JPN – JYOTIBA PHULE NAGAR

MOTIF

SHAKEEL BADAUNI

Budaun had long been famous for 'Shayars' (urdu poets) i.e., composer of Urdu and Persian poems and gazals. Among them, one of the most popular and famous composers of Urdu 'Shayri' and 'gazals' was Shayar Shakeel Budauni who was born on 3rd August 1916 at Mohalla Baido Tola in Budaun. He got his primary education in Urdu, Arabi and Persian at his home from his father Maulla Jamil Ahmad of Shokhta's family. He passed his Higher Secondary in 1936 from Maston Islamia High School and graduated from Aligarh Muslim University in 1942. In 1946, Shakeel Budauni resigned from his job in supply department, Delhi and joined Kadar Studio in Film Industry at Mumbai as a lyricist. He got education of 'shayari' from Mohd. Zila-ul-Kadri alias Jam Badauni and Jigari. His main compositions published were 'Ranaiyan', 'Sanmon Hasan', 'Rangeeniyan', 'Shabistan', 'Nagma-e-firdos', 'Door koi Gaye', 'Shakeel ki Diary' etc. He actively participated and organised a number of seminars in Urdu, English and Hindi. Shakeel Badauni, the 'Shayr' of Urdu gazals was popular as the 'King of Gazals'. Shakeel Budauni earned respect in film industry as a Film lyricist of Urdu and Hindi songs. Shakeel Budauni passed away on 20th April of 1970 at the age of 54. His memorable melodious and heart touching songs are still afresh in the memory of Indian folk, which were provided for unforgettable movies like, Babul, Mela, Aan, Ganga-Jamuna, Didar, Ghunghat, Udan Khatola, Baiju Bawra, Mother India, Mugal-e-azam, Chaudhawin ka Chand and Gharana etc.

Annexure III	Various measures of fertility and mean age at marriage, 1991 Census	951
Annexure IV	Percentage distribution of Migrants by place of birth/place of last residence, 1991 Census	952
Annexure V	Brief account of main religions in the district/tahsil as per 1991 Census	953
Annexure VI	Marital status of population as per 1991 Census	954
Annexure VII	Age, Sex and Education in the district, 1991 Census	958
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	960

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place

of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar
Deputy Director of Census Operations,

Lucknow

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District :

The district is named after its headquarters town Budaun, which is said to be Vedamau of the Mahabharat and Budhmau of the Buddha period. An inscription found near the suburb of the town indicates that it was known as Vodamayuta in the 12th and 13th centuries and in course of time got corrupted to Budaun. But the evidence of ancient coins and other antiquities discovered here shows that some earlier town on the same site existed long before the advent of Muslims in India. With the finding of numerous prehistorical bronze weapons and tools, it is beyond doubt that this region must have been civilized long ago, probably during the bronze age or even earlier. The earliest known Aryan people, who settled in this region were Panchals, who were the close allies of the Kurus, as is indicated by the joint name, Kuru Panchala. About the middle of the fourth century B.C. this region was annexed to the Nanda empire of Magadha and after the overthrow of the Nandas a quarter of century later, the district became part of the powerful Maurya empire. With the downfall of the Mauryas, Sungas established their dynasty which lasted about one hundred years i.e. from 187 B.C. to 75 B.C. After Sungas, the Kanva dynasty wielded power. The history of the region from the end of the Kanva rule to the rise of the Guptas is very obscure.

About the beginning of the first century B.C. a third dynasty came into existence in Panchala which consisted of some fourteen successive rulers, all having names ending in 'mitra' and have hence often designated as the Mitra rulers of Panchala. The beginning of the second century A.D. Kushanas subjugated Mitra of Panchala and were allowed to live as feudories. During the fourth century A.D. Gupta once again established imperial unity in India. After the downfall of the Guptas in the latter half of the sixth century A.D. the district appears to have come under the domination of the Maukhari Kings

of Kannauj and after them under that of the emperor Harsha (606-647 A.D.). After the death of Harsha, the history of the region, as that of the rest of Northern India, spells anarchy and confusion. Sometime in the first half of the ninth century, it came under the sway of the rising power of the Gurjara Pratiharas. The Pratiharas empire of Kannauj collapsed under the repeated shocks of terrible onslaughts by Muslims. With the establishment of Rashtrakutas in the region, the prosperity and importance of Budaun grew tremendously and soon it became one of the premier cities of Northern India.

In 1197-98 Qutb-ud-din Aibak, Mohammad Ghori's governor took possession of the city. Qutb-ud-din Aibak on his accession to the Delhi throne in 1210, appointed Iltutmish as governor of this place. Ghiya-ud-din Balban rode to the throne of Delhi in 1265-66. In the very year of his reign Balban was beset with the serious problem of Katehriya uprising in Budaun and Amroha. He suppressed the rebellion in such an exemplary manner that "the blood of the rioters ran in streams, heaps of slain were to be seen near every village and jungle and the stench of the dead reached as far as Ganges."

In 1289, Jalal-ud-din Feroz ascended the throne of Delhi and founded the Khilji dynasty. He was succeeded by Ala-ud-din. After the death of Ala-ud-din nothing is heard about Budaun till the accession of Feroz Tughlaq, the third ruler of the Tughlaq dynasty in 1351. After the death of Firoz, confusion reigned supreme throughout the empire and in 1394 Budaun came in possession of Nusrat Shah, while Mahmud was confined to Delhi throne During the early years of Mahmud's reign. Mahabat Khan was appointed governor of Budaun.

It is rather surprising that the history of Budaun remains almost obscure throughout the reign of Akbar, more so because, one of the greatest historian of the day, Abdul Qadir Budauni was the native of this place. This may have been either due to the fact that Budaun relapsed into insignificance or no significant event occurred to attract the attention of the chronicler. Abu Fazl's Ain-i-Akbari throws a considerable light on the administration of the district during Akbar's reign. The foremost change that was brought in this regime was that Budaun lost its status of being the capital of a province and became merely a sirkar in the subah of Delhi. The history of Budaun remains obscure for considerable period after the death of Akbar in 1605. During the middle of eighteenth century Hafiz Rahmat Khan, a Rohilla warrior, played an important role in the history of this region. He was defeated and killed in 1774 and the whole of Rohilkhand passed into the hands of Shuja-ud-daula. For twenty-seven years, Budaun remained in the possession of the rulers of Awadh. But in 1801, the Nawab Vizir of Awadh agreed to surrender Rohilkhand and other territories to the East India Company. Till 1856, the district remained peaceful. On the eve of freedom struggle of 1857 the people of the district took part in the struggle. The month of May 1858, saw the gradual restoration of order and the British rule Thereafter, for 50 years the district remained peaceful and made considerable economic progress. The 20th century saw the dawn of nationalism in the country. However, in between the Swadeshi era and the advent of Gandhiji on the political scene, there was no remarkable political happening in the district. The beginning of 1920 saw the foundation of the district congress committee and during the same year, the Non-cooperation Movement started by Gandhiji also spread in the district. In 1930, Civil Disobedience Movement was started in Budaun, as in the other parts of the country. During this Movement, more than 600 persons from the district were sent to jail. During Quit India Movement nearly all the local leaders were arrested but their place was continuously filled up by other people. On August 15, 1947 the country achieved its long awaited dream of independence. The district celebrated the Independence day in the befitting manner.

(iii) Administrative setup :

District Budaun lies in North-Western part of the state. It forms the South-West portion of the Rohilkhand Division, being part of the tract of land between the Ganga and Ramganga.

There are 6 tahsils in the district, namely Gunnaur, Bisauli, Sahaswan, Budaun, Dataganj and Bilsi. For implementation of development scheme the district is divided into 18 community development blocks.

There are 23 towns in the district out of which 6 towns are Nagar Palika Parishad (NPP) and rest of 17 are Nagar Panchayat (NP). Total no. of villages in the district is 2081 out of which 299 villages are uninhabited.

Jurisdictional Change (1991-2000) :

A new tahsil Bilsi was created in the year 1997 by transferring 99 villages and one town from Bisauli tahsil and 111 villages and one town from Sahaswan tahsil.

District Administration :

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District

Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Zila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each have a departmental district level office. From the development point of view the district is divided into community development blocks. Block Development Officers (BDO) looks after development works at community development block level, Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police and Superintendent of Police are incharge Additional Superintendent of Police (ASP) and Commanding Officers are incharge of their respective area. Deputy Superintendent of Police (DSP) looks-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features :

Location and Size :

The district lies between latitude 27°40' and 28°29' North and longitude 78°16' and 79°31' East. On the North it is bounded by district Moradabad, Rampur and Bareilly, in the East by the district of Shahjahanpur, the boundary for a considerable portion of its length being formed by the Ramganga, while to the West and South the Ganga separates the district Bulandshahr, Aligarh, Etah and Farrukhabad. The district occupies an area of 5168 sq.km. Owing to frequent changes in the channels of the rivers, the Ganga and Ramganga from year to year, the area of the district is constantly subject to variations. The district is some what irregular in shape, having an extreme length of some 145 Km. from East to West and an extreme breadth of 67 Km. from North to South.

Physiography :

The district Budaun is a part of Southern Upper Ganga Plain. The general slope of the district is from North-West to South-East. Geologically the district belongs to recent ori

On the basis of geology, soil, topography, climate and natural vegetation, the district is divided into following three sub micro regions.

Ganga Khadar :

It is an elongated belt parallel to the Ganga river stretching in East-West direction in the tahsils of Gunnaur, Sahaswan, Budaun and Dataganj The tract is low-lying with diverse appearance and fertility. The landform is a product of the Ganga river which flows in the Southern part along the district boundary towards South-East direction. Dead arms of the river, oxbow lake are the main topographical features along the Ganga river. Geologically, the region belongs to Alluvium and Dun gravels formations while the main soil suborder association is Psamments-Fluvents-Aquents-Ochrepts-Orthents. A small patch of Malpur reserved forest is also located in this region. Due to its physical characteristics, the region is not very developed in rspect of agriculture.

Budaun Plain :

The region consisting of tahsils Gunnaur, Bisauli, Sahaswan, Budaun and Dataganj is situated in the central part and covers approximately two-thirds area of the district. It is flat and levelled plain sloping towards South-East direction. The Sot is the main stream draining through the centre of the region. The most important topographical features in the region are the location of bhurs and mounds. The frequency of bhurs are relatively higher in Southern part. Geologically, the region belongs to Alluvium and Dun gravels formations, while the main soil sub-order association is Psamments-Fluvents Aquents

Ramganga-Aril Inter fluvial Plain :

The region is situated in the Eastern part of the district and comprises the major portion of Dataganj tahsil and a small segment of Budaun tahsil. It is an inter fluvial plain between Aril and the

Ramganga river :

The Ramganga drains the Eastern part along the district boundary towards South. The physical characteristics indicate that the region is an old abandoned course of the Ramganga river. Geologically, the region belongs to Alluvium and Dun gravels formations and the main soil, sub-order association is Psamments-Fluvents-Aquents.

Drainage :

The chief river of the district is Ganga and all the others are its tributaries. The Ganga has a course of some 150 Km. along the borders of this district. It flows in a wide and sandy bed and is liable to change its channel from year to year so that total area of the district is constantly subject to variation. The lowland along the Ganga is intersected by a multitude of small streams, some of which have their origin in the interior and maintain definite courses, while the rest are merely backwaters of the river and are liable to change from year to year.

Mahawa is the chief tributary of the Ganga. The other prominent streams of the district are Tikta, Burdmar, Chhoiya, Aka, Bhainsaur, Kamra, Sot, Aril and Narha. Ramganga is a large river and has a course of some 58 Km. along the Eastern boundary of the district.

The lakes in the district are numerous and extensive. The various depressions differ greatly in their character and appearance of the lakes, the chief is the Purainia lake while others include Aswar, Gutain and the lake near Bhainsrauli.

Climate :

The climate of the district is characterised by general dryness, a hot summer, and a pleasant cold season. The year may be divided into four seasons. The cold season stretches from middle of November to February and is followed by the summer from March to the third week of June. The South-West monsoon season which starts from July and lasts till the third week of September. The period from the last week of September to the middle of November constitutes the post monsoon or transition season.

May and early June are the hottest period of the year with the mean daily maximum temperature touching 40°C and the mean daily minimum 25°C. The scorching dust laden Westerly winds, which blow in the summer season, add to the discomfort to the intense heat. On individual days the maximum temperature reaches over 46°C. With the advancement of monsoon, there is appreciable drop in the day temperature. 87 per cent of the annual rainfall in the district is received during the monsoon months, June to September, June and August being the rainiest months.

Average rainfall during the year 1997 was 861 m.m. while actual rainfall recorded during the same year was 875 m.m. After October both the day and night temperatures decrease rapidly. January is generally the coldest month with the mean daily maximum temperature at 22°C and the mean daily minimum at 8°C.

The humidity is high during the South West monsoon season. Winds are generally light especially in the mornings. During the summer months the district experiences dust and thunderstorms. Fog is common in the cold season.

Natural Economic Resources :

Forestry :

According to statistics available for the year 1996-97, the area covered under forest in the district was 6903 hectares, which is 1.3 per cent of the total area. Forest department has planted trees on both side of the roads. Under social forestry during 1996-97, sixty lakh trees were planted in the district. Forestry does not yield much of revenue in the district. Some revenue is earned through the auction of woods on roadside trees.

The tree most commonly found in the district is dhak (Butea monosperma). Other trees found in the district are mango, sissoo (Delbergia sissoo), siras (Albita lebbek or Alibizia procera), neem (Azadirachta indica), and tun (Toona ciliala or cedrela toona) are commonly grown. The babul (Acacia arabica), which is valuable for its wood and also for the bark, which is generally used for tanning of leather, gular (Ficus recemosa), pakar (Ficus lacescens), pipal (Ficus religiosa) and bargad (Ficus bengalensis) are commonly found.

Due to increasing population and pressure on land and consequently the reduced forest area, the number and variety of the wild animals in district has diminished. The tiger and leopard have become extinct. The wild pigs and wolves are now rare. The number of blue bull or nilgai has increased during the last four and five years. Among the other animals found in the district are jackal, monkey and hare. Nearly all varieties of the birds found in the plains of Uttar Pradesh are found in the district. Snakes are common in the district, the chief being the cobra, krait and rat snakes.

Minerals and Mining :

Budaun is not rich in minerals. The limestone conglomerate known as Kankar is found. Lime is obtained by burning Kankar. Reh or Saline efflorescence is found in small quantity on usar land.

Soil :

The nature of the soils in the district is generally calcareous. The soils are neutral to moderately alkaline and have, sometimes, well developed clay accumulation horizon in the subsoil. The three main divisions of soils in the district are loam, clay and bhur or sand. Most of the usar land in this district is reclaimable by careful tillage.

Land and Land use Pattern :

According to the land use statistics available for the year 1996-97 through Sankhyakiya Patrika – 1998, out of total reported land of 520,166 hectares in the district, 6,903 hectare are covered by forest. Other uses were 7,659 hectares cultivable waste land, present follow 19,138 hectare, other fallow 16,921 hectares, barren and uncultivable land 11,921 hectares, land use other than agriculture 42,348 hectares, pasture 781 hectares, orchards 7,754 hectares and land under net area sown was 406,741 hectares.

Agriculture and Crop Pattern :

Agriculture in the district is growing with the advent of tube-wells and private pumping sets, together with various other minor irrigation works. There has been considerable extension of multiple – cropped area and more valuable high-yielding corps are replacing fast the old and indigenous varieties.

As is usual in the doab, the agriculture year is divided into three parts known by the traditional names kharif, rabi and zaid. The last part is of little significance in respect of area and mainly consists of vegetables, water melons, musk melons grown in summer, in the khadirs and among the sandy banks of Ganga, Ramganga, Sot and other rivers.

The Kharif crops are sown in June-July and reaped in September – October. The main kharif cereals are bajra, maize and paddy. Among the pulses cultivated in this season, urd, moong and moth are the chief ones. Rabi sowings begin in October – November and are harvested in March-April – May. Of all the food grains grown under rabi crops wheat is the most prominent crop. It is sown alone as well as mixed with barley, gram, pea or mustard. Another important rabi crop is pea. Among pulses Arhar is the main pulse crop of the district. The chief cash crops grown in the district are sugarcane, oil-seeds, potato, vegetables and fruits. During 1996-97 of the total area under different crops in the district was predominantly under wheat (249,774 hectares), followed by paddy (677,041), bajra, (119,205), maize (28,312), pulses (24,673), oil seeds (39,486), sugarcane (29,616) and potato (19,950) hectares. For the development of agriculture in the district, the cultivators of the district during 1997-98 had the services of 83 seed godowns/fertilizer depots, 169 rural godown, 18 insecticide depot, 4 seed farms, 50 cold storage and 9 agriculture service centres.

Crop density of the district is 156.4 per cent. Since 1996-97 national pulses development scheme has been implemented in the district which included the crops of gram and pea.

Irrigation :

The district enjoys heavy and equally distributed rainfall during the monsoon while occasional light showers are received during the winter months. The water level is generally high and the soil except in the bhur tracts has a remarkable moisture retaining capacity. 63 per cent of the area available for cultivation is irrigated. The district is deprived of canal network. Therefore, the main sources of irrigation are government and private small irrigation system. Tube wells have been the most prominent source of irrigation in the district. During 1995-96, total area irrigated through tubewells/ pumping sets was 82.88 per cent, while through wells it was merely 0.04 per cent preceded by ponds and lakes (0.02 per cent) and other sources (16.99). During 1997-98 the district had 1,155 government and 9,538 private tubewells, 28,455 wells, and 79,101 pumping sets.

Animal Husbandry :

The district does not have any significant mark so far as animal husbandry is concerned. The cattle of the local breed are of ordinary and inferior quality. However, considerable progress has been made in improving the breed of the cattle by the animal husbandry department through selective breeding, culling undesirable animals and up-grading in-digenous cattle with improved bulls of well known and tried Indian breeds. Artificial insemination service programme for breeding cows and buffaloes has been taken up. Goats are commonly reared for mutton and sheep for wool. Ponies, donkeys, camels and mules are mainly used for carrying loads. According to the live stock Census of 1993 the district had 428,263 cows of different varieties, 568,179 buffaloes, 14,545 sheep, 252,243 goats, 7,157 horses, 37,664 pigs and other animals 115,086. For improvement of the breed and health-care facilities, the district had services of 30 veterinary dispensaries, 50 livestock development centres, 33 artificial insemination centres and 23 sub centres during 1997-98. Beside these there were one sheep development centre and 2 Pig development centres. For milk development programmes, milk producers are trained and animal welfare schemes have been introduced. During 1996-97 the district had 412 milk co-operative societies with the membership

of 13,678. During the same year milk worth Rs. 45,190 thousand was procured and marketed in the district.

Fishery :

Fish of many varieties are found in the Ganga, Ramganga, Sot, Aril and Mahawa rivers. Some of the larger jhils contain several kinds of fish. The produce is sold locally in the town markets but a fair amount is exported to Bareilly, Aligarh and Agra. Fisheries department during 1994-95 leased 1,169 ponds with an area of 1,075.96 hectares. During 1996-97 number of ponds leased was 58 with an area of 3.80 hectare and fisheries departments distributed 11,938 thousand fingerlings in the district during the same period.

Industry :

The district has a sound agricultural base and a reasonably good infrastructure, but the industrial potential is low. The industrial units in the district mainly consists of agricultural implements, Pulse mill, Khandsari, washing soap, and vegetable oil. In the vicinity of Budaun town there is one factory known as Belkafood, manufacturing potato products which are timed and exported to different parts of India and abroad. Among the large scale industry in the district, sugar mills, vanaspati mill and one factory of chemical fertiliser at Babrala are worth mentioning. Among small scale industries, there are units of leather industry, edible oil, electrical and electronic industry, food products, wooden furniture, cement grill, automobile parts and various other general engineering parts. During 1995-96 the number of small scale industrial units were 4,342.

Trade and Commerce :

The district of Budaun is not well served by railways and therefore, it has not developed as a big trade centre. However, the district Budaun has trade connection with neighbouring districts. The exports of the district comprise mostly of agricultural products like ground nut, oil, bajra, maize and wheat. The district imports a large number of items, the chief being, cotton and cotton cloth, cement, iron and steel, fertilisers, petrol and kerosene oil.

Transport :

Mechanised transport like motor cars, buses and motor cycles are fast moving modes of conveyance of the district. Besides these, bicycles and cycle rickshaws in the city and on its outskirts and bullock-cart are still multipurpose vehicles Tractors are also used for transportation in the rural areas. U P. State Road Transport Corporation and private buses ply in the district. During 1997-98, the district had 191 bus stations. During the same period, the district had 18 railway stations (including halt). The length of railway line in the district is 57 Km. long broad guage and 48 Km. long metre gauge. During 1996-97, the district had 1,394 Km. long metalled road, out of which 1,236 Km. was maintained by Public Works Department and the rest by local bodies and other departments. The district has 298.94 Km. long state highways.

Electricity and Power :

All the urban areas of the district are electrified. Till 1997-98, 1464 villages had also been electrified. Out of the total consumption of 239,068 thousand Kwh. during 1997-98, agriculture sector was the highest consumer (164,703 thousand Kwh.), distantly followed by domestic light (33,401 thousand Kwh.) and industries (31,860 thousand Kwh.).

Gram Panchayat, its composition, jurisdiction and role in villages development

A Gram Panchayat acts as the executive of the Gram Sabha and plays a vital role in village development. There are 1,064 Gram Sabhas in the district.

Composition :

The members of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 441 Gram Sabhas in the district.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villages.

Its term :

The new Panchayat Raj Act of 1993 has fixed a uniform five year period for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third number of Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the sarpanch.

Qualifications :

In order to be elected to a village panchayat, a candidate should posses the following qualifications 1. He should be a resident of the village concerned

and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions :

A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks after the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a center.
5. It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat also enjoys certain judicial powers. It decides petty civil and criminal cases and imposes fine upto Rs. 100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room :

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate

household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder :

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per sq. km.(1,000 per sq.mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.-

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) A city or town with one or more contiguous

outgrowths;

ii) Two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households :

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya	2 Badi
3 Baiga	4 Balahar
5 Bajaniya	6 Baiswar
7 Balmiki	8 Bajgi
9 Banmanus	10 Balai
11 Barwar	12 Bangali
13 Bawariya	14 Bansphor
15 Beriya	16 Basor
17 Bhuiya	18 Beldar
19 Boria	20 Bhantu
21 Badhik	22 Bhuyiar
23 Baheliya	24 Chero
25 Chamar, Dhusia, Jhusia, Jatawa	26 Dharkar
27 Dabgar	28 Dom
29 Dhanuk	30 Dusadh
31 Dhobi	32 Domar
33 Dhangar	34 Gharami
35 Gond	36 Gual
37 Ghasiya	38 Habura
39 Hari	40 Hela
41 Kanjar	42 Korwa
43 Karwal	44 Kalabaz
45 Kharwar (excluding Banbasi)	46 Kapariya

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate:

Literacy rate of the population is defined as the per centage of literates in the age group seven years and above. For different age groups the per centage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator -Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops tea, coffee, rubber, coconut and betel

nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Per centage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometer of the area.-

Age :

Age is measured in terms of the completed number of years.

Sex-ratio :

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal -of night soil :

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their

barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1,000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year-}}{\text{Mid-year Population}} \times 1,000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a -particular age-group}}{\text{Mid-year female population of the -same age-group}} \times 1,000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population -of the same age-group}} \times 1,000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1,000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \text{S ASFR}_{15\text{-}19}^{45\text{-}49}}{1,000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \text{å ASMFR}_{15\text{-}19\text{-}}^{45\text{-}49\text{-}}}{1,000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1,000$$

q1

Probability of dying between birth and age. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2-

Probability of dying between birth and age 2.

q5-

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality

Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births -during the year}} \times 1,000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births -during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than- One year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate -(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age-group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/

residence different from the place where she/ he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999), M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding :

Population Distribution :

The total population of the district is 3,069,426 divided into the 2,512,290 in rural and 557,136 in urban areas. The most populous tahsil is Budaun with 840,154 population followed by Dataganj tahsil a population of 569,936 .The least populous tahsil is Sahaswan with a population of 349,480. The maximum urban population is at Budaun tahsil which

is 227,376 followed by Bisauli at with 101,889 urban population whereas the least urban population is in Bilsii tahsil which is 30,681 At the 2001 Census the district has 18.2 per cent of its population living in towns. As compared to this in the State the same is 20.8 per cent. The urban population is highest at 27.1 per cent in Budaun tahsil followed by 20.6 per cent in Bisauli tahsil and least 8.2 per cent in Bilsi tahsil.

Size, Class and Status of Towns :

Budaun with 148,029 population is Class I town Sahaswan and Ujhani with 58,184 and 51,051 populatioane is Class II town. There are six Class III towns in the district Islam Nagar, Bisauli, Bilsi, Kakrala, Allapur and Dataganj Six Nagar Palika Parishad in the district are Bisauli, Bilsi, Sahaswan, Ujhani, Budaun and Kakrala, apart from 17 Nagar Panchayats,

Population Growth :

The population of the district in 1991 adjusted to jurisdiction of 2001 was 2,448,338. in the district. The population of the district at 2001 Census is 3,069,426. There has been decadal population variationsince 1991 amounting to 621,088 in absolute term (25.4 per cent). The males who were 1,352,744 at 1991 Census increased to 1,666,669 and females increased from 1,095,594 to 1,402,757 As against to 25.8 per cent decadal growth in the district, the growth rate is 25.4 per cent in the state of Uttar Pradesh.

Population Density :

The area of the district is 5,168 square kilometre. The density of population in the district is 594 as compared to 690 in the state. In the rural areas of the district the population density is 507.

Sex ratio :

The sex ratio in the district is 842 , while it is 898 in the state of Uttar Pradesh. In the rural areas of the district the sex ratio is 831, while it is only 891 in urban areas. The rural sex ratio of the district is lower to the state. The sex ratio among 6 tahsils varies between 819 in Dataganj to 855 in Bisauli. Among C.D. blocks the sex ratio varies from 798 in Sumrer to 846 in Bisauli. The sex ratio in rural population in the district comes to 831. Among towns of the district the lowest sex ratio is found in Kachhla (794) and highest in Saidpur (925). The sex ratio of population in the age-group 0-6 is 890 in the district which is quite high to 842 from the general population. The sex ratio of population of the age-group 0-6 the rural areas is 888 against 898 in urban areas. The sex ratio of population in the age-group 0-6 among 18 C.D. blocks varies from as low as 853 in Janawai to as high as 915 in Wazirganj. The sex ratio of rural population in the age group 0-6 by ranges for 21.9 per cent population in the range of 850-899 The sex ratio of population in the age-group 0-6. among towns varies from 822 in Babrala to 971 in Rudayan.

Work Participation Rate :

In the district 30.0 per cent or 922,100 persons pertains to the category of working population Average males working population is 48.9 per cent against 7.6 per cent among females Main workers constitute 25.0 per cent of population Male workers predominates to male workers among marginal workers. Non-workers contribute 70 0 per cent of total population. Out of these 74.1 per cent are from the urban population. In rural areas 91.6 per cent females are Non-workers. Of the total worker population in the district 59.3 per cent are cultivators, 18.2 per cent engaged as agricultural labourers, 2.9 per cent in household industry and 19.5 per cent as other workers. Among male workers 61.2 per cent are cultivators as compared to 45.2 per cent females. Similarly as against 18.9 per cent male other workers, the proportion of female is 24.8 per cent. In rural areas of the district 68.1 per cent of working population is cultivators as against only 12.1 per cent in urban areas. In case of other workers, the composition of rural and urban proportion is 10.6 per cent and 67.9 per cent of working population. It may be mentioned that the working population in the district is 30.0 per cent as compared to 32.5 per cent in the state.

Literacy :

In the district 38.2 per cent of the population is literate as against 56.3 per cent in the state of Uttar Pradesh. In the district 49.0 per cent of the male population is literate as compared to 68.8 per cent in the state. Among females the literacy in the district is 25.1 per cent as compared to 42.2 per cent at the state level. In the district literacy rate is 53.3 per cent in urban areas as against 34.7 per cent in rural areas. The gap in male/female literacy rate is 26.1 per centage points in rural areas as compared to 15.4 per cent in urban areas. The literacy rate among C.D. blocks varies between 22.7 per cent in Dahgavan to 43.6 per cent in Ujhani. Similarly, the literacy rate among towns varies from 37 6 per cent in Sakhanu to 67.1 per cent in Babrala

(viii) Brief analysis of PCA data :

The district throws up a vivid picture of its population at the 2001 Census.

A few of the peculiar characteristics of the population are being highlighted through the following *inset tables*..

TABLE - 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population 1991* Total	Rural	Urban	Population 2001 Total	Rural	Urban	Percentage decadal variation 1991-2001 Total	Rural	Urban	Percentage urban population 1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Gunnaur				438,716	397,407	41,309					9 4
2	Bisauli				495,558	393,669	101,889					20 6
3	Bilsi **	NA			375,582	344,901	30,681			NA		8 2
4	Sahaswan				349,480	291,296	58,184					16 6
5	Budaun				840,154	612,778	227,376					27 1
6	Dataganj				569,936	472,239	97,697					17 1
District Total		2,448,338	2,017,033	431,305	3,069,426	2,512,290	557,136	25.4	24.5	29.1	17 6	18 2

The growth rates of each tahsil in Budaun district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 25.4 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 24.5and 29.1 per cent respectively . Out of the total population of the district 81.8 per cent lives in rural areas while 18.2 per cent lives in urban areas of the district The proportion of urban population has slightly increased during the decade from 17.6 per cent in 1991 to 18 2 per cent in 2001 in the district. The highest growth of urban population is recorded in Budaun 27.1 per cent and lowest is registered in Bilsi 8.2 per cent tahsil. Urban population is concentrated in Budaun tahsil while other tahsils are mostly rural.

TABLE - 2
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial Number	District / C.D. block	Total number of inhabited villages	Total rural population Persons	Male	Female	Number and percentage of villages	Population less than 200 Male	Female	Number and percentage of villages	Population 200-499 Male	Female	Number and percentage of villages	Population 500-999 Male	Female
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1	Rajpura	102	142,767	77,736	65,031	4 (3.9)	208	195	6 (5.9)	1,319	1,151	27 (26.5)	10,764	9,209

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1782 inhabited villages, 59 (3.3 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 236 villages having 13.2 per cent villages of the district while in the size class of 500-999 population claims 508 villages with 28.5 per cent of the total villages in the district. 631 villages (35.4 per cent) are in the size class of 1,000-1,999 and 317 villages (17.8 per cent) are in the size class of 2,000-4,999. 27 villages (1.5 percent) in the district fall in the ranges of 5,000-9999 and 4 villages (0.2 percent) have a population above 10,000.

TABLE - 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL
(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL
(c) Declassified - NIL
(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district..

TABLE-4
DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	52	2.9	64,446	2.6
11-20	5	0.3	3,803	0.2
21-50	25	1.4	11,788	0.5
51-100	31	1.7	16,480	0.7
101-200	70	3.9	26,050	1.0
201-300	139	7.8	101,866	4.1
301-500	512	28.7	635,626	25.3
501 +	948	53.2	1,652,231	65.8
Not known	0	0	0	0.0
District Total	**1,782**	**100.0**	**2,512,290**	**100.0**

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 948 accounting for 53.2 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 65.8 percent population. The lower ranges of 301-500 & 201-300 persons per sq. km. cover 512 villages (28.7 per cent) and 139 villages (7.8 per cent) respectively have very high density with more than 201-500 persons per sq. km. while the corresponding proportion in the middle range of 101 to 200 is 3.9 per cent of the total inhabited villages having 1.0 percent population of the district. In the low density range of 21 to 50 and 51-100 persons account for 1.4 and 1.7 per cent of inhabited villages respectively. Both these ranges together claim 1.2 per cent rural population. Population density of Budaun district (Rural) is 483.

TABLE-5
SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	854	846	933
1911	916	922	866	824	818	873
1921	908	918	834	848	845	867
1931	903	916	813	848	845	876
1941	907	922	824	855	852	875
1951	908	922	827	844	841	862
1961	907	921	817	837	835	853
1971	876	884	826	812	807	862
1981	882	889	850	809	798	864
1991	876	879	864	810	796	877
2001	898	904	876	842	831	891

Note : Sex ratio has been defined here as the number of females per 1000 males

As per 2001 Census sex-ratio of 842 females per 1,000 males has been recorded in the district against the state average of 898 . The sex-ratio of the district is significantly low as compared to the state average figures from 1901 to 2001. The lowest sex ratio of 810 females per 1000 males were recorded in the district during 1991 against the state average of 876 females. It is also observed that the proportion of females in rural areas is lower than that of urban areas in district whereas it is higher in state.

TABLE-6
SEX RATIO BY TAHSILS, 2001

Serial Number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Gunnaur	833	827	894
2	Bisauli	855	844	896
3	Bilsi **	847	842	896
4	Sahaswan	845	831	913
5	Budaun	850	837	886
6	Dataganj	819	808	878
	District Total	**842**	**831**	**891**

Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 842 females for every thousand males in Budaun district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 831 and 891 females respectively. The rural sex-ratio in the tahsils varies between 808 in Dataganj tahsil and 844 females per 1,000 males in Bisauli tahsil. The sex-ratio in Budaun (837), Bilsi (842) and Bisauli (844) is higher than district rural average (831). In urban areas the highest sex-ratio is recorded in Sahaswan (913) and the lowest is in Dataganj (878). For the district urban sex-ratio stands 891..

TABLE-7
SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Rajpura	837
2	Gunnaur	830

15	Samrer	798
16	Dataganj	812
17	Mion	812
18	Usawan	807
	District (Rural) Total	**831**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 831 females per 1,000 males. Among the C.D. blocks the highest sex-ratio of 846 females is found in Bisauli C.D. block and is followed by Wazirganj 845, while the lowest of 798 is recorded in Samrer C.D. block. The sex-ratio of Ujhani, Jagat and six other C.D. blocks are higher than the district rural average of 831 and in remaining seven blocks, this value is below the district average.

TABLE-8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	61	3.4	22,894	0.9
700-749	134	7.5	109,499	4.4

District Total	**1,782**	**100.0**	**2,512,290**	**100.0**
al) for District		**831**		

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e.614 accounting for 34.5 per cent of the total villages having largest population of 39.7 per cent in the district fall in the sex-ratio range of 800-849 females per 1,000 males. It is followed by the sex-ratio range of 850-899 which claims 434 villages (24.4 per cent) and 30.1 per cent population. The highest range of 1,100 & above claims 1 village (0.1 per cent). This range shares 369 rural population of the district while in the sex-ratio range of 900-949, there are 127 villages (7.1 per cent). In remaining sex-ratio ranges of 1000-1099, 950-999, 750-799, 700-749 and less than 700, the number of villages are 13 (0.7 per cent), 24 (1.3 per cent), 374 (21.0 per cent), 134 villages (7.5 per cent) and 61 (3.4 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e. 614 having maximum population (39.7 per cent) fall in the higher sex-ratio ranges of 800-849 females. District rural sex-ratio is 831.

TABLE- 9

Table 10 presents sex ratio of population in the age-group 0-6 years for total, rural and urban areas in respect of each tehsil of the district. Total population in age-group 0-6 is 6,46,756 persons comprising 3,42,215 males and 3,04,541 females. The total sex-ratio in this age-group works out 890 females for every thousand males in the district. The proportion of females in rural areas is lower than that of urban areas. The sex-ratio in rural and urban areas comes to 888 and 898 in this age-group respectively. The rural sex-ratio in tahsils varies between 860 in Gunnaur and 901 in Dataganj The sex-ratio of Dataganj (901), Sahaswan (901) and Bisauli (892) is higher than district rural average (888).Dataganj has lowest sex-ratio of 819 among the total population, but claims highest rank (904) in the sex-ratio of children. In urban areas, the highest sex-ratio is recorded in Bisauli (929) and the lowest is found in Gunnaur urban (861).

	District (Rural) Total	**541,638**	**286,837**	**254,801**	**888**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 888 for the district (rural). The sex-ratio of C.D. block varies between 853 and 915. It is highest in Wazirganj C.D. block i.e. 915 followed by 907 in Dataganj C.D. block and lowest 853 in Janawai C.D. block. The sex-ratio of Usawan and Mion C.D. block and other few blocks is higher than the district rural (888) while in other remaining eight blocks it is below the average of the district.

TABLE-12

SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	136	7.6	17,189	3.2
700-749	108	6.1	25,886	4.8
750-799	174	9.8	47,902	8.8
800-849	254	14.3	87,617	16.2
850-899	287	16.1	118,612	21.9
900-949	245	13.7	101,671	18.8
950-999	187	10.5	59,660	11.0
1000-1099	232	13.0	60,639	11.2
1100+	159	8.9	22,462	4.1
District (Rural) Total	**1,782**	**100.0**	**541,638**	**100.0**
Sex ratio (Rural) for District		**888**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e.287 (16.1 per cent) having largest population (21.9 per cent) in the district (rural) fall in the sex-ratio range of 850-899 in age of 0-6 years. It is followed by the sex-ratio range of 800-849 which claims 254 villages (14.3 per cent) and 16.2 per cent population. Next to it, 245 villages (13.7 per cent) are in the range of 900-949 with 18.8 per cent population. 232 villages (13.0 per cent) having 11.2 per cent population fall in sex-ratio range of 1000-1099. In remaining sex-ratio ranges of 700-749, 750-799, 1100+, 950-999, less than 700 claim less number of villages and these are distributed as 108 (6.1 per cent), 174 (9.8 per cent), 159 (8.9 per cent), 187 (10.5 per cent) and 136 (7.6 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty percent of villages i.e. 973 having population (54.6 per cent) fall in the higher sex-ratio ranges of 800 to 999.

District(Urban) Total			**105,118**	**55,378**	**49,740**	**898**

Table 13 deals with sex-ratio of population in the age-group 0-6 years of towns in Budaun district. Total urban populations of the district under this age-group comes to 1,05,118 with 55,378 males and 49,740 females. This gives a sex-ratio among 0-6 years children as 898. Out of 23 towns there are 12 towns which have sex-ratio above that of the district 898. In Gunnaur sex-ratio is at par with that of the district while in rest of the towns it is below the districts average.

TABLE-14

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of 3,069,426 total population of the district, 17.1 per cent of the total population belong to the Scheduled Castes and only 106 persons to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 18.4 per cent of rural population and 11.3 per cent of urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Bilsi tahsil (27.1 per cent) while the lowest is found in Sahaswan tehsil (11.4 per cent) The total of Scheduled Tribes population is 83 and 23 persons in rural and urban areas respectively. Scheduled Tribes population in the district is found in tahsil Budaun (86 person), Dataganj (15 persons) and tahsil Gunnaur (5 persons). The lowest population of Scheduled Tribes is recorded in Gunnaur tehsil (5 persons).

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rate is worked out by excluding population of

0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 38.2 per cent in the district. This proportion in rural area is 34.7 per cent against 53.3 per cent in urban areas. In the district the literacy rates of males (49.0 per cent) is much higher than that of females (25.1 per cent). Among the tahsils, Budaun tahsil tops with 45.0 per cent literates followed by Bisauli tahsil (41.3 per cent). Sahaswan tahsil with 25.1 per cent literates stands at the bottam in the district. Out of 6 tahsils, the literacy rates of 3.tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 23.8 per cent in the district. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 15.4 percentage points against 26.1 percentage points in the rural areas.

District (Rural) Total:		**683,801**	**503,643**	**180,158**	**1,828,489**	**868,337**	**960.152**	**34.7**	**46.4**	**20.3**	**26.1**

Table 22 reveals number and percentage by sex of literates, illiterates in rural areas at C.D. block level in the district.34.7 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 46.4 and 20.3 per cent respectively, which shows very wide gap of 26.1 percentage points in male and female literacy. At C.D. block level, Ujhani C.D. block has the highest rural literacy rate of 43.6 per cent while 56.3 per cent males and 28.3 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Dahgavan C.D. block (22.7 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 29.4 percentage points is found in Islamnagar C.D block.

TABLE-23
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population

81-90	1	0.1	1,773	0.1
91-99	0	0.0	0	0.0
100	1	0.1	1	0.0
District Total:	**1782**	**100.0**	**2,512,290**	**100.0**
Literacy rate for District		**38.2**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 3 villages (0.2 per cent) of the district and population of these villages is only 257 persons. One village (0.1 per cent) have all the literate population. 131 villages accounting for 7.4 per cent of the total villages are in the literacy range of 51-60 per cent and 37 villages (2.1 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 1601 villages (89.8 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 10 villages (.06 per cent). The range of 31-40 have the maximum number of 499 villages forming 28.0 per cent of the total inhabited villages. Literacy rate for Budaun district is 38.2.

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Budaun town with 81,104 literatesis way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (53.3 per cent). The literacy rate is quite high 76.2 and 68.7 percent in two towns namely Babrala and Budaun among males. Female literacy rate is not behind in these two towns (56.8 and 59.8 per cent). However, literacy rate among females is very low (23.2 per cent) in Kachhla town, thus the gap in male female literacy rate is high (26.3 percentage points).

Literacy rate for District (Rural)		35.5		

Table 26 presents the distribution of 1,530 villages by literacy rate range for Scheduled Castes population at the 2001 census. In majority of inhabited villages, which form 32.8 per cent of total rural Scheduled Castes population the literacy range is 31-40 percentage. In the district there are 1,530 inhabited villages having Scheduled Castes population with 35.5 per cent of literacy rate.

TABLE - 27

NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate

Table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates is far more than that of literates in the district (urban) and towns. The percentage of literates is least (19.3 per cent) in Kachhla among 23 towns but the gap in male/female literacy rate is highest 34.9 percentage points

in case of Wazirganj town. The males in all the 23 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least (15.6) in case of Gulariya while female literacy rate is highest (49.1) in Budaun NPP. District Budaun urban accounts for 41.6 percent literates, males 52.3 and females 29.4 per cent, thus the gap being 22.9 percentage points.

TABLE-28
NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of CD block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Male	Female	Persons	Male	Female	Persons	Male	Female

4	Dataganj	1	1	0	13	6	7	12.5	25.0	0.0	25.0
District (Rural) Total		**16**	**13**	**3**	**67**	**28**	**39**	**27.1**	**44.8**	**10.0**	**34.8**

Table 28 brings out the number and percentage of Scheduled Tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is much more than that of literates in the district and C.D. Blocks, with exception to Gannaur and Jagat C.D. Blocks. The literacy rate of the Scheduled Tribes population at 27.1 percent is for less than the corresponding rate 35.5 per cent in case of scheduled castes community. However, the gap in male and female literacy rates at 34.8 percentage points is higher than what it is in case of the Scheduled Castes community (25.2 per cent). The literacy rate is highest in Gunnaur C.D. Block and lowest in Dataganj C.D. Block. The gap in male/female literacy rate is zero in Gunnaur C D. Blocks while it is highest in Jagat C.D. Block (60.0 percentage points)..

TABLE-29
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

District Total:	**6**	**100.0**	**83**	**100.0**
Literacy rate for District (Rural):		**27.1**		

Table 29 gives the distribution of villages by literacy rate range for the Scheduled Tribes population at the 2001 census. In the district the Scheduled Tribes population is found in 6 villages out of which in one village the literacy range is 100 per cent. However, the maximum (57) of the Scheduled Tribes population (68.7 per cent) is found in only one village with literacy range from 11 to 20 percentage.

TABLE-30
NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates

Table 30 gives number and percentage of Scheduled Tribes literates and illiterates by sex in urban agglomerations/town population at the 2001 census. There is small Scheduled Tribes population in the towns of the district. In Budaun and Dataganj towns which have Scheduled Tribe population, the percentage of literates is 84.2 and 100 percent 100 per cent of males and 70.0 per cent of females are literates in Budaun (Urban). The gap in male/female literacy in Budaun town is 30 0 percentage points

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers works out of 30.0 per cent of the total population in the district. The total workers are comprised of 25.0 per cent of main workers and 5.0 per cent of marginal workers and the remaining 70.0 per cent are non-workers.

Among the main workers, males participation rate in the district is 43.8 per cent and 2 7 per cent of female. Male and female marginal workers account for 5.1 and 4.9 per cent respectively The percentage of females marginal workers is lower than that of males. Total workers (main and marginal workers) among tahsils varies from 28.3 per cent in Budaun tahsil to 33.2 per cent each in Gunnaur and Sahaswan tahsils.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 2,5122,90 total rural population of the district, 25.7 per cent have been categorised as main workers and the marginal workers constitute 5.2 per cent and the remaining 69.0 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 44.8 per cent males and 2.7 per cent females are in the category of main workers. Male and female marginal workers account for 4.9 and 5.7 per cent respectively. The percentage of female marginal workers is higher than that of male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 31.0 per cent. At the C.D. block level, Janawai has highest proportion of total workers forming 35.7 per cent of the total population. It is closely followed by Dahgavan (34.5 per cent), Rajpura (34.2 per cent),Samrer (32.9 per cent), Gunnaur (32.4 per cent), Qadar Chauk (30.4 percent) and Usawan (29.7 per cent. The lowest percentage of 28.3 per cent is recorded in Ujhani C.D block.

				7.6	**45.2**	**18.7**	**11.3**	**24.8**

It can be seen from table 34 that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 59.3 per cent of the total workers (main + marginal) and remaining 40.7 per cent of total workers are engaged as agricultural labourers (18.2 per cent), Household industry workers (2.9 per cent) and other workers (19.5 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 47.4 per cent in Budaun tahsil and 73.1 per cent in Gunnaur tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of female

cultivators is 45.2 per cent which is very low as compared to 61.2 per cent male cultivators in the district. The percentage of agricultural labourers (18.2) and household industry workers (2.9 per cent) is very low in the district as stated above. The workers in other activities occupy the second position (19.5 per cent) next to agriculture in the district as well as in each tahsil. The highest proportion of 31.4 per cent of other workers is recorded in Budaun tahsil while the lowest proportion of 12.2 per cent is found in Gunnaur tahsil.

Note: Percentage of Workers to total worker are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) constitute 31.0 per cent of total population. Among these workers, cultivators constitute 68.1 per cent, 18.6 per cent agricultural labourers, 2.7 per cent household industry workers and 10.6 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 2.7 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (49.6 per cent) is lower than that of males (70.7 per cent) in the rural areas of the district. The females play major role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 54.6 per cent in Jagat C.D. block and 80.5 per cent in Janawai C.D. block. Similarly for other workers, the lowest proportion is 5.1 per cent in Usawan C.D. block while 20.1 per cent is the highest in Ujhani C.D. block. The percentage of agricultural labourers and household industry workers together is quite low i.e. only 21.3 per cent in the district. The percentage of agricultural labourers is highest in Jagat block (25.4) and is followed by Wazirganj (22.7). In other C.D. blocks, this proportion is lower.Similarly, proportion of household industry workers varies in C.D. blocks between 1.6 per cent in Samrer and Sahaswan 3.6 per cent.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district Budaun. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (67.9) followed by agriculture laboures with 15.6 per cent (16.2 percent male and 8.2 per cent female). Cultivators form 12.1 per cent, males 12.5 per cent and females 6.7 per cent. If we observe each town, the table reveals that highest percentage of cultivators (53.5) is recorded in Gulariya. In the agriculture laboures category Budaun NPP. recorded very low percentage (2.0). Household industry workers are also very low (1.2 per cent in Usawan, 1.8 per cent in Kunwargaon and 2.0 per cent in Rudayan. As the usual trend recorded in the urban areas, other workers are in high percentage (92.8 per cent in Budaun, 85.1 per cent in Ujhani and 81.9 per cent in Bisauli).

(ix) Brief analysis of the Village Directory and Town Directory data :

One of the major parts of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

		(100)	**(77.6)**	**(25.1)**	**(98.9)**	**(15.5)**	**(14.0)**	**(12.6)**	**(4.7)**	**(7.4)**	**(51.5)**	**(58.4)**

Note - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the

Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, banks, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1782 inhabited villages in the district. 1382 villages or 77.6 per cent have been provided with the educational facilities of one type or the other. Similarly 448 villages in the district constituting 25.1 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1763 or 98.9 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 276 villages constituting 15.5 per cent of villages have been provided with post office facility within the village. 250 or 14.0 per cent villages have been provided with the telephone facility, 224 or 12.6 per cent with transport facility, 84 or 4.7 per cent villages with bank facility and 131or 7.4 per cent with agricultural credit societies. Similarly there are 917or 51.5 per cent villages which have been linked with the pucca road. Total 1,040 or 58.4 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Asafpur C.D. block has the highest 95.5 per cent villages where educational facility is available and lowest 55.3 per cent is found in Sahaswan. Medical facility is highest in Ujhani (49.1 per cent) and lowest (8.8 per cent) in Rajpura C.D. block. Improved drinking water is available to cent-per cent villages in 8 blocks while in other blocks, it is above 95.0 per cent. Telephone facility is highest in Qadar Chauk (29.6 per cent) while it is lowest 1.1 per cent in Dataganj C.D. block. Transport and communications is less developed in Gunnaur where only 4.4 per cent villages are covered by this facility whereas 26.4 per cent villages of Ujhani C.D. block are availing this facility. In the field of power supply it is varying from 24.8 per cent in Janawai and 92.1 per cent Ambiapur.

Note - Percentage are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kinds of amenities. Out of total rural population of 2,512,290 persons in the district, 2,239,978 or 89.2 per cent have educational facility of one or the other type. Similarly, 959,855 or 38.2 per cent population has medical facilities, while 2,503,665 or 99.7 per cent have got improved drinking water facility. Post office facilities are available to 788,618 or 31.4 per cent population. Telephone facility is available to 580,412 or 23.1 per

cent. Transport communications facility is available to469617or 18.7 per cent. Bank facility is available to 238696 or 9.5 per cent 345148 or 13.7 per cent have been provided with the facility of agricultural credit societies 1663100 or 66.2 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1770437 or 70.5 per cent rural population in the district. Similar pattern of availability of facilities is visible in the rural population at C.D. block level. However, in Bisauli C.D. block facilities of education, medical and improved drinking water are available to a larger proportion of population

TABLE - 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col 2 - 4)
	2	3	4	5
1. Education :-

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table 426 villages do not have primary school in their villages and out of these villages, children of 388 villages have to travel less than 5 kms. for schooling. Out of 1,782 inhabited villages as many as 1,512 are deprived of middle school and 1,774 of degree college. Of these 861 avail the facility of middle school at a distance of less than 5 kms., 604 at a distance 5-10 kms. and the remaining 47 at a distance of 10+ kms. In respect of degree college 143 avail this facility at a distance of less than 5 kms., 448 between 5 and 10 kms. and rest 1,183 villages at a distance of 10+ kms.

Similarly, there are 1,746 villages in the district which have been devoid of Hospital facility and 1,756 villages which are deprived of PHC facilities. Of these 406 villages have the facility of Hospital available within 5 kms., while in respect of 731 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly, a large number i.e. 609 villages have this facility at a distance of 10+ kms. As regards PHC 339 avail this facility at a distance of less than 5 kms., 841 at a distance of 5-10 kms. and the remaining 576 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1,506 villages do not have this facility in the village itself. Of these majority i.e.1,099 have this facility at a distance of less than 5 kms., another 370 villages avail it at a distance of 5-10 kms. In the remaining 37 villages in habitants have to travel a distance of 10+ kms.

As regards telephone, there are 1,532 villages in the district which are without telephone facilitiy. Of these 636 avail this facility at a distance of less than 5 kms.,490 at a distance of 5-10 kms. and remaining 406 have to traverse a distance of 10+ kms.

For Bus service out of 1,585 villages which do not have facility, 704 villages avail this facility at a distance of less than 5 kms., 712 at a distance between 5-10 kms. and 169 at a distance of 10+ kms.

In the entire district 1,713 villages are deprived of Commercial Bank and 1,752 of Co-

operative Bank. Of these 1,713 villages which are deprived of Commercial Banks 754 villages avail this facility at a distance of less than 5 kms., 711 between 5-10 kms. & the remaining 248 at a distance of 10+ kms. Regarding Co-operative Banks out of 1,752 villages 277 villages avail this facility at a distance of less than 5 kms., 853 at a distance of 5-10 kms. and remaining 622 at a distance of 10+ kms. 1,651 villages do not have agricultural credit societies. This facility to 950 villages is available at a distance of less than 5 kms., 537 at a distance of 5-10 kms., and the remaining 164 at a distance of 10+ kms.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1782 inhabited villages in the district, there are 273 villages which have nearest towns upto a distance of 5 kms. Of these 210 villages forming 76.9 per cent of these total villages, are having educational facilities of one type or the other and 65 villages constituting 23.8 per cent, have the medical facilities within the village, 32 villages forming 11.7 per cent have the facility of post office within the village and 36 or 13.2 per cent have the facility of telephone. 34 villages constituting 12.5 per cent have been linked by transport service. 14 villages comprising 5.1 per cent have been provided bank facilities, while 17 villages constituting only 6.2 per cent have been provided with agricultural credit societies. 162 villages comprising 59.3 per cent have been provided with pucca road.

There are 1164 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 913 villages constituting 78.4 per cent have been provided with the educational facilities. 293 villages comprising 25.2 per cent have been provided with medical facilities. 192 villages constituting 16.5 per cent enjoy the post office facility. 177 villages comprising 15.2 per cent have been provided the telephone facility. 159 villages constituting 13.7 per cent have been linked with transport communications. 56 villages comprising 4.8 per cent have bank facility. 94 villages constituting 8.1 per cent are having agricultural credit societies, while 592 villages or 50.9 per cent are approachable by pucca road. 229 villages fall in the distance range of 16-50 kms. Of these, 73.4 per cent villages have educational facility, 26.6 per cent with medical, 15.7 per cent with post office, 10.0 per cent with telephone and transport & communications available to 7.4 per cent villages. Banks and agricultural credit societies facilities are available to 4.8 and 7.0 per cent of villages. Approach by pucca road is available to 40.6 per cent villages.

There is one village in the district which is situated beyond 50 kms.from the nearest town, which has the educational facility while other facilities are not available. There are 115 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 78.3 per cent villages have the educational facility of one or other type. 29 village constituting 25.2 per cent have the medical, post office 13.9 per cent, 12.2 per cent each telephone and transport communication, banks 2.6 per cent and agricultural credit society facilities 3.5 per cent in the village. Approach by pucca road is available to 60.9 per cent villages.

$ Transport communication includes bus service, rail facility and navigable waterways

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Budaun district out of a total 1782 inhabited villages, 295 have a population in the range 1-499 persons. Of these, 101 villages (34.2 per cent) have education facility, 28 (9.5 per cent) have medical facility, 280 (94.9 per cent) have improved drinking water facility, None of the villages have post office facility. 13 (4.4 per cent) have telephone facility. 13 (4.4 per cent) have been linked by bus service. 2 (0.7 per cent) have Bank facility. No village has been provided with the agricultural credit societies, 89 villages (30.2 per cent) have been linked with pucca road. 103 villages (34.9 per cent) have been provided with electricity.

Out of 508 villages, which fall in the population range of 500-999 persons, 370 villages (72.8 per cent) have been provided with the education facility, 74 (14.6 per cent) with medical facility, 506 villages (99.6 per cent) have improved drinking water facility. 24 villages (4.7 per cent) have been provided with post office facilities, 45 villages (8.9 per cent) with telephone facility, 46 villages (9.1 per cent) with transport facilities, 12 villages (2.4 per cent) with bank facility, 13 villages (2.6 per cent) with agricultural credit societies & 205 villages (40.4 per cent) have approach by pucca road. 242 villages (47.6 per cent) in this range have electricity.

631 villages fall in population range of 1,000-1,999 persons. 582 villages (92.2 per cent) have education, and all the 631 villages improved drinking water facilities. 165 villages (26.1 per cent) enjoy the medical facility. 78 villages (12.4 per cent) have post office facility, 86 villages (13.6 per cent) have telephone facility, 75 villages (11.9 per cent) have transport communications facilities, 24 villages (3.8 per cent) have bank facilities, 49 villages (7.8 per cent) have agricultural credit societies and 335 villages (53.1 per cent) have approach by pucca road. 406 villages (64.3 per cent) are served with power supply

There are 317 villages in the district which are covered under 2,000-4,999 population range. In this range 299 villages (94.3) enjoy the facility of education, 315 villages (99.4) improved drinking water, 85 villages (26.8) telephone, 81 villages (25.6) transport communications, 258 villages (81.4) approach by pucca road and 260 villages (82.0) power supply. 157 villages (49.5 per cent) have medical facility. 150 villages (47.3 per cent) have post office facility, 36 villages (11.4 per cent) have bank facility, 57 villages (18.0 per cent) are having agricultural credit societies.

TABLE-42

DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of CD block	Number of inhabited villages	Total area in hectares	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6

13	Ujhani	106	29,674.0	87.9	65.7
14	Qadar Chowk	71	25,686.4	92.1	90.4
15	Samrer	98	17,883.8	37.8	91.9
16	Dataganj	93	20,423.2	36.4	87.5
17	Mion	113	25,455.3	93.0	89.5
18	Usawan	84	28,995.0	73.7	78.5
	District Total	**1,782**	**520,536.3**	**N.A.**	**74.0**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available in inhabited villages of the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates the extent of cultivable area under irrigation. There are total 1,782 inhabited villages in the district having a total area of 520,536.3 hectares. Of this, 74.0 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Rajpura block with 102 villages have a total area of 27,179.9 hectares, of which 17.7 per cent of land is cultivable and 62.3 per cent is irrigated. In Gunnaur block, all the 91 villages have a total land area of 30281.5.hectares, of which 82.9 per cent of land is cultivable and 85.4 per cent is irrigated. In Janawai block, all the 113 villages have a total area of 63,282.3 hectares, of this cultivable area is 36.6 per cent and 85.1 per cent is irrigated. In Asafpur block, all the 88 villages have a total area of 40,575 hectares. Of this, cultivable area is 51.2 per cent. Of cultivable area 96.4 per cent is irrigated. Islamnagar block with 89 villages have a total land area of 20,877.4 hectares, of this 82.4 per cent is cultivable area and out of this cultivable area 93.9 per cent is irrigated. Bisauli block with 94 villages have a total land area of 23,044.0 hectares. Of this 87.8 per cent is cultivated area, out of which 85.2 per cent is irrigated. Wazirganj block with a total 70 villages have an area of 13,976.0 hectares. Of this 57.7 per cent is cultivable area while 93.5 per cent is irrigated.

Table 47 indicates most important articles manufactured and exported from each town. The district is well known for Khoya and Sweets and these are town's main exports. The chief export items of the district are Gur and Desighee, which are manufactured in Bilsi, Budaun town and these are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 :

Data on houses and household amenities have traditionally been undertaken a few months before each census. It is based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc., are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc., for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE-48

HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure Status	Number of dwelling households	Number of households

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 479,652 consisting of 398,958 rural and 80,694 urban households. 96,550 households belong to Scheduled Castes and 4079 to Scheduled Tribes. 467,996 households are living in their owned houses constituting 97.57 per cent of total households. Of these households, the largest number of households (198,419) have occupied one room accommodation and is followed by two room accommodation numbering 162,579.households. Next position is claimed by households (59,473) occupying three-roomed accommodation. Number of households in owned accommodation occupying three plus rooms rank fourth place with 39,288 households while 8,237 households are without any exclusive room.

8,575 households living in rented accommodation account for 1.79 per cent of total number of households in the district. The largest number of 4,147 households are living in single room accommodation followed by 3,164 households in double roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 3,081 forming only 0.64 per cent of total households are distributed in single roomed accommodation numbering 1,492 double-roomed 930 and 346 in three roomed accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while urban areas show reverse picture.

TABLE-49

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

, Tables on Houses, Household amenities and Assets

Note -

Permanent - 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i e where, burnt briks G I Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or ot

Semi permanent - 2 Semi-permanent houses refer to those houses made of other types of materials

Temporary - 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt

The percentage distribution of households as shown in the above table reveals that 43.1 per cent of the households in the district had permanent houses. The trend is different is rural (38.0 per cent) and urban area (68.4 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Gunnaur (55.8 per cent) followed by Budaun (52.0 per cent) and lowest in Sahaswan (45.5 per cent) and in Bisauli (31.3 per cent). In respect of semi-permanent houses, the returns were 20.2 per cent at district level where as among tahsils, in Bisauli, it was 32.5 per cent and lowest was 12.8 per cent in tahsil Sahaswan. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 8.4 to28.6 per cent. Temporary houses in the district lie between the range of 23.4 and 48.3 per cent.

Data source: Census of India 2001, H-series Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Inproved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Note Percentage is to be given in brackets after the number of households

Bathroom means bathroom within the house

Toilet means toilet within the house.

The above table shows that out of total households of the district 93.1 per cent of the households had improved drinking water facility. The proportion of rural and urban area was92.6 and 95.4 per cent. Tahsil Gunnaur has higher order of proportion of households where percentage for rural area was 96.7 per cent and 98.8 per cent in urban areas. Electricity was available to 17.1 percent of

households at district level. Households of the district had better access of electricity. Bathrooms and toilet facilities were available in 19.9 and 39.8 per cent of households. At district level drainage facility was available for 91.9 per cent of households, whereas the proportion of rural and urban areas households accounted to 90.9 and 97.0 per cent

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 35.4 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is 32.5 and in urabn area it comes to 49.9 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food 5.2 per cent of the households. The composition of rural and urban comes to 1.2 and 24.8 per cent respectively. Kerosene is used for cooking in 1.1 per cent of the households (0.2 per cent rural and 5.8 per cent urban

households). The other methods like crop residue, cow dung cake, electricity and biogas are used by 22.2, 35.4, 0.1 each respectively in the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas). The table shows that firewood, cow dung cake and crop residue are the predominant fuel for cooking in the district.

TABLE-52

NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial Number	Tahsil	Total/ Rural/ Urban	Total number of households	Total number of households availing banking services	Availability of household assets

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets

The table reveals that out of the total households (479,652) of the district, in all 119,139 households could avail banking services at district level while 170,262, 75,550, 12,376, 248,270, 24,025 and 15,162 enjoyed the availability of households assets radio/transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively whereas 175,135 per cent had none of the specified assets.

It also reveal that at tahsil levels a highest number of households 129542 were availing banking services as well as all other households assets in Buduan tahsil. The highest number of households in Badaun tahsil i.e. 43,166 had none of specified assets whereas on other hand it was lowest number of houdehold i.e. 19,607 in Bilsi tahsil and number of household enjoying none of the specified assets was 19,607 in Bilsi tahsil. Banking services and all other availabel household assets enjoyed by household was higher in tahsil Badaun than the other tahsils. 8,427 households having banking services and 15,969 households having transistor asset in Sahaswan tahsil is recorded, while the rest of availabilities of households assets at the lowest foot also being availed in the same tahsil.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the Decade :

No significant or worth mentioning social, cultural event or any natural development has taken place in the last decade in the district. Only administrative change that has happened in the district during the decade 1991-2001 was the creation of new tahsil Bilsi.

(xii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district :

The district is not popular for tourism. However, there are some places which has historical importance. There are some places which are important and dear to the people of this district. Details of few such places are given below :

Bilsi :

The town was founded during the time when Budaun was under the sway of the late vizier of Awadh named Jas Ram, under the orders of Bilasi Singh a landowner of the neighbourhood. Before the advent of the railways, the town was one of the principal mart and trading centre in this part of Rohilkhand.

Budaun :

Budaun is an old town. The town consists of two distinct portions, the Qila or old city and the new city. The former as its name implies, was originally a fortress. The town is noted for its rich historical traditions and old buildings and monuments. Herein rest numerous Muslim saints, martyrs and Auliyas. Being the headquarters of the district, various district level offices are situated in the town.

Gunnaur :

It is a historical place. A fair is held on the occasion of Dussehra which attracts large number of persons. The tomb and mosque of Makhdum Sahib is situated in the town.

Sahaswan :

Headquarters of the tahsil of the same name, Sahaswan is a large town. The town is of undoubted antiquity.

Usehat :

Usehat is a historical place containing the remains of an old fort and a mosque which was built by Fateh Khan Khansaman A cattle fair is held here on Saturdays. A religions fair is also held here on the occasion of Dussehra which attracts thousand of people.

(xiii) Major Characteristics and Contribution of the District :

The region covered by the present district of Budaun was a centre of Vedic learning and it is believed that it was here that the Vedic texts assumed their final form. The district Budaun has produced many eminent persons of music and literature. Classical and light music had always been a popular form and amusement with people in the town and villages. Bunde Ali Khan, Mehdi Ali Khan, Inayat Husain Khan, Mustaq Husain Khan and Fida Husain Khan were some of the well known singers of the district. Some other eminent vocalists being Ustad Nisar Husain, Pandit Surendra Mohan Sharma, Waris Ali Khan, Gauhar Ali Khan and Akbar Khan.

The district also produced some eminent men of letters, notable among them being Zia Nakhabi, a writer who flourished between 1236 and 1316. Budaun attained celebraty as the birth place of the famous Mulla Abdul Qadir who died in 1615. Other literary persons who flourished in Budaun were Shaukat Alikhan 'Fani' (1879-1941), Maulvi Mohammad Fasik-ud-din (1870-1938). Waheed Ahmad. One of the most popular and famous composer of Urdu 'Shayri' and ghazals was Shakeel Badauni. Shakeel Badauni earned respects in film industry as a Film lyricist for Urdu and Hindi Songs.

(xiv) Scope of Village Directory & Town Directory Village Directory

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural)

without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1. Population and households Cols.4 & 5
2. Amenities. Cols.6 to 13
3. Other infrastructural facilities etc. Cols.14 to 16
4. Availability of news paper/ magazine Column 17
5. Commodities manufacture Column 18
6. Total area of village and land use pattern Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART- A
VILLAGE AND TOWN DIRECTORY
(SECTION I AND II)

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note: Explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against

the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i) Electricity for domestic use ED
(ii) Electricity for agricultural use EAG
(iii) Electricity for other purposes EO
(iv) Electricity for all purposes EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i) Newspaper N
(ii) Magazine M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village, is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i) Government Canal GC
(ii) Private Canal PC
(iii) Well (without electricity) W
(iv) Well (with electricity) WWE
(v) Tubewell (with electricity) TW
(vi) Tubewell(without electricity) TWE
(vii) Tank TK
(viii) River R
(ix) Lake L
(x) Waterfall WF
(xi) Others O
(xii) Total T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C.D. Block wise of the district.

Appendix-I-A Indicates number of villages C.D. Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C.D. Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C.D. Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A List of villages according to proportion of Scheduled Castes to the total population by ranges.

Appendix-VII B List of villages according to proportion of Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates C.D. Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.
