MOTIF

GHANTAGHAR

During 1850-1863 district Hardoi was created under the administration of District Magistrate W.S. Chapper. Owing to freedom struggle of 1857 there had been a great fight between the army of the East India Company and the freedom fighters from areas of Madhoganj, Ruiya of Hardoi. The work of district's formation was withheld for a while and later on it was completed by the time the Victoria Charter was brought into force by 1877. Abolishing Company's rule in India, British Parliament handed over the charge to Queen Victoria and Her Highness was honoured with the crown of 'Kaiser-e-Hind'. The Queen announced general amnesty to freedom fighters of 1857 struggle. On the occasion of celebrations of enthronement of Queen Victoria on 16th February of 1886, District Magistrate Lieutinent Colonel Harns Fort held a meeting with the local residents who were associated with the 'Company' in the 1857 struggle and chalked out a plan to construct a 'Ghantaghar' (Clock-tower) as a memory. After the completion of the construction of the clock-tower, a huge clock from the Great Britain was installed on top of the tower which worked till 1959-60 only. Till then, it's melodious alarm and sound of 'bells' could be heard up to a distance of five miles which itself speaks of the historic event.

(iii) Village Directory of Sandila CD Block 483
(i) Map of Bharawan CD Block (Facing Page) 501
(ii) Alphabetical list of villages of Bharawan CD Block 502
(iii) Village Directory of Bharawan CD Block 505

(d) Appendices to Village Directory

APPENDIX I Abstract of Educational, Medical and other Amenities in villages CD Block level 524
APPENDIX 1A Villages by number of Primary School 533
APPENDIX 1B Villages by Primary, Middle and Secondary Schools 534
APPENDIX 1C Villages with different sources of drinking water facilities available 535
APPENDIX II Villages with 5000 and above population which do not have one or more amenities available 536
APPENDIX IIA Census towns which do not have one or more amenities. 538
APPENDIX III Land utilization data in respect of Census Towns/non-municipal towns 539
APPENDIX IV CD Blockwise list of inhabited villages where no amenity other than drinking water facility is available 540
APPENDIX V Summary showing number of villages having or not having Scheduled Castes population 546
APPENDIX VI Summary showing number of villages having or not having Scheduled Tribes population 547
APPENDIX VIIA List of villages according to the proportion of the Scheduled Castes to the total population by ranges 548
APPENDIX VIIB List of villages according to the proportion of the Scheduled Tribes to the total population by ranges 585
APPENDIX VIII Number of villages under each Gram Panchayat (C D block wise) 586
APPENDIX IX Statement showing number of girls schools in the villages 587

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SC's and ST's PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi, Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar

District Highlights - 2001 Census

1. District Hardoi ranks 12th in terms of population in the state.

2. The percentage share of urban population in the district is 12.0 as against 20.8 of the population in urban areas of the state.

3. Hardoi district has population density of 568 persons per sq.km.which is below the state average (690 persons per sq. km).

4. Hardoi district ranks 66th in terms of sex ratio (844) which is lower than the state average (898 females per one thousand males).

5. Hardoi district ranks 49th in literacy (51.9) which is below the state average (56.3 percent).

6. There are only 169 uninhabited villages out of total 2,070 villages in the district.

7. Decadal growth rate of the district (23.7) is lower than the state average of 25.8.

8. Hardoi tahsil has the highest number of inhabited villages 448 while Bilgram (311) tahsil has the lowest number.

9. The district has 14 towns including one census town and out of them there is no town added after 1991 census. No town has been declassified.

10. There are 560,319 households in the district accounting for 2.2 per cent of the total households in the state. The average size of households in the district is 6.4 persons.

IMPORTANT STATISTICS

			State	District
			Uttar Pradesh	Hardoi
Number of Villages		Total	107,452	2,070
		Inhabited	97,941	1,901

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

As per the legend 'Hardoi' has been derived from the word 'Haridrohi'. It is believed from Puranas a king named Hirnakashyap ruled the district in the olden times. Hirnakashyap was an enemy of God Vishnu and his son named Prahalad was given severe punishments for the reason that Prahalad was a devotee of Vishnu. Upon this Vishnu had to incarnate himself as Narsingh and killed the king. Since Hirnakashyap hated the God, thus the place derived its name as Haridrohi which in course of time become Hardoi. There is another legent which says that there was a chieftain named 'Harnakas' who too was an enemy of God which may be another reason for its name as Haridrohi. There is another version about this that Hardoi was founded by Hardev Baksa. This is also confirmed by the fact that there still exists a Mohalla (locality) in the name of Hardev Baksa. As per one more opinion there was a great saint Hardev Baba from which the district derived its name The early history of the district is based on traditions and legendary allusions of Shiva Purana which relates Hardoi with to Thathera king of Hiranya Kashyap who called himself the God. Many historical events attach political importance to the district. Mahmood Ghaznavi is said to have invaded it in 1019 A.D and the great Chausa war between Humayun and Shershah Suri was taken place near Bilgram in 1539. Hardoi formed part of Suba of Avadh under the Mughals, which was ruled by Avadh dynasty of Nawabs and formed border with the territory of

Rohillas. In 1773 a brigade of British troops was stationed near Bilgram which was shifted to Kanpur. Later till 1849, Hardoi remained as most lawless tracts in the then Avadh province. The district was annexed to the British empire in 1856 along with the rest of the Avadh province and a district was formed with its headquarters at Mallawan. After a year (1857), the first war of independence broke out, plunging the whole area in the state of anarchy. In 1858, the district headquarter was shifted to Hardoi from Mallawan and has retained its position till date.

(iii) Administrative Set up

It is believed that the district Hardoi was established 1100 years ago. From the administrative point of view, the district has been bifurcated in five tahsils and split in 19 community development block.

The district has 7 N.P.Ps. and six Nagar Panchayats. There are 12 Thanas each in rural and urban areas.

As per the political arrangement, the district Hardoi has one complete Loksabha seat and two Loksabha segments partially. There are 9 state Legislative Assembly Seats.

Jurisdictional Changes (1991-2001)

As per the administrative arrangement the creations of a new tahsil Sawayajpur had taken place vide govt. order no. 2790/1-5/97-2/84-25-5 dated 19th September 1997. In all 172 villages of Shahabad tahsil, 371 villages of Hardoi tahsil and 172 villages of Bilgram tahsil have been transferrd to newly created tahsil Sawayajpur.

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level, Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection, each tahsil is further entrusted to Naib Tahsildars and Kanoongo circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charges for development activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. Each have a department at district level office. From development point of view, the district is divided into Community Development Block Block Development Officer (BDO) looks after development works at Community Developments Block level and as assisted by Assistant Development Officer and Village Development Officers at village level.

Under the police set-up, Senior Superintendent of Police is incharge. Additional Superintendent of Police (ASP) and Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Sessions Judge. In addition there are several Additional District Judges, Civil Judges, Chief Judicial Magistrates and Munsif Magistrates etc.

The nucleus of the district body for self government is consisted of Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

Location and Size :

The district lies between Latitude 26°53' north and 27°47' north and Longitude 79° 41' and 80° 49' East. It is bounded on the north by district Shahjahanpur and Kheri. On the east the Gomti river separates it from district Kheri and Sitapur. On the south lie the districts of Unnao and Lucknow, while to the west are the districts of Shahjahanpur and Farrukhabad and for a very short distance in the south-western corner, the Kanpur district. The western boundary is formed by the river, sendha upto Daprapur. It then runs southward till at Gadanpur it strives the Ganga, which constitutes the boundary as far as the border of district Unnao. The district is an irrgular quadrilateral in shape, with its greatest length of 126 Kms. from north-west to south east and an average breadth of 74 Kms. from east to west. The district has an area of 5,986 sq.km.

Physiography :

Topography : The rivers of the district have played an important role in the topography fashion-in-style of district. The district is situated between Ganga and Gomti rivers. The making of the district has been led by the contributions of rivers. The district has been bifurcated in three subdivision from the Geographical and economic point of view.

1. Western low land : This contains chiefly three Community Blocks Harpalpur, Bharkhani and Sandi. Besides this, C D blocks, Bilgram, Madhoganj and

Malawan come in the western portion. Ramganga, Garra and Ramganga rivers flow here. This region has been constituted by the fertile soil brought by these rivers.

2. North up sub division : The up level consists of Madhoganj, Bilgram and Mallawan and the total region of Sandila, Kachanna, Kanthauvan Bharawan, Bahardar comes under it. Sai river flows in the central part of the region. The soil is 'Domat Matiyar' and 'Domat'. The C D block of Sandila has 'Usrile' soil.

3. Central level region : Sursa, Bawan, Ahrori, Tadiyawan, Pihani, Shahabad Tondarpur and Hariyawan C D blocks come in this region. The soil is Domat Sandy.

Drainage :

The main rivers of the district are Ganga, Gomti, Garra, Neelam, Ramganga, Kunda, Sendha, Sukheta and Sai. The biggest river of the district is Ganga which flows from Farukhabad towards Kanpur. Gomti river enters the boundaries of Lucknow from district Sitapur.

There are many small and big nalas flowing in the district and used for irrigation purpose. District Hardoi has many lakes and ponds. There is a 'Dahar Jheel' near Sandi which is biggest among all the lakes. This is about four kms. in length. There is another big lake in Mallawan division near Sadamau.

Climate :

The climate of the district is characterized by a hot summer and pleasant cold winter. The year may be divided into four seasons. The cold season from around the end of November to February is followed by the summer, from March to around middle of June. The period of mid June to September constitutes the south west monsoon season October and November form the post monssoon season.

On an average there has been a rainfall of 941 mms in 1999. The temperature in the preceding years has maximum 44.1^0 Celsius while minimum being 5.0^0 celsius. The months of May and June are hottest and December- January are the coldest months of the year.

Natural and Economic Resources

Forestry :

As per the land use data available in 1998-99, the area under forest is 8974 hectares. The forest assets like Banyan, Bhalk, Bamboo, Shisham, Neem and Mango trees are found in the district. Cutting and felling of trees has taken place in the district and retrieved land is being used for agriculture purposes. The wood so obtained from the trees is used for fuel purposes.

Minerals and Mining :

Geologically, the district forms part of the vast Indo-Gangetic alluvial tract. The origin of the Indo-Gangetic tract as a whole is now attributed to the sag in the earth crust formed in the upper Eocene times between Gondwana land and the raising of Himalaya belt

The economic minerals found in the district are Kankar, reh and sand.

Kankar :

The mineral is found in the usar tract as lenses of moderate to large dimensions associated with clay and sand intercalation commonly it is nodular type and used as building material. Fair quality lime is obtained from Kankar by burning it.

Reh :

The saline efflorescence, called reh, generally occurs in usar and water logged lands and is of commercial value as it, provides material for the manufacture of country glass and is also used by washer men as a substitute for soap. It is used after purification, in the form of Soda ash in soaps and for the treatment of hard water in the dye industry. Rich in sulphur contents, it is used for extraction of sulphur.

Sand :

It is obtained from the banks of the main rivers and is used extensively for building purposes.

Soil :

The whole of low lying area below the old high banks of the Ganga is precarious as it is liable to inundation which often destroy almost the entire Kharif crop. The soil, particularly of higher lands, is of a very inferior quality, irrigation is always deficient, the crops are exposed to the ravages of wild animals, while heavy rains impair the fertility of the Bhur soil. All along the old high bank of the Ganga, the soil is light and sandy.

Land and Land use Pattern :

As per the statistics available from the preceding years,Land use classification is as following :

Total area is 598,977 hectares of which forests cover 8,974 hectares, Agriculture barren land 22,304 hectares. The area of vacant land is 37,103 hectares. Other fallow land is 28,574 hectares. Usar and non cultivable land has 17,508 hectares. Besides cultivation land used for other purpose in 45,496 hectares. Pasture land was 5,157 hectares. 14,187 hectares of land is used for orchard tree plantations. Net area sown is 419,674 hectares out of total sown area is 633,733 hectares. The breakup of land use under Ravi crop is 334,230 hectares and Kharif 286,860 hectares and Zaid 12,517 hectares The land

ready for cane production account for 126 hectares. Net irrigated area is 314,982 hectares while total irrigated area is 424,895 hectares.

Agriculture and Crop Pattern :

The district kharif crop is comprised of four main produce like Jawar, Millet, Arhar, Maize and Paddy and under the Rabi wheat, gram, barley, pea, mustard, cultivation of potato is done. There is fairly good production of sugarcane in the district. During the preceeding year total cultivable area was 419,674 hectares. Net area sown was 214,059 hectars., Double cropping was done to obtain more yield in the district. Under the Rabi crop the total represented area is 334,230 hectares of which 269,042 hectares for wheat (80.5 per cent) Barley is 8,045 hectares (1.9 per cent), 11,610 the Gram (4.1 per cent) and 22,320 the mustard (6.3 per cent) was cultivated while under the Kharif total aria 286,860 hectares was reported on which. Paddy yield was 114,335 hectares (7.1 per cent), Maize accounted for 55,525 hectares (18.8 per cent), Urad accounted for 23,588 hectares (7.3 per cent), ground nut (7 per cent) is produced in 19,877 hectares.

The cash crop accounts for 23,489 hectares of land of which sugarcane account for 10,624 hectares along with potato.During the preceding years paddy yield Kharif accounts for 2,348,170 quintals. Besides the Maize yield accounted for 21,640 quintals, Jawar 203,640 quintals and Millet 66,150 quintals, like wise the Rabi accounts for 6,808,180 quintals of wheat.

In the year 1997-98 the production of wheat was 661,994 Mt. Ton. Besides this Barley accounted for 12,543 while gram 8,128 Mt. Ton and Pea 1,857 Mt. Ton.

Irrigation :

Chiefly the irrigation in the district takes place by canals and Govt. and Private tube wells. Sharda Canal is the main canal in the canal system, of which the length of canal is 1,548 kms. The district has 592 govt. tube wells.

Under the private means of irrigation, there are 2,559 pucca tube well, Rahat 2,559, ground level pump sets .154, boring pump sets 81,456 and private tube wells 2,790.

As per the available sources, total irrigated area by Canals accounts for 91,769 hectares and 16,640 hectares of land is irrigated by govt. tube wells. Irrigation of 309,222 hectares of land has taken place by private tube wells, 4,602 hectares of land is irrigated by wells and by others sources of 2,662 hectares of land was irrigated..

Animal Husbandry :

As per the animal census of 1993 there are 1,733,716 animals of which bovine animals account for 717,070 and other animals account for 398,380. Besides these, there are sheep, Indian and crossbreed, there are goats and horses and ponies, desi, crossbreed and other animals. The number of poultry farms are 117,895. For providing medical facilities to the animals there are 35 veterinary hospitals. The number of poultry forms are 117,895. Also 71 animal evelopment centres, 31 artificial insemination centre, one sheep development centre and 4 piggery development centres are functioning in the district.

Fishery :

The people of the district usually take two types of food. Food item like fish is very energetic and easily digestible. These are available in lakes and tanks of the district. For the upliftment of poor people specially fishermen, emphasis is being laid on fishery cooperative society to take up the job. To encourage this 39 tanks with an area of 81,864 hectares has been given for fisheries on lease.

Industry :

There were 17 registered workshops from where the returns have been received. The total of 3,014 persons have been deployed. In the reference year 1992-93 a production worth Rs. 6,42,640 had been recorded. Average production per capita has been recorded Rs. 213.22. Besides, Industry department established small industrial units numbering 60 employing 192 person. There are two industrial units which consists of 114 industrial plots, of which 106 have been allotted. 21 are active where 98 persons were employed with a production of worth Rs. 14,85,000. This district is backward from the industry point of view. Sandila is earmarked for industry where industries are coming up gradually.

Trade and Commerce :

The chief trade of the district is comprised of export of food grains, oil seeds unrefined sugar, tobacco and cattle. The imports are mainly foreign goods, country cloth, salt and cotton. Food grains and sugar were exported to Calcutta, Bombay, Jabalpur, Varanasi and other places. Before the construction of the railways, the goods were transported on bullock cart but now this is done by trucks or railways The principal grain market is located at Railwayganj, the site of which belongs to the muncipal board, Hardoi. The market was established by Raja Hardeo Singh and Thakur Bharat Singh. The railway station at

Hardoi started functioning in 1872. In the beginning the market was known as ganj but after the opening of the railway station, it came to be known as market of Railwayganj. The market developed into a flourishing trade centre. With the improvements of roads and other means of communication after 1947, the trade in the market has increased considerably.

Transport :

The district is connected by rail and road transport. The length of pucca roads has been 1872 kms. which come under P.W.D. while the length of roads under local bodies accounts for 139 kms. Thus the length of roads per lakh comes to be 68.1 km. under P.W.D. while the length of pucca road per thousand of population under P.W.D. is 312.7 Kms..

Total number of inhabited villages are 1901of which 1024 villages are well connected by pucca roads which are 54.38 per cent of the total villages. In order to transport goods within and outside the district there are 42 transport agencies as per the available sources. For the transportation of goods of remote places the agencies are involved. There are 83 bus stations/ bus stop.

Electricity and Power :

During the year 1998-99, all the 13 towns of the district are electrified while 1,107 villages out of 1901 inhabited villages are electrified by central electricity authorities. 1,067 schedule caste township have also been electrified. During 97-98, the consumption of the electricity accounted for was 1,75,454 thousand Kw. per hour out of which 18,952 on domestic and small power, 6,487 on commercial and small power of industries 733, out of which light and 94,082 on agriculture and 947 on public water works and sewerage thousand/hour.

Thus 10.8 per cent on domestic light 3.7 per cent on commercial, 30.92 per cent on industry, 42 per cent on public, 53.62 per cent on agriculture power and .54 per cent was consumed on water works.

Gram Panchayat, its composition, jurisdiction and role in villages development

A Gram Panchayat acts as the executive of the Gram Sabha and plays a vital role in village development. There are 1,101 Gram Sabhas in the district.

Composition :

The members of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villages.

Its term :

The new Panchayat Raj Act of 1993 has fixed a uniform term of five years for every Panchayat. It can also be dissolved earlier by the state government if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the sarpanch.

Qualifications :

In order to be elected to a village panchayat, a candidate should posses the following qualifications

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He shouid be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions :

A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a center.
5. It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.

8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine upto Rs.100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which has component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room :

A room should have four walls with a doorway and a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is

not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually-in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of hut were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's

residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

(a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

(b) A place satisfying the following three criteria simultaneously:

(i) A minimum population of 5,000;

(ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and

(iii) A density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) A city or town with one or more contiguous outgrowths;

ii) Two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a

common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya	2 Badi
3 Baiga	4 Balahar
5 Bajaniya	6 Baiswar
7 Balmiki	8 Bajgi
9 Banmanus	10 Balai
11 Barwar	12 Bangali
13 Bawariya	14 Bansphor
15 Beriya	16 Basor
17 Bhuiya	18 Beldar
19 Boria	20 Bhantu
21 Badhik	22 Bhuyiar
23 Bahcliya	24 Chero
25 Chamar, Dhusia, Jhusia, Jatawa	26 Dharkar
27 Dabgar	28 Dom
29 Dhanuk	30 Dusadh
31 Dhobi	32 Domar
33 Dhangar	34 Gharami
35 Gond	36 Gual
37 Ghasiya	38 Habura
39 Hari	40 Hela
41 Kanjar	42 Korwa
43 Karwal	44 Kalabaz
45 Kharwar (excluding Banbasi)	46 Kapariya
47 Kol	48 Khairaha
49 Khorot	50 Khatik
51 Kori	52 Lalbegi

53 Majhwar
54 Mazhabi
55 Musahar
56 Nat
57 Parahiya
58 Pankha
59 Patari
60 Pasi, Tamali
61 Rawat
62 Shilpkar
63 Sansiya
64 Saharya
65 Sanaurhiya
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops

and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometer of the area.

Age :

Age is measured in terms of the completed number of years.

Sex-ratio :

Number of females per 1,000 males in a population.

(vi) Non Census Concepts :

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these

sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1,000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1,000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1,000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1,000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1,000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1,000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of

women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 Population) :

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population

change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2

(200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution:

The total population of the district is 3,398,306 in which 2,990,993 live in rural and rest 407,313 in urban areas. There are five tahsils in the district namely Shahabad, Sawayajpur, Hardoi, Bilgram and Sandila. The most populous tahsil is Hardoi followed by Sandila, Sawayajpur is least populated tahsil. The urban population in the district is 12.0 per cent. The urban population is maximum at 16.8 per cent in Bilgram and Shahabad tahsil. There are 2,070 revenue villages, out of them 169 are un-inhabited villages. The total rural population of 2,990,993 is spread over 19 CD blocks and 1,901 inhabited villages. The most populous CD Block is Ahrori with a population of 197,828, but the maximum number of inhabited villages (162) are in Bharkhari CD Block. About half of populated villages have a population in the size of 500-999 and 1,000-1,999 and such villages form as high as about 56.1 per cent of total populated villages. Although the population density in the rural at the district is 568 highest proportion (708) of villages are with a population density range of 501 and above per square kilometer. Such villages contain as much as 44.3 per cent of total rural population.

Size-class and status of towns:

In the total urban population of 407,313 as much as 112,486 live in Hardoi (NPP) The next big town is Shahabad (NPP) with a population of 67,751. The above two are class I and II towns having the civic status of Nagar Palika Parishad (NPP). Rest of 12 towns are Nagar Panchayats (NP) + Census Town (C.T.) and Nagar Palika Parisad (NPP), out of which 5 towns are class III, 3 towns are class IV, 3 are class V towns and one is class VI towns . Shahabad tahsil contains 2 towns, while Sawayajpur tahsil has one town, Hardoi tahsil has 2 towns, Bilgram tahsil has 5 towns, whereas Sandila tahsil has 4 towns.

Population growth:

At the present territorial jurisdication the population of the district was 2,747,082 at 1991 Census and growing by 23.7 per cent during the decade 1991-2001. Total population is 3,398,306 at 2001 Census. The decadal growth at 23.7 per cent in the district has been at lower level than in the state growth rate at 25.8 per cent.

Population Density:

The district has area of 5,986 square kilometer. The population density in the district is 568. In the rural areas of the district the density is about 508.

Sex-Ratio:

The sex-ratio. in the district at 844 is way behind 898 at the State level. Indeed the sex-ratio at the district has been all along lower in the district as against to the state. As against sex ratio of urban areas of the district the sex-ratio is lower in rural areas. Among tahsils, highest sex-ratio is in Sandila and lowest in Sawayajpur. Among CD Block, the sex-ratio is highest in Sandila at 859 and lowest in

Bharkhari at 816. Out of 1,901 inhabited villages in the district, there are about 2.2 per cent villages (with 0.4 per cent of rural population) which are having a sex-ratio below 700. In the urban parts of the district the sex-ratio is 882 and highest of 916 in Pihani (NPP) and lowest of 853 in Gopamau (NP). The sex-ratio of population on the age-group 0-6 is 914 in the district, which is lower than the state being at 916. As against a sex-ratio of 914 in the age-group 0-6 of rural population of the district, it is highest at 948 in Behdar Block and lowest at 872 in Harpalpur C.D. Block. It may be noted that out of 1,901 inhabited villages in the district, in over 16.5 per cent of villages with about 19.9 per cent of rural population the sex-ratio in the age-group 0-6 is between 850-899. As against the 0-6 age-group, sex-ratio of 914 in the rural area of the district is only 913 in urban. Among towns, sex-ratio is highest at 1062 in Som (CT) and lowest at 804 in Madhoganj (NP).

Work Participation Rate:

In the total population of the district of 3,398,306 as much as 32.3 per cent are workers and rest of 67.7 per cent are non-worker. Among workers 26.6 per cent are main workers and rest of 5.7 per cent are marginal workers of total population. In absolute terms, males out number females as main worker, while females are ahead of males as marginal worker. The extent of main workers is highest at about 27.4 per cent in Sawayajpur tahsil and lowest at about 25.9 per cent in Hardoi tahsil. In case of marginal workers the proportion is highest in Sandila tahsil at 8.1 per cent in comparison to 7.3 per cent in Bilgram and 4.9 per cent in Hardoi tahsil. The extent of workers in rural areas and non-workers in urban areas is higher. In the district, among workers about 59.3 per cent are cultivators and 16.9 per cent other workers. Over 42.1 per cent of female workers are engaged as cultivators.

Literacy:

In the district 51.9 per cent population is literate. The literacy is 65.8 per cent in urban areas and 49.9 per cent in rural areas. The males literacy is at highest (64.4 per cent) as against 36.8 per cent females literacy, and therefore the gap in male/female literacy rate is 27.6 percentage points. In rural areas among 19 CD Blocks, the highest literacy is at 60.9 per cent in Mallawan and lowest at 39.4 per cent in Sandila. The literacy among males in rural areas is 63.2 per cent in comparison to 33.8 per cent among females. The lowest female literacy of 24.8 per cent is in Sandila CD Block. The gap in male/female literacy rate is highest in Sandi CD Block, which is 32.5 per cent. In 32.0 per cent of villages covering also 35.4 per cent of rural population the literacy range is 41 to 50. Among urbanites in the district, as much as 73.2 per cent males are literates as against 57.3 per cent females. The highest urban literacy is in Hardoi (NPP) at 82.0 per cent and lowest in Gopamau (NP) at 46.1 per cent. The maximum male literacy is also found in Hardoi (NPP) at 87.1 per cent and lowest at 53.4 per cent in Gopamau (NP). However, the highest females literacy is in Hardoi (NPP) at 76.2 per cent and lowest at 37.3 per cent in Gopamau (NP). The maximum gap in male-female literacy rate at 27.1 per cent is found in Som (CT). The literacy among Scheduled Castes in urban areas 52.7 per cent and 42.7 per cent in rural areas. The literacy rate of Scheduled Tribes is 12.9 per cent rural and 56.2 per cent in urban areas of the district.

(viii) Brief analysis of PCA data

The district throws up an vivid picture of its population at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted through the following inset tables.

TABLE I

DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

SL. No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Shahabad				568,579	473,283	95,296					16.8
2	Sawayajpur				456,547	441,020	15,527					3.4
3	Hardoi		NA		975,970	850,869	125,101			NA		12.8
4	Bilgram				569,163	473,262	95,901					16.8
5	Sandila				828,047	752,559	75,488					9.1

The growth rates of each tehsil in the Hardoi district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 23.7 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 23.4 and 26.3 per cent respectively . Out of the total population of the district 88.0 per cent live in rural areas while 12.0 per cent live in urban areas of the district. The proportion of urban population has slightly increased during the decade from 11.7 per cent in 1991 to 12.0 per cent in 2001 in the district. The highest growth of urban population is recorded in Shahabad, Bilgram tehsils each per cent tehsil and lowest is registered in Sawayajapur (3.4). Urban population is concentrated in Shahabad, Bilgram and Hardoi tehsils.Recent figures of 1991 census in respect of tehsils have not been calculated.

TABLE 2

NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Population less than 200			Population 200-499			Population 500-999		
			Persons	Males	Females	Number and percentage of villages	Males	Females	Number and percentage of villages	Males	Females	Number and percentage of villages	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1	Shahabad	142	154,320	84,080	70,240	8 (5.6)	388	332	25 (17.6)	5,540	4,478	43 (30.3)	16,840	13,933
2	Tondarpur	110	149,081	81,218	67,863	4 (3.6)	207	191	19 (17.3)	3,829	3,077	36 (32.7)	14,604	11,929

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1901 inhabited villages, 70 (3.7 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 271 villages having 14.3 per cent villages of the district while in the size class of 500-999 population claims 488 villages with 25.7 per cent of the total villages in the district. In all 578 villages (30.4 per cent) are in the size class of 1,000-1,999 and 439 villages (23.1 per cent) are in the size class of 2,000-4,999, 52 (2.7 percent) are villages in the district fall in the ranges of 5000-9999 population. There are only 3 villages (0.2 percent) which fall in the population ranges 10,000 and above the maximum number of inhabited villages in the district is in Bharkhari C.D. block (162), where as minimum is in Kachhauna C.D. block (46). The biggest village in the district having population of 18942 persons is located in Sursa C.D. block of district.

TABLE 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town
1

(a) New

(i) Statutory town - NIL

(ii) Census town -

1. Azirpur CT
2. Nainana Jat CT

(b) Denotified - NIL

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL

(iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified - NIL

(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district..

TABLE 4

DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	674	35 5	1,007,004	33 7
11-20	2	0 1	313	0 0
21-50	13	0 7	16,197	0 5
51-100	22	1.2	15,131	0 5
101-200	58	3 1	42,258	1 4
201-300	83	4 4	66,830	2 2
301-500	341	17.9	518,860	17.3
501 +	708	37.2	1,324,400	44 3
Not known	0	0.0	0	0 0
District Total	**1,901**	**100.0**	**2,990,993**	**100.0**

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 708 accounting for 37.2 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 44.3 per cent population. The lowest ranges of 0-10 & 11-20 persons per sq. km. cover 676 villages (35.6 per cent). 424 villages (22.3 per cent) have high density with ranges of 201-300 and 301-500 persons per sq. km. while the corresponding proportion in the lower range of 101 to 200 is 3.1 per cent of the total inhabited villages having 1.4 per cent population of the district. In the medium densities ranges of 21 to 50 and 51-100 persons account for 0.7 and 1.2 per cent of inhabited villages respectively. Both these ranges claim 1.0 per cent rural population.

TABLE 5

SEX RAXTIO OF STATE AND DISTRICT 1901-2001

2001	898	904	876	844	839	882

Note- Sex Ratio has been defined here as the numberof females per 1000 males

As per 2001 Census sex-ratio of 844 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly low as compared to the state average figures from 1901 to 1991 and remained above the state average during this period. The lowest sex ratio of 818 females per 1,000 males were recorded in the district during 1991 against the state average of 876.females.

TABLE 6

SEX RATIO BY TAHSILS, 2001

Serial Number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Shahabad	848	840	890
2	Sawayajpur	821	818	907

4	Bilgram	850	846	867
5	Sandila	855	851	895
	District Total	**844**	**839**	**882**

The table-6 gives sex-ratios for total, rural and urban areas at tehsil level as per 2001 census. There are 844 females for every thousand males in Hardoi district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 839 and 882 females respectively. The rural sex-ratio in the tehsils varies between 818 in Sawayajpur tehsil and 851 females per 1,000 males in Sandila tehsil. The sex-ratio in Sahabad tahsil, Bilgram tahsil and Sandila tahsil is higher than district rural average (839). In urban areas the highest sex-ratio is recorded in Sawayajpur (907) and the lowest is in Bilgram urban (867).

TABLE 7

SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Shahabad	835

17	Behadar	858
18	Sandila	859
19	Bharawan	848
	District (Rural) Total	**839**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 839 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 859 females is found in Sandila C.D. block and is fallowed by Behadar (858) while the lowest of 816 is recorded in Bharkhari C.D. block. The sex-ratios of Pihani, Tadiyawan, Madhoganj, Mallawan, Kothwan, Kachhauna, Behadar, Sandila and Bharawan C.D. blocks are higher than the district rural average of 839 females and in remaining blocks, this value is below the district average

TABLE 8

SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	41	2.2	11,565	0.4

District	**1,901**	**100.0**	**2,990,993**	**100**
Sex ratio (Rural) for District			**839**	

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 709 accounting for 37.3 per cent of the total villages having largest population of 44.7 per cent in the district fall in the sex-ratio range of 800-849 females per 1,000 males. It is followed by the sex-ratio range of 850-899, which claims 577 villages (30.4 per cent) and 34.8 per cent population. The highest range of 1,100 & above claims 4 villages (0.2 per cent). This range shares only 260 rural population of the district while in the sex-ratio range of 900-949, there are 151 villages (7.9 per cent). In remaining sex-ratio ranges of 950-999, 1000-1099, 750-799, 700-749 and less than 700, the number of villages are 36 (1.9 per cent), 10 (0.5 per cent), 282 (14.8 per cent), 91 (4.8 per cent) and 41 (2.2 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e. 1286 having maximum population (79.5 per cent) fall in the sex-ratio ranges of 800-899.

TABLE 9

SEX RATIO OF TOWNS, 2001

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tehsils of the district. Total population in age-group 0-6 is 660875 persons comprising 345245 males and 315630 females. The total sex-ratio in this age-group is 914 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratios in rural and urban areas are 914 and 913 females respectively. The rural sex-ratio

in tehsil varies between 882 in Sawayajpur tehsil and 937 in Sandila tehsil. The sex-ratio of Hardoi tahsil and Sandila tahsil are higher than district rural average (914) Sawayajpur tahsil has lowest sex-ratio of 883 females among the total population. In urban areas, the highest sex-ratio is recorded in Sandila. urban (943) and the lowest is found in Bilgram urban (892).

TABLE 11

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in

each range of sex-ratio in the district.

The maximum number of villages i.e. 313 (16.5 per cent) having largest population (19.9 per cent) in the district (rural) fall in the sex-ratio range of 850-899 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 900-949 which claims 309 villages (16.3 per cent) and 22.9 per cent population. Next to it, 282 villages (14.8 per cent) are in the range of 1,000-1,999 with 13.1 per cent population. 241 villages (12.7 per cent) having 13.1 per cent population fall in sex-ratio range of 800-849. In remaining sex-ratio ranges of 700-749, 750-799, 110+less than 700 and 950-999 claim less number of villages and these are distributed as 73 (3.8 per cent), 144 (7.6 per cent), 200 (10.5 per cent), 109 (5.7 per cent and 230 (12.1 per cent) respectively. It becomes clear from the table that 59.7 per cent of villages i.e. 1134 having population (71.4 per cent) fall in the higher sex-ratio ranges of 850 to 1099.

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tehsil level in rural and urban areas of the district. Of the 3,398,306 total population of the district, 31.4 per cent of the total population belongs to the Scheduled Castes and negligible papulation (203) to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 34.1 per cent in rural population and 11.1 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Hardoi tehsil (40.2) while the lowest is found in Sawayajpur tehsil (16.4). The population of Scheduled Tribes is 95 and 108 in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in Hardoi tehsil (urban) and Sandila (rural).

District (Rural) Total		**2,990,993**	**1,020,828**	**95**	**34.1**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district,. 34.1 per cent of rural population of the district belongs to Scheduled Castes and only 95 population to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 15.2 per cent in Harpalpur and 49.4 per cent in Ahrori C.D. block.. The other C.D. blocks containing higher percentage of Scheduled Castes are Kothwan (48.7), Behadar (48.5) and Sursa (47.4). The highest population (68) of Scheduled Tribes is in Bharawan C.D. block and is followed by Harpalpur (20) C.D. block. In fact, Scheduled Tribes population in the district is mainly concentrated in Bharawan and Harpalpur C.D. blocks.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

District Total	**1,901**	**100**	**1,020,828**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 116 villages accounting

for 6.1 per cent of total 1901 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 77 villages (4.1 per cent). In 161 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 328 villages constituting 17.3 per cent of the total villages. The ranges of 21-30 and 31-40 per cent contain 309 and 262 villages respectively. Both these ranges together account for 30.1 per cent villages of the district. 648 villages fall in the range of 41-50 and above percent 98 villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 5.2 per cent Scheduled Castes population of the district. The maximum of the 33.5 percent of the Scheduled Castes population is covered by range of 51-75 per cent.

TABLE - 17

PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

District and tehsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are calculated out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years is to 51.9 per cent in the district. This proportion in rural area is 49.9 per cent against 65.8 per cent in urban areas. In the district, the literacy rates of males (64.4 per cent) is much higher than that of females (36.8 per cent). Among the tehsils, Bilgram tehsil tops with 56.2 per cent literates followed by Hardoi tehsil (54.2 per cent). Sandila tehsil with 46.4 per cent literates stands at the bottom in the district. Out of 5 tehsils, the literacy rates of Bilgram, Hardoi and Sawayajpur tehsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high (27.6) per cent in the district, as a whole. The situation at tehsil level is not much different. However this gap in urban literacy is lower (15.9) points against the rural areas, where the gap between male and female literacy is 29.4 points.

District (Rural) Total		**1,197,379**	**832,005**	**365,374**	**1,793,614**	**794,213**	**999,401**	**49.9**	**63.2**	**33.8**	**29.4**

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district.49.9 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportions of male and female literates are 63.2 and 33.8 per cent respectively which shows wide gap of 29.4 per cent in male and female literacy. At C.D. block level, Mallawan C.D. block has the highest rural literacy rate of 60.9 per cent, while 73.5 per cent males and 46.0 per cent females are literates in this block. The lowest (39.4 per cent) literacy rate in rural areas is noted in Sandila C.D. block. There are wide variations in male and female literacy rate in all the C.D. blocks of the district. The maximum difference of 32.5 points is observed in Sandi C.D. block.

TABLE 23

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	1	0.0
1-10	3	0.2	549	0.0
11-20	15	0.8	15,203	0.5
21-30	86	4.5	83,814	2.8
31-40	252	13.3	432,539	14.5
41-50	608	32	1,058,316	35.4
51-60	567	29.8	937,494	31.3
61-70	280	14.7	369,023	12.3
71-80	73	3.8	83,819	2.8
81-90	12	0.6	9,902	0.3
91-99	1	0.1	306	0.0
100	3	0.2	27	0.0
District Total:	**1,901**	**100**	**2,990,993**	**100.0**
Literacy rate for District (Rural):		**49.9**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in one villages (0.1 per cent) of the district and population of this village is only one person. 3 villages (0.2 per cent) have all the literate population. 567 villages accounting for 29.8 per cent of the total villages are in the literacy range of 51-60 per cent and 280 villages (14.7 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 964 villages (50.9 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 89 villages (4.7 per cent). The range of 41-60 has the maximum number of 1175 villages forming 61.8 per cent of the total inhabited villages.

The table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in towns population at the 2001 Census. The number of illiterates is more than literates in the district (urban) and towns. The percentage of literates is least in Gopamau (N.P.) among 14 towns but the gap in male/female literate rate is highest in case of Som C.T. The males in all the towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in Madhoganj N.P. (13.8 percent) and the female literacy rate is highest in Hardoi NPP (58.5 percent).

TABLE 28

NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of CD block	Number of literates and illiterates									Gap in male/ female literacy rate

The table 28 brings out the number and percentage of Scheduled Tribes literates and illiterates by sex in CD Blocks at the 2001 Census. The number of illiterates is more than literates in the district and CD Blocks,with exception to Kothwan CD Block. The literacy rate of the Scheduled Tribes population at 12.9 percent is lower than the corresponding rate (42.7)percent in case of scheduled castes community. The gap in male and female literacy rates 9.5 percent in the district. The literacy rate is highest in Kothawan CD Block and lowest in Bharawan CD Block. The gap in male/female literacy rate in Harpalpur CD Block is in favour of the females, which is an exception and otherwise the highest gap is in case of Kothwan CD Block.

TABLE 29

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

100	2	28.6	3	3.2
District Total:	7	100	95	100.0
Literacy rate for District (Rural):		12.9		

The table 29 gives the distribution of villages by literacy rate range for the scheduled tribes population at the 2001 Census. In the district the Scheduled Tribes population is found in 7 villages out of which in 2 villages the literacy range is 100 percent. However, the maximum (71.6 percent) of the Scheduled Tribes population is found in only one village with literacy range from 1 to 10 percent. In 2 villages (20.0 percent) Scheduled Tribes population has zero percent literacy rate.

TABLE30

NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Pihani NPP	5	3	2	4	2	2	71.4	75.0	66.7	8.3

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tehsils level in the district as per 2001 Census. The proportion of the total workers is 32.3 per cent of the total population in the district. The total workers are comprised of 26.6 per cent of main workers and 5.7 per cent of marginal workers and the remaining 67.7 per cent are non-workers.

Among the main workers, male participation rate in the district is 46.2 per cent and 3.4 per cent of females. Male and female marginal workers account for 5.0 and 6.6 per cent respectively. The percentage of females marginal workers is higher than males. Total workers (main and marginal workers) in tehsils varies from 29.8 per cent in Shahabad tehsil to 35.3 per cent in Sandila tehsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 2990993 total rural population of the district, 26.9 per cent have been categorised as main workers and the marginal workers constitute 6.0 per cent and the remaining 67.1 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 46.7 per cent male main workers and 3.4 per cent females are in the category of main workers. Male and female marginal workers account for 5.0 and 7.1 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district is 32.9 per cent. At the C.D. block level, Behadar has highest proportion of total workers forming 37.9 per cent of the total population. It is closely followed by Bharawan (37.4 per cent), Mallawan (35.9 per cent), Kothwan (35.3 per cent), Sandila (35.2 per cent) and Madhoganj (35.0 per cent). The lowest percentage of 28.7 per cent is recorded in Bawan C.D. block.

Note-Percentages of category of wokers are given in brackets.

It can be seen from table 34, that economy of the district is primarily agricultural activities supported by the fact that cultivators constitute 59.3 per cent of the total workers (main+marginal) and remaining 19.1 per cent of total workers are engaged as agricultural labourers. Household industry workers are (4.7 per cent) and other workers (16.9 per cent) in this district.

The distribution of workers by four categories of economic activity at tehsil shows very high dependence of population on agriculture sector, absorbing large number of workers. The proportion of cultivators varies between 56.5 per cent in Hardoi tehsil and 73.6 per cent in Swayajganj tehsil. These variations within the district may be due to cropping and land holding patterns. The percentage of female cultivators is 42.1 per cent which is very low as compared to 62.1 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district. The workers as agricultural labourers occupy the second position next to other activities in the district as well as in each tehsil. The highest proportion of 20.6 per cent of other workers is recorded in Hardoi tehsil while the lowest proportion of 9.3 per cent is found in Sawayajpur tehsil.

Note: Percent of Worker to total worker are given in brackets

Table 35 presents C.D. blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) constitute 32.9 per cent of total population. Among these workers, cultivators contribute 64.9 per cent, 20.2 per cent agricultural labourers, 4.1 per cent household industry workers and 10.8 per cent are other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable.Household industries also could not make much progress in rural areas as reflected in the data and Household Industries employ only 4.1 per cent workers of the total working force. Therefore, surplus working force has to depend on primary activities. Among cultivators, the percentage of females (10.5 per cent) is quite lower than males (51.7 per cent) in the rural areas of the district. The males play the main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to an other. The proportion of cultivators varies between 57.2 per cent in Kachhauna C.D.block to 77.8 per cent in Bharkhari C.D. block. Similarly for Other Workers, the lowest proportion is 6.6 per cent in Bharkhari C.D.block while 15.9 per cent is the highest in Bawan C.D. block. The percentage of Agricultural Labourers and Household Industry

workers together is 24.3 per cent in the district. The percentage of agricultural labourers is highest in Bharawan C.D. block (26.9 percent) and is followed by Ahrori (24.6 percent). Household Industry workers variy in C.D. blocks between 2.1 per cent in Bharkhari and pihani and 7.9 per cent in Bilgram.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It is observed from the table that four categories of economic activity are Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas have recorded highest percentage of Other Workers (70.1), followed by Household Industry workers with 10.7 percent (7.5 percent males and 37.3 percent females). If we observe each town, the table reveals that highest percentage(29.5) of Household Industry workers (29.5) is recorded in Mallawan N.P.. The agriculture laboures vary in townes between 1.3 percent each in Hardoi and Sandila (M.B.) and 34.5 percent in Som (C.T.). The percentage of cultivators is highest(48.3) in Kursath N.P. It is followed by Gopamau N.P. and Som C.T. (30.3) percent. As per the usual trend recorded in the urban areas, Other Workers are in high percentage (90.3 percent in Hardoi M.B,.81.4 percent in Sandila M.B. and 78.8 percent in Madhoganj N.P.

(ix) Brief analysis of the Village Directory and Town Directory data :

One of the major parts of the District Census Handbook is Village and Town Directories.These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such devclopmental indicators in the towns and villages. From this non-census data, a few inset tables have been generated and reproduced below showing trends in the availability of above amenities.

TABLE 37

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the pre mises, it ia considered as having access to Improved drinking water source. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 shows the C.D. block-wise distribution of villages according to the availability of different amenities as education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1901 inhabited villages in the district 1518 villages or 79.9 per cent have been provided with the education facility of one type or the other. Similarly 463 villages in the district constituting 24.4 per cent of total villages have medical facility of one type or the other. Improved drinking water facility is available in 1868 (98.3 per cent) villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph. 298 villages constituting 15.7 per cent of villages have been provided with post office facility within the village. In all 236 or 12.4 per cent villages have been provided with the telephone facility, 242 (12.7 per cent) with transport facility, 115 (6.0 per cent) villages with bank facility and 151 (7.9 per cent) with Agricultural Credit Societies. There are 1036 or 54.5 per cent villages which have been linked with the pucca road. Total 865 or 45.5 per cent of villages have been provided with the electricity. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block level has been found with slight variation Kachhauna C.D. block has the highest 93.5 percentages of villages where educational facility is available and lowest (72.2 per cent villages) is found in Bawan. Medical facility is highest in Kachhauna (45.7 per cent) and lowest (11.7 per cent) in Bharkhari C.D. block. Improved drinking water is available to cent-percent villages in Bharawan, Sandila, Kachhauna, Sursa and Hariyawan blocks while in other blocks, it is above 95.0 per cent. Telephone facility is highest in Kachhauna (30.4 per cent) while a single village of Harpalpur C.D. block enjoy this facility. Transport and communications is less developed in Mallawan where only 4.1 per cent villages are covered by this facility whereas 24.7 per cent villages of Ahirori C.D. block are availing this facility. In the field of power supply45.5 percent villages are availing this facility.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. *If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.*

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 gives the number of inhabited villages and proportion of rural population served by different kind of amenities. Out of total rural population of 2990993 persons in the district, 2722133 or 91.0 per cent have educational facility of one or the other type. Similarly 1140589 or 38.1 per cent population has medical facility while 2963298 or 99.1 per cent avail improved drinking water facility. Post office facilities are available to 990446 (33.1 per cent) population. Telephone facility is available to 579917 or 19.4 per cent. Transport communications facility is available to 589774 or 19.7 per cent. Bank facility is available to 372795 or 12.5 per cent. 406542 or 13.6 per cent have been provided with the facility of Agricultural Credit Societies. 2020459 or 67.6 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1719007 or is visible 57.5 per cent rural population in the district. Similar pattern of availability of facilities to the rural population at C.D. block level. However, in Kachhauna C.D. block, facilities of education, medical and improved drinking water are available to larger proportion of population

TABLE 39

7. Agricultural Credit Societies	1,013	579	158	1,750

Table 39 presents distribution of villages not having certain amenities within the village at district level. Inhabitants have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table.391 villages do not have primary school in their premises and out of these villages, children of 333 villages have to travel less than 5 kms. for schooling. Out of 1901 inhabited villages as many as 1469 are deprived of middle school and 1875 of degree college. Of these 767 avail the facility of middle school at a distance of less than 5 kms., 647 at a distance 5-10 kms. and the remaining 55 at a distance of 10+ kms. In respect of degree college 192 avail this facility at a distance of less than 5 kms., 462 between 5 to 10 kms. and rest 1221 villages at a distance of 10+ kms.

Similarly there are 1850 villages in the district which are deprived of Hospital facility and 1871 villages are without PHC facility. Of these 338 villages have the facility of Hospital available within 5 kms. while in respect of 649 villages, the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility and rest 863 villages have this facility at a distance of 10+ kms. As regards PHC 248 avail this facility at a distance of less than 5 kms., 979 at a distance of 5-10 kms. and the remaining 644 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1603 villages do not have this facility in the village itself. Of these majority i.e.1080 have this facility at a distance of less than 5 kms., another 470 villages avail it at a distance of 5-10 kms. In the remaining 53 villages, habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 1665 villages in the district which are without telephone facility. Of these 784 avail this facility at a distance of less than 5 kms., 434 at a distance of 5-10 kms. and remaining 447 have to traverse a distance of 10+ kms.

For Bus service, out of 1731 villages which do not have this facility, 523 villages avail this facility at a distance of less than 5 kms., 873 at a distance between 5-10 kms. and 335 at a distance of 10+ kms.

In the entire district, 1795 villages are deprived of Commercial Banks and 1869 of Co-operative Banks. Of 1795 villages which are deprived of Commercial Banks 754 villages avail this facility at a distance of less than 5 kms., 768 between 5-10 kms. and the remaining 273 at a distance of 10+ kms. Regarding Co-operative Banks, out of 1869 villages, 237 villages avail this facility at a distance of less than 5 kms., 972 at a distance of 5-10 kms. and remaining 660 at a distance of 10+ kms. 1750 villages do not have Agricultural Credit Societies. This facility to 1013 villages is available at a distance of less than 5 kms.to 579 at a distance of 5-10 kms. and the remaining 158 at a distance of 10+ kms.

TABLE 40

DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 shows distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1901 inhabited villages in the district, there are 231 villages which have nearest towns unto a distance of 5 kms. Of these only 185 villages forming 80.1 per cent of these total villages, are having the educational facility of one type or the other and 52 villages constituting 22.5 per cent, have the medical facilities within the village, 25 villages forming 10.8 per cent have the facility of post office within the village and 28 or 12.1 per cent have the facility of telephone. 22 villages constituting 9.5 per cent are linked by transport service. 14 villages comprising 6.1 per cent have been provided bank facilities, while 14 villages constituting only 6.1 per cent have been provided by Agricultural Credit Societies. 138 villages comprising 59.7 per cent have been provided with pucca road.

There are 1178 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 945 villages constituting 80.2 per cent have been provided with the educational facilities. 302 villages comprising 25.6 per cent have been provided with medical facilities. 180 villages constituting 15.3 per cent enjoy the post office facility. 155 villages comprising 13.2 per cent have been provided the telephone facility. 158 villages constituting 13.4 per cent have been linked with transport communications. 71 villages comprising 6.0 per cent have bank facility. 103 villages constituting 8.7 per cent are having agricultural credit societies, while 645 villages or 54.8 per cent are approachable by pucca road. 413 villages fall in the distance range of 16-50 kms. Of these, (78.5 per cent) villages have educational facility, 23.0 per cent with medical, 18.4 per cent with post office, 10.4 per cent with telephone and transport and communications is available to 12.1 per cent villages. Banks and Agricultural Credit Societies facilities are available to 6.1 and 6.8 per cent of villages respectively. 48.4 percent villages have been connected with pucca road.

There is only one village in the district which is situated beyond 50 kms.from the nearest town. As the table shows that there is no facility available in the village. There are 78 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 64 or 82.1 per cent villages have the educational facility of one or other type, 14 villages constituting 17.9 per cent have the medical, 21.8 percent have the post office, 12.8 percent with telephone and transport and communication available to 15.4 percent villages. There are 5 and 6 villages which have bank and agricultural societies respectively. 53 villages have been provided with pucca road

TABLE 41

DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 shows distribution of villages by population ranges and amenities available therein. In the district out of a total 1901 inhabited villages, there are 341 villages, which have a population of less than 500 persons. Of these, 114 villages (42.2 per cent) have education facility, 16 (4.7 per cent) have medical facility, 321 (94.1 per cent) have improved drinking water facility,. 6 (1.8 per cent) have telephone facility,. 21 (6.1 per cent) have been linked by bus service. 8 (2.3 per cent) have Bank facility., 114 villages (33.4 per cent) have been linked with pucca road.and 84 villages (24.6 per cent) have been provided with electricity. There are no villages in this population range which have post office and agricultural credit societies facilities..

Out of 488 villages, which fall in the population range of 500-999 persons, 369 villages (75.6 per cent) have been provided with the education facility, 80 (16.4 per cent) with medical facility, all the villages except one village have improved drinking water facility. 18 villages (3.7 per cent) have been provided with post office facility, 32 villages (6.6 per cent) with telephone facility, 42 villages (8.6 per cent) with transport facility, 9 villages (1.8 per cent) with bank facility, 27 villages (5.5 per cent) with Agricultural Credit Societies. 224 villages (45.9 per cent) have approach by pucca road and 176 villages (36.1 percent) have been provided with electricity.

578 villages fall in population range of 1,000-1,999 persons. Of these, 530 villages (91.7 percent) have education facility, 141 villages (24.4 percent) have medical facility, 573 (99.1 per cent) have drinking water facility,. 69 villages (11.9 percent) have post office facility, 80 villages (13.8 per cent) have telephone facility, 69 villages (11.9 per cent) have transport communications facility, 24 villages (4.2 per cent) have bank facility, 37 villages (6.4 per cent) have Agricultural Credit Societies, 328 villages (56.7 per cent) have approach by pucca road and 278 villages (48.1 percent) have been provided with elecrricity.

There are 439 villages in the district which are covered under 2,000-4,999 population range. Out of these 421 villages (95.9 percent) have been provided with the education facility. 188 villages (42.8 percent) have medical facility, 432 villages (98.4 percent) have improved drinking water facility, 163 villages (37.1 percent) have post office facility. 102 villages (23.2 percent) have telephone facility, 54 villages (12.3 percent) have bank facility, 73 villages (16.6 percent) have Agricultural Credit Societies, 321 villages (73.1 percent) have been linked with pucca road and 288 villages (65.6 percent) have electricity facility. There are 55 villages in the district having a population of 5,000 persons or above. Majority of these villages have maximum facility except telephone, bank, transport communication and agricultural credit societies facility.

TABLE 42

DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of CD block	Number of inhabited villages	Total area in hectares	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area

	District Total	**1901**	**515491.6**	**N.A.**	**86.4**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1901 inhabited villages in the district having a total area of 515491.6 hectares. Of this, 86.4 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue records maintained for each village by the State Government.

The land use pattern at C.D. block level shows that the percentage of cultivable area to total area is highest (90.7 percent) in Ahrori C.D. Block and is lowest (24.1 percent) in Mallawan C.D. block. Similarly the percentage of irrigated area to total cultivable area is highest (100.0 percent) in Behdar C.D. block and is lowest (55.8) in Kothwan C.D. block.

The table 43 gives per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Hardoi is Rs 208 of which Rs 12 are derived through local taxes and the remaining Rs 196 are received from all other sources. The average of total expenditure incurred per head is Rs.164. Out of this Rs 83 are spent on general administration, Rs 29 on public health and conveniences, Rs 26 on public works, Rs 3 on public institutions and Rs 23 are spent other items. Among all the 13 towns the receipt and expenditure recorded per head are the highest in Bilgram NPP and Pihani NPP respectively.

TABLE 44

SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Table 44 shows that in urban areas of Hardoi district, the average number of primary schools per 10,000 population is 6.7 schools, 1.5 junior secondary/ middle, 0.9 secondary/matriculation, 1.1 senior secondary schools and the ratio of colleges is only 0.1 college per 10,000 population. Among the towns, the ratio of primary and junior secondary/middle is highest in Bilgram NPP and Kursath N.P.

respectively. Kursath N.P. has highest ratio of secondary/ matriculation schools while in case of senior secondary schools this position is claimed by Pali N.P. and Sandi NPP (1.3.) College education is available only in five towns namely- Bilgram, Hardoi Mallawan, Pali and Sandi.

TABLE 45

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for wooden goods, rice and Gur. The chief export items of the district are mostly the same which are manufactured in the town.

(x)Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 :

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the

houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied

TABLE 48

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 564,246 consisting of 50,5534 rural and 58,712 urban households. 195,906 households belong to Scheduled Castes and 5,254 to Scheduled Tribes, 554,472 households are living in their owned houses constituting 98.3 per cent of total households. Of these households, the largest numbers of households (209,253) have occupied single room accommodation followed by double-room accommodation numbering to 184,184 households. Next position is claimed by households (79,415) occupying three-room accommodation. Number of households in owned accommodation occupying three plus rooms rank at fourth place with 60,608 households while 20,812 households are without any exclusive room.

6,588 households living in rented accommodation account for 1.2 per cent of total number of households in the district. The largest number of 3,010 households are living in single room accommodation followed by 2,400 households in double room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 3,186 forming only 0.5 per cent of total households are distributed in single room accommodation numbering 1,444 double-room 936 and 372 in three-room accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Tempo-rary	Perma-nent	Semi-perma-nent	Tempo-rary	Perma-nent	Semi-perma-nent	Tempo-rary
1	2	3	4	5	6	7	8	9	10	11
1	Shahabad	33.3	8.6	58.1	28.6	6.7	64.7	61.5	20.4	18.1

District Total		**31.2**	**6.5**	**62.3**	**26.7**	**5.9**	**67.4**	**69.5**	**12**	**18.5**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refer to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or ot

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:- 3 Temporary houses refer to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt

The percentage distribution of households as shown in the above table reveals that more than 31.2 percent of the households in the district had permanent houses. The trend is almost similar in rural (26.7 percent) and higher in urban area (69.5 percent). Among tahsils highest proportion of permanent houses were accounted in tahsil Bilgram (37.5 percent) followed by Sawayajpur and Hardoi (34.0 percent), Shahabad (33.3 percent) and lowest in Sandila (21.0 percent). In respect of semi-permanent houses, the returns were 6.5 percent of district level where as among tahsils, in Bilgaram, it was 8.8 percent and lowest was 4.9 percent in tahsils Hardoi and Sandila. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 5.5 to 20.4 percent. Temporary houses in the district lie between the range of 53.7 to 74.2 percent.

Data source: Census of India 2001, H series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises, it is considered as having access to 'Improved drinking water supply source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note Percentage is given in brackets belowthe number of households

Bathroom means bathroom within the house. Toilet means toilet within the house. Drainage menas closed and open drainage.

The above table shows that out of total households of the district, 71.5 percent of the households had improved drinking water facility. The proportion of rural and urban area were 69.5 and 88.7 percent. Tahsil Sawayajpur had higher order of proportion of households where percentage for rural area was 79.7 and 86.2 percent respectively in urban areas. Electricity was available for 15.0 percent of households at district level. Households of the district had poor access to electricity. Bathrooms and toilet facilities available to households in the district were 19.8 and 22.4 percent respectively. Tahsil Sawayajpur was poorly served in respect of these amenities. At district level drainage facility was available for 70.8 percent of households, whereas the proportion of rural and urban areas was to 68.1 and 94.0 percent households respectively.

Percentage are in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 40.4 percent of households in the district use firewood as fuel for cooking, the proportion in the rural areas is 38.4 and in urban areas it is 57.9 percent of households. Percentage of cow dung cake reported as one of the fuels for cooking of food is 41.1 percent.. Crop residue is used for cooking in as many as 13.9 percent households (14.8 percent in rural and 6.1 percent in urban households). Percentage other methods like cooking gas, kerosene, coal, lignite charcoal, electricity and biogas etc. ranges between 0.1 percent to 3.7 percent of the households of the district. The pattern of fuel for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, cow dung cake, crop residue and LPG (cooking gas) are the predominant fuels for cooking in the district.

Data source Census of India 2001, H-series. Table on Houses, Household amenities and Assets

This table presents data to total, rural and urban areas at district/tehsil level about households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households. There are 564246 households in the district and among them, 197676 households have been availing banking services. 219285 households have Radio/Transistor. Television is possessed by 70852 households. Telephone is available in 14187 households. Bicycle is a important means of transportation and is available in 387420 households. Scooters, Motorcycles, Mopeds and Cars, Jeeps, Vans are used by 27161 and 7021 households respectively. The picture of use of banking services and possession of assets by households at tahsil level is almost similar as analysed above for the district as a whole.

(xi)Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

The town of Hardoi stands at the bank of river Gorra and Sai etc. In ancient times, the area included in district Hardoi was mostly covered with forests where saints lived in Ashram and taught their pupils who came from different parts of the country. Sandil an ancient rishi, is said to have his ashram as a place which came to be known after him as Sandila. There happended to be a Sarawati Sadan in Hardoi. Its chief objective was to popularize Hindi and to organise cultural activities like debates, elocution, contests, kavi sammelan and dramatic performances. It also runs a library cum reading room which has thousand of books of Hindi. There is a Tulsi Satsang Bhawan of at Bilgram in the name of poet Tulsidas. Folk songs, peculiar to the various festival and seasons of the year, are sung in the district - Kaharwa a dipawali, the phag during Holi, the Alha, Baramasi and Kajari during the rainy season and Birha during the winter nights. Women also sing devigeets which proceeding to take a dip in the Ganga, Sai or Gomti or visiting in melas (fairs). Folk songs are sung by the farmers while transplanting paddy. Popular folk dances of the district mention may be made of the Kaharwa, Dhobi and Mela performed on the occasion of festivals, marriages and during fairs.

(xii)Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the

towns of the district Tourist Interest:

Steps have taken to boost the tourism in the district. The mosque of Bahadur Khan is the oldest building bearing a Persian inscription dated 1057 (1647 A.D.). There are several other tombs in and around the town, notable that of Ahmad Ali Khan on the Rosa road. One of the best known mosque is in the south-west near Rajghat, and gives its name to the locality of Masjid Ganj, while another is the Sunabari mosque near the tahsil.

The old temples in the town are those dedicated to Chanksi Nath and Phoolmati Devi located in the locality of Khalil. A temple dedicated to Vishwanath is in Sadar Azikh Gurdwara is located in Khirni Bagh Bisrat ghat at Shahjahanpur and Parushram pond at Jalalabad are also popular.

(xiii)Major Characteristics & Contribution of the District:

Hardoi district has a simple characteristics as religious place since long. The place is Godly gift to the God-fearing women and devotees. The religion belief in taking dip in the river Ganga is adequate to attain salvation.The temple,ashram and other spiritual centres are the force of inspiration..The fort of the Hirnyakashyap and Prahalad on Sandi Road, Shandilaya Rishi's ashram located at Sandila town has a mausoleum of Deler Khan. There is Berna temple in Berwa village 15 Kms. away from Belamau junction.Gopamau town has Jama Masjid,.Hatyaharan pilgrame is situated on Hardoi-Kolhawan-Atrauli road, Brahmavart at Sandi. Sidhashram is laocted at Pihani-Hardoi road. There are worth visiting palces and they are being developed as the tourist centres. Besides Puranic importance., there is historical imporance. Historical events are corelated with historical events. Mahmood Gaznavi has attacked this place. The great war of Chausa which was between Munayun and Shershah took place in Bilgram in 1539.

(xiv)Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

PART - A
VILLAGE AND TOWN DIRECTORY
(SECTION I AND II)

SECTION I
VILLAGE DIRECTORY

Note explaining the abbreviations used in the village directory :

The "Village Dirctory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , their amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares is given. Wherever the area figure was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW

(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this

column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.
