DISTRICT HEADQUARTER 'MATI'

On 23rd April 1981 the so called known district Kanpur was bifurcated into two districts Kanpur Nagar and Kanpur Dehat. About one and half century ago, the Akbarpur Pargana was known as Akarpur Shahpur and Akarpur Iral. Once Mount Gornery wrote a report in which Shahpur was known by the name 'Budkikhera'. Another historical legend envisage that F.N. Right in his book Statistical Descriptive and Historical Accounts that two ponds-Sheetal Shukla and Chhabba Kalar were constructed in Akbarpur. The district headquartera Mati is situated at this place. For the harmonious development, of the area, the govt. on 11th April 1994 declared the headquarters of Kanpur Dehat at this place, latter on the Collectorate, Vikas Bhawan, Police Hqrs. etc. have been constructed. Nearly, all the departments of the district, have their own buildings. A District Hospital with100 beds is also in the process of construction.

After the establishment of the district headquarters at Mati, the inhabitants now have to cover less distance to reach at the district headquarters and they get their work done within their reach. In the near future the district is supposed to reduce the crowd of the Kanpur Mahanagar.

Annexure VII Age, Sex and Education in the district, 1991 Census 578
Annexure VIII Distribution of different mother tongues returned in 1991 Census 581

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity

& Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/ TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated worker deserves all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar

District Highlights - 2001 Census

1. District Kanpur Dehat ranks 52nd in terms of population in the state.

2. The percentage share of urban population in the district is 6.9 as against 20.8 of the population in urban areas of the state.

3. Kanpur Dehat district has population density of 517 persons per sq.km. which is less than the state average 690 persons per sq. km.

4. Kanpur Dehat district ranks 59th in terms of sex ratio (852) which is lower than the state average (898) females per one thousand males.

5. Kanpur Dehat district ranks 7th in literacy 66.4 which is higher than the state average 56.3 percent.

6. There are only 60 uninhabited villages out of total 1,031 villages in the district.

7. Decadal growth rate of the district 20.0 is lower to the state average of 25.8.

8. Akbarpur tahsil has the highest number of inhabited villages 267, while Derapur tahsil has the lowest number (141).

9. The district has 8 towns out of them none are new towns added after 1991 census, but no town has been declassified.

10 There are 259,937 households in the district accounting for 1.0 per cent of the total households in the state. The average size of households in the district is 6.0 persons.

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs, which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District:

Kanpur Dehat is carved out from the old district of Kanpur, which is said to be the corruption of Kanhaiyapur. It is named after a village. According to local tradition, the name of Kanpur Kohna owes its origin to Hindu Singh, Raja of Sachendi. In course of time its name changed to Kanpur. Later on it bifurcated into Kanpur Nagar and Kanpur Dehat. The region covered by present district was once included in ancient Kingdom of Panchal which extended from Himalyan mountains to Chambal river in the south. The area comprising in the present district became a part of south Panchal. The prehistoric culture relates to the stoneage, which was discovered at Musanagar, on the left bank of Yamuna in Bhognipur tahsil.

The archaeological explorations and excavations at Jajmau throw light on culture and civilization of different historic age. The times of the Buddha, Mauryas, Shungs, Kushans and Guptas, different kind of wares, copper tools, Mauryan Bricks, Shungha Terracotta, figurines, copper coins and stone seals have been found in this area. After a few generations, the Paurava King, Bharat ruled over the whole northern India and district of the Kanpur Dehat is no exception to it. The history of the district emerges in 6th century B.C. when its name was allowed to figure in 16 great states (Maha Janapads). It was conquered by Nanda Dynasty and brought under the sway of monarch of Magadh in 4th century B.C. In the 5th & 6th Century A.D. district remained in Gupta Empire. After the break-up of Gupta empire the district came under Harshwardhan (606-647 A.D.) During the reign Hiuen Tsang, the famous Chinese Buddhist scholar, travelled this district between 630-644 A.D. The King of Gujar Pratihar captured Kannauj, which included the area of the present district. After Chandel Kings, the area was conquered by Muhammad Ghori.

The district was under the rule of Jaichand, the king of Kannauj formed an integral part of his Kingdom. In the 12th century, the area of the present district passed under the sway of Muslim Rulers. Sultan Nasir-ud-din Mahmood (1246-1266 A.D.) and Balban (1266-1287 A.D.) dominated the area. Sultan Ala-ud-din Khilji administered this region during 1296-1316 A.D. In 1440 A.D., the area was ruled by Mahmood Shah. In 1493 there occurred rebellion, which apparently spread across the Ganga and was totally crushed by Sikandar Lodi. During these days

Mahmood Khan Lodi held the charge of this region. Babar, the first of the Mughal Emperors, become the master of Delhi Kingdom and the present area was under its vicinity. So when Shershah Suri defeated Humayun at the battle of Kannauj in 1540 and conquered the kingdom of Delhi, the district passed into his hands. It formed a part of Akbar's regime in 1658 A.D. Aurangzeb marched through the district against Shuja, whom he defeated and overthrew at Khajua.

In Kanpur Dehat district, the administrative divisions of Akbar's days remained practically unchanged till the death of Aurangzeb in 1707. After the death, civil war was raised in the empire and Kanpur Dehat shared in the general confusion. During the 30's of 18th century power of this district came in the hand of Muhammad Khan Bangash. Muhammad Khan Bangash died in 1743 and his possession passed into the hands of his eldest son Quayam Khan. Sufdar Khan then annexed all the Bangash territories driving out Jafar Khan from Akbarpur. The later part of the 18th century till 1801 Kanpur Dehat formed an integral part of Awadh dominions. By the treaty concluded on November 10th, 1801 between Sadat Ali Khan (The Nawab of Awadh) and East Indian Co. The area covered by the present district was added to English Govt. Kanpur was made the headquarters of the district for administration purposes. The political history of this period is mirage.

The party of the disbanded 19th Native Infantry from Behrampur (in Bengal) had passed through this district in April 1857, filling the Indian troops with tales about the impending use of cartridges greased with fat of pigs and cows. The news of the out- break of struggle in Meerut further agitated the sepoys. During the period Nana Saheb and Tatyan Tope played an important role in freedom struggle. Unrest was brewing among the masses and tahsildar of Akbarpur threw in his lot with Nana Saheb. Practically, whole of the Rajput community joined in the rising. The uprising ultimately failed. The British acquired a large property, which was distributed into those who had supported them. In August 1920, Mahatma Gandhi launched his famous non-cooperation movement and it received enthusiastic response from all the stations of the district. British goods were boycotted liquor ships were pocketed. Processions and meeting became a daily feature. In 1928 when Simon Commission visited India it was subjected to a boycott all over the district. This district played an important role during the civil disobedience movement. The Quit India Movement of 9th August 1942 received wide support from the people of the district. On August 1947 Indians become free.

(iii) Administrative Set-up:

There are 5 tahsils and 11 C.D. blocks in the district. There are 612 Gram Sabhas and 1031 revenue villages in which there is 971 inhabited villages 60 un-inhabited villages, C.D. block Jhinjhak falls in two tahsils viz Derapur and Rasulabad, similarly Maitha C.D. block too falls in Bhognipur and Rasulabad tahsils. The distribution of other C.D. blocks in different tahsils is as follows. Amrodha and Malasa in tahsil Bhognipur Pukhrayan, Derapur in Derapur tahsil, Akbarpur and Sarvan Khera in Akbarpur, Rajpur and Sandalpur in Sikandara tahsil and Rasulabad and Kakvan in tahsil Rasulabad. There are 7 statutory towns and one census town in the district having Nagar Palika. The Jhinjhak N.P. and Shivli N.P. come under Derapur tahsil and Rura N.P. and Akbarpur N.P. come under the Akbarpur tahsil. Amraudha N.P., Pukhrayan N.P. Gausganj C.T., fall under Bhognipur tahsil, whereas Sikandara N.P. is in Sikandara tahsil.

Jurisdictional Changes (1991-2000)

In 9th June 1976 Kanpur district separated into two general and administrative status as Kanpur Nagar and Kanpur Dehat. In 12th July 1977 it acquired its original status and in 23rd April, 1981 it has been separated again in two parts as Kanpur Nagar and Kanpur Dehat for development of backward and down trodden people of the society. Thus a change in carving of tahsils and blocks took place and because of this Kanpur Nagar acquired one tahsil along with 3 blocks and Kanpur Dehat acquired 5 tahsils and 11 C.D. blocks. During the period 1999-2000, the entire Bilhaur and Ghatampur tahsils along with their towns transferred to Kanpur Nagar. Also 91 villages from Derapur tahsil and 120 villages and town from Bhognipur tahsil were added to the Sikandara tahsil of Kanpur Dehat. The following table gives a wide spectrum of the Jurisdictional changes of that period.

Jurisdictional Changes (1991-2000)

Sl No.	Name of Tahsil	Notification no and Date	Jurisdictional Changes	
			Added	Subtracted
				Entire Bilhaur and Ghatampur tahsils along with towns transferred to Kanpur Nagar district
1	Sikandara	286/A-5/97-294-97-R-5 dated 18.9.97	i. 91 villages transferred from Derapur tahsil ii. 120 villages and one town transferred from Bhognipur tahsil	
2	Derapur			91 villages transferred to newly created Sikandara Tahsil
3	Bhognipur			120 villages and one town transferred to newly created Sikandara tahsil

District Administration:

District administration is composed of Revenue, Law and order, Judiciary and local self government in the district. For revenue and Law and order, District Magistrate is the main controlling officer. He is assisted by the Chief Development Officer, District Development Officer, Additional District Magistrate, Chief Medical Officer on health front and Senior Superintendent of Police/Superintendent of Police in order to maintain Law and order and check the crimes. Various district level officers who lead their department are also under the control of District Magistrate. District Judge with his team is responsible for disposal of judicial matters. Gram Pradhan heads the rural area and Chairman town Panchayat in urban areas and Chairman of district boards under local self government.

(iv) Physical Features:

Location and Size:

The district Kanpur Dehat is a part of middle Ganga plain west. It lies in the lower Doab of Ganga and Yamuna rivers. The boundaries of the district are adjoined, Jalaun and Hamirpur in South, Kannauj in the North, Auraiya in the West and Kanpur Nagar in the East. The district headquarters of Kanpur Dehat district is at Kanpur Nagar. The area of the district is 3,021 sq. kms.

Physiography:

Topographically the district has slope from north to southeast direction, the entire district lies in lower Doab of Ganga and Yamuna. The course of Ganga and Yamuna lies in wide and sandy bed of the shores and changes accordingly on the basis of the factor like geology, soils, topography, climate and natural vegetation, the district has been divided into following fine sub-micro regions.

Ganga Khadar:

The region is situated along the Ganga river is a narrow strip. It is de-limited by the extent of floodwater of Ganga River. The rivers 'Ison' and 'Non' join the Ganga in this region. These rivulets form eroded surface along its course. The geology of the region belongs to alluvium, Dun gravels (recent).

Bilhaur Plain:

The region is situated parallel to the Ganga khadar and is an elongated shape. It is relatively a higher tract, which slopes from northwest to southeast direction. The catchments water zone of the Ganga River is bifurcated by the region. Pondu along with its tributaries drain in the central part and joins the Ganga at the fag end of the region. Other streams are Ison and Non-which flow in the upper part. A large depression of irregular shape is allotted near the western boundary of the district. There are small patches of mounds located mostly in the northwestern part. The geology of the region belongs to Alluvium, Dun gravels (recent).

Rind Plain:

The region is situated in the central part of the district. The region runs parallel to Bilhaur plain region and slopes from northwest to southeast direction. The Rind is the main river, which drains in the central part. Non-is a small stream, which drains in the southern part. Besides, there are numerous rivulets, which drain here and join the Rind at different places. The main physical feature is eroded surface, which is spread over along the river course of the Rind. The small depressions are also noticed in this tract. The geology of the region belongs to Alluvium, Dun gravels (recent).

Sengar Plain:

It is situated in the southern part of the district. It is high land tract and bifurcates the water catchments zone of the Yamuna in south and the Sengar in the north. There are wide differences in the physical characteristics of the area, situated along the Sengar and its southern part. The Sengar is the main stream, which drains in the northern part and joins the Yamuna near the district Boundary. A chain of reveres, which various intensity are observed along this river. The southern part is flat and relatively higher. The geology of the region belongs to Alluvium, Dun gravels (recent).

Yamuna Ravines:

It is situated in the southern most part of district extending parallel to the Yamuna River. The lower course of Sengar River also falls in this tract. As evident from the same it self, the main physical characteristics are ravines. The ravines extend from 2 to 4 km. in the length, whereas there are large variations in the width. Some ravines are one to two kilometers wide. The extensions of such ravines are widely spread in west of the Sengar and the Yamuna but it is considerably reduction the eastern part. During heavy rains, entire tract is sub merged with floodwater. The physical feature restricts the development roads, canals and other cultural features. The geology of the region belongs to Alluvium, Dun gravels (recent).

Drainage :

Nature lease holy rivers Ganga and Yamuna flank here throughout the year and never become dry on account of which they have great contribution in agriculture. Aside from these two main rivers, four small rivers Rind, Sengar, Lon and Pondu Nadi also flank through the district. Drainage pattern of the district is under planning.

Climate :

The climate of the district is characterized by hot summer with hot winds and general dryness except in the southwest monsoon seasons. The year may be divided in to four seasons. The period from March to about middle of June is summer season. This is followed by the southeast monsoon season, which lasts till the end of September. October and first half of November forms the post monsoon or transition period. The cold seasons spreads from about the middle of November to February.

Around the beginning of April there is rapid rise in temperature. May and early part of June constitute the hottest part of the year. Hot, dry and dust landen westerly winds are common in hot season. The district has maximum temperature 47 C and minimum temperature is 30 C. The average annual rainfall of the district is 950 m.m.

Natural and Economic Resources

Forestry :

The total forest area of the district is 6,834 hectare (statistical magazine 1999-2000), which is about 1.8 per cent of total geographical area. The district once it was beautiful in vegetation is now devoid of its previous richness. Only patches of dhak, babul, siras, tamarind, mango trees makes up for the flora in the district. Neem and sisham trees also occur.

Minerals and mining :

No important minerals are found in the district. Some of the minerals with local commercial value found in the district are Kankar, Maurang and Brick earth. District is a part of middle Ganga plain west. It lies in the lower doab of Ganga River. The mineral appears are sand and morang, which is utilized as building material.

Soil :

The structure and colour of this land of the district is of different type in different areas. In the middle part of Ganga and Ishan river the land soil is loam, but it is much fertile. The Rind river allied to Yamuna. The course traversed through twists and bends form wild and abrupt ravines along the riversides after its entrance in the district. Beyond the ravines the hunter land exhibits red soil. The loam is sandy and much fertile. Sengar, which separates the tahsil of Akbarpur and Bhognipur for some distance then, meets Yamuna. The riversides contain patches of alluvial tarai all along the river Yamuna. The soil is either sandy or gravelly and such soil occurring usually all around. Bundelkhand in south barren and raggal land appears along the Yamuna in Bhognipur tahsil.

Though the soil is level expanse of good loam in north part between Rind and Pondu Nadi, but however this is broken in places by sodic soil. (usar).In this tract the sodic soil is much in existance in the eastern side of the tahsil Akbarpur and Rasulabad.

Land and Land use Pattern :

The total land use pattern as per statistical magazine of 1999 shows that out of the total reported area 315,128 hectares during 1997-98, forest covered 9,527 hectares, cultivable waste land 7,442 hectares, whereas, present unused land 15,153 hectares and other fallows 16,496, 'usar' and uncultivable land 25,795 hectares, land use other than agriculture is 22,260 hectares.

Agriculture and Crop Pattern :

The agricultural sector does not show the overbearing prominence, as it enjoys in the other district of state. The dominance of agricultural sector is only marginal over the new agricultural sectors as the labour force engaged in cultivation either as cultivators or as agricultural labours. Yet the role of agriculture cannot be under played, as the economy of the district is whelmingly agricultural.

Agriculture shows predominance of substance forming. The package of scientific methods of cultivation has been percolating to the farmers and infrastructure development incorporated by the Govt. as irrigation facilities, power, storage facilities and the dissemination of information through mass media have been changing the method of agriculture for more production. The tractors are used for various agricultural operations. Yet the cultivation continued to the largely done with traditional implements. The considerable expiration has been taken place in storage facilities. The use of fertilizers has considerably increased but this increased consumption comparatively per hectare of cultivated land is lower than previous year.

There are three seasonal crops, Kharif, Rabi and Zaid. The cereal crops claim two third of total cropped area. The cropped area raising of food grains. The cultivation of oil seeds and commercial crops occupy low level in agricultural economy. Among the food grain crops the wheat covering one third are of the total cropped area and half of the area under Rabi and Zaid crops. Paddy is the most important crop, which occupy one seventh of total cropped area. Other important crops like Jwar, Bajara, Barley, Maize are also sown in the district. Pulses are more important crops in which gram occupies about 60 per cent area of total pulse cropped area and rest is occupied by Arhar, Moong, Masur and Urd.

During the year 1997-98 out of total reported area of 315,128 hectares the net sown area was 213,683 hectares, which accounted for about 68 per cent of total reported area.

Irrigation :

Out of net sown area of 213,683 hectares during 1997-98 as stated above, 161,047 hectares was net irrigated area. Irrigation facilities are mainly rest on Govt. Canals, Tube wells and Canals under different systems. Total irrigated area was 189,799 hectares from all sources in 1997-98.

Animal Husbandry :

The animal Husbandry is the back- bone of the peasant, seems to be increased in agricultural mechanize support. It continues to provide bulk of the drought power for various stages of cultivation. Animal Husbandry provides avocation to marginal and small farmers and also agricultural labours. The Govt. has put efforts to improve the quality of livestock through the network of artificial insemination centres, veterinary hospitals and dispensaries and live stock centers.

Fishery :

In the district, 64 hectares water area is in the jurisdiction of District Fishery Department. In addition to this water area, there is more area available as flowing river, lake, Ponds and Pokhars etc. in the district. It is a source of increasing economic counter of poor and fishermen and also developing the private sector of fishery in the district. During the year 1999-2000 they developed 145 hectares area of ponds and trained 145 persons for fishery. 435 hectares of area consumed by the District Planning Office. The rivers, canals and lakes of the district contain a plentiful of fish. Mostly the species found here are locally called Rohu, Main, Bhakur, Keraunch, Mechaseer, Chilwa, Gooch, Saul, Mola and Anwari.

Industry :

The main industry of the district is handloom, which is run by weavers' co-operative societies. Other industrial units are also established for which data is not available for 2001. State industrial development corporation established 3 industrial areas in Raniya Site and Jainpur. Addition to this, small-scale industries are also running. The position of production of these industries is very good.

Trade and Commerce :

The district has numerous trade centers for distributing goods whether imported or locally produced. These centers are spread over each tahsil, where markets are held once or twice in a week. A large number of retail shops are spread over the tahsils and urban centers. In district

almost every locality has its own retail market. In the village markets (known as hats) are held once or twice in a week. Commodities of daily requirement such as cereals, vegetables, hand made articles of common use and salt are sold.

Small local religious fairs are held and gathering take place nearly in all the towns. It is observed in the city and in many villages particularly on the occasions of festivals such as Holi, Dipawali, Dashara, Idul-Fiter, Guru Nanak's birthday, Buddha Purnima etc. In order to arrest any further rise and to give relief to consumers, chiefly in the urban areas, the prices of number of commodities were controlled and their supply was rationed. Some of the more important commodities are wheat, rice and cloth. Banking facilities are available in every urban area.

Transport :

The district is well connected by Rail and Road Transport. The development of any district depends upon rail and road transport. The goods are carried to this district by the road transport from other district. Total length of roads in the district is 2,054 km. According to the statistics available for the year 1996-1997, the length of road per thousand sq. km. area is 239.1 km.

Electricity and Power :

For fast economic development, electricity plays a pivotal role. Efforts are being made to electrify the entire district as soon as possible. According to Sankhikiya Patrika 1999 the use of electricity in different purposes was as follows (in 1,000kw/hour) 5,370 is used in domestic and small electric power, 2,049 in commercial lighting, 20,291 in industrial power, 219 for street lighting, 70,557 in agriculture and 1,099 in water and sewerage establishments.

Gram Panchayat, its composition, Jurisdiction and role in village development :

Gram Panchayat acts as the executive of the Gram Sabha and plays a vital role in village development. There are 612 Gram Sabhas in the district.

Composition :

The members of the village Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat.

It is necessary that the village Panchayat should have a member belonging to the Scheduled Caste and also a woman member. If they are not elected, then the government itself appoints two such members. The village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Term:

The new Panchayat Raj act of 1993 has fixed a uniform five-year term for every Panchayat. The state government can also dissolve it earlier, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualification :

In order to be elected to a village panchayat, a candidate should possess the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty-five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions:

A Gram Panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervises its work.
3. It looks the cleanliness of the village. The Panchayat in the village also provides drains for wastewater.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a center.
5. It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
6. It arranges for sufficient irrigational facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.

7. It manages and maintains the common property of the village.

In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine up to Rs. 100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work-sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, un-burnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a servant uses a garage and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, storeroom, passageway and verandah, which are not normally usable for living, are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where

a census houses is used as a shop or office. etc., and the household also stays in it then the room is not considered as a dwelling room. But if a servant uses a garage or servant quarter and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colonies where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bathroom, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work-shed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the

garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In un-surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) a minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) A city or town with one or more contiguous outgrowths;

ii) Two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume-pipes, under flyovers and staircases, or in the open in places of worship, man daps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	2	Badi
3	Baiga	4	Balahar
5	Bajaniya	6	Baiswar
7	Balmiki	8	Bajgi
9	Banmanus	10	Balai
11	Barwar	12	Bangali
13	Bawariya	14	Bansphor
15	Beriya	16	Basor
17	Bhuiya	18	Beldar
19	Boria	20	Bhantu
21	Badhik	22	Bhuyiar
23	Baheliya	24	Chero
25	Chamar, Dhusia, Jhusia, Jatawa	26	Dharkar
27	Dabgar	28	Dom
29	Dhanuk	30	Dusadh
31	Dhobi	32	Domar

33	Dhangar	34	Gharami
35	Gond	36	Gual
37	Ghasiya	38	Habura
39	Hari	40	Hela
41	Kanjar	42	Korwa
43	Karwal	44	Kalabaz
45	Kharwar (excluding Banbasi)	46	Kapariya
47	Kol	48	Khairaha
49	Khorot	50	Khatik
51	Kori	52	Lalbegi
53	Majhwar	54	Mazhabi
55	Musahar	56	Nat
57	Parahiya	58	Pankha
59	Patari	60	Pasi, Tarmali
61	Rawat	62	Shilpkar
63	Sansiya	64	Saharya
65	Sanaurhiya	66	Turaiha

Scheduled Tribes

1	Bhotia	2	Buksa
3	Jaunsari	4	Raji
5	Tharu		

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as an 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age group}}{\text{Mid-year married female population of the same age group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of stillbirths plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and childbirth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I U

As towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 1,563,336 in which 1,455,569 live in rural and rest 107,769 in urban parts. There are five tahsils in district namely Rasulabad, Derapur, Akbarpur, Bhognipur and Sikandra. The most populous tahsil is Akbarpur followed by Bhognipur tahsil. The urban population in the district is about 6.9 per cent. The urban population is maximum at about 11.0 per cent in Bhognipur tahsil. There are 971 inhabited and 60 are un-inhabited villages. The total rural population of Kanpur Dehat district is spread over 11 CD blocks. The most populated CD Block is Amrodha with a population of 163,816, but the maximum Number of inhabited villages 111 are in Maitha CD Block. Although the population density in the district is about 517.

Size-class and status of towns:

In the total urban population of 107,767 as much as 20,433 persons live in Jhinjhak N.P. next big town is Pukhrayan NPP with a population of 20107. The above two are class III towns having the civic status of NPP and NP. Among the towns two towns are class IV and three towns are class V.

Population growth:

At the present territorial jurisdiction the population of the district was 1,303,232 at 1991 Census and growing by 20.0 per cent during the decade 1991-2001 it is 1,563,336 at 2001 Census. The decadal growth in the district has been observed lower than that of state.

Population Density:

The district has area of 3,021 sq. km. The population density in the district is 517. In the rural areas of the district the density is about 491 and in the urban area it is 1,854.

Sex Ratio:

The sex ratio in the district at 852 is low to 898 at the state level. Indeed the sex ratio at the district has been all along lower in the district as against to the state since 1901. As against to urban areas of the district the sex ratio is higher in rural areas except to 1941, 1991 and 2001 Census. Among tahsils, highest sex ratio is in Bhognipur and lowest in Derapur. Among CD Block the sex ratio is highest in Malasa and Amrodha at 860 and lowest in Kakwan at 838. Out of 971 inhabited villages in the district there are about 1.2 per cent villages (with 0.3 per cent of rural population), which are having a sex ratio below 700. In the urban parts of the district the sex ratio is 867 and highest of Gausganj CT in 890 and lowest of Amrodha NP in Pukhrayan NPP 853. The sex ratio of population on the age group 0-6 is 892 in the district, which is lower than the state average at 916. As against a sex ratio of 893 in the age group 0-6 of rural population of the district, it is highest at 907 in Amrodha Block and lowest at 864 in Rajpur C.D. Block. It may be noted that out of 971 inhabited villages in the district is 18.9 per cent of villages with 23.2 per cent of rural population the sex ratio in the age group 0-6 is between 852 to 899. Among towns this sex ratio is highest at 994 in Sivli NP and lowest at 841 in Sikandra NP.

Work Participation Rate:

In the total population of the district Kanpur Dehat is 32.8 per cent are workers and rest of 67.2 per cent are non-worker. Among worker 24.1 per cent are main workers and rest of 8.7

per cent are marginal workers of total population. The extant of main workers is highest at about 25.2 per cent in Sikandra tahsil and lowest at about 23.5 per cent in Akbarpur tahsil. In case of marginal workers the proportion is highest in Bhognipur tahsil as 10.3 per cent in comparison to only about 10.2 per cent in Derapur and 9.6 per cent in Sikandra tahsil. In the district among workers about 50.8 per cent are cultivators and 20.5 per cent other workers. Over 42.2 per cent of female workers are engaged as cultivators.

Literacy:

In the district 66.4 per cent population is literate. The literacy is 74.8 per cent in urban areas and 65.8 per cent in rural areas. The males literacy is as highest 76.4 per cent as against 54.6 per cent females literacy, and therefore the gap in male/female literacy rate is 21.8 per cent. In rural areas among all CD Blocks, the highest literacy is at 68.1 per cent in Jhinjhak and lowest is 60.6 per cent in Amrodha. The literacy among males in rural areas is 76.0 per cent in comparison to 53.7 per cent among females. The lowest female literacy is 47.1 per cent is in Amrodha CD Block. The gap in male/female literacy rate is highest in Rajpur CD Block, which is 25.4 per cent. In 47.5 per cent of villages covering also 55.3 per cent of rural population the literacy range is 61 to 70. Among urbanites in the district, as much as 81.3 per cent males are literates as against 67.4 per cent females. The highest urban literacy is 81.4 per cent in Rura NP and lowest in Amrodha i.e. 61.0 per cent. The maximum male literacy is also found in Rana NP at 86.4 per cent and lowest 68.6 per cent is in Amrodha NP. However, the highest female literacy is in Rura NP i.e. 74.8 per cent and lowest 52.1 per cent in Amrodha NP. Still, the maximum gap in male-female literacy rate at 16.8 per cent is found in Gausganj CT. The literacy among Scheduled Castes is 55.7 per cent. In the countryside it is 59.0 per cent in towns Only 382 Scheduled Tribes population is found in the district. Out of this 130 are literates.

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

The district throws up vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables 1 to 36.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Sl. No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Rasulabad	NA	-	-	277,784	277,784	0	NA	NA	-	-	0
2	Derapur	NA	-	-	242,187	221,754	20,433	NA	NA	-	-	8.4
3	Akbarpur	NA	-	-	463,176	423,504	39,672	NA	NA	-	-	8.6
4	Bhognipur	NA	-	-	334,752	297,968	36,784	NA	NA	-	-	11
5	Sikandra **	NA	-	-	245,437	234,559	10,878	NA	NA	-	-	4.4
District Total:		**1,303,232**	**1,228,562**	**74,670**	**1,563,336**	**1,455,569**	**107,767**	**20.0**	**18.5**	**44.3**	**5.7**	**6.9**

The growth rates of the district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the tahsil cannot be calculated on account of administrative change amongst tahsils. Out of the total population of the district 93.1 per cent lives in rural areas, while 6.9 per cent lives in urban areas of the district. The highest growth of urban population is recorded in Bhognipur (11.0) per cent tahsil and lowest is registered in Sikandra (4.4) tahsil. Urban population is nil in Rasulabad tahsil, which is entirely rural.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial Number	District / C.D. block	Total Number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

Table-2 gives C.D. block-wise population, Number and percentage of villages falling in each range of population size of villages and Number of males and females in each population range at C.D. block level in the district. Out of the 971 inhabited villages, 26 (2.7 per cent) are small size villages with population below 200 persons. In the size of 200 to 499 persons there are 119 villages (12.3 per cent) of the district, while in the size class of 500-999 population claims 261 villages with 26.9 per cent of the total villages in the district. 339.villages (34.9 per cent) are in the size class of 1,000-1,999 202 villages (20.8 per cent) are in the size class of 2,000-4,999. 22 villages (2.3 per cent) are in size class of 5,000-9,999 and 2 villages (0.2 per cent) are in the size class of 10,000 and above, the biggest village Rasulabad in the district having population 18,205 persons is located in Rasulabad C.D. block of district.

Table 3 : New Towns, De-notified, Declassified and Merged Towns in 2001 Census

Name of town
1

(a) New
(i) Statutory town

NIL

(ii) Census town
NIL

(b) De-notified

(i) Statutory towns of 1991 census de-notified and also did not satisfy the criteria to be treated as census towns.
NIL

(ii) Statutory towns of 1991 census de-notified but identified as census towns based on demographic and economic criteria.
NIL

(iii) Census towns of 1991 census are notified as statutory town in 2001 census.
NIL

(c) Declassified
NIL

(d) Wholly merged with other town(s)
NIL

**Declassified means the census towns of 1991 census, which failed to satisfy the demographic and economic criteria.*

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total Number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	134]	13.8	184,718	12.7
11-20	0	0.0	0	0.0
21-50	4	0.4	210	0.0
51-100	7	0.7	3,440	0.2
101-200	40	4.1	24,608	1.7
201-300	87	9.0	81,150	5.6
301-500	301	31.0	421,072	28.9
501 +	398	41.0	740,371	50.9
Not known	0	0.0	0	0.0
District Total:	**971**	**100.0**	**1,455,569**	**100.0**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum Number of village i.e. 398 accounting for 41.0 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 50.9 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 134.villages (13.8 per cent). 398 villages (41.0 per cent) have very high density with more than 501 and above persons per sq. km. while the corresponding proportion in the lower range of 201 to 500 is 40.0 per cent of the total inhabited villages having 34.5 per cent population of the district. In the medium densities ranges of 21 to 50 and 51-100 persons account for 0.4 and 0.7 per cent of inhabited villages respectively. Both these ranges claim 0.2 per cent rural population.

Table 5: Sex Ratio of State and District 1901-2001

Year	UTTAR PRADESH			KANPUR DEHAT		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	868	868	0
1911	916	922	866	832	832	0
1921	908	918	834	802	803	677
1931	903	916	813	810	811	671
1941	907	922	824	777	777	810
1951	908	922	827	855	856	764
1961	907	921	817	865	866	773
1971	876	884	826	849	849	803
1981	882	889	850	844	844	843
1991	876	879	864	836	835	853
2001	898	904	876	852	850	867

NOTE- Sex Ratio has been defined here as the Number of females per 1000 males

As per 2001 Census sex ratio of 852 females per 1,000 males has been recorded in the district against the state average of 898. The sex ratio of the district was significantly low as compared to the state average figures from all 1901 to 2001. The lowest sex ratio of 777 females per 1,000 males were recorded in the district during 1941 against the state average of 907 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in the state, while proportion of females in rural areas is higher than that of urban areas in the district except 1941, 1991 and 2001.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial Number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Rasulabad	848	848	--
2	Derapur	844	842	871
3	Akbarpur	855	854	869
4	Bhognipur	860	860	861
5	Sikandra **	845	843	875
	District Total:	**852**	**850**	**867**

The table-6 gives sex ratio for total, rural and urban areas at tahsil level as per 2001 census. There are 852 females for every thousand males in Kanpur Dehat district. It becomes clear from the table that sex ratio in urban areas is higher than that of rural areas. The sex ratio among rural and urban population is 850 and 867females respectively. The rural sex ratio in the tahsils varies between 842 in Derapur tahsil and 860 females per 1,000 males in Bhognipur tahsil. The sex ratio in Akbrpur tahsil and Bhognipur tahsil is higher than district rural average (850). In urban areas the highest sex ratio is recorded in Sikndra urban (875) and the lowest is in Bhognipur urban (861).

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial Number	Name of C D block	Sex ratio
1	2	3
1	Rasulabad	851
2	Jhinjhak	839
3	Kakwan	838
4	Maitha	848
5	Derapur	846
6	Akbarpur	856
7	Sarbankhera	856
8	Malasa	860
9	Amrodha	860
10	Sandalpur	846
11	Rajpur	841
	District (Rural) Total:	**850**

The table-7 presents C.D. block-wise sex ratio for rural population in the district. The sex ratio in rural areas of the district comes 850 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex ratio of 860 females is found in Malasa and Amrodha C.D. blocks and is fallowed by Akbarpur and Sarbankhera CD blocks (856), while the lowest of 838 is recorded in Kakwan C.D. block. The sex ratio of Rasulabad, Akbarpur, Sarbankhera, Malasa and Amrodha C.D. blocks are higher than the district rural average of 850 females and in remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	12	1.2	4,752	0.3
700-749	20	2.1	14,468	1.0
750-799	122	12.6	134,045	9.2
800-849	340	35.0	568,299	39.0
850-899	318	32.7	555,330	38.2
900-949	122	12.6	152,527	10.5
950-999	23	2.4	19,752	1.4
1000-1099	13	1.3	5,582	0.4
1100+	1	0.1	814	0.1
District Total:	**971**	**100.0**	**1,455,569**	**100.0**
Sex ratio (Rural) for District:			**850**	

Table 8 presents the distribution of villages by 9 sex ratio ranges based on 2001 Census. The maximum Number of villages i.e. 340 accounting for 35.0 per cent of the total villages having largest population of 39.0 per cent in the district fall in the sex ratio range of 800-849 females per 1,000 males. It is followed by the sex ratio range of 850-899, which claims 318 villages (32.7 per cent) and 38.2 per cent population. The highest range of 1,100 and above claims 1 villages (0.1 per cent). This range shares 0.1per cent rural population of the district while in the sex ratio range of 1000-1099, there are 13 villages (1.3 per cent). In remaining sex ratio ranges of 950-999,900-949, 750-799, 700-749 and less than 700, the Number of villages are 23 (2.4 per cent), 122 (12.6 per cent), 122 (12.6 per cent), 20 (2.1 per cent) and 12 (1.2 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum Number of villages i.e 340 having maximum population (39.0 per cent) fall in the sex ratio ranges of 800-849 females.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Akbarpur	(NP)	860
2	Amraudha	(NP)	853
3	Gausganj	(CT)	890
4	Jhinjhak	(NP)	871
5	Pukhrayan	(NPP)	853
6	Rura	(NP)	874
7	Shivli	(NP)	880
8	Sikindra	(NP)	875
Sex ratio (Urban) for the district:			**867**

Table 9 gives the sex ratio of towns. The sex ratio in urban areas of the district comes to 867 females per 1,000 males as a whole. Among the 8 towns the sex ratio varies between 853 to 909. Gausganj (CT) has the highest sex ratio (890), while Amrodha (NP) and Pukhrayan (NPP) have the lowest sex ratio of 853 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Sl. No.	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

	District Total:	**Total**	**280,435**	**148,199**	**132,236**	**892**
		Rural	**262,813**	**138,807**	**124,006**	**893**
		Urban	**17,622**	**9,392**	**8,230**	**876**

The table 10 presents population of age-group 0-6 years and sex ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age group 0-6 is 280,435 persons comprising 148,199 males and 132,236 females. The total sex ratio in this age group works out 892 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex ratio in rural and urban areas comes 893 and 876 females in this age group respectively. The rural sex ratio in tahsil varies between 872 in Sikandra tahsil and 903 in Bhognipur tahsil. The sex ratio of Rasulabad tahsil, Akbarpur tahsil, and Bhognipur tahsil are higher than district rural average (893). In urban areas, the higher sex ratio is recorded in Akbarpur urban (900) and the lowest is found in Sikandra urban (841).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Rasulabad	28,013	14,732	13,281	902
2	Jhinjhak	23,411	12,462	10,949	879
3	Kakwan	11,338	6,003	5,335	889

10	Sandalpur	19,664	10,444	9,220	883
11	Rajpur	23,096	12,392	10,704	864
District (Rural) Total:		**262,813**	**138,807**	**124,006**	**893**

Table 11 gives C.D. block-wise sex ratio of rural child population in the age-group 0-6 years in the district. The sex ratio is 893 for the district (rural). The sex ratio of C.D. block varies between 864 to 907. It is highest in Amrodha C.D. block i.e. 907 followed by 905 in Sarbankhera C.D. block and lowest 864 females is found per 1,000 males in Rajpur C.D. block. The sex ratio of Rasulabad, Maitha, Akbarpur, Sarbankhera, Malasa and Amrodha C.D. blocks are higher than the district rural (893), while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	**Population 2001**	Percentage distribution of population
1	2	3	4	5
Less than 700	70	7.2	7987	3.0
700-749	61	6.3	12187	4.6
750-799	77	7.9	19019	7.2
800-849	137	14.1	40506	15.4
850-899	184	18.9	60887	23.2
900-949	139	14.3	51845	19.7
950-999	94	9.7	25876	9.8
1000-1099	120	12.4	33317	12.7
1100+	89	9.2	11189	4.3
District (Rural) Total	**971**	**100.0**	**262813**	**100.0**
Sex ratio (Rural) for District:				**893**

Table 12 shows the distribution of villages in 9 sex ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex ratio in the district. The maximum number of villages i.e.184 (18.9 per cent) having largest population (23.2 per cent) in the district (rural) fall in the sex ratio range of 850-899 females per 1,000 males in age of 0-6 years. It is followed by the sex ratio range of 900-949, which claims 139 villages (14.3 per cent) and 19.7 per cent population. Next to it, 137villages (14.1per cent) are in the range of 800-849 with 15.4 per cent population. 120 villages (12.4 per cent) having 12.7 per cent population fall in sex ratio range of 1,000-1099. In remaining sex ratio ranges of less than 700, 700-749, 750-799, 950-999 and 1,100 and above claim less number of villages and these are distributed as 70 (7.2 per cent), 61 (6.3per cent), 77 (7.9 per cent), 94 (9.7 per cent and 89(9.2per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that 31.3 per cent of villages i.e. 303 having population (26.8 per cent) fall in the higher sex ratio ranges of 950 to 999 and above.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Akbarpur	(NP)	3,128	1,644	1,484	903
2	Amraudha	(NP)	1,827	978	849	868

		Rural	234,559	53,244	153	22.7	0.1
		Urban	10,878	2,070	0	19	0
	District Total:	**Total**	**1,563,336**	**388,419**	**382**	**24.8**	**0**
		Rural	**1,455,569**	**370,646**	**382**	**25.5**	**0**
		Urban	**107,767**	**17,773**	**0**	**16.5**	**0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,563,336 total population of the district, 24.8 per cent of the total population belong to the Scheduled Castes and negligible percent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 25.5 per cent in rural population and 16.5 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Derapur and Akbarpur tahsils (26.0), while the lowest is found in Sikandra tahsil (22.5). Scheduled Tribes population in the district is mainly available in tahsil of Sikandra (0.1 per cent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

11	Rajpur	127,900	25,997	8	20.3	0
District (Rural) Total:		**1,455,569**	**370,646**	**382**	**25.5**	**0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 25.5 per cent of rural population of the district belongs to Scheduled Castes and negligible percent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 20.3 per cent in Rajpur and 28.3per cent in Sarbankhera C.D. block. The other C.D. block containing the highest percentage of Scheduled Castes are Jhinjhak and Malasa (27.1) and Maitha (26.8). The proportion of 0.1 per cent Scheduled Tribes population is counted in Sandalpur C.D. block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	58	6.0	0	0.0
Less than 5	36	3.7	905	0.2
5-10	107	11.0	11,323	3.1
11-20	218	22.5	64,335	17.4

31-40	167	17.2	97,479	26.3
41-50	82	8.4	51,162	13.8
51-75	66	6.8	35,556	9.6
76 and above	13	1.3	3,986	1.1
District Total	**971**	**100.0**	**370,646**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 58 villages accounting for 6.0 per cent of total 971 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 36.villages (3.7 per cent). In 107 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 218 villages constituting 22.5 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 224 and 167 villages respectively. Both these ranges together account for 40.3 per cent villages of the district. 161 villages fall in the range of 41-50 and above per cent. 13 villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 1.1 per cent Scheduled Castes population of the district. The maximum of the 28.6 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage

10	Sandalpur	842	1,132
11	Rajpur	821	1,000
District (Rural) Total:		**840**	**1,054**

Table 19 indicates sex ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex ratio is 840 for district (rural). Among the C.D.blocks, the highest sex ratio of 852 females is found in Sarbankhera C.D. block and lowest of 821 females is recorded in Rajpur C.D. block.

Sex ratio among Scheduled Tribes population in district Kanpur Dehat (rural) is 1054, one point above parity reflecting excess of females at district level. The sex ratio in 5 CD blocks is above the parity line, while in 3 C.D. blocks is below the district average. Two CD blocks have no Scheduled Tribe population. The lowest value of sex ratio 333 females is recorded in Jhinjhak C.D. block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 66.4 per cent in the district. This proportion in rural area is 65.8 per cent against 74.8 per cent in urban areas. In the district the literacy rates of males (76.4 per cent) is much higher than that of females (54.6 per cent). Among the tahsils, Derapur tahsil tops with 68.5 per cent literates followed by Akbarpur tahsil (67.6 per cent). Bhognipur tahsil with 63.7 per cent literates stands at the bottom in the district. Out of 5 tahsils, the literacy rates of 3.tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 21.8 per cent in the district, as a whole. The situation at tahsil level is not much different. However this gap in urban literacy is low, which comes to 13.8 points against the rural areas, where the gap between male and female literacy is 22.4 points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

District (Rural) Total:		**784,894**	**492,501**	**292,393**	**670,675**	**294,123**	**376,552**	**65.8**	**76**	**53.7**	**22.4**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 65.8 per cent of the total rural population excluding the age group of 0-6 years literates in the district. The corresponding proportion of male and female literates comes to 76 and 53.7.per cent respectively, which shows very wide gap of 22.4 per cent in male and female literacy. At C.D. block level, Jhinjhak C.D. block has the highest rural literacy rate of 68.1per cent, while 77.8 per cent males and 56.3 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Amrodha C.D. block (60.6 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 25.4 points is found in Rajpur C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population

District Total:	**971**	**100.0**	**1,455,569**	**100.0**
	Literacy rate for District:		**66.4**	

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is none village of the district where all persons are illiterate. 2 villages (0.2 per cent) have all the literate population. 153 villages accounting for 15.8 per cent of the total villages are in the literacy range of 51-60 per cent and 461 villages (47.5 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 54 villages (5.5 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 303 villages (31.2 per cent). The range of 61-80 has the maximum number of 741 villages forming 73.3 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District (Urban) Total		**67,456**	**39,262**	**28,194**	**40,311**	**18,453**	**21,858**	**74.8**	**81.2**	**67.4**	**13.8**

Table 24 shows Number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Rura (NP) is way ahead of

other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (74.8 per cent). The literacy rate is quite high (above 86 per cent in two towns) among males. Female literacy rate is not far behind in two towns (above 73 per cent). However, literacy rate among females is lowest 52.1 per cent) in Amrodha town, the gap in male female literacy rate is highest (16.8) in Gausganj (CT).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

The table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates are more than literates of the district (urban). The percentage of literates is least in Sikandara (NP) among 8 towns but the gap in male/female literacy rate is highest in Gausganj (CT). The males in all the 8 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Sikandra (NP) town the female literacy rate is highest in Shivli (NP) (58.2 per cent).

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

The table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD blocks at the 2001 census. The number of illiterates is more than the literates in the district. The literacy rate of the scheduled tribes population is 44.5 per cent, which is lower than the corresponding rate. It is only 59.5 per cent in case of Scheduled Castes community. The gap in male and female literacy rate at 25.1 per cent is also more than what it is in case of the Scheduled Castes community (about 34.2 per cent). The literacy rate is highest in Maitha (cent per cent) CD Block and lowest in Derapur (23.5 per cent) CD Block. the gap in male/female literacy rate in Sarbankhera CD Block (66.7 per cent) is highest among the CD blocks.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out 32.8 per cent of the total population in the district. The total workers are comprised of 24.1 per cent of main workers and 8.7 per cent of marginal workers and the remaining 67.2 per cent are non-workers.

Among the main workers, males participation rate in the district is 40.4 per cent and 5.1 per cent of females. Male and female marginal workers account for 7.9 and 9.6 per cent respectively. The percentage of female marginal workers is higher than the males. Total workers (main and marginal workers) among tahsils varies from 30.6 per cent in Rasulabad tahsil to 34.8 per cent in Sikandara tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 1455569 total rural population of the district, 24.3 per cent has been categorized as main workers and the marginal workers constitute 9.^{o} per cent and the remaining 66.7 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 40.6 per cent males and 5.2 per cent females are in the category of main workers. Male and female marginal workers account for 8.0 and 10.1 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level except Rasulabad and Sarbankhera where male and marginal workers are higher than female marginal workers. In case of Maitha CD block male and female marginal workers are in equal percentage.

The percentage of total rural workers of the district comes to 33.3. per cent. At the C.D. block level, Malesa has highest proportion of total workers forming 35.8 per cent of the total population. It is closely followed by Rajpur (35.7 per cent), Amrodha (35.6 per cent), Jhinjhak

(34.7per cent), Sandalpur (34.6 per cent) and Derapur (33.8 per cent. The lowest percentage of 29.7 per cent is recorded in Rasulabad C.D. block.

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 50.8 per cent of the total workers (main + marginal) and remaining 49.2 per cent of total workers are engaged as agricultural labourers (25.5 per cent), household industry workers (3.2 per cent) and other workers (20.5 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil level shows high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 43.1 per cent in Bhognipur tahsil and 66.8 per cent in Rasulabad tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females' cultivators is 42.2 per cent, which is low as compared to 53.0 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as stated above. The percentage of agricultural labour occupy second position. The workers in other activities occupy the third position next to agriculture labour in the district as well as in each tahsil. The highest proportion of 28.5 per cent of other workers is recorded in Bhognipur tahsil, while the lowest proportion of 10.3 per cent is found in Rasulabad tahsil.

Note: Percent of Worker to total worker are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) 33.3 per cent of total population. Among these workers, cultivators constitute 53.1per cent, 26.4.per cent agricultural labourers, 3.0 per cent household industry workers and 17.5 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 17.5 per cent workers of the total working force. Therefore surplus-working force has to depend on primary activities. Among cultivators, the percentage of females (43.2 per cent) is less than males (55.7 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 41.2 per cent in Sarbankhera C.D. block to 75.1 per cent in Kakwan C.D. block. Similarly, for other workers, the lowest proportion is 5.3 per cent in Kakwan C.D. block, while 29.5 per cent is the highest in Amrodha C.D. block. The percentage of household industry workers is quite low i.e. only 3.0 per cent in the district. The percentage of agricultural labourers is highest in Sandalpur (31.8) block and is followed by Malasa (31.1) and lowest percentage in Kakwan (17.5) CD block. Similarly, household industry workers varies in C.D. blocks between 2.1 per cent in Kakwan and 4.0 per cent in Maitha and Amrodha CD blocks.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district Kanpur dehat. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (72.0 per cent), followed by cultivators with 11.6 per cent (11.7 per cent male and 10.6 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (26.0) is recorded in Shivli (NP). In the agricultural labourers category Pukhrayan NPP recorded very low percentage (3.0). Household industry workers are also very low (3.3 per cent in Amrodha NP, and 3.9 per cent in Pukhrayan NPP. As the usual trend recorded in the urban areas, other workers are in high percentage (87.4 per cent) in Pukhrayan NPP, followed 75.9 per cent in Rura NP, 74.9 per cent in Jhinjhak NP and 74.7 per cent in Gausganj (CT).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47 :

One of the major parts of the District Census Handbook is Village and Town Directory. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data inset tables 37 to 47 have been generated and reproduced here showing major trends in the availability of above amenities.

Note: - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 971 inhabited villages in the district 830 villages or 85.5 per cent have been provided with the education facilities of one type or the other. Similarly, 431 villages in the district constituting 44.4 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 952 or 98.0 per cent villages. As regards, post office facility, which includes facilities like telegraph office and post and telegraph, 175 villages constituting 18.0 per cent of villages have been provided with post office facility within the village. 244 or 25.1 per cent villages have been provided with the telephone facility, 102 or 10.5 per cent villages access to transport facility, 46 or 4.7 per cent villages with bank facility and 77or 7.9 per cent with agricultural credit societies. Similarly, there are 547 or 56.3 per cent villages, which have been linked with the pucca road. Total 526 or 54.2 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Sarbankhera C.D. block has the highest 92.0 per cent villages where educational facility is available and lowest 77.8 per cent is found in Kakwan CD block. Medical facility is highest in Sarbankhera (70.7 per cent) and lowest (13.3 per cent) in Rajpur C.D. block. Improved drinking water is available to cent-percent villages in Maitha, Sarbankhera, and Malasa blocks while in other blocks; it is above 94 per cent. Telephone facility is highest in Sarbankhera (48.0 per cent), while a single village of Rasulabad C.D. block enjoy this facility. Transport and communications is less developed in the district where only 10.5 per cent villages are covered by this facility,

whereas 18.6 per cent villages of Rasulabad C.D. block are availing this facility. Power supply Amrodha (83.8 per cent) and lowest in Kakwan (14.8 per cent) CD block.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Sl. No.	Name of C. D. block	Total popula-tion of inhabited villages	Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,455,569 persons in the district, 1,371,565 or 94.2 per cent have educational facility of one or the other type. Similarly 832,421 or 57.2 per cent population has medical facilities while 1,438,714 or 98.8 per cent have got improved drinking water facility. Post office facilities are available to 507,694 or 34.9 per cent population. Telephone facility is available to 529,344 or36.4 per cent. Transport communications facility is available to 272,745 or 18.7 per cent. Bank facility is available to 203,457 or 14.0 per cent. 274,744 or 18.9 per cent have been provided with the facility of agricultural credit societies. 997,771or 68.5 per cent have been provided with the facility of approach by pucca road. Power supply is available to 998,642 or 68.6 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. However, in Sarbankhera C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5

7. Agricultural Credit Societies	474	338	82	894

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table 141 villages do not have primary school in their villages and out of these villages; children of 110 villages have to travel less than 5 kms., for schooling. Out of 971 inhabited villages as many as 710 are deprived of middle school and 960 of Degree College. Of these 399 avail the facility of middle school at a distance of less than 5 kms., 270 at a distance 5-10 kms., and the remaining 41.at a distance of 10+ kms. In respect of degree college 119 avail this facility at a distance of less than 5 kms., 301.between 5 to 10 kms., and rest 540 villages at a distance of 10+ kms.

Similarly, there are 944 villages in the district, which have been devoid of Hospital facility, and 953 villages, which are deprived of PHC facilities. Of these 247 villages have the facility of Hospital available within 5 kms., while in respect of 389 villages the inhabitants have to cover a distance of 5-10 kms., in order to avail this facility. Similarly overwhelming number i.e. 308 villages have this facility at a distance of 10+ kms. As regards PHC 177 avail this facility at a distance of less than 5 kms., 404 at a distance of 5-10 kms., and the remaining 372 have to travel a distance of more than 10 kms., to avail this facility.

Regarding Post Office, 796 villages do not have this facility in the village itself. Of these majority i.e. 442 have this facility at a distance of less than 5 kms., another 274 villages avail it at a distance of 5-10 kms. In the remaining 80 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 727 villages in the district, which are without telephone facility. Of these 280 avail this facility at a distance of less than 5 kms., 241 at a distance of 5-10 kms., and remaining 206 have to travel a distance of 10+ kms.

For Bus service, out of 902 villages which do not have facility, 279 villages avail this facility at a distance of less than 5 kms., 416 at a distance between 5-10 kms., and 207 at a distance of 10+ kms.

In the entire district 926 villages are deprived of Commercial Bank and 961 of Co-operative Bank. Of these 926 villages which are deprived of Commercial Banks 344 villages avail this facility at a distance of less than 5 kms., 404 between 5-10 kms., and the remaining 178 at a distance of 10+ kms. Regarding Co-operative Banks out of 961 villages 154 villages avail this facility at a distance of less than 5 kms., 400 at a distance of 5-10 kms., and remaining 407 at a distance of 10+ kms., 894 villages do not have agricultural credit societies. This facility to 474 villages is available at a distance of less than 5 kms., 338 at a distance of 5-10 kms., and the remaining 82 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 971inhabited villages in the district, there are 141 villages, which have nearest towns' up to a distance of 5 kms. Of these only 124 villages forming 87.9 per cent of these total villages, are having the educational facilities of one type or the other and 58 villages constituting 41.1per cent, have the medical facilities within the village, 12 villages forming 8.5 per cent have the facility of post office within the village and 32 or 22.7 per cent have the facility of telephone. 7 villages constituting 5.0 per cent have been linked by transport service. 4 villages comprising 2.8 per cent have been provided bank facilities, while 10 villages constituting only 7.1 per cent have been provided by agricultural credit societies. 92 villages comprising 65.2 per cent have been provided with pucca road.

There are 693 inhabited villages in the district, which fall in the distance range of 5-15 kms. Of these 587 villages constituting 84.7 per cent have been provided with the educational facilities. 311 villages comprising 44.9 per cent have been provided with medical facilities. 137 villages constituting 19.8 per cent enjoy the post office facility. 169.villages comprising 24.4 per cent have been provided the telephone facility. 77 villages constituting 11.1 per cent have been linked with transport communications. 31 villages comprising 4.5 per cent have bank facility. 54 villages constituting 7.8 per cent are having agricultural credit societies, while 382 villages or 55.1per cent are approachable by pucca road. 79 villages fall in the distance range of 16-50 kms. Of these, 84.8 per cent villages have educational facility, 35.4 per cent with medical, 25.3 per cent with post office and telephone, while transport and communications available to 10.1 per cent villages. Banks and agricultural credit societies facilities are available to 3.8 and 5.1 per cent of villages. 55.7 per cent villages have been linked by pucca road.

There are no villages in the district, which are situated beyond 50 kms., from the nearest town. There are 58 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 52. or 89.7 per cent villages have the educational facility of one or other type. 34 villages constituting 58.6 per cent have the medical, facility, 10.3 per cent with post office, 39.7 per cent with telephone and transport and communications available to 17.2 per cent villages. Banks and agricultural credit societies facilities are available to 13.8 and 15.5 per cent of villages respectively. 29 or 50.0 per cent villages have been linked by pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Kanpur Dehat district, out of a total 971 inhabited villages, overwhelming 145 have a population of less than 500 persons. Of these, 66 villages (45.5 per cent) have education facility, 27 villages. (18.6 per cent) have medical facility, 137 (94.5 per cent) have improved drinking water facility. No village has post office facility. 8 (5.5 per cent) have telephone facility. 10 villages (6.9 per cent) have been linked by bus service. One village. (0.7 per cent) have Bank facility. No village has been provided with the agricultural credit societies, 52 villages (35.9 per cent) have been linked with pucca road. 41 villages (28.3 per cent) have been provided with electricity.

Out of 261villages, which fall in the population range of 500-999 persons, 219 villages (83.9 per cent) have been provided with the education facility, 87 (33.3 per cent) with medical facility, 258 villages (98.9 per cent) have improved drinking water facility. 17 villages (6.5 per cent) have been provided with post office facilities, 37 villages (14.2 per cent) with telephone facility, 16 villages (6.1 per cent) with transport facilities, 3villages (1.1per cent) with bank facility, 9 villages (3.4 per cent) with agricultural credit societies and 127 villages (48.7 per cent) have approach by pucca road. 101 villages (38.7 per cent) in this range have electricity.

339.villages fall in population range of 1,000-1,999 persons. Of these 321 (94.7 per cent) villages have education, 168 (49.6 per cent) with medical facilities, 334 (98.5 per cent) have improved drinking water facilities, 50 villages (14.7 per cent) have post office facility, 103 villages (30.4 per cent) have telephone facility, 30 villages (8.8 per cent) have transport communications facilities, 3 villages (0.9 per cent) have bank facilities, 12 villages (3.5 per cent) have agricultural credit societies and 193 villages (56.9 per cent) have approach by pucca road and 199 (58.7 per cent) have been provided with electricity.

There are 202 villages in the district, which are covered under 2,000-4,999-population range. In this range, 200 villages (99.0 per cent) enjoy the facility of education, 128 (63.4 per cent) with medical facilities, 199 (98.5 per cent) have improved drinking water facilities, 86 (42.6 per cent) have post office facilities, 83 (41.1 per cent) have telephone facilities, 32 villages (15.8 per cent) with transport facilities, 24 villages (11.9 per cent) with bank facility, 41 villages (20.3 per cent) with the agricultural credit societies, 152 villages have approach by pucca road and 162 villages (80.2 per cent) have been provided with electricity. 22 villages, which fall in population, range of 5000-9999 persons. All of these villages have education and improved drinking water facilities. 19 villages (86.4 per cent) have been provided with medical facilities, 20 villages (90.9

per cent) with post office facility, 11 villages (50.0 per cent) with telephone facility, 12 villages (54.5 per cent) with transport facilities, 13 villages (59.1 per cent) with bank and agricultural society facilities and 21 villages (95.5 per cent) have power supply and approach by pucca road.

22 villages falls in population range of 10,000+ persons. All of these villages have education, medical, improved drinking water facilities, post office, transport and communication facility, bank, agricultural credit society approach by pucca road and electricity facilities.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area

District Total:		**971**	**254,435.3**	**70.6**	**74.6**

Note: - Cultivable area = irrigated area + un-irrigated area

Table 42 presents C.D block-wise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as un-irrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 971 inhabited villages in the district having a total area of 254,435.3 hectares. Of this, 76.6 per cent is cultivable and 74.6.per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Rasulabad block with 86.villages have a total area of 33415.2 hectares, of this 66.5 per cent of land is cultivable and of the aforesaid area 90.3 per cent is irrigated. In Jhinjhak block, all the 73.villages have a total land area of 20,063.5.hectares, of this 94 per cent of land is cultivable and of the aforesaid area 83.9 per cent is irrigated. In Kakwan block, all the 54.villages have a total area of 16,186.4 hectares, of this cultivable area is 8 per cent and 84.3.per cent is irrigated. In Maitha block, all the 111 villages have a total area of 25,802.7 hectares. Of this, cultivable area is 73.4 per cent. Of cultivable area 82.2 per cent is irrigated. Derapur block with 78 villages have a total land area of 20418.3 hectares, of this 87.4 per cent is cultivable area and out of this cultivable area 66.4 per cent is irrigated. Akbarpur block with 101.villages has a total land area of 29,253.6 hectares. Of this 72.8 per cent is cultivated area, out of which 71.per cent is irrigated. Sarbankhera block with a total 75 villages have an area of 26,773.7 hectares. Of this 75.4 per cent is cultivable area and out of which 82.5 is irrigated. Malasa block with 97 villages has a total land area of 32,762 hectares. Of this 56.4 per cent is cultivable area and out of this cultivable area 52.3 per cent is irrigated. Amrodha block with 105 villages has total land area of 13,934.1 hectares, of this 78.3 per cent is cultivable area and out of this cultivable area 66.2 per cent is irrigated. Sandalpur block with 86 villages has a total land area of 73,948.1 hectare of this 62 per cent is cultivable area and 73.6 per cent of cultivable area is irrigated. Rajpur block with 105 villages has a total land area of 21877.7 hectares. Of this 95.8 per cent is cultivable area and 69.6 per cent of cultivable area is irrigated.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name and urban status of the Town	Per capita receipt			Per capita expenditure

Slum Not Available				

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Jhinjhak, NP	Milk Product, Leather Goods, Rice	Milk Products, Leather Goods, Food grains
2	Shivli, NP	--, --, --	--, --, --
3	Rura, NP	Leather Goods, Milk Product, Rice	Food grains, Milk, --
4	Akbarpur, NP	Rice, Carpet, Leather Goods	Rice, Carpet, --
5	Amraudha, NP	--, --, --	Tobacco, Wheat, Earthen Pot
6	Pukhrayan, NPP	Rice, Aluminum Utensils, Steel Utensils	Rice, Aluminum Utensils, Steel Utensils
7	Gausganj, CT	Milk Product, Leather Goods, Carpet	Milk Products, Carpet, Food grains
8	Sikandra, NP	Shoes, Milk, --	--, --, --

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for a leather goods and food grains, which are town's main exports. The chief export items of the district are leather goods and milk products, which are manufactured in Jhinjhak (NP), Gausganj (CT) and Rura (NP) and these are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities, House listing Operations, Census of India 2001 based on inset tables 48 to 52:

Data on houses and household amenities have traditionally been undertaken a few months before each census. Based upon data collected in the house list, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared. In 1991 census, the house list was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/ motorcycle/ moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 262,253 consisting of 245,525 rural and 16,728 urban households. 73,630 households belong to Scheduled Castes and 1,808 to Scheduled Tribes. 254,542 households are living in their owned houses constituting 97.1 per cent of total households. Of these households, the largest number of households (77,191) have occupied double-roomed accommodation and is followed by single roomed accommodation numbering to 74,710.households. Next position is claimed by households (52,327) occupying three plus roomed accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 44,681 households while 5,633 households are without any exclusive room.

5,181 households living in rented accommodation account for 2.0 per cent of total number of households in the district. The largest number of 2,519 households are living in single roomed accommodation followed by 1554 households in double-roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 2530 forming only 1.0 per cent of total households are distributed in single roomed accommodation numbering 1,128, 622 double roomed and 310 in three roomed accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Sl. No.	District/Tahsil	Total			Rural			Urban		
		Perma-nent	Semi-perma-nent	Tempo-rary	Perma-nent	Semi-perm-anent	Tempo-rary	Perma-nent	Semi-perma-nent	Tempo-rary
1	2	3	4	5	6	7	8	9	10	11
1	Rasulabad	22.0	26.7	51.3	22.0	26.7	51.3	0.0	0.0	0.0
2	Derapur	35.3	26.3	38.4	31.3	27.6	41.1	81.9	11.4	6.7
3	Akbarpur	31.6	31.8	36.6	28.7	32.8	38.5	65.0	20.2	14.8

5	Sikandra	32.7	35.1	32.2	31.8	35.5	32.6	54.5	23.4	22.1
	District Total:	**32.9**	**30.3**	**36.8**	**30.4**	**31.3**	**38.4**	**69.7**	**16.8**	**13.5**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.
Note:-Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.
Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.
Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that 32.9 per cent of the households in the district had permanent houses. The trend is different in rural (30.4 per cent) and urban area (69.7 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Bhognipur (42.0 per cent) followed by Derapur (35.3.per cent), Sikandara (32.7 per cent) and lowest in Rasulabad (22.0 per cent). In respect of semi-permanent houses, the returns were 30.3 per cent of district level, whereas among tahsils, in Sikandara it was highest 35.1 per cent and lowest was 26.3 per cent in tahsil Derapur. Rural areas represented a similar ratio at district and tahsil level, but semi permanent houses in the urban areas were in the proportion range of 11.4 to 23.4 per cent. Temporary houses in the district lie between the range of 27.2 to 51.3 per cent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.
*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.
Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

The above table shows that out of total households of the district 67.0 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 65.5 and 88.6 per cent. Tahsil Derapur had higher order of proportion of households where percentage for rural area was 74.2 per cent and 95.4 per cent in urban areas. Electricity was available for 14.9 per cent of households at district level. Bathrooms and toilet facilities were available in 26.7 and 19.7 per cent of households. Rasulabad tahsil served lowest in respect of these amenities. Similarly, drainage facility was less in Bhognipur tahsil. At district level drainage facility was available for 69.8 per cent of households, whereas the proportion of rural and urban areas households accounted to 68.5 and 89.1 per cent.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 45.7 per cent of households in the district use firewood as fuel for cooking, the proportion in the rural area is 44.9 and in urban area it comes to 57.3 per cent of households. Crop residue has been reported as one of the fuel for cooking of food is 27.5 per cent of the households. The composition of rural and urban comes to 28.9 per cent and 6.8 per cent respectively. Cow dung cake is used for cooking in as 22.4 per cent of the households (23.5 per cent rural and to 2.63 per cent urban households). The other methods like L.P.G. (cooking gas), electricity, coal, lignite, charcoal and biogas etc., ranges between 0.1 per cent to 3.5 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas), where predominant fuel is firewood. The table shows that firewood, crop residue and cow dung cake are the predominant fuel for cooking in the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

This table presents data for total rural and urban areas at district/tahsil level about households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the house holds. There are 262253 households in the district and among them, 92328 households have been availing banking services, 91178 households have radio/transistor. 42764 households possess television. Telephone is available 6514 households. bicycle is a means of transportation and is available in 174563 households. Scooter/Motor cycle./Moped and Car/Jeep/Van are used 15158 and 3877 households respectively. the picture in use of banking services and possession of assets by the house holds at tahsil level is almost similar as analyzed for the district as a whole.

(xi) Major Social and Cultural Events, Natural and Administration Development and Significant activities during the decade:-

The major event recorded during the decade was administrative development entire Bilhaur and Ghatampur tahsils along with town were transferred to Kanpur Nagar district. Also 91 villages from Derapur and 120 villages and 1 town from Bhoganipur tahsils were transferred to Sikandara tahsil.

(xii) Places of Historical, Archeological and Tourist Interest

In tahsil Derapur, there are many places, which are worth seeing. Banipur Maharaj is chiefly noted for its ancient temple of Baneshwar Mahadeo. A fair is held here for 15 days on the occasion of Shivratri where people throng from nearby places. It falls in the Jhinjhak Development Block. A cattle fair is also held here on Dvitiya shukla paksh in the month of Jyeshtha (May-June). Town Derapur is known for its fine masonry tank called the Sahas-Kund and the remains of a fort built by Govind Rao Pandit, the Governer of the province during the Maratha administration from 1756 to 1762.

Similarly in tahsil Akbarpur, Gajner town is known for a mausoleum of Ghazi Shah and a Ghazi Peer fair is held on the first Sunday of the month of Jyeshtha which is attended by many

people. The Akbarpur town is known for its Masjid-Vadi and two fine masonry tanks, one of which is said to have been build one by Sital Shukla and the other by Chhabba.

The Musa nagar town in tahsil Bhognipur is famous for an ancient temple of Mukta Devi, which is said to have been build in 'Treta-Yug' by Raja Bali. In the days of Marathas, it was resorted and several additions were made by Gangadhar, who was the family priest of the Peshwas. A fair is held at the temple on the occasion of Kartik Poornima.

(xiii) Major Characteristics and Contribution of the District:

No significant contribution has come to light and similarly on the part of characteristics.

Nothing particular noticed. The district was part of Kanpur Nagar and the same are the characteristics and contributions of the district.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 and 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 and 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii)The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY
(SECTION I & II)

Section I – Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively. Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school,	O

Navodaya Vidyalaya, Makhtab,
etc.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)Agricultural Credit Society ACS
(ii)Non-Agricultural Credit Society NCS
(iii)Other Credit Society OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i) Cinema / Video Hall CV
(ii) Sports Club SP
(iii) Stadium / Auditorium ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i) Bus BS
(ii) Railway Station RS
(iii) Navigable Waterway NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i) Paved Road PR
(ii) Mud road MR
(iii) Foot path FP
(iv) Navigable River NR
(v) Navigable Canal NC
(vi) Navigable waterways other than River, Canal NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i) Electricity for domestic use ED
(ii) Electricity for agricultural use EAG
(iii) Electricity for other purposes EO
(iv) Electricity for all purposesEA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i) News Paper N
(ii) Magazine M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i) Government Canal GC
(ii) Private Canal PC
(iii) Well (without electricity) W

(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT
LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code Number	Merged in Town and Outgrowth
1	2	3	4

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.

SECTION II
TOWN DIRECTORY

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India level. It is presented according to 2001 Census Population of the town as follows :

Population	**Class**
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary / Intermediate / Senior Secondary / PUC / Junior College level, Secondary / Matriculation, Middle Schools / Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door-to-door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce the entire House listing as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at

the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices, which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalized to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series ‘Special Tables for Scheduled Castes/Scheduled Tribes’.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Kanpur Dehat
q1	Persons	99	67
	Males	98	61
	Females	104	73
q2	Persons	117	85
	Males	117	80
	Females	118	90
q5	Persons	134	111
	Males	135	93
	Females	132	132

(*Undivided Uttar Pradesh at 1991 Census)
Source:
(i) Estimates of fertility indicators Uttar Pradesh Table # 2.23.
(ii) District Profile Uttar Pradesh 1991.

The child mortality by ages 1, 2 and 5 years was lower in the district as against the State. The child mortality indicators in the district for females were in the improved condition as compared to the State by ages 1, 2 and 5 years.

Annexure III
Various Measures of Fertility and Mean Age at Marriage - 1991

Sl. No.	Fertility Measures	Uttar Pradesh	Kanpur Dehat
1	2	3	4
1	CBR	37.2	38.9
2	TFR	5.6	6.2
3	TMFR	6.3	7.1
4	GFR	172	187
5	GMFR	200	223
6	Mean age at marriage (1981-91)	17.3	17.5
7	Number of children ever born per ever married woman aged 45-49 years	4.6	4.6
8	Child woman ratio 0-4	631	630
	5-9	752	763

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 38.9 per thousand in the district. It is higher to the state of Uttar Pradesh i.e. of 37.2 per thousand. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower proportion from the state figures. The conclusion that may be drawn is higher fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3 years for the state whereas 17.5 years has been observed for the district. It may be observed that higher age at marriage leads to higher rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever married women in the age group 45-49. The state and the district figures are placed as 4.6 and 4.9 per thousand respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated 630 and 763 for the district while in case of the state the corresponding figures are 631 and 752.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 95.9 in 1991, while in 2001 it was 93.0 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent

in 2001. The district level figure was 3.7 percent and 6.7 percent respectively. This shows in-migration from other states to this district was approximately in 2001 in comparison to 1991. At district level in-migration from other countries was 0.4 percent in 1991 and 0.3 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 94.8 percent and 87.5 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 5.0 percent and 12.3 percent respectively. The movement of population from other countries in the district was 0.3 percent in 1991 and 0.2 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 93.0 percent in 1991 and 90.2 percent in 2001, while Muslim were 6.9 percent in 1991 and 9.3 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 56.4 percent male and 47.6 percent female to 58.6 percent male and 49.3 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 3.0 percent male and 5.2 percent female while it was 3.3 percent male and 4.5 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Annexure - VII

Age, Sex and Education in the state/district 1991 census.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 48.8 percent male and 71.4 percent female in 1991 which declined to 37.0 percent male and 55.4 percent female in 2001. Primary level education was 12.2 percent male and 9.5 percent female in 1991, which was 16.3 percent male and 15.5 percent female in 2001. Middle level education was 13.7 percent male and 6.5 percent female in 1991 and 19.1 percent male and 12.1 percent female in 2001. Matriculation and above level of education was achieved by 15.6 percent male and 5.1 percent female in 1991 which was 22.2 percent male and 9.7 percent female in

2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 94.0 percent person in 1991 and 98.8 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 5.9 percent and 1.1 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
