UTTAR PRADESH

DISTRICT JYOTIBA PHULE NAGAR

Area (Sq.km.)	2,249.00
Population	1,499,068
Number of Tahsils	3
Number of Vikas Khand	6
Number of Towns	8
Number of Villages	1,124

J – PART OF JOYA VIKAS KHAND
A – PART OF AMROHA VIKAS KHAND

NOTE – VIKAS KHAND ASMAULI IS SPREAD OVER IN TWO DISTRICTS NAMELY JYOTIBA PHULE NAGAR & MORADABAD.

BOUNDARY, DISTRICT
" TAHSIL
" VIKAS KHAND

HEADQUARTERS: DISTRICT, TAHSIL, VIKAS KHAND

NATIONAL HIGHWAY — NH 24

STATE HIGHWAY — SH 77

IMPORTANT METALLED ROAD

RAILWAY LINE: BROAD GAUGE

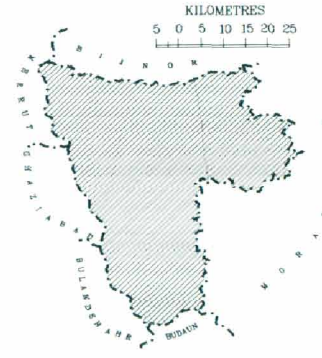

RIVER AND STREAM

VILLAGE HAVING 5000 AND ABOVE POPULATION WITH NAME — Adampur

TOWNS WITH POPULATION SIZE AND CLASS I, II, III, IV

DEGREE COLLEGE, TECHNICAL INSTITUTION

DISTRICT JYOTIBA PHULE NAGAR
(NEWLY CREATED)
CHANGE IN JURISDICTION 1991–2001

AREA GAINED FROM DISTRICT MORADABAD

MOTIF

MAZAR OF VILAYAT SHAH AND BASUDEO TEMPLE

Asymbolic of Hindu-Muslim unity, the district Jyotiba Phule Nagar is popularly known by the simultaneous existence of two religious places i.e. Dargah of Hazrat Vilayat Shah and pilgrim centre of Basudeo. Hazrat Vilayat Shah was born in Arab during 1236 and settled to this place in the year 1272. By tradition, it is believed that even snakes and scorpions became poison-less while they rattled around this place. Thousands of Hindus and Muslims gather here to pay their respect round the year. The temple of Shri Basudeo ji is primitive one and historical legends trace it since the period of "Ibne Batuta". This is one of the sacred places of worship of Meera ji. During the month of August/September devotees from various places visit the place. This pilgrim centre is unique example of national unity and religious harmony.

Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991Census 612
Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 613
Annexure VI Marital status of population as per 1991 Census 615
Annexure VII Age, Sex and Education in the district, 1991 Census 619
Annexure VIII Distribution of different mother tongues returned in 1991 Census 621

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of

all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri

New Delhi

Registrar General &
Census Commissioner, India

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and their team of dedicated workers deserves all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Jyotiba Phule Nagar ranks 54th in terms of population in the state.
2. The percentage share of urban population in the district is 24.6 as against 20.8 of the population in urban areas of the state.
3. J.P Nagar district has population density of 667 persons per sq. km., which is less than the state average 690 persons per sq. km.
4. J.P Nagar district ranks 31st in terms of sex ratio i.e. 885 which is lower than the state average of 898 females for one thousand males.
5. J.P Nagar district ranks 52nd in literacy 49.5 percent which is below than the state average of 56.3 percent.
6. There are only 184 uninhabited villages out of total 1124 villages in the district.
7. Decadal growth rate of the district 29.7 per cent is higher than the state average of 25.8 per cent.
8. Amroha tahsil has the highest number (361) of inhabited villages while Dhanaura tahsil has the lowest number (285) of inhabited villages.
9. The district has eight towns. Neither any new town was added nor any town had been declassified after 1991 census.
10. There are 227569 households in the district accounting for 0.9 percent of the total households in the state. The average size of households in the district is 6.6 persons.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs arefully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District :

District Jyotiba Phule Nagar has been created by state Government on 15th April 1997 with its headquarters at Amroha Nagar Palika Parishad. The district is comprisd of erstwhile three tahsils viz Amroha, Dhanaura and Hasanpur of district Moradabad. The district is named after Jyotiba Phule a dalit and social reformer.

In the historical perspective, the present area of the district refers to be a part of kingdom of North Panchala Desh with its capital at Ahichhatra, presently situated in Bareilly district. It is said that during the reign of Mughal emperor Shah Jahan, the governor of Sambhal, Rustam Khan built a fort and compelled traders and agriculturists to settle around it. In ancient time Panchal rulers, who then held dominance over this region were thrown out by the Kurus of Hastinapur but subsequently towards the middle of fourth century BC the entire Panchala region, including this district, was annexed to Nanda empire and continued as such for a quarter of a century. Later before they were also overpowered by Maurya Empire. The Mauryas ruled over this region for the next century and a half. After the downfall of Kushans, Nanda dynasty also occupied this region but they were subdued

by Samudra Gupta. The dominance of Gupta empire over this region, remained for the next two centuries and then the district came under the control of Mukhari kings of Kannauj after the downfall of Gupta empire and thereafter it remained under the reign of Harsha, during 606 to 647 A.D. After the death of Harsha, as in the whole of the northern region, in this district also, anarchy and confusion prevailed for quite sometime. However, at later stages, Tomars and Clans of Gahadvala's also ruled over this region. Again after the defeat of valiant King Prithvi Raj and later Jai Chandra at the hands of Shahab-ud-din Gauri, there was a state of confusion and lawlessness. Ultimately, Katehriyas, Bargujars, Gaurs, Tomars and some other clans of Rajputs united together with the sole objective of facing Muslim invasion and they continued their efforts for quite some, even after the establishment of Muslim outposts in some parts of the district. The Mughal invasion however, succeeded lateron when Babar became King of Delhi in 1526. After the accession of Humayun to the throne, the region was captured by Afghans under the leadership of Sher Shah for a shortwhile but again during the reign of Akbar, the district became part of Sarkar of Sambhal. Rohillas also held their dominance in this region from time to time and Marathas too invaded this region quite frequently but were driven away by Shuja-ud-daula's troops. On May 13,1857 when news of struggle for independence broke out, people in this district did not lag behind in joining freedom struggle. In fact, freedom fighters in this district formed their own government. Lateron in 1930, the civil disobedience movement launched by Gandhi ji and Quit India Movement in 1942 got strong support from the local populace and both Hindus and Muslims marched together for the cause of country's independence.

(iii) Administrative Setup:

As mentioned earlier, Jyotiba Phule Nagar district was created on 15th April, 1997. Before becoming a separate district, it was part of Moradabad district. This district was created by carving out three tahsils viz Amroha, Dhanaura and Hasanpur from district Moradabad. The district is further divided into seven Community Development Blocks, 484 Gram Sabhas and 8 Towns. There are 1124 revenue villages, out of which 940 are inhabited and 184 uninhabited.

Jurisdictional Changes (1991-2001)

For creating Jyotiba Phule Nagar district, three tahsils and eight Towns were carved out from Moradabad district as presented in the table given below:

Name of district/tahsil	Notifieation Number	Added/Declasified
1	2	3
Jyotiba Phule Nagar		
Amroha Tahsil	107/1-5/97-224 from 78-R-5/97 date 15/04/94	(1) 12 villages transferred Sambhal tahsil of Moradabad. (11) 398 villages and 3 townstransferred from Moradabad district.
Dhananra Tahsil		Entire tahsil and 3 towns transferred from Moradabad district.
Hasanpur Tahsil		Entire tahsil and 2 towns transferred from Moradabad

District Administration

District administration is composed of District Magistrate, Additional District Magistrate, Sub Divisional Magistrate, of District Judge, Superintendent of Police, Chief Development officer, District Developmetn officer, Assistant District Development Officer, Chief Medical Officer, treasury Officer, District rural Development Authority, District Inspector of Schools, Regional Tourist Officer, District Employment officer, District Horticulture Officer, District Information Officer, (NIC, Government of India), District Information Officer (State Gpovernment), General Manager (District Industry Centre), District Election Officer, District Public Relation Officer, District Economic and statistics Officer, Assistant Director Small Industries, District Forest Officer, District Forest Officer Soil Conservation, DFO Lodging, Additional Forest Conservator (Forest Division), Commandant (Home Guards), Executive Engineer (Jal Nigam), Executive Engineer (Electricity Distribution Division), Superintending Engineer (Public works Department),

Executive Engineer (Rural Engineering Services), Executive Engineer (Irrigation), Executive Engineer (Mandi Parishad) etc.

(iv) Physical Features:

(1) Location and Size

Jyotiba Phule Nagar is smallest district of Moradabad division in respect of area, and population. It is situated between 28°20' and 29°16' north latitude and 78°4'' and 79°6'' east longitude. It is bounded by districts Bijnor in north, Budaun and Moradabad in south and district Moradabad in east. River Ganga separates this district from districts Meerut, Ghaziabad and BulandShahr in the west. The height of the district is about 200m above the sea level. Total area of the district is 2,249 sq kms.

(2) Physiography:

Jyotiba Phule Nagar is a part of Northern Upper Ganga Plain. On the basis of geology, soils, topography, climate and natural vegetation, the district is divided into the following sub-micro regions.

Amroha Plains

The region is a flat plain with little physiographic variation. It covers major part of Amroha, Hasanpur and Dhanaura tahsils and portions of Moradabad, Chandausi and Bilari tahsils. Contour mark 200 metres makes its southern boundary. The slope is gentle and towards south. North-Eastern part is comparatively higher. Sot and Ban are the main tributaries draining the area. Sot joins the Ganga beyond this region whereas Ban is rivulet of the Ramganga. Geologically, the region belongs to Alluvium and Dun Gravels (Recent). Plantation belt around Amroha town is quite extensive. Ramganga canal system serves irrigational requirements of this belt. The region is most developed in the field of agriculture and industries.

Ganga Khadars:

Ganga Khadars is spread over along the Ganga river in north-south direction in Dhanaura and Hasanpur tahsils and is brone to floods. The slope is very gentle and parallel to the flow direction of the Ganga river. There are number of depressions, small rivulet bluffs and dead arms of the river etc. Contour of 200 metres marks roughly the eastern limit of the region. There are numerous small streams originating from local depressions and after flowing some distance parallel to the Ganga, join it again and most of them are non-perennial.Geologically , the region belongs to Alluvium and Dun gravels(Recent), Areas along the Ganga river are not developed in terms of transport, agriculture and settlements. It is a sparsely populated belt.

(3) Drainage:

The district is drained by two prominent rivers Ganga and Ramganga and their tributaries. Sot and Ban are the main tributaries draining the area. Sot joins the Ganga beyond this region whereas Ban is rivulet of the Ramganga.

(4) Climate:

The climate of the district is characterised by a hot and dry summer and a bracing winter. The cold season begins from around the middle of November and ends by February.It is followed by summer from March to around middle of June. The period from middle of June to the end of September is the south-west monsoon season. October and the first half of November constitute the post-monsoon season. The cold weather lasts longer and the temperature in summer does not reach the high levels obtained in the adjoining districts. In the winter, the climate is distinctly cold and moist because the general level of the area is low and is in the proximity of the tarai region.

The normal rainfall, according to statistical magazine of the year 1999-2000, was 1997 mm and the actual rainfall being 1159 mm. Floods is the regular feature of the Ganga river and affects some villages of tahsil Hasanpur.

(5) Natural and Economic Resources

Forestry

Khadars of the Ganga and Ramganga are mostly covered with Jhau and Dhak Jungles. The chief species of trees found in other regions of the district are mainly Jamun, Shisham, and Siras. Kaans is found in abundance in tahsil Hasanpur of the district, which is used for making ban, ropes, mats and stools. The fauna of the district is considerably varied. Tigers and leopards have now become rare. Other animals commonly found are the spotted deer, wild bear, wild cat and hogdeer. The jackals, monkeys, common mongoose, squirrels, porcupines, foxes and hare are found throughout the district.

Among the game birds, the most common are quail, little brown dove, spotted dove, common green pigeon, red jungle fowl, black patridges, gray patridges and red turtle dove. Quails appear in abundance during the Rabi and Kharif crops. Snakes are found throughout the district, the chief being cobra, krait, Russels viper or necklace snake or viper, rat-snake and the lesser viper. The ghariyal and magar, which were formerly found in the Ramganga river, have now become extinct, partly as a result of indiscriminate shooting and partly due to the silting up of the bed of the river.

Minerals and Mining:

No mineral occurrences have been reported from the district. Kankar is found in some of the areas of tahsil Hasanpur which is used in construction of buildings and roads. Sand is found in the barren lands of tahsil Hasanpur, which contains salt of sodium carbonate and Magnesium.

Soil

The district has plain level and fertile tract of land with adequate supply of water from Ganga river and its rivulets, lakes and jhils. According to general classification, the soils found in the district are domat, and bhur. The bhur region comes after the Khadars region of Ganga river and has domat type of soil in the southern part of the district, which spreds over to 650 sq kms. The soil is fertile. The north central part of the district, spreding over to 350 sq kms is stony bhur region above Khadars region of Ganga river has fertile domat type of soil.

Land and Land use Pattern:

Land use pattern as recorded in statistical Magazine 2001 indicates that out of the total reported area of 246.85 thousand hectares of the district, forest covered 5.10 percent,usar and uncultivable land 1.37 percent. Land use other than agriculture was 8.36 percent, present fallow 3.36 percent, other fallow 1.14 percent, usar land 3.35 percent, orchards 0.52 percent and grazing land 0.11 percent and net area sown was 76.71 percent. Most of the forests are in tahsil Dhanaura and Hasanpur of the district.

Agriculture and Crop Pattern:

The economy of the district is predominantly agricultural as greater part of the working force is engaged as cultivators and agricultural laboures. Kharif and Rabi are the two main harvests grown in the district.Wheat occupies the predominant place (94,076 hectares) followed by paddy (29,189 hectares)both in terms of area and production. Sugarcane is the most important commercial crop in the district grown in 68,202 hectares and average production being 595.72 quintals during 2001-02. Other main Kharif crops of the district are Arhar, Urd, Moong. After the Kharif harvest, in the middle of September, the fields are prepared for the Rabi crop of which wheat is the most important. It is grown in all tahsils of the district. It is cultivated separately as well as mixed with other crops like barley, Gram, pea, and mustard. The harvesting commences in the later half of March

and continues throughout April.

The main non-food crops of the district are suger-cane, oil- seeds, ground- nut, potato, onion, garlic and other vegetables and fruits, sun-hemp and tobacco. Sugar-cane was sown in 68,202 hectares, potato was sown in a seizeable area which in 2001-02 was 3,711 hectares.

Irrigation:

Rivers and streams for a long time, have been in use in the district for purpose of irrigation, but the beginning of the present century saw completion of a good number of canal schemes which have provided an additional and more rebrone source of irrigation to the cultivators in the area comprising the present district. According to statistical magazine, the net irrigated area was 223,496 hectares. Of this nearly 223,493 hectares was irrigated by tube wells including government and private tube wells, and only 3 hectares by canal. A canal network of 53 kms is available in the district.

Animal Husbandry:

Animal husbandry is an integral part of rural economy providing drought power and manures to small and marginal farmers as well as milk and milk products, meat, eggs, etc. to protein starved people, As per live-stock census of 1997, the district had 667,025 animals out of which 184,475 were cows, 389,976 buffaloes, 2,323 sheep, 71,913 goats, 2,059 horses and ponies, 15,165 pigs and 1,114 other animals. To look after these animals and improving the breeds of cows, buffaloes and calves, there are 56 veterinary hospitals in the district along with 56 artificial insemination centres, and 117 sub centers, 183 live-stock development centres and 12 breeding farms during 2002-03.

Fishery:

The rivers, streams and ponds of the district abound in varieties of fish, chief of which are rohu, lanchi, kerrel, sanwal, bhur, and bazaria.Fishing with hook and line is sometimes seen,but the usual implements used for catching fish are common casting-net of cotton or hemp thread, various kinds of dragnet the tappar or net fixed on the bottom of a bamboo frame and used in shallow waters and the karcha or conical basket open at both ends. As much as 6,672 thousand fingerlings were suppliedto gram panchayats and private traders under the small water scheme in the year 2002-03.

Industry

The district has been industrially backward. Yet the industrial development has caught on with the expansion of traditional handicrafts and small scale industries, the products of which not only enjoy the countrywide market but are also exported abroad. One of the most important industry found in Amroha is manufacture of wooden toys and artistic furniture. Gajraula had been declared as industrial area in the district and U.P. Industrial Development Corporation is working hard to accelerate the pace of Industrial Development of the district.

Trade and Commerce:

Prosperity of an area largely depends upon the volume of trade at that place.In rural areas, Khadi and village industries play an important role in the development of the district. It manufactures ban, shoes, bricks, earthern ware and dari etc. The district has numerous trade centres for these items.

Transport:

The district is well connected by rail and road transport. There are 12 railway stations in the district out of which 10 are in rural areas. The length of railway lines passing through the district is 53 kms. Total length of roads in the district under Public Works Department is 951 kms, national highways 103 kms, state highways 57 kms, main roads of the district 180 kms. district rural roads 611 kms, roads under Local bodies 352 kms and roads under other departments are 82 kms during 2001-02. The ratio of

roads per 1000 sq kms. was 564.59 kms. in the year 1999. During the period, the ratio of road length per lakh population was 104.95 kms. Means of road transport available in the district are State Road Transport Corporation buses and private buses, taxis, jeeps, trucks etc. Number of bus stations and bus stops were 58 during 2002-03.

Electricity and Power:

Electricity plays an important role in the economic development. By the end of the year 2002-2003, all the towns of the district had electricity and in rural areas 913 villages out of 948 inhabited villages had power supply which is about 99.13 percent. Total consumption of electricity during 2001-02 was 217730 kwh. Largest consumption of electricity was in agriculture sector which consumed 121,210 kwh (55.67 percent) followed by industrial sector 41,930 kwh (19.26 percent), domestic sector 41,040 kwh (18.85 percent), commercial sector 8,840 kwh (4.06 percent) and public lighting 2,900 Kwh (1.33 percent). Non-conventional energy sources which are being promoted and popularized in the district are gas plants, solar energy and wind power. Government is providing subsidies for establishment of such plants to lessen the burden on conventional energy sources .

Gram Panchayat, its Composition, Jurisdiction and role in village Development:

In the strengthened Panchayat Raj system, Gram Panchayats play a pivotal role in the Development of village economy. A total of 484 Gram Sabhas exist in the district. Gram Sabha prepares master plan and developmental activities for implementation. The jurisdiction of Gram sabha is mainly concentrated within the village. Elections are periodically held to elect members and Pradhan of Gram sabha. As many as seventeen departments have been attached to Gram Sabha in order to ensure that the benefits of government programmes may reach the common people. Gram Sabhas in the district control and manage all the activities concerned with the welfare of village community. Gram Panchayats also prepare priority development plans for the overall growth of the village dwellers. Members of Gram Sabha are responsible for day to day administration. The main duties of the Gram Sabha relate to construction, repair, cleaning and lighting of fairs, establishment and management of common land and grazing grounds, maintenance of schools etc. and promotion of social and communal harmony and goodwill amongst the villagers.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo,

plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such

building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the

Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	37	Gual
2	Badhik	38	Habura
3	Badi	39	Hari
4	Baheliya	40	Hela
5	Baiga	41	Kalabaz
6	Baiswar	42	Kanjar

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as

'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water

are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman

of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2

(200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population.Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution:

The total population of the district is 14,99,068 in which 1,130,881 live in rural and rest 368,187 in urban parts of the disttict. There are three tahsils in district namely Dhanaura, Amroha and Hasanpur which are sans urban population. The most populous tahsil is Amroha followed by Hasanpur while Dhanaura is least populated tahsil. The urban population in the district is 24.6 percent. The urban population is maximum at 32.1 percent in Amroha tahsil. There are 1,124 revenue Villages as 184 are un-inhabited. The total rural population of 1,130,881 is spread over 07 CD blocks and 940 inhabited villages. The most populous CD Block is Joya with a population of 250,477 with the maximum number of inhabited villages (201) More than (584) half of populated villages have a population in the size of 500-999 and 1,000-1999 and such villages form as high as 62.1 percent of total populated villages. Although the population density in the rural district is 516 highest proportion (55.3) percentof villages are with a population density range of 501+ per square kilometer. Such villages contain as much as 73.4 percent of total rural population.

Size-class and status of towns:

In the total urban population of 368,187 of the district, Amroha with a population of 165,129 is the biggest town and second biggest in Hasanpur with a population of 53,326. The former is Class I & the latter is class II town. Hower, both are having the civic status of Nagar Palika Parishad (NPP). Two other towns with NPP status are Dhanaura and Bachhraon (NPP). These are class III towns. Rest four towns are Nagar Panchayat (N.P.) of which two towns are class III, and two towns are class IV. There is no class V & VI town in the district. Dhanaura tahsil contains 3 class III towns, Amroha tahsil has also three towns each with class I, III and IV status, while Hasanpur tahsil has only two towns. One class II and the other class IV.

Population growth:

At the present territorial jurisdication the population of the district was 1,155,742 at 1991 Census and growing by 29.7 percent during the decade 1991-2001 it is 14,99,068 at 2001 Census. The decadal growth at 29.7 percent in the district has been higher than in the state at 25.8 percent.

Population Density:

The district has area of 2,249 square kilometer. The population density in the district is 667 In the rural areas of the district the density is 516.

Sex-Ratio:

The sex-ratio in the district at 885 is way behind 898 at the state level. Indeed the sex-ratio at the district has been all along lower in the district as against the state's since 1901. As against urban areas of the district the sex-ratio is lower in rural areas. Among tahsils, highest sex-ratio is (888) in Amroha and lowest (880) in Hasanpur Among CD Blocks the sex-ratio is highest in Asmauli at 890 and lowest 865 in Gangeshwari. Out of 940 inhabited villages in the district there are 35.2

percent villages (with 40.9 percent of rural population) which are having a range of sex-ratio 850-899. In the urban parts of the district the sex-ratio is 899 and highest 928 in Ujhari and lowest 885 in Gajraula. The sex-ratio of population on the age-group 0-6 is 911 in the district which is lower than the state. As against a sex-ratio of 906 in the age-group 0-6 of rural population of the district, it is highest at 990 in Asmauli CD Block and lowest at 897 in Amroha and Gajraula CD Block. It may be noted that out of 940 inhabited villages in the district in 15.2 percent of villages with 18.7 percent of rural population the sex-ratio in the age-group 0-6 is between 850 and 899. As against the 0-6 age-group sex-ratio of 906 in the rural area of the district is only 928 in urban. Among towns this sex-ratio is highest at 991 in Ujhari and lowest at 853 in Dhanaura.

Work Participation Rate:

In the total population of the district of Jyotiba Phule Nagar as 31.9 percent are workers and rest of 68.1 percent are non-worker. Among workers 25.5 percent are main workers and 6.4 percent are marginal workers of total population. In absolute terms females are outnumbered by males as main workers and marginal workers as well. The extent of main workers is highest 26.4 percent in Amroha tahsil and lowest at 24.8 percent in Dhanaura tahsil. In case of marginal workers the population is highest in Amroha tahsil as 6.9 percent in comparsion to 5.9 percent in Dhanaura and 5.9 percent in Hasanpur tahsil. The extent of workers in rural parts and non-workers in urban parts is higher. In the district among workers 47.9 percent are cultivators and 28.6 percent other workers. 45.5 percent of female workers are engaged as cultivators.

Literacy:

In the district 49.5 percent population is literate. The literacy is 54.1 percent in urban areas and 47.9 percent in rural areas. The male literacy is 62.6 percent as against 34.6 percent female literacy, and therefore the gap in male/female literacy rate is 28.0 percentage points. In rural areas among seven CD Blocks, the highest literacy is 58.0 percent in Amroha and lowest at 29.9 percent in Gangeshwari. The literacy among males in rural areas is 62.8 percent in comparison to 30.8 percent among females. The lowest female literacy of 14.1 percent is in Gangeshwari CD Block. The gap in male/female literacy rate is highest in Dhanaura CD Block which is 33.5 percentage points. In 22.4 percent of villages covering 17.3 percent of rural population the literacy range is 61 to 70. Among urbanites in the district, 61.8 percent males are literates as against 45.5 percent females. The highest urban literacy is in Dhanaura. 69.2 percent and lowest in Ujhari at 34.3 percent. The maximum male literacy is found in Gajraula at 80.8 percent and lowest at 44.4 percent in Ujhari. The highest female literacy is also in Dhanaura at 57.8 percent and lowest at 23.3 percent also in Ujhari. Still, the maximum gap in male-female literacy rate at 26.7 percentage points is found in Joya. The literacy among Scheduled Castes in the countryside is 45.8 percent and 51.2 percent in towns. There is no percentage of literacy among Scheduled Tribes in rural of district. Whereas 15 Scheduled Tribe are found literate in the urban area of the district.

viii) Brief Analysis of Primary Census Abstract Data Based on inset Tables 1 to 36 :

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991	1991*		2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13

2	Amroha	NA	NA	NA	640,799	435,278	205,521	NA	NA	NA	NA	32.1
3	Hasanpur	NA	NA	NA	470,965	398,918	72,047	NA	NA	NA	NA	15.3
	District Total	**1,155,742**	**872,369**	**283,373**	**1,499,068**	**1,130,881**	**368,187**	**29.7**	**29.6**	**29.9**	**24.5**	**24.6**

* 1991 census population for tahsils have not been recasted.

The growth rates of each tahsil in Jyotiba Phule Nagar district for total, rural and urban areas and percentage of urban population to total population are given in table 1. The decadal growth rate of the district is 29.7 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 29.6 and 29.9 per cent respectively. Out of the total population of the district 75.4 per cent live in rural areas while 24.6 per cent live in urban areas of the district. The proportion of urban population has slightly increased during the decade from 24.5 per cent in 1991 to 24.6 per cent in 2001 in the district. The highest growth of urban population is recorded in Amroha (32.1 per cent) and lowest is registered in Hasanpur tahsil (15.3 percent).

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

Table 2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 940 inhabited villages, 76 (8.1 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 141 villages having 15.0 per cent villages of the district while in the size class of 500-999 population claims 301 villages with 32.0 per cent of the total villages in the district. 283 villages (30.1 per cent) are in the size class of 1,000-1,999 and 125 villages (13.3 per cent) are in the size class of 2,000-4,999. There are 14 villages (1.5 per cent) in the district falling in the range of 5,000 to 9999 population. None of villages in the district fall in population range of 10,000 and above.

Table 3 : New Towns, Denotified, Declassified and Merged Towns in 2001 Census

Name of town

(a) New
- (i) Statutory town – NIL
- (ii) Census town - NIL

(b) Denotified - NIL
- (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
- (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
- (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified - Shahjahpur C.T.

(d) Wholly merged with other town(s) - NIL

Declassified means that the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	17	2.0	12,888	1 1
11-20	3	0.0	40	0.0
21-50	15	2.0	1,197	0.1
51-100	22	2.0	3,839	0.3
101-200	48	5.0	15,654	1.4
201-300	76	8.0	36,940	3.3
301-500	239	25.4	230,572	20.4
501 +	520	55.3	829,751	73.4
Not known	0	0.0	0	0.0
District Total	**940**	**100.0**	**1,130,881**	**100.0**

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 520 accounting for 55.3 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 73.4 per cent population. The lowest ranges of 0-10, 11-20, and 21-50 persons per sq. km. cover 35 villages (4.0 per cent). 239 villages (25.4 per cent) also have high density of 301-500 persons per sq. km. In the medium density range of 51-100, 101-200 and 201-300 persons account for 146 (15.0 per cent) of inhabited villages. Population covered under these density ranges is 5.0 per cent of rural population of the district.

Table 5 SexRatio of State and District1901-2001

Year	UTTAR PRADESH			JYOTIBA PHULE NAGAR		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	888	852	1,061
1911	916	922	866	868	837	1,014
1921	908	918	834	876	852	987
1931	903	916	813	867	846	961
1941	907	922	824	869	842	975
1951	908	922	827	879	864	941
1961	907	921	817	880	866	953
1971	876	884	826	846	834	906
1981	882	889	850	849	838	887
1991	876	879	864	860	851	890
2001	898	904	876	885	880	899

NOTE- SexRatio has been defined here as the number of females per 1000 males

As per 2001 Census sex-ratio of 885 females per 1,000 males has been recorded in the district against the state average of 898 The sex-ratio of the district was significantly low as compared to the state average figures from 1901 to 2001. The subsequent decades show declining trend from 1901 to 2001 and value remained below the state average. The lowest sex ratio of 846 females per 1000 males were recorded in the district during 1971 against the state average of 876. It is also observed that the proportion of females in rural areas is lower than that of urban areas in district, while it is higher in case of state.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Dhanaura	886	885	888
2	Amroha	888	882	902
3	Hasanpur	880	875	907
District Total		**885**	**880**	**899**

Table-6 gives sex-ratio for total, rural and urban areas at tahsil level as per 2001 census. There are 885 females for every thousand males in district. It becomes clear from the table that sex-ratio in urban areas is higher than that of rural areas. The sex-ratio among rural and urban population is 880 and 899 females respectively. The rural sex-ratio in the tahsils varies between 875 in Hasanpur tahsil and 885 females per 1,000 males in Dhanaura tahsil. The sex-ratio in Dhanaura. tahsil and Amroha tahsil is higher than district rural average (880). In urban areas the highest sex-ratio is recorded in Hasanpur (907) and the lowest is in Dhanaura (888).

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Amroha	879
2	Asmauli	890
3	Dhanaura	887
4	Joya	882
5	Gajraula	888
6	Hasanpur	880
7	Gangeshwari	865
District (Rural) Total		**880**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 880 females per 1,000 males. Among C.D. blocks the highest sex-ratio of 890 is found in Asmauli C.D. block and is followed by Gajaraula (888) while the lowest 865 is recorded in Gangeshwari C.D. block. The sex-ratios of four C.D. block are higher than the district rural average of 880 and in remaining two blocks, this value is below the district average whereas in Hasanpur C.D block it is equal to that of district.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	20	2.1	2,122	0.2
700-749	17	1.8	7,489	0.7
750-799	59	6.3	41,280	3.7
800-849	197	21.0	217,770	19.3
850-899	331	35.2	462,887	40.9
900-949	222	23.6	330,507	29.2
950-999	63	6.7	56,870	5.0
1000-1099	23	2.4	10,104	0.9
1100+	8	0.9	1,852	0.2
District Total	**940**	**100.0**	**1,130,881**	**100.0**
Sex ratio (Rural) for District		**880**		

Table 8 presents the distribution of villages by sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 331 accounting for 35.2 per cent of the total villages having maximum population of 40.9 per cent in the district, fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 900-949 which claims 222 villages (23.6 per cent) and 29.2 per cent population. The highest range of 1,100 and above claims 8 villages (0.9 per cent). This range shares only 0.2 per cent rural population of the district while in the sex-ratio range of 800-849, there are 197 villages (21.0 per cent). In remaining sex-ratio ranges of 1000-1099,950-999, 750-799, 700-749 and less than 700, the number of villages are 23 (2.4 per cent), 63 (6.7 per cent), 59 (6.3 per cent), 17 (1.8 per cent) and 20 (2.1 per cent) respectively. In these ranges, the percentage of population is comparatively low. It is observed from the above table that in majority of villages the sex-ratio is not favourable for females.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Amroha	NPP	899
2	Bachhraon	NPP	894
3	Dhanaura	NPP	887
4	Gajraula	NP	885
5	Hasanpur	NPP	900
6	Joya	NP	894
7	Naugawan Sadat	NP	919
8	Ujhari	NP	928
Sex ratio (Urban) for the district			**899**

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 899 females per 1,000 males. Among the 8 towns of the district the sex-ratio varies between 885 and 928. Ujhari N.P has the highest sex-ratio (928) while Gajraula N.P. has the lowest sex-ratio of 885 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Dhanaura	Total	77,070	40,597	36,473	898
		Rural	59,884	31,571	28,313	897
		Urban	17,186	9,026	8,160	904
2	Amroha	Total	122,791	64,055	58,736	917
		Rural	88,246	46,240	42,006	908
		Urban	34,545	17,815	16,730	939
3	Hasanpur	Total	102,384	53,519	48,865	913
		Rural	88,333	46,237	42,096	910
		Urban	14,051	7,282	6,769	930
	District Total	**Total**	**302,245**	**158,171**	**144,074**	**911**
		Rural	**236,463**	**124,048**	**112,415**	**906**
		Urban	**65,782**	**34,123**	**31,659**	**928**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group 0-6 is 302245 persons comprising 158171 males and 144074 females. The total sex-ratio in this age-group works out as 911 females for every one thousand males in the district. The proportion of females in urban areas is higher than that of rural areas. The sex-ratio in rural and urban areas comes 906 and 928 in this age-group respectively. The rural sex-ratio in tahsils varies between 897 in Dhanaura tahsil and 910 in Hasanpur tahsil. The sex-ratio of Amroha tahsil (908) and Hasanpur tahsil (910) are higher than district rural average (906). Dhanaura tahsil has lowest sex-ratio of 897 among the total rural population. In urban areas, the higher sex-ratio is recorded in Amroha urban (939) and the lowest is found in Dhanaura urban (904).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Amroha	38,492	20,286	18,206	897
2	Asmauli	4,582	2,302	2,280	990
3	Dhanaura	34,141	17,882	16,259	909
4	Joya	51,105	26,827	24,278	905
5	Gajraula	32,125	16,935	15,190	897
6	Hasanpur	37,575	19,683	17,892	909
7	Gangeshwari	38,443	20,133	18,310	909
	District (Rural) Total	**236,463**	**124,048**	**112,415**	**906**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 906 for the district (rural). The sex-ratio of C.D. block varies between 897 and 990. It is highest in Asmauli C.D. block i.e. 990 followed by 909 in Dhanaura, Hasanpur and Gangeshwari C.D. blocks and lowest 897 females each is found in both Amroha and Gajraula C.D. blocks. The sex-ratio of 4 C.D. blocks is higher than the district rural (906) while in remaining 3 CD blocks, it is below the district average.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	107	11.4	7,147	3.0
700-749	57	6.1	11,701	4.9
750-799	76	8.1	14,502	6.1
800-849	107	11.4	32,367	13.7
850-899	143	15.2	44,222	18.7
900-949	124	13.2	44,840	19.0
950-999	85	9.0	28,587	12.1
1000-1099	150	16.0	38,663	16.4
1100+	91	9.7	14,434	6.1
District (Rural) Total	**940**	**100.0**	**236,463**	**100.0**
Sex ratio (Rural) for District		**906**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 150 (16.0 per cent) having population 38663 (16.4 per cent) in the district (rural) fall in the sex-ratio range of 1000-1099 females per 1,000 males in age group of 0-6 years. It is followed by the sex-ratio range of 850-899 which claims 143 villages (15.2 per cent) and 18.7 per cent population. Next to it, are 124 villages (13.2 per cent) in the range of 900-949 with 19.0 per cent population. 107 villages (11.4 per cent) having 13.7 per cent population fall in sex-ratio range of 800-849. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, 950-999 and 1100+ claim less number of villages and these are distributed as 107 (11.4 per cent), 57 (6.1 per cent), 76 (8.1 per cent), 85 (9.0 per cent) and 91 (9.7 per cent) respectively. In these ranges, the percentage of population is also low.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA/ Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Amroha	NPP	26,677	13,777	12,900	936
2	Bachhraon	NPP	5,103	2,662	2,441	917
3	Dhanaura	NPP	4,285	2,313	1,972	853

District(Urban) Total			**65,782**	**34,123**	**31,659**	**928**

Table 13 gives sex ratio of the population in the age group 0-6 in respect of towns of the district. The sex ratio of 6 towns is more than 900, while in two towns it is 853 and 877 i.e. Dhanaura NPP and Joya NP respectively. The sex-ratio in all eight towns varies between 853 in Dhanaura NPP and 1991 in Ujhari NP.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,499,068 total population of the district, 17.3 per cent of the total population belong to the Scheduled Castes and zero per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 19.8 per cent in rural population and 9.5 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Dhanaura tahsil (21.1) while the lowest is found in Amroha tahsil (14.6). The proportion of Scheduled Tribes population is zero per cent in rural as well as urban areas.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Amroha	197,741	33,653	0	17.0	0.0
2	Asmauli	19,820	2,931	0	14.8	0.0

7	Gangeshwari	172,108	36,090	0	21.0	0.0
	District (Rural) Total	**1,130,881**	**224,020**	**1**	**19.8**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 19.8 per cent of rural population of the district belongs to Scheduled Castes and Zero per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 14.8 per cent in Asmauli and 23.3 per cent in Dhanaura C.D. block. The other C.D. blocks containing the higher percentage of Scheduled Castes are Gangeshwari (21.0), Joya (20.5) and Gajraula (19.8). Dhanaura C.D block recorded just one person belonging to Scheduled Tribes.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	194	20 6	0	0 0

District Total	**940**	**100.0**	**224,020**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 194 villages accounting for 20.6 per cent of total 940 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 131 villages (13.9 per cent). In 106 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 168 villages constituting 17.9 per cent of the total villages. The ranges of 21-30 and 31-40 per cent contains 135 and 85 villages respectively. 18 villages fall in the range of 76 and above percent. The maximum 22.9 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5

6	Joya (NP)	13,326	1,157	5	8.7	0.0
7	Naugawan Sadat (NP)	27,066	1,269	0	4.7	0.0
8	Ujhari (NP)	18,721	1,804	0	9.6	0.0
District(Urban) Total		**368,187**	**34,837**	**23**	**9.5**	**0.0**

Table 18 shows population and percentage of Scheduled Castes and Scheduled Tribes recorded during 2001 census in the district. Table depicts that Scheduled Castes population in Dhanaura NPP (14.0 per cent) and Gajraula NP (23.6 percent) was substantial but very low (4.7 per cent) in Naugawan Sadat town. Scheduled Tribes population is negligible in the urban areas of the district. There are no Scheduled Tribes populations in five towns. Highest number (15) of Scheduled Tribes was recorded in Gajraula N.P.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Amroha	876	0
2	Asmauli	842	0
3	Dhanaura	893	0
4	Joya	872	0
5	Gajraula	900	0
6	Hasanpur	888	0
7	Gangeshwari	883	0
District (Rural) Total		**884**	**0**

Table 19 indicates sex ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 884 for district (rural). Among the C.D.blocks, the highest sex ratio of 900 is found in Gajraula C.D. block and lowest 842 females is recorded in Asmauli C.D. block. There is only one male Scheduled Tribes population in the rural areas of the district.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No	Name of U.A./ Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Amroha (NPP)	851	500
2	Bachhraon (NPP)	834	0
3	Dhanaura (NPP)	863	0
4	Gajraula (NP)	916	875
5	Hasanpur (NPP)	884	0
6	Joya (NP)	854	667
7	Naugawan Sadat (NP)	866	0
8	Ujhari (NP)	788	0
Sex ratio (Urban) for the district		**869**	**769**

Sex ratio for Scheduled Castes in the urban areas of the district is 869 which ranges between (916) in Gajraula NP and Ujhari NP (788). Among 8 towns, 6 towns have sex ratio lower than district average. Sex ratio among Scheduled Tribes population in the towns of the district is 769. Out of 3 towns that have recorded sex ratio, the highest (875) is in Gajraula NP and lowest (500) in Amroha NPP.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population comes to 49.5 per cent in the district. This proportion in rural area is 47.9 per cent against 54.1 per cent in urban areas. In the district the literacy rate of males (62.6 per cent) is much higher than that of females (34.6 per cent). Among the tahsils, Dhanaura tahsil tops with 56.2 per cent literates followed by Amroha tahsil (53.4 per cent). Hasanpur tahsil with 38.3 per cent literates stands at the bottom in the district. Out of 3 tahsils, the literacy rates of 2 tahsils are higher than that of district average. It is observed that in urban areas of the district, the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 28.0 percentage points in the district. The trend at tahsil level is not much different. However, thid gap in urban literacy is low which comes to 16.3 percentage points against the rural areas, where the gap between male and female literacy is 32.0 percentage points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Amroha	92,332	61,979	30,353	105,409	43,246	62,163	58.0	73.0	40.8	32.2

District (Rural) Total		**428,435**	**299,878**	**128,557**	**702,446**	**301,501**	**400,945**	**47.9**	**62.8**	**30.8**	**32.0**

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. As much as 47.9 per cent of the total rural population excluding the age group of 0-6 years are literate in the district. The corresponding proportion of male and female literates comes to 62.8 and 30.8 per cent respectively, which shows very wide gap of 32.0 percentage points in male and female literacy. At C.D. block level, Amroha C.D. block has the highest rural literacy rate of 58.0 per cent in which 73.0 per cent males and 40.8 per cent females are literate in this block. The lowest literacy rate in rural areas is noted in Gangeshwari C.D. block (29.9 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum gap of 33.5 percentage points is found in Dhanaura C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	9	1.0	4,732	0.4
11-20	43	4.6	52,686	4.7
21-30	85	9.0	141,217	12.5
31-40	102	10.9	162,756	14.4

71-80	110	11.7	60,036	5.3
81-90	15	1.6	4,849	0.4
91-99	3	0.3	491	0.0
100	1	0.1	8	0.0
District Total	**940**	**100.0**	**1,130,881**	**100.0**
Literacy rate for District		**49.5**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no village with illiterate population i.e. zero per cent literacy range. 191 villages accounting for 20.3 per cent of the total villages are in the literacy range of 51-60 per cent and 211 villages (22.4per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent is observed in 409 villages (43.6 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 129 villages (13.7per cent). The range of 51-70 have large number of 402villages forming 42.7 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urbanstatus of UA/Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates

8	Ujhari (NP)	5,014	3,395	1,619	13,707	6,315	7,392	34.3	44.4	23.3	21.2
District (Urban) Total		**163,621**	**98,725**	**64,896**	**204,566**	**95,124**	**109,442**	**54.1**	**61.8**	**45.5**	**16.3**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. With absolute figure of literates 71,227. Amroha town is way ahead of other towns. The table reveals that literacy rate is high in the urban areas of the district (54.1 per cent). The literacy rate is quite high (above 75.0 per cent) in two towns among males. Female literacy rate is not a behind in these two towns (above 55 per cent). However, literacy rate among females is very low (23.3 per cent) in Ujhari town , thus the gap in male-female literacy rate is high (21.1 percentage points)

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates

This table presents number and percentage of literates and illiterates among Scheduled Castes in C.D blocks by sex. The number of literates is less than illiterates in all C.D. Blocks. Literates constitute 45.8 per cent of population and there is a big gap of 36.0 percentage points between male and female literacy rate. The highest (53.7 per cent) literates are in Amroha C.D. Block as against lowest (30.1 per cent) in Gangeshwari C.D. Block. The gap in male/female literacy rate is highest (37.7 per cent) in Joya C.D. Block and lowest (31.4 per cent) in Gangeshwari C.D. Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in town at the 2001 census. The number of illiterates is more than literates in the district (urban). The percentage of literates is minimum (37.6) in Ujhari N.P among 8 towns and the gap in male/felmale literacy rate is also highest in this town. The males in all the 8 towns have higher literacy rate than females.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

Table 30 gives number and percentage of Scheduled Tribes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. There is small Scheduled Tribes population in the towns of the district. In five towns, there is no Scheduled Tribes population. In remaining three towns, which have Scheduled Tribes population, the percentage of literates is 78.9 per cent among them 100 per cent of males and 50.0 per cent of females are literate. The gap in male/female literacy in 3 towns is 50.0 percentage points.

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers works out to be 31.9 per cent of total population in the district. The total workers are comprised of 25.5 per cent of main workers and 6.4 per cent of marginal workers and the remaining 68.1 per cent are non-workers.

Among the main workers, males participation rate in the district is 43.2 per cent and 5.6 per cent of females. Male and female marginal workers account for 4.4 and 8.5 per cent respectively. The percentage of female marginal workers is higher than that of males. Total workers (main and marginal workers) among tahsils varies from 30.7 per cent in Dhanaura tahsil to 33.3 per cent in Amroha tahsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 1130881 total rural population of the district, 25.2 per cent has been categorized as main workers and the marginal workers constitute 7.5 per cent and the remaining 67.2 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 42.9 per cent males and 5.1 per cent females are in the category of main workers. Male and female marginal workers account for 5.0 and 10.4 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total urban main workers of the district comes to 26.4 per cent. Naugawan Sadat NP has highest proportion of total workers forming 32.5 per cent of the total population. It is followed by Amroha NPP (28.3 per cent), Bachharawan NPP (25.5 per cent), Dhanaura NPP (25.1 per

cent), and Hasanpur (23.3 per cent). The lowest percentage of 21.9 is recorded in Joya NP. In all towns proportion of marginal workers is 2.8 per cent in which male and female participation is nearly equal. Percentage of non-workers constitute 70.8 at district level, among than male and female accounts to 53.4 and 90.2 per cent respectively. Percentage of female non-workers is much higher than male in this district.

				(14.1)	**(45.5)**	**(15.9)**	**(20.9)**	**(17.7)**

Note: Percentage of Workers to total workers are given in brackets

It can be seen from the table 34, that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 47.9 per cent of the total workers (main + marginal) and of the remaining 52.1 per cent of total workers are engaged as agricultural labourers 15.6 per cent, Household industry workers (8.0 per cent) and other workers (28.6 per cent).

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 35.7 per cent in Amroha tahsil and 64.2 per cent in Hasanpur tahsil. These variations within the district may be due to cropping and land holding patterns.The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the second position next to agriculture in the district as well as in each tahsil. The highest proportion of 35.3 per cent of other workers is recorded in Amroha tahsil while the lowest proportion of 19.5 per cent is found in Hasanpur tahsil.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Serial number	Name of C. D. block	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers

				(47.9)	(61.6)	(18.2)	(2.2)	(18.1)
		Females	529,502	82,315	44,716	15,211	9,488	12,900
				(15.5)	(54.3)	(18.5)	(11.5)	(15.7)

Note: Percentage of Workers to total workers are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) constitute 32.8 per cent of total population.Among these workers, cultivators constitute 59.9 per cent, 18.2 per cent agricultural labourers, 4.3 per cent household industry workers and 17.5 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 4.3 per cent workers of the total working force. Among cultivators, the percentage of females (54.3 per cent) is lower than males (61.6 per cent) in the rural areas of the district. The males play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other.The proportion of cultivators varies between 43.5 per cent in Asmauli C.D. block to 77.3 per cent in Gangeshwari C.D. block. Similarly for other workers, the lowest proportion is 6.1 per cent in Gangeshwari C.D. block while 27.2 per cent is the highest in Asmauli C.D. block. The percentage of agricultural labourers and household industry workers together is quite low i.e. only 22.5 per cent in the district. The percentage of agricultural labourers is highest in Joya block (22.1) and is followed by Asmauli (21.5). Similarly, percentages of of household industry workers varies in C.D. blocks between 2.0 per cent in Gajraula and 8.3 per cent in Amroha.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers.Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (66.8), followed by household industry workers with 20.7 per cent (12.1 per cent males and 65.7 per cent females). If we observe each town, the table reveals that highest percentage of cultivator (43.0) is recorded in Ujhari N.P. In the agriculture laborers category, Amroha NPP and Hasanpur NPP have recorded very low percentage (3.7). Household industry workers are also very low (1.9 per cent) in Gajraula N.P, 3.4 per cent in Ujhari NP and 3.5 per cent in Hasanpur NPP. As the usual trend recorded in the urban areas, other workers are in high percentage (87.3 per cent) in Hasanpur NPP 83.1 per cent in Dhanaura NPP, and 78.5 per cent in Gajraula N.P).

(ix) Brief analysis of the Village Directory and Town Directory data based inset tables 37 to 47:

One of the major parts of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like educational, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 940 inhabited villages in the district 684 villages or 72.8 per cent have been provided with the educational facilities of one type or the other. Similarly 320 villages in the district constituting 34.0 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 914 or 97.2 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 79 villages constituting 8.4 per cent of villages have been provided with post office facility within the village. 226 or 24.0 per cent villages have been provided with the telephone facility, 93 or 9.9 per cent with transport facility, 40 or 4.3 per cent villages with bank facility and 37 or 3.9 per cent with agricultural credit societies. Similarly there are 624 or 66.4 per cent villages, which have been linked with the pucca road. Total 723 or 76.9 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Asmauli C.D. block has the highest 100.0 per cent villages where educational facility is available and lowest 58.6 per cent is found in Dhanaura C.D. Block Medical facility is highest in Hasanpur (56.8 per cent) and lowest (16.7 per cent) in Asmauli C.D. block. Improved drinking water is available to cent-percent villages in Asmauli, while in other

blocks, it is above 94 per cent. Telephone facility is highest in Asmauli (41.7 per cent) while only four villages (3.5 per cent) of Gangeshwari C.D. block enjoy this facility. Transport and communications is less developed in Gajraula where only 3.6 per cent villages are covered by this facility whereas 25.0 per cent villages of Asmauli C.D. block are availing this facility. In the field of power supply 723 (76.9 per cent) villages have been covered in the district. Gangeshwari C.D block is lagging behind in availing this facility with only 48.2 per cent villages electrified.

TABLE 38 : NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

\# Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table 38 depicts the number and proportion of rural population served by different type of amenities. Out of total rural population of 1130881 persons in the district, 988948 or 87.4 per cent have educational facility of one or the other type. Similarly 568181 or 50.2 per cent population has medical facilities while 1128454 or 99.8 per cent have got improved drinking water facility. Post office facilities are available to 225926 or 20.0 per cent population. Telephone facility is available to 366298 or 32.4 per cent. Transport communications facility is available to 207817 or 18.4 per cent. Bank facility is available to 123847 or 11.0 per cent. 92942 or 8.2 per cent have been provided with the facility of agricultural credit societies. 882452 or 78.0 per cent have been provided with the facility of approach by pucca road. Power supply is available to 936400 or 82.8 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available: Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education .-				
(a) Primary School	251	10	2	263
(b) Middle School	465	325	18	808
(c) Degree College	146	230	559	935

6. Banks				
(a) Commercial Bank	486	326	95	907
(b) Cooperative Bank	203	516	208	927
7. Agricultural Credit Societies	454	355	94	903

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. Children of 263 villages do not have primary school in their villages and out of these villages, children of 251 villages have to travel less than 5 kms. for schooling. Out of 940 inhabited villages as many as 808 are deprived of middle school and 935 of degree college. Of these 465 avail the facility of middle school at a distance of less than 5 kms., 325 at a distance 5-10 kms. and the remaining 18 at a distance of 10+ kms. In respect of degree college 146 avail this facility at a distance of less than 5 kms., 230 between 5 and 10 kms. and rest 559 villages at a distance of 10+ kms.

Similarly there are 925 villages in the district which have been devoid of Hospital facility and 927 villages which are deprived of PHC facilities. Of these 236 villages have the facility of Hospital available within 5 kms. while in respect of 383 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly 306 villages have this facility at a distance of 10+ kms. As regards PHC 181 avail this facility at a distance of less than 5 kms., 517 at a distance of 5-10 kms. and the remaining 229 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 861 villages do not have this facility in the village itself. Of these, majority, i.e. 598 have this facility at a distance of less than 5 kms., another 237 villages avail it at a distance of 5-10 kms. In the remaining 26 villages, habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 714 villages in the district which are without telephone facilitiy. Of these 380 avail this facility at a distance of less than 5 kms., 201 at a distance of 5-10 kms. and remaining 133 have to traverse a distance of 10+ kms.

For Bus service out of 862 villages which do not have this facility, 340 villages avail this facility at a distance of less than 5 kms., 434 at a distance between 5-10 kms. and 88 at a distance of 10+ kms.

In the entire district 907 villages are deprived of Commercial Bank and 927 of Co-operative Bank. Of these 907 villages which are deprived of Commercial Banks 486 villages avail this facility at a distance of less than 5 kms., 326 between 5-10 kms. and the remaining 95 at a distance of 10+ kms. Regarding Co-operative Banks out of 927 villages 203 villages avail this facility at a distance of less than 5 kms., 516 at a distance of 5-10 kms. and remaining 208 at a distance of 10+ kms. 903 villages do not have agricultural credit societies. This facility to 454 villages is available at a distance of less than 5 kms, to 355 at a distance of 5-10 kms. and to the remaining 94 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 940 inhabited villages in the district, there are 182 villages which have nearest town upto a distance of 5 kms. Of these only 131 villages forming 72.0 per cent of these total villages, are having the educational facilities of one type or the other and 61 villages constituting 33.5 per cent, have the medical facilities within the village, 9 villages forming 4.9 per cent have the facility of post office within the village and 42 or 23.1 per cent have the facility of telephone. 18 villages constituting 9.9 per cent have been linked by transport service. 4 villages comprising 2.2 per cent have been provided bank facilities, while 6 villages constituting only 3.3 per cent have been provided by agricultural credit societies. 140 villages comprising 76.9 per cent have been provided with pucca road.

There are 639 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 471 villages constituting 73.7 per cent have been provided with the educational facilities. 231 villages comprising 36.2 per cent have been provided with medical facilities. 61 villages constituting 9.5 per cent enjoy the post office facility. 166 villages comprising 26.0 per cent have been provided the telephone facility. 65 villages constituting 10.2 per cent have been linked with transport communications. 31 villages comprising 4.9 per cent have bank facility. 24 villages constituting 3.8 per cent are having agricultural credit societies, while 412 villages or 64.5 per cent are approachable by pucca road. 97 villages fall in the distance range of 16-50 kms. Of these, 70.1 per cent villages have educational facility, 21.6 per cent with medical, 8.2 per cent with post office, 13.4 per cent with telephone and transport & communications available to 7.2 per cent villages. Banks and agricultural credit societies facilities are available to 5.2 and 7.2 per cent of villages.

There is one village in the district, which is situated beyond 50 kms. from the nearest town and that village enjoys bus service only. There are 21 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 14 or 66.7 per cent have the educational, seven or 33.3 per cent have the medical, one (4.8 per cent) post office, 5 (23.8 per cent) telephone, 2 (9.5 per cent) transport communications and 15 (71.4 per cent) villages have also been connected by pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									Type of amenity available
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.
However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In the district out of 940 inhabited villages, 301 have a population range of 500-999 persons. Of these, 217 villages (72.1 per cent) have educational facility, 90 (29.9 per cent) have medical facility, 301 (100.0 per cent) have improved drinking water facility. 9 villages (3.0 per cent) have post office facility. 58. (19.3 per cent) have telephone facility. 16 (5.3 per cent) have been linked by bus service. 4 (1.3 per cent) have Bank facility. 4 villages (1.3 per cent) have been provided with the agricultural credit societies, 181 villages (60.1 per cent) have been linked with pucca road. 232 villages (77.1 per cent) have been provided with electricity.

Out of 283 villages, which fall in the population range 1000-1999 persons, 261 villages (92.2 per cent) have been provided with the education facility, 120 (42.4 per cent) with medical facility, all the villages have improved dirinking water facility. 24 villages (8.5 per cent) have been provided with post office facilitieds, 91 villages (32.2 per cent with telephone facility, 33 villages (11.7 per cent) with transport facilities, 13 villages (4.6 per cent) with bank facility, 14 villages (4.9 per cent) with agricultural credit societies and 212 villages (74.9 per cent) have approach by pucca road 232 (82.0 per cent) villages in this range have electricity.

217 villages fall in population range of 1-499 persons. Out of these villages 75 (34.6), 143 (65.9) and 191 (88.0) have educational, power supply and improved drinking water facilities. Whereas 18 villages (8.3 per cent) enjoy the medical facility, None of village (0.0 per cent) have post office facility, 26 villages (12.0 per cent) have telephone facility, 11 villages (5.1 per cent) have transport communications facilities, 2 villages (0.9 per cent) have bank facilities, none of the village (zero per cent) have agricultural credit societies and 110 villages (50.7 per cent) have approach by pucca road.

There are 125 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy the facility of improved drinking water. 118 villages (94.4 per cent) have educational facility, 80 villages (64.0 per cent) have medical facility. 37 villages (29.6 per cent) have post office facility, 14 villages (11.2 per cent) have bank facility, 17 villages (13.6 per cent) are having agricultural credit societies. There are 14 village in the district having a population of 5,000 persons or above.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Amroha	178	29,631.7	83.4	90.1
2	Asmauli	12	2,050.1	86.1	98.0
3	Dhanaura	157	33,954.8	57.3	97.1
4	Joya	201	33,363.0	93.1	95.1
5	Gajraula	139	26,188.5	79.5	88.6
6	Hasanpur	139	30,762.6	90.6	93.0
7	Gangeshwari	114	34,095.8	91.5	94.0
	District Total	**940**	**190,046.5**	**82.5**	**93.1**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 940 inhabited villages in the district having a total area of 190,046.5 hectares. Of this, 82.5 per cent is cultivable and 93.1 per cent of total cultivable area has got the irrigation facility.The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Amroha block with 178 villages have a total area of 29,631.7 hectares, of this 83.4 per cent of land is cultivable and of the aforesaid area 90.1 per cent is irrigated. In Asmauli block, all the 12 .villages have a total land area of 2050.1 hectares, of this 86.1 per cent of land is cultivable and of the aforesaid area 98.0 per cent is irrigated. In Dhanaura block, all the 157 villages have a total area of 33,954.8 hectares. Of this cultivable area is 57.3 per cent and 97.1 per cent is irrigated. In Joya block, all the 201 villages have a total area of 33,363.0 hectares. Of this, cultivable area is 93.1 per cent.Of cultivable area 95.1 per cent is irrigated. Gajraula block with 139 villages have a total land area of 26,188.5 hectares. Of this 79.5 per cent is cultivable area and out of this cultivable area 88.6 per cent is irrigated. Hasanpur block with 139 villages have a total land area of 30762.6 hectares. Of this 90.6 per cent is cultivated area, out of which 93.0 per cent is irrigated. Gangeshwari block with a total 114 villages have an area of 34095.8 hectares. Of this 91.5 per cent is cultivable area. Irrigation facility is available to 94.0 per cent of cultivable land.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11

District Total		**183**	**15**	**162**	**168**	**11**	**10**	**13**	**0**	**14**

Table 43 gives the per capita receipt and expenditure (in rupees) for each town in the district. The average per capita receipt for towns of the district works out to be Rs183 of which Rs 15 are derived through local taxes and the remaining Rs 162 received from all other sources. The average of total expenditure incurred per head is Rs168 Out of this Rs 11 are spent on general administration, Rs 10 on public health and conveniences, Rs 13 on public works, none on public institutions and Rs 14 is spent on other items. Among all the five towns the receipt and expenditure recorded per head are the highest in Joya N.P.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Amroha NPP	6.6	1.6	1.0	1.2	0.1
2	Bachhraon NPP	3.0	1.9	0.8	0.8	0.0
3	Dhanaura NPP	2.5	1.6	1.2	0.8	0.0
4	Gajraula NP	5.3	3.5	1.3	1.0	0.3
5	Hasanpur NPP	5.4	2.6	1.1	0.6	0.0
6	Joya NP	8.3	4.5	1.5	1.5	0.0
7	Naugawan Sadat NP	2.6	1.5	1.1	1.1	0.0
8	Ujhari NP	13.4	2.7	1.1	0.0	0.0
District Total		**17.8**	**5.6**	**0.0**	**0.0**	**0.0**

In urban areas of district the average number of primary school per 10,000 population comes to 17.8 schools, 5.6 junior secondary/middle, 0.0 secondary/ matriculation, 0.0 senior secondary schools and the ratio of colleges is only 0.0 college per 10,000 population. Among the towns, the ratio of junior secondary/ matriculation is highest in Joya N.P. It has also highest ratio of secondary/ matriculation schools as well as senior secondary school. College education is available only in Amroha NPP and Gajraula N.P. The ratio of primary is highast in Ujhari N.P.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Amroha NPP	2
2	Bachhraon NPP	2
3	Dhanaura NPP	12
4	Gajraula NP	26
5	Hasanpur NPP	6
6	Joya NP	15
7	Naugawan Sadat NP	5
8	Ujhari NP	0
	District Total	**6**

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of the district. On an average there are 6 beds per 10,000 population in urban areas of the district. Iit is the highest 26 in Gajraula Nagar Panchayat while lowest value of zero bed is recorded in Ujhari and is preceded by Amroha NPP and Bachhraon NPP.

TABLE : 46 PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial Number	Name of the Town	Total Population	Slum population	Percentage of slun population to total population
1	2	3	4	5
		NA		

Figure of slum population in the urban areas of the district is not available.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Amroha NPP	-	Bidi Carpet Wooden Dholak
2	Bachhraon NPP	Bricks Sugar Cloths	Guava Mango Vegetable
3	Dhanaura NPP	Buggi Iron Mentha Oil	Vegetables Wheat Gur
4	Gajraula NP	Fertilizers Chemicals Soap	Fertilizers Medicines Soap
5	Hasanpur NPP	Handloom Cloth Sugar Ban	Ban Mango Vegetables
6	Joya NP		
7	Naugawan Sadat NP	Bidi Handloom cloth Biscuit	Bidi Handloom cloth Furniture
8	Ujhari NP	Sugar Khadi Cloth Bidi	Sugar Milk Khadi cloth

Table 47 indicates most important articles manufactured and exported out of each town in the district. The district is well known for manufacture of Bidi and wooden items The chief export items of the district are vegetables, fruits, Bidi, Gur. Handloom Cloth, Sugar etc. which are mainly manufactured in Hasanpur NPP, Naugawan Sadat NP and these are exported to other places

(x) Brief analysis of the data on houses and household amenities collected during Houselisting 2001 based on inset tables 48 to 52

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

Data source: Census of India 2001,H- series: Table on Household amenities and assets.

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district.The total number of households in the district stands at 228,116 consisting of 175,305 rural and 52,811 urban households. 44909 households belong to Scheduled Castes and 1972 to Scheduled Tribes. 220,333 households are living in their owned houses constituting 96.6 per cent of total households. Of these households, the largest number of households (81,748) have occupied one room accommodation and is followed by two rooms accommodation numbering 75,060 households. Next position is claimed by households (33,519) occupying three rooms accommodation. Number of households in owned accommodation occupying three+ rooms rank at fourth place with 28,449 households while 1,557 households are without any exclusive room.

6,047 households living in rented accommodation account for 2.7 per cent of total number of households in the district. The largest number of 3,705 households are living in single roomed accommodation followed by 1,690 households in double roomed accommodation. Households with three rooms and three plus rooms are small in numbers. Other households numbering 1,736 forming only 0.8 per cent of total households are distributed in single roomed accommodation numbering 747, double roomed 522 and 184 in three room accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show a reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Perma-nent	Semi-perma-	Tempo-rary	Perma-nent	Semi-perma-	Tempo-rary	Perma-nent	Semi-perma-	Tempo-rary

Data source Census of India 2001, H-series Tables on Houses, Household amenities and assets

The percentage distribution of households as shown in the above table reveals that 63.3 per cent of the households in the district have permanent houses. The trend is similar in rural (61.9 per cent) and urban areas (68.0 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Dhanaura (65.8 per cent) followed by Hasanpur (63.5 per cent), and lowest in Amroha (61.5 per cent). In respect of semi-permanent houses, the returns were 27.0 per cent at district level whereas among tahsils, in Amroha it was highest 31.8 per cent and lowest was 22.4 per cent in tahsil Hasanpur. Urban areas were in the proportion range of 18.0 to 31.1 per cent. Temporary houses in the district lie between the ranges of 6.7 and 14.1 per cent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.
*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.
Note: Percentage is to be given in brackets after the number of households. Bathroom means bathroom within the house Toilet means toilet within the house.
* houselist households

The above table shows that out of total households of the district 96.3 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 95.9 and 97.9 per cent. Tahsil Hasanpur had higher order of proportion of households where percentage for rural area was 96.5 and 97.3 per cent in urban area. Electricity was available for 22.3 per cent households at district level, households of the district had better access of electricity. Bathrooms and toilet facilities wer available in 39.9 and 44.7 per cent of households. Tahsil Hasanpur poorly served in respect of these amenities. Similarly drainage facility was also poor in Dhanaura and Hasanpur. At district level drainage facility was available for 85.0 per cent households, whereas the proportion of rural and urban areas households accounted for81.3 and 97.2 per cent.

TABLE 51 : NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

*Percentage in brackets * Households*

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 36.8 per cent households in the district use firewood as fuel for cooking, the proportion in the rural area is 31.1 and in urban area it comes to 55.7 per cent households. LPG (cooking gas) has been reported as one of the fuels for cooking of food for 7.6 per cent households. The composition of rural and urban comes to 2.0 and 26.5 per cent respectively. Kerosene is used for cooking in 0.8 per cent of the households (0.1 per cent rural and 3.1 per cent urban households). The other methods like crop residue cow dung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.1 per cent and 41.9 per cent households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominent fuel is cowdung cake. The table shows that firewood, cow dung and crop residue are the predominant fuel for cooking in the district.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.
** Households*

Above table reveals that out of the total households (228,116) of the district, in all 55.4 per cent (126,286 households) could avail banking services at district level while only 42.3 (96,602 households), 25.5 (58,270 households), 4.3 (9,800 households), 59.2 (134,980 households), 8.4 (19,079 households) and 1.6 per cent (3,682 households) enjoyed the availability of household assets radio/ transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively whereas only 26.5 per cent (60,560 hopulseholds) had none of the specified assets.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

During the decade the most significant development was creation of this district. The district was created on 15th April, 1997 by carving out three tahsils, viz Amroha, Dhanaura and Hasanpur from the district Moradabad.The district is named after Jyotiba Phule, a dalit and social reformer. No significant social cultural or natural event has taken place during the last decade.

(xii) Brief description of tourist Places of Religious, Historical or Archaeological Importance in Villages and Places of Tourist Intrest in the towns of the district:

There are not many places of tourists interest in the district. Amroha town which is the headquarters of the district is famous for mangoes and a particular type of fish. Gajraula had been declared as industrial area in the district and U.P. Industrial Development Corporation is working hard to accelerate the pace of industrial development of the district.

(xiii) Major Characteristics and Contribution of the district:

Newly created district of Jyotiba Phule Nagar is yet to establish itself in the field of economic development. The district administration is trying hard to turn the wheel of progress. The district is famous for its traditional handicrafts, specially the wooden toys of Amroha. This district has been made famous by the film director Kamal Amrohi, who came into prominance by the film "Pakeezah". The district is well known for grand Tazia processions during the muslim mouth of Moharram.

(xiv) Scope of Village Directory and Town Directory Column Heading wise Explanation and Coverage of Data

Village Directory :

The village directory, as the title connotes, presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been prescnted. The rationale of giving 2001 location codes along with 1991 location codes is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufactured	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been adopted:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration, are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement, a note is given

against such towns that ther are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999 and trade, commerce, industry and banking activities in year 1999. In this way, population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, Manufactured cinemas etc. and number of banks as well as commodities and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY
(Section I and II

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical .

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital Ayurvedic Hospital Unani Hospital Homeopathic Hospital	H HA HU HHom
(ii)	Allopathic Dispensary Ayurvedic Dispensary Unani Dispensary Homeopathic Dispensary	D DA DU DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the

distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)(vi)	Navigable CanalNavigable waterways other than River,Canal	NC,NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block

wise of the district.

Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	The appendix shows the list of villages according to proportion of the
Appendix-VII B	Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

VIKAS KHAND DHANAURA & GAJRAULA

(TAHSIL DHANAURA & HASANPUR)

DISTRICT JYOTIBA PHULE NAGAR

VIKAS KHAND	NUMBER OF VILLAGES	POPULATION
DHANAURA	184	167,681
GAJRAULA	171	151,083

V. K. – VIKAS KHAND

BOUNDARY, DISTRICT
,, TAHSIL
,, VIKAS KHAND
,, VILLAGE WITH PERMANENT LOCATION CODE NUMBER — 00857800
HEADQUARTERS: TAHSIL, VIKAS KHAND
POPULATION SIZE CLASS OF VILLAGES : BELOW 200
200 – 499, 500 – 999, 1000 – 4999, 5000 & ABOVE
UNINHABITED VILLAGES WITH PERMANENT LOCATION CODE NUMBER — 00934400
URBAN AREA WITH LOCATION CODE NUMBER — III

NATIONAL HIGHWAY — NH 24
IMPORTANT METALLED ROAD
RAILWAY LINE : BROAD GAUGE
RIVER AND STREAM
POST OFFICE, TELEGRAPH OFFICE — PO , TO
HIGH SCHOOL/ INTER COLLEGE — S
PRIMARY HEALTH CENTRE
BANK — B

Note:- Villages having NIL Scheduled Tribes Population have been excluded

APPENDIX VIII

Number of villages under each Gram Panchyat (C.D. block wise)

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total SC population	Total ST population	expenditure of Gram panchayat (in Rs.'000)	
			Number of villages with location code numbers	Location code					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttar Pradesh due to certain reasons.

APPENDIX IX

Statement showing number of girls schools in the villages

Name of District	Name of C.D. Block	Location Code	Name of Village Number	No. of Girls School
1	2	3	4	5
Information not available for this district				

SECTION II
TOWN DIRECTORY

Section II - Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point

of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all	ASC

	categories-Arts, Science and Commerce	
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

APPENDIX TO TOWN DIRECTORY
TOWN SHOWING THEIR OUTGROWTH WITH POPULATION

SerialName of the town with Number	Population of location code	Outgrowth core town	Population of	outgrowth
1	2	3	4	5

As no Towns having any outgrowth in the District are there, therefore the information is 'NIL'.

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table

and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - I TO VIII

Jyotiba Phule Nagar district was carved out from Moradabad after 1991 Census. Since the data is not available separated for Jyotiba Phule Nagar. Hence, for comparison purpose of Annesure IV to Viii, the data of undivided Moradabad dIstrict have been used, assuming that the trends and pattern of district are some.

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Jytiba Phule Nagar*
q1	Persons	99	89
	Males	98	101
	Females	104	75
q2	Persons	117	98
	Males	117	102
	Females	118	89
q5	Persons	134	120
	Males	135	121
	Females	132	139

The child mortality by age one year was lower in case of female and higher in case of male as against the State. Child mortality by age two years in both male and female are lower while by age five years the mortality indicators in the district for male is lower and for female shows higher order as compared to the State.

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Uttar Pradesh	Jyotiba Phule Nagar
1	2	3	4
1	CBR	37.2	34.3
2	TFR	5.6	5.5
3	TMFR	6.3	6.5
4	GFR	172	168
5	GMFR	200	207
6	Mean age at marriage (1981-91)	17.3	18.2
7	Number of children ever born per every married woman aged 45-49 years	4.6	4.7
8	Child woman ratio 0-4	631	733
	5-9	752	856

Source : (i) Extimates of fertility indicators Utrar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

In above figures shown that the demographical indicators in decades 1 to 4 above are lower in the district than those of U.P. However, from 5 to 8 the figures are higher than the States.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 34.3 in the district. It is lower than the state of Uttar Pradesh i.e. of 37.2. In respect of Total Fertility Rate (TFR), and General Fertility Rate (GFR) in the district presents all along a lower proportion from the state figures, while (TMFR) Total Marital Fertility Rate and (GMFR) General Marital Fertility Rate is of higher order in the district. The conclusion that may be drawn is of varied fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3 years for the state where as 18.2 years has been records for the district. It may be observed that higher age at marriage leads to high rate of fertility in the state and district as well. Similar trend is observed in the Number of children born per ever-married woman in the age group 45-49. The state and the district figures are placed as 4.6 and 4.7 per cent respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 733 and 856 for the district while in case of the state the corresponding figures are 631 and 752.

Annexure-IV

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 91.2 in 1991, while in 2001 it was 90.4 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 7.2 percent and 9.2 percent respectively. This shows in-migration from other states to this district was slightly higher in 2001 in comparison to 1991. At district level in-migration from other countries was 1.6 percent in 1991 and 0.4 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 91.3 percent and 86.9 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 8.1 percent and 12.7 percent respectively. The movement of population from other countries in the district was 0.7 percent in 1991 and 0.4 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 56.8 percent in 1991 and 59.9 percent in 2001, while Muslim were 42.7 percent in 1991 and 39.4 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religions had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure - VI
Marital status of populations as per 1991 Census

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 58.6 percent male and 52.3 percent female to 60.4 percent male and 53.4 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male 38.8 percent and female 44.3 percent in 1991 and in 2001 it was 37.3 percent male and 42.4 percent female at district level. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.2 percent male and 4.1 percent female while it was 2.5 percent male and 3.4 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 67.2 percent male and 85.8 percent female in 1991 which declined to 49.9 percent male and 72.5 percent female in 2001. Primary level education was 8.1 percent male and 3.9 percent female in 1991, which was 16.5 percent male and 9.9 percent female in 2001. Middle level education was 8.1 percent male and 3.1 percent female in 1991 and 13.7 percent male and 5.6 percent female in 2001. Matriculation and above level of education was achieved by 9.3 percent male and 3.8 percent female in 1991 which was 14.5 percent male and 5.9 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note: For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0.02 percent. The remaining tongues have been merged in the column of "Total of other mother tongue".

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 71.5 percent person in 1991 and 75.2 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 28.2 percent and 24.4 percent at district level in 1991 and 2001 Census respectively. Persons of other mother tongues recorded were very small in number in both the state, and district, in both Censuses.
