MOTIF

ALIGARH MUSLIM UNIVERSITY

The Aligarh Muslim University is the most important institution for the spread of modern education and social reforms among Muslims. Sir Syed Ahmad Khan (1817-1898) the founder of the University came from a family of nobles of the Mughal Court. He advocated English education for the regeneration of Muslims in India. His greatest achievement was the establishment of the Mohammedan Anglo-Oriental College at Aligarh in 1875. In course of time, this college became the most important educational institution of Indian Muslims. The Mohammedan Anglo-Oriental (MAO) College, which later on became the Aligarh Muslim University, fostered a modern outlook among the generation of students that studied here. The college, and later when it became a University, attracted students from all communities. It, however, played a particularly important role in the awakening of Muslims in India.

Annexure VII	Age, Sex and Education in the district, 1991 Census	714
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	716

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified

and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Aligarh ranks 21th in terms of population in the state.
2. The percentage share of urban population in the district is 28.9 as against 20.8 of the population in urban areas of the state.
3. Aligarh district has population density of 820 persons pre sq. km., which is more than the state average 690 persons per sq. km.
4. Aligarh district ranks 50st in terms of sex ratio (862) which is lower than the state average (898) females for one thousand males.
5. Aligarh district ranks 31st in literacy 58.5 which is higher than the state average 56.3 percent.
6. There are only 30 uninhabited villages out of total 1210 villages in the district.
7. Decadal growth rate of the district 22.2 per cent is lower to the state average of 25.8 per cent.
8. Koil tahsil has the highest number of inhabited villages 369 while Gabhana tahsil has the lowest number.
9. The district has 13 towns. Neither any town has been added nor any town declassified after 1991 Census.
10. There are 4,65,488 households in the district accounting for 1.8 percent of the total households in the state. The average size of households in the district is 6.4 persons.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The District Census Handbooks were first published after 1951 Census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 Census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 Census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

The early history of the region coverd by present district Aligarh lies in a dim past and is to some extent fragmentary and uncertain. The region never corresponded to any one kingdom and it was only now few occasions that the whole of it formed part of a single realm. It is very often being divided among several bordering states. The ancient history of the district is not known due to unavailability of any authentic material. As the legends have it, the district formed part of Pandavas kingdom after they shifted to Ahar in Bulandshahr district from their dilapidated kingdom of Hastinapur. There are traces of Buddhist culture and inhabitation in certain towns of the district. In the district remains of Buddhist settlement have been found in Balai Qila at Koil which are kept in Aligarh institute. Some other materials of same period have been unearthed from the great mound called Gohan Khera to the east of Sasni which now lies in district Hathras. In the second B.C. the district was under the reign of the king Mathura. The coins of that period were found from many places. Later the district was conguered by great Kushanas. After the decline of Kushanas the power came under Samudra Gupta in the middle of 4th centuary A.D. Tomar Rajputs established themselves at Delhi and its surrounding areas including Aligarh and they largely ruled as feudatories of Gujar Pratihars during middle of 9th and 10th century A.D. In subordination to the paramount rulers were Dor Rajput of Baran or

Bulandshahr, who held local power and whose genealogy for some ten generations has been preserved. Dors were defeated by Prithvi Raj Chauhan, who is said to have built a fort in Loni With the defeat of Prithvi Raj Chauhan in 1192, the district was captured by Qutb-ud-din-Aibak. It remain part of Delhi Sultanate till the establishment of Mughal dynasty. The medieval history of India says that the area came under the Lodi dynasty. The then king of Lodi dynasty Sikander Lodi gave Koil and its surrounding areas to Umar Khan the son of Suri Afaghan but in the begining of the reign of Ibrahim Lodi, the Zamindars of Jatrauli raised a rebellious and defeated Umar Khan, who was killed in fight. There after Qasim Khan of Sambhal crushed the rebellion. Koil was then given to Umar's son Muhammad Khan who built a fort of Mahammad garh in 1526, which was later on known as Aligarh. Under the reign of Akbar of mughal dynasty, Koil had no remarkable importance of it, the then capital of Sarkar formed a part of Agra province. The Sarkar was divided into four dasturs Koil, Akahabad, Marhara and Farida.

Before coming under full control of Britishers the district envisaged many ups and downs. During the mutiny of 1857. the history of Aligarh was full of incidents.

(iii) Administrative Setup

For the administration purpose and to control the administration of the district, the district have five tahsils namely Khair, Gabhana, Atrauli, Koil and Iglas. There are 12 development blocks having 122 Nyaya Panchayats and 854 gram sabhas. There are 1210 revenue villages which includes 30 uninhabited villages. The district has one Nagar Nigam two Nagar Palika Prishads, 9 Nagar Panchayat and one census town. 26 police stations are also functioning in the district.

Jurisdictional Change during 1991-2001

The following statement shows the jurisdictional changes during 1991-2001.

Jurisdictional Changes (1991-2001)

The following tatement shows the jurisdictional chnages during 1991-2001

S.No	Name of District/Tahsil	Notification No. and date	Jurisdictional Changes	
			Added	Substracted
1	2	3	4	5
	ALIGARH	2866/I-5/97-289/97-R-5 dated 18.09.97	-	
1	Gabhana Tahsil		(i) 103 villages transferred from Khair tahsil (ii) 56 villages and 1 town transferred from Koil tahsil.	
2	Khair Tahsil		-	103 villages transferred to newly created Gabhana tahsil.
3	Koil Tahsil		87 villages and 3 towns transferred from Sikandraro tahsil.	56 villages and 1 town transferred to newly created Gabhana tahsil.
4	Hathras Tahsil		-	Entire tahsil and its towns transferred to newly created Hathras district.
5	SikandraRao Tahsil		-	(i) 87 villages and 3 town transferred to Koil tahsil. (ii) 162 villages and 3 towns transferred to newly created Hatras district.

District administration:

District administration comprises of Revenue, Development Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate, (Finance and Revenue) i.e., ADM (F & R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now re-designated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. for Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each have a department at district level office. From the development point of view the district is divided into community development block. At Community Development Block levels are Block Development Officers (BDO) who looks after development works at community development block level and is assisted by Assistant Development Officer and Village Development Officers.

Under the police set-up Senior Superitendent of Police in big district and Superintendent of Police in small district are incharge. Additional Superintendent of Police (ASP) and Commanding officers are incharge of their respective area. Deputy Superintendent of Police (DSP) look after the Thanas alloted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The Judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judge, they are assisted by Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

Location and Size :

The total area of the district is 3650 sq. km. which is 0.13 percent of the total area of the state and 12.55 percent of the total area of Agra Division. District Aligarh is one of the district of Agra division. It lies between 27.27° and 28.11° North Latitudes and 77.27°, and 78.38° East Longitudes. It lies in the doab of Ganga and Yamuna, Ganga separates the district from Budaun for a few kms. in the extreme north east-while Yamuna constitute, the dividing line in the north west between Aligarh and Gurgaon district of Haryana. The district is surrounded by district Bulandshaher in the north. On the west and south west, the district stretches with district Mathura while in the east lies district Hathras.

So far as tahsil level area of the district is concerned, tahsil Atrauli contains the highest area while tahsil Iglas has the lowest area in the district.

Physiography:

On the basis of the factors like geology, soils, topography, climate and natural vegetation the district has been divided into the following four sub-micro regions: Yamuna Khadar, Aligarh Alluvial Plain, Kali Plain and Ganga Khadar.

Yamuna Khadar:- The region is situated along the Yamuna river in a narrow strip. It is a flat plain sloping towards the south. The Yamuna river forms its western boundary but the impact of this river on the physiography is very insignificant. There are few dry streams and shallow depression which retain water during the dry months also.

Aligarh Alluvial Plain:- It is situated in the central part of the district covering the major portion of the district. The eastern limit of the region concides with the highland between the Sengar and the Kali rivers. The western boundary is marked by the Yamuna Khadar region. The region is a flat plain sloping towards south.

Kali Plain: The region is situated in the Kali basin covering major part of Atrauli tahsil and part of Koil. The Kali and the Nim are the main streams flowing parallel to the Ganga river. There are formation of ravines along the Kali and the Nim streams.

Ganga Khadar: The region is situated along the Ganga river bifurcated by its natural levee from other regions. It covers only a portion of Atrauli tahsil. The physical characteristics of the region are determined by the Ganga river which flows on its northern boundary. It is a low lying area which is flooded during rains. Sand dunes and shallow depression are the main physiogarphic features of the region.

Drainage:

The drainage system in the district is good. The main rivers which flow in the district are Ganga, Yamuna and Kali. Ganga river merely touches in the north-east and covers a distance of 19 Km while Yamuna river flows in north-west to south-east direction and covers a distance of 16 kms.The Kali nadi is the only tributary of Ganga river which traverses through the district for a distance of 60 kms. Karwan Nadi is tributary of Yamuna river which flows in the district in development blocks Chandaus and Khair for a distance of 86 kms.

In pargana Akrabad the largest lakes are at Ladhawa, Sahadi. There are no lakes in Iglas and Khair tahsils.

Climate:

The climate of the district is characterized by a hot summer, pleasant weather and general dryness except in the monsoon season. The cold season from about the middle of November to early March is followed by the hot season which lasts till about the middle of June to about the third week of September. The period from the last week of September to the middle of Novemeber may be termed the post mansoon season.

The average rainfall in the district is 647.3 mm. The rainfall in the district increases from the south-west towards the north-east and varies from 604.5 mm to 724.9 mm. About 87 per cent of the annual rainfall is received during the south-west mansoon months from June to September, July and August being the two heaviest rainfall months.

Natural Economic Resources

Forestry:

The forest area in the district is negligible, Whatever forest area exist in the district is the result of plantation programmes by the sides of canals and roads. These forest mainly contains trees of Seesam, Babul and Jamun, The total forest area in the distrist is 2385 hecteares.

Minerals and mining:

No Important minerals are found in the distrist . The only minerals found in the district are kankar, reh and clay. The limestone conglomerate known as kankar is found in all parts of the district . The Two varieties of the kankar are often met with viz. soft disintegrated concretions in nodular form and large and hard concretions of ashy to blue colour found in comparatively thick beds of lenses. The former is used for metalling the roads and the latter for masonry work and ballast. Reh is alkaline or saline efforesence, deposited as thin superficial encrustations on the ground. It also results from in situ mechanical break down, chemical decomposition and solution of mineral particles such as plagioclase falspar and soda sericite present in the alluvium. Reh is used by washermen as a substitute for soap for washing coarser clothing. It is used in purer form for the manufacture of bangles, crude glass saltpetre etc. Clay is suitable for making bricks, earthen wares and toys.

Soil:

The major type of soil in the district are domat (clay) balui domat (sandy clay) bhur(sand) reh (alkaline) and loam soil. The loam soil is the fertile belt in the district. Clay soil is suitable for brick making, earthen wares and toys. Reh is used for washing by washermen, as a substitute of soap. It is used in purer form for manufecture of bangles, Crude glass saltpetre etc.

Land & Land use pattern:

The land of the district is level plain conforming to the topography of the doab. The low land area of the Ganga and Yamuna rivers is known as khadar. These khadar area sharply rise to the highly sandy plains lying between the Ganga and the Yamuna and the area lying between the Ganga and Kali nadi. The land use pattern of the district is as follows-

S.No.	Land use	1997-98
1	Forest	2,385
2	Agriculture	7,630
3	Barren land	4,874
4	Barren land and not fit for agriculture	13,892
5	Used other than agriculture	33,158
6	Charagagh (Grazing field)	1,858
7	Orchard and different trees	577
8	Cultivated Land	295,635
9	Kul Prativadit	368,694
10	Crop Density	165.7

Source- Samajik Samiksha

Agriculture and crop pattern:

Agriculture has an important place in the district. The economy of the district is agriculture based. During year 1997-98 out of total area, 369,694 hectares 80% area was used for agriculture. During 1995-96 and 1996-97 cultivated land was 398,564 and 292,726 hectares respectively. It shows an increase in agricultural land.

The three crops of the district are namely rabi, kharif and zaid. However, the main crops are rabi and kharif in the district. During the year 1997-98 the following crops were sown in the districts

Crop	Area in hectares
Paddy	17,167
Bajra	73,168
Maize	44,245
Wheat	190,423
Jaw (Barley)	26,159
Gram	2,700
Pea	3,115
Arhar	19,950
Mustard	39,033
Jawar	11
Sugar cane	10,099
Potato	2,555

Source- Samajik Samiksha

Average production of crops per hectare is wheat 32.35 quintals, paddy 21.30 quintals, barley 36.39 quintals, bazra 18.51 quintals, sugarcane 592.46 quintals and potalo 175.70 quintals.

Irrigation:

Canals and tubewells are the main source of irrigation in the district. There are 604 government and 20,945 private tubewells in the district. In year 1997-98 total irrigated area was 276,285 hectares. The area irrigated by canals was 13.47%, by govt. and private tube wells was 86.21 percent and the rest 22 percent area was irrigated from other sources.

Animal Husbandry:

Animal husbandry plays an important role in the rural economy of the district. It provides draught power for cultivation as well as supplements the income of the farmers by animal husbandry products. According to the Livestock Census of 1993, there are 1.9 lakh brovine population, 5.5 lakh buffaloes,

185 thousand sheep, 1.85 lakh goats and 36 thousand pigs. As many as 522 primary milk cooperative society with a membership of 28851 are functioning in the district. For improving the stock and providing care for live stock 46 veterinary dispensaries and 120 live stock development centres are functioning in the district. There are 45 artificial insemination centres and 120 subcentres in the district. There are also 14 pig development centres and 1 piggary unit.

Fishery:

There are few permanent lakes, and the big rivers the Ganga and the Yamuna, merely touch the fringe of the district. The chief species of fishes found here are rohu (Lobio rohita), Katla (Cattla cattla), kalbasu (Lobio calabasu) and island (silundia gaugetica). There is a fishery co-operative society in the district. Which works for the development of fishery industry.

Industry:

The district has made sufficient head way in industrial devolopment. During 1990-91 the number of factories registered under Indian factory act 1948 were 473. Industries registered during 1998-99 were 5, 650 employing 34,132 persons. The industrial units include a large printing establishments, unit engaged in manufacturing of scales, knives, locks, furniture, leather goods, scissors etc. Aligarh district is specially known for the production of locks of brass and iron and scissors, There are numerous lock works in city, Handloom, Carpet and glass industry are also found in the district.

Trade and commerce:

Trade grew rapidly with the construction of canals, metalled roads and railways At present the railways monopolise most of traffic, though a considerable volume of trade is also carried along the roads, Agricultural commodities form a sizeable bulk of export trade while the imports comprise mainly coal and manufactured articles. Presently Aligarh is very well known for its lock industry.milk products, milk powder, glucose or dextrose, cotton yarn, edible oils, ghee, handloom cloth.

The exports of the district comprise mainly agricultural products like wheat, gram, barley, bajra, maize, mustard, arhar, moong, urad, masoor, gur etc. The imports comprise cotton and cotton cloth, cement, coal, iron and steel, fertilizers, kerosene, petrol, agricultural implements and agricultural produce.

Transport:

The district is well connected by railways as well as roads. The railway tract in the district runs to a total length of 83 kms. having 11 railway stations including halts. The total length of roads, which includes roads under government departments and local bodies is 2023 kms. No national highway pass through the district whereas state highways account for 164kms. and main district roads for 96 kms. Other district and rural roads run through a length of 1293kms. Average length of roads for every one lakh of population stand for 76.8 kms.

Electricity & Power:

The network of electricity has covered all 1184 inhabited villages of the district Total consumption of electricty is 5,90,201 thousand kwh. Out of this railways claim lion's share of 2,19,716 thousand kwh, followed by agriculture which consumes 1,53,576 thousand kwh, Domestic light claims 1,12,347 thousand kwh, Per capita consumption of electricity is 193.9 kwh.

Gram Panchayt its composition, Jurisdiction and role in village Development

A Gram Panchayat acts as the executive of the Gram Sabha. It is vital for village development.

Composition:- The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 620 Gram Sabhas in the district. It is necessary that the village panchayat should have a member belonging to the scheduled caste ans also a woman member. If they not elected, then the government itself appoints two such members. The village panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the vilagers.

Its Terms:- The new Panchayat Raj act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissovlved earlier by the state government, if it fails to perform its dunty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be abtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualifications:- In order to be elected to a village panchayat, a candidate should possess the following qualifications.

(1) He should be a resident of the village concerned and his name should be in the vober's list of the village.

(2) He should be twenty five year old.

(3) He should be mentally and physically sound.

(4) He should not be a proclaimed offender.

Functions:- A gram panchayat is entrusted with various social economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health centre opened in the village. The Panchayat has also to provide land and building for such a center.
5. It gets mettalled roads build form the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
6. It arranges for sufficient irrigational facilities, improved seeds, insecticides, Chemical manures, improved implements and other such facilities with the help of the Block Development officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states the gram Panchyat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposed fine upto Rs 100/-.

The state government determines the number of Panchas according to the population of the village in Uttar Pradesh the number of Panchas is between 15-30.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in

which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the

buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered.

To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be

Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Dhangar
28 Dhanuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
33 Dusadh
34 Gharami
35 Ghasiya
36 Gond
37 Gual
38 Habura
39 Hari
40 Hela
41 Kalabaz
42 Kanjar
43 Kapariya
44 Karwal
45 Khairaha
46 Kharwar (excluding Banbasi)
47 Khatik
48 Khorot
49 Kol
50 Kori
51 Korwa
52 Lalbegi
53 Majhwar
54 Mazhabi
55 Musahar
56 Nat
57 Pankha
58 Parahiya
59 Pasi, Tarmali
60 Patari
61 Rawat
62 Saharya
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also

have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home

by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births

to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in

the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by

reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution :

The total population of the district is divided into 2,127,592 in rural and 864,694 in urban areas. The most populous tahsil is Koil with 1,373,814 population followed by Atrauli tahsil a population of 628,087.The least populous tahsil is Gabhana with a population of 278,116. The maximum urban population is at Koil tahsil which is 724,375 followed by Atrauli with 64,575 urban population whereas the least urban population is in Gabhana tahsil which is 13,752. At the 2001 Census the district has about 28.9 per cent of its population living in towns. As compared to this in the State the same is 20.8 per cent. The population of urban population is highest 52.7 per cent in Koil tahsil followed by 10.3 per cent in Atrauli tahsil and least 4.9 per cent in Gabhana tahsil.

Size, Class and Status of Towns

There are 12 statutory towns and 1 census town in the district. Aligarh Nagar Nigam with 669,087 populationis Class I town. There is no class II town. There are three Class III towns in the district. There are six Class IV towns and three Class V towns. The two Nagar Palika Parishad in the district are Khan, Atrauli apart from nine Nagar Panchayats which include Jatari, Chharra, Rafatpur, Harduaganj, Jalali, Kauriaganj, Pikhana, Vijaigarhich, Iglas and Beswan. The Qasimpur Power House Colony is the only Census Town of the district.

Population Growth

The population of the district in 1991 adjusted to jurisdiction of 2001 was 24,49,597 in the district. The population of the district at 2001 Census is 2,992,286. There has been decadal wherein population since 1991 accounting to 5,42,689 in absolute term (22.2 per cent). The males who were 13,27,738 at 1991 Census increased to 1,607,402 and females increased from 11,21,859 to 1,384,884. As against 22.2 per cnet decadal growth in the district, the growth rate has increased 25.8 per cent in the state of Uttar Pradesh during 1991-2001.

Population Density

The area of the district is 3,650 square kilometre. The density of population in the district is 820 as compared to 690 in the state. In the rural areas of the district the population density is 613.

Sex ratio

The sex ratio in the district is 862, while it is 898 in the state of Uttar Pradesh. In the rural areas of the district the sex ratio is low at 856 while it is high 876 in urban areas. The rural sex ratio of the district is worset than the state. The sex ratio among five tahsils varies between 845 in Iglas and 869 in Koil. Among C.D. blocks the sex ratio varies from 833 in Bijauli to 872 in Jawan Kikanderpur. The sex ratio in rural population in the district comes to 856. Among towns of the district the least sex ratio is 854 found in Aligarh (NN) and highest 895 in Pilkha. The sex ratio of population in the age-group 0-6 is 885 in the district which is higher than 862 from the general population. The sex ratio of population of the age-group 0-6 the rural areas is 886 against 884 in urban areas. The sex ratio of populationin the age-group 0-6 among twelve C.D. blocks varies from 869 in Lodha to as high as 903 in Gangiri. The sex ratio of rural population in the age-group 0-6 is 26.6 per cent population in the range 850-899. Among towns it varies from 776 in Qasimpur Power House Colony to 993 in Pilkhana.

Work Participation Rate

In the district 30.6 per cent (916,298 persons) pertains to the category of working population. Males working population is 45.5 per cent against 13.3 per cent among females. Main workers constitute 23.3 per cent of population with male 38.4 percent and female 5.8 percent. Marginal workers from 7.3 percent with female workers 7.5 percent and 7.2 percent male workers. Non-workers contribute 69.4 per cent of total population. In which 74.5 per cent are from the urban population. In rural areas 83.5 per cent females are Non-workers. Of the total working populationin the district 32.4 per cent are cultivators, 19.9 per cent engaged as agricultural labourers, 6.6 per cent in household industry and 41.1 per cent as other workers. Among male workers 34.1 per cent are cultivators as compared to 25.7 per cent among females. Similarly as against 42.7 per cent male other workers, the proportion of female is only 34.4 per cent. In rural areas of the district as much as 41.8 per cent of working population is cultivators as against only 2.9 per cent in urban areas. In case of other workers, the compositionof rural and urban proportionis 27.0 and 85.4 per cent of working population. It may be mentioned that the working populationin the district is 30.6 per cent as compared to 32.5 per cent in the state.

Literacy

In the district 58.5 per cent of the population is literate as against 56.3 per cent in the state of Uttar Pradesh. In the district 71.7 per cent of the male population is literate as compared to 68.8 per cent in the state. However, among females the literacy rate in the district is 43.0 per cent as compared to 42.2 per cent at the state level. In the district literacy rate is 63.2 per cent in urban areas as against 56.5 per cent in rural areas. The gap in male/female literacy rate is 34.2 per cent in rural areas as compared to 15.9 per cent age points in urban areas. The literacy rate among C.D. blocks varies between 43.3 per cent in Bijauli and 62.3 per cent in Chandaus. Similarly, the literacy rate among towns varies from 35.2 per cent in Pukhana to 86.9 per cent in Qasimpur Power House Colony.

(viii) Brief analysis of PCA data based on inset tables 1 to 36:

The district throw up vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables 1 to 36.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Khair	N.A.	N.A.	N.A.	372,970	328,330	44,640	N.A.	N.A.	N.A.	N.A.	12.0
2	Gabhana	N.A.	N.A.	N.A.	278,116	264,364	13,752	N.A.	N.A.	N.A.	N.A.	4.9
3	Atrauli	N.A.	N.A.	N.A.	628,087	563,512	64,575	N.A.	N.A.	N.A.	N.A.	10.3
4	Koil	N.A.	N.A.	N.A.	1,373,814	649,439	724,375	N.A.	N.A.	N.A.	N.A.	52.7
5	Iglas	N.A.	N.A.	N.A.	339,299	321,947	17,352	N.A.	N.A.	N.A.	N.A.	5.1
	District Total:	**2,449,597**	**1,810,294**	**639,303**	**2,992,286**	**2,127,592**	**864,694**	**22.2**	**17.5**	**35.2**	**26.0**	**28.9**

* Figures of 1991 Census for tahsils have not been recasted.

The growth rates of the district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 22.2 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 17.5 and 35.2 per cent respectively . Out of the total population of the district 71.1 per cent lives in rural areas while 28.9 per cent lives in urban areas of the district. The proportion of urban population has increased during the decade

from 26.0 per cent in 1991 to 28.9 per cent in 2001 in the district. The highest proportion of urban population is recorded in Koil tahsil (52.7 per cent) and lowest is registered in Gabhana (4.9 percent) tahsil. Urban population is concentrated in Koil and Atrauli tahsils.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Srl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages
			Persons	Males	Females		Males	Females		Males	Females

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1,180 inhabited villages, 17 (1.4 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 87 villages having 7.4 per cent villages of the district while in the size class of 500-999 population claims 312 villages with 26.4 per cent of the total villages in the district. 423 villages (35.8 per cent) are in the size class of 1,000-1,999 and 290 villages (24.6per cent) are in the size class of 2,000-4,999. 46 villages (3.9) have population in range 5000-9999 while 5 villages (0.4 percent) fall in the range of 10000 and above.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL

(b) Denotified - NIL
  (i) Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 Census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 Census are notified as statutory town in 2001 Census - NIL

(c) Declassified - NIL

(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	14	1.2	25,809	1.2
11-20	0	0.0	0	0.0
21-50	3	0.3	329	0.0
51-100	6	0.5	4,571	0.2

Population Density (Rural) of the district: 613

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 731 accounting for 61.9 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 71.7 per cent population. The lower ranges of 301-500 & 201-300 persons per sq. km. cover 354 villages (30.0 per cent). 49 villages (4.2per cent) have a share of population 24.7 per cent and 1.6 per cent respectively, while the corresponding proportion in the lower range of 101 to 200 is 1.9 per cent of the total inhabited villages having 0.6 per cent population of the district. In the medium densities ranges of 21 to 50 and 51-100 persons account for 0.3 and 0.5 per cent of inhabited villages respectively. Both these ranges claim 0.2 per cent rural population.

2001	898	904	876	862	856	876

NOTE- Sex ratio has been defined here as the numberof females per 1000 males

As per 2001 Census sex-ratio of 862 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly low as compared to the state average figures from 1901 to 1991 also remained above the state average figures during this period. The subsequent decades show declining trend from 1941 to 2001 and value remained below the state average. The lowest sex ratio of 837 females per 1000 males were recorded in the district during 1971 against the state average of 876 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in the district except 1981, 1991 and 2001 Census.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Khair	865	865	861
2	Gabhana	860	859	878
3	Atrauli	854	851	889
4	Koil	869	861	876
5	Iglas	845	843	879
	District Total:	**862**	**856**	**876**

The table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 Census. There are 862 females for every thousand males in Aligarh district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas except Khair tahsil. The sex-ratio among rural and urban population is 856 and 876 females respectively. The rural sex-ratio in the tahsils varies between 843 in Iglas tahsil and 865 females per 1,000 males in Khair tahsil. The sex-ratio in Khair, Gabhana and Koil tahsil is higher than district rural average (856). In urban areas the highest sex-ratio is recorded in Atrauli (889) and the lowest is in khair urban (861).

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 856 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 872 females is found in Jawan Sikanderpur C.D. block and is followed by Khair (867) while the lowest of 833 is recorded in Bijauli C.D. block. The sex-ratio of seven C.D. blocks is higher than the district rural average of 856 females and in remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	6	0.5	1,524	0.1

District Total:	**1,180**	**100**	**2,127,592**	**100.0**
Sex ratio (Rural) for District:		**856**		

Table 8 presents the distribution of villages by rural sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 475 accounting for 40.3 per cent of the total villages having largest population of 48.9 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-840 which claims 364 villages (30.8 per cent) and 31.2per cent population. The highest range of 1,100 and above claims 2 villages (0.2 per cent). This range shares 828 persons of rural population of the district while in the sex-ratio range of 900-949, there are 156 villages (13.2per cent). In remaining sex-ratio ranges of 1000-1099, 950-999, 750-799, 700-749 and less than 700, the number of villages are 10 (0.8 per cent), 35 (3.0 per cent), 114 (9.7 per cent), 18 (1.5 per cent) and 6 (0.5 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 475 having maximum population (48.9 per cent) fall in the higher sex-ratio ranges of 850-899 females and above showing that in majority of villages the sex-ratio is significantly higher.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tehsils of the district. Total population in age-group 0-6 is 5,62,946 persons comprising 2,98,579 males and 2,64,367 females. The total sex-ratio in this age-group works out 885 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 886 and 884 respectively. The rural sex-ratio in tahsil varies between 878 in Khair tahsil and 887 in Atrauli tahsil. The sex-ratio of 887 in Atrauli tahsil and 892 Koil tahsil are higher than district rural average (886). Khair tahsil has lowest sex-ratio of 861 females among the total population, as a whole claims also lower rank in the sex-ratio of children. In urban areas, the higher sex-ratio is recorded in Atrauli urban (909) and the lowest is found in Gabhana urban (776).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

	District (Rural) Total:	***418,169***	***221,743***	***196,426***	***886***

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the

district. The sex-ratio is 886 for the district (rural). The sex-ratio of C.D. blocks varies between 869 and 903. It is highest in Gangiri C.D. block i.e. 903 followed by 899 in Jawan Sikanderpur C.D. block and lowest 869 is found in Lodha C.D. block. The sex-ratio of four C.D. blocks is higher than the district rural (886) and Iglas and Khair C.D block equal to the district average while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population

District (Rural) Total	**1,180**	**100**	**418,169**	**100.0**
Sex ratio (Rural) for District		**886**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 229 (19.4 per cent) having largest population (26.6 per cent) in the district (rural) fall in the sex-ratio range of 850-899 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 800-849 which claims 180 villages (15.3 per cent) and 17.4 percent population. Next to it, 176 villages (14.9 per cent) are in the range of 900-949 with 17.4 percent population. 140 villages (11.9 percent) having 13.6 percent population fall in sex-ratio range of 950-999. In remaining sex-ratio ranges of less than 700, 700-749, 950-999, 1000-1099 and 1100+ claim less number of villages and these are distributed as 62 (5.3 per cent), 80 (6.8 per cent), 114 (9.7 per cent), 12.5 (10.6 per cent and 74 (6.3 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 725 having population (75.0 per cent) fall in the higher sex-ratio ranges of 800-999.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 29,92,286. total population of the district, 21.2 per cent of the total population belong to the Scheduled Castes and zero per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 23.2 per cent in rural population and 16.3 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Khair tahsil (24.0) while the lowest is found in Atrauli tahsil (18.3). The Scheduled Tribes population is 89 and 141 in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in tehsil of Koil (203 persons).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

	District (Rural) Total:	**2,127,592**	**493,031**	**89**	**23.2**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 23.2 per cent of rural population of the district belongs to Scheduled Castes and zero per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 18.7 per cent in Bijauli and 27.9 per cent in Dhanipur C.D. block.. The other C.D. block containing higher percentage of Scheduled Castes are Iglas (26.2), Lodha (26.1) and Tappal (24.8). The highest number of 62 persons of Scheduled Tribes is counted in Lodha C.D. block and is followed by Chandaus (19) C.D. block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage

District Total	**1,180**	**100.0**	**493,031**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 58 villages accounting for 4.9 per cent of total 1,180 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5 per cent in 87 villages (7.4 per cent). In 130 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 296 villages constituting 25.1 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 263 and

189 villages respectively. Both these ranges together account for 38.3 per cent villages of the district. 81 villages fall in the range of 41-50 and 63 villages in the range of 51-75 while 13 villages from 76 and above per cent 296 villages are such where the proportion of Scheduled Castes is between 11 to 20 per cent.These villages contain 19.8 per cent Scheduled Castes population of the district. The maximum of the 25.1 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

Table 18 shows number and percentage of scheduled castes and scheduled tribes population recorded during 2001 Census in district Aligarh. The table depicts that scheduled caste population in the district forms 16.3 per cent while it is negligible in case of scheduled tribes. It is only Aligarh NN where count a merely 141 persons have been counted as scheduled tribes. Scheduled castes population varies from 9.4 per cent in Chharra Rafatpur to 31.9 per cent in Jalali (N.P) out of 13 towns in 5 their percentage exceeds districts average of 16.3 while as in 8 it falls short.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial No.	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

13	Vijaigarh (NP)	905	0
Sex ratio (Urban) for the district:		**875**	**808**

Table 20 shows sex-ratio of scheduled castes and Scheduled Tribes population in urban Aligarh district. Where it is excess of males over females at district level for both scheduled caste and scheduled tribe. The sex-ratio in 6 towns among scheduled castes is above the parity line while in remaining 7 towns is below the line of equality in case of scheduled castes people. The lowest value of sex ratio of 824 females is recorded in Jalali town. Scheduled Tribes are only in Aligarh NN and their sex ratio is worked out as 808.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Table 21 shows district and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 58.5 per cent in the district. This proportion in rural area is 56.5 per cent against 63.2per cent in urban areas. In the district the literacy rates of males (71.7 per cent) is much higher than that of females (43.0 per cent). Among the tahsils, Gabhana tahsil tops with 62.4 per cent literates followed by Iglas tahsil (61.5 per cent). Atrauli tahsil with 48.3 per cent literates stands at the bottam in the district. Out of 5 tahsils, the literacy rates of 4 tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas..

The gap between male and female literacy is very high which comes to 28.7 per centage points in the district. The situation at tehsil level is not much different. However this gap in urban literacy is low which comes to 15.9 percentage points against the rural areas, where the gap between male and female literacy is 34.2 points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

District (Rural) Total:		**966,008**	**667,517**	**298,491**	**1,161,584**	**478,939**	**682,645**	**56.5**	**72.2**	**38.0**	**34.1**

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 56.5 per cent of the total rural population excluding the age-group of 0-6 years literates in the district. The corresponding proportion of male and female literates comes to 72.2 and 38.0 per cent respectively which shows very wide gap of 34.1 per cent in males and female literacy. At C.D. block level, Chandaus C.D. block has the highest rural literacy rate of 62.3 per cent while 77.5 per cent males and 44.4 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Bijauli and Gangiri each with C.D. blocks (43.3 per cent each). There are wide variations in male and female literacy rate in all the C.D. blocks of the district. The maximum difference of 39.8 percentage points is found in Gonda C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population

District Total	**1,180**	**100.0**	**2,127,592**	**100.0**
Literacy rate for District		**58.5**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in one village (0.1 per cent) of the district and population of these villages is only 77 persons. While one village (0.1 per cent) have all the literate population. 342 villages accounting for 29.0 per cent of the total villages are in the literacy range of 51-60 per cent and 425 villages (36.0 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 278 villages (23.6 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 134 villages (114 per cent). The range of 51-70 have the maximum number of 767 villages forming 65.0 per cent of the total inhabited villages.

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Aligarh NN town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (63.2). The literacy rate is quite high (94.9 per cent) in Qasimpur Power House Colony Census Town) among males. Female literacy rate is not a behind in the town (being 77.9 per cent). However, literacy rate among females is very low (22.7 per cent) in Pilkhana town, the gap in male female literacy rate is very high (30.4 percentage points) in Beswan.

Table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 Census. The number of illiterates is (81,588) more than literates (59651) in the district (urban) and towns.The percentage of literates is least (31.6)in Pilkhana among 13 towns but the gap in male/female literatcy rate is highest 31.8 percentage points in case of Qasimpur Power House Colony. The males in all the 13 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least (20.0 percentage points) in case of Kanriaganj towns female literacy rate is highest (57.4) in Qasimpur Power House Colony (C.T.).

Table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 Census. The number of illiterates is more than literates in the district and CD Blocks, with exception to Khair, Attrauli and Gonda CD Block. The literacy rate of the scheduled tribes population being 43.9 per cent is lower than the corresponding rate of 49.1 per cent in case of scheduled castes community. The gap in male and female literacy rates 43.9 percentage points is higher than what it is in case of the scheduled castes community (about 35.6 percentage points). The literacy rate is cent percent in Khair, atrauli and Gonda CD Block and lowest nil in chandaus and

Gangiri CD Blocks. The gap in male/female literacy rate in Gonda CD Block is in favour of the females, which is an exception and otherwise the highest gap is in case of Khair CD Block.

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out 30.6 per cent of the total population in the district. The total workers are comprised of 23.3 per cent of main workers and 7.3 per cent of marginal workers and the remaining 69.4 per cent are non-workers.

Among the main workers, males participation rate in the district is 38.4 per cent and 5.8 per cent of females. Male and female marginal workers account for 7.2 and 7.5 per cent respectively. The percentage of females marginal workers is slightly higher than males. Total workers (main and marginal workers) among tehsils varies from 27.6 per cent in Koil tahsil to 35.3 per cent in Iglas tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 2,127,592 total rural population of the district, 23.8 per cent has been categorised as main workers and the marginal workers constitute 8.9 per cent and the remaining 67.3 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 38.5 per cent males and 6.6 per cent females are in the category of main workers. Male and female marginal workers account for 8.0 and 9.9 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 32.7 per cent. At the C.D. block level, Tappal has highest proportion of total workers forming 37.9 per cent of the total population. It is closely followed by Iglas (35.8 per cent), Gonda (35.7 per cent), Khair (35.2 per cent), Bijauli (33.8 per

cent) and Akrabad (31.2) per cent. The lowest proportion of total workers percentage of 27.7 per cent is recorded in Jawan Sikandarpur C.D. block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Note: Percent of Worker to total worker are given in brackets

It can be seen from Table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 32.4 per cent of the total workers (main + marginal) and remaining 67.6 per cent of total workers are engaged as agricultural labourers (19.9 per cent), household industry workers (6.6 per cent) and other workers (41.0 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 17.5 per cent in Koil tahsil and 44.9 per cent in Atrauli tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of female cultivators is 25.7 per cent which is very less as compared to 34.1 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the second position next to agriculture in the district as well as in each tahsil. The highest proportion of 61.2 per cent of other workers is recorded in Koil tahsil while the lowest proportion of 24.4 per cent is found in Atrauli tahsil.

Note: Percentage of Workers to total workers are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) are 32.7 per cent of total population. Among these workers, cultivators constitute 41.8 per cent, 25.0 per cent agricultural labourers, 6.2 per cent household industry workers and 27.0 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 6.2 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (28.7 per cent) is lower than males 45.8of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to another. The proportion of cultivators varies between 28.3 per cent in Lodha C.D. block to 52.7 per cent in Gangiri C.D. block. Similarly for other workers, the lowest proportion is 17.5 per cent in Bijauli C.D. block while 48.3 per cent is the highest in Lodha C.D. block. The percentage of agricultural labourers and household industry workers together is quite low i.e. only 31.2 per cent in the district. The percentage of agricultural

labourers is highest in Akrabad (32.4) block and is followed by Atrauli (29.4). In other CD blocks, this proportion is almost similar. Similarly, household industry workers varies in C.D. blocks between 4.2 per cent in Chandaus and 9.8 per cent in Khair.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district Aligarh. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other worker (85.4) followed by household industry workers (6.8 per cent males and 16.7 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (21.7) is recorded in Pilkhana in the agriculture labourers category Jalali (NP) has recorded highest 44.3 per cent and very low per centage (0.4) in Qasimpur power which also has house hold industry worker rates lowest (1.3 per cent). As the usual trend recorded in the urban areas, other workers are in highest percentage (97.7 per cent in Qasimpur Power followed by 89.7 per cent in Aligarh corp. and 89.3 per cent in Iglas (NP).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset table 37 to 47:

One of the major parts of the District Census Handbook is Village and Town Directory. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data inset tables 37 to 47 have been generated and reproduced here showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherrwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, banks agricultural credit societies, approach by pucca road and power supply within the village. Out of 1180inhabited villages in the district 1030 villages or 87.3 per cent have been provided with the education facilities of one type or the other. Similarly 512 villages in the district constituting 43.4 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1178 or 99.8 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 306 villages constituting 25.9 per cent of villages have been provided with post office facility within the village. 409 or 34.7 per cent villages have been provided with the telephone facility, 172 or 14.6 per cent with transport facility, 61 or 5.2 per cent villages with bank facility and 72 or 6.1 per cent with agricultural credit societies. Similarly there are 919 or 77.9 per cent

villages which have been linked with the pucca road. Total 1093 or 92.6 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Akrabad C.D. block has the highest 94.2 per cent villages where educational facility is available and lowest 74.8 per cent is found in Iglas. Medical facility is highest in Tappal (62.1 per cent) and lowest (15.5 per cent) in Iglas C.D.block. Improved drinking water is available to cent percent villages in 10 blocks while in other two blocks, it is above 98per cent. Telephone facility is highest in Dharipur (53.1 per cent) while 14 village of (16.5 per cent) Bijauli CD block enjoy this facility. Transport and communications is less developed in Iglas where only 4.9 per cent villages are covered by this facility whereas highest 27.1 per cent villages of Khair C.D. block are availing this facility. In the field of power supply 92.6 percent villages have been covered in the district, in which highest cent percent in Chandaus and Lodha C.D. blocks.

TABLE38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial No.	Name of C. D. block	Total popula-tion of in-habited villages	Type of amenity available					Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the houschold has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities.

Out of total rural population of 21,27,592 persons in the district, 20,24,058 or 95.1 per cent have educational facility of one or the other type. Similarly 12,21,934 or 57.4 per cent population has medical facilities while 21,27,546 or 99.99 per cent have got improved drinking water facility. Post office facilities are available to 9,60,101 or 45.1 per cent population. Telephone facility is available to 9,53,591or 44.8 per cent. Transport communications facility is available to 5,06,344 or 23.8 per cent. Bank facility is available to 2,84,722 or 13.4 per cent. 2,84,055 or 13.4 per cent have been provided with the facility of agricultural credit societies. 1,82,2623 or 85.7 per cent have been provided with the facility of approach by pucca road. Power supply is available to 19,86,221 or 93.4 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. However, in Khair C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	142	7	3	152
(b) Middle School	635	163	17	815
(c) Degree College	190	367	618	1,175

(b) Cooperative Bank	231	479	461	1,171
7. Agricultural Credit Societies	491	466	151	1,108

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 152 villages do not have primary school in their villages and out of these villages, children of 142 villages have to travel less than 5 kms. for schooling Out of 1,180 inhabited villages as many as 815 are deprived of middle school and 1,175 of degree college. Of these 635 avail the facility of middle school at a distance of less than 5 kms., 163 at a distance 5-10 kms. and the remaining 17 at a distance of 10+ kms. In respect of degree college 190 avail this facility at a distance of less than 5 kms., 367 between 5 - 10 kms. and rest 618 villages at a distance of 10+ kms.

Similarly there are 1,151 villages in the district which are devoid of Hospital facility and 1,160 villages which are deprived of PHC facilities. Of these 343 villages have the facility of Hospital available within 5 kms. while in respect of 470 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly 338 xvillages have this facility at a distance of 10+ kms. As regards PHC 291 avail this facility at a distance of less than 5 kms., 450 at a distance of 5-10 kms. and the remaining 419 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 874 villages do not have this facility in the village itself. Of these majority i.e. 773 have this facility at a distance of less than 5 kms., another 124 villages avail it at a distance of

5-10 kms. In the remaining 17 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 771 villages in the district which are without telephone facilitiy. Of these 268 avail this facility at a distance of less than 5 kms., 286at a distance of 5-10 kms. and remaining 217 have to travl a distance of 10+ kms.

For Bus service out of 1042 villages which do not have facility, 436 villages avail this facility at a distance of less than 5 kms., 413 at a distance between 5-10 kms. and 193at a distance of 10+ kms.

In the entire district 1,122 villages are deprived of Commercial Bank and 1,171 of Co-operative Bank. Of these 1,122 villages which are deprived of Commercial Banks, 513 villages avail this facility at a distance of less than 5 kms., 459 between 5-10 kms. and the remaining 150 at a distance of 10+ kms. Regarding Co-operative Banks out of 1,171 villages 231 villages avail this facility at a distance of less than 5 kms., 479 at a distance of 5-10 kms. and remaining 461 at a distance of 10+ kms. 1,108 villages do not have agricultural credit societies. This facility to 491 villages is available at a distance of less than 5 kms., 466 at a distance of 5-10 kms. and the remaining 151 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1180 inhabited villages in the district, there are 245 villages which have nearest towns upto a distance of 5 kms. Of these only 205 villages forming 83.7 per cent of these total villages, are having the educational facilities of one type or the other and 101 villages constituting 41.2 per cent, have the medical facilities within the village, 40 villages forming 16.3per cent have the facility of post office within the village and 93 or 38.0 per cent have the facility of telephone. 39 villages constituting 15.9 per cent have been linked by transport service. 6 villages comprising 2.4 per cent have been provided bank facilities, while 11 villages constituting only 4.5 per cent have been provided by agricultural credit societies. 199 villages comprising 81.2 per cent have been provided with pucca road.

There are 807 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 718 villages constituting 89.0 per cent have been provided with the educational facilities. 349 villages comprising 43.2 per cent have been provided with medical facilities. 224 villages constituting 27.8 per cent enjoy the post office facility. 280 villages comprising 34.7 per cent have been provided the telephone facility. 112 villages constituting 13.9 per cent have been linked with transport communications. 45 villages comprising 5.6 per cent have bank facility. 50 villages constituting 6.2 per cent are having agricultural credit societies, while 625 villages or 77.4

per cent are approachable by pucca road. 102 villages fall in the distance range of 16-50 kms. Of these, 84.3 per cent villages have educational facility, 44.1 per cent with medical, 32.4 per cent with post office, 27.5 per cent with telephone and transport & communications is available to 15.7per cent villages. Banks and agricultural credit societies each facilities are available to 6.9 per cent villages.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Aligarh district out of a total 1180 inhabited villages, overwhelming 423 have a population of 1000-1999 persons. Of these, 392 villages (92.7 per cent) have education facility, 203 (48.0 per cent) have medical facility, 423 (100 per cent) have improved drinking water facility. 85 villages (20.1 per cent) have post office facility. 149 (35.2 per cent) have telephone facility. 49 (11.6 per cent) have been linked by bus service. 6 (1.4 per cent) have Bank facility. 22 villages (5.2 per cent) have been provided with the agricultural credit societies, 333 villages (78.7 per cent) have been linked with pucca road. 399 villages (94.3 per cent) have been provided with electricity.

Out of 312 villages, which fall in the population range of 500-999 persons, 253 villages (81.1 per cent) have been provided with the education facility, 80 (25.6 per cent) with medical facility, all the villages have improved drinking water facility. 26 villages (8.3 per cent) have been provided with post office facilities, 84 villages (26.9 per cent) with telephone facility, 26 villages (8.3 per cent) with transport facilities, 3 villages (1.0 per cent) with bank facility, none village has agricultural credit society and 251 villages (68.9 per cent) have approach by pucca road. 287 (92.0 per cent) villages in this range have electricity.

290 villages fall in population range of 2,000-4,999 persons. Of these 289 (99.7 per cent) villages have education, 173 villages (59.7 per cent) medical facility and all the villages have improved drinking water facilities. Whereas 153 villages (52.8 per cent) enjoy the rest office facility, 124 villages (42.8 per cent) have telephone facility, 61 villages (21.0 per cent) have transport facility, 33 villages (11.4 per cent) have bank facilities, 33 villages (11.4 per cent) have agricultural credit societies, 258 villages (89.0 per

cent) have approach by pucca road and 268 villages (92.4 per cent) are served with power supply.

There are 46 villages in the district which are covered under 5,000-9,999 population range. In this range, all the villages enjoy the facility of education, improved drinking water, and approach by pucca road. 39 villages (84.8 per cent) have medical facility. 37 villages (80.4 per cent) have post office facility, 14 villages (30.4 per cent) have bank facility, 13 village (28.3 per cent) are having agricultural credit societies and 44 villages (95.7 per cent) are served with power supply.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Tappal	87	41324.8	79.6	97.3

11	Gonda	83	26883.4	96.9	95.6
12	Iglas	103	25349.6	76.0	97.2
	District Total:	**1,180**	**357919.9**	**84.0**	**94.2**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,180 inhabited villages in the district having a total area of 3,57,919.9 hectares. Of this, 84.0 per cent is cultivable and 94.2 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Tappal block with 87 villages have a total area of 41,324.8 hectares, of this 79.6 per cent of land is cultivable and of the aforesaid area 97.3 per cent is irrigated. In Khair block, all the 96 villages have a total land area of 31,790.2 hectares, of this 90.9 per cent of land is cultivable and of the aforesaid area 96.2 per cent is irrigated. In Chanduas block, all the 92 villages have a total area of 31,892.5 hectares, of this cultivable area is 83.4 per cent and 94.1 per cent is irrigated. In Lodha block, all the 133 villages have a total area of 29,314.5 hectares. Of this, cultivable area is 82.9 per cent. Of cultivable area 95.3 per cent is irrigated. Jawan Sikandarpur block with 108 villages have a total land area of 29,788.3 hectares, of this 84.7 per cent is cultivable area and out of this cultivable area 91.6 per cent is irrigated. Atrauli block with 110 villages has a total land area of 27,279.4 hectares. Of this 98.8 per cent is cultivated area, out of which 91.2 per cent is irrigated. Bijauli block with a total 85 villages have an area of 22,318.8 hectares. Of this 77.6 per cent is cultivable area. Irrigation facility being 89.3 per cent in the block.

* House list households.

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 4,73,975 consisting of 34,4,079 rural and 1,29,896 urban households. 1,15,553 households belong to Scheduled Castes and 8,685 to Scheduled Tribes. 445386 households are living in their owned houses constituting 93.96 per cent of total households. Of these households, the largest number of households (1,69,802) have occupied one room accommodation and is followed by double rooms accommodation numbering to 1,38,974 households. Next position is claimed by households (64,421) occupying three plus rooms accommodation. Number of households in owns accommodation occupying three rooms rank at fourth place with 63,959 households while 8,228 households are without any exclusive room.

22,108 households living in rented accommodation account for 4.66 per cent of total number of households in the district. The largest number of 10,983 households are living in single roomed accommodation followed by 7,220 households in double rooms accommodation. Households with three rooms and account for 2,200 three plus are 1,411 in numbers. Other households numbering to 6,485 forming only 1.38 per cent of total households are distributed in single room accommodation numbering 3,252 double rooms 1,734 and 631 in three rooms accommodation. Households with 3+ rooms constitute 343. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial No.	District/ Tahsil	Total			Rural			Urban

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. here, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that more than 78.1 per cent of the households in the district had permanent houses in rural (73.4 per cent) and urban area 90.5 per cent. Among tahsils highest proportion of permanent houses were accounted in tahsil Koil (83.2 per cent) followed by Iglas (82.7 per cent), Khair (80.2 per cent) and lowest in Atrauli (65.6 per cent). In respect of semi-permanent houses, the returns were 9.7 per cent of district level whereas among tahsil in Atrauli it was highest 13.5 per cent and lowest was 7.2 per cent in tahsil Iglas In rural areas it was 10.6 for the district higher 13.2 in Atrauli tahsil and lowest 7.4 Iglas tahsil. But semi permanent houses in the urban areas were in the proportion of 7.2 with highest 15.5 per cent to Atrauli lowest 0.4 per cent . Temporary houses in the district lies between the range of 8.1 and 20.9 per cent in Koil and Atrauli respectively.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

* House list Households.

**Based on the improved drinding water source, drinking water source, drinding water supply has been classified as

'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.
Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

Table 50 shows that out of total households 473975 of the district 87.7 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 85.6 and 93.3 per cent. Tahsil Gabhana had higher order of proportion of households where percentage for rural area was 88.7 and 98.7 per cent in urban areas. Electricity was available for 34.5 per cent of households at district level. Households of the district had better access of electricity. Bathrooms and toilet facilities were available in 28.9 and 37.0 per cent of household. Atrauli poorly served in respect of these amenities. Similarly drainage facility was 91.3 percent each in Iglas and Khair. At district level drainage facility was available for 92.4 percent of households. Whereas the proportion of rural and urban areas households accounted for 91.9 and 93.7 per cent respectively.

Percentage in brackets
* House list households.
Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from Table 51 that 36.2 per cent of households in the district use firewood as fuel, for cooking the proportion in the rural area is 35.1 and in urban arca is comcs to 38.9 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in 13.2 per cent of the households. The composition of rural and urban comes to 3.2 and 39.7 per cent respectively. Kerosene is used for cookin in 1.9 per cent of the households (0.2 per cent rural and 6.4 per cent urban household). The other methods like crop residue cow dung cake, coal, lignite, charcoal, electricity and biogas etx. Ranges between 15.7 per cent and 0.2 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsil (rural areas) where predominant fuel is firewood. The table shows that firewood crop residue cow dung cake are the predominant fuel for cocking in the district.

Data source: Census of India 2001, H-series: Table on Houses, Households amenities and Assets.

* Houselist Households.

Table 52 reveals that out of the total households (473975) of the district, in all 36.7 per cent could avail banking services at district level while 35.4, 34.8, 7.2, 64.4, 13.2 and 2.8 per cent enjoyed the availability of households assets radio/transistor, television, telephone, bicycle, scooter/motor cycle/ moped and car/jeep/van respectively whereas only 22.6 per cent had none of the specified assets.

It also reveals that at tahsil level as highest number of 85,367 households were availing banking services as well as other households assets in Koil tahisl. The highest of none of specified assets 36,270 household in the tahsil Koil against it ,on the other hand the lowest of 16,743 households was observed were availing banking service and 16,819 household, radio/transistor household asset in Gabhana tahsil while the rest of the availabilities of households assets at the lowest foot were being availed in the same tahsil and the number of the enjoyers of none of the specified assets was 36,270 in Koil tahsil followed by 28,188 households in Atrauli tahsil and 17,961 household in Khair tahsil.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

Of special significance is the Aligarh exhibition which began on a modest scale in 1880 as a horse show. Gradually, it assumed importance and at present it is considered as one of the biggest industrial exhibition of state and is held every year, It attracts a large number of traders and dealers from all over the country. It is a display centre of social, economic and cultural programmes and achievements of the State, Well decorated Shops of handlooms, art and craft and other products are arranged in a beautiful manner. Modern and scientific agricultural implements are also put on display. Wrestling competition, mushairas, kavi samellans, dog shows, games and fire works are arranged for recreation.

A number of fairs are also held in town of which Ram Lila fair is an important one Beautiful Jhankis are taken out and decoration are made, its prime centre being the Ram Lila Bhawan, a building of exquisite beauty.

The extension of television network has been spread over throughout the districts which provide main cultural events to the people of district.

(xii) Brief discriptions of places of religious, historical, archaeological importance in villages and places of tourist interest in the towns of the district.

The town is of considerable antiquity. It gradually grew up round the old Dor stronghold, still known as the Balai Qila meaning lofty fort. Of the fort itself nothing now remains and site this is occupied by Sabit Khan's great mosque called the Jami Masjid. Near the mosque is another mosque called Moti Masjid. These two mosque and an adjacent tank are attributed to Sabit khan. About a half km to west of Jami Masjid is a group of tombs. Many of these bear Arabic inscriptions and some are undoubtedly very old. The most striking tomb is that of Gesu Khan, an open pillared chhatri of Hindu Style.

1. Population and households Cols.4 & 5

(xiii) Major Characteristics and Contribution of district

Aligarh district is specially well known for the production of locks. There are numerous lock factories in the city. To enhance this industry on Ramhgat Road a Tala nagari has been established between Aligarh and Harduaganj.

It is a good and rich education center due to existence of Aligarh Muslim University which is of international repute.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized in English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages

are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY (SECTION I & II)

Section - I : Village Directory

(a) Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

(B) STATEMENT

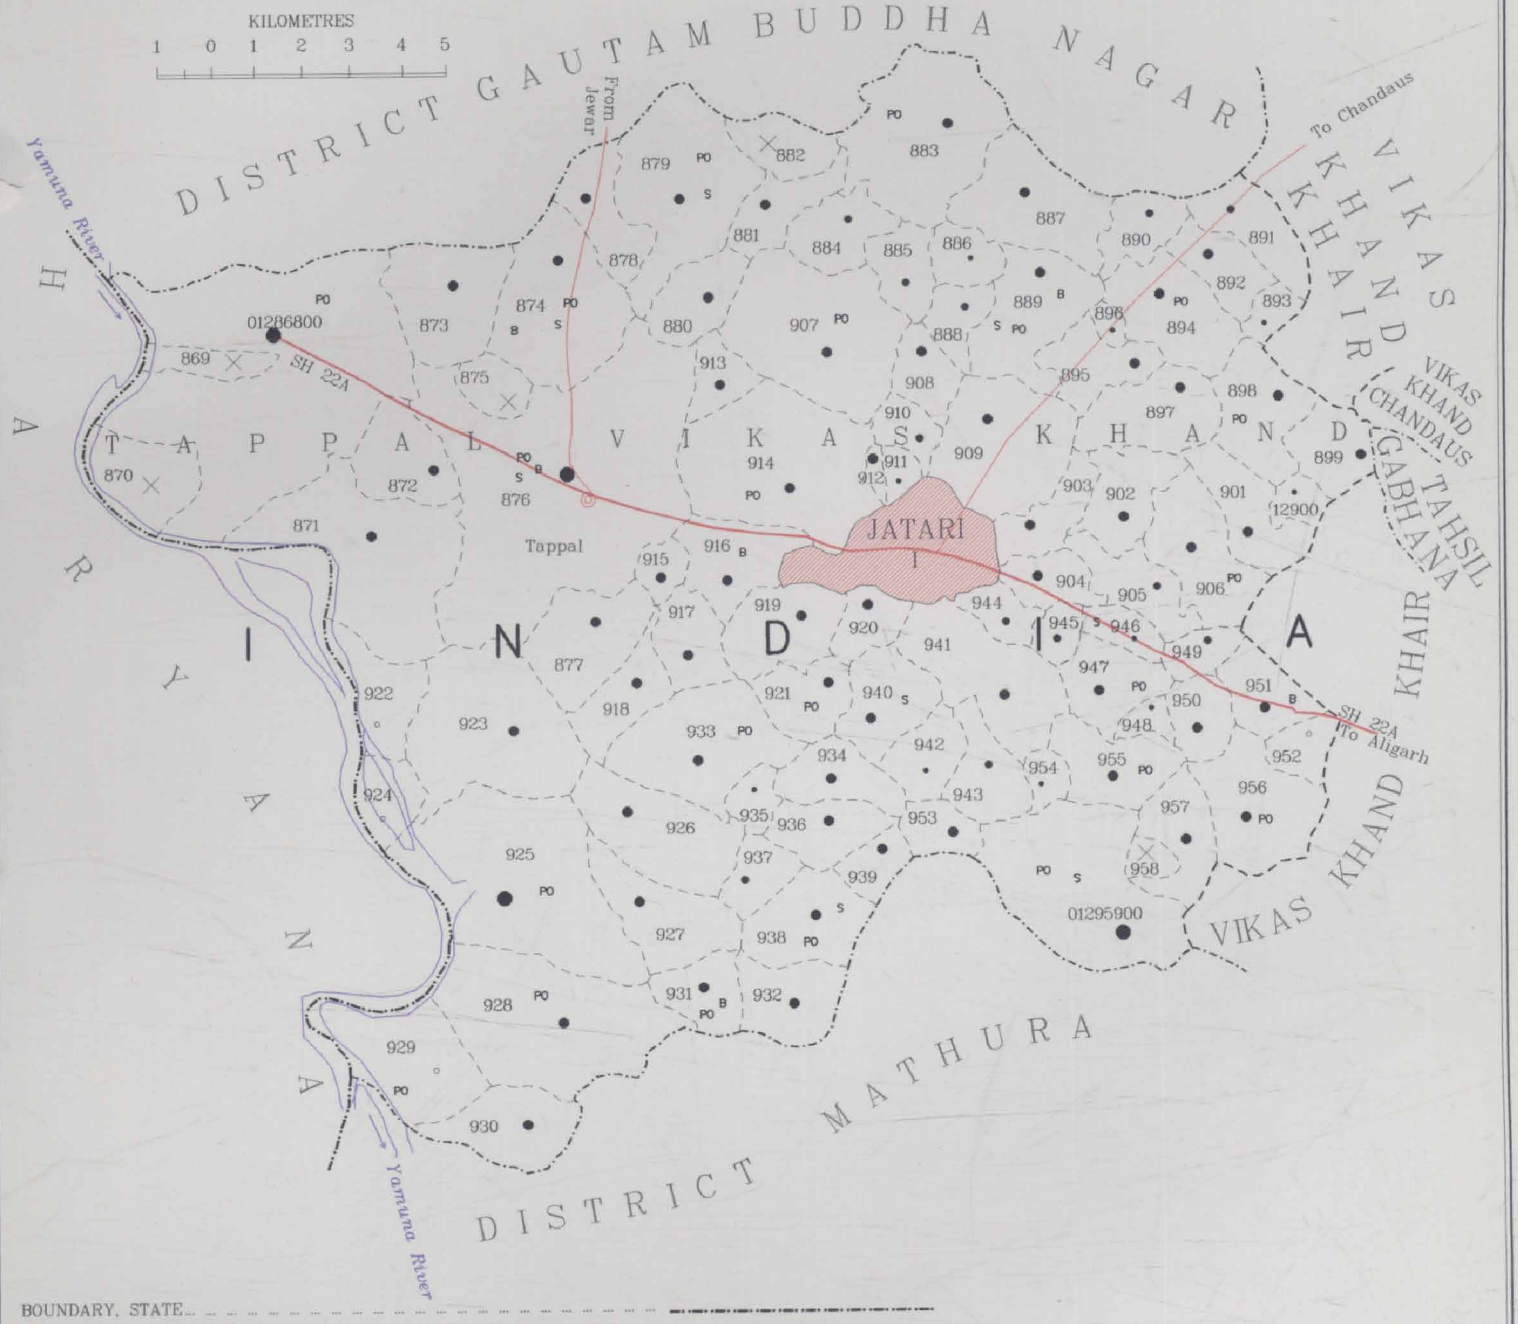

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.

APPENDIX VIII

NUMBER OF VILLAGES UNDER EACH GRAM PANCHYAT (C.D. BLOCK WISE)

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total SC population	Total ST population	Income and expenditure of Gram panchayat (in Rs.'000)	
			Number of villages with location code numbers	Location code					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

N.A.

APPENDIX IX

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Name of District	Name of C.D. Block	Location Code Number	Name of Village	No. of Girls School
1	2	3	4	5

N.A.

Section II - Town Directory

Section II - Town Directory

(a) Note explaining the abbreviations used in the Town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A

(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important feature of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities,' Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991

also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, then portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES I TO VIII

ANNEXURE-I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE-II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Aligarh
q1	Persons	99	104
	Males	98	98
	Females	104	114
q2	Persons	117	111
	Males	117	100
	Females	118	123
q5	Persons	134	126
	Males	135	115
	Females	132	143

(*Undivided Uttar Pradesh at 1991 Census)

The child mortality by age one year was higher and by ages, 2 and 5 years was lower in the district as against the State. The child mortality indicators in the district for females were in the improved condition as compared to the State by ages 1, 2 and 5 years.

ANNEXURE–III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE - 1991 CENSUS

Serial Number	Fertility Measures	Uttar Pradesh	Aligarh
1	2	3	4
1	CBR	37.2	35.6
2	TFR	5.6	5.7
3	TMFR	6.3	6.7
4	GFR	172.0	173
5	GMFR	200.0	211
6	Mean age at marriage (1981-91)	17.3	17.6
7	Number of children ever born per ever married woman aged 15-49 years	4.6	4.6
8	Child woman ratio 0-4	631	691
	5-9	752	783

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and moratality rate of any area. The table reveals that the Crude Birth Rath (CBR), which is the ratio of the number of live births in a year to mid year population, 35.6 per thousand in the district. It is below to the state of Uttar Pradesh i.e of 37.2 per thousand. In respect of Total Fertility Rate(TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all a slightly higher proportion from the state figures. The conclusion that may be drawn higher fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3 years for the state where as 17.6 years has been observed for the district. It may be observed that higher age at marriage leads to higher of fertility in the state and district as well Similar trend is observed in the number of children born per ever married women in the age group 15-49. The figures are same (4.6) in both the state and the district as well. Number of children in the age group 0-4 and 5-9 years per thousand women in the age group 15-49 has been calculated to 691 and 783 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that fertility levels as such are higher than the state average.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other district of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 91.8 each in 1991and 2001 both. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 7.5 percent and 7.9 percent respectively. At district level in-migration from other countries was 0.7 percent in 1991 and 0.3 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 89.2 percent and 88.2 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 10.5 percent and 11.6 percent respectively. The movement of population from other countries in the district was 0.3 percent in 1991 and 0.2 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 84.9 percent in 1991 and 81.5 percent in 2001, while Muslim were 14.6 percent in 1991 and 17.8 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 58.2 percent male and 48.7 percent female to 60.2 percent male and 50.7 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 38.8 percent and female was 46.3 percent in 1991 and in 2001 it was 37.4 percent male and 43.9 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.3 percent male and 5.3 percent female while it was 2.9 percent male and 4.9 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Annexure - VII
Age, Sex and Education in the state/district 1991 census.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 52.0 percent male and 78.7 percent female in 1991 which declined to 41.6 percent male and 65.2 percent female in 2001. Primary level education was 10.5 percent male and 6.2 percent female in 1991, which was 15.1 percent male and 11.0 percent female in 2001. Middle level education was 12.5 percent male and 4.9 percent female in 1991 and 15.5 percent male and 7.5 percent female in 2001. Matriculation and above level of education was achieved by 15.6 percent male and 5.5 percent female in 1991 which was 23.2 percent male and 10.0 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note: For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0.02 percent. The remaining tongues have been merged in the column of "Total of other mother tongue".

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 91.8 percent person in 1991 and 90.7 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent in 2001 at the state level whereas 7.6 percent and 9.0 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
