MOTIF

GARH-MUKTESHWAR

The place, Garh Mukteshwar is betterly known for two aspect, one for its historical existence of a fort, built of pucca bricks that decayed through ages and eventually destroyed by Britishers in 1857, and the other for a place of religious importance in the district. Every year, on the occasion of 'Kartik Poornima' a big fair is held here and devotees in lakhs take dips in the holy river Ganga. Locally, the main attraction among the Ghats (bathing places) is the Brij Ghat where countless devotees take holy dip in the river. A month long fair, in the month of Kartik, has its own distinctive importance in the entire northern part of the country. The religious importance of Garh Mukteshwar is also based on the fact that people wishing to attain 'Moksha' endure 'Kalpvas' throughout the month of Kartik, the same way as is observed at Prayag, Hardwar, Ujjain etc. in the month of 'Magha' (January / February).

Annexure VII	Age, Sex and Education in the district, 1991 Census	489
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	491

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified

and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and their team of dedicated workers deserves all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Ghaziabad ranks 13th in terms of population in the state.
2. The percentage share of urban population in the district is 55.2 as against 20.8 of the population in urban areas of the state.
3. Ghaziabad district has population density of 2,866 persons per sq.km.which is much higher than the state average 690 persons per sq. km.
4. Ghaziabad district ranks 51st in terms of sex ratio (860) which is below the state average (898) females per one thousand males.
5. Ghaziabad district ranks 3rd in literacy i.e. 69.7 per cent which is higher than the state average 56.3 percent.
6. There are 38 uninhabited villages out of total 560 villages in the district.
7. Decadal growth rate of the district is 47.2 per cent. It is higher than the state average of 25.8 per cent.
8. Hapur tahsil has the highest number (196) of inhabited villages while Ghaziabad tahsil has the lowest 80 villages .
9. The district has 17 towns. Only one new town has been added after 1991 census, but no town has been declassified.
10. There are 538,009 households in the district accounting for 2.1 per cent of the total households in the state. The average size of households in the district is 6.1 persons.

Important Statistics

			State	District
			Uttar Pradesh	Ghaziabad

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

Present Ghaziabad city was established by Ghaziuddin, a minister of emperor Muhammad Shah in the year 1740. On his name it was named Ghaziuddin Nagar, which later on changed into Ghaziabad. The district of Ghaziabad came into existence on 14th November 1976. It was formed out of the areas of the old undivided districts, Meerut and Bulandshahr.

Although no much archaeological excavation has been made in the district, but archaeological excavation, research and surveys done in Hastinapur provides information about the history of prehistorical period in this district. Archaeological remains of old civilization are scattered far and wide around Hastinapur. Many items such as copper items, sharp edged weapons etc. found after the excavations of the old mounds relate them to copper age, contemporary of Indus Valley Civilisation. According to Jain tradition Hastinapur was very old town of India which was established by first Tirthankar Rishav Dev. Buddhist relate Hastinapur to Pre-Buddhist age.

The district is the part of the tract where Vedic Aryans established themselves first which became the first stronghold of Vedic Culture and Brahmanism. Kurus ruled the tract during later Vedic Age. They were dislodged by Mandas

who were overthrown by Mauryas in 324BC. The Sungas who followed Mauryas were supplanted by Kushanas. It became part of the Gupta empire in the middle of the 4th Century AD and with its decline Mukharis of Kannauj took over. It was part of the empire of Gurjar Pratihars of Kannauj during 9th and 10th Centuries. These rules held vast empire under their sway while the real power was excercised by local chiefs who ruled the area as feudatories becoming independent as and when the situation suited them. The numismatic evidence suggests that during the second and first centuries BC, this region might have been under the rules of Mathura kings who might have been initially Vassals of Sungas. Yandheyas rose to power in the middle of Ist Century and were feudatories of Kushanas but with the decline of their power in the third century AD, they ruled independently till they were brought to submission by Samudra Gupta about the middle of 4th Century. Tomar Rajputs established themselves as rulers of Delhi and surrounding areas and they largely ruled as feudatories of Gurjar Pratihars during middle of the ninth and tenth centuries AD. The third quarter of the 10th Century saw the rise of Chauhans who had a prolonged struggle with the Tomars. Taking advantage of this confusion a Dor Rajput Chieftain Hardatta, captured the district and he is credited to have founded the towns of Hapur in 983 AD which was called Harpur or Haripur. Dors where dislodged by Prithvi Raj Chauhan who is said to have built a fort in Loni. According to historian Farishta Sultan, Mahmud Gazni in his ninth army expedition had captured this district but the territory was vacated by Hardatt by paying the Sultan 25,000 Dinars and 50 elephants.

Military invasion by Muslim continued in this district. In the year 1192 AD decisive battle took place between Prithvi Raj Chauhan and Mohammad Ghori. In that war Prithvi Raj Chauhan was defeated and lost his life. With the defeat of Prithvi Raj Chauhan in 1192, the district was captured by Qutub-Ud-Din Aibak. It remained part of Delhi Sultanate till the establishment of the Mughal dynasty. During the reign of Sultan Mohammad-Bin-Tughlaq this area faced great turmoil due to repressive measures taken by the Sultan. Sultan was very ruthless and cruel and harassed the people of this region, who were forced to leave the area. They came back dud settled during the reign of Feroz Tughlaq. But during the rule of successors of Feroz Tughlaq, the situation again deteriorated due to the attack of Taimur Lang. Taimur Lang plundered and destroyed the whole region and killed thousand of people.

Lodi dynasty ruled this region till the battle of Panipat and Babur's ascendance to the throne of Delhi. During the reign of Akbar, the district was part of Subah of Delhi. In 1740, Ghazi-ud-din the Vazir of the Emperor Mohammad Shah founded the town. Ghaziabad, originally known as Ghazi-Ud-Din Nagar. On February 15, 1771, the emperor Shah Alam II agreed under a treaty to assign the territories including this district to Maratha Chief Mahadji Schindia. After his death he was succeeded by his nephew Daulat Rao Schindia in 1794. After the defeat of Marathas in the English-Maratha battle Daulat Rao Schindia was forced for a treaty at Surji Arjungaon and thus ceded possession of his empire in doab to the British.

After coming under the possession of British rule, the main events happened in this region were the famine of 1837-38 and the first movement for freedom in 1857. Fierce battle was fought between Englishmen and Indian soldiers in and around this district. In the subsequent years people of this district took part in every freedom movement. People celebrated the freedom with great enthusiasm on 15th August 1947.

(iii) Administrative Setup

The district of Ghaziabad lies in the doab of famous rivers of northern India, the Ganga and the Yamuna in the western part of the stat of Uttar Pradesh. The district has four tahsils namely Modinagar, Garhmukteshwar, Ghaziabad and Hapur. For development purposes, the district is divided into eight community development blocks. They are located at Bhojpur, Muradnagar, Razapur, Loni, Dhaulana, Hapur, Simbhawali and Garhmukteshwar. Community Development Blocks are further divided into 409 Gram Sabhas.

The district has 560 villages, out of which 522 villages are inhabited and 38 uninhabited. There are 17 towns in the district.

Jurisdictional Changes during 1991-2000

The major jurisdictional changes that took place during 1991-2000 was the creation of a new district of Gautam Buddha Nagar. Six villages of Hapur tahsil were also transferred to Dadri tahsil of Gautam Buddha Nagar district.

Name of Distt./ Tahsil	Jurisdictional Changes Subtracted
Ghaziabad	
1. Dadri Tahsil	Entire tahsil alongwith towns transferred to newly created Gautam Buddha Nagar district.
2. Hapur Tahsil	6 villages transferred to Dadri tahsil of Gautam Buddha Nagar district.

District administration:

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrat (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional magistrate is in-charge, who is now re-designated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanungos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various District department officer at District level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD etc., each having department district level officer. From the development point of view, the district is further divided into community development block. Block Development Officer (BDO) looks after development works at community development block level while Assistant Development Officers and Village Development Officers at Village level.

Under the police set-up Senior Superintendent Of Police in big districts and Superintendent of Police in smaller districts and Additional Supdt. Of Police (ASP) are in-charge of their respective area. Deputy Superintendent of Police (DSP) look -after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population of the area.

The Judicial administration of the District is headed by District and Session Judges. In addition to it there are several additional District Judges. Civil Judges, Chief Judicial Magistrate and Munsif Magistrate.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti ect. Come under Local self-government.

(iv) Physical Features

Location and Size :

District Ghaziabad is situated in the western part of the state. It is situated between the parallels of latitude 28°25' to 28°55' north and longitude 77°12' and 78°15' east. It is bounded on the east by district Moradabad and on the west by the state of Delhi and are separated by the rivers of Ganga and Yamuna in the east and west respectively. In the north, the district of Meerut and the southern boundary extends to the district of Bulandshahr and Gautam Buddha Nagar (New District carved out from Ghaziabad and Bulandshahr). The length of the district from east to west is nearly 88 km and maximum breadth from north to south is nearly 51km. The geographical area of the district is 1148 sq.km.

Physiography:

The district Ghaziabad is a part of Northern Upper Ganga Plain. The district is a level plain having low lands known as khadar in the east of the Yamuna and the west of the Ganga Rivers, the area lying in between rivers Ganga and Kali Nadi, Doab area of the Kali Nadi and Hindan river and area lying in between Hindan and Yamuna rivers. On the basis of Geology, Soils, Climate, Topography and Natural Vegetation, the district is divided into the following five sub-micro regions.

Yamuna Khadar:

The region is situated in the western part of the district in the Ghaziabad tahsil. Small depressions dead arems of the river, meanders are the main topographical features. Southern part of the plain is flood affected because of the confluence of Hindan with the Yamuna. This is a low lying area but level plain and fertile. Geologically, the region belongs to Alluvium. Dun gravels (Recent).

Hindan Plain:

Hindan plain which is triangular in shape lies in Ghaziabad and Modinagar tahsils and is delimited by watershed line of the Hindan in the east and the Yamuna in the west. Soil erosion is a common feature along the Hindan river. Its slope is towards south. Geologically, the region belongs to Alluvium, Dun gravels (Recent).

Hapur Plain:

The region is situated in the central part of the district. This plain is slightly lower in the central part than its eastern and western sides but the general slope is towards south. There are patches of Bhur or sand dunes on its eastern part. Geologically, the region belongs to Alluvium, Dun Gravels (Recent).

Garh Mukteshwar Bhur Tract:

The region is situated parallel to Ganga Khadar in Garh Mukteshwar tahsil. The slope is gentle and towards south. Geologically, the region belongs to Alluvium, Dun Gravels (Recent). This tract is fertile and developed.

Ganga Khadar:

This is narrow belt extending north-south along the Ganga river. Its western limit is marked by the natural levee. The area between the levee and Ganga river is subject to inundation every year. There are number of depressions, dead arm of the river and shallow ravines. Geologically the region belongs to Alluvium, Dun Gravels (Recent).

Drainage:

Major rivers flowing through this district are Yamuna, Hindan, Kali and Ganga. Brief description of each river is given below.

Yamuna:

This river demarcates the boundaries of the district of Ghaziabad and State of Delhi in the south-west. This river enters Ghaziabad tahsil in the north-west and flowing from north to south to Dadri tahsil of Gautam Buddha Nagar district.

Hindan:

This river flows from north to south after flowing about 40 km in the Ghaziabad tahsil it enters into Dadri tahsil of Gautam Buddha district.

Kali:

River Kali enters district Ghaziabad through Hapur tahsil. After flowing 27 km towards south it enters district Bulandshahr.

Ganga:

This river demarcates boundary from district Moradabad in the eastern side of district Ghaziabad in tahsil Garh Mukteshwar. It flows a length of 25 km in the district.

There are lakes and ponds in every tahsil of the district. In Ghaziabad tahsil 6 hectare land is covered under lakes and ponds, most prominent lake among them is Masuri. Hasanpur is famous lake of tahsil Hapur. It is spread in 35 hectare land. There are many small lakes and ponds in tahsil Garh Mukteshwar covering an area of 1649 hectare.

Climate:

The climate of the district is almost similar to the surrounding districts. In the summer, the climate is quite warm and likewise the winter is also quite cold. The rains are heavy and widespread. The monsoon start in the district in the last week of June and continues till the end of September. Winter season in the district spans from October of February, summer from March to June and the rainy season between July and September. Average maximum temperature of the district is 43.7°C and minimum being 4.4°C. The Normal rainfall during 1998was 732mm, and actual rainfall was 1013 mm. Dry air blows in the part of the year but humidity rises to 65-70 percent during monsoon months.

Natural Economic Resources:

Forestry:

District Ghaziabad is deprived of natural vegetation. Land covered under forest is 2470 hectare which is only 1.28 percent of total land. Afforestation drive has been taken up in the lowland area (Khadar) of Ganga and in the northern part of the district. Under social forestry, plantation of trees is being done on the sides of roads, railway tracks and canals. Chief species of trees found in the district are Sheesum (Dalbarjia Sisoo), Arjun (Tarmilelia Arjun), jamun (Sijijium Quminai), Babul (Ascasia Arribica), Mango (Magifero Indica), Neem (Ejediricta Indica), Mulberry (Moras Elba), Eucliptus (Eucliptus Hibreed), poplar (Popals species), Peepal (Fies Raliojosa), Bargad (Fies Baimlensis), Haldu (Adina Kardifolia), Tamarind (Tamarindus Indica), Jackfruit (AttoCorpus Hetrophilus), Gulmohar (Delonics Rezia)etc. Due to lack of natural vegetation, forestry is not an economically viable occupation. The trees available in the district only provides firewood and wood for furniture. Trees are being planted under N.R.I.P and R.L.E.G.P scheme.

Wild animals are also not in great numbers. The main species of animals found in the district are Monkey (Makaka Malata), Geedarh (Canis-Autas), Fox (Valpus Bengalesis), Bhedia (Canis Lupus), Hyena (Hyena Hyena),Sambhar (Sarvas Unocolor), Wild Boar (Sas Sakrofa), Rabbit (Lex Nigrokolis)etc. Species of birds mainly found in the district are peacock (Parvo Kristetus), Bater (Kotarnix Kotarnix), Pigeon (Colamba Livia), Bagula (Bubux livs), Saras (Grai Farmesus), Cukoo(Udinepis Scolopesia), Owl (Srix Lotarograpika), Sparrow (Pacer Homostics), Parrot (Psitkul Kramaro) etc. Main reptiles found are python, krait, Russel Viper, Tortoise etc.

Minerals and Mining:

Minerals deposits of any economic importance are not found in the district with the exception of some building materials such as Kankar (Course limestone) and Reh.

Soil:

Level of Calcium increases with the depth of the soil. The quantum of phosphoric Acid, Nitrogen and Carbonic is less in the soil of the district. Rich domat soil is found normally in the area lying in between the Ganga and Hindan rivers. Balui, domat is found in the area lying in between the Hindan and Yamuna rivers. Bhur land (sandy) is usually in the Khadar (low land) of Yamuna, Hindan and Ganga rivers. Vast alkaline land is mainly found around Bhojpur, Dhaulana and Loni C.D. blocks of the district.

Land and Land use Pattern:

According to statistics of land use available through Statistical bulletin of 1999, during 1997-98, net sown area was 145,784 hectare (72 percent of the total reported area), while present fallow and other fallow land was 5,135 and 5,941 hectare respectively. Cultivable waste land was 4,318 hectare, land used for other than agriculture was 31,663 hectare. Barren and uncultivable land was 5,088 hectare.

Agriculture and Crop Pattern:

Land surface of the district Ghaziabad is made of the fertile soil brought by the rivers the Ganga and the Yamuna for thousand years. Ghaziabad is an agrarian district. About 50 per cent of the workforce are engaged in agriculture related activities. The district is agriculturally well developed with extensive cultivation and availability of extensive irrigation facilities. There are three harvests in the district-Rabi (Spring), Kharif (Autumn) and Zaid (Summer). Main crops of the Rabi are wheat, gram, pea and barley while in the Kharif harvests, main crops sown are paddy, jowar and bajra. Wheat is the chief crop of the district which is sown in the 40.84 per cent of the total agriculture land followed by sugarcane which is sown in 34 per cent of the cropped area; Pulses, maize, oilseeds, Fruits and Vegetables are other crops grown in the district.

Agriculture department of the district looks after the problems of the farmers by providing training on improved seeds, modern method of cultivation and modern technology. The cultivators of the district can avail the services of 249 seed godown/fertilizer depot, 69 rural godowns, 8 insecticide depot, one seed farm, 22 cold storage and 4 agriculture service centres. For storages of crops during 1998-99 the district had 3 Warehousing godowns of Food Corporation of India, 4 managed by Central Warehousing Corporation, 10 State Warehouses and 17 ware housing godowns managed by Co-operative Sector.

Irrigation:

Availability of irrigation is the main factor of development of agriculture of the district. The development of canal network has contributed immensely in the economic progress of the district. The main sources of irrigation are canal, tube wells, pumping sets and well. During 1998-99, the district had 596 km long canal, 238 government and 18,211 private tube wells and 23,175 pumping sets. More than 52 percent of the agriculture land is irrigated by tube wells, 32 percent by wells and nearly 15 percent land is irrigated by canal.

Animal Husbandry:

Animal Husbandry plays an important role in the rural economy of the district. It provides draught power for cultivation as well as supplements the income of the farmers by animal husbandry products. According to live-stock Census of 1993, total bovine population was 130,518, buffaloes were 542,006, sheep 6,526, goats 62,733,horses and ponies 8,694, pigs 43,973 and other animals 96,099. For improving the stock and providing care for the live-stock there are 38 veterinary dispensaries, 60 animal development centres, 37 artificial insemination centres and 60 sub centres, one breeding farm, and 3 pig development centers.

Its vicinity to Delhi, which is a good market for milk has given a boost to dairying. The district is a bulk supplier of milk to both Delhi Milk Scheme and Mother Dairy. There are 342 Milk Co-operative societies with the membership of 18,986.

Fishery:

Fishes are abundantly found in the rivers and lakes of the district. The fishes that are found in the district are Rohu (Lovio Kalabasu), Nain (Sirhinas Bhrigla), Saur (Channa Marulipus), Chilwa, Bata, Mangur, Bhakur, Tengra, Khursa Karaunch etc. Fishermen of the district have a ready market in the metropolis of Delhi. Fisheries Directorate is promoting fishery as an alternative occupation in the district. Lakes and ponds under Gram Samaj are provided to fishermen on lease. During 1998-99 there were 4 departmental lakes with an area of 109 hectare. During the same period 7,100 thousand fingerlings were distributed to fishermen.

Industry:

The district has made a tremendous headway in industrial development. One of the important factors that has given rise to its pivotal position in industry is its proximity to Delhi. The industrial establishments are primarily concentrated in and around towns which include the industrial areas of Meerut Road, Bulandshahr Road, GT Road and Mohan Nagar. The places which have concentration of industrial units are Modinagar, Pilkhua and Hapur. The district has plastic and chemical based industries (Soap, paint and varnish, plastic products, p.v.c. pipes and tubes, plastic film, rubber etc.), paper based industries, metal based industries (rolling mill, steel tubes, agriculture equipments, tin containers, steel ignet .etc.), Food based (Sugar mills, vegetable oil etc.), Cotton and wollen clothes (Polyester yarn, towel, carpet etc.), Electricity goods, machine tools and equipments. Beside these, there are other industries such as bicycle parts, clock, Rooh Afza Syrup, Ceramic goods etc. In the small scale industries there are units of handloom, silk, furniture, leather goods, food products, paper, TV parts, candle, Iron and steel goods, chemical products, rubber and plastic goods, machinery parts, electrical goods etc.

Trade and Commerce:

With the outset of industrial development, the trend of trade and commerce in the district has taken a sea change. Earlier the main items of trade were agriculture based. But now industrial goods such as, electronic, auto parts, polyester yarns, rubber goods, generator, chemical products, medicines, clothes, vegetable and refined oil etc. are exported to other parts of the country. The main items which are imported are raw material, petroleum products etc. Ghaziabad, Hapur, Muradnagar, Modinagar, Pilkhna, Garhmukteshwar, Simbhawali and Loni are trade centres of the district.

Transport:

According to registration of vehicles, motor cars, jeep, private bus, state bus, lorry, motor cycle/scooter, taxi and tractor are main source of transportation. The district is served by rails as well as roads. The railway track in the district runs to a total length of 152 kms. There are 23 railway stations (including halts) in the district. The district is served by a total

length of 2,914 kms of mettalled road, out of which 1,242 km is managed by Public Works Department , 1,473 km by local bodies and 199 kms by other departments. National Highways accounted for 106 kms and 94 kms by state highway.

Electricity and Power:

Right from the beginning of twentieth century, emphasis was being given for the production of electricity for this region. Electricity for District Ghaziabad is being supplied from UP Grid. The total consumption of electricity was 1,524,641 thousand kwh during 1998-99. The bulk consumptions accounting for 673,289 thousand kwh was consumed by industries followed by 451,518 thousand kwh by agriculture sector and 261,237 thousand kwh by domestic light. During the same period 516 villages out of the total 535 inhabited villages have been electrified.

Gram Panchayat, its Composition, Jurisdiction and role in village Development:

Panchayats occupied an important position in the daily life and administration of the rural community. Panchayats were made responsible for promotion of education and medical relief, prevention of crime and the general well-being of people.

All adults of the village, constitute the Gram Sabha, elects members of the Gram panchayat. The Gram Sabha also elect a *Pradhan* (President) for a term of five years, an *Up-pradhan* (Vice- President) being elected by members of the Panchayat. There is also reservations of a few seats in the panchayat for members of Scheduled Caste and women. The number of members of Gram Panchayat is fixed by the government in proportion to the population of the village of villages constituting the Gram Sabha. There are 409 Gram Sabhas in the district.

The functions of the gram panchayat include construction, repair cleaning and lighting of streets, sanitation and prevention of epidemics, upkeep of buildings, land and other property belonging to it, registration of births and deaths, regulation of markets and fairs, opening of primary school, provision of drinking water and welfare of children, youth and woman.

The main sources of income of these bodies are levied by them, voluntary contributions and government grants.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway

with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural

pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Caste:

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Dhangar
28 Dhanuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
33 Dusadh
34 Gharami
35 Ghasiya
36 Gond
37 Gual
38 Habura
39 Hari
40 Hela
41 Kalabaz
42 Kanjar
43 Kapariya
44 Karwal
45 Khairaha
46 Kharwar (excluding Banbasi)
47 Khatik
48 Khorot
49 Kol
50 Kori
51 Korwa
52 Lalbegi
53 Majhwar
54 Mazhabi
55 Musahar
56 Nat
57 Pankha
58 Parahiya
59 Pasi, Tarmali
60 Patari
61 Rawat
62 Saharya
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes:

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue

should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at

home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned

at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the}} \times 1000$$

same age-group

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year.of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained

below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or

faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution :

The total population of the district is 3,290,586 in which 1,474,171 live in rural and rest 1,816,415 in urban parts. There are four tahsils in district namely Modingar, Ghaziabad, Hapur and Garhmukteshwar. The most populous tahsil is Ghaziabad followed by Hapur, Garhmukteshwar is least populated tahsil preceded by Modinagar. The urban population in the district is about 55.2 per cent. The urban population is maximum at 76.2 per cent in Ghaziabad tahsil. There are 560 villages in the district out of which 522 are inhabited at the 2001 Census and remaining 38 are un-inhabited. The total rural population of 1,474,171 is spread over 8 CD Blocks. There are 13 inhabited forest villages. The most populous CD Block is Loni with a population of 271,466 but the maximum number of inhabited villages (104) are in Hapur CD Block. About 28 populated villages have a population less than 200 and such vilages form as high as 5.4 per cent of total populated villages in Garhmukteshwar CD Block. Although the population density in the rural district is about 1661 the highest proportion (74.1 per cent) of villages are with a population density range of 501+ per square kilometre. Such villages contain as much as 91.6 per cent of total rural population.

Size - Class and Status of Towns :

In the total urban population of 1,816,415 as much as 968,256 live in Ghaziabad (NN) town. The next big town is Hapur with a population of 211,983. The above two are class I towns having the civic status of NN and Nagar Palika Parishad (NPP). Among other towns, 4 towns are Nagar Palika Parishad (NPP), 6 towns are Nagar Panchayat and 5 towns are census towns.

Population growth :

At the present territorial jurisdiction the population of the district was 2,235,675 at 1991 Census and growing by 47.2 per cent during the decade 1991-2001, it is 3,290,586 at 2001 Census. The decadal growth at 47.2 per cent in the district has been at higher level than in the state at 25.8 per cent.

Population Density :

The district has an area of 1,148 square kilometer. The population density in the district is 2,866. In the rural areas of the district the density is 1661.

Sex - Ratio :

The sex-ratio in the district at 860 is lower to 898 at the state level. Indeed the sex-ratio at the district has been all along lower in the district as against to the state since 1901. As against urban areas of the district the sex-ratio has been higher in rural areas from 1941 to 1991. Among tahsils, highest sex-ratio is in Garhmukteshwar and lowest in Ghaziabad, Among CD Blocks the sex-ratio is highest in Garhmukteshwar at 886 and lowest in Razapur at 839. Out of 522 inhabited villages in the district there are about 2.7 per cent villages (with 0.2 per cent of rural population) which are having a sex-ratio below 700. In urban parts of the district the sex ratio is 861 and highest of 887 in Ordinance Factory Muradnagar and lowest of 840 in Patala. The sex-ratio of population in the age-group 0-6 is 854 in the district. As against a sex-ratio of 863 in the age-group 0-6 of rural population of the district, it is highest at 886 in Garhmukteshwar CD Block and lowest at 830 in Muradnagar CD Block. It may be noted that out of 522 inhabited villages in the district in 8.6 per cent of villages with about 2.4 per cent of rural population the sex-ratio in the age-group 0-6 is less than 700. As against the 0-6 age group sex ratio of 863 in the rural area of the district is only 845 in urban areas. Among towns this sex-ratio is highest at 903 in Dasna and lowest at 790 in Patala.

Work Participation Rate :

In the total population of the district of 3,290,586 as much as 28.5 per cent are workers and rest of

71.5 per cent are non-worker. Among workers 24.3 per cent are main workers and rest of 4.2 per cent are marginal workers. In absolute terms males outnumber females as main worker and marginal workers. The extent of main workers is highest at about 24.9 per cent in Garhmukteshwar tahsil and lowest at about 23.5 per cent in Hapur tahsil. In case of marginal workers also the proportion is highest in Garhmukteshwar tahsil as 8.3 per cent in comparison to only about 3.0 per cent in Ghaziabad tahsil. The extent of workers in rural areas and non-workers in urban parts is higher. In the district among workers about 17.1 per cent are cultivators and 70.8 per cent other workers. Over 19 per cent of female workers are engaged as cultivators.

Literacy :

In the district 69.7 per cent population is literate. The literacy is 74.9 per cent in urban areas and 63.2 per cent in rural areas. The male literacy is as high as 79.8 per cent as against 58.0 per cent female literacy, and, therefore, the gap in male/female literacy rate is 21.8 per cent. In rural areas among 8 CD Blocks, the highest literacy is at 70.9 per cent in Loni and lowest at about 56.6 per cent in Garhmukteshwar. The literacy among male in rural areas is 75.9 per cent in comparison to 48.3 per cent among female. The lowest female literacy of 40.4 per cent is in Garhmukteshwar CD Block. Also the gap in male/female literacy rate is highest in this CD Block which is 30.5 percentage points. In 40.6 per cent of villages covering also 39.6 per cent of rural population the literacy range is 61 to 70. Among urbanites in the district, as much as 82.9 per cent males are literate as against 65.6 per cent females. The highest urban literacy is in Ordnance Factory, Muradnagar (86.4 per cent) and lowest in Faridnagar (53.9 per cent). The maximum male literacy is also found in Ordnance Factory Muradnagar at 94.1 per cent and lowest at about 65.1 per cent in Faridnagar. The highest female literacy is in Ordinance Factory, Muradnagar at 77.7 per cent and lowest at 41.2 per cent in Faridnagar. Still, the maximum gap in male-female literacy rate at 29.5 per cent is found in Dasna. The literacy among Scheduled Castes in the countryside is 59.0 per cent and 65.3 per cent in towns. The literacy rate for Scheduled Tribes is 76.9 per cent in rural areas and 75.9 per cent in urban areas.

(viii) Brief analysis of PCA data :

The district throw up vivid picture of its population by varying parameters at the 2001 Census. Among few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables.

TABLE-1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Modinagar	N.A.	N.A.	N.A.	555,420	299,658	255,762	N.A.	N.A.	N.A.	N.A.	46.0
2	Ghaziabad	N.A.	N.A.	N.A.	1,629,510	387,533	1,241,977	N.A.	N.A.	N.A.	N.A.	76.2
3	Hapur	N.A.	N.A.	N.A.	773,899	489,070	284,829	N.A.	N.A.	N.A.	N.A.	36.8
4	Garhmukteshwar	N.A.	N.A.	N.A.	331,757	297,910	33,847	N.A.	N.A.	N.A.	N.A.	10.2
	District Total:	**2,235,675**	**1,174,125**	**1,061,550**	**3,290,586**	**1,474,171**	**1,816,415**	**47.2**	**25.6**	**71.1**	**47.5**	**55.2**

The growth rates of each tahsil in the Ghaziabad district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 47.2 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 25.6 and 71.1 per cent respectively. Out of the total population of the district 44.8 per cent lives in rural areas while 55.2 per cent lives in urban areas of the district. The proportion of urban population has increased during the decade from 47.5 per cent in 1991 to 55.2 per cent in 2001 in the district. The highest proportion of urban population is recorded in Ghaziabad (76.2 per cent) tahsil and lowest is registered in Garhmukteshwar (10.2) tahsil. Urban population is concentrated in Ghaziabad tahsil while other tahsils are partly rural.

TABLE - 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages
			Persons	Males	Females		Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12	13

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 522 inhabited villages, 28 (5.4 per cent) are small size villages with population below 200 persons. In the size of 200 to 499 persons, there are 27 villages having 5.2 per cent villages of the district while in the size class of 500-999 population claims 49 villages with 9.4 per cent of the total villages in the district. 166 villages (31.8 per cent) are in the size class of 1,000-1,999, 195 villages (37.4 per cent) are in the size class of 2,000-4,999. 44 villages (8.4 per cent) are in size class 5000-9999 and 13 villages (2.5 per cent) are in size class 10,000 and above population.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL
(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL
(c) Declassified - NIL
(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE-4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	9	1.7	95	0.0
11-20	2	0.4	38	0.0
21-50	8	1.5	387	0.0
51-100	8	1.5	1,818	0.1
101-200	22	4.2	13,959	0.9
201-300	16	3.1	12,029	0.8
301-500	70	13.4	94,872	6.4
501 +	387	74.1	1,350,973	91.6
Not known	0	0	0	0.0
District Total:	**522**	**100**	**1,474,171**	**100.0**
Population Density (Rural) of the district:				**1,661**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 387 accounting for 74.1 per cent of the total inhabited villages of the district fall in the density range of 501 and above persons having 91.6 per cent population. The lowest ranges of 0-10& 11-20 persons per sq. km. cover 11 villages (2.1 per cent). 387 villages (74.1 per cent) have very high density with more than 501 persons per sq. km. while the proportion in the medium range of 201 to 500 is 16.5 per cent of the total inhabited villages having 7.2 per cent population of the district. In the lower density ranges of 21 to 50 and 51-100 persons account for 1.5 per cent each of inhabited villages.

TABLE-5 : SEX RATIO OF STATE AND DISTRICT, 1991-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	880	888	841
1911	916	922	866	855	858	836
1921	908	918	834	857	857	860
1931	903	916	813	845	855	787
1941	907	922	824	857	862	828
1951	908	922	827	854	863	818
1961	907	921	817	845	858	801
1971	876	884	826	829	841	800
1981	882	889	850	828	834	818
1991	876	879	864	840	841	839
2001	898	904	876	860	859	861

As per 2001 Census sex-ratio of 860 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly low as compared to the state average figures from 1901 to 2001. The lowest sex ratio of 828 females per 1000 males was recorded in the district during 1981 against the state average of 882 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in both district and state.

TABLE-6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Modinagar	863	857	871
2	Ghaziabad	852	840	856
3	Hapur	867	863	875
4	Garhmukteshwar	877	879	859
	District Total:	**860**	**859**	**861**

The table-6 gives sex-ratio for total, rural and urban areas at tahsil/sub-tahsil level as per 2001 census. There are 860 females for every thousand males in Ghaziabad district. It becomes clear from the table that sex-ratio in urban area is higher than that of rural area except Gharmukteshwar tahsil. The sex-ratio among rural and urban population is 859 and 861 females respectively. The rural sex-ratio in the tahsils varies between 840 in Ghaziabad tahsil and 879 females per 1,000 males in Garhmukteshwar tahsil. The sex-ratio in Hapur and Gharmukteshwar tahsil is higher than district rural average (859). In urban areas the highest sex-ratio is recorded in Hapur (875) and the lowest in Ghaziabad (856).

TABLE-7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Muradnagar	854
2	Razapur	839
3	Bhojpur	860
4	Loni	840
5	Dhaulana	862
6	Hapur	865
7	Simbhawali	866
8	Garhmukteshwar	886
	District (Rural) Total:	**859**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 859 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 886 females is found in Garh Mukteshwar C.D. block and is followed by

Simbhawali (866) while the lowest of 839 is recorded in Razapur C.D. block. The sex-ratios of Bhojpur,Dhaulana,Hapur,Simbhawali and Garh Mukteshwar C.D. block are higher than the district rural average of 859 females and in remaining blocks, this value is below the district average.

TABLE - 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	14	2.7	2,545	0.2
700-749	9	1.7	26,003	1.8
750-799	31	5.9	43,247	2.9
800-849	151	28.9	497,609	33.8
850-899	225	43.1	709,692	48.1
900-949	68	13.0	177,045	12.0
950-999	18	3.4	16,676	1.1
1000-1099	6	1.1	1,354	0.1
1100+	0	0.0	0	0.0
District	**522**	**100.0**	**1,474,171**	**100.0**
Sex ratio for District (Rural):			**859**	

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 225 accounting for 43.1 per cent of the total villages having largest population of 48.1 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849 which claims 151 villages (28.9 per cent) and 33.8 per cent population. The highest range of 1,100 & above have no villages. In the sex-ratio range of 900-949, there are 68 villages (13.0 per cent). In remaining sex-ratio ranges of 1000-1099,950-999,750-799, 700-749 and less than 700, the number of villages are 6 (1.1 per cent), 18 (3.4 per cent), 31 (5.9 per cent), 9 (1.7 per cent) and 14 (2.7 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 225 having maximum population (48.1 per cent) fall in the higher sex-ratio ranges of 850-899 females showing that in majority of villages the sex-ratio is significantly higher.

TABLE - 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of	Sex ratio
1	2	3	4
1	Babugarh	NP	885
2	Behta Hajipur	CT	843
3	Dasna	NP	866
4	Dharoti Khurd	CT	844

16	Ordinance Factory Muradnagar	CT	887
17	Patala	NP	840
18	Pilkhuwa	NPP	878
Sex ratio (Urban) for the district:			**861**

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 861 females per 1,000 males as a whole. Among the 17 towns of the district the sex-ratio varies between 840 and 887. Ordnaince factory Muradnagar (C.T) has the highest sex-ratio (887), while Patala (N.P) has the lowest sex-ratio of 840 females.

TABLE - 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

		Rural	92,234	49,454	42,780	865
		Urban	47,280	25,327	21,953	867
4	Garhmukteshwar	Total	63,338	33,753	29,585	877
		Rural	57,396	30,535	26,861	880
		Urban	5,942	3,218	2,724	846
	District Total:	**Total**	**566,447**	**305,514**	**260,933**	**854**
		Rural	**278,499**	**149,483**	**129,016**	**863**
		Urban	**287,948**	**156,031**	**131,917**	**845**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age-group 0-6 is 566,447 persons comprising 305,514 males and 260,933 females. The total sex-ratio in this age-group works out 854 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 863 and 845 females in this age-group respectively. The rural sex-ratio in tahsil varies between 841 in Modinagar tahsil and 880 in Garhmukteshwar tahsil. The sex-ratio of Ghaziabad tahsil, Hapur tahsil, and Garhmukteshwar tahsil are higher than district rural average (863). Modinagar tahsil has lowest sex-ratio of 841 females among the total population. In urban areas, the higher sex-ratio is recorded in Hapur (867) and the lowest is found in Modinagar (827).

TABLE - 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Muradnagar	22,156	12,107	10,049	830
2	Razapur	26,313	14,227	12,086	850

	District (Rural) Total:	**278,499**	**149,483**	**129,016**	**863**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 863 for the district (rural). The sex-ratio of C.D. block varies between 830 to 886 It is highest in Garh Mukteshwar C.D. block i.e. 886 followed by 870 in Dhaulana and Simbhawali, C.D. blocks and lowest 830 females is found in Muradnagar. C.D. block. The sex-ratio of Loni, Dhaulana, Simbhawali, Hapur and Garhmukteshwar C.D. block are higher than the district rural (863) while in remaining blocks, it is below the average of the district.

TABLE - 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of popu-lation
1	2	3	4	5
Less than 700	45	8.6	6,726	2.4
700-749	48	9.2	17,101	6.1
750-799	73	14.0	29,333	10.5
800-849	83	15.9	41,133	14.8
850-899	99	19.0	90,201	32.4
900-949	83	15.9	61,707	22.2
950-999	37	7.1	19,522	7.0
1000-1099	35	6.7	9,755	3.5
1100+	19	3.6	3,021	1.1
District Total (Rural):	**522**	**100.0**	**278,499**	**100.0**
Sex ratio for District (Rural):	**863**			

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e 99 (19.0 per cent) having largest population (32.4 per cent) in the district (rural) fall in the sex-ratio range of 850-899 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 900-949 and 800-849 which claims 83 villages (15.9 per cent) and 22.2 per cent population and 83 villages (15.9 per cent) and 14.8 per cent population. Next to it, 73 villages (14.0 per cent) are in the range of 750-799 with 10.5 per cent population. 48 villages (9.2 per cent) having 6.1 per cent population fall in sex-ratio range of 700-749. In remaining sex-ratio ranges of less than 700,950-999,1000-1099 and 1100 and above claim less number of villages and these are distributed as 45 (8.6 per cent), 37 (7.1 per cent), 35 (6.7 per cent), and 19 (3.6 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 265 having population (50.8 per cent) fall in the higher sex-ratio ranges of 800-949.

TABLE - 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS/TOWNS, 2001

		Urban	**1,816,415**	**308,831**	**193**	**17.0**	**0.0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 3,290,586 total population of the district, 18.0. per cent of the total population belong to the Scheduled Castes and negligible per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 19.3 per cent of rural population and 17.0 per cent urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Hapur tahsil (23.4 per cent) while the lowest is found in Ghaziabad tahsil (15.1 per cent).

TABLE - 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

District (Rural) Total:		**1,474,171**	**284,949**	**14**	**19.3**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 19.3 per cent of rural population of the district belongs to Scheduled Castes and negligible per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 14.8 per cent in Loni C.D. block and 24.6 per cent in Hapur C.D. block. The other C.D. block containing the highest percentage of Scheduled Castes are Bhojpur (23.3 per cent), Garhmukteshwar,(20.4 per cent), Muradnagar (19.8 per cent) and Razapur (19.1 per cent).

TABLE - 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	47	9.0	0	0.0
Less than 5	48	9.2	4242	1.5

51-75	19	3.6	14486	5.1
76 and above	10	1.9	6962	2.4
District Total	**522**	**100.0**	**284,949**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 47 villages accounting for 9.0 per cent of total 522 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 48 villages (9.2 per cent). In 71 villages, it varies between 6-10 per cent while the next range of 11-20 per cent accounts for 126 villages constituting 24.1 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 109 and 62 villages respectively. Both these ranges together account for 32.8 per cent villages of the district. 59 villages fall in the range of 41-50 and above per cent. 10 villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 2.4 per cent Scheduled Castes population of the district. The maximum of the 31.5 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

TABLE - 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. Negligible per cent of rural population of the district belong to Scheduled Tribes population. There are 520 (99.6 per cent) villages where none of Scheduled Tribes have been recorded in the district. Remaining 2 villages (0.4 per cent) have less than 5 per cent Scheduled Tribes population.

Table 18 shows number and percentage of Scheduled Castes and Scheduled Tribes population

recorded during 2001 census in district Ghaziabd. The table depicts that Scheduled Castes population in Babugarh (N.P) and Begumabad Budhana C.T. were 42.9 and 31.2 per cent respectively but very low per cent (3.1 per cent) in Dasna (N.P.). Scheduled Tribes population is negligible in the urban areas of the district. There are 0.5 per cent scheduled tribes population in Ordnance Factory Muradnagar (CT). In other towns Scheduled Tribes population stands at 117 in Ghaziabad, 9 in Loni, 6 in Hapur, 5 each in Behta Hajipur and Pilikuwa and 2 in Garhmukteshwar.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Muradnagar	848	0
2	Razapur	841	1000
3	Bhojpur	862	0

District and tahsil wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 69.7 per cent in the district. This proportion in rural area is 63.2 per cent against 74.9 per cent in urban areas. In the district the literacy rates of males (79.8 per cent) is much higher than that of females (58.0 per cent). Among the tahsils, Ghaziabad tops with 74.4 per cent literates followed by Modinagar tahsil (69.4 per cent). Garhmukteshwar tahsil with 58.3 per cent literates stands at the bottam in the district. Out of 4 tahsils, the literacy rates of Ghaziabad .tahsil is higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 21.8 percentage points in the district, as a whole. The situation at tahsil level is not much different. However this gap in urban literacy is lowest i.e. 17.3 percentage points against 27.7 percentage points in rural areas.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

District (Rural) Total:		**755,060**	**488,692**	**266,368**	**719,111**	**304,494**	**414,617**	**63.2**	**75.9**	**48.3**	**27.6**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 63.2 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 75.9 and 48.3 per cent respectively which shows very wide gap of 27.7 per cent in male and female literacy. At C.D. block level, Loni C.D. block has the highest rural literacy rate of 70.9 per cent while 82.1 per cent males and 57.4 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Garhmukteshwar C.D. block (56.6 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 30.5 percentage points is found in Garhmukteshwar C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population

91-99	2	0.4	2,224	0.2
100	1	0 2	1	0.0
District Total:	**522**	**100.0**	**1,474,171**	**100.0**

Literacy rate for District (Rural): 63.2

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate person in 4 village (0.8 per cent) of the district and population of these villages is only 33 persons. One villages (0.2 per cent) have all the literate population. 75 village accounting for 14.4 per cent of the total village are in the literacy range of 51-60 per cent and 212 villages (40.6 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent is observed in 76 villages (14.7 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 155 villages (29.7 per cent). The range of 61-80 have the maximum number of 351 villages forming 67.2 per cent of the total inhabited villages.

District(Urban) Total		**1,144,675**	**679,770**	**464,905**	**671,740**	**296,086**	**375,654**	**74.9**	**82.9**	**65.6**	**17.3**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Ghaziabad town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district Ghaziabad. The literacy rate is quite high (above 80 per cent in nine towns) among males. Female literacy rate is high in two towns (above 75 per cent). However, literacy rate among females is very low (40.2 per cent) in Dasna N.P. Thus the gap in male-female literacy rate is very high (17.3 percentage points).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

District (Rural) Total:		**136,139**	**91,895**	**44,244**	**148,810**	**61,977**	**86,833**	**59**	**73.6**	**41.8**	**31.8**

Table No 25 shows number and percentage of scheduled castes literates and illiterates by sex during 2001 census in rural areas at C.D. blocks level in the district. 59.0 per cent of Scheduled Castes population excluding the age group of 0-6 literates are in rural area of district. The corresponding proportion of male and female literates comes to 73.6 and 41.8 per cent respectively, which shows a very wide gap of 31.8 per cent in male and female literacy. At C.D. block level Loni C.D. block has the highest rural literacy rate 66.9 per cent, while 79.1 per cent males and 52.6 per cent females are literate in this C.D. block. The lowest literacy rate in rural area is noted in Garhmukteshwar C.D. block (50.4 per cent). There is wide gap in male and female literacy in all the C.D. blocks of the district. The maximum difference of 36.0 percentage points is found in Garhmukteshwar C.D. block.

Table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates is less than literates in the district (urban) towns.The percentage of literates is least in Faridnadgar (N.P.) among 17 towns but the gap in male/female literate rate is highest. The males in all the 17 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Ghaziabad (N.N.) and the female literacy rate is highest in Ordinance Factory Muradnagar town.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

Table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of literates is more than iliterates in the district and CD Blocks. The literacy rate of the Scheduled Tribes population at 76.9 per cent is higher than the corresponding rate 59.0 per cent in case of Scheduled Castes community. The gap in male and female literacy rates at 27.5 per cent is lesser than what it is in case of the Scheduled Castes community (31.8 per cent). The literacy rate is highest in Razapur CD Block and lowest in Loni CD Block. The gap in male/female literacy rate in all the CD Block is in favour of males.

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out 28.5 per cent of the total population in the district. The total workers are comprised of 24.3 per cent of main workers and 4.2 per cent of marginal workers and the remaining 71.5 per cent are non-workers.

Among the main workers, males participation rate in the district is 40.9 per cent and 5.0 per cent of females. Male and female marginal workers account for 4.7 and 3.6 per cent respectively. The percentage of males marginal workers is higher than that of females. Total workers (main and marginal workers) among tahsils varies from 27.4 per cent in Ghaziabad tahsil to 33.2 per cent in Gharmukteshwar tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 14,74,171 total rural population of the district, 24.1 per cent has been categorised as main workers and the marginal workers constitute 6.6 per cent and the remaining 69.4 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 39.5 per cent males and 6 per cent females are in the category of main workers. Male and female marginal workers account for 6.5 and 6.6 per cent respectively. The percentage of female marginal workers is slightly higher than that of male marginal workers.

The percentage of total rural workers of the district comes to 30.6 per cent. At the C.D. block level Muradnagar has highest proportion of total workers forming 34.3 per cent of the total population. It is closely followed by Simbhawali (33.6 per cent), Garhmukteshwar (33.3 per cent), Bhojpur (31.1 per cent), Razapur (30.6 per cent) and Hapur(29.1 per cent). The lowest percentage of 27.2 per cent is recorded in Dhaulana C.D. block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Note : Percentage of workers to total workers are given in brackets.

It can be seen from table 34, that the economy of the district is primarily based on other workers. Cultivators constitute 17.1 per cent of the total workers (main + marginal) and remaining 82.9 per cent of total workers are engaged as agricultural labourers (7.4 per cent), household industry workers (4.7 per cent) and other workers (70.8 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on other workers absorbing large number of workers. The proportion of cultivators varies between 6.2 per cent in Ghaziabad tahsil and 37.7 per cent in Garhmukteshwar tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 19.4 per cent which is higher as compared to 16.7 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is very low in the district. The workers in Cultivator catagory occupy the second position next to other workers in the district as well as in each tahsil. The highest proportion of 86.4 per cent of other workers is recorded in Ghaziabad tahsil while the lowest proportion of 39.2 per cent is found in Garhmukteshwar tahsil.

Note: Percentage of Workers to total workers are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) are 30.6 per cent of total population. Among these workers, cultivators constitute 33.3 per cent, 13.8 per cent agricultural labourers, 5.2

per cent household industry workers and 47.7 per cent other workers. The other works play a major role in providing employment to the working force of rural population. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 5.2 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of males (34.6 per cent) is higher than females (28.0 per cent) in the rural areas of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 16.6 per cent in Loni C.D. block to 46.5 per cent in Garhmukteshwar C.D. block. Similarly for other workers, the lowest proportion is 32.9 per cent in Garhmukteshwar C.D. block while 72.3 per cent is the highest in Loni C.D. block. The percentage of agricultural labourers and household industry workers is 13.8 and 5.2 per cent respectively in the district. The percentage of agricultural labourers is highest in Hapur (22.4 per cent) C.D. block and is followed by Simbhawali (20.0). Similarly, household industry workers varies in C.D. blocks between 2.3 per cent in Muradnagar and 7.2 per cent in Loni C.D. Block.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district Ghaziabad. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (92.2 per cent), followed by house hold industries workers with 4.2 per cent (3.6 per cent male and 10.2 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (31.3) is recorded in Niwari N.P. In the agriculture labourers category highest percentage 13.5 is recorded in Garhmukhteshwar N.P.P. Household industry workers are also very low (0.2 per cent) in Babugarh N.P.,0.8 per cent in Ordinance factory Muradnagar and 1.4 per cent in Niwari N.P. As the usual trend recorded in the urban areas, other workers are in high percentage(99.6 per cent) in Babugarh 96.4 percent in Muradnagar N.P.P. and 99.2 per cent in Ordinance Factory Muradnagar.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - *Percentages are given in brackets.*

*Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

#Post office includes Post office, telegraph office and Post and telegraph office.

$Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 522 inhabited villages in the district 477 villages or 91.4 per cent have been provided with the education facilities of one type or the other. Similarly 456 villages in the district constituting 87.4 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 513 or 98.3 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 132 villages constituting 25.3 per cent of villages have been provided with post office facility within the village. 256 or 49.0 per cent villages have been provided with the telephone facility, 105 or 20.1 per cent with transport facility, 50 or 9.6 per cent villages with bank facility and 54 or 10.3 per cent with agricultural credit societies. Similarly there are 457 or 87.5 per cent villages which have been linked with the pucca road. Total 513 or 98.3 per cent of villages have been provided with

the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Muradnagar C.D. block has the highest 95.1 per cent villages where educational facility is available and lowest 84.8 per cent is found in Loni Medical facility is highest in Muradnagar (95.1 per cent) and lowest (80.2 per cent) in Garhmuktheshwar C.D. block. Improved drinking water is available to cent-percent villages in Bhojpur and Garh Mukteshwar blocks while in other blocks, it is above 97 per cent. Telephone facility is highest in Bhojpur (63.2 per cent). Transport and communications is less developed in Razapur where only 10.0 per cent villages are covered by this facility whereas 38.6 per cent villages of Dhaulana C.D. block are availing this facility. In the field of power supply all villages have been covered except 9 villages in the district.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 14,74171 persons in the district, 1450689 or 98.4 per cent have educational facility of one or the other type. Similarly 1,377,261or 93.4 per cent population has medical facilities while 1473665 or approx 100 per cent have got improved drinking water facility. Post office facilities are available to 617607 or 41.9 per cent population. Telephone facility is available to 957145 or 64.9 per cent. Transport communications facility is available to 453452 or 30.8 per cent. Bank facility is available to 2,53822 or 17.2 per cent. 212807 or 14.4 per cent have been provided with the facility of agricultural credit societies1395335 or 94.7 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1469136 or 99.7 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. However in Muradnagar, Dhaulana,Hapur and Simbhawali C.D. block facilities of education, medical and improved drinking water are available to more than 95 per cent of population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 46 villages do not have primary school in their villages and out of these villages, children of 46 villages have to travel less than 5 kms. for schooling Out of 522 inhabited villages as many as 306 are deprived of middle school and 509 of degree college. Of these 203 avail the facility of middle school at a distance of less than 5 kms., 95 at a distance of 5-10 kms. and the remaining 8 at a distance of 10+ kms. In respect of degree college 113 avail this facility at a distance of less than 5 kms., 178 between 5 to 10 kms. and rest 218 villages at a distance of 10+ kms.

Similarly there are 504 villages in the district which have been devoid of Hospital facility and 492 villages which are deprived of PHC facilities. Of these 188 villages have the facility of Hospital available within 5 kms. while in respect of 162 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 154 villages have this facility at a distance of 10+ kms. As regards PHC 153 avail this facility at a distance of less than 5 kms., 223 at a distance of 5-10 kms. and the remaining 116 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 390 villages do not have this facility in the village itself. Of these majority i.e. 303 have this facility at a distance of less than 5 kms., another 76 villages avail it at a distance of 5-10 kms. In the remaining 11 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 266 villages in the district which are without telephone facilitiy. Of these 165 avail this facility at a distance of less than 5 kms., 69 at a distance of 5-10 kms. and remaining 32 have to traverse a distance of 10+ kms.

For Bus service out of 437 villages which do not have facility, 237 villages avail this facility at a distance of less than 5 kms., 166 at a distance between 5-10 kms. and 34 at a distance of 10+ kms.

In the entire district 480 villages are deprived of Commercial Bank & 505 of Co-operative Bank. Of these 480 villages which are deprived of Commercial Banks 331 villages avail this facility at a distance of less than 5 kms., 128 between 5-10 kms. & the remaining 21 at a distance of 10+ kms. Regarding Co-operative Banks out of 505 villages 142 villages avail this facility at a distance of less than 5 kms., 251 at a distance of 5-10 kms. and remaining 112 at a distance of 10+ kms. 468 villages do not have agricultural credit societies. This facility to 338 villages is available at a distance of less than 5 kms., 105 at a distance of 5-10 kms. and the remaining 25 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 522 inhabited villages in the district, 477 villages forming 91.4 per cent of these total villages, are having the educational facilities of one type or the other and 456 villages constituting 87.4 per cent, have the medical facilities within the village, 132 villages forming 25.3 per cent have the facility of post office within the village and 256 or 49.0 per cent have the facility of telephone. 105 villages constituting 20.1 per cent have been linked by transport service. 50 villages comprising 9.6 per cent have been provided bank facilities, while 54 villages constituting only 10.3 per cent have been provided by agricultural credit societies. 457 villages comprising 87.5 per cent have been provided with pucca road.

There are 324 inhabited villages in the district which fall in the distance range of 5-15 kms from the town. Of these 298 villages constituting 92.0 per cent have been provided with the educational facilities. 288 villages comprising 88.9 per cent have been provided with medical facilities. 80 villages constituting 24.7 per cent enjoy the post office facility. 150 villages comprising 46.3 per cent have been provided the telephone facility. 61 villages constituting 18.8 per cent have been linked with transport communications. 31 villages comprising 9.6 per cent have bank facility. 34 villages constituting 10.5 per cent are having agricultural credit societies, while 285 villages or 88.0 per cent are approachable by pucca road. 35 villages fall in the distance range of 16-50 kms. Of these, 88.6 per cent villages have educational facility, 94.3 per cent with medical, 31.4 per cent with post office, 48.6 per cent with telephone and transport & communications available to 22.9 per cent villages. Banks and agricultural credit societies facilities are available to 8.6 and 14.3 per cent of villages respectively.

There is 1 village in the district which is situated beyond 50 kms.from the nearest town. This sole village enjoys education, Medical and post office facilities in the village itself. This village is also linked by pucca roads. Transport communications, Banks and Agricultural credit societies facilities are not available in the village. There are 2 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. One village constituting 50.0 per cent have the education, telephone, banks and agricultural credit society facilities in the village and also connects by pucca roads. Both this two village of this category do not have Post office facility.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages	Type of amenity available

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Ghaziabad district out of a total 522 inhabited villages, overwhelming 55 have a population of less than 500 persons. Of these, 19 villages (34.5 per cent) have education facility, 24 (43.6 per cent) have medical facility, 46 (83.6 per cent) have improved drinking water facility. 9 (16.4 per cent) have telephone facility. 3 (5.5 per cent) have been linked by bus service, 29 villages (52.7 per cent) have been linked with pucca road. 49 villages (89.1 per cent) have been provided with electricity. Post office, Banks and Agricultural credit society facilities are not available in these villages.

Out of 49 villages, which fall in the population range of 500-999 persons, 47 villages (95.9 per cent) have been provided with the education facility, 46 (93.9 per cent) with medical facility, all the villages have improved drinking water facility. 2 villages (4.1 per cent) have been provided with post office facilities, 12 villages (24.5 per cent) with telephone facility, 8 villages (16.3 per cent) with transport facilities, No village (0.0 per cent) with bank facility, 2 villages (4.1 per cent) with agricultural credit societies & 42 villages (85.7 per cent) have approach by pucca road. 48 villages (98.0 per cent) in this range have electricity.

166 villages fall in population range of 1,000-1,999 persons. 162 villages (97.6 per cent) have education, facility, 150 villages (90.4 per cent) enjoy the medical facility, 7 villages (4.2 per cent) have post office facility, 77 villages (46.4 per cent) have telephone facility, 28 villages (16.9 per cent) have transport communication facilities, 9 villages (5.4 per cent) have bank facilities, 10 villages (6.0 per cent) have agricultural credit societies and 147 villages (88.6 per cent) have approach by pucca road. 165 villages (99.4 per cent) have been provided with electricity. All of these villages have improved dirking water facility.

There are 195 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy improved drinking water, 192 villages (98.5 per cent) have been provided with Education facility,182 villages (93.3 per cent) have medical facility, 80 villages (41.0 per cent) have post office facility, 117 villages (60.0 per cent) have Telephone facility, 35 villages (17.9 per cent) have transport, communication facility, 20 villages (10.3 per cent) have bank facilility, 29 villages (14.9 per cent) is having agricultural credit societies, 183 villages (93.8 per cent) have approach by pucca road and 194 villages (99.5 per cent) have been provided with electricity. 44 villages fall in the population range of 5000-9999. Out of these all villages enjoy education, improved drinking water facilities and power supply facilities. Whereas 43 villages (97.7 per cent) enjoy Medical facility, 35 villages (79.5 per cent) have Post office facilities,31 villages (70.5 per cent) have Telephone facility, 24 villages (54.5 per cent0 have transport communication facility,16 villages (36.4 per cent) have Bank facility, 11 villages (25.0 per cent) have Agricultural credit societies facility, 43 villages (97.7 per cent) have approach by pucca road.

13 villages in the district which are covered under 10000 and above population range. In this range, all villages enjoy cent per cent facilities of education, improved drinking water, power supply and approach by pucca road facilities. 11 villages (84.6 per cent) have medical facility, 8 villages (61.5 per cent) have post office facility, 10 villages (76.9 per cent) have telephone facility, 7 villages (53.8 per cent) have bank facility and 2 villages (15.4 per cent) have agriculture credit society.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Muradnagar	61	18,856	98.4	94.5
2	Razapur	40	13,996	81.8	71.4
3	Bhojpur	57	20,663	87.8	97.8
4	Loni	46	14,995	70.5	86.6
5	Dhaulana	57	18,657	73.8	98.8
6	Hapur	104	31,357	67.4	96.7
7	Simbhawali	76	21,843	NA	92.4
8	Garhmukteshwar	81	30,090	73.3	87.9
	District Total:	**522**	**170,457**	**80.8**	**91.8**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 522 inhabited villages in the district having a total area of 170,457 hectares. Of this, 80.8 per cent is cultivable and 91.8 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Muradnagar block with 61 villages have a total area of 18,856 hectares, of this 98.4 per cent of land is cultivable and of the aforesaid area 94.5 per cent is irrigated. In Razapur block, all the 40 villages have a total land area of 13,996 hectares, of this 81.8 per cent of land is cultivable and of the aforesaid area 71.4 per cent is irrigated. In Bhojpur block, all the 57 villages have a total area of 20,663 hectares, of this cultivable area is 87.8 per cent and 97.8 per cent is irrigated. In Loni block, all the 46 villages have a total area of 14,995 hectares. Of this, cultivable area is 70.5 per cent. Of cultivable area 86.6 per cent is irrigated. Dhaulana block with 57 villages have a total land area of 18,657 hectares, of this 73.8 per cent is cultivable area and out of this cultivable area 98.8 per cent is irrigated. Hapur block with 104 villages has a total land area of 31,357 hectares. Of this 67.4 per cent is cultivated area, out of which 96.7 per cent is irrigated. Simbhawali block with a total 76 villages have an area of 21,843 hectares. Out of which 92.4 per cent is irrigated. Garh Mukteshwar block with total 81 villages have a land area of 30090 hectares. Of this 73.3 per cent is cultivable and out of this cultivable area 87.9 is irrigated.

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Ghaziabad district. On an average there are 4 beds per 10,000 population in urban areas of the district. Whereas it is the highest 30 in Muradnagar N.P.P. while lowest value of 1 bed is recorded in Loni N.P. seven towns do not have any bed.

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for cement pipe, cycle, cloths, cup-plate and nylon tyres. The chief export items of the district cycle, nylon threads and cloths are the main items which are manufactured in Muradnagar NPP town and are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities, collected during Houselisting Operations, Census of India 2001:

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The following is the distribution of households by number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."
* Houselist Household

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 526,770 consisting of 220,347 rural and 306,423 urban households. 112,155 households belong to Scheduled Castes and 15,041 to Scheduled Tribes. 452,258 households are living in their owned houses constituting 85.8 per cent of total households. Of these households, the largest number of households (154,721) have occupied double room accommodation and is followed by single room accommodation numbering to 127,315 households. Next position is claimed by households (83,234) occupying three room accommodation. Number of households in owned accommodation occupying three plus rooms rank at fourth place with 82,556 households while 4,432 households are without any exclusive room.

64,174 households living in rented accommodation account for 12.2 per cent of total number of households in the district. The largest number of 35,237 households are living in single room accommodation followed by 19,738 households in double room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 10,338 forming only 2 per cent of total households are distributed in single room accommodation numbering 5,183 double room 2,824 and 1,293 in three room accommodation. In rural areas majority of households have bigger size and majority of them have their own houses.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11

District Total:		**79.4**	**16.4**	**4.2**	**66.4**	**26.9**	**6.7**	**88.8**	**8.8**	**2.4**

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."
* Houselist Household

The percentage distribution of household as shown in the above table reveals that 79.4 percent household in the district had permanent houses. The trend is different in rural (66.4 per cent) and urban area (88.8 per cent). Among tahsils the highest proportion of permanent houses were accounted in tahsil Ghaziabnad (89.7 per cent) followed by Modinagar (73.1 per cent), Hapur(65.3 per cent) and lowest in Garhmuketeshwar(63.7 per cent). In respect of semi-permanent houses, the returns were 16.4 per cent of district level where as among tahsils, in Hapur it was highest 28.5 per cent and lowest was 7.6 per cent in tahsil Ghaziabad. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 5.9 to 25.4 per cent. Temporary houses in the district lie between the range of 2.7 and 8.9 per cent.

Table 50 shows that out of total households of the district 95.8 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 95.0 per cent and 96.5 per cent. Tahsil Modinagar (96.8 per cent)had higher order of proportion of households where percentage for rural area was 95.3 per cent and 98.4 per cent in urban areas. Electricity was available for 70.6 per cent of households at district level. Households of the district had better access of electricity. Bathrooms and toilet facilities were available in 66.1 and 72.4 per cent of households. Drainage facility was available for 91.1 per cent of households, whereas the proportion of rural and urban areas households accounted to 87.5 and 93.6 per cent respectively.

* Houselist Household

It is observed from the above Table 51 that 12.0 per cent of households in the district use firewood as fuel for cooking, the proportion in the rural area is 15.9 and in urban area it comes to 9.2 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in 42.9 per cent of the households. The composition of rural and urban comes to 16.1 and 62.2 per cent respectively. Kerosene is used for cooking in only 5.6 per cent of the households (2.7 per cent rural and 7.8 per cent urban households). The other methods like crop residue, cow dung cake, coal/ lignite/ charcoal, electricity and biogas etc. ranges between to 0.1 per cent to 4.2 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is cooking gas followed by Cowdung cake in all tahsils, whereas 16.1 per cent of households use L.P.G.(cooking gas) and kerosene is the predominant fuel for cooking in the district.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

This table presents data for total rural and urban areas at district/tahsil level about households availing banking services and possession of assets such as radio/transistor, telephone, bicycle, scooter and car etc by households. There are 526,770 households in the district and among them, 268,473 households have been availing banking services. 288,203 households have radio/transistor. Television is possessed by 321,012 households. Telephone is available in 80,672 households.324,326 households have bicycle. Scooter, Motorcycle, Moped and Car, Jeep, Van are used by 116,536 and 29,223 households respectively. The picture in use of banking services and possession of assets by households at tahsil level is about similar as analyzed above for district as a whole.

(xi) Major Social and Cultural Events, Natural and Administrative Developments and Significant Activities during the Decade

District Ghaziabad is a prominent district of western Uttar Pradesh. Having proximity to the National Capital, all-round development of this district is in the process. It has become more like a satellite town of the National Capital. The population of the urban areas are cosmopolitan in nature. No significant social or cultural development is mentionable but a major administrative change has taken place during the last decade. The creation of Gautam Buddha Nagar by carving out Dadri Tahsil has deprived this district of the chief industrial belt, i.e., Noida from the district.

(xii) Places of Religious, Historical or Archaeological importance in villages and places of Tourist interest in the town

Places of religious and tourist interest in the district are in abundance. Some of these are given below:-

Garh Mukteshwar:

In this district, Garh Mukteshwar is a place of religious importance. Each year at the time of Kartik Purnima a big fair takes where lakhs of people take a holy dip in the river Ganga.

Hapur:

It is an old place. It is a famous railway station of northern India. It is also famous centre of trade and commerce. It has a big

agricultural mandi for grain, Gur and Potato. Steel and brass utensils, leather goods and handloom goods are manufactured here. There is an old Jama Masjid constructed at the time of Aurangzeb's reign.

Modinagar:

It is an industrial town established by Rai Bahadur Gujurmal Modi. There are Sugar Mill, Textile Mill, Vegetable Oil Factory, Tyre Factory, Paint, Distillary, Steel Factories also besides these there are many small scale industries units also.

Ghaziabad:

It is headquarters town of the district. It is also an industrial town. There is a famous Dudheshwarnath Temple, where big fairs take place of Mahashivratri and Krishna Janmastami. Other famous temples are Thakurdwara, Hanuman Mandir Chofla and Digambar Jain Temple.

(xiii) Major Characteristics and Contribution of the District :

District Ghaziabad was created on 14 November 1976 by carving out Ghaziabad and Hapur tahsils of district Meerut and Dadri tahsil of district Bulandshahr. The information about old administrative history of the district is very limited. It is said that it was part of Kuru dynasty. At the time of Akbar it was part of Sirkar and Subah of Delhi. At the time of Maratha rule this was part of Saharanpur. From 1818 to 1976 it was part of district Meerut. The people of this district took active part in freedom movement. All the freedom movements were led by local leaders from time to time.

This district has developed in agriculture and industry in the last two decades. Due to its proximity to Delhi, a well developed market is always available to the district's industrial and agricultural production. Being nearer to Delhi, the urban areas of the district is also abode of Delhiites, who can not afford exorbitant cost of property in Delhi and prefer nearby and less expensive properties of Ghaziabad. Culturally, therefore, it seems extended part of Delhi. In recent years it has become the centre of professional education. Many educational institutions are mushrooming in Ghaziabad.

The district is home to the people of many castes and sub castes. Jat, Gujar, Vishnoi and Tyagi are some ethnic groups which are settled in this district and surrounding districts. Among all religious groups, Hindus dominate with nearly 80 percent people following this religion.

The economy of this district is growing by leaps and bounds. With the support of the government and enterprising people the district is bound to become more rich and prosperous. Hindus dominate with nearly 80 percent people following this religion.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17

5. Commodities manufacture Column 18
6. Total area of village and land use pattern Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A

VILLAGE AND TOWN DIRECTORY (SECTION I AND II)

.Section - I : Village Directory

(a) Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

(b) STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

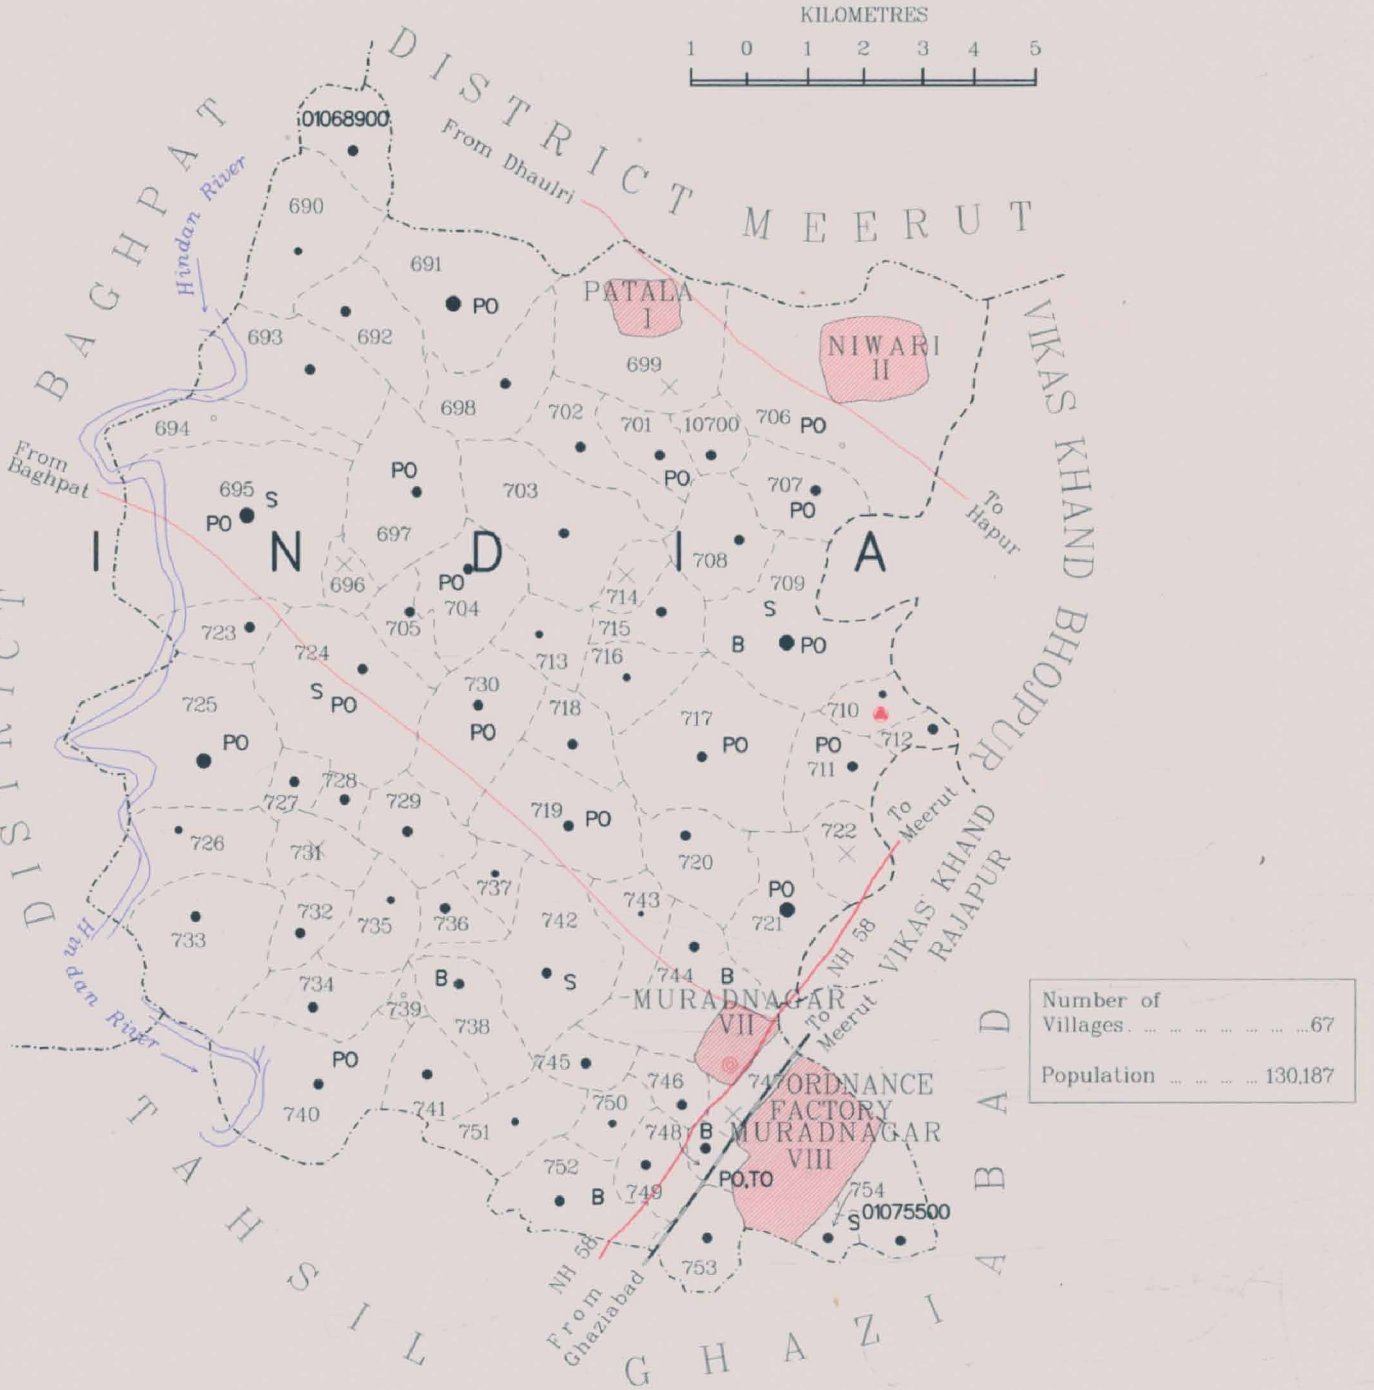

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.

SECTION II
TOWN DIRECTORY

Section II - Town Directory

(A) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A

(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

As no Towns having any outgrowth in the District are there, therefore the information is 'NIL'.

PART B

PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after

the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important feature of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also.

In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, then portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Ghaziabad
q1	Persons	99	51.0
	Males	98	47.0
	Females	104	55.0
q2	Persons	117	81.0
	Males	117	78.0
	Females	118	86.0
q5	Persons	134	104.0
	Males	135	107.0
	Females	132	91.0

(*Undivided Uttar Pradesh at 1991 Census)

The child mortality by ages 1, 2 and 5 years was lower in the district as against the State. The child mortality indicators in the district for females were in the improved condition as compared to the State by ages 1, 2 and 5 years.

ANNEXURE–III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE - 1991 CENSUS

Serial Number	Fertility Measures	Uttar Pradesh	Ghaziabad
1	2	3	4
1	CBR	37.2	29.7
2	TFR	5.6	4.5
3	TMFR	6.3	5.4
4	GFR	172.0	140
5	GMFR	200.0	171
6	Mean age at marriage (1981-91)	17.3	17 9
7	Number of children ever born per ever married woman aged 15-49 years	4.6	3.9
8	Child woman ratio 0-4	631.0	659
	5-9	752.0	717

Source. (i) Estimates of fertility indicators Uttar Pradesh Table # 2 23
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate or any area. the table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 29.65 per cent in the district. It is below to that of the state of Uttar Pradesh i.e. of 37.21 per cent. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower proportion from the state figures. The conclusion that may be drawn is lower fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.27 years for the state where as 17.89 years has been observed for the district. It may be observed that higher age at marriage leads to low rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever married women in the group 45-49. The state and the district figures are placed as 4.59 and 3.9 per cent respectively. number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 659 and 717 for the district while in case of the state the corresponding figures are 631 and 752.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 71.4 percent in 1991, while in 2001 it was 69.2 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 26.1 percent and 29.7 percent respectively. This shows in-migration from

other states to this district was increased in 2001 in comparison to 1991. At district level in-migration from other countries was 2.5 percent in 1991 and 1.1 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 61.2 percent and 59.4 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 37.5 percent and 40.1 percent respectively. The movement of population from other countries in the district was 1.2 percent in 1991 and 0.5 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 77.7 percent in 1991 and 74.8 percent in 2001, while Muslim were 21.2 percent in 1991 and 23.8 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district Ghaziabad for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 56.5 percent male and 49.4 percent female to 58.3 percent male and 50.2 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from

42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 41.5 percent and female was 47.8 percent in 1991 and in 2001 it was 39.9 percent male and 45.5 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 1.7 percent male and 4.2 percent female while it was 1.9 percent male and 2.8 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.0 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001.

Middle level education was 9.7 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 44.8 percent male and 69.3 percent female in 1991 which declined to 33.9 percent male and 51.9 percent female in 2001. Percentage of literates without educational level was 55.2 percentage male and 30.7 percent female in 1991, where as with declined trend it was 1.8 percent male and 1.6 percent female in 2001. Primary level education was 2.1 percent male and 0.6 percent female in 1991, which was 16.0 percent male and 14.1 percent female in 2001. Middle level education was 11.6 percent male and 5.6 percent female in 1991 and 16.0 percent male and 10.2 percent female in 2001. Matriculation and above level of education was achieved by 21.1 percent male and 9.4 percent female in 1991 which was 31.4 percent male and 19.0 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001, while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note: For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0.02 percent. The remaining tongues have been merged in the column of "Total of other mother tongue".

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 90.8 percent person in 1991 and 88.0 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent in 2001 at the state level whereas 7.2 percent and 9.8 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
