MOTIF

RAJA BABU PARK

'Raja Babu Park' was constructed during the British period in 1837 in the vicinity of the city. On January 22nd of 1901 a statue of Queen Victoria was founded in this park and the park was named as 'Maharani Victoria Park'. After the independence of the country, it was renamed after a reputed and distinguished lawyer Shri Rajeshwar Dayal Saxena alias Raja Babu, who was the President of the Civil Bar Association and later, elected as the President of Municipal Board, Bulandshahar. Since then, the park was renamed once again as Raja Babu Park. On November 22nd of 1969 A.D. another statue of 'Mahatma Gandhi' Father of the Nation was established in this park.

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage

enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Bulandshahr ranks 22nd in terms of population in the state.

2. The percentage share of urban population in the district is 23.2 as against 20.8 of the population in urban areas of the state.

3. Bulandshahr district has population density of 669 persons per sq. km. which is less than the state average 690 persons per sq. km.

4. Bulandshahr district ranks 35thin terms of sex ratio (879) which is lower than the state average (898) females per one thousand males.

5. Bulandshahr district ranks 28th in literacy (59.4) which is higher than the state average, 56.3 percent.

6. There are only 71 uninhabited villages out of total 1197 villages in the district

7. Decadal growth rate of the district 18.0 per cent is lower than the state average of 25.8 per cent.

8. Bulandshahr tahsil has the highest number of inhabited villages (240) while Sikandrabad (104) tahsil has the lowest number.

9. The district has sixteen towns. No new towns have been added after 1991 census and no town has been declassified.

10. There are 456,218 households in the district accounting for 1.8 percent of the total households in the state. The average size of households in the district is 6.4 persons.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The District Census Handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age-group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

The district is named after the headquarters town of Bulandshahr. The place is said to have been founded by Parmal, a Tomar Chief of Ahar and was originally called 'Banchchati' (land reclaimed from forest). According to an unsupported local tradition, it subsequently received the name of Ahibaran, either from its being a stronghold of the Nagar tribe or else from the name of the Tomar king. Ahibaran. Later the distrcit came to be known variously as Baran and Uchchainagar or Uncha nagar (high town) because it rises high above the surrounding country. The name was Persianised into Bulandshahr in mediaeval times.

The early history of the region, comprising bulk of the present districts of Bulandshahr and adjoining Meerut in the north, finds mention in such epics as the Mahabharata and in the Puranas, begins with the famous Paurava Kings Dushyanta and Bharat. Fifth in descent from Bharata was king Hastin who is said to have founded the ancient city of Hastinapur on the banks of a former bed of Ganga. It formed the capital of the great Pandava kingdom and was probably of the earliest Aryan settlements outside the Punjab. A group of shapeless mounds, where some excavations were carried out, are traditionally known to be the ruins of the palaces of the princes. Whatever credence can be placed in the myths prevalent in the area, it is evident from an inscription that the district was inhabited by Gaur Brahmin and

was ruled by the Gupta dynasty in the fifth century A.D. Detailed history of the region can, however, be traced after the advent of Mohammedans, Mahmud of Ghazni arrived at Baran in 1018 when it was in the possession of a native prince Har Datt. One of the immediate consequences of this raid of Mahmud was a general upheaval of the western tribes and a marked immigration towards the doab. Traditions has it that the Mewatis or Meos entered the district about this time in large numbers and settled towards its southern borders.

The supreme power remained in the family of Har Datt until the arrival of Qutb-ud-din Aibak, Muhammed Ghauri's General, about the close of the twelth century.

The fourteenth century is marked as an epoch when many of the tribes now inhabiting the district first gained a footing here. A number of Rajput adventurers poured in this region and displaced the defenceless local inhabitants from their lands. This was also the period of the early Mangol invasions. Timur, the central Asian invader raided the doab in 1398.

It was with the establishment of comparatively settled government of the Mughal dynasty that this harassed region witnessed a respite of peace culminating in the administrative reconstruction of Akbar. The Gujars and Jats exhibited their usual turbulent spirit and many of their chieftain carved out principalities from the villages of their neighbours. Baran at that time was dependency of koil and it continued to be administered from koil under the Maratha rule also. During the Maratha supremacy. Bulandshahr was administered from koil, which from 1789 till the accession of the British, remained in the undisturbed possession of Sindhia.

The first part of the district to come into the hands of the British was the pargana of Anupshahr and Jahangirabad, which were ceded in 1801 by Saadat Ali. The remainder of the district formed part of the territory conquered by Lake, the English Commander from the Marathas in the battle of Aligarh which took place in the first week of September 1803. Bulandshahr and the surrounding country were incorporated in the newly formed district in 1803 when the town Baran alongwith adjoining fort of Aligarh was captured by the British.

Bulandshahr took the pride of joining the first battle of independence in 1857 by the 9th Native Infantary which took place on May 21, shortly after the outbreak at Aligarh. Since the struggle for freedom, the district remained generally undisturbed except for the famines of 1860, 1878 and 1897.

In 1919 Bulandshahr came into prominence as a centre of nationalist activities. The infamous Rowlatt Act, gave vent to feelings of deep resentment and indignation and raised a storm of protest all over the district. Gandhi's appeal for complete nationwide hartal in protest against this enactment met with instant response from the people. In 1921 Mahatma Gandhi launched his famous non-cooperation Movement and it received enthusiastic response from all sections of the people.

On June 28, 1922, Moti Lal Nehru and Tasadduq Ahmad Shervani (the Nationalist) visited the district and addressed a public meeting in Khurja. On September 17, 1936, Jawahar Lal Nehru visited the district.

The Quit India Movement of 1942 received wide support from people in the district. On August 15, 1947 by virtue of the Indian Independence Act of 1947, India became independent.

(iii) Administrative Set-up

District Bulandshahr lies in western region of the State. Sikandrabad, Bulandshahr, Siana, Anupshahr, Debai, Shikarpur and Khurja are the seven tahsils. Debai and Shikarpur tahsils were created during 1991-2000. Sikandrabad, Gulaothi, Lakhaothi, Bulandshahr, Shikarpur Bhawan Bahadurnagar, Siana, Jahangirabad, Khurja Araniya, Pahasu, Unchagaon, Danpur, Debai and Anupshahr are the fifteen Community Development Blocks. Among the urban areas Anupshahr N.P.P., Jahangirabad N.P.P., Bulandshahr N.P.P., Gulaoathi N.P.P., Sikandrabad N.P.P., Khurja N.P.P., Shikarpur N.P.P., Debai N.P.P., Siana N.P.P., Bhawan Bahadur Nagar N.P., Bugrasi N.P., Khanpur N.P., Aurangabad N.P., Pahasu N.P., Chhatari N.P. and Narora N.P. bound the district.

Jurisdictional Changes (1991-2001)

In the year 1997, some parts of the district i.e., as well as 152 villages and 3 towns of Sikandrabad tahsil and 104 villages plus 3 towns of Khurja tahsil have been transferred to newly created district Gautam Budh Nagar. From Anupshahr tahsil, 161 villages and 2 towns have been transferred to newly created Debai tahsil in the district. 91 villages and 1 town from tahsil Bulandshahr and 91 villages and 2 town from Khurja tahsil have been transferred to newly created tahsil Shikarpur in the district. Besides

15 villages have also been transferred to Bulandshahr tahsil from Siana tahsil in the district.

Jurisdictional Changes (1991-2001)

Name of Tahsil	Status	Area and population added		
		Tahsil from which is substracted	Area km sq.	Population
Debai	Newly created Tahsil	Anupshahr	456 93	314797
Shikarpur	Newly created Tahsil	Bulandshahr	273.58	162415
Siana	Old Tahsil	Bulandshahr	44.9	31920

The area added in newly created tahsil has been shown in column 4 of the above statement. The area transferred from one tahsil to another tahsil has been shown in the statement. The status of urban local bodies has been explained in the Section, Administrative Unit.

District administration:

District administration comprises of Revenue, Developmen, Police (Law and Order), Judiciary, district level officers of different departments and Local self-government. District Magistrate is in-change of revenue administration. He is assisted by Additional District Magistrate, Finance and Revenue i.e. ADM (F& R)/ At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-zila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanoongos circles respectively. For each revenue village, Lekhpal is in-charge. District Development Officer takes care of developmental activities in the district. The other district level officers like- Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc net district administration. Community Development Officers and Village Development Officers are at village level.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in smaller districts are incharge. Additional supdt. of Police (ASP) and Circle Officer are in-charge of their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The judiciary system of the district consists of District Judge, Additional District Judge and Session Judge, Civil Judge, Assistant Session Judge and Munsif Magistrate.

The Nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman Executive Officer. in Nagar Palika Parishad and Nagar Panchyat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

Location and Size :

The district Bulandshahr lies in the western part of the state of Uttar Pradesh. The district lies under the administrative jurisdiction of Meerut division. The district is level plain varied by some uneven lands on the banks of river. The district lies between 28°4' and 28° north latitudes and 77° and 78° east longitudes. The district is situated in the upper doab of the Ganga and Yamuna which forms its eastern and western boundaries respectively and separate it from district Moradabad and Budaun in the east and the state of Haryana in the west. It is also bounded by district Ghaziabad in the north and district Aligarh in the south. The district covers a total area of 4352 sq. km with an average spread of about 56 km from north to south and about 88 km from west to east.

Physiography:

The general surface of the district present almost uniform level plain with an imperceptible gradual slope from north-west to south-east. The central portion forms an elevated plain flanked by low lying khadar strips on the banks of two rivers. The Ganga khadar in the east is narrower and at one or two places the river fertile soil deposits which are regularly cultivated. The Yamuna khadar on the west is more fertile and the tract of about 8 to 16 kms width is seen except in the south where the river flows to the eastern high bank.

On the basis of geology, soil, topography, climate and natural vegetation, the district is divided into the following sub-micro-regions, Bulandshahr Plain and Ganga khaddar.

Bulandshahr Plain

The region is situated in the central part of the district covering partly Siana, Bulandshahr, Khurja

and Sikandrabad tahsils. A fringe part of Anupshahr tahsil also falls within this belt. It is bifurcated by the water catchment of Nim nadi in the east and Karwan in the west. The east Kali and Karwan rivers collect water of this belt and flow parallel to each other. Although these streams originate from the depressions in the plain, yet they are perennial. It is perfectly a gentle plain with north to south slope. Other physiographic phenomenon are negligible. Geographically, the region belongs to Alluvium Dun gravels, while the main soil sub-order associations is Ochrepts-Psamments. Culturally the plain is very rich.

Ganga Khadar

This region covers partly Siana, Anupshahr and Bulandshahr tahsils and extends along the Ganga river from north to south in an elongated shape. Besides the Ganga, the Nim is another stream which flows in this region. Most part of the Nim is dry during the year. There is a natural level along Ganga which controls the slope. The general slope is from north to south with very little gradient. The sand bluffs and dead arms of the stream are the main physiographic features spread over along the Ganga river. Geologically, the region belongs to Alluvium, Dun gravels while the main soil sub-order associations are Psamments Fluvents Aquents and Ochrepts Psamments. Bulandshahr and Anupshahr branches of upper Ganga canal irrigate the area. The lower Ganga canal originates from Narora in this plain. Most of the settlements are connected by roads along the Ganga river. The village settlement is compact and bigger in size. Narora is a famous atomic power station. Other urban centres of the region are Anupshahr, Jahahngirabad, Khanpur, Debai, Siana and Bugrasi. It is a khadar tract, the elevation of the district above the sea level is 237.44 metres. The upland of the district is plain and low land tract consist of the land around the river. The general surface of the district uniform level plain with an imperceptible gradual slope from north-west to south-east. The central portion forms an elevation plain flanked by low lying khadar strips on the bank of the great Ganga and Yamuna rivers.

Drainage

The principal rivers and streams of the district are Ganga and Yamuna, Kali, Karban and Nim. First two are perennial and rest are seasonal. The Ganga khadar in the east is narrow and at one or two places the river leaves fertile deposits which are regularly cultivated. The Yamuna khadar on the west is more fertile and wider tract about 8 to 16 km wide, except in the south where the river flows close to its eastern high bank. Through the middle of the central upland flows the Kali nadi in a narrow and well defined valley which suffers from flooding in wet years. The westen half portion contains a sandy ridge, now marked by the Mat branch of the upper Ganga canal and two drainage channels known as the Patwai and the Kairon of Karwan. The river Hindon also enters the district in the north-west corner and after running a short distance joins the Yamuna near Dankaur. The eastern portion is drained by the Nim which flows parallel to the Ganga. Except for the occurance of some depressions and usar lands here and there, particularly in parts of Sikandrabad, Khurja and Baran parganas, the entire plain is marked by large fertile tracts.

The lakes in the district are a few in number and are small and shallow. The most extensive are those at Aurangabad, Chandokh and Mustafabad in pargana Shikarpur, near Aurangabad Saiyid in pargana Baran, at Ahmedgarh in pargana Pahasu and at Kuchesar in north of pargana Siana. The other lakes are in village Bhil Akbarpur, Naibasti and Chandauli of pargana Dadri, Sunpehra, Aliabad and Gangraul of pargana Sikandrabad, Thasrana and Amirpur in pargana Dankaur, Firozpur, Sarangpur and Saryal of pargana Khurja and Kalloopur and Mansher of pargana Jewar. They shrink to pools or puddles of water in the summer.

Climate

The climate of the district is characterized by a cold winter, a hot summer and general dryness except during monsoon season. Like other parts of northern India this district also has three major seasons – summer, winter and rainy season. The cold winter season starts about the middle of November and continues upto February. The period from March to the third week of June is the summer season. This is followed by the monsoon season. The rainy season goes on till mid October. About 86 percent of the annual rainfall in the district is received during June to September, July and August being the rainiest months. The normal annual rainfall in the district is of the order of 639 mms. During year 1997-98 the maximum temperature of the district was 43.4° C and minimum temperature was 2°C. January is the coldest month with maximum at about 21°C and minimum about 8°C. Cold waves affect the district and sometimes temperature drops to about 1° C. June is the hottest month with mercury shooting to

maximum of about 45° C. The hot, dry and dust laden western winds add to the intensity of hot summer. Some rains also occur in winter season from north-westerly cyclones which proves very useful to the standing rabi crops.

Natural and Economic Resources

Forestry

The district does not have expanses of natural forests. During year 1996-97 the total forest area was 166,557 hectares which is 4.6 percent of the total area. The maximum area in community development block Anupshahr was 2,382 hectares followed by Jahangirabad 1,474 hectares and Uchagaon 1,124 hectares while the minimum forest areas was in development block Siana (1 hectare) followed by Danpur (5 hectares) and Bhawan Bahadur Nagar (6 hectares), this area comes under forest development. The important trees found in the area are those of Shisham, mango, jamun, imli and babul. The district is rich in groves. The shrubs and bushes chiefly found in the district are those of arua, hina, panwar, madav, karaunda and makoh. These shrubs and bushes provide useful grazing ground for cattles.

Minerals and Mining

In respect of minerals and mining it has been exposed that no rocks are found anywhere in the district. However, the area is covered by alluvial deposit of quartery age, the exact thickness of which is considerable but not known. The only minerals of any importance in the district are kankar and reh. This mineral is common in the district and appears in three forms. First, small rounded rops in a matrix of clay and sand, secondly in the district strata of larger masses with a matrix of clay or of clay and sand mixed. Thirdly, in what is improperly termed stratified kankar. The formation of knakar appears to be due to the infiltration in water impregnated with lime through a bed of clay. It is used for construction purposes in canal works and as road metal. Reh, which spreads every where in the usar tract after the rainy season is well over and cold weather for advanced and remains until again washed away by the rains. Where this efforescence is abundant, no vegetation will thrive, nor is the soil cultivable by ordinary methods. Reh is chiefly found in the lowlands and in the upland in hollows where water lodges after the rains. There are a few level tracts covered with reh in the uplands, they are more in the lowland, and most in land cut up raqvines.

Soil :

In general, the soil of the district level is plain but in khadar area of Ganga-Yamuna and Kali Nadi the soil level is uneven. The soil is entirely alluvium with the kankar embeded in abundance and surface occasionally bears saline efforescence. Domat or loam, sandy loam, matiar or clay, blur or sand are the different varieties of soil in the district. Domat is fertile loam which is soft, matiar is stiff clay in which rice is grown. In the Tarai soil is alluvial, where the mixing of sand is large and is classfied as bhur. Agriculture year yield three harvests, the Kharif, Rabi and Zaid. The last is of little significance in the point of area.

Land and Landuse Pattern :

During the year 1997-98 the total area available in the district was 361,798 hectares. Out of these forest covered 16,557 hectares, cultivated waste 6,648 hectares current fallow 4,946 hectares, other fallow 6,364 hectares, usar and uncultivable 9,136 hectares, land put to other uses 33,599 hectares, grazing land 687 hectares and orchards 1,735 hectares More than 79% of the population lives in rural area and most of the land holding are owned by themselves.

Agriculture and Crop Pattern :

Agriculture provides substance to the population of the district engaging majority of the population of about 80.2 per cent which is dependent on agriculture. As per the land use data 436,522 hectares of land is used for agriculture purposes. As regards the size of land 22.2 per cent of land is of the size of less than 1 hectares, 8.9 per cent in the size of 2 to 3 while 7.6 per cent of the size of 3 to 5 hectares. Only 3.4 per cent of the land is of the size of more than 5 hectares. During the year 1997-98 the net area sown was 487,862 hectares and area sown more than once was 205,786 hectares. The kharif crops are sown in June/July and repeated in September/ October. Jowar, Bajra and maize, rice, urd and moong are the principal crops. In rabi, wheat leads the most valuable, gram, pea, mustard, arhar and masoor are the main produce. During the year 1996 the yield of some crops has been lower but in total there is an increase in agricultural production. The area under wheat has considerably increased in last few years. The non-food crops are potato, sugarcane, cotton. High yielding variety seeds are supplied by government cooperative department. Soil nutrients are supplemented in order to raise the productivity. During

the year 1997-98 the total area sown for rabi was 225,525, kharif 238,102 and zaid was 24,224 hectares.

Irrigation

Irrigation is one of the important source for agriculture, There is a good net work of canals and tube-wells in the district, the irrigation done by them is 96.9 per cent. During the year 1997-98 the total irrigated area of the district was 485,043 hectares, out of which net irrigated area was 270,204 hectares. As per 1998-99 statistics, the different source of irrigation in the district is given below :

Source of irrigation	Numbers
Own tube-wells	36,435
Pump set	32,677
Wells	223
Government tube-wells	499
Under ground pump set	154
Rahat	106
Length of canals in km	958

Out of the net irrigated area 14.5 per cent area was irrigated by canals, 10.3 per cent by government tube-wells, 71.1 per cent by own or private tube-wells, 0.6 per cent by wells and 3.4 per cent by other sources of irrigation.

Animal Husbandry

Considerable progress has been made in recent year in improving the breed of the cattle through artificial insemination centers and upgrading indigenous cattle with improved bulls of well known Indian breeds. To look after animals there are 36 veterinary hospitals, 58 animal development centres, 72 artifical insemination centres and 4 pig development centre in the district. As per 1993 Cattle census, total bovines accounted to 191,905 buffalous 770,277 goats, 157,568 sheep 11,328, horses 6,287, pigs 55,057, Hens and cocks 158,219 and 114,438 other animals.

Fishery

Rivers and lakes of the district abound in fish of many kinds. The kinds of fish mostly found are parhin, papda, sonli, moi, patra, silon, bhakur, rohu, nain and goonch. Pisciculture development scheme have been taken up in the district since 1986. A fish farm was established at Chandpur and experiments on fish for induced breeding were conducted. Government supplies fingerlings to private pisciculturists at the subsidized rate under applied nutrition programme, Ponds have been allotted to the pisciculturists on the contract basis for a period of ten years. In year 1990-91 166.0 hectares water area was developed, which is highest in the State. District has got three cooperative Fishery Societies and they have 150 members. In year 1998-99 government supplied 2,914 thousand fingerlings. Due to the proximity of Delhi market this programme is gaining momentum in the district.

Industries

The district Bulandshahr is very advanced in respect of industrial activities. Khurja city is famous for its potteries. Several hundred factories of pottery are working in Khurja city and its potteries are famous throughout the country.

District has several large and medium scale industries which mainly include sugar mill, distillery, paper mill, spinning mill synthetic yarn, detergent powder and cake, vegetable ghee, refined oil, L.P.G. cylinder, tiles and Engineering goods. Government of India is issuing new licenses in order to encourage the industrial development in the district. These units have investment of nearly 1850 crore rupees and give employment to 13,500 people.

Till 01.04.1997, 12,500 small and cottage industries have been established in the district. These units provide employment to 52,244 people. Small scale industries mainly manufacture agricultural tools, engineering workshop, nut bolts, brass metal, hand-pump parts, steel almirahs and furniture, steel pipes, rolling mills, electrical steel equipments, ice factory, flour mill, PVC, paints and chemicals, readymadc garments and power loom. There are some units in the district, which manufacture transformers and supply them to State Electricity Board.

Under the scheme of khadi and village industry scheme till 1.4.1998, 2,379 units have been established in the district. These employ 4,858 people. These units mainly produce silk, honey, leather goods, hand-made paper, match sticks, bamboo stick, cotton and wool.

Khurja city has traditional pottery industry. At present 450 pottery units are functional in the city which employ 5,135 people. Pottery industries mainly manufacture crockery, sanitary ware, scientific goods, electrical goods etc. To develop the pottery industry of Khurja Government of India has made arrangement for testing of raw material for glass and ceramic. The government also provide knowledge about new and latest technologies and designs.

The climate of the district is suitable for silk industry. In year 1990-91 the programme of silk worm raising was organized on experiment basis. In year 1990-91 there were 342 registered industrial units under the Industrial Act of 1948. These units had 10,959 workers and labourers. During 1990-91 these industrial units developed products of worth 5,596,163 thousand rupees.

Trade and Commerce

Trade in the district is mostly agricultural in character. The only commerce was the exported agriculatural produce chiefly gram and cotton. Important manufactures were the cotton prints of Jahangirabad the muslins of Sikandrabad, pottery of Khurja and wood-carvings of Bulandshahr and Shikarpur. Among articles imported were foreign cloth, salt, iron and spices and other articles required by district people. The chief trade of the district were those at Khurja, Debai, Sikandrabad, Bulandshahr and Shikarpur. Jowar and bajra was local consumption. Khurja is the largest commercial town between Debai and Hathras and is well situated for purpose of trade. Anupshahar is next to Khurja in trade, mainly in Timber and grain, Rabupura is famous for its bullock market. The main market of the district are Deputyganj, Grossganj and Fatehganj in Bulandshahr town, Khurja market in Khurja, Debai in Debai and Robertsganj in Anupshahr.

Markets dealing in general merchandise and cloth are located at all the urban centres, which also feed smaller markets called hats and bazaars. These bazaars are held once or twice on fixed days in a week and supply the villagers with food grains, oil seeds, cloth, vegetables and other consumer goods.

Transport

The district is served by a network of road and railways and is well connected with State capital Lucknow. There are 14 railway stations in the district of which 9 are in rural areas and 5 in urban areas. The district is connected by broad guage track only comprising of 116 km of railway track. Delhi-Howrah main line passes through the district which runs through Khurja, Sikandrabad, Chola, Waiv and Dankaur. It provides a direct connection to two major metropolitan cities of the country. Besides Khurja, Meerut and Aligarh, Chandausi branch lines also travel the district.

In year 1997-98 there was a network of 2,153 km of metallic road in the district. Each and every tahsil and Development block of the district is well connected by road. 1,472 km of road is under the control of P.W.D. and 483 km of road under the control of local bodies.

During 1997-98, 839 villages of the district were connected with the roads. The buses are directly available for various important places like Agra, Hardwar, Lucknow and Delhi. There are 209 bus stations in the district as on 1.4.1998, out of which 195 are in rural areas and 14 are in urban areas.

Electricity and Power

According to the statistics of year 1997-98, 1,195 inhabited villages have been electrified, 725 villages have got L.T. Mains and 703 colonies of scheduled castes/scheduled tribes have also been electrified. Till 01.04.1999, 46,513 electric pump sets have been established in the district. The per capita consumption of electricity in the district was 806.4 kwh in year 1998-99. The table given below shows the consumption of electricity in various activities during 1998-99.

Activity	Consumption (Thousand Kwh)
Domestic & Small Scale Power	225,945
Commercial Light and Electric Power	12,404
Industrial Electric Power	1,191,179
Public Light	3,093
Rail/Traction	577
Agricultural Electric Power	553,289
Public Water Supply & Sewage	4,037
Total	**1,990,524**

Above table clearly shows that a very high proportion is consumed in agriculture sector.

Gram Panchayat its composition, jurisdiction and role in village development:

A Gram Panchyata acts as the executive of the Gram Sabha. It works for village development.

Composition: The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 440 Gram sabhas in the district. It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The

Vilage Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Tenure: The new Panchayat Raj Act of 1993 has fixed a uniform five-year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualification: In order to be elected to a village panchayat, a candidate should possess the following qualifications:

(1) He should be a resident of the village concerned and his name should be in the voter's list of the village.
(2) He should be at least twenty-five years old.
(3) He should be mentally and physically sound.
(4) He should not be a proclaimed offender.

Functions:- A Gram panchayat is entrusted with various social economic and judicial functions.

1. It provides civic amenities to the people of the village
2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a centre.
5. It gets metalled roads to built from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
6. It arranges for sufficient irrigational facilities, improved seeds, insecticide, chemical maures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat also enjoys certain judicial powers. It decides petty civil and criminial cases and imposes fine upto Rs. 100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, god owns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in

which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, storeroom, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the

buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work shed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously;

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population

engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall

for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Dhangar
28 Dhanuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
33 Dusadh
34 Gharami
35 Ghasiya
36 Gond
37 Gual
38 Habura
39 Hari
40 Hela
41 Kalabaz
42 Kanjar
43 Kapariya
44 Karwal
45 Khairaha
46 Kharwar (excluding Banbasi)
47 Khatik
48 Khorot
49 Kol
50 Kori
51 Korwa
52 Lalbegi
53 Majhwar
54 Mazhabi
55 Musahar
56 Nat
57 Pankha
58 Parahiya
59 Pasi, Tarmali
60 Patari
61 Rawat
62 Saharya
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a

cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000

population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

Number of infant deaths

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age-group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age-group 0-4 years per 1,000 women in the age-group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress

migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution :

The total population 2,913,122 of the district is divided into 2,238,664 rural and 674,458 urban. The most populous tahsil is Bulandshahr with 733,113 population followed by Siana tahsil with a population of 461,872. The least populous tahsil is Sikandrabad with a population of 252,778. The maximum urban population is in Bulandshahr tahsil which is 239,425 followed by Khurja with 98,610 urban population whereas the least urban population is in Debai tahsil which is 55,284. At the 2001 census the district has 23.2 per cent of its population living in towns. As compared to this in the State the same is 20.8 per cent. The ratio of urban population is highest 32.7 per cent in Bulandshahr tahsil followed by 27.6 per cent in Sikandrabad tahsil and least 14.5 per cent in Debai tahsil.

Size, Class and Status of Towns :

There are sixteen statutory town no Census Town in the district. Bulandshahr NPP with 176,425 population is Class I town. Jahangirabad, Sikandrabad and Khurja with 51,394, 69,867, and 98,610 population are Class II towns. There are seven Class III towns in the district Bulandshahr. Also in the district there are four Class IV and towns one Class V towns. There are nine NPP in the district apart from seven Nagar Panchayats, namely Aurangabad, Bhawan Bahadur Nagar, Bugrasi, Khanpur, Naraura, Pahasu and Chhatari.

Population Growth :

The population of the district in 1991 adjusted to jurisdiction of 2001 was 2,468,375 in the district. The population of the district at 2001 Census is 2,913,122 There has been decadal variation of 4,44,747 persons since 1991 to 2001, which are 18.0 per cent. The rural population 1,937,427 at 1991 Census increased to 2,238,664 and urbans population increased from 530,948 to 674,458. As against 18.0 percent decadal growth in the district, the growth rate has increased by 25.8 per cent in the state.

Population Density :

The area of the district is 4,352 square kilometre. The density of population in the district is 669 as compared to 690 in the state. In the rural areas of the district the population density is 530.

Sex ratio :

The sex ratio in the district is 879, while it is 898 in the state of U.P. In the rural areas of the district the sex ratio is low at 877 while it is 887 in urban areas. The rural sex ratio of the district is worse than that of the state. The sex ratio among seven tahsils varies between 864 in Sikandrabad and 892 in Anupshahr. Among C.D. blocks the sex ratio varies from 850 in Sikandrabad to 903 in Unchagaon. The sex ratio in rural population in the district comes to 877. Among towns of the district the minimum sex ratio 833 is found in Naraura and highest 90.8 in Debai. The sex ratio of population in the age-group 0-6 is 867 in the district which is quite low to 879 from the general population. The sex ratio of population of the age-group 0-6 the rural areas is 869 against 861 in urban areas. The sex ratio of population in the age-group 0-6 among 15 CD blocks varies from as low as 841 in Shikarpur to as high as 900 in Debai. The sex ratio of rural population in the age-group 0-6 by ranges for 24.9 per cent population in the range 850-899. The sex ratio of population in the age-group 0-6 among towns varies from 813 in Chhatari to 908 in Debai.

Work Participation Rate :

In the district 40.3 per cent (1,173,805 persons) pertains to the category of working population. Average males working population is 50.9 per cent as against 28.2 per cent among females. Main workers constitute 27.0 per cent of population, males 41.7 and females 10.3 percent. Among marginal workers female workers (18.0) predominate male (9.2). Non-workers contribute 59.7 per cent of total population. Out of these 70.6 percent are from the urban population. In rural areas 66.3 percent females are Non-workers. Of the total worker population in the district 35.8 per cent are cultivators, 16.7 per cent engaged as agricultural labourers, 5.8 per cent in household industry and 41.7 per cent as other workers. Among male workers 38.8 per cent are cultivators as compared to 29.5 per cent among females. Similarly as against 41.7 per cent male other workers, the proportion of female is 41.8 cent. In rural areas of the district 41.7 per cent of working population is cultivators as against only 6.4 per cent in urban areas. In case of other workers, composition of rural and urban proportion is 34.3 per cent and 78.2 per cent of working population. It may be mentioned that the working population in the district is 40.3 per cent as compared to 32.5 per cent in the state.

Literacy :

In the district 59.4 per cent of the population is literate as against 56.3 per cent in the state of U.P. In the district 74.3 per cent of the male population is literate as compared to 68.8 per cent in the state. However, among females the literacy in the district is 42.5 per cent as compared to 42.2 per cent at the state level. In the district literacy rate is 64.0 per cent in urban areas as against 58.0 per cent in rural areas. The gap in male/female literacy rate is 35.5 percentage points in rural areas as compared to 20.2 percentage points in urban areas. The literacy rate among CD blocks varies between 51.1 per cent in Debai and 65.6 per cent in Bhawan Bahadur Nagar. Similarly, the literacy rate among towns varies from 53.0 per cent in Aurangabad to 72.0 per cent in Bulandshahr.

(viii) Brief analysis of PCA Data based on inset tables 1 to 36:

The district throws up a vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables 1 to 36:

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001

* Tahsil level figures for 1991 is not available.

The growth rates of the district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 18.0 percent during 1991-2001. The growth rates for rural and urban areas of the district are 15.6 and 27.0 per cent respectively. Out of the total population of the district 76.8 percent lives in rural areas while 23.2 percent lives in urban areas of the district. The proportion of urban population has slightly increased during the decade from 21.5 percent in 1991 to 23.2 per cent in 2001 in the district. The highest growth of urban population is recorded in Bulandshahr (32.7) per cent tahsil and lowest is registered in Debai (14.5) tahsil. Urban population is concentrated in Bulandshahr, Sikandrabad and Anupshahr.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of 1,126 inhabited villages, 21 (1.9 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 58 villages (5.2 per cent) of the district while in the size class of 500-999 population claims 185 villages with 16.4 per cent of the total villages in the district. 437 villages (38.8 per cent) are in the size class of 1,000-1,999 and 370 villages (32.9 per cent) are in the size class of 2,000-4,999. 53 villages (4.7 per cent) belong to population range of 5000-9999 while 2 villages (0.2 per cent) fall in the range of population 10,000 and above.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL

(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified - NIL

(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	186	16.5	384,392	17.2
11-20	1	0.1	10	0.0
21-50	4	0.4	1,468	0.1
51-100	4	0.4	2,102	0.1
101-200	22	2.0	22,573	1.0
201-300	35	3.1	34,522	1.5
301-500	194	17.2	255,627	11.4
501 +	680	60.4	1,537,970	68.7
Not known	0	0.0	0	0.0
District Total	**1,126**	**100.0**	**2,238,664**	**100.0**

Population Density (Rural) of the district: 530

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 680 accounting for 60.4 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 68.7 per cent population. The lower ranges of 301-500 persons per sq. km. cover 194 villages (17.2 per cent). 35 villages (3.1 per cent) have density with more than 201-300 persons per sq. km. while the corresponding proportion in the lower range of 101 to 200 is 2.0 percent of the total inhabited villages, having 1.0 percent population of the district. In the medium densities ranges of 21 to 50 and 51-100 persons account for 0.4 percent each of inhabited villages. Both these ranges claim 0.2 per cent rural population.

TABLE-5: SEX RATIO OF STATE AND DISTRICT 1991-2001

Census Year	UTTAR PRADESH			BULANDSHAHR		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	900	897	914
1911	916	922	866	897	900	881
1921	908	918	834	896	904	849
1931	903	916	813	882	892	834
1941	907	922	824	909	925	837
1951	908	922	827	883	887	862
1961	907	921	817	882	885	865
1971	876	884	826	857	855	867
1981	882	889	850	865	861	879
1991	876	879	864	857	851	881
2001	898	904	876	879	877	887

NOTE- Sex ratio has been defined here as the numberof females per 1000 males

As per 2001 Census sex-ratio of 879 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly low as compared to the state average figures from 1901 to 2001 except in the year 1941. The lowest sex ratio of 857 females per 1000 males were recorded in the district during 1971 and 1991 against the state average of 876 females. It is also observed that the proportion of females in rural areas is lower than that of urban areas except in 1901 and 1971 to 2001.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Sikandrabad	864	850	900
2	Bulandshahr	879	877	884
3	Siana	891	891	887
4	Anupshahr	892	894	883
5	Debai **	881	881	879
6	Shikarpur **	872	869	886
7	Khurja	871	863	896
District Total:		**879**	**877**	**887**

Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 879 females for every one thousand males in Bulandshahr district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 877 and 887 respectively. The rural sex-ratio in the tahsils varies between 850 in Sikandrabad tahsil and 894 in Anupshahr tahsil. The sex-ratio in Siana, Anupshahr and Debai tahsils, is higher than district rural average (877). In urban areas the highest sex-ratio is recorded in Sikandrabad (900) and the lowest is in Debai (879).

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial No.	Name of C D block	Sex ratio
1	2	3
1	Sikandrabad	850
2	Bhawan Bahadur Nagar	880

12	Shikarpur	868
13	Pahasu	869
14	Khurja	859
15	Araniya	867
District (Rural) Total		**877**

Table-7 presents CD block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 877 females per 1,000 males. Among the CD blocks the highest sex-ratio of 903 is found in Unchagaon CD block and is followed by Jahangirabad (895) while the lowest 850 is recorded in Sikandrabad CD block. The sex-ratio of seven CD blocks is higher than the district rural average of 877 and in remaining 8 blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	6	0.5	8,243	0.4
700-749	5	0.4	3,691	0.2
750-799	46	4.1	48,510	2.2
800-849	233	20.7	412,809	18.4
850-899	509	45.2	1,177,905	52.6
900-949	260	23.1	482,727	21.6
950-999	57	5.1	100,629	4.5
1000-1099	8	0.7	3,981	0.2
1100+	2	0.2	169	0.0
District Total	**1,126**	**100.0**	**2,238,664**	**100.0**

Sex ratio (Rural) for District: 877

Table 8 presents the distribution of villages by sex-ratio ranges based on 2001 Census. The maximum nuer of villages i.e.509 accounting for 45.2 per cent of the total villages having largest population of 52.6 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 900-949 which claims 260 villages (23.1 per cent) and 21.6 per cent population. The highest range of 1,100 & above claims 2 villages (0.2 per cent). This range shares 169 persons rural population of the district while in the sex-ratio range of 950-999, there are 57 villages (5.1 percent). In remaining sex-ratio ranges of 800-849, 750-799, 700-749 and less than 700, the number of villages are 233 (20.7 per cent), 46 (4.1 per cent), 5 (0.4 per cent) and 6 (0.5 per cent) respectively. 8 villages (0.7 per cent) are in range of sex ratio 1000-1099. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e. 509 having maximum population (52.6 per cent) fall in the higher sex-ratio ranges of 850-899 females and above showing that in majority of villages the sex-ratio is significantly higher.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Anupshahr	NPP	882
2	Aurangabad	NP	890
3	Bhawan Bahadur Nagar	NP	876

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group 0-6 is 542,329 persons comprising 290,455 males and 251,874 females. The total sex-ratio in this age-group works out to be 867 females for per thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 869 and 861 in this age-group respectively. The rural sex-ratio in tahsil varies between 855 in Sikandrabad tahsil and 898 in Debai tahsil. The sex-ratio of Siana (871) and Debai (898) tahsils are higher than district rural average (869). Sikandrabad tahsil has lowest sex-ratio of (864) among the total population, as a whole but in the sex-ratio of children Bulandshahr with 857 is at the bottom while Debai is at the top with 896. In urban areas, the higher sex-ratio is recorded in Sikandrabad urban (888) and the lowest is found in Bulandshahr urban (843).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial Number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Sikandrabad	34,736	18,723	16,013	855
2	Bhawan Bahadur Nagar	20,255	10,916	9,339	856
3	Gulaothi	23,062	12,459	10,603	851
4	Lakhaothi	24,580	13,287	11,293	850
5	Bulandshahr	41,250	22,035	19,215	872
6	Siana	17,917	9,585	8,332	869
7	Unchagaon	26,241	13,878	12,363	891
8	Jahangirabad	26,915	14,418	12,497	867
9	Anupshahr	29,980	16,058	13,922	867
10	Danpur	32,052	16,897	15,155	897
11	Debai	30,836	16,229	14,607	900
12	Shikarpur	27,220	14,782	12,438	841
13	Pahasu	33,481	17,826	15,655	878
14	Khurja	32,475	17,539	14,936	852
15	Araniya	25,339	13,510	11,829	876
	District (Rural) Total	**426,339**	**228,142**	**198,197**	**869**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 869 for the district (rural). The sex-ratio of C.D. block varies between 850 and 900. It is highest in Debai C.D. block i.e. 900 followed by 897 in Danpur C.D. block and lowest 850 females is found in Lakhaothi C.D. block. The sex-ratio of five C.D. Blocks is higher than the district rural (869) and Siana equals the district average while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	74	6.6	13,416	3.1
700-749	71	6.3	19,197	4.5
750-799	154	13.7	50,622	11.9
800-849	195	17.3	86,209	20.2
850-899	232	20.6	106,239	24.9
900-949	159	14.1	76,537	18.0
950-999	95	8.4	38,398	9.0
1000-1099	101	9.0	27,245	6.4
1100+	45	4.0	8,476	2.0
District (Rural) Total	**1,126**	**100.0**	**426,339**	**100.0**

Sex ratio (Rural) for District: 869

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 232 (20.6 per cent) having largest population (24.9 per cent) in the district (rural) fall in the sex-ratio range of 850-899 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 800-849 which claims 195 villages (17.3 per cent) and 20.2 per cent population. Next to it are 159 villages (14.1 per cent) in the range of 900-949 with 18.0 per cent population. 95 villages (8.4 per cent) having 9.0 per cent population fall in sex-ratio range of 950-999. In remaining sex-ratio ranges of Less than 700, 700-749, 750-799, 1000-1099 and 1100+ claim less number

of villages and these are distributed as 74 (6.6 per cent), 71 (6.3 per cent), 154 (13.7 per cent), 101 (9.0 per cent) and 45 (4.0 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 586 having population (63.1 per cent) fall in the higher sex-ratio ranges of 800-949.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of 2913122 total population of the district, 20.2 per cent of the total population belongs to the Scheduled Castes and 0.0 per cent to Scheduled Tribes as there is only 188 population of ST. The percentage of Scheduled Castes population constitutes 22.6 percent in rural and 12.2 per cent in urban areas of the district. The highest percentage of total Scheduled Castes population is recorded in Khurja tahsil (27.0) while the lowest is found in Bulandshahr tahsil (16.1). The Scheduled Tribes population is 52 and 136 in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in tahsil of Debai (98 persons), Siana (52 persons) and tahsil of Bulandshahr (38). The lowest population of Scheduled Tribes is recorded in Bulandshahr tahsil (38).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

	District (Rural) Total	**2,238,664**	**506,677**	**52**	**22.6**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each CD block of the district. 22.6 per cent of rural population of the district belongs to Scheduled Castes and zero per cent to Scheduled Tribes as their population is only 52. At CD block level, Scheduled Castes population varies between 14.8 per cent in Gulaothi and 33.0 per cent in Khurja CD block. The other CD block containing the highest percentage of Scheduled Castes are Shikarpur (28.7), Anupshahr (27.4) and Pahasu (26.7). The highest number of 51 Scheduled Tribes population is counted in Bhawan Bahadur Nagar CD block. The lowest number of Scheduled Tribes is recorded in Siana (1). The Scheduled Tribes population in the district is mainly concentrated in Bhawan Bahadur Nagar CD block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	82	7.3	0	0.0
Less than 5	106	9.4	4,155	0.8
5-10	126	11.2	26,077	5.1
11-20	275	24.4	103,695	20.5
21-30	239	21.2	147,036	29.0
31-40	143	12.7	95,982	18.9
41-50	69	6.1	52,944	10.4
51-75	68	6.0	62,109	12.3
76 and above	18	1.6	14,679	2.9
District Total	**1,126**	**100.0**	**506,677**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 82 villages accounting for 7.3 per cent of total 1126 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 106 villages (9.4 per cent). In 126 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 275 villages constituting 24.4 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 239 and 143 villages respectively. Both these ranges together account for 33.9 per cent villages of the district. 69 villages fall in the range of 41-50 and 68 villages in 51-75. 18 villages are such where the proportion of Scheduled Castes is more than 76 per cent. These villages contain 2.9 per cent Scheduled Castes population of the district. The maximum of 24.4 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,122	99.6	0	0.0
Less than 5	4	0.4	52	100.0
5-10	0	0.0	0	0.0

Table 18 shows number and percentage of Scheduled caste and Scheduled tribes population recorded during 2001 census in district Bulandshahr. The table depicts scheduled caste population in urban areas of the district. Scheduled tribe population is negligible in the urban areas of the district. Highest number 98 scheduled tribe population was recorded in Debai (NPP)

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial No.	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in Table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 59.4 per cent in the district. This proportion in rural area is 58.0 per cent as against 64.0 per cent in urban

areas. In the district the literacy rates of males (74.3 per cent) is much higher than that of females (42.5 per cent). Among the tahsils, Sikandrabad tahsil tops with 63.5 per cent literates followed by Bulandshahr tahsil (61.9 per cent). Debai tahsil with 53.6 per cent literates stands at the bottom in the district. Out of 7 tahsils, the literacy rates of 3 tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 31.8 percent in the district. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 20.2 percentage points against the rural areas, where the gap between male and female literacy is 35.5 percentage points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

	District (Rural) Total	**1,050,592**	**719,217**	**331,375**	**1,188,072**	**473,735**	**714,337**	**58.0**	**74.5**	**39.1**	**35.4**

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district.Bulandshahr 58.0 percent of the total rural population excluding the age-group of 0-6 years is literate in the district. The corresponding proportion of male and female literates comes to 74.5 and 39.1 per cent respectively which shows very wide gap of 35.4 percent in male and female literacy. At C.D. block level, Bhawan Bahadur Nagar C.D. block has the highest rural literacy rate of 65.6 per cent while 80.9 per cent males and 48.3 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Debai C.D. block (51.1 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 39.0 percentage points is found in Jahangirabad C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population

District(Urban) Total		**357,490**	**216,978**	**140,512**	**316,968**	**100,000**	**176,572**	**64.0**	**73.5**	**53.3**	**20.2**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Bulandshahr (NPP) town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (64.0 per cent). The literacy rate among males is quite high in two towns, 84.3 percent in Bhawana Bahadur Nagar and 79.7 per cent in Bulandshahr.Female literacy rate is not behind. In two towns it is (57.7 per cent) in Anupshahr and 63.4 in Bulandshahr NPP. However, literacy rate among females is very low (33.4 per cent) in Khanpur (NP) town.The gap in male–female literacy rate is high with 20.2 percentage points..

Table 25 deals with number and percentage of scheduled castes literates and illiterates by sex in CD Blocks. In rural Bulandshahr among scheduled castes literacy is 51.8 per cent at district leve,l with males 69.2 per cent and females 31.7 per cent. Thus there is a gap of 37.4 percentage points between male and female literacy. Sikandarabad has recorded highest literacy 57.8 per cent among scheduled castes while lowest 43.0 is found in Debai. Female literacy oscillates between 24.2 and 37.4.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0.00	9	0.9	84	0.0
1-10	6	0.6	244	0.0

Table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates is more than literates in the district (urban) and towns. The percentage of literates is minimum 46.3 per cent in Jahangirabad among 16 towns but the gap in male-female literacy rate is highest 37.6 in case of Khanpur town. The males in all the 16 towns enjoy higher literacy rate than females. The gap in male-female literacy rate is least 22.6 in case of Anupshahr and the female literacy rate is highest (55.1) in Bulandshahr NPP.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial No.	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates

Table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is less than literates in the district and CD Blocks. The literacy rate of the scheduled tribes population is 64.7 per cent is higher than the corresponding rate 58.2 per cent in case of scheduled castes community. The gap in male and female literacy rates at 30 percentage points is however more than what it is in case of the scheduled castes community (37.4 percentage points). The literacy rate is highest in Bhawana Bahadur Nagar CD Block and lowest in Siana CD Block. The gap in male/ females literacy rate in Bhawan Bahadur Nagar CD Block and lowest in Siana CD Block. The gap in male/female literacy rate in Bhawan Bahadur Nagar CD Block is in favour of the males.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

District Total	**4**	**100**	**52**	**100.0**
Literacy rate for District (Rural)		**64.7**		

Table 29 gives the distribution of villages by literacy rate range for the scheduled tribes population at the 2001 census. In the district the scheduled tribes population is found in 4 villages. At the district level literacy rate is 64.7 per cent. However, the maximum (82.7 per cent) of the scheduled tribes population (43) is found in only one village with literacy range from 61 to 70 per cent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Bulandshahr (NPP)	30	20	10	8	2	6	88.2	95.2	76.9	18.3
2	Debai (NPP)	47	29	18	51	26	25	57.3	64.4	48.6	15.8
	District (Urban)	**77**	**49**	**28**	**59**	**28**	**31**	**66.4**	**74.2**	**56**	**18.2**

Table 30 gives number and percentage of scheduled tribes literates and illiterates by sex in urban agglomerations/town population at the 2001 census. There is small scheduled tribes population in the towns of the district. In two towns there is scheduled tribe population. In between Bulandshahr and Debai towns which have scheduled tribe population, the percentage of literates is 88.2 and 57.3 per cent males (95.2 and 64.4) and females (76.9 and 48.6) per cent are literate. The gap in male-female literacy in Bulandshahr town is 18.3 percentage points and in Debai (NPP) it is 15.8 percentage points.

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out as 40.3 per cent of the total population in the district. The total workers are comprised of 27.0 per cent of main workers and 13.3 per cent of marginal workers and the remaining 59.7 per cent are non-workers.

Among the main workers, males participation rate in the district is 41.7 per cent and 10.3per cent of females. Male and female marginal workers account for 9.2 and 18.0 per cent respectively. The percentage of females marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 33.0 per cent in Debai tahsil to 47.7 per cent in Shikarpur tahsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 shows CD block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 2,238,664 total rural population of the district, 27.8

per cent has been categorized as main workers and the marginal workers constitute 15.7 per cent and the remaining 56.4 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 41.9 per cent males and 11.8 per cent females are in the category of main workers. Male and female marginal workers account for 10.4 and 21.9 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at CD block level.

The percentage of total rural workers of the district comes to 43.6 per cent. At the CD block level, Anupshahar has highest proportion of total workers forming 51.4 per cent of the total population. It is closely followed by Shikarpur (51.1 per cent), Jahangirabad (50.8 per cent), Pahasu (49.0 per cent), Bulandshahr (48.8 per cent) and Lakhaothi (48.3 per cent). The lowest percentage of 31.4 per cent is recorded in Debai CD block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Table 33 indicates that as against 24.2 per cent of main workers in the urban areas of the district,

such workers are 27.6 per cent in Bugrasi town. Similarly, the extent of marginal workers is 14.3 per cent in Pahasu town. In Bulanshahr district, urban total workers constitute 29.4 per cent, males 46.4 and females 10.2 while the difference between male main workers (41.2) and females main workers (5.1) is very wide. It narrows down (5.2 males and 5.0 females) in case of marginal workers.

Note: Percentage of Workers to total workers are given in bracket.

It can be seen from table 34, that the economy of the district is primarily agricultural as supported

by the fact that cultivators constitute 35.8 per cent of the total workers (main + marginal) and remaining 64.2 per cent of total workers are engaged as agricultural labourers (16.7 per cent), Household industry workers (5.8 per cent) and other workers (41.7 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on other work sector absorbing a large number of population (41.7 per cent). The proportion of other worker varies between 27.6 per cent in Debai tahsil to 53.2 per cent in Bulandshahar tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of cultivators is 43.1 per cent in Siana followed by Debai 42.0 per cent in the district. The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the top position after agriculture in the district as well as in each tahsil. The highest proportion of 53.2 per cent of other workers is recorded in Bulandshahar tahsil while the lowest proportion of 27.6 per cent is found in Debai tahsil.

Note: Percentage of Workers to total workers are given in brackets

Table 35 presents CD block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) 43.6 per cent of total population. Among these workers, cultivators constitute 41.7 per cent, 18.7 per cent agricultural labourers, 5.2 per cent household industry workers and 34.3 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population. Household industries could not make much progress in rural areas as reflected in the data and these household industries employ only 5.2 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (31.4 per cent) is lower than that of males (47.6 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one CD block to other. The proportion of cultivators varies between 26.5 percent in Bulandshahr CD block and 52.0 per cent in Lakhaothi CD block. Similarly for other workers, the lowest proportion is 20.1 per cent in Danpur CD block while 52.7 per cent is highest in Bulandshahr CDblock.The percentage of agricultural labourers and household industry workers together is quite low i.e. only 23.9 per cent in the district.The percentage of agricultural labourers is highest in Danpur CD block (29.6) and is followed by Pahasu (28.9), the lowest 11.3 per cent is found in Bulandshahr. Similarly, household industry workers varies in CDblocks between 3.4 per cent in Debai and 9.6 per cent in Bulandshahr.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district Bulandshahr. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (78.2), followed by Household Industry Workers with 8.7 per cent (6.0 per cent males and 22.6 per cent females). If we observe each town, the table reveals that highest percentage of cultivators (20.7) is recorded in Bhawan Bahadur Nagar. In the agricultural labourers category Bulandshahr NPP recorded very low percentage (1.3). Household industry workers are very low (3.5 per cent in Bhawan Bahadur Nagar, 5.1 per cent in Bulandshahr and 5.2 per cent in Bugrasi. As the usual trend recorded in the urban areas, other workers are in higher percentage 91.9 per cent in Bulandshahr, 88.2 per cent in Khurja and 84.2 per cent in Gulaothi NPP.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37-47:

One of the major parts of the District Census Handbook is Village and Town Directory. These are non-census data incorporated showing educational, medical, drinking water, banking, communication facilities and other such developmental indicators are incorporated in the town and village directory. From non-census data, inset tables 37 to 47 have been generated and reproduced here showing major trends in the availability of above amenities.

TABLE37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, banks agricultural credit societies, approach by pucca road and power supply within the village. Out of 1126 inhabited villages in the district 995 villages or 88.4 per cent have been provided with the education facilities of one type or the other. Similarly 599 villages in the district constituting 53.2 per cent have medical facilities of one type or the other. Improved drinking water facility is available in1118 or 99.3 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 283 villages constituting 25.1 per cent of villages have been provided with post office facility within the village. 316 or 28.1 per cent villages have been provided with the telephone facility, 252 or 22.4 per cent with transport facility, 80 or 7.1 per cent villages with bank facility and 106 or 9.4 per cent with agricultural credit societies. Similarly, there are 925 or 82.1 per cent villages which have been linked with the pucca road. Total 1054 or 93.6 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities exist in CD block level. However amenities in the villages at CD block level have been found with slight variation. Siana CD Block has the higher 97.0 per cent villages where educational facility is available and lowest 79.0 per cent is found in unchagaon. Medical facility is higher in Khurja (89.9 per cent) and lowest (19.3 per cent) in Anupshahar CD block. Improved drinking water is available to cent per cent villages in nine out of 15 blocks while in other blocks, it is above 97.0 per cent. Telephone facility is higher in Bulandshahar (56.4 per cent) while 8 villages of Anupshahar CD block enjoy this facility. Transport and communications is less developed in Araniya where 10.8 per cent villages are enjoying this facilities. Banking facilities is found highest (9.6 percent) in Lakhaothi CD block and lowest of 1.7 percent in Gulaothi CD block. Trend of Agricultural Credit Societies, approach of pucca road and power supply among 15 CD blocks may also be seen in the table.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial No.	Name of C. D. block	Total population of inhabited villages	Type of amenity available					Type of amenity available

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and Telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 2,238,664 persons in the district, 2,139,132 or 95.6 per cent have educational facility of one or the other type. Similarly 1,381,362 or 61.7 per cent population has medical facilities while 2,235,281 or 99.8 per cent have got improved drinking water facility. Post office facilities are available to 910,444 or 40.7 per cent population. Telephone facility is available to 819,436 or 36.6 per cent. Transport communications facility is available to 645,460 or 28.8 per cent. Bank facility is available to 308,743 or 13.8 per cent. 351,269 or 15.7 per cent have been provided with the facility of agricultural credit societies. 1,961,749 or 87.6 per cent have been provided with the facility of approach by pucca road. Power supply is available to 2,142,716 or 95.7 per cent rural population in the district. Similar pattern of availability of facilities is visible among the rural population at C.D. block level. However, in Bhawan Bahadur Nagar C.D. block facilities of education, medical and improved drinking water are available to a larger proportion of population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education -				
(a) Primary School	127	7	1	135

(b) PHC	307	560	225	1,092
3 Post Office	646	189	8	843
4 Telephone	413	280	117	810
5. Bus Service	492	362	58	912
6. Banks				
(a) Commercial Bank	651	352	51	1,054
(b) Cooperative Bank	287	606	211	1,104
7. Agricultural Credit Societies	657	306	57	1,020

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 135 villages do not have primary school in their

villages and out of these villages, children of 127 villages have to travel less than 5 kms. for schooling Out of 1,126 inhabited villages as many as 827 are deprived of middle school and 1,106 of degree college. Of these 552 avail the facility of middle school at a distance of less than 5 kms., 263 at a distance 5-10 kms. and the remaining 12 at a distance of 10+ kms. In respect of degree college 251avail this facility at a distance of less than 5 kms., 381 between 5 and 10 kms. and rest 474 villages at a distance of 10+ kms.

Similarly there are 1,092 villages in the district which have been devoid of Hospital facility and 1,092 villages which are deprived of PHC facilities. Of these 354 villages have the facility of Hospital available within 5 kms. while in respect of 455 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 283 villages have this facility at a distance of 10+ kms. As regards PHC 307 avail this facility at a distance of less than 5 kms., 560 at a distance of 5-10 kms. and the remaining 225 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 843 villages do not have this facility in the village itself. Of these majority i.e.646 have this facility at a distance of less than 5 kms., another 189 villages avail it at a distance of 5-10 kms. In the remaining 8 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 810 villages in the district which are without telephone facilitiy. Of these 413 avail this facility at a distance of less than 5 kms., 280 at a distance of 5-10 kms. and remaining 117 have to traverse a distance of 10+ kms.

For Bus service out of 912 villages which do not have facility, 492 villages avail this facility at a distance of less than 5 kms., 362 at a distance between 5-10 kms. and 58 at a distance of 10+ kms.

In the entire district 1,054 villages are deprived of Commercial Bank & 1,104 of Co-operative Bank. Of these 1,054 villages which are deprived of Commercial Banks 651 villages avail this facility at a distance of less than 5 kms., 352 between 5-10 kms. & the remaining 51 at a distance of 10+ kms. Regarding Co-operative Banks out of 1,104 villages 287 villages avail this facility at a distance of less than 5 kms., 606 at a distance of 5-10 kms. and remaining 211 at a distance of 10+ kms.1,020 villages do not have agricultural credit societies. This facility to 657 villages is available at a distance of less than 5 kms., 306 at a distance of 5-10 kms. and the remaining 57 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1,126 inhabited villages in the district, there are 272 villages which have nearest towns upto a distance of 5 kms. Of these only 232

villages forming 85.3 per cent of these total villages, are having the educational facilities of one type or the other and 142 villages constituting 52.2 per cent, have the medical facilities within the village, 53 villages forming 19.5 per cent have the facility of post office within the village and 79 or 29.0 per cent have the facility of telephone. 66 villages constituting 24.3 per cent have been linked by transport service. 12 villages comprising 4.4 per cent have been provided bank facilities, while 26 villages constituting only 9.6. per cent have been provided by agricultural credit societies. 233 villages comprising 85.7 per cent have been provided with pucca road.

There are 806 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 719 villages constituting 89.2 per cent have been provided with the educational facilities. 428 villages comprising 53.1 per cent have been provided with medical facilities. 212 villages constituting 26.3 per cent enjoy the post office facility. 228.villages comprising 28.3. per cent have been provided the telephone facility. 181 villages constituting 22.5 per cent have been linked with transport communications. 63 villages comprising 7.8 per cent have bank facility. 74 villages constituting 9.2 per cent are having agricultural credit societies, while 656 villages or 81.4 per cent are approachable by pucca road. 42 villages fall in the distance range of 16-50 kms. Of these, 90.5 per cent villages have educational facility, 61.9 per cent with medical, 42.9 per cent with post office, 16.7 per cent with telephone and transport & communications available to 11.9 per cent villages. Banks and agricultural credit societies facilities are available to 11.9 and 14.3 per cent of villages. Pucca road is approachable by 73.8 percent of inhabitants

No village beyond 51 kms exists in Bulandshahr district.

TABLE41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the houschold has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Bulandshahr district out of a total of 1,126 inhabited villages, 79 have a population of 1-499 persons. Of these, 30 villages (38.0 per cent) have educational facility, 24 (30.4 per cent) have medical facility, 72

(91.1 per cent) have improved drinking water facility. No village (0.0 per cent) have post office facility. 6 (7.6 per cent) have telephone facility. 10 (12.7 per cent) have been linked by bus service. 2 (2.5 per cent) have Bank facility. No village (zero per cent) has been provided with the agricultural credit societies, 44 villages (55.7 per cent) have been linked with pucca road. 62 villages (78.5 per cent) have been provided with electricity.

Out of 185 villages, which fall in the population range of 500-999 persons, 140 villages (75.7 per cent) have been provided with the education facility, 82 (44.3 per cent) with medical facility, all the villages have improved drinking water facility. 13 villages (7.0 per cent) have been provided with post office facilities, 31 villages (16.8 per cent) with telephone facility, 28 villages (15.1 per cent) with transport facilities, 3 villages (1.6 per cent) with bank facility, 9 villages (4.9 per cent) with agricultural credit societies and 140 villages (75.7 per cent) have approach by pucca road. 173 villages (93.5 per cent) in this range have electricity.

437 villages fall in population range of 1,000-1,999 persons. 408 (93.4 per cent) villages have education, 405 villages (92.7 per cent) have power supply, cent per cent villages have improved drinking water facilities whereas 215 villages (49.2 per cent) enjoy the medical facility, 53 villages (12.1 per cent) have post office facility, 107 villages (24.5 per cent) have telephone facility, 80 villages (18.3 per cent) have transport communications facilities, 13 villages (3.0 per cent) have bank facilities, 24 villages (5.5 per cent) have agricultural credit societies and 356 villages (81.5 per cent) have approach by pucca road. 405 villages (92.7 per cent) have power supply.

There are 370 villages in the district which are covered under 2,000-4,999 population range. In this range, 362 villages (97.8) enjoy the facility of education, 369 villages (99.7) improved drinking water, 141 villages (38.1 per cent) telephone, 108 villages (29.2 per cent) transport communications, 333 villages (90.0 per cent) approach by pucca road and 361 villages (97.6 per cent) power supply. 234 villages (63.2 per cent) have medical facility. 172 villages (46.5 per cent) have post office facility, 39 villages (10.5 percent) have bank facility, 53 villages (14.3 per cent) are having agricultural credit societies.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial No.	Name of C. D. block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Sikandrabad	104	23,072.2	85.8	97.1
2	Bhawan Bahadur Nagar	47	18,662.1	43.1	96.9
3	Gulaothi	58	14,069.2	90.8	97.6
4	Lakhaothi	73	18,509.9	81.6	94.4
5	Bulandshahr	94	14,559.1	98.4	95.1
6	Siana	33	11,594.1	NA	94.0
7	Unchagaon	62	19,358.7	NA	98.7
8	Jahangirabad	76	13,339.6	97.9	95.1

13	Pahasu	90	10,910.9	NA	98.0
14	Khurja	89	28,415.5	NA	100.0
15	Araniya	83	22,525.5	98.7	88.0
	District Total	**1,126**	**271,588.0**	**NA**	**96.6**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents CD blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area

under irrigation. There are total 1,126 inhabited villages in the district having a total area of 271,587 hectares. Of this, 96.6 per cent area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Sikandrabad block with 104 villages have a total area of 23,072 hectares, of this 85.8 per cent of land is cultivable and of the aforesaid area 97.1 per cent is irrigated. In Bhawan Bahadur Nagar block, all the 47 villages have a total land area of 18,662 hectares, of this 43.1 per cent of land is cultivable and of the aforesaid area 96.9 per cent is irrigated. In Gulaothi block, all the 58 villages have a total area of 14,069.2 hectares, of this cultivable area is 90.8 per cent and 97.6 per cent is irrigated. In Lakaothi block, all the 73 villages have a total area of 18,510 hectares. Of this, cultivable area is 81.6 per cent. Of cultivable area 94.4 per cent is irrigated. Bulandshahar block with 94 villages have a total land area of 14,559 hectares, of this 98.4 per cent is cultivable area and out of this cultivable area 95.1 per cent is irrigated. Siana block with 33 villages has a total land area of 11,594 hectares. Out of total land area 94.0 per cent is irrigated. Unchagaon block with a total of 62 villages has an area of 19,359 hectares. Out of total cultivable area, 98.7 per cent is irrigated area.

5	Bulandshahr, NPP	Handpump, Iron Rod, Sugar	Wheat, Milk, Gur
6	Chhatari, NP	--, --, --	--, --, --
7	Debai, NPP	Cotton Cloth, Earthen Utensils, Carpet	Cotton Cloth, Gur, Veg. Oil
8	Gulaothi, NPP	Furniture, Ghee, Milk Powder	Wheat, Potato, Hide
9	Jahangirabad, NPP	Quilt Covr, Iron Goods, --	Wheat, Gur, Paddy
10	Khanpur, NP	--, --, --	Wheat, --, --
11	Khurja, NPP	Ceramic Pots, Nutbolt, Medical Cotton And Bandage	Earthen Pots, Wheat, Nut Bolt
12	Naraura, NP	Ban, Patera, Electrical Goods	Fish, Sand, Vegetables
13	Pahasu, NP	--, --, --	--, --, --
14	Shikarpur, NPP	Hosiery, Ladies Purse, Embroidery Garments	Hosiery, Ladies Purse, Embroidery Garments
15	Siana, NPP	Ag Equipments, Furniture, Hardboard Box	Wheat, Gur, Mango
16	Sikandrabad, NPP	--, --, --	--, --, --

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for Plywood, Sugar being town's main exports The chief export items of the district are Gur and Wheat. These are the main items which are manufactured in Anupshahr town and these are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities collected during Houselisting Operations, Census of India 2001 based on inset table 48 to 52:

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

* House list households.

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 463,103 consisting of 364,919 rural and 98,184 urban households. 110,626 households belong to Scheduled Castes and 5,413 to Scheduled Tribes. 441,988 households are living in their owned houses constituting 95.44 per cent of total households. Of these households, the largest number of households (152,310) have occupied double room accommodation and is followed by single room accommodation numbering 1,46,088 households. Next position is claimed by households (71,419) occupying three room accommodation. Number of households in owned accommodation occupying three+ rooms rank at fourth place with 67,124 households while 5,047 households are without any exclusive room. 17,184 households living in rented accommodation account for 3.7 per cent of total number of households in the district. The largest number of 8,373 households are living in single roomed accommodation followed by 6,281 households in double room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering 3,931 forming only 0.9 per cent of total households are distributed in 1,859 single room accommodation, 1,288 double room and 384 in three room accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas a reverse picture is seen.

	District Total	**71.8**	**19.9**	**8.3**	**68.8**	**21.6**	**9.6**	**83.1**	**13.5**	**3.3**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1	Permanent houses refer to those houses whose wall & roofs are made of pucca materials i.e., burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate a re-used for roof.
Semi permanent:- 2	Semi-permanent houses refer to those houses made of other types of materials.
Temporary:- 3	Temporary houses refer to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in Table 49 reveals that 71.8 per cent of the households in the district had permanent houses. The trend is different in rural (68.8 per cent) and urban area (83.1 per cent). Among tahsils highest proportion of permanent houses were accounted for in tahsil Khurja (77.6 per cent) followed by Sikandrabad (76.2 per cent), Debai (75.5 per cent) and lowest in Siana (65.9 per cent). In respect of semi-permanent houses, the returns were 19.9 percent at district level whereas among tahsils, in Siana it was highest 26.6 per cent and lowest was 12.7 per cent in tahsil Khurja. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 5.3 to 23.6 per cent. Temporary houses in the district in urban areas lie between the range of 1.3 to 7.0 percent whereas permanent houses accounted 77.6 per cent in tahsil Khurja followed by Sikandrabad (76.2 per cent), Debai (75.5 per cent) and lowest in Siana (65.9 per cent). In respect of semi-permanent houses, the returns were 19.9 per cent at district level whereas among tahsils, in Siana it was highest 26.6 per cent and lowest was 12.7 per cent in tahsil Khurja. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 5.3 to 23.6 per cent. Temporary houses in the district lie between the range of 1.3 and 7.0 percent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

* House list Households.

**Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises, it is considered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage means closed and open drainage.

Table 50 shows that out of total households of the district 463,103 (92.9 per cent) of the households had improved drinking water facility. The proportion of rural and urban area was 91.9 and 96.8 percent respectivaly. Tahsil Bulandshahr had higher order of proportion of households having the same amenity where percentage for rural area was 94.2 and 97.7 per cent in urban areas. Electricity was available for 28.7 per cent of households at district level 14.8 percent rural and 80.3 percent urban.Bathrooms and toilet facilities were available in 37.4 and 41.8 per cent of households. Tahsil Sikarpur poorly served in nearest of these amenities. Similarly drainage facility varied between 90.1 and 96.3 at tahsil level. At district level drainage facility was available for 94.1 percent of households, whereas the proportion of rural and urban area households accounted to 93.3 and 97.1 percent.

Percentage in brackets

* House list households.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above Table 51 that 27.4 percent households in the district use firewood as fuel for cooking, the proportion in the rural area is 25.6 and in urban area it comes to 33.8 per cent households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in 13.5 per cent households. The composition of rural and urban comes to 5.0 and to 45.4 per cent respectively. Kerosene is used for cooking in 0.7 per cent households (0.3 per cent rural and 2.2 per cent urban households). The other methods like crop residue (12.3 per cent), cow dung cake, 45.4 per cent coal, lignite 0.2 per cent, electricity 0.1 and biogas 0.2 percent. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is cow dung cake followed by firewood, LPG and crop residue. The table shows that cow dung cake, crop residue and LPG (cooking gas) are the predominant fuel for cooking in the district.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

* Houselist Households.

Table 52 reveals that out of the total households (4,63,103) of the district, in all 45.7 percent (211,533 households) could avail banking services at district level while 47.0 percent (217,374 households), 31.9 per cent (147,718 households), 4.7 per cent (21,854 households), 59.3 per cent (274,452 households), 12.6 per cent (58,495 households) and 2.1 per cent (7,758 households) enjoyed the availability of household assets radio/transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively whereas 24.7 per cent (114,183 households) had none of the specified assets.

It also reveals that at tahsil level highest number of 56,163 of households were availing banking services as well as all other household assets in Bulandshahr tahsil. The highest of none of specified assets 25,114 household in the tahsil Bulandshahr, on the other hand the lowest number 9,309 was observed in Sikandrabad were availing banking services 15,782, 19,407 radio/transistor household asset in the same tahsil while the rest of the availabilities of household assets at the lowest foot were being availed in Sikandrabad tahsil and the number of the enjoyers of none of the specified assets was 9,309 lowest in Sikandrabad tahsil.56,163 households in Bulandshahr tahsil followed by 37,498 in Siana tahsil were having banking services and the order of number of households having all other available households assets was higher in tahsil Bulandshahr than the tahsil Sikandrabad except in the case of none of the specified assets being reverse.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

During the last decade the general awareness among the people has increased. The literacy among the females has increased. Social superstitions among general population have gradually diminished over a decade. The important festivals celebrated by Hindus are Holi, Diwali, Dushehra, Ram Naumi and Janamashtami. Ram Naumi is celebrated as birthday of Lord Rama. The fete of Amanta Devi is associated with this festival which is held at Ahar. During the festival of Janamashtami, temples are decorated and devotional songs in praise of Lord Krishana are sung. Ram Lila celebration are held at different places in the district during Dushehra. Five big fairs are held at Karora, Bulandshahr, Jewar, Anupshahr and Jahangirabad.

Diwali, the festival of lights is celebrated with worship of goddess Lakshmi. Businessmen and traders close their financial year on this day. A big bathing festival is observed at Kartiki Purnima. People take a bath in Ganga and a big fair is held at Anupshahr. The important festivals observed by Muslims are Barawafat, Shab-e-barat, Id-ul-fitr, Id-ul-zuha and Muharram. Sikhs also celebrate birthday of Guru Nanak Dev ji.

There are several picture houses in the district. Now a days most of the people have got radio sets and television sets. A large number of fairs held in the district, provide opportunities to people to relax and amuse. A large number of in-door and out-door games are played in the district.

(xii) Brief description of places of religious, historical, archaeological importance in villages and places of tourist interest in the towns of the district

District Bulandshahr has many places of tourists interest and historical importance. Ahar is believed to be the old town of Kaushambi. The place is also said to have been the residence of Rukmini, the wife of Lord Krishna and the temple of Ambika Devi in Muhammadpur, a neighbouring village is said to be the one from which Krishna carried her off. The remains of the old fort and a large tank on the banks of which lie the ruins of some buildings, now known as Hamman, are situated at Ahmadgarh. Aurangabad Chandokh is said to have been the capital of a Hindu raja Chand. The ruins of fort are still visible and also of an old temple, which is known as Chandrakant ka Mandir. Belon was established by Raja Bhup Singh. Bargujar who in honour of Bela Devi built the temple which stands in a grove of 'bel' trees between the village and the road.

The important modern buildings of Bulandshahr town have four gates namely Moti Bagh Gate, Bunford Club Gate, Growseganj Gate and Fatehganj Gate. There are many temples such as Rameshwar Mandir, Bhooteshwar Mandir, Bhawan Mandir, Kali Mandir etc.

Dankaur is a place of great antiquity. It was believed to be founded by Drona. A masonary tank and an ancient temple still exist and are known as Drona Charya.

The principal building of Khurja is Jain temple. It is a fine construction, the stone carving is profuse and of a high quality. Karanbas is famous for a very old temple of Sitala Devi. A great religious fair attended by thousands of people, is also held here. Narora is famous for its atomic power plant and dam constructed on the river Ganga. A restaurant of U.P. Tourism is also situated here.

(xiii) Major Characteristics and Contribution of the District:

The early history of this district is estimated from accounts available in Mahabharata and Puranas. In district at Molabagh and Karanbas, there was a war between the freedom fighters and British army. District has significant contribution in freedom struggle. In 1919 Bulandshahr came into prominence as a centre of nationalist activities. Rowlatt Act raised a strong protest all over the district. This district is also famous for its communal harmony. Hindus and Muslims showed their solidarity during the freedom struggle.

Ganga river flows through a large part of the district which attract thousands of pilgrims. Khurja is famous for its potteries. The Atomic power plant situated at Narora fulfills the increasing demand of electricity.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY (SECTION I & II)

Section - I : Village Directory

(a) Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell (without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

N.A.

Section II - Town Directory

Section II - Town Directory

(A) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A

(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B - PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own *state both in* respect to the quality and the coverage and only after

the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important feature of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also.

In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, then portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES I TO VIII

ANNEXURE-I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE-II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP	Bulandshahr
q1	Persons	99	98
	Males	98	72
	Females	104	102
q2	Persons	117	105
	Males	117	84
	Females	118	110
q5	Persons	134	117
	Males	135	101
	Females	132	121

The probability of dying between birth and at age 1,2 and 5 years are shown in the above table. Child mortality by ages 1,2 and 5 years is lower in the district as against the state, thus child mortality indicators in the district for both male and female shown in the above table are of lower order as compared to the state.

ANNEXURE – III
VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE - 1991

Serial Number	Fertility Measures	Uttar Pradesh	Bulandshahr
1	2	3	4
1	CBR	37.2	36.5
2	TFR	5.6	5.9
3	TMFR	6.3	6.9
4	GFR	172	178
5	GMFR	200	216
6	Mean age at marriage (1981-91)	17.3	17.8
7	Number of children ever born per ever married woman aged 45-49 years	4.6	4.6
8	Child woman ratio 0-4	631	685
	5-9	752	794

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 36.5 per 1000 in the district. It is below to that of the state of Uttar Pradesh i.e. 37.2 per thousand. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), Gereral Fertility Rate (GFR) and (GMFR) General Marital Fertility Rate it is of higher order in the district than the state figures. The mean age at marriage during the period 1981-91 has been 17.3 years for the state whereas 17.8 years has been observed for the district. It may be observed that higher age at marriage leads to low rate of fertility in the state and district as well. Number of children ever born per ever married women in the age group 45-49, in the state and the district figures are same as 4.6. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 685 and 794 for the district while in case of the state the corresponding figures are 631 and 752. So the conclusion that may be drawn, the fertility levels as such are higher than the state average.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other district of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 89.7 in 1991, while in 2001 it was 91.6 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 9.7 percent and 8.2 percent respectively. This shows in-migration from other state to this district was nearly equal in 2001 in comparison to 1991. At district level in-migration from other countries was 0.6 percent in 1991 and 0.2 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 87.7 percent and 88.2 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 11.9 percent and 11.6 percent respectively. The movement of population from other countries in the district was 0.4 percent in 1991 and 0.2 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 79.9 percent in 1991 and 78.3 percent in 2001, while Muslim were 19.8 percent in 1991 and 21.1 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of "Other Religions" had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 58.0 percent male and 49.2 percent female to 60.1 percent male and 50.6 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 39.1 percent and female was 46.7 percent in 1991 and in 2001 it was 37.5 percent male and 43.7 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.3 percent male and 5.6 percent female while it was 2.5 percent male and 3.9 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 50.5 percent male and 80.9 percent female in 1991 which declined to 39.6 percent male and 65.4 percent female in 2001. Primary level education was 11.0 percent male and 5.5 percent female in 1991, which was 16.9 percent male and 11.4 percent female in 2001. Middle level education was 10.9 percent male and 3.6 percent female in 1991 and 16.8 percent male and 7.6 percent female in 2001. Matriculation and above level of education was achieved by 15.0 percent male and 4.1 percent female in 1991 which was 21.6 percent male and 8.6 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Total Population	Hindi	Urdu	Punjabi	Total Of Other Mother Tongues
1	2	3	4	5
2913122.00	2679590.00	230608.00	1157.00	1767.00
100.00	92.00	7.90	0.00	0.10

Note: For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0.02 percent. The remaining tongues have been merged in the column of "Total of other mother tongue".

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 89.0 percent person in 1991 and 92.0 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 10.8 percent and 7.9 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
