MOTIF

PATNA BIRD SANCTUARY

Patna Bird Sanctuary established through the Notification No. 2432/14-3-29/90 dated 22.12.1990 issued by the Government of Uttar Pradesh is being maintained and controlled by the National Chambel Animal Sanctuary Project, U.P. of Agra. This bird sanctuary is situated in village Patna of tahsil Jalesar on Jalesar Sikandra Rao road at a distance of 6 kms from Jalesar. It is 56 km away from district Agra and 55 km from the district headquarters and also from district Aligarh. It is spread over an area of 108.86 hectares of land including 38.65 hectares land belonging to a rural society and 70.21 hectares of the private sector. Patna Bird Sanctuary is a natural place having a beautiful lake surrounded by trees of Date, Palm and other forestry environment. During October-March, various beautiful attractive birds from Asia and far away, fly over here and grace the scenic beauty of the lake which besides pleasing the tourists presents glorious view of Goa. Rare birds visible here are crane, painted stark, black necked stark, white necked stark, spot-bill, cotton teal, common teel, sawlar, koot, purple more-hen, spoon-bil, darter, flamingo, pelican, brahmini-duck, comb-duck, prizon, gray maze goose, bar-headed goose, jaicona, galard etc which fly over here from Tibet, Burma, Sri Lanka, Himachal Pradesh and Bay of Kucch. In the sanctuary there is an ancient (pauranic) temple of Lord Shiva where thousand of devotees come to worship on every monday. Owing to its natural beauty and pleasant environment, the Patna Bird Sanctuary is a place of attraction for tourist. Rainy water is the main source of water and hence in summer season is a hard and tough period to keep up its maintenance up to the mark

Annexure III	Various measures of fertility and mean age at marriage, 1991 Census	890
Annexure IV	Percentage distribution of Migrants by place of birth/place of last residence, 1991 Census	891
Annexure V	Brief account of main religions in the district/tahsil as per 1991 Census	892
Annexure VI	Marital status of population as per 1991 Census	893
Annexure VII	Age, Sex and Education in the district, 1991 Census	897
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	900

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so-as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre),

drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri

New Delhi
Dated: 17.10.2006.

Registrar General &
Census Commissioner, India

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Etah ranks 26 th in terms of population in the state.

2. The percentage share of urban population in the district is 17.3 as against 20.8 of the population in urban areas of the state.

3. Etah district has population density of 628 persons per sq.km.which is less than the state average 690 persons per sq. km.

4. Etah district ranks 62nd in terms of sex ratio (849) which is lower than the state average of 898 females per thousand males.

5. Etah district ranks 44th in literacy 54.6 per cent which is below than the state average of 56.3 percent.

6. There are only 93 uninhabited villages out of a total 1,610 villages in the district.

7. Decadal growth rate of the district 24.3 per cent is lower than the state average of 25.8 per cent.

8. Etah tahsil has the highest number of inhabited villages 473 while Jalesar tahsil has the lowest number (159).

9. The district has ninteen statutory towns. No new town has been added after 1991 census.

10. There are 427,839 households in the district accounting for 1.7 per cent of the total households in the state. The average size of households in the district is 6.5 persons.

IMPORTANT STATISTICS

			State		District	
			Uttar Pradesh		Etah

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

The birth place of Lava-Kush, sons of Lord Rama, the tract- part of old pachlana place included in Etah, had been an important place in the country. It is said that Shooker Kshetra (Soron) in tahsil Kasganj was the first to come into existence on the earth at the time of creation. There are references in Hindus, old religious books that the renowned king Bhagirath who is credited with having brought the Ganges to earth, undertook the first penance at this place. Local traditions associate the place with Rama, the celebrated king of Kosala, successor in the line of king Bhagirath. Bhagwat Puran says that Lord Vishnu had also appeared in the form of "Varah" (Boar) at Soron in the district. It is also said that tahsil Aliganj of the district owes its origin to Agastya – a Vedic sage.

History of the district shows that the place was the part of Shung, Chalukya, Kushana, Nag and Gupta empires. In the period of Hun and Kanyakubja, the tract had been also the important part of the country. There can be no doubt that at the time of Hiuen Tsang' visit, the Etah district formed an integral part of Harsh's kingdom with the capital of Kannauj subsequently its fortunes were probably linked with the fate of kingdom at the hand of Mahmud and a host of successive invaders. After them Mughals came into power and ruled over it. In the era of Muslim rule Ghayasuddin Balban, Babar, Shershah and Aurangzeb were the importatant emperors who took over the administration of the district in

their respective regimes. In 1737 Maratha troops took over the administration of the place. Later Nawab of Farrukhabad had gained ascendance in the area. In the light of British interference the territory now included in Etah district came under the administration of British's in 1801-02.

During the reign of Akbar, almost the whole of the present district of Etah was the part of subah of Agra. In the period of Maratha's supremacy the district that lay within was split up into territories of Etawah, Farrukhabad, Mathura and Aligarh. The district was ceded to the British by the Nawab of Avadh in 1801-02 who took over the charge from Nawab of Farrukhabad. An officer was posted in 1811 at Patiyali to run the administration exercising criminal jurisdiction over all the surrounding parganas. In 1816, the headquarters of Patiyali sub division were shifted to Sidhpura. In the same year parganas Bilgram, Faizpur-Badaria, Soron and half of the Marchara were transferred from Etawah to Aliganj while Etah-Sakit, Sahawar and rest of Marehara remained with Etawah. With other changes in the district Etah was made the headquarters of the district in 1852. In 1856 parganas Marehara and Pachlana were received from Aligarh. In 1879 the parganas of Jalesar which had until 1874 formed part of the Mathura district, was transferred to this district and constituted a separate Tahsil.

(iii) Administrative Set-up

The district of Etah is situated in the north-east of Agra division. The seat of the district administration is at Etah. The district comprises of 5 tahsils, namely Kasganj, Patiyali, Aliganj, Etah and Jalesar. There are 15 community development blocks spread over 5 tahsils of the district Kasganj tahsil has four C.D. blocks, Patiyali has three, Aliganj has two, Etah has four and Jalesar has two C.D. blocks. Etah with an area of 1242.16 sq.kms is the largest tahsil in terms of area and tahsil Jalesar with an area of 521.99 sq. kms is the smallest tahsil. These tahsils are within a proximity of 52 kms from the district headquarters the tahsils are further decentralized among 15 development blocks. There are Soron, Kasganj. Amanpur, Sahawar. Ganj Dundwara, Patiyali, Sidhpur, Jaithara, Aliganj, Marehara, Nidhauli Kalan, Shitalpur, Sakit, Jalesar and Awagarh. The urban areas of the district have seven NPP and twelve NP. Number of Police Stations and Police Chauki in the district are 41.

Jurisdictional Changes (1991-2001)

During the year 1991-2001, no jurisdictional change has taken place in the district.

District Administration:

District administration comprises of Revenue, Development, Police(Law and Order), Judiciary and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional magistrate is in-charge, who is now re-designated as Up-Zila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanoongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Each department eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD etc. has district level officer. The district has community department blocks with Block Development Officer (BDO), Assistant Development Officers and Village Development Officers at Village level.

Under the police set-up Senior Superintendent Of Police in big districts and Superintendent of Police in smaller districts are in-charge in the district. Additional Supdt. Of Police (ASP) and Commandant are incharge of their respective area. Deputy Superintendent of Police (DSP) look after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The Judicial administrate of the District is headed by District and Session Judge. In addition there are Additional District Judge, Civil Judicial Magistrate and Munsif Magistrate.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti ect. come under Local self-government.

(iv) Physical Features

(1) Location and size:

District Etah spread over an area of 4,446 sq. km. is a part of southern Upper Ganga plain according to the scheme of regional divisions and lies on the central portion of Ganga and Yamuna Doab. The district lies between the parallels 27°18' and 28°2' north latitude and 78°11' and 79°17' east longitude. It is bounded on the north by the Ganga which separates it from Budaun district, on the west by district of Aligarh, Mathura and Agra, on the south by Agra, Firozabad and Mainpuri and on the east by Farrukhabad. The whole of the district is a level plain. On the northern side of the district the Ganga and its tributary the Burhi Ganga flow from north–west to south-east and from its Khadar lands with old high bank. Rivers Kali, Isan and Arind centering the district from the west, follow the same pattern like that of Burhi Ganga and flow towards south-east. The Sengar also flows on the same pattern in the south- west corner of the district.

(2) Physiography:

The tract in the south of Kali Nadi is continuous series of troughs and depressions. There is a rolling chain of sand hills with large areas of firm soil. The entire tract along the Ganga and south of the Kali Nadi is a fertile land which has brought agricultural prosperity in Kasganj and Etah tahsils. The sandy tract mainly occurs in Aliganj tahsils and barren land in Jalesar tahsil. The geology of the district belongs to Recent. The main sub-order associations of soils are Psamments – Fluvents-Aquents, Orhrepts–Psamments, Ochrepts-Orthents-Rock outcrops–and Ochrepts- Aquepts-Ustalfs. There are no forests in the district.

The total sprawl of the district in respect of area is 4446 sq. km. which is 1.85 percent of Utter Pradesh. On the basis of factors like geology, soils, topography, climate and natural vegetation, the district has been divided into following five sub- micro regions.

Ganga Khadar:

The region extends parallel to the Ganga River in elongated shape in east- west side. It is a Khadar tract demarcated by high bluff from south. The Burhi Ganga is an offspring of the Ganga River, which originates from the Ganga and after flowing parallel in the region again joins the main stream just beyond the region. Actually it is not a separate stream but the old course of Ganga River which has shifted. This left course channel has been renamed as Burhi Ganga. There are numerous pockets of bhur and small water bodies. The Ganga is the main constraint for the development of roads and canals. The geology of the district belongs to Recent. The main sub-order soil associations are Psamments- Fluvents-Aquents, Ochrepts- Psamments, Ochrepts- Orthents Rock out crops and Ochrepts-Aquepts-Ustalfo, There are few local roads, which connect the places within the region. The highways and rail pass through the area and cross the Ganga at Kachhhia. The settlements in general are scattered. Ganj Dundwara, Soron and Sahawar are the important places in this area.

Aliganj Plain:

The region covers parts of Aliganj and Patiyali tahsils and have comparatively higher land surface than the neighbouring regions. It slopes towards south-east direction, Physiographically, it is a plain but bhurs are spread over in many parts of the region. It is more significant near Dhelia, Nagla Sumirat, Sahori villages. The geology of the region belongs to Alluvium, Dun gravels (Recent). The main soil sub-order association is Ochrepts-Orthents–Rock outcrops. There are number of small depressions which are mainly dry during the year. The region is well served by road and railways. There are many roads which criss – cross the region. Aliganj is the tahsil headquarters which is directly connected by roads with the district center. Lower Ganga canal serves the irrigational need of this tract. Besides Aliganj, other places of importance are Patiyali, Bhargain, Raja ka Rampur and Jaithara.

Middle Kali Plain:

The region covers the catchments area of Kali Nadi which drains in the middle of the region. It is more wide in Kasganj, Etah and Patiyali tahsils and narrow towards Aliganj. The slope is towards eastern side. The upper course is known as Nim, Karon, is the other tributary of Kali. Besides there are number of small rivulets which join the Kali on both sides but they are dry in most part of the year. Small patches of bhur are spread over in the region.

A concentration of such patches are noticed near Nadrala and Kanowa villages. Moundus with various sizes are located near Kharuwa, Durra, Bhitauna etc. A few patches of dissected surface are also noticed along the Kali river. The geology of the region belongs to Alluvium, Dun Gravels (Recent). The main soil sub-order association is Ochrepts-Orthents-Rock outcrops. Since it is flat plain, transport and irrigation system are very developed. There are number of major roads which connect the important places of region. Cart tracts and foot-paths join the rural areas. Agriculture is the main occupation which is supported by the Lower Ganga canal system. The important places situated in this region are Kasganj,Bilram, Amanpur, Mohanpur, Sidhpura and Marehra.

Isan-Arind Plain:

The region is extended in between the catchment area of the Isan and Arind rivers. It is a flat plain sloping towards southern side. Besides above mentioned rivers there are few small rivulets which have local importance. Few patches of mounds are also located near Nagla Dhani and Majhrau villages. Etah town is situated in this tract which is the district headquarters. There are number of roads running from all parts of the district converge at this place. The rail link from Tundla terminates here. The region is served with Lower and Upper Ganga canal system, and has helped in agricultural development. The geology of the region belongs to Alluvium, Dun gravels (Recent). The main soil sub-order association is Ochrepts-Orthents-Rock out crops. Nidhauli Kalan and Sakit are the other places of significance.

Sengar Plain:

The region is situated in the western part of the district covering almost entire Jalesar tahsil. The slopes is very gentle and approximately from north to south. Sengar is the only stream, flowing in this belt and joins the Yamuna beyond the region and remains watery during the rainy season. Except a few sand dunes in the north of Jalesar, it has completely featureless topography. Cultural features like canals and roads are well developed. Etawah branch of Upper Ganga canal with its numerous distributaries irrigate the area which is an indication of agricultural prosperity. The geology of the region belongs to Alluvium, Dun gravels (Recent). The main sub-order soil association is Ochrepts-Aquepts-Ustalfs. Tundla–Etah branch of northern railway serves the region. Settlements are relatively situated at distant places. Jalesar is the tahsil headquarters which is a famous center of handicrafts. Awagarh is the other place of significance. The type of land is of mixed variety and various in different parts of the district. The district is divided into two sections by the Kali Nadi, flowing from north-west to south-east. The river Kali Nadi, the Ganga and Burhi Ganga (an old bed of Ganga), govern the physical characterstics of the country. Generally speaking it may be said, that the area to the sowth-west of the Kali Nadi consisting of Jalesar and Etah tahsils and comprising rather less than half of the total area, is fertile tract of stable cultivation, while the northern portion, which includes the tahsil of Kasganj and Aliganj, is the reverse being subject to remarkable, vicissitudes of fortune and very sensitively responsive to any abnormal variations of season and rainfall.

There are four distinct tracts, first, the tarasi or the lowlands between the river Ganga and its old high bank, second uplands between the bank and the east of the Kali Nadi bank; third the valley of the Kali Nadi and fourth the tract lying south of this river.

The soils in the first generally known as Tarai, comprising the parganas of Faizpur-Badaria, Aulai and Nidhpur, more than half of the pargana of Soron, about a third of Pitiyali and portions of pachlana, Sahawar and Azamnàgar parganas, are of an alluvial character, differing from the soils of the upland in that they apparently contain a larger admixture of vegetable matter. The most valuable of the Tarai soils is the rich soft loam found along the edge of Ganga, the distinguishing feature of which is that it will grow sugercane without any irrigation. Similar but a less valuable soil is met with along the edge of the Burhi Ganga. Between the two level is higher and the quality of the soil deteriorates from north to south, being very sandy just above the Burhi Ganga. South of that stream there is considerable stretch of very poor soil, either wind blown sand or barren usar; but nearer the high bank there is a great improvement and there lies low lying and rich soil usually under sugarcane in the west of the district and wheat in the east. The upland near by Panchalna, Bilram, Soron,

Sahawan, Sidhpura, Patiyali Barna and Azamnagar is generally a level plain of loam but often the proportion of the sand is very high. For the outlying tracts the natural division into matyar or clay, dumat or loam and bhur or sand is adopted. There is a variety of rich loam found in the Ganga khadir the low land of the Kali Nadi and the Burhi Ganga, generally known as terai. In the usar and tract affected by reh, the characteristic feature of the soil is the presence of high content of soluble salts and or high percentage of exchangeable sodium.

(3) Drainage:

The chief rivers of the district are the Ganga the Burhi Ganga, the Kali Nadi, the Isan, the Rind, the Sengar and the Bagarh.

Ganga:

The Ganga forms for about 74 km. the northern boundary of the district flowing in south – easterly direction. The river flows at a distance varying from 5-15 km from its old high bank

Burhi Ganga:

The former bed of the Ganga is marked by Burhi Ganga which enters the district in the north-west corner and flows south-east wards at a considerable distance from the old high bank which is locally known as the pahar

Kali Nadi:

The Kalinadi or Kalinadi as it is often called locally flows to the south of the Burhi Ganga at a distance of 11 to 27 km. entering the Etah district from the Aligarh in the north west its general trend is to the south-east and finally it forms the southern boundary of the Aliganj tahsil. Its total length in the district is about 127 km. The valley through which the river flows is deep and about 5 km in width.

Isan:

The Isan is appunently the outcome of a wide shallow depression which is said to be traceable from Sardhana in Meerut, down to the border of this district. It has not tarai, the approach to it being merely marked by extensive stretches of low lying clay lands. Isan is seasonal river.

Rind:

The Rind, Ratwa or a Arrind flows through a portion of the south of the district beyond the Isan and through a river of considerable size in the rains, in the cold and the hot seasons it Almost entirely dries up

Sengar:

Sengar is seasonal river and through a river of considerable size in the rains.

Bagarh :

The Bagarh rises in the north east of Azamnagar where it forms a series of shallow depressions deepening occasionally into jhils and ultimately becomes a streams which flows into the Farrukhabad district. It dries up soon after the rains and its bed affords some good tarai cultivation.

There are also small tributaries of Kali Nadi such as the Nim, which flows into it at Baswan near Bilram, the Karoh Nala,which joins the Kali Nadi near Mandri, the Karna Nala which falls into the Kali Nadi near Dumari and the Bhogaon an Nala which after passing about 7 km from Aliganj join it near Sarai Agnat.

Lakes:

The uneven surface and imperfect drainage of a large part of the district have caused the formation of considerable sheets of water in the numerous depressions. Most of these diminish in area during cold and hot seasons and only some exist for a short time at the end of the rains. There are however some depressions which deserve the name of lakes. Notable among them are the jhils of Rustamgarh, Thana Daryagaj Sikandarpur and Patna situated in parganas Marehra, Azamnagar Nidhpur and Jalesar respectively.

(4) Climate:

The climate of the district varies between the extreme heat and cold the hot weather is characterized by an intensive heat weather it is intensely cold during cold weather. The year may be divided into four seasons. The cold season, running from the middle of November to the whole month of February, followed by the hot season extending from March to the whole month of June. The period from the month of July to the month of September constitutes the south-west monsoon season and the succeeding period lasting till the middle of November is the post monsoon season. Monsoon comes in the second half of June in the district. There is no meteorological observatory in the district for recording temperature in the district. The description it follows is based on the record of the neighbouring districts having similar climate

in conditions. After February there is continuous increase in the temperature and May is generally the hottest month of the year. The mean daily maximum temperature in May is about 41°C and the mean daily minimum, about 27°C.

The summer season is intensely hot with the maximum temperature on individual days raising up to 46oC. Hot dry dust laden winds which blow during the summer make the weather very uncomfortable. With the onset of the monsoon in the district by the third weak of June there is rapid decrease in the day temperature. Due to the increased moisture in the atmosphere even in the monsoon season the weather is oppressive in between the rains. After the withdrawl of the monsoon by about the third week of September there is a rapid decrease in the night temperature while there is a slight increase in the day temperature. It is only after October that both the day and night temperatures decrease rapidly. January is the coldest month with mean temperature of about 22°C in day and 8°C during nights. The district is periodically under cold waves because of western disturbances.

The average annual rainfall during 1998 was recorded 722 mm and actual was 1025 mm About 88 percent of the annual rainfall in the district is received during the period from June to September, July and August being the months of heaviest rainfall. After rains weather becomes humid and cold winds are generally light except in summer but during April to June strong hot winds called loo generally blow from west to east. During October to April the winds blow mostly from north and west. South- easterlies appear in May. During the monsoon season the winds are predomineantly from the south–east or east. During the cold season western disturbances affect the weathers, over the district and a few thunder storms also occur. Duststorms occur during the summer. Fog may occur during the cold season.

(5) Natural and Economic Resources

Forestry:

There are no forests in the district. Total forest area is about 0.3 percent of the total land area of the district. There is ample scope for forestry as forest department is undertaking aforestation drive in the district to augment the forest cover. Of the total area of the district 3145 hectare of land was under forests during the year 1997-98. Under social forestry schemes, fruit and non fruit bearing trees have been planted along road sides. The important trees are Dhak, Babul, Shisham, Jamun, Mango, Siris, Kanji, Neem, Imli, Semal, Gular, Bel, Ber etc.

There is substantial area under Orchards of Mangoes, Guavas, Papaya, Banana, Ber, Jamun, Jack fruit and Tamarind. The ornamental trees generally found in the private gardens and on the canal banks are Kachnar, Amaltas, Ashok and Gulmohar

The long Coarse, grass called Gandar is found along the Ganga and Burhi Ganga rivers. The longer and stouter reeds, called Senta, used for making chicks and thatching are also found in the district. The Khas grass is also found in the swampy ground and Patera is found in wet and water-logged tracts. The other grasses found in the district are Dab, Dub, Anjana and Siru etc. There are no special varieties of wild animals in the districts as the forest area is very small. Wild dog (ban kutta) and blue bulls are found in most part of the district, Leopards and wild Pigs are found in lower belt of Ganga and in Dhak jungles. Small animals like foxes, Jackals and hare are also numerous; snipes, pea, fowls, pigeons, peacocks, ducks and partridges are common birds found in the district.

Minerals & Mining:

The geology of the district does not reveal any valuable minerals except ordinary clay, kankar sand and reh. The only minerals of importance are "Kankar" found throughout the district and saline efforescence known as "reh" found in the neighbourhood of the Burhi Ganga and in pargana Marehra. Kankar is used for metal ling road and making lime. Reh is mostly utilized by local washermen. Sand is found in the beds of the Ganga and other rivers of the district. Clay is found every where in the district and is used for preparing bricks and other earthen wares. There are no prospects of mining and quarrying in the district.

Soils:

Soils comprise Domat, Matiyar, Bhur or sand and stiff clay and loam and reh. For the purpose of assessing and settling land revenue; the soils of the district were classified in the beginning of the present century. This classification has generally closely adhered to the traditional, local distinctions of the soils and

the same holds true even today. The most highly– rated. Soils is the rich and well-manure belt immediately surrounding the village site. There is a variety of rich loam found in the Ganga Khadir, the lowlands of the Kali Nadi and the Buri Ganga, generally known as Tarai. The most valuable of the Terai soils is the rich, soft loam. Being situated in the Ganetic doab the predominant soil in the district is the alluvium deposited by the Ganga and its tributaries. The soil belonging to the saline- alkaline group of soils and the good patches only are suitable for cultivation. Sandy loam soils are fertile but stand in great need of irrigation. Good Rabi and Kharif crops are obtained where irrigation facilities are available.

Land and Land use Pattern:

Land is fertile and plain with gentle slope from north-east to south-west ground water level is relatively light and land of the district is best suited for agriculture. According to agriculture census 1990-91 the total number of land holding in the district were 333,658, covering an area of 314,152 hectare but small land holdings one which was disadvantious holding were relatively much more than big for agriculture. The small land the consumption demands of most of the farmers and they have to be dependent upon other opportunities. Most of the land is held by owners. Tenancy culture has gradually abandoned in the district. More than 69.47 percent of the land holdings were below one hectare. 18.88 percent between 1 to 2 hectare, 8.87 percent 2 to 4 hectare, 2.66 percent from 4 to 10 hectares and 0.12 percent more than 10 hectares. The land use pattern in the district during 1997-98 under different needs i.e. forests 3,145 hectare, cultivable use 310,173 hectare, current and other fallow land 50,453 hectare, usar and not fit for cultivation 6,381 hectares, cultivation waste land 35,679 hectare, other uses 38,215 hectare, land under miscellaneous groves, orchards etc. 1,055 hectare and pasture 913 hectare.

Agriculture and Crop Pattern:

Agriculture network comprises 310,173 hectares, as net sown area, 538,053 hectares gross sown area, area under double crops 227,880 hectares, net irrigated area 281,786 hectares, gross irrigated area 412,719 hectares and net area sown to total reporting area was 69.54 percent during the year 1997-98.

The crop pattern is similar to the plains in all tahsils: As usual in the doab the agriculture year is divided into three kinds of harvests known by the traditional names Kharif, Rabi and Zaid. The Zaid harvest is comparatively of little importance. Melons, Kakri and Khira are mostly grown in the Khadirs and along the sandy banks of the rivers. Among Kharif crop bajra is most important, the other Kharif crops are Juar, maize and paddy and pulses like Arhar, Urad, Moong and Moth. In the Rabi the lead is taken by wheat which is the most important of all the food grains. It is sown alone as well as mixed with barely, gram, pea or mustard. The area under wheat alone has very much increased in the last few decades. It covers on an average nearly a more than third of the total Rabi area in the district. Barley was a favourite crops in the district and other important Rabi cereals are gram and pea. Of the pulses only arhar and Masur, pea are important. An interesting characteristic of arhar is that it is sown with the Kharif crops and harvested later than most of Rabi crops that is why it is hardly ever sown as a single crop, being usually combined with bajra or Jowar which are harvested in November leaving it standing alone in the field.

The major non-food crops in the district in both Rabi and Kharif consist of tobacco, oilseeds, groundnut, onion, garlic, potato and other vegetables. The other non food crops are sugar- cane, mustard, Seasame, Rapeseed, Jute, Cotton and Poppy in the district. The practice of growing different crops by rotation in the same field have been followed in order to increase the fertility of the land. Of the total area available the net area sown in the district during 1997-98 was 69.54 percent.

Irrigation:

Net irrigated area to net area sown was 90.84 per cent in the district anddd proportion of gross irrigated area to gross area sown was 76.71 percent. Irrigation potential in the district is very rich. Ground water is found at less depth in plenty. Irrigation through canals was 16.64 percent Tube-wells 76.17 percent and other sources 7.19 percent. There are 14,705 wells, 66,889 pump sets and 10,129 tubewells in the district.

Animal husbandry:

Cows, and buffaloes are reared mainly for milk and male cattle are used for ploughing

the field and selected number of then are also used for breeding purposes. Sheep and goats are reared chiefly for their wool, hide and flesh though the milk is often used. The district statistics of 1998-99 reveals that there are 279,758 bovines in the district Etah, 17,173 sheep, 239,674 goats, 3870 horses and ponies, 45,816 pigs, other animals total 124,262. Poultry farming is popular in the district. It is an easy source of supplementary income. There all 98,585 poultry birds in the district. There were 24 veterinary hospitals in the district at the end of the year 1998-99. In addition of this there are 20 artificial insemination centers, 53 artificial insemination subcentre and 31 animals development centres in the district.

Fishery:

In the district the scope of fishery is very poor in comparison to animals husbandry. To promote this program the department of fishery provided training to 71 fisherman with improvement of 59.525 hectare of ponds. During the year 1998-99 the government agency has distributed 92.90 lakhs of finger lings to the private enterprising.

Industry:

Under the factories Act, 1948 there were 52 registered factories in the district out of which 28 are reported to be operational according to district statistics.

In 1998-99 there were only 5 industries shades in working order which employed 290 workers. The value of the goods produced were worth Rs. 14,880. During the above period there were 8,399 rural and small scale-industries in the district and of which most of the units are household industries. Although this district is very poor in industries, yet manufacturing units of Ghunguru, Bell and cloth are running in Jalesar and Ganj Dundwara towns. Moon stone (pese) is being processed in Reh. The industrial backwardness of the district may be attributed to absence of rail link with in district headquarters of the district.

Trade and Commerce:

The pattern of trade is almost similar to that prevailing in neighbouring districts. But the broad features still show the domination of agriculture commodities in export trade. Certain items of exports of the district comprise both the commodities of industrial origins and agricultural products such as cereals pulses, ghee, milk products and other products, sugar, Ghungru, Ghanty, agricultural implements and glass beads. The district imports a large number of commodities. Cloth, metal goods and electrical goods, Machinery, Drugs and medicines, fertilizers are the main goods imported to the district. Ganj Dundwara, Kasganj, Etah and Jalesar are the main trade center in the district.

Transport:

Transport and communication are basic infrastructure which play an important role in the social, economic and industrial development of any area. This district is well connected by roadways. Delhi and Kolkata are directly linked with road from district headquarters. There are 21 railway stations (including halt) in the district. The length of rail line in the district is 47 kms of broad gauge and 100 km of meter gauge. The length of state highway passing through the district is 125 kms. Total length of metal led road in the district during 1997-98 was 1910. The common mode of transport are bus, jeep, car and trucks. According to Samajik Samiksha during 1998-99 the number of bus stations/ bus stops for state roadways was 173 in the district.

Electricity and Power:

By the year 1998-99, 1,148 villages and 556 scheduled caste hamlets were under electricity network. Total consumption in the said period was 227,818 thousand KWH. Domestic light consumed 31,034 thousand KWH and water supply and sewage etc 1654 thousand KWH. Consumption in commercial sector was 5,729 thousands KWH, industrial sector 11,271 thousands KWH, agriculture sector 177,183 thousand KWH and in public light it was 97 thousand KWH. Nearly 71.30 percent of the villages had been electrified by the year 1998-99.

Gram Panchayat, its Composition, Jurisdiction and role in village:

A Gram Panchyat acts as the executive of the Gram Sabha and plays a vital role in village development.

Composition:

The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat.

the village panchayat.

It is necessary that the village Panchayat should have members belonging to the scheduled caste and also a women members. If they are not elected, then the government itself appoints two such members. The village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Its Term:

The new panchayat Raj act of 1993 has fixed a uniform five-year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualification:

In order to be elected to a village panchayat, a candidate should possess the following qualifications:

(1) He should be resident of the village concerned and his name should be in the voter's list of the village.

(2) He should be twenty-five year old.

(3) He should be mentally and physically sound.

(4) He should not be a proclaimed of fender.

Functions

A Gram panchayat is entrusted with various social, economic and judicial function.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks after the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Center opened in the village. The Panchayat also provide land and building for such a center.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
6. It arranges for sufficient irrigational facilities, improved seeds, insectaries, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.

(v) Census Concepts

Building:

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.-

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of --permanent material and the other is made of temporary material.-

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.--

Room :

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of

however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.- In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder :-

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) a minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.-

City :

Towns with population of 1,00,000 and above

are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:--

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households :

Scheduled Castes and-- Scheduled Tribes.

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the

Scheduled Castes

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:-

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Bahelhya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Dhangar
28 Dhanuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
33 Dusadh
34 Gharami
35 Ghasiya
36 Gond
37 Gual
38 Habura
39 Hari
40 Hela
41 Kalabaz
42 Kanjar
43 Kapariya
44 Kharwal (excluding Banbasi)
45 Khairaha
46 Kharwar
47 Khatik
48 Khorot
49 Kol
50 Kori
51 Korwa
52 Lalbegi
53 Majhwar
54 Mazhabi
55 Musahar
56 Nat
57 Pankha
58 Parahiya
59 Pasi, Tarmali
60 Patari
61 Rawat
62 Saharya
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate:

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker:

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.-

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.-

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.--

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.-

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader. Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometer of the area.

Age :

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.-

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.--}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times S_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.-

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group-}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year

$$IMR = \frac{\text{Number of infant deaths during the year-}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births -during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than- One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate -(MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age-group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.--

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons' are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town:

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution

The total population of the district is 2,790,410 out of which 2,306,747 live in rural and rest 483,663 in urban areas. The most populous tahsil is Etah with 809,380 population followed by Kasganj tahsil whose population is 750,407. The least populous tahsil is Jalesar with a population of 337,601. The maximum urban population is in Kasganj tahsil which is 160,953 followed by Etah with 139,329 urban population where as the least urban population is in Aliganj tahsil which is 45,146 at the 2001 Census. The district has 17.3 per cent of its population living in towns. As compared to this in the state the same is 20.8 per cent.

The population of urban population is highest at 21.4 per cent in Kasganj tahsil followed by 19.2 per cent in Patiyali tahsil and least of 10.9 per cent Aliganj tahsil.

Size, Class and Status of Towns

There are 19 statutory towns in the district. Etah with 107,110 population is Class I town. Kasganj with 92,541 population is Class II town. There are five Class III towns in the district Etah. There are also eight class IV and four class V towns in the district The seven Nagar Palika Parishad in the district are Ganj Dundawara, Marehra, Jalesar, Soron, Kasganj, Aliganj and Etah. There are 12 Nagar Panchayats, namely Bilram, Sahawar, Amanpur, Mohanpur, Patiyali etc. There is no Census town in the district.

Population Growth

The population of the district in 1991 adjusted to jurisdiction of 2001 was 2,244,998 in the district. The population of the district at 2001 Census is 2,790,410. There has been decadal growth wherein population since 1991 rose by 545,412 in absolute term 24.3 per cent). Males were 1,230,561 at 1991 Census increased to 1,509,199 and females increased from 1,014,437 to 1,281,211. As against 24.3 per cent decadal growth in the district, the state figure founds 25.8 per cent which is higher than the district.

Population Density

The area of the district is 4,446 square kilometres. The density of population in the district is 628 as compared to 690 in the state. In the rural areas of the district the population density is 526 persons per square km.

Sex Ratio

The sex ratio in the district is 849 while it is 898 in the state of Uttar Pradesh. In the rural areas of the district the sex ratio is lower at 841 while it is 886 in urban aras. The rural sex ratio of the district is worse than the state. The sex ratio among five tahsils varies between 840 in Patiyali and 855 in Etah. Among C.D. blocks the sex ratio varies from 818 in

Patiyali to 863 in Marehra. The sex ratio in rural population in the district comes to 841. Among towns of the district the lowest sex ratio 820 is found in Nidhauli Kalan and highest 911 in Sakit. It is 886 for the district urban. The sex ratio of population in the age group 0-6 is 891 in the district which is quite high as compared to 849 in whole the general population. The sex ratio of population of the age group 0-6 the rural areas in 892 against 886 in urban areas. The sex ratio of population in the age group 0-6 among 15 CD blocks varies from as low as 863 in Jaithara to as high as 919 in Ganj Dundwara. The sex ratio of rural population in the age group 0-6 by ranges for 20.8 per cent population in the range 900-949. The sex rato of population in the age group 0-6 among towns varies from 755 in Nidhauli Kalan to 960 in Sakit.

Work Participation Rate

In the district 28.8 per cent or 802,418 persons pertain to the category of working population. Average males working population is 46.5 per cent against 7.9 per cent among females. Main workers constitute 23.7 per cent of population. while marginal workers account for 5.1 per cent Female workers do not predominate males among marginal workers. Non-workers contribute 71.2 per cent of total population. Out of these 25.6 per cent are from the urban population. In rural areas 91.6 per cent females are non-workers. Of the total workers population in the district 54.2 per cent are cultivators, 18.2 per cent engaged as agricultural labourers, 4.8 per cent in household industry and 22.7 per cent as other workers. Among male workers 56.5 per cent are cultivators as compared to 38.8 per cent among females. Similarly as against 22.7 per cent male other workers, the proportion of female is 23.0 per cent. In rural areas of the district as much as 63.0 per cent of working population is cultivators as against only 6.0 per cent in urban areas. In case of other workers, the composition of rural and urban proportion is 12.9 per cent and 76.6 per cent of working population. It may be mentioned that the working population in the district is 28.8 per cent as compared to 32.5 per cent in the state.

Literacy

In the district 54.6 per cent of the population is literate as against 56.3 per cent in the state of Uttar Pradesh. In the district 67.5 per cent of the male population is literate as compared to 68.8 per cent in the state. However, among females the literacy in the district is 39.3 per cent as compared to 42.2 per cent at the state level. In the district literacy rate is 64.0 per cent in urban areas as against 52.6 per cent in rural areas. The gap in male/female literacy rate is 30.9 percentage points in rural areas as compared to 16.7 percentage points in urban aras. The literacy rate among CD blocks varies between 40.0 per cent in Soron and 61.0 per cent in Shitalpur. Similarly, the literacy rate among towns varies from 41.7 per cent in Bhargam to 78.9 per cent in Etah.

(viii) Brief analysis of PCA data based on inset tables 1 to 36: The district throws up an vivid picture of its population at the 2001 Census.

A few of the peculiar characteristics of the population is being highlighted through the following inset tables.

TABLE - 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001			Total	Rural	Urban	1991	2001
		Total	Rural	Urban	Total	Rural	Urban					
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Kasganj	612,159	482,298	129,861	750,407	589,454	160,953	22.6	22.2	23.9	21 2	21.4

The growth rates of each tahsil in Etah district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 24.3 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 23.4 and 28.9 per cent respectively. Of the total population of the district 82.7 per cent lives in rural areas while 17.3 per cent lives in urban areas of the district. The proportion of urban population has been the same during the decade from 16.7 per cent in 1991 to 17.3 percent in 2001 in the district. The highest percentage of urban population is recorded in Kasganj tahsil (24.4) and lowest is registered in Aliganj tahsil (10.9). There is no as such concentration of urban population in any tahsil while there is wide variation in the proportion of urban population among different tahsils.

TABLE - 2
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages	Population 500-999

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of 1,517 inhabited villages, 66 (4.4 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 214 villages having 14.1 per cent villages of the district while in the size class of 500-999 population accounts for 382 villages with 25.2 per cent of the total villages in the district. 480.villages (31.6. per cent) are in the size class of 1,000-1,999 and 336 villages (22.1per cent) are in the size class of 2,000-4,999. 36 villages (2.4 per cent) in the district fall in the range of 5,000 –9999 and 3 villages (0.2 per cent) belong to a population of 10,000 and above.

TABLE - 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL
(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL
(c) Declassified - NIL
(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district

TABLE 4
DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	168	11.1	265,671	11.5
11-20	3	0.2	236	0.0
21-50	8	0.5	4,689	0.2
51-100	15	1.0	3,716	0.2
101-200	60	4.0	24,062	1.0
201-300	110	7.3	89,953	3.9
301-500	384	25 3	529,736	23
501 +	769	50.7	1,388,684	60.2
Not known	0	0	0	0.0
District Total	**1,517**	**100.0**	**2,306,747**	**100.0**
Population Density (Rural) of the district: 526				

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 769 accounting for 50.7 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 60.2 per cent population. The lower ranges of 301-500 & 201-300 persons per sq. km. cover 384.villages (25.3 per cent) and 110 villages (7.3 per cent) have high density with 201 to 500 persons per sq. km. While the corresponding proportion in the lower range of 101 to 200 is 4.0 per cent or 60 villages of the total inhabited villages having 1.0 per cent population of the district. In the medium density ranges of 21- 50 and 51-100 persons account for 0.5 and 1.0 per cent of inhabited villages respectively. Both these ranges claim 0.4 per cent rural population.

TABLE 5
SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	851	844	899
1911	916	922	866	838	834	860
1921	908	918	834	847	846	860
1931	903	916	813	845	847	829
1941	907	922	824	847	847	849
1951	908	922	827	870	870	870
1961	907	921	817	865	865	866
1971	876	884	826	833	830	859
1981	882	889	850	827	819	874
1991	876	879	864	824	815	873
2001	898	904	876	849	841	886

Note Sex ratio has been defined here as the number of females per 1000 males.

As per 2001 Census sex-ratio of 849 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly low as compared to the state average figures from 1901 to 2001. The lowest sex raxtio of 824 females per 1000 males was recorded in the district during 1991 against the state average of 876 females. It is also observed that the proportion of females in urban areas is higher than that of rural areas in district. It is reverse in case of urban areas at state level.

TABLE 6
SEX RATIO BY TAHSILS, 2001

Serial Number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kasganj	854	846	884
2	Patiyali	840	827	896
3	Aliganj	841	837	872
4	Etah	855	849	886
5	Jalesar	845	839	887
District Total		**849**	**841**	**886**

Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 849 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 841and 886 females respectively. The rural sex-ratio in the tahsils varies between 827 in Patiyali tahsil and 849 females per 1,000 males in Etah tahsil. The sex-ratio in Kasganj (854) and Etah (855) tahsil is higher than district average (849). In urban areas the highest sex-ratio is recorded in Patiyali (896) and the lowest is in Aliganj tahsil (872).

TABLE 7
SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Soron	835
2	Kasganj	859
3	Amanpur	848
4	Sahawar	843
5	Ganj Dundwara	824
6	Patiyali	818
7	Sidhpura	842
8	Jaithara	822
9	Aliganj	850
10	Marehra	863
11	Nidhauli Kalan	852
12	Shitalpur	846
13	Sakit	839
14	Jalesar	836
15	Awagarh	842
District (Rural) Total		**841**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 841 females per 1,000 males. Among the C.D. blocks the highest sex-ratio of 863 females is found in Marehra C.D. block and is followed by Kasganj (859.) while the lowest of 818 is recorded in Patiyali C.D. block. The sex-ratios of nine C.D. blocks including Shitalpur (846) and Nidhauli Kalan (852) C.D. block are higher than the district rural average of 841 but in six remaining blocks, this value is below the district average.

TABLE 8
SEX RATIO OF RURAL POPULATION BY RANGES 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	21	1.4	9,159	0.4
700-749	66	4.4	49,482	2.1
750-799	236	15.6	289,846	12.6
800-849	534	35.2	968,652	42.0
850-899	444	29.3	778,608	33.8
900-949	157	10.3	171,184	7.4
950-999	38	2.5	31,604	1.4
1000-1099	16	1.1	7,420	0.3
1100+	5	0.3	792	0
District Total	**1,517**	**100.0**	**2,306,747**	**100.0**
Sex ratio (Rural) for District			**841**	

Table 8 presents the distribution of villages by sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 534 accounting for .35.2 per cent of the total villages having largest population of 42.0. per cent in the district fall in the sex-ratio range of 800-849 females per 1,000 males. It is followed by the sex-ratio range of 850-899 which accounts for 444 villages (29.3 per cent) and 33.8 per cent population. The highest range of 1,100 & above claims 5 villages (0.3 per cent). This range shares 792 persons of rural population of the district while in the sex-ratio range of 900-949, there are 157 villages (10.3 per cent). In remaining sex-ratio ranges of 1000-1099, 950-999, 750-799, 700-749 and less than 700, the number of villages are 16 (1.1 per cent), 38 (2.5 per cent), 236 (15.6 per cent), 66 (4.4 per cent) and 21 (1.4. per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 534 having maximum population (42.0 per cent) fall in the higher sex-ratio ranges of 800-849 and above showing that in majority of villages the sex-ratio is significantly higher.

TABLE 9
SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A / Town	Urban status of town	Sex ratio

		Rural	59,022	31,297	27,725	886
		Urban	8,864	4,719	4,145	878
District Total		**Total**	**556,441**	**294,222**	**262,219**	**891**
		Rural	**470,492**	**248,661**	**221,831**	**892**
		Urban	**85,949**	**45,561**	**40,388**	**886**

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group 0-6 is 556,441 persons comprising 294,222 males and 262,219 females. The total sex-ratio in this age-group works out to be 891 females for every one thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 892 and 886 in this age-group respectively. The rural sex-ratio in tahsils varies between 883 in Etah and 915 in Patiyali tahsil.

TABLE 11

SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Soron	38,442	20,050	18,392	917
2	Kasganj	32,292	17,018	15,274	898
3	Amanpur	26,006	13,936	12,070	866
4	Sahawar	24,639	12,964	11,675	901
5	Ganj Dundwara	32,811	17,097	15,714	919
6	Patiyali	24,689	12,903	11,786	913
7	Sidhpura	23,832	12,462	11,370	912
8	Jaithara	33,982	18,239	15,743	863

11	Nidhauli Kalan	33,169	17,697	15,472	874
12	Shitalpur	39,281	20,737	18,544	894
13	Sakit	34,336	18,176	16,160	889
14	Jalesar	31,972	16,981	14,991	883
15	Awagarh	27,050	14,316	12,734	889
	District (Rural) Total	**470,492**	**248,661**	**221,831**	**892**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 892 for the district (rural). It is highest in Ganj Dundwara C.D. block at 919 followed by 917 in Soron C.D. block and is lowest at 863 in Jaithara C.D. block. The sex-ratio of Patiyali, Soron, Kasganj, Sahawar, Ganj Dundwara, Patiyali, Sidhpura and Shitalpur C.D. blocks are higher than the district rural (892).The sex ratio of Aliganj CD block is equal to the district average while in the remaining blocks, it is below the average of the district.

TABLE 12

SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	123	8.1	16,046	3.4
700-749	78	5.1	19,969	4.2
750-799	148	9.8	45,029	9.6
800-849	192	12.7	66,916	14.2
850-899	248	16.3	96,858	20.6
900-949	225	14.8	97,733	20.8
950-999	157	10.3	55,339	11.8
1000-1099	175	11.5	48,659	10.3
1100+	171	11.3	23,943	5.1
District (Rural) Total	**1,517**	**100**	**470,492**	**100**
Sex ratio (Rural) for District		**892**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 225 (14.8 per cent) having largest population (20.8 per cent) in the district (rural) fall in the sex-ratio range of 900-949 females per 1,000 males in age-group of 0-6 years. It is followed by the sex-ratio range of 850-899 which claims 248. villages (16.3 per cent) and 20.6 per cent population. Next to it, are 192 villages (12.7 per cent) in the range of 800-849 with 14.2 per cent population. 157 villages (10.3 per cent) having 11.8 per cent population fall in sex-ratio range of 950-999. In remaining sex-ratio ranges of less than 700,700-749, 750-799, 1000-1099 and 1100+ claim less number of villages and these are distrib-

uted as 123 (8.1 per cent), 78 (5.1 per cent), 148 (9.8 per cent), 175 (11.5 per cent) and 171 (11.3 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifteen per cent of villages i.e. 16.3 having population (20.6 per cent) fall in the higher sex-ratio range of 800-999.

TABLE 13

SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS /TOWNS, 2001

		Urban	**483,663**	**67,846**	**5**	**14.0**	**0.0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of 2,790,410 total population of the district, 17.2 per cent of the total population belong to the Scheduled Castes and only 30 persons to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 17.8 per cent in rural population and 14.0 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Jalesar tahsil (21.7.) while the lowest is found in Aliganj tahsil (14.5). The number of Scheduled Tribes population is 25 and 5 persons in rural and urban areas respectively. Scheduled Tribes population in the district is only concentrated in tahsil Aliganj (22 persons) and tahsil Kasganj (8).

TABLE - 15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

District (Rural) Total		**2,306,747**	**410,819**	**25**	**17.8**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 17.8 per cent of rural population of the district belongs to Scheduled Castes and only 25 persons to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 13.7 per cent in Jaithara and 24.3 per cent in Awagarh C.D. block.. The other C.D. blocks containing the higher percentage of Scheduled Castes are Patiyali (22.4), Jalesar (21.2) and Sidhpura (21.1). The highest number of 22 persons of Scheduled Tribes population is counted in Jaithara C.D. block and only three persons is counted in Soron CD block.

TABLE - 16

PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	251	16.5	0	0
Less than 5	167	11	6,851	1 7

11-20	345	22.7	110,493	26.9
21-30	230	15 2	106,450	25.9
31-40	131	8.6	71,284	17.4
41-50	68	4.5	39,398	9.6
51-75	57	3.8	29,526	7.2
76 and above	23	1.5	10,216	2.5
District Total	**1,517**	**100**	**410,819**	**100**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 251 villages accounting for 16.5 per cent of total 1517 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 167.villages (11.0 per cent). In 245 Villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 345 villages constituting 22.7 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 230 and 131 villages respectively. Both these ranges together account for 23.8 per cent villages of the district. 68 Villages fall in the range of 41-50, only 57 in the range of 51-75 and 23 villages go to 76 and above ranges. 23 villages are such where the proportion of Scheduled Castes is more than 76 per cent.These villages contain 2.5 per cent Scheduled Castes population of the district. The maximum of 26.9 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

TABLE - 17

PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural

and urban areas are given in Table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population comes to 54.6 per cent in the district. This proportion in rural area is 52.6 per cent against 64.0. per cent in urban areas. In the district the literacy rates of males (67.5 per cent) is much higher than that of females (39.3 per cent). Among tahsils,Etah tahsil tops with 61.0 per cent literates followed by Jalesar tahsil(57.5 per cent).Patiyali tahsil with 46.6 per cent literates stands at the bottom in the district. Out of five tahsils, the literacy rates of three tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates 64.0 are higher than that of rural areas (52.6).

The gap between male and female literacy is very high which comes to 28.3 percentage points in the district. The situation at tahsil level is not much different. However, this gap in rural literacy is much higher which comes to 30.9 percentage points against the urban areas where the gap between males and females literacy is 16.7 percentage points.

District (Rural) Total		**965,722**	**668,740**	**296,982**	**1,341,025**	**583,984**	**757,041**	**52.6**	**66.6**	**35.7**	**30.9**

Table 22 reveals the number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. In the district 52.6 per cent of the total rural population excluding the age-group of 0-6 years is literate. The corresponding proportion of male and female literates comes to 66.6 and 35.7.per cent respectively which shows very wide gap of 30.9 percentage points in male and female literacy. At C.D. block level, Shitalpur C.D. block has the highest rural literacy rate of 61.0 per cent while 75.3 per cent males and 43.8 per cent females are literate in this block. The lowest literacy rate in rural area is noted in Ganj Dundwara C.D. block (32.7 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 34.7 percentage points is found in Nidhauli Kalan C.D. block.

TABLE 23
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population

81-90	13	0.9	4,378	0.2
91-99	3	0.2	186	0.0
100	0	0.0	0 0	0 0
District Total	**1,517**	**100.0**	**2,306,747**	**100.0**
Literacy rate for District		**54.6**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 2 villages (0.1per cent) of the district and population of these villages is only 261 persons. None of the villages have all the literate population. 501 villages accounting for 33.0 per cent of the total villages are in the literacy range of 51-60 per cent and 361 villages (23.8 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 553 villages (36.4 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 102 villages (6.8. per cent). The range of 51-70 have the maximum number of 862 villages forming 56.8 per cent of the total inhabited villages.

Table 24 shows number and percentage of literates and illiterates by sex during 2001Census in the urban areas of the district. Regarding absolute figures of literates Etah (NPP) is way ahead of other

towns. The table reveals that literacy rate is high in the urban areas of the district (64.0). The literacy rate is quite high (84.9 and 82.5 per cent) in two towns among males. Female literacy rate is not a behind in same towns (72.2 and 62.4 per cent). However, literacy rate among females is very low (24.0 per cent) in Bilram town. The gap in male female literacy rate is very high 31.6 percentage points in Bhargain.

Table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns, population at the 2001 Census. The number of illiterates (40,157) is more (27,689) than literates in the district (urban). The percentage of literates is least at 31.9 per cent in Bhargain among 19 towns but the gap in male/female literate rate is highest in case of Marehra town.The males in all the 19 towns enjoy a higher literacy rate than females while the female literacy rate is highest in Etah (NPP). The gap in male/female literacy rate is least (18.0) in Awagarh while the female literacy rate is highest in Etah NPP.

TABLE 28

NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of CD block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Table 28 brings out the number and percentage of Scheduled Tribes literates and illiterates by sex in CD blocks at the 2001 census. The number of illiterates is more than literates in the district and CD blocks, with exception to Soron CD block. The literacy rate of the Scheduled Tribes population at 52.2 per cent is higher than the corresponding rate 45.8 per cent in case of Scheduled Castes community. The gap in male and female literacy rates at 56.9 percentage points is also more than what it is in case of the Scheduled Castes community (29.9 percentage points). The literacy rate is cent per cent in Soron CD block and lowest in Jaithara CD block. The gap in male/female literacy rate in Soron CD block is zero while it is 61.6 percentage points in case of Jaithara C.D. block.

TABLE 29

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers works out to be 28.8 per cent of the total population in the district. The total workers are comprised of 23.7 per cent of main workers and 5.2 per cent of marginal workers and the remaining 71.2 per cent are non-workers.

Among the main workers, males participation rate in the district is 40.8 per cent and 3.4 per cent of females. Male and female marginal workers account for 5.7 and 4.5 per cent respectively. The percentage of female marginal workers is lower than that of males. Total workers (main and marginal workers) among tahsils varies from 27.8 per cent in Etah tahsil to 29.7 per cent in Patiyali tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of 2,306,747 total rural population 24.0 per cent has been categorized as main workers and the marginal workers constitute 5.4 per cent and the remaining 70.6 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 41.3 per cent males and 3.4 per cent females are in the category of main workers. Male and female marginal workers account for 5.8 and 4.9 per cent respectively. The percentage of female marginal workers is lower than that of male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 29.4 per cent, male 47.1 and females 8.4 per cent. At the C.D. block level, Amanpur has highest proportion of total workers forming 31.7 per cent of the total population. It is closely followed by Ganj Dundwara (31.4 per cent), Sahawar (30.5 per cent), Soron (30.4 per cent), Marehra (30.3 per cent) and 30.0 per cent in Sidhpura. The lowest percentage of 26.9 per cent is recorded in Sakit C.D. block.

Note: Percentage of Workers to total workers are given in bracket

It can be seen from Table 34, that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 54.2 per cent of the total workers (main + marginal) and remaining 45.8 per cent of total workers are engaged as agricultural labourers (18.2 per cent), Household industry workers (4.8 per cent) and other workers (22.7 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 42.2 per cent in Jalesar tahsil and 69.4 per cent in Aliganj tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of female cultivators is 38.8 per cent which is very less as compared to 56.5 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the second position next to agriculture in the district as well as in each tahsil.The highest proportion of 26.2 per cent of other workers is recorded in Etah tahsil while the lowest proportion of 14.5 per cent is found in Aliganj tahsil.

Note: Percentage of Workers to total workers are given in bracket

Table 35 presents C.D.block-wise distribution of workers by sex in four categories of economic activity. In rural areas of the district total workers (main+marginal) account for 29.4 per cent of total population. Among these workers, cultivators constitute 63.0 per cent, 20.2.per cent agricultural labourers, 3.9 per cent household industry workers and 12.9 per cent other workers. The agricultural

sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 3.9 per cent workers of the total working force. Therefore, surplus working force has to depend on primary activities. Among cultivators, the percentage of females (44.1 per cent) is lower than that of males (65.9 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 46.5 per cent in Jalesar C.D. block and 76.9 per cent in Aliganj C.D. block. Similarly for other workers, the lowest proportion is 7.4 per cent in Patiyali. C.D. block while 11.7 per cent is the highest in Sahawar C.D. block. The percentage of agricultural labourers and household industry workers together is quite low i.e. only 24.1 per cent in the district. The percentage of agricultural labourers is highest in Awagarh block (30.8) and is followed by Jalesar C.D. block (30.1). In other C.D. blocks, this proportion is low. Similarly, household industry workers varies in C.D. blocks between 2.2 per cent in Sakit and 5.5 per cent in Ganj Dundwara CD block.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of district It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (76.6 per cent), followed by household industry workers with 9.8 per cent (6.6 per cent males and 37.4 per cent females).If we observe each town, the table reveals that highest percentage of cultivators (34.2) is recorded in Mohanpur. In the agriculture labourers category, Etah (NPP) recorded very low percentage (0.9). Household industry workers are also very low (1.6 per cent in Raja ka Rampur, 2.0 per cent in Marehra and 3.0 per cent in Bilram. As the usual trend recorded in the urban areas, other workers are in highest percentage (92.4 per cent) in Etah NPP, 91.1 per cent in Kasganj and 85.5 per cent in Jalesar N.P.P.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

One of the major parts of the District Census Handbook is Village and Town Directory. Non-census data showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages are produced. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE - 37

DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like educational, medical, improved drinking water, post office, telephone, transport, communications, banks, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1517 inhabited villages in the district 1243 villages or 81.9 per cent have been provided with the educational facilities of one type or the other. Similarly 576 villages in the district constituting 38.0 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1501 or 98.9 per cent villages. As regards post office facility which includes facilities like telegraph office and post & telegraph, 282 villages constituting 18.6 per cent of villages have been provided with post office facility within the village. 397 or 26.2 per cent villages have been provided with the telephone facility, 226 or 14.9 per cent with transport facility, 49 or 3.2 per cent villages with bank facility and 73 or 4.8 per cent with agricultural credit societies. Similarly there are 949 or 62.6 per cent villages which have been linked with the pucca road. Total 1014 or 66.8 per cent of villages have been provided with

the electricity supply. Almost similar pattern for availability of amenities in the villages at C.D. block level has been found with slight variations. Awagarh C.D. block has the highest 96.9 per cent villages where educational facility is available and lowest 69.9 per cent is found in Sakit. Medical facility is highest in Shitalpur (52.0 per cent) and lowest (20.4 per cent) in Jaithara C.D. block. Improved drinking water is available to cent-percent villages in seven CD blocks while in other blocks, it is above 95.0 per cent. Telephone facility is highest in Jaithara (36.7 per cent) while it is lowest (16.8per cent) in Ganj Dundwara C.D. block. Transport and communications is less developed in Marehra where only 4.7 per cent villages are covered by this facility whereas 22.7 per cent villages of Amanpur C.D. block are availing this facility. In the field of power supply it is available for 28.4 per cent in Ganj Dundwara to 98.1 per cent in Kasganj CD block.

TABLE 38

NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

\# Post office includes Post office, telegraph office and Post and telegraph office

Table 38 depicts the number and proportion of rural population served by different type of amenities. Out of total rural population of 2,306,747 persons in the district, 2,134,482 or 92.5. per cent have educational facility of one or the other type. Similarly 1,134,502 or 49.2 per cent population has

medical facilities while 2,292,477 or 99.4 per cent have got improved drinking water facility. Post office facilities are available to 834,447 or 36.2 per cent population. Telephone facility is available to 837,712 or 36.3 per cent. Transport and communications facility is available to 520,099 or 22.5 per cent. Bank facility is available to 167,764 or 7.3 per cent.220,533. or 9.6 per cent have been provided with the facility of agricultural credit societies. 1,761,909 or 76.4 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,730,291 or 75.0 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. However, in Kasganj C.D. block facilities of educational, medical and improved drinking water are available to a larger proportion of population

TABLE - 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

	Distance range of place from the villages where the amenity is available			
Village not having the amenity of	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col 2 - 4)

7. Agricultural Credit Societies	797	501	146	1444

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 278 villages do not have primary school in their villages and out of these villages, children of 252 villages have to travel less than 5 kms. for schooling. Out of 1,517 inhabited villages as many as 1139 are deprived of middle school and 1,496 of degree college. Of these 731 avail the facility of middle school at a distance of less than 5 kms., 382 at a distance 5-10 kms. and the remaining 26 at a distance of 10+ kms. In respect of degree college 276 avail this facility at a distance of less than 5 kms., 500 between 5 to 10 kms. and rest 720 villages at a distance of 10+ kms.

Similarly there are 1476 villages in the district which have been devoid of Hospital facility and 1492 villages which are deprived of PHC facilities. Of these 335 villages have the facility of Hospital available within 5 kms. while in respect of 576 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly a large number i.e. 565 villages have this facility at a distance of 10+ kms. As regards PHC, 314 avail this facility at a distance of less than 5 kms., 775 at a distance of 5-10 kms. and the remaining 403 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1,235 villages do not have this facility in the village itself. Of these, majority i.e 975 have this facility at a distance of less than 5 kms., another 230 villages avail it at a distance of 5-10 kms. In the remaining 30 villages, inhabitant have to travel a distance of 10+ kms.

As regards Telephone, there are 1120 villages in the district which are without telephone facilitiy. Of these 598 avail this facility at a distance of less than 5 kms., 344 at a distance of 5-10 kms. and remaining 178 have to traverse a distance of 10+ kms.

For Bus service out of 1329 villages which do not have facility, 576 villages avail this facility at a distance of less than 5 kms., 540 at a distance

between 5-10 kms. and 213 at a distance of 10+ kms.

In the entire district 1,474 villages are deprived of Commercial Bank and 1,507of Co-operative Bank. Of these 1,474 villages which are deprived of Commercial Banks, 666 villages avail this facility at a distance of less than 5 kms., 574 between 5-10 kms.and the remaining 234 at a distance of 10+ kms. Regarding Co-operative Banks out of 1,507 villages, 369 villages avail this facility at a distance of less than 5 kms., 729 at a distance of 5-10 kms. and remaining 409 at a distance of 10+ kms. 1444 villages do not have agricultural credit societies. This facility to 797 villages is available at a distance of less than 5 kms., 501 at a distance of 5-10 kms. and the remaining 146 at a distance of 10+ kms.

TABLE 40

 # Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1517 inhabited villages in the district, there are 305 villages which have nearest towns upto a distance of 5 kms. Of these only 256 villages forming 83.9 per cent of these total villages, are having the educational facilities of one type or the other and 112 villages constituting 36.7 per cent, have the medical facilities within the village, 37 villages forming 12.1 per cent have the facility of post office within the village and 89 or 29.2 per cent have the facility of telephone. 56 villages constituting 18.4 per cent have been linked by transport service. 5 villages comprising 1.6 per cent have been provided bank facilities, while 7 villages constituting only 2.3 per cent have been provided by agricultural credit societies. 222 villages comprising 72.8 per cent have been provided with pucca road.

There are 1042 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 856 villages constituting 82.1 per cent have been provided with the educational facilities. 392 villages comprising 37.6 per cent have been provided with medical facilities. 206 villages constituting 19.8 per cent enjoy the post office facility. 262.villages comprising 25.1 per cent have been provided the telephone facility.142 villages constituting 13.6 per cent have been linked with transport communications. 39 villages comprising 3.7 per cent have bank facility. 58 villages constituting 5.6 per cent are having agricultural credit societies, while 628 villages or 60.3 per cent are approachable by pucca road. 75 villages fall in the distance range of 16-50 kms. Of these, 69.3 per cent villages have educational facility, 38.7 per cent with,medical, 21.3 per cent with post office, 29.3 per cent with telephone and transport & communications available to 14.7 per cent villages. Banks and agricultural credit societies facilities are available to 1.3. and 2.7. per cent of villages respectively. Pucca road available to 44.0 per cent village. There is no inhabited village beyond 51+km in the Etah district.

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In the district out of a total 1,517 inhabited villages, 280 have a population in the range of 1- 499 persons. Of these, 113 villages (40.4 per cent) have educational facility, 43 (15.4 per cent) have medical facility, 270 (96.4 per cent) have improved drinking water facility. No village has post office facility in this range. 28. (10.0 per cent) have telephone facility. 19 (6.8 per cent) have been linked by bus service. One (0.4 per cent) have Bank facility. No village has been provided with the agricultural credit societies, 116 villages (41.4 per cent) have been linked with pucca road. 139 villages (49.6 per cent) have been provided with electricity.

Out of 382 villages, which fall in the population range of 500-999 persons, 314 villages (82.2 per cent) have been provided with the educational facility, 124 (32.5 per cent) with medical facility, 380 (99.5 per cent) villages have improved drinking water facility. 17 villages (4.5 per cent) have been provided with post office facilities, 79 villages (20.7per cent) with telephone facility, 41 villages (10.7 per cent) with transport facilities, One village (0.3 per cent) with bank facility, 4 villages (1.0 per cent) with agricultural credit societies and 194 villages (50.8 per cent) have approach by pucca road. 227 (59.4 per cent)villages in this range have electricity. 480 villages fall in population range of 1,000-1,999 persons.453 villages (94.4 per cent)have educational, 477 villages (99.4 per cent) with improved drinking water facilities, 197 villages (41.0 per cent) enjoy the medical facility, 85 villages (17.7 per cent) have post office facility, 131villages (27.3 per cent) have telephone facility, 74 villages (15.4 per cent) have transport and communications facilities, 15 villages (3.1 per cent) have bank facilities, 25 villages (5.2 per cent) have agricultural credit societies and 315 villages (65.6 per cent) have approach by pucca road. 348 villages (72.5 per cent) have facility of electricity.

There are 336 villages in the district which are covered under 2,000-4,999 population range. In this range, 325 villages (96.7 per cent)enjoy the facility of education, cent per cent improved drinking water, 139 villages (41.4 per cent) telephone, 70 villages (20.8 per cent) transport and communications, 285 villages (84.8 per cent) approach by pucca road and 269 villages (80.1) power supply. 185 villages (55.1 per cent) have medical facility. 148 villages (44.0 per cent) have post office facility, 24.villages (7.1 per cent) have bank facility, 35 village (10.4. per cent) are having agricultural credit societies.In remaining population ranges of 5000-9999 and 10,000+ the availibity of such type of facility is in better condition.

TABLE 42
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of CD block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Soron	121	29,254.5	NA	88.1
2	Kasganj	103	22,065 1	98.7	89 2

	District Total	**1,517**	**381,673.8**	**92.6**	**91.4**

Table 42 presents C.D block-wise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There is a total of 1517 inhabited villages in the district having a total area of 381673.8 hectares. Of this, 92.6 per cent is cultivable and 91.4 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Soron block with 121 villages have a total area of 29254.5 hectares, of cultivable area of the block 88.1 per cent is irrigated. In Kasganj block, all the 103.villages have a total land area of 22065.1 hectares, of this 98.7 per cent of land is cultivable and of the aforesaid area 89.2 per cent is irrigated. In Amanpur block, all the 97 villages have a total area of 18944.9 hectares, of this cultivable area is 96.2 per cent and 91.0.per cent is irrigated. In Sahawar block, all the 73 villages have a total area of 20458.0 hectares. Of this, cultivable area is 86.2 per cent. Of cultivable area 87.8 per cent is irrigated.Ganj Dundwara block with 95 villages have a total land area of 18590.8 hectares, of this 82.6 per cent is cultivable area and out of this cultivable area 79.3 per cent is irrigated. Patiyali block with 70 villages have a total land area of 25628.9 hectares. Of this 78.0 per cent is cultivated area, out of which 87.6.per cent is irrigated. Sidhpura block with a total 94 villages have an area of 17391.1 hectares. Of the cultivable area 98.4 per cent is irrigated area.,

Table 43 gives the per capita receipt and expenditure (in thousand rupees) for each town in the district. The average per capita receipt for towns of the district works out to Rs 206 of which Rs 33 are derived through local taxes and the remaining Rs 172 received from all other sources. The average of total expenditure incurred per head is Rs 172. Out of this Rs 80 are spent on general administration, Rs 40 on public health and conveniences, Rs 19 on public works and Rs 32 is spent on other items. No amount has been allocated on public administration. Among all the 19 towns the receipt and expenditure recorded per head are the highest in Ganj Dundwara NPP and Marehra N.P.

TABLE 44

SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7

	Total	5.3	2.6	0.9	1.2	0.1

Table 44 shows the average number of educational institutions, per 10,000 population of statutory towns in the district. At district level primary schools population comes to 5.3 schools, 2.6 junior secondary/middle, 0.9 secondary/matriculation, 1.2 senior secondary schools and the ratio of colleges is only 0.1. Among the towns, the ratio of primary school is highest 9.8 each in Jaithara and Jalesar, junior secondary/middle is highest in Bilram (NP). Sidhpura has highest ratio (2.0) of secondary/ matriculation schools while in case of senior secondary school this position is claimed by Nidhauli kalan NP (4.0). College education is available only in Etah NPP, Ganj Dundwara NPP, Kasganj NPP, Nidhauli Kalan NP and Jalesar NPP.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3

11	Jaithara, NP	Tobacco, --, --	Tobacco, Garlic, Potato
12	Raja Ka Rampur, NP	Tobacco, --, --	Tobacco, Potato, Garlic
13	Aliganj, NPP	Tobacco, --, --	Tobacco, Garlic, Potato
14	Marehra, NPP	Carpet, Dari (Carpet), Earthen Pots	Mango, Bangles, Durrie
15	NidhauliKalan, NP	Gilat Ornaments, --, --	Wheat, Gilat Ornaments, --
16	Etah, NPP	Ghee, Coffee, Roasted Gram	Garlic, Ghee, Gram
17	Sakit, NP	Cotton, Quilt, Earthen Pots	Food grains, Cotton, Milk
18	Jalesar, NPP	Brass Ghanta, Ghungroo, Brass Utensils	Brass, --, --
19	Awagarh, NP	Building Materials, Ornaments, Ag.Equipments	Rice, Wheat, Building Materials

Table 47 indicates most important articles manufactured and exported out of the each town in the district.The district is well known for tobacco and bidi town's main exports. The main items manufactured in the urban part of the district are tobacco, bidi and food grains and these are mainly exported to other place.

(x) Brief analysis of the data on houses and household amenities collected during Houselisting Operations, Census of India 2001 based on inset table 48 to 52

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48

HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 431,639 consisting of 363,123 rural and 68,516 urban households.85,451 households belong to Scheduled Castes and 3,588 to Scheduled Tribes.417,436 households are living in their owned houses constituting 96.7 per cent of total households. Of these households, the largest number of households (183,280) have occupied one room accommodation and is followed by two room accommodation numbering 130,505 .households. Next position is claimed by households (50,814) occupying three room accommodation. Number of households in owned accommodation occupying three+rooms rank at fourth place with 43,769 households while 9,068 households are without any exclusive room.

11,202 households living in rented accommodation account for 2.6 per cent of total number of households in the district. The largest number of 5,264. households are living in single room accommodation followed by 4,102 households in double room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 3,081 forming only 0.7 per cent of total households are distributed in single room accommodation numbering 1,520, two room 822 and 284 in three room accommoda-tion. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanen	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Kasganj	69 1	8.6	22.3	64.9	8.6	26 5	86.6	8.7	4.7

Data source Census of India 2001, H-series Tables on Houses, Household amenities and Assets

Note.-

Permanent - 1 Permanent houses refer to those houses whose wall & roofs are made of pucca materials i e where, burnt bricks, G I

Semi permanent - 2 Semi-permanent houses refer to those houses made of other types of materials

Temporary - 3 Temporary houses refer to those houses having wall and roofs made of Kutcha materials i e where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt

The percentage distribution of households as shown in the above table reveals that 66.0 per cent of the households in the district had permanent houses. The trend is different in rural (62.1 per cent) and urban area (86.8 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Etah (71.2 per cent) followed by Kasganj (69.1 per cent), Jalesar (69.0 per cent) and lowest in Aliganj (51.7 per cent). In respect of semi-permanent houses, the returns were 8.5 per cent of district level whereas among tahsils, inAliganj it was highest 10.7 per cent and lowest was 7.5 per cent in tahsil Etah Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 6.1 in tahsil Etah to 9.6 per cent in tahsil Aliganj. Temporary houses in the district lie between the range of 21.3 and 37.6 per cent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly

Note: Percentage is to be given in brackets after the number of households

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage menas closed and open drainage.

The above table shows that out of total households of the district 85.4 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 84.1 and 92.3 per cent. Tahsil Patiyali had higher order of proportion of households where percentage for rural area was 86.4 and 95.8 per cent in urban areas. Electricity was available for 18.0 per cent of households at district level.Bathrooms and toilet facilities were available in 18.7 and 25.9 per cent of households. Tahsil Jalesar poorly served in respect of these amenities. Drainage facility was available for 90.8 per cent of households, whereas the proportion of rural and urban areas households accounted for 89.9 and 95.3 per cent.

Percentage in brackets

Data source Census of India 2001, H-series Tables on Houses, Household amenities and Assets.

It is observed from the above table that 45.6 per cent of households in the district use firewood as fues, for cooking, the proportion in the rural area is 44.8 and in urban area it comes to 49.7 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in 7.3 per cent of the households. The composition of rural and urban comes to 1.5 and 38.2 per cent respectively. Kerosene is used for cooking in 0.1 per cent of the households. The other methods like crop residue, cowdung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.1 per cent and 27.5 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood . The table shows that firewood, cowdung cake, crop residue, LPG (cooking gas) are the predominant fuels for cooking in the district.

TABLE 52 :

NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

	District Total	**Total**	**431,639**	**129,610**	**160,084**	**71,767**	**13,519**	**283,896**	**29,697**	**5,750**	**106,467**
		Rural	**363,123**	**98,025**	**131,131**	**36,999**	**5,753**	**245,511**	**19,135**	**3,731**	**91,141**
		Urban	**68,516**	**31,585**	**28,953**	**34,768**	**7,766**	**38,385**	**10,562**	**2,019**	**15,326**

Table 52 reveals that out of the total households (431639) of the district, in all 30.0 per cent could avail banking services at district level while 37.1, 16.6, 3.1, 65.8, 6.9 and 1.3 per cent enjoyed the availability of household assets radio/transistor. television, telephone, bicycle, scooter/motor cycle/ moped and car/jeep/van/respectively whereas 24.7 per cent had none of the specified assets.

It also reveals that at tahsil level a highest proportion of 34.7 per cent of households were availing banking services as well as all other households assets in Etah tahsil. The highest of none specified assets 29.8 per cent in the tahsil Kasganj against it, on the other hand the lowest 12.1 per cent were availing banking services and 13.2 per cent radio/transistor household asset in Jalesar tahsil while the rest of the availabilities of household assets at the lowest foot were being availed in the same tahsil and the percentage of the enjoyers of none of the specified assets was 29.8 per cent in Kasganj tahsil. 25.1 per cent households in Etah tahsil followed by 18.8 per cent in Patiyali tahsil. Banking services and the order of percentage of households having all other available household assets was higher in tahsil Etah.

(xi) Major social and cultural Events, Natural and Administrative Development and Significant Activities during the decade:

During the year 1991-2001, the district administration has not reported any major social, cultural and natural event in the district.

(xii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district

The district has some places of historical, cultural and religious interest. Some noteworthy places of tourist interest in the district are as under.

Soron:

It is situated on a metalled road at a distance of 45 kms from the district headquarters. It is generally believed that famous poet Tulsidas was born here and had composed the Ram-Charait- Manas at Rajapur in district Banda.

The Soron in the district holds a unique place among places of pilgrimage in the country. It is one of the important holy bathing places and an annual fair is held in the month of December. The place has a very ancient temple of Sri Varah Bhagwan. There are many other temples notable among then are those of Yogeshwar and Someshwar, Sri Sita Ram and Batuk nath.

Patiyali:

Patiyali town the tahsil headquarter lies on the bank of the Burhi Ganga at a distance of 40 km. from the district headquarter. It has the ruins of buildings of Mughal times. It is also the birth place of great literary poet Amir Khusro who was the contemporary of Ala-ud-din Khilji.

Jalesar Town:

It is located about 40 kms to the north-east of Etah Ruined walls surrounding a large mass of shapeless mound proclaimed the existence of a decayed fort built by one raja Katira of Mewar. Beside the usual public buildings the town contains a number of historical moments, mosques, temples and mausoleum of the Nawab Rashid Khan.

Atranji Khera:

A number of archaeological excavations have been conducted here and yielded coins over one thousand year old.

Bilsar:

The village Bilsar boasts of inscription of Gupta times.

Nadai:

This village is located 25 kms from Etah and has brass-bell weighing 84 maunds.

Bhargain:

This place has a number of Muslim graves and monuments.

(xiii) Major Characteristics and Contribution of the District:

District Etah has larger number of crimes in comparison to other districts of the state. This is mainly because of poverty, illiteracy and unemployment. During the 1998-99. the number of crimes i.e. theft, dacoti, loot, abduction, rape, SC/ST victimization and other. registered were 3042. It has reduced in the year 1999 by 2604. The district has also produced mnay freedom loving people in the state. It is also birth place of great poet Amir Khusro.

(xiv) Scope of Village Directory & Town Directory

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of newspaper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART - A VILLAGE AND TOWN DIRECTORY
(SECTION I AND II)

SECTION I - VILLAGE DIRECTORY

Section - I : Village Directory

(a) Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows.

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village,

whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspsaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat
Appendix-IX	Shows number of different types of girls school in a village.

(B) STATEMENT
LIST OF VILLAGES MERGED IN TOWNS AND OUT-GROWTH AT 2001 CENSUS

Serial Number	Name of Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4
Not applicable as there are no merged villages and outgrowths in the district.
