CHAKRA TIRTH

Located at Naimisharanya in the district Sitapur, a sacred and important historical pilgrimage and tourist center, CHAKRA TIRTH is a circular pond, which is fed by an underground continuous stream. It is believed that divine disk provided by *BRAHMA*, the creator of the universe, to the prominent sages was stormed in the universe by the angry Lord Shiva to destroy the universe in order to take revenge for His beloved wife, Mata Sati (Goddess Parvati). The '*Chakra*' had torned the six heavens and was just near to destroy the seventh one i.e., '*Patal Lok*'. In the mean time all the Gods, *Rishi*, *Munigana* and other prominent sages finding no way to save the universe from Lord Shiva's anger, rushed together to the *Shakti Mata Lalita Devi*, who by that time was in meditation at '*Naimisharanya*' (Neemsaar) and bowing their heads before her, they prayed with folded hands and requested her to save the universe for the sake of mankind and to cool down the Lord. The *Shakti Mata Lalita Devi* pleased upon them and stopped the '*chakra*' on her little-finger though it had poked into half of the earth. Since then where the '*chakra*' had fallen on the earth, a circular pond was created by itself. The place is known as '*Chakra Teerth*'. It is also believed that, there is the underground origin of the holy river *Gomti*. ***CHAKRA TIRTH*** has been mentioned in great Sanskrit epics like ***MAHABHARATA*** and ***SKAND PURANA***. It is also believed that nobody has drowned in this pond. There are so many other temples around the pond among which, that of Lord Shiva is of great importance. Near the place, lies goddess *Mata Lalita Devi's* temple and at a distance is *Vyas Gaddi* where *Maharishi Vyas* divided *Vedas* into four parts and composed *Puranas*. There is the only *Hanuman Garhi* in the country, where Hanumans face is towards south.

Annexure VI Marital status of population as per 1991 Census 1041
Annexure VII Age, Sex and Education in the district, 1991 Census 1044
Annexure VIII Distribution of different mother tongues returned in 1991 Census 1046

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage

enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar

District Highlights - 2001 Census

1. District Sitapur ranks 9th in terms of population in the state.

2. The percentage share of urban population in the district is 12.0 as against 20.8 of the population in urban areas of the state.

3. Sitapur district has population density of 630 persons per sq.km.which is less than the state average 690 persons per sq. km

4. Sitapur district ranks 48th in terms of sex ratio (864), which is lower than the state average (898) females per one thousand males.

5. Sitapur district ranks 57th in literacy 48.3 which is lower than the state average 56.3 percent.

6. There are only 27 uninhabited villages out of total 2,348 villages in the district.

7. Decadal growth rate of the district 26.7 is higher to the state average of 25.8

8. Misrikh tahsil has the highest number of inhabited villages 585, while Sidhauli tahsil has the lowest number (315).

9. The district has 11 towns. Out of them no new town has been added after 1991 Census, and no town has been declassified.

10 There are 596,177 households in the district accounting for 2.3 per cent of the total households in the state. The average size of households in the district is 6.1 persons.

IMPORTANT STATISTICS

			State	District
			Uttar Pradesh	Sitapur

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District:

Sitapur district is famous for its mythological and historical background. There is no official description for its name but as per the traditional sayings, Sitapur is referred to as Lord Ram's wife Sita. It is said that she stayed with Lord Ram at this place during a pilgrimage. Afterwards, king Vikramaditya established this city in the memory of Sita and gave the place its name as Sitapur.

According to Abul Fazal's Aine-Akbari, this place was called Chhataypur or Chhitapur during the reign of Akbar the Great.

According to ancient history, this place was part of the kingdom of Shingunags of Magadh after the Kaushal king Bidudabh. After the fall of Nandas and Mauryas, this area was under the control of Shunga dynasty. Some clay statues of Shunga style were found in Sidhauli tahsil. Similarly, some small statues of Gupta period were also found in Badesar of Misrikh tahsil.

The holy place of Naimisharanya, situated on the left bank of Gomti River, is a centre of pilgrimage where saint Ved Vyas created Puranas. There are still remains of a large University of post Vedic period where 88,000 Rishis (Hermits) gained knowledge of Shastras. Saint Shaunak was the Chancellor of this university. Pandavas also came to Naimisharanya during their exile. Lord Ram and his wife bathed at this sacred place to wash off the stigma of death of

Ravana- the king of Demons. It is said that Sita proved her purity and assimilated in the pious soil of Naimisharanya.

Sitapur district was always politically awakened. In the fight for freedom in 1857, this district played an important role. During 1857, Arya Samaj and Seva Samiti had established and strengthened their organization in the district. In 1921, thousands of people of Sitapur took part in Gandhiji Non-Cooperation Movement. Gandhiji came to Sitapur in 1925 and appealed to cooperate in the Freedom Movement at Lalbagh. Many National leaders-Maulana Mohammed Ali, Pundit Motilal Nehru, Pt. Jawaharlal Nehru were also present.

(iii) Administrative Set-up:

Sitapur district is part of Lucknow Division. Its neighbouring districts are Lucknow and Barabanki in the south, Bahraich in the east, Kheri in the north and Hardoi in the west. For administrative convenience the district of Sitapur has been divided into 6 tahsils . Considering geographical position, climate and natural resources, the district can be divided into uparihar and ganjar (low lands) areas. For effective implementation of rural development programmes, 2,321 inhabited villages of the district have been distributed among 19 Community Development Blocks.

Follwing jurisdictional changes have taken place during the last decade.

Jurisdictional changes (1991-2000)

Sl. No.	Name of Tahsil	Notification Number and Date	Added	Subtracted
1	Sidhauli	4430/1-5/94-84/187-R-5 dated 4-1-95	67 villages transferred from Misrikh	-
2	Misrikh	4430/1-5/94-84/187-R-5 dated 4-1-95	-	67 villages transferred to Sidhauli Tahsil

District Administration:

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary and Local self- government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now re-designated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in- charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. District land officer District of Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD etc. each have their departmental district level officer. On development front, the district is divided into 19 community department blocks. Assistant Development Officer and Village Development Officers are the functionaries at lower level,

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in smaller districts are in-charge. Additional Supdt. of Police (ASP) and their respective area. Deputy Superintendents of Police (DSP) look after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their Police stations depending upon the population and area.

The Judicial administration of the District is headed is by District and Session Judge. In addition to this there are several additional District Judges. Civil Judicial Magistrate and Munsif Magistrate.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman , Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayat and Pramukh of Kshetra Samiti ect., come under Local self-government.

(iv) Physical Features:

(1) Location and Size:

The district Sitapur is bounded on the west and southwest by river Gomti, which flows in an irregular course from north west to south east, separating this district from Hardoi. To the east lies Bahraich, the boundary being the great river Ghagra; to the north is Kheri, the frontier being merely conventional, save in the north-east where it is formed by the Dahawar; and to the south are the district of Lucknow and Bara Banki between the Gomti and Ghagra. It has an area of 5,743 square kms. It has 6 tahsils and 19 Community Development Blocks.

(2) Physiography:

District Sitapur is a part of middle Ganga plain. The district is a level plain formed of recent age

Alluvium and Dun-gravels, having an elevation of 100-150 metres from the sea level. A low sandy ridge is running from north to south parallel to Chauka-Ghagra axis. The western part of this sandy ridge depicts plain and constitutes major part of the district, while the eastern part has Khadar characteristics. The west part is dissected by a number of small streams having slight indulations between rivers and streams. This is extensively cultivated and is doted by shallow ponds and jhils most of which dry up during the summers. The western part in comparatively low plain and is broken by Chauka and Ghagra streams. The tract is damp and most having high water table and is best suited for cultivation of rice.

On the basis of geology, soils, topography, climate and natural vegetation the district is sub divided into the three sub-micro regions: such as Ghaghra-Chauka Khadar, Sitapur plain and Gomti Basin. Brief description of these sub-micro regions are given below:

Ghaghra –Chauka Khadar:

The Khaddar tract formed of Alluvium and Dun-gravels of recent age runs parallel to Ghaghra river from north to south direction covering the major portion of Biswan, Laharpur, and Mahmudabad tahsils. The western limit of the region is marked by natural levee. The fact reveals that entire region is a left course of Chauka river which was pirated by Dahawar river in its upper part hence Chauka river becomes insignificant. The slope of the region is from north to south. Ghagra flows on the eastern boundary of the region where as Dahawar forms northern limit. A very narrow belt of eroded surface is observed along Ghaghra, Kakrehia and some streams in northern part. Ox-bow lakes, river meanders, natural ponds sand bars, dead arms of the river are the main physiographical characteristics. The area of the region is 1,766.6 sq. kms.

Sitapur Plain:

The plain is situated in the central part of the district covering parts of all six tahsils of the district with a little variation in relative relief. It is also formed of Alluvium and Dun-gravels of Recent age. A continuous belt of eroded surface may be seen along the Surayana, Gond and Puras streams in their lower courses. This region covers an area of 2,828.55 sq. km.

Gomti Basin:

This region spreads over parts of Misrikh and Sidhauli tahsils along Gomti river in a crescent shape in the western part of the district. Geologically, it is also formed of Alluvium and Dun-gravels of Recent age. It is separated from Sitapur plain by the watershed line of Gomti River. The general slope of the area is from north to south. Three are rugged surface along Kathna and Gomti rivers. A number of sand patches are noticed in the North-Western area nearby Gomti river. The region is spread over an area of 1,167.23 sq. km.

(3) Drainage:

Main rivers of this district are Gomti, Chowka, Ghagra and have tributaries Sarain, Pirai, Gond, Godia, Kevani, Gadia, Ikharia etc. Sitapur has mainly three types of soils- Bhood, Domat and Matiyar. Its minimum temperature is $6^{o}C$ and maximum $43.34^{o}C$. Northern part of the district receives more rain because it is nearer to hills.

(4) Climate:

The climate is generally healthy. The low- lying parts on the eastern border have a bad reputation owing to the proximity of moisture to the surface. But it is not so unhealthy as the submontane Tarai of Kheri and Bahraich. The cold weather is good and bracing frost often occur in the winter. The prevailing winds are from the east during the rains and from the west during the remainder of the year.

The average rainfall for the last quinquennium was about 53.17 inches. During the last forty-five years the rainfall has been less than 20 inches in only two years and is generally over 30 inches. The wettest tahsil of the district is Sitapur.

(5) Natural and Economic Resources:

Forestry:

The forest consists of Babul, Dhak, Neem, Sheesham and Bamboo trees which are grown in scattered and barren land. In sandy areas, Palms trees and thorny bushes are grown. In Ganga area there are dense forest comprising of huge trees and different kinds of vegetation.

During the second world war a huge area of forest was converted into plain due to war strategy. Though no costly wood trees are available, there are trees from which Lakh, Leesa, Toddy (Tadi) and wood for use in buildings is drawn. The trees of valuable woods are being planted. The forest gives shelter to birds and wild animals. The district abounds in orchards. Mango trees are grown in groves and on the road sides. The other variety of trees are

Banyan, Gular, Pakar, Fig, Vasaka which are found in the district.

Mineral and Mining:

The district is very poor in minerals. Kankar, Reh and Brick clay are the main minerals found in the district and used as building materials.

Soil:

There is a well–marked fall in the slope from the main body of the district to the alluvial plain of the Ganjar. The western boundary of this tract is a high and sharply defined bank, under which flows the Kewani in north, while further south is an abandoned channel of the Chauka. From this bank there stretches eastwards a low plain of stiff clay, cut up by innumerable streams and watercourses, and terminating in the sandy heights, which mark the bank of the Ghagra. The whole of this tract is liable to annual inundations. On the east of the Chauka the Kharif harvest is always precarious and in danger of being swept away by the violence of the stream. These floods in Chauka have from time to time effected considerable alterations in the physical aspect of the country, and the changes would be far greater were it not for the presence of wide expanses of, Jhau or Tamarisk jungle which serve as brake to the current and by arresting the loose particles of sand bind the soild together in some degree of consistence.

The whole district is of purely alluvial formation. The deposits left by the rivers in the uplands are usually a fertile loam of varying consistency, which tends towards a stiff clay in the depressions, while the slightest rise above the mean level is at once marked by a corresponding lightness in the nature of the soil and a tendency to bhur or sandy land. The latter is most in evidence along the banks of the Gomti and Sarayan. In almost every case the land between the streams presents roughly the same aspects: a fringe of low-lying tarai of varying width in the immediate vicinity of the channel and bounded by the high bank, which is crowned by a ridge of light sandy soil broken by ravines and water-courses; and beyond this a level fertile plain extending to the bank of the next river.

Land and Land use Pattern:

According to Sankhikiya Patrika-2003 total reported area of the district was 572,700 hectare which consists of the area 5,808 hectare covered under forest, 7,647 hectare cultivable land, 4,022 hectare present fellow, 12,735 hectare other fallow, 7,072 hectare barron and un-cultivable land, 59,661 hectare used for other than agriculture, 655 hectare pastures and 6,029 hectare orchards etc.

Agriculture and crop Pattern:

Agriculture is the main source of economy of the district where more than 83 per cent people earn their bread out of it. The impact of weather, quality of soil, land structure and population effects the agriculture produce. The three crop pattern of Rabi, Kharif and Zaid is observed in the district. In the year 2001-02. The pattern of sown area was Paddy 160,975 hectare, Wheat 198,535 hectare, Barley 3,825 hectare, Juwar 8,714 hectare, Bajra 3,162 hectare, Maize 15,324 hectare, Urd 9,560 hectare, Moong 25 hectare, Masoor 28,842 hectare, Gram 1,317 hectare, Peas 2,339 hectare, Arhar 11,156 hectare, Mustard 16,345 hectare, Til 8,003 hectare and Ground nut 3,357 hectare. Under the cash crops potato was swan in 3,180 hectare, Tobacco is 508 hectare and Sugar cane is 112,345 hectare. The production during 2001-2002 was as follows. Paddy 276,372 metric ton, Wheat 487,280 metric ton Barley 6,267 metric ton, Jwar 8,053 metric ton, Bajra 2,620 metric ton, Maize 11,130 metric ton, Urd 2,586 metric ton, Moong 17 metric ton, Masoor 20,167 metric ton, Gram 1,236 metric ton, Pea 2,746 metric ton, Arhar 13,122 metric ton, Mustard 10,729 metric ton, Til 1,761 metric ton, Ground nut, 3006 metric ton, Sugar cane 6,347,493 metric ton, Potato 49,544 metric ton and Tobacco 3,811 metric ton.

Irrigation:

Canals, Tube-wells, Wells, Lakes and Ponds are the main source of irrigation in the district. According to Sankhyikiya Patrika 2003, the sown area in the district irrigated by canals is 27,480 hectare, by private tube-well 177,590 hectare, by govt. tube-wells 5,376 hectare, by wells 33,587, by ponds 984 hectare and by other sources 1,267 hectare.

Animal Husbandry:

Animal husbandry supplements the income of the farmers. Cows and she- buffaloes are reared for milk and oxen are used for ploughing the fields and also as pack animals, sheep and goats are reared chiefly for their flesh and skin. Horses, Ponies, Donkeys and Mules are used in carts.

Fishery:

The lakes, rivers and streams of the district abound in various types of fish. The fish mostly found are Rohu, Nain, Cutla, Karonch, Padhin, Jhinga

(Prawn), Tengir, Paryasi and Silung. There are more than 25 spices of fish found in the river Gomti, artificial lakes and streams etc all round the year.

Industry:

Though, in the past, the district was famous for its textile industry, earthen pots and engraved door panels, it stands low from industrial point of views now. There are some sugar mills, tour mills and rice mills in the district. Now it is mainly famous for its cotton and woolen mats (Darries). Laharpur and Khairhbad are famous for its production and exports.

According to Sankhyikiya Patrika 2003 there were 106 registered factories in 2002-03 in which an average of 6,869 daily workers were deployed.

There are village and small scale industries too functioning in the district. Out of 2732 establishment there are 118 industrial routes, 59 registered establishment 2555 private industries amount the small scale industries there are 114 handloom, co-operative rockets, 37 private engineering, 4 chemical, 74 vidhayan and 301 other private industries.

Trade and Commerce:

Production wise the district is very rich in agricultural produce. Which is exported to other district of the state. Wheat, Paddy, Arhar, Gram, Maize, Juwar, and Barley are exported from the gram markets of Biswan and Mahmoodabad. Jute is exported to Kanpur. The modus oprandis for export is chiefly by railways but in recent year land transport is playing an equally important role in it. The other items being exported are sugar, molasses, plywood, carpet, hide, moong, brass ware, ground nut oil and instruments of husbandry. Through out the country, the ply- wood of Sitapur is in great demand and the main junctions of import are Delhi, Punjab and west Bengal. Sugar in exported to Bihar, Maharastra, West Bengal, Gujarat, Madhya Pradesh, Punjab, Rajasthan and Kerla. Carpets (Durie) is exported to Madhya Pradesh, West Bengal, Bihar, Rajasthan, Punjab, Delhi and Nepal.

Transport:

Transport and Communication are basic infrastructure which play an important role in the social, economic and industrial development of the area. The district is well connected by railway and National highway.

According to Sankhyikiya Patrika 2003, the length of national highway is 96 km, State highway 62 km., main roads of district 529 km and other roads 1,346 km. Thus the total length of road is 2,032 km. There are 34 railway stations (including halts) in the district. Both metre gauge and broad gauge pass through it. The number of bus stops are 100.

There are number of vehicles play on the road. In urban areas cycle, rickshaws, tanga, motor cycle and motor vehicles like car, jeep, and bus are used. In village area, bullock cart, horse cart, are still in use.

Electricity and Power:

According to Sankhyikiya Patrika 2003, the percentage of electrified inhabited villages was 48.4 per cent. Electricity is used for domestic, commercial, industrial, rail traction and agricultural purposes. The maximum consumption of electricity is in domestic purposes.

Gram Panchayat, its composition, jurisdiction and role in village development:

A Gram Panchayat acts as the executive of the Gram Sabha. Gram Pradhan is elected from amongst villagers for a period of five years.

The members of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village Panchayat. There are 1,235 Gram Sabha in the district.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The village panchayat is the sloe body which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

The new Panchayat Raj act of 1993 has fixed a uniform five year for every panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be neared from office of two-third Panch vote against him. But in such a case the sanction of the district authorities must be obtained before hand. The Panchayat normally meets once in a month. If need be an emergency should possess the also be called by the Sarpanch.

In order to be elected to a Village Panchayat, a candidate should possess the following qualifications:

(I) He should be a resident of the village concerned and his name should be in the voter's list of the village.

(II) He should be twenty-five years old.
(III) He should be mentally and physically sound.
(IV) He should not be a proclaimed offender.

Functions:

A Gram Panchayat is entrusted with various social, economic and judicial functions.

(I) It provides civic amenities to the people of the village.
(II) It gets a primary school opened in the village and supervise its work.
(III) It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
(IV) It gets a Primary Health Center opened in the village. The Panchayat has also provided land and building for such a center.
(V) It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
(VI) It arranges for sufficient irrigational facilities, improved seeds, insectidies, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
(VII) It manages and maintains the common property of the village.
(VIII) In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminial cases and imposes fine up to Rs.100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses:

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses:

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several

huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room:

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house:

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.-

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then

considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village:

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area:

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously;

   i) A minimum population of 5,000;

   ii) At least 75 per cent of male working population engaged in non-agricultural pursuits and

   iii) A density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City:

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration:

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically

contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of

which form a continuous spread.

Household:

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household:

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household:

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe:

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same

footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes:

1	Agariya	2	Badi
3	Baiga	4	Balahar
5	Bajaniya	6	Baiswar
7	Balmiki	8	Bajgi
9	Banmanus	10	Balai
11	Barwar	12	Bangali
13	Bawariya	14	Bansphor
15	Beriya	16	Basor
17	Bhuiya	18	Beldar
19	Boria	20	Bhantu
21	Badhik	22	Bhuyiar
23	Baheliya	24	Chero
25	Chamar, Dhusia, Jhusia, Jatawa	26	Dharkar
27	Dabgar	28	Dom
29	Dhanuk	30	Dusadh
31	Dhobi	32	Domar
33	Dhangar	34	Gharami
35	Gond	36	Gual
37	Ghasiya	38	Habura
39	Hari	40	Hela
41	Kanjar	42	Korwa
43	Karwal	44	Kalabaz
45	Kharwar (excluding Banbasi)	46	Kapariya
47	Kol	48	Khairaha
49	Khorot	50	Khatik
51	Kori	52	Lalbegi
53	Majhwar	54	Mazhabi
55	Musahar	56	Nat
57	Parahiya	58	Pankha
59	Patari	60	Pasi, Tarmali
61	Rawat	62	Shilpkar
63	Sansiya	64	Saharya
65	Sanaurhiya	66	Turaiha

Scheduled Tribes

1	Bhotia	2	Buksa
3	Jaunsari	4	Raji
5	Tharu		

Language and Mother tongue:

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate:

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate:

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level:

The highest level of education a person has completed

Work:

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as

worker and non-worker is one year preceding the date of enumeration.

Main worker:

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker:

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker:

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator:

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer:

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker:

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker:

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate:

Percentage of workers (main + marginal) to total population.

Population density:

Population density is the number of persons inhabited per square kilometer of the area.

Age:

Age is measured in terms of the completed number of years.

Sex-ratio:

Number of females per 1,000 males in a population.

(vi) Non Census Concepts:

Improved drinking water:

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage:

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil:

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility:

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR):

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR):

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate:

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence

of migration.

Age specific fertility rate (ASFR):

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR):

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR):

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR):

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR):

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR):

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR):

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR):

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

Number of infant deaths

$$NMR = \frac{\text{aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate:

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate:

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR):

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR):

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR):

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR):

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age-group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 Population):

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4):

1. Number of children in the age-group 0-4 years per 1,000 women in the age-group 15-49 years.

Child woman ratio (5-9):

2. Number of children in the age-group 5-9 years per 1,000 women in the age-group 15-49 years.

Migration:

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration:

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units:

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town:

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area:

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city:

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings:

Population Distribution :

The total population of the district is 3,619,661 in which 3,186,973 live in rural and rest 432,688 in urban parts. There are six.tahsils in district namely Misrikh, Sitapur, Laharpur, Biswan, Mahmudabad and Sidhauli. The most populated tahsil is Misrikh followed by Sitapur tahsil. The urban population in the district is 12.0 per cent. The urban population is maximum at 28.9 per cent in Sitapur tahsil. There are 2,321 inhabited and 27 un-inhabited villages. The total rural population of Sitapur district is spread over 19 CD blocks. The most populated CD Block is Biswan with a population of 225,745, but the maximum number of inhabited villages (187) are in Pisawan CD Block. The population density in the district is 630 which is less than the state average of 690.

Size-class and status of towns:

In the total urban population of 432,688 persons, Sitapur (NPP) (151,908) is the largest town and next big town is Laharpur (NPP) with a population of 50,092. The above two are class I and II towns having the civic status of Municipal Board (NPP). Out of the 9 other towns four towns have the status of NPP and five are Nagar Panchayat. Out of which 3 towns are class III, 6 towns are class IV. Misrikh tahsil contains 2 towns, Sitapur tahsil has 3 towns, Laharpur tahsil has 2 towns. Biswan tahsil contains 1 town, Mahmudabad tahsil contains 2 and Sidhauli tahsil has only 1 town.

Population growth:

At the present territorial jurisdication the population of the district was 2,857,009 at 1991 Census and growing by 26.7 per cent during the decade 1991-2001 it is 3,619,661 at 2001 Census. The decadal growth in the district has been observed higher than that of state.

Population Density:

The district has area of 5,743.0 square kilometre. The population density in the district is 630. In the rural areas of the district the density is 564.

Sex-Ratio:

The sex-ratio in the district at 864 is lower than 898 at the state level. Indeed the sex-ratio has been all along lower in the district as against to the state since 1901. As against to urban areas of the district the sex-ratio is lower in rural areas from 1981-2001. Among tahsils, highest sex-ratio is in Sitapur and lowest in Misrikh Among CD Block the sex-ratio is highest in Hargaon at 882 and lowest in Pisawan at 829 Out of 2,321 inhabited villages in the district there are 42.6 per cent villages (with 38.5 per cent of rural population) which are having a sex-ratio below 849 In the urban parts of the district the sex-ratio is 905 and highest of 921 in Biswan and lowest of 883 in Misrikh-cum-Neemsar (NPP). The sex-ratio of population on the age-group 0-6 is 936 in the district which is higher than the state being only at 916. As against a sex-ratio of 936 in the age-group 0-6 of rural population of the district, it is highest at 988 in Reusa Block and lowest at 902 in Maholi CD Block. It may be noted that out of 2,321 inhabited villages in the district, 19.7 per cent population belong to 0-6 age-group.

Work Participation Rate:

In the total population of the district Sitapur is 31.1 per cent are workers and rest of 68.9 per cent are non-worker. Among worker 25.5 per cent are main workers and rest of 5.6 per cent are marginal workers of total population. The extent of main workers is highest at about 26.7 per cent in Laharpur tahsil and lowest at 24.1 per cent in Sitapur tahsil. In case of marginal workers the proportion is highest in Sidhauli tahsil as 6.5 per cent in comparison to only 6.2 per cent in Sitapur and 5.7 per cent in Mahmudabad tahsil. The extent of workers in rural parts and non-workers in urban parts is higher. In the district among workers about 56.1 per cent are cultivators and 17.4 per cent other workers. Over 37.6 per cent of female workers are engaged as cultivators.

Literacy:

In the district 48.3 per cent population is literate. The literacy is 67.0 per cent in urban areas and 45.7 per cent in rural areas. The male literacy is as highest 60.0 per cent as against 30.9 per cent female literacy, and therefore, the gap in male/female literacy rate is 25.4 per cent. In rural areas among all CD Blocks, the highest literacy is 57.3 per cent in Maholi and lowest 29.6 per cent in Pahala. The literacy among males in rural areas is 58.1 per cent in comparison to 33.9 per cent among females. The lowest female

literacy of 16.8 per cent is in Reusa CD Block. The gap in male/female literacy rate is highest in Parsendi.CD Block which is 29.7 per cent. The highest urban literacy is in Sitapur (NPP) 77.0 per cent and lowest in Tambaur-cum-Ahmadabad (NP) 39.3 per cent. The maximum male literacy is found in Maholi (NP) 82.7 per cent and lowest at 46.2 per cent in Tambaur-cum-Ahmadabad (NP). However, the highest female literacy is in Sitapur (NPP) at 71.0 per cent and lowest at 31.4 per cent in Tambaur-cum-Ahmadabad (NP). Still, the maximum gap in male-female literacy rate at 18.6 per cent is found in Hargaon NP. The literacy among scheduled castes is 31.9 per centb in the countryside it is 39.1 per cent and 52.3 per cent in towns. Only 23.3 per cent of Scheduled Tribe population in rural areas and 84.8 in urban areas are found literate in the district.

(viii) Brief analysis of PCA Data :

The district throws up a vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables 1 to 36:

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Misrikh	693,409	658,707	34,702	764,302	730,526	33,776	10.2	10.9	-2.7	5.0	4.4
2	Sitapur	566,518	400,970	165,548	720,704	512,442	208,262	27.2	27.8	25.8	29.2	28.9
3	Laharpur	466,033	414,957	51,076	602,780	533,004	69,776	29.3	28.4	36.6	11.0	11.6
4	Biswan	456,374	419,611	36,763	594,826	546,592	48,234	30.3	30.3	31.2	8.1	8.1
5	Mahmudabad	363,998	322,216	41,782	469,209	416,108	53,101	28.9	29.1	27.1	11.5	11.3
6	Sidhauli	310,677	296,880	13,797	467,840	448,301	19,539	50.6	51	41.6	4.4	4.2
District Total		**2,857,009**	**2,513,341**	**343,668**	**3,619,661**	**3,186,973**	**432,688**	**26.7**	**26.8**	**25.9**	**12.0**	**12.0**

The growth rates of each tahsil in the Sitapur district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 26.7 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 26.8 and 25.9 per centrespectively. Out of the total population of the district 88.0 per cent lives in rural areas, while, 12.0 per cent lives in urban areas of the district. No change has been recorded in the proportion of urban population during 1991 and 2001 in the district. The highest growth of urban population is recorded in Sidhauli (41.6 per cent) tahsil while decrease in Misrikh urban population is (2.7 per cent).

TABLE-2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages
			Persons	Males	Females		Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12	13

Table-2 Gives CD block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD block level in the district. Out of the 2321 inhabited villages, 79 (3.4 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 347 villages having 15.0 per cent villages of the district while in the size class of 500-999 population claims 655 villages with 28.2 per cent of the total villages in the district. 746 villages (32.1 per cent) are in the size class of 1,000-1,999 and 472 villages (20.3 per cent) are in the size class of 2,000-4,999. No. of villages in the district fall in the ranges of 5,000 and above population are 22 (0.9 per cent). None of villages in the district fall in the ranges of 10,000 and above.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL

(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified - NIL

(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE-4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	175	7.5	265,232	8.3
11-20	3	0.1	44	0.0
21-50	5	0.2	496	0.0
51-100	19	0.8	8,240	0.3
101-200	64	2.8	34,760	1.1
201-300	97	4.2	74,538	2.3
301-500	548	23.6	610,364	19.2
501 +	1,410	60.7	2,193,299	68.8
Not known	0	0.0	0	0.0
District Total	**2,321**	**100.0**	**3,186,973**	**100.0**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 1410 accounting for 60.7 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 68.8 per cent population. The lowest ranges of population density 0-10 & 11-20 persons per sq. km. cover 175.villages (7.5 per cent). 3 villages (0.1 per cent). In the medium densities ranges of 21 to 50 and 51-100 persons account for 0.2 and 0.8 per cent of inhabited villages respectively. These ranges claim 0.3 per cent rural population.

TABLE-5: SEX RATIO OF STATE AND DISTRICT 1991-2001

Census Year	UTTAR PRADESH			SITAPUR		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	897	896	906
1911	916	922	866	879	882	833
1921	908	918	834	873	877	829
1931	903	916	813	877	881	814
1941	907	922	824	877	881	814
1951	908	922	827	860	864	814
1961	907	921	817	859	865	785
1971	876	884	826	829	829	830
1981	882	889	850	846	845	854
1991	876	879	864	833	829	860
2001	898	904	876	864	859	905

NOTE- Sex ratio has been defined here as the numberof females per 1,000 males

As per 2001 Census sex-ratio of 864 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly low as compared to the state average figures from 1901 to 2001. The lowest sex ratio of 829 females per 1,000 males were recorded in the district during 1971 against the state average of 876.females. It is also observed that the proportion of females in rural areas is lower than that of urban areas in the district since 1971 census.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Misrikh	848	846	887
2	Sitapur	880	870	906
3	Laharpur	870	865	912
4	Biswan	866	861	921
5	Mahmudabad	855	850	894
6	Sidhauli	867	866	893
	District Total	**864**	**859**	**905**

The Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 864 females for every thousand males in Sitapur district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 859 and 905 females respectively. The rural sex-ratio in the tahsils varies between 846 in Misrikh tahsil and 870 females per 1,000 males in Sitapur tahsil.

TABLE-7 : SEX RATIO BY CD BLOCKS, 2001

Serial No.	Name of C D block	Sex ratio
1	2	3
1	Pisawan	829
2	Maholi	854
3	Misrikh	855
4	Machhrehta	851
5	Gondlamau	847
6	Ailiya	856
7	Hargaon	882
8	Parsendi	869

12	Reusa	852
13	Sakran	865
14	Biswan	868
15	Pahala	860
16	Mahmudabad	856
17	Rampur Mathura	837
18	Kasmanda	867
19	Sidhauli	877
District (Rural) Total		**859**

Table-7 presents CD block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 859 females per 1,000 males, as a whole. Among the CD blocks the highest sex-ratio of 882 females is found in Hargaon CD block and is fallowed by 877 in Sidhauli CD block while the lowest of 829 is recorded in Pisawan CD block. The sex-ratios of Hargaon, Parsendi, Khairabad, Laharpur, Sakran,. Biswan, Pahala, Kasmanda and Sidhauli CD blocks are higher than the district rural average of 859 females and in remaining blocks, this value is below the district average.

TABLE-8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	24	1.0	7,349	0.2
700-749	60	2.6	33,408	1.0
750-799	238	10.3	219,483	6.9
800-849	667	28.7	969,119	30.4
850-899	867	37.4	1,422,006	44.6
900-949	360	15.5	468,867	14.7
950-999	75	3.2	55,851	1.8
1000-1099	19	0.8	7,648	0.2
1100+	11	0.5	3,242	0.1
District Total	**2,321**	**100.0**	**3,186,973**	**100.0**

Table 8 presents the distribution of villages sex-ratio ranges based on 2001 Census. The maximum number of villages i.e.867 accounting for 37.4 per cent of the total villages having largest population of 44.6 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849 which claims 667 villages (28.7 per cent) and 30.4 per cent population. The highest range of 1,100 & above claims 11 villages (0.5 per cent). This range shares 0.1 per cent rural population of the district while in the sex-ratio range of 900-949, there are 360 villages (15.5 per cent). In remaining sex-ratio ranges of 1000-1099,950-999, 750-799, 700-749 and less than 700, the number of villages are 19 (0.8 per cent), 75 (3.2 per cent), 238 (10.3 per cent), 60 (2.6 per cent) and 24 (1.0 per cent) respectively

TABLE- 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of	Sex ratio
1	2	3	4
1	Biswan	(NPP)	921
2	Hargaon	(NP)	902

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age-group 0-6 is 713,356 persons comprising 368,562 males and 344794 females. The total sex-ratio in this age-group works out 936 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 936 and 927 females in this age-group respectively. The rural sex-ratio in tahsil varies between 908 in Misrikh and 961 in Biswan tahsil. The sex-ratio of Laharpur, Biswan, Mahmudabad and Sindhauli tahsil are higher than district rural average (936.).Misrikh tahsil has lowest sex-ratio of 908 females among the total population, as a whole. In urban areas, the higher sex-ratio is recorded in Laharpur. urban (985) and the lowest is found in Misrikh urban (893).

TABLE-11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial Number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females

19	Sidhauli	33,673	17,261	16,412	951

Table 11 gives CD block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 936 for the district (rural). The sex-ratio of CD block varies between 902 to 988. It is highest in Reusa CD block i.e. 988 followed by 973 in Behta CD block and lowest 902 females is found in Maholi CD block. The sex-ratio of Parsendi, Laharpur, Behta, Reusa, Sakran, Biswan, Mahmudabad and Sndhauli. CD block are higher than the district rural (936) while in remaining blocks, it is below the average of the district.

TABLE-12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	129	5.6	13,112	2.1
700-749	108	4.7	19,239	3.0
750-799	152	6.5	33,182	5.2
800-849	244	10.5	65,029	10.1

District (Rural) Total	2,321	100.0	640,943	100.0
Sex ratio (Rural) for District		**936**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e.442 (19.0 per cent) having largest population (20.9 per cent) in the district (rural) fall in the sex-ratio range of 1,000-1,099 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 900-949 which claims 347 villages (15.0 per cent) and 19.7 per cent population. Next to it, 320 villages (13.8 per cent) are in the range of 1100 and above with 8.6 per cent population. 300 villages (12.9 per cent) having 14.8 per cent population fall in sex-ratio range of 850-899 and 279 villages (12.0 per cent) having 15.6 per cent population fall in sex ratio 950-999. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, and 800-849, claim less number of villages and these are distributed as 129 (5.6 per cent), 108 (4.7 per cent), 152 (6.5 per cent) and 244 (10.5 per cent) respectively. In these ranges, the percentage of population is also low. Is Further, more than 12.9 per cent of villages i.e. 300 having population (14.8 per cent) fall in the sex-ratio ranges of 850 to 899 and above.

TABLE-13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 3,619,661 total population of the district, 31.9 per cent of the total population belong to the Scheduled Castes and 0.0 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 34.9 per cent in rural population and 9.6 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Sidhauli. tahsil (39.7) while the lowest is found in Mahmudabad tahsil (24.3). The proportion of Scheduled Tribes population in both rural and urban areas is negligible.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

19	Sidhauli	166,581	63,431	0	38.1	0.0
	District (Rural) Total	**3,186,973**	**1,111,955**	**327**	**34.9**	**0.0**

Table 15 Shows distribution of Scheduled Castes and Scheduled Tribes population in each CD block of the district. 34.9 per cent of rural population of the district belongs to Scheduled Castes and negligible per cent to Scheduled Tribes. At CD block level, Scheduled Castes population varies between 19.1 per cent in Rampur Mathura. and 46.5 per cent in Misrikh CD block. The other CD block containing the highest percentage of Scheduled Castes are Machhrehta (44.5), Gondlamau (42.5.) and Kasmanda (40.5). The proportion Scheduled Tribes population in all the CD block negligible.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5

76 and above	107	4.6	44,663	4.0
District Total	**2,321**	**100.0**	**1,111,955**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 59 villages accounting for 2.5 per cent of total 2,321 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 43.villages (1.9 per cent). In 104 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 310 villages constituting 13.4 per cent of the total villages. The range of 11-30 and 31-40 per cent contains 406 and 498 villages respectively. Both these ranges together account for 49.0 per cent villages of the district. 107 villages fall in the range of 76 and above percent. 377 villages are such where the proportion of Scheduled Castes is more than 20.0 per cent. These villages contain 21.5 per cent Scheduled Castes population of the district. The maximum of the 25.9 per cent of the Scheduled Castes population is covered by range of 51-75 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage

District Total	**2,321**	**100.0**	**327**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. The scheduled tribe population in rural area of the district is negligible. There are 2,296 (98.9 per cent) villages where none of Scheduled Tribes have been recorded in the district. The remaining 25 (1.1 per cent) villages have proportion of Scheduled Tribes population up to less than 5.0 per cent.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

District (Urban) Total		**432,688**	**41,671**	**40**	**9.6**	**0.0**

Table 18 shows number and percentage of scheduled caste and scheduled tribes population recorded during 2001Census in district Sitapur. The table depicts that scheduled caste population in Maholi (NP) and Sidhauli (NP) were 18.2 and 17.1 per cent respectively. But only 5.0 per cent Scheduled caste population was recorded in Laharpur (NPP). Scheduled tribe population is negligible in the urban areas of the district and it was found only in Sitapur (NPP).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C.D. BLOCKS, 2001

Serial No.	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

18	Kasmanda	870	0
19	Sidhauli	882	0
	District (Rural) Total	**862**	**890**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each CD block of the district. The Scheduled Castes sex-ratio is 862 for district (rural). Among the C.D.blocks, the highest sex ratio of 884 females is found in Hargaon CD block and lowest of 821 females is recorded in Pisawan CD block. This table also shows sex ratio of ST population in rural areas of the district is 890. The sex ratio in Pisawan, Gondlamau, Ailiya, Hargaon, Parsendi, Khairabad, Reusa, Mahmudabad and Rampur Mathura CD blocks is above the parity line while in remaining Maholi, Behta, Sakran and Biswan CD blocks is below the line of equality. The lower value of sex ratio of 261 females is recorded in Biswan CD blocks.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 48.3 per cent in the district. This proportion in rural area is 45.7 per cent against 67.0 per cent in urban areas. In the district the literacy rates of males (60.0 per cent) is much higher than that of females (24.5 per cent). Among the tahsils, Sitapur tahsil tops with 56.4 per cent literates followed by Misrikh tahsil (52.6 per cent). Laharpur tahsil with 39.9 per cent literates stands at the bottom in the district. Out of 6tahsils, the literacy rates of 3.tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 25.4 per cent in the district, as a whole. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 13.5 points against the rural areas, where the gap between male and female literacy is 27.3 points.

TABLE- 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

District (Rural) Total		**1,163,041**	**804,072**	**358,969**	**2,023,932**	**910,207**	**1,113,725**	**45.7**	**58.1**	**30.9**	**27.3**

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at CD block level in the district. 45.7 per cent of the total rural population excluding the age-group of 0-6 years literates in the district. The corresponding proportion of male and female literates comes to 58.1 and 30.9.per cent respectively which shows very wide gap of 27.3 per cent in male and female literacy. At CD block level, Maholi CD block has the highest rural literacy rate of 57.3 per cent while 70.7 per cent males and 41.3 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Behta CD block (32.3. per cent). There are wide variations in male and female literacy in all the CD blocks of the district. The maximum difference of 29.7 points is found in Parsendi CD block.

TABLE -23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	17	0.7	6,527	0.2
11-20	83	3.6	96,725	3.0

81-90	12	0.5	6,180	0.2
91-99	3	0.1	688	0.0
100	0	0.0	0	0.0
District Total	**2,321**	**100.0**	**3,186,973**	**100.0**
Literacy rate for District			**48.3**	

Table 23 gives the distribution of villages by literacy rate ranges in the district. 677 villages accounting for 29.2 per cent of the total villages are in the literacy range of 41-50 per cent and 564 villages (24.3 per cent) fall in the literacy range of 51-60 per cent. The lower literacy rate of 1 to 10 per cent observed in 17 villages (0.7 per cent) of the district. The higher literacy ranges of 71 to 99 per cent covers 88 villages (3.7 per cent). The range of 41-60 have the maximum number of 1,241 villages forming 53.5 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District (Urban) Total		**241,402**	**139,150**	**102,252**	**191,286**	**87,945**	**103,341**	**67.0**	**73.4**	**59.9**	**13.5**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Sitapur town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (67.0 per cent). The literacy rate is quite high (above 80.0 per cent in 4 towns) among males. Female literacy rate is not for

behind in four towns (above 60.0 per cent). However, literacy rate among females is very low (31.4 per cent) in Tambaur-cum-Ahmadabad (NP) town. The gap in male female literacy rate is very high (18.7) in Hargaon (NP).

TABLE-25: NUER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial No.	Name of C.D. Block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

	District (Rural) Total	**344,499**	**245,989**	**98,510**	**767,456**	**351,281**	**416,175**	**39.1**	**51.5**	**24.5**	**27.0**

Table 25 shows number and percentage of scheduled castes literates and illiterates by sex in CD blocks 2001. In rural areas of the district proportion of literates is 39.1 per cent in which 51.5 Males and 24.5 Females. Thus, the gap in male and female literacy rates is 27 among 19 CD blocks, Ailiya CD block has the highest literacy rate and Reusa CD block has the lowest literacy rates. The gap in male/female literacy rates in Maholi CD block is highest and this gap is lowest in Rampur Mathura CD block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

Table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of literates is less than illiterates in the urban area of the district. The percentage of literates is least in Tambaur-cum-Ahmadabad (NP) among 11 towns but the gap in male/female literate rate is highest in case of Maholi town. The males in all the 11 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Laharpur tahsil and but in Misrikh-cum-Neemsar town the female literacy rate is highest.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial No.	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out 31.1 per cent of the total population in the district. The total workers are comprised of 25.5 per cent of main workers and 5.6 per cent of marginal workers and the remaining 68.9 per cent are non-workers.

Among the main workers, males participation rate in the district is 44.4 per cent and 3.7 per cent of females. Male and female marginal workers account for 6.2 and 4.9 per cent respectively. The percentage of males marginal workers is higher than females. Total workers (main and marginal workers) among tahsils varies from 30.3per cent in Sitapur tahsil to 31.7 per cent in Mahmudabad and Sidhauli tahsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 shows CD block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 3,186,973 total rural population of the district, 25.9 per cent has been categorised as main workers and the marginal workers constitute 5.9 per cent and the remaining 68.2 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 45.1 per cent males and 3.6 per cent females are in the category of main workers. Male and female marginal workers account for 6.4 and 5.3 per cent respectively. The percentage of male marginal workers is higher than female marginal workers. Similar trend is visible at CD block level except Misrikh, Khairabad and Pahala CD Blocks.

The percentage of total rural workers of the district comes to 31.8. per cent. At the CD block level, Khairabad has highest proportion of total workers forming 37.0 per cent of the total population. It is closely followed by Misrikh (34.0 per cent), Sakran (33.2 per cent), Behta (33.0 per cent), Pahala (32.8 per cent) and Rampur Maniharan (32.6 per cent). The lowest percentage of 29.3 per cent is recorded in Ailiya CD block.

Note: Percentage of Workers to total workers are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 56.1 per cent of the total workers (main + marginal) and remaining 21.7 per cent of total workers are engaged as agricultural labourers. Household industry workers (4.8 per cent) and other workers (17.4 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 41.8 per cent in Sitapur tahsil and 61.3 per cent in Misrikh tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of males cultivators is 58.8 per cent which is very high as compared to 37.6 per cent of female cultivators in the district. The percentage of agricultural labourers and household industry workers is 21.7 per cent and 4.8 per cent respectively in the district as stated above. The workers in other activities occupy the third position next to agricultural laborers in the district. The highest proportion of 34.2 per cent of other workers is recorded in Sitapur tahsil while the lowest proportion of 12.0 per cent is found in Misrikh tahsil.

Note: Percent of Worker to total worker are given in brackets

Table 35 presents CD block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) 31.8 per cent of total population. Among these workers, cultivators constitute 61.7 per cent, 23.3.per cent agricultural labourers, 4.2 per cent household industry workers and 10.7 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 4.2 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of males (51.4 per cent) is much higher than females (8.9 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one CD block to other. The proportion of cultivators varies between 45.8 per cent in Khairabad CD block to 70.5 per cent in Reusa CD block. Similarly for other workers, the lowest proportion is 4.2 per cent in Reusa CD block while 22.0 per cent is the highest in Khairabad CD block. The percentage of agricultural labourers and household industry workers together is quite low i.e. only 14.9 per cent in the district. The percentage of agricultural labourers is highest in Both Misrikh and Khairabad. (27.9) CD blocks and is followed by Biswan (26.8 per cent). Maholi (25.1), Parsandi and Machhrehta each (24.6) and Sakran (24.5 per cent).

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district Sitapur. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (78.3), followed by cultivators with 5.3 per cent (5.6 per cent male and 2.9 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (15.5) is recorded in Tambaur cum Ahmadabad (NP). In the agriculture labourers category Sitapur town is recorded very low percentage(1.2). Household industry workers are also very low (3.6per cent in Tambaur cum Ahmadabad, 3.8 per cent in Sitapur and 4.2 per cent in Biswan towns. As the usual trend recorded in the urban areas, other workers are in high percentage (93.8 per cent in Sitapur and 87.1 per cent in Biswan town).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

One of the major parts of the District Census Handbook is Village and Town Directory. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data inset tables 37 to 47 have been generated and reproduced here showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial No.	Name of C. D. block	Number of inhabited villages	Type of amenity available

Note : - Percentages are given in brackets.

***** Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 2,321 inhabited villages in the district 1,776 villages or 76.5 per cent have been provided with the education facilities of one type or the other. Similarly 603 villages in the district constituting 26.3 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 2,300 or 99.1per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 364 villages constituting 15.7 per cent of villages have been provided with post office facility within the village. 798 or 34.4 per cent villages have been provided with the telephone facility, 204 or 8.8 per cent with transport facility, 126 or 5.4 per cent villages with bank facility and 193 or 8.3 per cent with agricultural credit societies. Similarly there are 1167 or 50.3 per cent villages which have been linked with the pucca road. Total 1,271 or 54.8 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Laharpur CD block has the highest 88.9 per cent villages where educational facility is available and lowest 61.2 per cent is found in Mahmudabad. Medical facility is highest in Laharpur. (70.4 per cent) and lowest (9.5 per cent) in Maholi CD block. Improved drinking water is available to cent-percent villages in Gondlamau, Ailiya, Hargaon, Parsendi, Khairabad, Laharpur, Sakran, Pisawan, Kasmanda and Sidhauli. blocks while in other blocks, it is above 90 per cent. Telephone facility is highest in Ailiya (54.7 per cent). Transport and communications is less developed in Pisawan where only 1.6 per cent villages are covered by this facility whereas 28.2 per cent villages of Parsendi CD block are availing this facility. In the field of power supply only 54.8 per cent villages have been covered in the district.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 3,186,973 persons in the district, 2,850,061 or 89.4 per cent have educational facility of one or the other type. Similarly 1,206,339 or 37.9 per cent population has medical facilities while 3,178,357 or 99.7 per cent have got improved drinking water facility. Post office facilities are available to 885,311 or 27.8 per cent population. Telephone facility is available to 1,318,221 or 41.4 per cent. Transport communications facility is available to 401,315 or 12.6 per cent. Bank facility is available to 354,126 or 11.1 per cent. 433,098 or 13.6 per cent have been provided with the facility of agricultural credit societies. 1,927,950 or 60.5 per cent have been provided with the facility of approach by pucca road. Power supply is available to 209,773 or 65.7 per cent rural population in the district. More or less similar pattern of availability of facilities is visible to the rural population at CD block level.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :

7. Agricultural Credit Societies	1,391	622	115	2,128

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 556 villages do not have primary school in their villages and out of these villages, children of 538 villages have to travel less than 5 kms. for schooling Out of 2,321 inhabited villages as many as 1,820 are deprived of middle school and 2,313 of degree college. Of these 1,307 avail the facility of middle school at a distance of less than 5 kms., 477 at a distance 5-10 kms. and the remaining 36 at a distance of 10+ kms. In respect of degree college 230 avail this facility at a distance of less than 5 kms., 668 between 5 to 10 kms. and rest 1415 villages at a distance of 10+ kms.

Similarly there are 2,270 villages in the district which have been devoid of Hospital facility and 2272 villages which are deprived of PHC facilities. Of these 647villages have the facility of Hospital available within 5 kms. while in respect of 919 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 704 villages have this facility at a distance of 10+ kms. As regards PHC 555 avail this facility at a distance of less than 5 kms., 1,076 at a distance of 5-10 kms. and the remaining 641 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1,957 villages do not have this facility in the village itself. Of these majority i.e.1,626 have this facility at a distance of less than 5 kms., another 288 villages avail it at a distance of 5-10 kms. In the remaining 43 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 1,523 villages in the district which are without telephone facilitiy. Of these 1,030 avail this facility at a distance of less than 5 kms., 300 at a distance of 5-10 kms. and remaining 193 have to traverse a distance of 10+ kms.

For Bus service out of 2,190 villages which do not have facility, 730 villages avail this facility at a distance of less than 5 kms., 968 at a distance between 5-10 kms. and 492 at a distance of 10+ kms.

In the entire district 2,208 villages are deprived of Commercial Bank & 2,281of Co-operative Bank. Of these 2,208 villages which are deprived of Commercial Banks 1,229 villages avail this facility at a distance of less than 5 kms., 775 between 5-10 kms. & the remaining 204 at a distance of 10+ kms.

Regarding Co-operative Banks out of 2,281 villages 548 villages avail this facility at a distance of less than 5 kms., 1,190 at a distance of 5-10 kms. and remaining 543 at a distance of 10+ kms. 2,128 villages do not have agricultural credit societies. This facility to 1,391 villages is available at a distance of less than 5 kms., 622 at a distance of 5-10 kms. and the remaining 115 at a distance of 10+ kms.

Post office includes Post office, Telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 2,321inhabited villages in the district, there are 296 villages which have nearest towns upto a distance of 5 kms. Of these only 215 villages forming 72.6 per cent of these total villages, are having the educational facilities of one type or the other and 60 villages constituting 20.3 per cent, have the medical facilities within the village, 24 villages forming 8.1 per cent have the facility of post office within the village and 90 or 30.4 per cent have the facility of telephone. 25 villages constituting 8.4 per cent have been linked by transport service. 13 villages comprising 4.4 per cent have been provided bank facilities, while 24 villages constituting only 8.1per cent have been provided by agricultural credit societies. 182 villages comprising 61.5 per cent have been provided with pucca road.

There are 1,488 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 1139 villages constituting 76.5 per cent have been provided with the educational facilities. 416 villages comprising 28.0 per cent have been provided with medical facilities. 246 villages constituting 16.5 per cent enjoy the post office facility. 544.villages comprising 36.6 per cent have been provided the telephone facility. 160 villages constituting 10.8 per cent have been linked with transport communications. 82 villages comprising 5.5 per cent have bank facility. 126 villages constituting 8.5 per cent are having agricultural credit societies, while 763 villages or 51.3per cent are approachable by pucca road. 527 villages fall in the distance range of 16-50 kms. Of these, 78.6 per cent villages have educational facility, 23.5 per cent with medical, 17.5 per cent with post office, 30.6 per cent with telephone and transport & communications available to 3.2 per cent villages. Banks and agricultural credit societies facilities are available to 5.5 and 7.6 per cent of villages respectively.

Only village in the district situated beyond 50 kms.from the nearest town is availing amenities like education. Transport communications and approachable by pucca road. The habitants of this village are not availing amenities like medical, post office, Telephone, Banks and agricultural credit societies. There are 9 villages whose distance ranges from the nearest statutory town have not been under the unspecified category. 7 Village 77.8 per cent villages have the educational facility of one or other type. Three village each constituting 33.3 per cent have the medical, telephone, banks and agricultural credit society facilities in the village. Two villages each constituting 22.2 per cent are avaling the amenities like post office, Bank and approachable by pucca road one village has also Transport and communications facility.

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Sitapur district out of a total 2,321 inhabited villages, overwhelming 426 have a population of less than 500 persons. Of these, 122 villages (28.6 per cent) have education facility, 29 (6.8 per cent) have medical facility, 412 (96.7 per cent) have improved drinking water facility. 91 (21.4 per cent) have telephone facility. 19 (4.5 per cent) have been linked by bus service. 3 (0.7 per cent) have Bank facility. 132 villages (31.0 per cent) have been linked with pucca road and 146 villages (34.3 per cent) have been provided with electricity. None of the village of this population rang have facilities like post office and agricultgural credit societies.

Out of 655 villages, which fall in the population range of 500-999 persons, 486 villages (74.2 per cent) have been provided with the education facility, 114 (17.4 per cent) with medical facility, 651villages (99.4 per cent) have improved drinking water facility. 47 villages (7.2 per cent) have been provided with post office facilities, 179 villages (27.3 per cent) with telephone facility, 43 villages (6.6 per cent) with transport facilities, 13villages (2.0 per cent) with bank facility, 40 villages (6.1 per cent) with agricultural credit societies & 302 villages (46.1 per cent) have approach by pucca road and 317 villages (48.8 per cent) in this range have electricity.

746 villages fall in population range of 1,000-1,999 persons. Out of these 698 (93.6 per cent) villages have education facilities. Whereas 220 villages (29.5 per cent) enjoy the medical facility, 743 villages (99.6 per cent) have improved drinking water, 126 villages (16.9 per cent) have post office facility, 309 villages (41.4 per cent) have telephone facility, 66 villages (8.8 per cent) have transport communications facilities, 36 villages (4.8 per cent) have bank facilities, 66 villages (8.8 per cent) have agricultural credit societies and 378 villages (50.7 per cent) have approach by pucca road and 421 villages (56.4) have power supply facility.

There are 472 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy the facility of improved drinking water, 448 villages (94.9 per cent) have education facility, 221 villages (46.8 per cent) have medical facility. 172 villages (36.4 per cent) have post office facility, 203 villages (43.0 per cent) have telephone, 65 villages (13.8 per cent) have transport

and communication facility 59.villages (12.5 per cent) have bank facility, 76 village (16.1 per cent) is having agricultural credit societies, 334 villages (70.8) have approach by pucca road and 367 villages (77.8 per cent) have power supply facilities. There is only 22 village in the district having a population of 5,000 persons or above.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial No.	Name of C. D. block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Pisawan	187	39,048.0	N.A.	76.3

9	Sidhauli, NP	Tobacco, Furniture, --	Tobacco, Vegetable, --
10	Sitapur, NPP	--, --, --	Carpet, Ply Board, Vegetable Oil
11	Tambaur -cum-Ahamdabad, NP	Furniture, Shoe, Sugar	Furniture, Shoes, Sugar

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The chief export items of the district are carpet, tobacco, food grains, sugar and gur. These are the main items which are manufactured in the towns and exported to other places.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48 to 52 :

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* House list households.

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 592,893 consisting of 531,429 rural and 61,464 urban households. 211,660 households belong to Scheduled Castes and 7,595 to Scheduled Tribes 577,422 households are living in their owned houses constituting 97.4 per cent of total households. Of these households, the largest number of households (191,669) have occupied single roomed accommodation and is followed by double roomed accommodation numbering to 174,592 households. Next position is claimed by households (85,040) occupying three roomed accommodation. Number of households in owned accommodation occupying three plus rooms rank at fourth place with 80,507 households while 45,614 households are without any exclusive room.

10,046 households living in rented accommodation account for 1.7 per cent of total number of households in the district. The largest number of 4,904 households are living in single roomed accommodation followed by 3,263 households

in double roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 5,425 forming only 0.9 per cent of total households are distributed in single roomed accommodation numbering 2,720, in double roomed numbering 1,449 and 493 in three roomed accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial No.	District/ Tahsil	Total			Rural			Urban		
		Perma-nent	Semi-perma-nent	Tempo-rary	Perma-nent	Semi-permanent	Tempo-rary	Perma-nent	Semi-perma-nent	Tempo-rary

	District Total	**31.7**	**6.0**	**62.2**	**26.7**	**5.6**	**67.7**	**75.7**	**9.3**	**14.9**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refer to those houses whose wall & roofs are made of pucca materials i.e., burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate a re-used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refer to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that more than 31.7 per cent of the households in the district had permanent houses. The trend is different in rural (26.7 per cent) and urban area (67.7 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Sitapur (46.0 per cent) followed by Laharpur (38.9 per cent), Mahmudabad (31.2 per cent) and lowest in Sidhauli (17.2 per cent). In respect of semi-permanent houses, the returns were 6.0 per cent of district level where as among tahsils, in Laharpur it was 7.5 per cent and lowest was 4.1 per cent in tahsil Misrikh rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 6.2 to 13.2 per cent. Temporary houses in the district lie between the range of 47.1 to 78.6 per cent.

				(90.2)	**(67.9)**	**(52.9)**	**(76.0)**	**(93.9)**

The above table shows that out of total households (413,274) of the district 69.7 per cent of the households had improved drinking water facility. The proportion of rural and urban area was (357,819) 67.3 and (55,455) 90.2 per cent. Tahsil Laharpur had higher order of proportion of households where percentage for rural area was (65,349) 74.5 and (7,969) 93.2 per cent in urban areas. Electricity was available for (84780) 14.3 per cent of households at district level. Bathrooms and toilet facilities were available in (139,041) 23.5 and (112,341) 18.9 per cent of households. Tahsil Laharpur and

Mahmudabad poorly served in respect of Bathroom and toilet facilities respectively. Similarly drainage facility was also poor in tahsil Laharpur and Biswan. At district level drainage facility was available for (399,647) 67.4 per cent of households, whereas the proportion of rural and urban areas households accounted to (341,982) 64.4 and (57,715) 93.9 per cent.

Percentage in brackets

* House list households.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that to (334,789) 56.5 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is to (1,305,011) 57.4 and in urban area it comes to (29,778) 48.4 per cent of households. LPG (cooking gas) has been reported

as one of the fuel for cooking of food in to (26,499) 4.5 per cent of the households. The composition of rural and urban comes to (325) 1.0 and to (21,237) 34.6 per cent respectively. Kerosene is used for cooking in as many as (7,177) 1.2 per cent of the households (1,623) 0.3 per cent rural and to (5,554) 9.0 per cent urban households). The other methods like crop residue, cow dung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between to (780) 0.1 per cent to 5.4 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, crop residue and cow dung cake are the predominant fuel for cooking in the district.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.
* Houselist Households.

The table reveals that out of the total households (592,893) of the district, as many as 336,806 households or 56.8 per cent could avail banking services at district level while 236,368 household or 40.0 per cent availed radio transister, 6,718 household 11.3 per cent television, 16,361 household has 2.8 per cent telephone, 445,208 household 75.1 per cent cycle, 31,071 household has 5.2 per cent scooter, motorcycle and moped and 6,386 household 1.1 car, jeep and van whereas only or 111,829 household 18.9 per cent had none of the specified assets. This means that more than 81.1 per cent of the households in the district have at least only one of the household assets.

It also reveals that at tahsil levels a highest proportion of 61.8 per cent of households (59,572) were availing banking services in Biswan tahsil. Where as the highest proportion of 42.0 per cent household (52,234) availed Radio/transistor, 23.4 per cent households (11,488) availed Television, 5.8 per

cent household (2,573) availed telephone, 9.3 per cent household (97,875) availed scooter/motorcycle/moped and 1.7 per cent household availed car/Jeep/Van in Misrikh. The highest of 77.5 per cent household (60,969) used bicycle in Sidhaule tahsil. The highest of none of specified assets 22.9 per cent households (22,007) in the tahsil Laharpur against it, on the other hand the lowest of 50.3 per cent (50,909 households) was observed were availing banking services and 37.5 per cent (32,988 households) availed radio/ transistor household asset in Sidhaule tahsil while the rest of the availabilities of household assets such as television, bicycle and scooter/motor cycle/moped at the lowest foot were being availed in Laharpur tahsil and the percentage of the enjoyers of none of the specified assets was 16.7 per cent (22,007) in Sitapur tahsil.

(XI) Major Social and Cultural Events, Natural and Administrative Development and Significant activities during the decade:-

No such important activities was observed during the decade except a small administrative change that took place in the year 1995 in which 67 villages of Misrikh were transferred to Sidhauli vide govt. notification number 4430/1-5/94/-84/187-R-5 dated 4.1.95

(XII) Brief description of of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district :-

There are so many historical places/towns in the district Sitapur. Some of these are as under.

Machhrehta:

In Aaine Akbari this place has been referred as more than 400 years old. This was meditation place of Machhendar Nath, hence this name. There is an old inn, Imambara and many Temples and Mosques.

Mehmudabad:

Emperor Akbar's commander Nawab Mehmud Khan established this town. His predecessors ruled this place till Zamindari abolition.

Aurangabad:

Earlier it was know as "Balpur Pasau" created by Pasis. In 1670AD Aurangzeb presented this place to Bahadurbeg who named it Aurangabad.

Bara Gaon:

This is an ancient place. There are many mosques and a pond is called "Badesar".

Biswan:

One fakir Bishwer Nath established this town about 600 years ago and hence the town was called Biswan. The grave of Mumtaz Husain of Persian style made in 1,047 Hijri is famous for its sturdiness. Shekbasi in 1,173 Hijri made many buildings, Dargah , Mosques, Inn etc. Hazrat Gulzar Shah's Mazar is famous for communal harmony, where annual Urs/ Mela is held every year.

Hargaon:

Famous king of Ayodhya, Harishchandra established this town. There is a pond named 'Suraj Kund' of Hindus. A Mela is organized in the month of Kartik Poornima.

Khairabad:

It was a place of pilgrimage in times of King Vikramaditya. Some say that Khaira Pasi established this town in 11th century. Babar took it in his reign from Bahadur Khan in 1527. It remained under Humayun till he was defeated by Sher Shah. There were 25 palaces during the reign of Emperor Akbar, which are now placed in Kheri and Hordoi districts. It was a big trading centre also where Kashmiri shawls, Jewels of Burmingham and Elephants of Assam were traded. It was the Commissionary of Avadh State at the time of Akbar and Lucknow was under Khairabad. Imambara and few other buildings still exist there. Dargah of Hazrat Makhdoom Sahib is famous among devotees.

Laharpur:

In 1374 AD, Firoz Shah Tuglak habilitated this place. After 30 years, Pasis in the leadership of Lohari defeated him out and changed its name to Loharipur which changed to Laharpur in course of time. Raja Todar Mal, the revenue minister and one of the Nav Ratnas of Akbar's Ministry, was born here.

Naimisharanya:

This place has been the centre of spiritual development in the past. There are 30 thousand Religious places about. 88,000 Mendicants meditated here. People from all over India visit this holy place. It is 35 km from Sitapur on Sitapur Hardoi road. Some important holy places at Naimisharanya are as follows.

Chakratirth:

This place is the holiest in Naimisharanya. It is said that Lord Brahma's Device Chakra fell on this

pious land and created a round "Kund" (crater), which is named as Chakra Tirth.

Lalita Devi Temple:

This is very famous temple among religious devants.

Panch PrayagVyas Gaddi:

This pond is situated near the Lalita Devi temple. It is situated near Chakratirth where Rishi Vyas divided Vedas in four parts and also created Purans.

Soot Gaddi:

Soot and Shaunak had discourse at this place.

Sri Hanuman Garhi and Panch Pandav:

Large statue of Lord Hanuman is situated here. According to popular belief, after killing Ahi Rawan, Hanuman appeared with Lord Ram and Lakshman at this place from beneath "Pataal"

Misrikh:

This is another religious place situated 10 km away from Naimisharanya and 25 km from Sitapur on Hardoi road. Maharishi Dadhichi Ashram and Sitakund are holy pilgrimages of this place.

Sitapur Shyamnathan Temple:

This Shiva Temple built 300-400 years ago is situated in old Sitapur City.

(XIII) Major Characteristics and Contribution of the District:

One of the Nav-Ratna and Revenue minister of Mughal Emperor Akbar Raja Todar Mal was born at Laharpur town of this district Sitapur.

Kavi Narottam Das the writer of "Sudama Charitra" and contemporary of Tulsidas, was born at village Badi in tahsil Sidhauli.

In district Sitapur, Acharya Narendra Dev was a famous academic and nationalist. He translated " Ami Dharam Kosh" and " Boudh Dharam Darshan" in Hindi. Maulana Fazle Haq Khairabadi was a famous freedom fighter, philosopher and intellectual. He belonged to Khairabad town of he passed a " Fatwa of Jihad" against British Government in 1857, and was imprisoned to Cellular Jail of Andaman and Nicobar and died there in 1861. Famous poet/ writer Jannisar Akhtar and Javed Akhtar are his offsprings. Muztar Wasim Khairabadi a will Known Urdu poet from Khairabad was master(ustad) of famous Urdu poet Firaq Gorakhpuri. Riyaz Khairabadi a famous writer and poet also belonged to Khairabad. He published many Magazines and novels. Jwala Prasad Warq is among the creators of modern Urdu literature. Pt. Madhu Sudan Dixit was a famous doctor of Ayurveda. The district Ayurvedya hospital is Named after him.

Pt.Krishna Bihari Mishra was the founder of the " Hindi Sabha" in 1940 in this district. He was inspired by Rajashri Purushottam Das Tandon in this task. Dr. Naval Bihari Mishra has a prominent place for explanary writing in science fictions. Captain Manoj Pandey the Param Veer Chakra holder was born in Ruda village near Kamlapur town. He sacrificed his life during Kargil War in 1999.Dr. Safdar Husain Ash, Ram Swaroop " Jabt", Suraj Narayan " Adab", Jigar " Biswani" Wasi Sitapuri, Mayal Khairabadi, Aarif Sitapuri, Padmshree Qazi Abdussattar, Iliyaas Sitapuri, Hasan Abid, Dr. Airaz Naqvi, Shakeb Rizvi, Ahmad Wasi, Afsar Biswani, Rasheed Kausar Farukhi, Samar Biswani, Dabir Sitapuri, Mast Hafeeq Rahmani, Wafa Sitapuri are famous for urdu poetry whereas. Sant Baba Raghunath Das " Ram Sanehi", Dr. Ganesh Bux singh, Pt. Nand Kishore Mishra, Pt. Baldeo Prasad Awasthi, Pt. Laxmi Narayan Sharma " Krapan", Lala Hardayal singh, Girja Dayal Srivastava, Girish Balbhadra Prasad Dixit " Padhees", Anoop Sharma, Pt. Bhagwan Deen " Deenji", Hanumant Dayal Awasthi " Hanumant", Uma Dutt Saraswat " Dutt", Laxman Prasad Misra, Dr. Kunwar Chandra Pratap singh and Ramji Das Kapoor, Acharya Chaturbhuj Sharma, Dr. Shyam Sunder Madhup, Dr. Shyam Kishore Misra, Ram Swaroop Awasthi " Roopji", Madan Gopal " Mahendra", Dr, Ganesh Dutt Saraswat, Dr. Arun Trivedi, Luv Kush Dixit, Sant Pandey, Shyam Awasthi " Mayank" are famous for Hindi Poetry.

It the field of sports, Akhlaq Hussain, Satya Prakash Gupta, Intezaar Hussain, Anzaar Hussain Aftab Hussain and Zuber Kamal Siddiqui were national level Hockey players. Nidhi Shukla and Ashok Singh were Volleyball players who brought glory of this district.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each CD block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991

census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory:

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY
(SECTION I & II)

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell (without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

APPENDIX VII B - Village Directory

List of villages according to the proportion of the Scheduled Tribes to the total population by ranges

Name of the District : SITAPUR

Range of Scheduled Tribes population (percentages)	Location code number	Name of village
1	2	3
	03164200	Shadi Pur

Name of CD Block: Kasmanda

Name of CD Block: Sidhauli

Note:- Villages having NIL Scheduled Tribes Population have been excluded

APPENDIX VIII

Number of villages under each Gram Panchyat (C.D. block wise)

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total SC population	Total ST population	Income and expenditure of Gram panchayat (in Rs.'000)	
			Number of villages with location code numbers	Location code					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttar Pradesh due to certain reasons.

APPENDIX IX
Statement showing number of girls schools in the villages

Name of District	Name of C.D. Block	Location Code	Name of Village Number	No. of Girls School
1	2	3	4	5
Information not available for this district				

SECTION II
TOWN DIRECTORY

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle

Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first Census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after

the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important feature of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also.

In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, then portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP	*Sitapur
q1	Persons	99	98
	Males	98	72
	Females	104	102
q2	Persons	117	105
	Males	117	84
	Females	118	110
q5	Persons	134	117
	Males	135	101
	Females	132	121

The probability of dying between birth and at age 1, 2 and 5 years are shown in the above table. Child mortality by ages 1, 2 and 5 years is lower in the district as against the state, thus child mortality indicators in the district for both male and female shown in the above table are of lower order as compared to the state.

ANNEXURE – III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE - 1991

Serial Number	Fertility Measures	Uttar Pradesh	Sitapur
1	2	3	4
1	CBR	37.2	36.5
2	TFR	5.6	5.9
3	TMFR	6.3	6.9
4	GFR	172	178
5	GMFR	200	216
6	Mean age at marriage (1981-91)	17.3	17.8
7	Number of children ever born per ever married woman aged 45-49 years	4.6	4.6
8	Child woman ratio 0-4	631	685
	5-9	752	794

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.2
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 36.5 per 1000 in the district. It is below to that of the state of Uttar Pradesh i.e. 37.2 per thousand. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), Gereral Fertility Rate (GFR) and (GMFR) General Marital Fertility Rate it is of higher order in the district than the state figures. The mean age at marriage during the period 1981-91 has been 17.3 years for the state whereas 17.8 years has been observed for the district. It may be observed that higher age at marriage leads to low rate of fertility in the state and district as well. Number of children ever born per ever married women in the age group 45-49, in the state and the district figures are same as 4.6. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 685 and 794 for the district while in case of the state the corresponding figures are 631 and 752. So the conclusion that may be drawn, the fertility levels as such are higher than the state average.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 92.9 in 1991, while in 2001 it was 81.0 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 6.3 percent and 18.6 percent respectively. This shows in-migration from other states to this district was thrice in 2001 in comparison to 1991. At district level in-migration from other countries was 0.8 percent in 1991 and 0.4 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 93.8 percent and 78.5 percent

during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 5.9 percent and 21.3 percent respectively. The movement of population from other countries in the district was 0.3 percent in 1991 and 0.2 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

ANNEXURE – V
BRIEF ACCOUNT OF MAIN RELIGIONS IN THE STATE/DISTRICT/TAHSIL AS PER 1991 CENSUS

State/Distt./Tah.	Total Population	Religion (Percentage to total population) Buddhist	Christian	Hindu	Jain	Muslim	Sikh	Other Religion	Religion not Stated

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 82.2 percent in 1991 and 80.2 percent in 2001, while

Muslim were 17.4 percent in 1991 and 19.2 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 58.0 percent male and 49.2 percent female to 56.4 percent male and 47.9 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 39.1 percent and female was 46.7 percent in 1991 and in 2001 it was 40.2 percent male and 46.7 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 3.1 percent male and 5.2 percent female while it was 2.5 percent male and 3.9 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 64.7 percent male and 86.6 percent female in 1991 which declined to 51.4 percent male and 72.5 percent female in 2001. Primary level education was 9.3 percent male and 4.1 percent female in 1991, which was 15.7 percent male and 9.6 percent female in 2001. Middle level education was 7.3 percent male and 2.2 percent female in 1991 and 12.6 percent male and 5.0 percent female in 2001. Matriculation and above level of education was achieved by 8.3 percent male and 2.4 percent female in 1991 which was 11.4 percent male and 4.7 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001, while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note : For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02%. The remaining tongues have been merged in the column of "Total of Other Mother Tongues."

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 89.5 percent person in 1991 and 86.8 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 8.8 percent and 9.7 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses, except Awadhi (2.9 percent) in the district at 2001 Census.
