MOTIF

REMAINS OF BUDHA – 'SANKISA'

Sankisa, also known as 'Kapita' is situated in pargana Shamshabad tahsil Farrukhabad in the district. It is believed that Lord Budha appeared here from heaven and stayed there for three months to preach the Bodh religion. A Chines e traveller Fahiyan had described 'Sankisa' as the greatest pilgrimage for the followers of Budhism where Lord Budha spent such a long period of three months in a single stretch of time. After 'Sankisa Menrukane', Fariyahn described during 399-414 A.D. regarding the people of that place. The state of their prosperity and happiness was beyond explanation as well as the fertility of the land. Whatsoever the realistic perfection may be; overall, by the time the district administration had recommended re-establishment of the 'stoop' and to construct a park in the nearby land. Besides it, a 'stoop' (pillar) bearing an elephant of the Great Ashoka empire, has also been established here.

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of

all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5 The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G Mitra, Deputy Registrar General (C&T) and Dr. I.C Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables

I am deeply grateful to Shri J K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours At the outset I thank to Shri R.C Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing

I thank to Shri R G Mitra, Ex Deputy Registrar General (C&T), Shri R P Singh, Ex Deputy Registrar General (Map), Dr I C. Aggarwal, Ex Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S S A Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them

The preparation of District Census Handbook was done under the supervision and guidance of Shri B K Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J Majhi, Assistant Director, Shri M.M. Pandey, Dr. S S. Sharma S I. Grade-I and Shri S.K. Banerjee, S.I. Gr II who assisted in the work for timely completion of the project S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps

District Highlights - 2001 Census

1. Farrukhabad district ranks 51st in terms of population in the Uttar Pradesh state.
2. Farrukhabad is one of the higher urbanised districts in the state having more than twenty one per cent of the population in urban areas
3. Farrukhabad district has population density of 720 persons per sq.km. as compared to the state average (690 persons per sq. km.)
4. Farrukhabad district ranks 63rd in terms of sex ratio (848) which is lower than the state average (898 females per one thousand males).
5. Farrukhabad district ranks 23th in literacy (60.9 per cent) which is above the state average (56 3 percent)
6. There are only 124 un-inhabited villages out of total 1,007 villages in the district.
7. Decadal growth rate of the district (22.3 per cent) is lower than the growth rate of the state (25.8 per cent).
8. Kaimganj tahsil has the highest number of villages (383) while tahsil Amritpur (140) has the least number of villages.
9. The district has Seven towns and no new town has been added after 1991 Census nor declassified
10. There are 241,422 households in the district accounting for 0.9 per cent of the total households in the state. The average size of households in the district in 6.5 persons.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publications has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, Official Statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained Administrative Statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given Information on some new items was also provide, keeping in view, the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were nine-fold industrial classification of main workers and sex-wise population in the 0-6 age group. Yet other information at the 1991 census was CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP, no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data along with inset tables and statements is more informative The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census, the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" now seems to be a misnomer

(ii) Brief History of the district :

The district is named Farrukhabad after its chief town The early history of the region now covered by the present district goes back to remote integrity. The finding of numerous pre-historical bronze weapons and tools indicates that the region must have been civilized long ago in prehistoric times probably during the bronze age. A large number of small pieces of pottery have been found scattered all over the district out of which the pieces of pottery, known as grey and painted grey ware, have been found at Kampil which are similar to those found at Hastimpur and Atrangi Khera.

The earliest known Aryan people who settled in the region were the Panchals and were close allies of the Kurus and their territory roughly corresponding to the present Bareilly, Budaun, Farrukhabad and adjoining districts of Uttar Pardesh.

The traditional history of the district from the earliest times till the end of Mahabharata war gleaned mainly from the 'Puranas' and the 'Mahabharata'. Also Panchal figures as the 'tenth' in the list of the sixteen premier states (Mahajanpada) in the time of Mahavira and Buddha and is said to have comprised the region of covered by the present district of Bareilly, Budaun and Farrukhabad.

This region has witnessed rise and fall of many dynasties in Medieval and Modern Periods. Regarding the origin of name of district the story goes that Muhammad Khan Bangash, the Nawab of Farrukhabad, founded the town of Kaimganj and Muhammadabad, the former being named after his

eldest son and the later after himself. Farrukhsiyar, the emperor was arrayed at the nawab's presumptuousness in naming a town after himself. To appease his wrath, the Nawab announced his intention of founding another town and naming it after the emperor. Since this time his father-in-law, Kasim Khan Bangash, while on his way to make, was set upon and killed by a party of Bamtela marauders at the village of Jamalpur, now known as Kasim Bagh some 5 km. to the east of the town. Using this event as a pretext, Muhammad Khan asked for and obtained a grant of fifty two Bamtela villages for the site of a new town which was founded in 1714 and named Farrukhabad after the name of the emperor.

(iii) Administrative Setup

As mentioned earlier, Farrukhabad district has been shrinked in 1997 due to creation of Kannauj district. Now in the district after jurisdictional changes occurred in 18th September 1997, there are three tahsils namely Kaimganj, Amritpur and Farrukhabad of which Amritpur tahsil is newly created. The district HQ's is Farrukhabad-cum-Fatehgarh. Kaimganj, Shamsabad, Rajepur, Nawasganj, Muhammadabad, Farrukhabad and Kamalganj are the sven development blocks. The district comprises 511 Gram Sabhas. Kaimganj and Farrukhabad-cum-Fatehgarh are two towns of Nagar Palika Parishad stature, while Kampil, Shamsabad, Muhammadabad and Kamalganj are of Nagar Panchayat and Fatehgarh of cantonment board stature respectively.

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now re-designated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD etc , each have a department at district level office. From the devlopment point of view the district is divided into Community Development Block. Block Development Officers (BDO) looks after development works at Community Developments block level. Assistant Development Officer and Village Development Officers are Deployed at village level.

Under the police set-up Senior Superintendent of Police in big district and Superintendent of Police in small districts are incharge Additional Superintendent of Police (ASP) and Commandent Officer are incharge of their respective area Deputy Superintendent of Police (DSP) looks after the Thanas allotted to them Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area

The judicial administration of the district is headed by District and Session Judge In addition there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under local self-government.

(iv) Physical Features:

1. Location and Size:-

In shape the district may be roughly linked to a very irregular parallelogram, situated between Latitude 26°46' and 27°43' north and Longitude 79°7' and 80°2' east. It is situated towards the north-west of the Allahabad division and in bounded by Budaun and Shahjahanpur on the north, part of Shahjahanpur and Hardoi on the east, Kanpur on the south-east, Etawah on the south and Mainpuri and Etah on the west. The maximum length from north to south is about 120 km. and the maximum breadth from east to west about 65 km According to the Central Statistical Organization, the area of the district was 4,349 sq km. in 1977. Presently the area of the district is 2181 sq. km Owing to the action of the Ganga in shifting its bed from year to year the total area varies slightly but such changes are usually not very extensive. It is only in the Kannauj tahsil and in the northern portion of Kaimganj that the shifting of the river affects the district as a whole.

2. Physiography :

The district of Farrukhabad is a part of southern upper Ganga plain according to the scheme of Regional Divisions and covers an area of 42 sq. km. Along the north and eastern portion of the district, the Ganga form the boundary. It forms part of the level expanse of alluvium deposits along the Ganga Basin. Modern deposits of the Ganga and the Ram Ganga give rise to the low land and the older form of deposit is called Bangar. Bangar is a levelled plain, covers four-fifths of the area of the district and is traversed by such small east bound rivers like Bagar, the Kali and the Isan. The geology of the district belongs to Alluvium (recent). On the basis of factors like geology, soils, topography the district has been divided into the following four sub micro regions.

Ganga-Ramganga Khaddar:-

It extends parallel to the Ganga river in a narrow strip, which is wider in north and taper down towards south. The Ganga and the Ram Ganga have played a great influence on this plain. The Ram Ganga flows from north to south, whereas the Ganga enters the district from the north-west corner. A natural levee from Kampil to Singhi Rampur along the Ganga is a prominent topographic feature. This levee indicates the limits of the left course of the Ganga. The inter fluvial zone of the Ram Ganga and the Ganga rivers is marked with numerous depressions, sand dunes, dead arms of the river etc. The geology of the region belongs to Alluvium, Dun Gravels (Recent). Since it is a Khadar tract, the infrastructure in undeveloped. Roads and canals are also not developed because of physical factors. Villages are smaller in size and situated mostly on the natural levee of the Ganga forming a linear pattern.

Farrukhabad – Kaimganj Plain :-

The region is situated in the northern part of the district covering parts of Kaimganj and Farrukhabad tahsils. It is a flat plain sloping towards the east. Ravines are noted in the lower course of the river Bagar. A few natural depressions with irregular shape are also situated in the northern part. The geology of the region is Alluvium, Dun Graveles (Recent).

Lower Kali Plain :-

It is situated in the central part of the district covering the southern part of Farrukhabad and the northern parts of Chhibramau and Kannauj tahsils. River kali along with its tributaries joins the Ganga near Kannauj. The slop runs from west to east. The sand dunes of bhur near Mohanpur, Ratanpur and Singhi Rampur and a patch of mounds at Induiaganj are the worth mentioning physical features. The geology of this region belongs to Alluvium, Dun gravels (Recent).

Isan Plain :-

It is situated in the southern part of the district covering major portions of Chhibramau and Kannauj tahsils. The Isan along with its tributaries flows from the centre of this plain. Pandu and Arind are the other streams of the region. Besides, there are some dry depressions spread over the area. The slope in very gentle and runs from west to east. A very narrow zone of ravines is also noticed along the Isan river. A few patches of bhur or sand dunes are also located near Bhawani Sarai, Kasawa etc. this geology of region belongs to Alluvium (Recent).

3. Drainage :-

The principal rivers and streams of the district are Ganga, Ram Ganga, Kali Nadi, Isan, Burhiganga (or old Ganga), Bagar, Pandu and Rind or Arind. The first four are perennial, the rest being mere channels for the escape of surplus drainage which cease to flow soon after the close of monsoon.

There are several large stretches of water in the Usar plains. They occur mostly in the western part of tahsil. In tahsil Chhibramau a village named Talgram (village of ponds) is surrounded by a number of large and small lakes. Such lakes depends for their supply of water on the rains and are merely accumulations of surface drainage which can find no outlet and collect in depressions.

4. Climate :

The climate of the district in characterized by a hot dry summer and a pleasant cold season. The year may be divided into four seasons. The cold season from about the middle of November to February is followed by the summer season from March to about the middle of June. The period from mid June to about the end of September is the south-west monsoon season. October and the first half of November constitutes the post monsoon season. May is generally the hottest month with the mean maximum temperature at about 41°C. The maximum temperature of the district touches 46.8°C. While minimum temperature is around 3.3°C. The average rain fall is 810 m.m. The average ground water level is about 60 feet. Winds are generally light. The predominant direction of wind is between south-west and north-west throughout the year but in May and in the south-west monsoon season winds from direction between north-east and south-west blow on many days. In the summer months dust-storms

and thunder-storms occur occasionally. During monsoon the humidity is very high.

5. Natural Economic Resources

Forestry :

The district contains practically no natural forests, but cultivable waste lands were resumed by government and transferred to forest department. At places there are small patches of Dhak forest. Other trees planted by the forest department are Sissoo, Babul, Jamun, Kanji and Arjun. The area covered by forests is 1.3 percent of the total area of the district where as according to scientists it ought to be 20 percent in the plains. In the year 1999-2000, the government spent Rs. 20.55 lakh on the plantation of trees in 90 hectares of land.

Minerals and mines :

Like the neighbouring districts of the doab, Farrukhabad is not rich in minerals. The limestone conglomerate known as Kankar is found all over the upland. In the modular form called Bichua it is used only as road metal and for producing lime. In either form it is found in strata averaging from 10 cm to 35 cm. in thickness and varying in colour from grey to blue. Brick earth is found in many places and the resources of the district are sufficient to meet the local demand. Sand is found along the banks of the Ganga and Ram Ganga rivers.

Soil :

Throughout the district the soils are divided into three main traditional classes, Dumat or Loam, Matiyar or Clay, and Bhur or Sand. But though the same nomenclature is employed in both the upland and the low land, they differ greatly in character. In the upland the names have the same meaning as elsewhere in the Doab. Dumat is a fertile loam which is soft to the touch when powdered and Bhur is Sandy and rough to the touch. Matiyar is a stiff clay in which rice is grown in the rains. But in tarai the soil is everywhere alluvial, consisting of a stratum of loam of varying thickness more or less intermixed with sand overlying a bed of white river sand.

Land and Land use Pattern :

According to Samajarthik Samiksha 1999-2000, the land use pattern as recorded in 1996-1997 indicates that out of total reported area of 218,979 hectares the area covered by forest was 483 hectare, cultivable waste land 6,969 hectare, current fallow 9062 hectare, other fallow 12,889 hectare, Usar and uncultivable land 9008 hectare, land used other than agriculture 23,476 hectare, pastures 563 hectare, area covered by trees and gardens were 3,351 hectare. The net sown area was 153,178 hectare and the area sown more than once was 71,394 hectare.

Agriculture and Crop Patterns :

Agriculture in the main source of the economy of the district. 78.8 percent of people dwelling in countryside are dependent on agriculture. As is usual in the doab, the agriculture year yields three harvests : the Kharif, Rabi and Zaid. The last is of little significance in point of area and mainly consists of cucurbits, vegetables, spices, tobacco legumes and low-grade crereals. Melons, Kakri and Cucumbers are mostly grown in the Khadar and along the sandy banks of the rivers.

The principal crops of Kharif are Maize, Rice, Bajra, Jawar, Urd, Moong and Moth, whereas the crops covered in Rabi are Wheat, Gram, Barley, Pea, Arhar and Masur.

According to Sankhyiya Patrika 1997 Rice was sown in 26,277 hectare, wheat in 142,256 hectare, Barley in 4,961 hectare, Juwar in 7,543 hectare, Bajra in 12,078 hectare, Maize in 92,591 hectare. Under the pulses Urd was sown in 4,670 hectare, Moong in 3,053 hectare, Masoor in 782 hectare, Gram in 9,107 hectare, Pea in 3,404 hectare and Arhar in 6,940 hectare. The pattern for oil seeds is Mustard in 25,473 hectare, Til in 4,411 hectare, Groundnut in 2,279 hectare and Sunflower in 8,984 hectare. The cash crop sown is Sugarcane in 9,062 hectare, Potato in 54,518 hectare and Tobacco in 4,373 hectares. The figures of yield are paddy 56,711 mt.ton, wheat 412,321 mt.ton, wheat 412,321, Pulses 10,681 mt.ton, Juwar 8,456 mt.ton., Bajra 15,647 mt.ton., Maize 199,059 mt.ton. Regarding pulses the yield is Urd 1,886 mt.ton, Moong 2,134 mt.ton, Masoor 508 mt.ton, Gram 8,823 mt.ton, Pea 5,333 mt.ton and Arhar 7,656 mt.ton. The yield under oil seeds is Mustard 30,847 mt.ton, Til 706 mt.ton, Groundnut 1,766 mt.ton and Sunflower 13,081 mt.ton. In cash crops the production is Sugarcane 528,025 mt.ton, Potato 1,316,937 mt.ton and Tobacco 20,281 mt.ton. To improve the agricultural produce, the farmers of the district have the services of 202 seed/ fertilizer depots, 122 rural depots, 15 insecticide depots, 6 seed producing farms, 108 cold storages, 7 agricultural service centres and 6 Krishi Utpadan Mandi Samitis. The district has 68 warehousing godowns of defferent agencies such as Food Corporation of India, Central Warehousing Corporation and State Warehousing Corporation of the State Government, Co-operatives and others. There are government officials providing information about agriculture and crop protection.

Irrigation :

For agricultural production and to grow

various crops, irrigation plays a vital role which depends upon the availability of its sources. The districts is rich in irrigation resources and a network of it spread throughout the district. According to land revenue record (1996-97) 3,776 hectare area is irrigated through canal, 114,880 hectare by tube wells 2,437 hectare by wells and 366 hectare by tanks. Thus a total of 121,847 hectares area of the land is irrigated through various sources including sources other than above (388 hectare).

Animal Husbandry :

Animal husbandry is an integral part of the rural economy besides cultivation. According to 1997 Livestock Census, the number of milched cattle is 171,317 and unmilched cattle are 253,552. The district provides 563 hectare of land as pasture and 483 hectare of forest for the rearing of these cattle. There are 19,505 sheep, 157,809 goats, 2,335 ponies, 36,683 pigs, 78,887 hen and cocks and 33,429 other poultry birds. The district has services of 13 veterinary dispensaries and 12 artificial insemination centres/ subcentres.

Fishery :

The rivers, canals and ponds of the district contain a plentiful of fish. There are more than 45 species of fish known in the district, the chief being 'Rohu' (Labeorohita), Bhakur (Catla), Rita (Rita), Bata (Labeo bata), Mahsher (Barbustor) and Karouch (Labeo calbasu). To make progress in fishery a centre of Fishery Development Authority has been established in the district. The authority provides loan and grant to pisciculturists.

Industry :

To strengthen the economy of the place, state or country, industry play a vital role. The district is backward from industrial point of view. Except Bidi industry in Kamalganj area, no industry has been in operation. The district has name in printing but remained confined to itself only. Under the village and cottage industry, the following units were operational during 1996-97.

S.No.	Name of Industries	Numbers
1.	Khadi	2
2.	Khadi and Village Industry	2,837
	a) Engg.	589
	b) Chemical	434
	c) Vidhain	1,149
	d) Handloom	291
	e) Handicraft	1,218
	f) Others	2,502

The number of industrial estates were two with 24 allotted sheds. These comprises of 75 industrial plots, out of which only 43 was operational. The number of employees during the year 1996-97 was 135 and produced goods worth Rs. 10,236 thousand.

Trade and commerce :

The trade of district mainly consisted of food grains, cotton, sugar, gur (Jaggery), ghee, oil, tobacco, potatoes and spices. But a certain amount of trade is also done in manufactured articles such as utensils of copper, ready made garments, footwear and saltpetre. The pattern of trade has undergone some changes but the broad features still show the domination of agricultural commodities, potato and textile prints in export trade and the import comprise mainly manufactured articles. There are organised whole sale markets (Mandis) at Farrukhabad, Kamalganj, Muhammadabad, Kaimganj, Fatehgarh and Shamsabad. Drug, medicine, cloth, agricultural implements, fertilizers, machinery, furniture, fruits, vegetable and general merchandise are sold in the urban centre of the district. The market at Farrukhabad and Fatehgarh also reflect the industrial growth of the district. Ghee, milk products, handloom cloth, foundry castings (weight and measures etc) and edible oils, which are produced in the district, are sold in the local markets. The common requirements of the villagers and those residing in the urban areas of the district are generally met by traders and pedlars operating in the local bazaars which in rural areas are known as 'hats'

Transport :

The economic prosperity of the district can be assessed by the facility of Transport and Communication available in the district The connectivity of interior parts of the district with towns can open the venues for modern technology and to avail the facility of transaction of the necessity of the daily, life. Agricultural crop and raw material for manufacturers can only be supplied by road transport To achieve this goal the district has 79 km. P W D road, 118 km. road under district administration and 516 km road under district and village level authority during year 1998-99. Under local bodies like NPP/ N.P/Cantt. a length of 93 km. road was recorded The district has 852 km. 'Pucca Road' out of which 713 km. road belong to Public Works Department

Electricity and Power :

To boost the agricultural and industrial growth and to manage the social services of the population, it depend solely on the availability of the electricity to some extent. To gear up the increase of power

supply adequate measures have been taken up in the district. For this under district sector scheme grant has been given to the district. There are 7 electrified towns, 728 villages (full filled central definition), 348 villages with L.T. main line, 6,110 power pumpset/ tube wells, and 378 electrified Harijan localities. In year 1999-2000 an amount of Rs. 1,03,03,000 were spent under this scheme and 82.6 per cent electrified villages are recorded against total number of inhabited villages.

Gram Panchayat, its composition, jurisdiction and role in villages development

A Gram Panchayat acts as the executive of the Gram Sabha. Gram Pradhan is elected from almost villages for a period of five years.

Composition :-

The members of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 511 gram sabhas in the district.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villages.

The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand. The panchayat normally meets once in a month. If ned he, an emergency meeting canal so be called by the Sarpanch.

In order to be elected to a village panchayat, a candidate should posses the following qualifications

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old
3. He should be mentally and physically sound
4. He should not be a proclaimed offender

Functions:-

A Gram panchayat is entrusted with various social, economic and judicial functions

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a centre.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the District
6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area of the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine upto Rs. 100

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence etc.

Usually a structure has four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls Therefore, such of the conical structures are also treated as separate buildings

Permanent houses

Houses, the walls and roof of which are made of permanent materials The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made

of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch. bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc. and the household also stays in it, then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household, then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut, if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by

different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area

committee, etc.

b) A place satisfying the following three criteria simultaneously:
   i) a minimum population of 5,000;
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban', all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc , may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths,
ii) two or more adjoining towns with their outgrowths; and
iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements,

in hume pipes, under fly-overs and staircases or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	2	Badi
3	Baiga	4	Balahar
5	Bajaniya	6	Baiswar
7	Balmiki	8	Bajgi
9	Banmanus	10	Balai
11	Barwar	12	Bangali
13	Bawariya	14	Bansphor
15	Beriya	16	Basor
17	Bhuiya	18	Beldar
19	Bona	20	Bhantu
21	Badhik	22	Bhuyiar
23	Baheliya	24	Chero
25	Chamar, Dhusia, Jhusia, Jatawa	26	Dharkar
27	Dabgar	28	Dom
29	Dhanuk	30	Dusadh
31	Dhobi	32	Domar
33	Dhangar	34	Gharami
35	Gond	36	Gual
37	Ghasiya	38	Habura
39	Hari	40	Hela
41	Kanjar	42	Korwa
43	Karwal	44	Kalabaz
45	Kharwar (excluding Banbasi)	46	Kapariya
47	Kol	48	Khairaha
49	Khorot	50	Khatik
51	Kori	52	Lalbegi
53	Majhwar	54	Mazhabi
55	Musahar	56	Nat
57	Paraiiya	58	Pankha
59	Patari	60	Pasi, Tarmali
61	Rawat	62	Shilpkar
63	Sansiya	64	Saharya
65	Sanaurhiya	66	Turaiha

Scheduled Tribes

1	Bhotia	2	Buksa*
3	Jaunsari	4	Raji
5	Tharu		

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics

Literate

A person aged 7 years and above who can both

read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even

if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain etc. in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed off locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned

below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

Number of infant deaths

$$IMR = \frac{\text{during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital

for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parent's/ relative's house is in a place different from usual place of residence, the place where the hospital or parent's / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / Towns. These Class I UAs. /Towns are now further sub classified into seven sub classes namely, M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with 50,000 to 99,999 population are classified as Class II towns; 20,000 to 49,999 population are Class III towns; population with 10,000-19,999 are Class IV towns; population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are, in any respect, unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population.Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution:

The total population of the district is 1,570,408 in which 1,228,864 live in rural and rest 341,544 in urban parts. There are 3 tahsils in district namely Kaimganj, Amritpur and Farrukhabad which are sans urban population. The most populous tahsil is

Farrukhabad followed by Kaimganj. Amritpur is least populated tahsil. The urban population in the district is about 21.7 per cent. The urban population is maximum at 32.1 per cent in Farrukhabad tahsil. There are 1,007 villages and 124 villages are un-inhabited. The total rural population of Farrukhabad is spread over 07 CD blocks. The most populous CD Block is Kamalganj with a population of 233,188 with the maximum number of inhabited villages (160).

Size-class and status of towns:

In the total urban population of 341,544 and 228,333 live in Farrukhabad-cum-Fatehpur, NPP. The next big town is Kaimganj, NPP with a population of 31,150. The above two are class I and III towns having the civic status of Municipal Board (NPP). Rest of 5 towns are Nagar Panchayat (N.P.) and C.B. out of which 2 towns are class III, 2. towns are class IV, 1 are class V town. Kaimganj tahsil contains 3 towns, Farrukhabad tahsil has 4 towns.

Population growth:

At the present territorial jurisdication the population of the district was 1,284,419 at 1991 Census and growing by 22.3 per cent during the decade 1991-2001 it is 1,570,408 at 2001 Census. The decadal growth at 22.3 per cent in the district has been at lower level than in the state at 25.8 per cents.

Population Density:

The district has area of 2,181 square kilometer. The population density in the district is 720. In the rural areas of the district the density is 575.

Sex-Ratio:

The sex-ratio in the district at 848 is lower than 898 at state level. Indeed the sex-ratio at the district has been all along lower in the district as against to the state since 1901. As against to urban areas of the district the sex-ratio is lower in rural areas. Among tahsils, highest sex-ratio is in Farrukhabd and lowest in Amritpur. Among CD Block the sex-ratio is highest in Kamalganj at 869 and lowest in Rajepur at 813. Out of 883 inhabited villages in the district there are 4.8 per cent villages (with 2.0 per cent of rural population) which are having a sex-ratio below 700. In the urban parts of the district the sex-ratio is 874 and highest of 893 in Shamshabad and lowest of 664 in Fategarh (CB). The sex-ratio of population on the age-group 0-6 is 897 in the district which is lower than the state being only at 898. As against a sex-ratio of 901 in the age-group 0-6 of rural population of the district, it is highest at 930 in Kamalganj CD Block and lowest at 883 in Rajepur C.D. Block. It may be noted that out of 883 inhabited villages in the district in over14.4 per cent of villages with 24.0 per cent of rural population the sex-ratio in the age-group 0-6 is between 900-949. As against the 0-6 age-group sex-ratio of 901 in the rural area of the district it is only 878 in urban. Among towns this sex-ratio is highest at 934 in Mohammadabad, NP and lowest at 829 in Fatehgarh, CB.

Work Participation Rate:

In the total population of the district of Farrukhabad as much as 29.5 per cent are workers and rest of 70.5 per cent are non-worker. Among worker 24.3 per cent are main workers and rest of 5.2 per cent are marginal workers of total population. In absolute terms males outnumber of females as main worker and marginal workers as well. The extent of main workers is highest at 26.3 percent in Amritpur tahsil and lowest at 23.8 per cent in Farrukhabad tahsil. In case of marginal workers the population is highest in Farrukhabad tahsil as 5.9 per cent in comparison to only 3.3 per cent in Amritpur and 4.7 per cent in Kaimganj tahsil. The extent of workers in rural aparts and non-workers in urban parts is higher. In the district among workers 49.1 per cent are cultivators and 24.6 per cent other workers. Over 32.4 per cent of female workers are engaged as cultivators.

Literacy:

In the district 60.9 per cent population is literate. The literacy is 70.2 per cent in urban areas and 58.3 per cent in rural areas. The males literacy is as highest 71.1 per cent as against 48.7 per cent females literacy and therefore the gap in male/female literacy rate is 22.5 per cent. In rural areas among 7 CD Blocks, the highest literacy is at 66.6 per cent in Mohammadabad and lowest at 50.7 per cent in Kaimganj. The literacy among males in rural areas is 69.6 per cent in comparison to 44.4 per cent among females. The lowest female literacy of 37.5 per cent is in Kaimganj CD Block. The gap in male/female literacy rate is highest in Rajepur CD Block which is 28.3 per cent. In 28.3 per cent of villages covering also 30.7 per cent of rural population the literacy range is 61 to 70. Among urbanites in the district, as much as 76.6 per cent males are literates as against 64.5 per cent females. The highest urban literacy is in Fatehgarh (CB) 85.4 per cent and lowest in Shamshabad (NP) at 52.3 per cent. The maximum males literacy is also found in Fatehgarh (CB) at 92.7 per cent and lowest at 59.9 per cent in Shamshabad (NP). The highest females literacy is in Fatehgarh (CB) at 74.2 per cent and lowest at

47.4 per cent in Kampil (NP) Still, the maximum gap in male-female literacy rate at 20..7 per cent is found in Mohammadabad (NP). The literacy among Scheduled Castes in the countryside is 49.2 per cent and 57.3 per cent in towns. There is no percentage of literacy in Scheduled Tribes at district level. Only 278 persons out of 911 Scheduled Tribe population are found literate in the district.

(viii) Brief Analysis of Primary Census Abstract Data based on inset Tables 1 to 36:

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, Scheduled Caste and Scheduled Tribe population with male-female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural labourers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Sl No.	Tahsil	Population 1991			Population 2001			Percentage decadal variation 1991-2001			Percentage urban population	
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Kaimganj				552,535	489,232	63,303					11 5
2	Amritpur		N A		150,988	150,988	0			N A		0 0
3	Farrukhabad				866,885	588,644	278,241					32 1
	District Total:	**1,284,419**	**1,011,583**	**272,836**	**1,570,408**	**1,228,864**	**341,544**	**22.3**	**21.5**	**25.2**	**21.2**	**21 7**

The growth rates of each tahsil in the Farrukhabad district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 22.3 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 25.2 and 21.2 per cent respectively . Out of the total population of the district 21 7 per cent lives in rural areas while 78.3 per cent lives in urban areas of the district. The proportion of urban population has slightly increased during the decade from 21 2 per cent in 1991 to 21.7 per cent in 2001 in the district. Due to jurisdictional changers in the district figures of Tahsil are not being presented

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Table-2 gives C D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 883 inhabited villages, 47 (5.3 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 127 villages having 14.4 per cent villages of the district while in the size class of 500-999 population claims 255 villages with 28 9 per cent of the total villages in the district 283 villages (32.0 per cent) are in the size class of 1,000-1,999 and 148 villages (16.8 per cent) are in the size class of 2,000-4,999 19 villages with 2.2 per cent in the district fall in the ranges of 5,000 and above population There are only 4 villages (0 5 per cent) which fall in the population range 10,000 and above. The maximum number of inhabited villages in the district is in Kamalganj C.D.block-(160) whereas minimum is in Barhpura C.D block (79)

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWN IN 2001 CENSUS

	Name of town
	1
(a)	New
	(i) Statutory town
	NIL
	(ii) Census town
	NIL
(b)	Denotified
	(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns.
	NIL
	(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria.
	NIL
	(iii) Census towns of 1991 census are notified as statutory town in 2001 census
	NIL
(c)	Declassified
	NIL
(d)	Wholly merged with other town(s)
	NIL

**Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria*

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	164	18 6	226 208	18 4
11-20	2	0 2	65	0 0
21-50	9	1 0	1 285	0 1
51-100	19	2 2	6,708	0 5
101-200	42	4 8	18,805	1 5
201-300	57	6 5	42 576	3 5
301-500	165	18 7	227 401	18 5
501 +	425	48 1	705,816	57 4
Not known	0	0 0	0	0 0
District Total:	**883**	**100.0**	**1,228,864**	**100.0**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 425 accounting for 48.1 per cent of the total inhabited villages of the district fall in the very high density range of more than 500 persons per S.q K m having 57.4 per cent population The lowest ranges of 0-10 and 11-20 persons per sq km cover 166 villages (18 8 per cent) Corresponding proportion in the range of 201 to 500 is 25 2 per cent of the total inhabited villages having 22 0 per cent population of the district In the medium density range of 21 to 50 and 51-100 persons account for 9 and 19 per cent of inhabited villages respectively Both these ranges claim 0.6 per cent rural population.

Table 5: SexRatio of State and District1901-2001

	UTTAR PRADESH			FARRUKHABAD		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	849	828	948
1911	916	922	866	822	813	871
1921	908	918	834	827	822	853
1931	903	916	813	827	824	844
1941	907	922	824	869	897	747
1951	908	922	827	842	837	865
1961	907	921	817	835	833	845
1971	876	884	826	810	805	840
1981	882	889	850	817	812	836
1991	876	879	864	832	823	868
2001	898	904	876	848	841	874

NOTE- SexRatio has been defined here as the number of females per 1000 males

As per 2001 Census sex-ratio of 848 females per 1,000 males has been recorded in the district against the state average of 898 The sex-ratio of the district was significantly low as compared to the state average figures from 1901 to 2001 and remained below the state average figures during this period The lowest sex ratio of 810 females per 1,000 males were recorded in the district during 1971 against the state average of 876 females. It is also observed that the proportion of females in rural areas is lower than that of urban areas in district except in 1941 whereas in state level proportion of females in rural areas is higher than that of urban areas.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kaimganj	843	838	885
2	Amritpur	813	813	-
3	Farrukhabad	858	851	872
	District Total:	**848**	**841**	**874**

The table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 848 females for every thousand males in Farrukhabad district It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 841 and 874 females respectively. The rural sex-ratio in the tahsils varies between 813 in Amritpur tahsil and 858 females per 1,000 males in Farrukhabad tahsil The sex-ratio in Kaimganj and Farrukhabad tahsils is slightly higher than district rural average (841) In urban areas the highest sex-ratio is recorded in Kaimganj (885) and the lowest is in Farrukhabad tahsil, (872) females per 1,000 males

TABLE 7 : SEX RATIO BY C D BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Kamganj	828
2	Nawabganj	838
3	Shamsabad	847
4	Rajepur	813
5	Barhpura	823
6	Mohammadabad	849
7	Kamalganj	869
	District (Rural) Total:	**841**

The table-7 presents C.D block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district in 841 females per 1,000 males, as a whole. Among the C D. blocks the highest sex-ratio of 869 females is found in Kamalganj C D block and is followed by Mohammadabad (849) while the lowest of 813 is recorded in Rajepur C.D. block The sex-ratios of Shamsabad , Mohammadabad and Kamalganj C.D blocks are higher than the district rural average of 841 females and in remaining blocks, this is below the district average

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	42	4 8	24,728	2 0

900-949	105	11 9	143 482	11 7
950-999	25	2 8	20,191	1 6
1000-1099	11	1 2	6 043	0 5
1100+	3	0 3	1 229	0 1
District Total:	**883**	**100 0**	**1,228 864**	**100 0**

Sex ratio (Rural) for District: 841

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census The maximum number of villages i e 290 accounting for 32 8 per cent of the total villages having largest population of 36 9 per cent in the district fall in the sex-ratio range of 800-849 females per 1,000 males It is followed by the sex-ratio range of 850-899 which claims 237 villages (26 8 per cent) and 33 1 per cent population. The highest range of 1,100 & above claims 3 villages (0 3 per cent),having only 0 1 per cent rural population. While in the sex-ratio range of 900-949, there are 105 villages (11 9 per cent) in remaining sex-ratio ranges of 950-999,1,000-1,099,750-799,700-749 and less than 700, the number

of villages are 25 (2.8 per cent), 11 (1.2 per cent), 133 (15.1 per cent), 37 (4.2 per cent) and 42 (4.8 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 765 having maximum population (93.8 per cent) fall in the sex-ratio ranges of 750-949 females.

TABLE9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U A / Town	Urban status of town	Sex ratio
1	2	3	4
1	Farrukhabad-cum-Fatehgarh	UA	874
2	(a) Farrukhabad-cum-Fatehgarh	NPP	890
3	(b) Fatehgarh	CB	664
4	Kaimganj	NPP	880
5	Kamalganj	NP	839
6	Kampil	NP	880
7	Mohammadabad	NP	868
8	Shamsabad	NP	893
Sex ratio (Urban) for the District:			**874**

Table 9 gives the sex-ratio of towns The sex-ratio in urban areas of the district comes to 874 females per 1,000 males as a whole Among all the towns of the district the sex-ratio varies between 664 to 893. Shamsabad (NP) has the highest sex-ratio (893) while Fatehgarh C.B. has the lowest sex-ratio of 664females per 1000 males.

TABLE10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Person	Male	Female	
1	2	3	4	5	6	7
1	Kaimganj	Total	107,205	56,491	50,714	898
		Rural	96,036	50 592	45,444	898
		Urban	11,169	5 899	5 270	893
2	Amritpur	Total	29,021	15 409	13 612	883
		Rural	29,021	15,409	13 612	883
		Urban	0	0	0	
3	Farrukhabad	Total	151,931	80 001	71 930	899
		Rural	110,983	58 143	52,840	909
		Urban	40,948	21 858	19 090	873
District Total:		**Total**	**288,157**	**151,901**	**136,256**	**897**
		Rural	**236,040**	**124,144**	**111,896**	**901**
		Urban	**52,117**	**27,757**	**24,360**	**878**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district Total population in age-group 0-6 is 288,157 persons comprising 151,901 males and 136,256 females. The total sex-ratio in this age-group works out 897 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas The sex-ratio in rural and urban areas comes 901 and 878 females in this age-group respectively. The rural sex-ratio in tahsil varies between 883 in Amritpur tahsil and 909 in Farrukhabad tahsil The sex-ratio of all the three tahsils are lower than district rural average (901) The sex ratio of total rural population is 841 as against 901 in the age group 0-6 of the rural population. The sex ratio in urban areas is (874) in the district

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C D block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Person	Male	Female	
1	2	3	4	5	6
1	Kaimganj	36,112	18,990	17,122	902
2	Nawabganj	27,766	14,736	13,030	884
3	Shamsabad	32,158	16,866	15,292	•907
4	Rajepur	29,021	15,409	13,612	883
5	Barhpura	24,984	13,134	11,850	902
6	Mohammadabad	40,932	21,653	19,279	890
7	Kamalganj	45,067	23,356	21,711	930
District (Rural) Total:		**236,040**	**124,144**	**111,896**	**901**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 901 for the district (rural) The sex-ratio of C D block varies between 883 to 930 It is highest in Kamalganj C.D. block i.e 930 followed by 907 in Shamsabad C D. block and lowest 883 females is found in Rajepur C D. block The sex-ratio of Kaimganj,Barhpura, Shamsabad and Kamalganj C D. blocks are higher than the district rural (901), while in remaining blocks, it is below the average of the district

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	78	8 8	8,480	3 6
700-749	47	5 3	9,139	3 9
750-799	90	10 2	20,722	8 8
800-849	105	11 9	29,292	12 4
850-899	124	14 0	41,404	17 5
900-949	127	14 4	56,584	24 0
950-999	87	9 9	25,283	10 7
1000-1099	113	12 8	31,509	13 3
1100+	112	12 7	13,627	5 8
District (Rural) Total	**883**	**100.0**	**236,040**	**100.0**
Sex ratio (Rural) for District:		**901**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 127 (14.4 per cent) having largest population (24.0 per cent) in the district (rural) fall in the sex-ratio range of 900-949 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 850-899 which claims 124 villages (14.0 per cent) and 17.5 per cent population. Next to it, 113 villages (12.8 per cent) are in the range of 1,000-1,999 with 13.3 per cent population. The highest range of 1100 and above claims 112 villages (12 7 per cent) This range account for 5.8 per cent of rural pipulation of the district , while 87 villages (9 9 per cent) having 10 7 per cent population fall in sex-ratio range of 950-999. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, and 800-849, the number of villages are 78 (8.8 per cent), 47 (5.3 per cent), 90 (10 2 per cent), 105 (11.9 per cent) respectively In these ranges, the percentage of population is 3.6,3.9,8.8 and 12.4 respectively. It becomes clear from the table that more than seventy five per cent of villages i.e. 668 having population (83.7 per cent) fall in the sex-ratio ranges of 800 to 1100 and above.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

		Urban	**341,544**	**46,155**	**815**	**13.5**	**0.2**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,570,408 total population of the district, 16.4 per cent of the total population belong to the Scheduled Castes and 0.1 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 17.2 per cent in rural population and 13.5 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Kaimganj tahsil (18.6), while the lowest is found in Amritpur tahsil (10.2) The proportion of Scheduled Tribes population is 0.2 per cent in urban areas. Scheduled Tribes population in the district is mainly concentrated in tahsil of Farrukhabad (0.1 per cent), while remaining tahsils there is no Scheduled Tribes population.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Scheduled Castes population	Scheduled Tribes population	Scheduled Castes population to total population	Scheduled Tribes population to total population

	District (Rural) Total:	**1,228,864**	**211,925**	**96**	**17.2**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 17.2 per cent of rural population of the district belongs to Scheduled Castes. At C.D. block level, Scheduled Castes population varies between 10.2 per cent in Rajepur and 20.6 per cent in Barhpura C.D. block. The other C.D. block containing the highest percentage of Scheduled Castes are Kaimganj (20 5) Nawabganj (19.5) and Shamsabad (18) The highest proportion of 0.1 per cent Scheduled Tribes population is found in Kaimganj C.D. block and remaining CD blocks there is no Scheduled Tribes population.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	122	13.8	0	0.0

51-75	24	2 7	17,790	8 4
76 and above	9	1 0	3,166	1 5
District Total	**883**	**100.0**	**211,925**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 122 villages accounting for 13.8 per cent of total 883 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5 per cent in 101 villages (11.4 per cent). In 169 villages, it varies between 5-10 per cent, while the next range of 11-20 per cent accounts for 227 villages constituting 25.7 per cent of the total villages. The range 21-30 and 31-40 per cent contains 132 and 58 villages respectively. Both these ranges together account for 21.5 per cent villages of the district. 74 villages fall in the range of 41-50 and above per cent. Out of this 9 villages are such where the proportion of Scheduled Castes is more than 76 per cent. These villages contain 1.5 per cent Scheduled Castes population of the district. The maximum of the 30.4 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

	District(Urban) Total	**341,544**	**46,155**	**815**	**13.5**	**0.2**

Table 18 shows number and percentage of Scheduled Caste and Scheduled Tribes population recorded in urban Agglomerations/ towns during 2001 census. Of the 341,544 total urban population of the district only 13.5 per cent belong to Scheduled Castes. The highest percentage of Scheduled Castes population is recorded in Kamalganj NP (26.1 per cent), while the lowest percentage is found in Shamsabad NP (7.4 per cent). The Scheduled Tribe population is negligible in the urban areas of the district. Highest percentage (0 4) of Scheduled Tribe population was recorded in Farrukhabad-cum-Fatehgarh NPP.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Kaimganj	824	1133

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 60.9 per cent in the district. This proportion in rural area is 58.2 per cent against 70.2 per cent in urban areas. In the district the literacy rates of males (71.1 per cent) is much higher than that of females (48.7 per cent). Among the tahsils, Farrukhabad tahsil tops with 65.2 per cent literates followed by Kaimganj tahsil (55.6 per cent). Amritpur tahsil with 54.9 per cent literates stands at the bottam in the district Out of 3 tahsils, the literacy rates of 1 tahsil i.e Farrukhabad is higher than that of district average It is observed that in urban areas of district the literacy rates are higher than the rural areas

The gap between male and female literacy rate is very high, which comes to 22 5 per cent in the district, as a whole. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 13 8 points against the rural areas, where the gap between male and female literacy is 25.2 points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS,

Sl No	Name of C D block	Number of literates and illiterates									Gap in male-female literacy rate

District (Rural) Total:		**577,469**	**378,049**	**199,420**	**651,395**	**289,537**	**361,858**	**58.2**	**69.6**	**44.4**	**25 2**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level. 58.2 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 69.6 and 44.4 per cent respectively which shows very wide gap of 25.2 per cent in male and female literacy rate. At C.D. block level, Mohammadabad C D block has the highest rural literacy rate of 66 6 per cent, while 78.1 per cent males and 52 8 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Kaimganj C D block (50 7 per cent) There are wide variations in male and female literacy in all the C.D. blocks of the district The maximum difference of 28.3 points is found in Rajepur C D block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population

District Total:	**883**	**100.0**	**1,228,864**	**100.0**
Literacy rate for District:		**60.9**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 1 village (0.1 per cent) of the district and population of these villages is only 1 person. 1 village (0.1 per cent) has the literate population 250 villages accounting for 28.3 per cent of the total villages are in the literacy range of 61-70 per cent and 232 villages (26.3 per cent) fall in the literacy range of 51-60 per cent The lower literacy rate of 1 to 50 per cent observed in 252 villages (28 6 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 148 villages (16.7 per cent). The range of 41-80 have the maximum number of 733 villages forming 83 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Fatehgarh (CB) town is way ahead of other towns. The table reveals that literacy rate is very high in the urban areas of the district (70.2) per cent. The literacy rate is quite high (above 80 per cent in three towns) among males. Female literacy rate is not far behind in four towns (above 60 per cent) However, literacy rate among females is very low (43.6 per cent) in Shamsabad (NP) town, thus the gap in male female literacy rate is very high (16 4 per cent), but the gap is the highest in Mohammadabad (NP) (20 7 per cent)

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

District (Rural) Total:		**82,732**	**55,974**	**26,758**	**129,193**	**59,615**	**69,578**	**49.2**	**60.3**	**35.5**	**24.9**

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by sex in CD blocks at the 2001 Census. In rural areas of the district proportion of literates is 49.2 per cent in which 60.3 per cent are males and 35.5 per cent females. Thus, the gap in male and female literacy rate is 24.9 among all the CD blocks, Mohammadabad CD block has the highest literacy rate 55 2 per cent and Kaimganj CD block has the lowest literacy rate (45 5 per cent). The gap in male/female literacy rate in Mohammadabad CD block is highest (27 3) and lowest in Barhpura CD block (21 1)

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

91-99	2	0 3	122	0 1
100	1	0.1	58	0 0
District Total:	**761**	**100.0**	**211,925**	**100.0**
Literacy rate for District (Rural):		**49.2**		

The table 26 presents the distribution of villages by literacy rate range for Scheduled Castes population at the 2001 Census Maximum number of villages (206) are in literacy rage range of 41-50 with population of 73,026 which also carries highest percentage of population (34.5). In contrast to this lowest number of only one village (0.1 per cent) is in the cent. per cent literacy rate having population of 58. It is observed that in the literacy rate range from 31 to 70 there are 624 villages (82 per cent) covering 90.8 per cent of the population

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl No	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Farrukhabad-cum-Fatehgarh (NPP)	13,027	7,956	5,071	14,005	6,574	7,431	58 2	66 0	49 1	16 9

6	Mohammadabad (NP)	1,836	1,228	608	2,243	1,013	1,230	57 2	69 6	42 1	27 5
7	Shamsabad (NP)	631	419	212	1,112	532	580	45 7	53 9	35 2	18 7
	District (Urban)	**21,677**	**13,582**	**8,095**	**24,478**	**11,326**	**13,152**	**57.3**	**66 3**	**46.7**	**19.6**

The table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 Census. The number of literates is less than illiterates in the district (urban) in all towns except Fatehgarh (CB). The percentage of literates is least in Kamalganj (NP) among towns but the gap in male/female literacy rate is highest in case of Mohammadabad (NP) (27 5) The males in all the towns enjoy higher literacy rate than females The gap in male/female literacy rate is least (16 9) in case of Fatehgarh (NPP)

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers by sex for rural population of the district. Of the 1228864;total rural population of the district, 24.4 per cent has been categorised as main workers and the marginal workers constitute 5.6 per cent and the remaining 70 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 42.8 per cent males and 2.6 per cent females are in the category of main workers. Male and female marginal workers account for 5.8 and 5.3 per cent respectively. The percentage of female marginal workers is lower than male marginal workers.

The percentage of total rural workers of the district comes to 30 per cent. At the C.D. block level, Kamalganj has highest proportion of total workers forming 31.5 per cent of the total population. It is closely followed by Mohammadabad(31.2 per cent), Rajepur (29.6 per cent), Kaimganj 29.6 per cent), Nawabganj(29.1per cent) and Shamsabad (29) per cent. The lowest percentage of 28.5 per cent is recorded in Barhpura C.D block

TABLE33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

The table 33 gives number and percentage of main workers, marginal workers and non-workers by sex in urban area of the district at the 2001 census. The propirtion of the total workers workout to 27.6 per cent of the total population of the district. The total workers are comprised of 23.7 per cent of main workers and 3.9 per cent of marginal workers and the remaining 72.4 per cent are non-workers.

Among the main workers, male participation rate in the district is 40.4 per cent whereas females participation rate is only 4.6 per cent. Male and female marginal workers accounts for 5.4 per cent and 2.2 per cent respectively. The percentage of female marginal workers is lower than males. Total workers (main and marginal workers) among town varies from 24.3 per cent in Kampil (NP) to 34.1 per cent in Fatehgarh (CB).

Note: Percentage of Workers to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 49.1 per cent of the total workers (main + marginal) and remaining 50.9 per cent of total workers are engaged as agricultural labourers (18.0 per cent), Household Industry workers (8.3 per cent) and other workers (24.6 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 40.9 per cent in Farrukhabad tahsil and 66.8 per cent in Amritpur tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 32.4 per cent which is very low as compared to 51.3 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is low in the district as stated above. The workers in other activities occupy the second position next to agriculture in the district. The highest proportion of 32.4 per cent of other workers is recorded in Farrukhabad tahsil while the lowest proportion of 8 4 per cent is found in Amritpur tahsil

Note: Percentage of Workers to total worker are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) are 30.0 per cent of total population. Among these workers, cultivators constitute 60.4 per cent, 20.8 per cent agricultural laborers, 7.0 per cent household industry workers and 11.8 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercialy viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 7.0 per cent workers of the total working force. Therefore surplus-working force has to depend on primary activities. Among cultivators, the percentage of females (39.9 per cent) is lower than males (63.2 per cent) in the rural areas of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 33.0 per cent in Barhpura C.D. block to 72.1 per cent in Mohammadabad C.D. block. Similarly for other workers, the lowest proportion is 8.4 per cent in Rajepur C.D. block while 28.2 per cent is the highest in Barhpura C.D. block. The percentage of agricultural labourers is highest in Barhpura CD Block (27.5) and lowest (15.6 per cent) in Nawabganj C D. block. Household industry workers are quite low i.e 7.0 per cent in the district and varies between 3 3 per cent in Mohammadabad and 14.9 per cent in Kamalganj CD Block

Table 36 presents distribution of workers by sex in four categories of economic activity. In Urban areas of the district total workers (main and marginal) are 27.6 per cent of total population. Among these workers, cultivators constitute 5.0 per cent, 7.4 per cent agriculture labour, 13.3 per cent household industry workers and 74.3 per cent other workers. Other workers play a major role in accelerating the urban economy. Cultivators, Agricultural labourers, household industry workers could not make much progress in urban areas as reflected in the date.

Among other workers, the percentage of male (76.9 per cent) is higher than females (54.5 per cent) in the urban area of the district. The males play a major role in the urban economy of the district. The percentage of other workers is highest in Fatehgarh (CB) (97.7 per cent) whereas lowest in Kampil (NP) (40.4 per cent).

The percentage of cultivators and agricultural labours together is low (12.4 per cent).The percentage of cultivators is highest in Mohammadabad NP (37.4) is followed by Kampil (25.9) and is lowest in Fatehgarh (CB) (0.2). Similarly agricultural labouresrs varies in towns between 0.3 per cent in Fatehgarh CB and 28.8 per cent in Kampil NP.

(ix) Brief analysis of the Village Directory and Town Directory data :

One of the major parts of the District Census Handbook are Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in towns and villages. From this non-census data, inset tables have been generated and reproduced below showing major trends in the availability of above amenities:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communic ations $	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

Note : - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 883 inhabited villages in the district 690 villages or 78.1 per cent have been provided with the education facilities of one type or the other. Similarly 176 villages in the district constituting 19.9 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 868 or 98.3 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 117 villages constituting 13.3 per cent of villages have been provided with post office facility within the village 448 or 50.7 per cent villages have been provided with the telephone facility, 148 or 16.8per cent with transport facility, 39 or 4.4 per cent villages with bank facility and 60 or 6.8 per cent with agricultural credit societies. Similarly there are 488 or 55.3 per cent villages which have been linked with the pucca road, and 618 or 70.0 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Nawabganj C.D. block has the highest 89.8per cent villages where educational facility is available and lowest 70.7 per cent is found in Kaimganj CD Block. Medical facility is highest in Nawabganj (31.8 per cent) and lowest (12.4 per cent) in Shamsabad C.D. block. Improved drinking water facility is available in most of the villages in all CD blocks.In fact it is above 95 per cent Telephone facility is highest in Barhpura(63.3 per cent) while lowest in Rajepur C.D. block (38.6 per cent). Transport and communications is less developed in Kaimganj where only 8.0 per cent villages are covered by this facility whereas 25.7 per cent villages of Rajepur C.D. block are availing this facility.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D block	Total population of inhabited villages	Type of amenity available					Type of amenity available				
			Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communica-tions $	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

Note - Percentages are given in brackets.
* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly
# Post office includes Post office, telegraph office and Post and telegraph office
$ Transport communication includes bus service, rail facility and navigable waterways

Table 38 depicts the number and proportion of rural population served by different kind of amenities at the CD Block level. Out of total rural population of 1,228,864 persons in the district, 1,138,508 or 92.6 per cent have educational facility of one or the other type. Similarly 447,052 or 36.4 per cent population has medical facilities while 1,226,898 or 99.8 per cent have got improved drinking water facility. Post office facilities are available to 365,183 or 29.7 per cent population. Telephone facility is available to 810,773 or 66.0 per cent. Transport communications facility is available to 292,184 or 23.8 per cent. Bank facility is available to 164,821 or 13.4 per cent. 202,870 or 16.5 per cent have been provided with the facility of agricultural credit societies. 870,246 or 70.8 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,045,533 or 85.1 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	176	18	0	194
(b) Middle School	452	206	13	671
(c) Degree College	180	244	448	872
2. Medical:-

(b) PHC	217	339	316	872
3 Post Office	610	139	17	766
4. Telephone	329	70	36	435
5 Bus Service	410	265	76	751
6. Banks				
(a) Commercial Bank	532	244	68	844
(b) Cooperative Bank	269	337	271	877
7 Agricultural Credit Societies	538	230	55	823

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 194 villages do not have primary school in their villages and out of these villages, children of 176 villages have to travel less than 5 kms. for schooling. Out of 883 inhabited villages as many as 671 are deprived of middle school and 872 of degree college. Of these 452 avail the facility of middle school at a distance of less than 5 kms., 206 at a distance of 5 to10 kms. and the remaining 13 at a distance of 10+ kms. In respect of degree college 180 avail this facility at a distance of less than 5 kms., 244 between 5 to 10 kms. and rest 448 villages at a distance of 10+ kms.

Similarly there are 870 villages in the district which have been devoid of Hospital facility and 872 villages which are deprived of PHC facilities. Of these 289 villages have the facility of Hospital available within 5 kms. while in respect of 278 villages the inhabitants have to cover a distance of 5-10 kms. and rest 303 villages have this facility at a distance of 10+ kms. As regards PHC 217 avail this facility at a distance of less than 5 kms., 339 at a distance of 5-10 kms. and the remaining 316 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 766 villages do not have this facility in the village itself. Of these majority i.e. 610 have this facility at a distance of less than 5 kms., another 139 villages avail it at a distance of 5-10 kms. In the remaining 17 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 435 villages in the district which are without telephone facilitiy. Of these 329 avail this facility at a distance of less than 5 kms., 70 at a distance of 5-10 kms. and remaining 36 have to traverse a distance of 10+ kms..

For Bus service out of 751 villages which do not have facility, 410 villages avail this facility at a distance of less than 5 kms , 265 at a distance between 5-10 kms. and 76 at a distance of 10+ kms

In the entire district 844 villages are deprived of Commercial Bank & 877 of Co-operative Bank. Of these 844 villages which are deprived of Commercial Banks 532 villages avail this facility at a distance of less than 5 kms., 244 between 5-10 kms. & the remaining 68 at a distance of 10+ kms. Regarding Co-operative Banks out of 877 villages 269 villages avail this facility at a distance of less than 5 kms , 337 at a distance of 5-10 kms. and remaining 271 at a distance of 10+ kms. 823 villages do not have agricultural credit societies. This facility to 538 villages is available at a distance of less than 5 kms., 230 at a distance of 5-10 kms. and the remaining 55 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table 40 deals with the distribution of villages according to distance from the nearest statutory town. Out of total 883 inhabited villages in the district, there are 94 villages which have nearest towns upto a distance of 5 kms. Of these only 76 villages forming 80.9 per cent of these total villages, are having the educational facilities of one type or the other and 21 villages constituting 22.3 per cent, have the medical facilities within the village, 11 villages forming 11.7 per cent have the facility of post office from a town situated within 5 Kms. from the village and 58 or 61.7 per cent have the facility of telephone. 13 villages constituting 13.8 per cent have been linked by transport service. 8 villages comprising 8.5 per cent have been provided bank facilities, and agricultural credit societies. 70 villages comprising 74.5 per cent have been provided with pucca road.

There are 669 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 523 villages constituting 78.2 per cent have been provided with the educational facilities. 130 villages comprising 19.4 per cent have been provided with medical facilities. 88 villages constituting 13.2 per cent enjoy the post office facility. 335 villages comprising 50.1 per cent have been provided the telephone facility. 110 villages constituting 16.4 per cent have been linked with transport communications. 24 villages comprising 3.6 per cent have bank facility. 41 villages constituting 6.1 per cent are having agricultural credit societies, while 358 villages or 53.5 per cent are approachable by pucca road. 113 villages fall in the distance range of 16-50 kms. Of these, 76.1 per cent villages have educational facility, 21.2 per cent with medical, 14.2 per cent with post office, 46.0 per cent with telephone and transport & communications available to 20.4 per cent villages. Banks and agricultural credit societies facilities are available to 5.3 and 8.8 per cent of villages respectively.

There is no villages in the district which are situated beyond 50 kms.from the nearest town. There are 7 villages whose distance ranges from the nearest statutory town have not been given Such villages have been grouped under the unspecified category. 5 or 71.4 per cent villages have the educational facility of one or other type. One village constituting 14.3 per cent have the medical. Bank and agricultural credidt society facilities, whereas 28.6 per cent post office and Transport Communications. There are only 3 villages constituting 42.9 per cent with Telephone facility and provided with pucca road.

TABLE41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'

However, the concept of improved drinking water is state specific and this is to be considered accordingly

Table 41 deals with the distribution of villages by population ranges and amenities available therein. Out of the total 883 inhabited villages, in the district there are 174 villages have population of less than 500 persons.Of these, 55 villages (31.6 per cent) have education facility, 7 (4.0 per cent) have medical facility, 160 (92.0 per cent) have improved drinking water facility. 36 (20.7 per cent) have telephone facility. 16 (9.2 per cent) have been linked by bus service. 54 villages (31.0 per cent) have been linked with pucca road. 59 villages (33.9 per cent) have been provided with electricity.

Out of 255 villages, which fall in the population range of 500-999 persons, 195villages (76.5 per cent) have been provided with the education facility, 26 (10.2 per cent) with medical facility, almost all the villages have improved drinking water facility. 8 villages (3.1 per cent) have been provided with post office facilities, 102 villages (40.0 per cent) with telephone facility, 36 villages (14.1 per cent) with transport facilities, 2 villages (0.8 per cent) with bank facility, 6 villages (2.4 per cent) with agricultural credit societies, 115 villages (45.1 per cent) have approach by pucca road and 156 villages (61.2 per cent) have been provided with electricity.

283 villages fall in population range of 1,000-1,999 persons. 271 villages have education, facilities. Whereas 60 villages (21.2 per cent) enjoy the medical facility, All villages (cent per cent) have improved drinking water facilities, 40 villages (14.1 per cent) have post office facility,179 villages (63.3 per cent) have telephone facility, 50 villages (17.7 per cent) have transport and communication facilities, 7 villages (2.5 per cent) have bank facilities, 15 villages (5 3 per centr) have agricultural credit societies, 175 villages (61.8 per cent) have approach bypuca road and 244 villages (86.2 percent) have been provided with electricity.

There are 148 villages in the district which are covered under 2,000-4,999 population range. Out of these 146 villages (98.6 per cent) have been provided with education facility.65 villages (43.9 per cent) have medical facility. All villages (cent per cent) have improved drinking water facility, 50 villages (33.8 per cent) have post office facility, 112 villages (75.7 per cent) have telephone facility, 38 villages (25.7 per cent) have transport communication facilities, 21 villages (14.2 per cent) have bank facilities, 28 villages (18.9 per cent) have agricultural credit societies, 122 villages (82.4 per cent) have been linked with pucca road and 136 villages (91.9 per cent) have electricity facility.

Out of 19 villages which are in the population range of 5000-9999 persons, all the villages have education, improved drinking water and power supply facilities. There are only 4 villages in the population range of 10,000 and above persons. All the four villages have educational, medical, improved drinking water, post office, approach by pucca road and power supply facilities.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Kaimganj	150	36,351	61 7	72 9
2	Nawabganj	88	21,850	79 3	79 4
3	Shamsabad	145	29,325	79 7	80 9
4	Rajcpur	140	34,438	74 0	80 1
5	Barhpura	79	12,410	71 9	79 9
6	M ohammadabad	121	36,491	N A	79 4
7	Kamalganj	160	4,976	60 6	73 0
	District Total:	**883**	**175,841**	**78.0**	**78.6**

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 883 inhabited villages in the district having a total area of 175840.7 hectares. Of this, 78 per cent is cultivable and 78.6 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

The land use pattern at CD Block level shows than the percentage of cultivable area to total area to tatal area is highest (79.7 per cent) in Shamsabad CD Block and is lowest (60.6 per cent) in Mohammadabad CD Block. Similarly the percentage of irrigated area to total cultivable area is highest in Shamsabad CD Block and is lowest (72.9 pef cent) in Kaimganj CD Block.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

1	Kampil, NP	--, --, --	Tobacco, Potato, Sugarcane
2	Kaimganj, NPP	Sugar, Tobacco, Knife	Mango, Guava, Tobacco
3	Shamsabad, NP	Bricks, Tobacco, Shoes	Shoe, Potato, Tobacco
4	Farrukhabad-cum-Fatehgarh, NPP	Brass & Copper Utensils, Handloom Cloth, Wooden Goods	Potato, Tobacco, Sugarcane
5	Fatehgarh, CB	--, --, --	--, , --
6	Mohammadabad, NP	--, --, --	Potato, Wheat, Maize
7	Kamalganj, NP	Bidi, Cloth, --	Potato, Wheat, Maize

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The main export items of the district are Tobacco and Potato whereas are the main items which are manufactured in the town are Brass and Copper utensils, Knife and Bidi.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001 :

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. have been added in the schedule for the first time . The district wise tables have been prepared and these are placed in the subsequent tables The following is the distribution of households by number of rooms occupied·

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 240,773 consisting of 189,040 rural and 51,733 urban households. 46,785 households belong to Scheduled Castes and 2,338 to Scheduled Tribes. 231,425 households are living in their owned houses constituting 96.1 per cent of total households. Of these households, the largest number of households (86,860) have occupied one roomed accommodation and is followed by double roomed accommodation numbering to 77,179 households Next position is claimed by households (33,046) occupying three roomed accommodation. Number of households in owned accommodation occupying three rooms plus rank at fourth place with 30539 households while 3801 households are without any exclusive room.

7,172 households living in rented accommodation account for 3 per cent of total number of households in the district. The largest number of 3,205 households are living in single roomed accommodation followed by 2,641 households in double roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 2,085 forming only 0 9 per cent of total Households. Of these household the largest number of households have occupied one roomed accommodation numbering 1,172 double roomed accommodation numbering 490 and is followed by three rooms accommodation numbering to 252.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/Tahsil	Total			Rural			Urban		
		Perma-nent	Semi-perma-nent	Tempo-rary	Perma-nent	Semi-perma-nent	Tempo-rary	Perma-nent	Semi-perma-nent	Tempo-rary
1	2	3	4	5	6	7	8	9	10	11
1	Kaimganj	48.9	15 9	35.2	46 1	15 8	38 1	71 6	17 4	11 0
2	Amritpur	40.5	7.3	52.2	40 5	7 3	52 2	0 0	0 0	0 0
3	Farrukhabad	56.9	12 7	30.4	46.4	13 7	39.9	79 2	10 4	10 2
	District Total:	**52.5**	**13.3**	**34.2**	**45.5**	**13.7**	**40.7**	**77.9**	**11.7**	**10.4**

Data source: Census of India 2001, H-series Tables on Houses, Household amenities and Assets

Note:-

Permanent:- Permanent houses refer to those houses whose walls & roofs are made of pucca materials i e where burnt briks G I Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles, slate, shingle, corrugated iron zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof

Semi permanent:- Semi-permanent houses refer to those houses made of other types of materials

Temporary:- Temporary houses refer to those houses having wall and roofs made of Kutcha materials, i e where grass leaves reeds, bamboo, mud and unburnt bricks are used for the construction of walls and grass, leaves, reeds, bamboo hatch, mud, unburnt bricks and wood etc are used for roofs.

The percentage distribution of households as shown in the above table reveals that more than 52.5 per cent of the households in the district had permanent houses. The trend is different in rural (45.5 per cent) and urban area (77.9 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Farrukhabad (56.9 per cent) followed by Kaimganj (48.9per cent), and lowest in Amritpur (40.5 per cent). In respect of semi-permanent houses, the returns were 13 3 per cent of district level where as among tahsils, in Kaimganj it was highest 15.9 per cent and lowest was 7.3 per cent in tahsil Amritpur Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 10.4 to 17.4 per cent. Temporary houses in the district lie between the range of 30 4 to 52.2 per cent.

TABLE 50 : PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source Census of India 2001, H-series Tables on Houses, Household amenities and Assets

*Based on the improved drinking water source, water supply has been classified as 'Improved' or otherwise If the household has access to drinking wter supplied from a tap or a hand pump/tube well situated within or outside the premises, it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is given in brackets after the number of households Bathroom means bathroom within the house Toilet means toilet within the house. Drainage menas closed and open drainage.

Improved drinking water facility i.e. through tap, hand pump and tube well was reported to be availed in 83.9 per cent of the household at district level (83.3 per cent rural and 86.1 per cent urban). In all the three tahsils availability of this facility was nearly equal to the district proportion. Similarly in respect of electricity 26.5 per cent of the household in the district availed this facility. The breakup for rural and urban areas remains to be 13.8 per cent and 72.6 per cent. Among all the tahsils higher proportion (34.4 per cent) of availability was to be recorded in Farrukhabad tahsil, whereas the urban areas proportion was 75.7 per cent. More than 25 per cent of the household in the district had bathroom facility, thr urban households was much better served as compared to the rural areas. households having toilet facility accounted to be 36.1 per cent at district level, the urban households exceeded rural households in many folds who had this facility. Tahsil Amritpur had lower order of proportion of households where the percentage was only 20 5 per cent.

The drainage facility was reported in 87.6 per cent of the household in the district (85.3 per cent in rural and 95.9 per cent in urban). The similar observation had emerged in all other tahsils.

It is observed from the above table that to 39.5 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is to 38.2 and in urban area it comes to to 44.4 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in to 10.5 per cent of the households. The composition of rural and urban comes to 2.2 and to 40.5 per cent respectively. Kerosene is used for cooking in as many as 1.3 per cent of the households (to 0.2 per cent rural and 5.3 per cent urban households) The other methods like crop residue, cow dung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between to 0.1 per cent to 25.0 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, cow dung cake, LPG (cooking gas) crop resedue are the predominant fuel for cooking in the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Total number of house-holds	Total number of households availing banking	Availability of household assets						
					Radio/ Tran-sistor	Tele-vision	Tele-phone	Bicycle	Scooter, Motor Cycle, Moped	Car, Jeep, Van	None of the specified assets
1	2	3	4	5	6	7	8	9	10	11	12
1	Kaimganj	Total	84,746	33,664	30,713	11,245	2,450	57,565	4,484	848	21,037
		Rural	75,561	29,668	27,121	7,947	1,508	51,965	3,436	614	18,753
		Urban	9,185	3,996	3,592	3,298	942	5,600	1,048	234	2,284
2	Amritpur	Total	23,734	6,259	8,532	2,769	368	14,951	783	151	7,057
		Rural	23,734	6,259	8,532	2,769	368	14,951	783	151	7,057
		Urban	0	0	0	0	0	0	0	0	0
3	Farrukhabad	Total	132,293	49,369	47,728	40,183	8,937	88,398	11,521	1,813	28,688
		Rural	89,745	29,396	30,766	14,805	2,378	62,761	4,562	720	20,828
		Urban	42,548	19,973	16,962	25,378	6,559	25,637	6,959	1,093	7,860
District Total:		**Total**	**240,773**	**89,292**	**86,973**	**54,197**	**11,755**	**160,914**	**16,788**	**2,812**	**56,782**
		Rural	**189,040**	**65,323**	**66,419**	**25,521**	**4,254**	**129,677**	**8,781**	**1,485**	**46,638**
		Urban	**51,733**	**23,969**	**20,554**	**28,676**	**7,501**	**31,237**	**8,007**	**1,327**	**10,144**

The above table shows that 89,292 household in the district avail banking facility in the district, whereas number of household in tahsil Kaimganj, Farukhabad and Amritpur is 33,664, 49,369 and 6,259 respectively. Radio and transistor was possessed by 86,973 household in the district. The trend is almost similar in tahsils. The number of household being 30,713 in Kaimganj, 47,728 in Farrukhabad and 8,532 in Amritpur. The network of television was available to 54,197 households 40,183 in Farrukhabad 11,245 in Kaimganj and 2,769 in Amritpur. As much as 11,755 household in the district had telephone connections. Availability of other assets like bicycle, scooter/motor cycle/ moped and car/jeep/van came to 160,914, 16,788 and 2,812 households respectively. 56,782 households in the district did not have none of these specified assets. The number of households in tahsil accounted to 7,057 in Amritpur, 21,037 in Kaimganj and 28,688 in Farrukhabad tahsil.

(xi) Major Social and Cultural Events, Natural and Administrative Development and significant activities during the decade :

District Kannauj has been formed out of this district and nothing else was available to analysis social, cultural and nutural events in the district.

(xii) Brief Description of Places of Religious, Historical, Archaeological Importance in villages and places of Tourist Interest in the towns of the District:

Brief desciption of place of religious, historical or archaeological and tourist interest are as follows:

Kampil :

Kampil is a place known for its ancient history. It is said that it was extablished by saint Kampila. It epic 'Mahabharata' the place was the kingdom of south 'Panchal' where king Drupad's Princess Dropadi's Swayamvar was held and Arjun married his daughter Dropadi. There is an old temple of Rameshwarnath (Mahadev). It is said customary, that Prince Shatrughan brother of Sri Ram brought the Shivling from Ashok Vatika of Lanka to establish the Shivling here at Kampil. There are three Jain Temples related to Jain Tirathankar Neem Nath. Thus it is a Pilgrimage for Jains.

Sankisa :

Sankisa is holy place for Buddist pilgrims. Fort of Fatehgarh is renowned historical place for tourist and Khudaganj also bears historical importance.

(xiii) Major Characteristics and Contribution of district :

Fa-hien, the chinese, Buddhist pilgrim, visited Sankisa, pargana Shamshabad of tahsil Farrukhabad, at the beginning of the fifth century and called it 'Sankasya'. In the 7th century Huien Tsary, another chinese traveler came here and called it 'Ke-pi-tha' According to Buddhist belief Buddha descended here again on the earth after he had been in the heaven for three months. As an act of faith and reverence Asoka, the great built a 'Vihare' (monastery) To commorate this every year a function named 'Swargarohan' is celebrate here. Govt of India recognized Sankisa Basantpur as place of tourist

interest for Buddhist.

(xiv) Scope of Village Directory and Town Directory Column Heading wise Explanation and Coverage of Data

Village Directory :

The village directory, as the title connotes, presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by, English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rationale of giving 2001 location codes along with 1991 location codes is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufactured	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII)

The following mode of listing of towns has been adopted:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration, are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement, a note is given against such towns that there are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s)

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999 and trade, commerce, industry and banking activities in year 1999. In this way, population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, Manufactured cinemas etc. and number of banks as well as commodities and exports are enumerated vividly in various statements relating to the town directories of the districts.

The Village Directory is the compilation of basic information pertaining to a particular village. The format of the Directory has been revised from time to time but it has been continued to remain as the traditional source of village level basic data. It contains a list of villages with Location Code Numbers, Population, amenities, namely, Educational and Medical facilities, availability of Drinking Water, Post, Telegraph and Telephone facilities, Commercial

and Co-operative Banks, Agricultural and Non-agricultural and other Credit Societies, Recreational and Cultural facilities, Communication, Approach Roads to village, Power Supply and Newspaper/ Magazine etc.. The name of villages of each Rural Development Block of the District has been arranged alphabetically and location codes number of the Census of India 2001 and corresponding code number of 1991 Census have been given for each village for easy reference.

Generally a 'village' is taken as a statutorily recognised unit of an area having definite and recognised boundaries and separate land records. Thus in Census, the basic unit of rural areas is taken as a revenue village which has definite surveyed boundaries. A revenue village may comprise of several hamlets but the entire village is treated as one Unit for presentation of data. In Mizoram, however, the concept of village is different from what has been mentioned above since there is no surveyed village in the state. Therefore an inhabited area with locally recognised boundaries and having a name of its own is treated as a village. The un-inhabited villages i.e., the villages where no population was found during Census Operations have also been included in the list of villages and C.D. Blockwise in the Village Directory.

Although there is no Panchayat Institution in the District, the villages have Village Councils which are democratically elected local bodies. In addition to the information as to the availability or otherwise of the basic amenities as mentioned in the preceding paragraphs, following nine appendices have also been included :

1. Appendix I	Abstract of Educational, Medical and other amenities in villages - C.D. Block level.
2. Appendix II	Villages with 5,000 and above population which do not have one or more amenities.
3. Appendix III	Land Utilization Data in respect of Census Towns/Non-Municipal Towns
4. Appendix IV	C.D. Block-wise list of inhabited villages where no amenities other than drinking water facility are available.
5. Appendix V	Summary showing number of villages not having Scheduled Castes population.
6. Appendix VI	Summary showing number of villages not having Scheduled Tribes population.
7. Appendix VII	List of villages according to the proportion of the Scheduled Castes and the Scheduled Tribes to the total population by ranges.
8. Appendix VIII	Number of villages under each Gram Panchayat (C D. Block wise)
9. Appendix IX	Statement showing number of girls schools in the villages

Since a large number of abbreviations had to be used due to space problems, a detailed and explanatory note on each of these abbreviations has also been incorporated for easy clarification of the subject concerned.

PART A

VILLAGE AND TOWN DIRECTORY

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note: Explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU

	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	

O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO

(iv) Electricity for all purposes EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes.

(i) Newspaper N
(ii) Magazine M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i) Government Canal GC
(ii) Private Canal PC
(iii) Well (without electricity) W
(iv) Well (with electricity) WWE
(v) Tubewell (with electricity) TW
(vi) Tubewell(without electricity) TWE
(vii) Tank TK
(viii) River R
(ix) Lake L
(x) Waterfall WF
(xi) Others O
(xii) Total T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C.D. Block wise of the district.

Appendix-I-A Indicates number of villages C.D. Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C.D. Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C.D. Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A List of villages according to proportion of Scheduled Castes to the total population by ranges.

Appendix-VII B List of villages according to proportion of Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates C.D Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

Statement showing number of girls schools in the villages

Name of District	Name of C D Block	Location Code	Name of Village Number	No of Girls School
1	2	3	4	5
Information not available for this district				

SECTION II

TOWN DIRECTORY

Town Directory

Note explaining the abbreviations used in Town Directory :

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M Cor/NN
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB/NPP
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III

Municipal Finance 1998 -1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV

Civic and Other amenities,1999

Column (1 to 6) : Self explanatory.

Column (7) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes .

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i e Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc of the government or semi government or autonomous bodies, public sector undertakings etc

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other The following codes are used

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/

Painting college, Pharmacy college, B Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools

School up to class V are treated as Primary or elementary schools These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e g P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 :Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 . Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to Area (in sq km.), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., Cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors

of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included In 1981 census only main workers were presented in to four categories One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also This will help the data users in better analysis and understanding of this literacy data

Level of presentation in District Census

	Name of the Primary Census Abstract	Level of presentation
1	District Primary Census Abstract	District/CD Block/UA/City/Town
2	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4	Village Primary Census Abstract	CD Block/Village wise
5	Urban Primary Census Abstract	Town/Ward level

Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels The level of presentation of Primary Census Abstracts are as under

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also The data for each CD Block is presented both for rural and urban areas separately All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s)

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares The area figures of the CD Block is the total of the village areas coming under each CD Block The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil The difference may be due to the fact that while the area covered by hills forests and rivers etc, have been accounted in the Tahsils and P S level the same may not be covered under the area of the villages Apart from this it may also differ due to varying methods of computation adopted at different levels

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town

ANNEXURE

I - VIII

ANNEXURE-I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE-II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which in north central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000 The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state

The child mortality indicators at the 1991 Census in the district and the State was as following

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Farrukhabad
QI	Persons	99	78
	Males	98	62
	Females	104	84
Q2	Persons	117	112
	Males	117	109
	Females	118	118
Q5	Persons	134	132
	Males	135	126
	Females	132	135

The child mortality by ages 1, 2 and 5 years was lower in the district as against the State, thus child mortality indicators in the district for both male and females shows lower order as compared to the State

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl No	Fertility Measures	Person Male Female	Uttar Pradesh	Farrukhabad
1	2	3	4	5
1	CBR		37 21	34 30
2	TFR		5 60	5 35
3	TMFR		6 30	6 10
4	GFR		172	164
5	GMFR		200	193
6	Mean age at marriage (1981-91)		17 27	17 29
7	Number of children ever born per ever married woman aged 45-49 years		4 59	4 61
8	Child woman ratio 0-4		631	643
	5-9		752	803

Measures of fertility is an important component to describe fertility and moratality rate of any area The table reveals that the Crude Birth Rath (CBR), which *is the ratio of the number of live births in a year to* mid year population, is 34. 30 per cent in the district. It is below to the state of Uttar Pradesh i.e of 37.21 per cent. In respect of Total Fertility Rate(TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all a slightly lower proportion from the state figures. The mean age at marriage during the period 1981-91 has been 17.27 years for the state where as 17.29 years has been observed for the district. It may be observed that higher age at marriage leads to higher of fertility in the state and district as well. Similar trend is observed in the number of children born per ever married women in the age group 45-49 The state and the district figures are placed as 4.59 and 4.61per cent respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 45-49 has been calculated to 643 and 803 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that fertility levels as such are high to the state average. Another important factors i.e. the probability of dying is varying between birth and at age 1,2 has been of lower order in the district but at the age of 5 it is more by 8,7 and 10 points in case of person, male and females in the district.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively The corresponding figure for the district was 96 7 in 1991, while in 2001 it was 93.6 percent respectively The proportion of in-migrants from other states was 16.1 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 3.0 percent and 6.2 percent respectively This shows in-migration from other states to this district was twice in 2001 in comparison to 1991 At district level in-migration from other countries was 0 3 percent in 1991 and 0.2 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 95.1 percent and 89.0 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 4.8 percent and 10.8 percent respectively. The movement of population from other countries in the district was 0.2 percent in 1991 and 0.2 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17 3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 85.6 percent in 1991 and 84.5 percent in 2001, while Muslim were 14.2 percent in 1991 and 14.8 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district Farrulhabad for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 56.9 percent male and 47 8 percent female to 59.5 percent male and 50.4 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39 8 percent male and 46.2 percent female. Percentage of married male was 39.8 percent and female was 47.0 percent in 1991 and in 2001 it was 37.6 percent male and 44.4 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.8 percent male and 5.1 percent female while it was 3.2 percent male and 5.1 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Note For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0 02% The remaining tongues have been merged in the column of "Total of Other Mother Tongues"

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 92.9 percent person in 1991 and 92.5 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 7.0 percent and 7.2 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
