MOTIF

NAUCHANDI FAIR

As the name Nauchandi denotes, the place is primarily distinguished as one of the form of goddess 'Chandidevi'. The fair being organized in the name of the Goddess 'Chandi-devi' is termed as 'Nauchandi Mela' which is held in the heart of the Meerut city, sprawling over approximately an area of 2 sq.km. Every year in the month of 'Falgun', a month long fair is held here and devotees/ pilgrims from all over the country and as well as traders, dealing in various trades also visit the place. The uniqueness of the fair is its over crowded gatherings and un-interrupted continuity of the fair, round the clock for the month long entertainment of its own kind. Entertainment includes various cultural activities, music programmes, exhibitions etc. which can be enjoyed throughout the month. This 'Mela' premises is enriched with all sort of commodities so that everyone can obtain goods according to their need. All the facilities could be availed and could also be obtained at any time in the premises of the fair. From traditional 'Nautanki' held in make shift auditoriums to 'Dhaba' or hotels/restaurants etc. with delicious eatables as well as fast foods are the main attractions of the fair. On the opposite side of the Goddess, Chandi Devi Temple, a tomb of Sufi 'Bale Mian' exists here, which is said to be build by devotees. Throughout the nights devotional 'Kawalis' are organized in the memory of the said saint.

Persons from every community enjoy the fair with great enthusiasm and zeal. Magistrates, police and judicial officers of various ranks are deployed in the fair premises to maintain law and order.

Annexure VIII	Distribution of different mother tongues returned in 1991 Census	507

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified

and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district The first part contains non-census data for each village and town and is called Village and Town Directories Part A The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs) The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A M. Ansari. Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost the same in scope as in 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on larger number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

District Meerut is said to be associated with the earlier tradition of the Hindus according to which Maya, the father-in-law of Ravana, founded this place which has, therefore, been called Maidant-Ka-Khera. According to another version Maya a distinguished architect, got land from king Yudhisthira on which the city of Meerut now stands and he called this place Mayarashtra, a name which in course of time became shortened to Meerut. Tradition also has it that the district formed part of the dominion of Mahipal, king of Indraprastha and the word Meerut is associated with his name. This district of Meerut came into existence in 1918 and included the southern division of Saharanpur district. Meerut district has distinguished itself as the nerve-centre of the development of western Uttar Pradesh. The vast strands of history of Meerut eventually find their beginnings in the pre-historic period and cover a wide spectrum of time and space to bring this cosmopolitan town to its present status.

The birth of Meerut may go even as far back as 6000 years before the classical age of Vedas. The archaeological excavations in Hastinapur and Rajpur Parasan indicate that the illustrious, Indus valley culture thronged in this area too. Thus the origins of this place may even go back to the pre-historic age. The excavations in Alamgir village on the bank of river Hindon in 1958 very clearly indicate that when

the Aryans subjugated this area it could well have been a tribal habitat.

As mythology would put it Meerut was the hometown of the classical king Ravana's wife called Mandodari. The existence of BILKESHWARA temple archaeologically testifies it. It was here that Mandodari and her father Maya used to perform their worship. Indraprastha, the famous town built by Maya later on became the cause for the epic war of Mahabharata. Hastinapur was the capital of Kaurava and Pandava while Parikshit Garh was the capital of Raja Parikshit.

The Greek historians of the second century called this area as BASTINOPORA (Hastinapur) which indicates that even during the ancient times this place was accorded international recognition. Much earlier than that i.e. in about 600 B.C., this area formed one of the sixteen great districts (metropolitan areas) or one of the sodas Mahajanapadas of North India. Later on Mahapadmananda annexed this area which subsequently formed part of the kingdom of Chandragupta Maurya. During the period of Maurya dynasty the famous town of Hastinapur is said to have been destroyed by a devastating fire. However the area of Meerut district always occupied a prominent place in the Mauryan period. Even for Ashoka the great 'Mirath Mandal' had a special significance. This famous 'Shaka dynasty' was ruling over this area till 200B.C. when the Yayudhas overthrew them. They ruled over about 80 years.

Kustaianas ousted the 'Yayudhas' and ruled over this area for about 40 years after which the 'Yayudhas' again came back to power. In the subsequent period Samundragupta subjugated this area. Afterwards this area watched Yashovarman and Tomar kings coming and going. The Pratihars became very powerful in the 9th and 10th centuries and overthrew the Tomars . In the clawing days of Hindu period the famous Chauhans ruled here. Thus the area of Meerut district had the privilege of being ruled by almost every famous Dynasty of Hindu period and inherited the best of their traditions and culture.

The Muslim Sultanate made its first inroads in this area after the defeat of king Prithiviraj Chauhan in 1192. After the first Sultan Qutub-u-ddin Aibak's rule Meerut district was under Sultan Babban who constructed a mosque in Garhmukteshwara in 1283 .This is known as the famous Dargah Sharif today.

Meerut faced the vagaries of a big drought in 1314, which has been recorded by the historian Alberuni. In 1930 Ferozshah Tuglaq used Meerut as prison-house. Only eight years later Taimur invaded the area of Meerut district and butchered a vast number of people here. Probably these historical developments planted the seeds of love for independence in the hearts of the people living in this area. In the historical documents 'Tawarikh-I-Ferozshati' the famous historian Ghiyasuddin Barni records that revolt lies in the hearts of the people of this area who are basically 'freedom - loving'. He mentions that Meerut district used to be the hotbed of seditions and intrigues due to which this area was always kept under very tough and tyrannical rulers.

Meerut area was under Syed rule upto 1451 when the sultan of Jaunpur, Hussain Sharif, attacked Meerut and Bahlol Lodi made a compromise with him. After the battle of Panipat, Meerut came under the first Mughal Babar, in 1526 with a brief gap of Shershah Suri's regime from 1540 to1556 after which Humayun regained this area. Then followed the illustrious period of Akbar the great which was an era of reformation, reconstruction, and also of the evolution of the composite Hindu- Muslim culture. Akbar even had established one of his mints in Meerut. The last Mughal emperor Aurangzeb even named a few towns after him.

In 1739 Nadir shah's invasion again shook the peace and freedom loving people of Meerut down to their hilts. Nadir and his army looted Meerut and committed enormous atrocities here.

As history would have had it, the freedom loving people of Meerut were instrumental in leading the revolt of 1857 by sparking of its first embers on the 24th of April 1857 soldier of the third cavalry regiment refused to operate the objectionable cartridges. Given a ten year punishment the same soldiers revolted on 10th of may 1857 and shot dead the commander of the XI regiment. Thus the people of Meerut participated in the freedom struggle and became the pilots of this movement.

(iii) Administrative Setup

The district Meerut is located in the western plain of the state of Uttar Pradesh. From the administrative point of view the district is divided into 3 tahsils, 14 statutory towns, 2 census towns and 12 C.D. blocks are 674 including 52 uninhabited villages. No jurisdictional change has taken place in the district during the last decade.

Jurisdictional Changes (1991-2000)

A new district, Baghpat was created by carving out two statutory towns (namely Tikri T.A., Doghat T.A.) and 63 villages to the new district. Besides these changes, 251 villages and 6 towns were also transferred to the newly created district of Baghpat.

Jurisdictional Changes 1991-2001

Name of District/Tahsil	Notification No. & Date	Jurisdictional Changes (Subtracted from the district)
Meerut		
1 Sardhana Tahsil	2779/1-5/97-R-5 dated 15.09 1993	63 villages and 2 towns transferred to newly created Baraut tahsil of Baghpat district
2 Baghpat Tahsil	2779/1-5/97-R-5 dated 15.09.1993	Entire tahsil alongwith all towns transferred to newly created Baghpat district.

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, district level officers of different departments and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate, Finance and Revenue i.e., ADM (F & R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now re-designated as Up-Zila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for developmental activities in the district. The other district level officers like - Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. net district administration. At Community Development Block levels are Block Development Officers (BDO) and Assistant Development Officers and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police are inchartge of the district. Additional Supdt. of Police (ASP) and Commanding Officer are in-charge of their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

The judiciary system of the district consists of District Judge, Additional District Judge and Session Judge, Civil Judge, Assistant Session Judge and Munsif Magistrate.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical features

Location and Size

The district Meerut lies between latitude 28° 54' and 29° 15' north and longitude 77° 77' and 78° 14' east. On the north it is bounded by district Muzaffarnagar and on the south by district Ghaziabad, in the east by district Bijnor and Jyotiba Phule Nagar, in the west by district Baghpat. The holy river Ganga forms its natural boundary in the east and the river Hindon in the west. It is the district headquarters and headquarters of Comissionery. It is very near (i.e. about 100 k.m.), to the National Capital, 'New Delhi'. It is rectangular in shape. The geographical area of the district is 2590 sq. km.

Physiography

The district Meerut is a part of northern upper Ganga plain. It lies in the upper Ganga Doab roughly in a rectangular shape. The Ganga and Hindon form its boundaries in the east and west respectively.

The district is almost a levelled alluvial plain with a slight slope from north to south or south to east. The whole of the district is a well-cultivated plain

and there is no uneven ground except in the area of ravines near the river valleys and the scattered bhur ridges in the upland tract. The whole district is a tract of extraordinary fertile soil. On the basis of Geology, Soils, Topography, Climate and natural vegetation the district is divided into the following four sub-micro regions-

1) Hindon Plain
2) Meerut Plain
3) Mawana Bhur Tract
4) Ganga Khadar.

Hindon Plain

The region covers a small portion of Sardhana and Meerut tahsils. It slopes towards south. The Hindon is the main river in the region. The tributaries of the Hindon flow parallel to it before joining at different places in the region. The tributaries are non-perennial. Physiographically the area is dull. Geographically, this region belongs to Alluvium, Dun gravels of recent age.

Meerut Plain

It is a flat plain sloping towards south. Compared to its peripheral areas, the central portion is lower. Physiography is monotonous. Few depressions are the main geographic feature. The plain can be said as a 'bread basket' tract of western Uttar Pradesh. Geologically, this region belongs to Alluvium, Dun gravels of recent age.

Mawana Bhur Tract

The region is spread over in an elongated shape extending in north-south direction in Mawana tahsil. There is a chain of Bhur or sand ridges located in this belt. These sand dunes are locally known as Palauta. Most of the sand dunes are reclaimed and the area is used for agriculture. The area slopes towards south. Geologically the region belongs to Alluvium, Dun gravels (recent).

Ganga Khadar

The region is situated parallel to Ganga river in north-south direction in Mawana tahsil. Slope of the region is governed by the Ganga river which flows from north to south. Dead arms of rivers, swamps, local depressions are the main topographical features. Sand dunes are located sporadically. Geologically, the region belongs to Alluvium, Dun gravels of recent age.

Drainage

The rivers Ganga and Hindon are the principal rivers of the district. Burhi Ganga is a tributary of Ganga while Kali Nadi is a tributary of Hindon River. These tributaries are non-perennial. The area is flat with very little variation in slope. There are few patches of rugged surface along the river Hindon in the sourthern part. The Ganga River flows from north to south direction in Mawana Tahsil. There are number of small rivulets along the Ganga which are actually the abandoned old course of the main stream. Sand dunes are located sporadically. There is a chain of Bhur or Sand Ridges along the riversides in this tract. The land has become uneven on the sides of the river. Still there is no problem of drainage in the district as 90% part of the district is levelled alluvial plain.

Climate

This area has climate variation of extreme kind, ranging from extremely hot in summers and extremely cold in winters. The temperature starts rising from the beginning of March signifying the onset of summer. The western winds locally known as 'Loo' begins to blow in April. The heat is maximum in May and June when the temperature goes up to 45° centigrade. The season of monsoon is humid. Thus this region goes through various seasonal vagaries throughout the year. October and November are the ideal months for sowing of Rabi crop. Scarcity of rain occurs in the district.

Thunderstorms occur in the summer and monsoon months, their frequency being higher in the month of June and September. Dust raising winds are common in the summer afternoons. The normal rainfall during the year 1997 was 768 mm, while normal rainfall for the same year was 817 mm.

Fieldwork especially agricultural operations are carried out in the district from July to March / April after the harvesting of crops is over.

Natural and Economic Resources

Forestry

The total forest area in the district was 6865 hectares as per agricultural data reported during the year 1996-97. The maximum forest area was 4155 hectares in Parikshitgarh C.D. block. Out of the total area 5706-hectares was in tahsil Mawana, 140-hectare area was in tahsil Sardhana and 663-hectare area was in tahsil Meerut. There is no importance

of forest in the district from the economic point of view. In addition to forest 15157-hectare area was covered under fruit gardens in the year 1998-99. Forests help in maintaining the moisture of soil and checking erosion of soil. Therefore, social forestry drive is undertaken and quick growing trees of industrial use are being planted in the district.

Minerals and Minings

No important minerals and mining are found in the district and, therefore, no mining activity is undertaken in this district.

Soil

The soil is highly fertile and rich. The slope of the district being north to south, there are long patches of different kinds of soil. In the khadar area of Ganga the soil is sandy while in the surrounding areas of Hindon and Kali rivers the types of soil is bhur and in the central part, the soil is hard.

Land and Land-use Pattern

District Meerut is one of the leading district of Uttar Pradesh in agriculture. Land use statistics shows that during the year 1997-98 total reported area was 313,221 hectares. Out of it net sown area was 209,809 hectares, which was 76.60% of total estimated area. Of the total 273,882 hectares was estimated land for agriculture. Land used for pastures, orchards etc. was 631 hectares, present and other left over land was 7,465 hectares, usar and unsuitable land for agriculture was 31,361 hectares, barren land was 3,766 hectares and forest covers 17,826 hectares.

Agriculture and Crop Pattern

District Meerut has an important place in the field of agriculture in the entire state. For further improvement of agriculture, government through agriculture department is providing vital information about improved agriculture technique, improved seed and fertilizer to the farmers. Cultivators are provided information on crop protection. They are also provided financial assistance. Rabi and Kharif are two main harvests in the district.

Main crops of Rabi are gram and wheat and main crops of Kharif are maize and paddy. In the year 1997-98 area under Rabi crops was 104,087 hectare out of which wheat covers 82,592 hectare, pea 875 hectare and gram 398 hectare. As far as Kharif crops are concerned, out of an area of 187,807 hectare, paddy was sown in 17,696 hectare, maize in 4,556 hectare, bajra in 27 hectare. For Zaid crops, total area sown was 21,789 hectare.

The main cash crops of the district are sugarcane, potato and cotton, which are sown in the area of 119,796 hectare, 7,995 hectare and 133 hectare respectively. Almost, in 33% of the area, sugarcane is sown in the CD Block Parikshitgarh, Mawana Kalan and Hastinapur of Tahsil Mawana.

Production of the crops in the district are high due to its climate, soil, natural rain and ample means of irrigation. The use of chemical fertilizer and good seeds also helped to increase the production of cereals and other crops. Total production of cereal was 349476 metric tonnes in the year 1997-98. Pulses were 3,526 metric tonne. The production of wheat was 291,966 metric tonne followed by rice 44,758 metric tonne. Among oilseeds, mustard was in the lead having production of 3,131 metric tonne. The only other crop of oilseed was sunflower (377 metric tonne). Of the cash crops, 8,097,970 metric tonne of sugarcane was produced followed by Potato 132,285 metric tonne. Cotton was merely 23 metric tonne.

For development of agriculture in the district the cultivators were provided with 134 seed godowns/ fertilizer depots., 121 godowns, 13 insecticide depot., one seed farm, 44 cold storages and 5 agriculture service centres during 1998-99. For storages of cereals the district has 56 warehousing godowns managed by different agencies.

Irrigation

The main source of irrigation in the district is tube-well. 77 percent area of the land is irrigated with tube wells. The number of tube-wells operated through power is increasing day by day. There were 22550 private and 349 govt. tube-wells in the district during 1998-99. Only 22.8 percent area of the land is irrigated by canal. The length of the canal was 767 km during the same period.

Animal Husbandry

Animal husbandry is one of the substitutes of agriculture. From this substitute, nutritional food, manure for agricultural and leather is obtained as raw material. On the basis of "Animal Census- 1993" the total number of animals were 802,590. Out of which cows were 175,801, buffaloes 459,624, sheep 7,462, goats 44,185, small ponies 5,440, pigs 29,804 and other animals 80,274. In addition to this the number of cock and hen were 93,364 and others were 1,195.

Note: - [The data given above is for undivided district of Meerut.]

In order to increase the production of good species of animals, the district administration has implemented the programmes of animal health care, artificial insemination etc. In the year 1998-99 there were 28-veterinary hospitals, 76 animal development centres and 28 artificial insemination centres and 76 sub-centres in the district. Two pig centres were also established. 88,878 animals were provided the facility of artificial insemination in the year 1998-99.

Gangol Co-operative Milk Federation Ltd. is the only establishment, engaged in milk production activity in the district. During 1999-2000 the number of primary milk co-operative societies attached to this federation were 552, having membership of 33,479 with share money of Rs. 2,858 thousand.

Fishery

There is enough scope for the development of fishery in the district. There are many small ponds under gram sabhas, revenue department and private owners. Ponds controlled by gram sabhas and revenue department are leased to the fishermen. During 1998-99, fingerlings numbering 21,219 thousand were distributed to the fishermen by the Fishery Department.

Industry

Industry plays a major role in the socio-economic development of the district. For the establishment of the industry, the industry department of the district provides the facilities of consultations, selection of project, arrangement of land and building as well as financial resources to entrepreneurs. The main industrial areas of the district are towns of Meerut, Hastinapur, Mawana and Sardhna, where speedy development of the industries can be seen. Under the large scale industry, there are 21 big industries including 5 sugar mills. The main sugar mills are located in Mawana and Daurala. There is one rubber factory i.e. Modi Rubber Industry Pvt. Ltd. located in Modipuram where high quality of tyres are manufactured in plenty for heavy vehicles. There is also a spinning mill in the district.

Partapur and Mohkampur are also industrial estates in the district. In addition to these industries, there is one flour mill as well as other small scale industries where manufacturing of agricultural equipments, electrical and automobile parts, hand pump parts, foundry, nuts and bolts, production of aluminium and steel utensils, distillery, card boards, transformer, tyre and tube and cotton fibre are being carried out.

Trade and Commerce

Meerut district is an important trading centre of western Uttar Pradesh. Main items that are exported to other parts of the country are gur (molassess), sugar, cloth, wheat, scissors, wine, blankets, sports goods, ayurvedic medicines, iron furniture etc. The most important commodities that are imported into the district from other parts of the country are iron, wood, cloth, tobacco, yarn, cement, leather goods, electrical items, sports goods raw material, petroleum, medicine etc. The district has trade links with other parts of the country.

Transport

Proper network of transport has played an important role for the all round development of the district. It is well connected by rail and road. Direct bus services has been provided to Delhi, Agra, Dehradun, Hardwar, Bareilly, Moradabad, Lucknow, Muzaffarnagar, etc. There are 269 bus stations in the district, out of which 249 are in rural areas and 20 in urban areas. Total length of road during 1997-98 was 1,990 km., out of which, 874 km was managed by Public Works Department, 685 km by local bodies and 431 km under different departments.

Rail services are directly linked with the country's capital i.e. New Delhi and state capital Lucknow. In addition to this rail services are also linked with the main cities of the country. 11 Railway stations are in the district, out of which 8 are in the rural areas and 3 in the urban areas. Only broad gauge railway track facilities are available in the district . The length of the broad gauge track is 56 kms only .

Electricity and Power

In order to increase the economy of the district, efforts are being made to increase the supply of electricity regularly. Electricity is required to operate tube well for irrigation and for the production of different items in the industry etc. The necessity of electricity has become part and parcel of the life of people everywhere. All the inhabited villages and urban areas have been electrified. 576 Harijan Basti and 34,119 tube wells have also been electrified.

Gram Panchayat and Village Development

A Gram Panchayat acts as the executive of the Gram Sabha. The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the gram Sabha generally elect a small committee of 7 to 15 members from among themselves who constitute the Village

Panchayat. It is necessary that the Village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body which looks after the various problems of the village and takes steps to improve the condition of the villagers.

Formerly the term of the Gram Panchayat differed from state to state. It ranged between three to five years. But the new Panchayat Raj Act of 1993 has fixed a uniform five year term for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duties faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained before hand. The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch. Decisions are taken by the majority vote. In case of a tie the Sarpanch can also use his casting vote.

In order to be elected to a Village Panchayat, a candidate should possess the following qualifications:

(1) He should be a resident of the village concerned and his name should be in the voter's list of the village.

(2) He should be twenty-five years old.

(3) He should be mentally and physically sound.

(4) He should not be a proclaimed offender.

The members of the Gram Panchayat elect a Sarpanch and a Vice-Sarpanch from amongst its own members. They may have some elderly members forming a special committee to make the working of the Panchayat more smooth and meaningful. All these people are honorary and do not get any pay. A paid secretary to the Panchayat is appointed by the district authorities in consultation with the Panchayat concerned. A Treasurer may also be appointed if the Panchayat is larger and much accounts have to be obtained.

A Gram Panchayat is entrusted with various social, economic and judicial functions:

(1) It provides civic amenities to the people of the village.

(2) It gets a primary school opened in the village and supervises its work.

(3) It looks after the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.

(4) It gets the Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a center.

(5) It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.

(6) It arranges for sufficient irrigational facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.

(7) It manages and maintains the common property of the village.

(8) In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fines upto Rs. 100.

The state government determines the number of Panchas according to the population of the village eg. in Uttar Pradesh the number of Panchas is between 15-30. In 1999-2000 the number of Panchas in Meerut was 465.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.-

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can

be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.--

Semi-permanent houses

Houses in which either the wall or the roof is made of—permanent material and the other is made of temporary material.-

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.- In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house-

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.—

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like

a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.-

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.—

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village-

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village'

for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.-

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

-For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and-

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:—

i) a city or town with one or more contiguous outgrowths;—

ii) two or more adjoining towns with their outgrowths; and—

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001,

it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.-

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and— Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.-

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Dhangar
28 Dhanuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
33 Dusadh
34 Gharami
35 Ghasiya
36 Gond
37 Gual
38 Habura
39 Hari
40 Hela
41 Kalabaz
42 Kanjar
43 Kapariya
44 Kharwal (excluding Banbasi)
45 Khairaha
46 Kharwar
47 Khatik
48 Khorot
49 Kol
50 Kori
51 Korwa
52 Lalbegi
53 Majhwar
54 Mazhabi
55 Musahar
56 Nat
57 Pankha
58 Parahiya
59 Pasi, Tarmali
60 Patari
61 Rawat
62 Saharya
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned

by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.-

Literate-

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work-

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker-

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.-

Non worker-

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.-

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer-

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.-

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of

the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population-.

Population density-

Population density is the number of persons inhabited per square kilometer of the area.-

Age-

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage-

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.-

Type of latrine and method of disposal -of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village

or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term

of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution :

The total population of the district is 2,997,361 in which 1,545,378 live in rural and rest 1,451,983 in urban parts. There are three tahsils in district namely Sardhana, Mawana and Meerut. The most populous tahsil is Meerut followed by Mawana. Sardhana is least populated tahsil. the urban population in the district is about 48.4 per cent The urban population is maximum at 66.5 per cent in Merrut tahsil. There are 674 revenue villages in the district, out of which 622 are inhabited at the 2001 Census and remaining 52 are inhabited. The total rural population of 1,545,378 is spread over 12 CD Blocks. The most populous CD Block is Rajpura with a population of 163,425 but the maximum number of inhabited villages (93) are in Hastinapur CD Block. About 40 per cent of populated villages have a population between 2000 to 4999 and such villages form as high as 50.0 per cent of total populated villages in Machra CD Block. The population density in the rural district is about 674 and the highest proportion (70.7 percent) of villages are with a population density range of 501+ per square kilometre, Such villages contain as much as about 89.2 per cent of total rural population.

Size - Class and Status of Towns :

In the total urban population of 1,451,983 as much as 1,068,772 live in Meerut (N.N.). The next big town is Meerut (C.B.) with a population of 92,944. Meerut is clas I town having the civic status of Nagar Nigam (N.N.). Among rest of towns, 2 towns are Nagar Palika Parishad (NPP), 10 are Nagar Panchayat, one cantonment Board and 2 census towns.

Population growth :

At the present territorial jurisdiction the population of the district was 2,417,513 at 1991 Census and growing by 24.0 per cent during the decade 1991-2001, it is 2,997,361 at 2001 Census. The decadal growth at 24.0 per cent in the district has been at lower level than the state at 25.8 per cent.

Population Density :

The district has an area of 2590 square kilometre. The population density in the district is 1157. In the rural areas of the district, the density is about 660.

Sex - Ratio :

The sex-ratio in the district at 872 is lower to 898 at the state level. Indeed the sex-ratio at the district has all along been lower in the district as against to the state since 1901. As against to urban areas of the district, the sex-ratio is higher in rural areas upto the year 1971. From 1981 to 2001 sex ratio in urban areas remained higher than rural areas. Among tahsils, highest sex-ratio is in Sandhana and Mawana and lowest in Meerut. Among CD Blocks the sex-ratio is highest in Machra at 885 and lowest in Meerut at 849. Out of 622 inhabited villages in the district there are about 4.0 per cent villages (with 0.2 per cent of rural population) which are having a sex-ratio below 700. In the urban parts of the district the sex-ratio is 874 and highest 916 in Kithaur (NP) and lowest 741 in Meerut (C.B.). The sex-ratio in the age-group 0-6 is 857 in the district which is lower than the state being at 916. As against a sex-ratio of 853 in the age-group 0-6 of rural population of the district, it is highest at 870 in Sarurpurkhud and Kharkhoda Block and lowest at 835 in Janikhurd CD Block. It may be noted that out of 622 inhabited villages in the district in over 9.3 per cent of villages with 2.6 per cent of rural population the sex-ratio in the age-group 0-6 is less than 700. As against the 0-6 age group sex-ratio of 853 in the rural area of the district it is 862 in urban areas. Among towns this sex-ratio is highest at 933 in Kithaur and lowest at 748 in Daurala.

Work Participation Rate :

In the total population of the district of 2,997,361 as much as 29.9 per cent are workers and rest 70.1 per cent are non-workers. Among workers, 24.6 per cent are main workers and rest of 5.3 per cent are marginal workers. In absolute terms males outnumber females both as main worker and marginal workers. The extent of total workers is highest at about 33.7 per cent in Mawana tahsil and lowest at about 27.8 per cent in Meerut tahsil. In case of marginal workers the proportion is highest in Mawana tahsil as 8.5 per cent in comparison to only about 3.8 per cent in

Meerut tahsil. The extent of workers and non-workers in rural areas is 33.1 and 66.9 per cent. In the district among workers 24.2 per cent are cultivators and 58.5 per cent other worker, 26.1 per cent female workers are engaged as cultivators.

Literacy :

In the district about 64.8 per cent population is literate. The literacy is about 67.0 per cent in urban areas and about 62.7 per cent in rural areas. The male literacy is as high as 75.0 per cent as against about 53.1 per cent female literacy, and, therefore, the gap in male/female literacy rate is 21.9 percentage points. In rural areas among 12 CD Blocks, the highest literacy is at 67.4 per cent in Rohta and lowest 54.1 per cent in Sarurparkhurd. The literacy among males in rural areas is about 75.7 per cent in comparison to about 47.7 per cent among females. The lowest female literacy of about 40.6 per cent is in Sarurpur Khurd CD Block. The gap in male/female literacy rate is highest in Hastinapur CD Block which is about 30.1 per cent. In 41.2 per cent of villages covering about 43.2 per cent of rural population, the literacy range is 61 to 70 per cent. Among urbanites in the district, as much as about 74.3 per cent males are literate as against about 58.6 per cent females. The highest urban literacy is in Meerut (CB) (80.2 per cent) and lowest in Sewalkhas (40.9 per cent). The maximum male literacy is also found in Meerut (CB) at 84.9 per cent and lowest at about 52.9 per cent in Sewalkhas. However, the highest female literacy is in Meerut CB at 73.8 per cent and lowest at about 27.2 per cent in Sewalkhas. Still, the maximum gap in male-female literacy rate at 28.0 per cent is found in Karnawal (NP). The literacy among scheduled castes in the countryside is about 59.3 per cent and about 62.9 per cent in towns. The literacy rate for scheduled tribes is about 33.3 per cent in rural areas and 50.3 per cent in urban areas.

(viii) Brief analysis of PCA data based on unit tables 1-36.

The district throw up vivid picture of its population by varying parameters at the 2001 Census. Among few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Sardhana				502,384	412,741	89,643				17.0	17.8
2	Mawana		N.A		687,066	527,876	159,190		N.A		22.7	23.2
3	Meerut				1,807,911	604,761	1,203,150				62.5	66.5
	District Total	**2,417,513**	**1,329,037**	**1,088,476**	**2,997,361**	**1,545,378**	**1,451,983**	**24.0**	**16.3**	**33.4**	**45.0**	**48.4**

The growth rate of the district for total, rural and urban areas and percentage of urban population to total population is given in the table. The decadal growth rate of the district is 24.0 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 16.3 and 33.4 per cent respectively . Out of the total population of the district 51.6 per cent lives in rural areas while 48.4 per cent lives in urban areas of the district. The proportion of urban population has increased during the decade from 45.0 per cent in 1991 to 48.4 per cent in 2001 in the district. Urban population is concentrated in Meerut tahsil while other tahsils have higher rural population.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Sarurpur Khurd	34	143,182	76,582	66,600	1 (2.9)	1	0
2	Sardhana	47	133,561	71,273	62,288	2 (4.3)	90	74
3	Daurala	51	135,998	72,429	63,569	1 (2.0)	1	0

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of 622 inhabited villages, 46 (7.4 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 38 villages having 6.1 per cent villages of the district while in the size class of 500-999 population therefore 67 villages with 10.8 per cent of the total villages in the district. 157 villages (25.2 per cent) are in the size class of 1,000-1,999 and 248 villages (39.9 per cent) are in the size class of 2,000-4,999. 58(9.3 per cent) villages in the district fall in the ranges of 5,000 -9999 population. There are 8 (1.3 per cent) villages having population of 10,000 persons and above.

TABLE - 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL

(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified - NIL

(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district.

TABLE - 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	11	1 8	137	0 0
11-20	5	0 8	221	0 0
21-50	16	2 6	3,001	0 2
51-100	25	4 0	5,054	0 3
101-200	17	2 7	10,557	0 7
201-300	30	4 8	37,023	2 4
301-500	78	12 5	110,582	7 2
501 +	440	70 7	1,378,803	89 2
Not known	0	0 0	0	0 0
District Total	**622**	**100.0**	**1,545,378**	**100.0**

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 440 accounting for 70.7 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 89.2 per cent population. The lowest ranges of 0-10 & 11-20 persons per sq. km. cover 11 villages (1.8 per cent) and 5 villages (0.8 per cent) respectively. 78 villages (12.5 per ent) have high density with 301-500 persons per sq. km while the corresponding proportion in the lower range of 21 to 50 is 2.6 per cent of the total inhabited villages having 0.2 per cent population of the district. In the medium density ranges of 51 to 100 and 101-200 account for 4.0 and 2.7 per cent of inhabited villages respectively. Both these ranges constitute 1.0 per cent rural population. District rural density is 660.

TABLE - 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	877	891	836
1911	916	922	866	848	870	779
1921	908	918	834	851	886	748
1931	903	916	813	839	875	738
1941	907	922	824	848	890	743
1951	908	922	827	826	851	770
1961	907	921	817	839	850	810
1971	876	884	826	830	833	823
1981	882	889	850	841	833	854
1991	876	879	864	858	844	875
2001	898	904	876	872	869	874

NOTE- Sex Ratio has been defined here as the number of females per 1000 males

As per 2001 Census sex-ratio of 872 females per 1,000 males has been recorded in the district against the state average of 898 The sex-ratio of the district was low as compared to the state average figures from 1901 to 2001. The lowest sex ratio of 826 females per 1000 males was recorded in the district during 1951. In the state it was lowest 876 in 1971 and 1991. It is also observed that the proportion of females in rural areas is higher than that of urban areas in both district and state except in the year 1981, 1991 and 2001 in the district.

TABLE - 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Sardhana	877	874	892
2	Mawana	877	869	900
3	Meerut	868	865	870
	District Total	**872**	**869**	**874**

Table-6 gives sex-ratio for total, rural and urban areas at tahsil level as per 2001 census. There are 872 females for every thousand males in Meerut district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 869 and 874 females respectively. The rural sex-ratio in the tahsils varies between 865 in Meerut tahsil and 874 females per 1,000 males in Sardhana tahsil. The sex-ratio in Mawana tahsil is 869 and equal to district rural average (869) In urban areas the highest sex-ratio is recorded in Mawana (900) and the lowest is in Meerut urban (870).

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Sarurpur Khurd	870
2	Sardhana	874
3	Daurala	878
4	Mawana Kalan	860
5	Hastinapur	858
6	Parikshitgarh	871
7	Machra	885
8	Rohta	856
9	Janikhurd	861
10	Meerut	849
11	Rajpura	876
12	Kharkhoda	871
	District (Rural) Total	**869**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 869 females per 1,000 males. Among the C.D. blocks the highest sex-ratio of 885 is found in Machra C.D. block and is followed by Daurala (878) while the lowest 849 is recorded in Meerut C.D. block. The sex-ratio in 7 C.D. blocks, out of twelve C.D. blocks is higher than the district rural average of 869 and in the remaining five blocks, this value is below than the district average.

TABLE - 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	25	4 0	2,844	0 2
700-749	2	0 3	6,333	0 4
750-799	39	6 3	49,809	3 2
800-849	163	26 2	348,478	22 5
850-899	272	43 7	844,792	54 7
900-949	100	16 1	276,978	17 9
950-999	11	1 8	14,912	1 0
1000-1099	4	0 6	507	0 0
1100+	6	1 0	725	0 0
District Total	**622**	**100.0**	**1,545,378**	**100.0**
Sex ratio (Rural) for District			**869**	

Table 8 presents the distribution of villages by sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 272 accounting for 43.7 per cent of the total villages having largest population of 54.7 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by sex-ratio range of 800-849 which accoutns for 163 villages (26.2 per cent) and 22.5 per cent population. The highest range of 1,100 & above claims 6 villages (1.0 per cent). This range shares 725 rural population of the district while in the sex-ratio range of 900-949, there are 100 villages 16.1 per cent). In remaining sex-ratio ranges of 1000-1099,950-999, 750-799, 700-749 and less than 700, the number of villages are 4 (0.6 per cent), 11 (1.8 per cent), 39 (6.3 per cent), 2 (0.3 per cent) and 25(4.0 per cent) respectively. In these ranges, the percentage of population is comparatively low.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4

		Urban	16,621	8,886	7,735	870
2	Mawana	Total	125,727	67,688	58,039	857
		Rural	97,532	52,651	44,881	852
		Urban	28,195	15,037	13,158	875
3	Meerut	Total	296,004	159,464	136,540	856
		Rural	113,378	61,205	52,173	852
		Urban	182,626	98,259	84,367	859
District Total		**Total**	**517,960**	**278,947**	**239,013**	**857**
		Rural	**290,518**	**156,755**	**133,753**	**853**
		Urban	**227,442**	**122,182**	**105,260**	**862**

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group 0-6 is 5,17,960 persons comprising 278,947 males and 239,013 females. The total sex-ratio in this age-group works out to be 857 females for every thousand males in the district. The proportion of females in rural areas is lower than that of urban areas. The sex-ratio in rural and urban areas comes 853 and 862 females in this age-group respectively. The rural sex-ratio in tahsil varies between 852 each in Meerut and Mawana tahsils and 855 in Sardhana tahsil. The sex-ratio of rural areas of Sardhana tahsil is higher than the district rural average (853). Meerut tahsil has lowest sex-ratio of 868 females among the total population, as also in the sex-ratio of children. In urban areas, the highest sex-ratio is recorded in Mawana urban (875) and the lowest is found in Meerut urban (859).

TABLE 11 . SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial No	Name of C D block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Sarurpur Khurd	30,320	16,217	14,103	870
2	Sardhana	24,398	13,198	11,200	849
3	Daurala	24,890	13,494	11,396	845
4	Mawana Kalan	21,647	11,716	9,931	848
5	Hastinapur	18,547	10,047	8,500	846

12	Kharkhoda	25,995	13,899	12,096	870
	District (Rural) Total	**290,518**	**156,765**	**133,753**	**853**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 853 for the district (rural). The sex-ratio of C.D. block varies between 835 to 870. It is highest in Sarurpur Khurd and Kharkhoda C.D. blocks i.e. 870 followed by 869 in Parikshitgarh C.D. block and lowest 835 females is found in Jani Khurd C.D. block. The sex-ratio of 4 C.D. blocks are higher than the district rural (853) while in remaining 8 C.D blocks., it is below than the average of the district.

TABLE - 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of popu-lation
1	2	3	4	5
Less than 700	58	9.3	7,632	2 6
700-749	51	8 2	16,130	5.6

900-949	86	13 8	51.907	17 9
950-999	33	5 3	14,094	4 9
1000-1099	37	5.9	8,318	2 9
1100+	30	4.8	3,027	1 0
District (Rural)Total	**622**	**100.0**	**290,518**	**100.0**
Sex ratio (Rural) for District			**853**	

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 121 (19.5 per cent) having largest population (28.5 per cent) in the district (rural) fall in the sex-ratio range of 850-899 females per 1,000 males in age of 0-6 years It is followed by the sex-ratio range of 800-849 which claims 118 villages (19.0 per cent) and 24.3 per cent population. Next to it are 88 villages (14 1 per cent) are in the range of 750-799 with 12.4 per cent population. 86 villages (13.8 per cent) having 17.9 per cent population fall in sex-ratio range of 900-949. In remaining sex-ratio ranges of less than 700, 700-749, 950-999,1000-1099 and 1100+ claim less number of villages and these are distributed as 58 (9.3 per cent), 51 (8.3 per cent), 33 (5.3 per cent), 37 (5.9 per cent) and 30 (4.8 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 327 having population (65.2 per cent) fall in the higher sex-ratio ranges of 750 to899 and above.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

		Rural	**1,545,378**	**326,052**	**13**	**21.1**	**0.0**
		Urban	**1,451,983**	**226,640**	**223**	**15.6**	**0.0**

Table 14 depicts the distribution of scheduled castes and scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 2,997,361 total population of the district, 18.4 per cent of the total population belong to the scheduled castes and zero per cent to scheduled tribes. The percentage of Scheduled Castes population constitutes 21.1 per cent rural and 15.6 per cent urban. The highest percentage of total Scheduled Castes population is recorded in Mawana tahsil (19.8) while the lowest is found in Sardhana tahsil (17.5) The proportion of Scheduled Tribes population is zero and zero per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in tahsil of Meerut which alone accounts for 236 scheduled tribe population in the district.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

District (Rural) Total		**1545,378**	**326,052**	**13**	**21.1**	**0.0**

Table 15 shows distribution of scheduled castes and scheduled tribes population in each C.D. block of the district. 21.1 per cent of rural population of the district belongs to scheduled Castes and zero per cent to scheduled tribes. At C.D. block level, scheduled castes population varies between 11.1 per cent in Sarurpur Khurd and 28.3 per cent in Daurala C D block The other C.D blocks containing the highest percentage of Scheduled Castes are Hastinapur (25.6), Rajpura (25.5) and Rohta (25.1) The highest number of 7 persons of Scheduled Tribes population is counted in Rohta C.D. block and is followed by Janikhurd C.D block with 6 persons. In no other C.D. blocks, scheduled tribes population exist.

TABLE - 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	60	9 6	0	0.0
Less than 5	61	9.8	3,501	1 0

76 and above	17	2.7	4,897	1.5
District Total	**622**	**100.0**	**326,052**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 60 villages accounting for 9.6 per cent of total 622 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5per cent in 61villages (9.8 per cent). In 67 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 130 villages constituting 20.9 per cent of the total villages. The range 21-30 and 31-40 per cent constitutes 143 and 81 villages respectively. Both these ranges together account for 36.0 per cent villages of the district. 43 villages fall in the range of 41-50 and 20 villages in the range 51-75. Seventeen (2.7) villages are such where the proportion of Scheduled Castes is more than 76 per cent. These villages form 1.5 per cent Scheduled Castes population of the district. The maximum 32.0 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

TABLE - 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in Table-21.The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 64.8 per cent in the district. This proportion in rural area is 62.7 per cent against 67.0 per cent in urban areas. In the district the literacy rates of males (75.0 per cent) is much higher than that of females (53.1 per cent). Among the tahsils, Meerut tahsil tops with 66.7 per cent literates followed by Mawana tahsil (62.5 per cent) Sardhana tahsil with 60.8 per cent literates stands at the bottom in the district. Of 3 tahsils, the literacy rates of Meerut tahsil is higher than that of district average. It is observed that in

urban areas of district the literacy rates are higher than the those of rural areas.

The gap between male and female literacy is high which comes to21.9 percentage points in the district The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 15.7 percentage points against the rural areas, where the gap between male and female literacy is 28.0 percentage points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

District (Rural) Total		**786,410**	**507,416**	**278,994**	**758,968**	**319,492**	**439476**	**62.7**	**75.7**	**47.7**	**28.0**

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 62.7 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 75.7 and 47.7 per cent respectively which shows very wide gap of 28.0 percentage points in male and female literacy. At C.D. block level, Rohta C.D. block has the highest rural literacy rate of 67.4 per cent while 80.1 per cent males and 52.6 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Sarurpur Khurd C.D. block (54.1 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 30.1 percentage points is found in Hastinapur C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population

100	2	0 3	2	0 0
District Total	**622**	**100.0**	**1,545,378**	**100.0**
Literacy rate for District		**64.8**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There are no literates in two villages (0.3 per cent) of the district and population of these villages is only 12 persons. 620 villages (99.7 per cent) have all the literate population. 104 villages accounting for 16.7 per cent of the total villages are in the literacy range of 51-60 per cent and 256 villages (41.2 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent is observed in 84 villages 13.5 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 178 villages 28.6 per cent). The range of 51-70 have the maximum number of 360 villages forming 57.9 per cent of the total inhabited villages.

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literatesMeerut UA is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (67.0). The literacy rate is quite high (above 80 per cent in six towns) among males. Female literacy rate is not far behind in Meerut CB (above 70.0 per cent). However, literacy rate among females is very low (27.2 per cent) in, Sewalkhas (NP) thus the gap in male female literacy rate is very high (15.7 percent) in Meerut urban areas.

Literacy rate for District (Rural)		**59.3**		

The Table 26 presents the distribution of villages by literacy rate range for scheduled castes population at the 2001 census. Inhabited villages which form 42.4 per cent of total rural scheduled castes population the literacy range is 61 to 70 per centages. In the district there are 562 inhabited villages with scheduled castes population. Only in two villages no literate scheduled caste person lives. All 22 inhabitants of these two villages are not literate.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 Census. The number of illiterates is less than literates in the district (urban) and towns.The percentage of literates is least in Sardhana among 16 towns but the gap in male/female literay rate is highest in case of Daurala town. The males in all the 16 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Meerut CB while female literacy with 56.6 per cent is second highest.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates

District (Rural) Total		**3**	**3**	**0**	**10**	**3**	**7**	**33.3**	**60.0**	**0.0**	**60.0**

Table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is more than literates in the district and CD Blocks. The literacy rate of the scheduled tribes population at 33.3 per cent is lower than the corresponding rate of 59.3 per cent in case of scheduled castes community. The gap in male and female literacy rates at 60.0 percentage points, however is more than what it is in case of the scheduled castes community (33.2 per cent). The literacy rate is highest in Rohta CD Block and nil in Janikhurd CD Block. The gap in male/female literacy rate in Rohta CD Block is in favour of males which is a normal phenomenon.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil/ level in the district as per 2001 Census. The proportion of total workers works out to 29.9 per cent of the total population in the district. The total workers are comprised of 24.6 per cent of main workers and 5.3 per cent of marginal workers and the remaining 70.1 per cent are non-workers.

Among the main workers, males participation rate in the district is 41.6 per cent and 5.1 per cent of females. Male and female marginal workers account for 5.0 and 5.6 per cent respectively. The percentage of females marginal workers is slightly higher than that of males. Total workers (main and marginal workers) among tahsils varies from 27.8 per cent in Meerut tahsil to 33.7 per cent in Mawana tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 1,545,378 total rural population of the district, 25.4 per cent has been categorised as main workers and the marginal workers constitute 7.7 per cent and the remaining 66.9 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 41.8 per cent males and 6.5 per cent females are in the category of main workers. Male and female marginal workers account for 6 0 and 9.6 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 33.1 per cent. At the C.D. block level, Hastinapur has highest proportion of total workers forming 43.2 per cent of the total population. It is followed by Mawana Kalan (40.8 per cent), Daurala (38.2 per cent), Janikhurd (33.2 per cent), Meerut (32.5 per cent) and Parikshitgarh (31.3 per cent). The lowest percentage of 28.2 per cent is recorded in Rajpura C.D. block.

Note Percentage of Worker to total worker are given in brackets

It can be seen from Table 34, that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 24.2 per cent of the total workers (main + marginal) and remaining 75.8 per cent of total workers are engaged as agricultural labourers (12.3 per cent), Household industry workers (4.9 per cent) and other workers (58 5 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 13.8 per cent in Meerut tahsil and 40.9 per cent in Mawana tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of female cultivators is 26.1 per cent which is higher as compared to 23.9 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the top position relegating agriculture to second position in the district and tahsils. The highest proportion of 74.0 per cent of other workers is recorded in Meerut tahsil while the lowest proportion of 36.1 per cent is found in Mawana tahsil.

Note: Percentage of Workers to total workers are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) are 33.1 per cent of total population. Among these workers, cultivators constitute 40.0 per cent 18.6 per cent agricultural labourers, 4.7 per cent household industry workers and 36.7 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercialy viable. Household industries also could not make much progress in rural areas as

reflected in the data and these household industries employ only 4.7 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (32.7 per cent) is lower than that of males (42.1 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 27.3 per cent in Daurala C.D. block to 51.2 per cent in Hastinapur C.D. block. Similarly for other workers, the lowest proportion is 22.5 per cent in Hastinapur C.D. block while 56.2 per cent is the highest in Rajpura C.D. block. The percentage of agricultural labourers and household industry workers together is quite low i.e. only 23.3 per cent in the district. The percentage of agricultural labourers is highest in Mawana Kalan (24.0) block and is followed by Daurala (21.3). In other C.D. blocks, this proportion is quite insignificant. Similarly, household industry workers varies in C.D. blocks between 1.9 per cent in Mawana Kalan and 7.0 per cent in Meerut.

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district Meerut. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (87.4), followed by Household industry workers (5.3 per cent) with male (4.7 per cent) and female (11.6 per cent). If we observe each town, the table reveals that highest percentage of cultivators (35.4) is recorded in Karnawal (NP).In the agriculture labourers category Meerut CB recorded very low percentage (0.5 per cent). Household industry workers are also very low (1.9 per cent) in Mohiuddinpur, (2.3 per cent) in Meerut CB and (2.0 per cent) in Hastinapur. As the usual trend recorded in the urban areas, other workers are in high percentage (96.9 per cent), in Meerut CB (91.5 per cent) in Meerut (N.N).

(ix) Brief analysis of the Village Directory and Town Directory data: Table 37-47

Major part of the District Census Handbook is Village and Town Directories. In this part non-census data are incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

Table 37 deals with the C.D block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, banks, agricultrual credit societies, approach by pucca road and power supply within the village. Out of 622 inhabited villages in the district 559 villages or 89.9 per cent have been provided with the education facilities of one type or the other. Similarly 351 villages in the district constituting 56.4 per cent have medical facility of one type or the other. Improved drinking water facility is availbale in 611 or 98.2 per cent villages. As regards, post office faciltiy which includes facilities like telegraph office and post & telegraph, 192 vilages consituting 30.9 per cent of villages have been provided with post office faciltiy within the village. 289 or 46.5 per cent of village have been provided the telephone facility, 252 or 40.5 per cent with transport facility, 73 or 11.7 per cent villages with bank facility and 76 or 12.2 per cent with agricultural credit societies. Similarly there are 569 or 91.5 per cent villages which have been linked with the pucca road. Total 606 or 97.4 per cent of village have been provided with the

electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation Daurala C.D. block has the highest 100 per cent villages where educational facility is available and lowest 68.8 per cent is found in Hastinapur. Medical facility is highest in Sarurpur Khurd (91.2 per cent) and lowest (30.1 per cent) in Hastinapur C.D. block. Improved drinking water is available to cent-percent villages in Sarurpur Khurd, Sardhana, Daurala, Rajpura, Mawana Kalan and Meerut blocks while in other blocks, it is above 90.0 per cent. Telephone facility is highest in Rohta (63.8 per cent) and lowest 31.5 per cent in Parikshitgarh C.D. block. Transport and communication is less developed in Meerut where only 8.7 per cent villages are covered by this facility whereas 73.5 per cent villages of Sarurpur khurd C.D. block are availing this facility. In the field of power supply all villages of 6 C.D.blocks have been covered fully except remaining 6 C.D. blocksin the district where electricity facility is covered in more than 90 per cent villages.

TABLE 38 : NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial No.	Name of C. D. block	Total population of inhabited villages	Type of amenity available				Type of amenity available

Note - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,545,378 persons in the district, 1,528,294 or 98.9 per cent have educational facility of one or the other type. Similarly 1,166,704 or 75.5 per cent population has medical facilities while 1,544,508 or 99.9 per cent have got improved drinking water facility. Post office facilities are available to 848,656 or 54.9 per cent population. Telephone facility is available to 955,544 or 61.8 per cent. Transport communications facility is available to 818,876 or 53.0 per cent. Bank facility is available to 342,947 or 22.2 per cent. 273,932 or 17.7 per cent have been provided with the facility of agricultural credit societies. 1,495,368 or 96.8 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,534,966 or 99.3 per cent rural population in the district. Similar pattern of availability of facilities is visible in the rural population at C.D. block level. However, in Sarurpur Khurd C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 65 villages do not have primary schools in their villages and out of these villages, children of 58 villages have to travel less than 5 kms. for schooling. 364 inhabited villages are deprived of middle school and 616 of degree college. Of these 239 avail the facility of middle school at a distance of less than 5 kms., 110 at a distance 5-10 kms. and the remaining 15at a distance of 10+ kms. In respect of degree college 90 avail this facility at a distance of less than 5 kms., 160

between 5 and 10 kms. and rest 366 villages at a distance of 10+ kms.

Similarly there are 595 villages in the district which have been devoid of Hospital facility and 588 villages which are deprived of PHC facilities. Of these 218 villages have the facility of Hospital available within 5 kms. while in respect of 189 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly a large number i.e. 188 villages have this facility at a distance of 10+ kms. As regards PHC 160 avail this facility at a distance of less than 5 kms., 286 at a distance of 5-10 kms. and the remaining 142 have to travel a distance of more than 10 kms. to avail this facility. Regarding Post Office, 430 villages do not have this facility in the village itself. Of these majority i.e. 318 have this facility at a distance of less than 5 kms., another 91 villages avail it at a distance of 5-10 kms. In the remaining 21 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 333 villages in the district which are without telephone facilitiy. Of these 187 avail this facility at a distance of less than 5 kms., 90 at a distance of 5-10 kms. and remaining 56 have to traverse a distance of 10+ kms.

For Bus service, out of 374 villages which do not have facility, 242 villages avail this facility at a distance of less than 5 kms., 117 at a distance between 5-10 kms. and 15 at a distance of 10+ kms.

In the entire district 554 villages are deprived of Commercial Bank & 611 of Co-operative Bank. Of these 554 villages which are deprived of Commercial Banks, 348 villages avail this facility at a distance of less than 5 kms., 173 between 5-10 kms. & the remaining 33 at a distance of 10+ kms. Regarding Co-operative Banks, out of 611 villages, 174 villages avail this facility at a distance of less than 5 kms., 308 at a distance of 5-10 kms. and remaining 129 at a distance of 10+ kms. 546 villages do not have agricultural credit societies. This facility to 351 villages is available at a distance of less than 5 kms., 152 at a distance of 5-10 kms. and the remaining 43 at a distance of 10+ kms.

\# Post office includes Post office, Telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 622 inhabited villages in the district, there are 149 villages which have nearest towns upto a distance of 5 kms. Of these only 141 villages forming 94.6 per cent are having the educational facilities of one type or the other and 84 villages constituting 56.4 per cent, have the medical facilities within less than 5 Kms. from the village, 42 villages forming 28.2 per cent have the facility of post office within 5 Km. from the village and 79 or 53.0 per cent have the facility of telephone. 60 villages constituting 40.3 per cent have been linked by transport service. 11 villages comprising 7.4 per cent have been provided bank facilities, while 18

villages constituting only 12.1 per cent have been provided with agricultural credit societies141 villages comprising 94.6 per cent have been provided with pucca road.

There are 404 inhabited villages in the district which fall in the distance range of 5-15 kms.

Of these 366 villages constituting 90.6 per cent have been provided with the educational facilities. 238 villages comprising 58.9 per cent have been provided with medical facilities. 127 villages constituting 31.4 per cent enjoy the post office facility. 181 villages comprising 44.8 per cent have been provided the telephone facility. 157 villages constituting 38.9 per cent have been linked with transport communications. 55 villages comprising 13.6 per cent have bank facility. 49 villages constituting 12.1 per cent are having agricultural credit societies, while 374 villages or 92.6 per cent are approachable by pucca road. 65 villages fall in the distance range of 16-50 kms. Of these, 73.8 per cent villages have educational facility, 43.1 per cent medical, 32.3 per cent post office, 41.5 per cent telephone and transport and communications are available to 52.3 per cent villages. Banks and agricultural credit societies facilities are available to 9.2 and 12.3 per cent of villages. Approach to pucca road is available to 50 (76.9 per cent) villages.

There is no village of inhabitation beyond a distance of 51 Km and more in the district.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Meerut district out of a total 622 inhabited villages, overwhelming 248 have a population in range of 2000-4999 persons. Of these, 246 villages (99.2 per cent) have education facility, 182(73.4 per cent) have medical facility, 248 (100 per cent) have improved drinking water facility. 113 villages (45.6 per cent) have post office facility148 (59.7 per cent) have telephone facility. 119 (48.0 per cent) have been linked by bus service 32 (12.9 per cent) have Bank facility. 32 villages (12.9 per cent) have been provided with the agricultural credit societies, 241 villages (97.2 per cent) have been linked with pucca road. 247 villages (99.6 per cent) have been provided with electricity.

Out of 67 villages, which fall in the population range of 500-999 persons, 63 villages (94.0 per cent) have been provided with the educational facility, 25 (37.3 per cent) with medical facility, all the 67 villages have improved drinking water facility. 3 villages (4.5 per cent) have been provided with post office facilities, 22 villages (32.8 per cent) with telephone facility, 23 villages (34.3 per cent) with transport facilities, 4 villages (6.0 per cent) with bank facility, 8 villages (11.9 per cent) with agricultural credit societies and 61 villages (91.0 per cent) have approach by pucca road. 65 (97.0 per cent) villages in this range have electricity.

157 villages fall in population range of 1000-1999 persons. All these villages have education, power supply and improved drinking water facilities, whereas 79 villages 50.3 per cent) enjoy the medical facility, 18 villages (11.5 per cent) have post office facility, 61villages (29.3 per cent) have telephone facility, 46 villages (29.3 per cent) have transport communications facilities, 9 villages (5.7 per cent) have bank facilities, 14 villages (8.9 per cent) have agricultural credit societies and 148 villages (94.3 per cent) have approach by pucca road.

There are 248 villages in the district which are covered under 2000-4999 population range. In this range, 246 (99.2 per cent) villages enjoy the facility of education, 248 (100.0 per cent) improved drinking water, 148 (59.7 per cenr) telephone, 119 (48.0 per cent) transport communications, 241 (97.2 per cent) approach by pucca road and 247 (99.6 per cent) villages power supply. 182 villages 73.4 per cent) have medical facility. 113 villages (45.6 per cent) have post office facility, 32villages (12.9 per cent) have bank facility, 32 villages (12.9 per cent) are having agricultural credit societies.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area in hectares	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area

	District Total:	**622**	**229183.9**	**83.3**	**96.0**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available in inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 622 inhabited villages in the district having a total area of 229,183.9 hectares. Of this, 83.3 per cent is cultivable and 96.0per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Sarurpur Khurd block with 34 villages have a total area of 18,871 hectares, of this 83.7 per cent of land is cultivable and of the aforesaid area 90.1 per cent is irrigated. In Sardhana block, all the 47 villages have a total land area of 18,234.8 hectares, of this 85.9 per cent of land is cultivable and of the aforesaid area 98.1 per cent is irrigated. In Daurala block, all the 51 villages have a total area of 16,937.0 hectares, of this cultivable area is 93.5 per cent and 94.1 per cent is irrigated. In Mawana Kalan block, all the 58 villages have a total area of

21,251.0 hectares. Of this, cultivable area is 81.3 per cent. Of cultivable area 100.0 per cent is irrigated. Hastinapur block with 93 villages has a total land area of 30,679.0 hectares, of this 61.7 per cent is cultivable area and out of this cultivable area 89.8 per cent is irrigated. Parikshit Garh block with 73 villages have a total land area of 31,215.9 hectares. Of this 71.4 per cent is cultivated area, out of which 97.0 per cent is irrigated. Machra block with a total 48 villages has an area of 17,324 hectares. Of this 100.0 per cent is cultivable area. and 99.7 per cent irrigated area.

Table 44 shows in urban areas of Meerut district the average number of primary schools per 10,000 population comes to 2.3 schools, 1.1 junior secondary/ middle. But ratio of secondary matriculation, senior secondary schools and colleges is zero per 10,000 population. Among the towns the ratio of primary is highest (8.1) in Phalauda while highest ratio of junior secondary / middle (3.7), secondary / matriculation (2.6) and senior secondry schools (3.0) is found in Meerut C.B.

College education is available only in six towns.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population

9	Meerut Cantt , CB	Handloom Cloth, Iron Furniture, Sport Goods	Steel Scrap, Iron Furniture, Sport Goods
10	Meerut, M Corp.	Cotton Cloth, Sports Goods, Scissors	Cotton Cloth, Sports Goods, Scissors
11	Parikshitgarh, NP	--, --, --	Gur, Sugar, Food grains
12	Phalauda, NP	Gur, Handloom Cloth, Engine Parts	Mango, Green Vegetables, Genda's Flowers
13	Sardhana, NPP	Khadi Cloth, Plastic Toys, Gur	Khadi Cloth, Gur, Mango
14	Sewal khas, NP	Vegetable, Wheat, Bricks	Gur, Food grains, Potato

Table 47 indicates most important articles manufactured and exported out of each town in the district. The district is well known for the manufacturing of scissors, sports goods, handloom cloth, cement, gur and sugar. The chief export items of the district are grains, vegetable, sports goods, cotton cloth, gur and sugar.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001:

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time have been added in the schedule. The following is the distribution of households by number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households

Data source: Census of India 2001, H- series· "Tables on Houses, Household amenities and Assets."

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 447,747 consisting of 231,969 rural and 215,778 urban households. 97,126 households belong to Scheduled Castes and 6,792 to Scheduled Tribes. 406,699 households are living in their owned houses constituting 90.8 per cent of total households. Of these households, the largest number of households 132,047 have occupied double room accommodation and is followed by single roomed accommodation numbering 116,113 households. Next position is claimed by 81,138households occupying three plus roomed accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with74,792 households while 2,609 households are without any exclusive room.

30,889 households living in rented accommodation account for 6.9 per cent of total number of households in the district. The largest number of 16,330 households are living in single room accommodation followed by 9,338 households in double room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering 10,159 forming only 2.3 per cent of total households are distributed in single room accommodation numbering 4,829 double room 3,166 and 1,284 in three room accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while urban areas show a reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

	District Total	**65.4**	**28.9**	**5.7**	**52.8**	**39.0**	**8.2**	**79.0**	18 0	3.0

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.
Note:-

Permanent:- 1 Permanent houses refer to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refer to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that 65.4 per cent of the households in the district had permanent houses. The trend is different in rural (52.8 per cent) and urban area (79.0 per cent). Among tahsils highest proportion of permanent houses were counted in tahsil Meerut (74.6per cent) followed by Sardhana (53.5 per cent) and lowest in Mawana (50 per cent). In respect of semi-permanent houses, the returns were 28.9 per cent of district level whereas among tahsils, in Mawana it was 39.4 per cent and lowest was 22.1 per cent in tahsil Meerut Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 18.0 in the district and in tahsils between 14.7 and 41.8 per cent. Temporary houses in the district lie between the range of 3.3 and 10.5 per cent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.Bathroom means bathroom within the house. Toilet means toilet within the house. Drainage means closed and open drainage.

The above table shows that out of total households of the district 95.4 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 93.9 and 97.1 per cent. Tahsil Meerut had higher order of proportion of households where percentage for rural area was 93.0 and 97.4per cent in urban areas. Electricity was available for 63.2 per cent of households at district level Bathrooms and toilet facilities were available in 59.3 and 61.8 per cent of households respectively Tahsil Sardhana poorly served in respect of these amenities. Similarly drainage facility was poor in Mawana,92.0 per cent with rural 92.3 per cent and urban 90.9 per cent. At district level drainage facility was available to 94.4 per cent households, whereas the proportion of rural and urban households accounted for 94.2 and 94.6 per cent respectively.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from Table 51 that cow dung cake with 46.0 per cent households use is the most prominent souce of fuel for cooking. It is followed by cooking gas which is used by 30.6 per cent household (9.6 per cent ruraland 53.1 per cent urban), 14.6 per cent households in the district use firewood as fuel, for cooking, the proportion in the rural area is 14 6 and in urban area also it comes to 14.6 per cent. Bio-gasis used for cooking in 2.7 per cent of the households (0.2 per cent in rural and 5.4 per cent urban households). The other methods like crop residue, coal/ lignite/ charcoal, kerosene and electricity account for 4.8, 0.1, 3.0 and 0.5 per cent respectively of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is cow dung cake. The table shows that cow dung cake , LPG (cooking gas) and firewood are the predominant fuel for cooking in the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial Number	Tahsil	Total/ Rural/ Urban	Total number of households	Total number of households availing banking services	Availability of household assets						
					Radio, Transistor	Television	Telephone	Bicycle	Scooter, Motor Cycle, Moped	Car, Jeep, Van	None of the specified assets
1	2	3	4	5	6	7	8	9	10	11	12
1	Sardhana	Total	73,002	39,335	31,931	31,429	3,651	43,750	8,292	1404	17391
		Rural	61,298	33,543	25,464	25,019	2,307	36,256	6,584	1055	15194
		Urban	11,704	5,792	6,467	6,410	1,344	7,494	1,708	349	2197

		Urban	181,471	95,865	83,085	123,775	43,012	117,897	61,790	13065	20873
		Total	**447,747**	**244,126**	**197,534**	**229,674**	**54,574**	**277,922**	**92,324**	**18192**	**84668**
District - Total		**Rural**	**231,969**	**129,804**	**99,050**	**88,277**	**7,930**	**139,339**	**25,837**	**4198**	**56734**
		Urban	**215,779**	**114,322**	**98,484**	**141,397**	**46,644**	**138,583**	**66,487**	**13994**	**27934**

Table 52 reveals that out of the total households 447,747 of the district, in all 54.5 per cent could avail banking services at district level while only 42.3, 51.3, 12.2 62.1, 20.6 and 4.1 per cent enjoyed the availability of household assets radio/ transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively. Only 18.9 per cent had none of the specified assets.

It also reveals that at tahsil level highest number of 142,529 of households were availing banking services in Meerut tahsils. The highest of none of specified assets 41,434 household in tahsil Meerut had the facility. On the other hand the lowest 39,335 households were availing banking services in Sardhana tahsil and 31,931 radio/transistor household asset also in Sardhana tahsil while the rest of the availabilities of household assets at the lowest foot were being availed in Sardhana tahsil and the number of the enjoyers of none of the specified assets was 17,391 in Sardhana tahsil. 142,529 households in Meerut tahsil followed by 62,262 household in Mawana tahsil were having banking services and the order of percentage of households having all other available household assets was higher in tahsil Meerut than other tahsils.

(xi) Major Social and Cultural Events, Natural and Administrative Developments and Significant Activities during the Decade

No social, cultural or natural changes took place during the last decade. However, a major administrative change took place during the last decade as district Meerut was bifurcated and district Baghpat was carved out of it.

(xii) Brief description of places of Religious, Historical or Archaeological importance in villages and places of Tourist Interest in the Towns of the district.

Meerut

Meerut is an old and historical city. There is a martyr's memorial in the city which is 110 feet high. Here eminent citizens of the city congregate on 10th

May of every year to pay homage to the martyrs. There is a big pond named 'Surajkund' in the city which was constructed by a rich businessman in the year 1914 which has been developed into a park. There is one 'Appu Ghar' which is a centre for sports and entertainment. In the cantonment area of the city there is a famous Baba Aughar Nath temple. Artistically created, this temple attracts thousands of pilgrims in the month of Shravan

Hastinapur

The town situated 37 kms away from Meerut, is famous for Jain Temples. This is a sacred place for the followers of Jain religion, as many of their Teerathankars are said to have been associated with it. Jain Temples and places of oblation still exist in Hastinapur.

'Jambu Deep' the religious place recently built by Jain community attracts tourists. Hastinapur was said to be the capital of epical Kauravas and Pandawas.

Parikshitgarh

The town is located 23 kms away from Meerut and 15 kms from Hastinapur. This place owes its name to the legendry king Parikshit. It is also said that the Rishi Vyasa completed the second half of Mahabharata here only. Only at about 6 km away, the ashram of famous Saint 'Shringi' is said to have existed. The place also made itself known by a pond called 'Gandhari Kund', the water that never dries up. The pond is said to have been constructed by 'Gandhari', the mother of Kauravas. This place is also famous for a well called 'Noval Dehu', the water of which is said to be possessing medicinal properties specially for the purpose of curing leprosy.

Sardhana

About 21 kms away from Meerut, this place is said to have been founded by king 'Sarkat'. During the fag end of the Mohammedan rule, the then ruler Mir Qasim gifted away the Muzaffarnagar – Aligarh tract to one of the European, Walter Reinhardt popularly known as 'Samroo' who married a local girl called 'Farzana' who was basically an Arab but later adopted Christianity. After the death of Walter, this girl later known as 'Begum Samroo' got a beautiful church constructed in Sardhna in 1822. This church came to be known as memorable piece of architecture in the year 1961. The 23rd pope declared it as 'Minor Basilica'. Today this place is famous for this church and attracting a flood of visitors from all over the world, especially from amongst the followers of Lord Christ.

(xiii) Major Characteristics and Contribution of the District

District Meerut has an important place in the freedom movement of the country as Veer Mangal Pandey had first blown the trumpet of freedom in Meerut during freedom struggle in 1857.

"Martyr Memorial" had been built near roadways bus station for the remembrance of the people who sacrificed their lives for the cause of the country during freedom struggle in 1857. The memorial is 110 feet long and on the top of it Emblem has been engraved. District administration declares local holidays on 10th of May as Martyrdom-Day every year to pay tribute to Martyrs by V.V.I.P., V.I.P. and the local people. Also cultural programmes are organized at night.

Nauchandi Fair the famous fair of north India, is being organized during March/April every year for the last one and a half century. This fair is said to be associated with 'Chandi Devi' of the Hindu Community and Mazar of Hazrat Wale Mian of Muslim Community. This fair is a symbol of Hindu-Muslim unity in Meerut.

District Meerut is a famous place of western Uttar Pradesh. This place has an important place in the field of agriculture, small scale industries (Handloom cloth, scissosrs, sports goods), trade and commerce. This district is also the nerve centre of political activity. First spark of resistance against British colonizers during freedom movement of 1857 started from here. Veer Mangal Pandey is still remembered with reverence in this district. The people of this district took part in every movement for freedom led by the great leaders of the country. After independence also, this district remained politically active. Chowdhery Charan Singh, a great leader of this district, led the nation as Prime Minister.

The district is agriculturally very developed and virtually is food bowl of Uttar Pradesh. It is famous for scissors, 'gur ki rewri' and 'khoye ki gajak', handloom cloth, sports goods. Scissors and sports goods are exported from here. Having proximity to the national capital, this district has developed tremendously as a trading centre.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized in English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii)The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

Column 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

Type of sources available for drinking water within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societes or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sport Clubs, Stadium/Auditorium is available in the village the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News paper/Magazines the same is noted in this column using following codes:

(i)	News paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

APPENDIX VIII

Number of villages under each Gram Panchyat (C.D. block wise)

Name of District - Azamgarh	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers	Location code	Number of households	Total population	Total SC population	Total ST population	Income and expenditure of Gram panchayat (in Rs.'000) Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttar Pradesh due to certain reasons.

APPENDIX IX

Statement showing number of girls schools in the villages

Name of District - Meerut

Name of District	Name of C.D. Block	Location Code	Name of Village Number	No. of Girls School
1	2	3	4	5

Information not available for this district

SECTION II
TOWN DIRECTORY

Section II - Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point

of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all	ASC

	. categories-Arts, Science and Commerce	
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table

and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State were the following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Meerut
q1	Persons	99	51
	Males	98	47
	Females	104	55
q2	Persons	117	81
	Males	117	78
	Females	118	86
q5	Persons	134	104
	Males	135	107
	Females	132	91

The child mortality by ages 1,2 and 3 years was lower in the district as against the State. The child mortality indicators in the district for females were also in the improved condition as compared to the State by ages 1,2 and 5 years.

ANNEXURE – III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE - 1991

Serial Number	Fertility Measures	Uttar Pradesh	Meerut
1	2	3	4
1	CBR	37.2	33.0
2	TFR	5.6	5.1
3	TMFR	6.3	6.2
4	GFR	172	157
5	GMFR	200	196
6	Mean age at marriage (1981-91)	17.3	17.9
7	Number of children ever born per ever married woman aged 15-49 years	4.6	4.3
8	Child woman ratio 0-4	631	663
	5-9	752	769
9	Child mortality indicator		
Source:	(i) Estimates of fertility indicators Uttar Pradesh Table # 2.23		
	(ii) District Profile Uttar Pradesh 1991.		

Measures of fertility is an important component to describe fertility and mortality rate of any area The table reveals that the Crude Birth Rate (CBR), which is the ratio of number of live births in a year to the mid year population,33.0 per thousand in the district. It is below the state of Uttar Pradesh i.e. of 37.2 per thousand. In respect of Total Fertility Rate (TFR), Total marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower proportion from the state figures. The conclusion that may be drawn is lower fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3 years for the state whereas 17.9 years has been recorded for the district. It may be observed that higher age at marriage leads to low rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever married women in the age group 15-49. The state and the district figures are placed as 4.6 and 4.3 respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 663 and 769 for the district while in case of the state the corresponding figures are 631 and 752.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other district of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 81.3 in 1991, while in 2001 it was 78.7 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 15.9 percent and 19.3 percent respectively. This shows in-migration from other state to this district was slightly increased in 2001 in comparison to 1991. At district level in-migration from other countries was 2.8 percent in 1991 and 2.0 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 80.2 percent and 72.9 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 19.0 percent and 26.4 percent respectively. The movement of population from other countries in the district was 0.7 percent each in 1991 and 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 70.1 percent in 1991 and 65.4 percent in 2001, while Muslim were 27.5 percent in 1991 and 32.6 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 57.2 percent male and 50.7 percent female to 59.7 percent male and 51.8 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. At district level it was 40.0 percent male and 45.8 percent female in 1991 and 38.1 percent male and 43.4 percent female in 2001. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.1 percent male and 4.7 percent female while it was 2.6 percent male and 3.4 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 48.1 percent male and 71.7 percent female in 1991 which declined to 38.1 percent male and 56.0 percent female in 2001. Primary level education was 10.5 percent male and 7.3 percent female in 1991, which was 16.1 percent male and 13.3 percent female in 2001. Middle level education was 11.2 percent male and 4.9 percent female in 1991 and 15.4 percent male and 9.2 percent female in 2001. Matriculation and above level of education was achieved by 16.5 percent male and 7.3 percent female in 1991 which was 27.1 percent male and 16.3 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0.02 percent. The remaining tongues have been merged in the column of "Total of other mother tongue".

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 72.7 percent person in 1991 and 78.8 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 26.1 percent and 19.4 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number at both the state and district, in both Censuses.
