.

239 villages fall in population range of 1,000-1,999 persons. Of these 234(97.9 percent) villages have education facility, whereas 110 villages (46.0 per cent) enjoy medical facility, 238 villages (99.6 per cent) have drinking water facility, 20 (8.4 percent) post office facility, 186 villages (77.8 per cent) have telephone facility, 77 villages (32.2 per cent) have transport communication facilities, 9 villages (3 8 per cent) have bank facilities, 12 villages (5.0 per cent) have agricultural credit societies and 228 villages (95.4 per cent) have approach by pucca road 236 (98.7 percent) villages are served with power supply.

There are 320 villages in the district which are covered under 2,000-4,999 population range of these 317 (99.1 percent) villages have education facility. 233 villages (72.8 per cent) have medical facility. 320 villages (100 per cent) have improved drinking water facility; 130 (40.6 percent) post office facility, 275 villages (85.9 per cent) have telephone facility, 137 (42.8 percent) villages have transport communication, 32 (10.0 percent) villages have bank facility, 41 villages (12.8. per cent) are having facility of agricultural credit societies. As many as 308 villages (96.3 per cent) are connected by road while 315 villages (98.4 per cent) served by power. The table shows that as the population increases villages with higher population range i.e. 5000-9999 and 10000+ population have a larger share in amenities The table shows that as the population in census villages with higher population range i.e. 5000-9999 and 10000+ population have a larger share in amanities

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D block	Number of inhabited villages	Total area in hectares	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Un	102	38,144	83.2	100 0
2	Kanana	51	19,922	14 2	6.1
3	Thana Bhawan	58	25,896	85.2	99 7
4	Shamli	43	18,149	89.5	99.7
5	Kandhla	51	30,443	72.6	95 3
6	Charthawal	67	26,025	98.0	98 0
7	Purquazi	71	23,821	78.4	90.7
8	Muzaffarnagar	53	21,853	90.3	97.8
9	Baghara	49	21,693	85.7	99.8
10	Budhana	54	19,371	93.6	98.5
11	Shahpur	44	21,105	85.6	99.1
12	Morna	59	32,023	87.6	95.4
13	Jansath	93	43,881	96.0	92.9
14	Khatauli	98	28,375	86.0	99.6
	District Total	**893**	**370,701**	**158.6**	**53.4**

Note . - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available in inhabited villages in the district. Cultivable area includes both irrigated and unirrigated area. It further elaborates about the extent of cultivable area under irrigation. There is a total of 893 inhabited villages in the district having a total area of 370701.36 hectares. Of this, 158.6 per cent is cultivable and 53.4.per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C D. block level shows that Un block with 102.villages have a total area of 38144 hectares, of this 83.2 per cent of land is cultivable and of the aforesaid area 100.00 per cent is irrigated. In Kairana block, all the 51.villages have a total land area of 19,922 hectares, of which 14.2 per cent of land is cultivable and of the aforesaid area 6.1 per cent is irrigated. In Thana Bhawan block, all 58 villages have a total area of 25896 hectares, of this cultivable area is 85.2 per cent and 99.7.per cent is irrigated. In Shamli block, all 43 villages have a total area of 18,149 hectares. Of this, cultivable area is 89.5 per cent. Of cultivable area 99.7 per cent is irrigated. Kandhla block with 51 villages have a total land area of 30443 hectares, of this 72.6 per cent is cultivable area and out of this 95.3 per cent is irrigated. Charthawal. block with 67.villages has a total land area of 26,025 hectares Of this 98.0 per cent is cultivated area and out of which 98.0.per cent is irrigated. Purkazi block with a total of 71 villages have an area of 23821 hectares. Of this 78.4 per cent is cultivable areaand 90.7 percent is irrigated area. The table provides similar figure for other remaining seven CD blocks.

Table 43 gives the per capita receipt and expenditure (in rupees) for each town in the district. The average per capita receipt for towns of the district Muzaffarnagar works out to Rs ,220 of which 15 are derived through local taxes and Rs 207 received from all other sources. The average of total expenditure incurred per head is Rs 178. Out of this Rs 39 are spent on general administration, Rs 42 on public health and conveniences, Rs 27 on public works, Rs 1 on public institutions and Rs 24 is spent other items. Among all the twenty towns the receipt and expenditure recorded per head are the highest in Bhokarhedi (NP) and Shamli (NPP) accordingly.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7

20	Un, NP	10 3	2 1	0 7	0.7	0 0
	Total	6 3	1.8	0 7	0 7	0 1

Table 44 shows in urban areas of Muzaffarnagar district the average number of primary school per 10,000 population comes 6.3 schools, 1.8 junior secondary/middle, 0.7 secondary/matriculation, 0.7 senior secondary schools and the ratio of colleges is only 0.1 college per 10,000 population. Among the towns, the ratio of primary schools is highest 10.3 in Un (NP) while in case of junior secondary/middle school it is highest 3.9 in Sisauli (N.P.). The town has also highest ratio (2.6) of secondary/ matriculation schools while in case of senior secondary schools this position is claimed by Jansath NP (7.3.) College education is available only in six towns with varring average.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population

4	Budhana, NP	Gur, Shoes, Sweetmeat	Gur, Sugarcane, Fertilizer
5	Charthawal, NP	Gur, --, Handloom Cloth	Sugar, Food Grains, Fruits
6	Garhi Pukhta, NP	Gur, Khandsari, Shira (Molasses)	Wheat, Rice, Potato
7	Jalalabad, NP	Earthen Pots, Gur, Sulfur (Sugar)	Sulfur (Sugar), Plywood, Blanket
8	Jansath, NP	--, --, --	Sugarcane, Wheat, Rice
9	Jhinjhana, NP	Earthen Utensils, Cotton Cloth, Gur	Earthen Utensils, Sugarcane, Food grains
10	Kairana, NPP	Handloom Cloth, Shoes, --	Sugarcane, Onion, Cauli flower
11	Kandhla, NPP	Blanket, Sugar, Toffee	Sugarcane, Blanket, Toffee
12	Khatauli Rural C.T		
13	Khatauli, NPP	Pully, Khadi Cloth, Ag.Equipment	Tractor Pully, Khadi Cloth, Sugar
14	Miranpur, NP	Dari (Carpet), Blancket, Carpet	Khandsari, Blanket, Earthen Pots
15	Muzaffarnagar, NPP	Medicines, Soap, Pesticides	Gur, Onion, Sugar
16	Purquazi, NP	Gur, Khandsari, Tin Box	Khandsari, Gur, Rice
17	Shahpur, NP	Brass Pots, Loee (woollen sheet), Ag.Equipment	Sugar, Wheat, Sugar Cane
18	Shamli, NPP	Bullock Cart, Sugar, Ag.Equipment	Bullock Cart, Sugar, Rim
19	Sisauli, NP	Gur, Wooden Article, --	Gur, Sugar Cane, Wooden Articles
20	Thana Bhawan, NP	Ice, Leather, --	Wheat, Sugarcane, Onion
21	Un, NP	Earthen Pots, Gur, --	Onion, Garlic, Gur

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for agricultural equipments, Sugar cane, food grains and gur preparation and these are the items of town's main exports. The chief export items of the district are sugar, gur and food grains and khandsari, earthen pot, blankets are the main items which are manufactured in Muzaffarnagar, Banat, Purquazi,. town and these are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001 based on inset tables 48-52 :

Data on houses and household amenities are traditionally undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/ moped, car/jeep and banking facility availed by household etc. for the first time have been added in the schedule. The district wise tables have been prepared and these are incorporated in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 530,438 consisting of 400,864 rural and 129,574 urban households. 95,565 households belong to Scheduled Castes and 4,136 to Scheduled Tribes A total number of 508,427 households are living in their owned houses constituting 96.1 per cent of total households. Of these households, the largest number of households (160,328.) have occupied double roomed accommodation and is followed by single roomed accommodation numbering 149,642 households. Next position is claimed by households (108,137) occupying three plus roomed accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 85975 households while 4345. households are without any exclusive room.

16,987 households living in rented accommodation account for 3.20 per cent of total number of households in the district. The largest number of 8,870 households are living in single roomed accommodation followed by 5,417 households in double roomed accommodation. Households with three rooms1,462 and three plus 1,032 are small in numbers. Other households numbering 5,024. forming only 0.95 per cent of total households are distributed in single roomed accommodation numbering 2,675 double roomed 1,298 and 513 in three roomed accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Perma-nent	Semi-perma-nent	Tempo-rary	Perma-nent	Semi-perma-nent	Tempo-rary	Perma-nent	Semi-perma-nent	Tempo-rary

5	Jansath	54.2	35.1	10.7	51.9	36.8	11.3	66.1	26.7	7.2
	District Total:	**48.7**	**41.6**	**9.6**	**42.7**	**45.7**	**11.6**	**67.3**	**29.1**	**3.6**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refer to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refer to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that 48.7 per cent of the households in the district had permanent houses. However, the trend is different in rural (42.7 per cent) and urban area (67.3 per cent). Among tahsils highest proportion of permanent houses is accounted for in tahsil Muzaffarnagar (60.1 per cent) followed by Jansath (54.2 per cent) Shamli (41.9 per cent) and lowest in Kairana (29.6.per cent). In respect of semi-permanent houses, the returns are 41.6.per cent at district level whereas among tahsils, in Kairana it is highest 54.1 per cent and lowest 31.4 per cent in tahsil Muzaffarnagar Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion of 13.9.to 59.6 per cent. Temporary houses in the district lie between the range of 7.0and 16.3 per cent.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-series' Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is given in brackets below the number of households. Bathroom means bathroom within the house.Toilet means toilet within the house Drainage mean closed and open drainage.

The above table shows that 95.2 per cent households of the district had improved drinking water facility. The proportion of rural and urban area was 94.5 and 97.2 per cent respectively. Tahsil Muzaffarnagar had higher order of proportion of households where percentage for rural area was 95.7 and 98.8 per cent in urban areas. Electricity was available to 47.5 per cent of households at district level. Urban households of the district had better access of electricity. Bathroom and toilet facilities were available in 48.7 and 53.2 per cent households respectively. Tahsil Kairana is compratively poorly served in respect of these amenities. Similarly, drainage facility was also poor in Jansath.

At district level drainage facility was available to 95.4 per cent of households, whereas the proportion of rural and urban area households accounted for 95.0 and 96.7 per cent respectively.

TABLE 51 : NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

		Rural	**400,864**	**71,838**	**35,788**	**271,204**	**300**	**76**	**19,026**	**901**	**950**	**305**	**476**
				(17.9)	**(8.9)**	**(67.7)**	**(0.1)**	**(0.0)**	**(4.7)**	**(0.2)**	**(0.2)**	**(0.1)**	**(0.1)**
		Urban	**129,574**	**33,627**	**7,086**	**30,114**	**109**	**318**	**53,539**	**867**	**3,397**	**176**	**341**
				(26.0)	**(5.5)**	**(23.2)**	**(0.1)**	**(0.2)**	**(41.3)**	**(0.7)**	**(2.6)**	**(0.1)**	**(0.3)**

It is observed from the above table that 19.9 per cent of households in the district use firewood as fuel for cooking; the proportion in the rural area is 17.9 percent and in urban area it comes to 26.0 per cent. LPG (cooking gas) has been reported as one of the fuel for cooking of food in 13.7 per cent households. The composition of rural and urban comes to 4.7 and 41.3 per cent respectively. Kerosene is used for cooking in only 0.8 per cent households, 0.2 per cent rural and 2.6 per cent urban households. The other source like crop residue, cow dung cake, coal, lignite, charcoal, electricity and biogas accounted for 8.1, 56.8, 0.1 and 0.3 per cent respectively. The pattern of fuel used for cooking follows almost in all tahsils (rural areas) where predominant fuel is cow dung cakes. The table shows that firewood, cowdung cake, LPG (cooking gas) and crop residue are the predominant fuel for cooking in the district.

Data source : Census of India 2001H-series

The table reveals that out of the total households (530,438) of the district, 277,803 households (52.37 per cent) could avail banking services at district level while only 224,335 households, 219,766 households, 411,37 households, 302,196 households, 57,826 households and 11,047 households enjoyed the availability of houselhlods assests radio/transistor, television, telephone, bicycle, scooter/motor cycle/ moped and car/jeep/van respectively where as only 131,215 households had none of the specified assets.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

No significant social, cultural or natural events have occurred in the district in the last decade. However in administrative development, a new tahsil Shamli was created for which internal jurisdictional changes were taken place.

(xii) Brief description of Places of Religious, Historical or Archeological importance in villages and places of Tourist Interest in the towns of the district :

District Mazaffarnagar has not many places of tourism interest, However some important places of the district are given below:-

Budhana

Budhana the headquarters of the tahsil and development block of the same name is a historical place. In the region of Akbar it was constituted as a mahal. It was a stronghold of Begham Samru of Meerut.

Charthawal

It is the headquarters of a development block. There are two ancient temples, one dating back to Jahangir's line and other about 500 years.

Kairana

The town is the headquarters of tahsil of the same name. The importance of the place dates back to the reign of emperor Shah-Jahan. Among old building and monuments baradari constructed by Mukarrab khan may be mentioned. The oldest building in the town is a mosque. Other buildings of historical by Shahjahan There are other mosques which have importance of antiquity.

Khatauli

The Place traces its origin to Akbar's times. Khatauli is at present a town of considerable importance. It coustitutes one of the important grain mandi (market) of the district. An old sarai (inn) dating back to the times of emperor Shahjahan (1627-1656) testifies to the antiquity of the places. A Jain fair is usually held here in the month of chaitra.

Mazaffarnagar

It is a headquarters town of the district and tahsil. Muzaffarnagar stands on the site of an old town known as Sarwat in the days of Akbar Along with other parts of district, Sarwat was given as Jagir to Muzaffar Khan, a Barha Saijid by Shahjhan, Muzaffar Khan laid the foundation of a new town. In the freedom struggle o f 1857, the people of this town fell in line with the rest of the country. The district responded to the call of the leaders to join the national movement against British Rule. It is a big trading centre for gur and Sugar It is also an important centre for wheat trade.

Shamli

This is an old town. It was a centre of freedom movement during 1857. It has one big sugar mill. It is an important trading centre.

Bhokarhedi

It is situated at 24 kms. away from the district headquarters. There is an old double storied structure, ascribed by the Hindus to one Baba Garib Das (a local saint) and by their Muslim brethren to Baba Garib Shah. It is used by the Hindus and Muslims as a common place of worship, and attracts large number of people when full moon occures in the month of Sravana, when a local fair takes place here.

Jansath

It is 22 kms. away from district headquarters. According to local legends, the Pandava brothers are said to have traversed this area in the course of their wanderings during exile (agyatvasa). An old temple dedicated to Gyaneshwara, makes Jansath a principle site for the local Hindu population who congregate here on various festivals through out the year. It is also the site of a number of fairs held annually. The chief fair held here is the Nasrullah fair which runs from the second to the third Friday of Jaaistha attended by an average of 3000 persons.

Kandhla

It is situated at 47 kms. away from Muzaffarnagar. There is an ancient tank called Suraj Kund, where people come to bath on religious occasion. There is also an old Jain Temple. The famous tomb of Saint Maqdum Shah, built in 1706 A.D., still stands and people offer prayers.

Shukartal

The place comprises of two villages Khadir and Shukartal Bangar, i.e low land and up land area situated on the western bank of the Ganga. It is located 22 kms from tahsil Jansath. Traditionally, the place is one of the most important centres of Hindu Pilgrimage in the district believed to be the same spot where the curse laden king Parikshit (grandson of Arjun) was given a learned discourse on Shreemad Bhagwat by Maharishi shuk Deva, the Sage. The banyan tree under which the king received this recitation, is identified with the one standing in the compound of the temple of Sukhdeva, which is situated by the river side. A huge gathering made up of by about one lakh persons takes place here on the Kartika Purnima, when people flock to this place to have a dip in the Ganga. Newly built "Viraat Hanuman Murti" in this place is a site of main attraction. This is one of the biggest Murti in Asia, which is built on 8 Chabutra's have a height of 54 feet. In this idol seven arabs of Ran Naam words are written in different languages.

(xiii) Major Characteristics and contribution of the district:

The district is one of the five western districts of Uttar Pradesh which occupy top position in the country, surpassing even Punjab and Haryana, so far as the per hectare gross value of agricultural production is concerned. The farmers else where . Agriculture based industries have progressed well specially in case of sugarcane production and its industrial manufacturing. The surplus agriculture

produce and industrial production in the district have particularly contributed towards states gross domestic product. Hybrid seeds are produced in the two agriculture farms situated in the villages of Bebri and Allaudin.

There is nothing specific as regards to demographic characteristics of the district. More than 78 percent of the population hails in rural pockets. The Tyagis claim to be a pramukh of Brahmans and are said to be the earliest colonists of the district, subsequently displaces by jats and Gujars. The Jats occupy the most dominants position among the Hindus of the district and are next to Jatavas (Chamar) in number. They are generally tall and well-built. Their women fold too are of strong physique.

The district may be said to be have achieved a place of importance in the field of classical music by virtue of having produced an eminent khayal singer as Ustad Abdul Wahid Khan (died 1965)who founded the kairana gharana. Many men of letters were born in this district. In urdu literature, Sadullah was one of the earliest know literary person of this district. Leading humorist, Shankat Thanvi belonged to Thana Bhawan Lalji Kayastha, a resident of Kandhla was well know hindi writer of his times.

(xiv) Scope of Village Directory and Town Directory:

The village directory, as the title connotes, presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rationale of giving 2001 location codes along with 1991 location codes is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1	Population and households	Cols.4 & 5
2	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufactured	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been adopted:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration, are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement, a note is given against such towns that there are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999 and trade, commerce, industry and banking activities in year 1999. In this way, population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, Manufactured cinemas etc. and number of banks as well as commodities and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY
(Section I and II)

Section - I : Village Directory

(a) Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital Ayurvedic Hospital Unani Hospital Homeopathic Hospital	H HA HU HHom
(ii)	Allopathic Dispensary Ayurvedic Dispensary Unani Dispensary Homeopathic Dispensary	D DA DU DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP

(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)(vi)	Navigable CanalNavigable waterways other than River,Canal	NC,NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	The appendix shows the list of villages according to proportion of the
Appendix-VII B	Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

APPENDIX VIII

NUMBER OF VILLAGES UNDER EACH GRAM PANCHYAT (C.D. BLOCK WISE)

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total SC population	Total ST population	Income and expenditure of Gram panchayat (in Rs.'000)	
			Number of villages with location code numbers	Location code					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttar Pradesh due to certain reasons.

APPENDIX - IX

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Name of District	Name of C.D. Block	Location Code Number	Name of Village	No. of Girls School
1	2	3	4	5
Information not available for this district				

SECTION II
TOWN DIRECTORY

Town Directory

Note explaining the abbreviations used in Town Directory :

A. Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Cor/NN
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB/NPP
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

B. Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

C. Statement III

Municipal Finance 1998 -1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

D. Statement IV

Civic and Other amenities,1999

Column (1 to 6) : Self explanatory.

Column (7) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night

soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

E. Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes .

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/

Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 :Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

F. Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

G. Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B - PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

DISTRICT PRIMARY CENSUS ABSTRACT (GENERAL)

PART - B
ANNEXURE I - VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Muzaffarnagar
q1	Persons	99	88
	Males	98	78
	Females	104	116
q2	Persons	117	112
	Males	117	162
	Females	118	123
q5	Persons	134	129
	Males	135	124
	Females	132	140

The child mortality by ages 1, 2 and 5 years was lower in the district as against the State, thus child mortality indicators in the district for both persons shows lower order as compared to the State.

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person Male Female	Uttar Pradesh	Muzaffarnagar
1	2	3	4	5
1	CBR		37.2	38.3
2	TFR		5 6	5.8
3	TMFR		6 3	6.9
4	GFR		172	178
5	GMFR		200	220
6	Mean age at marriage (1981-91)		17	18
7	Number of children ever born per ever married woman aged 45-49 years		4 6	5.2
8	Child woman ratio 0-4		631	667
	5-9		752	743

Note - i) Estimates of fertility indicators Uttar Pradesh Table # 2 23
ii) District Profile Uttar Pradesh 1991

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population is 38.33 per thousand in the district It is higher to the state of Uttar Pradesh i.e.of 37.21 per thousand. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a higher proportion from the state figures. The conclusion may be drawn than fertility ratio is slightly higher for the district as district as compared to the state. The mean age at marriage during the period 1981-91 has been 17.27 years for the state whereas 18.11 years has been observed for the district. Number of children born ever per ever married women (45-49 age group) in higher in the district as compared to the state. The state and the district figures are placed as 4.6 and 5.2 per cent respectively. Number of children in the age group 0-4 and 5-9 years per thousand women in the age group 15-49 has been calculated to 667 and 743 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that fertility levels as such as higher to the state average in case of the age group 0-4 and are below in case of age-group 5-9.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 85.5 in 1991, while in 2001 it was 78.2 percent respectively. The proportion of in-migrants from other

states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 12.9 percent and 20.7 percent respectively. This shows in-migration from other states to this district was approximately twice in 2001 in comparison to 1991. At district level in-migration from other countries was 1.7 percent in 1991 and 1.1 percent in 2001. While at state level figures were 2.5 percent and 1 1 percent during 1991 and 2001 Census respectively

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 85.4 percent and 75.9 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18 9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 14.2 percent and 23.6 percent respectively. The movement of population from other countries in the district was 0.4 percent in 1991 and 0.5 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 64 3 percent in 1991 and 60 7 percent in 2001, while Muslim were 34.5 percent in 1991 and 38.1 percent in 2001 Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district Muzaffarnagar for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45 9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 57.4 percent male and 49.5 percent female to 59.4 percent male and 51 5 percent female Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39 8 percent male and 46 2 percent female Percentage of married male 39.7 and female 47.0 in 1991and in 2001 it was 38.1 male and 44.2 female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2 4 percent male and 4.2 percent female while it was 2.8 percent male and 3.4 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0 1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census Among the age groups, the proportion is in the descending order for never married and ascending order for widowed The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 54.6 percent male and 77.0 percent female in 1991 which declined to 41.9 percent male and 61.3 percent female in 2001. Primary level education was 10.9 percent male and 6.9 percent female in 1991, which was 17.3 percent male and 12.8 percent female in 2001. Middle level education was 10.1 percent male and 4.1 percent female in 1991 and 14.4 percent male and 7.6 percent female in 2001. Matriculation and above level of education was achieved by 12.6 percent male and 0.5 percent female in 1991 which was 19.6 percent male and 10.0 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note - For the state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02 per cent. The remaining mother tongues have been merged in the column of 'Total of other mother tongue'

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 84.4 percent person in 1991 and 84.5 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 15.0 percent and 15.0 percent at district level in 1991 and 2001 Census respectively.. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
