MOTIF

RAM PRASAD 'BISMIL'

The district Shahjahanpur has the pride of being recognized as one of the Martyr's Town owing to the contributions and sacrifices by Pt. Ram Prasad Bismil, Ashfaq Ullah Khan and Thakur Roshan Singh for the freedom of the country. All of them belonged to the district. The road connecting the *mazars* of Shaheed Ahmad Ullah Khan, a freedom fighter of the first war of independence and Shaheed Ashfaq Ullah Khan, who was one of the participants of the '*Kakori Kand*', is called as Shaheed Ram Prasad Bismil Marg. During freedom movement Shaheed Ram Prasad Bismil lived in an old building of 'Arya Samaj Temple. After the failure of freedom fighters Maulvi Ahmad Ullah Shah and others in attaining the target during the first war of independence, Shaheed Ram Prasad Bismil collaborating Ashfaq Ullah Khan and Roshan Singh with him, formed a Society, 'Mitravedi Sangh' in association of their other friends, under the Leadership of Shri Genda Lal Dixit. The motto behind it, was to raise funds in order to meet out the essential needs related to the aim for independence of the country. Later Ram Prasad Bismil constituted 'Hindustan Association' with association of Shri Yogesh Chaterjee again with the similar motto but insufficiency of the funds lead them to rob. Ram Prasad Bismil was the main accused of '*Mainpuri Kand*' and the government funds' robbery case of 9th August, 1925 as well in the '*Kakori Kand*'. All the three *shaheeds* Ram Prasad Bismil, Ashfaq Ullah Khan and Roshan Singh were awarded punishment by the British Government on December 19 of 1927 as to be hanged till death. In their memory a 'Shahhed Park' having their three separate statues with musical fountain is also established in the city of the district.

Annexures - I To VIII

Annexure I Number of villages under each Gram Panchayat 1027
Annexure II Fertility and Mortality, 1991 Census 1027
Annexure III Various measures of fertility and mean age at marriage, 1991 Census 1028
Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991 Census 1029
Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 1030
Annexure VI Marital status of population as per 1991 Census 1031
Annexure VII Age, Sex and Education in the district, 1991 Census 1035
Annexure VIII Distribution of different mother tongues returned in 1991 Census 1037

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignment before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar

District Highlights - 2001 Census

1. District Shahjahanpur ranks 33rd in terms of population in the state.

2. The percentage share of urban population in the district is 20.6 as against 20.8 of the population in urban areas of the state.

3. Shahjahanpur district has population density of 557 persons per sq.km.which is less than the state average 690 persons per sq. km

4. Shahjahanpur district ranks 67th in terms of sex ratio (842) which is lower than the state average (898) females per one thousand males.

5. Shahjahanpur district ranks 55th in literacy 49.1 which is below than the state average 56.3 per cent.

6. There are only 268 uninhabited villages out of total 2,425 villages in the district.

7. Decadal growth rate of the district 28.2 is higher to the state average of 25.8.

8. Powayan tahsil has the highest number of inhabited villages 746 while Jalalabad tahsil has the lowest number.

9. The district has 11 towns. No new town has been added after 1991 census, nor has been declassified.

10. There are 400,657 households in the district accounting for 1.6 percent of the total households in the state. The average size of households in the district is 6.4 persons.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

The district is named after its headquarters town Shahjahanpur, which was ounded during the reign of Shahjahan by Diler Khan, who defeated the Rajputs at hinaur. In recognition of his Success the emperor bestowed 14 villages on Diler Khan and ordered him to build a fort at Noner Khera, a place near the junction of the Gavra and the khanant where an old strong hold existed in former days. The town which grew up around the fort was called Shahjahanpur after the name of the emperor Shahjahan.

The earliest known Aryan people associated with this region, were the Panchalas who lived in the land lying between the Himalayas in the north and the Chambal in the south. The Panchalas were close allies of Kurus. The traditional history of the region according to Puranas begins with Pururavas Aila, the first monarch who held sway over this region. His great grandson, Yayati is said to have ruled the whole of Madhyadesh as including this district. In the post Mahabharata period the common name Panchala was used for the entire region of which Kampilya (modern kampil in the Farrukhabad district situated at some distance from the southern border of the Shahjahanpur district) was the capital.

During the time of Mahavira and Buddha in the sixth century B.C., Panchala figured in the list of sixteen century premier states. It then comprised the region covered by the present district

of Budaun, Bareilly, Farrukhabad, Shahjahanpur and the adjoining areas. About the middle of the 4th century B.C. this region was annexed to the Nanda empire of Magadha and then after a quarter of the century, the district became part of the powerful Maurya empire and remained so for the next century and a half. With the downfall of Mauryas after the death of Asoka in 236 B.C., the Sunga power rose into prominence and Pushyamitras Sunga became the lord of the entire region including this district. Sunga power lasted for about one hundred year from 187 B.C. to 75 B.C.

During the fourth century A.D., the Gupta established imperial unity in India and the present district of Shahjahanpur also served the fruits of the golden age as a part of the empire. For the next two centuries or so, the district formed part of the Ahichhatra Bhukti (a province) of the Gupta empire which was governed by a Kumaramatya(governor). After Gupta's the region was ruled by Harsha (60-647A.D.). Yasovarman (725-752A.D.), Nagabhatta-II (815A.D.), Bhoja I (836-885A.D.) and Mahendrapala I (885-910 A.D.). In the twelth century, this region remained for a long period in the undisputed possession of original tribes of Ahirs, Gujars, Pasis and Arakhs.

In 1379 Raja Kharag Singh of Katchriyas was attacked by Firoz Tughlaq, then ruling Delhi, to revenage the treacherous murder of Saiyad Mohammad. The raja fled to the hills, but sultan laid the whole tract waste converting all western Rohilkhand in to a vast hunting preserve so that nothing but game lived there. After the death of Muhammad Shah (1434) his son Alauddin Alam Shah ascended the throne. The region of Katehr was also included in his kingdom. After Bahlol Lodi's death, his eldest son Sikandar Lodi ascended the throne in 1448. When Akbar ascended the throne in 1556 A.D. Ali Quli Khan was made governor of Sambhal who failed the attempt of the Rajputs to revolt.

After the death of Aurangzeb in 1707. this region together with the entire north India fell into a state of utter anarchy. The Mughal empire began to disintegrate which gave rise to several independent principalities in north ndia, the territories of Farrukhabad, Avadh, Bundelkhand and Rohilkhand being more important. This district along with entire Rohilkhand, later on, came under influence of the Bangash and Rohilla Pathans, who played a major role in the history of the district.

Ali Mohammad Khan, the Rohilla leader occupied the bulk of parganas of present Shahjahanpur in 1741. He died on September 25, 1748. In November 1749, Qaim Khan Bangash of Farrukhabad, at the instigation of Safdar Jang (the nawab vazir of Avadh) invaded Rohilkhand but was defeated and slain by Rohillas. The result of the battle was that the entire present district of Shahjahanpur fell into the hands of the Rohillas. The rule of nawab vazir Sadat Ali Khan, came to close with the treaty of Lucknow executed on the 10th of November 1801. Thereby Rohilkhand including Shahjahanpur was ceded to the east India Company. No further event of importance occurred till the formation of Shahjahanpur district in 1813-14, and thereafter the district remained in peace till the convulsion caused by the freedom struggle in 1857.

Towards the close of the 19th century the activities of Arya Samaj were spread to the district headquarters and some other towns. The 20th century saw the expansion of nationalism in the country. During the partition of Bengal (1905) the district did not lay behind in holding meetings, organizing strikes and protests and creating awareness among the people of the ruthlessness and oppression of foreign rule. The movement for boycotting foreign goods also gained momentum. In 1920 the non-co-operation movement started by Mahatma Gandhi also spread here.During the Khilafat movement, the people of the district also shaved the rejoicing of the Turkish victories with the rest of the country. The Chauri-Chaura incident (Gorakhpur district in 1922) caused Mahatma Gandhi to call of the Non-co-operation movement in the entire of country. In 1930 civil disobedience movement was started in Shahjahanpur, as in other parts of the country, which continued till May, 1934.

In 1941 the movement for individual Satyagrah was launched against the War Fund and number of people from the district courted arrest.. On August 8, 1942, the Indian National Congress passed a resolution calling upon the British to relinquish power and 'Quit India'. Nearly all local leaders were arrested but their place continued to be filled by other volunteers. This resulted in large-scale destruction of government property, uprooting of railway lines and disruption of telephone lines. Schools, and colleges were closed for an indefinate period and anti government literature was put into circulation.

On August 15,1947, the country was liberated from the alien rule and became free. The day of independence is celebrated every year in

this district, as elsewhere in the country.

(iii) Administrative Setup:

Shahjahanpur is one of the districts of Bareilly division. From the administrative point of view the district is divided into four tahisls namely Shahjahanpur, Powayan, Tilhar and Jalalabad. The district is further divided into 14 community development Blocks,, 957 Gram Sabhas and 2,425 revenue villages. The district has 3 Nagar Palika Parishad, 1 Cantonment area and 7 Nagar Panchayats. There are in all 21 police stations out of which 10 are in rural areas and 11 in urban area.

Jurisdictional Changes (1991-2000):

There has not been any jurisdictional change in the district during the year 1991-2000.

District Administration:

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional magistrate is in-charge, who is now re-designated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD etc., each have department district level office. From the development point of view, the district is divided into community department block. Block Development Officer (BDO) looksafter department Community Department Block level Assistant Development Officers and Village Development Officers are deployed at Village level.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in smaller districts are in-charge. Additional Supdt. Of Police (ASP) and their respective area. Deputy Superintendent of Police (DSP) look –after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The Judicial administration of the District is headed is by District and Session Judge. In addition there are several Additional District Judge. Civil Judicial Magistrate and Munsif Magistrate.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

Location and Size:

The district Shahjahanpur is situated in the south-east corner of the Rohilkhand division between latitude $27^{O}37'$ and $28^{O}20'$ north and longitude $79^{O}37'$ and $80^{O}23'$ east.

It is bounded on the north by district Pilibhit, on the east by district Kheri, on the south by district Hardoi and Farrukhabad and on the west by district Budaun and Farrukhabad. The area of the district is 4,575 sq. kms.

Physiography:

On the basis of geology, soils, climate and topography the district is divided into the following four sub-micro regions:

Ganga Khadar:

The region covering Jalalabad tahsil (partly) is a narrow belt situated along the river Ganga which flows on the boundry line of the district. The area is subject to the frequent floods during rainy seasons. There are numerous small rivulets which originate from the mother stream and after flowing some distance they again join it. During rains, the entire area looks like sea. Bukharakhar is another stream which joins the Ganga beyond this region.

Ram Ganga Flood Plain:

The region covers major parts of Tilhar and Shahjahanpur tahsils. The eastern boundary of this region consider with the watershed zone of Ganga river which drains the Shahjahanpur plain. Ram Ganga, Bahgul, Andhoi, Aril are the main rivers flowing in the region. There are traces of the old abandoned course of streams. The Bahgal river forms meanders before meeting the Ram Ganga. There are patches of Bhur along the Ram Ganga. The general slope is towards south Geologically.

Shahjahanpur Plain:

It is situated in the central part of the district occupying a major part of the total area of the district, consisting the parts of Shahjahanpur, Powayan and Tilhar tahsils. The watershed zone of the Gomti in the east and Ram Ganga in the west keeps the identity of this region separately. The general slope of the area is towards south. Deoha is the main stream which flows in the central part of this tract. The other tributaries are Khanaut east Bahgul Garai, Katva etc. All these streams flow parallel to each other. Natural lavee along Deoha and eroded surface in the upper courses of Katva and east Bahgal rivers are main physical features.

Gomati Basin:

It is situated in the eastern part of the district covering major part of Powayan tahsil. The Gomti is the main river which flows through the centre of the region. Other tributaries of Gomti joining in the regin are Basna, Jokhai, Bhainsi, Kathna, and UI. There is a natural lavee along UI, river which is actually the old course of Chauka river. Jokhai river in its middle course spread over a wide area. The zone in between Jokhai and Gomti is a low lying tract which is flooded during rains. There are large traces of swamps and reeds here. Besides above streams, there are number of depressions of various size. The general slope is towards south-east direction. Geologically, the region belongs to Alluvium and Dun-gravels formation while the main soil sub-order association is Ochrepts.

Drainage:

All the rivers of the district discharge their water into Ganga. There are three subsidiary systems, the Gomti, the Garra and the Ram Ganga apart from the UI which is an affluent of the Ghaghara.

UI Rinu UI river is of great antiquity and represents an abandoned channel of the Sharda. UI has its origion in the low ground in the extreme south corner of district Pilibhit and for some distance form the boundary between Pargana Khatar and district Kheri. It traverse the district of Kheri from west to east eventually falling into the Chauka.

Gomti System:

The Gomti river has its source in the marshy tract near Mainakot in tahsil Puranpur district Pilibhit. It has a well defined bed when it enters the district on the northern border of tahsil Powayan, though the current is sluggish and the channel is almost dry for half of the year. In the lower reaches Gomati has considerable current and flows in a wide valley with high sandy plains on either bank. Gomti has several tributaries, namely, the Kathna, the Jhukna and the Bhainsi.

Garra System:

It rises in the hills of kumaon as Nandhaur and after entering the bhebar at Chorgallia in Nainital as Deoha, it enters the district in the extreme north of tahsil Tilhar and is called Garra. The Garra is a large river with a wide bed. The Garra river has also several tributaries, namely the Khanaut the Sukheta, the Katna, the Kaimva, the Garai and Bhaksi.

Ram Ganga System:

It is a big river, having its origin in the lofty heights of the Himalayas and after emerging from the hills, traverse Bijnor, Moradabad, Rampur, Bareilly, and Budaun district. For some 20 kms it forms the boundry between this district and the Budaun district and then makes its way through tahsil Jalalabad to join the Ganga in the district Farrukhabad. It has several tributaries, the chief ones being the sot and the Bahgul.

Climate:

The climate of the district is characterized by dampness in the monsoon period, a hot dry summer and a bracing cold. The cold season begins from mid November to February followed by summer from March to about middle of June. The period from mid June to about the end of September is the monsoon season. In the year 1997-98 the highest temperature recorded was 44°C and lowest 2.8°C. The average rainfall in the year 1997 was 1,047 mm and the actual rainfall was 908 mm

Air is very humid in the south-west monsoon. The summer is the driest part of the year, especially the afternoons when the relative humidity is less than 25 per cent.

Natural Economic Resources:

Forestry:

Forest cover 9,882 hectares of area in the district which is 2.16 per cent of the total area. Trees found in the forest are Sal, which is locally called Karou, Asna (Terminalia

tomentosa) and Mahua(Madhuca latifolia). The Dhak is the common tree found throughout the district. Large streches of open grass waste are found principally in tahsil Powayan which are of great use as supplying thatching grasses, like gander or panai, kans (Saccharum spontoneum), sarpet, sintha and munj. The other trees found troughout the district are Mango (Mangifera Indica), Babul (Acacia arabica), Sissoo (Dalbargia sissoo), Semal (Salmalia mala barica), Siris (Albizzia species), Tamarind (Tamavindus Indiaca), Jamun (syzygium camini), Bel (aegla marnelos), Neem (Azadirachta indica), Pipal (ficus religiosa), Bargad (ficus bengalenis), Pakar (Ficus indica) and Gular (ficus glomerata). In addition to these bamboos are to be seen almost every where and are of much economic value.

Minerals and Mining:

The mineral products of the district are few and unimportant. The most valuable is the nodular limestone conglomerate known as kankar, which is used mainly as road material and is also extensively employed for concrete and lime burning. It exists in large quantities throughout the district especially in Shahjahanpur and Tilhar tahsils and in Pargana Baragaon. Quarries are also found in the near vicinity of all the metalled roads and there are three recognized varieties, the bichna, the chatari and the dark type called talia used only for lime – burning. The clay suitable for making bricks is found almost everywhere in the district.

Soil:

The soils throughout the district correspond closely to the types prevailing over the whole of the Ganga plains (doab). The chief varieties of soils in the district are bhur or sand, matiyar or clay and domat or loam. The highest proportion of Bhur is in Kant and Khutar blocks followed by Tilhar and Powayan; matiar occurs in Jamaur, Jalalabad, Nigohi and Bhawal khera blocks while domat is found in the rest of the district. Locally the richly improved soil near the village sites is called gaubani, the soil growing rice and other crops, is called dhankar while khapat is very hardest and poorest clay usually found in natural drainage and flood times where water collects and remains locked for long periods during the rainy season.

Land and Land Use Pattern:

According to Statistical Magazine 1999-2000, the total area of the district was 457,294 hectares out of which 1.72 per cent was usar and uncultivable land, 2.16 per cent under forest, 8.40 per cent land use other than agriculture. The cultivation is done on 87.72 per cent of land. The total sown area is 87.12 per cent. Double cropping is done on 61.69 per cent of the total sown area.

Agriculture and Crop Pattern:

The main crops of the district are Kharif, Rabi and Zaid. The Kharif crops are sown in June-July and reaped in September-October after the cessation of the rains, usually well before the preparations of the fields for Rabi sowing which begins in October-November and are harvested in March-May. The main crops of Rabi are wheat, gram barley, pea, masoor. Rabi crops are sown in 48.74 per cent area of the total sown area. In Rabi crops, the area of wheat is 82.88 per cent. The main crops of Kharif are maize, bajra, rice, and juwar Sugar cane, oil seeds(like ground nut and mustard), vegetables and fruits are the notable non-food crops in the district Cotton and tobacco were the flourishing cash crops in the district in early year.

Irrigation:

Irrigation is the main requirement of agricultural development of a district. The main source of irrigation in the district are canals, tube wells, wells and rahats. The total length of canals in the district was 892 kms in the year 1998-99. There are 456 government tube wells, 6,153 private tube wells, 78385 boring pumps, 5,315 wells, and 5120 rahats in the district for irrigation purposes 84 per cent of the total area in the district is irrigated by means of minor irrigation.

Animal Husbandry:

Animal Husbandry is an integral part of rural economy providing drought power and manures to small and marginal farmers as well as milk products, meat, eggs etc to protien starved people of the district. As per the livestock census of 1993, a total of 1,095,352 animals were in the district of which 30.53 per cent were bovine, 34.38 per cent buffaloes, 19.93 per cent goats and sheep's, 0.44 per cent horses

and ponies, 3.19 per cent pigs and 1.49 per cent other animals. The density of animals is 239 animals per sq km. Number of poultry in the district is estimated to be 109,464 as per 1993 animal census.

Fishery:

Fish are found in the lakes and rivers of the district. Many varieties of fish are to be found generally identical with those which are common to the rivers and lakes of all the plain districts. The most common belong to the families of the cyrinidoe and silu-ridoe. In the year 1998-99 eighty five and in the year 1990-2000, 70 person were trained and 105 lakh of fingerlings were distributed.

Industry:

The development of economy is possible only through industrial development. The district being famous as sugar-cane producing area in the state, sugar refining is most important industry here. There are three sugar mills in the district namely Kisan Co-operative Sugar Mill Powyan. The Kisan Chini Mill Ltd tilhar and Rosa Sugar Works, Rosa. Crushing capacity of there sugar mills is 1,000 tons. The Keru and Company Rosa is one of the largest alcohol factory producing 1,500 gallons of alcohol per day. Oswal Chemical Factory is also working in private sector of the district. Other notable textile industry in the district is ordinance clothing factory. The cotton cloth made by the indigenous weavers in towns and villages was the ordinary coarse wind locally known as garha and gazi. In a few places cotton printing trade was also carried on. Woolen manufactures were confined only to coarse blankets and woolen bags used in the preparation of khandsari. The city was also noted for matting made of baib grass imported from the tarai of the Sharda river in the foot-hills of the Himalayas.

The pottery made in the district was of the ordinary description and the only point to notice was the occasional use of vitreous glaze and the mixture of the river sand with the clay so as the enable it to stand the heat of the kiln without cracking. The pottery was decorated by painting in various designs at Tilhar and to a small extent at Shahjahanpur and other places. The manufacture of crude glass was carried on to a very small extent but a fair amount of the ordinary glass bangles were produced. Other factories working in the district are as follows.

1. Janki Solvent Extension Pvt. Ltd, Niwaspur
2. Shahjahanpur Paper and Board Pvt Ltd., Jamaur
3. Janki Floor Mill, Jamuhi
4. Vidya Ply Board Pvt. Ltd., Sahjahanpur
5. Janki Cattle Field Industrial Unit, Rosa
6. Janki Extension and Refinery, Solvent
7. Janki Extension and Refinery, Purification of oil
8. Filotac Fittings Pvt. Ltd, Niwaspur-fuel pipes
9. J.S.P. Vanaspati Ltd., Karaunda
10. J.S.P. Oil and Fats Pvt. Ltd, Karaunda –Solvent
11. J.S.P. Oil and Fats Pvt. Ltd., Karaunda-Refined Oil

There are 124 factories registered under 1948 factory Act and the number of persons employed were 10,645 and the production value being 1,641.82 Lakh during the year 1990-91.

Trade and Commerce:

Prosperty of an area depends on the volume of trade of that place. There are many commercial banks in the district. The number of branches of nationalized banks are 82 while other banks are 34 in number. There are 36 rural branches, Co-operative Bank branches are 18 in number, ands village development banks are 8. There are 1,177 establishments in rural and 172 in urban areas under Punchyat distribution system. There are various private agencies which provide advances to different schemes There are marketing societies to check the malpractices in markets. Food grains, chemical fertilizer and other consumer goods are sold by these market to societies and cultivators. There are milk collecting centres selling milk through sale depots located in the urban areas of the district. Gur and Khandsari trade is also done hsere

The Railways mostly cater to the needs of the trade. Though a considerable valume of trade is done through roads.

The agricultural commoditics still form a sizeable bulk of export trade of the district and the chief imports comprise mainly manufactured articles and other consumer goods. There is a distillery at Roza .

The common requirements of the villagers and theresidents of the towns of the district are generally met by local bazars.

Transport:

The district is well connected by rail and road. The total length of pucca roads in the district is 1,327 km. Out of this 1,067 kms roads are under P.W.D. 215 kms under local self government and 45 kms under irrigation department. During the 1997-98. there were 28 railway stations (including halts) and 120 Bus stations (including stops) in the district. The means of conveyance in the district are U.P. State Road Transport Corporation buses, jeeps and taxis.

Electricity and Power:

Electricity has an important role in the development of economy of the district. The total consumption of electricity in the district during 1998-99 was 184,517 thousand Kwh, of which 56,670 thousand Kwh was consumed under domestic sector, 1,395 thousand Kwh under commercial sector, 24,566 thousand Kwh under Industrial sector, 6,175 thousand Kwh under Public light 76,960 thousand Kwh under Agricultural sector and 6,195 thousand Kwh under public water system. 1,284 villages have been electrified up to 1999.

Gram Panchayat, its Composition, Jurisdiction and role in village Development:

A Gram Panchyat acts as the executive of the Gram Sabha.

Composition:

The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat.

It is necessary that the village Panchayat should have member belonging to the scheduled caste and also a women member. If they are not elected, then the government itself appoints two such members. The village Panchayaat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Its Term:

The new panchayat Raj act of 1993 has fixed a uniform five-year for every Panchayat.It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualification:

In order to be elected to a village panchayat, a candidate should possess the following qualifications:

(1) He should be resident of the village concerned and his name should be in the voter's list of the village.

(2) He should be twenty-five year old.

(3) He should be mentally and physically sound.

(4) He should not be a proclaimed offender.

Functions

A Gram panchayat is entrusted, with various social, economic and judicial function.

1.It provides civic amenities to the people of the village.

2.It gets a primary school opened in the village and supervise its work.

3.It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.

4.It gets a Primary Health Center opened in the village. The Panchayat has also provide land and building for such a center.

5.It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.

6.It arranges for sufficient irrigational facilities, improved seeds, insectaries, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.

7.It manages and maintains the common property of the village.

8.It some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine unto Rs.100.

(v) Census Concepts

Building:

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses:

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses:

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room:

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut

if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house:

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of hut were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person,

e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows.

(a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

(b) A place satisfying the following three criteria simultaneously:

(i) A minimum population of 5,000;

(ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and

(iii) A density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of outgrowths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live

in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and east Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	2	Badi
3	Baiga	4	Balahar
5	Bajaniya	6	Baiswar
7	Balmiki	8	Bajgi
9	Bannanus	10	Balai
11	Barwar	12	Bangali
13	Bawariya	14	Bansphor
15	Beriya	16	Basor
17	Bhuiya	18	Beldar
19	Boria	20	Bhantu
21	Badhik	22	Bhuyiar
23	Baheliya	24	Chero
25	Chamar, Dhusia, Jhusia, Jatawa	26	Dharkar
27	Dabgar	28	Dom
29	Dhanuk	30	Dusadh
31	Dhobi	32	Domar
33	Dhangar	34	Gharami
35	Gond	36	Gual
37	Ghasiya	38	Habura
39	Hari	40	Hela
41	Kanjar	42	Korwa
43	Karwal	44	Kalabaz
45	Kharwar (excluding Banbasi)	46	Kapariya
47	Kol	48	Khairaha
49	Khorot	50	Khatik
51	Kori	52	Lalbegi
53	Majhwar	54	Mazhabi
55	Musahar	56	Nat
57	Parahiya	58	Pankha

59	Patari	60	Pasi, Tarmali
61	Rawat	62	Shilpkar
63	Sansiya	64	Saharya
65	Sanaurhiya	66	Turaiha

Scheduled Tribes

1	Bhotia	2	Buksa
3	Jaunsari	4	Raji
5	Tharu		

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the per centage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber

crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching

pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1,000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1,000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1,000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1,000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1,000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \sum_{15-19}^{45-49} ASFR \quad 1,000$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1,000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1,000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate

Number of infant deaths of less than 7 days during the year

$$= \frac{}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal mortality rate

Number of infant deaths of 7 days to less than 29 days during the year

$$= \frac{}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR)

Number of deaths of 29 days to less than One year during the year

$$= \frac{}{1,000} \times$$

Number of live births during the year

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during

the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in

any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution:

The total population of the district is 2,547,855 in which 2,022,329 live in rural and rest 525,526 in urban parts. There are four tahsils in district namely Powayan, Tilhar, Shahjahanpur and Jalalabad. The most populous tahsil is Shahjahanpur followed by Powayan. Jalalabad tahsil. Jalalabad is least populated tahsil. The urban population in the district is 20.6 per cent. The urban population is maximum at 42.3 per cent in Shahjahanpur tahsil. There are 2,425 inhabited villages in the districts at 2001 Census and remaining 268 are un-inhabited villages. The total rural population 2,022,329 of the district is spread over 14 CD blocks. The most populated CD Block is Bhawalkhera with a population of 192,353, but the maximum number of inhabited villages 203 are in Khutar CD Block. 11.7 per cent villages have a population less than 200. The population density in the rural of the district in case of 846 villages (39.2) per cent is above 501 and 573 villages are in population density range of 301-500 persons per square kilometer having 26.1 per cent of total rural population.

Size-class and status of towns:

In the total urban population of 52,552 as much as 29,662 persons live in Shahjahanpur NPP, next big town is Tilhar NPP, with a population of 52,911. The above two are class I and II towns having the civic status of NPP. Rest 7 towns are NP and one each is CB and NPP, out of which 5 are class III towns and 4 are IV towns.

Powayan tahsil consists of 2 towns, Tilhar tahsil has 3 towns, Jalalabad tahsil has 2 towns, while Shahjahanpur tahsil has 4 towns.

Population growth:

At the present territorial jurisdiction, the population of the district was 1,987,395 at 1991 Census and growing by 28.2 per cent during the decade 1991-2001 it is 2,547,855 at 2001 Census. The decadal growth 28.2 per cent in the district has been at higher level than in the state at 25 8 per cent.

Population Density:

The district has area of 4,525 sq. km. The population density in the district is 557. In the rural areas of the district the density is 449. In the state of Uttar Pradesh the density is 690.

Sex Ratio:

The sex ratio in the district at 842 is lower to 898 at the state level. Indeed, the sex ratio at the district has been all along lower in the district as against the state since 1901. Among tahsils, highest sex ratio is found in Powayan and lowest in Jalalabad. Among CD Blocks, the sex ratio is highest in Khutar at 874 and lowest in Kalan at 793. Out of 2,157 inhabited villages in the district, there are about 27.6 per cent villages (with 32.8 per cent of rural population), which are having a sex ratio in the range of 800-849. In the urban parts of the district the sex ratio is 864 and highest of 912 in Tilhar NPP and lowest of 770 in Shahjahanpur CB. The sex ratio of population on the age group 0-6 is 897 in the district, which is lower than the state average at 916. As against a sex ratio of 921 in the age group 0-6 of rural population of the district, it is highest at 953 in Khutar CD Block and lowest at 896 in Mirzapur C.D. Block. It may be noted that out of 2,157 inhabited villages in the district over 17.1 per cent of villages with 17.0 per cent of rural population, the sex ratio in the age group 0-6 is in the range of 1,000-1,999. As against the age group 0-6 sex ratio of 921 in the rural area of the district is only 795 in urban areas. Among towns the sex ratio is highest at 1,008 in Khutar NP and lowest at 695 in Shahjahanpur NPP.

Work Participation Rate:

In the total population of the district of Shahjahanpur is 2,547,855 as much as 28.6 per cent are workers and rest 71.4 per cent are non-worker. Among worker 24.2 per cent are main workers and rest of 4.5 per cent are marginal workers of total population. In absolute terms, females out number the males as main worker and marginal workers as well. The extant of main workers is highest at 25.9 per cent in Jalabad tahsil and lowest at 22.8 per cent in Powayan tahsil. In case of marginal workers the proportion is highest in Powayan tahsil which is 6.2 per cent in comparison to only 4.1 per cent in Tilhar and Shahjahanpur tahsils. The extent of workers in rural parts and non workers in urban parts is higher. In the district, among workers 49.6 per cent are cultivators, while 24.1 per cent are other workers. Over 27.5 per cent of female workers are engaged as cultivators.

Literacy:

In the district 49.1 per cent population is literate. The literacy rate is 58.1 per cent in urban areas, whereas 46.7 per cent in rural areas. The males literacy is highest 59.7 per cent as against 36.3 per cent females literacy rate, therefore the gap in male/ female literacy rate is 23.5 per cent. In rural areas among 14 CD Blocks, the highest literacy rate is 54.2 per cent in Powayan and lowest is 36.9 per cent in Kalan. The literacy among males in rural areas is 58.4 per cent in comparison to 32.2 per cent among females. The lowest female literacy 23.1 per cent is in Kalan CD Block. The gap in male/female literacy rate is highest in Tilhar CD Block, which is 29.3 per cent. In and about 25.0 per cent of villages covering 27.3 per cent of rural population, the literacy range is 41 to 50. In urban areas of the district, 64.6 per cent males are literates as against 50.6 per cent females. The highest urban literacy rate (80.2 per cent) is observed in Shahjahanpur CB and lowest 45.3 per cent in Kanth NP. The maximum male literacy 24.1 per cent is found in Allahganj. The literacy among Scheduled Castes is 41.7 per cent in rural areas and 50.9 per cent in urban areas. The literacy rate among Scheduled Tribes among rural areas is 19.4 per cent, while it 80.8 per cent in urban areas.

(viii) Brief analysis of PCA data based on inset table 1-36:

The district throw up vivid picture of its population by varying parameters at the 2001 Census. Among few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables.

TABLE 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

SL. No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	Powayan	494,008	464,900	29,108	637,801	600,175	37,626	29.1	29.1	29.3	5.9	5.9
2	Tilhar	477,582	405,520	72,062	598,320	507,190	91,130	25.3	25.1	26.5	15.1	15.2
3	Shahjahanpur	648,020	367,078	280,942	836,815	483,129	353,686	29.1	31.6	25.5	43.3	42.3
4	Jalalabad	367,785	337,266	30,519	474,919	431,835	43,084	29.1	28.0	41.2	8.3	9.1
	District Total:	**1,987,395**	**1,574,764**	**412,631**	**2,547,855**	**2,022,329**	**525,526**	**28.2**	**28.4**	**27.4**	**20.8**	**20.6**

The growth rates of each tahsil in the Shahjahanpur district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 28.2 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 28.4 and 27.4 per cent respectively. Out of the total population of the district 79.4 per cent lives in rural areas while 20.6 per cent lives in urban areas of the district. The proportion of urban population has slightly declined during the decade from 20.8 per cent in 1991 to 20.6 per cent in 2001 in the district. The highest growth of urban population is recorded in Shahjahanpur (42.3) per cent tehsil and lowest is registered in Powyan (5.9) tahsil. Urban population is concentrated in Shahjahanpur tahsil while other tehsils are entirely rural. Jalalabad tahsil has highest decadal growth rate of 412 per cent, while Shahjahanpur tahsil has shown the lowest growth rate of 25.9 per cent for the total population.

TABLE 2
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No	District / C D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages	Population 500-999

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 2157 inhabited villages, 252 (11.7per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 477 villages having 22.1 per cent villages of the district while in the size class of 500-999 population claims 717 villages with 33.2 per cent of the total villages in the district. 539 villages (25.0 per cent) are in the size class of 1,000-1,999 and 152 villages (7.0 per cent) are in the size class of 2,000-4,999. 15 (0.7 per cent) villages in the district fall in the ranges of 5,000 -9999 population. There are 5 (0.2 per cent) villages having population of 10,000 persons and above. The biggest villages only in the district having population of 14,631 persons is located in Banda CD Block of the district.

(a) New

(i) Statutory town – NIL

(ii) Census town -

NIL

(b) Denotified - NIL

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL

(iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified - NIL

(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district

TABLE 4

DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	228	10.6	218,697	10 8
11-20	15	0.7	580	0 0
21-50	46	2 1	3,449	0.2
51-100	78	3 6	12,862	0 6
101-200	144	6 7	53,186	2 6
201-300	227	10 5	129,667	6 4
301-500	573	26.6	527,095	26 1
501 +	846	39 2	1,076,793	53 2
Not known	0	0.0	0	0 0
District Total:	**2,157**	**100.0**	**2,022,329**	**100.0**

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 846 accounting for 39.2 per cent of the total inhabited villages of the district fall in the very high density range of 501+ persons having 53.2 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 228 villages (10.6 per cent) and 15 villages (0.7 per cent) Corresponding proportion in the range of 201 to 500 is 37.1 per cent of the total inhabited villages having 32.5 per cent population of the district. In the medium density ranges of 21 to 50 and 51-100 persons account for 2.1and 3.6 per cent of inhabited villages respectively. Both these ranges claim 0.8 per cent rural population.

TABLE 5

SEX RATIO OF STATE AND DISTRICT 1901-2001

	UTTAR PRADESH			SHAHJAHANPUR		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	862	846	973
1911	916	922	866	841	831	924
1921	908	918	834	852	845	904
1931	903	916	813	836	833	854
1941	907	922	824	822	827	794
1951	908	922	827	826	819	864
1961	907	921	817	826	819	870
1971	876	884	826	797	786	861
1981	882	889	850	813	801	862
1991	876	879	864	816	800	880
2001	898	904	876	842	836	864

As per 2001 Census sex-ratio of 842 females per thousand males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly low as compared to the state average figures, from 1901 to 2001 and remained below during this period, the lowest sex-ratio of 797 females per thousand male were recorded in the district during 1971 against the state average of 876 females. It is also observed that the proportion of female in rural areas is lower than the urban areas of the district and vise-versa in state.

TABLE 6

SEX RATIO BY TAHSILS, 2001

Serial Number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Powayan	864	863	880
2	Tilhar:	840	829	903
3	Shahjahanpur	844	840	850
4	Jalalabad	809	803	881
	District Total:	**842**	**836**	**864**

Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 Census. There are 842 females for every thousand males in Shahjahanpur district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 836 and 864 females respectively. The rural sex-ratio in the tahsils varies between 803 in Jalalabad tahsil and 863 females per 1,000 males in Powayan tahsil. The sex-ratio in Shahjahanpur and Powayan tahsils are higher than district rural average (836). In urban areas the highest sex-ratio is recorded in Tilhar (903) and the lowest is in Shahjahanpur (850) females per thousand males.

TABLE 7

SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Banda	867
2	Khutar	874
3	Powayan	856
4	Sindhauli	854
5	Katra (Khudaganj)	830
6	Jaitipur	800
7	Tilhar	846
8	Nigohi	842
9	Kanth	821
10	Dadrol	847
11	Bhawal Khera	850
12	Kalan	793
13	Mirzapur	810
14	Jalalabad	805
	District (Rural) Total:	**836**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 836 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 874 females is found in Khutar C.D. block and is followed by Banda (867) while the lowest of 793 is recorded in Kalan C.D. block. The sex-ratios of Banda, Khutar, Powayan, Sindhauli, Tilhar, Nigohi, Dadrol and Bhawal Khera C.D. blocks are higher than the district rural average of 836 females and in remaining blocks, this value is below the district average.

TABLE 8

SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	108	5.0	30,917	1.5
700-749	159	7.4	121,483	6.0
750-799	364	16.9	329,457	16.3
800-849	596	27.6	663,601	32.8

900-949	269	12.5	219,425	10.9
950-999	64	3.0	31,371	1.6
1000-1099	60	2.8	12,395	0.6
1100+	19	0.9	1,130	0.1
District	**2,157**	**100.0**	**2,022,329**	**100.0**
Sex ratio (Rural) for District:			**836**	

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 596 accounting for 27.6 per cent of the total villages having largest population of 32.8 per cent in the district fall in the sex-ratio range of 800-849 females per 1,000 males. It is followed by the sex-ratio range of 850-899 which claims 518 villages (24.0 per cent) and 30.3 per cent population. The highest range of 1,100 & above claims 19 villages (0.9 per cent). This range shares 0.1 per cent rural population of the district while in the sex-ratio range of 900-949, there are 269 villages (12.5 per cent). In remaining sex-ratio ranges of 950-999,1,000-1,099, 750-799, 700-749 and less than 700, the number of villages are 64 (3.0per cent), 60 (2.8 per cent), 364 (16.9 per cent), 159 (7.4 per cent) and 108 (5.0 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 1478 (68.5 per cent) having maximum population (79.4 per cent) fall in the higher sex-ratio ranges of 750-899 females.

TABLE 9

SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Allahganj	(NP)	870
2	Jalalabad	(NPP)	886

		Urban	**88,108**	**49,074**	**39,034**	**795**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tehsil of the district. Total population in age-group 0-6 is 502,037 persons comprising 264,539 males and 237,444 females. The total sex-ratio in this age-group works out 897 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 921 and 795 females in this age-

group respectively. The sex-ratio in tahsil varies between 843 in Shahjahanpur tahsil and 940 in Powayan tahsil. The rural sex-ratio of Powayan tahsil is higher than district rural average (921). Shahjahanpur tahsil has lowest sex-ratio of 843 among the total population. In urban areas, the highest se-ratio in this age group is recorded in Powayan urban (969) and the lowest is found in Shahjahanpur urban (729).

TABLE 11
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

	District (Rural) Total:	**413,929**	**215,519**	**198,410**	**921**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 921 for the district (rural). The sex-ratio of C.D. block varies between 896 to 953 . It is highest in Khutar C.D. block i.e. 953 followed by 951 in Sindhauli C.D. block and lowest 896 females is found in Mirzapur C.D. block. The sex-ratio of Banda, Khutar, Powayan, Sindhauli, Jaitipur, Nigohi and Dadrol C.D. block are higher than the district rural (921).

TABLE 12
SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population

District (Rural) Total	**2,157**	**100.0**	**413,929**	**100.0**
Sex ratio for District (Rural):		**921**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 368 (17.1 per cent) having largest population (17.0 per cent) in the district (rural) fall in the sex-ratio range of 1000-1099 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 1100+ which claims 356 villages (16.5 per cent) and 9.5 per cent population. Next to it 250 villages (11.6 per cent) are in the range of 900-949 with 17.1per cent population 246 villages (11.4 per cent) having 16.3 per cent population fall in sex-ratio range of 850-899.

In remaining sex-ratio ranges of 700-749, 750-799, 800-849, 950-999 and less than 700 claim less number of villages and these are distributed as 121 (5.6 per cent), 145 (6.7 per cent), 229 (10.6 per cent), 214 (9.9 per cent) and 228 (10.6 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 1,188 having population (57.1 per cent) fall in the higher sex-ratio ranges of 900-1,100 and above.

TABLE 13

SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS /TOWNS, 2001

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 2,547,855 total population of the district 17.7 per cent of the total population belong to the Scheduled Castes and Nil per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 20.0 per cent in rural population and 8.8 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Powayan tahsil (24.9), while the lowest is found in Jalalabad tehsil (13.5). Scheduled Tribes population in the district is 97 only in the district of which 38 is in rural area and 59 in urban area.

TABLE - 15

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level 348 villages accounting for 16.1 per cent of total 2,157 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 227 villages (10.5 per cent). In 317 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 486 villages constituting 22.5 per cent of the total villages. The range 21-30 and 31-40 per cent contains 304 and 177 villages respectively. Both these ranges together account for 22.3 per cent villages of the district. 298 villages fall in the range of 41-50 and above per cent out of which 81 villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 7.6 per cent Scheduled Castes population of the district. The maximum of the 24.0 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

TABLE - 17

PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage

Table 18 shows number and percentage of Scheduled Castes and Scheduled Tribes population recorded during 2001 Census in the district. The table depicts that Scheduled Castes population in Shahjahanpur CD Block, Rly. settlement Roza (NP) were 23.1 and 18.2 per cent respectively but very low (5.6 per cent) in the Tilhar NPP. Scheduled Tribes population is negligible in the urban areas of the district. There are Scheduled Tribes population only in two towns.

TABLE 19

SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 49.1 per cent in the district. This proportion in rural area is 46.7 per cent against 58.1 per cent in urban areas. In the district the literacy rates of males (59.7 per cent) is much higher than that of females (36.3 per cent). Among the tahsils Shahjahanpur tahsil tops with 52.7 per cent literates followed by Powayan tahsil (51.9 per cent) Jalalabad, tahsil with 43.3 per cent literates stands at the bottam in the district. Out of 4 tahsils, the literacy rate of Powayan and Shahjahanpur tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rate is higher than the rural areas.

The gap between male and female literacy is very high which comes to 23.4 percentage points in the district as a whole. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 14.0 percentage points against the rural areas, where the gap between male and female literacy is 26.2 percentage points.

TABLE 22

District (Rural) Total:		**750,294**	**517,718**	**232,576**	**1,272,035**	**583,708**	**688,327**	**46.6**	**58.4**	**32.2**	**26.2**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district 46.6 per cent of the total rural population excluding the age-group of 0-6 years literates in the district. The corresponding proportion of male and female literates comes to58.4 and 32.2 per cent respectively which shows very wide gap of 26.2 percentage points in male and female literacy. At C.D. block level, Powayan C.D. block has the highest rural literacy rate of 54.2 per cent while 65.5 per cent males and 40.7 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Kalan C.D. block (36.9 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 29.4 percentage points is found in Tilhar C.D. block.

TABLE 23

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	7	0.3	103	0 0

91-99	8	0 4	2,008	0 1
100 .	4	0 2	25	0 0
District Total:	**2157**	**100.0**	**2,022,329**	**100.0**

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 7 villages (0.3 per cent) of the district and population of these villages is only 103 persons. 4

villages (0.2 per cent) have all the literate population, 479 villages accounting for 22.2 per cent of the total villages are in the literacy range of 51-60 per cent 248 villages (11.5 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 1239 villages (57.4 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 184 villages (8.5 per cent). The range of 31-60 have the maximum number of 1431 villages forming 66.3 per cent of the total inhabited villages.

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Shahjahanpur town is way ahead of other towns. The table reveals that literacy rate is high in the urban areas of the district (58.1 per cent). The literacy rate is quite high (above 80.0 per cent) in Railway Settlement Roza (NP) and Shahjahanpur (CB) among males. Female literacy rate is not far behind in maximum towns. However, literacy rate among females is very low (28.7 per cent) in Kanth town, thus the gap in male female literacy rate is high (14.0 percentage points)

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by sex in CD blocks 2001. In rural areas of the district proportion of literates is 41.7 per cent in which males are 52.6 and female 28.3 per cent. Thus, the gap in male and female literacy rates is 24.3 percentage points. Among 14 CD blocks Bhawal Khera CD block has the highest ltieracy rate (46.5 per cent) and Kalan CD block has the lowest literacy rate (34.5 per cent). The gap in male/female literacy rate in Khutar (26.7 percent points) CD block is highest and lowest in Jaitipur (18.2 percent points) CD block.

TABLE 26

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers works out to 28.6 per cent of the total population in the district. The total workers are comprised of 24.2 per cent of main workers and 4.5 per cent of marginal workers and the remaining 71.4 per cent are non-workers.

Among the main workers, male participation rate in the district is 42.6 per cent and 2.2 per cent of female. Male and female marginal workers account for 6.2 per cent and 2.5 per cent respectively. The percentage of females marginal workers is lower than males. Total workers (Main and marginal workers) among tahsils varies from 27.9 per cent in Shahjahanpur tahsil to 29.2 per cent in Jalalabad tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 2,022,329 total rural population of the district, 24.6 per cent has been categorised as main workers and the marginal workers constitute 4.8 per cent and the remaining 70.6 per cent fall in the category of non-workers. The sex-wise break up at the district level

shows that 43.6 per cent males and 1.9 per cent females are in the category of main workers. Male and female marginal workers account for 6.4 and 2.8 per cent respectively. The percentage of female marginal workers is lower than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 29.4 per cent. At the C.D. block level, Jaitpur has highest proportion of total workers forming 31.0 per cent of the total population. It is closely followed by Dadrol (30.6 per cent), Banda (30.4 per cent), Jalalabad (30.2 per cent), Kanth (29.4 per cent) and Tilhar (29.2 per cent. The lowest percentage of 27.9 per cent is recorded in Nigohi C.D. block.

The table 33 indicates that as against 22.4 per cent of main workers in the urban areas of the district, such workers are as high as 27.9 per cent in Shahjahanpur (CB). Male participation rate in the district is 38.8 per cent whereas female's is 3.4 per cent. Total workers among towns varies from 22.7 per cent in Railway Settlement Roza (NP) to 29.3 per cent in Shahjahanpur (CB).

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 49.6 per cent of the total workers (main + marginal) and

remaining 22.6 per cent of total workers are engaged as agricultural labourers. Household industry workers (3.7 per cent) and other workers (24.1 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 35.2 per cent in Shahjahanpur tahsil and 61.0 per cent in Jalalabad tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of female cultivators is 27.8 per cent which is low as compared to 57.4 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the second position next to agriculture in the district as well as in each tahsil. The highest proportion of 42.7 per cent of other workers is recorded in Shahjahanpur tehsil while the lowest proportion of 13.5 per cent is found in Jalalabad tahsil.

to total worker are given in brackets

Table 35 presents CD block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) 29.4 per cent of total population. Among these workers, cultivators constitute 60.0 per cent 25.9 per cent agricultural labourers, 3.1 per cent household industry workers and 11.0 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 3.1 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (34.4 per cent) is low than males (62.0 per cent) in the rural areas of the district. The males play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 42.1 per cent in Bhawal Khera C.D. block to 78.2 per cent in Kalan C.D. block.Similarly for other workers, the lowest proportion is 6.2 per cent in Mirzapur C.D. block while 24.9 per cent is the highest in Bhawal Khera C.D. block. The percentage of agricultural labourers and household industry workers together is low i.e. only 29.0 per cent in the district. The percentage of agricultural labourers is highest in Khutar (34.7) block and is followed by Jalalabad (33.9). In other C.D. blocks, this proportion is quite insignificant. Similarly, household industry workers varies in C.D. blocks between 1.7 per cent in Nogohi and 5.1 in Bhawal Khera.

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district Shahjahanpur It can be observed from the table that the four categories of economic

activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (81.9), followed by agricultural labourers with 8.1 per cent (8.5 per cent male and 4.2 per cent female). If we observe each town, the table reveals that highest percentage of agricultural labourers (36.8 per cent) is recorded in Khudaganj (NP). The percentage of cultivators is very low (3.9 per cent). It is highest in Kanth (14.3) followed by Khutar NP (13.4) and Allahganj NP (10.4). Among household industry. The percentage of males (4.2 per cent) is lower than females (26.7 per cent) in the urban area of the district, other workers play a major role in urban economy.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset table 37 to 47 :

One of the major part of the District Census Handbook is Village and Town Directories.These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37

Note : - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 2,157 inhabited villages in the district 1,461 villages or 67.7 per cent have been provided with the education facilities of one type or the other. Similarly 537 villages in the district constituting 24.9 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 2,109 or 97.8 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph 262 villages constituting 12.1 per cent of villages have been provided with post office facility within the village 435 or 20.2 per cent villages have been provided with the telephone facility, 179 or 8.3 per cent with transport facility, 89 or 4.1 per cent villages with bank facility and 105 or 4.9 per cent with agricultural credit societies. Similarly there are 998 or 46.3 per cent villages which have been linked with the pucca road. Total 1,115 or 51.7 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation Mirzapur C.D. block has the highest 81.4 per cent villages where educational facility is available and lowest 52.7 per cent is found in Khutar Medical facility is highest in Kanth (68.5 per cent) and lowest (6.4 per cent) in Sindhauli C.D. block. Improved drinking water is available to cent-percent villages in Powayan, and Mirzapur blocks while in other blocks, it is above 95 per cent. Telephone facility is highest in Kanth (26.5 per cent) while 17 (17.0 per cent) village of Kalan C.D. block enjoy this facility. Transport and communications is less developed in Powayan and Jalalabad where only 2.2 per cent villages are covered by this facility whereas 18.8 per cent villages of Katra (Khudaganj) C.D.block are availing this facility. In the field of power supply 1,115 (51.7 per cent) villages have been covered in the district.

Note :- Percentages are given in brackets.

*Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 2,022,329 persons in the district, 1,753,015 or 86.7 per cent have educational facility of one or the other type. Similarly 760,475 or 37.6 per cent population has medical facilities, while 2,011,014 or 99.4 per cent have got improved drinking water facility. Post office facilities are available to 539,977 or 26.7 per cent population. Telephone facility is available to 640,006 or 31.6 per cent. Transport communications facility is available to 321,286 or 15.9 per cent. Bank facility is available to 220,171 or 10.9 per cent 227,623 or 11.3 per cent have been provided with the facility of agricultural credit societies 1,222,970 or 60.5 per cent have been provided with the facility of approach by pucca road. Power supply is available to 128,670 or 62.7 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block. However, in all the C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population

TABLE - 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
	2	3	4	5
1. Education :-

7. Agricultural Credit Societies	1,126	754	172	2,052

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table 729 villages do not have primary school in their villages and out of these villages, children of 638 villages have to travel less than 5 kms. for schooling. Out of 2157 inhabited villages as many as 1846 are deprived of middle school and 2148 of degree college. Of these 1092 avail the facility of middle school at a distance of less than 5 kms.692 at a distance 5-10 kms. and the remaining 62 at a distance of 10+ kms. In respect of degree college 191 avail this facility at a distance of less than 5 kms., 560 between 5 to 10 kms. and rest 1397 villages at a distance of 10+ kms.

Similarly there are 2,130 villages in the district which have been devoid of Hospital facility and 2126 villages which are deprived of PHC facilities. Of these 399 villages have the facility of Hospital available within 5 kms. while in respect of 812 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 919 villages have this facility at a distance of 10+ kms. As regards PHC 417 avail this facility at a distance of less than 5 kms., 1,049 at a distance of 5-10 kms. and the remaining 660 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1,895 villages do not have this facility in the village itself. Of these majority i.e. 1,343 have this facility at a distance of less than 5 kms., another 492 villages avail it at a distance of 5-10 kms. In the remaining 60 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 1,722 villages in the district which are without telephone facilitiy. Of these 854 avail this facility at a distance of less than 5 kms., 540 at a distance of 5-10 kms. and remaining 328 have to traverse a distance of 10+ kms.

For Bus service out of 2048 villages which do not have facility, 649 villages avail this facility at a distance of less than 5 kms., 974 at a distance between 5-10 kms. and 425 at a distance of 10+ kms.

In the entire district 2,070 villages are deprived of Commercial Bank and 2142 of Co-operative Bank. Of these 2070 villages which are deprived of Commercial Banks 941 villages avail this facility at a distance of less than 5 kms., 854 between 5-10 kms. and the remaining 275 at a distance of 10+ kms. Regarding Co-operative Banks out of 2142 villages 343 villages avail this facility at a distance of less than 5 kms., 1052 at a distance of 5-10 kms. and remaining 747 at a distance of 10+ kms. 2052 villages do not have agricultural credit societies. This facility to 1,126 villages is available at a distance of less than 5 kms., 754 at a distance of 5-10 kms. and the remaining 172 at a distance of 10+ kms.

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 2,157 inhabited villages in the district, there are 268 villages which have nearest towns upto a distance of 5 kms. Of these only 170 villages forming 63.4 per cent of these total villages, are having the educational facilities of one type or the other and 63 villages constituting 23.5 per cent, have the medical facilities within the village, 21 villages forming 7.8 per cent have the facility of post office within the village and 70 or 26.1 per cent have the facility of telephone. 22 villages constituting 8.2 per cent have been linked by transport service 10 villages comprising 3.7 per cent have been provided bank facilities, while 12 villages constituting only 4.5 per cent have been provided by agricultural credit societies 166 villages comprising 61.9 per cent have been provided with pucca road.

There are 1,328 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 914 villages constituting 68.8 per cent have been provided with the educational facilities. 313 villages comprising 23.6 per cent have been provided with medical facilities178 villages constituting 13.4 per cent enjoy the post office facility 279 villages comprising 21.0 per cent have been provided the telephone facility. 127 villages constituting 9.6 per cent have been linked with transport communications. 65 villages comprising 4.9 per cent have bank facility. 68 villages constituting 5.1 per cent are having agricultural credit societies, while 609 villages or 45.9 per cent are approachable by pucca road. 452 villages fall in the distance range of 16-50 kms. Of these, 65.7 per cent villages have educational facility, 23.5 per cent with medical, 11.5 per cent with post office, 15.7 per cent with telephone and transport and communications available to 3.5 per cent villages. Banks and agricultural credit societies facilities are available to 2.2 and 4.9 per cent of villages.

There is only one villages in the district which is situated beyond 50 Kms. from the nearest town and has education and approach by pucca road facilities.

There are 108 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category 79 or 73.1 cent per cent villages have the educational facility of one or other type. 55 villages constituting 50.9 per cent have the medical, 10.2 per cent with post office, telephone 13.9 per cent with and transport and communication available to 13.0 per cent villages. There are 4 (3.7 per cent), 3 (2.8 per cent) and 51 (47.2 per cent) villages in unspecified range which have bank, agricultural societies and pucca road facilities respectively.

TABLE 41

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. Out of a total 2157 inhabited villages in the district, there are 729 villages having a population of less than 500 persons. Of these 241, villages (33.1 per cent) have education facility, 88 (12.1per cent) have medical facility, 685 (96.0 per cent) have improved drinking water facility, 67 (9.2 per cent) have telephone facility, 27 (3.7 per cent) have been linked by bus service. 9 (1.2 per cent) have Bank facility. 225 villages (30.9 per cent) have been linked with pucca road 311 villages (42.7 per cent) have been provided with electricity. Not a single village has been provided with post office and agricultural credit societies facilities in the population range of 1-499.

Out of 717 villages, which fall in the population range of 500-999 persons, 541 villages (75.5per cent) have been provided with the education facility, 171 (23.8 per cent) with medical facility, all the villages have improved drinking water facility. 52 villages (4.3per cent) have been provided with post office facilities, 113 villages (15.8 per cent) with telephone facility, 42 villages (5.9 per cent) with transport facilities, 9 villages (1.3 per cent) with bank facility, 22 villages (3.1per cent) with agricultural credit societies and 326 villages (45.5 per cent) have approach by pucca road. and 341 villages (47.6 per cent) have power supply facility.

539 villages fall in population range of 1,000-1,999 persons. Out of these 509 villages (94.4 per cent have education facilities. Whereas 179 villages (33.2 per cent) enjoy the medical facility, 121 villages (22.4 per cent) have post office facility, 173 villages (32.1 per cent) have telephone facility, 62villages (11.5 per cent) have transport communications facilities, 38 villages (7.1 per cent) have bank facilities, 46 villages (8.5 per cent) have agricultural credit societies and 323 villlages (59.9 per cent) have power supply facility. All of these villages have improved drinking water facility except two villages.

There are 152 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages except 2 villages enjoy the facility of education and improved drinking water. 84 villages (55.3 per cent) have medical facility 75 villages (49.3 per cent) have post office facility, 22 villages (14.5 per cent) have bank facility, 30 villages (19.7 per cent) are having agricultural credit societies.

Out of 39 villages (25.7 per cent) have transport, communication facilities, 115 villages (75.7 per cent) have been linked with pucca road and 120 villages (78.9 per cent) have electricity. Out of 15 villages in the range of 5000-999 persons, all the villages have educational, improved drinking water, approach by pucca road and power supply facilities. There are only 5 villages in the population range of 10,000 and above persons. All the 5 villages have the educationa, medical, improved drinking water, transport, communiction, approach by pucca road and electricity facilities.

TABLE 42
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of CD block	Number of inhabited villages	Total area in hectares	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Banda	192	47,551.0	81.5	89.9
2	Khutar	203	31,938.0	72.1	92.8
3	Powayan	179	28,716.1	N.A.	85.3
4	Sindhauli	172	28,932.5	47.3	95.4
5	Katra (Khudaganj)	128	25,371.3	84.8	72.6
6	Jaitipur	151	193,695.7	7.0	77.4
7	Tilhar	159	22,771.1	N.A.	[illegible]
8	Nigohi	130	25,217.0	93.0	83.0
9	Kanth	162	11,200.0	N.A.	86.3
10	Dadrol	148	31,317.4	75.9	86.9
11	Bhawal Khera	162	21,728.7	97.9	84.1
12	Kalan	100	18,407.0	N.A.	75.0
13	Mirzapur	86	20,739.2	29.0	84.5
14	Jalalabad	185	38,814.4	67.0	80.0
	District Total:	**2,157**	**546,398.6**	**55.4**	**84.0**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 2157 inhabited villages in the district having a total area of 546398.6 hectares. Of this, 55.4 per cent is cultivable and 84.0 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

The land use pattern at CD block level shows that the percentage of cultivable area is highest (97.9 per cent) in Bhawal Khera CD block and is lowest (7.0 per cent) in Jaitpur CD block. Similarly, the percentage of irrigated area to total cultivable area is highest in Sindhauli CD block and is lowest (72.6 per cent) in Katra (Khudaganj) CD block.

	District	**2.7**	**1.2**	**0.6**	**0.9**	**0.1**

Table 44 shows in urban areas of Shahjahanpur district the average number of primary school per 10,000 population comes 2.7 schools, 1.2 junior secondary/middle, 0.6 secondary/matriculation, 0.9 senior secondary schools and the ratio of colleges is only 0.1 college per 10,000 population. Among the towns, the ratio of primary schools and middle is highest in Railway Settlement Roza (NP) (7.6 per cent) and Khutar (NP) 4.2 per cent respectively. Shahjahanpur (CB) has highest ratio (2.0 per cent) of secondary/matriculation schools while in case of senior secondary school this position is claimed by Shahjahanpur (CB) (4.4). College education is available only in Shahjahanpur NPP, Jalalabad NPP, Powayan NP and Tilhar NPP.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Allahganj, NP	3
2	Jalalabad, NPP	10
3	Kanth, NP	2

		N.A.		

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Khutar, NP	Gur, Sugar	Diesel, Salt, Pulses
2	Powayan, NP	--, --, --	Rice, Wheat, --
3	Khudaganj, NP	Sugar, Edible Oil, Bricks	Wheat, Rice, Gur
4	Katra, NP	Zari Work, Rice, Agricultural Machine	Food grains, Gur, Vegetable
5	Tilhar, NPP	Wooden Goods, Carpet, Embroidory Work	Vegetables, Gur, Sugar
6	Kanth, NP	Wooden Goods, Readymade Garments, Box	Carpet, Rice, Sugarcane
7	Railway Settlement Roza, NP	Wine, Carpet, Rice	Wheat, Rice, Gur
8	Shahjahanpur, NPP	Sugar, Wine, Rice	Carpet, Readymade garment, Wine
9	Shahjahanpur, CB	--, --, --	Wine, Carpet, Cloth
10	Jalalabad, NPP	Bidi, Furniture, Grill	Bidi, Gur, Furniture
11	Allahganj, NP	Wooden Furniture, Earthen Pots, Bread	Rice, Wheat, Fodder

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for sugar, furniture, rice and wooden goods which are town's main exports The chief export items of the district are sugar. wheat, rice, carpets etc. which are manufactured in the towns and these are mainly exported to other places

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48 to 52:

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48

HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure Status	Number of dwelling households	Number of households								
		Total			Scheduled Caste			Scheduled Tribe		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

	Two rooms	4,792	1,106	3,686	796	191	605	118	59	59
	Three rooms	1,022	489	533	88	48	40	17	12	5
	3+ rooms	453	143	310	32	15	17	0	0	0
	Median number of rooms	2	2	2	2	2	2	2	2	2
Others	No exclusive room	190	131	59	52	42	10	9	7	2
	One room	1,699	836	863	414	247	167	22	15	7
	Two rooms	695	397	298	121	61	60	9	8	1
	Three rooms	362	153	209	53	22	31	12	9	3
	3+ rooms	134	81	53	22	16	6	2	1	1
	Median number of rooms	1	1	1	1	1	1	1	1	1

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 394,165 consisting of 324,572 rural and 69,593 urban households 81,357 households belong to Scheduled Castes and 3,886 to Scheduled Tribes 379,020 households are living in their owned houses constituting 96.1 per cent of total households. Of these households, the largest number of households (147,807) have occupied single roomed accommodation and is followed by single roomed accommodation numbering to 127,997 households. Next position is claimed by households (49,241) occupying three roomed accommodation. Number of households in owned accommodation occupying three plus roomed rank at fourth place with 40,191 households while 13,786 households are without any exclusive room.

12,063 households living in rented accommodation account for 3.1 per cent of total number of households in the district. The largest number of 5,543 households are living in single roomed accommodation followed by 4,792 households in double roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 3,080 forming only 0.8 per cent of total households are distributed in single roomed accommodation numbering 1,699 double roomed 695 and 362 in three roomed accommoda-tion. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary
1	2	3	4	5	6	7	8	9	10	11
1	Powayan	39.5	17.2	43.3	38.4	17.4	44.2	61.5	13.9	24.6
2	Tilhar	34.4	20.9	44.7	31.3	19 7	49 0	53.1	28.1	18.8
3	Shahjahanpur	52.3	12.5	35.2	35 6	12.9	51 4	82.0	11.8	• 6.3
4	Jalalabad	31.7	13.3	55.0	27.5	13.5	59.0	77.7	11.8	10.5
	District Total:	**40.9**	**15.8**	**43.3**	**33.6**	**16.0**	**50.4**	**74.7**	**15.0**	**10.3**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent - 1 Permanent houses refer to those houses whose wall & roofs are made of pucca materials i e where, burnt bricks G.I. Semi permanent.- 2 Semi-permanent houses refer to those houses made of other types of materials

Temporary.- 3 Temporary houses refer to those houses having wall and roofs made of Kutcha materials i e where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt

The percentage distribution of households as shown in the above table reveals that 40.9 per cent of the households in the district had permanent houses. The trend is different in rural (33.6.per cent) and urban area 74.7 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Shahjahanpur (52.3 per cent) followed by Powayan (39.5 per cent), Tilhar (34.4 per cent) and lowest in Jalalabad (31.7 per cent). In respect of semi-permanent houses, the returns were 15.8 per cent of district level where as among tahsils, in Tilhar it was 20.9 per cent and lowest was 12.5 per cent in tahsil Shahjahanpur. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 11.8 to 28.1 per cent. Temporary houses in the district lie between the range of 35.2 to 55.0 per cent.

Data source Census of India 2001. H series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated

Note: Percentage is given in brackets belowthe number of households.

Bathroom means bathroom within the house. Toilet means toilet within the house. Drainage menas closed and open drainage.

The above table shows that out of total households of the district 88.1 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 86.8 and 94.2 per cent. Tahsil Jalalabad had higher order of proportion of households where percentage for rural area was 90.1 and 97.6 per cent in urban areas. Electricity was available for 20.8 per cent of households at district level households of the district. Bathrooms and toilet facilities were available in 24.4 and 39.3per cent of households respectively. Tahsil Powayan is poorly served in respect of these amenities. At district level drainage facility was available for 78.6 per cent of households, whereas the proportion of rural and urban areas households accounted to 74.7 and 96.8 per cent. The similar observation had emerged in all other tahsils.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 31.3 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is 29.1 and in urban area it comes to 41.6 per cent of households. Cow dung cake has been reported as one of the fuel for cooking of food in 48.9 per cent of the households. The composition of rural and urban comes to 57.4 and 9.1 per cent respectively. Crop residue is used for cooking in as many as 9.5 per cent of the households (10.7per cent rural and 4.1 per cent urban households). LPG (Cooking gas) has been reported as fuel for cooking in 7.0 per cent of the households. The proportion of rural and urban comes to 1.6 and 32.0 per cent respectively. The other methods like kerosene, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.1 per cent to 2.4. per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, crop residue, LPG (cooking gas) and cow dung cakes are the predominant fuel for cooking in the district.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

This table presents data for total, rural and urban services and possession of assets such as radio/ transistor, telephone, bicycles, scooter and car etc. by the households. There are 394,165 households in the district and among them 167,350 households have been availing banking services. 159,069 households have radio/transistor, Television is possessed by 83,587 households. Telephone is available in 14,386 households, bicycle is available in 265,861 households. Scooter, motorcycle, moped and car, jeet, van are used by 27,962 and 5,830 households respectively. The picture in use of baning services and possession of assets by households at tahsil leel in almost similar as analysed above for the district as a whole.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

There has been no such development reported under this head during the decade.

(xii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district Tourist Interest in the tows of the district:

Steps have taken to boost the tourism in the district. The mosque of Bahadur Khan is the oldest building bearing a Persian inscription dated 1057 (1647 A.D.). There are several other tombs in and around the town, notable that of Ahmad Ali Khan on the Rosa road. One of the best known mosque is in the south-west near Rajghat, and gives its name to the locality of Masjid Ganj, while another is the Sunabari mosque near the tahsil.

The old temples in the town are those dedicated to Chanksi Nath and Phoolmati Devi located in the locality of Khalil. A temple dedicated to Vishwanath is in Sadar Sikh Gurdwara is located in Khirni Bagh Bisrat ghat at Shahjahanpur and Parushram pond at Jalalabad are also famous..

(xiii) Major Characteristics and Contribution of the District:

In the eighteenth century Chandan Rai of Nahil composed several poems, the most celebrated being the Kesri Prakash. His grandson Makrand Rai wrote a much admired work the "Harya Ras". Man Bhawan of Mundia was author of several Hindi works including the Shringar Ratnavali.

Nawab Mohabbat Khan of shahjahanpur, the son of Nawab Faiz Ali Khan, wrote history of Indian named the Akhbar-i-Mohabbat a comprehensive work of merit. Another Persian history styled the Shahjahanpur Nama or the Anhar-ul-bahr was written by an unknown Pathan of Shahjahanpur in 1839. The authors name does not

appear but he states that his brother was Mohammad Khan a poet who wrote under Pseudonym "Ahmad".

(xiv) Scope of Village Directory & Town Directory Village Directory

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART - A
VILLAGE AND TOWN DIRECTORY
(SECTION I AND II)

SECTION I
VILLAGE DIRECTORY

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , their amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares is given. Wherever the area figure was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW

(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities

manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.
