MOTIF

SHRI KRISHNA JANAM STHALI

A sacred place of Hindu religion known as the birth place of ***Loknayak Karmayogi Bhagwan*** Shri Krishna. The town of Mathura is acclaimed all over the world for its tradition, art and culture, civilization, music and spiritual wisdom. According to Hindu tradition, as illustrated in ***"Maha Purana Yug Purush"***, Lord Krishna emerged in Mathura in order to vanish ***'Asuras'***. ***'Leela'*** of Shri Krishna and Radha reflects true affection of ***'Gopis'*** of ***Brij Bhumi*** which seems to be the coinciding point of God and soul as a symbol of pious relationship. Since long, it had been a center of faith and belief of millions of people all over the world. On the auspicious day of '**Janamashtmi**' Mathura, is visited in the month of ***'Bhadra'*** (July-August) by unaccounted member of ***'shradhalus'*** (Devotees) Janmastmi the date of birth of Lord Krishna is celebrated with gay and enthusiasm irrespective of caste and creed. All around the ***'sthali'*** is an aura of peace and purity. Here unholy are said to become holy. The tradition is that in order to get rid of Mathura dwellers, He travelled to Dwarikapuri overnight.

Annexure VII	Age, Sex and Education in the district, 1991 Census	565
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	567

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage

enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and their team of dedicated workers deserves all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The District Census Handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 Census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

Mathura is the north-western district of Agra division and a part of Braj. It is one of the seven holy cities of India and is the most ancient and inhabited place of Utter Pradesh. About the twelth century A.D. the place had been simultaneously an important centre of the three chief Indian religious systems, the Brahmanical, the Jain and Budhist Subsequently, it became a stronghold of Krishnabhakti cult. It is believed that lord Krishna was born in the city of Mathura and passed his childhood in its neighbourhood. It is also stated in the Ramayana that Shatrughana (Ram's brother) made this place his capital. Most of the important places in the district are associated with one or another story connected with the Krishna legend. There is ample evidence to believe that in early times the district was more pastoral and agricultural as indicated by many names of its place such as Braj (herd of cattle) and Mathura (town of Churn). The Harvansha Puran mention it as " A tine country of many pasture – lands and well-natured people, full of ropes for tethering cattle, resonant with the voice of the sputtering

churn and flowing with buttermilk, where the soil is ever moist with milky froth, and the stick with its circling cord sputters merrily in the pail as the girls spin it round in homesteads gladdened by the sputtering churn."

Many places like Aring, Boroda, Jait, Lohban, Maholi, Parkham, Sonkh and Vrindavan are traitionally associated with the asuras, Nagas and Yakshas, who are regarded as having inhabited this region even before the advent of the Vedic Aryans. The earliest tines Aryan who settled in these parts seem to have been Yadvas who find mention in Rigveda and whose favourite river was the Yamuna.

Mathura is intimately associated with the religious traditions of the Jains and finds mention in a number of their ancient books, some times as Uttara Mathura. It is said that the great Jain stupa, better known as Vodva stupa which once stood at the Kankali Tila site in Mathura, was built by Kubera, the Yakshi, at the instance of two Jain ascetics in the time of the seventh tirthankara, Suparshva, to whom it was dedicated. In the eighth -century B. C. the twenty-third tirthankara Parshva Natha, is said to have paid a visit to the city where a monument was raised to commemorate the event some time after which the stupa (said to have been originally of gold) was encased in brick. About the middle of the sixth century B.C. the last tirthankara, Mahavira, is said to have visited Mathura where he had many devotees including the members of the royal family Mathura also played a significant role in the development of Budhism. It is said that Avantipura, the king of Shurasenas at Mathura was among the chief devotees of the Buddha and that it was through his help that Buddhism gained ground in this region. According to the Buddhist tradition Mathura was a favourite resort of the Yakshas who harassed the inhabitants and whom the Buddha subdued. Mathura continued to hold a high position in the Indian history throughout. The celebrated poet Kalidas praised the city of Mathura, the river Yamuna, the Goverdhan hill and Vrindaban grove. It is found in the record of Fahien who stayed there. This place binds a mention in the records of Hiuen Tsang (629-645 A.D.), who stayed there. It is also connected with some important events in Aurangzeb's life. His eldest son was born there in 1639. In 1666 Shivaji after escaping from Aurangzeb in Agra had come to Mathura. After the Mughal rules it came under the Jats who gave refuge to many from Delhi during Nadirshah's invasion and also during the invasion of Ahmad Shah Abdali. Mathura also played an important role in the independence movement.

The history of the district as administration unit can be traced down to Akbar's reign where the district fell within three Sarkars in the Subah of Agra. At the annexation in 1803 the Yamuna tract comprised the parganas of Mathura, Farah, Sonkh, Sonsa, Govardhan, Sahar hergarh and Kosi and the transyamuna tract comprised the parganas of Sadabad, Sahpau, Raya, Mat, Mahaban, Somnai and NohJhil. The Sirkar of Sahar appears to have disappeared in the region of Aurangzeb when the sirkar of Mathura was first heard of Govardhan was created late in the eighteeth century by Najaf Khan as fief for Raza Quli Beg out of the pargana of Sahar and some villages of pargana Sonkh. The pargana of Sadabad was formed in Shahjahan's time, taking 200 villages of the old mahal of Jalesar and a few from the mahals of Khandauli and Mahaban. The Mahal of Mahaban was split up into the parganas of Mahaban, Mat, Raya and Sonai during the period of Jat rule. The parganas of Sahpan and Mursan were also formed out of the mahal of Jalesar. The whole of the district fell to the British in December 1803 but parts appear to have been transferred almost at once to favourite grantees. The pargana of Mathura was taken from the forah tahsil of Agra

and with the parganas of Sonkh, Sonsa, Govardhan and part of Sahar was formed into a new parganas and tahsil called Aring. In 1840 taluks Sonkh, Madim, Dunaitia and Lashkarpur in the northeast of Mahaban, along with some villages, were transferred to Mathura from Aligarh. In 1867 the headquarters of tahsil Mathura was moved from Aring to Mathura and 7 years later pargana Jalesar was transferred to Agra. In 1950 under the Provinces and States (Absorption of Enclave) Order, 1450 seven villages were transferred from Bharatpur to Mathura in exchange for the village of Phulwara.

(iii) Administrative setup

The seat of district administration is at Mathura. The district comprises of three tahsils i.e. Chhata, Mathura and Mat.Tahsil Chhata has three C.D. blocks (Nandgaon, Chhata and Chaumuhan), Tahsil Mathura has four CD blocks (Goverdhan, Mathura, Farah and Mathura). Tahsil Mat has also three C.D. blocks Nohjhil, Mat and Raya.

There are a total of 880 revenue villages, of which 736 villages are inhabited. There are 478 Gram sabhas and 19 towns in the district.

Jurisdictional Changes (1991-2000)

During 1991-2000 as many as 107 villages and 3 towns were transferred from Sadabad tahsil to Mathura tahsil.

Jurisdictional Changes 1991-2000

Sl. No	Name of District/ Tahsil	Jurisdictional Changes	
		Added	Substracted
1	2	4	5
	Mathura		
1	Tahsil Mathura	(i) 107 villages and 3 towns transferred from Sadabad tahsil of Hathras district to Mathura tahsil of district Mathura	-
2	Hathras Tahsil Sahabad	-	(i) 107 villages and 3 towns transferred to Mathura tahsil (ii) Sadabad tahsil with 134 villages and 2 towns of Sadabad tahsil of Mathura district transferred to newly created Hathras district

District administrative setup:

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now re-designated as Up-Zila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongoss circles respectively. For each revenue village, Lekhpal is in- charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various District department officer at district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD etc. each have district level officer from the development point of view. The district has Block Development Officer (B.D.O.) at block level. He is assisted by Assistant Development Officer and Village Development Officers.

Under the police set-up Senior Superintendent of Police are in-charge. Additional Supdt. Of Police (ASP) and commandant are in change of their respective area. Deputy Superintendent of Police (DSP) look after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their Police stations depending upon the population and area.

The Judicial administration of the District is headed by District and Session Judge. In add ition to it there are several Additional District Judge, Civil Judicial Magistrate and Munsif Magistrate.

The nucleus of the district body for local self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat,

Chairman in District Board and Gram Pradhan in Panchayat and Pramukh in Kshetra Samiti etc. come under local self-government.

(iv) Physical features

(i) Location and size:

The district is situated the north –western part of the Agra Division and lies between latitude 27°14′ and 27°58′ N and longitude 77°17′ and 78°12′E. In shape it is like an imperfect crescent, the horns looking up towards the northeast. Its lengthiest section from the junction of Gurgoan (Haryana) and Bharatpur (Rajasthan) districts to that of those of Etah and Agra, is about 96 km. and its greatest breadth about 66 km from the to east.

It is bounded on the north-west by the districts of Aligarh and Gurgaon on the east by that of Aligarh and Hathras on the south by the district of Agra and on the west by that of Bharatpur. It has an area of 3340 sq. km.

Physiography:

The district lies in the basin of the Yamuna. It is more or less a plain sloping of the rate of 0.25 metre per kilometre from north to south in the direction of the river's course. Low hills-now Where higher than 261 metre. above sea level-in a few scattered spots rise on the Bharatpur border. The heighest elevation above sea level is about 178 mt. near Kotban on the Gurgaon border and the lowest 171.6 mt. near Jalesar Road railway station. Yamuna enters the district at Chauudras (of tahsil Chatta) and follows a winding course of about 161 km. and leaves the district at village Mandaur. The Pathwaha and Jhirna are the two streams which drains the northern Mat and with the river Yamuna.

The river Yamuna divides the district into two phycisal units the eastern or trans Yamuna and the western or cis Yamuna tract. The eastern Yamuna tract comprises the tahsils of Mat. This tract is at lower level than the cis Yamuna tract. The level gently drops from north to south, the height above sea level which is 185.9 m. than the sis Yamuna tract, including the tahsil of Chhata and Mathura lies at a higher level than the eastern tract. Most of larger villages and the important towns of Mathura, Vrindaban and Kosi lie on the right of the Yamuna, except for which there is no other river of stream in the tract.

In the two western tahsils, Mathura and Chhata, lie the only hills of the district which are outlying spurs of the Aravalli system and belong to several district ranges. The most northerly is the Charanoahar in Chhota Baithan. To the south-west is the hill of Nandgaon which is 800 km. long. On the southern most hill stands the village of Rankauli, the village of Dibhala in the centre and at the northernmost is the sacred village of Barsana Some 16 km. further south-east is the Giriraj or Annakut hill, commonly known as Govardhan. All these hills are of ancient quartzite. The district is plentifully supplied with trees of the deciduous types and tropical scrub and thorn but is lacking in any extensive natural vegetation cover. According to the latest available figures (of 1996-97) the area under protected forest is 1281 hectare. The main silvatic products are timber, wood, bark and grasses. The forests are worked according to the schemes and working plans of the forest department.

Physiographically the district can be divided into two micro regions as given below.

Nandgaon- Goverdhan Plain:

The region is situated in the western part of the district comprising major parts of Chhata and Mathura tahsils. The eastern limit of the region runs parallel to the Yamuna river. The general slope of this tract is from north to south. It is remarkable to note that there is not a single stream worth to be mentioned here. However, there are a few perennial tanks. Although it is homogencous plain but a few hillocks with a

height of 200 metres are noted in the western side near Barsana. Beside a few segment of broken surface are also noticed in the eastern part. Comparatively the western side to the region is higher than east. Its distributaries irrigate this land which is comparatively deficient in rainfall.

Yamuna Khaddar:

The name of the region itself indicates its characteristics. It loops both side of the river Yamuna. The area covers parts of Chhata, Mathura, Mat and sadabad tahsils. The Yamuna is the master stream which flows from the centre of this area. The slope direction and other physical features are controlled by this river. Nohjhil khaddar is a large natural lake located in the north. Since the physical characteristics are directly linked with the Yamuna river, cultural features are not exception of this fact

(3) Drainage:

The district is situated in the basin of Yamuna, which traverses through the central part of the district from north to south and divide the district into two parts. The district nevertheless be described as a plain, sloping in the direction of the river's course. The river's and streams of the district consist of the Yamuna and its two affluents, the Pathwaha and the Jhirna or Karwan both of which become fairly torrential in the monsoon season. Yamuna divides tahsil Mat from the tahsil of Chhata. Its banks are first sandy and low but as it advances in its course they become steeper and ravines and sand hills begin to intermingle with the sandy slope. The cultivation on the banks bordering the ravines is poor, the ravines themselves being devoid of vegetation and pitted with modular limestone. But the land adjacent to the river is quite often very fertile, the soil varying from sand to rich loam, the richest being found in the Katri.

(4) Climate:

The climate of the district is characterized by an intensely hot summer, a cold winter and general dryness throughout the year except during the south –west monsoon. Intensity of heat is highest in May–June. The minimum temperature generally ranges from 7^{o}C(January) to 26^{o}C (May) and the maximum temperature from around 23^{o}C(January) to 42^{o}C(May). At times due to weather disturbances spell of cold weather occurs with temperature going down below the freezing point of water. Rainfall averages around 620 mm, which in general increases from the south-west towards the south-east. Dust and thunder storms also occur in the summer season while occasional fog occurs in the winter.

(5) Natural and Economic Resources :

Forestry:

It is evident from the names given to different places in the ancient history that in older days this area was full of forests grass land and pastures. Its forests were hunting ground during Mughal period for the royal family members. But now the condition is very pitiable. It is lacking natural vegetation cover. The trees are planted on the road, rail and canal sides and also some patches of wasteland. It is manage by the state forest department. The deciduous type of tree and tropical scrub and thorns are found in some patches. Babul, Shissham, Bargad and Neem are the main trees. Forest department has raised the plantation of Babul, Kanji, Siris, Khoir and Pipal. As per statistical magazine during 1997. 1436 hectare of land was covered by forest.

The wild animals are disappearing owing to the intensive cultivation, reclamation of wasteland and cutting of jungles. The leopard, Hyaena, wolf and blue bull or Nilgai are rearly seen in hilly tracts to west near the Bharatpur border. Wild boar are frequent in the ravines and Khadar of Yamuna which also swarms with crocodile and tortoise. The jungle cats, characal, jackal, fox, black buck rarihe deer, hog deer hare monkey and langur are also sighted here

and there. The common birds are peacocks, ducks, partridges, and saras. Peacocks are a common sight all over the district.

Reptiles are common in the district specially in the rural areas. The chief being the gharial, crocodile, monitor, lizard, garden lizard, python. cobra, dhaman or rat snake, water snake, black barred snake, pond turtle, patar and Yamuna kachhua. The monitor lizard is found in every parts of the district. About 25 different species of fishes are available in the river lakes, streams, ponds etc. in the district.

Minerals and Mining:

The scope of mining in the district is scanty. Only Kankar and Clay are available. Sand stone is available in a limited quantity at Barsana and Nandgaon but owing to the religious sanctity attaching to the hill, it is not quarried. Similar sandstone is also found at Govardhan. Kankar is abundant in the district particularly in the bangar and that found in the east of Yamuna is larger, hard and has an ashy-blue colour while that in the west is small, soft and light in colour Black Kankar, which is used in masonry work. Clay suitable for making bricks, toys and utensils is found almost everywhere in the district.

Soil:

The classification of the soils in the district still holds good. In the bangar or uplands the soils vary from dumat (rich loam) to bhur which is constituted of deposits of blown sand and fine dust, Dumat is not plentiful in the district and found only in tahsil Mat and the northern tract of Chhata. Piliya (light yellow loam), which has a large proportion of sand is not plentiful in the district and is more workable after irrigation than daumat. Dahar or pure clay is found only in the Khadar area or lowlands. It is hard and unyielding and responds to the plough only if it is moist. In the behar (the ravines of the Yamuna) the soil becomes impoverished by drainage resulting in very poor harvests. The soils found in river beds are called by a variety of names such as tardabua, jhawar, kunda, jhada and khapra, The general soils around the jhils and ponds is Chiknot which is also called bhabra in some villages.

In the district arable soil is considered important according to the facilities of irrigation available and no accessibility. Generally the prevailing soil of the district is an easily workable and productive piliya, rising in places to the dignity of a rich brown loam.

According to the settlement report of 1924, there were the following types of soils in the district–Gara barha-I, barha-II, barha III, puth, khadar I and khadar-II.

Land and Land use Pattern:

The economy of the area largely depends on agriculture. The first recorded statistics of irrigation are available from the revision of land records carried out in 1848-50. The facilities of irrigation made available by the construction of Agra canal and the extension of the mat branch made marked improvement as regards the area irrigated and cultivated. In the closing years many reforms and a number of reorganization schemes in the farming system were introduced and a large number of irrigation works, mainly canals were completed in the district Out of the total area 328444 hectare of the district as per statistical magazine during year 1997-98, cultivable waste land was 5726 hectare, present fallows 6199 hectare, other fallows 8206 hectare, usar and uncultivable land 5406 hectare, land use other than agriculture 33859 hectare and net area sown 265423 hectare. The number of land holdings of the size of less than 1.00 hectare were 48725 the number of holdings were 45260 in the land holdings size of 1.00 to 2.00 hectare, the land holdings of the size of 2.00 to 4.00 hectare covered 17741 and land holdings size of 4.00 to 1.00

hectare were 16957. The land holdings are, therefore, generally small in size.

Agriculture and Crop Pattern:

As elsewhere in the Doab, the usual harvests of the district are the Kharif, the Rabi and Zaid. The economy of the area largely depends on agriculture and animal husbandry. Wheat and barley arc the principal crops of the Rabi while bajra, jwar and rice of Kharif Total eropped area is 3,81,173 hectare and out of this 1,15,699 hectare is sown more than once. There are three main cropping seasons. Kharif, Rabi and Zaid having 1,29,978, 2,41,823 and 9,336 hectares respectively. The area under cereals is 2,45,438 hectares, under pulses 12,541 hectares, under oil seeds 57,659 hectares and under green fodder mostly grown during Rabi seasons 6,418 hectares. The total production of cercals, pulses, oil seeds, sugar cane and potatoes is 6,93,342, 6,747, 36,382 and 8,45,795 metric ton respectively.

For augmentation of agriculture products besides providing financial assistance fairs are organized which provide knowledge of modern techniques and equipment. High yielding fertilizers and insecticides are provided by Govt. agencies. The main autumn crops in the past havc now virtually beeń replaced by paddy, millets, like jwar, maize and bajra and pulses like urad and moong. Similar has been the fate of once popular Rabi crops like, linseed, mustard and duan which have yielded wheat barely, arhar and gram.

Irrigation:

The first recorded statistics of irrigation are available from the revision of land records carried out in 1848-50 when of the total cultivated area of 6,47481 acres, 249932 acres were irrigated. The facilities of irrigation made available by the construction of the Agra canal and the extension of the Mat branch inadefa la marked improvement in the tahsils as regards the areas irrigated and cultivated. The Mat branch canal was originally constructed between 1851 and 1855 and formed a part of the old Ganga canal. It irrigates through its tributaries Baldeo, Daghaita, Jewar, Badna, Jarara, Mahaban, Sadabad, Air Khera, Barahana and Jagsana. The Hathras branch canal also irrigate some portion of Mat tahsil of the district.

The network of irrigation though all sources cover an area of 3,02,928 hectares. Considering the different irrigation systems we find that canal cover an area of 1,09,357 hectares, tube wells 1,38,028 hectares, wells 223 hectares, other sources 262 hectares in the rural area of the district. The canal system is running to 1,367 kms. It has raised the sub soil and water and its regular supply makes the tube wells run economically therefore, tubewells irrigation stand first and the canal the next.

Animal Husbandry:

That the area around Mathura, Gokul and Vrindaban was in ancient times more pastoral they agriculturc is indicated by the Krishna legends associated with it and the names of some places that are still in current use. Thus the local name for this area, Brajmandala, means herd circle or zone, Mathura means the town of Churns, Goverdhan implies a place where cattle flourish, Gokul means cow-pen, Mat Milkpail, Bathen cattle pasturc, Dahigaon curd village, Gotha means cow byre, Gokulpur, town of cow byre, Bachhgaon means village of calves, and Makanpur town or butter. But the decay of pastures and forests in the district has led to decline in cattle rearing and milk production.'

The livestock of the district generally lives one green fodder crops and the by products of agriculture. Cattle development has been receiving government's attention since the start of thc Five year Plans and thc animal husbandry department has been improving the breed of stock in the district. Artificial insemination facilities far

improving the breeds of cows, buffaloes and calves were started of various places in the district. The animal husbandry department of the state government has a live-stock officer posted in the district and he is incharge of the animal husbandry and poultry development schemes. Recognising the importance of developing the live-stock wealth in the interest of rural economy and to meet the growing demand for qualified veterinary and animal husbandry workers. The state government established in 1947 of Mathura, the U.P. college of Veterinary Science and Animal Husbandry. The animal husbandry department also arranges supply of cow, bulls, buffaloes, bulls bucks, rams and boars for breeding purpose at subsidized rates.

At the live-stock Census of 1993 the number of cows and buffaloes were 109039 and 4,45,220 respectively. Sheep, goats, horses, pigs and hens were 36,048, 88,502, 1,310, 28,232 and 32,904 respectively. As per statistical magazine of 1997-98, there were 20 veterinary hospitals, 28 veterinary development centres, 3 artificial insemination centres, 19 artificial sub insemination centres, 5 pif development centres and 3 sheep development centres.

Fishery:

Nearly 22 different kinds of fish are found in the district in Karwan, the Yamuna, Nohjhil Lake, big ponds and major canals. The chief species of fish including Rohu, Mahasher, lake fish, Rishala, Katla or Bhakur, Mrigala and Mullet inhabit the Yamuna and Nohjhil lake, perennial streams, lakes, ponds, tanks, artificial reservoirs and the flooded fields of the district. Catches are usually made by net, rod and a kind of bottomless basket and small dams in the rivers, rivulets, lakes, ponds and canals are often farmed out by the owners and fishermen. Piscicultural activities for development have been undertaken by the fisheries department. Fingerlings are supplied to gaon panchayats and private pisciculurists under the small water schemes Sinn 1962 –63 when the small water scheme was launched in the district nearly 5,35,000 fry were collected from the Yamuna and stored in the two nurseries in the district and 72,500 fingerlings were supplied to a number of gaon sabhas and private pisciculturists of the district. According to statistical magazine of the year 1997-98 the production was 46 quintal and 60 lac fingerlings were distributed.

Industry:

Though upto the close of the 19th century there were no important industrial establishments in the district excepting household industry of weaving cloth, making of paper and stone carving, the making of small silver toys at Gokul has been a famous industry from ancient times. But there after there was general development in the industrial fields also. As per the data available during 1997-98 there were 93 registered industries working under the act of 1948 and working employees with labor force being 1493. Khadi industry is also flourishing in the district. The number of industrial unit of Khadi being two in number by registered society. There are 1342 cottage industries, besides these there are areas for stone carving industry, rolling mills, Kashi tape and crops industry in Mathura the Bharat electric industries. There are Ayurvedic and Allopathic manufacture also.

Trade and Commerce:

Because of its favourable location and its importance as a place of pilgrimage, Mathura has always been a trading city and it was a wealthy trade centre and a great mart in ancient times. There was a trade route coming from Tamralipti (a port in Bengal) which passed through Mathura and went on to Balkh (in central Asia), Europe and other countries. The situation of Mathura on the Yamuna enabled boats of considerable tonnage carryings large cargoes of stone, cotton, ghee and indigo to pass it. During British times many roads were

to pass it. During British times many roads were built and old ones rebuilt and repaired linking Mathura with important places inside and outside the district and facilitating its trade and commerce. In 1904 a new railway line connecting Mathura with Agra and Delhi, was laid which absorbed a good deal of the road –borne goods traffic between Punjab and places beyond Mathura.

Industrial development started in the district only after the coming of independence in 1947. The starting of variety of a industries such as the manufacture of brass taps and cocks, preservation of fruits and vegetables and production of railway equipment added a number of industrial articles and raw materials to the purely agricultural trade pattern of the district. The commodities exported from the district are grains and pulses, jaggery, oil-seeds, edible oils, preserved fruits, cotton, animals, cement, iron, steel, coal, niwar etc. to all parts of the country particularly to Delhi, Agra and Aligarh and to states of Gujarat and Rajashthan. The Kashi Taps and Cocks Manufacturing company, Mathura is a large-scale unit producing 1500 dozen bibs and stop cocks monthly. It has entered the foreign market and is competing with middle east countries through its agencies of Calcutta.

The district imports rice, jwar, bajra, ground nut, coal, building stone and building materials, Khandsari, oil seeds, cement, wood, iron and certain chemicals for its industries from Delhi, Agra, Kanpur and Jharia for which Mathura and Kosi are the main importing stations. Many fairs are held in different parts of the district most of which go in for some days and are attended by a large number of people and a good deal of buying and selling is carried on. Perhaps the biggest is the annual fair which is held at Vishram Ghat in Mathura city and attracts people from all parts of the country and another important one is Guru Purnima which is held at Goverdhan. There are trade associations in existence in the district. They safeguard the commercial interests of their trades by providing technical and legal advice in matters of sales trade, income trade, octroi, imports and exports.

Transport:

In olden times the usual means of transport and travel were palanquins, elephants, horse, camels and vehicles drawn by bullocks, buffaloes, horses and camels. Boats plied on the Yamuna which is still a navigable waterway. The bulk of the heavy goods was moved by means of pack animals but valuable goods were usually carried in carts and carriages. People in the villages depended largely on the bullock cart and on vehicles drawn by horses and camels. Camel carts were a common sight in older days. With the construction and improvement of metalled roads speedy mechanized transport, which has the added advantage of being able to play in almost in any kind of weather also made its appearance and today motorcycles other motor –vehicles, bicycles and cycle-rickshaws are a common sight in the city and its out-skirts. As an economical and convenient means of transport, the bicycle is popular both in rural and urban areas of the district. Scooters, motor-cycles, cycle, rickshaw are recent addition to the modes of public conveyance and are so popular that to a great extent they have driven Ekkas and Tongas off the roads. The bullock cart is a multipurpose vehicle in the villages of the district and is used for agriculture purposes, the transport of people and goods from one place to another etc. The road transport of buses and railways is also available. The railway lines travesing. the district have been the Central Railway North–Eastern Railway and Northern Railway and Western Railway.

The district is well connected by rail and road transport. There are 21 railway stations (including halt) in the district and of which 8 station are in rural

areas. The broad gauge line in the district are 112 km long and meters gange line are 62.5 km.

Electricity and Power:

Electricity plays an important role in the economic development. Electric power is supplied to Mathura city and other parts of the district from the Hydel distribution centre. The Mathura supplied electricity through its substations to the municipal and cantonment areas of the city. It purchases the bulk of its supplies from the hydroelectric department of the U.P. State Electricity Board. The total consumption of the district is 3,89,822 thousands K.W.H. as per statistical magazine of 1997-98. However electricity for agricultural purpose shows much higher consumption. The consumption for agricultural purposes amounts to the 1,81,129 thousand K.V.H. followed by rail which consumed 42,417 thousands K.V.H. and industrial sector 48818 thousands KV.H. Domestic sector consumed 83,117 thousand KVH light consumed 2,933 thousand KWH and others 6,672 thousand KWH. 100 percent of the inhabited villages have power supply while it was 58.18 percent in 1981. All the towns of the district are electrified 654 scheduled casti hamlets have also been electrified by the end of the year 98-99.

Gram Panchayat, its composition, Jurisdiction and role in village development:

A Gram Panchyat acts as the executive of the Gram Sabha.Gram Pradhan is elected from among the village for a period of five year.

Composition:

The members of the villages or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elected a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 507 Gram Sabha's in the district.

It is necessary that the village Panchayat should have member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The village Panchayaat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Its Term:

The new panchayat Raj act of 1993 has fixed a uniform five-year Panchayat.It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualification:

In order to be elected to a village panchayat, a candidate should possess the following qualifications:

(1) He should be resident of the village concerned and his name should be in the voter's list of the village.

(2) He should be twenty-five year old.

(3) He should be mentally and physically sound.

(4) He should not be a proclaimed offender.

Functions

A Gram panchayat is entrusted with various social, economic and judicial function.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the

village.

4. It gets a Primary Health Centre opened in the village. The Panchayat has also provide land and building for such a center.
5. It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
6. It arranges for sufficient irrigational facilities, improved seeds, insectisides chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine unto Rs.100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as

rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining

second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled

Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	37	Majhwar
2	Badhik	38	Mazhabi
3	Badi	39	Musahar
4	Baheliya	40	Nat
5	Baiga	41	Pankha
6	Baiswar	42	Parahiya
7	Bajaniya	43	Pasi, Tarmali
8	Bajgi	44	Patari
9	Balahar	45	Rawat
10	Balai	46	Saharya
11	Balmiki	47	Gual
12	Bangali	48	Habura
13	Banmanus	49	Hari
14	Bansphor	50	Hela
15	Barwar	51	Kalabaz
16	Basor	52	Kanjar
17	Bawariya	53	Kapariya
18	Beldar	54	Karwal
19	Beriya	55	Khairaha
20	Bhantu	56	Kharwar
21	Bhuiya		(excluding Banbasi)
22	Bhuyiar	57	Khatik
23	Boria	58	Khorot
24	Chamar, Dhusia,	59	Kol
	Jhusia, Jatawa	60	Kori
25	Chero	61	Korwa
26	Dabgar	62	Lalbegi
27	Dhangar	63	Sanaurhiya
28	Dhanuk	64	Sansiya
29	Dharkar	65	Shilpkar
30	Dhobi	66	Turaiha
31	Dom	**Scheduled Tribes**	
32	Domar	1	Bhotia
33	Dusadh	2	Buksa
34	Gharami	3	Jaunsari
35	Ghasiya	4	Raji
36	Gond	5	Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution :

The total population of the district is 2,074,516 in which 1,487,493 live in rural and rest 587,023 in urban parts. There are 3 tahsils in district namely Chhata, Mat and Mathura. The most populous tahsil is Mathura followed by Mat, Chhata is least populated tahsil. The urban population in the district is about 28.3 percent. The urban population is maximum at about 41.5 percent in Mathura tahsil. There are 880 revenue villages in which 144 are uninhabited. The total rural population of 1,487,493 is spread over 10 CD blocks. The most populous CD Block is Mathura with a population of 211704, but the maximum number of inhabited villages (99) are in Raya CD Block. About half of populated villages have a population in the size of 1000-1999 and 2000-4999 and such villages form 58.4 percent of total populated villages. Although the population density in the rural district is 458, highest proportion (45.7) of villages are with a population density range of 501+ per square kilometer. Such villages contain as much as about 55.5 percent of total rural population.

Size-class and status of towns:

In the total urban population of 587,023 as much as 302,770 live in Mathura (NPP), the next big town is Vrindavan (NPP) with a population of 56,692. The above two are class I and class II towns respectively

(1) Nagar Panchayat (13), C.T. (2) and C.B. (1). Out of which 3 towns are class III, 3 towns are class IV, 10 are class V towns and one is class VI towns. Chhata tahsil contains 5 towns, Mathura tahsil has 12 towns, while Mat tahsil has only 2 towns.

Population growth:

At the present territorial jurisdication the population of the district was 1,650,653 at 1991 Census and growing by 2.6 percent yearly during the decade 1991-2001 it is 2,074,516 at 2001 Census. The decadal growth at 25.7 percent in the district has been at near equal level than in the state at 25.8 percent.

Population Density:

The district has area of 3,340 square kilometres. The population density in the district is 621. In the rural areas of the district the density is 458.

Sex-Ratio:

The sex-ratio in the district at 840 is way behind to 898 at the state level. The sex-ratio at the district has been all along lower in the district as against to the state since 1901. As against to urban areas of the district the sex-ratio is lower in rural areas. Among tahsils, highest sex-ratio is 852 in Mat and lowest of 830 in Chhata. Among CD Block the sex-ratio is highest in Nohjhil at 865 and lowest in Chaumuha at 819. Out of 736 inhabited villages in the district there are 3.9 percent villages (with 0.7 percent of rural population) which are having a sex-ratio below 700. In the urban parts of the district the sex-ratio is 849 and highest of 884 in Bad (C.T.) and lowest of 792 in Vrindaban. The sex-ratio of population in the age-group 0-6 is 872 in the district which is lower than the state 898. As against a sex-ratio of 875 in the age-group 0-6 of rural population of the district, it is highest at 890 in Mat C.D. Block and lowest at 859 in Nohjhil C.D. Block. It may be noted that out of 736 inhabited villages in the district, over 47.3 percent of villages with 64.5 percent of rural population the sex-ratio in the age-group 0-6 is between 800-949. As against the 0-6 age-group sex-ratio of 875 in the rural area of the district is only 862 in urban. Among towns this sex-ratio is highest at 964 in Mahaban (N.P.) and lowest at 769 in Saunkh (N.P).

Work Participation Rate:

In the total population of the district of 2,074,516, 37.2 percent are workers and rest 62.8 percent are non-worker. Among worker 25.9 percent are main workers and 11.2 percent are marginal workers of total population. In absolute terms males out number females as main worker, as against marginal workers where females out number males. The extent of main workers is highest at 28.7 percent in Chhata tahsil and lowest at 24.1 percent in Mathura tahsil. In case of marginal workers the population is highest in Mat tahsil as 16.4 percent in compersion to only 11.5 percent in Chhata and 8.9 percent in Mathura tahsil. In the district among workers 39.9 percent are cultivators and 38.3 percent other workers. Over 40.9 percent female workers are engaged as cultivators.

Literacy:

In the district 61.5 percent population is literate. The literacy is 70.5 percent in urban areas and 57.7 percent in rural areas. The males literacy is as highest 76.5 percent as against 43.4 percent females literacy, and therefore the gap in male/female literacy rate is 33.1 percentage points. In rural areas among 10 CD Blocks, the highest literacy is 63.9 percent in Goverdhan and lowest at 47.4 percent in Chhata. The literacy among males in rural areas is 75.4 percent in comparison to 36.3 percent among females. The lowest female literacy of 24.8 percent is in Chhata CD Block. The gap in male/female literacy rate is highest in Nandgaon CD Block which is 42.0 percentage points. In 65.6 percent of villages covering also 71.9 percent of rural population the literacy range is 51 to 70. Among urbanites in the district, 79.1 percent males are literates as against 60.3 percent females. The highest urban literacy is in Mathura (C.B.) 88.2 percent and lowest 49.1 percent in Mahaban (N.P.). The maximum males literacy is also found in Mathura (C.B.) at 93.5 percent and lowest at 62.8 percent in Mahaban (N.P). However, the highest females literacy is in Mathura (C.B.) at 80.1 percent and lowest at 32.7 percent in Mahaban (N.P). Still, the maximum gap in male-female literacy rate at 36.3 percent is found in Nandgaon (N.P). The literacy among Scheduled Castes is 52.1 percent in rural areas and 55.6 percent in urban areas. There is no percentage of literacy in Scheduled Tribes at district level. Only 96 persons, out of 231 Scheduled Tribe population are found literate in the district.

(viii) Brief analysis of PCA data based on inset tables 1 to 36:

The district throw up vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables 1 to 36.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Chhata	N.A.	N.A.	N.A.	465,472	370,407	95,065	N.A.	N.A.	N.A.	N.A.	20.4
2	Mat	N.A.	N.A.	N.A	485,106	460,025	25,081	N.A.	N.A.	N.A.	N.A.	5.2
3	Mathura	N.A.	N.A.	N.A.	1,123,938	657,061	466,877	N.A.	N.A.	N.A.	N.A.	41.5
	District Total:	**1,650,653**	**1,224,890**	**425,763**	**2,074,516**	**1,487,493**	**587,023**	**25.7**	**21.4**	**37.9**	**25.8**	**28.3**

The decadal growth rate of the district is 25.7 percent during 1991-2001. The growth rates for rural and urban areas of the district are 21.4 and 37.9 per cent respectively . Out of the total population of the district 71.7 per cent lives in rural areas while 28.3 per cent lives in urban areas of the district. The proportion of urban population has increased during the decade from 25.8 per cent in 1991 to 28.3 per cent in 2001 in the district. The highest growth of urban population is recorded in Mathura tahsil (41.5 percent) and lowest is registered in Mat tahsil (5.2 percent). Urban population is concentrated in Mathura tahsils, while other tahsils have least percentage of urban populationl.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 736 inhabited villages, 45 (6.1 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 78 villages (10.6 percent) of the district while in the size class of 500-999 population claims 132 villages with 17.9 per cent of the total villages in the district. 206 villages (28 per cent) are in the size class of 1,000-1,999 and 224 villages (30.4 per cent) are in the size class of 2,000-4,999. 42 villages (5.7 percent) are in the size class of 5000-9999 and 9 villages (1.2 percent) are in the size class of 10,000 and above population. The biggest village in the district having population of 11,757 persons is situated in Mat C.D. block of district.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL
(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL
(c) Declassified - NIL
(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	76	10.3	152,385	10.2
11-20	4	0.5	239	0.0
21-50	7	1.0	787	0.1
51-100	9	1.2	2,818	0.2
101-200	37	5.0	18,779	1.3
201-300	68	9.3	80,975	5.4
301-500	199	27.0	406,547	27.3
501 +	336	45.7	824,963	55.5
Not known	0	0.0	0	0.0
District Total:	**736**	**100.0**	**1,487,493**	**100.0**

Population Density (Rural) of the district: 458

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e.336 accounting for 45.7 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 55.5 per cent population. The lowest range of 11-20 persons per sq. km. cover 4 villages (0.5 per cent), which have negligible percentage of population. The district have high density with more than 564.5 persons per sq. km. while the corresponding proportion in the lower range of 21 to 50 is 1.0 per cent of the total inhabited villages having 0.1 per cent population of the district. In the medium density ranges of 101-200 and 201-300 persons account for 5.0 and 9.3 per cent of inhabited villages respectively. Both these ranges claim 6.7 per cent rural population.

TABLE 5: SEX RATIO OF STATE AND DISTRICT 1901-2001

Census Year	UTTAR PRADESH			MATHURA		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	866	865	867
1911	916	922	866	816	814	823
1921	908	918	834	815	815	816
1931	903	916	813	834	838	820
1941	907	922	824	836	842	814
1951	908	922	827	846	849	833
1961	907	921	817	836	838	828
1971	876	884	826	822	818	840
1981	882	889	850	811	803	840
1991	876	879	864	816	801	862
2001	898	904	876	840	837	849

Note- Sex ratio has been defined here as the numberof females per 1000 males

As per 2001 Census sex-ratio of 840 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district has been significantly lower as compared to the state average figures from 1901 to 2001. The subsequent decades show declining trend from 1901 to 2001 and value remained below the state average. The lowest sex ratio of 811 females per 1000 males was recorded in the district during 1981 against the state average of 882 females. It is also observed that the proportion of females in rural areas is lower than that of urban areas in the district since 1971 while in case of the state, rural sex-ratio has been much higher than urban throughtout the period 1901 to 2001.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Chhata	830	824	852
2	Mat	852	851	874
3	Mathura	839	833	847
	District Total:	**840**	**837**	**849**

Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 Census. There are 840 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 837 and 849 females respectively. The rural sex-ratio in the tahsils varies between 824 in Chhata tahsil and 851 in Mat tahsil. The rural sex-ratio in Mat tahsil is higher than the district rural average (837). In urban areas the highest sex-ratio is also recorded in Mat tahsil (874) and the lowest of 847 in Mathura tahsil. The sex-ratio in Mat tahsil is higher (852) than district average (840).

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial No.	Name of C D block	Sex ratio
1	2	3
1	Nandgaon	826
2	Chhata	827
3	Chaumuhan	819
4	Nohjhil	865
5	Mat	846
6	Raya	843
7	Govardhan	836
8	Mathura	827
9	Farah	843
10	Baldeo	832
	District (Rural) Total:	**837**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 837 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 865 females is found in Nohjhil . C.D. block and is fallowed by Mat (846) while the lowest 819 is recorded in Chaumuhan C.D. block. The sex-ratios of Nohjhil,Mat, Raya and Farah C.D. blocks are higher than the district rural average of 837 and in remaining blocks, this valuc is bclow the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	29	3.9	10,495	0.7
700-749	14	1.9	9,093	0.6
750-799	99	13.5	179,834	12.1

900-949	65	8.8	63,283	4.2
950-999	16	2.2	10,097	0.7
1000-1099	11	1.5	6,095	0.4
1100+	2	0.2	71	0.0
District Total	**736**	**100.0**	**1,487,493**	**100.0**

Sex ratio (Rural) for District: 837

Table 8 presents the distribution of villages by sex-ratio ranges based on 2001 Census. The maximum number of villages i.e.278 accounting for 37.8 per cent of the total villages having largest population of 51.2 percent in the district fall in the sex-ratio range of 800-849. It is followed by the sex-ratio range of 850-899 which claims 222 villages (30.2 per cent) and 30.1 per cent population. The highest range of 1,100 and above claims 2 villages (0.2 per cent). This range shares only 71 rural population (0.0 percent) of the district while in the sex-ratio range of 900-949, there are 65 villages (8.8 percent). In the remaining sex-ratio ranges of 700-749, 750-799, 950-999, 1000-1099 and less than 700, the number of villages are 14 (1.9 per cent), 99 (13.5 per cent), 16 (2.2 per cent),11 (1.5 per cent) and 29 (3.9 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 278 having maximum population (51.2 per cent) fall in the medium sex-ratio ranges of 800-849 females showing that in majority of villages the sex-ratio is significantly medium.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group 0-6 is 405,854 persons comprising 216,779 males and 189,075 females. The total sex-ratio in this age-group works out as 872 in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 875 and 862 in this age-group respectively. The rural sex-ratio in tahsil varies between 872 and 878.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 875 for the district (rural). The sex-ratio of C.D. block varies between 859 and 890. It is highest in Mat C.D. block i.e. 890 followed by 879 in Mathura and Farah C.D. block and lowest 859 is found in Nohjhil C.D. block. The sex-ratio of Mat, Raya, Govardhan, Mathura, Farah and Baldeo

C.D. block is higher than the district rural (875) while in the remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5

District (Rural) Total	**736**	**100.0**	**311,773**	**100.0**
Sex ratio (Rural) for District		**875**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e.129 (17.5 per cent) having largest population (25.5 per cent) in the district (rural) fall in the sex-ratio range of 850-899 in age of 0-6 years. It is followed by the sex-ratio range of 800-849 which claims 119 villages (16.2 per cent) and 21.9 per cent population. Next to it, 100 villages (13.6 per cent) are in the range of 900-949 with 17.1 per cent population. 87 villages (11.8 per cent) having 10.8 per cent population fall in sex-ratio range of 950-999. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, 1000-1099 and 1100 and above villages are distributed as 68 (9.2 per cent), 33 (4.5 per cent), 73 (9.9 per cent), 88 (12.0 per cent and 39 (5.3 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that 47.3 per cent of villages i.e. 348 having population (64.5 per cent) fall in the sex-ratio ranges of 800-949 and above.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF

Serial No.	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

District(Urban) Total			**94,081**	**50,524**	**43,557**	**862**

Table 13 shows the sex-ratio of population in the age group of 0-6 years in the urban areas of the district. The sex-ratio is 862 for the district (urban). The sex- ratio of towns varies between 769 and 964. It is highest in Mahaban NP (964) and lowest in Saunkh NP (769) in this age group. The sex-ration of nine town in higher than the district average (urban). The remaining ten towns have lower sex-ratio than the district average.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial No.	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Chhata	Total	465,472	75,923	21	16.3	0.0
		Rural	370,407	62,779	1	16.9	0.0
		Urban	95,065	13,144	20	13.8	0.0
2	Mat	Total	485,106	108,411	29	22.3	0.0
		Rural	460,025	105,556	3	22.9	0.0
		Urban	25,081	2,855	26	11.4	0.1
3	Mathura	Total	1,123,938	222,266	181	19.8	0.0
		Rural	657,061	158,814	131	24.2	0.0

	District Total:	**Total**	**2,074,516**	**406,600**	**231**	**19.6**	**0.0**
		Rural	**1,487,493**	**327,149**	**135**	**22.0**	**0.0**
		Urban	**587,023**	**79,451**	**96**	**13.5**	**0.0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 2074516 total population of the district, 19.6 per cent of the total population belong to the Scheduled Castes and a population of 231 to Scheduled Tribes. The percentage of Scheduled Caste population constitutes 22.0 per cent in rural population and 13.5 percent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Mat tehsil (22.3) while the lowest is found in Chhata tehsil (16.3). The proportion of Scheduled Tribes population is negligible in the district. Total Scheduled Tribes population in the district is 231 in which 135 in rual and 96 in urban area.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

9	Farah	125.890	29,947	1	23.8	0.0
10	Baldeo	155,985	36,811	8	23.6	0.0
	District (Rural) Total:	**1,487,493**	**327,149**	**135**	**22.0**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district, 22.0 percent of rural population of the district belongs to Scheduled Castes and 00.0 per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 16.1 per cent in Chhata and 28.5 per cent in Mathura C.D. block.. The other C.D. blocks containing the highest percentage of Scheduled Castes are Mat (24.7) and Farah (23.8). The highest population (78) of Scheduled Tribes is counted in Mathura C.D. block and is followed by Govardhan (44) C.D. block. The Scheduled Tribes population in the remaining C.D. Block is recorded below-10. The percentage of Scheduled Tribes population in the district is negligible.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	69	9.4	0	0.0
Less than 5	63	8.6	1,606	0.5
5-10	71	9.6	13,829	4.2
11-20	238	32.3	101,258	31.0
21-30	144	19.6	76,632	23.4
31-40	78	10.6	65,966	20.2
41-50	28	3.8	21,576	6.6
51-75	33	4.5	34,477	10.5
76 and above	12	1.6	11,805	3.6
District Total	**736**	**100.0**	**327,149**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 69 villages accounting for 9.4 per cent of total 736 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5 per cent in 63 villages (8.6 per cent). In 71 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 238 villages constituting 32.3 per cent of the total villages. The range of 21-30 and 31-40 per cent contain 144 and 78 villages respectively. Both these ranges together account for 30.2 per cent villages of the district. In remaining percentage range of Scheduled Caste population of 41-50, 51-75 and 76 and above are distributed as 28 villages (3.8 percent), 33 villages (4.5 percent) and 12 villages (1.6 percent) respectively. The maximum of 31.0 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	729	99.0	0	0.0
Less than 5	7	1.0	135	100.0

76 and above	0	0.0	0	0.0
District Total	**736**	**100.0**	**135**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population

to total population in the villages. There are 729 (99.0 percent) villages where none of Scheduled Tribes have been recorded in the district. Only 7 (1.0 per cent) villages have proportion of Scheduled Tribes population in the district. Total population of Scheduled Tribes in the district is 135 and they belong to population ranges of less than 5.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

9	Farah	853	0
10	Baldeo	848	143
	District (Rural) Total	**849**	**1,077**

Table 19 indicates sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of

the district. The Scheduled Castes sex-ratio is 849 for district (rural). Among the C.D.blocks, the highest sex ratio of 861 is found in Nandgaon C.D. block and lowest of 825 is recorded in Goverdhan C.D. block. The Scheduled Tribes sex-ratio is 1077 in rural area of Mathura district is one point above parity reflecting area of excess of females over the males at district level. The sex-ratio (1600) in Mathura C.D. block is above the parity line. The lower value of sex-ratio 143 is recorded in Baldeo C.D. block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

Sex ratio (Urban) for the district:		**868**	**959**

Table 20 presents sex ratio among scheduled castes and scheduled tribes in the towns of district Mathura. As per 2001 Census sex ratio of 868 has been recorded in the district for scheduled castes and 959 for scheduled tribes. Among towns, sex ratio for scheduled castes is reasonably good at 937 in Barsana (NP) but low at 823 in Mahaban (NPP). As against this, percentage of scheduled tribes is highest 1222 in Kosikalan (NPP) and lowest in Mathura NPP.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

District and tehsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 61.5 percent in the district. This proportion in rural area is 57.7 per cent against 70.5 per cent in urban areas. In the district the literacy rates of males (76.5 per cent) is much higher than that of females (43.4 per cent). Among the tehsils, Mathura tehsil tops with 66.4 per cent literates followed by Mat tehsil(59.5 per cent). Chhata tehsil with 51.2 per cent literates stands at the bottom in the district. Out of 3 tehsils, the literacy rates of Mathura.tehsil is higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 33.1 per cent in the district, as a whole. The situation at tehsil level is different. However this gap in urban literacy is low which comes to 18.8 percentage points against the rural areas, where the gap between male and female literacy is 39.1 percentage points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District (Rural) Total:		**678,103**	**485,129**	**192,974**	**809,390**	**324,817**	**484,573**	**57.7**	**75.4**	**36.3**	**39.1**

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 57.7 per cent of the total rural population excluding the age-group of 0-6 years literates in the district. The corresponding proportion of male and female literates comes to 75.4 and 36.3 per cent respectively, which shows very wide gap of 39.1 per cent in male and female literacy. At C.D. block level Goverdhan CD block has the highest rural literacy rate of 63.9 per cent while 79.9 per cent males and 44.4 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Chhata CD block (47.4 per cent). There are wide variations in male and female literacy in all the CD blocks of the district. The maximum difference of 42.0 percentage points is found in Nandgaon CD block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5

Literacy rate for District		**61.5**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no

literate in one villages (0.1 per cent) of the district and population of this village is only 2 persons. 4 villages (0.5 per cent) have all the literate population. 260 villages accounting for 35.3 per cent of the total villages are in the literacy range of 51-60 per cent and 223 villages (30.3 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 percent observed in 166 villages (22.8 percent) of the district. The higher literacy ranges of 71 to 100 per'cent covers 86 villages (11.6 per cent). The ranges of 51-70 have the maximum number of 483.villages forming 65.6 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Mathura C.B. town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (70.5). The literacy rate among males is quite high (above 90 percent in three towns). Female literacy rate is not far behind in two towns (above 77 percent). However, literacy rate among females is very low (32.7 percent) in Mahaban (N.P.) town. The gap in male female literacy rate is 18.8 percentage points.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 1487493 total rural population of the district, 26.6 per cent has been categorised as main workers and the marginal workers constitute 14.2 per cent and the remaining 59.3 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 39.9 percent males and 10.6 per cent females are in the category of main workers. Male and female marginal workers account for 8.8 and 20.6 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 40.7 per cent. At the C.D. block level, Nohjhil has highest proportion of total workers forming 47.6 per cent of the total population. It is closely followed by Chaumuhan (47.3 per cent),Baldeo (45.3 per cent), Mat and Raya (43.4 per cent), Chhata (40.7 per cent) and Nandgaon (40.2 per cent). The lowest percentage of 31.2 per cent is recorded in Mathura C.D. block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

The table 33 indicates number and percentage of main workers, marginal workers and non-workers by sex in urban area of the district. It can be seen from the table that against 24.4 percent main worker, such

workers are as high as 34.8 percent in Mathura C.B. and lowest of 19.3 percent in Bajha town. Similarly, the extent of marginal worker is 3.7 percent at district level (4.3 percent males and 3.0 percent females) with maximum and minimum limit of 14.2 percent in Chaumuhan NP and 0.8 percent in Mathura C.B. Non-workers are in the proportion of 71.9 percent (54.4 percent males and 92.5 percent females).

As far as total workers are concerned it can be seen from the table that there are 28.1 percent total workers in the district of which 45.6 percent are males and 7.5 percent are females.

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN TAHSILS, 2001

				(24.5)	**(40.9)**	**(26.0)**	**(6.9)**	**(26.2)**

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 39.9 per cent of the total workers (main + marginal) and remaining 60.1 per cent of total workers are engaged as agricultural labourers (17.4 per cent), Household industry workers (4.4 per cent) and other workers (38.3 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators are 51.9 per cent in Chhata tahsil and 45.8 per cent in Mat tahsil and 30.4 percent in Mathura tahsil. The percentage of females cultivators is 40.9 per cent which is nearly similar as compared to 39.4 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the second position next to agriculture in the district. The highest proportion of 50.3 per cent of other workers is recorded in Mathura tahsil while the lowest proportion of 26.7 per cent is found in Mat tahsil.

Note. Percentage of Workers to total workers are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district, total workers (main+marginal) 40.7 per cent of total population. Among these workers, cultivators constitute 49.0 per cent, 21.3 per cent agricultural labourers, 4.1 per cent household industry workers and 25.7 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 4.1 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (43.4 per cent) is lower than males (52.0 per cent) in the rural areas of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 35.6 per cent in Mathura C.D. block to 59.0 per cent in Chaumuha C.D. block. However for other workers, the lowest proportion is 17.5 per cent also in Chaumuha C.D. block while 45.3 per cent is the highest in Mathura C.D. block. The percentage of agricultural labourers and household industry workers is 21.3 and 4.1 percent respectively the district. The percentage of agricultural labourers is highest in Baldeo (26.1) block and is followed by Mat (25.6). Similarly, household industry workers varies in C.D. blocks between 2.7 per cent in Nandagon and 5.5 per cent in Raya.

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district Mathura. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table

have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (84.8), followed by cultivators with 6.4 percent (5.3 percent males and 13.9 percent females). If we observe each town, the table reveals that highest percentage of cultivators (42.8) is recorded in Nandgaon (N.P.). In the agricultural labourers category Mathura (C.B.) recorded very low percentage (0.2). Household industry workers are also very low (1.0 percent in Mathura (C.B.). As the usual trend recorded in the urban areas, other workers are in high percentage (98.3 percent in Mathura (C.B.), 93.6 Vrindavan (NPP) and 92.3 percent in Farah (N.P.).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

One of the major parts of the District Census Handbook is Village and Town Directory. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data inset tables 37 to 47 have been generated and reproduced here showing major trends in the availability of above amenities.

TABLE37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.
* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherrwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.
# Post office includes Post office, telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 736 inhabited villages in the district 634 villages or 86.1 per cent have been provided with the education facilities of one type or the other. Similarly 260 villages in the district constituting 35.3 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 716 or 97.3 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph,186 villages constituting 25.3 per cent of villages have been provided with post office facility within the village 267 or 36.3 per cent villages have been provided with the telephone facility, 129 or 17.5 per cent with transport facility,64 or 8.7 per cent villages with bank facility and 50 or 6.8 per cent with agricultural credit societies. Similarly there are 597 or 81.1 per cent villages which have been linked with the pucca road. Total 628 or 85.3 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Goverdhan C.D. block has the highest 96.2 per cent villages where educational facility is available and lowest 81.1 per cent is found in Mathura C.D.block. Medical facility is highest in Goverdhan (59.6 per cent) and lowest (21.6 per cent) in Nohjhil C.D. block. Improved drinking water is available to cent-percent villages in Goverdha and Farah blocks while in other blocks, it is above 91.7 per cent. Telephone facility is highest in Raya C.D.block (53.5 per cent) and lowest in Nohjhil C.D. block (22.7). Transport and communications is less developed in Nandgaon where only 10.4 per cent villages are covered by this facility whereas the highest 30.8 per cent villages of Govardhan C.D. block are availing this facility. In the field of power supply 85.3 percent or 628 villages have been covered in the district.

TABLE 38 : NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,487,493 persons in the district, 1,443,538 or 97.0 per cent have educational facility of one or the other type. Similarly 816,425 or 54.9 per cent population has medical facilities while 1,473,023 or 99.0 per cent have got improved drinking water facility. Post office facilities are available to 737,760 or 49.6 per cent population. Telephone facility is available to 730,020 or 49.1 per cent. Transport communications facility is available to 356,700 or 24.0 per cent. Bank facility is available to 290,674 or.19.5 per cent. 165,713 or 11.1 per cent have been provided with the facility of agricultural credit societies 1,386,166 or 93.2 per cent have been provided with the facility of approach by pucca road.

Power supply is available to 1369547 or 92.1 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block. The facilities of education improved drinking water power supply and pucca road are available to larger proportion of population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	109	1	0	110
(b) Middle School	336	151	10	497

7. Agricultural Credit Societies	358	229	99	686

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table.110 villages do not have primary school in their villages and out of these villages, children of 109 villages have to travel less than 5 kms. for schooling. Out of 736 inhabited villages as many as 497 are deprived of middle school and 727 of degree college. Of these 336 avail the facility of middle school at a distance of less than 5 kms.,151 at a distance 5-10 kms. and the remaining 10.at a distance of 10+ kms. In respect of degree college 132 avail this facility at a distance of less than 5 kms.,171 at a distance of 5 to 10 kms. and rest 424 villages at a distance of 10+ kms.

Similarly there are 710 villages in the district which have been devoid of Hospital facility and 721 villages which are deprived of PHC facilities. Of these 204 villages have the facility of Hospital available within 5 kms. while in respect of 261 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly 245 villages have this facility at a distance of 10+ kms. As regards PHC 170 villages avail this facility at a distance of less than 5 kms., 324 at a distance of 5-10 kms. and the remaining 227 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 550 villages do not have this facility in the village itself. Of these majority i.e.433 have this facility at a distance of less than 5 kms., another 108 villages avail it at a distance of 5-10 kms. In the remaining 9 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 469 villages in the district which are without telephone facilitiy. Of these 251 avail this facility at a distance of less than

5 kms., 157 at a distance of 5-10 kms. and remaining 61 have to traverse a distance of 10+ kms.

For Bus service out of 662 villages which do not have facility, 237 villages avail this facility at a distance of less than 5 kms., 306 at a distance between 5-10 kms. and 119 at a distance of 10+ kms.

In the entire district 676 villages are deprived of Commercial Bank & 719 of Co-operative Bank. Of these 676 villages which are deprived of Commercial Banks 380 villages avail this facility at a distance of less than 5 kms., 238 between 5-10 kms. & the remaining 58 at a distance of 10+ kms. Regarding Co-operative Banks out of 719 villages 183 villages avail this facility at a distance of less than 5 kms.,334 at a distance of 5-10 kms. and remaining 202 at a distance of 10+ kms. 686 villages do not have agricultural credit societies. This facilities to 358 villages is available at a distance of less than 5 kms.,229 at a distance of 5-10 kms. and the remaining 99 at a distance of 10+ kms.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABLITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available				Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 736 inhabited villages in the district, there are 203 villages which have nearest towns upto a distance of 5 kms. Of these only 176 villages forming 86.7 per cent of these total villages, are having the educational facilities of one type or the other and 65 villages constituting 32.0 per cent, have the medical facilities upto distance of 5 kms., 39 villages forming 19.2 per cent have the facility of post office upto distance of 5 kms. and 83 or 40.9 per cent have the facility of telephone. 40 villages constituting 19.7 per cent have been linked by transport service. 12 villages comprising 5.9 per cent have been provided bank facilities, while 9 villages constituting only 4.4 per cent have been provided by agricultural credit societies. 177 villages comprising 87.2 per cent have been provided with pucca road.

There are 435 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 374 villages constituting 86.0 per cent have been provided with the educational facilities. 155 villages comprising 35.6 per cent have been provided with medical facilities. 119 villages constituting 27.4 per cent enjoy the post office facility. 148 villages comprising 34.0 per cent have been provided the telephone facility. 71 villages constituting 16.3 per cent have been linked with transport communications. 44 villages comprising 10.1 per cent have bank facility. 35 villages constituting 8.0 per cent are having agricultural credit societies, while 353 villages or 81.1 per cent are approachable by pucca road. 82 villages fall in the distance range of 16-50 kms. Of these, 89.0 per cent villages have educational facility, 40.2 per cent medical, 30.5 percent post office, 34.1 per cent telephone and transport & communications available to 17.1 per cent villages. Banks and

agricultural credit societies facilities are available to 7.3 and 6.1 per cent of villages.

There is one village in the district which is situated beyond 50 kms.from the nearest town. This table presents no report regarding amenities in the village. There are 15 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 11 or 73.3 per cent villages have the educational facility of one or other type. 7 villages constituting 46.7 per cent have the medical, 3 (20.0) percent post office, 8 (53.3) percent telephone, banks 2 (13.3) percent and 1 (6.7) percent agricultural credit society facilities in the village. 13 villages or 86.7 percent have also been connected by pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available						Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Mathura district out of a total 736 inhabited villages, 123 have a population of less than 500 persons. Of these, 49 villages (39.8 per cent) have education facility, 10 (8.1 per cent) have medical facility, 109 (88.6 percent) have improved drinking water facility. None of one village has post office facility. 16 (13.0 per cent) have telephone facility. 13 (10.6 per cent) have been linked by bus service. 3 (2.4 per cent) have Bank facility. None of the village has been provided with the agricultural credit societies, 59 villages (48.0 per cent) have been linked with pucca road. 78 villages (63.4 per cent) have been provided with electricity.

Out of 132 villages, which fall in the population range of 500-999 persons, 112 villages (84.8 per cent) have been provided with the education facility, 25 (18.9 per cent) with medical facility, all the villages (except 3 villages) have improved drinking water facility. 7 villages (5.3 per cent) have been provided with post office facilities, 46 villages (34.8 per cent) with telephone facility, 16 villages (12.1 per cent) with transport facilities, one village (0.8 per cent) with bank facility, 4 villages (3.0 per cent) with agricultural credit societies and 97 villages (73.5 per

cent) have approach by pucca road and 109 villages (82.6 percent) have electricity.

206 villages fall in population range of 1,000-1,999 persons. All of these villages have improved drinking water facilities. While 201 (97.6 per cent) have education facility, 62 villages (30.1 percent) enjoy the medical facility, 34 villages (16.4 per cent) have post office facility, 71 villages (34.5 per cent) have telephone facility, 31 villages (15.0 per cent) have transport communications facilities, 9 villages (4.4 per cent) have bank faciiities, 11 villages (5.3 per cent) have agricultural credit societies, 173 villages (84.0 per cent) have approach by pucca road and 184 villages (89.3 percent) have power supply.

There are 224 villages in the district which are covered under 2,000-4,999 population range. 221 villages (98.7 percent) have been provided with the education facility. 120 villages (53.6 per cent) have medical facility. 99 villages (44.2 per cent) have post office facility, 222.villages (99.1 per cent) have improved drinking water facility. 101 villages (45.1 percent) with telephone facility, 52 villages (23.2 percent) have transport communication facility, 29 villages (12.9 percent) with bank facility, 28 villages (12.5 per cent) have agricultural credit socicties. 217 villages (96.9 percent) have approach by pucca road and 208 villages (92.9 percent) have been provided with the electricity. There are 51 villages in the district having a population of 5,000 + above. The maximum number of villages have been provided maximum facilities.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Nandgaon	48	28611.5	72.6	91.4
2	Chhata	72	29665.7	100.0	94.4
3	Chaumuha	52	20145.6	32.3	86.3
4	Nohjhil	97	21540.8	96.3	91.1
5	Mat	60	21322.7	100.0	95.7
6	Raya	99	23479.8	80.1	99.0
7	Govardhan	52	27600.8	51.8	91.7
8	Mathura	95	36642.9	77.7	86.6
9	Farah	76	24159.5	76.2	82.5
10	Baldeo	85	30322.7	84.3	95.4
	District Total:	**736**	**263491.9**	**77.7**	**91.8**

Note:- Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D block wise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 736 inhabited villages in the district having a total area of 263491.9 hectares. Of this, 77.7 per cent is cultivable and 91.8 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that 10 block with 736 villages have a total area of 263491.9 hectares, of this 77.7 per cent of land is cultivable and of the aforesaid area 91.8 per cent is irrigated. In Nandgoan block, all the 48 villages have a total land area of 28611.5 hectares, of this 72.6 per cent of land is cultivable and of the aforesaid area 91.4 per cent is irrigated. In Chhata block, all the 72 villages have a total area of 29665.66 hectares, of this cultivable area is 100.0 per cent and 94.4 per cent is irrigated. In Chaumuhan block, all the 52 villages have a total area of 20145.61 hectares. Of this, cultivable area is 32.3 per cent. Of cultivable area 86.3 per cent is irrigated. Nohjhil block with 97 villages have a total land area of 21540.8 hectares, of this 96.3 per cent is cultivable area and out of this cultivable area 91.1 per cent is irrigated. Mat block with 60 villages has a total land area of 21322.67 hectares. Of this 100.0 per cent is cultivated area, out of which 95.7 per cent is irrigated. Raya block with a total 99 villages have an area of 23479.76 hectares. Of this 80.1 per cent is cultivable area, out of which 99 percent is unirrigated. In Goverdhan Block all the 52 villages have a total areas 27600.83 hectares. Of this, cultivable area is 51.8 percent. Of cultivable area 91.7 percent is unirrigated. Remaining Mathura, Farah and Baleo C.D. Bolcks also have above 70 percent cultivable area. Of this,

cultivable area, unirrigated area are also have 80 percent and above.

Table 44 shows school/ colleges per 10,000 population in urban areas of Mathura district. The average number of primary school per 10,000 population comes 3.5 schools, 1.3 junior secondary/

middle, 0.8 secondary/matriculation, 1.0 senior secondary schools and the ratio of colleges is only 0.1 college per 10,000 population. Among the towns, the ratio of primary is highest in Mathuara (C.B.) College education is available only in 6 towns namely Kosi kalan (NPP.), Mahaban (NP), Nandgaon and Vrindavan N.P., Chaumuhan (NP) and Mathura (CB).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

19	Vrindavan, NPP	Stones, Zari, Gota	Murti (Idol), Sweet meats, Chandan

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The main export items of the district are Kanthi Mala, Murti, Sweets, Chandan, Mishri and Mustard oil are the main items which are manufactured in the district and these are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities, collected during Houselisting Operations, Census of India 2001:

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 Census, the houselist was considerably expanded with 22 items of information. Again in 2001 Census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."
* House list households.

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 318,912 consisting of 227,438 rural and 91,474 urban households. 74,491 households belong to Scheduled Castes and 4,779 to Scheduled Tribes. 296,326 households are living in their owned houses. Of these households, the largest number of households (101,328) have occupied single room accommodation and is followed by double room accommodation numbering to 92,254 households. Next position is claimed by households (51,798) occupying three plus roomed accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 45,411 households while 5,535 households are without any exclusive room.

16,500 households are living in rented accommodation in the district. The largest number of 6,976 households are living in single roomed accommodation followed by 5,781 households in double-roomed accommodation. Households with three rooms and three plus are 2,033 and 1,424 respectively. 286 households have no exclusive room for living. In case of other 2,638 households live in single room accommodation while 1693 live in two room accommodation. There are 873 households occuping 3 rooms. While 631 households have occupation of 3+ rooms.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial No.	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Tempo-rary
1	2	3	4	5	6	7	8	9	10	11

2	Mat	88.2	4.2	7.6	87.8	4.3	7.8	94.6	2.3	3.1
3	Mathura	89.7	4.4	5.9	85.8	4.8	9.4	95.0	3.9	1.1
	District Total:	**89.2**	**4.3**	**6.5**	**86.9**	**4.5**	**8.6**	**94.9**	**3.8**	**1.2**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-
Permanent:- 1 Permanent houses refer to those houses whose wall & roofs are made of pucca materials i.e. here, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refer to those houses having walls and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that 89.2 percent of the households in the district had permanent houses. The trend is different in the rural (86.9 percent) and urban area (94.9 percent). Among tahsils highest proportion of permanent houses were accounted is tahsil Mathura (89.7 percent) followed by Chhata (88.9 percent) and lowest in Mat (88.2 percent). In respect of semi-permanent houses, the returns were 4.3 percent at district level where as among tahsils, in Mathura it was 4.4 percent and lowest was 4.2 percent in tahsil Mat. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 2.3 to 4.1 percent. Temporary houses in the district lie between the range of 5.9 and 7.6 percent.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

* House list Households.

**Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage maens closed and open drainage.

The above table shows that out of total households of the district 65.4 percent of the households had improved drinking water facility. The proportion of rural and urban area was 55.4 and 90.3 percent respectively. Tahsil Mat had higher order of proportion of households where percentage for rural area was 70.5 and 88.5 percent in urban areas. Electricity was available for 50.5 percent of

households at district level households. The district had better access of electricity. Bathrooms and toilet facilities were available in 26.6 and 34.4 percent of households respectively. Tahsil Mat poorly served in respect of these amenities except improved drinking water facility. Drainage facility was good in the district. At district level drainage facility was available for 87.3 percent of households, whereas the proportion of rural and urban areas households accounted for 83.8 and 95.9 percent respectively.

TABLE 51 : NUMBER AND PERCENTAGE OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Serial No.	Tahsil	Total/ Rural/ Urban	Total* house-holds	Fire wood	Crop residue	Cowdung cake	Electricity	Coal / Lignite (charcoal)	Cooking gas (L.P.G)	Bio-gas	Kerosene	Others	No cooking

Percentage in brackets

* House list households.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 48.8 percent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is to 57.1 and in urban area it comes to 28.2 percent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in 17.5 percent of the households. The composition of rural and urban comes to 3.6 and 52.2 percent respectively. Kerosene is used for cooking in 1.1 percent of the households (0.2 percent rural and 3.5 percent urban households). The other methods like crop residue, cow dung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.1 percent and 16.7 percent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas). The table shows that firewood, LPG (cooking gas) cow dung cake and crop residue are the predominant fuel for cooking in the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial No.	Tahsil	Total/ Rural/ Urban	Total number of households	Total number of households availing banking services	Availability of household assets						
					Radio/Transistor	Television	Telephone	Bicycle	Scooter, Motor Cycle, Moped	Car, Jeep, Van	None of the specified assets

Data source: Census of India 2001, H-series: Table on Houses, Households amenities and Assets.
* *Houselist Households.*

The table reveals that out of the total households (318912) of the district, in all 133050 households could avail banking services at district level while 1,22,212, 1,15,830, 28,804, 1,92,458, 45,123 and 7,800 households enjoyed the availability of households assets radio/transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively whereas only 71,989 households had none of the specified assets.

It also reveals that at tahsil level a highest proportion of 77,298 households were availing banking services as well as all other households assets in Mathura. The highest of none of specified assets with 34,084 households are also in tahsil Mathura. On the other hand the lowest of 25,535 households were observed for availing banking services and 3,469 households telephone services in Mat tahsil while the rest of the availabilities of households assets at the lowest foot were being availed in Chhata tahsil and enjoyers of none of the specified assets were 17,501 households in Mat tahsil. 20,404 households in Chhata tahsil.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

Mathura has always been a cultural and religious centre and Pali, Prakrit and Sanskrit learning flourished there for centuries. With the Muslim invasion Pathshalas and Gurukulas decayed though Sanskrit continued to be taught in such of them as survived. But by the beginning of the present century many such institution came to an end as endowments meant for Sanskrit Pathshalas were gradually diverted to running high schools and intermediate colleges where the teaching of Sanskrit was not compulsory. During the last ten years none of the significant social, cultural and administrative events took place in the district. There is no change in the administrative front.

(xii) Brief descriptions of places of religious, historical, archaeological importance in villages and places of tourist interest in the towns of the district

There are many places of tourist interest in the district. Mathura itself is one of the seven important holy cities of India. It is the birth place of Lord Krishna and he passed his childhood in neighboring places. Thus these places are associated with one or another story connected with the Krishna legend. The important places are as follows-

Aring:

There are many legends regarding the derivation of the name. The first in that it was named after Aringasur, a demon who was killed by Krishna. Secondly, Aring has its basis in Sanskrit root ar and could be a tax imposed by Krishna which the people of the place paid reluctantly thirdly the name of Arishta-grama could be after the bitha trees that grew here and fourthly the arang is a local name for Mart or bazar. It has a sacred pond called Kilol Kund and a few temples. The main temples are Baldev a Bihariji Behoviji and Pepaleswar Mahadev.

Bachh Gaon:

The village is close to Bharatpur (Rajasthan) border. It is said that lord Krishna defeated Bachchhasar (a demon) here. Another legend is based on an incident in Kirishna's life who when the jealous god Bharama took away the Bachchha (calves) from his herd created other. It is also will known for its songs and folk dances and is a halting place of for pilgrims performing Ban Jatra.

Baldev:

It is also called Dauji originally known as Riha. Its importance and its name is due to the location in it of the famous temple of Krishna's brother Balrama or Baldeva. There is a tank known as Kshir Sagar (milk sea) made of bricks.

Barsana:

Barsana's sanskrit name is Brahma - Sanu meaning Brahma's hill. It is situated on the slopes and foot of the hill. It was the home of Radha Krishina's consort, on one park of the peaks is a group of old temples dedicated 6 larliji a local name for Radha and on other there are three buildings-Man Mandir, Dargah and Mor Kuti. A big fair is held here on the birth day of Radha on every 9th day of the month of Bhadra. Second fair is hold on the colour throwing day of Holi festival. This is one of important tourist place.

Gokul:

It lies on the left bank of the Yamuna. It is situated 1.61 km. north-west of Mahaban and 6.44 km. South-east of Mathura on Mathura Etah metalled road. Gokul denotes a cowhouse. It has picturesque appearance when seen from the other side of the river Yamuna. The oldest temples are those of Gokulnath, Madan Mohan and VithalNath, Dwarkanath and Balkrishna. Besides, it has 2 shrines to wilt in honour of Mahadeva and 2 large masonary tanks. It is an important halting place for pilgrims undertaking the famous Ban Jatra pilgrimage. Where they have to spend 7 days as a religions duty.

Mahaban:

It is on the left bank of river Yamuna and is about 12.87 km south-east of Mathura, and 1.6 km. from Gokul. Its name is derived from dense forest. It is said to have been founded by Nanda(Krishna's foster father) some time before Krishna's birth, Legend connects Mahaban and Mathura as Krishna was born at the latter place and was brought up at the former. Mahaban was attacked by Mahmood of Ghazni in 1018 and there after the armies of Illtutimish, Shahjahan and Ahmad shah Abadali etc. The largest and most sacred temple at Mahaban is that of Mathuranath palace of Nanda or Assi Khamba and Raman – Reti (a playground of Krishna).

Goverdhan:

It is famous place of Hindu pilgrimage. It is a part of located in a narrow sandstone hill known as 'Giriraj' about 8 km. in length. It is said that lord Krishna held this hill on his finger tip for 7 days and nights to save the people of this area from the deluge of rains. Some devotees take 108 rounds (parikrama) of it.

Mathura:

It is situated on the west bank of

the Yamuna. It is 57.94kms from Agra and 144.84 kms from Delhi. Mathura is a city of temples and shrines, the majority of which are dedicated to Lord Krishna. The famous places are Vishram Ghat, Dwarkadhis temple, Sati Burj and Geeta Mandir. The main shrine of the Sikhs is Gurudwara Teg Bahadur. Another Gurudwara of Nanak Baghichi said to have been visited by Guru Nanak and Guru Govind Singh. There are several Jain temples it the city, also near the Sadar bazaar there is a garden called Yamuna Bagh where are two small, butt coloured sandstone chhattris of Parikhji and Maniram. A handsome building beautifully carved is the old Mathura museum. The museum was shifted to its present site of Dampier Park in 1930 and is one of the most important museum in India and houses many exqnisite pieces of sculpture dating from very early times.

Nand gaon:

Nandgaon is situated at the foot of the hill known as Brahma-ka-Pahar. It is situated 8.05 km. north of Barsana. According to tradition it was the home of Krishna's foster father Nanda. On the top of the hill is the spacious temple of Nand Rai. Besides many temples, it has a sacred lake Mansarover and Kadamb grove called Udhoji-ka-kyar. The lake is about 216MX115M and designed in the form of ship. It is one of the four reputed lakes of the district. It is said that was the watering place where lord Krishna used to bring his cows. A big fare is held here on every Janmaasthmi – the birth day of Lord Krishna and another on Rangoli Holi in Phalguna.

Radha Kund:

It is situated at a distance of 4.83 kms. north of Goverdhan and 25.75 kms. west of Mathura on a metalled road. It has grown up on the margin of the lake called Radhakund also known as Srikund. It is said that when Krishna had killed demon Arishtha (of bull form) he felt a sense of guilt. So summoning to the spot water from all the sacred streams in the country, he tool a bath of purification in Radha kund and another pond Krishna kund into which the sacred waters had, at his bidding, poured themselves. To commemorate this event every year on the 8th day of the dark half of Kartika a large fair is held near this spot.

Vrindaban:

The celebrated town of Vrindaban is situated on the right bank of the Yamuna about 14 km. north of Mathura. The river touches it from three sides. It was so named either from word Vrinda, another sacred name of Tulsi plant or after Vrinda Devi one of Krishnas playmates. Within Vrindaban municipality there are about one thousand temples. It is said that the Emperor Akbar was taken blindfolded into the grove where a marvellous vision was revealed to him. The four temples built there in his honour are called Govind Deva, Madan Mohan, Gopinath and Jugal Kishore which are masterpieces of architectural style of Saracenic and Hindu features, besides temple of Radha Ballabh, Krishna Chandra, Rangji and Radha Manohar are worth seeing

(xiii) Major Characteristics and Contribution of the District :

It is one of the seven holy cities of India and is the most ancient inhabited place of Uttar Pradesh. About the twelth century A.D. the place had been an important centre simultaneously of the three chief Indian religious system the Brahmanical, the Jain and the Buddhist. Subsequently, it became a stronghold of Krishna-Bhakti cult. It is believed that Lord Krishna was born in the city of Mathura and passed his childhood in its neighborhood. Most of the important places in the district are associated with one or other story connected with the district, was far more pastoral than agricultural in early times. Mathura's intimate association with the religious traditions of the fairs

finds mention in a number of their ancient books. Mathura also played a significant role in the development of Budhism. Mathura continued to hold its religious important as one of the greatest centres of artistic activity during the golden age of Indian history.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A

VILLAGE AND TOWN DIRECTORY (SECTION I & II)

Section - I : Village Directory

(a) Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

(b) STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.

1	2	3	4	5
N.A.				

Section II - Town Directory

Section II - Town Directory

(a) Note explaining the abbreviations used in the Town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A

(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after

the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important feature of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also.

In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, then portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following.

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Mathura
q1	Persons	99	67
	Males	98	61
	Females	104	73
q2	Persons	117	85
	Males	117	80
	Females	118	90
q5	Persons	134	111
	Males	135	93
	Females	132	132

(*Undivided Uttar Pradesh at 1991 Census)
Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23.
(ii) District Profile Uttar Pradesh 1991.

The child mortality by ages 1, 2 and 5 years was lower in the district as against the State. The child mortality indicators in the district for females were in the improved condition as compared to the State by all ages 1, 2 and 5 years.

ANNEXURE–III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE - 1991 CENSUS

Serial Number	Fertility Measures	Uttar Pradesh	Mathura
1	2	3	4
1	CBR	37.2	36.9
2	TFR	5.6	5.7
3	TMFR	6.3	6.5
4	GFR	172.0	181
5	GMFR	200.0	210
6	Mean age at marriage (1981-91)	17.3	17.5
7	Number of children ever born per ever married woman aged 15-49 years	4.6	5.2
8	Child woman ratio 0-4	631	705
	5-9	752	743

Source. (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 36.9 per thousand in the district. It is below to the state of Uttar Pradesh i.e. of 37.2 per thousand. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) the district presents all along a slightly higher proportion than state figures. The conclusion that may be drawn is higher fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3 years for the state whereas 17.5 years has been observed for the district. It may be observed that higher age at marriage leads to higher rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever-married women in the age group 15-49. The state and the district figures are placed as 4.6 and 5.2 respectively. Number of children in the age group 0-4 and 5-9 years per thousand women in the age group 15-49 has been calculated to 705 and 743 for the district respectively while in case of the state the corresponding figures are 631 and 752 respectively. The various measures of fertility present that fertility levels as such are higher than the state average.

Uttar Pradesh	100.0	100.0	100.0	74.1	65.2	77.4	25.2	33.9	21.9	0.7	0.9	0.7
	89897	22304	67593	52766	12591	40175	36560	9298	27262	571	415	156
Mathura	100.0	100.0	100.0	58.7	56.4	59.5	40.7	41.7	40.3	0.6	1.9	0.2

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other district of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district Mathura was 63.0 percent in 1991, while in 2001 it was 60.5 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 35.7 percent and 38.8 percent respectively. At district level in-migration from other countries was 1.4 percent in 1991 and 0.7 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state

amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 61.1 percent and 58.7 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 38.4 percent and 40.7 percent respectively. The movement of population from other countries in the district was 0.5 percent in 1991 and 0.6 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

ANNEXURE – V
BRIEF ACCOUNT OF MAIN RELIGIONS IN THE STATE/DISTRICT/TAHSIL AS PER 1991 CENSUS

	100 0	0 1	0.1	91.6	0 1	7.9	0.2	0.0	0.0

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 91.6 percent in 1991 and 91.5 percent in 2001, while Muslim were 8.1 percent each in 1991 and 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 57.6 percent male and 46.5 percent female to 59.3 percent male and 49.4 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 39.5 percent and female was 48.3 percent in 1991 and in 2001 it was 38.1 percent male and 45.3 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.5 percent male and 5.2 percent female while it was 2.9 percent male and 5.1 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Annexure - VII

Age, Sex and Education in the state/district 1991 census.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 50.1 percent male and 82.0 percent female in 1991 which declined to 38.2 percent male and 65.2 percent female in 2001. Primary level education was 10.7 percent male and 4.8 percent female in 1991, which was 16.5 percent male and 11.5 percent female in 2001. Middle level education was 10.8 percent male and 3.5 percent female in 1991 and 15.6 percent male and 7.1 percent female in 2001. Matriculation and above level of education was achieved by 17.3 percent male and 4.6 percent female in 1991 which was 25.3 percent male and 9.2 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note. For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0 02 percent. The remaining tongues have been merged in the column of "Total of other mother tongue".

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 97.4 percent person in 1991 and 96.1 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent in 2001 at the state level whereas 1.7 percent and 2.0 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the-state, and district, in both Censuses.
