MOTIF

GHEE PRODUCING UNIT

There are only five major pure ghee producing units in the state of Uttar Pradesh. Besides the main units established in Hapur, Khurja, Chandausi and Hathras, Etawah has the biggest pure ghee producing unit in the state as compared to the rest in proportion and quality. The main reason behind the large proportion is due to the family of Bhadawari cattles found there. The breed have small legs, small ears, well built body structure and a strip of white hair on the neck. Every cattle from this family milches an average of 18 to 20 lts. of milk at a time which leads to high production of pure ghee in Etawah and the percentage of fat in the milk is accounted for 12 to 15 percent which adds to more richness to the quality of the pure ghee. Being the 'beehar' area on the out skirts of Etawah, there is a large amount of grass and green fodder, easily available for their grazing. There is a tradition of cattling in every household, which is also a source of their income. The ghee producing units have modern techniques of milching, production and processing. The ghee of Etawah has great demand all over the country because of its unique taste and quality.

Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991 Census 421
Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 422
Annexure VI Marital status of population as per 1991 Census 424
Annexure VII Age, Sex and Education in the district, 1991 Census 428
Annexure VIII Distribution of different mother tongues returned in 1991 Census 430

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar

District Highlights - 2001 Census

1. District Etawah ranks 60th in terms of population in the state.
2. The percentage share of urban population in the district is 23.0 as against 20.8 of the population in urban areas of the state.
3. Etawah district has population density of 579 persons per sq.km.which is below than the state average 690 persons per sq. km
4. Etawah district ranks 54th in terms of sex ratio (858) which is lower than the state average (898) females per one thousand males.
5. Etawah district ranks 14th in literacy 69.6 which is higher than the state average 56.3 percent.
6. There are only 6 uninhabited villages out of total 692 villages in the district.
7. Decadal growth rate of the district 18.4 is lower to the state average of 25.8.
8. Bharthana tahsil has the highest number of inhabited villages (231), while Saifai tahsil has the lowest number (59).
9. The district has 6 towns. No town has been added or declasified after 1991 Census.
10. There are 214,222 households in the district accounting for 0.8 per cent of the total households in the state. The average size of households in the district is 6.2 persons.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District:

The district derives its name from Etawah, which is its headquarter. It is still some times referred to as the city of bricks and both tradition and the appearance of the ground suggest that the modern city was founded on an ancient Khera or town site, so that it is not improbable that the existence of old bricks or old brick kilns may have led to its present name. According to some scholars the region from Bateshwar in district Agra to Bhareh was known as 'Ishtapath' and there are a large number of temples of Lord Siva who was 'Isht Dev' of the people of that region. From the word 'Isht' the town was given the name of Ishtkapuri a reference to which is found in Bhareshya Puran. With the lapse of time Ishtkapuri changed into Etawah.

The early history of the region now within the district of Etawah is quite interesting. It once formed

part of the ancient country of Panchala which is said to have extended from the foot of the Himalayas in the north to the river Chambal in south. This region rose into great prominance during the period of Mahabharata. Many local traditions are attached to the modern Chakar Nagar of the district which most probably seems to be Ekchakra mentioned in Mahabharata. It was Ekchakra where Pandavas along with their mother Kunti spent their secret abode of one year during the period of their exile.

During the fourth century A.D., Guptas once again established imperial unity in India. The Chinees traveler Fa-hien also visited a city named 'A-lo i.e. Alvi, which has been identified with modern Airwa and spent his treat at the Dragon Shrine. Fa-hien described it as "a city near a large forest" (atavi). There are the remains of Budhist and Jain temples evidently of every ancient date in large number.

With the coronation of Harsha as a king (in 606 AD) the district came under Thaneshwar dynasty. Hiuen Tsang in his works has also dwelt upon the prosperity of this region.

The defeat of Jaichandra of Kannauj in the battle of Chandawer in 1193 A.D. at the hand of Shahab-ud-din Ghori, the district passed under influence of Muslim power, which by end of the century held in different degrees of subjection the whole of North India except Malwa and some contiguous districts. However, the local history of the district during the early years of the thirteenth century is more or less the account of settlement and emergence of certain Rajput clans. The Gaurs occupied part of Phaphund and Bidhuna near the Kanpur boundary, both falling in turn to Chandelas of Mahoba. The Chauhans occupied the western portion of the district, with extentive tracts now in Mainpuri. In 1400-1401 Mallu Iqbal Khan marched towards this region and opposed by Rai Sumar Singh or Sabir of Etawah and other Zamidars of the vicinity on the banks of the Ab-i-Siyah (Kali Nadi) near Patiali. The opposing army of Rai was defeated and chased down to the confines of Etawah where they took shelter. In the fourth year of Akbar's reign, Bahadur Khan a younger brother of Ali Quli Khan, was granted the jagir of Etawah at the instance of Maham Anka, the foster mother of the Emperor.

On December 25, 1857, a British Column arrived in the district. Kunwar Johar Singh now surrounded and blew up the Etawah tahsil building from where Taj Khan, was resisting the british advance. On 6th January 1858 the British reoccupied Etawah, but struggle was hardly crushed. In 1885 when Dussehra and Muharram coincided, communal disturbances broke out between the Hindus and the Muslims. In 1907 rumours were afloated in Etawah that Zorawar Singh Nigam, had organized a conspiracy to throw out the British. But on enquiry it was found baseless and a person Khalil who was responsible for rumour was arrested and sentenced. In 1914-15, the district came into prominance as a centre of revolutionary activity when Gendalal Dixit, a teacher at Auraiya, formd the Shivaji Samitti with object of liberating the country. Gendalal Dixit had also organized a group of young men called 'Matri-Vedi'.

In 1920 Mahatama Gandhi launched his non-cooperation movement all over the country. In Etawah, the response of the people to this movement was enthusiastic and wide spread. In 1920-21, the district congress committee was formed with Maulana Rahamat Ullah as its president. In 1925, Jyoti Shankar Dixit of Etawah was arrested in connection with the Kakori conspiracy case but later released.

In 1928, bycott of the Simen Commission; followed by; the civil disobedience movement in 1930 and Quit India Movement 1942 were started in Etawah, as in other parts of the country. Thus, people of Etawah played an eminent role in the freedom struggle of India.

(iii) Administrative Set-up:

The Etawah district comprises of 5 tahsils namely: Jaswantnagar, Saifai, Etawah, Bharthana and Chakarnagar and 8 Community Development Blcoks, 416 Gram Sabhas and 692 villages with 6 towns. There are 686 inhabited villages and uninhabited villages. Jaswantnagar (NPP), Etawah (NPP) and Bharthana (NPP), while rest 3 are Nagar Panchayat namely: Among towns 3 are Nagar Palika Parishads viz: Ekdil (NP), Bakewar (NP) and Lakhna (NP).

Jurisdictional Changes (1991-2000)

During the decade the entire Bidhuna and Auraiya tahsils alongwith all towns transfered to newly created Auraiya district.

Simultaneously, Jaswantnagar tahsil and Saifai tahsil has been carved out newly from Etawah tahsil and Chakarnagar tahsil newly carved out from Bharthana and Auraiya tahsils within district. Details are given below in the table.

S. No	Name of Tahsil	Notification No.	Jurisdictional Changes	
			Added	Subtracted
1	2	3	4	5
	Etawah	2869/1-322/92-R-5 dated 18-9-1997		Entire Bidhuna, Auraiya tahsils alongwith all towns transferred to newly created Auraiya district
1	Jaswant Nagar	1797/1-5/97-152/97-R-5 dated 1.9.1997	99 villages and one town transferred from Etawah tahsil	
2	Saifai		(i) 55 villages transferred from Etawah tahsil	
			(ii) 5 villags transferred from Karhal tahsil of Mainpuri district	
3	Etawah			(i) 99 villages and one town transferred to Jaswant nagar tahsil
				(ii) 55 villages transferred to Saifai tahsil
4	Bharthana			78 villages transferred to Chakarnagar tahsil
5	Chakarnagar		(i) 78 villages transferred from Bharthana tahsil.	
			(ii) 29 villages transferred from Auraiya Tahsil	

District Administration:

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration.

He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue

collection each tahsil is further entrusted to Naib Tahsildars and Kanoongoes circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each have a department at district level office, departments point of view the district is divided into community development block. Block Development Officers (BDO) looks after development works at community developments block level. Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big district and Superintendent of Police in small districts are incharge. Additional Superintendent of Police (ASP) and their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features:

(1) Location and Size:

The physical features of the district may be described in terms of location, boundaries and areas. District Etawah is situated in west of the Kanpur division. It is bounded in north by the district Mainpuri and Farrukhabad, on the east by newly created district Auraiya and on the south by Jalaun on the west by district Agra. Firozabad and the remaining part of the district bounded by the State of M.P. which also provides its western boundary to a certain distance. The district lies between 26°21' and 27°1' North latitude and 78°45' and 79°45' East longitude. Distirct has the area of 2311.0 sq.Km.

(2) Physiography:

The district Etawah is a south eastern part of the southern upper Ganga plain. The district lies entirely in Ganga plain but its physical features vary considerably and are determined by the rivers. Southern part of the district is dissected by the Yamuna and the Chambal ravines. The Yamuna and the Chambal rivers, which after entering on the west from Agra flow towards south east bisecting the district into unequal segments. On the north of this belt the district depicts leveled plain and drained by several streams namely, Sengar, Ahneya, Rind and Pandu etc. The flow of these streams are towards south east which indicates that the general slope of the district is in the same direction. The geology of the district belongs to Alluvium (recent). The climate of the district is dry and healthy. There is no forest in the district except stray jungles in the ravines of the Yamuna and the Chambal.

On the basis of the factors like geology soils, topography, climate and natural vegetation, the district has been divided into following three regions.

1. Arind Ahneya Plain
2. Sengar Plain
3. Chambal Yamuna Ravines

1. Arind Ahneya Plain : The region situated in the northern part of the district covering a portion of Etawah and Bharthana tahsils. It is bifurcated by the water dividing line of the Arind river system. Puraha and Ahneya are the main tributaries of Arind. These tributaries originated from the local depression in the region itself and flow parallel to each other. These streams are nonperennial. A narrow belt of ravines have developed along these streams. The general slope is from north west to south east. There are number of canal distributaries branching out from the Etawah branch of lower Ganga canal serving the irrigation need of the region. The geology of the region belongs to Alluvium, Dun Gravels.

2. Sengar Plain : It occupies the central part of the district extending in a elongated shape from north west to south east direction. Sengar along with its tributaries flows from the centre of the plain. This is a perennial stream of the Yamuna. A narrow stretch of ravines may be marked along the river courses flowing here. The streams form a parallel drainage pattern. A very important characteristics of the region

is high land surface all along its southern limit which restricts the influence of the Yamuna river and form a nodal zone. The geology of the region belongs to Alluvium, Dun gravels (Recent). Agriculturally this belt is not very rich even though the irrigational facilities are available here. Bhognipur and Etawah branch of lower Ganga canal irrigates the area. Etawah is the district headquarters situated on the bank of the Yamuna.

3. Chambal Yamuna Ravines : The region is situated in the southern part of the district in an elongated shape. It covers part of Etawah, and Bharthna tahsils. This is the zone of ravines. Yamuna, Chambal and Kurai are the main streams. They run parallel to each other and join the Yamuna in this belt. The ravines of this triangular tract are narrow and V-shaped. The Yamuna and Chambal ravines are more intensive and difficult to traverse. The main physiographic features of this belt are numerous platforms, knolls, bluffs, steep ridges, low sloping hills, deep trenches and broad cut meanders. During rainy season, these streams are flooded and difficult to cross. The geology of the region belongs to Alluvium, Dun gravels (Recent).

(3) Drainage:

Southern part of the district is dissected by the Yamuna and the Chambal ravines. The Yamuna and Chambal rivers, which after entering on the west from Agra flow towards south east bisecting the district into unequal segments.

On the north of this belt the district depicts levelled plain and drained by several streams, namely Sengar, Ahneya, Rind and Pandu etc. The flow of these streams are towards south east which indicates that the general slope of the district is in the same direction. Puraha and Ahneya are the main tributaries of the Rind river system. These tributaries originated from the local depression in the region itself and flow parallel to each other. These streams are non-perennial. A narrow belt of ravines have developed along these streams. The general slope is from north west to south east. There are number of canal distributaries branching out from the Etawah branch of lower Ganga canal serving the irrigation need of the region.

Sengar alongwith its tributaries flows into central part of the district. This is a perennial stream of the Yamuna. A narrow stretch of ravines may be marked along the river courses flowing here. The streams form a parallel drainage pattern.

(4) Climate:

The climate of the district is characterised by a hot dry summer and cool winter. The year may be divided into the following seasonal cycles; the cold season from about middle of November to February, followed by a hot season from March to about middle of June. The period which follows and lasts till about the end of September constitutes the south-west monsoon or transition period. In 1997-98 the maximum and minimum temperature of the district was 45.4^{0}C and 3.0^{0}C respectively. Average rainfall in district in 1997 was 792 mm. However the climate of the district is tropical.

(5) Natural and Economic Resources

Forestry:

Forests play an important role in the economy of the district and it is quite deeply connected with agricultural prosperity of the people. It controls soil and water conservation which is essential for agriculture.

Unfortunately the district is not rich in forest wealth. The extensive Usar plains which prevail in the pachar are utterly destitute of vegetation except a little short grass and babul trees. There are stray jungles in the ravines of the Yamuna and the Chambal. The chief trees are Jamun, Bel, Neem and Seesham. The forest area in district is 29,703 hectare which is 12.7 per cent of the total area of the district. In 1999-2000 under district plan for social forestry government allocated and utilized a fund of Rs. 12,033 thousand for plantation in district.

Minerals and Mining:

The district is very poor in mineral resources. Sand and Silt is found in Chambal and Yamuna rivers. Reh and Sand are found in some usar lands of the district.

Soil:

The soil of the district belongs to Dun Gravels, Alluvium. The menace of soil erosion in the district of Etawah is more pronounced in the areas which are liable to receive monsoon floods from the two major rivers Chambal and Yamuna, whether directly or through their tributaries. Presence of adequate forest, controls soil erosion in the district. After soil test in district Etawah it has been realised that the soils are generally deficient in Nitrogen, Phosphate and Potassium in different degree, which is removed

by the use of chemical fertilizers, green manure and compost.

Land and Land Use Pattern:

According to the district statistical magazine, 1998 total reported area of the district is 235,231 hectare in which 1,426 hectare are urban areas and 233,805 hectare in rural areas 12.7 per cent is under forest, more than 64 per cent land is used for agriculture, 2.30 per cent Barren land, 28 per cent fallow and orchards, Usar and non-cultivable land in district is 5.7 per cent and more than 10 per cent land is used for other purposes. In Etawah district irrigation facilities is good and 171,485 hectare land (72.8 per cent) is irrigated. Canals and tubewells are the main source of irrigation. More than 47 per cent land holdings are below 0.5 hectare and more than 71 per cent landholding are below 1 hectare and approximately 28 per cent land holdings lies between 1 to 10 hectare. Thus, land distribution in district is unequal. Due to small land holding, mechanisation in agricultural sector is not upto mark.

Agriculture and Crop Pattern:

The method of cultivation in the district are generally same as those found elsewhere in the Doab. There are usual harvests known as Kharif or autumn, the Rabi or spring and Zaid or extra harvest. The Kharif crops are sown in Ashadha-Sravan (May-June) and reaped in Kuar-Kartik (October – November) after the cessation of rains, Rabi sowings begin in October – November and are harvested in March – April and even May. The Zaid consist of vegetables and low grade cereals sown in March, April and reaped before June. The system of double cropping is followed to a considerable extent in the district owing to the facilities for irrigation.

The chief Kharif crops are the paddy, bajra, juwar and maize. These are sown either alone or in combination with arahar in the district.

Wheat heads the list of Rabi cereals in the district as far as area and production is concern. In 1998-99, wheat was sown in 53 per cent area of the total sown area. Gram, pea, mustard etc. are the main Rabi crops.

Irrigation:

Nearly 73 per cent cultivated land is irrigated through canal, tubewell, well, tank and other sources of irrigation. The main sources of irrigation in district are canals and tube wells which cover 99 per cent of the total irrigated area.

In earlier times the district was almost wholly dependent on wells and to a small extent on tanks. The well irrigation appears to have been largely replaced by canals.

Animal Husbandry:

Animal husbandry is an important source of supplementing income of the rural population. According to the animal counting (census) – 1993 total number of animals in district were 613,011. The percentage of different animals are 26 per cent cow, oxes and its allied; 34 per cent buffaloes and its allied, 28 per cent goats and 12 per cent other animals. The total number of poultry in district was 30,554. To improve the quality of animals 7 artificial insemination centres and 30 sub centres are established in the district, twenty two animal hospitals and thirty three animal development centres are working in the district. Four pig development centres are also running in the district.

Jamunapari goat has made its place as an export commodity from this country. The district has Jamunapari bulks centre located in Chanda, which maintain 20 jamunapari bulks to cater breeding facilities for jamunapari goats. Bhadwari buffalo is famous for its 11.8 per cent fat contents. Poultry keeping, as an important subsidiary occupation. Under the applied Nutrition programme the two development blocks of Jaswant Nagar and Bharthana in the district, with 20 villages in each were selected for intensive poultry farming.

Fishery:

The rivers and tanks of the district abound in fish. The most prized kinds are Rohu, and Arwari or Mullet which are found in Yamuna river. The common species of fishes are Rohu (labeo rohita). Karonch (labeo calbaisie), Khursa (labeo gonues) Nain, Catla, Bam and Silond. Fingerlings are also supplied at subsidies rates by the government fishery department.

Industry:

The district has a good agriculture base and a reasonably good infrastructure of various facilities but the industrial base is weak, resulting in low income to the district. Industrially the district remained as one of the backward district of the state. Some handloom cloth are woven in a number of villages, situated in the west of Etawah tahasil. In Etawah city, Daris (mat) of good quality were manufactured on small scale. Few workers are engaged in

on small scale. Few workers are engaged in producing the different articles of horn, especially combs, peacock feather fans etc, are exported to other places. Ornamental brass articles, musical instruments and utensils used for worship are manufactured at Jaswant Nagar.

U.P Cooperative Spinning Mill Ltd. is a single large scale cotton yarn producing industry, situated in Mainpuri road was established in 1,958 Oils, flour, pulse, rice, chemicals, engineering goods, plastic goods, glassware, electricals, leather goods and textile and allied products are produced in a large number of small scale units which are mainly located in the urban areas. In 1990-91 total 131 factories were registered under Factory Act 1,948 among them 58 factories were working. Its products was of worth Rs. 26,957.27 thousand. In 1997-98 total 1,684 small scale and cottage industries were running in rural areas of the district in which 7816 people were employed.

Trade and Commerce:

The region covered by present district of Etawah had flourishing trade with adjoining district of Farrukhabad, Mainpuri, Agra, Gwalior and Kanpur since early times. In 19th century the chief export items were cotton, ghee, oil seeds and import goods were metals, rice and sugar. However, after 1,930 the production of cotton declined sharply up to fifties and after that there was no cultivation of cotton in the district.

The requirement of the people residing on the rural areas of the district are generally supplied by small local bazars, known as Hats. The markets are scattered all over the district.

Transport:

Road and railways are the main sources of transportation in the district. The Delhi Hawrah main railway line enters in district near Balarai railway station and after transversing 35 km. east, reaches Etawah railway station. The railway covers a total length of 90 km. in the district.

The towns of Etawah is centrally located having road links with all adjoining district viz. Farrukhabad, Kanpur, Mainpuri, Jalaun. Allahabad, Fatehpur, Mathura, Agra, Lucknow, Meerut and Gwalior and Bhind districts of the state M.P. and Hardwar of the state Uttaranchal.

Electricity and Power:

Electric power is available in the district from Northern power grid of the state. In 1999-2000 total 694 villages of the district were electrified, 4,571 private and 523 public tubewells were running by electricity. Thus, 99 per cent villages of the district were electrified till 2000.

Fourteen electric sub stations of 33 KV watt and 3,695 km. electric lines of high tension (11 KV) and 370 km. electric lines of 33 KV were established in the district. In 1999-2000 percapita electric consumption was 132.84 KW hrs.

Gram Panchayat, its composition, jurisdiction and role in village development

A Gram Panchayat acts as the executive of the Gram Sabha and plays vital role in village development. There are 416 gram sabhas in the district.

Composition: The members of the village Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and take steps to improve the conditions of the villagers.

Its term: The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

Qualifications: In order to be elected to a village panchayat, a candidate should posses the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions : A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.

2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a center.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the District
6. It arranges for sufficient irrigational facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help for the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal case and imposes fine upto Rs. 100

(v) Census Concepts

Building:

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses:

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses:

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc. have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as

rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room:

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house:

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining

rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village:

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area:

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously;

i) a minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits and

iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City:

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration:

An Urban Agglomeration is a continuous urban

spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household:

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household:

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household:

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe:

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the

Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes:

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia,
25 Chero
26 Dabgar
27 Dhangar
28 Dhanuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
33 Dusadh
34 Gharami
35 Ghasiya
36 Gond
37 Gual
38 Habura
39 Hari
40 Hela
41 Jhusia, Jatawa
42 Kalabaz
43 Kanjar
44 Kapariya
45 Karwal
46 Khairaha
47 Kharwar (excluding Banbasi)
48 Khatik
49 Khorot
50 Kol
51 Kori
52 Korwa
53 Lalbegi
54 Majhwar
55 Mazhabi
56 Musahar
57 Nat
58 Pankha
59 Parahiya
60 Pasi, Tarmali
61 Patari
62 Rawat
63 Saharya
64 Sanaurhiya
65 Sansiya
66 Shilpkar
67 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue:

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate:

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate:

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level:

The highest level of education a person has completed

Work:

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker:

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker:

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker:

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator:

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops - tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer:

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker:

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker:

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate:

Percentage of workers (main + marginal) to total population.

Population density:

Population density is the number of persons inhabited per square kilometer of the area.

Age:

Age is measured in terms of the completed number of years.

Sex-ratio:

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water:

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage:

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil:

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility:

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR):

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR):

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate:

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR):

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR):

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR):

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR):

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR):

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \sum_{15-19}^{45-49} ASFR \times 1{,}000$$

Total marital fertility rate (TMFR):

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \sum_{15-19}^{45-49} ASMFR \times 1{,}000$$

Age-specific mortality rate (ASMR):

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR):

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late

neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR):

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate:

$$\frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate:

$$\frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR):

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR):

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR):

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR):

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 Population):

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4):

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9):

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration:

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly, a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to

another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration:

The migrational movements are of three types

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units:

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town:

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area:

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city:

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion

in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution:

The total population of the district is 1,338,871in which 1,030,789 live in rural and rest 308,082 in urban parts. There are 5.tahsils in district namely Jaswantnagar, Saifai, Etawah, Bharthana and Chakarnagar. The most populous tahsil is Etawah followed by Bharthana. Saifai is least populated tahsil. The urban population in the district is about 23.0.per cent. The urban population is maximum at about 44.6 per cent in Etawah tahsil. There are 686 revenue villages and 6 are un-inhabited. The total rural population of 1,030,789 is spread over 8 CD blocks. The most populous CD Block is Mahewa with a population of 190941 with the maximum number of inhabited villages (117). The population density in the rural district is 458. The highest proportion (46.5) of villages are with a population density range of 501+ per square kilometer. Such villages contain as much as about 53.2 per cent of total rural population.

Size-class and status of towns:

In the total urban population of 308,082 largest number of persons (210, 453) live in Etawah (NPP). The next big town is Bharthana (NPP) with a population of 38,779. The above two are class I and III towns having the civic status of Nagar Palika Parishad. Rest of 3.towns are Nagar Panchayat (N.P) and one is Nagar Palika Parishad.

Population growth:

At the present territorial jurisdication the population of the district was 1,130,340 at 1991 Census and growing by 18.4 per cent during the decade 1991-2001 it is 1,338,871at 2001 Census. The decadal growth at 18.4 per cent in the district is lower than that in the state at 25.8 per cents.

Population Density:

The district has area of 2,311 square kilometer. The population density in the district is 579 In the rural areas of the district the density is 458.

Sex-Ratio:

The sex-ratio in the district at 858.is lower than state (898). Indeed the sex-ratio at the district has been all along lower in the district as against to the state since 1901. As against to urban areas of the district the sex-ratio is lower in rural areas. Among tahsils, highest sex-ratio is in Jaswantnagar and lowest in Chakarnagar Among CD Block the sex-ratio is highest in Jaswantnagar at 865and lowest in Chakarnagar. at 812 Out of 686.inhabited villages in the district there are 0.9 per cent villages (with 0.3 per cent of rural population) which are having a sex-ratio below 700 In the urban parts of the district the sex-ratio is 886 and among towns the highest sex ratio 908 in Lakhna NP and lowest 879 in Jaswantnagar (NPP). The sex-ratio of population in the age-group 0-6 is 895 in the district which is lower than the state 898 As against a sex-ratio of 897 in the age-group 0-6 of rural population of the district, it is highest at 906 in Bharthana Block and lowest at 881 in Jaswantnagar C.D. Block. It may be noted that out of 686 inhabited villages in the district in over 34.3 per cent of villages with about 40.9 per cent of rural population the sex-ratio in the age-group 0-6 is between 850-899 As against the 0-6 age-group sex-ratio of 897. in the rural area of the district is higher than 887 in urban. Among towns this sex-ratio is highest at 941 in Ekdil and lowest at 822.in Jaswantnagar.

Work Participation Rate:

In the total population of the district of Etawah as much as 27.5 per cent are workers and rest of 72.5 per cent are non-worker. Among worker 22.3 per cent are main workers and rest of 5.2 per cent are marginal workers of total population. In absolute terms males outnumber females as main worker and marginal workers as well. The extent of main workers is highest at 22.9 per cent in Saifai tahsil and lowest at 21.3 per cent in Chakarnagar tahsil. In case of marginal workers the population is highest in Chakarnagar tahsil as 7.1 per cent in comparison to only 4.8 per cent in Etawah and 5.1 per cent in Bharthana tahsil. The extent of workers in rural parts and non-workers in urban parts is higher. In the district among workers 44.2 per cent are cultivators and 29.6per cent other workers. 32.1 per cent of female workers are engaged as cultivators.

Literacy:

In the district 69.6 per cent population is literate. The literacy is 76.6 per cent in urban areas and 67.4 per cent in rural areas. The males literacy is as highest 79.9 per cent as against 57.4 per cent females literacy, and therefore the gap in male/female literacy rate is 22.5 per cent. In rural areas among 8 CD Blocks, the highest literacy is at 68.9 per cent in Jaswantnagar and lowest at 62.2 per cent in Chakarnagar The literacy among males in rural areas is 79.0 per cent in comparison to 53.5 per cent among females. The lowest female literacy of 46.8 per cent is in Chakarnagar CD Block. The gap in male/female literacy rate is highest in Chakarnagar CD Block which is 27.6 per cent. In 43.9 per cent of villages covering also 49.7 per cent of rural population the literacy range is 61to 70 Among urbanites in the district, as much as 83.1 per cent male are literates as against 69.3 per cent females. The highest urban literacy is in...Bharthana (NPP) 83.2 per cent and lowest in Ekdil NP at 65.5 per cent. The maximum males literacy is also found in Bharthana (NPP) at 89.4 per cent and lowest at 74.7 per cent in Ekdol NP However, the highest females literacy is in Bharthana (NPP) at 76.3 per cent and lowest at 54.9 per cent in Ekdil (NP). The maximum gap in male-female literacy rate at 19.8 per cent is found in Ekdil (NP) The literacy among scheduled castes, in the countryside is 61.0 per cent and 67.7 per cent in towns. There is no percentage of literacy in Scheduled Tribes at district level. Only 14 persons out of 16 Scheduled Tribe populations are found literate in the district.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

The district throws up a vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables 1 to 36:

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial No.	Tahsil	Population						Percentage decadal variation 1991-2001				
		1991			2001						1991	2001

Note: ** Newly created tahsils

The growth rates of each tahsil in the Etawah district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 18.4 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 11.2 and 51.2 per cent respectively . Out of the total population of the district 77.0 per cent lives in rural areas while 23.0 per cent lives in urban areas of the district. The proportion of urban population has slightly increased during the decade from 18.0. per cent in 1991 to 23.0 per cent in 2001 in the district.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 686 inhabited villages, 20 (2.9 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 86 villages having 12.5 per cent villages of the district while in the size class of 500-999 population claims 200 villages with 29.2 per cent of the total villages in the district. 228 villages (33.2 per cent) are in the size class of 1,000-1,999 and 135 villages (19.7 per cent) are in the size class of 2,000-4,999. In the size of 5,000-9,999 persons there are 17 villages having 2.5 per cent of the total villages in the district. None of villages in the district fall in the ranges of 10,000 and above population. The biggest village Pratapner in the district having population of 9,801 persons is located in Barahpura C.D. block of district.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New

(i) Statutory town – NIL

(ii) Census town - NIL

(b) Denotified - NIL

(i) Statutory towns of 1991 Census denotified and also did not satisfy the criteria to be treated as census towns - NIL

(ii) Statutory towns of 1991 Census denotified but identified as census towns based on demographic and economic criteria - NIL

(iii) Census towns of 1991 Census are notified as statutory town in 2001 Census - NIL

(c) Declassified - NIL

(d) Wholly merged with other town(s) - NIL

Declassified means the Census towns of 1991 Census which failed to satisfy the demographic and economic criteria.

TABLE4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density square (per kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	33	4.8	32,321	3.1
11-20	1	0.1	17	0.0
21-50	4	0.6	3,406	0.3
51-100	9	1.3	2,984	0.3
101-200	88	12.8	97,786	9.5
201-300	73	10.6	89,919	8.7
301-500	159	23.2	256,078	24.8
501 +	319	46.5	548,278	53.2
Not known	0	0.0	0	0.0
District Total	**686**	**100.0**	**1,030,789**	**100.0**

This table shows the distribution of villages by population density ranges. The 686 inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 319 accounting for 46.5 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 53.2 per cent population. The lowest ranges of 0-10 persons per sq. km. cover 33 villages (4.8 per cent). In the medium densities ranges of 21 to 50 and 51-100 persons account for 0.6 and 1.3 per cent of inhabited villages respectively. Both these ranges claim 0.6 per cent rural population.

TABLE-5: SEX RATIO OF STATE AND DISTRICT 1991-2001

Census Year	UTTAR PRADESH			ETAWAH		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	842	836	889
1911	916	922	866	824	820	857
1921	908	918	834	814	810	840
1931	903	916	813	806	801	836
1941	907	922	824	833	834	833
1951	908	922	827	844	849	822
1961	907	921	817	844	846	830
1971	876	884	826	828	824	854
1981	882	889	850	834	826	875
1991	876	879	864	834	825	875
2001	898	904	876	858	849	886

Note:- Sex ratio has been defined here as the numberof females per 1,000 males

As per 2001 Census sex-ratio of 858 emales per 1,000 males has been recorded in the district against the state average of 898 The sex-ratio of the district was significantly low as compared to state average figures from 1901 to 2001. The lowest sex ratio of 806 females per 1000 males were recorded in the district during 1,931 against the state average of 903 females. It is also observed that the proportion of females in rural areas is lower than that of urban areas in district. except in 1,941 to 1,961 census.

TABLE-6 : SEX RATIO BY TAHSILS, 2001

Serial No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Jaswantnagar	866	864	879
2	Saifai	849	849	-
3	Etawah	863	848	883
4	Bharthana	859	852	901
5	Chakarnagar	827	827	-
	District Total:	**858**	**849**	**886**

The table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 858 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 849 and 886 females respectively. The rural sex-ratio in the tahsils varies between 827 in Chakarnagar tahsil and 866 females per 1,000 males in Jaswant Nagar tahsil.

TABLE-7 : SEX RATIO BY CD BLOCKS, 2001

Serial Number.	Name of C D block	Sex ratio
1	2	3
1	Jaswantnagar	865
2	Saifai	849
3	Barhpura	846
4	Basrehar	849
5	Takha	845
6	Bharthana	856
7	Mahewa	851
8	Chakarnagar	812
District (Rural) Total:		**849**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 849 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 865 females is found in Jaswant Nagar C.D. block, is followed by Bharthana (856) while the lowest of 812 is recorded in Chakarnagar C.D. block. The sex-ratios of Jaswant Nagar, Bharthana and Mahewa C.D. block are higher than the district rural average of 849 females and equal in Saifai and Basrehar CD block in remaining blocks. this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	6	0.9	2,915	0.3
700-749	23	3.4	13,902	1.3
750-799	86	12.5	100,106	9.7
800-849	226	32.9	378,841	36.8
850-899	235	34.3	421,578	40.9
900-949	78	11.4	87,799	8.5
950-999	23	3.4	20,460	2.0
1000-1099	8	1.2	5,122	0.5
1100+	1	0.1	66	0.0
District Total	686	100.0	1,030,789	100.0
Sex ratio (Rural) for District		849		

Table 8 presents the distribution of villages by sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 235 accounting for 34.3 per cent of the total villages fall in the sex ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849, which claims 226 villages (32.9 per cent) having population of 36.8 per cent in the district and 36.8 per cent population. The highest range of 1,100 & above claims 1 village (0.1 per cent). This range shares 0.0 per cent rural population of the district while in the sex-ratio range of 900-949, there are 78 villages (11.4 per cent). In remaining sex-ratio ranges of 750-799, 700-749 and less than 700, the number of villages are 86 (12.5 per cent), 23 (3.4 per cent), and 6 (0.9 per cent), respectively. In these ranges, the percentage of population is comparatively low.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Bakewar	(NP)	890
2	Bharthana	(NPP)	903
3	Ekdil	(NP)	881
4	Etawah	(NPP)	883
5	Jaswantnagar	(NPP)	879
6	Lakhna	(NP)	908
Sex ratio (Urban) for the district:	886		

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 886 females per 1,000 males as a whole. Among the six towns of the district the sex-ratio varies between 879 to 908. Lakhna (N.P.) has the highest sex-ratio (908) while Jaswantnagar (NPP.) has the lowest sex-ratio of 879 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial	Name of Tahsil	Total / Rural /	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Jaswantnagar	Total	34,483	18,450	16,033	869
		Rural	30,095	16,041	14,054	876
		Urban	4,388	2,409	1,979	822
2	Saifai	Total	14,875	7,837	7,038	898
		Rural	14,875	7,837	7,038	898

5	Chakarnagar	Total	23,276	12,224	11,052	904
		Rural	23,276	12,224	11,052	904
		Urban	0	0	0	0
	District Total:	Total	237,193	125,187	112,006	895
		Rural	190,493	100,436	90,057	897
		Urban	46,700	24,751	21,949	887

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district.Total population in age-group 0-6 is 237,193 persons comprising 125,187 males and 112,006 females. The total sex-ratio in this age-group works out 895 females for every thousand males in the district. In district the proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 897 and 887 females in this age-group respectively. The rural sex-ratio in tahsil varies between 876 in Jaswant Nagar tahsil and 907 in Bharthana tahsil. In urban areas, the higher sex-ratio is recorded in Etawah urban (896) and the lowest is found in Safai and Chakarnagar urban (Zero).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial Number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Jaswantnagar	27,230	14,479	12,751	881
2	Saifai	17,740	9,399	8,341	887
3	Barhpura	20,653	10,973	9,680	882
4	Basrehar	30,788	16,222	14,566	898

	District (Rural) Total:	**190,493**	**100,436**	**90,057**	**897**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 897 for the district (rural). The sex-ratio of C.D. block varies between 881 to 913. It is highest in Takha C.D. block i.e. 913 followed by 906 in Bharathana C.D. block and lowest 881 females is found in Jaswantnagar C.D. block. The sex-ratio of Basrehar,Takha,Bharthna.Mahewa and Chakarnagar C.D. blocks are higher than the district rural (897) while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	43	6.3	4,726	2.5
700-749	37	5.4	7,892	4.1
750-799	62	9.0	16,290	8.6
800-849	91	13.3	27,096	14.2
850-899	110	16.0	40,161	21.1
900-949	105	15.3	37,264	19.6
950-999	71	10.3	27,741	14.6
1000-1099	95	13.8	20,182	10.6

District (Rural) Total	***686***	***100.0***	***190,493***	***100.0***
Sex ratio (Rural) for District			**897**	

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 110 (16.0 per cent) having largest population (21.1 per cent) in the district (rural) fall in the sex-ratio range of 850-899 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 900-949 which claims 105 villages (15.3 per cent) and 19.6 per cent population. Next to it, 95 villages (13.8 per cent) are in the range of 1,000-1,099 with 10.6 per cent population. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, 800-849, 950-999 and 1100+ claim less number of villages and these are distributed 43 (6.3 per cent as 37 (5.4 per cent), 62 (9.0 per cent), 91 (13.3 per cent), 105 (15.3 percent) and 71 (10.3 per cent) and 72 (10.5 per cent) respectively. In these ranges, the percentage of population is also low.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Bakewar	(NP)	2,401	1,262	1,139	903
2	Bharthana	(NPP)	6,050	3,212	2,838	884
3	Ekdil	(NP)	1,801	928	873	941

5	Jaswantnagar	(NPP)	4,388	2,409	1,979	822
6	Lakhna	(NP)	1,659	886	773	872
District (Urban) Total			**46,700**	**24,751**	**21,949**	**887**

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomeration/Towns 2001. In urban area of the district total population in age group 0-6 is 46,700 in which 24,751 males and 21,949 females and sex ratio of the urban areas of the district is 887. Among six towns, sex ratio in age group 0-6 varies from 822 in Jaswantnagar (NPP) and 941 in Ekdil (NP). In three towns Etawah (NPP), Ekdil (NP) and Bakewar (NP) sex ratio is more than the district average. Among six towns Etawah (NPP) has the highest population

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Note: ** Newly created tahsils

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,338,871 total population of the district, 23.4 per cent of the total population belong to the Scheduled Castes and zero per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 25.8 per cent in rural population and 15.5 per cent in urban population of the district. The highest percentage of

total Scheduled Castes population is recorded in Bharthana tahsil (28.0 per cent) while the lowest is found in Saifai tehsil (18.1 per cent) The proportion of Scheduled Tribes population is zero in rural and negligible in urban areas. Scheduled Tribes population in the district is only 16 which is in urban area of the Etawah tahsil. Tahsils Jaswantnagar,Saifai, Bharthana and Chakarnagar have no S.T. population.District is distributed as 31 persons in Kulpahar tahsil, 6 persons in Charkhari tahsil and 28 persons in Mahoba tahsil.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

District (Rural) Total:		**1,030,789**	**265,771**	**0**	**25.8**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 25.8 per cent of rural population of the district belongs to Scheduled Castes and zero per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 18.4 per cent in Barhpura C.D.Block and 34.2 per cent in Mahewa C.D. block. The other C.D. block containing the percentage of Scheduled Castes population are Jaswantnagar (23.5), Saifai (19.4) Basrehar (26.6). Takha (22.1),Bharthana(29.0) and Chakarnagar (25.3). Scheduled Tribes population does not reside in blocks.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

District Total	**686**	**100.0**	**265,771**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 50 villages accounting for 7.3 per cent of total 686 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5 per cent in 48 villages (7.0 per cent). In 66 villages, it varies between 5-10per cent while the next range of 11-20 per cent accounts for 169 villages constituting 24.6 per cent of the total villages. The range 21-30and 31-40 per cent contains 131 and 95 villages respectively. Both these ranges together account for 32.9 per cent villages of the district. 52 villages fall in the range of 41-50. The maximum of the 22.6 per cent of the Scheduled Castes population is covered by range of 21-30 and also in 31-40. per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. Scheduled Tribes population does not reside in rural areas of the district.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bakewar (NP)	13,082	2,836	0	21.7	0.0
2	Bharthana (NPP)	38,779	6,381	0	16.5	0.0
3	Ekdil (NP)	9,965	2,754	0	27.6	0.0
4	Etawah (NPP)	210,453	29,353	16	13.9	0.0
5	Jaswantnagar (NPP)	25,333	4,485	0	17.7	0.0
6	Lakhna (NP)	10,470	1,890	0	18.1	0.0
District (Urban) Total		**308,082**	**47,699**	**16**	**15.5**	**0.0**

Table 18 shows number and percentage of scheduled caste and scheduled tribes population recorded during 2001 census in district Etawah. The table 18 depicts that highest (27.6 per cent) scheduled caste population resides in Ekdil(N.P.) and lowest proportion (13.9 per cent) reside in Etawah (NPP). Sixteen S.T. population resides only in Etawah (NPP.). Thus S.T. population does not reside in Etawah district except Etawah (NPP.).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial No.	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Jaswantnagar	852	0
2	Saifai	844	0
3	Barhpura	843	0
4	Basrehar	833	0
5	Takha	848	0
6	Bharthana	854	0
7	Mahewa	830	0
8	Chakarnagar	806	0
	District (Rural) Total	**839**	**0**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 839 for district (rural). Among the C.D.blocks, the highest sex ratio of 854 females is found in Bharthna C.D block and lowest of 806 females is recorded in Chakarnagar C.D. block. The proportion of Scheduled Tribes population as zero in rural areas of the district.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bakewar (NP)	889	0
2	Bharthana (NPP)	892	0
3	Ekdil (NP)	882	0
4	Etawah (NPP)	847	333
5	Jaswantnagar (NPP)	863	0
6	Lakhna (NP)	849	0
	Sex ratio (Urban) for the district:	**859**	**333**

Table 20 shows sex-ratio of Scheduled castes and Scheduled Tribes population in towns of the district Etawah. In six towns of the district, Bharthana (NPP.) has highest (892) Scheduled Castes. sex ratio while Etawah (NPP.) has the lowest (847) Scheduled Castes. sex ratio. Jaswantnagar (NPP.),Ekdil (N.P.), Bharthna (NPP.) and Bakewar (N.P.) have Scheduled Castes. sex ratio above to the district urban Scheduled Castes sex ratio.

In six towns of the district only Etawah NPP. has sixteen Scheduled Tribes. population whose sex ratio is 333. thus, we may infer that out of 16 Scheduled Tribes population in Etawah (NPP.), five Scheduled Tribes females reside in 2001, Census.

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 69.6 per cent in the district. This proportion in rural area is 67.4 per cent against 76.6 per cent in urban areas. In the district the literacy rates of males (79.9 per cent) is much higher than that of females (57.4 per cent). Among the tahsils, Etawah tahsil tops with 71.1 per cent literates followed by Bharthna tahsil(70.0 per cent). Saifai tahsil with 64.9 per cent literates stands at the bottam in the district. Out of five tahsils, the literacy rates of Etawah and Bharthna tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to22.5 per cent in the district, as a whole. However this gap in urban literacy is low which comes to 13.8 points against the rural areas, The gap between male and female literacy is 25.4 points in rural areas.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 1030,789 total rural population of the district, 22.3 per cent has been categorised as main workers and the marginal workers constitute 5.9 per cent and the remaining 71.8 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 39.1 per cent males and 2.6 per cent females are in the category of main workers. Male and female marginal workers account for 7.4 and 4.2 per cent respectively. The percentage of female marginal workers is lower than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 28.2 per cent. At the C.D. block level, Basrehar C.D. Block has highest proportion of total workers forming 28.8 per cent of the total population. It is closely followed by Takha (28.6per cent), Jaswantnagar (28.3 per cent). The lowest percentage of 27.5 per cent is recorded in Barhpura C.D. block.

Table 33 shows number and percentage of main workers, marginal workers and non-workers by sex in urban agglomerations/towns, 2001. In urban areas of the district total workers are 25.2, which comprises 22.2 per cent main workers and 3.0 per cent marginal workers. In 22.2 per cent main workers comprises 38.6 per cent male workers and only 3.8 percent female workers. In urban area 3.0 percent marginal workers comprises 4.6 per cent male and 1.2 per cent female. In urban areas of the district 74.8 per cent population is non worker, in which 56.8 per cent male and 95.1 per cent females are non-workers. Among six towns of the district, Ekdil (N.P) has highest (28.8 per cent) proportion of workers and Bakewar (N.P.) has the lowest proportion (22.6 per cent)of workers. On the other hand Jaswantnagar (NPP.) has the highest proportion of the main workers and Bakewar (N.P.) has the lowest main workers.

Table 34 shows distribution of workers by sex in four categories of economic activity in tahsils.

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 44.2 per cent of the total workers (main + marginal) and remaining 22.1 per cent of total workers are engaged as agricultural labourers, Household industry workers (4.1 per cent) and other workers (29.6 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 32.2 per cent in Etawah tahsil and 65.8 per cent in Saifai tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 32.1 per cent which is very low as compared to 45.7 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as stated above. The workers in other activities occupy the second position next to agriculture in the district. The highest proportion of 45.4 per cent of other workers is recorded in Etawah tahsil while the lowest proportion of 10.3 per cent is found in Safai tahsil.

Table 35 Shows C.D. block-wise distribution of workers by sex in four categories of economic activity in C.D. Blocks, 2001. In the rural areas of the district total workers (main+marginal) 28.2 per cent of total population. Among these workers, cultivators constitute 55.0 per cent, 26.8 per cent

agricultural labourers, 3.0 per cent household industry workers and 15.2 per cent other workers.The agricultural sector plays a major role in providing employment to the working force of rural population, despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 3.0 per cent workers of the total working force. Therefore surplus-working force has to depend on primary sector. Among cultivators, the percentage of females (38.7 per cent) is lower than males (57.0 per cent) in the rural areas of the district. The males play main role in rural economy of the district.The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 41.9 per cent in Mahewa C.D. block to 76.2 per cent in Takha C.D. block. Similarly for other workers, the lowest proportion is 6.0 per cent in Talkha C.D. block while 21.7 per cent is the highest in Barhpura C.D. block.The percentage of household industry workers is quite low i.e. only 3.0 per cent in the district. The percentage of agricultural labourers in district is 26.8 per cent of the total workers. Its highest value is observed in (36.9 percent) Mahewa C.D. block and is followed by 28.7 percent in Chakarnagar C.D. Block. Similarly, household industry workers varies in C.D. blocks between highest 4.7 per cent in Mahewa C.D. block and lowest 1.3 per cent in Takha C.D. block.

Table 36 shows distribution of workers by sex in four categegories of economic activity in urban agglomerations/Towns, 2001. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers (main and marginal workers). At the district level, urban areas recorded highest percentage of other workers (83.5 per cent), followed by household industry workers (8.1 per cent). Agricultural labourers (4.5 per cent) and cultivators (4.0 per cent). If we observe each town, the table reveals that highest percentage of cultivators (19.1) in Ekdil (N.P.). In the agriculture laboures category 31.1 per cent recorded also in Ekdil (N.P.). Among six towns of the district, highest proportion of house hold Industry (9.7 per cent) observed in Etawah NPP. As the usual trend recorded in the urban areas, other workers are highest (913) per cent in Bharthana NPP.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37-47:

One of the major parts of the District Census Handbook is Village and Town Directory. Non-census data showing educational, medical, drinking water, banking, communication facilities and other such developmental indicators are incorporated in the town and village directory. From non-census data, inset tables 37 to 47 have been generated and reproduced here showing major trends in the availability of above amenities.

TABLE37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES. 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly

\# Post office includes Post office, telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 686 inhabited villages in the district 600 villages or 87.5 per cent have been provided with the education facilities of one type or the other. Similarly 104 villages in the district constituting 15.2 per cent have medical facilities of one type or the other. Improved drinking water facility is available in684 or 99.7 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 144 villages constituting 21.0 per cent of villages have been provided with post office facility within the village. 218 or 31.8 per cent villages have been provided with the telephone facility, 77 or 11.2 per cent with transport facility, 32 or 4.7 per cent villages with bank facility and 45 or 6.6 per cent with agricultural credit societies. Similarly there are 489 or 71.3 per cent villages which have been linked with the pucca road. Total 524 or 76.4 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Chakarnagar C.D. block has the highest 96.8 per cent villages where educational facility is available and lowest 79.7 per cent is found in Takha C.D. Block. Medical facility is highest in Mahewa (35.0 per cent) and lowest (3.1 per cent) in Takha C.D. block. Improved drinking water is available to cent-percent villages in six C.D. blocks while in other two blocks, it is above 98 per cent. Telephone facility is highest in Safai (52.9 per cent) and lowest 7.8 per cent in Takha C.D. Block.. Transport and communications is less developed in Jaswantnagar where only 3.3 per cent villages are covered by this facility whereas 41.3 per cent villages of Chakarnagar C.D. block are availing this facility.

In field of banking facility, Bharthna C.D. Block has the highest proportion (6.5 per cent) of banks while C.D. Block Chakarnagar has only one bank. In Chakarnagar C.D. Block proportion of agricultural societies is 12.7 per cent while its lowest proportion 1.6 (i.e. single agricultural societies) in Takha C.D. block. The highest proportion (88.9 per cent)of power supply is available in Jaswantnagar C.D. Block while Takha C.D. block has least (54.7 per cent) electrification.

TABLE38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial No.	Name of C. D. block	Total population of inhabited villages	Type of amenity available

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,030,789 persons in the district, 982,228 or 95.3 per cent have educational facility of one or the other type. Similarly 248,953 or 24.2 per cent population has medical facilities while 1,027,945 or 99.7 per cent have got improved drinking water facility. Post office facilities are available to 399,373 or 38.7 per cent population. Telephone facility is available to 442,873 or43.0 per cent. Transport communications facility is available to 177,019or 17.2 per cent. Bank facility is available to 133,712 or 13.0 per cent. 135,178 or 13.1per cent have been provided with the facility of agricultural credit societies. 842,401 or 81.7 per cent have been provided with the facility of approach by pucca road. Power supply is available to 869,992 or 84.4 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 86 villages do not have primary school in their villages and out of these villages, children of 85 villages have to travel less than 5 kms. and remaining at a distance of 5-10 Kms. for schooling. Out of 686 inhabited villages as many as 378 are deprived of middle school and 683 of degree college. Of these 343 avail the facility of middle school at a distance of less than 5 kms., 34 at a distance 5-10 kms. and the remaining 1at a distance of 10+ kms. In respect of degree college 72 avail this facility at a distance of less than 5 kms., 215 between 5 to 10 kms. and rest 396 villages at a distance of 10+ kms.

Similarly there are 673 villages in the district which have been devoid of Hospital facility and 675 villages which are deprived of PHC facilities. Of these 107villages have the facility of Hospital available within 5 kms. while in respect of 171 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 395 villages have this facility at a distance of 10+ kms. As regards PHC 142 avail this facility at a distance of less than 5 kms., 242 at a distance of 5-10 kms. and the remaining 291 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 542 villages do not have this facility in the village itself. Of these majority i.e. 460 have this facility at a distance of less than 5 kms., another 78 villages avail it at a distance of 5-10 kms. In the remaining 4 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 468 villages in the district which are without telephone facilitiy. Of these 285 avail this facility at a distance of less than 5 kms., 111 at a distance of 5-10 kms. and remaining 72 have to traverse a distance of 10+ kms.

For Bus service out of 634 villages which do not have facility, 319 villages avail this facility at a distance of less than 5 kms., 242 at a distance between 5-10 kms. and 73 at a distance of 10+ kms.

In the entire district 655 villages are deprived of Commercial Bank & 680 of Co-operative Bank. Of these 655 villages which are deprived of Commercial Banks 341 villages avail this facility at a distance of less than 5 kms., 245 between 5-10 kms. & the remaining 69 at a distance of 10+ kms. Regarding Co-operative Banks, out of 680 villages 233 villages avail this facility at a distance of less than 5 kms., 252 at a distance of 5-10 kms. and remaining 195 at a distance of 10+kms. 641 villages do not have agricultural credit societies. 394 villages avail this facility at a distance of less than 5 kms. 209 at a distance of 5-10 kms. and 38 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available					Type of amenity available

Post office includes Post office, Telegraph office and Post and Telegraph office.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 686 inhabited villages in the district, there are 67 villages which have nearest towns upto a distance of 5 kms. Of these only 58 villages forming 86.6 per cent of these villages, having the educational facilities of one type or the other and 16 villages constituting 23.9 per cent, have the medical facilities within the village, 15 villages forming 22.4 per cent have the facility of post office within the village and 27 or 40.3 per cent have the facility of telephone. 10 villages constituting 14.9 per cent have been linked by transport service. 4 villages comprising 6.0 per cent have been provided bank facilities, while 2 villages constituting only 3.0 per cent have been provided by agricultural credit societies. 50 villages comprising 74.6 per cent have been provided with pucca road.

There are 344 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 304 villages constituting 88.4 per cent have been provided with the educational facilities. 56 villages comprising 16.3 per cent have been provided with medical facilities. 73 villages constituting 21.2 per cent enjoy the post office facility. 113 villages comprising 32.8 per cent have been provided the telephone facility. 31 villages constituting 9.0 per cent have been linked with transport communications. 20 villages comprising 5.8 per cent have bank facility. 27 villages constituting 7.8 per cent are having agricultural credit societies, while 252 villages or 73.3

per cent are approachable by pucca road. 201 villages fall in the distance range of 16-50 kms. Of these, 86.1 per cent villages have educational facility, 10.4 per cent with medical, 19.4 per cent with post office, 23.9 per cent with telephone and transport & communications available to 14.9 per cent villages. Banks and agricultural credit societies facilities are available to 2.5 and 5.5 per cent of villages. 65.7 percent have been provided with pucca road.

There are no villages in the district which are situated beyond 50 kms.from the nearest town. There are 74 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 65 or 87.8 per cent villages have the educational facility of one or other type. 11 village constituting 14.9 per cent have the medical, 17 (23.0 per cent) villages have postoffice, 30 (40.5 per cent) villages have telephone, 6 (8.1 per cent) villages have transport, 3 (4.1 per cent) villages have bank, 5 (6.8 per cent) villages have agricultural credit societies and 55 (74.3 per cent) villages have approach by pucca road.

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Etawah district out of a total 686 inhabited villages, overwhelming 106 have a population of less than 500 persons. Of these, 53 villages (50 per cent) have education facility, 1 (0.9 per cent) have medical facility, 105 (99.1 per cent) have improved drinking water facility. None villages have post office facility. 8 (7.5 per cent) have telephone facility. 6 (5.7 per cent) have been linked by bus service. 2 (1.9 per cent) have Bank facility. None villages have been provided with the agricultural credit societies, 53 villages (50.0 per cent) have been linked with pucca road. 59 villages (55.7 per cent) have been provided with electricity.

Out of 200 villages, which fall in the population range of 500-999 persons, 176villages (88.0) per cent) have been provided with the education facility, 17 (8.5 per cent) with medical facility, all the villages have improved drinking water facility. 18 villages (9.0 per cent) have been provided with post office facilities, 49 villages (24.5 per cent) with telephone facility, 19 villages (9.5 per cent) with transport facilities, None villages with bank facility, 4 villages (2.0 per cent)

with agricultural credit societies & 129 villages (64.5 per cent) have approach by pucca road. 147 villages(73.5 per cent) in this range have electricity.

228 villages fall in population range of 1,000-1,999 persons. 222 (97.4 per cent) of these villages have education. Whereas 38 villages (16.7 per cent) enjoy the medical facility all the villages enjoy the facility of improved drinking water, 44 villages (19.3 per cent) have post office facility, 81villages (35.5 per cent) have telephone facility, 24 villages (10.5 per cent) have transport communications facilities, 4 villages (1.8 per cent) have bank facilities, 16 villages (7.0 per cent) have agricultural credit societies and 166 villages (72.8 per cent) have approach by pucca road. 182 villages (79.8 percent) have electricity.

There are 135 villages in the district which are covered under 2,000-4,999 population range. In this range, 132 (97.8 per cent) villages enjoy the facility of education. 39 villages (28.9 per cent) have medical facility. 67villages (49.6 per cent) have post office facility, 15.villages (11.1 per cent) have bank facility, 134 villages (99.3 per cent) is having improved drinking water. 68 (50.4 percent) have telephone facility, 19 (14.1 percent) have transport communications facilities, 17 (12.6 percent) have agricultural credit There are 17 villages in the district having a population of 5,000 persons or above.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial No.	Name of C. D. block	Number of inhabited villages	Total area in hectare	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Jaswantnagar	90	26,742.1	75.0	86.2

7	Mahewa	117	31,066.0	82.2	86.0
8	Chakarnagar	63	33,410.0	50.6	28.2
	District Total:	**686**	**245,122.4**	**76.3**	**82.4**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 686 inhabited villages in the district having a total area of 245,122.4 hectares. Of this, 76.3 per cent is cultivable and 82.4.per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Takha block with 64..villages have a total area of 30,674.07 hectares, of this 53.6 per cent of land is cultivable and the aforesaid area 97.3 per cent is irrigated. In Bharthana block, all the 92.villages have a total land area of 55,217.84..hectares, of this 99.9 per cent of land is cultivable and of the aforesaid area 92.7 per cent is irrigated. In Jaswantnagar. block, all the 90.villages have a total area of 26,742.07 hectares, of this cultivable area is 75.0 per cent and 86.2.per cent is irrigated. In Saifai block, all the 68 villages have a total area of 18,417.03 hectares. Of this, cultivable area is 90.8 per cent and 86.5. per cent is irrigated Barhpura block with 79 villages have a total land area of 25,780.15 hectares, of this 43.4 per cent is cultivable area and 61.2 per cent is irrigated. Mahewa block with 117.villages has a total land area of 31,066.0 hectares. Of this 82.2 per cent is cultivated area, out of which 86.0.per cent is irrigated. Chakarnagar block with a total 63 villages have an area of 33,410.0 hectares. Of this 50.6 per cent is cultivable area and 28.2 per cent is irrigated. Basrehar block with a total 113 villages have an area of 23,815.24 hectares of this 86.4 percent is irrigated.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure

		N.A		

TABLE47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bakewar, NP	Carpet, Handloom Cloth, --	Carpet, Handloom cloth, --
2	Bharthana, NPP	Rice, Pulses, Mustard Oil	Rice, Pulses, Wheat
3	Ekdil, NP	Cloth, Earthen pots, --	Potato, Cloth, Goat
4	Etawah, NPP	--, --, --	Handloom Cloth, Ghee, Rice
5	Jaswantnagar, NPP	Potato Chips, Cotton Cloth, Wooden Furniture	Potato, Pea, Cotton Cloth
6	Lakhna, NP	Rice, Ornaments, Vegetables	Ghee, Vegetables, Food grain

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for a Handloom export, The chief export items of the district is Handloom. The main items which are manufactured in Bakewar (N.P.) is carpet and these are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48-52 :

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."
* House list households.

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 217,528 consisting of 170,884 rural and 46,644 urban households. 57020 households belong to Scheduled Castes and 1,675 to Scheduled Tribes. 206,663 households are living in their owned houses constituting 95.0 per cent of total households. Of these households, the largest number of households (74,792) have occupied one double roomed accommodation and is followed by two roomed accommodation numbering to 64,747households. Next position is claimed by households (32,589) occupying three plus roomed accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 31640 households while 2,895 households are without any exclusive room.

8,205 households living in rented accommodation account for 3.8 per cent of total number of households in the district. The largest number of 4,196 households are living in single roomed accommodation followed by 2,634 households in double roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 2,660 forming only 1.2 per cent of total households are distributed in single roomed accommodation numbering 1,336 double roomed 734 and 335 in three roomed accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Note ** Newly created tahsils

Data source. Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refer to those houses whose wall & roofs are made of pucca materials i.e., burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate a re-used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refer to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that more than 59.6 per cent of the households in the district had permanent houses. The trend is different in rural (52.1per cent) and urban area (87.1 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Etawah (70.5 per cent) followed by Jaswantnagar (62.4per cent), Bharthna (52.6 per cent) and lowest in Chakarnagar (47.2 per cent). In respect of semi-permanent houses, the returns were 13.1 per cent of district level where as among tahsils, in Saifai it was 15.9 per cent and lowest was 9.9 per cent in tahsil Etawah. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 0 to 14.7 per cent. Temporary houses in the district have 27.3 per cent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

* House list Households.

**Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises, it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households. Bathroom means bathroom within the house. Toilet means toilet within the house.

Drainage means closed and open drainage.

The above table shows that out of total households of the district 71.6 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 66.7 and 89.3 per cent. Tahsil Jaswantnagar had higher order of proportion (78.5 per cent) of households where

percentage for rural area was 76.6 and 91.1per cent in urban areas. Electricity was available for 26.8 per cent of households at district level households of the district had better access of electricity. Bathrooms and toilet facilities were available 21.5 and 30.1 per cent of households in district. Tahsil Saifai is poorly served in respect of these amenities. Similarly drainage facility was also poor in Chakarnagar tahsil At district level drainage facility was available for 82.3 per cent of households, whereas the proportion of rural and urban areas households accounted to 78.7 and 95.2 per cent

* House list households

Data source Census of India 2001, H-series: Tables on Houses, Households amenities and Assets

It is observed from the above table that to 57.9 per cent of households in the district use firewood

as fuel, for cooking, the proportion in the rural area is to 60.5and in urban area it comes to 48.2per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in to 9.3 per cent of the households. The composition of rural and urban comes to 1.4 and 38.0 per cent respectively. Kerosene is used for cooking in as many as 1.6 per cent of the households (0.1 per cent rural and to 7.1 per cent urban households). The other methods like crop residue, cow dung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between to 0.1 per cent to 22.0 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, LPG (cooking gas) and kerosene are the predominant fuel for cooking in the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial No.	Tahsil	Total/ Rural/ Urban	Total number of house-holds	Total number of house-holds availing banking services	Availability of household assets			Availability of household assets

Data source: Census of India 2001, H-series Table on Houses, Households amenities and Assets.
* Houselist Households

The table reveals that out of the total households (217,528) of the district, in 68,083 (31.3 per cent)could avail banking services at district level, while only 62,902 (28.9 percent), 46,073 (21.2 percent), 9,167 (4.2 percent), 150,692 (69.3 per cent), 16,912 (7.8 percent), 2,653 (1.2 percent), 49,591 (22.8 percent) enjoyed the availability of household assets radio/transistor, television, telephone, bicycle, scooter/ motor cycle/moped car/jeep/van and None of the specified assets.

It also reveals that at tahsil levels a highest number of 26,512 households were availing banking services in Etawah The highest number of none of specified assets 18,177 in the tahsil Bharthana.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

In last decade 1991-2000 new tahsil headquarter, CD Blocks, Police station, airport and stadium was established in Saifai The headquarters of the newly created tahsil Bharthana and police station Bharthana was established in Kandhesipachar village. State warehouse was established in village Palikala of the tahsil Bharthana. Nothing significant happened on social and cultural front in the district.

(xii) Brief description of places of religious historical or archaeological importance in villages and places of tourist interest in the towns of the district.

Tiksi Maha Deo Temple : The most famous temple in Etawah city is the Tiksi Maha Deo temple, which is situated in the ravines on the Etawah-Gwalior road in south of Etawah city, and is built on a high buttressed platform which raises it considerably above the road level. The religious gatherings at this temple are held in Phalguna and Sravana. Adjoining it another temple is of Kali Devi. It is an old temple built near the ruins of fort. It said that lingam has installed by Sage Bashishtha the guru of Rama.

The Nilkanth Temple : It is also situated in Etawah city. It is also of great religious importance and contains a well, renowned, for the healing power of its water, which is carried in tins by those suffering particularly from chest diseases. The bathing Ghat along the Yamuna river are lined by a few temples, that of Damaneshwar being the most ancient. The prominent Ghat, is the Bisrant.

Fort of Etawah : It is known as Baradari (twelve doors) near the Tiksi temple in Etawah city.

The ancient Mound at Chakar Nagar : The ancient mound at Chakar Nagar lies about 26 kms. south east of Etawah, between Yamuna and Chambal rivers. There is an enormous khera (mound) having traces of old buildings. Near it on the west, there is a magnificent well built of blocks of Kankar, evidently very old. The Khera is reported to have been called Ekachakra, hence the modern name is dervied and is said to have been mentioned under old name in the Mahabharata.

Partabner : Partabner is a large village about 14 kms. distant from Etawah and is connected by branch road from Kachauri Ghat to Etawah. The village is founded by Raja Partab Singh the 13th Raja of Chauhan Rajput, about 1250 AD. The same chieftain built a fort which is now in ruins.

Sarai Ekdil : Sarai Ekdil lies about 8 km. east of Etawah on ancient route from Agra to Allahabad. The site is said to have been settled by a Kayasth named Rupa and was known as sarai Rupa. In 1402 Hijri (1,632 AD) and eunuch named Ekdil Khan built a new Sarai and mosque. Hence forth called after his name. The Agra, Allahabad road is arched by two fine stone gateway with the inscription – In the reign of Shahjahan the foundation of mosque was laid. The town gives its name to a railway station on the main line of Delhi Mughalsarai section of northern railway.

(xiii) Major Characteristics and Contribution of the District:

The region covered by the present district of Etawah was a centre of Vedic learning and stronghold of Brahamanism. In later vedic times the Panchala parishad, an academy of the learned of this region, was celebrated throughout the country. The district is famous for Jamunapali breed of goats, Ghee and Wool. In future the district may turn into an industrial centre due to its proximity to Auraiya where Natural gas and petroleum pipeline have passed. The district belongs to the national fame leader Shri Mulayam Singh Yadav also.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed

in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of newspaper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY
(SECTION I & II)

SECTION - I
VILLAGE DIRECTORY

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

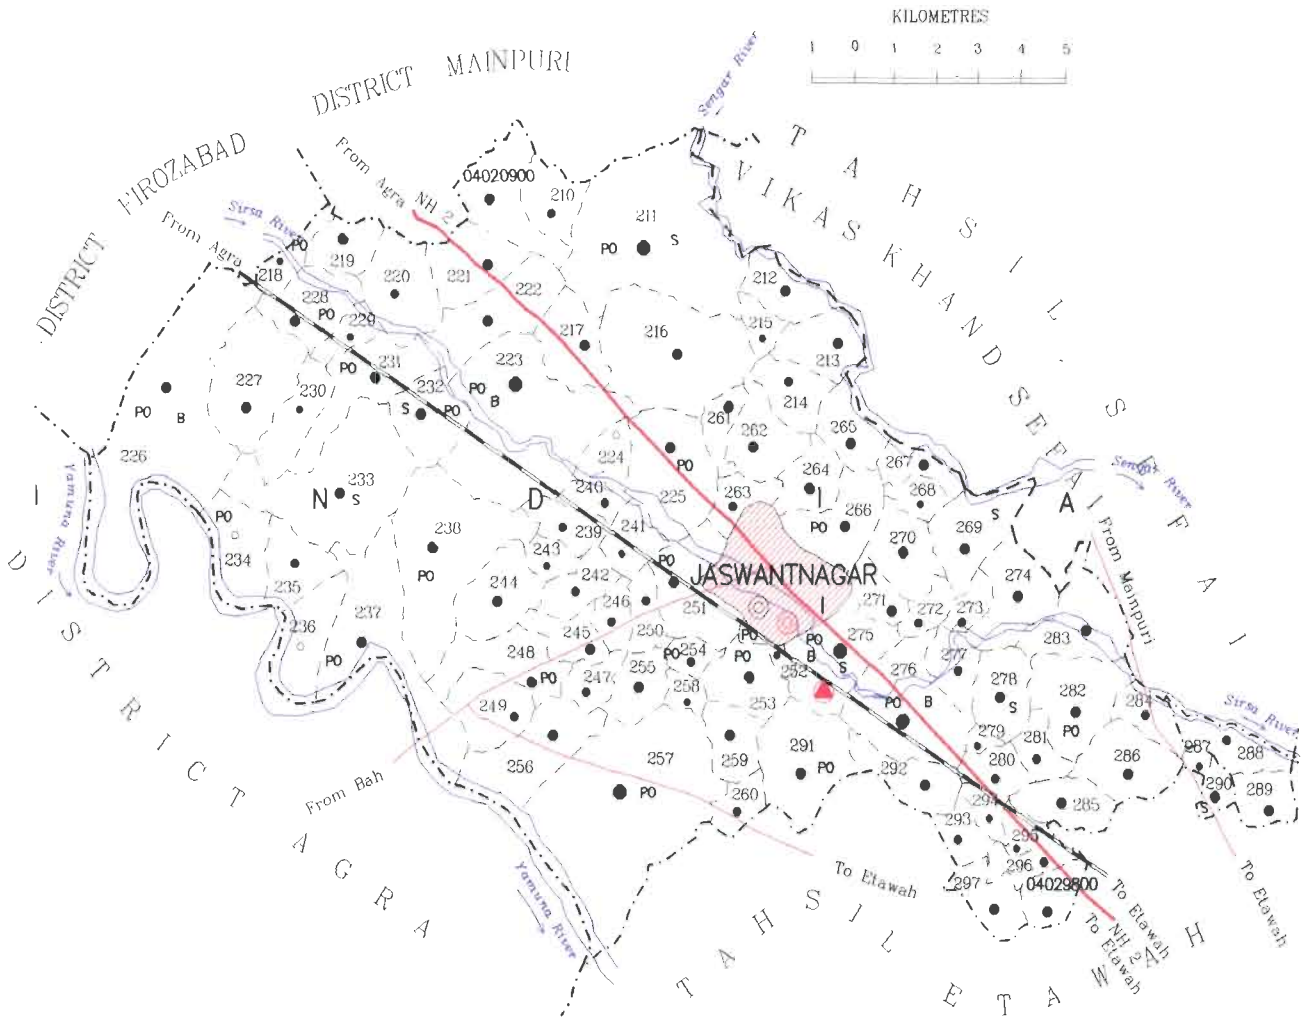

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.

SECTION II
TOWN DIRECTORY

Section II - Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point

of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of

the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES
I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which in north –central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000.The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Etawah
q1	Persons	99	85
	Males	98	81
	Females	104	87
q2	Persons	117	120
	Males	117	110
	Females	118	130
q5	Persons	134	144
	Males	135	137
	Females	132	154

(*Undivided Uttar Pradesh at 1991 Census)

The child mortality by ages 1, 2 and 5 years was lower in the district as against the State, The child mortality indicators in the district for females were in the improved condition as compared to the State by ages 1, 2 and 5 years

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person/Male/Female	Uttar Pradesh	Etawah
1	2	3	4	5
1	CBR		37.21	33.38
2	TFR		5.6	5.07
3	TMFR		6.3	5.64
4	GFR		172	157
5	GMFR		200	181
6	Mean age at marriage (1981-91)		17 27	16.75
7	Number of children ever born per ever married woman aged 45-49 years		4.59	4.62
8	Child woman ratio 0-4		631	625
	5-9		752	709

Source :

(i) Estimates of fertility indicators Uttar Pradesh Table # 2.23

(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CRB), which is the ratio of the number of live births in a year to the mid year population, is 33.38 percent in the district. It is below to the state of Uttar Pradesh i.e. of 37.21 percent. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower proportion from the state figures. The conclusion that may be drawn is lower fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.27 years for the state where as 16.75 years has been observed for the district. It may be observed that lower age at marriage leads to low rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever-married women in the age group 45-49. The state and the district figures are placed as 4.59 and 4.62 percent respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 625 and 709 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that levels as such are below to the state average. Another important factors i.e. the probability of dying between birth and at age 1, has been of lower order in the district and at age 2 it is of high order for persons and females. At the age of 5 the probability of dying has been of high order in case of person males and females in the district.

100.0	100 0	100.0	85 8	83 4	86.4	14.1	16 4	13 6	0.1	0 2	0 0

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district

was 89.0 in 1991, while in 2001 it was 88.0 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 10.7 percent and 11.9 percent respectively. This shows in-migration from other states to this district was increased in 2001 in comparison to 1991. At district level in-migration from other countries was 0.35 percent in 1991 and 0.1 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 89.2 percent and 85.8 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 10.6 percent and 14.1 percent respectively. The movement of population from other countries in the district was 0.2 percent in 1991 and 0.1 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

	100 0	0 3	0 0	97.8	0.1	1 7	0 0	0.0	0 1

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80 7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 92.8 percent in 1991 and 92.1. percent in 2001, while Muslim were 6.6 percent in 1991 and 7.2 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 54.4 percent male and 45.9 percent female to 57.5 percent male and 55.1 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 41.8 percent and female was 50.9 percent in 1991 and in 2001 it was 38.6 percent male and 46.2 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 3.0 percent male and 5.5 percent female while it was 3.0 percent male and 3.8 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

ANNEXURE - VII

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 46.4 percent male and 69.5 percent female in 1991 which declined to 34.0 percent male and 53.0 percent female in 2001. Primary level education was 12.5 percent male and 10.5 percent female in 1991, which was 17.4 percent male and 17.4 percent female in 2001. Middle level education was 13.6 percent male and 7.0 percent female in 1991 and

19.8 percent male and 12.7 percent female in 2001. Matriculation and above level of education was achieved by 16.3 percent male and 5.4 percent female in 1991 which was 25.4 percent male and 11.5 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

District - Etawah

Total Population	Hindi	Urdu	Nepali	Punjabi	Awadhi	Total Of Other Mother Tongues
1	2	3	4	5	6	7
1,338,871	1,290,525	43,196	3,419	370	243	1,118
100 0	96.4	3.2	0.3	0.0	0.0	0.1

Note : For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is grater than 0 02%. The remaining tongues have been merged in the column of "Total of Other Mother Tongues."

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 96.8 percent person in 1991 and 96.4 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 3.1 percent and 3.2 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
