BOUNDARY : DISTRICT	
" TAHSIL	
" VIKAS KHAND	
HEADQUARTERS : DISTRICT , TAHSIL , VIKAS KHAND	
HIGHWAY : NATIONAL	NH 2
" STATE	SH 31
IMPORTANT METALLED ROAD	
RAILWAY LINE : BROAD GAUGE	
RIVER AND STREAM	
VILLAGE HAVING 5000 AND ABOVE POPULATION WITH NAME	Bhadana
TOWNS WITH POPULATION SIZE AND CLASS : I, II, III, IV, V	
DEGREE COLLEGE , TECHNICAL INSTITUTION	

Area (Sq.Km.)	2,361.00
Population	2,052,958
Number of Tahsils	4
Number of Vikas Khand	9
Number of Towns	9
Number of Villages	814

MOTIF

GLASS BANGLES INDUSTRY

In the field of artistic glass work, famous district Firozabad is situated 44 km. away in the east of Agra and it is regularly developing since 15th century AD. Utilising the various pieces of broken glasses all sort of decorative items including beautiful perfume bottles, tumblers, birds bangles, etc. are manufactured here which are popular all over the world. The manufacturing technique of all these items, especially of bangles is full of hard labour and peculiar which provides employment at a large scale. Melting the raw material of glass and other chemicals in the furnace, various coloured glass pieces are mixed technically and with specific technique glass coils of certain size and shape are prepared. Thereafter, these coils are cut in pieces and straightened one by one to give shape to each bangle and through different methods they are decorated with separate designs and colours. Lastly they are hardened and all this is processed in various furnaces. Initially this traditional industry being small scale industry was deprived of dear advance techniques and solutions for its development. Out of the total production of glass goods, 50 per cent is of glass bangles here in Firozabad. Now a days this developing glass bangles industry is being aided and supported by the government of Uttar Pradesh and as well as by the Central Government.

Annexures - I To VIII

Annexure I	Number of villages under each Gram Panchayat	543
Annexure II	Fertility and Mortality, 1991 Census	543
Annexure III	Various measures of fertility and mean age at marriage, 1991 Census	544
Annexure IV	Percentage distribution of Migrants by place of birth/place of last residence, 1991 Census	545
Annexure V	Brief account of main religions in the district/tahsil as per 1991 Census	546
Annexure VI	Marital status of population as per 1991 Census	547
Annexure VII	Age, Sex and Education in the district, 1991 Census	551
Annexure VIII	*Distribution of different mother tongues returned in 1991 Census*	553

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc

2 The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district Thereafter, at successive censuses, its scope and coverage has been enlarged The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA The 1971 census-DCHB series was in three parts Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics district census tables and certain analytical tables based on PCA and amenity data in respect of villages The 1981 census DCHB was in two parts Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels New features alongwith restructuring of the formats of village and town directory were added into it In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns

3 The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit

4 The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village Income and expenditure of gram panchayat, wherever possible has been provided Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village) are given This includes educational facilities (namely primary and middle schools and college) medical facilities (viz Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre)

drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums' The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs

5 The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr Ranvir Singh, Director of Census Operations Uttar Pradesh Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991 The task of planning, designing and coordination of this publication was carried out by Shri R G Mitra, Deputy Registrar General (C&T) and Dr I C Agrawal, Senior Research Officer of Social Studies Division Dr R P Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L Jain, Deputy Director and Shri R K Mehta, Assistant Director I am thankful to all of them and others who have contributed to make this publication possible

D.K. Sikri

New Delhi
Dated 17 10 2006

Registrar General &
Census Commissioner India

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr I C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B K Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserves all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M M Pandey, Dr S S Sharma S.I Grade-I and Shri S.K Banerjee, S I Gr II who assisted in the work for timely completion of the project. S I Gr.II, S.I Gr.III, Sr Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job Shri A M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i e Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B' If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data The VD data was also made available through the magnetic tapes/floppies Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

Firozabad was carved out from Mainpuri and Agra district of Uttar Pradesh on 4th February 1989. According to the state government orders of 5th June 1989 the district contained three tahsils – Jasrana, Shikohabad and Firozabad. However, a new tahsil Tundla was formed after 1991 Census vide gazette notification no 2542/1-5/99-60/89-R-5, dated 30.5.1999 Thus, the nine community development blocks, which were previously distributed amongst the three tahsils, were redistributed in the 4 tahsils as – Tundla CD block in Tundla tahsil; Firozabad and Kotla (Narkhi) in Firozabad tahsil; Eka, Kheragarh and Jasrana in Jasrana tahsil and Shikohabad, Araon and Madanpur in Shikohabad tahsil. Formerly Firozabad was an important town and tahsil headquarters of Agra district

According to the ancient history Firozabad was ruled by Chouhan Rajputs during 13th century They established their capital of Chandrawar 5 Kms towards south from Firozabad. Chandrawar village was established by the king Chandra Sen According to historians Mohammed Ghauri defeated Prithavi Raj Chauhan, Jai Chand and last Tomar king Pandupal but could not defeat Chandrawar twice because of his military power and plethora of war resources Although Chandrawar was very young but the sense of sacrifice for nation, which prevailed in him, made him invincible.

A tale is also associated with the name of this district It is said that Raja Todar Mal while returning from a Piligrimage of Gaya in the year 1566, stayed at Asafabad The dacoits looted him thrice He complained about the incident to emperor Akbar upon which Akbar ordered one of his officers, named

Firoz, to march for Asafabad to eradicate the dacoity Firoz established Firozabad. He died there and was buried in a tomb made of white marbles Thus, the place was named Firozabad after him

(iii) Administrative Setup

Firozabad district is situated in the south-western part of the state which is a part of southern upper Ganga plain It is carved out from Agra and Mainpuri districts The district is bounded by Etah district in the North, Mainpuri and Etawah districts in the east and Agra district in the south and in the west

There are four Tahsils namely – Tundla, Firozabad, Jasrana and Shikohabad in the district Three Municipal Boards – Firozabad, Shikohabad and Sirsaganj towns and two Nagar Panchayats namely Tundla and Jasrana come under statutory Town of the district Tundla Rly. Colony, Tundla Khas and Sukhmalpur Nijamabad areas are categorized under Census towns as urban area for Census purpose There are 814 villages in four Tahsils comprising 9 development blocks.in the district

Jurisdictional Changes in the district (1991-2000)

Tundla tahsil was formed after 1991 Census vide Gazette notification no. 2542/1-5-99-60/89-R-5 dated 30.5.1999. The details of the jurisdictional changes in the district are as under:

Sl No	Name of Tahsil	Notification No	Jurisdictional Changes	
			Added	Subtracted
1	2	3	4	5
1	Tundla tahsil	2542/1-5/99-68/89-R-5 dated 30 5 99	65 villages & 3 town transferred from Firozabad tahsil	-
2	Firozabad tahsil	- do -		65 villages and 3 town transferred to newly created Tundla tahsil

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government District Magistrate is in-charge of revenue administration He is assisted by Additional District Magistrate (Finance and Revenue) i e , ADM (F&R) At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Zila Adhikari He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanoongo circles respectively For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc.From the development point of view the district is divided into community development blocks Block Development Officer (BDO) looks after development works at community development block level. Assistant Development Officer and Village Development Officers at village level

Under the police set-up Senior Superintendent of Police in big district and Superintendent of Police in small districts are incharge Additional Superintendent of Police (ASP) and Commanding Officers are incharge of their respective area A Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area

The judicial administration of the district is headed by District and Session Judge In addition there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc come under Local self-government

(iv) Physical Features

(1) Location and Size :

Firozabad lies on the south west end of Uttar Pradesh at 27° and 27°24' (north) latitude and 77°60' and 90°04' (East) longitude To the north lies the district Etah, in the east lies Etawah and Mainpuri. In the south there is river Yamuna and boundaries of Agra district and in the west it touches the boundaries of Agra district The district is situated in the 'Doab' of the rivers Ganga and Yamuna. It covers an area of 2361 Sq km

(2) Physiography :

On the basis of geology, soil topography, climate and natural vegetation the district has been subdivided into three sub micro regions –

1 Isan – Arind Plain
2 Firozabad Plain
3 Yamuna Khadar

Isan – Arind Plain :-

The region is situated in the North – Eastern part of the district. The Arind river flows through the region. The geology of the region belongs to Alluvium, Dun gravels.

Firozabad Plain :-

It covers the central and major part of the district, which is a flat plain sloping towards south River Sirsa and Sengar flow parallel through the region The area along the streams is dissected. Being a flat plain, infrastructures one well developed in the region. There are number of roads which connect urban and rural areas. National highway – 2 passes through the region Firozabad and Shikohabad are the important industrial towns

Yamuna Khadar :-

The region is situated parallel to Yamuna river whose slope is according to flow direction of the Yamuna river. Since it is a major river, the imprints on the land surface are very prominent. The meanders and ravines are the main topographical features The geology of the region belongs to Alluvium, Dun gravels (recent).

(3) Drainage :

The main river of the district is Yamuna which flows towards south boundary from Agra. Other two rivers which come from Etah are seasonal rivers. There is no specific lake in the district, some ponds and tanks are found in the district as well. Yamuna khadar slope is according to flow direction of the Yamuna river. Since it is a major river the imprints on land surface are very important The meanders and ravines are the main topographical features River Sirsa and Sengar flow parallel through Firozabad plain The area along the stream is dissected and is well developed being a flat plain Drainage is according to slope of terrain, the course being North-West to South-East. The Isan, Sirsa, Arind and Sengar rivers imposed by fertile cachhar lands

(4) Climate :

Agra being near to Rajasthan effects the climate of Firozabad. On the whole it is dry continental type except during the monsoon season Dust storms and westerly hot winds are common in summer. During summer season the temperature rises upto 45°C and falls down to 24°C in winters Average rainfall of the district in 697 mm In the year 1998 the actual rainfall was recorded 84 5 mm

(5) Natural and Economic Resources

Forestry :

The district is backward in forest wealth According to Agricultural statistics of yr. 95-96, the area of 8,611 hectare comes under forest It is 3 6 percent of the total area of the region in which 4,718 hectares is reserved forest and 2,829 hectares is forest and finds its place in CDB, Tundla and Firozabad Apart from it the area of gardens and trees is spread in 8.8 hectares. Thus, for the purpose of economy the forest wealth is nil. Only fire wood is available though aforestation drive is in progress

Minerals and Mining :

Regarding minerals the district is very poor It abounds only in sand which is found on the banks of river Yamuna, 5 Km. away towards south and is used as a building material

Soil :

The district is situated in 'Doab' of the rivers Ganga and Yamuna and alluvial soil is marked by excess of 'domat" and 'pilra' It is fertile 'cacchar' land.

Land and Land use Pattern :

According to the Samajarthik Sameksha Patrika 1999-2000, the total reported area was 235,733 hectares Out of its the net sown area was 178,166 hectares and area sown more than one was 55,808 hectares. Thus the area sown in Rabi was 154,727, in Kharif 92,946 hectares and in Jayad it was 11,247 hectares

According to Sankhyikiyh Patrika 1999, 8,611 hectares is covered by forest. The cultivable waste land accounts for 3,929 hectares. The present fallow is 7,551 hectares, other fallow 9,058 hectares, barren and uncultivable land 8,890 hectares, land used other than agriculture 18,022 hectares pastures 730 hectares and orchards in 839 hectares. The number of operational holdings in the district was 154.003 The size of land holdings and their number comprised as below 0-5 hectares – 80,417, between 0 5 to 1 0 hectares 37,497, between 1 to 2 hectares the land holding accited 16,973. Between 2 to 4 hectares it was 14,769 and 4 and above hectares the number was 4,337

Agriculture and Crop Pattern :

Kharif, Rabi and Jayad are the three main crops of the year. Wheat, Barley, Peas, Gram and Mustard are the main crops of Rabi whereas Paddy, Bajra and Maize are main products of Kharif

According to Samajarthik Samiksha Patrika 1999-2000 the data of area of land in which the main crops were raised during 1997-98 is as follows Wheat 91,897 hectares, Barley 13,040 hectares, Grains 3,920 hectares, Peas 8,339 hectares, Mustard 20,877 hectares, Paddy 13501 hectares, Bajra 55 639

hectares and Maize 7,924 hectares. There are 24 cold storages in the district, of which 5 in Firozabad CDB, 3 in Tundla, 8 in Madanpur and 8 in Shikohabad. The Chief Crops raised during 1997-98 in the district are as follow according to Sankhykiya Patrika 1999.

Rice 31,220 mt. ton, wheat 245,553 mt, Barley 38,408 mt, Jwar 125 mt, Bajra 103,634 mt, Maize 18,017 mt, Urd 471 mt, Moong 1,443 mt, Massor 40 mt, Gram 4,105 mt, Peas 3,742 mt., Arhar 1,315 mt, Moth 6 mt, Lahi (mustard) 14,127 mt , Til 120 mt , Groundnut 2 mt., Sunflower 954 mt., soyabeen 3 mt., other crops: Sugarcane 5,529 mt., Potato 357,355 mt., Tobacco 156 mt., Cotton 1 mt

For augmenting the agricultural produce, the farmers of the district have been provided with services of 13 seed godowns/fertilizer depots, 13 insecticide depots, 26 cold storages and 7 agriculture service centres during 1998-99.

Irrigation :

The main sources of irrigation are government and private small irrigation system though the area enjoys rainfall too. According to the available data of 1997-98 from Samajarthik Samiksha the land irrigated by canals was 18581 hectares. Similarly 2,369 hectares by govt. tubewells, 138,116 by private tubewells and 5 hectares was irrigated by other sources.

Animal Husbandry :

Its a part and parcel of farming Due to its importance every 5th Year the animal Census is being conducted Many measures are taken up by the department for the development and medical care in this regard. To provide better services, vet. hospital, development centre, artificial insemination centre and Piggary are established

According to animal Census the maximum number of animals are bovine and buffalows The no of animals, like horses and mules, used for the purpose of transportation are less. A programme to provide healthy breed is run from time to time There are primary cooperative Milk Societies in the District

Fishery :

Fishery contributes to a great extent towards the economy of the district. Thus "Matsya Palak Vikas Abhikaran" came into existence. Its job is to provide necessary scientific education and finance for pisiculture in private ponds and the ponds of 'Gram Samaj' which are left abandoned Ponds are rented on lease to genuine persons and aid is given for the renovation of ponds and inputs. Various banks sanction loans to prepare hatching and fingerlings. The common species of fish used as a source to supplement food are Rohu (labeo rohita), Karonch (labeo calbaisu), khursa (labor gonius), nain (cirrhina mrigala), catla (catla catla), bam (mastacenbelus armatus) silond (silmia silondia) which are found in river Yamuna.

Industry :

From the very beginning Ferozabad has been an industrial city and holds an important status in the state. Glass industry is one of the oldest household industry of the area. In the beginning bangles were made without any scientific and , technical knowledge. It started in the beginning of 20th century In 1900 Potpermesh, blowing techniques were introduced by Angistum, a glass technologist. The industry bloomed after the 2nd world war The main products are glass bangles, scientific equipments of glass and other decorative items which are widely circulated in different part of the country. For the past few years miniature bulbs are being produced and the largest bulb factory of Asia, which supplies electric bulbs in entire India, is situated in Shikohabad There are two industrial sheds in Firozabad – one in Firozabad itself and the other in Shikohabad having around 133 plants.

Amongst the village and small scale industry comes Khadi, Engineering, Chemical, Handloom, Silk, Coir and Handicrafts The industries are run by Panchayat, Industrial cooperative societies, registered establishment and private industrialists.
There are 3,169 factories in Firozabad of which 330 are registered and 2,839 unregistered having around 63,380 workers.

Trade and commerce :

It is a big trading centre of glass products The export items include products of industries established in the district The import consists of consumer goods like drugs, cotton and woollen cloth, soap, fruits and edible items Being near to Agra it attracts a large number of tourists for glass products

Transport :

The development of any place depends upon the mode of transportation Firozabad is well connected by railways There are 11 railway station (including halts) in the district The length of railway line (broad gauge) is 53 kms The length of National highway is

51 km and state highway is 19 kms. Whereas the length of main road passing through the district is 119 km. The length of the road in village and other than as mentioned above is 1093 km.
Also the length of road under Zila Parishad is 31 km. and under Mahapalika/Nagar Palika/ Cantt is 137 km. Thus, the total length of road, in 1997-98 comes to 1450 km

The Chief mode of transport are bus, jeep, car and trucks According to Sankhyikiya Patrika the total no. of bus station/bus stops in 1998-99 were 52.

Electricity and Power :

Electricity is an important part of industry and cultivation The district does not have any power plant and power is supplied by Harduaganj and other centres. It is used for domestic, commercial and agricultural purposes. It is also used to run the electric trains and in glass industries. The distribution of power in different sector of the district during 1997-98 (Sankhiya Partrika – 1999) was as follows :-

Sl No	Item	Year 1997-98 (In thousand kw per hour)
1.	Domestic light	31,899
2	Commercial light and Laghu Vidhyut Shakti	18,184
3	Industrial	58,680
4	Public Street Light	1,248
5.	Rail / Traction	-
6	Agriculture	185,177
7.	Public Jalkal and Toilet	5,934
	Total :	**301,122**

Gram Panchayat, its composition, jurisdiction and role in village development

A Gram Panchayat acts as the executive of the Gram Sabha Gram Pradhan is elected from amongst villagers for a period of five years.

Composition :

The members of the village or Gram Panchayat are elected by the members of the Gram Sabha The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 512 gram sabhas in the district.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Its term :

The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him But in such a case the sanction of the district authorities must be obtained beforehand.
Qualifications : In order to be elected to a village panchayat, a candidate should possess the following qualifications

1. He should be a resident of the village concerned and his name should be in the voter's list of the village
2. He should be twenty five years old
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions :

A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a centre.
5. It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It arranges for sufficient irrigational facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village
8. In some states, the Gram Panchayat enjoys also certain judicial powers It decides petty civil and criminal cases and imposes fine upto Rs. 100

(V) Census Concepts

Building :

A 'Building' is generally a single structure on the ground Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such

as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc

Usually a structure will have four walls and a roof But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.-

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of -permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene

Room :

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc , should be regarded as a room An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question

One is likely to come across conical shaped hut or tent in which human beings reside In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not .strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.- In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office , etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households

Census house :

A 'census house' is a building or part of a

building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant It may be used for residential or non- residential purpose or both

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder :

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard By definition, this has to be treated as five census houses If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house

In case of hostels, hotels, etc , even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village

Rural-Urban area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously

i) a minimum population of 5,000,

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits, and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq km and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns -

City :

Towns with population of 100,000 and above are called cities

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns In some cases railway colonies, university campuses, port areas, etc , may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e , towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted·--

i) a city or town with one or more contiguous outgrowths;--

ii) two or more adjoining towns with their outgrowths; and--

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen There may be one member households, two member households or multi-member households

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households .

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes:

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Dhangar
28 Dhanuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
33 Dusadh
34 Gharami
35 Ghasiya
36 Gond
37 Gual
38 Habura
39 Hari
40 Hela
41 Kalabaz
42 Kanjar
43 Kapariya
44 Karwal (excluding Banbasi)
45 Khairaha
46 Kharwar
47 Khatik
48 Khorot
49 Kol
50 Kori
51 Korwa
52 Lalbegi
53 Majhwar
54 Mazhabi
55 Musahar
56 Nat
57 Pankha
58 Parahiya
59 Pasi, Tarmali
60 Patari
61 Rawat
62 Saharya
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue It is not necessary that the language spoken as mother tongue should have a script The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.-

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate A person who can only read but cannot write is not literate It is not necessary

that to be considered as literate, a person should have received any formal education or passed any minimum educational standard Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates

Literacy rate:

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above For different age groups the percentage of literates in that age group gives the literacy rate

Educational level

The highest level of education a person has completed

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker:

A person who has worked for major part of the reference period (i.e six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i e. last one year preceding the date of enumeration) is termed as 'Non worker'

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.--

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator -Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (area).

Agricultural labourer-

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages An agricultural labourer has no right of lease or contract on land on which she/he works.-

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in

Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states --

System of Sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers, those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc , in these towns

Type of latrine and method of disposal of night soil:

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing) Through this sewer the faecal matter is transported without the need for scavenging This system generally exists in cities and big towns

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period

$$TFR = \frac{5 \times S\ ASFR_{15\text{-}19}^{45\text{-}49}}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period

$$TMFR = \frac{5 \times \text{å } ASMFR_{15\text{-}19}^{45\text{-}49}}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per'1,000 population of the same age group

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1-

Probability of dying between birth and age 1 This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2-

Probability of dying between birth and age

q5-

Probability of dying between birth and age This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births. in that year

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz , Neo-natal mortality rate and Post neo-natal mortality rate The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births -during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age-group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1 Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2 Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.--

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz rural to rural, rural to urban, urban to rural and urban to urban

Civic status of urban units-

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e g Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc

Size class of UA / town:

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt defined slums as (a) Areas where buildings are in any respect unfit for human habitation, or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings:

The total population of the district is 2,052,958 in which 1,430,405 live in rural and rest 622,553 in urban parts. There are 4 tahsils in district namely Tundla, Firozabad, Jasrana and Shikohabad The most populous tahsil is Firozabad followed by Shikohabad. Tundla is least populated tahsil preceeded by Jasrana. The urban population in the district is 30.3 per cent. The urban population is maximum at 52.3 percent in Firozabad tahsil. There are 814 revenue villages in the district out of which 795 are inhabited at the 2001 Census and remaining 19 are un-inhabited. The total rural population of 1,430,405 is spread over 9 C.D Blocks.The most populous C.D. Block is Firozabad with a population of 226,557, but the maximum number of inhabited villages (109) are in Kheragarh C D Block. More than half of populated villages have a population in the size of 500-999 and 1000-1999 and such villages form 58.1 percent of total populated villages.Population density in the rural area is 625. It is highest in 318 villages (40.0 percent) with a population density range of 501+ per square kilometer. Such villages contain 52.0 percent of total rural population.

Size – Class and Status of Towns :

In the total urban population of 622,553 as many as 279,102 live in Firozabad (NPP). The next big town is Shikohabad (NPP) with a population of 88,161 The above two are class I and II towns having

the civic status of Nagar Palika Parisad. Rest of 7 towns are 2 Nagar Panchayat (NP), 2 NPP and 3 C.T. Out of which there are three class III towns, one is class IV town, two are class V towns and one is class VI town. Tundla tahsil contains Tundla, Tundla Rly. Colony and Tundla Kham towns, Firozabad tahsil has Firozabad and Sukhmalpur- Nizamabad towns, Jasrana tahsil has Fariha and Jasrana towns, while Shikohabad tahsil has Shikohabad and Sirsaganj towns

Population growth :

At the present territorial jurisdiction the population of the district was 1,533,054 at 1991 Census and growing by 33.9 percent during the decade 1991-2001 it is 2,052,958 at 2001 Census. This decadal growth in the district has been higher than in the state at 25.8 per cent

Population Density :

The district has an area of 2,361 square kilometres. The population density in the district is 870 In the rural areas of the district the density is 625.

Sex Ratio :

The sex-ratio in the district at 852 is way behind to 898 at the state level. Indeed the sex ratio at the district has been all along lower in the district as against the state since 1901. As against urban areas of the district the sex-ratio is lower in rural areas except in the years 1921, 1931 and 1951 to 1971. Among tahsils, highest sex-ratio is in Firozabad and lowest in Shikohabad. Among CD Block the sex-ratio is highest in Kheragarh at 850 and lowest in Madanpur at 830. Out of 795 inhabited villages in the district there are 1.3 percent villages (with 0.4 percent of rural population) which are having a sex-ratio below 700. In the urban parts of the district the sex-ratio is 878 and highest of 889 in Sirsaganj (NPP) and lowest of 848 in Sukhmalpur Nazimabad (CT). The sex-ratio of population on the age-group 0-6 is 887 in the district which is lower than the state's 916. As against a sex-ratio of 888 in the age group 0-6 of rural population of the district, it is highest at 923 in Kotla Narkhi CD Block and lowest at 860 in Tundla CD Block It may be noted that out of 795 inhabited villages in the district in over 6.7 percent of villages with about 2.3 percent of rural population the sex-ratio in the age-group 0-6 is less than 700. As against the 0-6 age-group sex-ratio of 888 in the rural area of the district it is 885 in urban areas. Among towns this sex-ratio is highest at 912 in Fariha (NP) and lowest at 829 in Tundla Kham (CT)

Work Participation Rate :

Out of total of 2,052,958 population of the district of 27.2 percent are workers and rest of 72 8 percent are non-workers. Among workers 22 2 percent are main workers and rest of 5.1 percent are marginal workers of total population. The extent of main workers is highest at 23.3 percent in Firozabad tahsil and lowest at 20.9 percent in Shikohabad tahsil. In case of marginal workers the proportion is highest in Tundla tahsil as 6.7 percent in comparison to only 6.0 percent in Jasrana tahsil. The extent of workers in rural parts and non-workers in urban parts is higher. Of the total workers in the district, 30.6 percent are cultivators and 48.1 percent other workers 18 5 percent of female workers are engaged as cultivators

Literacy :

In the district, 64.5 percent population is literate The literacy is 67 0 percent in urban areas and 63 4 percent in rural areas The male literacy is as high as 75 9 percent as against 51.0 percent female literacy and therefore the gap in male/female literacy rate is 24.9 percentage points. In rural areas among 9 CD Blocks, the highest literacy is at 66.3 percent in Madanpur and lowest at 57.3 percent in Eka. The literacy among males in rural areas is 76.6 percent in comparison to 47.4 percent among females The lowest female literacy of 39.8 percent is in Eka CD Block Also the gap in male/female literacy rate is highest in this CD Block which is 32.2 percentage points.67.4 percent of villages covering also 74.2 percent of rural population the literacy range is 51 to 70. Among urbanites in the district, as much as 74.3 percent males are literates as against 58.5 percent females. The highest urban literacy is in Jasrana (NP) at 84.7 percent and lowest in Firozabad (NPP+OG) at 61.4 percent.The maximum male literacy is also found in Jasrana NP at 93.0 percent and lowest at 68.7 percent in Firozabad (NPP +OG). However, the highest female literacy is in Jasrana (NP) at 75.0 percent and lowest at 53.0 percent in Firozabad (NPP+OG). The maximum gap in male-female literacy rate at 22 8 percentage points is found in Sukhmalpur Nizamabad CT. The literacy among scheduled castes in the rural part is 59.8 percent and 60.9 percent in towns. The literacy rate for scheduled tribes is 80 0 percent in rural areas and 20.7 percent in urban areas of the district.

(viii) Brief analysis of PCA data based on inset tables 1 to 36

The district throws up a vivid picture of its population at the 2001 Census

A few of the peculiar characteristics of the population is being highlighted through the following inset tables

TABLE - 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population 1991 Total	1991 Rural	1991 Urban	Population 2001 Total	2001 Rural	2001 Urban	Percentage decadal variation 1991-2001 Total	Rural	Urban	Percentage urban population 1991	2001

4	Shikohabad	NA	NA	NA	576,380	460,007	116,373	NA	NA	NA	NA	20 2
District Total:		**1,533,054**	**1,125,494**	**407,560**	**2,052,958**	**1,430,405**	**622,553**	**33.9**	**27.1**	**52.8**	**26.6**	**30.3**

The population of tahsils for 1991 Census have not been recasted

The growth rates of the district for total, rural and urban areas and percentage of urban population to total population is given in the above table. The decadal growth rate of the district is 33.9 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 27.1 and 52.8 per cent respectively. Out of the total population of the district 69.7 per cent lives in rural areas while 30.3 per cent lives in urban areas of the district. The proportion of urban population has increased during the decade from 26.6 per cent in 1991 to 30.3 per cent in 2001 in the district. The highest growth of urban population is recorded in Firozabad (52.3 per cent) tahsil and lowest is registered in Jasrana (4.3) tahsil. Urban population is concentrated inFirozabad tahsil.

TABLE - 2
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial Number	District / C D block	Total number of inhabited villages	Total rural population Persons	Males	Females	Number and percentage of villages	Population less than 200 Males	Females	Number and percentage of villages	Population 200-499 Males	Females	Number and percentage of villages	Population 500-999 Males	Females

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 795 inhabited villages, 26 (3 3 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 73 villages having 9 2 per cent villages of the district while in the size class of 500-999 population claims 210 villages with 26.4 per cent of the total villages in the district, 252 villages (31.7 per cent) are in the size class of 1,000-1,999 and 191 villages (24.0 per cent) are in the size class of 2,000-4,999 38 villages (4 8 per cent) in the district fall in the ranges of 5,000-9999 and 5 villages (0 6 per cent) in the population range of 10,000 and above

TABLE - 3 NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

	Name of Town
	1
(a) New	
(i) Statutory town – NIL	
(ii) Census town - NIL	
(b) Denotified - NIL	
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL	
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL	
(iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL	
(c) Declassified - NIL	
(d) Wholly merged with other town(s) - NIL	

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria
During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district

TABLE 4
DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	29	3 6	44 793	3 1
11-20	10	1 3	6,680	0 5
21-50	77	9 7	101,814	7 1
51-100	132	16 6	219,352	15 3
101-200	68	8 6	100,937	7 1
201-300	43	5 4	48,824	3 4
301-500	118	14 8	163,590	11 4
501 +	318	40 0	744 415	52 0
Not known	0 0	0 0	0 0	0 0
District Total:	**795**	**100.0**	**1,430,405**	**100.0**
Population Density (Rural) of the district		625		

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density The maximum number of villages i.e.318 accounting for 40.0 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 52 0 per cent population The lowest ranges of 0-10 and 11-20 persons per sq km cover 39 villages (4 9 per cent) 77 villages (9 7 per cent) have density in the range of 21-50 persons per sq. km while the corresponding proportion in the higher range of 51 to 100 is 16 6 per cent of the total inhabited villages having 15 3 per cent population of the district In the higher densities ranges of 101 to 200 and 201-300 persons account for 8 6 and 5 4 per cent of inhabited villages respectively Both these ranges claim 10 5 per cent rural population

TABLE 5
SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	848	845	887
1911	916	922	866	823	822	848
1921	908	918	834	817	820	782
1931	903	916	813	822	825	790
1941	907	922	824	843	839	878
1951	908	922	827	848	863	775
1961	907	921	817	849	861	796
1971	876	884	826	833	835	827
1981	882	889	850	825	818	845
1991	876	879	864	832	822	861
2001	898	904	876	852	841	878

Note Sex ratio has been defined here as the number of females per 1000 males

As per 2001 Census sex-ratio i e 852 females per 1,000 males has been recorded in the district against the state average of 898 The sex-ratio of the district was lower as compared to the state average figures from 1901 to 2001 The lowest sex ratio of 817 was recorded in the district during 1921 against the state average of 907 in 1941

TABLE 6 :
SEX RATIO BY TAHSILS, 2001

Serial Number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Tundla	851	839	886
2	Firozabad	859	841	875
3	Jasrana	847	847	867
4	Shikohabad	845	836	883
	District Total:	**852**	**841**	**878**

The table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 Census There are 852 females for every thousand males in the district It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas The sex-ratio among rural and urban population is 841 and 878 respectively. The rural sex-ratio in the tahsils varies between 836 and 847 in Shikohabad and Jasrana tahsils respectively In urban areas the highest sex-ratio is recorded in Tundla (886) and the lowest is in Jasrana urban (867)

TABLE 7
SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Tundla	839
2	Kotla (Narkhi)	847
3	Firozabad	837
4	Eka	845
5	Kheragarh	850
6	Jasrana	844
7	Shikohabad	837
8	Araon	841
9	Madanpur	830
	District (Rural) Total:	**841**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 841 females per 1,000 males. Among the C.D blocks the highest sex-ratio of 850 is found in Kheragarh C D block and is followed by Kotla (847) while the lowest of 830 is recorded in Madanpur C D block The sex-ratios of Jasrana, Eka and Kotla C D block are higher than the district rural average of 841 and in remaining blocks, this value is below the district average except Araon which has the same sex ratio of 841 at the district level also

TABLE 8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	10	1 3	5,506	0 4
700-749	23	2 9	14,766	1 0
750-799	110	13 8	159,657	11 2
800-849	319	40 1	649,548	45 4
850-899	242	30 4	509,826	35 6
900-949	66	8 3	74,191	5 2
950-999	16	2 0	13,700	1 0
1000-1099	8	1 0	3,195	0 2
1100+	1	0 1	16	0 0
District Total:	**795**	**100.0**	**1,430,405**	**100.0**
Sex ratio (Rural) for District:		**841**		

Table 8 presents the distribution of villages by sex-ratio ranges based on 2001 Census The maximum number of villages i.e.319 accounting for 40.1 per cent of the total villages having largest population of 45.4 per cent in the district fall in the sex-ratio range of 800-849. It is followed by the sex-ratio range of 850-899 which claims 242 villages (30.4 per cent) and 35.6 per cent population. The highest range of 1,100 and above claims one village (0.1 per cent). This range shares only 16 rural population of the district while in the sex-ratio range of 900-949, there are 66 villages (8.3 per cent) In remaining sex-ratio ranges of 950-999 and 1000-1099, the number of villages are 24 (3.0 per cent) with proportion of 1.2 per cent population. In these ranges, the percentage of population is comparatively low. 10 villages (1.3 per cent) fall in the lower sex-ratio ranges of less than 700 females but table shows that in majority of villages the sex-ratio is significantly higher

TABLE 9
SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

		Urban	**110,520**	**58,638**	**51,882**	**885**

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district Total population in age-group 0-6 is 400,407 persons comprising 212,202 males and 188,205 females. The total sex-ratio in this age-group works out as 887 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 888 and 885 in this age-group respectively The rural sex-ratio among tahsils varies between 860 in Tundla tahsil and 903 in Firozabad tahsil. The sex-ratios of Firozabad tahsil and Jasrana tahsil are higher than district rural average 888.

TABLE 11
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

900-949	114	14 3	54,398	18 8
950-999	80	10 1	31,492	10 9
1000-1099	93	11 7	28,934	10 0
1100+	58	7 3	8,376	2 9
District (Rural) Total	**795**	**100.0**	**289,887**	**100 0**
Sex ratio (Rural) for District:		**888**		

Table 12 shows the distribution of villages in nine sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e.152 (19.1 per cent) having largest population (26.9 per cent) in the district (rural) fall in the sex-ratio range of 850-899. It is followed by the sex-ratio range of less than 900-949 which claims 114 villages (14.3 per cent) and 18 8 per cent population Next to it,113 villages (14 2 per cent) are in the range of 800-849 with 14.5 per cent population 93 villages (11 7 per cent) having 10.0 per cent population fall in sex-ratio range of 1000-1099. In remaining sex-ratio ranges of 700-749, 750-799, and 950-999 and 1100+ claim less number of villages and these are distributed as 41 (5.2 per cent), 91 (11.4 per cent), 80 (10 1 per cent), 58 (7 3 per cent) respectively. In these ranges, the percentage of population is also low It becomes clear from the table that more than fifty per cent of villages fall in the higher sex-ratio ranges of 800 to 949

TABLE13
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS /TOWNS, 2001

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in Table-21 The literacy rates are worked out by excluding population of 0-6 years As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 64 5 per cent in the district. This proportion in rural area is 63 4 per cent against 67 0 per cent in urban areas In the district the literacy rates of males (75 9 per cent) is much higher than that of females (51 0 per cent) Among the tahsils, Tundla tahsil tops with 68 1 per cent literates followed by Shikohabad

tahsil(67 4 per cent). Firozabad tahsil with (63 0 per cent) and Jasrana Tahsil (61.6 percent) literates stands at the bottom in the district. Out of 4 tahsils, the literacy rates of Tundla and Shikohabad tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas

The gap between male and female literacy is quite high which comes to 24 9 percentage points in the district The situation at tahsil level is not much different However, this gap in urban literacy is low which comes to 15 8 percentage points against the rural areas, where the gap between male and female literacy is 29 1 percentage points

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C D. block level in the district. 63 4 per cent of the total rural population (excluding the age-group of 0-6 years) are literates in the district. The corresponding proportion of male and female literates comes to 76.6 and 47.4 percentage points respectively which shows very wide gap of 29.1 percentage points in male and female literacy. At C.D. block level, Madanpur C D. block has the highest rural literacy rate of 66 3 percent while 78.4 per cent males and 51.4 per cent females are literate in this block. The lowest literacy rate in rural areas is noted in Eka C.D block (57.3 per cent). There are wide variations in male and female literacy in all the C D. blocks of the district The maximum difference of 32 2 points is found in Eka C.D. block

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates, Firozabad town is way ahead of other towns. The table reveals that literacy rate is high in the urban areas of the district (67.0). The literacy rate is quite high (above 88.0 per cent in three towns) among males. Females literacy rate is above 70 per cent in four towns.However, literacy rate among females is low (55.2 per cent) in Sukhmalpur Nizamabad CT. The gap in male-female literacy rate is also high (22.8 percentage points) in this town.

Table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 Census. The number of illiterates is more than literates in the district (urban) . The percentage of literates is least in Firozabad (NPP + OG) among 9 towns but the gap in male/female literacy rate is highest in case of Tundla Railway Colony (CT). The males in all the 9 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Tundla Kham (CT) and Farha (NP) and also the female literacy rate is highest in Farha (NP).

TABLE 28
NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of CD block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers works out as 27.2 percent of the total population in the district. The total workers are comprised of 22.2 percent of main workers and 5.1 percent of marginal workers and the remaining 72.8 percent are non-workers.

Table 32 shows C.D. Block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of 1,430,405 total rural population of the district, 21 8 percent has been categorized as main workers and the marginal workers constitute 5 7 percent and the remaining 72 5 percent fall in the category of non-workers. The sex-wise break up at the district level shows that 37.7 percent males and 2.8 percent females are in the category of main workers. Male and female marginal workers account for 7.2 and 4.0 percent respectively. The percentage of female main and marginal workers is lower than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 27.5 percent. At the C.D. block level, Jasrana has highest proportion of total workers forming 30.4 percent of the total population. It is closely followed by Tundla (29.3 percent), Eka (28.6 percent) Madanpur (28.1 percent), Kheragarh and Firozabad (26.8 percent), Araon (26.7 percent) and Kotla (Narkhi) (26.2 percent). The lowest percentage of 25.7 percent is recorded in Shikohabad C.D. block.

Note. Percentage of Workers to total workers is given in brackets

It can be seen from Table 34, that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 30.6 per cent of the total workers (main + marginal) and remaining 14.9 per cent of total workers are engaged as agricultural labourers, Household industry workers (6.4 per cent) and other workers (48 1 per cent) in the district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 14.7 per cent in Firozabad tahsil and 52.9 per cent in Jasrana tahsil These variations within the district may be due to cropping and land holding patterns. The percentage of female cultivators is 18.5 per cent which is very low as compared to 32.2 per cent male cultivators in the district. The percentage of agricultural labourers (14.9) and household industry workers (6 4) is very low in the district as stated above The highest proportion of 70.4 per cent of other workers is recorded in Firozabad tahsil while the lowest proportion of 20.9 per cent is found in Jasrana tahsil

Note: Percentage of Workers to total workers is given in brackets

Table 35 presents C.D. blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers main+marginal) 27.5 per cent of total population. Among these workers, cultivators constitute 42.9 per cent, 20.7 per cent agricultural labourers, 5 5 per cent household industry workers and 30.8 percent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 5.5 per cent workers of the total working force. Therefore, surplus working force has to depend on primary activities. Among cultivators, the per centage of females (26 3 percent) is lower than males (45 1 percent) in the rural areas of the district. The males play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 26.6 per cent in Firozabad C.D. block to 57.7 per cent in Jasrana C.D. block. Similarly for other workers, the lowest proportion is 14.1 per cent in Jasrana C.D. block while 60.6 percent is the highest in Firozabad C.D. block. The per centage of agricultural labourers and household industry workers together is quite low i.e. only 26.2 percent in the district. The per centage of agricultural labourers is highest in Araon (34.0) C.D block and is followed by Madanpur (28.1). In other C.D. blocks, this proportion is quite insignificant. Similarly, the proportion of household industry workers varies in C.D. blocks between 3.3 percent in Araon and 8 0 percent in Tundla.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (89.3), followed by household industry workers with 8.3 percent (6.7 percent male and 19.7 percent females). If we observe each town, the

table reveals that highest percentage of household industry workers (15.0) is recorded in Sukhmalpur Nizamabad. In the agriculture labourers category Firozabad (NPP) is recorded very low percentage (0.4). Cultivators are also very low (0.2 percent in Jasrana (NP), 0.4 percent in Firozabad (NPP) and 1.1 percent in Sukhmalpur Nizamabad (CT). As the usual trend recorded in the urban areas, other workers are in high percentage (98.8 percent) in Jasrana, 91.0 percent in Shikohabad (NPP) and 90 4 percent in Firozabad (NPP).

(ix) Brief analysis of the Village Directory and Town Directory data on inset table 37 to 47: One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE - 37

Note - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

\# Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village Out of 795 inhabited villages in the district, 671 villages or 84.4 percent have been provided with education facilities of one type or the other Similarly, 338 villages in the district constituting 42.5 percent have medical facilities of one type or the other. Improved drinking water facility is available in790 or 99.4 percent villages. As regards post office facility which includes facilities like telegraph office and post & telegraph, 138 villages constituting 17.4 percent of villages have been provided with post office facility

within the village. 185 or 23.3 percent villages have been provided with the telephone facility, 112 or 14.1 percent with transport facility, 65 or 8.2 percent villages with bank facility and 96or 12.1 percent with agricultural credit societies. Similarly, there are 583 or 73.3 percent villages which have been linked with the pucca road. Total 675 or 84.9 percent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Firozabad C.D. block has the highest 92 0 percent villages where educational facility is available and lowest 75.3 percent is found in Eka. Medical facility is highest in Jasrana (68.2 percent) and lowest (14.0 percent) in Eka C.D. block. Improved drinking water is available to cent-percent villages in Tundla, Kotla, Kheragarh, Shikohabad and Madanpur blocks while in other blocks, it is above 98.0 percent. Telephone facility is highest in Araon (48.5 percent) while not a single village of Tundla C.D. block enjoy this facility. Transport and communications is less developed in Firozabad C.D. Block where only 6.0 percent villages are covered by this facility whereas 27.4 percent villages of Kotla (Narkhi) C.D. block are availing this facility. In the field of power supply all villages have been covered except 120 villages in the district.

TABLE 38

NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,430,405 persons in the district, 1,355,521 or 94.8 per cent have educational facility of one or the other type. Similarly, 773,325 or 54.1 per cent population has medical facilities while 1,428,379 or 99.9 per cent have got improved drinking water facility. Post office facilities are available to 512,132 or 35.8 per cent population. Telephone facility is available to 429,571 or 30.0 per

cent. Transport communications facility is available to 308,556 or 21.6 per cent. Bank facility is available to 198,290 or 13.9 percent 279,326 or 19.5 percent have been provided with the facility of agricultural credit societies. 1,219,680 or 85.3 per cent have been provided with the facility of approach by pucca road Power supply is available to 1,285,883 or 89.9 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level However, in Jasrana C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population.

TABLE - 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col 2 - 4)
	2	3	4	5
1 Education				
(a) Primary School	123	7	0	130

6 Banks				
(a) Commercial Bank	346	268	128	742
(b) Cooperative Bank	190	326	249	765
7 Agricultural Credit Societies	487	150	62	699

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 130 villages do not have primary school in their villages and out of these villages, children of 123 villages have to travel less than 5 kms. for schooling. Out of 795 inhabited villages as many as 581 are deprived of middle school and 779 of degree college. Of these 389 avail the facility of middle school at a distance of less than 5 kms., 186 at a distance 5-10 kms and the remaining 6 at a distance of 10+ kms. In respect of degree college 137 avail this facility at a distance of less than 5 kms., 242 between 5 and 10 kms. and rest 400 villages at a distance of 10+ kms.

Similarly, there are 773 villages in the district which have been devoid of Hospital facility and 774 villages which are deprived of PHC facilities. Of these 220 villages have the facility of Hospital available within 5 kms. while in respect of 261 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 292 villages have this facility at a distance of 10+ kms. As regards PHC 194 avail this facility at a distance of less than 5 kms., 354 at a distance of 5-10 kms. and the remaining 226 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 657 villages do not have this facility in the village itself. Of these majority i.e. 545 have this facility at a distance of less than 5 kms., another 97 villages avail it at a distance of 5-10 kms. In the remaining 15 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 610 villages in the district which are without telephone facilitiy. Of these 304 avail this facility at a distance of less than 5 kms., 153 at a distance of 5-10 kms. and remaining 153 have to traverse a distance of 10+kms.

For Bus service, out of 699 villages which do not have facility, 324 villages avail this facility at a distance of less than 5 kms., 237 at a distance between 5-10 kms. and 138 at a distance of 10+kms.

In the entire district 742 villages are deprived of Commercial Bank & 765 of Co-operative Bank. Of these 742 villages which are deprived of Commercial Banks 346 villages avail this facility at a distance of less than 5 kms., 268 between 5-10 kms. & the remaining 128 at a distance of 10+ kms. Regarding Co-operative Banks out of 765 villages 190 villages avail this facility at a distance of less

than 5 kms., 326 at a distance of 5-10 kms. and remaining 249 at a distance of 10+ kms. 699 villages do not have agricultural credit societies. This facility to 487 villages is available at a distance of less than 5 kms., 150 at a distance of 5-10 kms and the remaining 62 at a distance of 10+ kms.

TABLE 40

DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 795 inhabited villages in the district, there are 189 villages which have nearest towns upto a distance of 5 kms. Of these only 161 villages forming 85.2 percent are having the educational facilities of one type or the other and 83 villages constituting 43.9 percent, have the medical facilities within the village, 25 villages forming 13.2 per cent have the facility of post office within the village and 50 or 26.5 percent have the facility of telephone. 26 villages constituting 13.8 percent have been linked by transport service. 14 villages comprising 7.4 percent have been provided bank facilities, while 27 villages constituting only 14.3 percent have been provided by agricultural credit societies. 144 villages comprising 76.2 percent have been provided with pucca road.

There are 530 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these, 440 villages constituting 83 0 percent have been provided with the educational facilities. 225 villages comprising 42 5 percent have been provided with medical facilities. 99 villages constituting 18.7 percent enjoy the post office facility. 124 villages comprising 23.4 percent have been provided the telephone facility. 74 villages constituting 14.0 percent have been linked with transport communications. 44 villages comprising 8.3 percent have bank facility .62 villages constituting 11.7 percent are having agricultural credit societies, while 389 villages or 73.4 percent are approachable by pucca road. 64 villages fall in the distance range of 16-50 kms. Of these, 90.6 percent villages have educational facility, 42.2 percent with medical, 17.2 percent with post office, 7.8 percent with telephone and transport and communications available to 12.5 percent villages. Banks and agricultural credit societies facilities are available to 6.3 and 9.4 percent of villages respectively. 41 villages comprising 64.1 percent have been provided with pucca road.

There is no any village in the district which is situated beyond 50 kms.from the nearest town. There are 12 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 12 or 100 percent villages have the educational facility of one or other type. 3 villages constituting 25.0 percent have the medical facility. 3 villages constituting 25 0 percent enjoy the post office facility, 6 villages comprising 50.0 percent have been provided the telephone facility, 4 villages constituting 33.3 percent have been linked with transport communication villages comprising 25 percent have Bank facility, only one village constituting 8.3 percent have Agricultural Credit Societies facilities and 9 villages comprising 75.0 percent have been provided with pucca road.

Post office includes Post office, Telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Firozabad district out of a total of 795 inhabited villages, 99 villages have a population of less than 499 persons. Of these, 33 villages (33.3 percent) have education facility, 17 (17.2 percent) have medical facility, 96 (97.0 percent) have improved drinking water facility. No villages have post office facility. 10 (10.1 percent) have telephone facility. 8 villages (8.1 percent) have transport and communication facility. 6 (6.1 percent) have bank facility. No villages have been provided with the Agricultural credit societies, 51 villages (51.5 percent) have been linked with pucca road. 66 villages (66.7 percent) have been provided with electricity

Out of 210 villages, which fall in the population range of 500-999 persons, 166 villages (79.0 percent) have been provided with education facility, 73 (34.8 percent) with medical facility, all the villages except one village have improved drinking water facility. 8 villages (3.8 percent) have been provided with post office facility, 28 villages (13.3 percent) with telephone facility, 24 villages (11.4 percent) with transport facility, 7 villages (3.3 percent) with bank facility, 17 villages (8.1 percent) with agricultural credit societies and 117 villages (55.7 percent) have approach by pucca road and 169 villages (80.5 percent) have been provided with electricity facility.

252 villages fall in population range of 1,000-1,999 persons. 243 villages (96.4 percent) have education facilities whereas 104 villages (41.3 percent) enjoy the medical facility, 29 villages (11.5 percent) have post office facility, 59 villages (23.4 percent) have telephone facility, 23 villages (9.1 percent) have transport communication facility, 17 villages (6.7 percent) have bank facility, 23 villages (9.1 percent) have agricultural credit societies, 201 villages (79.8 percent) have approach by pucca road and 230 villages (91.3 percent) have power supply facility. All the villages except one village have improved drinking water facility

There are 191 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy the facility of improved drinking water. 186 villages (97.4 percent) have been provided with education facility. 114 villages (59.7 percent) have medical facility, 69 villages (36.1 percent) have post office facility, 25 villages (13.1 percent) have bank facility, 42 villages (22.0 percent)

are having agricultural credit societies, 73 villages (38.2 percent) with telephone facility, 172 villages (90.1 percent) have approach by pucca road facility and 168 villages (88.0 percent) have the facility of electricity. There are 43 villages in the district having a population of 5,000 persons and above with maximum amenities

TABLE 42
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of CD block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area

	District Total:	**795**	**925791.2**	**NA**	**90.0**

Note . - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available in inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 795 inhabited villages in the district having a total area of 925,791.2 hectares. 90.0 percent of total cultivable area is irrigated. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Tundla block with 62 villages have a total area of 24,036.3 hectares. In Kotla (Narkhi) block, all the 84 villages have a total land area of 25,667.2 hectares, of this 95.6 percent of land is cultivable and of the aforesaid area 100.0 percent is irrigated. In Firozabad block, all the 100 villages have a total area of 22,569.0 hectares, of this cultivable area is 67.8 percent and 84.7 percent is irrigated. In Eka block, all the 93 villages have a total area of 35,259.0 hectares. Of this, cultivable area is 75.4 percent. Of cultivable area 84.1 percent is irrigated. Kheragarh block with 109 villages have a total land area of 23,491.5 hectares, of this 89.7 per cent is irrigated Jasrana block with 66 villages has a total land area of 23,136.3 hectares. Of this, 82.3 percent is cultivated area, out of which 96.5 percent is irrigated. Shikohabad block with a total 107 villages have an area of 240,255.9 hectares. Of this, 15.8 percent is cultivable area, out of which 88.2 percent is irrigated. In Araon Block all the 68 villages have a total area of 200,264.0 hectares, of this, 9.8 percent is cultivable area, out of which 94.5 percent is irrigated. In Madanpur Block, all the 106 villages have a total area of 331,112.0 hectares, of this, cultivable area is 4.7 percent. Of cultivable area 81.2 percent is irrigated.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure

6	Fariha, NP	--, --, --	Potato, Rice, Food Grains
7	Jasrana, NP	--, --, --	Mango, --, --
8	Shikohabad, NPP	Bulb, Tube Light, --	Bulb, Tumbler, Paper
9	Sirsaganj, NPP	Shoes, Potato Chips, Pulses	Potato, Shoes, Food grains

Table 47 indicates most important articles manufactured and exported out of the each town in the district The district is well known for Glass works and potato production centre. The chief export items of the district are Potato, Glass items Food grains which are produced in Firozabad (NPP) and other towns and these are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities,collected during Houselisting Operations, Census of India 2001 based on inset tables 48 to 52:

Data on houses and household amenities have traditionally been undertaken a few months before each census Based upon data collected in the

houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/ moped, car/jeep and banking facility availed by household etc. for the first time have been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48

HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source Census of India 2001, H- series. "Tables on Houses, Household amenities and Assets "

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 307,535 consisting of 220,610 rural and 86,925 urban households 67,372 households belong to Scheduled Castes and 3,633 to Scheduled Tribes. 285,286 households are living in their owned houses constituting 92.8 percent of total households. Of these households, the largest number of households (111,454) have occupied single roomed accommodation and is followed by Double roomed accommodation numbering 87,712 households. Next position is claimed by households (42,216) occupying three plus roomed accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 39,941 households while 3,963 households are without any exclusive room.

19,794 households living in rented accommodation account for 6 4 per cent of total number of households in the district. The largest number of 11,366 households are living in single roomed accommodation followed by 5,641 households in double roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering 2,455 forming only 0 8 per cent of total households are distributed in single roomed accommodation numbering 1,255 double roomed 588 and 303 in three roomed accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture

TABLE 49
PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Sl No	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary

	District Total:	**74.2**	**9.8**	**16**	**67.1**	**11.2**	**21.6**	**92.0**	**6.3**	**1.7**

Data source· Census of India 2001, H-series Tables on Houses, Household amenities and Assets

Note -

Permanent.- 1 Permanent houses refer to those houses whose walls & roofs are made of pucca materials i e where, burnt bricks GI Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials

The percentage distribution of households as shown in the above table reveals that more than 74.2 percent of the households in the district had permanent houses. The trend is different in rural (67 1 percent) and urban area (92.0 percent) Among tahsils highest proportion of permanent houses were accounted in tahsil Firozabad (84.4 percent) followed by Tundla (80.0 percent), Shikohabad (69.2 percent) and lowest in Jasrana (59.5 percent). In respect of semi-permanent houses, the returns were 9.8 percent at district level where as among tahsils, in Shikohabad it was 13.2 percent and lowest of 5.6 percent in tahsil Tundla. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 1.2 to 12.1 percent. Temporary houses in the district lie between the range of 8.4 and 28.3 percent.

Data source Census of India 2001, H-series Tables on Houses, Household amenities and Assets

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Inproved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Note Percentage is to be given in brackets after the number of households

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage menas closed and open drainage

The above table shows that out of total households of the district 82.3 percent of the households had improved drinking water facility. The proportion of rural and urban area was 80 0 and 88.1 percent respectively. Tahsil Firozabad had highest order of proportion of households where percentage for rural area was 82.7 and 85.7 percent in urban areas. Electricity was available to 34.2 percent of households at district level. Bathrooms and toilet facilities were available in 22.9 and 32.4 percent of households respectively. Tahsil Jasrana poorly served in respect of these amenities.Drainage facility was available highest 89.9 percent in Tundla and lowest 84.8 percent in Jasrana Tahsil At district level drainage facility was available to 88.4 percent of households, whereas the proportion of rural and urban areas households accounted for 86 9 and 92.2 percent respectively.

Percentage in brackets

Data source Census of India 2001, H-series Tables on Houses, Household amenities and Assets

It is observed from the above table that 49.9 percent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is 54.8 and in urban area it comes to 37.6 percent of households LPG (cooking gas) has been reported as one of the fuel for cooking of food in 14.4 percent of the households. The composition of rural and urban comes to 2.8 and 43.7 percent respectively. Kerosene is used for cooking in only 2.1 percent of the households (0.1 percent rural and 7.3 percent urban households). The other methods like crop residue, cow dung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.1 percent and 16.7 percent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood 49.9 percent followed by cow dung cake 16.7 percent and crop residue (15.5 percent). The table shows that firewood, cow dung cake, crop residue and LPG (cooking gas) are the predominant fuel for cooking in the district.

Data source Census of India 2001, H-series Table on Houses, Household amenities and Ass

This table presents data for total rural and urban areas at district/tahsil level about households availing banking services and possession of assets such as radio, transistor, telephone, bicycle, scooter and car etc, by the households. There are 307,535 households in the district and among them 90,983 households, availing banking services. 92,279 households have radio/transistor. Television is possessed by 87,037 households. Telephone is available in 15,239 households. Bicycle is available to 220,493 households. Scooter, Motor cycle, Moped and car, jeep, van are used by 30,050 households and 4,597 households respectively. The none of the specified assets 56,223 households in the district the picture in use of Banking services and possession of assets by households at tahsil level is almost similar as analysed above for the district as a whole.

(xi) Major Social and Cultural Events, natural and administrative development and significant activities during the Decade :

No social, cultural or natural development worth mentioning has taken place during the last decade. However, a major administrative change has taken place during the last decade. A new tahsil Tundla came into existence with 65 villages, 3 town and 49 gram sabhas.

(xii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district :

The main places of tourist interest are as under:

1. **Chandrawar :** It is located 5 kms. towards south-west of Firozabad on the bank of river Yamuna. It is covered with deep ravines. It is said that Chandrasen, a chauhan ruler had founded this village. It was a place of importance during early Muslim period , when rulers of this area resisted the invaders. It lost seat of rulers in 1566 when Firozabad was founded. There are ruins of fort, several temples and mosques. The tomb of shah, a sufi of Akbar's father's time, have a beautiful gateway amidst picturesque surroundings. A fair is held in the month of October every year.

2. **Tundla :** It is located at a distances of 14 kms. east of Agra from Firozabad on Agra – Firozabad – Etawah road. It is an important junction of northern railway. It is also a growing town. Large railway colony in itself is a township

3. **Kheragarh :** The village lies 87 kms. to the south of Mainpuri. There is an old fort of Chauhan rulers.

4. **Mustafabad :** The village is known after Mustafa Khan, a local magnate in the reign of Jahangir. A mud fort was constructed during 18th century by Nawab of Awadh. There is an old well known as "Oudhari". It is famous for purity of water.

5. **Purhan :** There is a belief that it's name is attributed to "Parekshit". It is called a 'Burdan'. There is a tank called 'Parekshit kund' It was excavated many years ago. During the excavation, some coconut, betel nut and cloves with harmless snakes were found in the kund. It is said that Parekshit's son Janmejaya made a sacrifice after the death of his father who died of snakebite. There are ruins of an old fort, some stone sculptures and well called 'Parekshit Kund'. There is a shrine of Jokanja. There is large gathering of persons on Sunday in the second half of the summer months of Ashad and Magh to cure sterility to invoke easy childbirth

(xiii) Major Characteristics and Contribution of the District

Firozabad district is unique in the state The bangles and glass industry of the district caters to the need of all over the state as well as neighbouring states of the country. The district possesses distinct ethnic culture.

(xiv) Scope of Village Directory and Town Directory

Village Directory

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rationale of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories

1.	Population and households	Cols 4 & 5
2	Amenities.	Cols.6 to 13
3	Other infrastructural facilities etc.	Cols 14 to 16
4.	Availability of news paper/ magazine	Column 17
5	Commodities manufacture	Column 18
6	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances

during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts

PART - A VILLAGE AND TOWN DIRECTORY
(SECTION I AND II)

SECTION I - VILLAGE DIRECTORY

Section - I : Village Directory

(a) Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U A , the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i e., Serial number, Name of village & location code number and area of the village against column no 4 to 18 The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows'-

Columns 1 : Serial Number

Self explanatory All the villages within the CD Block are presented serially in the ascending order of their location code number

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages

Column 3 : Area of the village

The area of the villages in hectares are given Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc , in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz < 5 kms , 5-10 kms and 10+ kms of the nearest place where the facility is available is given Column wise details are given below

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school Pre-basic school, pre-primary school, junior basic school upto class V

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e g Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e g P(3), M(4), etc

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes .

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA

	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	*Child Welfare Centre*	*CWC*
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e g. H(3), D(4), etc

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows .

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc the same is indicated in codes mentioned below along with the number of banks in brackets If not available the distance of nearest place where the facility exist is given

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i e Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets In case the facility is not available within the village the distance of the nearest place where *such facility exist is given :*

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns If not available the particulars of the nearest place with the facility is recorded The information is indicated in codes mentioned below along with the number of such facilities in brackets

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows·

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes ·

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts are furnished against these columns The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns The area figures are given in hectare(s) up to one decimal Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices

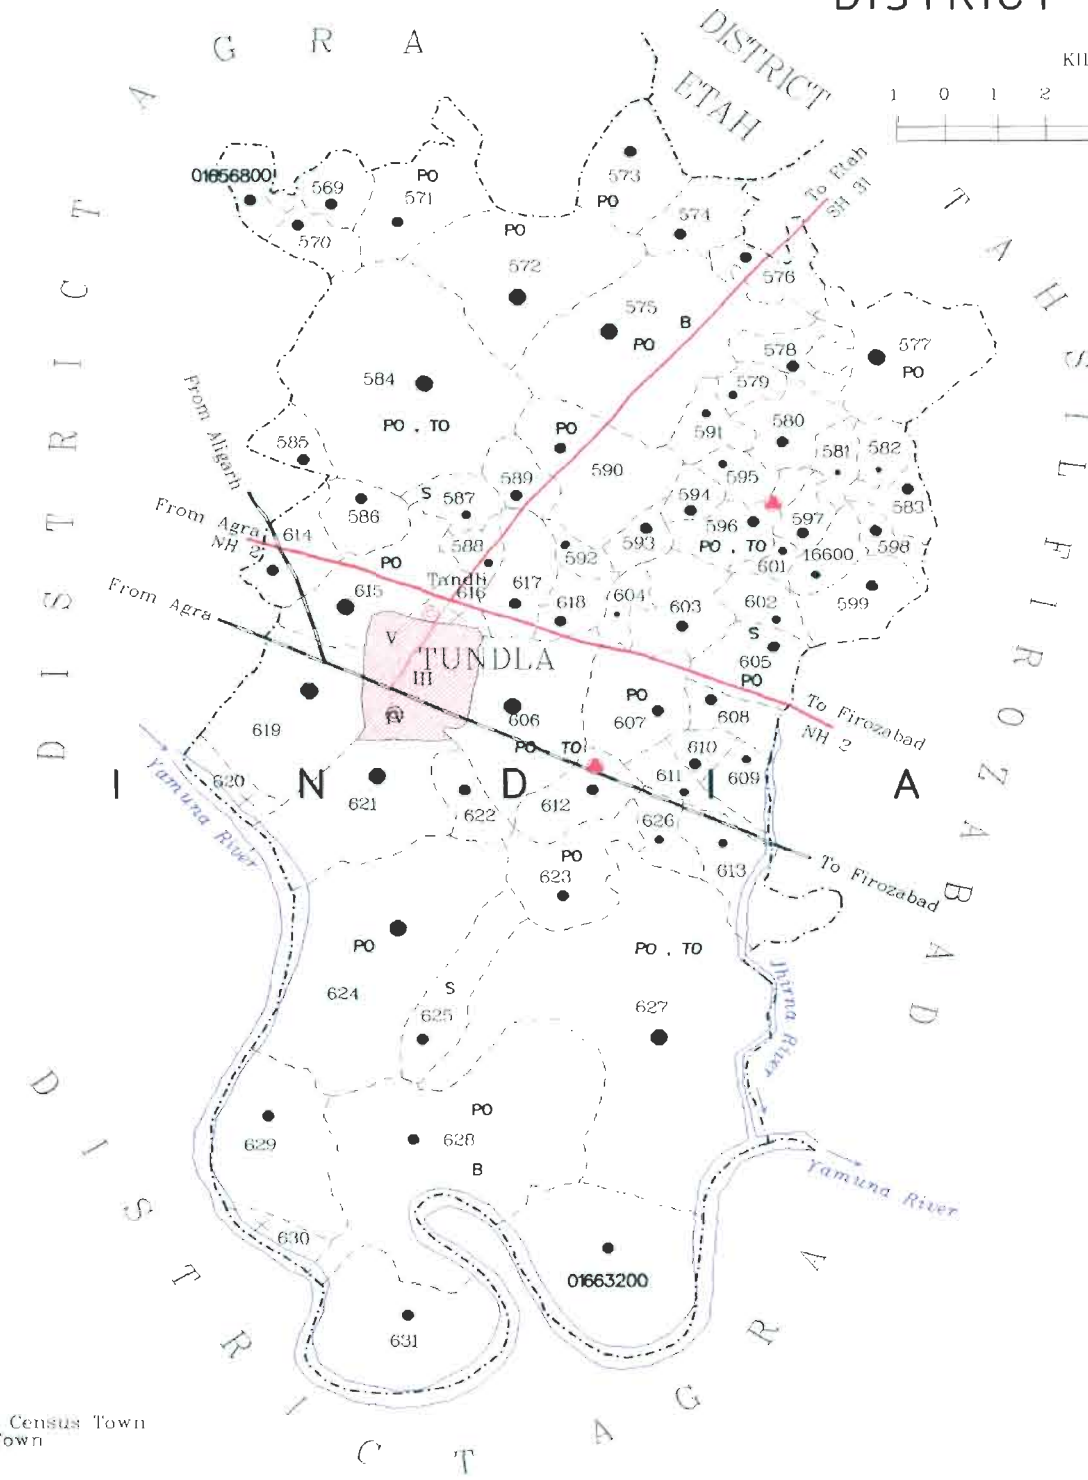

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat
Appendix-IX	Shows number of different types of girls school in a village

Information not available for this district				

Section II - Town Directory

Section II - Town Directory

(a) Note explaining the abbreviations used in the Town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal Its name is to be mentioned If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns .

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e g D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A

(ii)	Unani	U
(iii)	Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used .

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B Ed College, Teacher's Training Institute, Music / Dance School, Nursing School etc are covered under 'Others'

Column 11 to 14.

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools

School up to class V are treated as Primary or elementary schools These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary

Schools upto class X are considered as Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number *of Primary and Middle schools, respectively* For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g P(4), M(3)

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission.' There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B - PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included In 1981 census only main workers were presented in to four categories One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s)

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town

ANNEXURES I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAMPANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Firozabad
q1	Persons	99	111
	Males	98	104
	Females	104	119
q2	Persons	117	124
	Males	117	110
	Females	118	142
q5	Persons	134	143
	Males	135	117
	Females	132	172

(*Undivided Uttar Pradesh at 1991 Census)

The child mortality by ages 1, 2 and 5 years has been higher in the district as against the State The child mortality indicators in the district for females were in higher order as compared to the State by ages 1, 2 and 5 years

Annexure – III
Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No	Fertility Measures	Person Male Female	Uttar Pradesh	Firozabad
1	2	3	4	5
1	CBR		37 2	43 2
2	TFR		5 6	6 7
3	TMFR		6 3	7.6
4	GFR		172	205
5	GMFR		200	243
6	Mean age at marriage (1981-91)		17 3	17.3
7	Number of children ever born per ever married woman aged 15-49 years		4 6	5 2
8	Child woman ratio 0-4		631	687
	5-9		752	736

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that Crude Birth Rate (CBR),which is the ratio of the number of live births in a year to the mid year population is 43.2 per thousand as against the state ratio of 37.2.The other different fertility measures like Total fertility rate (TFR), Total marital fertility rate (TMFR), General fertility rate (GFR) and General marital fertility rate (GMFR) of the district are higher to the figures of the state It may be observed a high fertility ratio in the district as against the state . Mean age of marriage during 1981-91 was 17.3 years for the state as well as for the district. Similar trend is observed in the number of children ever born per ever married woman aged 15-49. The state and district figures are placed as 4.6 and 5.2 respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 years has been calculated to 687 and 736 for the district while in case of the state the corresponding figures are 631 and 752. Mostly the fertility variables suggest that fertility levels as such are higher than those of state average.

Firozabad	100 0	100 0	100 0	91 5	89 8	91 9	8 4	10 0	8 0	0 1	0 2	0 1

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence) The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other district of state) was 81 3 percent and 79 6 percent respectively The corresponding figure for the district was 94 9 in 1991, while in 2001 it was 93 2 percent respectively The proportion of in-migrants from other states was 16 2 percent at state level during 1991 Census, whereas it rose to 19 3 percent in 2001 The district level figure was 4 9 percent and 6 6 percent respectively This shows in-migration from other state to this district was increased in 2001 in comparison to 1991 At district level in-migration from other countries was 0 2 percent each in 1991 and in 2001 While at state level figures were 2.5 percent and 1 1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79 6 percent in 1991, while it was recorded 74 1 percent in 2001 at state level District level figures were 94 0 percent and 91 5 percent during 1991 and 2001 Census respectively The percentage of in-migrants from other states worked out to be 18 9 in 1991 and 25 2 percent in 2001 at state level, whereas district figures for both the Censuses were 5 9 percent and 8 4 percent respectively The movement of population from other countries in the district was 0 1 percent each in 1991 and in 2001, while state level figures were 1.5 percent and 0 7 percent respectively

Note For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0 02 percent The remaining tongues have been merged in the column of "Total of other mother tongue"

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82 1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 94 3 percent person in 1991 and 91 9 percent in 2001 Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8 0 percent at the state level whereas 5 5 percent and 8 0 percent at district level in 1991 and 2001 Census respectively Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses
