UTTAR PRADESH

DISTRICT GAUTAM BUDDHA NAGAR

Area (sq. Km)	1,442.00
Population	1,202,030
Number of Tahsils	03
Number of Vikas Khand	04
Number of Towns	09
Number of Villages	422

BOUNDARY, STATE

" DISTRICT

" TAHSIL

" VIKAS KHAND

HEADQUARTERS : DISTRICT, TAHSIL, VIKAS KHAND

NATIONAL HIGHWAY — NH 91

IMPORTANT METALLED ROAD

RAILWAY LINE , BROAD GAUGE

RIVER AND STREAM

VILLAGE HAVING 5000 AND ABOVE POPULATION WITH NAME — Dayantpur

TOWNS WITH POPULATION SIZE AND CLASS I , II , III , IV , V

DEGREE COLLEGE , TECHNICAL INSTITUTION

Note –

Sikandrabad Vikas khand is spread over in two districts namly Bulandshahr and Gautam Buddha Nagar.

B – PART OF BISRAKH VIKAS KHAND

DA – PART OF DADRI VIKAS KHAND

L – PART OF LONI VIKAS KHAND

D – PART OF DANKAUR VIKAS KHAND

S – PART OF VIKAS KHAND SIKANDRABAD

MOTIF

NOIDA AND GREATER NOIDA CITIES

Noida and Greater Noida combine Gautam Buddha Nagar. These twin cities have vast potential of development specially in industrial sphere – **electronics, textile, engineering, computer software and ornaments. The planned** development of Noida in different sectors, the commercial sector eighteen has specially been designed where from stationery to fashionable items are available. Ansal Market, Ocean Plaza, Saib-Shopping Mall, Vishal Chambers etc, the multi-storied buildings, houses and many multinational establishments are worth mentioning.

World class restaurants, Nirula-Shipra, Mac-Donald, Vimpi Domino Pizza, Kentuki, Bamboo Swits etc. attract foreign tourists. Development of city centre would be another addition in commercial trade, social and cultural activities. The renowned industrialists of the country and abroad assume this place as the industrial pilgrimage. One of the biggest and lone biotech university is being established here.

Greater Noida Development Authority had been in existence since Jan. 19, 1991 with the basic objective to prepare a model for industrial city. After Chandigarh, it is one of the cities where town-planning design has been prepared. The development of infrastructure schools and colleges of repute and various **offices of multi-national companies like Dawoo Motors, Escorts, Yamah, L.G.** Electronics have been established here. The incoming schemes for the city are establishment of software parks, oral parks and fruit city. This city is planned and being developed in such a way where medium as well as large scale industries will come into existence in near future and it will be one of the biggest industrial, commercial and manufacturing centre of the state. It is connected by **the National Capital Delhi by three routes. The city is also proud of having Noida** Film City Complex established by late Gulshan Kumar.

Annexure VII	Age, Sex and Education in the district, 1991 Census	370
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	372

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified

and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Gautam Buddha Nagar ranks 63rd in terms of population in the state.
2. The percentage share of urban population in the district is 37.4 as against 20.8 in the state.
3. Gautam Buddha Nagar district has a population density of 834 persons per sq.km. which is more than the state average of 690 persons per sq. km.
4. Gautam Buddha Nagar district ranks 69th in terms of sex ratio (841) which is lower than the state average (898) females per thousand males.
5. Gautam Buddha Nagar district ranks 6th in literacy (68.7 per cent) which is higher than the state average (56.3 per cent).
6. There are only 30 uninhabited villages out of total 422 villages in the district.
7. Decadal growth rate of the district 41.5 per cent is higher than the state average of 25.8 per cent.
8. Gautam Buddha Nagar tahsil has the highest number of inhabited villages (156) while tahsil Jewar has the lowest number (113).
9. The district has 9 (nine) towns including two census towns. No new town has been added or declassified after 1991 census..
10. There are 204,302 households in the district accounting for 0.8 per cent of the total households in the state. The average size of households in the district is 5.9 persons.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The District Census Handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

Gautam Buddha Nagar is a newly created district carved out from Ghaziabad district and Bulandshahr district. The district was created in 1997 in the series of creation of new districts in Uttar Pradesh.

The historical background of the district, as available in epics viz., Mahabharata and Puranas and the archaeological finding of Hastinapur (a premier city of ancient India) relate the district to the tract where Vedic Aryans established themselves. The region became the first stronghold of the Vedic culture and Brahmanism. It formed the capital of the great Pandav Kingdom, celebrated in Mahabharata and was probably of the earliest Aryan's settlement out side Punjab. The legend of Mahabharat states that the area on both sides of Yamuna was an extensive forest know as Khandava, inhabited by Bhils, Nagas, Khandus and other aborigines who were disrupter of peace of the Aryan settlers.

Kurus were the rulers during later Vedic Age and were dislodged by Nandas in the middle of 4th century B.C. Nandas, in turn, were overthrown by Mauryas in 324 B.C. The Sungas, who followed Mauryas were supplanted by Kushanas. Later on Gupta Empire annexed this territory in their kingdom in the middle of the 4th century A.D. Skand Guptas referred to as the reigning monarch and Sarvanaga as the governor of Antar Vedi which comprised the

reign between the Ganga and Yamuna while the district formed part. A few Buddhist remains, including some terracotta seals and an inscribed statue, the writing on which may be dated between 5th and 9th centuries, has been found in the district. The Mukharis of Kannauj snatched the area from Guptas in the beginning of 6th century A.D. It became part of the empire of Gurjar Pratihars of Kannauj during 9th and 10th centuries but real power was exercised by local chiefs who ruled the area as feudatories becoming, at times, independent as and when the situation suited them. Tomar Rajputs established themselves as rulers of Delhi and surrounding areas and largely ruled as feudatories of Gurjar Pratihars during the middle of ninth and tenth centuries A.D. However, the Gurjar Pratiharas began to decline rapidly and Tomars became independent. But they soon came into conflict with Chauhans of Shakambhari who in the third quarter of that century won a victory over the ruling Tomar chief. Taking adavantage of the confusion, a Dor Rajput Chieftain, Haidatta, captured the areas of Meerut, Aligarh, Bulandshahr etc. and is credited to have founded the town of Hapur in 930 A.D. Prithvi Raj Chauhan – the then ruler of Delhi built a fort in Loni and his general Govind Rao made Dehra his headquarters.

Qutub-ud-Din Aibak captured the area after defeat of Prithvi Raj Chauhan in 1192 and appointed Governers in all places of upper doab to establish their military bases. The greater part of this region was held by Dor Rajputs. The extirpation of Dor dynasty was followed by Muslim Rule and Iltutamish (1210-1236) was made Governor of entire Baran and Doab. It remained part of Delhi Sultanate till the establishment of the Moghul dynasty. During the reign of Akbar, the area was part of Suba of Delhi. On February 15, 1771, the emperor Shah Alam II agreed under a treaty to assign the territories including the district Ghaziabad to Maharaja Scindia. On December 30, 1803 Daulat Rao Scindia ceded his entire possession in Doab to the British by the treaty of Suraj Arjun Gaon since the struggle for freedom the district remained generally undisturbed except for the famines of 1860, 1878 and 1897. In 1921 Mahatma Gandhi launched his famous non co-operation movement and it received enthusiastic response from all sections of the people. Quit India moment of 1942 received wide support by people. On August 15, 1947 the area of the district along with others attained independence.

(iii) Administrative Setup

The district of Gautam Buddha Nagar was created after 1991 Census vide Uttar Pradesh Government Notification nos. No. 1249/1-5/97-R-5 dated 06.05.97, No. 2448 (1) 1-5/97/124/97-R-5 dated 07.08.97, No. 2248/1-5/97-124/97-R-5 dated 07.08.97 and No. 2654/1-5/97-312/97-R-5 dated 06.09.1997 by transferring tahsils and towns from Bulandshahr and Ghaziabad district. It comprises of 3 tahsils, viz., Gautam Buddha Nagar (134 villages+2 towns transferred from Sikandrabad tahsil of Bulandshahr district and 39 villages from Dadri tahsil of Ghaziabad district), Jewar (104 villages+3 towns of Khurja tahsil of Bulandshahr dsirtict and 18 villages+ one town from Sikandrabad tahsil of the same district) and Dadri (121 villages and 2 towns including one Census Town from Dadri tahsil of Ghaziabad district).

Jurisdictional Changes during 1991-2000

The major jurisdictional changes that took place during 1991-2000 are related to creation of new district of Gautam Buddha Nagar. The following table shows the changes which took place in creation of this district:

Name of District/Tahsil	Notification No. & Date	Jurisdictional Changes (Added)
Gautam Budha Nagar	1249/1-5/97-02/97-R-5 dated 6.5.1997	(i) 134 villages and 2 towns transferred from Sikandrabad tahsil of Bulandshahr district.
Tahsil		
Gautam Buddha Nagar	2448/(1)/1-5/97-124-97-R-5 dated 7.8.1997	(ii) 39 Villages transferred from dadri tahsil of Ghaziabad district.
		(i) 104 villages and 3 towns transferred from Khurja tahsil of Bulandshahr district.
Jewar Tahsil		(ii) 18 Villages and 1 town transferred from Sikandrabad tahsil of Bulandshahr district.
Dadri Tahsil	2654/1-5//97-312/97-R-5 dated 06.09.1997	(i) 121 villages and 2 towns including 1 Census Town remained in this tashil.
		(ii) 6 villages transferred from Hapur tahsil of Ghaziabad district to this tahsil.

District administration:

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, district level officers of different departments and Local self-government. District Magistrate is incharge of Revenue Administration. He is assisted by

Additional District Magistrate (Finance and Revenue) i.e. ADM (F& R). At the tahsil level, Sub Divisiobal Magistrate is in-charge, who is now redesignated as Up-Zila Adhikari. He is assisted by Tahsildar in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanoongo circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer looks after development activities in the district. The other district level officers like- Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture. Horticulture, PWD, etc. comprise district administration.

Under the police set-up, Senior Superintendent of Police in big districts and Superintendent of Police in smaller districts are incharge. Additional supdt. of Police (ASP) and Commanding Officer are in-charge of their respective areas. Deputy Superintendent of Police (DSP) lookafter the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

The judiciary system of the district consists of District Judge, Additional District Judge and Session Judge, Civil Judge, Assistant Session Judge and Munsif Magistrate.

The Nucleus of the district body for self government is consisted of Mayor and Municipal Commissioner (MNA) in the case of Nagar Nigam, Chairman and Executive Officer in Nagar Palika Parishad and Nagar Panchyat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

(1)Location and Size :

Gautam Buddha Nagar district is situated in the Doab of Ganga and Yamuna rivers between the parallels of 28° 6' to 28° 40' north latitude and 77° 17' - 77° 42' east longitude. It is bounded in the north by district Ghaziabad and in the south by district Aligarh. In the east lies district Bulandshahr. In the west riverYamuna forms natural boundary with the state of Delhi and Faridabad district of Haryana state. The district is vertically stretched from north to south rather than east to west. The total area of the district is 1442 sq kms which is 0.51 per cent of the total area of the state.

(2)Physiography :

On the basis of Geology, soil, topography, climate and natural vegetation, the district is divided into following sub-micro region:

Yamuna khadar

This region is situated in the western part of the district along with the river Yamuna. Small depressions, dead arms of the river, meanders are the main tropical features. These depressions have various shapes and sizes and are found on the left course of Hindon river. Northern part of the plain is flood prone because of meeting place of Hindon with Yamuna. It is very low-lying area but at the same time very fertile. The slope of the land is very gentle and runs from north to south. Geologically, the region belongs to Alluvium and Dun gravels of recent origin.

Dadri Plain

This region is situated in the north-east part of the district. This plain is slightly lower in the central part than its eastern and western sides but the general slope is towards south. This tract is one of the best agricultural belts of the state. Geologically, the region belongs to Alluvium and ,Dun gravels of recent origin.

Jahangirpur Plain

This region covers the eastern and south- central part of the district covering Kakod and Jahangirpur development blocks. It is perfectly a gentle plain with north to south slope. Other physiographic phenomenon are negligible. Geologically, the region belongs to Alluvium and Dun gravels of recent origin.

(3)Drainage :

Yamuna and Hindon are the two principal rivers that flow through the district. These rivers swell in rainy season and flow through the vast tract of the land. The general slope of the district is from north to south. River Ganga enters in the district from the north-west boundry whereas river Hindon from middle of north and joins Yamuna within 7 km. near Dankaur. Except for occurrence of some depressions, the entire plain is marked by large fertile tract. Yamuna is a perennial river. There is no natural lake in the district. Seasonal ponds emerge during rainy season and shrink dry during summer.

(4)Climate:

The district has healthy climatic conditions. Being nearer to Delhi, the temperature is akin to that of Delhi. In the summer, the climate is quite hot and

likewise the winter is also quite cold. The rains are heavy and widespread. The monsoon starts in the district in the last week of June and continues till the end of September. The winter season in the district spans from October to February and summer from March to June. The average annual rainfall in the district is similar to the neighbouring districts recorded during the last many years. More than 90% of the annual rainfall occurs in monsoon season, variation being from year to year. On an average, there are 35 rainy days in the district. In the absence of meterological observatory in the district, compilation and collection of temperature and rainfall data are not regularly done. However, as per Samajarthic Samiksha 1998-1999, the average annual rainfall in the district was 936 mm.

(5)Natural Economic Resources

Forestry:

The district lies in the sub-tropical division of deciduous type of vegetation and does not have expanses of natural forests. Forest are in patches and are the result of saplings planted by the forest department. The important trees found in the area are those of Shishum, Mango, Jamun, Imli and Babool. The shrubs and bushes chiefly found in the district are those of arus, ber, brahmi, munj, hina, madar and karaunda. Year 1998-1999, as per statistical magazine, witnessed 400 hectares of land under forest, which had been calculated to 0.21 per cent of the total area. Area under trees, bushes and orchards covered 2396 hectares, i.e., 1.24 per cent. Maximum area under forest was 117 hectares in Jewar followed by 114 hectares in Bisrakh and 82 hectares each in development blocks Dadri and Dankaur. Forestry in the district bears significance for maintaining eco-balance in environment and for prevention of soil erosion.

Wild animals are rare in the district. Mostly Wolves, Monkeys, Hyena and Foxes are found in this area. The common birds found in the district are Peacock, Duck, Partridge and Snipe. Crocodile and Turtle species are also found in the district.

Minerals and Mining :

The geology of the district is deprived of any mineral and mining products. Sand, stone etc. are obtained from rivers and used as building material.

Soil :

The whole of district forms alluvial deposits the exact thickness of which is considerable but not known. On the banks of the river which is mostly low land, different varieties of soil are found. In the khadar, the soil composition is sandy, clay and alkaline. The chief soil of the district is rich loam. A distinctive feature of this soil is that it dries white or a very light gray and becomes dark of colour when manured and moistured.

Land and Land use Pattern :

The land in the district appears level plain. The general surface of the district presents gradual slope from north-west to south-east. The bulk of it lies on the upland on western part with river Yamuna border. The upland soil for the most part is a good firm loam, though occasional sandy out crops appear and some times with actual sand hills and bhurs. These tracts, however, mark relatively small patches on an extensively level and fertile plain. The low land of the district is very small and lies along with Hindon river and occasionally appear along Yamuna. The Khadar is narrow and largely sandy and waste. It also has some good soil in patches. The Yamuna khadar is fairly wide on the north-west border but generally tends to narrow further south. Reh and water logging prevail in the Hindon khadar. The district statistics 1999 shows that out of the rural area of 193,714 hectares, as much as 4,795 hectares netted as culturable waste land, 8,748 hectares current fallow, 8,491 hectares other fallow, 6,718 hectares usar and unfit for agriculture, 23,374 hectares of land for other than agricultural purposes and 400 hectares under forest cover. Major part of the land, i.e., 72 per cent is cultivated.

Agriculture and Crop pattern :

Agriculture plays pivotal role in the district economy. The agriculture system in the district is well developed. The prospects of cultivation is very encouraging. Scientific methods of cultivation and availability of high yielding veriety of seeds, knowledge about balanced use of fertilizers etc are the main contributory factors which have enhanced the productivity of different crops.

Rabi and Kharif are two main harvests of the district. Wheat and Gram in Rabi and Maize and Paddy in Kharif are main crops of the district. Improved agricultural practices, such as use of high yielding variety of seeds, fertilizers, improved agricultural implements, plant protection measures have shown encouraging results and gross and net produce of many crops have increased. The district statistics 1998-1999 shows the total land under wheat

cultivation was 69,804 hectares, Paddy 19,479 hectares, Maize 9,792 hectares, Barley 5,728 hectares and Bajra 12,297 hectares while Sugarcane was grown in only 1,206 hectares of land. Out of the total gross area sown, the proportion of wheat was 56.2 per cent. Next follow paddy, bajra and maize.Yield of main crops per hectare was 26.72 quintals for Paddy, 34.15 quintals for Wheat and 31.36 quintals for Barley respectivily. Cultivators could avail the facilities of 218 seed godown/fertilizer depots, 79 rural godowns, 15 insecticide depots and 3 agriculture service centers available in the district. There is also one seed improvement farm in the district.

Irrigation :

The irrigation network includes canals, tube wells, pump sets and other miscellaneous sources. Tube wells are the main source of irrigation accounting for 68.0 per cent of the irrigated land through 158 government and 3,970 private tube wells. While canals with 344 kms network account for 15.0 per cent of irrigated land (15,313 hectares). Wells account for merely 15.0 per cent of the net area irrigated as per district statistics 1999.

Animal Husbandry :

Animal husbandry is a supplementary economic activity for marginal farmers. As per livestock Census of 1993, the district had bovine population of 39,892 cows and 219,366 buffaloes. There were also 33,040 goats, 8,427 sheep and 16,662 pigs. To improve the progeny of livestock, there are 19 Veterinary clinics, 18 live-stocks development centres, 19 artificial insemination centres, 18 artificial insemination sub centres, 2 sheep development centres and 2 pig development centres.

Fishery :

Rivers and ponds of the district abound in fish of many species such as, singhara, silund, rit, catla, maigal and rohu, which are some of the important varieties of fishes found in the district. River Yamuna and Hindon are chiefly noted for this purpose. The usual mode of catching fish is by means of drag net or funnel shaped basket and fishing rod. Pisciculture development schemes have been taken up in the district. Government also supplies fingerlings to private pisciculturists at subsidies rates. District statement 1998-199 shows that 1,085 thousand fingerlings have been distributed to fishermen in the district. Out of these, 505 thousand alone were distributed in Dankaur CD Block, followed by Bisrakh 300 thousand, Dadri 260 thousand and 20 thousand in the Jewar CD Block.

Industry :

The economy of the district still continues to be predominantly agricultural in-spite of rapid development of industrial sector and rising of the district on the industrial map of the state and country. The district statistics 2001 shows 6,433 small scale industrial units with investment of Rs. 2,225.16 corers. Among medium and large industries as many as 871 units have been licensed by Government of India. Keeping in view the pattern of investment and licenses issued, it is observed that the district has a pivotal role in the industrial revolution in the state of Uttar Pradesh. One of the important factors that have given rise to its pivotal position in industrial map of the country is its proximity to Delhi. The other contributing factors are well-knit road links and other infrastructural facilities. NOIDA (New Okhla Industrial Development Authority) was developed as Industrial township. With the passage of time, this township has attracted big industrial houses of the country and multinational companies to set up their offices and factories. NOIDA, Greater NOIDA, Surajpur and Dadri are such industrial areas in this district, where big industries are established. The industries that have come up in this district are textiles, electronic goods, engineering goods, vegetable oil, iron goods and Information Technology. So many Indian and Multinational Companies like Daewoo Motors, LG Electronics, Honda CL and Onida have established their factories in this district. Besides, NOIDA is one of the biggest software suppliers in the country.

Trade and Commerce :

Greater Noida, Suraj Pur, Dadri and Jewar are the main trade centres of the district. These Centres cater to more than 90 per cent of the trade with neighboring districts and Delhi and export to other states and countries of the world. Among articles exported are electronic and computer goods, chemicals, iron products, species, medicines, timber and grain. Vegetables are supplied to Delhi. There are many primary distributing markets in the district.

Transport :

The district is served by rails as well as by roads. The railway track in the district runs to a total length of 36 kms. There are 8 railway stations including halts. The district headquarters is well connected by roadways buses with all administrative

units like Tahsils, Development Blocks and Local Bodies. Besides these, NOIDA is connected by bus service with Hardwar, Dehradun, Moradabad, Bareilly and Aligarh. The district statistics 1999 show that there are 47 bus stations in the district out of which 41 are in rural areas. The district is served by a total length of 865 kms. of metalled roads. No National Highway passes through the district. State highways passing through the district are 20 kms long in the district and rural roads are 366 kms. Roads maintained by other departments are district board (9 kms.), urban bodies (401 kms.) and 48 kms. by government departments.

Electricity and Power :

Electricity is important for giving impetus to economic growth of the district. The district statistics 1999 shows that 319 villages of the district were electrified and L.T. mains installed in another 302 villages. The consumption (thousand KW per hour) in different needs was domestic user 776,960, commercial 123,720, industrial 1,331,040, public light 58,690, public water and sewerage 73,310 thousand kwh. The per capita consumption in the district was 1,966.3 kwh.

Gram Panchayat its composition, jurisdiction and role in Village Development :

A Gram Panchayat acts as the executive body of the Gram Sabha. The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the gram Sabha generally elect a small committee of 7 to 15 members from among themselves who constitute the Village Panchayat. It is necessary that the Village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body which looks after the various problems of the village and takes steps to improve the condition of the villagers.

Formerly the term of the Gram Panchayat differed from state to state. It ranged between three to five years. But the new Panchayat Raj Act of 1993 has fixed a uniform five year term for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duties faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained before hand. The Panchayat normally meets once in a month. If need be an emergency meeting can also be called by the Sarpanch. Decisions are taken by the majority vote. In case of a tie the Sarpanch can also use his casting vote.

In order to be elected to a Village Panchayat, a candidate should possess the following qualifications:

(1) He should be a resident of the village concerned and his name should be in the voter's list of the village.

(2) He should be twenty-five years old.

(3) He should be mentally and physically sound.

(4) He should not be a proclaimed offender.

The members of the Gram Panchayat elect a Sarpanch and a Vice-Sarpanch from amongst its own members. They may have some elderly members forming a special committee to make the working of the Panchayat more smooth and meaningful. All these people are honorary and do not get any pay. A paid secretary to the Panchayat is appointed by the district authorities in consultation with the Panchayat concerned. A Treasurer may also be appointed if the Panchayat is larger.

A Gram Panchayat is entrusted with various social, economic and judicial functions which are as under:

(1) It provides civic amenities to the people of the village.

(2) It gets a primary school opened in the village and supervises its work.

(3) It looks after the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.

(4) It gets the Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a center.

(5) It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.

(6) It arranges for sufficient irrigational facilities, improved seeds, insecticides, chemical fertillizer manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.

(7) It manages and maintains the common property of the village.

(8) In some states, the Gram Panchayat also enjoys certain judicial powers. It decides petty civil and criminal cases and imposes fines upto Rs. 100.

The state government determines the number of Panchas according to the population of the village in Uttar Pradesh the number of Panchas is between 15-30.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc. have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. *But if a garage*

or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars

has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously;

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples

of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia,
25 Chero
26 Dabgar
27 Dhangar
28 Dhanuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
33 Dusadh
34 Gharami
35 Ghasiya
36 Gond
37 Gual
38 Habura
39 Hari
40 Hela
41 Jhusia, Jatawa
42 Kalabaz
43 Kanjar
44 Kapariya
45 Karwal
46 Khairaha
47 Kharwar
(excluding Banbasi)
48 Khatik
49 Khorot
50 Kol
51 Kori
52 Korwa
53 Lalbegi
54 Majhwar
55 Mazhabi
56 Musahar
57 Nat
58 Pankha
59 Parahiya
60 Pasi, Tarmali
61 Patari
62 Rawat
63 Saharya
64 Sanaurhiya
65 Sansiya
66 Shilpkar
67 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned

by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000

population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence

of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution :

The total population 1,202,030 persons of the district is divided into 752,615 persons in rural and 449,415 persons in urban areas. The most populous tahsil is Dadri with 692,259 population followed by Gautam Buddha Nagar tahsil with a population of 259,445.The least populous tahsil is Jewar with a population of 250,326. The maximum urban population is at Noida C.T. which is 305,058 followed by Dadri NPP with 57,416 urban population whereas the least urban population is in Kakod NP (7,139). At the 2001 Census the district has 37.4 per cent of its population living in towns. As compared to this, in the State the

same is 20.8 per cent. The population of urban population is highest in Dadri tahsil (373,224) followed by Jewar tahsil (56,711)

Size, Class and Status of Towns

There are 7 statutory and 2 Census Towns in the district. Noida with 305,058 population is Class I Census town. Dadri with 57,416 population is Class II town. There are three Class IV towns in the district. Salarpur Khadar, Dankaur and Rabupura are Class III towns. Class V towns are Bilaspur, Kakod and Jahangirpur. There is one NPP in the district (Dadari) apart from Six Nagar Panchyats, viz. Bilaspur, Dankaur, Kakod, Rabupura, Jahangirpur and Jewar. The two census towns of the district are Noida and Salarpur Khadar.

Population Growth

The population of the district in 1991 adjusted to jurisdiction of 2001 was 849,742 in the district whereas population of the district at 2001 Census is 1,202,030. There has been decadal variations wherein population since 1991 amounting to 352,288 in absolute terms (41.5 per cent). The males, who were 467,777 at 1991 Census, increased to 652,819 and females rose from 381965 to 549,211. As against 41.5 per cent decadal growth in the district, the growth rate has been 25.8 per cent in Uttar Pradesh.

Population Density

The area of the district is 1,442.00 square kilometre. The density of population in the district is 834 as compared to 690 in the state. In the rural areas of the district the population density is 603.

Sex ratio

The sex ratio in the district is 841, while it is 898 in the state of Uttar Pradesh. In the rural areas of the district the sex ratio is high at 853 while it is only 822 in urban areas. The rural sex ratio of the district is lower than that of the state. The sex ratio among three tahsils varies between 827 in Dadri and 870 in Jewar. Among C.D. blocks the sex ratio varies from 822 in Loni to 865 in Jewar and Sikandarabad. Among towns of the district the minimum sex ratio 729 is found in Salarpur Khadar and highest 891 in Jewar. The sex ratio of population in the age-group 0-6 is 854 in the district which is higher than the sex ratio of general population (841). The sex ratio of population of age-group 0-6 in rural areas is 852 against 858 in urban areas. The sex ratio of population the age-group 0-6 among six C.D. blocks varies from as low as 765 in Loni to as high as 863 in Dadri. It may be noted that out of 392 inhabited villages in the district in 18.9 percent of villages with 24.1 percent of rural population the sex ratio in the age group 0-6 is between 800-849. The sex ratio of population in the age-group 0-6 among towns varies from 807 in Bilaspur to 897 in Kakod and Jewar.

Work Participation Rate

Only 30.3 per cent (363,814 persons) population pertains to the category of workers. Males working population is 46.6 percent as against 10.9 per cent among females. Main workers constitute 25.7 per cent of population with male 41.9 and female 6.4 percent. For marginal workers the figures are 4.6 percent of total population (4.6 percent males and and 4.5 percent females respectively). Non-workers constitute 69.7 per cent of total population, 67.7 percent are from the urban areas and 70.9 in rural areaswith male 55.6 and female 88.9 percent. Of the total working population in the district 25.6 per cent are cultivators, 9.4 per cent engaged as agricultural labourers, 4.0 per cent in household industry and 61.0 per cent as other workers. Among male workers 26.1 per cent are cultivators as compared to 22.9 per cent among females. Similarly as against 62.5 per cent male other workers, the proportion of female other workers is 53.7 per cent. In rural areas of the district as much as 40.5 per cent of working population is cultivators against only 3.1 per cent in urban areas. In case of other workers, the composition of rural and urban proportion is 40.9 and 91.3 per cent respectively of working population. It may be mentioned that the working population in the district is 30.3 per cent as compared to 32.5 per cent in the state.

Literacy

In the district 68.7 per cent of the population is literate as against 56.3 per cent in the state. In the district 81.3 per cent of the male population is literate as compared to 68.8 per cent in the state. Among females the literacy in the district is 53.7 per cent as compared to 42.2 per cent in the state. In the district literacy rate is 74.9 per cent in urban areas as against 64.9 per cent in rural areas. The gap in male/female literacy rate is 34.1 per cent in rural areas as compared to 16.6 percentage points in urban areas. The literacy rate among C.D. blocks varies between 60.4 per cent in Jewar to 69.8 per cent in Loni. Similarly, the literacy rate among towns varies from 52.6 per cent in Rabupura to 80.1 per cent in Noida.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

The district throws up a vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables 1 to 36:

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial No	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Dadri				692,259	319,035	373,224					53.9
2	Gautam Buddha Nagar		N.A		259,445	239,965	19,480		N.A.			7.5
3	Jewar				250,326	193,615	56,711					22 7
	District Total	**849,742**	**601,185**	**248,551**	**1,202,030**	**752,615**	**449,415**	**41.5**	**25.2**	**80.8**	**29.3**	**37.4**

The growth rate of each tahsil in the district for total, rural and urban areas and percentage of urban population to total population is given in table. The growth rates for rural and urban areas of the district are 25.2 and 80.8 per cent respectively. Out of the total population of the district 37.4 per cent live in urban areas while 62.6 per cent lives in rural areas. The proportion of urban population has gone up during the decade from 29.3 per cent in 1991 to 37.4 per cent in 2001 census. Since it is a new district carved out from Ghaziabad and Bulandshahr after 1991 Census the percentage decadal variation of tahsils during 1991-2001 census is not given.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 392 inhabited villages, 19 (4.8 percent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 27 villages having 6.9 percent villages of the district while in the size class of 500-999 population there are 60 villages with 15.3 percent of the total villages in the district. 154 villages (39.3 percent) are in the size class of 1,000-1,999 and 109 villages (27.8 percent) are in the size class of 2,000-4,999 and 23 villages (5.9 percent) in the district fall in the range of 5,000-9999 population.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL

(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified - NIL

(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	5	1.3	867	0.1
11-20	1	0.2	21	0.0
21-50	3	0 8	285	0 0
51-100	10	2.5	4,222	0 6
101-200	20	5.1	11,040	1.5
201-300	22	5.6	22,902	3.0
301-500	81	20.7	120,408	16.0
501 +	250	63.8	592,870	78 8
Not known	0	0.0	0	0.0
District Total	**392**	**100.0**	**752,615**	**100.0**

Population Density (Rural) of the district: 603

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 250 accounting for 63.8 percent of the total inhabited villages of the district falling in the density range of 501+ persons having 78.8 percent population. The lower ranges of 301-500 and 201-300 persons per sq. km. cover 81 villages (20.7 percent) and 22 villages (5.6 percent) have higher density in the range of 201-500 persons per sq.km. while the corresponding proportion in the lower range of 101 - to 200 is 5.1 percent of the total inhabited villages having 1.5 percent population of the district. In further lower density ranges of 21 - 50 and 51-100 persons account for 0.8 and 2.5 percent of inhabited villages respectively. Both these ranges claim 0.6 percent rural population.

TABLE-5: SEX RATIO OF STATE AND DISTRICT 1991-2001

Census Year	UTTAR PRADESH			GAUTAM BUDDHA NAGAR		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	892	889	915
1911	916	922	866	880	879	896
1921	908	918	834	880	878	894
1931	903	916	813	867	867	866
1941	907	922	824	887	886	892
1951	908	922	827	875	876	874
1961	907	921	817	872	872	877
1971	876	884	826	845	844	858
1981	882	889	850	848	844	876
1991	876	879	864	817	821	807
2001	898	904	876	841	853	822

NOTE- Sex ratio has been defined here as the number of females per 1000 males

As per 2001 Census, sex-ratio of 841 (females per 1,000 males) has been recorded in the district against the state average of 898. The sex-ratio of the district remained all along significantly low as compared to the state average figures from 1901 to 2001. The lowest sex ratio of 817 females per 1000 males was recorded in the district in 1991 against the state average of 876 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in the state while in the district, the gap is not wide in the period 1901-2001.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Dadri	827	848	810
2	Gautam Buddha Nagar	852	850	871
3	Jewar	870	866	884
District Total		**841**	**853**	**822**

Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 841 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is higher than that in urban areas. The sex-ratio among rural and urban population is 853 and 822 females respectively. The rural sex-ratio in tahsils varies between 848 in Dadri tahsil and 866 females per 1,000 males in Jewar tahsil. The sex-ratio in Jewar tahsil (866) is higher than the district rural average (853). In urban areas the highest sex-ratio is also recorded in Jewar (884) and the lowest is in Dadri (810).

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial No.	Name of C D block	Sex ratio
1	2	3
1	Loni	822
2	Bisrakh	835
3	Dadri	863
4	Dankaur	853
5	Sikandrabad	865
6	Jewar	865
District (Rural) Total		**853**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 853 females per 1,000 males. Among the C.D. blocks the highest sex-ratio of 865 is found in Sikandrabad and Jewar C.D. block followed by Dadri 863 while the lowest 822 is recorded in Loni C.D. block. The sex-ratios of Sikandrabad and Jewar C.D. block are higher than the district rural average of 853 and in the remaining blocks, this value is equal in Dankaur and in other Blocks it is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	9	2 3	11,149	1 5
700-749	5	1 3	1,395	0.2
750-799	30	7 7	43,599	5.8
800-849	112	28 6	257,235	34 2
850-899	166	42.3	361,041	48 0
900-949	61	15.6	72,979	9.7
950-999	5	1.3	4,712	0.6
1000-1099	3	0.8	392	0.1
1100+	1	0.3	113	0.0
District Total	**392**	**100.0**	**752,615**	**100.0**
Sex ratio (Rural) for District		853		

Table 8 presents the distribution of villages by sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 166 accounting for 42.3 percent of the total villages having largest population of 48.0 percent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849 which claims 112 villages (28.6 percent) and 34.2 percent population. The highest range of 1,100 and above claims one village (0.3 per cent). This range shares 113 persons rural population of the district while in the sex-ratio range of 900-949, there are 61 villages (15.6 percent). In remaining sex-ratio ranges of 1000-1099, 950-999, 750-799, 700-749 and less than 700, the number of villages are3 (0.8 percent), 5 (1.3 percent), 30 (7.7 percent), 5 (1.3 percent) and 9 (2.3 percent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 166 having maximum population (48.0 percent) fall in the higher sex-ratio ranges of 850-899 showing that in majority of villages the sex-ratio is significantly higher. However, sex ratio for Gautam Budha Nagar rural stands 853.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio

	District Total	**Total**	**218,359**	**117,783**	**100,576**	**854**
		Rural	**143,824**	**77,677**	**66,147**	**852**
		Urban	**74,535**	**40,106**	**34,429**	**858**

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group 0-6 is 218,359 persons comprising 117,783 males and 100,576 females. The total sex-ratio in this age-group works out as 854 females for every thousand males in the district. The proportion of females in rural areas is lower than that of urban areas. The sex-ratio in rural and urban areas comes to 852 and 858 in this age-group respectively. The rural sex-ratio in tahsil varies between 850 in Dadri tahsil and 853 in Gautam Budha Nagar tahsil. The sex-ratio of 852 in tahsil Jewar is equal to the district rural average. Dadri has lowest sex ratio of 827 females among the total population and holds second lowest sex ratio among children. In urban areas, the highest sex-ratio is recorded in Jewar urban (875) and the lowest is found in Gautam Budha Nagar urban (834). In this age-group the sex ratio in all tahsils is nearly equal to the district average.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial Number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Loni	1,135	643	492	765
2	Bisrakh	34,749	18,913	15,836	837
3	Dadri	30,752	16,506	14,246	863
4	Dankaur	43,565	23,504	20,061	854
5	Sikandrabad	1,525	821	704	857
6	Jewar	32,098	17,290	14,808	856
	District (Rural) Total	**143,824**	**77,677**	**66,147**	**852**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the

district. The sex-ratio is 852 for the district (rural). The sex-ratio of C.D. block varies between 765 and 863. It is highest in Dadri C.D. block i.e. 863 followed by 857 in Sikandrabad C.D. block and lowest 765 is found in Loni C.D. block. The sex-ratio of Jewar, Sikandrabad, Dankaur and Dadri C.D. blocks is higher than the district rural (852) and Dankaur almost equals the district average while in remaining two blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population

950-999	25	6.4	8,770	6.1
1000-1099	33	8.4	8,109	5.6
1100+	15	3.8	2,252	1.6
District (Rural) Total	**392**	**100.0**	**143,824**	**100.0**
Sex ratio (Rural) for District			**852**	

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 74 (18.9 per cent) having largest population (24.1 per cent) in the district (rural) fall in the sex-ratio range of 800-849 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 850-899 which accounts for 69 villages (17.6 per cent) and 22.7 percent population. Next to it, 54 villages (13.8 per cent) are in the range of 750-799 with 13.8 percent population. 47 villages (12.0 per cent) having 15.1 per cent population fall in sex-ratio range of 900-949. Remaining sex-ratio ranges of less than 700, 700-749, 950-999, 1000-1099 and 1100+ claim less number of villages and these are distributed as 34 (8.7 per cent), 41 (10.5 per cent), 25 (6.4 per cent), 33 (8.4 per cent and 15 (3.8 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 244 having population (75.7 per cent) fall in the higher sex-ratio ranges of 750- 949.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1202030 total population of the district, 16.3 percent of the total population belong to the Scheduled Castes and 398 persons to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 19.6 per cent in rural population and 10.8 percent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Jewar tahsil (23.6) while the lowest is found in Dadri tahsil (12.6). The Scheduled Tribes population is 298 and 100 persons in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in tahsil of Jewar (241 persons). The lowest population of Scheduled Tribes is recorded in Gautam Budha Nagar tahsil (27), preceded by Dadri tahsil (130).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Loni	6,074	1,891	0	31.1	0.0
2	Bisrakh	188,912	27,764	8	14.7	0.0
3	Dadri	163,346	29,528	30	18.1	0.0
4	Dankaur	221,862	44,410	19	20.0	0.0
5	Sikandrabad	8,618	1,655	0	19.2	0.0
6	Jewar	163,803	42,174	241	25.7	0.1
	District (Rural) Total	**752,615**	**147,422**	**298**	**19.6**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 19.6 per cent of rural population of the district belongs to Scheduled Castes and 298 persons to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 14.7 per cent in Bisrakh to 31.1 per cent in Loni C.D. block. The other C.D. blocks containing the higher percentage of Scheduled Castes are Sikandrabad (19.2), Jewar (25.7) and Dankaur (20.0). The highest number of 241 persons belonging to Scheduled Tribes population is in Jewar C.D. block and is distantly followed by Dadri C.D. block (30 persons). The lowest number i.e. zero of Scheduled Tribes is recorded in Sikandrabad and Loni C.D. blocks. The Scheduled Tribes population in the district is mainly concentrated in Jewar CD Block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	33	8.4	0	0.0
Less than 5	43	11.0	2,205	1.5
5-10	61	15.6	10,285	7.0
11-20	105	26.8	39,595	26.9

76 and above	2	0.5	1,618	1 1
District Total	**392**	**100.0**	**147,422**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. Infact 33 villages accounting for 8.4 per cent of total 392 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 43 villages (11.0 per cent). In 61 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 105 villages constituting 26.8 per cent of the total villages. The range 21-30 and 31-40 per cent contains 77 and 32

villages respectively. Both these ranges together account for 27.8 per cent villages of the district. 24 villages fall in the range of 41-50 and 51-75 percent fall in 15 villages (3.8 percent) and 2 villages (0.5 percent) are in the range of 76 and above per cent and these villages contain 1.1 per cent Scheduled Castes population of the district. The maximum of 33.4 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	384	98.0	0	0.0
Less than 5	7	1.8	119	39.9
5-10	0	0.0	0	0.0
11-20	0	0.0	0	0.0
21-30	0	0.0	0	0.0
31-40	0	0.0	0	0.0
41-50	1	0.2	179	60.1

District(Urban) Total		**449,415**	**48,600**	**100**	**10.8**	**0.0**

Table 18 shows number and percentage of Scheduled Castes and Scheduled Tribes population recorded during 2001 census in the district. The table shows that Scheduled Castes population in Dankaur NP is highest (25.5 percent) and lowest (8.6 percent) is in Noida CT. Scheduled Tribes population of 100 is found only in Noida while Scheduled Caste population for the district in urban areas is 10.8

percent, which is found in different proportion in all the 9 towns of the district. In case of Scheduled Tribes it is only one town, i.e. Noida CT where 100 persons have been recorded as Scheduled Tribes whereas in other eight towns the Scheduled Tribes population is nil.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial No.	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Loni	861	0
2	Bisrakh	852	1,667
3	Dadri	878	1,308
4	Dankaur	860	1,111
5	Sikandrabad	853	0
6	Jewar	864	799
	District (Rural) Total	**863**	**874**

Table 19 indicates sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 863 and for Scheduled Tribes it is 874 for district (rural). Among the C.D.blocks, the highest sex ratio of 878 females per thousand male is found in Dadri C.D. block and lowest sex-ratio (852) is recorded in Bisrakh C.D. block. In case of Scheduled Tribes, it is zero in two towns (Loni and Sikandrabad) and in other four towns, it is between 799 in Jewar and 1667 in Bisrakh C.D. Block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bilaspur NP	862	0
2	Dadri NPP	845	0
3	Dankaur NP	843	0
4	Jahangirpur NP	886	0
5	Jewar NP	882	0
6	Kakod NP	915	0

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 68.7 per cent in the district. This proportion in rural area is 64.9 per cent against 74.9 per cent in urban areas. In the district the literacy rates of males (81.3 per cent) is much higher than that of females (53.7 per cent). Among the tahsils, Dadri tahsil tops with 73.9 per cent literates followed by Gautam Budha Nagar tahsil(63.2 per cent). Jewar tahsil with 59.7 per cent literates stands at the bottom in the district. Out of 3 tahsils, the literacy rates of Dadri tahsil is higher than that of district average. It is also observed that in urban areas of district, the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 27.6 percentage points in the district. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 16.6 percentage points against the rural areas, where the gap between male and female literacy is 34.1 percentage points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Loni	3,447	2,246	1,201	2,627	1,088	1,539	69 8	83 5	53 4	30.1

5	Sikandrabad	4,856	3,199	1,657	3,762	1,423	2,339	68.5	84 2	50.3	33 9
6	Jewar	79,495	54,542	24,953	84,308	33,309	50,999	60 4	77 3	40 8	36.5
	District (Rural) Total	**395,058**	**264,773**	**130,285**	**357,557**	**141,358**	**216,199**	**64.9**	**80.6**	**46.5**	**34.1**

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. Infact, 64.9 per cent of the total rural population excluding the age-group of 0-6 years is literate in the district. The corresponding proportion of male and female literates is 80.6 and 46.5 per cent respectively which shows very wide gap of 34.1 percentage points in male and female literacy. At

C.D. block level, Loni C.D. block has the highest rural literacy rate of 69.8 per cent while 83.5 percent males and 53.4 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Jewar C.D. block (60.4 per cent). There are wide variations in male and female literacy rates in all the C.D. blocks of the district. The maximum gap of 36.7 percentage points is found in Dankaur C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.3	1	0.0
1-10	1	0.3	930	0.1
11-20	1	0.3	1,205	0 2
21-30	4	1.0	1,016	0.1
31-40	8	2.0	14,050	1.9
41-50	24	6.1	52,785	7.0
51-60	81	20.7	145,846	19.4
61-70	169	43.1	316,132	42.0
71-80	97	24.7	203,985	27.1
81-90	6	1.5	16,665	2.2
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total	**392**	**100.0**	**752,615**	**100.0**
Literacy rate for District		**68.7**		

Table 23 gives distribution of villages by literacy rate ranges in the district. There is no literate in one village (0.3 per cent) of the district and population of this village is only (one) person. No village (zero per cent) has all the literate population. 81 villages accounting for 20.7 per cent of the total villages are in the literacy range of 51-60 per cent and 169 villages (43.1 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 percent observed in 39 villages (10.0 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 103 villages (26.2 per cent). The range of 51-70 have the maximum number of 250 villages forming 63.8 per cent of the total inhabited villages, whereas literacy rate for the district as a whole is 68.7 percent.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

Table 24 shows number and percentage of literates and illiterates by sex during 2001 census in the urban areas of the district. Regarding absolute figures of literates Noida town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (74.9 per cent). The literacy rate is quite high (90.7 per cent) and 85.9 per cent among males in Salarpur Khadar and Noida CT respectively. Female literacy rate is not far behind in these two towns 72.9 per cent in Noida and 64.6 per cent in Salar Khadar CT. However, literacy rate among females is very low (37.2 per cent) in Rabupura NP. Thus the gap in male female literacy rate is very high (29.0) in this town.

TABLE25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

Table 25 reveals number and percentage of Scheduled Castes literates and illiterates by sex in CD blocks. District's literacy is 56.8 percent (males 74.3 percent, and females 36.5 percent). The gap between male and female literacy is 37.8 percentage points for the district. In six CD blocks, literacy rate varies from 52.2 percent in Jewar to 65.7 percent in Loni. Among females it oscillates between 30.7 in Jewar and 45.2 percent in Loni.

Table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in towns population at the 2001 census. The number of illiterates is 26,383 which is more than literates 22,217 in the district (urban). The percentage of literates is least (47.1) in Jahangirpur NP among towns but the gap in male/female literacy rate is highest (42.2 percentage points) in case of Rabupura NP. The males in all the 9 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is minimum i.e. 24.0 percentage points in case of Dadri (NPP) while the female literacy rate is highest, 49.2 percent in the same town.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial No.	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates

	District (Rural) Total	**148**	**94**	**54**	**150**	**65**	**85**	**62.2**	**75.8**	**47.4**	**28.4**

Table 28 brings out the number and percentage of Scheduled Tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates (150) is more than literates (148) in the district. The literacy rate of the Scheduled Tribes population (62.2 percent) is higher than the corre-

sponding rate (56.9 percent) in case of Scheduled Castes community. However, the gap of literacy rates at 28.4 percentage points is the same as in case of Scheduled Caste (28.4). The literacy rate of 65.4 percent is highest in Jewar CD Block and lowest (37.5 percent) in Bisrakh CD Block. The gap in male-female literacy rate in all CD Blocks is in favour of the males, which is a normal phenomenon.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Literacy rate for District (Rural): 62.2

Table 29 gives the distribution of villages by literacy rate ranges for the Scheduled Tribes population at the 2001 census. In the district, the Scheduled Tribes population is found in 8 villages, out of which in one village, the literacy range is 100 percent. However, the maximum (61.1 percent) of the Scheduled Tribes population (182) is found in only 2 villages with literacy range from 61 to 70 percent. Literacy rate of Scheduled Tribe for the district is 62.2 percent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/femal literacy rate

Table 30 gives number and percentage of Scheduled Tribes literates and illiterates by sex in towns' population at the 2001 census. There is small Scheduled Tribes population of 100 in the towns of the district. All Scheduled Tribes population is residing in Noida CT only. Among them, 32 are literates and the remaining Scheduled Tribes population of 68 being illiterate. The percentage of literates is 37.2 percent in which 36.7 percent are males and 37.8 percent females. The gap in male-female literacy in Noida town is 1.1 percentage points.

TABLE31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN TAHSILS, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers is 30.3 per cent of the total population in the district. The total workers are comprised of 25.7 per cent main workers and 4.6 per cent marginal workers and the remaining 69.7 per cent are non-workers.

Among the main workers, male participation rate in the district is 41.9 per cent and 6.4 per cent of females. Male and female marginal workers account for 4.6 and 4.5 per cent respectively. The percentage of females marginal workers is lower than that of males. Total workers (main and marginal workers) among tahsils varies from 28.3 per cent in Jewar tahsil to 31.1 per cent in Dadri tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of 752,615 total rural population of the district, 23.5 per cent has been categorised as main workers and the marginal workers constitute 5.6 per cent and the remaining 70.9 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 39.2 per cent males and 5.1 per cent females are in the category of main workers. Male and female marginal workers account for 5.2 and 6.0 per cent respectively. The percentage of female marginal workers is higher than that of male marginal workers. Similar trend is visible in Dankaur, Sikandrabad and Jewar C.D. blocks.

The percentage of total rural workers of the district comes to 29.1. At the C.D. block level, Sikandrabad has highest proportion of total workers forming 32.2 per cent of the total population. It is followed by Dankaur (30.5 per cent), Bisrakh (28.5 per cent), Jewar (28.4 per cent), and Loni (24.9 per cent). The lowest percentage of 24.9 is recorded in Loni C.D. block.

Table 33 indicates that as against 29.4 percent main workers in the urban areas of the district, such workers are as high as 32.0 percent in Noida CT. However, the extent of marginal workers is highest (5.8) in Rabupura NP. The proportion of total workers is 32.3 per cent of the total urban population of the

district. Total workers are comprised of 29.4 per cent of main workers and 2.9 per cent of marginal workers and the remaining 67.7 per cent are non workers. Among the main workers, male participation rate in the district is 46.5 per cent whereas female participation rate is only 8.5 per cent. Male and female marginal workers account for 3.6 and 2.0 per cent respectively. The percentage of female marginal workers is lower than that of males. Proportion of workers (main and marginal) among towns varies from 22.8 per cent in Bilaspur NP to 34.9 per cent in Noida CT.

Note: Percentages of Workers to total workers are given in brackets

It can be seen from table 34, that the economy of the district is primarily non-agricultural as supported by the fact that cultivators constitute only 25.6 per cent of the total workers (main + marginal) and remaining 74.4 per cent of total workers are engaged as agricultural labourers (9.4 per cent), Houschold industry workers (4.0 per cent) and other workers (61.0 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on other work sector absorbing a large number of population (61.0 per cent). The proportion of cultivators varies between 14.6 per cent in Dadri tahsil and 42.5 per cent in Jewar tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of female cultivators is 22.9 per cent which is lower as compared to 26.1 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the top position and next is agriculture in the district as well as in each tahsil. The highest proportion of 77.7 per cent of other workers is recorded in Dadri tahsil while the lowest proportion of 34.4 per cent is found in Jewar tahsil.

Note Percentages of Workers to total workers are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) are 29.1 percent of total population. Among these workers, cultivators constitute 40.5 per cent, agricultural labourers 14.3 per cent, household industry workers 4.3 per cent and other workers 40.9 per cent. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these employ only 4.3 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (34.0 per cent) is lower than that of males (41.8 per cent) in the rural areas of the district. The females play major role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to an other. The proportion of cultivators varies between 15.1 per cent in Loni C.D. block and 52.9 per cent in Jewar C.D. block. Similarly for other workers, the lowest proportion is 21.5 per cent in Jewar C.D. block while higher proportion (79.7 per cent) is in Loni C.D. block. The percentage of agricultural labourers and household industry workers together is quite low i.e. only 18.6 per cent in the district. The percentage of agricultural labourers is highest (22.9) in Jewar block and is followed by Dankaur (17.7). In other C.D. blocks, this proportion is comparatively low. Percentage of household industry workers varies in C.D. blocks between 2.7 per cent in Jewar and 5.0 percent in Dadri C.D. Block.

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district. The four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (91.3 percent), followed by household industry worker with 3.5 percent, (males 3.1 and females 6.0 percent). If we consider each town, the table reveals that highest percentage of household industry worker (8.3) is recorded in Jewar NP. In the agriculture labourers category Dadri NPP recorded very low percentage (0.4). Cultivators also have very low percentage (1.6) in Noida CT, 1.7 percent in Dadri and 3.0 percent in Bilaspur NP. As per the usual trend in the urban areas, other workers are in high percentage (94 4 percent) in Noida CT, 94.0 percent in Dadri NPP and 91.7 percent in Dankaur NP.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37-47:

One of the major parts of the District Census Handbook is Village and Town Directory. Non-census data showing educational, medical, drinking water, banking, communication facilities and other such developmental indicators are incorporated in the town and village directory. From non-census data, inset tables 37 to 47 have been generated and reproduced here showing major trends in the availability of above amenities.

		(100)	**(83.7)**	**(91.3)**	**(99.0)**	**(20.4)**	**(40.3)**	**(22.2)**	**(5.6)**	**(6.6)**	**(73.7)**	**(91.8)**

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like educational, medical, improved drinking water, post office, telephone, transport, communications, banks, agricultural credit societies, approach by pucca road and power supply within the village. Out of 392 inhabited villages in the district, 328 villages (83.7 per cent) have been provided with the educational facility of one type or the other. Similarly 358 villages in the district constituting 91.3 per cent have medical facility of one type or the other. Improved drinking water facility is available in 388 (99.0 per cent) villages. As regards, post office facility, which includes facilities like telegraph office and post and telegraph, 80 villages constituting 20.4 per cent of villages have been provided with this facility within the village. 158 (40.3 per cent) villages have been provided with the telephone facility, 87 (22.2 per cent) with transport facility, 22 (5.6 per cent) villages with bank facility and 26 (6.6 per cent) with agricultural credit societies. There are 289 (73.7 per cent) villages which have been linked with the pucca road. Total 360 (91.8 per cent) of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been

found with slight variation. Sikandrabad CD block has the highest number (cent percent) of villages where educational facility is available and lowest (66.7 per cent) is found in Loni. Medical facility is highest in Loni and Sikandrabad (cent percent) and lowest (88.5 per cent) in Dankaur CD block. Improved drinking water is available to cent percent villages in Loni, Dadri, Sikandrabad and Jewar blocks while in two other blocks, it is above 96.00 per cent. Post office facility is available from 14.4 percent villages in Dankaur to 66.7 percent in Loni Block. Telephone facility is highest in Loni (66.7 per cent) and lowest (24.2 per cent) in Jewar CD block. Transport and communications are less developed in Bisrakh where only 11.9 per cent villages are covered by these facilities whereas 33.3 per cent villages each of Loni and Sikandrabad CD block are availing this facility. In the field of power supply this is available cent percent in Loni and Sikandrabad CD Blocks. It is lowest (86.3 per cent) in Jewar C.D. Block. In Sikandrabad no bank facility is available. In other CD blocks it is in the proportion of 3.2 percent in Jewar to 33.3 per cent in Loni. Pucca road is available from 56.8 percent in Jewar to cent percent in Loni.

TABLE 38 : NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial No.	Name of C. D. block	Total population of inhabited villages	Type of amenity available					Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kinds of amenities. Out of total rural population of 752,615 persons in the district, 708,327 (94.1 per cent) have educational facility of one or the other type. Similarly 724,066 (96.2 per cent) population has medical facilities while almost cent percent have got improved drinking water facility. Post office facilities are available to 302,435 (40.2 per cent) population. Telephone facility is available to 384,698 (51.1 per cent). Transport communications facility is available to 206,467 (27.4 per cent). Bank facility is available to 104,115 (13.8 per cent) whereas 105,620 (14.0 per cent) have been provided with the facility of agricultural credit societies. 641,171 (85.2 per cent) have been provided with the facility of approach by pucca road. Power

supply is available to 716,139 (95.2 per cent) rural population in the district. Similar pattern of availability of facilities is visible in rural population at C.D. block level. However, in Loni C.D. block, facilities of medical, approach by pucca road, power supply and improved drinking water are available in cent percent proportion of population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	61	4	0	65

3. Post Office	209	89	14	312
4. Telephone	112	98	24	234
5. Bus Service	159	130	28	317
6. Banks				
(a) Commercial Bank	189	155	31	375
(b) Cooperative Bank	76	185	122	383
7. Agricultural Credit Societies	212	117	37	366

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. Total 65 villages do not have primary school in their premises and out of these villages, children of 61 villages have to travel less than 5 kms. for schooling. Out of 392 inhabited villages as many as 291 are deprived of middle school and 386 of degree college. Of these 196 avail the facility of middle school at a distance of less than 5 kms., 93 at a distance 5-10 kms. and the remaining 2 at a distance of 10+ kms. In respect of degree college 75 avail this facility at a distance of less than 5 kms., 134 between 5 to 10 kms. and rest 177 villages at a distance of 10+ kms.

Similarly there are 378 villages in the district which are devoid of Hospital facility and 378 villages are without PHC facilities. Of these 117 villages have the facility of Hospital available within 5 kms. while in respect of 155 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 106 villages have this facility at a distance of 10+ kms. As regards PHC 101 villages avail this facility at a distance of less than 5 kms., 201 at a distance of 5-10 kms. and the remaining 76 have to travel a distance of more than 10 kms. to avail this facility. Regarding Post Office, 312 villages do not have this facility in the village itself. Of these, majority i.e. 209 have this facility at a distance of less than 5 kms., another 89 villages avail it at a distance of 5-10 kms. In the remaining 14 villages in habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 234 villages in the district which are without telephone facilitiy. Of these, 112 avail this facility at a distance of less than 5 kms., 98 at a distance of 5-10 kms. and remaining

24 have to traverse a distance of 10+ kms. For Bus service out of 317 villages which do not have this facility, 159 villages avail this facility at a distance of less than 5 kms., 130 at a distance between 5-10 kms. and 28 at a distance of 10+ kms.

In the entire district, 375 villages are deprived of Commercial Banks and 383 of Co-operative Banks. Of these, 375 villages which are deprived of Commercial Banks, 189 villages avail this facility at a distance of less than 5 kms., 155 between 5-10 kms. and the remaining 31 at a distance of 10+ kms. Regarding Co-operative Banks, out of 383 villages, 76 villages avail this facility at a distance of less than 5 kms., 185 at a distance of 5-10 kms. and remaining 122 at a distance of 10+ kms. 366 villages do not have Agricultural Credit Societies. This facility to 212 villages is available at a distance of less than 5 kms. to 117 at a distance of 5-10 kms. and to the remaining 37 at a distance of 10+ kms.

TABLE40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communic ations $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 392 inhabited villages in the district, there are 86 villages which have nearest towns upto a distance of 5 kms. Of these only 72 villages forming 83.7 per cent of these total villages are having the educational facility of one type or the other and 83 villages constituting 96.5 per cent have the medical facilities within the village, 17 villages forming 19.8 per cent have the facility of post office within the village and 34 or 39.5 per cent have the facility of telephone. 20 villages constituting 23.3 per cent have been linked by transport service. 5 villages comprising 5.8 per cent have been provided bank facilities, while 9 villages constituting only 10.5 per cent have been provided by Agricultural Credit Societies. 70 villages comprising 81.4 per cent have been provided with pucca road.

There are 272 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these, 227 villages constituting 83.5 per cent have been provided with the educational facilities. 244 villages comprising 89.7 per cent have been provided with medical facilities.58 villages constituting 21.3 per cent enjoy the post office facility. 112 villages comprising 41.2 per cent have been provided the telephone facility.57 villages constituting 21.0 per cent have been linked with transport communications. 15 villages comprising 5.5 per cent have banking facility. 16 villages constituting 5.9 per cent are having Agricultural Credit Societies, while 193 villages or 71.0 per cent are approachable by pucca road. 30 villages fall in the distance range of 16-50 kms. Of these, 25 villages (83.3 per cent) have educational facility, 27 (90.0 per cent) with medical, only 4 (13.3 per cent) with post office, 11 (36.7 per cent) with telephone and transport and communications is available to 10 (33.3 per cent) villages. Banks and Agricultural Credit Societies are available to 6.7 and 3.3 per cent of villages respectively. Approach to pucca road is in 73.3 percent villages.

TABLE41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In the district out of a total of 392 inhabited villages, majority of 154 have a population range 1000-1999 persons. Of these, 139 villages (90.3 per cent) have educational facility, 146 (94.8 per cent) have medical facility, 154 (cent per cent) have improved drinking water facility, 11 villages (7,1 per cent) have post office facility, 61 (39.6 per cent) have telephone facility, 32 (20.8 per cent) have been linked by bus service, 1 (0.6 per cent) have Banking facility, 3 villages (1.9 per cent) have been provided with the Agricultural Credit Societies, 117 villages (76.0 per cent) have been linked with pucca road and 147 villages (95.5 per cent) have been provided with electricity.

Out of 60 villages, which fall in the population range of 500-999 persons, 46 villages (76.7 per cent) have been provided with the educational facility, 54 (90.0 per cent) with medical facility, all the villages

have improved drinking water facility, 2 villages (3.3 per cent) have been provided with post office facilities, 16 villages (26.7per cent) with telephone facility, 8 villages (13.3 per cent) with transport facilities. No village (zero per cent) has banking and Agricultural Credit Societies facility, 34 villages (56.7 per cent) have approach by pucca road and 56 villages (93.3 percent) in this range have electricity.

109 villages fall in population range of 2000-4999 persons. Out of these, 106 villages (97.2 percent) have educational facilities whereas 105 villages (96.3 per cent) enjoy the medical facility. 47 villages (43.1 per cent) have post office facility, 56 villages (51.4 per cent) have telephone facility, 29 villages (26.6 per cent) have transport communications facility, 10 villages (9.2 per cent) have bank facility, 16 villages (14.7 per cent) have Agricultural Credit Societies and 96 villages (88.1 per cent) have approach by pucca road. Improved drinking water facility is available in all the 109 villages.

There are 23 villages in the district which are covered under 5000-9999 population range. In this range, all the villages enjoy the facilities of education, medical, improved drinking water, approach by pucca road and power supply. 20 villages (87.0 per cent) have post office facility, 69.6 per cent have telephone, 43.5 per cent transport facility, 11villages (47.8 per cent) have bank facility and 7 villages (30.4 per cent) are having Agricultural Credit Societies. None of the village falls in the population range of 10,000 and above population.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial No.	Name of C. D. block	Number of inhabited villages	Total area in hectare	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Loni	3	765.6	26.0	64.1
2	Bisrakh	84	22,757.6	70.4	96.7
3	Dadri	68	21,785.9	62.8	99.3
4	Dankaur	139	39,375.7	89.7	94.0
5	Sikandrabad	3	880.1	84.5	100.0
6	Jewar	95	33,007.3	81.3	99.1
	District Total	**392**	**118,572.2**	**78.3**	**96.7**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates as to what is the extent of cultivable area under irrigation. There are total 392 inhabited villages in the district having a total area of 118,573 hectares. Of this, 78.3 per cent is cultivable and 96.7 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Loni block with 3 villages has a total area of 765.6 hectares, of this 26.0 per cent of land is cultivable and of the aforesaid area 64.1 per cent is irrigated. In Bisrakh block, all the 84 villages have a total land area of 22757.6 hectares. Of this, 70.4 per cent of land is cultivable and of the aforesaid area 96.7 per cent is irrigated. In Dadri block, all the 68 villages have a total area of 21785.9 hectares. Of this, cultivable area is 62.8 per cent and 99.3 per cent is irrigated of cultivable area. In Dankaur block, all the 139 villages have a total area of 39375.7 hectares. Of this, cultivable area is 89.7 per cent. Of cultivable area 94.0 per cent is irrigated. Sikandrabad block with 3 villages have a total land area of 880.1 hectares. Of this, 84.5 per cent is cultivable area and out of this cultivable area cent per cent is irrigated. Jewar block with 95 villages has a total land area of 33007.28 hectares. Of this 81.3 per cent is cultivated area, out of which 99.1 per cent is irrigated.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Table 43 gives an account of per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district is Rs.159 of which Rs. 12 are derived through local taxes and the remaining Rs.147 received from all other sources. The average total expenditure incurred per head is Rs. 146. Out of this, Rs. 38 are spent on general administration, Rs 54 on public health and conveniences, Rs 21 on public works, and Rs.33 are spent on other items. Among all the five towns, the receipt and expenditure recorded per head is highest in Dankaur NP.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bilaspur, NP	2.7	1.3	2.7	2.7	0.0
2	Dadri, NPP	3.1	2.6	2.1	1.2	0.2
3	Dankaur, NP	5.0	4.2	2.5	0.8	0.8
4	Jahangirpur, NP	3.2	2.1	1.1	1.1	0.0
5	Jewar, NP	2.6	2.6	1.9	1.9	0.0
6	Kakod, NP	2.8	1.4	1.4	1.4	0.0
7	Rabupura, NP	1.5	0.8	0.8	0.8	0.0
	District	**3.0**	**2.4**	**1.9**	**1.3**	**0.1**

Table 44 shows in urban areas of the district, the average number of primary schools per 10,000 population comes to 3.0 primary schools, 2.4 junior secondary/middle,1.9 secondary/matriculation,1.3 senior secondary schools and the ratio of colleges is only 0.1 college per 10,000 population. Among towns, the ratio of primary and junior secondary/middle is highest in Dankaur N.P. and Bilaspur N.P. has the highest ratio of secondary/ matriculation schools while in case of senior secondary schools, this position is claimed also by Bilaspur (2.7). College education is available only in Dadri NPP (0.2) and Dankaur N.P. (0.8).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl No	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bilaspur, NP	0
2	Dadri, NPP	17
3	Dankaur, NP	4
4	Jahangirpur, NP	2
5	Jewar, NP	2
6	Kakod, NP	0
7	Noida, CT	43
8	Rabupura, NP	0
9	Salarpur Khadar, CT	9
	Total	32

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of the district. On an average, there are 32 beds per 10,000 population in urban areas of the district. It is the highest (43) in Noida (CT) while lowest number of beds (two) is recorded in Jahangirpur NP and Jewer NP. In Bilaspur NP, Kakod NP and Rabupura NP, this type of facility is not available.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS 2001

N.A.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bilaspur, NP	--, --, --	Paddy, Wheat, Mustard
2	Dadri, NPP	Jacket, Hosiery, Wooden Goods	Rice, Gur. Wheat
3	Dankaur, NP	Tools, Bricks, --	Wheat, Rice, Barley
4	Jahangirpur, NP	--, --, --	Niwar, Ban, --
5	Jewar, NP	Khadi Cloth, Iron Goods, Gur	Wheat, Veg. Oil, Iron Goods
6	Kakod, NP	Bricks, --, --	Wheat, Rice, Barley
7	Noida, CT	Cars, Television Sets, Adio/Video Tapes	TV, Electronic Goods, Cars
8	Rabupura, NP	--, --, --	Food grains, --, --
9	Salarpur Khadar, CT	--, --, --	--, --, --

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for wheat and rice production. The chief export items of the district are rice and wheat. There are also the main items which are produced throughout the district are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001 based on inset tables 48-52:

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. has been added in the schedule for the first time. The districtwise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households*								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."
* House list households.

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 20,4454 consisting of 113,133 rural and 91,321 urban households. 38,717 households belong to Scheduled Castes and 4,011 to Scheduled Tribes. 166,138 households are living in their owned houses constituting 81.26 per cent of total households. Of these households, the largest number of households (51,418) have occupied double roomed accommodation and is followed by single roomed accommodation numbering 46,535 households. Next position is claimed by households (33,658) occupying three plus room accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 32,187 households while 2,340 households are without any exclusive room.

31,128 households living in rented accommodation account for 15.2 percent of total number of households in the district. The largest number of 16,886 households are living in single room accommodation followed by 6,593 households in double room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering 7,188 forming only 3.5 per cent of total households are distributed in single room accommodation numbering 3,974, 993 double room and 863 three roomed accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas they show a reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial No	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Dadri	84 3	9 8	5.9	84.1	13 2	2.8	84 5	7.8	7.7

3	Jewar	72.3	18.9	8.8	73.7	16.6	9 7	66.6	28.0	5 4
	District Total	**80.6**	**13.0**	**6.5**	**78.6**	**15.6**	**5.8**	**83.0**	**9.7**	**7.3**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 — Permanent houses refer to those houses whose wall & roofs are made of pucca materials i.e., burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc oro t h e r metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate a re-used for roof.

Semi permanent:- 2 — Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 — Temporary houses refer to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that 80.6 percent of the households in the district had permanent houses. The trend is different in rural (78.6 per cent) and urban area (83.0 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Dadri (84.3 per cent) followed by Gautam Budha Nagar (75.9 per cent), and lowest in Jewar (72.3 per cent). In respect of semi-permanent houses, the returns were 13.0 per cent of district level whereas among tahsils, in Jewar it was highest 18.9 per cent and lowest was 9.8 percent in tahsil Dadri. Rural areas presented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion of 7.8 to 28.0 percent. Temporary houses in the district form 6.5 per cent and at tahsil level it lies between 5.9 in Dadri and 8.8 per cent in tahsil Jewar.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source Census of India 2001, H-series. Tables on Houses, Household amenities and Assets.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

* House list Households.

**Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises, it is considered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note. Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage means closed and open drainage.

Table 50 shows that out of total households of the district, 93.6 percent of the households had improved drinking water facility. The proportion of rural and urban area was 92.9 and 94.5 percent. Tahsil Dadri had highest order of proportion of households where percentage for rural area was 94.9 and 94.4 percent in urban areas. Electricity was available for 63.7 percent of households at district

level which had better access to electricity. Bathrooms and toilet facilities were available in 52.1 and 52.2 percent households at district level. Tahsil Jewar was poorly served in respect of these amenities. Similarly drainage facility was 90.9 percent in Gautam Budha Nagar tahsil, 91.7 percent in Dadri and 92.8 percent in Jewar. At district level drainage facility was available for 91.7 percent households, whereas the proportion of rural and urban area, households accounted for 91.3 and 92.3 percent respectively..

Percentage in brackets

* House list households.

Data source: Census of India 2001, H-series: Tables on Houses, Households amenities and Assets.

It is observed from the above table that 13.9 percent of households in the district use firewood as fuel for cooking. The proportion in the rural area is 15.8 and in urban area it comes to 11.5 percent households. LPG (cooking gas) has been reported as one of the fuels for cooking of food in 34.3 percent of the households. The composition of rural and urban comes to 12.2 and 61.7 percent respectively. Kerosene is used for cooking in 6.8 percent of the households (1.1 percent rural and 14.0 percent urban households). The other methods like crop residue (5.5), cowdung cake (38.5), coal, lignite (charcoal) (0.2), electricity and biogas range between 0.1 percent and 0.3 percent respectively of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is cowdung cake. 34.3 percent of households use LPG and 13.9 percent use firewood. The table shows that cowdung cake (38.5), firewood (13.9), cooking gas (34.3), kerosene (6.8) are most common fuels for cooking.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial No.	Tahsil	Total/ Rural/ Urban	Total number of households	Total number of households availing banking services	Availability of household assets				Availability of household assets

Data source: Census of India 2001, H-series: Table on Houses, Households amenities and Assets.
* Houselist Households.

Table 52 reveals that out of the total households (204,454) of the district, in all 94,258 could avail banking services at district level while only 107, 854 avail radio/transistor. As many as 107, 348 and 40,037 avail telivision and telephone, 100,426 bicycle, 47,601 scooter/motor cycle/moped. 23,561 households have car/jeep/van etc., and 42,304 households have none of the specified assets.

It also reveals that at tahsil level the highest number of 68,104 households were availing banking services as well as maximum number of households have other assets in Dadri tahsil. The highest number of none of specified assets 21,628 were in tahsil Dadri. On the other hand lowest number of 13,069 of the households were availing banking services and 18,662 radio/transistor household asset in Jewar tahsil and in case of the rest of the availabilities of household assets found at the lowest foot in this tahsil also. 21,628 households were enjoyers of none of the specified assets in Dadri tahsil, 11,537 households in Jewar tahsil followed by 9,139 households in Gautam Budha Nagar tahsil. Dadri tahsil continued to have edge over other tahsils in respect of availability of households assets.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

The district of Gautam Buddha Nagar was created in the year 1997. No cultural and natural events happened during the last decade. Among administrative developments many villages & towns from Ghaziabad and Bulandshahr districts have been transferred to the present district.

(xii) Brief descriptions of places of religious, historical, archaeological importance in villages and places of tourist interest in the towns of the district

The district has no important place of tourism worth mentioning. In fact it is center of economic and industrial activities. People visit this district mainly for business purposes. NOIDA, Greater NOIDA, Surjapur and Dadri are important industrial places, visited by people from all over India and abroad.

These towns have been developed to the extent possible for carrying out commercial activities and habitation. Many technical and professional institutes have emerged in these towns, which attract students from all over the country.

Dankaur

This town is an ancient historical (religious) place in the district. The town is associated with famous teacher "GURU DRONACHARYA" who trained Kauravas and Pandavas in the art of Archery. This is the place where AIKLAVYA belonging to Bhil tribe achieved proficiency in the art of archery, considering idol of Guru Dronacharya as his teacher. There is a garden park named after Aiklavya in Dankaur NP. The town has a big temple named after Dronacharya where pilgrims come regularly. A fair is held on the occasion of Janmashtami for worshipping Dronacharya. Local holiday is also observed through out the district on this day. A big wrestling tournament is also held by Nagar Panchayat committee in which wrestlers from all over the country participate.

Bisrakh Village:

As per legend, Bisrakh village is the birthplace of father of king Ravana, the famous character of Epic Ramayan. Village Bisrakh is situated at a distance of 5 kms from Baghpat and can be reached by Bus or any other road transport.

(xiii) Major Characteristics and Contribution of the District :

The district is one of the largest industrial township of the country. Various industries of national and international importance are established in this town. This town is contributing immensely in the software development of the nation. Many technical institutions are functioning here. Huge employment opportunity are available here from lowest to highest level. The district has a major contribution in the gross domestic product of the state.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of newspaper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban

Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A

VILLAGE AND TOWN DIRECTORY (SECTION I & II)

SECTION I - VILLAGE DIRECTORY

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In-case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

(b) STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

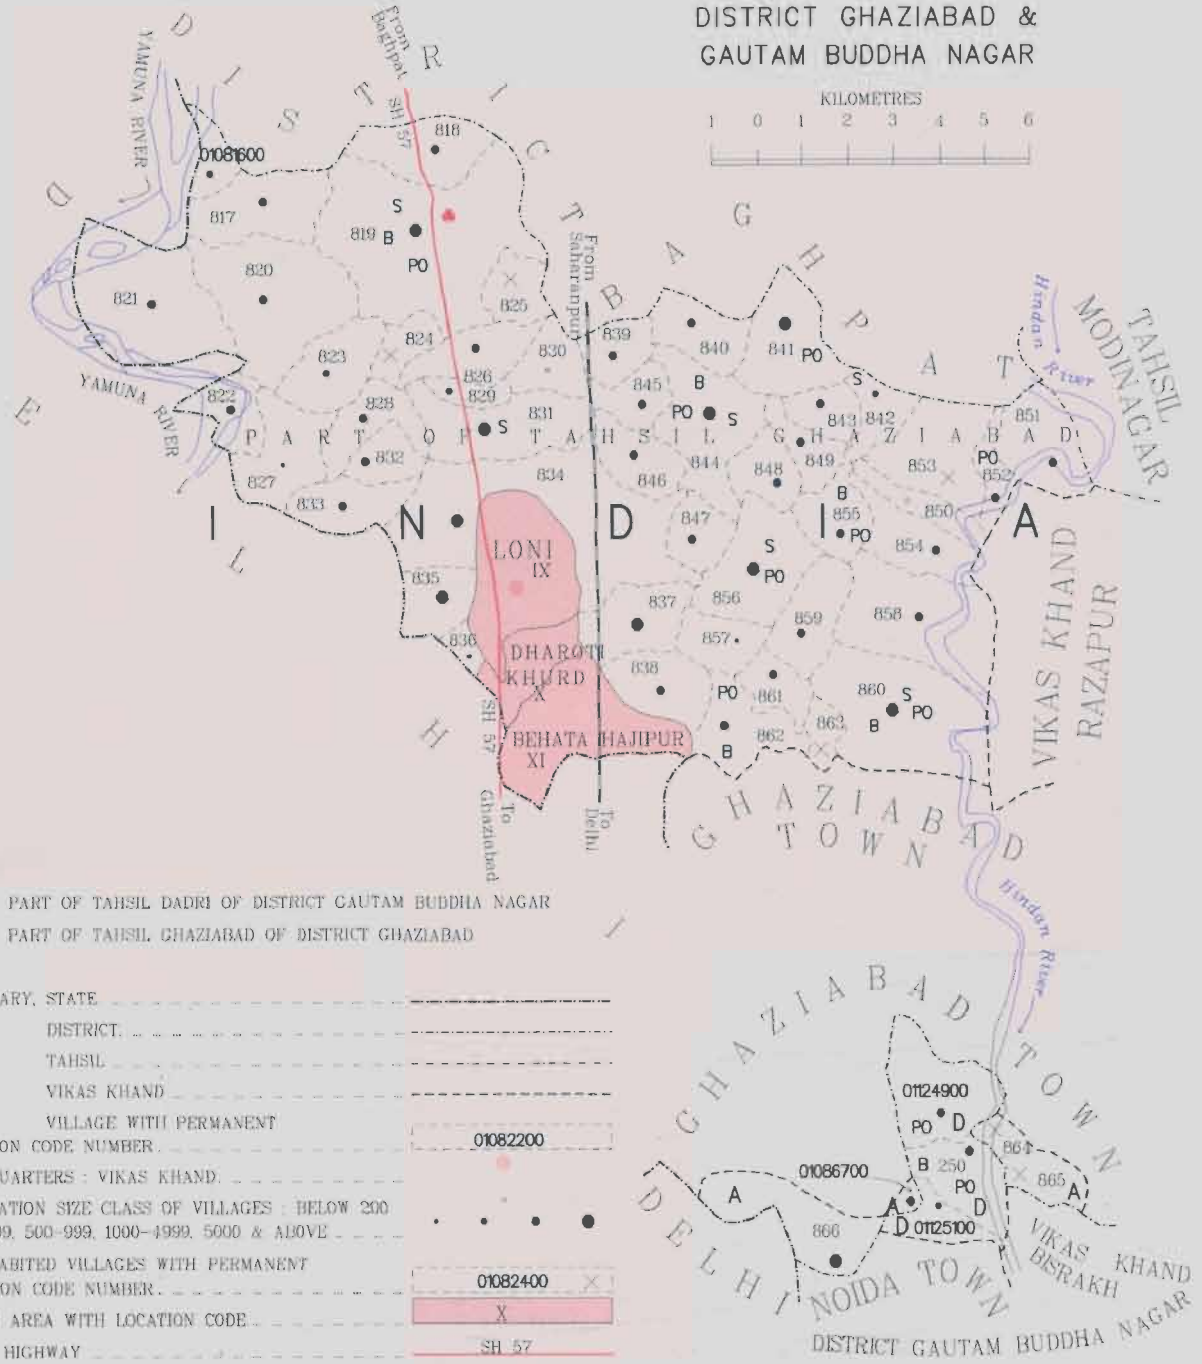

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.

1	2	3	4	5

N.A

SECTION II - TOWN DIRECTORY

Town Directory

(a) Note explaining the abbreviations used in Town Directory :

A. Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Cor/NN
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB/NPP
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

B. Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

C. Statement III

Municipal Finance 1998 -1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

D. Statement IV

Civic and Other amenities,1999

Column (1 to 6) : Self explanatory.

Column (7) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night

soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

E. Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/

Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 :Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

F. Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

G. Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after

the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important feature of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also.

In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, then portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES I TO VIII

*Gautam Buddha Nagar district was carved out from Bulandshahr after 1991 Census. The data is not available separately for Gautam Buddha Nagar. Hence, for comparison purpose of Annexures IV to VIII, the data of undivided Bulandshahr district have been used, assuming that the trends and pattern of districts are same.

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP	*Bulandshahr
q_1	Persons	99	98
	Males	98	72
	Females	104	102
q_2	Persons	117	105
	Males	117	84
	Females	118	110
q_5	Persons	134	117
	Males	135	101
	Females	132	121

The probability of dying between birth and at age 1,2 and 5 years are shown in the above table. Child mortality by ages 1,2 and 5 years is lower in the district as against the state, thus child mortality indicators in the district for both male and female shown in the above table are of lower order as compared to the state.

ANNEXURE – III
VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE - 1991

Serial Number	Fertility Measures	Uttar Pradesh	Bulandshahr
1	2	3	4
1	CBR	37.2	36.5
2	TFR	5.6	5.9
3	TMFR	6.3	6.9
4	GFR	172	178
5	GMFR	200	216
6	Mean age at marriage (1981-91)	17.3	17.8
7	Number of children ever born per ever married woman aged 45-49 years	4.6	4.6
8	Child woman ratio 0-4	631	685
	5-9	752	794

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 36.5 per 1000 in the district. It is below to the state of Uttar Pradesh i.e. of 37.2 per thousand. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), Gereral Fertility Rate (GFR) and (GMFR) General Marital Fertility Rate is of higher order in the district than the state figures. The mean age at marriage during the period 1981-91 has been 17.3 years for the state whereas 17.8 years has been observed for the district. It may be observed that higher age at marriage leads to low rate of fertility in the state and district as well. Number of children ever born per ever married women in the age group 45-49, in the state and the district figures are same as 4.6. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 685 and 794 for the district while in case of the state the corresponding figures are 631 and 752. So the conclusion that may be drawn, the fertility levels as such are high to the state average.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other district of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 89.7 in 1991, while in 2001 it was 57.8 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 9.7 percent and 40.5 percent respectively. This shows in-migration from other state to this district was approximately four times in 2001 in comparison to 1991. At district level in-migration from other countries was 0.6 percent in 1991 and 1.7percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 87.7 percent and 47.0 percent during 1991 and 2001 Census

respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 11.9 percent and 51.8 percent respectively. The movement of population from other countries in the district was 0.4 percent in 1991 and 1.2 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 79.9 percent in 1991 and 85.6 percent in 2001, while Muslim were 13.0 percent in 1991 and 19.8 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it reduced marginally in the district from 58.0 percent male and 49.2 percent female to 57.4 percent male and 48.6 percent female Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 1.7 percent male and 4.5 percent female while it was 2.5 percent male and 3.9 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9 8 percent male and 3 7 percent female in 1991 which increased to 13.8 percent male and 7 1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 50.5 percent male and 80.9 percent female in 1991 which declined to 33.4 percent male and 56.1 percent female in 2001. Primary level education was 11.0 percent male and 5.5 percent female in 1991, which was 15.6 percent male and 12.9 percent female in 2001. Middle level education was 10.9 percent male and 3.6 percent female in 1991 and 16.9 percent male and 9.1 percent female in 2001. Matriculation and above level of education was achieved by 15.0 percent male and 4.1 percent female in 1991 which was 31.4 percent male and 16.7 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0 02 percent. The remaining tongues have been merged in the column of "Total of other mother tongue"

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 89.0 percent person in 1991 and 93.3 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 10.8 percent and 1.8 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
