MOTIF

'LEATHER FACTORY'

Kanpur city is basically known as an industrial city since long. The concentration of industrial establishments in the state of U.P. had been synonymous unit to the Kanpur Nagar. Among the industrial activities, the leather industry attains important status, where mostly weaker sections of the sociely have got jobs. The leather processing centres are located in Jajmau where, more than 354 'tanneries' are in operation. The raw leather is processed here and out of that the next stage of processing is of sole harness and industrial leather is produced which is a distinction of the city. Shoes, sandals, chappals, shoe-uppers and other leather items make the city famous. Of the total exports of the city, more than 90% is from this sector. The saddlers item is produced only at Kanpur in the country and the value of the export is 207 crore per annum. Besides these, the other renowned units are also there which manufacture and export other leather items. Taking into account the process of leather manufacturing the leather is dyed as per choice The high level quality is required by the prospective buyers. Kanpur Nagar was once also Known as Manchester of the least due to many textile mills established here and items like belts, suitcases, bags, winter jerseys and trousers etc. are manufactured.

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi, Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

ANALYTICAL NOTE

Analytical Note

.(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publications has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, Official Statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained Administrative Statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provide, keeping in view, the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were nine-fold industrial classification of main workers and sex-wise population in the 0-6 age group. Yet other information at the 1991 census was CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP, no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data along with inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census, the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" now seems to be a misnomer.

(ii) Brief History of the district :

Kanpur is said to be the corruption of Kanhaiyapur or Kanhpur which was an unimportant village till its first contact with British. According to a local tradition, name of Kanhpur owes its origin to Hindu Singh a raja of Sachendi who came here about 1750 AD to bathe in the holy river Ganga and established village which possibly was named Kanhpur and with the passage of time, it changed to Kanpur. Kanpur Nagar district was carved out from Kanpur district on 9th June 1976 and remaining part of the district was named Kanpur Dehat. Again on 12.7.1977, it was merged into the same district, Then after on 23rd April 1981, district was further divided into Kanpur Nagar and Kanpur Dehat. On 15th August 1989 Kanpur was made divisional headquarters in which six districts of Allahabad divisions, i.e,. Kanpur Nagar, Kanpur Dehat, Etawah, Auraiya, Farrukhabad and Kannauj were included.

Area that constitutes present district of Kanpur Nagar seems to have imprints of one of the earliest existence of human culture going as far as back to stone age as described archaeological finds in

Moosanagar on the left bank of Yamuna. Traces of further stages of culture are revealed from bronze arrows, spear head of copper, fragments of stone images, terra cotta objects, bricks, pottery pieces etc.

In sixth century B.C, it was a part of Panchala Kingdom at Ahichetra the sway of which extended from the foot of Himalaya in the north -east to Chambal river in south- west. During the medieval period, it was part of Kannauj empire till its conquest in 1193 A.D. by Shahabuddin Ghauri at the battle of "Chandawar" and its territory passed to the Muslim rule of sultan of Delhi, Sharqui dynasty of Jaunpur, the Mughals with an interruption of rule of Sher Shah Suri of Afghanistan. The death of Aurangzeb in 1707 triggered off the process of disintegration of Mughal empire and in its wake, many battles were fought between Mughals, Marathas and Nawabs of Avadh for its control with the territory going finally to Nawab of Avadh. It remained with them till 1801 when it was made over to the Britishers. The Muslims of 1857 in Kanpur went into full conflagration when Nana Saheb, son of Peshwa Baji Rao II struck against Britishers and took control. Kanpur rose to prominence after comming into contact with Britishers. Strategically placed, it was made an important military station and was strongly garrisoned. In late 19th century ,it developed into an industrial centre with large concentration of textile industry leading nick named as Manchester of east.

(iii) Administrative Setup

The district has three tahsils leading to Kanpur Nagar, Bilhaur and Ghatampur and ten C.D. Blocks ie. Kalyanpur, Bidhunu, Sarsol, Bilhaur, Shivrajpur, Chaubepur, Kakwan, Ghatampur, Patara and Bhitargaon. Besides it has one Nagar Nigam, two Nagar Panchayats- Bithoor and Shivrajpur, two Nagarpalika parishads-Bilhaur and Ghatampur, one Cantonment Board and four census towns, In Kanpur Nagar ,besides collectorate and commissionarete, there are all district and divisional level offices.

Jurisdictional Changes (1991-2001)

A new tahsil Bighapur was created between 1991-2000 bifurcating tahsil Purwa, 313 villages and two town were transferred from purwa tahsil to new tahsil Bighapur, however, outer limits of administrative units are as before.

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F and R). At tahsil level, Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildar in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildar and Kanoongos. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level, eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. Each have a department at district level office, from development point of view, the district is divided into community development block. Block Development Officers (BDO) look after development work at community development block levels, Assistant Development Officer and Village Development Officers at village level.

Under the police set-up, Senior Superintendent of Police in big district and Superintendent of Police in small districts are incharge. Additional Superintendent of Police (ASP) look after their respective areas. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judges, Civil Judges, Chief Judicial Magistrates and Munsif Magistrates etc.

The nucleus of the district body for self government consists of Mayor and Nagar Ayukta in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad, and Nagar Panchayats. Chairman Jila Panchayat and Gram Pradhan in gram Panchayats and Pramukh of Kshetra Samiti etc. come under Local self government.

(iv) Physical features

1. Location and Size:-

Kanpur Nagar belongs to the track known as lower doab of Ganga and Yamuna. It is situated on the bank of river Ganga. It lies between the parallels of 25°26' and 26°58' north latitude and 79°31' and 80°34' east longitudes. In the north of the districdt is Unnao where as in east lies Fatehpur and Kanpur Dehat district is in south -west. North boundary is fixed by Ganga river. Total area of the district is 3,155 sq.kms as per revenue records which is 1.23

per cent of the whole U.P. and ranks 39th in respect of area in the state.

Physiography :

District Kanpur Nagar is a part of middle Ganga plain-west which covers the area of 1,065 sq.km. The course of the Ganga lies in wide and sandy bed and changes occasionally. Apart from sand, a belt is formed by new deposits of Alluvium. Alluvium deposits are mostly above flood level known as 'Kachhar'. High cliffs along the Ganga bears many ravines. Pandu and the Rind are the other rivers which flow in the district. Geologically the district belongs to Alluvium, Dun gravels of recent. On the basis of geology, soils, topography, climate and natural vegetation, the district has been divided into following three sub micro regions:-

1. Ganga Khadar
2. Kanpur Plain
3. Rind Plain

Ganga Khadar :

The region is situated along the Ganga river in a narrow strip. It is delimited by the extent of flood water of Ganga river. The region covers 56 villages having an area of 131.48 sq.km.

Kanpur Plain :

The region is situated in the central part parallel to the Ganga Khadar region. The catchment water zone of the Ganga river is bifurcated by this region. The Pandu and its tributaries drain in this region. Railway and Canals etc. are well developed in this region. It is rich in agriculture as well in industry. Kanpur is the largest urban centre of the state which is industrially most developed centre of the state. A large number of industries are located in and around the Kanpur City.

Rind Plain :

It is situated parallel to Kanpur Plain region and slopes from north -west to south -east. The Rind river drains in the region. The main physical feature is eroded surface which is spread over along river course of Rind. The Geology belongs to Alluvium, Dun gravels (Recent).

Drainage :

The two chief rivers of district are Ganga and the Yamuna. The Isan and the Non are tributaries of the Ganga and the Rind is the chief tributary of Yamuna . The next important river is Pandu.

Ganga :

The Ganga enters the village of Chita Mau and flows along the north- east boundary of the district for its entire length and also skirts the Bilhaur and Kanpur tahsil. It has a wide and sandy bed, changing its channel almost every year as its sand banks are formed and washed away. In the rains the Ganga is of immense breadth but during the cold weather it shrinks to much small dimension. The river leaves the district at village Purwa Mir in Kanpur tahsil.

Isam :

The Isan a tributary of the Ganga has its origin in south -east of Aligarh and enters the district in the extreme north.. The other tributary of the Ganga is the Non (not to be confounded with the river of same name in south of district). The name obviously refers to the brackish nature of its water. This area is full of large, shallow swamps, from which the over flows makes its way southwards to form the Non though river does not assume a definite channel till it enters Shoerajpur. It joins the Ganga in South of Bithur.

Pandu :

This is third tributary of Ganga but does not join that river till it exits from the district, the function taking place in Fatehpur some 5 km beyond the Kanpur border. The Pandu rises in the Farrukhabad and enters this district near the village Naila. During its course the river receives a considerable amount of drainage being fed by small tributaries such as the Nai laukha Bhoni and Paghaiya.

Rind :

The two tributaries of Yamuna are the Rind and the Sengar. The first one is the Rind (or Arind as it is sometimes called) a stream which probably possessed a reputation of sanctity in bygone days. The Rind like Isan has its source in Aligarh district and passing through Kanpur enters the Fatehpur district where it falls into Yamuna.

Yamuna :

It separates the district from Jalaun in south, and flows about a distance of 58 km. in length from Kanpur district.

The lakes :

The district has a large number of small depressions in which surface water collects to form shallow Jhils. The important one being found in northern Ghatampur and in parts of Kanpur tahsils.

Climate :

There is a meteorological observatory in the district. The climate of the district is characterized by a hot summer and general dryness except in monsoon season. The period from March to about the middle June is summer season which is followed by monsoon season till about the end of September, October and first half of November is transition period. The cold season spreads from about the middle of November to February.

During the year 1996-97 and 1997-1998 the highest temperature of the district was recorded 44.2°C each. The minimum temperature during that year was 7°C. Annual average rainfall in the district is 783 mm.

Humidity : During the monsoon season, the humidity generally exceeds 70 per cent, but after that it decreases. The driest part of the year is the summer season when in the afternoon the humidity is less than 30 per cent.

Winds :

Winds are Generally light with some strengthening in force during the summer and early monsoon season. In the non monsoon months winds blow mostly from direction between south-west and north-west and north westorly predominating in the afternoon. From May winds from directions between north-east and south-east begin to blow and in south west monsoon season they are either from directions between south-east and north-east or between south-west and north-west.

5. Natural Economic Resources

Forestry :

Total geographical area of forest in district is 16.4 per cent of the total area. The district once bountiful in vegetation is now devoid of its preveous richness. Only patches of Dhak, Babul, Siras and Termind (Imli) makes for flora in the district. Neem and Sisham tree also occur. Among the important wild animals, found in the area, are wolves, wild big nilgai, chikaras, black bull, hyaena, fox and jackals that are frequently seen in the area.

Minerals and Mining :

No important minerals are found in the district. Some of the minerals of local commercial value found in the district are Kankar and Maurang etc.

Soil :

The soil is soft vis-a-vis sandy. Between Pandu and Rind the land is alike to that found in north part of previous tract.

Land and Land Use Pattern :

Total Geographical area of district is 299,435 hectares of which 25,384 hectares is urban area which is 8.47 per cent of total area.

193,152 hectare area is used in agricultural purposes which is 64.50 per cent of total area of the district. In urban area only 6,647 hectares are used for agricultural purposes, which is 26.99 per cent of total cultivated land, 9,933 hectares area is covered under water, 199 hectare area is used as graveyards, 10,331 hectare is full of "Reh", 12,116 hectare area is not suitable for agriculture due to some other reasons. 1,571 hectare is covered by timbers, 265 hectare belongs to forest in Gram Sabha 3,440 hectare area is under forest division, 215 hectare area belongs to private forest, 1,066 hectare to other trees and bushes, 3,598 hectare area to permanent grazing land.

Agriculture and Crop Pattern :

The agriculture sector in the district does not show the over bearing prominence. As it enjoys in the other districts of the state. Kanpur City aptly described as industrial capital, has brought about tremendous expansions of non agricultural activities. The dominance of agriculture sector is only marginal over non -agriculture sector. Yet the role of agriculture can not be underplayed as the economy of the rural side of the district depends on it.

There are three crop seasons namely Kharif, Rabi and Zaid. During the year 1998-99 total harvested area was 293,299 hectares, out of which 175,516 hectares in Rabi, 110,800 hectares in Kharif and 6,983 hectares in Zaid were harvested. Two or more times harvested area was 99,565 hectares.

The main crops of Kharif are paddy maize, urd, sugar cane and arhar. Main crop of Rabi is wheat and its area was 101,920 hectares which is 53.34 per cent of total Rabi crops area. During the year 1998-99 oil seeds was the main crop of Zaid and its area was 1,869 hectares.

There are 33 seed godowns in the district whose storage capacity is 5,900 metric tones. There are 36 cold storages in the district whose storage capacity is 285,754 metric tones. There are 2 ware-houses of Food corporation of India with storage capacity of 211,288 metric tons, one warehouse belongs to state with a capacity of 40,648 metric tones, and 15 State Government godowns with 19,742 metric tones storage capacity are functional.

Irrigation :

Total irrigated are of the district was 131,758 hectares out of which 55,856 hectares was irrigated by canals, 6469 hectares by government tube-wells, 68,196 hectares by private tube-wells and 1,237 hectares by other sources during the year 2000-2001. During 1999-2000, out of total irrigated area, total cultivated area was 94.86 per cent, during 98-99 and 97-98 this percentage was 77.5 and 76 .0 respectively, percentage of gross cultivated area to gross irrigated area is 70.5 per cent. This percentage during 97-98 and 98,97 was 70.8 and 70.1 respectively. In this way actual rise in irrigated area was nominal. Reasons for this nominal rise was due to shortage of water in canals, mechanical and electrical faults in tube-wells and lack of supply of electric. Length of

total canals in the district is 822 Kms., whereas govt. tube-wells are 289, private tube-wells are 8,895 and number of boring pump sets are 26,742.

In Kanpur Nagar district, Ganga, Pandu, None and Rind rivers are flowing but there is no flood problems.

Animal Husbandry :

Agriculture and live stocks are closely related to each other. As per Samajarthic Samiksha (1999-2000) in 1997 there were 771,026 live stocks in the district, of these 501,551 buffaloes, 155,576 goats, 13,375 sheep and 40,475 pigs were reported. The quality of live stock is poor. The government have made efforts to improve the quality of livestock in the district through a network of artificial insemination centres, veterinary hospital and dispensaries. There are one semen collection centre, and one mobile veterinary dispensary, five D class veterinary service centres, 12 artificial insemination centre, 82 artificial insemination sub centres, one poultry development centre, one central laboratory and one gaushala in the district.

In Kanpur Nagar, major portion of population reside in Mahanagar. In order to meet the supply of pure and pasteurized milk, Kanpur milk product cooperative federation is functional. The capacity of plant of dairy is one lakh liter per day. In the city, milk federation is providing Parag milk, ghee, butter and paneer etc to people by setting booths at different places. In this way by these booths, on average basis 75.67 thousand liters milk is being provided daily. This milk cooperative federation, with the help of 276 milk cooperative societies is providing pasteurized milk in poly pack by purchasing milk under operation flood scheme. Besides Government poultry farm, 71 private poultry farm are also operational in this district which supply chicken and eggs.

Fishery :

Fishery department provides alternative enterpreneur to the people to supplement income, also provides food with protein to the people. During the year 2000-2001, more than twelve lakh fingerlings were distributed, which is 1.25 times of last year. 90 persons were leased 49.682 hectare area of ponds among the Mallah Community. Till now, 311 ponds were leased out whose area was 182.118 hectare.

Industry :

Kanpur comes on the top of the industrial map of Uttar Pradesh and occupies a place of importance among the industrial cities of the county. It has grown up into a textile town. Tannery and leather good industries follow next in strengthening the industrial structure of the town. The infrastructure available in the district, attracted a large variety of industry, large as well as small scale, making the city boom with industrial activities. The city grew phenomenally during the first half of the present century. The British India corporation group and J.K. group of industries were on the forefront of industrial development of the district. A good variety of industries, tannery and leather good industries and industries related to plastic goods, chemical, medicines, fertilizers, food and food products edible oil, motor and automobile workshop are spread in different parts of the district. Some of the important factories in Public Sector are British India Corporation tannery and footwear corporation, H.A.L, Artificial limb manufacturing corporation, Indian field and Gun factory, Ganesh Flour Mills & Lohia Machines Ltd. are large scale industries under government and private sectors.

There are 1613 factories registered under Factory Registration Act 1948 in the district out of which only 760 are functional and which engage 586606 daily labour and employees.

Industrial Institute :

Presently there are five industrial institute in the district.

1. State Industrial Institute Kalpi Road, Kanpur.
2. Shekshit Berozgar Industrial Institute Panki, Kanpur.
3. Uptron Industrial Institute Panki, Kanpur.
4. Cooperative Industrial Institute, Dadanagar, Kanpur.
5. Panki Industrial Area Side No. 1,2,3 and 4.

Presently in Panki Industrial area, plots and shades are available which are allotted by U.P.S.I.D.C. on marginal rate.

Trade and commerce :

After independence there has been a considerable development in the construction of new roads and bridges especially during 'The Five Year Plan' periods. Trucks and other transport facilities which are available in the district play an important role in the transportation of goods. The pattern of trade is similar to that found in other districts of the state. Industrial good and agricultural products are the main items of export while general merchandise and consumer goods such as salt, medicines, utensils etc form the imports. The agriculture produce is collected at different trade centres from where it is exported to the other places. The industrial output being exported directly from the industrial units.

In district, cotton and woolen cloth, jute, chemical, plastic ,steel, fertilizers and engineering

goods are manufactured and exported. Among main handicraft, embroidery, weaving carpets, baskets, musical instruments, jewelry and leather goods are also exported. On average the agricultural products, like pulses, Paddy, Gur, Mustard and linseed are imported from various places in the country.

Transport :

Communication arteries that connect various parts of the district with other district of the state and important places of the country make Kanpur one of the well served district by communication facilities in the state. During the year 2000-2001, the total length of road accounts for 3,446 km. in the district. Main district road is 75 km. and 1,852 km. is under local bodies, 99 km. are of national highways and 1,273 kms. of state highways.

Kanpur city is an important junction. Tracks from three railway divisions, northern, central and north-eastern railway make their ways through the district. Total length of railway tract being 1,331 kms. of broad gauge and 200 kms. that of metre gauge move along with the entire length of national highways number 2 i.e. Sher Shah Suri Marg. The electrified track under northern railways connect Kanpur with Calcutta and Delhi, whereas Bombay is linked through tracks under central railways and north eastern railways connecting Agra and Mathura on the west. Lucknow and Gorakhpur has been brought under broad gauge only recently and metregauge tracks have been abolished. Kanpur city is also served by inland air services. There is a navigable route on Gonda upto Howrah on the eastern side.

Electricity and Power :

Electric transmission of the district is being done through Panki Thermal Power house. During the year 1998-99 total consumption of the power was 2,078,919 kwh, in which the consumption in Domestic Light and Small Electric Power was 610,622 kwh., Commercial light and Small Electric Power 206,054 kwh, Industrial Electric Power 842,422 kwh, Public Light Arrangement 20,390 kwh, Rail/ Traction 222,531 kwh, Agriculture Electric Power 136,243 kwh, Civic Water used Drainage 40,657 kwh.

Thermal power is generated in Panki Power Station not only to meet the needs of district but that of state also. Up to the year 98-99 out of total 909 villages of district, 687 villages were electrified and 595 Harijan settlement were also electrified.

Gram Panchayat, its composition, jurisdiction and role in villages development

A Gram Panchayat acts as the executive of the Gram Sabha and plays a vital role in village development. There are 555 gram sabhas in the district. Gram Pradhan is elected from almost villages for a period of five years.

The members of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villages.

The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

In order to be elected to a village panchayat, a candidate should posses the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions :

A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It look the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a center.
5. It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other

6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area of the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal case and imposes fine upto Rs. 100

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence etc.

Usually a structure has four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which

are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc. and the household also stays in it, then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household, then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut, if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and

are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:
   i) a minimum population of 5,000;
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban', all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and

Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya	2 Badi
3 Baiga	4 Balahar
5 Bajaniya	6 Baiswar
7 Balmiki	8 Bajgi
9 Banmanus	10 Balai
11 Barwar	12 Bangali
13 Bawariya	14 Bansphor
15 Beriya	16 Basor
17 Bhuiya	18 Beldar
19 Boria	20 Bhantu
21 Badhik	22 Bhuyiar
23 Baheliya	24 Chero
25 Chamar, Dhusia, Jhusia, Jatawa	26 Dharkar
27 Dabgar	28 Dom
29 Dhanuk	30 Dusadh
31 Dhobi	32 Domar
33 Dhangar	34 Gharami
35 Gond	36 Gual

37 Ghasiya	38 Habura
39 Hari	40 Hela
41 Kanjar	42 Korwa
43 Karwal	44 Kalabaz
45 Kharwar (excluding Banbasi)	46 Kapariya
47 Kol	48 Khairaha
49 Khorot	50 Khatik
51 Kori	52 Lalbegi
53 Majhwar	54 Mazhabi
55 Musahar	56 Nat
57 Parahiya	58 Pankha
59 Patari	60 Pasi, Tarmali
61 Rawat	62 Shilpkar
63 Sansiya	64 Saharya
65 Sanaurhiya	66 Turaiha

Scheduled Tribes

1 Bhotia	2 Buksa
3 Jaunsari	4 Raji
5 Tharu	

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in

exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain etc. in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected

the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed off locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1.000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels

indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{1{,}000} \times \frac{1{,}000}{\text{Number of live births during the year}}$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{1{,}000} \times \frac{1{,}000}{\text{Number of live births and still births during the year}}$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy

and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parent's/relative's house is in a place different from usual place of residence, the place where the hospital or parent's / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town. UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / Towns. These Class I UAs. /Towns are now further sub classified into seven sub classes namely, M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with 50,000 to 99,999 population are classified as Class II towns; 20,000 to 49,999 population are Class III towns; population with 10,000-19,999 are Class IV towns; population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are, in any respect, unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population.Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution:

The total population of the district is 4,167,999 in which 1,370,488 live in rural and rest 2,797,511 in urban areas. There are three tahsils in district namely Bilhaur ,Kanpur ,Ghatampur, which are sans urban population. The most populous tahsil is Kanpur followed by Ghatampur Bilhaur is least populated tahsil. The urban population in the district is 67.1 per cent. The urban population is maximum at 85.4 per cent in Kanpur tahsil. There are 1,003 revenue villages in which 94 are un-inhabited. The total rural population of 1,370,488 is spread over in 10 CD blocks. The most populous CD Block is Ghatampur with a population of 186,134 but the maximum number of inhabited villages (120) are in Shivrajpur CD Blocks. About half of populated villages have a population in the size of 500-999 and 1,000-1,999 and such villages form as high as 58.6 per cent of total populated villages. Highest proportion (46.4) of villages are with a population density range of 501 per sq km. Such villages contain as much as 55.5 per cent of total rural population.

Size-class and status of towns:

In the total urban population of 2,551,337. live in Kanpur Nagar Nigam. the next big town is Kanpur Cantt Board with a population of 100,796. The above two are class I and II town having the civic status of Nagar Nigam and Cantt Board. Rest of. eight towns are Nagar Palika Parishad (NPP) Nagar Panchayat (N.P.) and C.T. Out of which three towns are class III, two towns are class IV and three are class V towns. Kanpur tahsil contains six. towns, Bilhaur tahsil has three towns, while Ghatampur tahsil has only one town.

Population growth:

At the present territorial jurisdiction the population of the district was 3,253,572 at 1991 Census and growing by 28.1 per cent during the decade 1991-2001, it is 4,167,999 at 2001 Census. The decadal growth at 28.1 per cent in the district has been at near equal level than in the state at 25.8 per cents.

Population Density:

The district has area of 3,155 square kilometers. The population density in the district is 1,321. In the rural areas it is 484, while 8,578 is in urban areas.

Sex-Ratio:

The sex-ratio in the district at 855 is lower than state sex-ratio of 898. Indeed the sex-ratio at the district has been all along lower in the district as against to the state since 1901. As against to urban areas of the district the sex-ratio is higher in rural areas. Among tahsils, highest sex-ratio is in Ghatampur and lowest in Bilhaur. Among CD Block the sex-ratio is highest in Bhitargaon at 868 and lowest in Kakwan at 837. Out of 909 inhabited villages in the district there are 36.3 per cent villages (with 44.3 per cent of rural population) which are having a sex-ratio between 850-899 In the urban parts of the district the sex-ratio is 854 and highest of 882 is in Ghatampur NPP and lowest of 780 in northern Railway Colony CT. The sex-ratio of population on the age-group 0-

6 is 869 in the district which is higher than the district sex -ratio as a whole. As against a sex-ratio of 891 in the age-group 0-6 of rural population of the district, it is highest at 908. in Sarsol CD Block and lowest at 864 in Kakwan C.D. Block. It may be noted that out of 909 inhabited villages in the district in over15.1 per cent of villages with 22.2 per cent of rural population the sex-ratio in the age-group 0-6 is between 900-949 As against the 0-6 age-group,'sex-ratio of 891 is in the rural area of the district and only 854. in urban areas Among towns this sex-ratio is highest at 898 in Chaubeypur Kalan CT and lowest at 700 in Chakeri CT.

Work Participation Rate:

In the total population of the district of 4,167,999 as much as 29.9 per cent are workers and rest of 70.1 per cent are non-worker. Among worker 25.0 per cent are main workers and rest of 5.0 per cent are marginal workers of total population. In absolute terms females outnumber males as main worker and marginal workers as well. The extant of main workers is highest at 25.3 per cent in Kanpur tahsil and lowest at 23.0 per cent in Bilhaur tahsil. In case of marginal workers the participation is highest in Ghatam pur tahsil as 11.1 per cent in compersion to only 7.4 per cent in Bilhaur and 3.6 per cent in Kanpur tahsil. The extent of workers in rural aparts and non-workers in urban parts is higher. In the district among workers, 17.9 per cent are cultivators and 65.8 per cent other workers. Total 23.5 per cent of female workers are engaged as cultivator.

Literacy:

In the district 74.4 per cent population is literate. The literacy is 78.4 per cent in urban areas and 65.7 per cent in rural areas. The males literacy is as highest 80.3. per cent as against 67.5 per cent females literacy, and therefore the gap in male/female literacy rate is 12.8 percentage point. In rural areas among ten CD Blocks, the highest literacy is at 69.3 per cent Chaubeypur and lowest at 63.8 per cent in Ghatampur. The literacy among males in rural areas is 75.2 per cent in comparison to 54.5 per cent among females. The lowest female literacy of 50.8 per cent is in Ghatmpur CD Block. The gap in male/female literacy rate is highest in Ghatampur CD Block which is 24.0. percentage points. In 45.2 per cent of villages covering 54.1 per cent of rural population the literacy range is 61 to 70. Among urbanites in the district, as much as 82.6 per cent males are literates as against 73.4 per cent females. The highest urban literacy is in Chakeri CT 95.5 per cent and lowest in Bilhaur NPP at 63.9. per cent. The maximum males literacy is also found in Chakeri CT at 97.9 per cent and lowest at 68.5 per cent in Bilhaur NPP. However, the highest females literacy is in Chakeri CT at 92.7 per cent and lowest at 58.9 per cent in Bilhaur NPP. Still, the maximum gap in male-female literacy rate at 18.7 percentage points is found in Bithoor NP. The literacy among Scheduled Castes population in the countryside is 55.2 per cent and 64.0 per cent in towns. At the district total Scheduled Tribes population is 2,051 (462 in rural and 1,589 in urban) in which 37.1 per cent in rural areas and 41.7 per cent in urban areas are literates.

(viii) Brief Analysis of Primary Census Abstract Data based on inset Tables 1 to 36 :

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural labourers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

The growth rate of district for total, rural and urban area and percentage of urban population to total population is given in table. The decadal growth rate of the district is 28.1per cent during 1991-2001. The growth rates for rural and urban areas of the district are 17.3 and 34.2 per cent respectively . Out of the total population of the district 32.9 per cent lives in rural areas while 67.1per cent lives in urban areas of the district. The proportion of urban population was slightly high during the decade from 64.1 per cent in 1991 to 67.1per cent in 2001 in the district. The highest perentage of urban population is recorded in Kanpur tahsil (85.4 per cent) and lowest is registered in Ghatampur tahsil (6.9 per cent).

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 909 inhabited villages, 42 (4.6 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 133 villages having 14.6 per cent villages of the district while in the size class of 500-999 population claims 257 villages with 28.3 per cent of the total villages in the district. 275.villages (30.3 per cent) are in the size class of 1,000-1,999,another 169 villages (18.6 per cent) are in the size class of 2,000-4,999and 29 villages (3.2 per cent) are in the ranges of 5,000 -9,999 population. There are only 4 villages (0.4 per cent) which fall in the population range of 10,000 and above.

Above table shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 422 accounting for 46.4 per cent of the total inhabited villages of the district fall in the very high density range of more than 501 persons per sq. Km. having 55.5 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 211villages (23.2 per cent) and 2 villages (0.2 per cent) respectively. Corresponding proportion in the range of 201- 500 is 26.2 per cent of the total inhabited villages having 21.6 per cent population of the district. In the medium densities ranges of 21 to 50 and 51-100 persons accounting for 0.3 and 1.4 per cent of inhabited villages respectively. Both these ranges claim 0.3 per cent rural population.

Note- SexRatio has been defined here as the number of females per 1000 males

As per 2001 Census sex-ratio of 855 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly low as compared to the state average figures from 1901 to 2001 and always remained below the state average. The lowest sex ratio of 770 females per 1,000 males was recorded in the district during 1,951 against the state average of 908 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in both district and the state.

Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 855 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is higher than that of urban areas but at the tahsil level there is a mixed trend.The sex-ratio among rural and urban population is 857 and 854 females respectively. The rural sex-ratio in the tahsils varies between 853 in Bilhaur tahsil and 861 females in Ghatampur tahsil. The sex-ratio in Ghatampur tahsil is higher than district average (855). In urban areas the highest sex-ratio is recorded in Ghatampur (882) and the lowest is in Kanpur tahsil, 853 females per 1,000 males.

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 330 accounting for 36.3 per cent of the total villages having maximum population of 44.3 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849 which claims 254 villages (27.9 per cent) and 33.0 per cent population. The highest range of 1,100 and above claims only 3 villages (0.3 per cent). while in the sex-ratio range of 900-949, there are 127 villages (14.0 per cent) accounting for 11.4 per cent population. In remaining sex-ratio ranges of 1,000-1,099, 950-999, 750-799, 700-749 and less than 700, the number of villages are 9 (1.0 per cent), 44 (4.8 per cent), 98 (10.8 per cent), 24 (2.6 per cent) and 20 (2.2 per cent) respectively. In these ranges, the percentage of population is comparatively low.

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas

in respect of each tahsil of the district. Total population in age-group 0-6 is 591,301 persons comprising 316,438 males and 274,863 females. The total sex-ratio in this age-group works out 869 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 891 and 854 females in this age-group respectively. The rural sex-ratio in tahsil varies between 878 in Bilhaur tahsil and 898 in Ghatampur tahsil. The sex-ratio of Ghatampur tahsil is higher than district average (891). whereas it is lower in Kanpur and Bilhaur tahsils. The sex ratio of total rural population is 857 as against 891 in the age group 0-6 of the rural population. This position of sex-ratio in urban area in this age group (854) is equal to the sex ratio observed for total urban (854) population in the district.

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 137 (15.1 per cent) having maximum population (22.2 per cent) in the district (rural) fall in the sex-ratio range of 900-949 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 850-899 which

claims 134 villages (14.7 per cent) and 20.7 per cent population. Next to it, 123 villages (13.5 per cent) are in the range of 1,000-1,0999 with 10.9 per cent population. 114 villages (12.5 per cent) having 14.1 per cent population fall in sex-ratio range of 800-849. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, 950-999, and 1100 and above claim less number of villages and these are distributed as 79 (8.7 per cent), 60 (6.6 per cent), 87 (9.6 per cent), 77 (8.5 per cent) and 98(10.8per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty percent of villages i.e. 462 having population (65.7 per cent) fall in the sex-ratio ranges of 800 to 999.

total population of the district, 16.5 per cent of the total population belongs to the Scheduled Castes and negligible per cent of Scheduled Tribes. The percentage of Scheduled Castes population constitutes 27.0 per cent in rural population and 11.3 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Ghatampur tahsil (26.3) while the lowest is found in Kanpur tahsil (13.5). The proportion of Scheduled Tribes population is negligible in rural and 0.1 per cent in urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in tahsil Kanpur and Ghatampur. Tahsil Bilhaur registered none of Scheduled Tribes population.

The proportion of Scheduled Castes population is less than 5per cent in 41 villages (4.5 per cent). In 67 villages,

(7.4 percent) it varies between 5-10.per cent while the next range of 11-20 per cent accounts for 185 villages constituting 20.4 per cent of the total villages. The range 21-30.and 31-40.per cent contains 222 and 166 villages respectively. Both these ranges together account for 42.7per cent villages of the district. 178 villages fall in the range of 41-50 and above per cent. Out of these, 21 villages are such where the proportion of Scheduled Castes is more than 76 per cent. These villages contain 2.3 per cent Scheduled Castes population of the district. The maximum of 32.7 per cent Scheduled Castes population is covered under the range of 21-30 per cent.

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population comes to 74.4 per cent in the district. This proportion in rural area is 65.7 per cent against 78.4 per cent in urban areas. In the district the literacy rate of males (80.3 per cent) is much higher than that of females (67.5 per cent). Among the tahsils, Kanpur tahsil tops with 76.7 per cent literates followed by Bilhaur tahsil (67.6 per cent). Ghatampur tahsil with 65.2 per cent literates stands at the bottam in the district. Out of 3 tahsils, the literacy rates of.tahsil Kanpur is higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is high ,which comes to12.8 per cent in the district, as a whole. The trend at tahsil level is not much different. However this gap in urban literacy is low which comes to 9.2 percentage points against the rural areas, where the gap between male and female literacy is 20.7 percentage points.

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily other than agricultural activities as supported by the fact that other workers constitute 65.8 per cent followed by cultivators that constitute 17.9 per cent of total workers (main+marginal) and remaining 12.4 per centage are engaged as agricultural labourers and 3.9 per cent as house hold industry workers.

The distribution of workers by four categories of economic activity in tahsil Kanpur shows very high dependency of population on other work absorbing large number of workers(81.97). In other tahsils the proportion of other workers is19.8 per cent in Ghatampur tahsil and 28.6 per cent in Bilhaur tahsil

The proportion of cultivators varies between 8.2 per cent in Kanpur tahsil and 48.1 per cent in Bilhaur tahsil. The percentage of female cultivators is 23.5 per cent which is high as compared to 16.9 per cent of male cultivators in the district The percentage of agricultural labourers and household industry workers is also low in the district as stated above.

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main marginal) are 34.4 per cent of total population. Amongst these workers, cultivators constitute 45.1per cent, 31.1.per cent agricultural labourers, 3.9 per cent household industry workers and 19.9 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 3.9 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (37.6 per cent) is lower than males (47.4 per cent) in the rural areas of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 30.2 per cent in Kalyanpur C.D. block to 67.8. per cent in Kakwan C.D. block. Similarly for other workers, the lowest proportion is 8.8 per cent in Kakwan C.D. block while 35.0 per cent is the highest in Kalyanpur C.D. block. The percentage of agricultural labourers is highest (39.1 per cent) in Patara CD Block and lowest (19.6 per cent) in Kakwan CD block. Household industry workers in quite low i.e. 3.9 per cent in the district and varies between 2.3 per cent in Ghatampur CD Block and 5.3 per cent in Vidhunu CD block.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. Total workers (main+marginal) are 27.7 per cent of total population. Amongst these workers, cultivators constitute 1.3 per cent, 1.1 per cent agriculture labourers, 3.9 per cent household industry workers and 93.7 per cent other workers.

Other workers play a major role in accelerating the urban economy. Cultivators, agricultural labourers, household industry workers could not make much progress in urban areas as reflected in the data. Among other workers, the percentage of male (94.5 per cent) is higher than females (86.4 per cent) in the urban areas of the district. The males play a major role in the urban economy of the district. The percentage of other workers is highest in Chakeri CT (98.9 per cent) whereas lowest in Bithoor (NP) (67.1 percent) the percentage of cultivators and agricultural laboures together is quite low (2.4 per cent).The percentage of cultivators is highest in Bithoor NP 17.7 is followed by Shivrajpur NP (10.1), Bilhaur (NPP) (9.3). Similarly the agricultural labourers varies between 0.1 per cent in Northern Railway coloney (CT), 16.6 per cent in Shivrajpur (NP).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47 :

One of the major parts of the District Census Handbook are Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in towns and villages. From this non-census data, inset tables have been generated and reproduced below showing major trends in the availability of above amenities:

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.
However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like educational, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 909 inhabited villages in the district 789 villages or 86.8 per cent have been provided with the educational facilities of one type or the other. Similarly 419 villages in the district constituting 46.1 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 891or 98.0 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 172 villages constituting 18.9 per cent of villages have been provided with post office facility within the village, 311or 34.2 per cent villages have been provided with the telephone facility, 101 or 11.1 per cent with transport facility, 52or 5.7per cent villages with bank facility and 82or 9.0 per cent with agricultural credit societies. Similarly there are 685 or 75.4 per cent villages which have been linked with the pucca road. Total 633 or 69.6 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Bhitargaon C.D. block has the highest 97.3 per cent villages where educational facility is available and lowest 74.5 per cent is found in Chaubepur. Medical facility is highest in Patara (77.9 per cent) and lowest (28.6 per cent) in Bhitargaon C.D. block. Improved drinking water is available to cent-percent villages in Bilhaur, Patara and Ghatampur. blocks while in other blocks, it is above 94 per cent. Telephone facility is highest in sarsol (58.4 per cent) while only 3 villages of Kakwan C.D. block enjoy this facility. Transport and communications is less developed in Patara where only 1.5 per cent villages are covered by this facility whereas 29.2 per cent villages of Kalyanpur C.D. block are availing this facility.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001 based on tables 48 to 52:

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. have been added in the schedule for the first time. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied:

*Based on the improved drinking water source, water supply has been classified as 'Improved' or otherwise. If the household has access to drinking wter supplied from a tap or a hand pump/tube well situated within or outside the premises, it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is given in brackets after the number of households. Bathroom means bathroom within the house.Toilet means toilet within the house Drainage menas closed and open drainage.

The above table shows that out of total households of the district 83.7 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 67.8 and 92.5 per cent. Tahsil Kanpur had highest order of proportion of households (89.9 per cent), where percentage for rural area was 74.7 and 92.8.per cent in urban areas. Electricity was available for 63.8 per cent of households at district level. Households of the district had better access of electricity. Bathrooms and toilet facilities were available in 54.6. and 59.8 per cent of households. Tahsil Bilhaur poorly served in respect of these amenities. At district level drainage facility was available for 84.6.per cent of households, whereas the proportion of rural and urban areas households accounted to 68.4 and 93.7.per cent

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 26.4 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is 49.9 and in urban area it comes to 13.2 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in 40.5 per cent of the households. The composition of rural and urban comes to 3.4 and 61.2 per cent respectively. Kerosene is used for cooking in as many as 9.0 per cent of the households (0.3 per cent rural and 13.9 per cent urban households). The other methods like crop residue, cow dung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.2 per cent to 10.7 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, LPG (cooking gas) cow dung cake and kerosene are the predominant fuel for cooking in the district.

(xi) Major social and cultural Events, Natural and Administrative Development and significant activities during the decade :

Indian Tourism Research and Promotion Centre have been established in the district. This centre is very important for this district and its function is to protect the different decaying places of historical and cultural importance of the district on the map of Indian tourism. In November 1992, successful organization of Bithur Ganga festival is the first step in this direction.

(xii) Brief Description of Places of Religious, Historical, Archaeological Importance in villages and places of Tourist Interest in the towns of the District:

Brief desciption of place of religious, historical or archaeological and tourist interest are as follows:

Behta Buzurg :

Behta Buzurg village of tahsil Ghatampur, situated at a distance of 15 km. from Ghatampur

and 40 km. from Kanpur Nagar. It is famous for the ancient temple of Jagaurath which is said to be two thousand years old. A fair is also held on Bhadra (August – September) in the Krishna Paksha.

Bhitarigaon (Tahsil Ghatampur) :

The village of Bhitarigaon is situated at a distance of 14 Km. from Ghatampur and 59 km. from Kanpur Nagar. It is connected by road with tahsil and district headquarters. Bhitarigaon is chiefly noted for its ancient brick temple which is unique specimen of brick architecture of early Gupta period

Belhaur :

Bilhaur the headquarters of the tahsil of the same name is situated on the Grand Trunk road 51 km. north-west of Kanpur Nagar, the district headquarters. It is connected with the district headquarters by road as well as by rail (the North-Eastern Railway). The place is said to have been founded by one Billaur Khan a Sepah Salar of Mughal times but the date of its foundation is not known. Bilhaur has been administered by Municipal Board and is headquarters of development block of the same name which started functioning from April 1963.

Bithur (Tahsil Kanpur) :

The ancient town of Bithur is situated on the bank of Ganga in the extreme northern angle of tahsil at a distance of 23 km. from Kanpur Nagar on the Kanpur – Bithur road. It is connected by road and rail with the tahsil and district headquarters and has a railway station of North Eastern Railway.

Bithur is a place of great antiquity. Legend has it that, it was here that Brahma celebrated the completion of creation by a horse sacrifice. The spot is known as Brahmaji Ki Khunti in the Brahmavati Ghat on the river bank where it is supposed to have been a nail of his horse, shoe said to have been embedded in one of the steps of landing place is still the object of devout worship.

Bithur remained the headquarters of the district from 1811 to 1819. In 1819 the British government assigned it as residence to Baji Rao, the deposed Peshwa. Bithur is administered as a Nagar Panchayat Parishad.

A fair is also held on the, occasion of Kartika Purnima and about 20,000 people gather here to have a bath in the Ganga Bithur falls in Kalyanpur development block.

Jajmau (tahsil Kanpur) :

It is very old place. It is mentioned by Alberuni a small mosque bearing persian inscription lies here. Most interesting building is the shrine of famous saint Makhdum Shah Ala-Ulhaq and temple of Sideshwari.

The city of Kanpur Nagar also affords few sites of attraction. These include Phool Bagh, Kamala Tower & Retreat, Laxmi Narain temple and Allen forest and Zoo Complex.

(xiii) Major Characteristics and contribution of district :

The persons of the district who emerged prominently on political scene were Gopi Nath Singh, member of AICC from 1931 and a member of Parliament for 1952-1960, Narain Prasad Arora and Murali Lal Rohtagi (Chairman of reception committee) at the Kanpur session of congress in 1925.

On the August 15, 1972 on the occassion of silver jubliee celebration of the independence of the country, 1398 persons of the district were awarded Tamra-Patra (Copper Plate) recognizing the services rendered by them or their for bears in the fight for the Indian freedom.

(xiv) Scope of Village Directory and Town Directory

Village Directory :

The village directory, as the title connotes, presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rationale of giving 2001 location codes along with 1991 location codes is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufactured	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been adopted:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration, are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement, a note is given against such towns that there are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999 and trade, commerce, industry and banking activities in year 1999. In this way, population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, Manufactured cinemas etc. and number of banks as well as commodities and exports are enumerated vividly in various statements relating to the town directories of the districts.

The Village Directory is the compilation of basic information pertaining to a particular village. The format of the Directory has been revised from time to time but it has been continued to remain as the traditional source of village level basic data. It contains a list of villages with Location Code Numbers, Population, amenities, namely, Educational and Medical facilities, availability of Drinking Water, Post, Telegraph and Telephone facilities, Commercial and Co-operative Banks, Agricultural and Non-agricultural and other Credit Societies, Recreational and Cultural facilities, Communication, Approach Roads to village, Power Supply and Newspaper/ Magazine etc.. The name of villages of each Rural Development Block of the District has been arranged alphabetically and location codes number of the Census of India 2001 and corresponding code number of 1991 Census have been given for each village for easy reference.

Generally a 'village' is taken as a statutorily recognised unit of an area having definite and recognised boundaries and separate land records. Thus in Census, the basic unit of rural areas is taken as a revenue village which has definite surveyed boundaries. A revenue village may comprise of several hamlets but the entire village is treated as one Unit for presentation of data. In Mizoram, however, the concept of village is different from what has been mentioned above since there is no surveyed village in the state. Therefore an inhabited area with locally recognised boundaries and having a name of its own is treated as a village. The un-inhabited villages i.e., the villages where no population was found during Census Operations have also been included in the list of villages and C.D. Blockwise in the Village Directory.

Although there is no Panchayat Institution in the

District, the villages have Village Councils which are democratically elected local bodies. In addition to the information as to the availability or otherwise of the basic amenities as mentioned in the preceding paragraphs, following nine appendices have also been included :

1. Appendix I — Abstract of Educational, Medical and other amenities in villages - C.D. Block level.
2. Appendix II — Villages with 5,000 and above population which do not have one or more amenities.
3. Appendix III — Land Utilization Data in respect of Census Towns/Non-Municipal Towns.
4. Appendix IV — C.D. Block-wise list of inhabited villages where no amenities other than drinking water facility are available.
5. Appendix V — Summary showing number of villages not having Scheduled Castes population.
6. Appendix VI — Summary showing number of villages not having Scheduled Tribes population.
7. Appendix VII — List of villages according to the proportion of the Scheduled Castes and the Scheduled Tribes to the total population by ranges.
8. Appendix VIII — Number of villages under each Gram Panchayat (C.D. Block wise)
9. Appendix IX — Statement showing number of girls schools in the villages.

Since a large number of abbreviations had to be used due to space problems, a detailed and explanatory note on each of these abbreviations has also been incorporated for easy clarification of the subject concerned.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first Census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after

the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important feature of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also.

In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, then portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which in north –central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000.The population of the UP state was 139 million at the 1991 Census, which accounted for 16 per cent of India's total population. It grew by 25 per cent between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Kanpur Nagar
Q1	Persons	99	99
	Males	98	94
	Females	104	110
Q2	Persons	117	106
	Males	117	99
	Females	118	123
Q5	Persons	134	128
	Males	135	121
	Females	132	152

(*Undivided Uttar Pradesh at 1991 Census)

The child mortality by ages 1, 2 and 5 years was lower in the district as against the State, The child mortality indicators in the district for females were in the improved condition as compared to the State by ages 1, 2 and 5 years

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl.No.	Fertility Measures	Person/Male/Female	Uttar Pradesh	Kanpur Nagar
1	2	3	4	5
1	CBR		37.21	29.28
2	TFR		5.6	3.94
3	TMFR		6.3	5.65
4	GFR		172	123
5	GMFR		200	164
6	Mean age at marriage (1981-91)		17.27	18.39
7	Number of children ever born per ever married woman aged 15-49 years		4.59	4
8	Child woman ratio 0-4		631	435
	5-9		752	604

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population is 28.28 per cent in the district. it is below to the state of Uttar Pradesh i.e. of 37.21 per cent. in respect of Total Fertility Rate (TFR),Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower proportion from the state figures. The conclusion that may be drawn is lower fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.27 years for the state where as 18.39 years has been observed for the district. It may be observed that higher age at marriage leads to low rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever married women in the age group 15-49. The state and the district figures are placed as 4.59 and 4.00 per cent respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 435 and 604 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that fertility levels as such are below to the state average. Another important factors i.e. the probability of dying between birth and at age 1,2 and 5 has been of lower order in the district in case of persons, males and females in the state.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 83.4 in 1991, while in 2001 it was 87.6 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 13.8 percent and 10.9 percent respectively. This shows in-migration from other states to this district was marginally decreased in 2001 in comparison to 1991. At district level in-migration from other countries was 2.8 percent in 1991 and 1.5 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 80.8 percent and 83.4 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 18.1 percent and 16.0 percent respectively. The movement of population from other countries in the district was 1.1 percent in 1991 and 0.6 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 79.5 percent in 1991 and 82.7 percent in 2001, while Muslim were 17.8 percent in 1991 and 15.7 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 55.8 percent male and 49.8 percent female to 57.3 percent male and 49.3 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.3 percent male and 4.9 percent female while it was 2.2 percent male and 3.5 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure-VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 34.2 percent male and 50.6 percent female in 1991 which declined to 31.0 percent male and 42.2 percent female in 2001. Primary level education was 11.1 percent male and 10.8 percent female in 1991, which was 14.6 percent male and 14.7 percent female in 2001. Middle level education was 12.9 percent male and 9.6 percent female in 1991 and 15.9 percent male and 12.5 percent female in 2001. Matriculation and above level of education was achieved by 30.0 percent male and 18.4 percent female in 1991 which was 33.8 percent male and 75.3 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note : For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02%. The remaining tongues have been merged in the column of "Total of Other Mother Tongues."

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 85.9 percent person in 1991 and 89.8 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 11.9 percent and 9.0 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
