NAWABGANJ BIRD SANCTUARY

Situated on Lucknow-Kanpur road Nawabganj Bird Sanctuary is one of the valuable natural Bird Sanctuary heritage variety and abundance of wildlife in the district of Unnao. The flocks of resident and migratory birds in and around the lakes have always been special attraction during winters. The contribution of birds to maintain the ecological balance is immense. Approximately 1250 species of birds among which about 300 species of birds migrate across Himalayas from Tibet, China, Europe and Siberia during winters. Some of these birds fly over 5000 km and above 8500 mts hight to reach our country. In order to promote proper protection and conservation to the resident and migratory birds Nawabganj lake and its surrounding area was declared as Nawabganj Bird Sanctuary in 1984. The arrival of migratory birds starts from the month of November. The lake is in its behest during the month of December and January. By the end of February the migratory birds gradually start leaving for their respective destinations. Some resident birds stay here throughout the year. Birds, wild animals and vegetation of the Sanctuary includes *Greylag goose*, *Pintail*, *Common teal*, *Cotton teal*, *Red crested pochard*, *Brahmini duck*, *Gadwall*, *Shoveller*, *Wigeon*, *Coot* and *Mallard* etc.

Annexure VII Age, Sex and Education in the district, 1991 Census 953
Annexure VIII Distribution of different mother tongues returned in 1991 Census 955

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth

with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri

Census Commissioner, India

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publications has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, Official Statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained Administrative Statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provide, keeping in view, the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were nine-fold industrial classification of main workers and sex-wise population in the 0-6 age group. Yet other information at the 1991 census was CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP, no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data along with inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census, the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" now seems to be a misnomer.

(ii) Brief History of the district:

The district is named after its headquarters town, Unnao. the district has remained important in the field of spiritualism, literature and political activity, Historical and archaeological facts reveal that the district existed from ancient times. Popular legend is associated with Rishi Parshuram of Ramayan Period, who lived in the jungle of Parasnandan village of tahsil Hasanganj in the district. Suryavanshi king Dashrath used to come for hunting in the jungle of the district. King Dashrath had mistakenly killed Shravan Kumar at a place of the Purwa tahsil. Sharvan is a historical and mythological place in memory of Shravan Kumar. Pariyar region of tahsil Unnao was "tapobhumi" (place of meditation) of Maharashi Valmiki, where exiled Sita lived sometime and gave birth to Lav and Kush.

About 1200 years ago, the site of Unnao town was covered with extensive forests, Godo Singh a Chauhan Rajput, cleared the forests, probably in the third quarter of the 12th century and founded a town called Sarai Goda, which shortly afterwards passed

into the hands of the rulers of Kannauj, who appointed Khande Singh as the Governor of the place. Unwant Singh, a Bishen Rajput and a lieutinent of the governor, killed him and built a fort here, renaming the place as Unnao.

In ancient times the area covered by the present district of Unnao, formed part of the region known as Kerala, which was later merged in the Suba of Avadh. Traces of ancient remains at several places in the district are fairly interesting and testify to the antiquity of those places. An important ancient site is Sanchankot, also known as Sujankot which lies in village Ramkot of tahsil Safipur. The present village is situated on a large mound on the right bank of river Sai. Stone and terracotta figures have been found scattered around these mounds. Ancient coins were also found in this site.

Local tradition also connect well known mythological personages like Bakasura, Krishna, Mayurdhawaj, Ashwathama and Astika of the era of Ramayana, Mahabharata and Puranas, with different places of the district.

Huen Tsang, the famous Chinese pilgrim to India, stayed at Kannauj for three months in 636 AD. From here he journeyed a distance of about 26 km and reached the city of Na-fa-t-po-ku-la (Navadevakula) which stood on the eastern bank of Ganga. This place, which is about 3 km north-west of Bangarmau in tahsil Safipur has been identified by some scholars as Nawal and is supposed to represent the site of an important ancient city, believed to have been upturned in the 13th century by the curse of a saint, and is still called 'Aundha Khera' or 'Lauta Shahr' both meaning an upturned city.

The freedom struggle of 1857-1858 was followed by the transfer of power from the East India Company to the British crown. As soon as order was restored, the civil administration was re-established. After the annexation of Avadh by the British in February 1856, the district then called district Purwa, came into existence and the headquarter shifted from Purwa to Unnao. The district then contained 13 Parganas.

The district has produced many freedom fighters to the nation. Martyr Chandra Sheikhar Azad and Pt. Vishambhar Dayal Tripathi has contributed greatly in the freedom struggle of the nation. In the field of Hindi literature Surya Kant Tripathi 'Nirala', Bhagwati Charan Verma, Dr. Shiv Mangal Singh 'Suman' and Chandra Bhushan Dwivedi 'Raman Kaka' has contributed invaluably.

(iii) Administrative Setup:

Geographically the district is situated in the Southern part of Lucknow Division and in the central part of the State. The seat of district administration is at Unnao.

Jurisdictional Changes (1991-2001)

A new tahsil Bighapur was created between 1991-2000 bifurcating tahsil Purwa, 313 villages and two town were transferred from purwa tahsil to new tahsil Bighapur, however, outer limits of Administrative units are as before.

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, district level officers of different departments and Local self-government. District Magistrate is in-change of revenue administration. He is assisted by Additional District Magistrate, Finance and Revenue i.e. ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Zila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development activities in the district. The other district level officers like- Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, horticulture, PWD, etc net district administration.Community Development Officers and Village Development Officers are at village level.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in smaller districts are incharge. Additional supdt. of Police (ASP) and Commanding Officer are in-charge of their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area. The judiciary system of the district consists of District Judge, Additional District Judge and Session Judge, Civil Judge, Assistant Session Judge and Munsif Magistrate.

The Nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman Executive Officer in Nagar Palika Parishad and Nagar Panchyat. Chairman District

Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government

(iv) Physical Features

Location and Size:-

The district lies between 26O 8' and 27 2' N latitudes and 80 3' E and 81 3' E Longitudes. The district is bounded in the north by district Hardoi, on the east by district Lucknow, on the south by district Rae Bareli, on the south-west by district Fatehpur and on the west by Ganga which separates it from the district Kanpur. It is spread from south-east to north-west between 40 to 50 kms. The district may be divided broadly into two main parts - the lowlands and the uplands. The lowland tract comprises about 23.7 per cent of the total area of the district. The upland extend from the bank of Ganga to the Sai valley. It comprises about 76.3 per cent area of the district. The district covers an area of 4558 sq. kms which is 1.89 per cent of the total area of. U.P. the district rectangular in shape.

Physiography :

District Unnao lies in the Middle of Ganga Plain. On the basis of geology, soils, topography, climate and natural vegetation the district is divided into the following four sub-micro regions:

Ganga Khadar:

The region is situated along the Ganga river covering parts of Shafipur, Unnao and Purwa tahsils. It is formed of rocks of Alluvium and Dun gravels of recent age. Its approximate width is 6 kms. The Ganga river flows in the boundary line of the district from north-west to south-east direction following the direction of slope of the area. There are number of small rivulets which are mostly the left out course of the Ganga river. A few to be named are Kalyan, Khar, Paira and Morahi etc. Unlike other khadar tract, there is an abrupt change in the land surface away from the Ganga river. There is a chain of mounds along the river upto Safipur, the natural levees situated in this belt indicate the extent of the old course of the Ganga. A patch of Bhur is also located near Balbadar village along the railway tract.

Safipur Plain:

The region is situated in the upper central part of the district covering the major parts of Safipur tahsil and parts of Hasanganj and Unnao tahsils. It has similar types of geology and soils as of the region above. Virtually it is a water dividing zone which bifurcates the drainage system of the Ganga on one land and the Sai and the Loni on the other. As such it is difficult to define the slope of the region. Physiographically, it is a monotonous tract. Transport and irrigational links are well developed. there are number of roads which connect different places within and outside the regions. Agriculture is also developed.

Upper Sai Catchment:

It is situated in the north-eastern part of the district in an elongated shape covering Hasanganj, Safipur and Purwa tahsils partly. It has similar type of geology and soils as of above region. The Sai is the main stream of the region which flows from the central part in Hasanganj tahsil and then follows the district boundary. There are number of tributaries of this river which join the main stream at different places. They originate from the local depressions located at different places in the region. Among the tributaries of Sai there is only one revulets which forms eroded surface along its course. There are two patches of Bhur land situated nearby Koiya Madar and Haidrabad. Although the major canals are absent but there are number of distributaries which serve the purpose of irrigation.

Unnao-Purwa Plains:

The region is situated in between Ganga Khadar and Upper Sai Catchment area covering the major portion of Purwa, Unnao and some part of Hasanganj tahsil. Land surface is relatively higher than the adjoining regions and thus it is a watershed zone. The general slope of the area is towards south. Loni alongwith its tributaries flow parallel to the Ganga river. A peculiar concentration of low depressions or Tal are situated nearby Ajgain. Some of these depressions are of serpentine shape whereas other are of ox-bow lake pattern. A zone of inland drainage is formed nearby these depressions. Nawabganj bird sanctuary has developed due to these depressions, where number of tourists visit every year.

Drainage :

The Ganga and Sai are the main rivers which flows towards south-east. There are some seasonal rivers like Kalyani, Tenai, Loni and Morahi which dries up in summer but holds water during the greater part of the year. These rivers are tributaries of the Ganga. Ganga flows about 115 kms and Sai about 135 kms in the district. There are few lakes in the district but only mentionable lake is at Nawabganj, which is spread over an area of 2.25 sq. kms. This lake is also a famous bird sanctuary where approximately 250 species of resident and migratory birds are found rowing mostly in winter season.

Ganga:

The Ganga and the Sai are the main rivers of the district, the former making its western and southern boundaries and the latter, for the greater part of its course, forming its northern and eastern boundaries. Among the other streams of the district are the Kalyani, the Tinai, the Loni and the Morahi

(Naurahi), all tributaries of the Ganga. These rivers generally run dry during the hot weather, but hold water during the greater part of the year and are utilised for irrigation by erecting temporary earthern bunds at fixed places in their courses.

Kalyani:

Rising in district Hardoi, this narrow and slow-moving stream enters the district at Jalalpur in the north of pargana Bangarmau and follows an irregular course through that pargana and pargana Fatehpur Chaurasi to meet the Ganga near Maraunda.

Tinai:

This stream rises in the Kutjari lake at Asiwan and runs through parganas Asiwan, Rasulbad and Pariyar. It is generally dry except during the rains. Its banks are high and steep and, therefore, it is entirely useless for irrigation.

Loni:

This is a small stream which rises in the Pawai tank in pargana Unnao and runs south-eastward through tahsil Purwa, where it enters about the middleof the western border of the tahsil, meeting the Ganga near Khajurgaon in district Rae Bareli. The chief tributaries of the Loni are the Kharhi, and the Surajwan. The Kharhi, a small stream, rises in the tanks of Belha and Balganj in pargana Daundia Khera and, running through pargana Bhagwantnagar, joins the Loni near Bihar, in pargana of that name.

Morahi:

This stream also known as the Gurdhoi, rises in a series of swamps in pargana Harha and flows under the old high bank of the Ganga through pargana Ghatampur and Daundia Khera to meet that river near Baksar.

Sai :

This stream, a tributary of the Gomati, which joins in district Jaunpur, rises in district Hardoi and first touches the district near village Islamabad Bijhauli in pargana Bangarmau. Running south-eastward, it separates parganas Bangarmau and Safipur from district Hardoi and enters this district near village Kursat, in pargana Safipur.

Lakes

There are an unusualy large number of swamps and lakes of great size and value, particularly in the southern and eastern parts of the district. The largest lakes, which hold water all the year round, are the Kundra Samundar near Jhalotar, the lake near Nawabganj, the wide expanse of water near Kantha and the long chain of lakes in pargana Mauranwan. In tahsil Hasanganj, besides the Kundra Samundar at Mawali, there are the Kulli Bani and Jalesar tanks near Ajgain and the chain of lakes called Basaha, which, it seem, partakes of certain characteristics of a stream also, traversing distance of 96 km. in the district and eventually leaving it for district Rae Bareli where it is reckoned as a tributary of the river Sai. In tahsil Purwa there are many lakes, situated largely in a well defined belt stretching along the whole length of the tahsil. The lakes at Kantha, Sagauli and Barela contain water all the year round, while the others generally provide irrigation for the Rabi crops only, drying up in years of drought. These lakes and tanks abound in fish and Singharas (water chest net).

Climate:

The climate of this district is characterized by a hot dry summer and pleasant cold season. There is no metrological observatory in the district, but on the basis of records of observatories in neighbouring districts, where similar climatic conditions prevail, it would appear that from about the end of February temperature increase rapidly till May, which is generally the hottest month, the maximum temperature then being about 27° C (80.6° F) and the maximum temperature then being about 41° C (105.8° F). The heat in summer is intense and scorching dust-laden winds which blow on many days make the weather very tiring. The maximum temperature on some days goes up to 45° C (113.0° F), or even higher. Afternoon thunder-showers, which occur during the summer, give some relief though only temporarily. With the onset of the monsoon, day temperature fall appreciably, but nights continue to be as warm as in the latter part of summer towards the end of the monsoon in September and October, day temperature rises slightly, but night temperature goes down rapidly. After october, day temperature also decreases steadily. January is generally the coldest month, the maximum temperature being about 22° C (71.6° F) and minimum temperature about 8° C (46.4° F). During the cold season, the minimum temperature drops occasionally to about 4° C (39.2° F) when cold waves strics the district in the wake of passing western disturbances. The district has four rain gauge stations at Unnao, Purwa, Safipur and Hasanganj with extending records over years. The average annual rainfall varies in the tahsils of the district specially in Unnao and Purwa. About 80 per cent of the annual rainfall is received during the south-west monsoon months i.e. June to September. July is the rainest month. The variation in the rainfall from year to year is large. In the south-west monsoon season, relative humidity is high, being over 70 per cent. From october humidity begins to decrease and in summer, which is the driest part of the year, relative humidity in the afternoon drops to less than 25 per cent. In the monsoon season the sky is mostly cloudy. In the rest of the year clear or lightly clouded conditions prevail

but in the cold season, in association with passing western disturbances, sky becomes cloudy for brief spells of a day or two.

Winds are generally light to moderate in the district. During the period of October to April, winds blow mostly from directions between the west and the north-west. From May winds from directions between the north-east and the south-west begin to blow. In the south-west monsoon season winds blow either from directions between the south-east and the north-east or between the south-east and the north-west.

Natural and Economic Resources:

Forestry:

The district is not very rich in forests reserves. An area of 16,705 hectares is covered under forest, which is about 3.67 per cent of the total area. Due to inferior quality of forest land, output of wood per hectare is very low. Social forestry scheme is being implemented with the help of World Bank. Plantation of trees is being undertaken in government and public lands. In the domat clayey and usar tracts and along the banks of rivers and nullahs, the babool, bamboo, ber, khair, sissoo and munj trees are being grown. In the areas where the soil is sandy, the kanji, arru, semal, bamboo, khair and teak trees are being grown.

Minerals & Minning:

Availability of mining products in this district is almost nil. Barring sand and pebble, which are used for construction of houses, there are no other mineral of importance found in the district.

Soil:

In the low-land of the district, the soil is clayed but in some areas, the soil is sandy. In the upland part of the district, the soil is clayey and alluvial but in the central part, barren land (Usar) is growing at place of wide depression in which clay predominates.

The district possesses two main portions, the tarai or lowlands, lying along the banks of the Ganga, and the uplands, which extend eastwards from the high banks of that river. All along the immediate banks of the river lies a stretch of alluvial land which is constantly subject to inundations. Beyond this tract, which is directly subject to fluvial action, lies a stretch of lowland with large areas unfit for cultivation and a constant liability to disastrous floods. On the other hand, the spring crops in this tract, are generally excellent. In parganas Unnao and Harrha there are extensive stretches of waste land covered with coarse grass, tamarisk and babul. The autumn harvest is precarious and for this reason the Rabi (spring) covers a decidedly more extensive area. The land in the district is of average fertility. The cultivated land usually fertile but at the same time there are considerable stretches of inferior soil, light and sandy bhur, which is peculiarly susceptible to drought and is accordingly regarded as generally precarious. The soil is, for the most part, a fertile loam of light texture similar to that which prevails throughout Avadh. Clay is found in some places, while elsewhere,. especially in the west and the north, there is a high proportion of sand. Here and there salt earth is to be found, but the manufacture of salt would not be profitable owing to the meagreness of the expected yield. The large area of barren waste area striking characteristics of this district, tahsil Purwa having the biggest area of such land.

Land and Land-Use Pattern:

The ecomnomy of district Unnao is based on agriculture. Maximum land is used for cultivation. Samajikarthie Samiksha 1998 shows that net area sown was 296,297 hectares. Forests area covered 16,704 hectares, unculturable land 14,933 hectares, present fallow 33705 hectares, Other fallow 32,792 hectares, Pastures 3,343 hectares and orchards covered an area of 4,625 hectares. Land holding are small in size. Land holdings of the size of less than one hectare covered more than 75 per cent of the total land holdings.

Agriculture and Crop Pattern:-

The agriculturists of the district are generally wedded to old and well- tried methods of agriculture and the standards of cultivation is as a whole high. As in other districts of the plains, there are three main harvests, Kharif, Rabi and Zaid. Of these the Zaid or the intermediate cropes of not much importance. In the Kharif crop paddy is the most important from point are the area under it. The Kharif crop millets, juwar and pulses like arhar, urd, moth and moong are worth mentioning. In the Rabi crop wheat is the most important. Other important Rabi crops are Barley Gram, Pea oilseed and mustard. Of the Rabi arhar is the most important. The other products are groundnut, onion, garlic, vegetables and fruits.

Total area sown during 1996-97 for wheat was 190,563 hectares, paddy 91,070 hectares, Juwar 12,790 hectares, maize 36,603 hectares and gram 10,208 hectares. Average output of main crops were, wheat 22.77 quintals per hectare, paddy 15.96 quintals, barley 11.90 quintals, jawar 6.41 quintals, maize 14.79 and gram 8.49 quintals per hectare (source-sankhikiya patrica 98).

For providing infra-structural facility to the agriculture sector of the district, there were 34 seed/ fertilizer depots, 16 insecticide depots, 7 cold storages and 4 agriculture service centres. For storage of crops, there were 73 warehouses managed by State warehousing. food Corporation of India and Cooperative sector. for providing reasonable price

for crops to the farmers, three marketing centres are being run at Unnao, Purwa and Bangarmau by Krishi Utpadan Mandi Samiti.

Irrigation:

Irrigation plays a vital role in the augmenta-tion of agricultural production. Irrigation of the agricultural land in the ponds have normally sufficient water for the paddy crop. Irrigation of the agricultural land in the district depend on canal network. during 1997-98, the length of canal was 175 kms. There are other sources of small and medium level of irrigation. There were 154 government and 7,294 private tubewells, 2,852 wells and 49,567 pumping sets.

Animal Husbandry:

Animal husbandry is an important part of the rural economy. It is an important source of income for small and marginal farmers. Accorrding to the live-stock census 1993, there were 5.82 lakhs of bovine population and buffaloes stood at 3.66 lakhs. Besides these, there were 264,189 goats, 59,301 sheep and 82,534 pig in the district. For improvement of live-stock, emphasis is being given on improving breeds and providing health care facilities for animals. Till 1998, there were 46 veterinary dispensaries, 37 animal centres, 51 artificial insemination centres and done sheep development centre and 2 pig development centres.

Fishery:

Fishery provides source of income to the weaker section of the society. It also provides good food enriched with protein to the under nourished people. Sai, Kalyani and Ganga rivers and many ponds are available for fisheries in the district. Fisheries department is providing fingerlings to the willing fishermen. Number of ponds under fisheries department were 24 during 1997-98 covering an area of 370.7 hectares. In the same year fisherman distributed 12,821 thousand fingerlings to the fishermen.

Industry:

Tropographical status of Unnao industrial area is of great importance and is congenial for industrial requirement being totally free from any residential vicinity and having availability of roadways, railways and airport lying very close. Banks are very close and financial institutions like IDBI, PICUP etc. are also available in the radius of 40 and 60 kms (at Kanpur and Lucknow). Yet the district is lagging behind in the field of industry. Though the industries of Unnao are very small, however, it may attract the industrialists and entreprenures of leather as well as other fields. Unnao industrial area is having about 198 registered under Factories act 1948 (1998 Sankhikaya Patrika). Leather industries are main units and most of them are export oriented units. These leather industries manufacture mainly shoe and leather goods such as saddler and harness goods. There are many tanneries also. Leather industries of Unnao have set up a common effluent treatment plant as per scheme of Ministry of Environment and Forest, Government of India with the assistance of World Bank which is treating 20 laks litres waste water every day. Some of the prominent industries of the district are Mirza Tanners Ltd, Super House Leathers Ltd. and Kings international Ltd. During the year 1997-98 small units numbring 2,603 were in operation; of which 2,531 related to Khadi Udhyog, tow village industry, 7 engineering units, 8 chemical, 48 and 7 miscelleneous with total working man power of 1,235 persons.

Trade and Commerce:

Communication system were good enough in the greater part of the district in the twenties of this century. Village markets were numerous and well distributed over the area. In addition to Unnao, the other developing centres of trade were Purwa, Mauranwan and Safipur. The proximity of Unnao to Kanpur was serious obstacle in the development of trade in the district, as far as the trade of food grains is concern together the maximum advantage the agriculturists obtained better prices at Kanpur than locally. Mustard oil, grains and vegetables were mainly exported to Kanpur. The establishment of several large-scale industries at Magarwara and Unnao after 1953 has considerably added to the variety of the exports of the district. Sulphuric acid, superphosphates, liquor fertilizers and cattle and poultry feed and raw leather (ride) are exported in large quantities to Knapur. It is primarily a satellite town between Lucknow and Kanpur.

Transport:

District Unnao is welll connected by railways and road. There are 25 railway stations including halts and the railway track running in the district is nearly 150 kms. Unnao is an important junction in Lucknow-Kanpur rail route. Roads make great contribution in the economic development of the district. Length and condition of the roads are the basic components of infra-structural development of an area. Construction of roads is labour oriented work and provides employment to the rural segments of the district during construction. With large investments in construction of roads, network of road communication increases and enlarges the avenues for social economic development. All the tahsils and towns are connected by roads with district headquaters and surrounding places. The length of roads in the district was 1,795 kms. till 1997-98. Out of this which roads maintained by PWD is 1,663 kms. National Highway covers a length of 67 kms and

State highway coverd length of 178 kms. Unnao is connected by bus services with the districts of Kanpur, Hardoi, Lucknow and Rae bareli.

Electricity and Power:

Electricity plays a pivotal role in the Socio-economic development of an area. All the tahsils headquarters and towns are electrified. Till 1997-98 nearly 1,046 villages of the district have been electrified. Total consumption of electricity upto 1996-97 was 213,014 thousand kwh, out of which consumption of industries dominated with 81,264 thousand kwh followed by 67,598 thousand kwh on domestic light and minor elecric power. Per capita consumption of electricity was 11 kwh during 1996-97 year.

Gram Panchayat, its composition, jurisdiction and role in villages development

A Gram Panchayat acts as the executive of theGram Sabha. Gram Pradhan is elected from almost villages for a period of five years.

Composition :-

The members of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 511 gram sabhas in the district. It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villages.

The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand. The panchayat normally meets once in a month. If ned he, an emergency meeting canal so be called by the Sarpanch.

In order to be elected to a village panchayat, a candidate should posses the following qualifications

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions:-

A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a centre.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area of the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine upto Rs. 100

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence etc.

Usually a structure has four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc. and the household also stays in it, then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household, then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut, if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

(a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

(b) A place satisfying the following three criteria simultaneously:

(i) a minimum population of 5,000;

(ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

(iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban', all villages, which, as per the 1991 Census had a population of 4,000 and

above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

(i) a city or town with one or more contiguous outgrowths;

(ii) two or more adjoining towns with their outgrowths; and

(iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specifica-

tion of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	2	Badi
3	Baiga	4	Balahar
5	Bajaniya	6	Baiswar
7	Balmiki	8	Bajgi
9	Banmanus	10	Balai
11	Barwar	12	Bangali
13	Bawariya	14	Bansphor
15	Beriya	16	Basor
17	Bhuiya	18	Beldar
19	Boria	20	Bhantu
21	Badhik	22	Bhuyiar
23	Baheliya	24	Chero
25	Chamar, Dhusia, Jhusia, Jatawa	26	Dharkar
27	Dabgar	28	Dom
29	Dhanuk	30	Dusadh
31	Dhobi	32	Domar
33	Dhangar	34	Gharami
35	Gond	36	Gual
37	Ghasiya	38	Habura
39	Hari	40	Hela
41	Kanjar	42	Korwa
43	Karwal	44	Kalabaz
45	Kharwar (excluding Banbasi)	46	Kapariya
47	Kol	48	Khairaha
49	Khorot	50	Khatik
51	Kori	52	Lalbegi
53	Majhwar	54	Mazhabi
55	Musahar	56	Nat
57	Parahiya	58	Pankha
59	Patari	60	Pasi, Tarmali
61	Rawat	62	Shilpkar
63	Sansiya	64	Saharya
65	Sanaurhiya	66	Turaiha

Scheduled Tribes

1	Bhotia	2	Buksa
3	Jaunsari	4	Raji
5	Tharu		

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People

who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any eco-nomically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The

type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain etc. in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed off locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \text{S ASFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times a \text{ ASMFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz.,

Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-49 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/

he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parent's/relative's house is in a place different from usual place of residence, the place where the hospital or parent's / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / Towns. These Class I UAs. /Towns are now further sub classified into seven sub classes namely, M1 to M7 depending on the population size of UA/ City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with 50,000 to 99,999 population are classified as Class II towns; 20,000 to 49,999 population are Class III towns; population with 10,000-19,999 are Class IV towns; population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are, in any respect, unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population.Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population its Distribution etc :

The total population of the district is 2,700,324 in which 2,288,781 live in rural and rest 411,543 in urban parts. There are 5 tahsils in district namely Safipur, Hasanganj, Unnao, Purwa and Bighapur. The most populous tahsil is Unnao followed by Hasanganj, Bighapur is least populated tahsil. The urban population in the district is 15.2 per cent. The urban population is maximum at 31.3 per cent in Unnao tahsil. There are 1,794 revenue and 105 uninhabited

villages. The total rural population of 2,288,781 is spread over 16 CD blocks and 1,689 inhabited villages. The most populous CD Block is Sikandarpur Karan with a population of 185,066 but the maximum number of inhabited villages (141) are in Hasanganj CD Block. About half of populated villages have a population in the size of 500-999 and 1000-1999 and such villages form as high as a 61.3 per cent of total populated villages. Although the population density in the rural of the district is 512 and highest proportion (44.6) of villages are with a population density range of 501 per square kilometer. Such villages contain as much as 49.6 per cent of total rural population.

Size-class and status of towns:

In the total urban population of 411,543 as much as 144,662 live in Unnao NPP the next big town is Gangaghat NPP with a population of 70,803. The above two are class I and II towns having the civic status of Nagar Palika Parishad (NPP). Rest of 17 towns are Nagar Panchayat (N.P.)+ C.T. out of which 3 towns are class III, 3 towns are class IV, and 11 are class V towns. Safipur tahsil contains 6 towns, Hasanganj tahsil has 6 towns, Unnao tahsil has 3 towns. Purwa tahsil has 2 towns and Bighapur tahsil also has 2 towns.

Population growth:

At the present territorial jurisdication the population of the district was 2,200,397 at 1991 Census and growing by 22.7 per cent during the decade 1991-2001 it is 2,700,324 at 2001 Census. The decadal growth at 22.7 per cent in the district has been at near equal level than in the state at 25.8 per cent.

Population Density:

The district has an area of 4,558 square kilometres. The population density in the district is 592. In the rural areas of the district the density is 512.

Sex-Ratio:

The sex-ratio in the district is 871 as against state is 898. Indeed the sex-ratio at the district has been all along lower in the district as against to the state except 1961, 1971 and 1981. As against to urban areas of the district the sex-ratio is lower in rural areas during 2001. Among tahsils, highest sex-ratio is in Bighapur and lowest in Safipur. Among CD Block the sex-ratio is highest in Bighapur at 960 and lowest in Ganj Moradabad at 856. Out of 1,689 inhabited villages in the district there are 0.7 per cent villages (with 0.1 percent of rural population) which are having a sex-ratio below 700. In the urban parts of the district the sex-ratio is 898 and highest of 969 in Purwa NP and lowest of 850 in Majhara Pipar Ehatmali (CT). The sex-ratio of population on the age-group 0-6 is 923 in the district which is higher than the state being only at 916. As against a sex-ratio of 927 in the age-group 0-6 of rural population of the district, it is highest at 948 in Hasanganj Block and lowest at 908 in Asoha C.D. Block. It may be noted that out of 1,689 inhabited villages in the district in over 15.7 per cent of villages with 23.5 per cent of rural population the sex-ratio in the age-group 0-6 is between 900-949. As against the 0-6 age-group sex-ratio of 927 in the rural area of the district and tahsil is only 898 in urban. Among towns this sex-ratio is highest at 1,011 in Hydrabad NP and lowest at 815 in Ugu NP.

Work Participation Rate:

In the total population of the district of 2,700,324 as much as 34.3 per cent are workers and rest of 65.7 per cent are non-worker. Among workers 25.4 per cent are main workers and rest of 8.9 per cent are marginal workers of total population. The extant of main workers is highest at 26.2 per cent in Purwa tahsil and lowest at 24.4 per cent in Bighapur tahsil. In case of marginal workers the population is highest in Purwa tahsil as 12.2 per cent in comparison to 11.1 per cent in Bighapur and 9.2 per cent in hasanganj tahsil. The extent of workers in rural aparts and non-workers in urban parts is higher. In the district among workers 53.5 per cent are cultivators and 20.6 per cent other workers. Over 44.8 per cent of female workers are engaged as cultivators.

Literacy:

In the district 54.6 percent population is literate. The literacy is 69.1 per cent in urban areas and 51.9 per cent in rural areas. The males literacy is higher 66.3 per cent as against about 41.6 per cent females literacy, and therefore the gap in male/female literacy rate is 24.7 per cent. In rural areas among 16 CD Blocks, the highest literacy is at 64.4 per cent in Bighapur and lowest at 41.1 per cent in Auras. The literacy among males in rural areas is 64.5 per cent in comparison to 37.9 per cent among females. The lowest female literacy of 27.0 per cent is in Auras CD Block. The gap in male/female literacy rate is highest in Purwa CD Block which is 30.2 per cent. In 30.0 per cent of villages covering also 30.6 per cent of rural population the literacy range is 51 to 60. Among urbanites in the district, as much as about 76.0 per cent males are literates as against 61.5 per cent females. The highest urban literacy is in Bighapur NP at 79.1 per cent and lowest in Ganj Moradabad NP at 46.1 per cent. The

maximum males literacy is also found in Bighapur at 86.8 per cent and lowest at 57.7 per cent in Ganj Moradabad NP. However, the highest females literacy is in Bighapur NP at 68.9 per cent and lowest at 37.6 per cent in Ganj Moradabad NP. The maximum gap in male-female literacy rate at 25.4 per cent is found in Auras NP. The literacy among Scheduled Castes is in the countryside it is 43.0 per cent and 56.8 per cent in towns. The literacy rate for Scheduled Tribes in the rural areas is 23.4 per cent and 24.0 per cent in urban areas.

(viii) Brief Analysis of Primary Census Abstract Data based on inset Tables 1 to 36 :

The district throws up a vivid picture of its population at the 2001 Census.

A few of the peculiar characteristics of the population are being highlighted through the following inset tables.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Safipur	NA	NA	NA	612,438	531,196	81,242	NA	NA	NA	NA	13.3
2	Hasanganj	NA	NA	NA	634,553	584,232	50,321	NA	NA	NA	NA	7.9
3	Unnao	NA	NA	NA	741,450	509,265	232,185	NA	NA	NA	NA	31.3
4	Purwa	NA	NA	NA	398,237	362,903	35,334	NA	NA	NA	NA	8.9
5	Bighapur	NA	NA	NA	313,646	301,185	12,461	NA	NA	NA	NA	4.0
District Total:		**2,200,397**	**1,901,099**	**299,298**	**2,700,324**	**2,288,781**	**411,543**	**22.7**	**20.3**	**37.5**	**13.6**	**15.2**

The growth rate of district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 22.7 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 20.3 and 37.5 per cent respectively. Out of the total population of the district 84.8 per cent lives in rural areas while 15.2 per cent lives in urban areas of and district. The proportion of urban population has slightly increased during the decade from 13.6 per cent in 1991 to 15.2 per cent in 2001 in the district. The highest growth of urban population is recorded in Unnao tahsil (31.3 per cent) and lowest is registered in Bighapur tahsil (4.0 per cent). Urban poulation is concentrated in Unnao and Safipur tahsil. The recent figures of 1991 census have not been calculated.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Ganj Moradabad	85	128,421	69,197	59,224	3 (3.5)	222	168
2	Bangarmau	76	137,504	73,356	64,148	0 (0.0)	0	0
3	Fatehpur Chaurasi	106	130,622	69,671	60,951	3 (2.8)	200	166
4	Safipur	109	134,649	71,539	63,110	3 (2.8)	210	154

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1689 inhabited villages, 58 (3.4 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 300 villages having (17.8 per cent) villages of the district while in the size class of 500-999 population claims 550 villages with (32.6 per cent) of the total villages in the district. 484. villages (28.7 per cent) are in the size class of 1,000-1,999 and 248 villages (14.7 per cent) are in the size class of 2,000-4,999. There are 40 villages (2.4 per cent) in the district fall in the range of 5,000 - 9999 population while in the size class of 10,000 and above population claims 9 villages with 0.5 per cent of total villages in the district. The biggest village in the district having population of 17,292 persons is located in Sikandarpur Karan C.D. block of district.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	468	27.7	674,365	29.5
11-20	3	0.2	3,258	0.1
21-50	9	0.5	1,894	0.1
51-100	14	0.8	6,316	0.3
101-200	40	2.4	21,107	0.9
201-300	97	5.7	70,299	3.1
301-500	304	18.0	375,414	16.4
501 +	754	44.6	1,136,128	49.6
Not known	0	0.0	0	0.0
District Total:	**1,689**	**100.0**	**2,288,781**	**100.0**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 754 accounting for 44.6 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 49.6 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 468 villages (27.7 per cent) and 3 villages (0.2 per cent) have very low density. In the medium densities ranges of 21 to 50 and 51-100 persons account for 0.5 and 0.8 per cent of inhabited villages respectively. Both these ranges claim 0.4 per cent rural population.

Table - 5
SexRatio of State and District 1901-2001

Census Year	UTTAR PRADESH			UNNAO		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	957	956	971
1911	916	922	866	903	906	862
1921	908	918	834	889	890	860
1931	903	916	813	890	894	810
1941	907	922	824	896	898	864
1951	908	922	827	902	905	844
1961	907	921	817	892	895	784
1971	876	884	826	889	891	809
1981	882	889	850	889	891	875
1991	876	879	864	873	872	880
2001	898	904	876	871	862	890

Note : Sex-Ratio has been defined here as the number of females per 1000 males.

As per 2001 Census sex-ratio of 871 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly low as compared to the state average figures from 1901 to 2001, exception to 1901, 1971 and 1981 Census. The lowest sex ratio of 871 females per 1,000 males were recorded in the district during 2001 against the state average of 898 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in both district and state except only 1991 and 2001 census report in the district.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Bighapur	959	962	901
2	Hasanganj	887	885	902
3	Purwa	927	925	947
4	Safipur	877	872	911
5	Unnao	886	886	885
	District Total:	**898**	**898**	**898**

The table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 898 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is equal than that of urban areas. The sex-ratio among rural and urban population is same i.e. 898. The rural sex-ratio in the tahsils varies between 872 in Safipur tahsil and 962 females per 1,000 males in Bighapur tahsil. The sex-ratio in Bighapur tahsil and Purwa tahsil is higher than district rural average (898). In urban areas the highest sex-ratio is recorded in Purwa tahsil (947) and the lowest is in Unnao tahsil.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Ganj Moradabad	856
2	Bangarmau	874
3	Fatehpur Chaurasi	875
4	Safipur	882
5	Auras	868
6	Mianganj	882
7	Hasanganj	885
8	Nawabganj	904
9	Sikandarpur Sarausi	869
10	Bichhiya	902
11	Sikandarpur Karan	889
12	Asoha	903
13	Purwa	958
14	Hilauli	935
15	Bighapur	960
16	Sumerpur	958
	District (Rural) Total:	**898**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 898 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 960 females is found in Bighapur C.D. block and is fallowed by Sumerpur (958) while the lowest of 856 is recorded in Ganj Moradabad C.D. block. The sex-ratios of Nawabganj, Bichhiya, Asoha, Purwa, Hilauli, Bighapur and Sumerpur C.D. block are higher than the district rural average of 898 females and in remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	11	0.7	1,455	0.1
700-749	19	1.1	9,298	0.4
750-799	70	4.1	52,137	2.3
800-849	279	16.5	343,980	15.0
850-899	496	29.4	866,398	37.9
900-949	397	23.5	598,904	26.2
950-999	215	12.7	259,628	11.3
1000-1099	170	10.1	139,888	6.1
1100+	32	1.9	17,093	0.7
District Total:	**1,689**	**100.0**	**2,288,781**	**100.0**

Sex ratio (Rural) for District: 898

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 496 accounting for 29.4 per cent of the total villages having largest population of 37.9 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 900-949 which claims 397 villages (23.5 per cent) and 26.2 per cent population. The highest range of 1,100 & above claims 32 villages (1.9 per cent). This range shares 0.7 per cent rural population of the district while in the sex-ratio range of 950-999, there are 215 villages (12.7 per cent). In remaining sex-ratio ranges of 1000-1099,800-849, 750-799, 700-749 and less than 700, the number of villages are 170 (10.1 per cent), 279 (16.5. per cent), 70 (4.1per cent), 19 (1.1 per cent) and 11 (0.7 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 496 having maximum population (29.4 per cent) fall in the sex-ratio ranges of 850-899 females and above showing that in majority of villages the sex-ratio is significantly higher.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio
1	2	3	4
1	Auras	NP	904
2	Bangarmau	NPP	920

5	Bighapur	Total	50,135	26,190	23,945	914
		Rural	48,365	25,220	23,145	918
		Urban	1,770	970	800	825
District Total:		**Total**	**476,318**	**247,730**	**228,588**	**923**
		Rural	**413,914**	**214,850**	**199,064**	**927**
		Urban	**62,404**	**32,880**	**29,524**	**898**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age-group 0-6 is 476,318 persons comprising 247,730 males and 228,588 females. The total sex-ratio in this age-group works out 923 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 927 and 898 females in this age-group respectively. The rural sex-ratio in tahsil varies between 914 in Bighapur tahsil and 935 in Hasanganj tahsil. The sex-ratio of Hasanganj tahsil is higher than district rural average (927), Bighapur tahsil has lowest sex-ratio of 914 females among the total population.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	**2**	**3**	**4**	**5**	**6**
1	Ganj Moradabad	24,729	12,843	11,886	925
2	Bangarmau	27,373	14,222	13,151	925
3	Fatehpur Chaurasi	25,331	13,184	12,147	921

14	Hilauli	27,398	14,239	13,159	924
15	Bighapur	19,780	10,359	9,421	909
16	Sumerpur	22,745	11,803	10,942	927
	District (Rural) Total:	**413,914**	**214,850**	**199,064**	**927**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 927 for the district (rural). The sex-ratio of C.D. block varies between 908 to 948. It is highest in Hasanganj C.D. block i.e. 948 followed by 944 in Mianganj C.D. block and lowest 908 females is found in Asoha C.D. block. The sex-ratio of Auras, Mianganj, Hasanganj, Nawabganj, Sikandarpur Sarausi, and Bichhia C.D. block are higher than the district rural (927) and Sumerpur equals to the district average while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	113	6.7	10,354	2.5
700-749	65	3.8	9,993	2.4
750-799	121	7.2	21,857	5.3

District (Rural) Total	**1,689**	**100.0**	**413,914**	**100.0**
Sex ratio (Rural) for District:		**927**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 295 (17.5 per cent) having population (17.2 per cent) in the district (rural) fall in the sex-ratio range of 1000-1099 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 900-949 which claims 265 villages (16.0 per cent) and 24.0 per cent population. Next to it, 243 villages (14.4 per cent) are in the range of 1100 and above with 7.3 per cent population. 210 villages (12.4 per cent) having 16.0 per cent population fall in sex-ratio range of 850-899. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, 800-849, and 950-999 claim less number of villages and these are distributed as 113 (7.0 per cent), 65 (4.0 per cent), 121 (7.2 per cent), 188 (11.1. per cent and 189 (11.2 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 992 having population (63.6 per cent) fall in the higher sex-ratio ranges of 900 to 949 and above.

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomerations/towns 2001. In urban area of the district total population in age group of 0-6 is 62,404 in which 32,880 males and 29,524 females and sex ratio of the urban areas of the district is 898. Among 19 towns sex ratio in age group 0-6 varies from 796 in Bhagwantnagar (NP) to 1011 in Hyderabad (NP). In 8 towns sex ratio is more than the district urban average.

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 2,700,324. total population of the district, 30.6 per cent of the total population belong to the Scheduled Castes and no per cent to Scheduled Tribes. There are only 957 scheduled tribes population in the district. The percentage of Scheduled Castes population constitutes 33.5 per cent in rural population and 14.7 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Hasanganj tahsil (38.1), while the lowest is found in Unnao tahsil (24.4). The proportion of Scheduled Tribes population is 0.0 and 0.1 per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in urban areas of tahsils Hasanganj and Unnao and in the rural area of tahsil Bighapur.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

District (Rural) Total:		**2,288,781**	**766,941**	**742**	**33.5**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 33.5 per cent of rural population of the district belongs to Scheduled Castes and 0.0 per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 27.0 per cent in Sikanderpur Karan and 45.3 per cent in Auras C.D. block.. The other C.D. block containing the highest percentage of Scheduled Castes are Hasanganj (42.5), Mianganj (36.7) and Asoha (36.6). The highest proprotion of Scheduled Tribes population is counted in Sumerpur C.D. Block and is followed by Bichhiya C.D. Block. The lowest percentage of Scheduled Tribes population is recorded in Sikanderpur Sarausi C.D. Block. Out of 16 CD blocks, only 4 CD blocks have the Scheduled tribes population and each CD block has 0.1 per cent scheduled tribes population of the total population.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage

District Total	**1,689**	**100.0**	**766,941**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 40 villages accounting for 2.4 per cent of total 1689 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5 per cent in 33 villages (2.0 per cent). In 79 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 221 villages constituting 6.4 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 383 and 363 villages respectively. Both these ranges together account for 44.2per cent villages of the district. 64 villages fall in the range of 76 and above per cent. 242 villages are such where the proportion of Scheduled Castes is between 41-50 per cent. These villages contain 19.4 per cent Scheduled Castes population of the district. The maximum of the 69.5 per cent of the Scheduled Castes population is covered by ranges of 21-50 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Table 18 shows number and percentage of scheduled caste and scheduled tribes population recorded during 2001 census in district Unnao. The table depicts that scheduled caste population in Ugu and Auras (NP) were around 30 per cent but low (6.3 per cent) in the Kursath town. Scheduled tribe population is negligible in the urban areas of the district. There are scheduled tribe populations in only 4 towns out of 19 towns. Highest percentage (1.1) of scheduled tribe population was recorded in Nawabganj (NP).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS,

Sl. No.	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

	District (Rural) Total	**913**	**841**

Table 19 indicates sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 913 for district (rural). Among the C.D.blocks, the highest sex ratio of 1,005 females is found in Bighapur C.D. block and lowest of 856 females is recorded in Ganj Moradabad C.D. block. This table also shows sex ratio of Scheduled Tribe population in rural areas of

the district is 841 out of 16 CD blocks, 3 blocks have no scheduled tribes population. The highest sex ratio of 3,000 females is found in Sikanderpur Karan CD block and lowest of 556 females is recorded in Mianganj CD block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial	Name of U.A./ Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

18	Ugu NP	889	0
19	Unnao NPP	921	727
Sex ratio (Urban) for the district:		**914**	**822**

Table 20 shows sex-ratio among scheduled castes and scheduled tribes in urban agglomerations/ towns 2001. Among 19 towns sex ratio of scheduled castes is highest in Nawabganj town (1,020) and it is lowest in Majhara Piper Ehatmali town (831). 15 towns have sex ratio zero in scheduled tribes population. It means ST female population is zero. In urban area of the district sex ratio of Scheduled Castes and Scheduled Tribes are 914 and 822 respectively.

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 54.6 per cent in the district. This proportion in rural area is 51.9 per cent against 69.1 per cent in urban areas. In the district the literacy rates of males (66.3 per cent) is much higher than that of females (41.6 per cent). Among the tahsils, Bighapur tahsil tops with 63.2 per cent literates followed by Unnao tahsil (61.2 per cent). Hasanganj tahsil with 49.2 per cent literates stands at the bottam in the district. Out of 5 tahsils, the literacy rates of Bighapur and Unnao tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 24.7 per cent in the district, as a whole. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 14.5. points against the rural areas, where the gap between male and female literacy is 26.6 points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

	District (Rural) Total:	**973,760**	**638,959**	**334,801**	**1,315,021**	**566,693**	**748,328**	**51.9**	**64.5**	**37.9**	**26.6**

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district.51.9 per cent of the total rural population excluding the age-group of 0-6 years literates in the district. The corresponding proportion of male and female literates comes to 64.5 and 37.9 per cent respectively which shows very wide gap of 26.6 per cent in male and female literacy. At C.D. block level, Bighapur C.D. block has the highest rural literacy rate of 64.4 per cent while 77.1 per cent males and 51.3 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Auras C.D. block (41.1 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 30.2 points is found in Purwa C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.1	5	0.0
1-10	5	0.3	1,253	0.1
11-20	14	0.8	7,074	0.3
21-30	65	3.8	63,076	2.8
31-40	199	11.8	262,350	11.5
41-50	466	27.6	749,186	32.7
51-60	507	30.0	700,019	30.6
61-70	316	18.7	387,992	17.0
71-80	104	6.2	113,545	5.0
81-90	9	0.5	4,132	0.2
91-99	1	0.1	142	0.0
100	1	0.1	7	0.0
District Total:	**1689**	**100.0**	**2,288,781**	**100.0**
Literacy rate for District:		**54.6**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 2 village (0.1 per cent) of the district and population of these villages is only 5 persons. One village (0.1 per cent) have all the literate population. 507 village accounting for 30.0 per cent of the total villages are in the literacy range of 51-60 per cent and 316 villages (18.7 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 749 villages (44.3 per cent) of the district. The higher literacy ranges of 71 to 99 per cent covers 114 villages (6.8 per cent). The range of 41-60 have the maximum number of 973 villages forming 57.6. per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Bighapur town is way ahead of other towns. The table reveals that literacy rate is high in the urban areas of the district (69.1). The literacy rate is high (above 81.0 per cent in four towns) among males. Female literacy rate is not for behind in two towns (above 68.0 per cent). However, literacy rate among females is very low (37.6 per cent) in Ganj Moradabad town, thus the gap in male female literacy rate is high (14.5).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

District (Rural) Total:		**265,325**	**181,127**	**84,198**	**501,616**	**219,733**	**281,883**	**43.0**	**56.0**	**28.7**	**27.3**

Table 25 shows number and percentage of scheduled castes literates and illiterates by sex in CD blocks 2001. In rural areas of the district proportion of literates is 43.0 per cent in which 56.0 per cent Males and 28.7 per cent Females. Thus, the gap in male and female literacy rates is 27.3. Among 16 CD blocks, Bighapur CD block has the highest (53.0) literacy rate and Auras CD block has the lowest (35.0) literacy rates. The gap in male/ female literacy rates in Purwa CD block (29.7) is highest and this gap is lowest in Sikanderpur Sarausi CD block(23.3).

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5

	District (Urban) Total	**28,416**	**17,512**	**10,904**	**31,898**	**13,995**	**17,903**	**56.8**	**67.1**	**45.5**	**21.6**

The table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/ towns population at the 2001 census. The number of illiterates is more than literates in the district (urban) and towns. The percentage of literates is least in Ganj Moradabad (NP) among 19 towns but the gap in male/female literate rate is highest in case of Auras (NP). The males in all the towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in Maurawan (NP) and the female literacy rate is highest in Majhara Pipar Ehatmali. (CT)

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

The table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is higher than literates in the district and CD Blocks. The literacy rate of the scheduled tribes population at about 23.4 per cent is lesser than the corresponding rate it is 56.8 per cent in case of scheduled castes community. The gap in male and female literacy rates at about 19.7 per cent is lesser than what it is in case of the scheduled castes community (21.7 per cent). The literacy rate of highest in Bangarmau CD Block and lowest in Nawabganj CD Block. The highest gap in male/ female literacy rate is in Purwa CD Block.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

District Total:	**29**	**100.0**	**742**	**100.0**
Literacy rate for District (Rural):		**23.4**		

The table 29 gives the distribution of villages by literacy rate range for the scheduled tribes population at the 2001 census. In the district the scheduled tribes population is found in 29 villages out of which in one village the literacy range is 100 per cent. However, the maximum (32.7 per cent) of the scheduled tribes population is found in only 5 villages with literacy range from 11 to 20 percentages.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

The table 30 gives number and percentage of scheduled tribes literates and illiterates by sex in urban agglomerations/town population at the 2001 census. There is small scheduled tribes population (215) in the towns of the district. In 14 towns there is no scheduled tribe population. In Nawabganj (NP) which have highest scheduled tribe population, the percentage of literates is 3.5 per cent in which 4.3 per cent males and 2.6 per cent females are literates. In urban areas of the district proportion of literates is 24.0 per cent in which 32.3 males and 12.5 females. The gap in male/female literacy in the district is 19.8 per cent.

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out 34.3 per cent of the total population in the district. The total workers are comprised of 25.4 per cent of main workers and 8.9 per cent of marginal workers and the remaining 65.7 per cent are non-workers.

Among the main workers, males participation rate in the district is 43.1 per cent and 5.6 per cent of females. Male and female marginal workers account for 6.9 and 11.1 per cent respectively. The percentage of females marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 31.7per cent in Unnao tahsil to 38.4 per cent in Purwa tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 2,288,781 total rural population of the district, 25.9 per cent has been categorised as main workers and the marginal workers constitute 9.7 per cent and the remaining 64.4 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 43.8 per cent males and 6.0 per cent females are in the category of main workers. Male and female marginal workers account for 7.1 and 12.6 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 35.6 per cent. At the C.D. block level, Purwa has highest proportion of total workers forming 41.7 per cent of the total population. It is closely followed by Asoha (41.2 per cent), Nawabganj (37.7 per cent), Auras (37.2 per cent), Hilauli. (36.6 per cent) and Bighapur (35.6) per cent. The lowest percentage of 32.9 per cent is recorded in Ganj Moradabad and Sikandarpur Sarausi C.D. block.

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 53.5 per cent of the total workers (main + marginal) and remaining 21.6 per cent of total workers are engaged as agricultural labourers, Household industry workers (4.3 per cent) and other workers (20.6 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 38.8 per cent in Unnao tahsil and 61.6 per cent in Purwa tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 44.8 per cent which is low as compared to 56.1 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the third position. The highest proportion of 39.5 per cent of other workers is recorded in Unnao tahsil while the lowest proportion of 11.2 per cent is found in Purwa tahsil.

Note: Percent of Worker to total worker are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) 35.6 per cent of total population. Among these workers, cultivators constitute 59.5 per cent, 23.6.per cent agricultural labourers, 3.7 per cent household industry workers and 13.2 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 3.7 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (47.2 per cent) is lower than males (63.5 per cent) in the rural areas of the district.The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 44.6 per cent in Sikanderpur Karan C.D. block to 69.6 per cent in Hilauli C.D. block. Similarly for other workers, the lowest proportion is 6.2 per cent in Hilauli C.D. block while 27.4 per cent is the highest in Sikanderpur Karan C.D. block. The percentage of agricultural labourers and household industry workers together is 27.3 per cent in the district. The percentage of agricultural labourers is highest in Sumerpur C.D. block (33.8.) and is followed by Asoha (27.8.). In other C.D. blocks, this proportion is quite insignificant. Household industry workers is quite low i.e.3.7 per cent in the district and varies between 1.9 per cent in Purwa and 6.7 per cent in Mianganj CD block.

Note: percentage of workers to total workers are given in brackets.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban

areas recorded highest percentage of other workers (74.4), followed by cultivators with 10.0 per cent (10.3 per cent male and 7.3 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (42.8) is recorded in Rasulabad (NP). The percentage of agricultural labourers is quite low (7.3 per cent) and varies in between 1.9 per cent in Gangaghat (NPP) and 34.1 per cent in Bhagwant Nagar (NP). Household industry workers are also very low (8.4 per cent) in the district. The percentage of male (6.1 per cent) is very lower than females (25.3 per cent). As the usual trend recorded in the urban areas, other workers are in high percentage (90.6 per cent) in Majhar Pipear Ehatmale (CT), 89.9 per cent in Unnao (NPP), 77.7 per cent in Bangermau (NPP) and 74.6 per cent in Nawabganj (NP).

(ix) Brief analysis of the Village Directory and Town Directory data :

One of the major parts of the District Census Handbook are Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in towns and villages. From this non-census data, inset tables have been generated and reproduced below showing major trends in the availability of above amenities:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the Household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1689 inhabited villages in the district 1298 villages or 76.9 per cent have been provided with the education facilities of one type or the other. Similarly 413 villages in the district constituting 24.5 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1669 or 98.8 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 251 villages constituting 14.9 per cent of villages have been provided with post office facility within the village. 481 or 28.5 per cent villages have been provided with the telephone facility, 183 or 10.8 per cent with transport facility, 88or 5.2 per cent villages with bank facility and 144 or 8.5 per cent with agricultural credit societies. Similarly there are 767 or 45.4 per cent villages which have been linked with the pucca road. Total 1000 or 59.2 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Ganj MoradabadC.D. Block has the highest 88.2 per cent villages where educational facility is available and lowest 61.7 per cent is found in Sumerpur. Medical facility is highest in Hilauli (38.2per cent) and lowest (16.0 per cent) in Bighapur C.D. block. Improved drinking water is available in most of the villages in all the CD blocks. Telephone facility is highest in Hasanganj (39.7 per cent) while only 8 villages of Auras C.D. block enjoy this facility. Transport and communications is less developed in Fatehpur Chaurasi where only 3.8 per cent villages are covered by this facility whereas 18.7 per cent villages of Auras C.D. block are availing this facility. In the field of power supply 59.2 per cent villages have been covered in the district.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

			Type of amenity available					Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 2288781 persons in the district, 2068897 or 90.4 per cent have educational facility of one or the other type. Similarly 998527 or 43.6 per cent population has medical facilities while 2280555 or 99.6 per cent have got improved drinking water facility. Post office facilities are available to 801235 or 35.0 per cent population. Telephone facility is available to 920055 or 40.2 per cent. Transport communications facility is available to 394490 or 17.2 per cent. Bank facility is available to 328077 or 14.3 per cent. 423576 or 18.5 per cent have been provided with the facility of agricultural credit societies. 1383028 or 60.4 per cent have been provided with the facility of approach by pucca road. Power supply is available to 71.6 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. However, in all the C.D. blocks facilities of education and improved drinking water are available to larger proportion of population

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

	Distance range of place from the villages where the amenity is available			
Village not having the amenity of	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	376	29	1	406

(b) Cooperative Bank	305	802	555	1,662
7. Agricultural Credit Societies	947	473	125	1,545

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 406 villages do not have primary school in their villages and out of these villages, children of 376 villages have to travel less than 5 kms. for schooling Out of 1,689 inhabited villages as many as 1,335 are deprived of middle school and 1,677 of degree college. Of these 913 avail the facility of middle school at a distance of less than 5 kms., 392 at a distance 5-10 kms. and the remaining 30 at a distance of 10+ kms. In respect of degree college 191 villages avail this facility at a distance of less than 5 kms., 403 between 5 to 10 kms. and rest 1,083 villages at a distance of 10+ kms.

Similarly there are 1,653 villages in the district which have been devoid of Hospital facility and 1,657 villages which are deprived of PHC facilities. Of these 429 villages have the facility of Hospital available within 5 kms. while in respect of 650 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility and rest 574 villages have this facility at a distance of 10+ kms. As regards PHC 279 avail this facility at a distance of less than 5 kms., 795 at a distance of 5-10 kms. and the remaining 583 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1438 villages do not have this facility in the village itself. Of these majority i.e. 1,002 have this facility at a distance of less than 5 kms., another 383 villages avail it at a distance of 5-10 kms. In the remaining 53 villages habitants have

to travel a distance of 10+ kms.

As regards Telephone, there are 1208 villages in the district which are without telephone facilitiy. Of these 641 avail this facility at a distance of less than 5 kms., 357 at a distance of 5-10 kms. and remaining 210 have to travail a distance of 10+ kms.

For Bus service out of 1583 villages which do not have facility, 573 villages avail this facility at a distance of less than 5 kms., 728 at a distance between 5-10 kms. and 282 at a distance of 10+ kms.

In the entire district 1611 villages are deprived of Commercial Bank & 1662 of Co-operative Bank. Of these 1611 villages which are deprived of Commercial Banks 736 villages avail this facility at a distance of less than 5 kms., 628 between 5-10 kms. & the remaining 247 at a distance of 10+ kms. Regarding Co-operative Banks out of 1662 villages 305 villages avail this facility at a distance of less than 5 kms., 802 at a distance of 5-10 kms. and remaining 555 at a distance of 10+ kms. 1545 villages do not have agricultural credit societies. This facility to 947 villages is available at a distance of less than 5 kms., 473 at a distance of 5-10 kms. and the remaining 125 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village.Out of total 1689 inhabited villages in the district, there are 345 villages which have nearest towns upto a distance of 5 kms. Of these only 254 villages forming 73.6 per cent of these total villages, are having the educational facilities of one type or the other and 74 villages constituting 21.4 per cent, have the medical facilities, 28 villages forming 8.1 per cent have the facility of post office and 85 or 24.6. per cent have the facility of telephone. 37 villages constituting 10.7 per cent have been linked by transport service. 13 villages comprising 3.8 per cent have been provided bank facilities, while 22 villages constituting only 6.4 per cent have been provided by agricultural credit societies. 174 villages comprising 50.4 per cent have been provided with pucca road.

There are 1095 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 855 villages constituting 78.1 per cent have been provided with the educational facilities. 276 villages comprising 25.2 per cent have been provided with medical facilities. 184 villages constituting 16.8 per cent enjoy the post office facility. 322.villages comprising 29.4 per cent have been provided the telephone facility. 124 villages constituting 11.3 per cent have been linked with transport communications. 64 villages comprising 5.8 per cent have bank facility. 102 villages constituting 9.3 per cent are having agricultural credit societies, while 479villages or 43.7 per cent are approachable by pucca road. 190 villages fall in the distance range of 16-50 kms. Of these, 74.7 per cent villages have educational facility, 25.8 per cent with medical, 17.4 per cent with post office, 30.0 per cent with telephone and transport & communications available to 10.0 per cent villages.

Banks agricultural credit societies and approach by pucca road facilities are available to 4.2, 8.4, and 45.3. per cent of villages.

There are no villages in the district which are situated beyond 50 kms.from the nearest town. There are 59 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 47 or 79.7 per cent villages have the educational facility of one or other type. 14 village constituting 23.7 per cent have the medical facility. 6 villages forming 10.2 per cent have the facility of post office, 17 or 28.8 per cent villages have the facility of telephone, 3 villages constituting 5.1 per cent have been linked by transport service and bank facilities. 4 villages 6.8 per cent and 28 villages 47.5 per cent have the facility of agricultural credit societies and approach by pucca road respectively.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In the district out of a total 1689 inhabited villages, overwhelming 358 have a population of less than 500 persons. Of these, 124 villages (34.6 per cent) have education facility, 12 (3.4 per cent) have medical facility, 344 (96.1 per cent) have improved drinking water facility. 43 (12.0 per cent) have telephone facility. 20 (5.6 per cent) have been linked by bus service. 6 (1.7 per cent) have Bank facility. 101 villages (28.2 per cent) have been linked with pucca road. and 148 villages (41.3 per cent) have been provided with electricity. There are no village in this range, which has post office and agricultural credit societies facilities.

Out of 550 villages, which fall in the population range of 500-999 persons, 435villages (79.1 per cent) have been provided with the education facility, 80 (14.5 per cent) with medical facility, all the villages except 5 villages have improved drinking water facility. 35 villages (6.4 per cent) have been provided with post office facilities, 128 villages (23.3 per cent) with telephone facility, 38 villages (6.9 per cent) with transport facilities, 6villages (1.1 per cent) with bank facility, 21 villages (3.8 per cent) with agricultural credit societies & 23 villages (42.4 per cent) have approach by pucca road. And 297 villages (54.0 per cent) have been provided with electricity..

484 villages fall in population range of 1,000-1,999 persons. All of these villages have improved drinking water facilities out of these 448 villages (92.6 per cent) have education facilities.. Whereas 127 villages (26.2 per cent) enjoy the medical facility, 53 villages (11.0 per cent) have post office facility, 168villages

(34.2 per cent) have telephone facility, 53 villages (11.0 per cent) have transport communications facilities, 22 villages (4.5per cent) have bank facilities, 43 villages (8.9 per cent) have agricultural credit societies 212 villages (43.8 per cent) have approach by pucca road and 307 villages (63.4 per cent) have been provided with electricity.

There are 248 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy the facility of education and improved drinking water except 5 and 1 villages respectively. 157 villages (63.3 per cent) have medical facility. 119 villages (48.0 per cent) have post office facility, 30.villages (12.1 per cent) have bank facility, 59 village (23.8 per cent) is having agricultural credit societies. 11 villages (44.8 per cent) have telephone facility. 55 villages (27.2 per cent) have transport communication facility. 174 villages (70.2 per cent) have been linked with pucca road and 202 villages (81.5 per cent) have electricity facility. Out of 40 villages which are in the population range of 5,000-9,999 persons, 90 per cent and above villages have education, improve drinking water, post office, approach by pucca road and power supply facilities. There are only 9 villages in the population range of 10,000 and above persons. All the 9 villages have educational, improved drinking water, approach by pucca road and power supply facilities.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Ganj Moradabad	85	9,961.8	96.7	84.9
2	Bangarmau	76	23,847.5	74.8	90.4
3	Fatehpur Chaurasi	106	30,123.0	24.3	92.2
4	Safipur	109	15,384.0	81.8	80.0
5	Auras	91	40,075.9	41.6	82.7
6	Mianganj	135	22,225.4	62.5	80.0
7	Hasanganj	141	23,360.1	69.7	88.1
8	Nawabganj	119	13,379.8	97.4	79.2
9	Sikandarpur Sarausi	86	23,286.6	63.4	75.7
10	Bichhiya	82	17,551.7	80.2	85.2
11	Sikandarpur Karan	109	14,001.6	49.6	78.4
12	Asoha	119	15,771.2	99.7	91.5
13	Purwa	103	16,613.6	68.1	82.8
14	Hilauli	68	N.A	78.6	90.8
15	Bighapur	119	13,896.4	N.A	77.4
16	Sumerpur	141	23,442.1	60.3	80.6
	District Total:	**1,689**	**303,058.5**	**66.0**	**83.4**

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,689 inhabited villages in the district having a total area of 303,058.5 hectares. Of this, 66.0 per cent is cultivable and 83.4.per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

The land use pattern at CD block level shows that the percentage of cultivable area to total area is highest (99.7 per cent) in Asoha CD block and is lowest (24.3 per cent) in Fatehpur Chaurasi CD block. Similarly the percentage of irrigated area to total cultivable area is highest (92.2 per cent) in Fatehpur Chaurasi CD block and is lowest (75.7 per cent) in Sikanderpur Sauausi CD block.

The table 43 gives the per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Unnao works out to Rs. 145 of which Rs. 18 are derived through local taxes and the remaining Rs 127 received from all other sources. The average of total expenditure incurred per head is Rs 127. Out of this Rs 56 are spent on general administration, Rs 14 on public health and conveniences, Rs 38 on public works and Rs. 19 is spent other items. Among all the 18 towns the receipt and expenditure recorded per head are the highest in Nyotini (NP).

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7

1	2	3	4
1	Auras, NP	--, --, --	Mango, Wheat, Rice
2	Bangarmau, NPP	Incense Stick, Mainda, Chikan Goods	Wheat, Rice, Reed Oil
3	Bhagwant Nagar, NP	Utensil, Incense Stick, Shoes	Brass, Incense Stick, Shoes
4	Bighapur, NP	--, --, --	--, --, --
5	Fatehpur Chaurasi, NP	--, --, --	--, --, --
6	Gangaghat, NPP	--, --, --	--, --, --
7	Ganj Muradabad, NP	Carpet, Khadi Cloth, Bakery	--, --, --
8	Hyderabad, NP	Lai, Chura, Earthen Pots	Lai, Wheat, Mango
9	Kursath, NP	Embroidery Work, Embroidery, Lai	Chiken, Rice, Mango
10	Majhara Pipar Ahatmali, CT	--, --, --	--, --, --
11	Maurawan, NP	Batasa, --, --	Rice, Wheat, --
12	Mohan, NP	Chura, Chikan Garments, Mango	Mango, Guava, Chura
13	Nawabganj, NP	--, --, --	--, --, --
14	Nyotini, NP	Lai Chura, Earthen Pots, Bangles (Lakhi)	Mango, Guava, Lai
15	Purwa, NP	Rice, --, --	Rice, Potato, Wheat
16	Rasulabad, NP	Lai, Chura, Earthen Pots	Lai, Wheat, Mango
17	Safipur, NP	Rice, Mustard Oil, Gold Ornaments	Rice, Mango, Potato
18	Ugu, NP	Rice, Chura, Shoes	Wheat, Rice, Maize
19	Unnao, NPP	Quilt, Leather Goods, Reed Oil	Wine, Leather Goods, Reed Oil

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for a Leather Goods, Lai-Chura, Mud utensils and Rice. The chief export items of the district are mostly the same that are manufactured in the towns.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001 :

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. have been added in the schedule for the first time . The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied:

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 472,017 consisting of 407,323 rural and 64,694 urban households. 159,954 households belong to Scheduled Castes and 6032 to Scheduled Tribes. 45,823 households are living in their owned houses constituting 97.1 per cent of total households.Of these households, the largest number of households (152,914) have occupied double roomed accommodation and is followed by single roomed accommodation numbering to 150,459.households. Next position is claimed by households (78,469) occupying three rooms accommodation. Number of households in owned accommodation occupying three plus roomed at fourth place with 65,126 households while 11,263 households are without any exclusive room.11,207 households living in rented accommodation account for 2.4 per cent of total number of households in the district. The largest number of 6894 households are living in single roomed

accommodation followed by 3061 households in double roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 2,579 forming only 0.5. per cent of total households are distributed in single roomed accommodation numbering 1,299 double roomed 656 and 329 in three roomed accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

	District Total:	**30.8**	**13.4**	**55.7**	**24.6**	**13.7**	**61.8**	**70.4**	**11.8**	**17.8**

Data source: *Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.*

Note:-

Permanent:- Permanent houses refer to those houses whose walls & roofs are made of pucca materials, i.e., where burnt briks, G.I. Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- Temporary houses refer to those houses having wall and roofs made of Kutcha materials, i.e., where, grass, leaves, reeds, bamboo, mud and unburnt bricks are used for the construction of walls and grass, leaves, reeds, bamboo hatch, mud, unburnt bricks and wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that more than 30 per cent of the households in the district had permanent houses. The trend is almost similar in rural (24.6 per cent) and different in urban area (70.4 per cent).Among tahsils highest proportion of permanent houses were accounted in tahsil Unnao (47.4 per cent) followed by Bighapur (36.3 per cent), Safipur (26.4 per cent) and lowest in Hasanganj (18.8 per cent). In respect of semi-permanent houses, the returns were 13.4 per cent of district level where as among tahsils, in Bighapur it was 17.5 per cent and lowest was 11.1 per cent in tahsil Safipur. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 6.5 to 34.0 per cent. Temporary houses in the district lie between the range of 38.9 to 69.3 per cent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises, it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is given in brackets after the number of households. Bathroom means bathroom within the house.Toilet means toilet within the house. Drainage menas closed and open drainage.

The above table shows that out of total households of the district 65.2 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 62.0 and 85.8 per cent. Tahsil Unnao had higher order of proportion of households where percentage for rural area was 62.1 and 94.0 per cent in urban areas. Electricity was available for 17.1 per cent of households at district level. the break up for rural and urban areas remains to be 9.5 per cent and 64.7 per cent. Bathrooms and toilet facilities were available in 30.4 and 21.4 per cent of households. Tahsil Hasanganj

poorly served in respect of these amenities. At district level drainage facility was available for 76.2 per cent of households, whereas the proportion of rural and urban areas households accounted 74.0 and 90.4 per cent. In respect of drainage facility the proportion of availability was much better as compared to the other facilities of the district.

TABLE 51 : NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Total house-holds	Fire wood	Crop residue	Cowdung cake	Electricity	Coal / Lignite (charcoal)	Cooking gas (L.P.G.)	Bio-gas	Kerosene	Others	No cooking

		Rural	**407,323**	**258,959**	**54,556**	**83,329**	**329**	**297**	**6,897**	**332**	**1,810**	**251**	**563**
				(63.3)	**(13.4)**	**(20.5)**	**(0.1)**	**(0.1)**	**(1.7)**	**(0.1)**	**(0.4)**	**(0.1)**	**(0.1)**
		Urban	**64,694**	**29,537**	**3,548**	**2,063**	**55**	**1,349**	**21,526**	**157**	**6,247**	**59**	**153**
				(45.7)	**(5.5)**	**(3.2)**	**(0.1)**	**(2.1)**	**(33.3)**	**(0.2)**	**(9.7)**	**(0.1)**	**(0.2)**

It is observed from the above table that 61.1 per cent of households in the district use firewood as fuel for cooking, the proportion in the rural area is 63.3 and in urban area it comes to 45.7 per cent of households. Cow dung Cake has been reported as one of the fuel for cooking of food 18.1 per cent of the households. The composition of rural and urban comes to 20.5 and 3.2 per cent respectively. Crop residue is used for cooking in as many as 12.3 per cent of the households (13.4 per cent rural and 5.5 per cent urban households). The other methods like LPG (cooking gas, Kerosene, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.1 per cent to 6.0 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, Crop residue and cow dung cake are the predominant fuel for cooking in the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Total number of households	Total number of households availing banking	Availability of household assets

District Total:		**Total**	**472,017**	**142,000**	**175,260**	**84,770**	**16,240**	**345,135**	**28,147**	**5,906**	**94,074**
		Rural	**407,323**	**113,038**	**147,319**	**52,985**	**7,553**	**304,108**	**17,937**	**4,128**	**81,157**
		Urban	**64,694**	**28,962**	**27,941**	**31,785**	**8,687**	**41,027**	**10,210**	**1,778**	**12,917**

This table presents data of total, rural and urban areas as district/tahsil level about households availing banking services and possession of assets such radio/ transistor, telephone, bicycle, scooter and car etc. by the households. There are 472,017 households in the district and among them, 142,000 households availing banking services. 175,260 households have radio/ transistor. Television is possessed by 84,770 households.Telephone is available in 16,240 households. Bicycle is available in 345,135 housholds. Scooter, Motorcycle, Moped and Car, Jeep Van are used by 28,147 and 5,906 households respectively. The picture in use of banking services and possession of assets by households at tahsils level is almost similar as analysed above for the district as whole.

(xi) Major social and cultural Events, Natural and Administrative Development and significant activities during the decade

During last decade a new tahsil Bighapur has been carved out from the tahsil Purwa. No major social and cultural event or any significant activity have happened which is worth mention or which may have changed the course of history of the district in last decade.

(xii) Brief Description of Places of Religious, Historical, Archaeological Importance in villages and places of Tourist Interest in the towns of the District:

Following places have some religious, historical or archaeological importance, which attracts tourists from the neighbouring districts:

Bangarmau:

Bangarmau is situated on the left bank of Kalyani, about 49 kms. north-west of Unnao and 22 kms north-west of Safipur on Unnao-Hardoi road. The ancient town of Newal stood close to the site of Bangarmau. According to Buddhist literature, Budha stayed here for sometime and preached sermons. The antiquity of the place is attested by the discovery of earthen black polished wares and other Archaeological findings. One terracotta piece, in particular, representing 'Ardhanarishwari' a rare specimen of its kind in India, was found here and is displayed in the National Museum.

A fair, Budghwa Mangal is held here on the first Tuesday of Chaitra month. Two other fairs are also organised by the villagers, one known as Baboo Mian ka Mela and the other called as the fair of Shitla Devi.

Ganj Moradabad:

This place is said to have been founded by one Murad Sher Khan a contemporary of Aurangzeb. A fair is held every year in memory of Maulvi Fazle Rehman, who was a pious and great spiritual man. A smaller fair is also held here in the month of Chaitra.

Nawabganj:

Nawabganj lies on the Lucknow-Kanpur national highway, about 20 kms. north-east of Unnao and 5 kms south of Ajgain railway station. It was founded in 1842 by Amir-ud-daula, the prime minister of Avadh, who built a sarai and a mosque which are still in good condition. Naubat Rai, the treasurer built a tank here. Nawabganj was a centre of heavy fighting between British Army led by General Havelock and Indian fighters in July/August 1857.

In order to promote proper protection and conservation to the resident and migratory birds Nawabganj lake and its surrounding area was declared as Nawabganj bird sanctuary in 1984. Approximately 250 species of resident and migratory birds are found rowing here. A big fair known as Durga Kusheni takes place on the full moon day of the month of Chaitra.

Pariyar:

Pariyar lies on the left bank of Ganga at a distance of about 23 kms north-west of Unnao. Tradition has it that Lakshman at the behest of this brother Rama, accompanied Sita to her banishment to this place. It was here that Sita gave birth to Lava and Kusha. The place possesses two temples, one of Balkaneshwar Nath Mahadeo, believed to have been built by Lava and Kusha and the other is of Janki. A fair is held here on the full moon day of the month of Kartika.

Patna:

Patna lies on the road from Unnao to Allahabad via Achalganj. The village possesses a temple dedicated to Lingeshwar Mahadeo, a tomb of Mohabbat Shah and an ancient mound, which is believed to have buried the ruins of Bhar dynasty. A large fair is held here in honour of Niamat Shah, disciple of Mohabbat Shah.

Mohan:- This small town lies on the left bank of Sai river about 6 kms east of Hasanganj and 38 kms north-east of Unnao. During the days pf the Nawabs of Avadh, it was an important town, of which a many residents found employment in the court of the Nawab. the town was well known for its Unani Hakeems, mimies and actors.

Safipur:

Safipur lies on the Unnao-Hardoi road about 27 kms north-west of Unnao. It is said to have been named after a darvesh Makhdum Singh Safi. On his death he was buried here and the place assumed the name Safipur. Safipur forms the last

resting place of several other darveshes also, of whom the chief are Ifham-ullah, Qudrat-ullah, Hafiz ullah and Abdullah.

A famous mausoleum over the remains of the darvesh Safi was erected here. Small Urs fair are held here on the 12th and 22nd day of Rabi-ul-awwal, 20th day of Jamat-us-sani, 12th and 14th days of Rajjab, 8th day of Ramzan and 14th day of Zilhaj.

Situated between industrial city of Kanpur and metropolis of Lucknow district Unnao remains an underdeveloped district. this district has the potential to develop into a big industrial and trading centre. The need is to explore and tap this potential.

(xiii) Major Characteristics and contribution of district :

The district is famous for some great personalities who have laid deep imprint on the history of the district and the nation.

The great martyr Chandra Shekhar Azad, whose name is written in the golden letters in the history of freedom struggle belonged to this district. There are many other freedom fighters associated with this district. Rao Ram Bux Singh was a great freedom fighter of Biaswara. He was talukedar of Daundia Khera and fought for the freedom of the country against the British. But his forces were defeated and he was hanged to death in Daundia Khera on 28th december 1858. Chandrika Bux Singh gave a tough fight to the British during the first war of independance in 1857. He alongwith his family and associates was sentenced Kalapani ki saza. On his way to Kalapani he was killed by British on 30th December 1859. Maulana Hasrat Mohani (1891-1951) was a freedom fighter and Urdu poet. Vishwambhar Dayal Tripathi (1899-1959) was a great man in all aspects of life. He was a brilliant scholar. He was a close associate of Subhash Chandra Bose. He was several times sent to jail during the freedom struggle. Pt. Dwarka Prasad Misra was a great freedom fighter and diplomat, belonged to village Padari in Unnao. He became the Chief Minister of M.P. after Ravi Shanker Shukla. Many literary lumanaries also belonged to this district. Surya Kant Tripathi 'Nirala' a chhyawadi poet was born in West Bengal, belonged to village Gadhakola of district Unnao. He was a great poet and wrote strongly against social injustice and exploitation in the society. Bhagwati Charan Verma was a great writer, born at Safipur and also he was Hindi advisor at Akashwani, Lucknow in 1950. He was also the member of Rajya Sabha in 1978. Nand dulari Bajpayee was a famous critic, born at Magarya (Unnao) he was also vice Chancellor of Vikram University, Ujjain. Shiv Mangal Singh 'Suman' was a great Hindi poet of Unnao district.

(xiv) Scope of Village Directory and Town Directory Column Heading wise Explanation and Coverage of Data

Village Directory :

The village directory, as the title connotes, presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rationale of giving 2001 location codes along with 1991 location codes is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16

4. Availability of news paper/ magazine — Column 17
5. Commodities manufactured — Column 18
6. Total area of village and land use pattern — Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been adopted:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration, are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement, a note is given against such towns that there are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999 and trade, commerce, industry and banking activities in year 1999. In this way, population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, Manufactured cinemas etc. and number of banks as well as commodities and exports are enumerated vividly in various statements relating to the town directories of the districts.

The Village Directory is the compilation of basic information pertaining to a particular village. The format of the Directory has been revised from time to time but it has been continued to remain as the traditional source of village level basic data. It contains a list of villages with Location Code Numbers, Population, amenities, namely, Educational and Medical facilities, availability of Drinking Water, Post, Telegraph and Telephone facilities, Commercial and Co-operative Banks, Agricultural and Non-agricultural and other Credit Societies, Recreational and Cultural facilities, Communication, Approach Roads to village, Power Supply and Newspaper/ Magazine etc.. The name of villages of each Rural Development Block of the District has been arranged alphabetically and location codes number of the Census of India 2001 and corresponding code number of 1991 Census have been given for each village for easy reference.

Generally a 'village' is taken as a statutorily recognised unit of an area having definite and recognised boundaries and separate land records. Thus in Census, the basic unit of rural areas is taken as a revenue village which has definite surveyed boundaries. A revenue village may comprise of several hamlets but the entire village is treated as one Unit for presentation of data. In Mizoram, however, the concept of village is different from what has been mentioned above since there is no surveyed village in the state. Therefore an inhabited area with locally recognised boundaries and having a name of its own is treated as a village. The un-inhabited villages i.e., the villages where no population was found during Census Operations have also been included in the list of villages and C.D. Blockwise in the Village Directory.

Although there is no Panchayat Institution in the District, the villages have Village Councils which are democratically elected local bodies. In addition to the information as to the availability or otherwise of the basic amenities as mentioned in the preceding para-

graphs, following nine appendices have also been included :

1. Appendix I — Abstract of Educational, Medical and other amenities in villages - C.D. Block level.
2. Appendix II — Villages with 5,000 and above population which do not have one or more amenities.
3. Appendix III — Land Utilization Data in respect of Census Towns/Non-Municipal Towns.
4. Appendix IV — C.D. Block-wise list of inhabited villages where no amenities other than drinking water facility are available.
5. Appendix V — Summary showing number of villages not having Scheduled Castes population.
6. Appendix VI — Summary showing number of villages not having Scheduled Tribes population.
7. Appendix VII — List of villages according to the proportion of the Scheduled Castes and the Scheduled Tribes to the total population by ranges.
8. Appendix VIII — Number of villages under each Gram Panchayat (C.D. Block wise)
9. Appendix IX — Statement showing number of girls schools in the villages.

Since a large number of abbreviations had to be used due to space problems, a detailed and explanatory note on each of these abbreviations has also been incorporated for easy clarification of the subject concerned.

PART A
VILLAGE AND TOWN DIRECTORY

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital Ayurvedic Hospital Unani Hospital Homeopathic Hospital	H HA HU HHom
(ii)	Allopathic Dispensary Ayurvedic Dispensary Unani Dispensary Homeopathic Dispensary	D DA DU DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the

distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)(vi)	Navigable CanalNavigable waterways other than River,Canal	NC,NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block

wise of the district.

Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	The appendix shows the list of villages according to proportion of the
Appendix-VII B	Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES FULLY MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	**2**	**3**	**4**
Not applicable as there are no villages merged in towns & any outgrowths at 2001 census.

	03570900	Mavaiya

Note:- Villages having NIL Scheduled Tribes Population have been excluded

APPENDIX VIII
Number of villages under each Gram Panchyat (C.D. block wise)

			Number of villages with location code numbers						Income and expenditure of Gram panchayat (in Rs.'000)	
Sl. No.	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers	Loca-tion code	Number of households	Total population	Total SC population	Total ST population	Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttar Pradesh due to certain reasons.

APPENDIX IX

Statement showing number of girls schools in the villages

Name of District - Unnao

Name of District	Name of C.D. Block	Location Code	Name of Village Number	No. of Girls School
1	2	3	4	5
Information not available for this district				

SECTION II
TOWN DIRECTORY

Town Directory

Note explaining the abbreviations used in Town Directory :

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Cor/NN
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB/NPP
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III

Municipal Finance 1998 -1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV

Civic and Other amenities,1999

Column (1 to 6) : Self explanatory.

Column (7) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/

Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 :Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to Area (in sq km.), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., Cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors

of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

CD Blockwise

ANNEXURE - I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 per cent of India's total population. It grew by 25 per cent between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP	Unnao
q1	Persons	99	97
	Males	98	95
	Females	104	99
q2	Persons	117	129
	Males	117	122
	Females	118	131
q5	Persons	134	144
	Males	135	139
	Females	132	156

The child mortality by age one year was lower in both male and female as against the State. Child mortality by age two and five years in both male and female shows higher order in the district as compared to the State.

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person/ Male/ Female	Uttar Pradesh	Unnao
1	2	3	4	5
1	CBR		37.2	38.0
2	TFR		5.6	5.7
3	TMFR		6.3	6.6
4	GFR		172.0	174.0
5	GMFR		200.0	206.0
6	Mean age at marriage (1981-91)		17.3	17.7
7	Number of children ever born per ever married woman aged 15-49 years		4.6	4.8
8	Child woman ratio 0-4		631	579
	5-9		752	713

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.2
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population is 38.0 per thousand in the district. It is above to the state of Uttar Pradesh i.e. of 37.2 per thousand. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a higher proportion from the state figures. The conclusion that may be drawn is higher fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3 year for the state where as 17.7 year has been observed for the district. It may be observed that higher age at marriage leads to low rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever-married women in the age group 15-49. The state and the district figures are placed as 4.6 and 4.8 per thousand respectively. Number of children in the age group 0-4 and 5-9 years per thousand women in the age group 15-49 has been calculated to 579 and 713 for the district while in case of the state the corresponding figures are 631 and 752.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district Unnao was 95.8 percent in 1991, while in 2001 it was 94.6 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 4.1 percent and 5.3 percent respectively. This shows in-migration from other states to this district was increased in 2001 in comparison to 1991. At district level in-migration from other countries was 0.1 percent in 1991 and 0.1 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 95.4 percent and 89.9 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 4.5 percent and 10.0 percent respectively. The movement of population from other countries in the district was 0.1 percent in 1991 and 0.1 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 89.2 percent in 1991 and 88.8 percent in 2001, while Muslim were 10.7 percent in 1991 and 11.0 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 54.6 percent male and 45.6 percent female to 57.5 percent male and 48.7 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 41.9 percent and female was 48.9 percent in 1991 and in 2001 it was 39.2 percent male and 45.2percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 3.0 percent male and 5.9 percent female while it was 3.3 percent male and 5.4 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure-VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 per cent male and 80.0 per cent female in 1991 to 44.2 per cent male and 65.9 per cent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Per centage of literates without educational level was 2.0 per cent male and 0.7 per cent female in 1991 at state level, which increased to 2.8 per cent male and 2.1 per cent female in 2001. Similarly primary level education was 10.7 per cent male and 6.1 per cent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 per cent male and 3.7 per cent female in 1991 which increased to 13.8 per cent male and 7.1 per cent female in 2001. Matriculation and above level was 13.5 per cent male and 4.4 per cent female in 1991 which was 20.4 per cent male and 9.0 per cent female in 2001.

Similar trend can be observed in the district also. Illiterates were 57.8 per cent male and 81.0 per cent female in 1991 which declined to 45.3 per cent male and 65.8 per cent female in 2001. Primary level education was 11.3 per cent male and 6.1 per cent female in 1991, which was 17.4 per cent male and 12.1 per cent female in 2001. Middle level education was 9.6 per cent male and 3.5 per cent female in 1991 and 15.1 per cent male and 7.9 per cent female in 2001. Matriculation and above level of education was achieved by 10.8 per cent male and 3.4 per cent female in 1991 which was 15.3 per cent male and 7.1 per cent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001, while middle level education was highest in 15-19 and the age group that had highest per centage of matriculation and above level of education was 20-24 (years).

100.0	94.6	3.5	1.6	0.2	0.0	0.1

Note : For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02%. The remaining tongues have been merged in the column of "Total of Other Mother Tongues."

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 96.1 percent person in 1991 and 94.6 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 3.8 percent and 3.5 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses, except Awadhi which was recorded as 1.6 percent in the district at 2001 Census.
