SUGAR MILL

Among the sugar Mills at Pilibhit, Lalata Prasad Har Prasad Sugar Factories Oil Mills, Pilibhit is one of the oldest large-scale industrial unit in the district besides Kisan Cooperative Sugar Factory Ltd., Majhola. Other established Sugar Mills in the district are Kisan Co-operative Sugar Mill, Bisalpur and Puranpur Co-operative Sugar Mill, Puranpur. Sugarcane is one of the main cash crops of the district, which covers more than fifteen percent of the total cropped area. These sugar mills caters the crushing of entire sugarcane produced in the district and meet out the crushing needs neighboring areas of the district. During crushing season, these industrial units provide employment to more than three thousand persons. The total value of the products of these units have considerably increased over the years. The total investment of these units have also increased manifold. Sugar of good quality is produced in these units which are also exported to other states of the country. Apart from these, many other small scale Jaggery producing units are also operating in the district. These units are located in Pilibhit, Majhola and Bisalpur, Jahanabad. Gandhi Smarak Gur Khandsari Udyog and Cooperative Sugarcane Marketing and Processing Society deal in the sugar *khandsari* business. The process of sugar making is also done in indigenous lines. *Sulphur Sugar*, *gur* and *khandsari* are also manufactured during sugarcane season.

Annexures - I To VIII

Annexure I Number of villages under each Gram Panchayat 639

Annexure II Fertility and Mortality, 1991 Census 639
Annexure III Various measures of fertility and mean age at marriage, 1991 Census 639
Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991 Census 640
Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 641
Annexure VI Marital status of population as per 1991 Census 642
Annexure VII Age, Sex and Education in the district, 1991 Census 646
Annexure VIII Distribution of different mother tongues returned in 1991 Census 648

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic

of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/ TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and their team of dedicated workers deserves all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

The present town is of comparatively recent origin but there is still a village known as 'old Pilibhit' standing on the left bank of the Khakra about 5 km to the north -east near the road to Neoria. This village had always been occupied by the Banjaras of Periya clan. It is supposed that the name is derived from peria, the title of the Banjara Class and a Bhit i.e. a wall of yellow mud which once surrounded the district. The early history of the district is traced only from the Puranas and the Mahabharata, according to which Pururavas was the first monarch and originator of Aila (or the lunar) dynasty who ruled over this region. From Pururavas Aila sprang various dynasties including that of the Panchalas. His great-grandson, the emperor Yayari, extended his Kingdom far and wide, reducing all Madhyadesa including this district. Later, Mandhatri, son of Yuvanasva of the Ikshvaku family, extended his sway over this region and the Haihaya (branch of the Lunar dynasty) King, Kartavirya Arjuna, is also said to have been victorious over the district as far as the Himalayas. His contemporary Paurava King Bharat, was ruling over the whole of northern India.

In the post Mahabharata period, ten ruling dynasties, including the Panchalas and their kingdoms flourished at the end of the Mahabharata war and twenty seven (or twenty five) kings ruled over this region till the time of the Nandas. The common name Panchala was given to this region in this period. According to a Chetiya Jataka, the City of Uttar Panchala (Ahichchhatra) the capital of this region, was founded by a Chedi prince who was advised by the family priest, Kapila to leave by the north gate of the capital of his father. He formed the Uttar Panchala Kingdom with settlers from the Panchala and chedi territories.

During the ninth and eighth centuries B.C., the district was under the Naga rulers. According to Jain tradition, Naga King, Dharmendra ruled over this region. By the rise of Duddhism, Panchala attained the position of a self governing oligarchical republic. Panchala remained an independent state at least for a century after the demise of the Buddha until it was conquered by Mahapadmanand and brought under the sway of the monarchies of Mugadh in the 4th century B.C. According to Puranas, ten kings of the Sugna dynasty ruled for 112 years (1185 B.C. to 73 B.C.) Then four kings of the Kanva dynasty, founded by Vasudeva, ruled for 45 years.

The history of the district from the downfall of the Kanvas to the rise of Kushanas can be traced only from the coins founded at Ahichchatra in district Bareilly . The Mitra Kings are known from their coins and are believed to have flourished between 100 B.C. to A.D. 200. In the beginning of the second century A.D. the district came under the Kushanas, the Mitra rules probably allowed to live as feudatories. King Achyuta of the Naga dynasty was the last independent King of Panchala who flourished in about the middle of the fourth century A.D. Samudragupta started his first campaign uprooting the neighbouring kingdoms of Achyuta and Nagasena and the district remaining in the Gupta empire till 550 A.D. After the break up of the Gupta empire, Pilibhit came under Harshvardhan (606-647 A.D.) and in the eighth century Yashovarman (725-752 A.D.) of Kannauj after whom it remained under the Ayudh Kings of Kannauj for several decades.

When the Muslim invaders first achieved the conquest of the country, there was apparently no place of any importance in the district and consequently no inducement for the victorious armies to direct their attention to this region. The first mention of Pilibhit is found during the reign of Nasir-ud-din Mahmud but it was not identified. When Kutlugh Khan rebelled in Avadh, Nasir-ud-din led his army in December 1255, marching from Delhi by way of Tilibhat, which was possibly in Pilibhit

All Pilibhit and the forests as far as Sharda (chauka) were held till the time of Ali Muhammad by the Banjaras who still own many villages there. Place names like Pilibhit and Madho Tanda show that they are of Banjara origin. Raja Harmal who founded Berkhera, was Harmal Janghara whose name is well known in the whole pargana even today. Pilibhit seems to have been a Banjara settlement but nothing is known of its early history and the derivation of the name is very uncertain. The early Muslim historians rendered the name as Talpat. Pilibhit has no history till the middle of the 18th century, when it became the residence of Hafiz Rahmat Khan, the Rohilla leader.

At the time of Aurangzeb's death in 1707 the bulk of the area covered by the present district of Pilibhit was still included in the sirkar of Badaun (in the subah of Delhi) and was under the charge of the Mughal officers of Bareilly. During the reign of Bahadur Shah (1707-1712), Daud Khan an Afghan slave fled to India and joined Mudar Shah of Madhkar to fight against the ruler of Bankoli (in the Bareilly district). Daud Khan was murdered by Raja Debi Chand of Kumaon. Ali Mohammed Khan, the adopted son of Daud Khan took the command of the army and established his authority in Badaun and Bareilly. On may 14, 1745 Ali Mohammed Khan was defeated by Safdar Jang. In 1772, the Marathas marched into Rohilkhand and invaded Bijnor and on March 5, the Rohilla leaders including Hafiz Rohmat Khan fled to Pilibhit. In June 1772, a treaty was made between the Rohillas and Shuja-ud-daula (which the British Commander in chief, Robert Barker, witnessed) by which the Rohillas agreed to pay Shuja-ud-daula Rs. 40 Lakhs on his obliging the Marathas to retire from Rohilkhand either by peace or war. The Marathas having retired, the Rohillas came back.

The Rohillas were to some extent responsible for the desolation of Pilibhit. The unscientific dams they constructed on the streams caused, in many cases irreparable injury and the absence of a strong central government led to never ending conflicts between the owners of adjacent estates with consequences that were often disastrous to the tenantry. Trouble was also caused in the northern parts of Pilibhit by the irruptions of the Gurkhas who from 1794 to 1798 constantly raided the Tarai.

In 1816, the Muslims of Pilibhit participated in a movement that took place at Bareilly against the British when a tax was imposed for maintaining the municipal police and was realised with undue severity. This was the indication of 1857 freedom struggle.

In 1871, Pilibhit, which had been a part of the Bareilly district was formed into separate sub divisions, comprising Jahanabad, Pilibhit and Puranpur. In November 1879, the Pilibhit sub-

division was converted into a separate district being placed in the charge of a magistrate and collector.

In 1916, the activities of Indian National Congress came into prominence in the district when Mehtab Singh and Brij Nandan Prasad, two prominent national leaders of the district participated in the Lucknow session of the congress.

In 1920 the people of the district participated in the Khilafat movement. In this connection large processions were taken out by the Hindus and Muslims in Pilibhit. Mahatma Gandhi launched the famous non-cooperation movement all over the country in 1921. He visited the district and addressed audience in Bisalpur and Pilibhit. In 1928 when the Simon Commission visited India, complete hartal was observed and protests,processions and demonstrations were also organised in the district and elsewhere. By 1929 a special force of volunteers was organised in the district to participate in the civil disobedience movement launched by Mahatma Gandhi in 1930. Mahatma Gandhi's famous Dandi march on the 12th of March, 1930, undertaken as a symbolic protest against the government monopoly of salt and to assert the right of manufacturing salt, was the signal for the beginning of the civil disobedience movement in Pilibhit, as in every other part of the country.

On August 9, 1942, when the Quit India Movement was launched throughout the country, Pilibhit also gave support and the people there put up a long and sustained struggle. By 1945, when the Second World War ended British public opinion had veered round to giving complete independence to India.

At last, on August 15, 1947, the country and with it the district, shook off the foreign yoke and achieved its long awaited independence. The district celebrated Independence Day in a befitting manner and there were rejoicing in every home.

(iii) Administrative Setup

For administrative purposes, the district is divided into three tahsils-Puranpur, Pilibhit and Bisalpur. The District is further divided into 7 Community Development Blocks and 599 Gram Sabhas,

Jurisdictional Changes (1991-2000)

During 1991 to 2000 census, no jurisdictional changes have taken place in the district.

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos's circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental offices at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each have a departmental district level office. The development point of view the district is divided into community development block. Block Development Officers (BDO) looks after development works at community developments block level. Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big district and Superintendent of Police in small districts are incharge. Additional Superintendent of Police (ASP) in their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for Local self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

(1) Location and size :

The district of Pilibhit is the north-eastern most district of the Rohilkhand Division which is situated in the Sub-Himalaya belt on the boundary

of Nepal. It lies between the $28^0$6' and $28^0$53' north latitude and the meridians of $79^0$57' and $80^0$27' east longitude. On the north are the district Nainital and the territory of Nepal, on the south lies the Shahjahanpur district, on the east the district is flanked for a short distance by district Kheri and for the remaining distance by the Shahjahanpur district and on the west lies the district of Bareilly. Total area of the district is 3,499 Sq.kms.

(2) Physiography :

Geographically, the district has many characteristics. In the north and west it is like 'Tarai area' and resembles with common characteristics of Rohilkhand while the Southern portion is similar to the tracts of Bareilly and Shahjahanpur . The eastern section is similar to the forest area of Kheri and the north of Awadh. As a whole, the district is a plain intersected by numerous streams flowing mainly in the southern direction. The surface level have varying troughs and depressions. Geologically, the district belongs to Alluvium (recent) formation. On the basis of Geology, soils, topography, climate, natural vegetation the district is divided into the following two sub-micro regions:

Pilibhit Tarai :

The region is situated in the northern part of the district covering the northern parts of Puranpur and Pilibhit tahsils. Numerous streams with shifting courses and forest clad tract are the main characteristics of Tarai. The Sharda river drains on the boundary line from north-west to south-east direction. Other streams are Mala, Deoha, Katra, Kailas etc. Besides, there are numerous small rivulets which drain the region for a shorter distance. Geologically, the region belongs to Alluvium and Dun gravels formations.

Pilibhit-Bisalpur Plain :

The region is situated in the southern part of the district covering entire Bisalpur and parts of Puranpur and Pilibhit tahsils. Although it is a plain area but impact of Tarai is quite evident on this tract. The general slope of the area is towards south. The frequency of streams flowing in this tract are relatively reduced as compared to Tarai zone. The main streams are Deoha, Kanta, and Khanaut. The Deoha is the main stream which drains mostly the western part of the area. There are patches of Bhurs along this river. Its shifting course are marked by natural levees. The reserved forest of Tarai tract extend in this plain also. There is a swamp tract in the south-west of Puranpur town. Geologically, the region belongs to Alluvium and Dun gravels formations.

(3) Drainage :

The Deoha is the main river which drains mostly the western part of the area. The Sharda river drains on the boundary line from north-west to south east direction. Other streams are Mala, Katra, Kailas and Khanaut etc. Besides there are numerous small rivulets which drain the region for a shorter distance. There are number of lakes along the course of Deoha river. Similarly the Chauka river is the old course of Sharda. During the rains all these streams are flooded. There is a belt of swamp along the Sharda river. The general slope of the area has variation. A watershed zone exists along Puranpur-Madho Tanda. Toward the west of this zone, slope is from north to south and on eastern side, it is from north-west to south-east.

(4) Climate :

The climate of the district is influenced by its proximity to the hills and the tarai swamps and is characterised by general dryness in the summer season and a bracing cold season. The summer is milder than in the districts to the south. The year can be divided into four seasons. The cold season, from about the middle of November to the end of February, is followed by the hot season from March to about the third week of June. The south west monsoon season starts from the last week of June till the last week of September. Month of October and the first half of November constitute the post monsoon or the transition season. Average rainfall in the district recorded in 2002 was 1256 mm.

(5) Natural and Economic Resources

Forestry :

Forests play an important role in the economy of the district and are intimately connected with the agricultural prosperity of the people. A forest with normal ground vegetation cover is the best protection the land can have both for retention of moisture and for binding the soil. Forests not only reduce the force with which the rain strikes the earth but also reduce run off and act as a reservoir of moisture which can be utilised at will later on. In areas with severe winds and torrential rains, shelter belts of trees and forest cover keep an effective check on the loss of soil by erosion.

The type of forest vegetation ranges from the tropical semi evergreen to tropical dry deciduous forests. The total area of forest in the

district is 80156 hectares and out of this 40040 hectares is reserve forest. The forest consists of two long and narrow strips uniting in the north, one extending in a southerly direction on either side of the Mala as far as the northern boundary of Bisalpur, and the other stretching along the right bank of the Chauka to its junction with the Sharda and then continuing along the latter stream to the borders of Shahjahanpur and Kheri. The chief varieties of trees found in the forests of the district are Sal, Shisham (Dalbergia Sissoo) haldu (Adina Cordifolia), asna (Terminalia tomentosa) phaldu (Mitragyna naryfolia), teak or sagaun (Tectona grandis), semal (Salmalia malabarica), khair (Acacia indica) Jamun (Syzigygium cumini), neem (Azadirachta indica), bargad or banyan (Ficus bengalensis), guava (Psidium guajava), mahua (Madhuka indica), aonla (Emblica officinal's) and kathal (Atrocarpus heterophyllus), Grasses like Dub (cynedon dactylon) saib (Eulaliopis bineta) and Kano (Saccharum spontneun) and spear grass are also found in the district.

Minerals and Mining :

The Pilibhit district is underlined by alluvial sediments of the quarternary aye. The northern fringe of the district, occupied by the tarai belt is underlaid by sand pebble beds interbedded with clay. South of the tarai belt, the alluvium is chiefly composed of fine to medium grained sand and clay with varying amounts of kankar. The mineral products are very few. For practical purposes they are confined to kankar and brick earth, for though saline afforescences (known as Reh) are found in a few places, they do not occur in sufficient quantity to be of any economic value. Sand occurs in substantial quantities in the district. Brick-clay occurs commonly and is utilised locally for the manufacture of bricks.

Soil :

The soils of the district are identical with those found throughout the Gangetic plain and particularly those occurring in the sub-Himalayan belt. They consist in the main sand or bhur, clay or matiar and a mixture of sand and clay in varying proportions, known as dumat or doras and usually styled loam.

Clay differs from place to place in weight, colour, cohesiveness and liability to split into fissure under the influence of the hot weather, though on the whole it is very retentive of moisture. The best is matiar proper, a bluish or blackish soil which produces all the local crops except bajra. The greasy and sticky clay is called chiknot, that found in low situations in a drainage line and the whitish heavy clay which becomes pasty with rain and as hard as iron with heat, is known as khapat which is of little value producing only in the inferior kinds of rice. Another variety of a calcareous nature and a yellowish colour is known as siwai.

Land and Land use Pattern :

Land use pattern as recorded in Statistical Magazine 2003 indicates that in the year 2001-2002 out of the total reported area of 357,229 hectares of the district, forests covered 80,156 hectares, cultivable land 3,710 hectares, fallow land 3,488 hectares, land use other than agriculture 36,121 hectares, area under hurbs and garden 2,585 hectares and pastures and uncultivated 7,595 hectares. Net area sown is 223,254 hectares.

Agriculture and Crop Pattern :

The three harvest of the district are known by their usual names – rabi, kharif and zaid. The kharif or rainfed crops are sown in June and July and harvested in September and October, while rabi or irrigated crops are sown in October – November and harvested in February – March. The main kharif crops of the district are rice, maize, bajra and those of rabi wheat, barley, gram, arhar, pea and masoor. The zaid crops consist of moong, sun hemp and vegetables.

The main non-food crops of the district are sugarcane, jute sunhemp and oil seeds of different types. Sugarcane is an important crop of the district.

Irrigation :

The copious rainfall and the high spring level of the district greatly reduce the need of irrigation which is required only to ensure a crop in unfavourable years and not, as in the doab, to ensure any crop. In normal seasons one watering for spring crops and two or three for sugarcane is all that is necessary. In the year 2001-2002 net irrigated area was 214,499 hectares out of which 161,538 hectares was irrigated through tube wells and 52,782 hectares by canals and the rest by tank and other sources.

Animal Husbandry :

As agriculture and animal husbandry are two inseparable units of agriculture development, the animal husbandry department looks after the veterinary and animal husbandry work in the district and is concerned with the development of cattle, poultry breeding, sheep breeding and allied schemes and the prevention and treatment of various animal diseases. As per statistical magazine in the year 1997 the district had 178,264

cows, 210,917 buffaloes 1,896 sheeps, 91,677 goats, 3,251 horses and poneys, 11,256 pigs and 194 other animals. Sheeps and goats are generally reared with the object of obtaining their hide and flesh. Sheeps provide coarse wool which is utilised by the villages.

There are 20 veterinary hospitals in the district along with 25 Animal Husbandry Development Centres, 15 Artificial Insemination Centres and 25 Artificial Insemination Sub-centres.

Fishery :

Fish of different varieties are found in the district. Fish are caught with nets of various kinds and with local methods. The main activities of the Fishery Departments are development and exploitation of reservoirs for pisciculture and supply of fingerlings to breeders and Gram Sabhas. Distribution of fingerlings was 2,261 thousands in the district in the year 2002-03.

Industry :

The district has a sound agriculture base but its industrial potential is low. The unrefined sugar is one of the old time industries of the district. The system of manufacture is similar to that in vogue throughout Rohilkhand and unrefined sugar was sent out in the form of gur or rab. Another important industry is the manufacture of cloth, locally known as garha. In the past Pilibhit was a great centre of wood carving but this craft has disappeared now. Country carts and notably, the light two wheeled vehicles known as rahlus were also manufactured in Pilibhit and were marketed in the fair at Gola Gokarannath (in the kheri district). Some quantity of household furniture, bed-steads and the like were also manufactured and some cases these were painted and lacquered. Tarkashi work (inlaying with wire) was also done. Work in metal is also done at Pilibhit and brass vessels were exported to Nepal in large number. The pottery of the district is ordinary and the manufacture is confined to common household wares and utensils.

There are four sugar mills located at Pilibhit, Majhola, Bisalpur and Puranpur, two solvent plants and one alcohol distillery working in the district. The manufacturing units of agricultural implements, engineering goods, rice, wooden furniture, sulphur sugar, gur, khandsari, flutes, brick-klins, wax candles, biscuits, washing soaps, oil, pulses, cement jali, ice and ice candy, vegetable and fruit preservation, leather articles and ayurvedic and unani medicines are the main small scale industries of the district.

Trade and Commerce :

Prosperity of an area depends largely on the volume of trade at that place. The district has many trade centres for distributing goods (whether imported or locally produced) spread over each tahsil where markets are held once or twice a week. Pilibhit is a secondary regulated and consuming market. This market is also of the combination type being an occasional as well as a regular mandi and is well connected with big mandis of some other states as well. This mandi deals mainly in the trade of rice wheat, flutes and gur. Puranpur is another regulated market which is of combination type also being an occasional as well as regular mandi. This mandi deals mainly in food grains, gur and rab. Bisalpur is another important regulated market and deals in gur, rice and other food-grains. The common requirements of the villagers and those residing in the urban areas of the district are generally met by traders and peddlers operating in the local bazaars which in the rural areas are known as hats.

Transport :

The district is well connected by rail and road transport. Total length of roads in the district is 1,538 kms. according to statistical magazine of 2003. National Highway passing through the district is 40 km. where as state highway is 131 kms. Main district roads are 90 Km. long whereas district and rural roads are 889 km.. Roads under Local Self Government are 112 km. long while the length of 269 km. roads are under the supervision of irrigation and sugarcane department. The length of pucca roads per 1,000 sq.km. was 408.4 km. during 2001-02. During the time period the length of pucca roads per lakh population was 90.7 km. Means of transport available in the district are State Road Transport Corporation buses and private buses, taxis, jeeps, trucks etc.

Electricity and Power :

Electricity has an important role in the economic development. Total consumption of electricity during the year 2002-03 was 82,780 thousand kw. Agriculture sector consumed 24,308 thousand kwh., domestic sector consumed 39,881 thousand kwh. followed by commercial sector 10,143 thousand kwh, industrial sector 6,833 thousand kwh, public light 792 thousand kwh. Other non conventional energy sources, which are being promoted in the district are bio-gas plant, solar energy and wind power. According to

Statistical Magazine (2003) 1,096 villages had been electrified till 31.3.03, and 43 per cent of Scheduled Caste villages have also been electrified till March 03.

Gram Panchayat, its composition, jurisdiction and role in villages development.

Gram Panchayat acts as an executive part of the Gram Sabha which plays vital role in the development of villages.

Composition :

The members of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 599 gram sabhas in the district.

It is necessary for the village Panchayat to have a member belonging to the Scheduled Caste and also a woman member. On non election of these members, the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps from time to time to improve the conditions of the villages.

Its term :

The new Panchayat Raj Act of 1993 has fixed a uniform time period for five years for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty accordingly. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a cases the prior sanction of the district authorities must be obtained.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the sarpanch.

Qualifications :

In order to be elected as a member of a village panchayat, a candidate should posses the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions :

A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks after the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a center.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It manages for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area of the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal case and imposes fine upto Rs. 100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the

following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room :

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder :

Sometimes, a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with

all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.
b) A place satisfying the following three

criteria simultaneously:

i) a minimum population of 5,000;
ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

-For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as

Houseless Households :

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	2	Badi
3	Baiga	4	Balahar
5	Bajaniya	6	Baiswar
7	Balmiki	8	Bajgi
9	Banmanus	10	Balai
11	Barwar	12	Bangali
13	Bawariya	14	Bansphor
15	Beriya	16	Basor
17	Bhuiya	18	Beldar
19	Boria	20	Bhantu
21	Badhik	22	Bhuyiar
23	Baheliya	24	Chero
25	Chamar, Dhusia, Jhusia, Jatawa	26	Dharkar
27	Dabgar	28	Dom
29	Dhanuk	30	Dusadh
31	Dhobi	32	Domar
33	Dhangar	34	Gharami
35	Gond	36	Gual
37	Ghasiya	38	Habura
39	Hari	40	Hela
41	Kanjar	42	Korwa
43	Karwal	44	Kalabaz
45	Kharwar (excluding Banbasi)	46	Kapariya
47	Kol	48	Khairaha
49	Khorot	50	Khatik
51	Kori	52	Lalbegi
53	Majhwar	54	Mazhabi
55	Musahar	56	Nat
57	Parahiya	58	Pankha
59	Patari	60	Pasi
			Tarmali
61	Rawat	62	Shilpkar
63	Sansiya	64	Saharya
65	Sanaurhiya	66	Turaiha

Scheduled Tribes

1	Bhotia	2	Buksa
3	Jaunsari	4	Raji
5	Tharu		

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education

or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate:

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker:

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but

not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometer of the area.

Age :

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal -of night **Soil.**

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to

the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age group}}{\text{Mid-year female population of the same age group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age group}}{\text{Mid-year married female population -of the same age group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)-

Number of live births per 1,000 married women in reproductive age group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 76.7 percent person in 1991 and 79.2 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 14.8 percent and 12.3 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.}} \times 1{,}000$$

Mid-year married female population in the age-group (15-49) years.

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times S \text{ ASFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Total marital fertility rate (TMFR)-

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.-

$$TMFR = \frac{5 \times \text{å ASMFR}_{15\text{-}19\text{-}}^{45\text{-}49\text{-}}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2-

Probability of dying between birth and age 2.

q5-

Probability of dying between birth and age

5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)-

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births -during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than- One year during the year-}}{\text{-Number of live births -during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1.000$$

Still birth rate (SBR)-

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still-births during the year}} \times 1{,}000$$

Maternal mortality rate -(MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age-group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place

to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/ employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town:

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent pheno-menon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega

Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution

The total population of the district is 1,645,183 of which 1,350,959 live in rural and rest 294,224 in urban parts. There are three tahsils in district namely Pilibhit, Bisalpur and Puranpur. The most populous tahsil is Pilibhit followed by Bisalpur. Puranpur is least populated tahsil. The urban population in the district is 17.9 per cent. The urban population is maximum at about 23.7 per cent in Pilibhit tahsil. There are 1,349 revenue villages in the district out of which 1,216 are inhabited at the 2001 Census and remaining 133 are uninhabited. The total rural population of 1,350,959 is spread over 7 Cd blocks and 7 inhabited forest villages. The most populous CD Block is Puranpur with a population of 373,282 and maximum number of inhabited villages (360) is in this CD Block. About 17 per cent populated villages have a population less than 200. The population density in the rural area of the district in case of 609 villages (50.1 per cent) is 501+, 227 villages are with a population density range of 301-500 per square kilometre. Such villages contain as much as about 15.1 per cent of total rural population.

Size – Class and Status of Towns

In the total urban population of 294,224 as much as 124,245 live in Pilibhit NPP. The next big town is Bisalpur NPP with a population of 60,681. There aer 9 towns and all are statutory towns. In the district Puranpur, Pilibhit and Bisalpur are of NPP status, and remaining six (6) are of NP status.

Population Growth :

At the present territorial jurisdiction the population of the district was 1,283,103 at 1991 Census and growing by 28.2 per cent dring the decade 1991-2001 it is 1,645,183 at 2001 Census. The decadal growth at 28.2 per cent in the district has been at lower level than in the state at 25.8 per cent.

Population Density

The district has an area of 3,499 square kilometres. The population density in the district is 470. In the rural areas of the district the density is about 390.

Sex Ratio :

The sex-ratio of the district is 877 which is low to the state level (898). Indeed the sex ratio at the district has been all along lower in the district as against to the state since 1901. As against to urban areas of the district the sex ratio is higher in rural areas. Among tahsils, highest sex ratio is in Pilibhit and lowest in Bisalpur. Among CD Block the sex ratio is highest in Amariya at 895 and lowest in Bisalpur at 852. Out of 1,216 inhabited villages in the district there are 30.9 per cent villages (with 41.5 per cent of rural population), which are having a sex ratio in the range of 850-899. In the urban parts of the district the sex ratio is 885 and highest of 921 in Nyaria Husainpur (NP) and lowest of 808 in Gularia Bhandara (NP). The sex ratio of population on the age group 0-6 is 940 in the district, which is higher than the state being only at 916. As against a sex ratio of 943 in the age group 0-6 of rural population of the district, it is highest at 956 in Marori and Bar Khera CD blocks and lowest at 919 in Lalauri Khera CD Block. It may be noted that out of 1,216 inhabited villages in the district in over 18.1 per cent of villages with about 22.9 per cent of rural population the sex ratio in the age group 0-6 is in the range of 1,000-1,099. As against the 0-6 age group sex ratio of 943 in the rural area of the district, it is only 921 in urban areas. Among towns this sex ratio is highest at 985 in Kalinagar (NP) and lowest at 850 in Gularia Bhindara (NP).

Work Participation Rate :

In the total population of the district of 1,645,183 as much as 28.0 per cent are workers and rest of 72.0 per cent are non worker. Among workers 21.9 per cent are main workers and rest of 6.1 per cent are marginal workers of total population. In absolute terms females outnumber males as main worker and marginal workers as well. The extent of main workers is highest at about 22.5 per cent in Bisalpur tahsil and lowest at about 21.4 per cent in Pilibhit tahsil. In case of marginal workers the proportion is highest in Pilibhit tahsil as 6.4 per cent in comparison to only about 6.3 per cent in Puranpur and 5.6 per cent in Bisalpur tahsil. The extent of non workers in urban parts is higher. In the district among workers about 45.5 per cent are cultivators and 25.4 per cent other workers. Over 27.9 per cent of female workers are engaged as cultivators.

Literacy

In the district about 49.8 per cent population is literate. The listeracy is about 60.3 per cent in urban areas and about 47.4 per cent in rural areas. The males literacy is an high as 62.5 per cent as against about 35.1 per cent females literacy, and

therefore, the gap in male/female literacy rate is 27.4 per cent. In rural areas among 7 CD Blocks, the highest literacy is at 54.6 per cent in Bisalpur and lowest at 42.6 per cent in Amariya. The literacy among males in rural areas is 61.2 per cent in comparison to 31.2 per cent among females. The lowest female literacy of about 28.2 per cent is in Marori CD Block. Also the gap in male/female literacyr ate is highest in this CD Block which is 32.8 per cent. In 27.4 per cent of villages covering also 35.2 per cent of rural population the literacy range is 41 to 50. Among urbanites in the district, as much as 68.0 per cent males are literates as against 51.5 per cent females. The higehst urban literacy is in Gularia Bhandara (NP) at 68.8 per cent and lowest in Nyoria Husainpur (NP) at 34.6 per cent. The maximum males literacy is also found in Gularia Bhandara (NP) at 76.1 per cent and lowest at about 43.6 per cent in Nyoria Husainpur NP. However, the highest females literacy is in Pilibhit (NPP) at 62.3 per cent and lowest at about 23.4 per cent in Nyoria Husainpur (NP). Still, the maximum gap in male-female literacy rate at 30.3 per cent is found in Bar Khera (NP). The literacy among Scheduled Castes in urban areas is 57.0 per cent and 44.2 per cent in rural areas. The literacy rate for Scheduled Tribes is 35.2 per cent in rural and 83.5 per cent in urban areas of the district.

(viii) Brief analysis of PCA data

The district throws up vivid picture of its population at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted through the following inset tables..

TABLE - 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001			Total	Rural	Urban	1991	2001
		Total	Rural	Urban	Total	Rural	Urban					
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Pilibhit	542,149	403,891	138,258	686,997	524,059	162,938	26.7	29.8	17.9	26.0	23.7
2	Bisalpur	417,149	357,174	59,975	537,047	452,991	84,056	28.7	26.8	40.2	14.3	15.7
3	Puranpur	323,805	285,182	38,623	421,139	373,909	47,230	30.1	31.1	22.3	11.9	11.2
District Total:		**1,283,103**	**1,046,247**	**236,856**	**1,645,183**	**1,350,959**	**294,224**	**28.2**	**29.1**	**24.3**	**18.4**	**17.9**

The growth rates of each tehsil in the Pilibhit district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 28.2 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 29.1 and 24.3 per cent respectively. Out of the total population of the district 82.1 per cent lives in rural areas while 17.9 per cent lives in urban areas of the district. The proportion of urban population has slighyly declined during the decade from 18.4 per cent in 1991 to 17.9 per cent in 2001 in the district. The highest growth of urban population is recorded in Pilibhit tahsil (23.7 cent) and lowest is registered Puranpur in tahsil (11.2 per cent). Urban population is concentrated in Pilibhit tahsils. Puranpur tahsil has highest decadal growth rate of 30.1 per cent, while Pilibhit tahsil has shown the lowest growth rate of 26.7 per cent for the total population.

TABLE - 2
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial Number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percent-age of villages	Population less than 200		Number and percent-age of villages	Population 200-499		Number and percent-age of villages	Population 500-999

	Districts (Rural) Total:	**347 (28.5)**	**261,940**	**229,027**	**133 (10.9**	**199,894**	**176,255**	**16 (1.3)**	**55,151**	**48,568**	**3 (0.2)**	**26,514**	**23,787**

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1216 inhabited villages, 207 (17.0 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 170 villages having 14.0 per cent villages of the district while in the size class of 500-999 population claims 340 villages with 28.0 per cent of the total villages in the district. 347 villages (28.5 per cent) are in the size class of 1,000-1,999 133 villages (10.9 per cent) are in the size class of 2,000-4,999. 16 villages 11.3 per cent are in the size class of 5000-9999 and 3 villages (0.2 per cent) are in the size of 10,000 and above. The biggest village in the district having population of 25,433 persons is located in Puran pur C.D. block of district.

TABLE - 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL
(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL
(c) Declassified - NIL
(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district..

TABLE 4

DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	36	3.0	2,971	0.2
11-20	14	1.2	437	0.0
21-50	58	4.8	4,869	0.4
51-100	77	6.3	24,497	1.8
101-200	112	9.2	60,267	4.5
201-300	83	6.8	69,339	5.1
301-500	227	18.7	204,101	15.1
501 +	609	50.1	984,478	72.9
Not known	0	0.0	0	0.0
District Total:	**1,216**	**100.0**	**1,350,959**	**100.0**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 609 accounting for 50.1 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 72.9 per cent population. The lowest ranges of 0-10 & 11-20 persons per sq. km. cover 50villages (4.2 per cent). 227 villages (18.7 per cent) fall in the density range of 301-500 persons per sq. km. while the corresponding proportion in the lower range of 101 to 300 is 16.0 per cent of the total inhabited villages having 9.6 per cent population of the district. In the medium densities ranges of 21 to 50 and 51-100 persons account for 4.8 and 6.3 per cent of inhabited villages respectively. Both these ranges claim 2.2 per cent rural population.

TABLE 5
SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	884	876	953
1911	916	922	866	861	859	879
1921	908	918	834	884	882	894
1931	903	916	813	864	863	873
1941	907	922	824	861	863	852
1951	908	922	827	858	858	855
1961	907	921	817	842	840	852
1971	876	884	826	827	825	844
1981	882	889	850	846	843	862
1991	876	879	864	853	850	870
2001	898	904	876	877	875	885

Note : Sex ratio has been defined here as the number of females per 1000 males.

As per 2001 Census sex-ratio of 877 females per 1,000 males has been recorded in the district against the state average of 898.The sex-ratio of the district was significantly low as compared to the state average figures from 1901 to 1931 and remained above the state average figures during this period. The subsequent decades show declining trend from 1941 to 2001 and value remained below the state average. The lowest sex ratio of 827 females per 1000 males were recorded in the district during 1971 against the state average of 876.females. It is also observed that the proportion of females in rural areas is lower and in state it is higher.

TABLE 6 :
SEX RATIO BY TAHSILS, 2001

Serial Number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Pilibhit	889	889	889
2	Bisalpur	859	857	867
3	Puranpur	883	880	906
	District Total:	**877**	**875**	**885**

The table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 877 females for every thousand males in Pilibhit district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 875 and 885 females respectively. The rural sex-ratio in the tahsils varies between 857 in Bisalpur tahsil and 889 females per 1,000 males in Pilibhit tahsil. The sex-ratio in Puran pur tahsil and Pilibhit (T) is higher than district rural average (875). In urban areas the highest sex-ratio is recorded in Nyoria Husainpur N.P.(921) and the lowest is in Gularia urban (808).

TABLE 7
SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Amariya	895
2	Marori	894
3	Lalaurikhera	873
4	Barkhera	864
5	Bilsanda	855
6	Bisalpur	852
7	Puranpur	880
8	Forest Villages	657
	District (Rural) Total:	**875**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 875 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 895 females is found in Amariya C.D. block and is fallowed by Marori (894) while the lowest of 852 is recorded in Bisalpur C.D. block. The sex-ratios of Amariya, Marori and Puranpur C.D. block are higher than the district rural average of 875 females and in remaining blocks, this value is below the district average

TABLE 8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	41	3.4	1,991	0.1
700-749	30	2.5	9,270	0.7
750-799	116	9.5	74,972	5.5
800-849	262	21.5	271,994	20.1
850-899	376	30.9	560,535	41.5
900-949	249	20.5	354,778	26.3
950-999	78	6.4	62,330	4.6
1000-1099	44	3.6	13,943	1.0
1100+	20	1.6	1,146	0.1
District Total:	**1,216**	**100.0**	**1,350,959**	**100.0**
Sex ratio (Rural) for District:		**875**		

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census.The maximum number of villages i.e. 376 accounting for 30.9 per cent of the total villages having largest population of 41.5 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849 which claims 262 villages (21.5 per cent) and 20.1 per cent population. The highest range of 1,100 & above claims 20 villages (1.6 per cent). This range shares 0.1 per cent rural population of the district while in the sex-ratio range of 900-949, there are 249 villages (20.5 per cent). In remaining sex-ratio ranges of 950-999,1000-1099, 750-799, 700-749 and less than 700, the number of villages are 78 (6.4 per cent), 44 (3.6 per cent), 116 (9.5 per cent), 30 (2.5 per cent) and 41 (3.4 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 887 having maximum population (87.9 per cent) fall in the sex-ratio ranges of 800-949

TABLE 9
SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio
1	2	3	4
1	Barkhera	(NP)	842
2	Bilsanda	(NP)	882
3	Bisalpur	(NPP)	868
4	Gularia Bhindara	(NP)	808
5	Jahanabad	(NP)	906
6	Kalinagar	(NP)	892
7	Nyoria Husainpur	(NP)	921
8	Pilibhit	(NPP)	887
9	Puranpur	(NPP)	910
Sex ratio (Urban) for the district:			885

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 885 females per 1,000 males. Among the 9 towns of the district the sex-ratio varies between 808 to 921 Nyoria Husainpur has the highest sex-ratio (921), while Gularia Bhindara has the lowest sex-ratio of 808 females.

TABLE 10
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Pilibhit	Total	131,170	67,917	63,253	931
		Rural	108,012	55,708	52,304	939
		Urban	23,158	12,209	10,949	897
2	Bisalpur	Total	110,070	56,685	53,385	942
		Rural	95,299	49,056	46,243	943
		Urban	14,771	7,629	7,142	936
3	Puranpur	Total	83,288	42,697	40,591	951
		Rural	75,527	38,746	36,781	949
		Urban	7,761	3,951	3,810	964
	District Total:	**Total**	**324,528**	**167,299**	**157,229**	**940**
		Rural	**278,838**	**143,510**	**135,328**	**943**
		Urban	**45,690**	**23,789**	**21,901**	**921**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age-group 0-6 is 324528 persons comprising 167299 males and 157229 females. The total sex-ratio in this age-group works out 940 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 943 and 921 females in this age-group respectively. The rural sex-ratio in tahsil varies between 939 in Pilibhit tahsil and 949 in Puranpur tahsil. The sex-ratio of Puranpur tahsil is higher than district rural average (943). Puranpur tahsil also claims highest rank in the sex-ratio of children (951). In urban areas, the higher sex-ratio is recorded in Nyoria Husainpur (N.P.) urban (921) and the lowest is found in Gularia Bhindara (N.P.) urban (808).

TABLE 11
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Amariya	42,219	21,796	20,423	937
2	Marori	37,020	18,922	18,098	956
3	Lalaurikhera	28,773	14,990	13,783	919
4	Barkhera	31,156	15,929	15,227	956
5	Bilsanda	34,548	17,935	16,613	926
6	Bisalpur	29,595	15,192	14,403	948
7	Puranpur	75,437	38,701	36,736	949
8	Forest Villages	90	45	45	1,000
	District (Rural) Total:	**278,838**	**143,510**	**135,328**	**943**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 943 for the district (rural). The sex-ratio of C.D. block varies between 919 to 956. It is highest same in Marori and Barkhera C.D. block i.e. 956 followed by 948 in Puran pur C.D. block and lowest 919 females is found in Lalauri khera C.D. block. The sex-ratio of Marori, Barkhera, Bisalpur and Puran pur C.D. block are higher than the district rural (943) while in remaining blocks, it is below the average of the district.

TABLE 12
SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	152	12.5	7,250	2.6
700-749	46	3.8	6,407	2.3
750-799	81	6.7	14,762	5.3
800-849	112	9.2	21,379	7.7
850-899	129	10.6	37,789	13.6
900-949	164	13.5	48,567	17.4
950-999	124	10.2	51,336	18.4
1000-1099	220	18.1	63,719	22.9
1100+	188	15.5	27,629	9.9
District (Rural) Total	**1,216**	**100**	**278,838**	**100**
Sex ratio (Rural) for District:		**943**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e.220 (18.1 per cent) having largest population (22.9 per cent) in the district (rural) fall in the sex-ratio range of 1000-1099 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 1100 and above which claims 188 villages (15.5 per cent) and 9.9 per cent population. Next to it, 164 villages (13.5 per cent) are in the range of 900-949 with 17.4 per cent population. 152 villages (12.5 per cent) having 2.6 per cent population fall in sex-ratio range of less than 700. In remaining sex-ratio ranges of 700-749, 750-799, 800-849, 850-899 and 950-999 claim less number of villages and these are distributed as 46 (3.8 per cent),81 (6.7 per cent), 112 (9.2 per cent), 129(10.6 per cent and 124 (10.2 per cent) respectively. It becomes clear from the table that more than fifty per cent of villages i.e. 696 having population (68.6 per cent) fall in the higher sex-ratio ranges of 900 to 949 and above.

TABLE13
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS /TOWNS, 2001

Serial number	Name of UA/ Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Barkhera	(NP)	2,087	1,103	984	892
2	Bilsanda	(NP)	2,334	1,191	1,143	960
3	Bisalpur	(NPP)	10,350	5,335	5,015	940
4	Gularia Bhindara	(NP)	914	494	420	850
5	Jahanabad	(NP)	2,485	1,310	1,175	897
6	Kalinagar	(NP)	1,985	1,000	985	985
7	Nyoria Husainpur	(NP)	3,055	1,562	1,493	956
8	Pilibhit	(NPP)	16,704	8,843	7,861	889
9	Puranpur	(NPP)	5,776	2,951	2,825	957
District(Urban) Total			**45,690**	**23,789**	**21,901**	**921**

The above table 13 shows sex ratio of population in the age group 0-6 of the district. The sex ratio of the age group 0-6 for all the urban units in the district comes to 921. The urban units which have sex ratio of more than district figure are Kalinagar NP (985). , Bilsanda NP (960), Puranpur NPP (957), Nyoria Husainpur NP (956) and Bisalpur NPP (940). The lowest sex ratio is observed in Gularia Bhindara NP (850), Pilibhit NPP (889), Barkhera NP (892) and Jahanabad NP (897).

TABLE 14
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Pilibhit	Total	686,997	88,725	286	12.9	0.0
		Rural	524,059	75,966	157	14.5	0.0
		Urban	162,938	12,759	129	7.8	0.1
2	Bisalpur	Total	537,047	90,369	131	16.8	0.0
		Rural	452,991	84,201	121	18.6	0.0
		Urban	84,056	6,168	10	7.3	0.0
3	Puranpur	Total	421,139	71,401	1,376	17.0	0.3
		Rural	373,909	67,010	1,372	17.9	0.4
		Urban	47,230	4,391	4	9.3	0.0
	District Total:	**Total**	**1,645,183**	**250,495**	**1,793**	**15.2**	**0.1**
		Rural	**1,350,959**	**227,177**	**1,650**	**16.8**	**0.1**
		Urban	**294,224**	**23,318**	**143**	**7.9**	**0.0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1645183 total population of the district, 15.2 per cent of the total population belongs to the Scheduled Castes and 0.1 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 16.8 per cent in rural population and 7.9 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Puran pur tahsil (17.0) while the lowest is found in Pilibhit tahsil (12.9). The proportion of Scheduled Tribes population is 0.1 and 0.1 per cent in rural areas and negligible population (143) in urban areas. Scheduled Tribes population in the district is mainly concentrated in tahsil of Puran pur (0.3 per cent), there are no percentage of Scheduled Tribe population to total population in Pilibhit and Bisalpur tahsils.

TABLE - 15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Amariya	211,325	24,028	30	11.4	0.0
2	Marori	175,808	28,599	14	16.3	0.0
3	Lalaurikhera	136,915	23,339	113	17.0	0.1
4	Barkhera	150,274	27,362	47	18.2	0.0
5	Bilsanda	161,645	38,039	73	23.5	0.0
6	Bisalpur	141,072	18,800	1	13.3	0.0
7	Puranpur	373,282	66,883	1,372	17.9	0.4
8	Forest Villages	638	127	0	19.9	0.0
District (Rural) Total:		**1,350,959**	**227,177**	**1,650**	**16.8**	**0.1**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 16.8 per cent of rural population of the district belongs to Scheduled Castes and 0.1 per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 11.4 per cent in Amariya and 23.5 per cent in Bilsanda C.D. block.. The other C.D. block containing the highest percentage of Scheduled Castes are Barkhera (18.2), Puran pur (17.9) and Marori (16.3). The highest proportion of 0.4 per cent Scheduled Tribes population is counted in Puran pur C.D. block and is fallowed by Lalaurkhera (0.1) C.D. block. Rest of C.D. Blocks have no percentage of Scheduled Tribes population to total population.

TABLE - 16
PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	224	18.4	0	0.0
Less than 5	168	13.8	4,667	2.1
5-10	185	15.2	21,324	9.4
11-20	309	25.4	67,436	29.7
21-30	157	12.9	47,534	20.9
31-40	74	6.1	32,771	14.4
41-50	37	3.0	18,315	8.1
51-75	41	3.4	21,606	9.5
76 and above	21	1.7	13,524	6.0
District Total	**1,216**	**100**	**227,177**	**100**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 224 villages accounting for 18.4 per cent of total 1216 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 168 villages (13.8 per cent). In 185 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 309 villages constituting 25.4 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 157 and 74 villages respectively. Both these ranges together account for 19.0 per cent villages of the district. 99 villages fall in the range of 41-50 and above percent. 21 villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 6.0 per cent Scheduled Castes population of the district. The maximum of the 29.7 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

TABLE - 17
PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,181	97.1	0	0.0
Less than 5	30	2.5	944	57.2
10-May	2	0.2	47	2.8

6	Kalinagar (NP)	9,997	1,643	0	16.4	0.0
7	Nyoria Husainpur (NP)	19,775	419	0	2.1	0.0
8	Pilibhit (NPP)	124,245	11,495	102	9.3	0.1
9	Puranpur (NPP)	37,233	2,748	4	7.4	0.0
District(Urban) Total		**294,224**	**23,318**	**143**	**7.9**	**0.0**

Table 18 shows number and percentage of scheduled caste and scheduled tribes population recorded during 2001 census in district Pilibhit. The table depicts that scheduled caste population in Kalinagar (NP) is 16.4 per cent but very low 2.1 per cent in the Nyoria Husainpur (NP). Scheduled tribe population is negligible in the urban areas of the district. There are no scheduled tribe population in Nyoria Husainpur, Jahanabad, Bilsanda and Kalinagar NP.

TABLE 19
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Amariya	890	579
2	Marori	897	1,333
3	Lalaurikhera	865	883
4	Barkhera	867	1,043
5	Bilsanda	847	921
6	Bisalpur	824	0
7	Puranpur	885	927
8	Forest Villages	896	0
	District (Rural) Total	**871**	**921**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 871 for district (rural). Among the C.D.blocks, the highest sex ratio of 897 females is found in Marori C.D. block and lowest of 824 females is recorded in Bisalpur C.D. block. The Scheduld Tribe sex ration is 921 for district. The sex ratio in Marori and Barkhera C.D. Block is above the purity line while in remaining C.D. Blocks are below the line of equality. The lower value of sex ratio of 579 females is recorded in Amariya C.D. Block.

TABLE 20

SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Barkhera (NP)	699	0
2	Bilsanda (NP)	853	0
3	Bisalpur (NPP)	850	1333
4	Gularia Bhindara (NP)	757	800
5	Jahanabad (NP)	1067	0
6	Kalinagar (NP)	904	0
7	Nyoria Husainpur (NP)	967	0
8	Pilibhit (NPP)	878	821
9	Puranpur (NPP)	923	1000
Sex ratio (Urban) for the district:		**878**	**810**

Table 20 shows sex-ratio of scheduled caste and scheduled tribe population in urban areas of the district. At the district level sex ratio is 878 for scheduled caste and 810 for scheduled tribe. Sex ratio of higher order is found in Jahanabad NP (1,067) and lowest of 699 in Barkhere NP in case of scheduled caste. In case of scheduled tribe highest sex ratio is recorded in Bisalpur NPP (1,333) and minimum of 800 in Gularia Bhindara NP.

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 49.8 per cent in the district. This proportion in rural area is 47.4 per cent against 60.3 per cent in urban areas. In the district the literacy rates of males (62.5 per cent) is much higher than that of females (35.1 per cent). Among the tahsils, Bisalpur tahsil tops with 53.0 per cent literates followed by Pilibhit tahsil(50.0 per cent). Puranpur tahsil with 45.5 per cent literates stands at the bottam in the district. Out of 3 tahsils, the literacy rates of 2 tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 27.4 per cent in the district, as a whole. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 16.5 points against the rural areas, where the gap between male and female literacy is 29.9 points.

TABLE 22

NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of CD block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

District (Rural) Total		**508,111**	**353,204**	**154,907**	**842,848**	**367,118**	**475,730**	**47.4**	**61.2**	**31.3**	**29.9**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 47.4 per cent of the total rural population excluding the age-group of 0-6 years literates in the district. The corresponding proportion of male and female literates comes to 61.2 and 31.3 per cent respectively which shows very wide gap of 30.0 per cent in male and female literacy. At C.D. block level, Bisalpur C.D. block has the highest rural literacy rate of 54.6 per cent while 68.9 per cent males and 37.4 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Amariya C.D. block (42.6 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 32.8 points is found in Marori C.D. block.

TABLE 23

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	5	0.4	74	0.0
1-10	1	0.1	576	0.0
11-20	21	1.7	9,113	0.7
21-30	72	5.9	94,288	7.0
31-40	197	16.2	292,351	21.6

100	8	0.7	80	0.0
District Total:	**1,216**	**100**	**1,350,959**	**100.0**
Literacy rate for District:			**49.8**	

Table 23 gives the distribution of villages by literacy rate ranges in the district. 295 villages accounting for 24.3 per cent of the total villages are in the literacy range of 51-60 per cent and 181 villages (14.9 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 629 villages (51.7 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 111 villages (9.2 per cent). The range of 31-60 have the maximum number of 825 villages forming 67.9 per cent of the total inhabited villages.

TABLE 24
NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District(Urban) Total		**149,749.00**	**89,900.00**	**59,849.00**	**144,475.00**	**66,146.00**	**78,329.00**	**60.3**	**68.0**	**51.5**	**16.5**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Gularia Bhindara town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (60.3). The literacy rate is quite high (above 74.0 percent in two towns) among males. Females literacy rate is not for behind in two towns (above 59.0 percent). However, literacy rate among females is very low (23.4 percent) in Nyoria Husainpur town, thus the gap in male female literacy rate is high (16.5 percent).

TABLE 25
NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

District (Rural) Total:		**78,536**	**55,070**	**23,466**	**148,641**	**66,339**	**82,302**	**44.2**	**57.3**	**28.8**	**28.5**

Table 25 shows number and percentage of scheduled castes literates and illiterates by sex in Cd blocks 2001. In rural areas of the district proportion of literates is 44.2 per cent in which 57.3 per cent males and 28.8 per cent females. Thus, the gap in male and female literacy rates is 28.5 per cent. Among eight CD blocks, Bisalpur CD block has the highest literacy rate and Puranpur CD block has the lowest literacy rate. The gap in male/female literacy rates in Bisalpur CD block (31.8) is highest and this gap is lowest in Bilsanda CD block (27.4).

TABLE 26

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

Literacy rate for District (Rural): 44.2

The table 26 presents the distribution of villages by literacy rate range for scheduled castes population at the 2001 census. In majority of inhabited villages, which account for 56.5 percent of total rural scheduled castes, population the literacy range is 41-60 percentages. In the district there are 992 inhabited villages with scheduled castes population with about 44.2 percent of literacy rate.

TABLE - 27

NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

The table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates is more than literates in the district (urban) and towns. The percentage of literates is least in Kalingar N.P. among 9 towns but the gap in male/female literate rate is highest in case of Barkhera town. The males in all the 9 towns enjoy higher

TABLE 28
NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of CD block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates

The table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is more than literates in the district and CD Block, with exception to Lalaurikhera CD Block. The literacy rate of the scheduled tribes population at about 35.2 percent is lower than the corresponding rate it about 44.2 percent in case of scheduled castes community. The gap in male and female literacy rates at about 25.9 percent is lesser than what it is in case of the scheduled castes community 28.5 per cent.The literacy rate is highest in Lalaurikhera CD Block, and lowest in Bilsanda CD Block. The gap in male/female literacy rate is highest (52.1 per cent) in Amariya CD Block.

TABLE 29
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	11	31.4	85	5.2

District Total:	**35**	**100.0**	**1,650**	**100.0**

Literacy rate for District (Rural): 35.2

The table 29 gives the distribution of villages by literacy rate range for the scheduled tribes population at the 2001 census. In the district the scheduled tribes population is found in 35 villages out of which in 5 villages the literacy range is 100 percent. However, the maximum (31.4 percent) of the scheduled tribes population (518) is found in only 4 villages with literacy range from 1to 10 percenrages.

TABLE 30

NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

5	Puranpur (NPP)	2	1	1	2	1	1	100.0	100.0	100.0	0.0
District (Urban) Total		**101**	**60**	**41**	**42**	**19**	**23**	**83.5**	**92.3**	**73.2**	**19.1**

The table 30 gives number and percentage of Scheduled Tribes literates and illiterates by sex in urban town population at the 2001 census. There is small Scheduled Tribes population in the towns of the district. In 4 towns there is no Scheduled Tribe population. The Gularia Bhindara, Pilibhit NPP, Barkhera NP, Bisalpur NPP and Puranpur NPP towns have Scheduled Tribe population; the percentage of literates is 83.5 per cent in which 92.3 per cent of males and 73.2 per cent of female are literates. The gap in male/ female literacy in the urban population of the district is 19.1 per cent.

TABLE - 31

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out 28.0 per cent of the total population in the district. The total workers are comprised of 21.9 per cent of main workers and 6.1 per cent of marginal workers and the remaining 72.0 per cent are non-workers.

Among the main workers, males participation rate in the district is 39.2 per cent and 2.2 per cent of females. Male and female marginal workers account for 8.6 and 3.4 per cent respectively. The percentage of females marginal workers is lower than males. Total workers (main and marginal workers) among tahsils varies from 27.8 per cent in Pilibhit tahsil to 28.3 per cent in Puranpur tahsil.

TABLE 32

NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D. block	Persons/ Males/ Females	Total Population	Main workers		Marginal workers		Total workers (Main & marginal		Non workers

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 1,350,959 total rural population of the district, 22.0 per cent has been categorised as main workers and the marginal workers constitute 6.4 per cent and the remaining 71.6 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 39.6 per cent males and 2.0 per cent females are in the category of main workers. Male and female marginal workers account for 8.8 and 3.7 per cent respectively. The percentage of female marginal workers is lower than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 28.4 per cent. At the C.D. block level, Marori has highest proportion of total workers forming 30.0 per cent of the total population. It is closely followed by Barkhera and Bilsanda (28.9 per cent), Puranpur (28.6 per cent), Bisalpur (28.4 per cent), Amariya (28.2 per cent) and Lalauri khera 26.8 per cent. The lowest percentage of 26.8 per cent is recorded in Lalauri khera C.D. block.

TABLE 33

				5.6	**27.9**	**32.8**	**17.0**	**22.2**

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 45.5 per cent of the total workers (main + marginal) and remaining 25.4 per cent of total workers are engaged as agricultural labourers, Household industry workers (3.7 per cent) and other workers (25.4 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 40.1 per cent in Pilibhit tahsil and 51.3 per cent in Bisalpur tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 27.9 per cent which is low as compared to 47.3 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the same position as to agriculture in the district as well as in each tahsil. The highest proportion of 31.9 per cent of other workers is recorded in Pilibhit tahsil while the lowest proportion of 20.6 per cent is found in Puranpur tahsil.

				5.6	33.0	38.5	14.8	13.6

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) 28.4 per cent of total population. Among these workers, cultivators constitute 53.5 per cent, 29.0 per cent agricultural labourers, 3.2 per cent household industry workers and 14.2 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 3.2 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (33.0 per cent) is lower than males (55.6 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 48.5 per cent in Lalaurikhera C.D. block to 62.2 per cent in Barkhera C.D. block. Similarly for other workers, the lowest proportion is 8.3 per cent in Barkhera C.D. block while 24.4 per cent is the highest in Lalaurikhera C.D. block. The percentage of household industry workers is quite low i.e. only 3.2 per cent in the district. The percentage of agricultural labourers is highest in AmariyA (33.8) block and is followed by Puranpur (31.1). Similarly, household industry workers varies in C.D. blocks between 2.5 per cent in Amariya and 4.3 per cent in Bisalpur.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district Pilibhit. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (80.9), followed by agriculture labourers with 7.5 percent (7.8 percent male and 4.9 percent female). If we observe each town, the table reveals that highest percentage of agriculture labourers (20.0) is recorded in Kalinagar town. In the cultivators category in Gularia Bhindara town (NP) recorded very low percentage (0.9)Household industry workers are also very low (2.4 percent in Gularia Bhindara. As the usual trend recorded in the urban areas, other workers are in high percentage (94.0 percent in Gularia Bhindara 88.9 per cent in Pilibhit and 88.6 percent in Puranpur M.B.

(ix) Brief analysis of the Village Directory and Town Directory data :

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such

developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE - 37
DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

			Type of amenity available									
Serial number	Name of C. D. block	Number of inhabited villages	Educa-tion	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communi-cations $	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

Note : -

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1216 inhabited villages in the district 865 villages or 71.1 per cent have been provided with the education facilities of one type or the other. Similarly 150 villages in the district constituting 12.3 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1188 or 97.7 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 133 villages constituting 10.9 per cent of villages have been provided with post office facility within the village. 380 or 31.3 per cent villages have been provided with the telephone facility, 130 or 10.7 per cent with transport facility, 42or 3.5 per cent villages with bank facility and 59 or 4.9 per cent with agricultural credit societies. Similarly there are 771 or 63.4 per cent villages which have been linked with the pucca road. Total 806 or 66.3 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Barkhera C.D. block has the highest 90.3 per cent villages where educational facility is available and lowest 54.7 per cent is found in Puranpur. Medical facility is highest in Bisalpur (74.8 per cent) and lowest (2.8 per cent) in Puranpur C.D. block. Improved drinking water is available above 96.0 per cent villages. Telephone facility is highest in Amariya (46.7 per cent) while a single village of forest village enjoy

this facility. Transport and communications is less developed in Bilsanda where only 6.5 per cent villages are covered by this facility whereas 16.5 per cent villages of Amariya C.D. block are availing this facility. In the field of power supply it is highest in Amariya (81.3 per cent) C.D.Block and lowest (44.0 per cent) villages in Barkhera C.D. Block.

TABLE 38
NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

			Type of amenity available									
Serial number	Name of C D block	Total population of inhabited villages	Educa-tion	Medical	Im-proved drinking water*	Post Office #	Tele-phone	Transport communi-cations $	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

		100.0	0.0	0.0	88.2	0.0	55.2	0.0	0.0	0.0	68.5	98.3
	District Total:	**1,350,959**	**1,236,002**	**323,922**	**1,349,509**	**335,568**	**623,382**	**277,322**	**129,564**	**155,544**	**1,067,478**	**1,014,321**
		100.0	**91.5**	**24.0**	**99.9**	**24.8**	**46.1**	**20.5**	**9.6**	**11.5**	**79.0**	**75.1**

Note : -

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1350959 persons in the district, 1236002 or 91.5 per cent have educational facility of one or the other type. Similarly 323922 or 24.0 per cent population has medical facilities while 1349509 or 99.9 per cent have got improved drinking water facility. Post office facilities are available to 335568 or 24.8 per cent population. Telephone facility is available to 623382 or 46.1 per cent. Transport communications facility is available to 277322 or 20.5 per cent. Bank facility is available to 129564 or 9.6 per cent. 155544 or 11.5 per cent have been provided with the facility of agricultural credit societies. 1067478 or 79.0 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1014321 or 75.1 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. However, in Bisalpur C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population in comparision to other C.D. Blocks.

TABLE - 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
	2	3	4	5
1. Education :-				
(a) Primary School	306	38	8	352
(b) Middle School	718	295	28	1,041
(c) Degree College	64	253	897	1,214
2. Medical:-

(b) Cooperative Bank	225	478	503	1,206
7. Agricultural Credit Societies	639	395	123	1,157

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table352 villages do not have primary school in their villages and out of these villages, children of 306 villages have to travel less than 5 kms. for schooling Out of 1216 inhabited villages as many as 1041 are deprived of middle school and 1214 of degree college. Of these 718 avail the facility of middle school at a distance of less than 5 kms., 295 at a distance 5-10 kms. and the remaining 28 at a distance of 10+ kms. In respect of degree college 64 avail this facility at a distance of less than 5 kms., 253 between 5 to 10 kms. and rest 897 villages at a distance of 10+ kms.

Similarly there are 1212 villages in the district which have been devoid of Hospital facility and 1208 villages which are deprived of PHC facilities. Of these 152 villages have the facility of Hospital available within 5 kms. while in respect of 392 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 668 villages have this facility at a distance of 10+ kms. As regards PHC 219 avail this facility at a distance of less than 5 kms., 459 at a distance of 5-10 kms. and the remaining 530 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1083 villages do not have this facility in the village itself. Of these majority i.e.781 have this facility at a distance of less than 5 kms., another 266 villages avail it at a distance of 5-10 kms. In the remaining 36 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 836 villages in the district which are without telephone facilitiy. Of these 437 avail this facility at a distance of less than 5 kms., 244 at a distance of 5-10 kms. and remaining 155 have to traverse a distance of 10+ kms.

For Bus service out of 1106 villages which do not have facility, 495 villages avail this facility at a distance of less than 5 kms., 422 at a distance between 5-10 kms. and 189 at a distance of 10+ kms.

In the entire district 1177 villages are deprived of Commercial Bank and 1206 of Co-operative Bank. Of these 1177 villages which are deprived of Commercial Banks 534 villages avail this facility at a distance of less than 5 kms., 453 between 5-10 kms. and the remaining 190 at a distance of 10+ kms. Regarding Co-operative Banks out of 1206 villages 225. villages avail this facility at a distance of less than 5 kms., 478 at a distance of 5-10 kms. and remaining 503 at a distance of 10+ kms. 1157 villages do not have agricultural credit societies. This facility to 639 villages is available at a distance of less than 5 kms., 395 at a distance of 5-10 kms. and the remaining 123 at a distance of 10+ kms.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1216 inhabited villages in the district, there are 143 villages, which have nearest towns upto a distance of 5 kms. Of these only 106 villages forming 74.1 per cent of these total villages, are having the educational facilities of one type or the other and 20 villages constituting 14.0 per cent, have the medical facilities within the village, 12 villages forming 8.4 per cent have the facility of post office within the village and 44 or 30.8 per cent have the facility of telephone. 20 villages constituting 14.0 per cent have been linked by transport service. 5 villages comprising 3.5 per cent have been provided bank facilities, while 2 villages constituting only 1.4 per cent have been provided by agricultural credit societies. 107 villages comprising 74.8 per cent have been provided with pucca road.

There are 804 inhabited villages in the district, which fall in the distance range of 5-15 kms. Of these 572 villages constituting 71.1 per cent have been provided with the educational facilities. 101 villages comprising 12.6 per cent have been provided with medical facilities. 91 villages constituting 11.3 per cent enjoy the post office facility. 251 villages comprising 31.2 per cent have been provided the telephone facility. 71 villages constituting 8.8 per cent have been linked with transport communications. 26 villages comprising 3.2 per cent have bank facility. 39 villages constituting 4.9 per cent are having agricultural credit societies, while 493 villages or 61.3 per cent are approachable by pucca road. 143 villages fall in the distance range of 16-50 kms. Of these, 60.1 per cent villages have educational facility, 7.0 per cent with medical, 10.5 per cent with post office, 25.9 per cent with telephone and transport & communications available to 12.6 per cent villages. Banks and agricultural credit societies facilities are available to 3.5 and 6.3 per cent of villages respectively. 58.0 percent villages are approachable by pucca road.

There are no villages in the district, which are situated beyond 50 kms.from the nearest town. There are 126 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 101 or 80.2 per cent villages have the educational facility of one or other type. 19 villages constituting 15.1 per cent enjoy the medical facility, 15 villages comprising 11.9 percent have been provided the post office facility 38.1 percent with telephone and transport and communications available to 16.7 per cent villages. Banks and agricultural credit societies facilities are available to 4.8 and 7.1 percent of villages, 69.8 percent villages are approach able by pucca road.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Pilibhit district out of a total 1216 inhabited villages, overwhelming 377 villages have a population of less than 500 persons. Of these, 103 villages (27.3 per cent) have education facility, 5 villages (1.3 per cent) have medical facility, 349 (92.6 per cent) have improved drinking water facility, 63 (16.7 per cent) have telephone facility. 17 (4.5 per cent) have been linked by bus service. 2 (0.5 per cent) have Bank facility. 167 villages (44.3 per cent) have been linked with pucca road. 246 villages (65.3 per cent) have been provided with electricity. There is no any village in this population range to have the facilities of post office and agricultural credit societies.

Out of 340 villages, which fall in the population range of 500-999 persons, 279 villages (82.1 per cent) have been provided with the education facility, 25 (7.4 per cent) with medical facility, all the villages have improved drinking water facility. 15 villages (4.4 per cent) have been provided with post office facilities, 84 villages (24.7 per cent) with telephone facility, 21 villages (6.2 per cent) with transport facilities, 4 villages (1.2 per cent) with bank facility, 10 villages (2.9 per cent) with agricultural credit societies 199 villages (58.5 per cent) have approach by pucca road and 168 villages (49.4 percent) have been provided with power supply facility.

347 villages fall in population range of 1,000-1,999 persons. All of these villages have improved drinking water facilities of these, 335 villages (96.5 percent) have education facility, 72 villages (20.7 percent) have medical facility, 55 villages (15.9 per cent) have post office facility, 149 villages (42.9 per cent) have telephone facility, 51 villages (14.7 per cent) have transport communications facilities, 16 villages (4.6 per cent) have bank facilities, 22 villages (6.3 per cent) have agricultural credit societies, 260 villages (74.9 per cent) have approach by pucca road and 263 villages (75.8 percent) have been provided with electricity..

There are 133 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy the facility of improved drinking water,129 villages (97.0 percent) have been provided with the education facility; 38 villages (28.6 per cent) have medical

facility. 50 villages (37.6 per cent) have post office facility, 71 villages (53.4 per cent) have telephone facility, 31 village (23.3 per cent) is having transports communications facility, 13 villages (9.8 per cent)have bank facility, 20 villages (15.0 percent) have agricultural credet societies 127 villages (95.5 percent) is having approach by pucca road facility and 111 villages (83.5 percent) have been provided electricity. There is only 19 villages in the district having a population of 5000 persons or above have maximum facilities.

TABLE 42
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of CD block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Amariya	182	42,339	80.6	98.0
2	Marori	140	27,242	77.4	93.4
3	Lalaurikhera	100	19,597	87.2	88.8
4	Barkhera	134	31,028	70.8	93.7
5	Bilsanda	168	35,368	75.9	94.1
6	Bisalpur	125	23,947	79.5	93.0
7	Puranpur	360	111,447	70.5	92.6
8	Forest Villages	7	0	0.0	0.0
Total		**1,216**	**290,968**	**NA**	**NA**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,216 inhabited villages in the district having a total area of 290,967.92 hectares. Of this, 75.2 per cent is cultivable and 93.6 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Amariya block with 182 villages have a total area of 42338.72 hectares, of this 80.6 per cent of land is cultivable and of the aforesaid area 98.0 per cent is irrigated. In Marori block, all the 140 villages have a total land area of 27,242.33 hectares, of this 77.4 per cent of land is cultivable and of the aforesaid area 93.4 per cent is irrigated. In Lalurikhera block, all the 100 villages have a total area of 19,597.11 hectares, of this cultivable area is 87.2 per cent and 88.8 per cent is irrigated. In Barkhera block, all the 134 villages have a total area of 31,027.74 hectares. Of this, cultivable area is 70.8 per cent. Of cultivable area 93.7 per cent is irrigated. Bilsanda block with 168 villages have a total land area of 35,367.6 hectares, of this 75.9 per cent is cultivable area and out of this cultivable area 94.1 per cent is irrigated. Bisalpur block with 125 villages has a total land area of 23,947 hectares. Of this 79.5 per cent is cultivated area, out of which 93.0 per cent is irrigated. Puranpur block with a total 360 villages have an area of 111,447.42 hectares. Of this 70.5 per cent is cultivable area and out of this cultivable area 92.6 percent is irrigated.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure

	District Total	**3.0**	**1.7**	**1.0**	**0.7**	**0.1**

Table 44 shows in urban areas of Pilibhit district the average number of primary schools per 10,000 population comes 3.0, 1.7 junior secondary/middle, 1.0 secondary/matriculation, 0.7 senior secondary schools and the ratio of colleges is only 0.1 college per 10,000 population. Among the towns, the ratio of primary and junior secondary/ matriculation is highest in Barkhera and Bilsanda. Bilsanda also has highest ratio of secondary/ matriculation schools, while in case of senior secondary school this position is claimed by both Bilsanda and Gulariya Bhindara (1.5) college education is available only in Bisalpur, Pilibhit and Puranpur towns.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Barkhera, NP	10
2	Bilsanda, NP	7
3	Bisalpur, NPP	13
4	Gulariya Bhindara, NP	0
5	Jahanabad, NP	0
6	Kalinagar, NP	4
7	Nyoria Husainpur, NP	0
8	Pilibhit, NPP	16
9	Puranpur, NPP	12
	District Total	12

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Pilibhit district. On an average there are 12 beds per 10,000 population in urban areas of the district, whereas it is the highest 16 in Pilibhit NPP, while lowest value of 4 beds is recorded in Kalinger NP and is closely fallowed by Bilsanda NP. (7), there is no beds in three towns of the district.

TABLE 46

PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population

7	Bilsanda, NP	Rice, Sugar, Gur	Wheat, Rice, Sugar
8	Kalinagar, NP	Ban, Gur, Rice	--, Gur, Rice
9	Puranpur, NPP	--, Wooden Furniture, Sugar	Rice, Wood, Sugar

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for a Sugar. The chief manufactured items of the district are Rice, Sugar and wooden goods and these are exported to other places.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 :

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/ jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and A

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 250316 consisting of 206509 rural and 43807 urban households. 49043 households belong to Scheduled Castes and 2335 to Scheduled Tribes. 239783 households are living in their owned houses constituting 95.8 per cent of total households. Of these households, the largest numbers of households (96291) have occupied single roomed accommodation and is followed by double-roomed accommodation numbering to 80204 households. Next position is claimed by households (29586) occupying three rooms accommodation. Number of households in owned accommodation occupying three plus rooms rank at fourth place with 27596 households while 6106 households are without any exclusive room.

6977 households living in rented accommodation account for 2.8 per cent of total number of households in the district. The largest number of 3603 households are living in single roomed accommodation followed by 2428 households in double roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 3556 forming only 1.4 per cent of total households are distributed in single roomed accommodation numbering 1948 double roomed 837 and 320 in three roomed accommodation. In rural areas majority of households have smaller size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary

3	Puranpur	48.9	22.7	28.3	44.7	24	31.3	86.5	11.7	1.8
	District Total:	**50.9**	**25.7**	**23.3**	**45.5**	**27.4**	**27.1**	**76.5**	**17.8**	**5.8**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or ot

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt

The percentage distribution of households as shown in the above table reveals that 50.9 per cent of household in the district had permanent houses.The trend is different in rural (45.5 per cent) and urban area (76.5 per cent). Among tahsils highest proportion of permanent house were accounted in tahsil Pilibhit (58.7 per cent) followed by Puranpur (48.9 per cent), and lowest in Bisalpur (42.5 per cent). In respect of semi-permanent house, the returns were 25.7 per cent of district level where as among tahsils, in Bisalpur it was 27.2 per cent and lowest as 22.7 per cent in tahsils Purnpur. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 11.7 to 25.7 per cent. Temporary houses in the district lie between the range of 14.8 to 30.2 per cent.

The above table shows that out of total households of the district 95.2 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 94.5 and 98.2 per cent. Tahsil Puranpur had higher order of proportion of households (97.2) where percentage for rural area was 97.1 per cent and 98.3 per cent in urban areas. Electricity was available for 25.8 per cent of households at district level households of the district had poor access of electricity. Bathrooms and toilet facilities were available in the district 22.5 and 41.8 per cent of households respectively. Tahsil Bisalpur in Bathroom facilities and tahsil Puranpur in toilet facilities poorly served in respect of these amenities. At district level drainage facility was available for 74.9 per cent of households, whereas the proportion of rural and urban areas households accounted to 70.4 and 96.1 per cent respectively.

TABLE 51 :
NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001.

				41.1	**6.4**	**8.2**	**0.1**	**0.2**	**32.1**	**0.3**	**11.1**	**0.3**	**0.3**

It is observed from the above table that 45.4 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural ares is 46.3 and in urban ares it comes 41.1 per cent of households. LPG (cooking gas) has ben reported as one of the fuel for cooking of food in 7.4 per cent of the househokds. The composition of rural and urban comes 2.2 and 32.1 per cent respectively. Kerosene is used for cooking in as many as 2.4 per cent of the households (0.6 per cent rural and 11.1 per cent urban households). The other methods like crop residue, cow dung cake, coal, lignite, charcoal,electricity and biogas etc. ranges between 0.1 per cent 31.4 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, crop residue and cow, dung cake are the predominant fuel for cooking in the district.

TABLE 52 :

NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial Number	Tahsil	Total/ Rural/ Urban	Total number of households	Total number of households availing banking services	Availability of household assets						
					Radio, Transistor	Television	Telephone	Bicycle	Scooter, Motor Cycle, Moped	Car, Jeep, Van	None of the specified assets

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

The table reveals that out of the total households (250316) of the district, in all 123986 households could avail banking services at district level while while only 82390, 62625, 7661, 176648, 18159 and 3054 households enjoyed the availability of household assets radio/transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively whereas only 51872 households had none of the specified assets.

It also reveals that at tahsil levels a highest number of households were availing banking services as well as all other households assets in Pilibhit tahsil. The highest of none of specified assets also 20149 households in the tahsil Pilibhit against it, on the other hand the lowest of 26724 households was observed were availing banking services and 20734 households radio/ transistor households asset in Puranpur tahsil while the rest of the availabilities of household assets at the lowest foot also were being availed in Puranpur tahsil except scooter, motorycle, moped and Car, Jeep, Van households assets, and the households of the enjoyers of none of the specified assets was 13115 households in Puranpur tahsil. 55707 households in Pilibhit tahsil followed by 41555 households in Bisalpur tahsil were having banking services and the order of households having all other available household assets was higher in tahsil Pilibhit than the other tahsils of the ditrict.

(xi) Major Social and Cultural Events, Natural and Administrative, Development and Significant Activities during the decade:

The Pilibhit Young Men's Association was established in 1936 with the aim of inculcating the spirit of social services among young people and for meeting the moral, educational and cultural needs of the people. It also organises cultural programmes. It trains its members in rendering social service of various types and tries to impress upon them a sense of discipline. It holds "Goshthis" (assemblies of learned people), Kavi sammelons (poetic gathering) and painting, story writing and drama competitions. It provides a library for people to further the sense of education.

The Hindi Sahitya Parishad was established in 1954 in Pilibhit. It enjoys the patronage of the educated people. Poets from other places also participate in its literary sittings. It has published a number of Hindi books from time to time. Cultural functions are also organised by it.

The Cultural Survey Samiti and Lalit Rangmanch aim to propagat fine arts and plays.

There area number of libraries and reading rooms in the district. The first library in the district known as Meston Library was established at Pilibhit in 1916 and was inaugurated

by George Meston, the then governor. The library had a collection of 1200 books and the number of daily visitor was about 25.

As elsewhere in the state, fasting and feasting are the special features of the Hindu festivals which are spread through the entire year. The festival celebrated in the district are Dussehra, Diwali, Holi, Vasant Panchami, Shivratri, Id-ul-fitre, Id-ul-Zuha, Christmas, Baisakhi, Lohri etc.

(xii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district.

The main piligrim centres of the district attracting Hindus and Muslims are very few but at these places fairs are also held although they have little commercial significance. These are the Jasantri Devi at Dasnagar, the Sidha Baba, the Khandhiyan Baba, the Langar Baba, the Dewal Devi Temple fair, the Shiv Temple fair at Lilhar, the Chakra Tirth temple fair at Kalyanpur and the Mastana Shah Urs at Ghera Sharif a village at Gangri.

(xiii) Major Characteristics and Contribution of the District :

The district has been renowned for its Hindi scholars, Swami Narainanand (1877-1911) whose original name was Laxmi Narain Tewari, wrote Lavanyalata and Lavani Ka Itihas. Ram Prasad Shukla (1889-1926) wrote – Nandan – Nikunj, Manorma, Mangal Prabhat and Vanmala and translated Raghuvansh into Hindi and English. Brij Nandan Mishra (1891-1927) translated an account of Tilak's Trial into Hindi. A number of books are said to have been written by him but only Kusum Vatika is now available, Babu Ram Bhatnagar (1895-1974) was a poet and composed a number of poems.

Jalal-ud-din Jalal (1841-1904) was born at Bahadurganj. His famous work is Kulliyat-i-Jalal. Hafiz Pilibhiti (1853-1929) whose original name was Qazi Hafiz Khalil, wrote Naghma-i-jigar doz, Lazzati dard, Maikhana-i-Khuld, Naghmai Ruh and some other books. Durga Sahai (1874-1910) known as Surur Jahanabadi, is a renowned poet of his time whose famous works are Kulliyat-i-Surur, Maikhana-i-Surur. Saiyad Zamin Hussain (1895-1971) known as Goya Jahanabadi wrote Tulu-i-Sahr and Daur-i-Nan.

(xiv) Scope of Village Directory and Town Directory

Village Directory

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status

of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART - A
VILLAGE AND TOWN DIRECTORY
(SECTION I AND II)

SECTION I

VILLAGE DIRECTORY

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H

	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG

(iii) Electricity for other purposes EO
(iv) Electricity for all purposes EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i) News Paper N
(ii) Magazine M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i) Government Canal GC
(ii) Private Canal PC
(iii) Well (without electricity) W
(iv) Well (with electricity)
WWE
(v) Tubewell (with electricity) TW
(vi) Tubewell(without electricity) TWE

Information not available for this district				

SECTION II
TOWN DIRECTORY

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follow:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs,

streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS

(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES
I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

Fertility and Mortality 1991 Census

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which in north –central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000.The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Pilibhit
q1	Persons	99	123
	Males	98	100
	Females	104	127
q2	Persons	117	127
	Males	117	117
	Females	118	136
q3	Persons	134	137
	Males	135	131
	Females	132	144

(*Undivided Uttar Pradesh at 1991 Census)

The child mortality by ages 1, 2 and 5 years was higher in the district as against the State except child mortality for males for the age q3. The child mortality indicators in the district for females were in the improved condition as compared to the State by ages 1, 2 and 5 years.

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person Male Female	Uttar Pradesh	Pilibhit
1	2	3	4	5
1	CBR		37.21	39.76
2	TFR		5.6	6.34
3	TMFR		6.3	7.15
4	GFR		172	194
5	GMFR		200	225
6	Mean age at marriage (1981-91)		17.27	17.67
7	Number of children ever born per ever married woman aged 45-49 years		4.59	4.88
8	Child woman ratio 0-4		631	692
	5-9		752	848

Source :

(i) Estimates of fertility indicators Uttar Pradesh Table # 2.23

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CRB), which is the ratio of the number of live births in a year to the mid year population, is 39.76 percent in the district. It is below to the state of Uttar Pradesh i.e. of 37.21 percent. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and Genera; Marital Fertility Rate (GMFR), the district presents all along a higher proportion from the state figures. The conclusion that may be drawn is higher fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.27 years for the state where as 17.67 years has been observed for the district. It may be observed that higher age at marriage leads to high rate of fertility in the state and district as well. Number of children ever born per ever-married women aged 45-49 is little higher in the district as compared to the state. The state and the district figures are placed as 4.59 and 4.88 percent respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 692 and 848 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that levels as such are high to the state average.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other district of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 73.1 in 1991, while in 2001 it was 67.1 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 16.0 percent and 24.4 percent respectively. This shows in-migration from other state to this district was increased in 2001 in comparison to 1991. At district level in-migration from other countries was 10.9 percent in 1991 and 8.5 percent in 2001. While at

state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 85.1 percent and 74.3 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 11.8 percent and 23.3 percent respectively. The movement of population from other countries in the district was 3.1 percent in 1991 and 2.4 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 71.7 percent in 1991 and 71.3 percent in 2001, while Muslim were 23.1 percent in 1991 and 23.8 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 56.4 percent male and 48.4 percent female to 58.8 percent male and 51.3 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 40.2 percent and female was 46.7 percent in 1991 and in 2001 it was 38.4 percent male and 43.6 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.6 percent male and 4.9 percent female while it was 3.3 percent male and 4.8 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure-VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 74.5 percent male and 86.7 percent female in 1991 which declined to 49.4 percent male and 72.1 percent female in 2001. Primary level education was 9.4 percent male and 4.1 percent female in 1991, which was 16.3 percent male and 10.0 percent female in 2001. Middle level education was 8.4 percent male and 2.3 percent female in 1991 and 14.1 percent male and 5.0 percent female in 2001. Matriculation and above level of education was achieved by 8.4 percent male and 0.3 percent female in 1991 which was 12.6 percent male and 5.1 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note : For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02%. The remaining tongues have been merged in the column of "Total of Other Mother Tongues."

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 76.7 percent person in 1991 and 79.2 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 14.8 percent and 12.3 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
