MOTIF

RAMPUR RAZA LIBRARY

Raza Library, a valuable treasure of Indo-Islamic literature and art, was founded in 1774 by the first administrator of the Rampur estate, Nawab Faiz-u-llah Khan who established the central base of the library by placing his own collections of various manuscripts, miniatures, historical documents, books on various subjects, small paintings etc. During 1889-1930 Nawab Hamid Ali Khan constructed an attractive building, 'Hamid Manzil', in the campus of the fort for his court based on the Indo-European architecture, where now the Raza Library is housed since 1957. It was undertaken by the Government of India under 'Rampur Raza Library Act 1975' on 1st July of 1975 and declared it as the institution of national importance. There is a huge collection of 16,000 manuscripts, 70,000 published books, 205 manuscripts written on "Tardh-patra", 3,000 valuable samples of 'Khattati' (Calligraphy), 1,068 small paintings and 150 drawing manuscripts containing 4,413 pictures. In addition to above, there is a huge collection of various astrological apparatuses, historical coins, documents and other rare arts. At present library is being taken up for modernization by digitization of the rare coins, paintings, samples of islamic calligraphy, valuable drawing manuscripts etc. Their information is being written on compact discs for safety and lasting information. This famous referral library is known all over the world for the art, culture, and history of Islamic studies.

Annexure VIII	Distribution of different mother tongues returned in 1991 Census	631

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified

and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and their team of dedicated workers deserves all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks (DCHBs) were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

The district is named after its headquarters town Rampur which was a well known seat of Rohilla power before the treaty of Laldhing, made between the Nawab of Oudh and the Rohillas in 1774. The site was originally a group of four villages which was called Rampur after Raja Ram Singh of Kutihat. The present town of Rampur is said to have been founded by Faizullah Khan in 1775. He at first called Faizabad but since it was reported to him that several towns of this name already existed, the name was changed to Mustfabad urf Rampur. In very early times the region was known as Uttara Panchala or simply panchala and about tenth century A.D., it was called by the name Katchar. The past history of the district, therefore, has been intimately connected with that of Panchala, Katehar, Rohilkhand and the Rampur state. Communities like Ahar, Ahir, Baswar, Beriya, Bhumihar, Chauhan (non-Rajput), Dalera, Gujar,

Kanjar, Nat and pasi appear to be the indigenous descendants of the aborigines. Although the villages into the district are claimed to be as old as Mahabharta age, there is no evidence to support it since no archaeological survey of the district has so far been carried out.

The last Nawab of the Rampur state under British rule was Mohammad Raza Ali Khan. He took great pain to streamline the administration, initiated reforms and enforced progressive policies. With the independence of the country on August 15, 1947, Nawab of Rampur was among the first of the Indian princes who promptly decided on the merger of the state with Union of India on May 5, 1949, the major treaty was signed on 1st July. The administration of the state of Rampur was transferred to the central government, and finally it was decided to merge the state of Rampur with the state of Uttar Pradesh w.e.f. December 1, 1949. With this merger, the territory was reconstituted as district Rampur of Uttar Pradesh.

(iii) Administrative Setup

The District Rampur lies in the middle of Rohilkhand division. It is bounded on the north by Nainital, on the east by Bareilly, on the South by Budaun and on the west by Moradabad. Rampur has five tahsils, Suar, Bilaspur, Rampur, Milak and Shahabad with the headquarters of district administration located at Rampur town. There are six development blocks in the district with two in Rampur tahsil and one each in other four tahsils. Boundary of the C.D. block Bilaspur is spread over two tahsils- Suar and Bilaspur.

There are 1155 villages in the district out of which 1092 are inhabited and 63 are uninhabited. There are 568 gram sabhas and 8 towns in the district.

Jurisdictional Changes (1991-2001)

No jurisdictional change has taken place in the district during 1991 to 2001.

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government departments. District Magistrate is in-charge of revenue administration assisted by Additional District Magistrates i.e. ADM (F & R). At the tahsil level Sub Divisional Magistrate is in-charge. who is now redesignated as Up-Zila Adhikari. He is assisted by Tahsildar in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanungos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level e.g. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, cooperative etc., from development point of view the district is divided into community development blocks and Block Development Officers (BDO) are incharge for development works at Block level. BDOs are assisted by Assistant Development Officers (ADOs) and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big district and Superintendent of Police are incharge in the district. Deputy Superintendent of Police (Dy.SP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations. The judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judge, Civil Judges, Chief Judicial Magistrate and Munsif Magistrate etc. The nucleus of the district body for self government consists of Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Feature

Location and Size :

District Rampur is located between latitude $28^0$25' north and $29^0$10' north longitude $78^0$51' east, $79^0$28' east. The extreme breadth from east to west is about 49 kms. The extreme length from north to south is about 81 km. The district lies in the middle of Rohilkhand division. It is bounded on the north by Nainital, on the east by Bareilly, on the south by Budaun and on the west by Moradabad. It is almost heart shaped on configuration. It has an area of 2,367 sq.km. and is one of the smallest district of the state ranks 53 as regards area and 44 as ragards 2001 population of the state.

Physiography :

The district is almost an open plain with slight undulation, surface being traversed by numerous river valleys. The general slope is from north to south and south east. On the northern border of the district, the elevation is about 192 metres above sea level. The district may be devided in to four physical units, the northern forest belt or semi-tarai tract, the central plain, the Ramganga Khadar and the Southern upland. The northern forest belt tract comprises the northern tahsils of Suar and Bilaspur. Owing to its proximity to the tarai forest the soils though rich in humus, are ill-drained and the climate is unhealthy. A greater part of the tract has been cleared of forest and the area brought under plough. All the rivers and streams flowing through the tract have been diverted into irrigation canals still considerable part of the tract are covered with forests. The central plain comprises of the tahsils Rampur and Milak and north eastern part of the tahsil Shahabad. It is highly developed agricultural land. The land slopes gently towards south. The soils here are generally dumat and matiyar. The land is covered with a network of canals with sufficient irrigation potential. All the available land in this tract has been brought under plough and there is practically no forest in this part.

Ramganga Khadar (flood plain) tract comprises the central part of tahsil Shahabad and extends through the tahsil from north-west to south east for about 26 km. It is almost impossible to describe the limits of the Khadar which keeps on changing owing to the vagaries of the river changing its course at will. Nearly all the villages along the river get inundated during the rainy season. A major part of the tract consists of sand. At places where the land is fertile, vegetable, wheat and sugarcane are grown. Southern upland tract consisting of south-western part of tahsil Shahabad lies to the west of Ramganga Khadar. The river forms the north eastern boundary of the upland and is utilised for irrigation. The soil in the northern part consists of rich friable loam while in the south it is sandy bhur . The tract is sufficient in irrigation, Ganga canal being the only source.

Drainage :

District is almost plain. The general slope is from north to south and southeast. In the northern part of the district is forest belt of tarai tract which comprises the northern tahsils of Suar and Bilaspur. Its soils, though rich in humus, are ill drained and the climate is unhealthy. All the rivers and streams flowing through the tract have been diverted into irrigation canals. The Ramganga and its tributaries, the Kosi and the Ganga are main rivers of the district. Among the other streams, the chief are the Bah, Kachhia Bahgul, Ghuga, Bhakra, Dhimri, Sohaya, Sainfni pilakhar, Hathichinghar and Nahal.

Climate :

The climate of the district is characterised by hot dry summer and cold winter. The period of winter season starts from about mid November and continues till February followed by Summer from March to about the middle of June. From middle of June to the end of September is the Mansoon Season. October and the first half of November constitute the post mansoon season. The cold weather last longer and the temperature in summer is not as high as in other adjoining districts. In winter the climate is cold and moist.

The average rainfall in the district is about 110 cm ranging, between 100 cm in the south west and 130 cm in the north east. About 85 percent of the annual rainfall is received during the monsoon season.

May and June are the hottest months with the mean daily maximum temperature of about 40^0C and the mean daily minimum about 25^0C. The maximum temperature reaches about 46^0C. January is generally the coldest month when the mean daily maximum temperature is about 21^0C and the mean daily minimum temperature about 8^0C. Minimum temperature on individual days sometimes drop to freezing point. Winds are generally light with some increase in force during the later summer and monsoon season.

Natural and Economic Resources

Forestry :

The total area under forest in the district is 6611 hectares of which 4189 hectares is in Suar development block and 1876 hectares in Bilaspur.

Being in the vicinity of hill and tarai, the district is most suited for the growth of forest. With the

increase of the population, the portion of the forests at several places were gradually cleared for agricultural purposes. Now the forest are confined to Suar and Bilaspur tahsils only. These forests contain large patches of over grown long grass and can not be cultivated. Main trees found in these forests are babul, semal, ber, sissoo, gular etc. These are now being gradually replaced with plantations of Eucalyptus and Khair etc.

In earlier days a large number and variety of animals and birds were found in these forests but due to clearing of jungles and reckless shooting, the animals have shifted to the adjoining forests. As such, their number has diminished sharply. The tiger and leopard have become rare. Other animals commonly found in these forests are spotted dear, wild bear, wild cat hog and deer. The jackal, monkey, common mongoose, squirrel , porcupine, fox and hyena are found throughout the district. Among the game birds the most common are the grey quail, little brown dove, spotted dove, pigeon, red jungle owl, black partridge and red turtle dove. Quails appear in abundance. Quails and partridge are tamed for fighting. The goose, surkhab, teal and red crested pochard duck visit the district during the winter.

Mineral and Mining :

The district forms part of the Indo-Gangetic alluvium, which consists of sands of various grades, silt, clay and kankar in varying proportions. The northern part of the district lies close to the tarai area of district Naintal and is characterised by the dominance of finer fractions over coarser material. The presence of boulders in the northern part of the district in the river beds, at a depth of three metres or less, indicates that in the not very remote past the Himalayan detritus found its way further south than observed at present. Among minerals only Reh, Kankar and Clay are found in the district.

Reh – This mineral is rare in the district and the quantity obtained is insignificant.

Kankar – This too is scarce and is practically absent in the northern part of the district, the deposits also are of poor quality.

Clay – Clay, suitable, for making bricks, earthern toys and utensils is found almost everywhere in the district, especially near Rampur.

Soil :

The district is almost an open plain with slight undulation, the surface being traversed by numerous river valleys. Owing to its proximity to the terai forests, the soils, though rich in humus are poor drained and the climate is unhealthy. The plain area is a highly developed agricultural tract. The soil is generally domat and matiyar. The central part of tahsil Shahabad consists of sand and is covered with Jhao. At places where the soil is fertile, vegetable, wheat and sugarcane are grown. The land between the rivers Ramganga and Gangan has poor soil with deficient means of irrigation. The soil in the northern part of tahsil Shahabad consists of rich friable loam while in the south it is sandy bhur.

Land and Land use Pattern :

Like other district of the Rohilkhand Division, this district is also predominantly agricultural. The cultivated area in 1997-98 in the district was 235,695 hectare. In the closing years many reforms and a number of reorganization schemes in the farming system were introduced and a large number of irrigation works, mainly canals were completed in the district. Out of the total area of the district as per statistical magazine for the year 1997-98, forest covered 6,611 hectare, cultivable waste land was 339 hectare, present fallow 478 hectare, other fallow 227 hectare, usar and uncultivable land 7498 hectare, land use other than agriculture 25,501 hectare and net area sown was 193,765 hectare. The number of land holdings of the size of less than 1.0 hectare was 65.4 percent of the total land holdings. 20.1 percent in the land holding size of 1.0 to 2.0 hectare, 2.0 to 3.0 hectare covered the proportion of 7.4 percent and land holdings of size of 3.0 to 5.0 and 5.0 and above was 5.0 percent and 2.1 percent respectively. The land holdings are, generally small in size.

Agriculture and Crop Pattern :

Like other district of the Rohilkhand Division, this district is also predominantly agricultural. The main harvests of the district as usual consist of the Kharif (autum) and the Rabi (Spring) crops. The Zaid or intermediate crop is not of much importance in point of area covered, and consists of vegetables and melons in nearly all the tahsils. The latter are grown along the sandy banks of the Kosi and the Ramganga, specially in the Rampur and Shahabad tahsils.

Vegetables are cultivated every where. For augmentation of agricultural products besides providing financial assistance, fairs are organized which provide knowledge about modern techniques and equipments. High yielding seeds, fertilizers and insecticides are provided by the government agencies. The main autumn crops in the past have now virtually been replaced by paddy. Millets like Jowar, maize and bajra and pulses like urd and moong are grown in the district. Similar has been the fate for once popular Rabi crops like linseed and mustard which have given place to wheat, barley, arhar and gram. During 1997-98 as per Statistical Magazine, the district produced 329,183 m.ton of paddy, 355,416 m.ton of wheat, 3,366 m.ton of Jowar and 2,910 m.ton of bajra.Other crops produced during the same period were 4,226 m.ton pulses and 11,270 m.ton oilseeds. Among commercial crops 1,534,846 m.ton sugar cane and 41,951 m.ton potato was produced.

Irrigation :

Rivers and streams from times immemorial, have been used in the district for purpose of irrigation. Canals constitute one of the chief source of irrigation in the district. Kosi canal in Rampur tahsil, Sainjni, Drummond, Bhakra and Bahgul in Bilaspur tahsil, Kemri and Nahal in central portions of the district and Gangan in Shahabad tahsil provides a good irrigation network. Besides canals other sources of irrigation in the district are numerous tanks and reservoirs. Besides constructing tubewells and canals the government also gives loans and other financial assistance for the construction and repair of pucca wells, boring of wells, installing persian wheels (rahats) and pumping sets in the well and the construction of private tubewells for the cultivators in the district. Considering the sources of irrigation, it may be stated that during 1997-98 as per statistical magazine 9,540 hectare land was irrigated through canals and 170,088 hectare land by tubewells. Irrigation by canals is done mainly in areas under Bilaspur, Saidnagar, Chamraua and Milak C.D. blocks. Rest of the 1,904 hectares land was irrigated by other means.

Animal Husbandry :

Little headway had been made in the field of live stock development in the Rampur state prior to its merger with Uttar Pradesh. Artificial insemination facilities for improving the breeds of cows, buffaloes were started at various places in the district. The animal husbandry department of the state government has a live stock officer posted in the district and he is incharge of the animal husbandry and poultry development schemes. The department also arranges supply of cow-bulls, buffalo bulls, bucks, rams and boars for breeding purposes at subsidized rates. As per statistical magazine in 1998-99 there were 23 veternery hospitals, 18 animal husbandry centres and 39 artificial insemination centres.

According to the live stock census 1993 as per Statistical Magazine there were 536,275 animals, out of which 83,542 were goats, 3,865 horses 10,619 sheep, 13,514 pigs. There were 266,008 hen, cock, duck and other fowl in the district.

Fishery :

The rivers and streams of the district abound in a variety of fishes, chief of which are the rohu, lanchi, karrel, sanwal, bhur and barfaria. After carrying out a survey, the fisheries department has taken up a programme for development of pisciculture. Fingerlings are supplied to Gram Panchayats and private leasers under the 'Small Water Scheme'. Total 11,555 thousand fingerlings were distributed in the year 1998-99 as per statistical magazine.

Industry :

The industrial structure of the district consists of large, medium and small scale industries and village and cottage industries. There are eight units under medium scale industries and one under large scale industry. These eight units are Raza textiles, Raza Buland Sugar Factory, New Board Company, Hind Ceramics, Rajpur Distillery and Chemicals, Government Printing Press, Richardson Hindustan Ltd. and Rudra Vilas Sahkari Chini Factory. Under small scale industry items such as cloth, sugar, RCC sheets, alcohol, mentha, solvent oil and straw board are produced.

There are 5,937 units registered under small scale industries. They employ about 32,952 persons as per Statistical Magazine 1998-99. Village and cottage industries produce shoes, edible oil, gum, hides and skins, ropes, earthen pot, furniture, doors and windows etc. They employ about 41,233 persons as per statistical magazine 1998-99.

Trade and Commence :

Rampur was a trade centre of considerable importance in the past. One of the most attractive product was the cotton fabric known as 'Khes'. The pottery of Rampur was also well known in the past. Rampur used to possess a considerable reputation for steel sword blades and cutlery of all kinds. The craftsmen of Rampur now manufacture Sarautas and Knives of good quality. The inhabitants of Rampur have always taken an interest in Khandsari manufacture. A factory was setup at Roshanbagh, quite close to the Railway station of Rampur. Sugar was mostly supplied to Chandausi, Delhi and Punjab. Shira was also supplied to Kanpur. The principal exports of the district are liquor and hides. The main items of import are cotton and tobacco, the first by the Raza Textiles for making cloth and the other by small scale industries for making bidis. Coal and Kerosene oil are also imported, coal being mainly imported for brick kilns.

Transport :

The district is well connected by rail and road transport. The length of railway lines passing through the district is 74 km. Rampur is an important railway junction. Total length of roads in the district is 1,581 km. according to the statistics available up to the year 1999. Thirty four km. national highway passes through this district. No state highway passes through this district. Main district roads are 163 km. long whereas district and rural roads are 957 km. long. Road under local self government are 311 km., while 116 km. long roads are constructed and managed by other departments. The ratio of roads per 1,000 sq.km. area was 585 km. long till 1999. During the same period the ratio per lakh population was 92 km. The district is well connected by road transport. Means of road transport available in the district are State Road Transport Corporation buses, private buses, taxis, jeeps and trucks etc. Number of bus stations and bus stops are 102.

Electricity and Power :

Electricity plays an important role in development. A power house established by Nawab Hamid Ali khan in 1,913 at Rampur was taken over by the U.P. Government upon the merger of the state. This power house has been linked with Sharda-Hydro-electric grid and supplies electricity to Rampur. Tanda also has a power house which supplies electricity to the neighbouring districts. The per capita consumption of electricity amounts to 59.9 thousand units. However, electricity for agricultural purposes shows much higher consumption for per hectare of net area sown.The consumption for agricultural purposes amounts to 212.2 kwh. per hectare. Under rural electrification scheme 858 villages had power supply till 1998-99. Total consumption of electricity during 1998-99 was 145,596 thousand kwh. Largest consumer of electricity was agriculture sector which consumed 77,397 thousand kwh. followed by domestic sector 31,583 thousand kwh. and industrial sector 25,016 thousand kwh.

Gram Panchayat its Composition, Jurisdiction and role in village development

In the strengthened panchayat raj system, gram panchayat plays a vital role in development of village economy. A total of 947 gram sabha exists in the district. Gram sabha prepares master plan and developmental activities are carried out. The Jurisdiction of gram sabha is mainly concentrated within the village. Elections are periodically held to elect members and pradhan of gram sabha. As many as 17 (seventeen) departments have been attached to gram sabha in order to ensure that the benefits of the government programmes may reach to the common people or gram sabha in the district. A gram sabha controls and manages the activities concerned with the welfare of the village community. They also prepare priority development plans for the over all growth of the village dwellers. Members of the gram sabha are responsible for day to day administration. The main duties of the gram sabha relate to construction, repair, cleaning and lighting of fairs, establishment and management of common land and grazing grounds, maintenance of schools etc; besides promotion of social and communal harmony and goodwill amongst the villagers.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such

as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered

as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous

outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1	Agariya	37	Gual
2	Badhik	38	Habura
3	Badi	39	Hari
4	Baheliya	40	Hela
5	Baiga	41	Kalabaz
6	Baiswar	42	Kanjar
7	Bajaniya	43	Kapariya
8	Bajgi	44	Karwal
9	Balahar	45	Khairaha

10	Balai	46	Kharwar (excluding Banbasi)
11	Balmiki	47	Khatik
12	Bangali	48	Khorot
13	Banmanus	49	Kol
14	Bansphor	50	Kori
15	Barwar	51	Korwa
16	Basor	52	Lalbegi
17	Bawariya	53	Majhwar
18	Beldar	54	Mazhabi
19	Beriya	55	Musahar
20	Bhantu	56	Nat
21	Bhuiya	57	Pankha
22	Bhuyiar	58	Parahiya
23	Boria	59	Pasi, Tarmali
24	Chamar, Dhusia, Jhusia, Jatawa	60	Patari
25	Chero	61	Rawat
26	Dabgar	62	Saharya
27	Dhangar	63	Sanaurhiya
28	Dhanuk	64	Sansiya
29	Dharkar	65	Shilpkar
30	Dhobi	66	Turaiha
31	Dom		**Scheduled Tribes**
32	Domar	1	Bhotia
33	Dusadh	2	Buksa
34	Gharami	3	Jaunsari
35	Ghasiya	4	Raji
36	Gond	5	Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference

period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to

improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{} \times 1000$$

Mid-year female population
of the same age-group

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \text{S ASFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

Number of infant deaths

$$\text{NMR} = \frac{\text{aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes,

such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population.Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution:

The total population of the district is 1,923,739 in which 1,443,286 live in rural and rest

480,453 in urban parts. There are five tahsils in district namely Suar, Bilaspur, Rampur, Shahabad and Milak which have urban population also. The most populous tahsil is Rampur followed by Suar. Bilaspur is least populated tahsil. The urban population in the district is 480,453 or 25.0 percent. The urban population is maximum (43.0 percent) in Rampur tahsil. There are 1,155 revenue villages in the district out of which 1,092 are inhabited at the 2001 Census and remaining 63 are un-inhabited. The total rural population of 1,443,286 is spread over Six CD blocks and 3 forest villages. The most populous CD Block is Suar with a population of 356,161 and with maximum number of 250 inhabited villages. 89 populated villages have a population of less than 200 and such villages form 8.2 per cent of the total populated villages in six CD Blocks. Although the population density in the rural district is 638 highest poportion (63.6 per cent) of villages are with a population density range of 501+ square kilometre. Such Villages contain as much as 82.5 per cent of total rural population.

Size-class and status of towns:

In the total urban population of 480,453 as many as 281,494 live in Rampur NPP town. The next big town is Tanda NPP with a population of 40,013. The above two are class I and III towns having the civic status of Nagar Palika Parishad (NPP). Towns Suar, Bilaspur and Milak are also NPP. Rest of the three towns are Nagar Panchayat (N.P.) out of which Kemari and Shahabad are class III towns and Maswasi is IV town. Out of the eight towns one is class I, six class III and one class IV towns.

Population growth:

At the present territorial jurisdication the population of the district was 1,502,141 at 1991 Census and growing by 28.1 per cent during the decade 1991-2001 it is 1,923,739 at 2001 Census. The decadal growth at 28.1 per cent in the district has been at higher level than in the state at 25.8 per cent.

Population Density:

The district has an area of 2,367.00 square kilometre. The population density in the district is 813 In the rural areas of the district the density is 629.

Sex-Ratio:

The sex-ratio in the district at 879 is behind 898 at the state level. Indeed the sex-ratio has all along been lower in the district as against the state since 1901. As against the urban areas of the district, the sex-ratio is higher than that in rural areas except in census year 1961 when in rural areas, sex ratio (875) was higher than that (855) in urban area. Among tahsils, highest sex-ratio (893) is in Rampur and lowest (856) in Shahabad. Among CD Blocks the sex-ratio is highest in Bilaspur at 883 and lowest in Shahabad at 855. Out of 1,092 inhabited villages in the district there are 34.3 per cent villages (with 44.5 per cent of rural population) which are having a sex-ratio range 850-899. In the urban parts of the district the sex-ratio is 902 with highest of 919 in Rampur NPP and lowest 861 in Shahabad NP. The sex-ratio of population on the age-group 0-6 is 922 in the district which is higher than the state being only at 908 As against a sex-ratio of 919 in the age-group 0-6 of rural population of the district, it is highest at 934 in Bilaspur CD Block and lowest at 904 in Shahabad CD Block. It may be noted that out of 1,092 inhabited villages in the district, in 17.9 per cent of villages with 26.0 per cent of rural population the sex-ratio in the age-group 0-6 is in the range of 900-949. As against the 0-6 age-group sex-ratio of 919 in the rural area of the district it is 933 in urban area. Among towns this sex-ratio is highest at 970 in Maswasi and lowest at 902 in Milak.

Work Participation Rate:

In the total population of the district of Rampur, workers account for 28.3 percent and rest of 71.7 per cent are non-workers. Among worker 23.8 per cent are main workers and rest of 4.5 per cent are marginal workers. In absolute terms males outnumber females both as main worker and marginal workers. The extent of main workers is highest at 25.0 per cent in Shahabad tahsil and lowest at 22.3 per cent in Suar tahsil. In case of marginal workers also the proportion is highest in Shahabad tahsil as 5.8 per cent in comparsion to only 3.8 per cent in Suar and 4.3 percent in Rampur tahsil.. In the district among workers 41.4 per cent

are cultivators and 27.4 per cent other workers. 27.7 per cent of female workers are engaged as cultivators.

Literacy:

In the district 38.8 percent population is literate. The literacy is 52.2 percent in urban areas and 34.0 per cent in rural areas. The males literacy is higher at 48.2 per cent than 27.9 percent female literacy and therefore, the gap in male/female literacy rate is 20.3 percent points. In rural areas among six CD Blocks, the highest literacy is at 40.5 percent in Bilaspur and lowest at 27.6 per cent in Saidnagar. The literacy among males in rural areas is 44.8 per cent in comparison to 21.4 per cent among females. The lowest female literacy of 16.8 per cent is in Saidnagar CD Block. However the gap in male/ female literacy rate is highest in Milak CD Block which is 27.7 percent points. In 23.8 per cent of villages covering also 31.2 percent of rural population the literacy range is 21 to 30. Among urbanites in the district, as much as 58.0 per cent males are literates as against 45.7 per cent females. The highest urban literacy is in Milak at 58.7 per cent and lowest in Suar at 35.2 per cent. The maximum male literacy is found in Milak at 68.3 per cent and lowest at 42.8 per cent in Suar. However, the highest female literacy is in Rampur at 52.0 per cent and lowest at 26.4 per cent in Suar. Still, the maximum gap in male-female literacy rate at 26.9 percentage point is found in Maswasi. The rural literacy among scheduled castes is 36.2 per cent, and 52.5 per cent in towns. There are only 55 persons (38 males and 17 females) Scheduled Tribes as litrate in rural area whereas 142 Scheduled Tribes literats in towns, 130 male and 12 females.

(viii) Brief Analysis of Primary Census Abstract Data Based on inset Tables 1 to 36 :

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population 1991			Population 2001			Percentage decadal variation 1991-2001			Percentage urban population 1991	Percentage urban population 2001

	District Total:	**1,502,141**	**1,109,425**	**392,716**	**1,923,739**	**1,443,286**	**480,453**	**28.1**	**30.1**	**22.3**	**26.1**	**25.0**

The growth rates of each tahsil in the Rampur district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 28.1 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 30.1 and 22.3 per cent respectively. Out of the total population of the district 75.0 per cent live in rural areas while 25.0 per cent live in urban areas in 2001 in the district. The proportion of urban population has slightly declined during the decade from 26.1per cent in 1991 to 25.0 per cent in 2001 in the district. The highest

growth of urban population is recorded in Bilaspur (35..7 per cent) tahsil and lowest is registered in Rampur (15.5 per cent) tahsil. Bilaspur has highest decadal growth rate of 35.1 per cent, while Rampur tahsil has shown the lowest growth rate of 23.6 per cent for the total population.

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1092 inhabited villages, 89 (8.2 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 169 villages having 15.5 per cent villages of the district while in the size class of 500-999 population claims 286 villages with 26.2 per cent of the total villages in the district. 355 villages (32.5 per cent) are in the size class of 1,000-1,999 and 166 villages (15.2 per cent) are in the size class of 2,000-4,999. Twenty Seven villages in the district fall in the ranges of 5,000 and above population.

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWN IN 2001 CENSUS

	Name of Town
(a)	New
	(i) Statutory town
	NIL
	(ii) Census town
	NIL
(b)	Denotified
(i)	Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns.
	NIL
(ii)	Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria.
	NIL
(iii)	Census towns of 1991 census are notified as statutory town in 2001 census.
	NIL
(c)	Declassified
	NIL
(d)	Wholly merged with other town(s)
	NIL

**Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.*

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	12	1.1	19,163	1.3
11-20	6	0.5	149	0.0
21-50	16	1.5	745	0.1
51-100	30	2.7	8,791	0.6
101-200	80	7.3	34,381	2.4
201-300	68	6.2	33,890	2.3
301-500	186	17.0	155,783	10.8

Not known	0	0.0	0	0.0
District Total:	**1,092**	**100.0**	**1,443,286**	**100.0**

Population Density (Rural) 629

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e.694 accounting for 63.6 per cent of the total inhabited villages of the district fall in the density range of 501+persons having 82.5 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq km. cover 12 villages (1.1 percent) and 6 villages (0.5 percent) respectively. The proportion in the lower range of 51-100 to 301-500 is 33.2 percent of the total inhabited villages having 16.1 percent populations of the district. In the medium density ranges of 21-50 and 51-100 persons account for 1.5 and 2.7 percent of inhabited villages respectively. Both these ranges claim 0.7 percent rural population.

Table : 5 SexRatio ofState and District1901-2001

Census year	UTTAR PRADESH			RAMPUR		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	897	883	959
1911	916	922	866	876	868	917
1921	908	918	834	866	861	882
1931	903	916	813	855	849	882
1941	907	922	824	845	835	878
1951	908	922	827	863	837	922
1961	907	921	817	871	875	855
1971	876	884	826	836	828	869
1981	882	889	850	843	829	883
1991	876	879	864	858	846	893
2001	898	904	876	879	871	902

As per 2001 Census sex-ratio of 879 females per 1,000 males has been recorded in the district against the state average of 898 as can be seen in Table 5 above. The sex-ratio of the district has been lower as compared to the state average figures from 1901 to 2001. The lowest sex ratio of 836 females per 1000 males were recorded in the district during 1971 against the lowest in the state of 876 females. It is also observed that the proportion of females in urban areas is higher than that of rural areas in the district except in the year 1961.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Suar	880	881	874
2	Bilaspur	886	884	891
3	Rampur	893	873	919
4	Shahabad	856	855	861
5	Milak	865	863	884
	District Total:	**879**	**871**	**902**

Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 879 females for every thousand males in Rampur district. It becomes clear from the table that sex-ratio in urban areas is higher than that of rural areas in all tahsil except Suar where rural sex ratio 881 exceed urban 874. The sex ratio among rural and urban population is 871 and 902 females respectively. The rural sex ratio in the tahsils varies between 855 in Shahabad tahsil and 884 females per 1,000 males in Bilaspur tahsil. The rual sex ratio in Rampur, Bilaspur and Suar tahsils is higher than district rural average (871). In urban areas the highest sex ratio is recorded in Rampur (919) and the lowest in Shahabad (861).

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Suar	881
2	Bilaspur	883
3	Saidnagar	878
4	Chamraua	869
5	Shahabad	855
6	Milak	863
7	Forest Villages	911
	District (Rural) Total:	**871**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 871 females per 1,000 males. Among C.D. blocks it is highest in Bilaspur (883) while the lowest 855 is recorded in Shahabad C.D. block. Sex-ratios of Bilaspur, Suar and Saidnagar C.D. block are higher than the district rural average of 871 while in the remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	19	1.7	4,984	0.3

District Total:	**1,092**	**100**	**1,443,286**	**100**

Sex ratio (Rural) for District: 871

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census.The maximum number of villages i.e. 375 accounting for 34.3 per cent of the total villages having largest population of 44.5 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849 which claims 272 villages (24.9 per cent) and 24.6 per cent population. The highest range of 1,100 & above claims 11 villages (1.0 per cent). This range shares 0.1 per cent rural population of the district while in the sex-ratio range of 900-949, there are 211 villages (19.3 per cent). In remaining sex-ratio ranges of 1000-1099, 950-999, 750-799, 700-749 and less than 700, the number of villages are 36 (3.3 per cent), 60 (5.5 per cent), 79 (7.2 per cent), 29 (2.7 per cent) and 19 (1.7 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 375 having maximum population (44.5 per cent) fall in the higher sex-ratio ranges of 850-899 and above showing that in majority of villages the sex-ratio is significantly higher.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial numberer	Name of U.A./ Town	Urban status of town	Sex ratio
1	2	3	4
1	Bilaspur	NPP	889
2	Kemri	NP	894
3	Maswasi	NP	893
4	Milak	NPP	884
5	Rampur	NPP	919
6	Shahabad	NP	861
7	Suar	NPP	876
8	Tanda	NPP	866
Sex ratio (Urban) for the district:			**902**

Table 9 gives sex-ratio of towns. The sex-ratio in urban areas of the district comes to 902 females per 1,000 males. Among the 8 towns of the district the sex-ratio varies between 861 and 919 Rampur NPP has the highest sex-ratio (919), while Shahabad (N.P.) has the lowest sex-ratio of 861 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district.Total population in age-group 0-6 is 398,223 persons comprising 207,215 males and 191,008 females. The total sex-ratio in this age-group works out as 922 females for every thousand males in the district.The proportion of females in urban areas is higher than that of rural areas. The sex-ratio in rural and urban areas comes 919 and 933 in this age-group respectively. The rural sex-ratio in tahsils varies between 905 in Shahabad tahsil and 935 in Bilaspur tahsil. The sex-ratio of Suar and Bilaspur tahsil is higher than district average (922). In rural areas sex ratio exceed the district average (919) in tahsils Suar, Bilaspur and Milak. In urban areas, the higher sex-ratio is recorded in Suar (942) and the lowest is found in Milak (902).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Suar	78,675	40,851	37,824	926
2	Bilaspur	40,652	21,024	19,628	934
3	Saidnagar	43,007	22,321	20,686	927
4	Chamraua	41,486	21,763	19,723	906
5	Shahabad	58,013	30,476	27,537	904
6	Milak	55,968	29,154	26,814	920

	District (Rural) Total:	**318,337**	**165,892**	**152,445**	**919**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 919 for the district (rural). The sex-ratio of C.D. block varies between 904-934. It is highest in Bilaspur C.D. block (934) followed by 927 in Saidnagar C.D. block and lowest 904 is found in Shahabad C.D. block. The sex-ratio of Milak, Saidnagar, Suar and Bilaspur C.D. blocks are higher than that of the district rural (919) average while in the remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	95	8.7	7,506	2.4
700-749	47	4.3	10,018	3.1
750-799	73	6.7	15,797	5.0
800-849	112	10.3	31,732	10.0
850-899	152	13.9	50,938	16.0
900-949	196	17.9	82,729	26.0
950-999	128	11.7	53,956	16.9
1000-1099	169	15.5	49,677	15.6
1100+	120	11.0	15,984	5.0
District (Rural) Total	**1,092**	**100.0**	**318,337**	**100.0**
Sex ratio (Rural) for District:		**919**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e.196 (17.9 per cent) having largest population (26.0 per cent) in the district (rural) fall in the sex-ratio range of 900-949 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 1000-1099 which account for 169 villages (15.5 per cent) and 15.6 per cent population. Next to it are 152 villages (13.9 per cent) in the range of 850-899 with 16.0 per cent population. 128 villages (11.7 per cent) having 16.9 per cent population fall in sex-ratio range of 950-999. In remaining sex-ratio ranges of Less than 700,700-749, 750-799, 800-849 and 1100 and above claim less number of villages and these are distributed as 95 (8.7 per cent), 47 (4.3 per cent), 73 (6.7 per cent), 112 (10.3 per cent and 120 (11.0 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 613 having population (56.1 per cent) fall in the higher sex-ratio ranges of 900 to 949 and above.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

2	Kemri	NP	4,878	2,515	2,363	940
3	Maswasi	NP	3,044	1,545	1,499	970
4	Milak	NPP	5,046	2,653	2,393	902
5	Rampur	NPP	40,469	20,921	19,548	934
6	Shahabad	NP	6,615	3,442	3,173	922
7	Suar	NPP	5,004	2,598	2,406	926
8	Tanda	NPP	8,555	4,407	4,148	941
District(Urban) Total			**79,886**	**41,323**	**38,563**	**933**

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomerations/towns during 2001. In urban areas of the district total population in age group of 0-6 is 79,886 in which 41,323 are males and 38,563 females and sex ratio of the urban areas of the district is 933. Among 8 towns sex ratio in age group 0-6 varies from 902 in Milak (NPP) town to 970 in Maswasi (N.P.). In five towns sex ratio is more than the district average. Among eight towns, Rampur town has highest population.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

	District Total:	**Total**	**1,923,739**	**257,365**	**358**	**13.4**	**0.0**
		Rural	**1,443,286**	**232,559**	**169**	**16.1**	**0.0**
		Urban	**480,453**	**24,806**	**189**	**5.2**	**0.0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tehsil level in rural and urban areas of the district. Of 1,923,739 total population of the district, 13.4 per cent of the total population belong to Scheduled Castes and negligible per cent to Scheduled Tribes as they account for only 358. The percentage of Scheduled Castes population constitutes 16.1 per cent in rural population and 5.2 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Shahabad tahsil (23.1) while the lowest is found in Rampur tahsil (7.6). The proportion of Scheduled Tribes population is negligible both in rural and urban areas. Scheduled Tribes population in the district is mainly concentrated in tahsil of Rampur, Bilaspur and Suar.The lowest number of only 10 Scheduled Tribes is recorded in Milak tahsil.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Suar	356,161	46,136	13	13.0	0.0
2	Bilaspur	196,829	29,477	107	15.0	0.1
3	Saidnagar	182,923	18,386	13	10.1	0.0
4	Chamraua	189,521	19,628	6	10.4	0.0
5	Shahabad	256,855	61,557	20	24.0	0.0
6	Milak	258,012	57,347	10	22.2	0.0
7	Forest Villages	2,985	28	0	0.9	0.0
	District (Rural) Total:	**1,443,286**	**232,559**	**169**	**16.1**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district 16.1 per cent of rural population of the district belongs to Scheduled Castes and negligible per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 10.1

per cent in Saidnagar and 24.0 per cent in ShahabadC.D. block.. The other C.D. blocks containing a higher percentage of Scheduled Castes are Milak (22.2), Bilaspur (15.0) and Suar (13.0). The highest proportion of 0.1 per cent (107) Scheduled Tribes population is counted in Bilaspur C.D. block. The lowest number of Scheduled Tribes is recorded in Chamraua CD Block which account for only six.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	208	19.0	0	0.0
Less than 5	253	23.2	8,365	3.6

51-75	64	5.9	39,559	17.0
76 and above	26	2.4	12,844	5.5
District Total	**1,092**	**100.0**	**232,559**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level.208villages accounting for 19.0 per cent of total 1092 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.per cent in 253 villages (23.2 per cent). In 149 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 152 villages constituting 13.9 per cent of the total villages. The range 21-30.and 31-40 per cent contains 119 and 78 villages respectively. Both these ranges together account for 18 per cent villages of the district. 133 villages fall in the range of 41-50 and above per cent ranges. Twenty six villages are such where the proportion of Scheduled Caste is more than 76.0 per cent. These villages contain 5.5 per cent Scheduled Castes population of the district. The maximum of the 19.1 per cent of the Scheduled Castes population is covered by range of 31-40 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES,2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,079	98.8	0	0.0
Less than 5	11	1.0	82	48.5

76 and above	0	0.0	0	0.0
District Total	**1,092**	**100.0**	**169**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. 1.2 per cent of rural population of the district belong to Scheduled Tribes population. There are 1079 (98.8 per cent) villages where none of Scheduled Tribes have been recorded in the district. 11 (1.0 per cent) villages have proportion of Scheduled Tribes population less than 5 per cent and remaining 2 (0.2 per cent) villages have 5-10 percent Scheduled Tribe population. However, in 13 villages, the proportion of Scheduled Tribes population is less than 10.0 per cent accounting for 100.0 per cent Scheduled Tribe population of the district.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

Table 18 shows number and percentage of Scheduled Caste and Scheduled Tribes population recorded during 2001 Census in urban area district Rampur. The table depicts that scheduled caste population in Shahabad and Maswasi were 16.0 and 13.1 per cent respectively but very low (1.3 per cent) in the Tanda town. Scheduled tribe population is negligible in the urban areas of the district. There are no scheduled tribe population in Maswasi (N.P.), Tanda (NPP), Kemri (NP) and Milak (NPP). Highest percentage (0.2) of Scheduled Tribe population was recorded in Suar (NPP).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Suar	875	857
2	Bilaspur	879	981
3	Saidnagar	881	857
4	Chamraua	868	500
5	Shahabad	860	818
6	Milak	866	2333
7	Forest Villages	750	0
District (Rural) Total		**869**	**965**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 869 for district (rural). Among the C.D.blocks, the highest sex ratio of 881 is found in Saidnagar C.D. block and lowest of 860 is recorded in Shahabad C.D. block. This table also shows sex ratio of ST population in rural areas of the district which is 965. The highest sex ratio of 2,333 was recorded in Milak CD block, while lowest of 500 was recorded in Chamraua CD block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bilaspur NPP	861	1,000
2	Kemri NP	990	0
3	Maswasi NP	906	0
4	Milak NPP	859	0
5	Rampur NPP	873	9
6	Shahabad NP	841	1,250
7	Suar NPP	882	938
8	Tanda NPP	797	0
Sex ratio (Urban) for the district:		**867**	**252**

Table 20 shows sex-ratio among scheduled castes and scheduled tribes in urban agglomerations/towns as per 2001 Census. Among eight towns, sex ratio of scheduled castes is highest 990 in Kemari (NP) town and it is lowest 797 in Tanda (NPP) town. Four towns have zero sex ratio among scheduled tribes population. It means ST female population is zero. In urban area of the district Rampur, sex ratio of Scheduled Caste and Scheduled Tribe are 867 and 252 respectively.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Sl. No	Name of Tahsil	Total / Rural / Urban	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years childrens comes to 38.8 per cent in the district. This proportion in rural area is 34.0 per cent as against 52.2 per cent in urban areas. In the district the literacy rate of males (48.2 per cent) is much higher than that of females (27.9 per cent). Among the tahsils, Bilaspur tahsil tops with 43.2 per cent literates followed by Milak tahsil(41.8 per cent). Shahabad tahsil with 31.8 per cent literates stands at the bottom in the district. Out of 5 tahsils, the literacy rates of 3 tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 20.3 percentage points in the district. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 12.4 points against the rural areas, where the gap between male and female literacy is 23.4 points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Suar	92,585	64,530	28,055	263,576	124,851	138,725	33.4	43.4	21.8	21.7
2	Bilaspur	63,206	41,850	21,356	133,623	62,672	70,951	40.5	50.1	29.4	20.7
3	Saidnagar	38,638	27,743	10,895	144,285	69,646	74,639	27.6	37.0	16.8	20.2
4	Chamraua	43,987	32,315	11,672	145,534	69,103	76,431	29.7	40.6	17.1	23.5

7	Forest Villages	1,445	896	549	1,540	666	874	59.0	71.2	46.1	25.0
District (Rural) Total:		**382,327**	**271,020**	**111,307**	**1,060,959**	**500,184**	**560,775**	**34.0**	**44.8**	**21.4**	**23.4**

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 34.0 per cent of the total rural population excluding the age-group of 0-6 years is literate in the district. The corresponding proportion of male and female literates comes to 44.8 and 21.4.per cent respectively which shows very wide gap of 23.4 percentage points in male and female literacy. At C.D. block level, Bilaspur C.D. block has the highest rural literacy rate of 40.5 per cent

while 50.1 per cent males and 29.4 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Saidnagar C.D. block (27.6 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 27.7 percentage points is found in Milak C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	14	0.0
1-10	27	2.5	16,406	1.1
11-20	132	12.1	174,916	12.1
21-30	260	23.8	450,353	31.2
31-40	258	23.6	401,356	27.8
41-50	205	18.8	263,125	18.2
51-60	103	9.4	90,199	6.2
61-70	68	6.2	37,555	2.6
71-80	27	2.5	7,927	0.5
81-90	7	0.6	1,317	0.1
91-99	2	0.2	93	0.0
100	2	0.2	25	0.0
District Total:	**1,092**	**100.0**	**1,443,286**	**100.0**
Literacy rate for District:		**38.8**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in one village (0.1 per cent) of the district and population of this village is only 14 persons. In 2 villages (0.2 per cent) total population is literate. 103 villages accounting for 9.4 per cent of the total villages are in the literacy range of 51-60 per cent and 68 villages (6.2 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent was observed in 882 villages (80.8 per cent) of the district. The higher literacy ranges of 71 to 100 per cent cover 38 villages (3.5 per cent). The range of 21-30 have the maximum number of 260 villages forming 23.8 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District(Urban) Total		**209,024**	**122,577**	**86,447**	**271,429**	**129,994**	**141,435**	**52.2**	**58.0**	**45.7**	**12.3**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Rampur town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (Rampur). The literacy

rate is quite high (above 50.0 per cent in three towns) and among males it is above 60.0 percent). Female literacy rate is not far behind in two towns (above 50.0 per cent). However, literacy rate among females is very low (25.8 per cent) in Kemri town. The gap in male female literacy rate is 12.3 percentage points.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial		Number of literates and illiterates									Gap in
		Number of literates			Number of illiterates			Percentage of literates			male/female
number	Name of C.D.block	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	literacy rate
1	2	3	4	5	6	7	8	9	10	11	12

District (Rural) Total:		**64,464**	**46,757**	**17,707**	**168,095**	**77,661**	**90,434**	**36.2**	**48.6**	**21.7**	**26.9**

Table 25 shows number and percentage of scheduled castes literates and illiterates by sex in CD blocks during 2001. In rural areas of the district proportion of literates is 36.2 per cent in which 48.6 per cent are males and 21.7 per cent females. Thus, the gap in male and female literacy rates is 26.9 percentage points. Among six CD blocks, Suar CD block has the highest literacy rate (39.3) and Shahabad CD block has the lowest literacy rate (32.4). The gap in male/female literacy rates in Suar CD block is highest 29.7 percentage points while gap is lowest in Bilaspur CD block 25.0 percentage point.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	45.0	5.1	537	0.2

	District (Urban)	**10,472**	**6,747**	**3,725**	**14,334**	**6,539**	**7,795**	**52.5**	**62.6**	**40.6**	**22.0**

Table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates is more than literates in the district (urban) and towns.The percentage of literates is least in Kemri N.P. among towns but the gap in male/female literate rate is highest in case of Maswasi NP. The males in all the towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Tanda NPP.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Number of literates and illiterates									Gap in male/female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Suar	4	3	1	9	4	5	36.4	50.0	20.0	30.0
2	Bilaspur	36	26	10	71	28	43	42.4	57.8	25.0	32.8
3	Saidnagar	4	2	2	9	5	4	36.4	33.3	40.0	-6.7

5	Shahabad	3	2	1	17	9	8	30.0	33.3	25.0	8.3
6	Milak	3	1	2	7	2	5	37.5	50.0	33.3	16.7
District (Rural) Total:		**55**	**38**	**17**	**114**	**48**	**66**	**42.0**	**55.1**	**27.4**	**27.7**

Table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is more than literates in the district. The literacy rate of the scheduled tribes population at 42.0 per cent is lower than the corresponding rate of 52.5 per cent in case of scheduled castes community. The gap in male and female literacy rates at 27.7 percentage point is also higher than what it is in case of the scheduled castes community 22.0 percentage points. The literacy rate is highest in Chamraua CD Block (83.3 per cent) and lowest in Shahabad CD Block (30.0 per cent). The gap in male/female literacy rate in Saidnagar CD Block is in favour of the females, which is an exception and otherwise the highest gap is in case of Chamraua CD Block.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out to 28.3 per cent of the total population in the district, with 47.1 per cent male and 6.9 per cent female. The total workers are comprised of 23.8 per cent of main workers and 4.5 per cent of marginal workers and the remaining 71.7 per cent are non-workers.

Among the main workers, males participation rate in the district is 41.8 per cent and 3.2 per cent of females. Male and female marginal workers account for 5.3 and 3.7 per cent respectively. Total workers (main and marginal workers) among tahsils varies from 26.1 per cent in Suar tahsil to 30.8 per cent in Shahabad tahsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D. block	Persons / Males /	Total Population	Main workers		Marginal workers		Total workers		Non workers

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of 1,443,286 total rural population of the district, 23.6 per cent has been categorised as main workers and the marginal workers constitute 4.9 per cent and the remaining 71.5 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 41.6 per cent males and 2.9 per cent females are in the category of main workers. Male and female marginal workers account for 5.6 and 4.1 per cent respectively.

The percentage of total rural workers of the district comes to 28.5 per cent. At the C.D. block level, Bilaspur has highest proportion of total workers forming 31.1 per cent of the total population. It is closely followed by Shahabad (31.0 per cent), Milak (28.5 per cent),Chamraua (27.7 per cent), Saidnagar (26.8 per cent) and Suar (26.6 per cent). The lowest percentage of 26.6 is recorded in Suar C.D. block.

Table 33 indicates that as against 24.3 per cent of main workers in the urban areas of the district, such workers are as high as 25.6 per cent in Rampur NPP. Similarly the extent of marginal workers (5.2) is highest in Shahabad town. Percentage of non-workers in district is 72.3. It is highest in Maswasi NP (76.4 per cent).

Note: Percentage of Worker to total worker are given in brackets

It can be seen from Table 34, that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 41.4 per cent of the total workers (main + marginal) and remaining 58.6 per cent of total workers are engaged as agricultural labourers (24.6 per cent), Household industry workers (6.6 per cent) and other workers (27.4 per cent) in the district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing a large number of workers. The proportion of cultivators varies between 27.4 per cent in Rampur tahsil and 56.5 per cent in Shahabad tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of and household industry workers is very low, only 6.6 per cent in the district as stated above. The workers in other activities occupy the second position next to agriculture in the district as well as in each tahsil. The highest proportion of 43.6 per cent of other workers is recorded in Rampur tahsil while the lowest proportion of 15.3 per cent is found in Shahabad tahsil.

Note: Percentage of Workers to total workers are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) are 28.5 per cent of total population. Among these workers, cultivators constitute 52.6 per cent, 29.5 per cent agricultural labourers, 3.9 per cent household industry workers and 14.1 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 3.9 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 44.8 per cent in Bilaspur C.D. block and 60.7 per cent in Shahabad C.D. block. Similarly for other workers, the lowest proportion is 11.0 per cent in Suar C.D. block while 19.7 per cent is the highest in Chamraua C.D. block. The percentage of household industry workers is quite low i.e. only 3.9 per cent in the district. The percentage of agricultural labourers is highest in Bilaspur (36.5) block and is followed by Suar (36.3). In other C.D. blocks, this proportion is quite insignificant. Similarly, household industry workers varies in C.D. blocks between 2.0 per cent in Bilaspur and 6.8 per cent in Chamraua.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

				(6.6)	**(4.0)**	**(4.6)**	**(47.7)**	**(43.7)**

Note: percentage of workers to total workers are given in brackets.

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district Rampur. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (68.8), followed by cultivators with 7.0 per cent (7.3 per cent male and 4.0 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (44.0) is recorded in Maswasi N.P. In the agriculture labourers category in Rampur NPP. recorded very low percentage (2.0). Household industry workers are also very low (0.7 per cent) in Maswasi NP, 4.0 per cent in Milak and 4.3 per cent in Suar NPP. As the usual trend observed in the urban areas, other workers are in high percentage (78.3 per cent) in Tanda NPP, 76.5 per cent in Bilaspur NPP and 75.3 per cent in Rampur NPP.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47 :

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES,

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1092 inhabited villages in the district 845 villages or 77.4 per cent have been provided with the educational facilities of one type or the other. Similarly 456 villages in the district constituting 41.8 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1084 or 99.3 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 115 villages constituting 10.5 per cent of villages have been provided with post office facility within the village. 473 or 43.3 per cent villages have been provided with the telephone facility, 88 or 8.1 per cent with transport facility, 56 or 5.1 per cent villages with bank facility and 60 or 5.5 per cent with agricultural credit societies. Similarly there are 767 or 70.2 per cent villages which have been linked with the pucca road. Total 916 or 83.9 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Saidnagar C.D. block has the highest 86.6 per cent villages where educational facility is available and lowest 74.0 per cent is found in Suar CD Block. Medical facility is highest in Saidnagar (83.9 per cent) and lowest (8.1 per cent) in Milak C.D. block. Improved drinking water is available to cent-percent villages in Suar, Saidnagar and Chamraua blocks while in other blocks, it is near cent per cent. Telephone facility is highest in Suar (58.0 per cent). Transport and communications is not developed in Chamraua where only 2.5 per cent villages are covered by this facility. In the field of power supply all villages have been covered except 176 villages in the district.

TABLE 38 : NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Total population of inhabited villages	Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,443,286 persons in the district, 1,314,097 or 91.0 per cent have educational facility of one or the other type. Similarly 783,993 or 54.3 per cent population has medical facilities while 1,441,777 or 99.9 per cent have got improved drinking water facility. Post office facilities are available to 345,233 or 23.9 per cent population. Telephone facility is available to 782,779 or 54.2 per cent. Transport communications facility is available to 220,242 or 15.3 per cent. Bank facility is available to 199,593 or 13.8 per cent. 199,960 or 13.9 per cent have been provided with the facility of agricultural credit societies. 1,153,570 or 79.9 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,288,095 or 89.2 per cent rural population in the district. However, in Saidnagar C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

	Distance range of place from the villages where the amenity is available			
Village not having the amenity of	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	209	37	6	252
(b) Middle School	575	294	55	924
(c) Degree College	80	162	846	1,088
2. Medical:-				
(a) Hospital	317	373	387	1,077
(b) PHC	282	412	346	1,040
3. Post Office	691	233	53	977
4. Telephone	318	160	141	619
5. Bus Service	422	387	210	1,019
6. Banks				
(a) Commercial Bank	652	304	86	1,042
(b) Cooperative Bank	320	467	286	1,073
7. Agricultural Credit Societies	601	322	109	1,032

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 252 villages do not have primary schools and out of these villages, children of 209 villages have to travel less than 5 kms. for schooling Out of 1092 inhabited villages as many as 924 are deprived of middle school and 1088 of degree college. Of 924 villages, 575 avail the facility of middle school at a distance of less than 5 kms., 294 at a distance 5-10 kms. and the remaining 55 at a distance of 10+ kms. In respect of degree college 80 avail this facility at a distance of less than 5 kms., 162 between 5-10 kms. and rest 846 villages at a distance of 10+ kms.

Similarly there are 1077 villages in the district which have been devoid of hospital facility and 1040 villages do not have PHC facilities. Of these 317 villages have the facility of Hospital available within 5 kms. while in respect of 373 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 387 villages have this facility at a distance of 10+ kms. As regards PHC 282 avail this facility at a distance of less than 5 kms., 412 at a distance of 5-10 kms. and the remaining 346 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 977 villages do not have this facility in the village itself. Of these majority i.e.691 have this facility at a distance of less than 5 kms., another 233 villages avail it at a distance of 5-10 kms. In the remaining 53 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 619 villages in the district which are without telephone facilitiy. Of these 318 avail this facility at a distance of less than 5 kms., 160 at a distance of 5-10 kms. and remaining 141 have to traverse a distance of 10+ kms.

For Bus service out of 1019 villages which do not have facility, 422 villages avail this facility at a distance of less than 5 kms., 387 at a distance between 5-10 kms. and 210 at a distance of 10+ kms.In the entire district 1,042 villages are deprived of Commercial Bank & 1,073 of Co-operative Bank. Of these 1,042 villages which are deprived of Commercial Banks 652 villages avail this facility at a distance of less than 5 kms., 304 between 5-10 kms. & the remaining 86 at a distance of 10+ kms. Regarding Co-operative Banks out of 1073 villages 320 villages avail this facility at a distance of less than 5 kms., 467 at a distance of 5-10 kms. and remaining 286 at a distance of 10+ kms. 1,032 villages do not have agricultural credit societies.This facility to 601 villages is available at a distance of less than 5 kms,322 at a distance of 5-10 kms. and the remaining 109 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available				Type of amenity available			
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

	(100.0)	(66.7)	(16.7)	(8.3)	(58.3)	(8.3)	(8.3)	(8.3)	(50.0)
District total	**1,092**	**845**	**456**	**115**	**473**	**88**	**56**	**60**	**767**
	(100.0)	**(77.4)**	**(41.8)**	**(10.5)**	**(43.3)**	**(8.1)**	**(5.1)**	**(5.5)**	**(70.2)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1092 inhabited villages in the district, there are 134 villages which have nearest towns upto a distance of 5 kms. Of these only 97 villages forming 72.4 per cent of the total villages, are having the educational facilities of one type or the other and 37 villages constituting 27.6 per cent, have the medical facilities within the village, 13 villages forming 9.7 per cent have the facility of post office within the village and 73 or 54.5 per cent have the facility of telephone. 12 villages constituting 9.0 per cent have been linked by transport service. 4 villages comprising 3.0 per cent have been provided bank facilities, while 7 villages constituting only 5.2 per cent have been provided with agricultural credit societies. 96 villages comprising 71.6 per cent have been provided with pucca road.

There are 846 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 658 villages constituting 77.8 per cent have been provided with the educational facilities. 373 villages comprising 44.1 per cent have been provided with medical facilities. 86 villages constituting 10.2 per cent enjoy the post office facility. 356 villages forming 42.1 per cent have been provided with the telephone facility. 74 villages constituting 8.7 per cent have been linked with transport communications. 49 villages comprising 5.8 per cent have bank facility. 46 villages constituting 5.4 per cent are having agricultural credit societies, while 594 villages or 70.2 per cent are approachable by pucca road. 100 villages

fall in the distance range of 16-50 kms. Of these, 82.0 per cent villages have educational facility, 44.0 per cent with medical, 15.0 per cent with post office, 37.0 per cent with telephone and transport & communications available to 1.0 per cent villages. Banks and agricultural credit societies facilities are available to 2.0 and 6.0 per cent of villages, respectively. 71.0 per cent have approach by pucca road.

There are 12 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 66.7 or cent per cent villages have the educational facility of one or other type. One village each constituting 8.3 per cent have the post office, transport and communication, banks and agricultural credit society facilities in the village. 6 villages have also been connected by pucca road. There are two villages (16.7 per cent) which have medical facilities and 7 villages (58.3 per cent) have telephone facilities.

TABLE 41:DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Rampur district out of a total 1092 inhabited villages., 845 villages (77.4 per cent) have educational facility, 456 (41.8 per cent) have medical facility, 1084 (99.3 per cent) have improved drinking water facility. 115 villages (10.5 per cent) have post office facility. 473 (43.3 per cent) have telephone facility. 88 (8.1 per cent) have been linked by bus service. 56 (5.1 per cent) have Bank facility. 60 villages (5.5 per cent) have been provided with the agricultural credit societies, 767 villages (70.2 per cent) have been linked with pucca road. 916 villages (83.9 per cent) have been provided with electricity.

Out of 286 villages, which fall in the population range of 500-999 persons, 225 villages (78.7 per cent) have been provided with the educational facility, 106 (37.1 per cent) with medical facility, 285 villages 99.7 per cent have improved drinking water facility. 22 villages (7.7 per cent) have been provided with post office facilities, 116 villages (40.6 per cent) with telephone facility, 14 villages (4.9 per cent) with transport facilities, 2 villages (0.7 per cent) with bank facility, 8 villages (2.8 per cent) with agricultural credit societies and 168 villages (58.7 per cent) have approach by pucca road 216 or 75.5 per cent villages in this range have electricity.

355 villages fall in population range of 1,000-1,999 persons. 329 villages (92.7 per cent) have been provided with educational facility 169 villages (47.6 per cent) enjoy the medical facility whereas 355 villages (100.0 per cent) have improved drinking water facility, 24 villages (6.8 per cent) have post office facility, 175 villages (49.3 per cent) have telephone facility, 25 villages (7.0 per cent) have transport communications facilities, 15 villages (4.2 per cent) have bank facilities, 12 villages (3.4 per cent) have agricultural credit societies and 270 villages (76.1 per

cent) have approach by pucca road and 313 villages (88.2 per cent) have power supply facility.

There are 2 villages in the district which are covered under 10,000+ population range. In this range, all the villages enjoy the facility of educational, medical improved drinking water, post office, agricultural credit societies, approach by pucca road and power supply. In the population range of 2000-4,999, 97 villages (58.4 per cent) have medical facility. 49 villages (29.5 per cent) have post office facility, 24 villages (14.5 per cent) have bank facility, 29 village (17.5 per cent) are having agricultural credit societies. There are 25 villages in the district having a population of 5,000-9,999 persons where cent per cent facility of educational, improved drinking water and power supply are available.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Suar	250	55,770.1	NA	96.6
2	Bilaspur	223	48,290.7	NA	96.1
3	Saidnagar	112	19,841.5	NA	85.9
4	Chamraua	120	21,008.5	NA	92.2
5	Shahabad	187	37,547.6	NA	74.2
6	Milak	197	40,244.8	NA	95.2
7	Forest Villages	3	3,418.5	NA	0.0
	District Total:	**1,092**	**226,121.7**	**NA**	**92.8**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area. It elaborates that what is the extent of cultivable area under irrigation. There are total 1,092 inhabited villages in the district having a total area of 226,121.7 hectares. Out of total cultivable area, 92.8 per cent land has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government. Among 6 CD Blocks highest (96.6 per cent) area is irrigated in Suar CD Block while Shahabad CD Block with 74.2 per cent irrigated area has least irrigated land.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

		Per capita receipt			Per capita expenditure					
Serial number	Class, name & urban status of the Town	Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)

District Total		**4.6**	**1.3**	**0.6**	**0.5**	**0.1**

Table 44 shows in urban areas of Rampur district the average number of primary schools per 10,000 population comes 4.6 schools, 1.3 junior secondary/ middle, 0.6 secondary/matriculation, 0.5 senior secondary schools and the ratio of colleges is 0.1 college per 10,000 population. Among the towns, the ratio of primary (6.0),junior secondary/ middle and secondary/matriculation is highest in Milak NPP(3.1) and Miswasi NP respectively. While in case of senior secondary school this position is claimed by Bilaspur NPP and Kemri NP(0.8). College education is available only in Rampur NPP and (0.1) Bilaspur NPP.(0.3)

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bilaspur NPP	3
2	Kemri NP	2
3	Maswasi NP	0
4	Milak NPP	12
5	Rampur NPP	11
6	Shahabad NP	9
7	Suar NPP	7
8	Tanda NPP	8
	Distrct Total	**9**

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Rampur district. On an average there are 9 beds per 10,000 population in urban areas of the district. It is highest (12) in Milak NPP while lowest value of 2 beds is recorded in Kemri N.P. There is no bed in Medical institution of Maswasi NP.

TABLE : 46 PROPORTION OF SLUM POPULATION TOWNS, 2001

Serial Number	Name of the Town	Total Population	Slum population	Percentage of slun population to total population

			N.A	

TABLE 47 : MOST IMPORTANT COMMODITY MANUFACTURED IN AND EXPORTED FROM TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bilaspur NPP	Earthen Utensil Ply Wood Agriculture Instruments	Wheat Rice Plywood
2	Kemri NP		Bricks
3	Maswasi NP		Coriander Oil Seed Garlic
4	Milak NPP		Wheat Paddy Sugarcane
5	Rampur NPP	Knife Bidi Liquor	Bidi Liquor Knife
6	Shahabad NP	Sugar Bricks Furniture	Mango Veg. Oil Rice
7	Suar NPP		
8	Tanda NPP		

Table 47 indicates most important articles manufactured and exported from each town in the district. The district is well known for Knife which is the main export of the district Knife, Bidi, Oil and plywood are the main items which are manufactured in Rampur district and these are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities, based on inset tables 48-52

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 289,452 consisting of 217,459 rural and 71,993 urban households. 48,241 households belong to Scheduled Castes and 4,161 to Scheduled Tribes. 274,155 households are living in their own houses constituting 94.7 per cent of total households. Of these households, the largest number of households (103,392) have occupied one room accommodation and is followed by two room accommodation numbering 95,768 households. Next position is claimed by households (38,273) occupying three room accommodation. Number of households in owned accommodation occupying three plus rooms rank at fourth place with 32,152 households while 4,570 households are without any exclusive room. 9,971 households living in rented accommodation account for 3.4 per cent of total number of households in the district. The largest number of 5,612 households are living in single room accommodation followed by 2,985 households in double room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 5,326 forming only 1.8 per cent of total households are distributed in single room accommodation numbering 2,490 double room numbering 1,452 and 823 in three room accommodation. In rural areas majority of households have houses of bigger-size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Perma-nent	Semi-perma-nent	Tempo-rary	Perma-nent	Semi-perma-nent	Tempo-rary	Perma-nent	Semi-perma-nent	Tempo-rary

Data source: *Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.*
Note:-
Permanent:- 1Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.
Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.
Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that 46.2 per cent of the households in the district had permanent houses. The trend is different in rural (36.4 per cent) and urban area (75.6 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Rampur (59.8 per cent) followed by Bilaspur (56.5 per cent), Milak (39.5 per cent) and lowest in Shahabad (25.4 per cent). In respect of semi-permanent houses, the returns were 31.2 per cent of district level where as among tahsils, in Milak it was 39.2 per cent and lowest was 24.5 per cent in tahsil Bilaspur. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 11.1 to 27.2 per cent. Temporary houses in the district lie between the range of 15.7 and 38.5 per cent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households. Bathroom means bathroom within the house.Toilet means toilet within the house. Drainage mens closed and open drainage.

The above table shows that out of total households of the district 96.6 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 96.2 and 97.8 per cent. Tahsil Rampur had higher proportion of households where percentage for rural area was 97.4 and 97.6 per cent in urban areas. Electricity is available to 37.2 per cent of households at district level. Bathrooms and toilet facilities were available in 44.0 and 65.1 per cent of households. Tahsil Shahabad was poorly served in respect of these amenities. Similarly drainage facility was also poor in Bilaspur. At district level drainage facility was available to 86.4 per cent of households, whereas the proportion of households in rural and urban areas accounted for 82.8 and 97.3 per cent.

TABLE 51 : NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Total house-holds	Fire wood	Crop residue	Cow-dung cake	Electri-city	Coal / Lignite (charcoal)	Cooking gas (L.P.G.)	Bio-gas	Kero-sene	Others	No cooking

	District Total:	**Total**	**289,452**	**130,512**	**41,891**	**78,065**	**414**	**297**	**30,047**	**1,221**	**6,067**	**412**	**526**
				(45.1)	**(14.5)**	**(27.0)**	**(0.1)**	**(0.1)**	**(10.4)**	**(0.4)**	**(2.1)**	**(0.1)**	**(0.2)**
		Rural	**217,459**	**96,806**	**38,040**	**74,201**	**289**	**62**	**5,604**	**1,046**	**735**	**384**	**292**
				(44.5)	**(17.5)**	**(34.1)**	**(0.1)**	**(0.0)**	**(2.6)**	**(0.5)**	**(0.3)**	**(0.2)**	**(0.1)**
		Urban	**71,993**	**33,706**	**3,851**	**3,864**	**125**	**235**	**24,443**	**175**	**5,332**	**28**	**234**
				(46.8)	**(5.3)**	**(5.4)**	**(0.2)**	**(0.3)**	**(34.0)**	**(0.2)**	**(7.4)**	**(0.0)**	**(0.3)**

It is observed from the above table that 45.1 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is to 44.5 and in urban area it comes to 46.8 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in 10.4 per cent of the households. The composition of rural and urban comes to 2.6 and 34.0 per cent respectively. Kerosene is used for cooking in 2.1 per cent of the households (0.3 per cent rural and 7.4 per cent urban households). The other methods like crop residue, cow dung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between 27.0 per cent and 0.1 per cent of the households of the district. The table shows that firewood, LPG (cooking gas, cowdung cake, crop residue) and kerosene are the predominant fuel for cooking in the district.

TABLE 52: NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

					Availability of	Availability of household assets					
Serial number	Tahsil	Total/ Rural/ Urban	Total number of households	Total number of house-holds availing banking services	Radio/ Transistor	Tele-vision	Tele-phone	Bicycle	Scooter, Motor Cycle, Moped	Car, Jeep, Van	None of the specified assets
1	2	3	4	5	6	7	8	9	10	11	12

		Rural	40,045	13,570	14,686	5,886	819	22,766	1,419	354	12,934
		Urban	4,890	1,809	2,630	1,967	380	2,979	399	74	1,091
5	Milak	Total	43,790	19,832	15,891	9,449	1,498	29,527	2,499	530	9,867
		Rural	39,816	17,537	14,684	7,557	977	27,527	2,013	427	8,897
		Urban	3,974	2,295	1,207	1,892	521	2,000	486	103	970
	District Total:	**Total**	**289,452**	**113,473**	**118,821**	**88,151**	**17,365**	**197,710**	**26,568**	**5,788**	**57,484**
		Rural	**217,459**	**85,068**	**86,251**	**47,106**	**7,462**	**149,719**	**14,393**	**3,523**	**46,315**
		Urban	**71,993**	**28,405**	**32,570**	**41,045**	**9,903**	**47,991**	**12,175**	**2,265**	**11,169**

Table 52 reveals that out of the total households (289,452) of the district, in all 113,473 (39.3 per cent) could avail banking services at district level while 118,821 (41.1), 88,151 (30.5), 17,365 (6.0), 197,710 (68.3), 26,568 (9.0), and 5,788 (2.0 per cent) enjoyed the availability of household assets radio/transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively whereas only 57,484 (19.9 per cent) had none of the specified assets.

It also reveals that at tahsil levels a highest proportion of 45.3 per cent of households (19,832) were availing banking services in Milak tahsil. The highest of none of specified assets 14,025 (31.2) households is in the tahsil Shahabad. The lowest of 15,379 households was observed availing banking services and 17,316 household radio/transistor asset in Shahabad tahsil while the rest of the household assets were at the lowest level being availed in Shahabad tahsil and the number of households of the enjoyers of none of the specified assets was 13,338 in Rampur tahsil.19,832 households in Milak tahsil followed by 16,119 in Bilaspur tahsil were having banking services and the number of households having all other available assets was higher in tahsil Suar than the tahsil Shahabad and Rampur except in the case of none of the specified assets being reverse.

(xi) Major social and cultural events, natural and administrative developments and significant activities during the decade

During the last ten years no significant social, cultural and administrative events took place in the district. A gradual transformation of society and public awareness through literacy, communication, social, economic and political activity has occurred at all level of society, but the district still preserves its own old culture. There is no change in the administrative front.

(xii) Brief description of Places ofReligious Historical, Archaeological importance in villages and Places of Tourist Interest in the towns of the district:

In very early times the region was known as Uttara Panchala or simply Panchala. Since tenth century AD it was called by the name Katehr. The past history of the district, has been intimately connected with Panchala, Katehr, Rohilkhand and the Rampur state. No archaeological survey, exploration or excavation has been carried out in the district and ancient monuments and antiquities, if any, were almost wiped out during the Rohilla domination of two hundred years or so. The last of the Nawabs of Rampur state under British rule was Mohammad Raza Ali Khan. He took great pain to streamline the administration, initiated reforms and enforced progressive policies. There are few places of tourist importance presented below.

Aimi – The village is included in the Khaariy nyaya panchayat circle of the Milak development block. It possesses two old buildings, shrine of a sati and the temple of Jwala Devi where small gatherings take place on several occasions in the year.

Ajitpur – It is one of the oldest villages of the district. It is said to have been founded by Raja Ajit Singh, an Ahir, about 850 years ago. The village flourished during the reign of Garab Singh the successor of Ajit Singh. The only remains to witness its vanished greatness are the ruins of an old buildings lying outside the village.

Bhamraua – Bhamraua an old village is located in south-east of Rampur. It was originally held by the Tagas who were driven out by the Sheikhs during the early Muslims period. The place contains an old temple of Shiva, where fairs are regularly held in the month of Sravana and on the occasion of Shivratri.

Bilaspur – Bilaspur is the headquarters of the tahsil which it gives its name. In ancient days there existed the town of Rajpur, the capital of Hindu Raja. On the down fall of the Raja, a Thakur Bilasi Singh, is said to have founded Bilaspur near the old town of Rajpur. Among ancient buildings there is an old fort now occupied by the tahsil. Other importnat buildings are the Mausoleum of Saiyid Mian near the Sarai of Imam Tarab Ali Shah, and the Tombs of Mian Sadiq Shah and Mian Bad-ud-din. The remains of a Sati Shrine, said to have been built by Sardar Daud Khan, the Rohila Chieftain in memory of Raja Khem Karan and his widow who burnt herself alive after the death of her husband.

Keorar – The village owes its origin to one Pande Dargahi Mal, who is said to have founded it. It contains an old temple dedicated to Mahadeo. A considerable trade in cattle is carried on at the market place.

Lalpur – The village of Lalpur is situated on the right bank of Kosi river, at a distance of about 11 km. north of Rampur. Near the village a masonry weir has been constructed over the Kosi river which forms the head work of the Kosi canal. The weir wall itself consists of 16 bays and provided with shutters to control the supply of water in the canal. The weir has extended irrigation facilities to a large area.

Rampur – Rampur is the district headquarters. It is said that in ancient days on the site now occupied by the town, there was a group of four villages, which was called Rampur after Raja Ram Singh of Katehr. The present town was founded by nawab Faizullah Khan. He also built the fort in the town. Inside the fort, the Hamid Manzil with the La Touche Hall, the Rang Mahal, The Machchhi Bhawan

Palace, the Mahal Sarai and the Imambara were rebuilt during the reign of Hamid Ali Khan. The fine wall surrounding the fort is pierced by two gates, known as the Hamid and Wright gates with six minarates. Each of them was mounted with a gun in the Nawab's days.

Rathaunda – Rathaunda, small village is situated about 8 km. north of Milak. It is known for an old temple of Shiva, where a large fair is held on the occasion of Shivratri.

(xiii) Major Characteristics and Contribution of the District :

The district has been one of the centre of Islamic culture and accredited to produce urdu poets and persons of repute in every walk of life. Rampur estate continued till British rule in India. The major part of the district is depended upon agriculture. More than 73 percent population live in rural areas. Recently the state Government has taken a decision to establish an Urdu University in Rampur in order to preserve Islamic culture education and tradition.

(xiv) Scope of Village Directory and Town Directory Column Heading wise Explanation and Coverage of Data

Village Directory :

The village directory, as the title connotes, presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rationale of giving 2001 location codes along with 1991 location codes is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufactured	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been adopted:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration, are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement, a note is given against such towns that there are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999 and trade, commerce, industry and banking activities in year 1999. In this way, population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, Manufactured cinemas etc. and number of banks as well as commodities and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY (Section I - II)

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

(a) Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital Ayurvedic Hospital Unani Hospital Homeopathic Hospital	H HA HU HHom
(ii)	Allopathic Dispensary Ayurvedic Dispensary Unani Dispensary Homeopathic Dispensary	D DA DU DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the

distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)(vi)	Navigable CanalNavigable waterways other than River,Canal	NC,NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any Newspaper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block

wise of the district.

Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	The appendix shows the list of villages according to proportion of the
Appendix-VII B	Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

APPENDIX VIII

NUMBER OF VILLAGES UNDER EACH GRAM PANCHYAT (C.D. BLOCK WISE)

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total SC population	Total ST population	Income and expenditure of Gram panchayat (in Rs.'000)	
			Number of villages with location code numbers	Location code					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttar Pradesh due to certain reasons.

APPENDIX - IX

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Name of District	Name of C.D. Block	Location Code Number	Name of Village	No. of Girls School
1	2	3	4	5
Information not available for this district				

SECTION II
TOWN DIRECTORY

Town Directory

(a) Note explaining the abbreviations used in Town Directory :

A. Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Cor/NN
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB/NPP
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

B. Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

C. Statement III

Municipal Finance 1998 -1999

Item-wise amount of receipt and expenditure in

thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

D. Statement IV

Civic and Other amenities,1999

Column (1 to 6) : Self explanatory.

Column (7) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

E. Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning

centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the

number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 :Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

F. Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

G. Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART - B
PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/ Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA),

headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important feature of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at

different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, then portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The

difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure I - VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Rampur
q1	Persons	99	101
	Males	98	84
	Females	104	134
q2	Persons	117	128
	Males	117	109
	Females	118	124
q5	Persons	134	137
	Males	135	124
	Females	132	150

The child mortality by ages 1, 2 and 5 years was lower for males in the district as against the State, while child mortility was higher for females in the ages 1, 2 and 5 thus child mortality indicators in the district for male shows lower order as compared to the State.

Annexure – III

Various Measures of Fertility and Mean age at Marriage – 1991

Serial No.	Fertility Index	Person Male Female	Uttar Pradesh	Rampur
1	2		3	4
1	CBR		37.2	36.9
2	TFR		5.6	5.9
3	TMFR		6.3	7.1
4	GFR		172	178
5	GMFR		200	225
6	Mean age at Marriage (1981-91)		17.3	18.4
7	No. of Children born per ever married woman aged 45-49 years		4.6	5.1
8	Child woman ratio 0-4		631	731
	Child woman ratio 5-9		752	812

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 36.9 per cent in the district. It is below to the state of Uttar Pradesh i.e. of 37.2 per cent. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate(GMFR), the district presents all along a slightly higher proportion from the state figures. The conclusion that may be drawn is higher fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3 years for the state whereas 18.4 years has been observed for the district. It may be observed that higher age at marriage leads to high rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever-married women in the age group 45-49. The state and the district figures are placed as 4.6 and 5.1 per cent respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 731 and 812 for the district while in case of the state the corresponding figures are 631 and 752. The various measure of fertility presents that fertility levels is much high than the state average.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 77.8 percent in 1991, while in 2001 it was 72.1 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 16.6 percent and 24.1 percent respectively. This shows in-migration from other states to this district was higher in 2001 in comparison to 1991. At district level in-migration from other countries was 5.6 percent in 1991 and 3.8 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 82.0 percent and 72.1 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 16.7 percent and 26.7 percent respectively. The movement of population from other countries in the district was 1.3 percent in 1991 and 1.2 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 47.9 percent in 1991 and 47.1 percent in 2001, while Muslim were 48.0 percent in 1991 and 49.1 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 60.1 percent male and 52.4 percent female to 62.4 percent male and 55.6 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. In the district percentage of married male 37.3 married female 43.6 in 1991 and in 2001 male 35.5 and female 40.0 percent. Percentage of married male was 37.3 percent and female was 43.6 percent in 1991 and in 2001 it was 35.5 percent male and 40.1 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.0 percent male and 4.2 percent female while it was 2.6 percent male and 4.0 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 73.3 percent male and 88.2 percent female in 1991 which declined to 61.6 percent male and 78.0 percent female in 2001. Primary level education was 7.0 percent male and 3.3 percent female in 1991, which was 11.7 percent male and 6.6 percent female in 2001. Middle level education was 7.0 percent male and 2.4 percent female in 1991 and 9.3 percent male and 3.8 percent female in 2001. Matriculation and above level of education was achieved by 7.9 percent male and 3.0 percent female in 1991 which was 10.2 percent male and 5.6 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note - For the state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02 per cent. The remaining mother tongues have been merged in the column of 'Total of other mother tongue.'

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001) at state level. This trend is visible for the district as well. The district reported Hindi as mother tongue for 57.1 percent person in 1991 and 62.7 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent in 2001 at the state level whereas 38.5 percent and 33.3 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
