MOTIF

MAHARISHI VED VYAS MANDIR

Situated on the bank of Jamuna, Kalpi is the biggest and the oldest town of the district Jalaun. It finds mention in Mahabharatha that the place known as 'Vyas Teela' is referred as the birth place of Maharishi Ved Vyas the writer of the epic Mahabhartha and 18 'Puranas'. The Lord Sun's temple by tradition is told, that it was built by Samanta, son of Lord Krishna. The place is referred in the earlier history, when a Chinese pilgrim Huen-Saung had travelled through this place. Kalpi fort attains the status of main fort during the year, contemporary forts during the late 12th century it was attacked by Shahb-u-ddin and later on Emperor Akbar came here and the place was ruled by Kuleen and Abdul Raheem Khan. Subsequently, Prithviraj Chauhan and the Marathas dominated the area.

Annexure VII	Age, Sex and Education in the district, 1991 Census	577
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	580

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical

notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard. I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image,Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook:

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The CD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District:

It is said that the present name of the district is derived form Rishi Jalwan, who lived here in ancient times, but some local people ascribe its name to Jalim, (a Sanadhya Brahmin) believed to have been the founder of its first settlement.

District Jalaun is surrounded by three rivers, Yamuna, Betwa and Pahuj. The land being an undulated plain has always been suitable for human inhabitation. As such, the people had been living here since a very ancient time. Kalpi, at the bank of river Yamuna, happened to be the biggest and most ancient township of the district. The earliest known traditional ruler of this region was Yayati, who are mentioned in the Purana and Mahabharat as a Samrat (emperor) and a great conqueror who extended his kingdom far and wide. The earliest known Aryan people associated with this region were the Chedis. This region rose into great prominence during the period of Mahabharat, which describes the Chedis along with the Kurus. Panchals and Matsayas. The ancient history of the district is closely associated with the history of entire Bundelkhand region. It is a history of ascendancy and dethronement of many rulers. The territory was ruled over by Harsh Vardhan and found mention in the report of Chinese traveler Hiuen Tsang. After Harsh, in a quick succession it passed on to a Buddhist Brahmin then to the rulers of Kannauj and then to Nagabhatta the ambitious ruler of Gurjar Pratihar in Rajputana, from whom it descended to his grandson Mihira who is better known as Raja Bhoj. Afterwards Chandel rulers of Kalinjar annexed the area and it remained under their rule for few hundred years and Kalpi was one of the main forts of these rulers till Prithviraj brought it under his rule as a consequence of the battle with Raja Parmar.

From the beginning of the 13th century the district through its most important place Kalpi, became intimately associated with Muslims. The Muslim hold over Bundelkhand including the present district, however, remained nominal even after its occupation in 1202. As Shahabuddin was the first ruler to invade the territory in late twelfth century. From whom it was annexed by the founder of Bundela regime. Thereafter, Pathans and Mughal rulers dominated the scene. Among Pathans the Lodi dynasty remained connected. In 1583 AD emperor Akbar visited Kalpi, where he was the guest of its Jagirdar Abdul Matlub Khan. Quli Khan and Abdur Rahim Khan-Khana governed this place during Mughal period. The Marathas dominated the scene for more than a hundred years. During first struggle for freedom in 1857, fierce armed conflict was held between British forces and freedom fighters led by Nana Sahib of Bithoor, Rani Laxmi Bai of Jhansi and Tatyan Tope. These events happened at Orai, Kalpi, Jalaun, Konch and places like Kachchwahagarh. The twentieth century began with the heralding of a new name of nationalism in the

whole of India and Jalaun also did not remain unaffected. The congress, which had already become the mouthpiece of people's aspiration at the national level was becoming increasingly popular in this district and a branch of it was founded in this district. The people of this district participated in all the national level movements to oust the British government, including Civil Disobedience and Quit India Movement.

(iii) Administrative Setup:

The district Jalaun (headquarters at Orai) forms the most northern portion of the trans Yamuna tract of the country known as Bundelkhand region comprising of five districts of Uttar Pradesh. There are five tahsils in the district viz:- Jalaun, Orai, Kalpi, Konch and Madhogarh. Madhogarh is newly created tahsil during 1991-2001. Two hundred twenty villages of tahsil Jalaun with 3 towns were transferred to tahsil Madhogarh vide notification 5-2-17/82-185-R-5 dated 04.01.1995. Later 36 villages were transferred from tahsil Konch and added to tahsil Madhogarh vide notification no. 3714/1-5/99-143/97-R-5 dated 27.12.1999. There are 10 towns, out of which 4 towns are under Nagar Palika Parishad and 6 towns are Nagar Panchayats.

Jurisdictional Changes (1991-2000):

During the year 1991-2000 the following jurisdictional change has taken place.

S.No.	Name of Tahsil	Notification No.	Jurisdictional Changes	
			Added	Subtracted
1	2	3	4	5
1.	Madhogarh	5-2-17/82-185-R-5 dated 4.01.1995 3714/1-5/99-143/97-R-5 dated 27.12.1999	(i) 220 villages and 3 towns transferred from Jalaun Tahsil (ii) 36 villages transferred from Konch Tahsil	-
2.	Jalaun	3714/1-5/99-143/97-R-5 dated 27.12.1999		220 villages and 3 towns transferred to Madhogarh Tahsil
3.	Konch	3714/1-5/99-143/97-R-5 dated 27.12.1999		36 villages transferred to Madhogarh Tahsil

District Administration:

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub-divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level e. g., Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD etc., each have a department at district level office, departments point of view the district is divided into Community Development Block. Block Development Officers (BDO) looks after development works at Community Developments Block level. Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big district and Superintendent of Police in small districts are in-charge. Additional Superintendent of Police (ASP) and their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge. In addition, there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc., come under Local self-government.

(iv) Physical Features:

(1) Location and Size:

The district is situated between the parallel of 25^0 46 and $26^0$27' north latitude and $78^0$56' and $79^0$52' east longitude and forms a compact tract of territory of rectangular shape. On the west the boundary is

formed by the Pahuj river, beyond the district Bhind of Madhya Pradesh is located. In the north Yamuna divides it from the districts of Etawah and Kanpur Dehat. On the south-west Jalaun adjoins Samthar in the district Jhansi. To the south east Betwa divides it first from Jhansi and then from Hamirpur, the district is stretched from east to west 93 kms and from north to south 68 kms. Total area of the district is 4,565 kms.

(2) Physiography:

On the basis of geology, soil, topography, climate and natural vegetation the district has been divided in the following five regions.

Pahuj Ravines Tract: The region is formed of alluvium and Dun gravels of recent age. The region is situated along Pahuj river in a longitudinal direction and well known for its ravines. Topography is rugged and unsuitable for agricultural activities.

Jalaun Plain: The region is comparatively a flat plain. It is situated in the western part of the district.

Orai Tract: The region lies in south of Jalaun plain in the east-west direction. It is wider in south-west part but narrower towards north-east. The geology of the region consists of Alluvium and Dun gravels of recent age.

Yamuna Ravines Tract: The region extends in a north-west and south-east direction along the Yamuna river covering the northern part of Kalpi and Jalaun tahsils formed of Alluvium and Dun gravels of recent.

Betwa Ravines Tract This region is a narrow strip formed of Alluvium and Dun gravels of recent age along Betwa river covering the southern most part of Konch, Orai and Kalpi tahsils from this region. Compared to Pahuj and Yamuna, the ravines of this tract is less extensive. Its surface is not suitable for agriculture. Most of area along Betwa is covered with reserved forest.

(3) Drainage:

The main rivers of the district are the Yamuna, the Betwa, the Pahuj and several minor streams among which the Non and the Melunga are notable. Yamuna forms the northern boundary of the district. It flows with a gentle curving course in the north, and then it turns towards south continuing to form the district limit. Its total length within the district limit is approximately 83 kms. The Betwa forms the boundary with Jhansi along the southern border. Its course runs towards east, and tends somewhat to the northeast and it meanders along the south-east side of the district sparing it from Hamirpur. The Pahuj river enters Jalaun in the south-western corner of tahsil Konch. This forms the western boundary.

(4) Climate:

The tropic of the Capricorn being very near the climate is drier as compared to the districts on the north of river Yamuna. The year may be divided into four seasons. The cold, from the middle of November to February and is followed by the hot season lasting till about the middle of June. The summer season sets in early and last for a longer period. The period which follows lasting till about the third week of September constitutes the south-west monsoon season and is succeeded by the period which may be termed post monsoon or transition season lasting till the middle of November.

After February the temperature begins to increase rapidly, May and early part of June is the hottest parts of the year, the average temperature is 27^0 Celsius. It reduces to a minimum of 3^0 to 4^0C in January and reaches to a maximum of 47^0C in the hottest period of May and June. The rainfall is less than the other areas of the State. The average rainfall of the district was 1,029 mms.

(5) Natural and Economic Resources

Forestry:

There are no forest belt in the district, but small patches of forest are found here and there, especially along the rivers of the district, namely the Yamuna, the Betwa and the Pahuja. The total area of forests in the district is 25,701 hectares, which is about 5 per cent of total area. Babul is the only plant which is found abundantly in the district. Mango and Mahua trees are found sparsely. In tahsil Jalaun bamboo trees are found abundantly. Babul and Catechu have some commercial use, while its wood is used as fuel. There is no industrial production of forest products. Under the Social Forestry Scheme trees are being planted. Farmers are keen in planting Eucalyptus trees. During 1999-2000 plantation of 25 lakh saplings were targeted under Extensive Aforestation Scheme. Against this target 25.04 lakh saplings were planted by different government departments. Forest department is trying to create awareness among people about environment, thus plantation of trees are being taken up extensively to check soil erosion and ravine reclamation.

Minerals and Mining:

No mineral of repute is found in the district, geological formation of the district consists more or less entirely of alluvium, which consists of Kankar, sand, maurang and brick earths.

Soil:

The natural divisions into which the district falls are clearly marked. Along the outer edge, is the ravine belt fringed here and there, by rich alluvial soil, but for most part consisting of low hummocks thickly strewn with Kankar and is too poor for continuous cultivation. The upland which succeeds ravines is poor in quality. It has a light coloured hard soil. After heavy rain when these soil dry up it can not be turned over by

the plough. To the north there is a tract of loam. The whole of the south and centre of the district beyond the upland, excluding the area in tahsil Kalpi affected by the Non and Melunga is occupied by the dark Kankar and the black cotton soil 'Mar'.

Land and Land Use Pattern:

Jalaun like other parts of Bundelkhand region is poor in agriculture and net sown area was only 343,394 hectares during 1996-97. Area under cultivable and that unfit for cultivation was about 4,862 and 12,966 hectares respectively. Present fallow and other fallow land was 23,515 and 7,833 hectares respectively. Orchards covered 2,746 hectares of land. The land use other than agriculture was 35,076 hectares.

Agriculture and Crop Pattern:

Jalaun like other parts of Bundelkhand region is poor in agriculture. The whole district is precarious, owing to its extreme sensitivity to droughts. Apart from this, like other portion of Bundelkhand, it is liable to incursions of 'kans' which frequently throws large areas out of cultivation.

Kharif and Rabi are the main harvests. The Zaid or hot weather crops are insignificant because of the fact that bulk of the soil is unsuited to them. The Rabi is most important. Due to lack of irrigation facilities, double cropped or 'dofasli' area is insignificant.

According to Agriculture Census 1990-91 total number of land holdings in the district was 21·1,764. Of these 62,662 holdings covering an area of 18,025 hectares were of less than one hectare and 44,579 holdings covering an area 31,478 hectares were between 0.5 to 1.00 hectares. Land holdings in the size of 4.00 to 10.00 hectares were 20,602 in number. This leads to a conclusion that although the number of marginal and small holdings is more but these account for a small proportion of land.

The chief Kharif staples are juar, bajra and paddy and that of Rabi, wheat, barley and gram. The pulses include masoor, arhar and urd. During the year 1996-97 maximum area of 97,087 hectares was under wheat, followed by gram (78,843 hectares), peas (73,518 hectares.), Masoor (33,980 hectares) and Til (14,053 hectares). Other crops sown are Juar (18,311 hectares), barley (9,176 hectares) and paddy (1,326 hectares.).

Average production of crops during 1996-97 were paddy (7.18 quintal per hectare) wheat (23.83 quintals per hectare), barley (1, 2.44 quintals per hectare), Juar (9.91 quintal per hectare), bajra (12.58 quintals per hectare), gram (7.17 quintal per hectare) and matar (9.30 quintal per hectare).

Infrastructural facility is available for agriculture in the district is not of high order. During 1997-98 the district had 77 seed godown/fertiliser depots, 80 rural godowns, 11 insecticide depots, one cold storage and 4 agriculture service centres. Warehousing facilities available were limited to 50 godowns having different storage capacity. Among these one godown was under Food Corporation of India, 5 Central Warehousing Corporation, 9 under State Warehousing, 9 under State Government and 26 under cooperative sector.

Irrigation:

The district is well covered with canals, taken out from the river Betwa. The length of canals in the district is 1,916 Kms. irrigating 127,091 hectares. Construction of wells and fitting them with Persian wheels or electric or diesel pumps is an important feature of the minor irrigation. The number of wells and Persian wheels were 2,153 and the number of pump-sets were 1,225. During 1997-98, number of government tube wells were 486, while private tube wells were 1,100 irrigating 12,859 hectares and 10,556 hectares respectively. Pumping sets installed were 10,680 in number. The above irrigation facilities are highly inadequate and major part of cultivable land remains un-irrigated.

Animal Husbandry:

Total livestock of the district constitute 814,846 as per Live Stock Census, 1993. The animals are generally of poor structure and weak too. Bovine populations were 287,073, buffaloes 195.775, sheep 47,858, goats 214,180 and pigs 20,949. The poultry birds numbered 55,224.

To improve the progeny of the animals, the district had the services of 25 veterinary dispensaries, 34 Livestock Development Centres, 25 Artificial Insemination Centres, 2 breeding farms, 4 sheep and wool extension centres and 13 pig development centres.

Fishery:

The district has very good potential for fish development and the government is doing commandable work in this sphere. Fish of usual varieties are found in the rivers and ponds of the district. The main activities of the fisheries department are development of reservoirs for viticulture and supply of fingerlings to private breeders and Gram Samajs. During 1997-98, the number of department's ponds were 113. In the same year 5,170 fingerlings were distributed.

Industry:

Village industries of the district are mainly based on agriculture. Hand made paper industry is an old industry of Kalpi, Carpet industry, weaving of cloth on power looms, leather goods, iron and steel furniture,

wooden furniture making, hosiery and woolen goods, candles making and soap making are some of the industries of the district. Ayurvedic medicines, hair oils and scents are also produced. Some big and medium size industries of vegetable oil, steel, chemical and soap are functioning in the district. Many schemes are being implemented to promote industries under the aeigis of district industries centre. As per latest data of statistical bulletin 1998-99 the number of factories registered under Factory Act 1948, were 34. During 1997-98 number of village and small scale industries were 5,469.

Trade and Commence:

The trade and commerce of the district is mainly based upon its agricultural produce and goods produced by small scale industries. The district is known for its trade in ghee, and oil seeds. The trade, that is carried on in industrial goods is generally of the commodities like, handloom clothes, handmade paper, woolen sweaters, blankets, shoes, bidi and fire works. Kalpi, Konch, Jalaun, Madhogarh, Ait and Kotra are trade centres of the district. The religious fairs of the district held on different occassions have also acquired commercial importance. Brisk trading take place in these fairs.

Transport:

Although being strategically positioned, transport network in the district is very poor. Total length of railway line in the district is 82 kms. with 8 railway stations. Total length of road is 1,330 kms. out of which 1,232 kms. are maintained by PWD. The national highway no. 25 runs parallel to the railway line and connects all the railway stations. Length of national highway is 72 Kms. The state highway no. 211 joins Jalaun town with the district headquarters Orai. The length of State highways in the district is 81 Km. Length of roads per lakh of population during 1998-99 was 113.5 Kms.

Electricity and Power:

During 1997-98 total consumption of electricity was 179,702 thousand Kwh. Agriculture took the lion share with 80,814 thousand Kwh. followed by 55,494 thousand Kwh. by industry and 34,931 thousand Kwh. by domestic light. During 1999-2000, total number of 705 villages out of 942 inhabited villages had been electrified.

Gram Panchayat, its composition, jurisdiction and role in village development

A Gram Panchayat acts as the executive of the Gram Sabha and plays a vital role in village development. There are 564 Gram Sabhas in the district.

Composition

The members /of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 441 Gram Sabhas in the district.

It is necessary that the Village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villages.

Term

The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

In order to be elected to a village panchayat, a candidate should posses the following qualifications:

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty-five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions : A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervises its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a center.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.

6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area of the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal case and imposes fine upto Rs. 100.

(v) Census Concepts

Building:

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses:

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses:

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room:

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant

quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house:

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses. On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

An only case where a structure with roof and pillars has come up was treated as a building.

Village:

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for

presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area:

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.
b) A place satisfying the following three criteria simultaneously:
   i) A minimum population of 5,000;
   ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) A density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City:

Towns with population of 1, 00,000 and above are called cities.

Urban Agglomeration:

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and
(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) A city or town with one or more contiguous outgrowths;
ii) Two or more adjoining towns with their outgrowths; and
iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household:

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household:

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or

households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household:

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe:

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	2	Banmanus
3	Badhik	4	Bansphor
5	Badi	6	Barwar
7	Baheliya	8	Basor
9	Baiga	10	Bawariya
11	Baiswar	12	Beldar
13	Bajaniya	14	Beriya
15	Bajgi	16	Bhantu
17	Balahar	18	Bhuiya
19	Balai	20	Bhuyiar
21	Balmiki	22	Boria
23	Bangali	24	Chamar, Dhusia, Jhusia, Jatawa
25	Chero	26	Dhobi
27	Dabgar	28	Dom
29	Dhangar	30	Domar
31	Dhanuk	32	Dusadh
33	Dharkar	34	Gharami
35	Ghasiya	36	Gual
37	Gond	38	Habura
39	Hari	40	Khatik
41	Hela	42	Khorot
43	Kalabaz	44	Kol
45	Kanjar	46	Kori
47	Kapariya	48	Korwa
49	Karwal	50	Kharwar (excluding Banbasi)
51	Khairaha	52	Lalbegi
53	Majhwar	54	Musahar
55	Mazhabi	56	Nat
57	Pankha	58	Pasi, Tarmali
59	Parahiya	60	Patari

61	Rawat	62	Sansiya
63	Saharya	64	Shilpkar
65	Sanaurhiya	66	Turaiha

Scheduled Tribes

1	Bhotia	2	Buksa
3	Jaunsari	4	Raji
5	Tharu		

Language and Mother tongue:

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate:

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate:

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level:

The highest level of education a person has completed

Work:

Work is defined as participation in any eco-nomically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker:

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker:

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker:

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator:

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing,

vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural laborers:

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural laborers has no right of lease or contract on land on which she/he works.

Household industry worker:

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker:

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate:

Percentage of workers (main + marginal) to total population.

Population density:

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio:

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water:

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage:

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil:

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faucal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of

latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility:

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR):

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR):

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate:

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR):

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a Particular age group}}{\text{Mid-year female Population of the same age group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR):

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a Particular age group}}{\text{Mid-year married female Population of the same age group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR):

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR):

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR):

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{} \quad 1{,}000$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Mid-year population of the same age group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR):

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate:

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate:

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR):

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR):

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year

$$PMR = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Still birth rate (SBR):

$$= \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Maternal mortality rate (MMR):

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1, 00,000 Population)

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration:

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration:

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units:

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town:

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area:

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city:

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population.Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 1,454,452 in which 1,113,926 live in rural and rest 340,526 in urban parts. There are 5 tahsils in the district namely Madhaogarh, Jalaun, Kalpi, Orai and Konch which stands urban population. The most populous tahsil is Orai followed by Kalpi is least populated tahsil. The urban population in the district is 23.4 per cent. The urban population is maximum at 45.4 per cent in Orai tahsil. There 1,151 revenue villages and 214 are un-inhabited. The total rural population of 1,113,926 is spread over nine CD blocks and nil inhabited forest villages. The most populous CD Block is Dakor with a population of 177,169 but the maximum number of inhabited villages (146) are in Nadigaon CD Block. The population density in the rural district is 265.5 highest proportion (22.7 per cent) of villages are with a population density range of 201-300 per square kilometer. Such villages contain as much as 23.0 per cent of total rural population.

Size-class and status of towns:

In the total urban population of 340,526 in which 139,318 live in Orai NPP the next big town is Konch (NPP) with a population of 50,844 and Jalaun (NPP) with a population of 50,057. The above two are class I and II towns having the civic status of Nagar Palika Parishad (NPP). Rest of 7 towns are one (NPP) six Nagar Panchayat (NP) out of which one town is class III, 3 towns are class IV, 3 are class V towns and nil is class VI towns. Madhogarh tahsil contains 3 towns, Kalpi, Orai, and Konch tahsil have two towns each, while Jalaun tahsil has only one town.

Population growth:

At the present territorial jurisdiction the population of the district was 1,219,377 at 1991 Census and growing by 19.3 per cent during the decade 1991-2001 it is 1,454,452 at 2001 Census. The decadal growth at 19.3 per cent in the district has been lower level than in the state at 25.8 per cent.

Population Density:

The district has area of 4,565 square kilometres. The population density in the district is 319 in the rural areas of the district the density is 252.

Sex-Ratio:

The sex-ratio in the district at 849 is lower than 898 at the state level. Indeed the sex-ratio at the district has been all along lower in the district as against to the state since 1901. As against to urban areas of the district the sex-ratio is lower in rural areas. Among tahsils, highest sex-ratio is in Jalaun and lowest in Kalpi. Among CD Block the sex-ratio is highest in Konch at 862 and lowest in Maheva at 827. Out of 937 inhabited villages in the district, there are 2.6 per cent villages (with 0.4 per cent of rural population), which are having a sex-ratio below 700. In the urban parts of the district the sex-ratio is 867 and highest of 882 in Kadaura (NP) and lowest of 838 in Madhogarh (NP) The sex-ratio of population on the age-group 0-6 is 889 in the district which is lower than the state being only at. As against the sex-ratio of 891 in the age-group 0-6 of rural population of the district, it is highest at 910 in Kadaura CD Block and lowest at 864 in Jalaun. CD Block. It may be noted that out of 937 inhabited villages in the district in over 14.8 per cent of

villages with 20.5 per cent of rural population the sex-ratio in the age-group 0-6 is between 850-899. As against the 0-6 age-group sex-ratio of 891 in the rural area of the district is only 885 in urban. Among towns this sex-ratio is highest at 963 in Umri (NP) and lowest at 841 in Madhogarh (NP).

Work Participation Rate:

In the total population of the district of Jalaun as much as 36.0 per cent are workers and rest of 64.0 per cent are non-worker. Among worker 24.5 per cent are main workers and rest of 11.5 per cent are marginal workers of total population. In absolute terms females outnumber males as main workers and marginal workers as well. The extent of main workers is highest at 25.8 per cent in Kalpi tahsil and lowest at 22.7 per cent in Jalaun tahsil. In case of marginal workers the population is highest in Konch tahsil as 13.8 per cent in comparsion to only 8.7 per cent in Orai and 10.7 per cent in Madhogarh tahsil. The extent of workers in rural parts and non-workers in urban parts is higher. In the district among workers 41.8 per cent are cultivators and 21.8 per cent other workers. Over 33.1 per cent of female workers are engaged as cultivators.

Literacy:

In the district 64.5 per cent population is literate. The literacy is 71.8 per cent in urban areas and 62.3 per cent in rural areas. The males literacy is as highest 77.4 per cent as against 49.2 per cent females literacy, and therefore the gap in male/female literacy rate is 28.2 per cent. In rural areas among 9 CD Blocks, the highest literacy is at 70.2 per cent in Jalaun and lowest at 53.8 per cent in Kadaura. The literacy among males in rural areas is 76.4 per cent in comparison to 45.3 per cent among females. The lowest female literacy of 36.9 per cent is in Maheva C.D Block. The gap in male/female literacy rate is highest in Maheva C.D Block which is 36.3 per cent. In 23.9 per cent of villages covering also 42.3 per cent of rural population the literacy range is 51 to 60. Among urbanites in the district, as much as 80.6 per cent males are literates as against 61.6 per cent females. The highest urban literacy is in Orai (NPP) 77.5 per cent and lowest in Nadigaon (NPP) at 61.8 per cent. The maximum males literacy is also found in Orai (NPP) at 85.0 per cent and lowest at 73.9 per cent in Konch (NPP). However, the highest females literacy is in Orai (NPP) at 68.8 per cent and lowest at 46.8 per cent in Nadigaon (NP). Still, the maximum gap in male-female literacy rate at 28.1 per cent is found in Kotra (NP). The literacy among Scheduled Castes is 27.0 per cent, in the countryside it is 56.3 per cent and 64.8 per cent in towns. There is no percentage of literacy for Scheduled Tribes at district level. Only 25 persons out at 140 Scheduled Tribe population are found literate in the district.

(viii) Brief Analysis of Primary Census Abstract Data based on inset Tables 1 to 36:

The district throws up an vivid picture of its population at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted through the following Insat table 1 to 36.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Madhogarh				296,681	267,170	29,511					9.9

5	Konch				265,087	207,069	58,018					21.9
District Total		**1,219,37**	**950,180**	**269,197**	**1,454,452**	**1,113,926**	**340,526**	**19.3**	**17.2**	**26.5**	**22.1**	**23.4**

The growth rates of each tahsil in the Jalaun district for total, rural and urban areas and Percentage of urban population to total population is given in table. The decadal growth rate of the district is 19.3 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 17.2 and 26.5 per cent respectively. Out of the total population of the district 76.6 per cent lives in rural areas while 23.4 per cent lives in urban areas of the district. The proportion of urban population has slightly increased during the decade from 22.1 per cent in 1991 to 23.4 per cent in 2001 in the district.

TABLE 2:NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

cent during 1991-2001. The growth rates for rural and urban areas of the district are 17.2 and 26.5 per cent respectively. Out of the total population of the district 76.6 per cent lives in rural areas while 23.4 per cent lives in urban areas of the district. The proportion of urban population has slightly increased during the decade from 22.1 per cent in 1991 to 23.4 per cent in 2001 in the district.

Table-2 gives CD block-wise population, number and Percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD block level in the district. Out of the 937 inhabited villages, 63 (6.7 per cent) are small size villages with population below 200 persons. In the size of 200 to 499 persons there are 181 villages having 19.3 per cent villages of the district while in the size class of 500-999 population claims 281 villages with 30.0 per cent of the total villages in the district. 272 villages (29.0 per cent) are in the size class of 1,000-1,999 and 127 villages (13.6

per cent) are in the size class of 2,000-4,999. 12 (1.3 per cent) villages in the district fall in the ranges of 5,000-9,999 and 1 village (0.1 per cent) of district fall in size class 10,000 and above population, The biggest village in the district having population of 10,632 persons is located in Dakor CD block of district.

TABLE 3: NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

		Name of town
		1
(a)	New	
	(i) Statutory town	Nil
	(ii) Census town	Nil
(b)	Denotified	
(i)	Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil.
(ii)	Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
(iii)	Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c)	Declassified	Nil
(d)	Wholly merged with other town(s)	Nil

Declassified means the census towns of 1991 census, which failed to satisfy the demographic and economic criteria

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	144	15.4	169,518	15.2
11-20	5	0.5	786	0.1
21-50	18	1.9	8,354	0.7
51-100	37	3.9	16,628	1.5
101-200	155	16.5	132,500	11.9
201-300	213	22.7	255,890	23.0
301-500	197	21.0	259,998	23.3

Not known	0	0.0	0	0.0
District Total	**937**	**100.0**	**1,113,926**	**100.0**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 213 accounting for 22.7 per cent of the total inhabited villages of the district fall in the density range of 201-300 persons having 23.0 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq.km. cover 149 villages (15.9 per cent), 168 villages (17.9 per cent) have very high density with more than 501 and above persons per sq. km. while the corresponding proportion in the lower range of 301 to 500 is 21.0 per cent of the total inhabited villages having 23.3 per cent population of the district. In the medium densities ranges of 21 to 50 and 51-100 persons account for 1.9 and 3.9 per cent of inhabited villages respectively. Both these ranges claim 2.2 per cent rural population.

TABLE 5 SEX RATIO OF STATE AND DISTRICT 1901-2001

Census Year	UTTAR PRADESH			JALAUN		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	937	935	951
1911	916	922	866	931	931	936
1921	908	918	834	901	902	892
1931	903	916	813	908	911	883
1941	907	922	824	904	906	890
1951	908	922	827	908	911	893
1961	907	921	817	886	892	841
1971	876	884	826	857	861	832
1981	882	889	850	837	835	841
1991	876	879	864	829	823	849
2001	898	904	876	849	843	867

Note- Sex Ratio has been defined here as the number of females per 1,000 males

As per 2001 Census sex ratio of 849 females per 1,000 males has been recorded in the district against the state average of 898. The sex ratio of the district was high as compared to the state average figures in 1911 and 1931 and remained above the state average figures during this period. The subsequent decades show declining trend in 1901, 1921, 1941 and 1961 to 2001 and value remained below the state average, while in 1951 equal state average. The lowest sex ratio of 829 females per 1,000 males were recorded in the district during 1991 against the state average of 876 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in state, while in case of district proportion of female in rural areas is higher than that of urban from 1921 to 1971 and in remaining decade proportion of females is higher in urban areas than that of rural areas.

TABLE 6: SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Madhogarh	842	842	846
2	Jalaun	857	852	875
3	Kalpi	837	829	876
4	Orai	855	847	865
5	Konch	856	852	872
District Total		**849**	**843**	**867**

The table-6 gives sex ratio for total, rural and urban areas at tahsil level as per 2001 Census. There are 849 females for every thousand males in Jalaun district. It becomes clear from the table that sex ratio in rural areas is lesser than that of urban areas. The sex ratio among rural and urban population is 843 and 867 females respectively. The rural sex ratio in the rural area of tahsil varies between 829 in Kalpi tahsil and 852 females per 1,000 males in Jalaun , Konch tahsils. The sex ratio in Jalaun, Orai, and Konch is higher than district rural average (843). In urban areas the highest sex ratio is recorded in Kalpi urban (876) and the lowest is in Madhogarh urban (846).

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Rampura	832
2	Kuthaund	857
3	Madhoganj	849
4	Nadigaon	839
5	Jalaun	848
6	Maheva	827
7	Kadaura	831
8	Dakor	847
9	Konch	862
District (Rural) Total		**843**

The table-7 presents CD block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 843 females per 1,000 males, as a whole. Among the CD blocks the highest sex-ratio of 862 females is found in Konch CD block and is fallowed by Kuthaund (857), while the lowest of 827 is recorded in Maheva CD block. The sex-ratios of Kauthaund, Madhoganj, Jalaun, Dakor and Konch CD blocks are higher than the district rural average of 843 females and in remaining C.D blocks, this value is below the district average.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	24	2.6	4,102	0.4
700-749	45	4.8	33,217	3.0

District Total	**937**	**100.0**	**1,113,926**	**100.0**
Sex ratio (Rural) for District		**843**		

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 299 accounting for 31.9 per cent of the total villages having largest population of 39.2 per cent in the district fall in the sex-ratio range of 800-849 females per 1,000 males. It is followed by the sex-ratio range of 850-899 which claims 263 villages (28.1 per cent) and 33.3 per cent population. The highest range of 1,100 and above claims 7 villages (0.7 per cent). This range shares 0.1 per cent rural population of the district while in the sex-ratio range of 1,000-1,099, there are 21 villages (2.2 per cent). In remaining sex-ratio ranges of 950-999,900-949, 750-799, 700-749 and less than 700, the number of villages are 46 (4.9 per cent), 94 (10.0 per cent), 138 (14.7 per cent), 45 (4.8 per cent) and 24 (2.6 per cent) respectively. In these ranges, the Percentage of population is comparatively low. The maximum number of villages i.e 562 having maximum population (72.5 per cent) fall in the sex-ratio ranges of 800-849 and 850-899 females showing that in majority of villages falls in there sex ratio ranges.

TABLE 9: SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Jalaun	(NPP)	875
2	Kadaura	(NP)	882
3	Kalpi	(NPP)	874
4	Konch	(NPP)	875
5	Kotra	(NP)	857
6	Madhogarh	(NP)	838
7	Nadigaon	(NP)	851
8	Orai	(NPP)	865
9	Rampura	(NP)	850
10	Umri	(NP)	850
Sex ratio (Urban) for the district			**867**

Table 9 gives the sex ratio. The sex ratio in urban areas of the district comes to 867 females per 1,000 males as a whole. Among the 10 towns of the district the sex ratio varies between 838 to 882. Kadaura (NP) has the highest sex ratio (882), while Madhogarh NP has the lowest sex ratio of 838 females.

TABLE 10: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group

		Urban	9,268	4,823	4,445	922
	District Total	**Total**	**242,309**	**128,245**	**114,064**	**889**
		Rural	**191,444**	**101,261**	**90,183**	**891**
		Urban	**50,865**	**26,984**	**23,881**	**885**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age-group 0-6 is 242,309 persons comprising 128,245 males and 114,064 females. The total sex-ratio in this age-group works out 889 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 891 and 885 females in this age-group respectively. The rural sex-ratio in tahsil varies between 879 in Jalaun tahsil and 909 in Kalpi tahsil. The sex-ratio of Kalpi, is higher than district rural average (891). Orai tahsil has lowest sex-ratio of 878 females among the total population. In urban areas, the highest sex-ratio is recorded in Konch urban (922) and the lowest is found in Orai urban (866).

TABLE 11: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Serial number	Name of CD block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Rampura	13,817	7,285	6,532	897
2	Kuthaund	20,983	11,031	9,952	902
3	Madhoganj	16,423	8,745	7,678	878

	District (Rural) Total	**191,444**	**101,261**	**90,183**	**891**

Table 11 gives CD block wise sex ratio of rural child population in the age group 0-6 years in the district. The sex ratio is 891 for the district (rural). The sex ratio of CD block varies between 864 to 910. It is highest in Kadaura CD block i.e. 910 followed by 907 in Maheva CD block and lowest 864 females in found in Jalaun CD block. The sex ratio of Rampura, Kuthaund, Maheva and Kadaura CD block are higher than he district rural (891) in remaining block, it is below the district average.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	92	9.8	6,584	3.4
700-749	70	7.5	12,087	6.3
750-799	95	10.1	20,440	10.7
800-849	114	12.2	25,237	13.2
850-899	139	14.8	39,257	20.5
900-949	109	11.6	34,636	18.1
950-999	77	8.2	17,776	9.3
1000-1099	134	14.3	23,744	12.4
1100+	107	11.4	11,683	6.1
District (Rural) Total	**937**	**100.0**	**191,444**	**100.0**
Sex ratio (Rural) for District		**891**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 139 (14.8 per cent) having largest population (20.5 per cent) in the district (rural) fall in the sex-ratio range of 850-899 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 1,000-1,099, which claims 134 villages (14.3 per cent) and 12.4 per cent population. Next to it, 114 villages (12.2 per cent) are in the range of 800-849 with 13.2 per cent population. 109 villages (11.6 per cent) having 18.1 per cent population fall in sex-ratio range of 900-949. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, 950-999 and 1,100 and above claim less number of villages and these are distributed as 92 (9.8 per cent), 70 (7.5 per cent), 95 (10.1 per cent), 77 (8.2. per cent and 107 (11.4 per cent) respectively. In these ranges, the percentage of population is also comparatively low. It becomes clear from the table that more than 33 per cent of villages i.e. 318 having population (27.8 per cent) fall in the higher sex-ratio ranges of 950 to 999 and above.

TABLE 13: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Jalaun	(NPP)	8,306	4,412	3,894	883
2	Kadaura	(NP)	2,130	1,150	980	852
3	Kalpi	(NPP)	6,518	3,411	3,107	911
4	Konch	(NPP)	8,067	4,193	3,874	924
5	Kotra	(NP)	1,359	726	633	872
6	Madhogarh	(NP)	1,543	838	705	841
7	Nadigaon	(NP)	1,201	630	571	906
8	Orai	(NPP)	18,461	9,894	8,567	866
9	Rampura	(NP)	1,829	991	838	846
10	Umri	(NP)	1,451	739	712	963
District(Urban) Total			**50,865**	**26,984**	**23,881**	**885**

Table 13 gives town wise sex ratio of child population in age group 0-6 in the district. The sex ratio for district urban is 885. The sex ratio of towns varies from 841 to 963. Sex ratio is highest in Umri (N.P) town i.e. 963 and lowest in Madhogarh (N.P) town i.e. 841.

TABLE 14: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

		Rural	**1,113,926**	**319,139**	**11**	**28.6**	**0.0**
		Urban	**340,526**	**74,168**	**129**	**21.8**	**0.0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,454,452 total population of the district, 27.0 per cent of the total population belong to the Scheduled Caste and negligible per cent to Scheduled Tribles. The percentage of Scheduled Castes population constitutes 28.6 per cent in rural population and 21.8 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Jalaun tahsil (28.6), while the lowest is found in Kalpi tahsil (24.7). The proportion of Scheduled Tribes population is negligible only available in Jalaun urban of 87 (0.2 per cent) and 53 in Orai tahsil (negligible Percentage)

TABLE 15: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of CD block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

District (Rural) Total		**1,113,926**	**319,139**	**11**	**28.6**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each CD block of the district. 28.6 per cent of rural population of the district belongs to Scheduled Castes and negligible per cent to Scheduled Tribes. At CD block level, Scheduled Castes population varies between 20.5 per cent in Maheva and 32.6 per cent in Jalaun CD block. The other CD block containing the highest percentage of

Scheduled Castes are Konch (31.4), Kadaura (30.2) and Rampura (29.9). Scheduled Tribes population is counted in only Dakor CD block (11 persons).

TABLE 16: PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	80	8.5	0	0.0
Less than 5	44	4.7	1,027	0.3

76 and above	21	2.2	6,716	2.1
District Total	**937**	**100.0**	**319,139**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 80 villages accounting for 8.5 per cent of total 937 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5 per cent in 44 villages (4.7 per cent). In 70 villages. it varies between 5-10 per cent, while the next range of 11-20 per cent accounts for 140 villages constituting 14.9 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 213 and 198 villages respectively. Both these ranges together account for 43.9 per cent villages of the district. 192 villages fall in the range of 41-50 and above per cent. 21 villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 2.1 per cent Scheduled Castes population of the district. The maximum of the 30.4 per cent of the Scheduled Castes population is covered by range of 31-40 per cent.

TABLE 17: PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

District (Urban) Total		**340,526**	**74,168**	**129**	**21.8**	**0.0**

Table 18 shows number and percentage of Scheduled Castes and Scheduled Tribes population recorded during 2001 Census in district Jalaun. The table depicts that Scheduled Caste population in Madhogarh and Orai (NPP) were around 26.0 per cent but low (16.5 per cent) in the Konch (NPP) town. Scheduled Tribe population is negligible in the urban areas of the district. There are no Scheduled Tribes population in 8 towns out of 10 towns. Two towns i.e. Jalaun (NPP). (0.2 per cent) and Orai NPP. (negligible per cent) have very low Scheduled Tribe population.

TABLE 19: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Rampura	818	0
2	Kuthaund	833	0
3	Madhoganj	827	0
4	Nadigaon	829	0
5	Jalaun	830	0
6	Maheva	798	0
7	Kadaura	807	0
8	Dakor	827	833
9	Konch	858	0
	District (Rural) Total	**826**	**833**

Table 19 indicated sex ratio among Scheduled Castes and Scheduled Tribes in each CD blocks of the district. The Scheduled Caste sex ratio is 826 for district (rural). Among the CD blocks the highest sex ratio of 858 females is found in Konch CD block and lowest of 798 females is recorded in Maheva CD block.

Sex ratio of Scheduled Tribes population in district (rural) is 833. The sex ratio of Dakor CD block is 833 as for district rural.

TABLE 20: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Jalaun (NPP)	879	1,023
2	Kadaura (NP)	882	0
3	Kalpi (NPP)	820	0
4	Konch (NPP)	867	0

		Urban	**207,823**	**125,155**	**82,668**	**132,703**	**57,191**	**75,512**	**71.8**	**80.6**	**61.6**	**19.0**

District and tahsil-wise literacy rate besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rate is worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 64.5 per cent in the district. This proportion in rural area is 62.3 per cent against 71.8 per cent in urban areas. In the district the literacy rate of males (77.4 per cent) is much higher than that of females (49.2 per cent). Among the tahsils, Jalaun and Orai tahsils tops with 69.1 per cent literates followed by Konch tahsi (64.8 per cent). Kalpi tahsil with 57.0 per cent literates stands at the bottom in the district. Out of 5 tahsils, the literacy rate of Jalaun, Orai and Konch tahsils is higher than that of district average. It is observed that in urban areas of district the literacy rate are higher than the rural areas except Konch where it is equal to district average.

The gap between male and female literacy is very high which comes to 28.2 per cent in the district, as a whole. The situation at tahsil level is not much different.

TABLE 22: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial Number	Name of CD block	Number of literates and illiterates						Percentage of literates			Gap in Male-female Literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

District (Rural) Total		**574,210**	**384,381**	**189,829**	**539,716**	**219,914**	**319,802**	**62.2**	**76.4**	**45.3**	**31.2**

The table 22 reveals number of literates, illiterates and the literacy rate in rural areas at CD block level in the district. 62.2 per cent of the total rural population excluding the age-group of 0-6 years literates in the district. The corresponding proportion of male and female literates comes to 76.4 and 45.3 per cent respectively, which shows very wide gap of 31.2 per cent in male and female literacy. At CD block level, Jalaun CD block has the highest rural literacy rate of 70.2 per cent, while 83.3 per cent males and 54.6 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Kadaura CD block (53.8 per cent). There are wide variations in male and female literacy in all the CD blocks of the district. The maximum difference of 36.3 points is found in Maheva CD block.

TABLE 23: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	19	0.0
1-10	1	0.1	384	0.0
11-20	4	0.4	2,201	0.2
21-30	9	1.0	4,464	0.4

District Total:	**937**	**100.0**	**1,113,926**	**100.0**
Literacy rate for District		**64.5**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 1 village (0.1 per cent) of the district and population of these villages is only 19 persons. 6 villages (0.6 per cent) have all the literate population. 224 villages accounting for 23.9 per cent of the total villages are in the literacy range of 51-60 per cent and 351 villages (37.5 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 148 villages (15.8 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 213 villages (22.6 per cent). The range of 51-70 have the maximum number of 575 villages forming 61.4 per cent of the total inhabited villages.

TABLE 24: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name and urban Status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

District (Urban) Total		**207,823**	**125,155**	**82,668**	**132,703**	**57,191**	**75,512**	**71.7**	**80.6**	**61.6**	**19.0**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Orai (NPP) town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (71.7 per cent). The literacy rate is high (above 77 per cent in one towns) among males. Female literacy rate is not far behind in this town (above 68 per cent). However, literacy rate among females is very low (46.8 per cent) in Nadigaon (NP) town. The gap in male female literacy rate is high (28.1) in Kotra (NP).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial Number	Name of CD block	Number of literates and illiterates						Percentage of literates			Gap in male /female Literacy rate
		Number of literates			Number of illiterates

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by sex in CD blocks 2001. In rural areas of the district proportion of Scheduled Castes literates is 56.3 per cent in which 72.0 per cent males and 36.9 per cent females. Thus, the gap in male and female literacy rate is 35.1 per cent. Among nine CD blocks, Jalaun (61.6 per cent) CD block has the highest literacy rate and Kadaura (49 per cent) CD block has the lowest literacy rate. The gap in male/female literacy rate in Konch CD block is highest and this gap is lowest in Kadaura CD block.

TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

9	Rampura (NP)	1,177	852	325	1,470	604	866	54.4	71.4	33.5	37.9
10	Umri (NP)	859	591	268	970	386	584	59.0	74.3	40.5	33.8
District	**(Urban) Total:**	**40,420**	**26,291**	**14,129**	**33,748**	**13,782**	**19,966**	**64.8**	**77.7**	**49.6**	**28.1**

The table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 Census. The number of illiterates is less than literates in the district (urban) and towns. The percentage of literates is least in Rampura NP) among 10 towns but the gap in male/female literacy rate is highest in case of Rampura (NP) town. The males in all the 10 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Orai (NPP) and also the female literacy rate is highest.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial Number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in Male/ female Literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Dakor	0	0	0	11	6	5	0	0	0	0
District (Rural) Total		**0**	**0**	**0**	**11**	**6**	**5**	**0**	**0**	**0**	**0**

The table 28 presents out the number and percentage of Scheduled Tribes literates and illiterates by sex in CD block at the 2001 Census. Only 11 males of Scheduled Tribes have been recorded in Dakor CD block in rural area of the district. All are illiterates hence the literacy rate is zero in both the CD block and district rural.

TABLE 29: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	1	100.0	11	100.0
1-10	0	0.0	0	0.0
11-20	0	0.0	0	0.0

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out 36.0 per cent of the total population in the district. The total workers are comprised of 24.5 per cent of main workers and 11.5 per cent of marginal workers and the remaining 64.0 per cent are non-workers.

Among the main workers, males participation rate in the district is 40.4 per cent and 5.8 per cent of females. Male and female marginal workers account for 8.8 and 14.6 per cent respectively. The percentage of females marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 32.7 per cent in Orai tahsil to 39.0 per cent in Konch tahsil.

Table 32 shows CD block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 1,113,926 total rural population of the district, 25.1 per cent has been categorised as main workers and marginal workers constitute 13.7 per cent and remaining 61.3 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 40.9 per cent males and 6.3 per cent females are in the category of main workers. Male and female marginal workers account for 9.7 and 18.4 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is seen at CD block level.

The percentage of total rural workers of the district comes to 38.7 per cent. At the CD block level, Konch has highest proportion of total workers forming 43.2 per cent of the total population. It is closely followed by Maheva (41 per cent), Nadigaon (40.2 per cent), Kadaura (39.8 per cent), Jalaun (38 per cent) and Madhoganj and Dakor both (37.7per cent). The lowest percentage of 33.1 per cent is recorded in Rampura CD block.

Note: Per cent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 41.9 per cent of the total workers (main + marginal) and remaining 58.1 per cent of total workers are engaged as agricultural labourers (32.7per cent), Household industry workers (3.6 per cent) and other workers (21.8 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 30.1 per cent in Orai tahsil and 48.8 per cent in Madhogarh tahsil. .These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 33.1 per cent as compared to 44.9 per cent of male cultivators in the district. The proportion agricultural labourers varies between 25.7 per cent in Orai tahsil and 36.6 per cent in Jalaun tahsil. The Percentage of female agricultural labourers is 52.7 per cent which is very high as compared to 32.7 per cent male agricultural labourers. The percentage of household industry workers is very low in the district as stated above. The workers in other activities occupy the third position the district as well as in each tahsil. The highest proportion of 39.3 per cent of other workers is recorded in Orai tahsil, while the lowest proportion of 12.8 per cent is found in Madhogarh tahsil.

Note: Per cent of Worker to total worker are given in brackets

Table 35 presents CD block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) 38.7 per cent of total population. Among these workers, cultivators constitute 48.9 per cent, 37.8 per cent agricultural labourers, 3.0 per cent household industry workers and 10.3 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 3.0 per cent workers of the total working force. Therefore surplus-working force has to depend on primary activities. Among cultivators, the percentage of females (35.2 per cent) is much lesser than males (54.5 per cent) in the rural areas of the district. The females play significant role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one CD block to other. The proportion of cultivators varies between 43.2 per cent in Jalaun CD block to 63.7 per cent in Maheva CD block. Similarly, for other workers, the lowest proportion is 7.3 per cent in Maheva CD block, while 14.7 per cent is the highest in Dakor CD block. The percentage of household industry workers is quite low i.e. only 3.0 per cent in the district. The percentage of agricultural labourers is highest in Jalaun (42.5) block and is lowest is Maheva (26.3). Similarly, household industry workers varies in CD blocks between 2.3 per cent in Nadigaon and 3.9 per cent in Madhoganj CD block.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district Jalaun It can be observed from the table that the four categories of economic activity are

cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (76.2 per cent), followed by cultivators with 8.8 per cent (9.1 per cent male and 6.6 per cent female). If we observe each town, the table reveals that highest Percentage of cultivators (49.6 per cent) is recorded in Umri NP In the agriculture laboures category with 8.2 per cent (7.0 per cent male and 18.4 females) recorded at district level highest Percentage of agricultural labourer (35.1 per cent) is recorded in Rampura town and lowest 3.4 per cent in Kalpi NPP. Household industry workers are very low (2.5 per cent) in Rampura NP, 3.1 per cent in Umri NP and 3.8 per cent in Nadigaon NP. As usual trend recorded in the urban areas, other workers are in high percentage (86.0 per cent in Kalpi NPP 84.3 per cent in Orai NPP. and 81.6 per cent in Jalaun NPP.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset table 37-47:

One of the major parts of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37: DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 937 inhabited villages in the district 827villages or 88.3 per cent have been provided with the education facilities of one type or the other. Similarly, 317 villages in the district constituting 33.8 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 906 or 96.7 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 223 villages constituting 23.8 per cent of villages have been provided with post office facility

within the village. 355 or 37.9 per cent villages have been provided with the telephone facility, 212 or 22.6 per cent with transport facility, 56 or 6.0 per cent villages with bank facility and 61 or 6.5 per cent with agricultural credit societies. Similarly, there are 514 or 54.9 per cent villages which have been linked with the pucca road. Total 618 or 66.0 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Jalaun CD block has the highest 93.9 per cent villages where educational facility is available and lowest 81.5 per cent is found in Nadigaon CD block. Medical facility is highest in Kadaura (52.0 per cent) and lowest (18.9 per cent) in Maheva CD block. Improved drinking water is available to above 99 per cent villages in Jalaun and Konch blocks while in other blocks, it is above 94 per cent. Telephone facility is highest in Dakor (48.1 per cent) while lowest (26.0per dent) in Madhoganj CD block enjoy this facility. Transport and communications is less developed in the district where only 22.6 per cent villages are covered by this facility whereas 37.8 per cent villages of Kadaura CD block are availing this facility. In the field of power supply 618 villages or 66.0 per cent have been covered in the district.

TABLE 38: NUMBER AND PER CENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,113,926 persons in the district, 1,074,309 or 96.4 per cent have educational facility of one or the other type. Similarly, 604,595 or 54.3 per cent population has medical facilities, while 1,106,005 or 99.3 per cent have got improved drinking water facility. Post office facilities are available to 540,776 or 48.5 per cent population. Telephone facility is available to 503,181 or 45.2 per cent. Transport communications facility is available to 374,793 or 33.6 per cent. Bank facility is available to 207,803 or 18.7 per cent. 176,081 or 15.8 per cent have been provided with the facility of agricultural credit societies. 805,648 or 72.3 per cent have been provided with the facility of approach by pucca road. Power supply is available to 872,469 or 78.3 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at CD block level. However, in Jalaun CD block facilities of education, medical and improved drinking water are available to larger proportion of population.

TABLE 39: DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 112 villages do not have primary school in their villages and out of these villages, children of 104 villages have to travel less than 5 kms. for schooling Out of 937 inhabited villages as many as 666 are deprived of middle school and 927 of degree college. Of these 430 avail the facility of middle school at a distance of less than 5 kms., 221 at a distance 5-10 kms. and the remaining 15 at a distance of 10+ kms. In respect of degree college 74 avail this facility at a distance of less than 5 kms., 199 between 5 to 10 kms. and rest 654 villages at a distance of 10+kms.

Similarly. there are 902 villages in the district which have been devoid of Hospital facility and 915 villages which are deprived of PHC facilities. Of these 240 villages have the facility of Hospital available within 5 kms., while in respect of 342 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly, overwhelming number i.e. 320 villages have this facility at a distance of 10+ kms. As regards PHC 134 avail this facility at a distance of less than 5 kms., 406 at a distance of 5-10 kms. and the remaining 375 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 714 villages do not have this facility in the village itself. Of these majority i.e. 564 have this facility at a distance of less than 5 kms., another 121 villages avail it at a distance of 5-10 kms. In the remaining 29 villages habitants have to travel a distance of 10+ kms.

As regards telephone, there are 582 villages in the district which are without telephone facilitiy. Of these 317 avail this facility at a distance of less than 5 kms., 135 at a distance of 5-10 kms. and remaining 130 have to traverse a distance of 10+ kms.

For Bus service out of 798 villages which do not have facility, 375 villages avail this facility at a distance of less than 5 kms., 344 at a distance between 5-10 kms. and 79 at a distance of 10+ kms.

In the entire district 899 villages are deprived of Commercial Bank & 907 of Co-operative Bank. Of these 899 villages which are deprived of Commercial Banks 366 villages avail this facility at a distance of less than 5 kms., 360 between 5-10 kms. & the remaining 173 at a distance of 10+ kms. Regarding Co-operative Banks out of 907 villages 223 villages avail this facility at a distance of less than 5 kms., 447 at a distance of 5-10 kms. and remaining 237 at a distance of 10+ kms. 876 villages do not have agricultural credit societies. This facility to 422 villages is available at a distance of less than 5 kms., 303 at a distance of 5-10 kms. and the remaining 151 at a distance of 10+ kms.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 937 inhabited villages in the district, there are 128 villages which have nearest towns up to a distance of 5 kms. Of these only 111 villages forming 86.7 per cent of these total villages, are having the educational facilities of one type or the other and 43 villages constituting 33.6 per cent, have the medical facilities within the village, 30 villages forming 23.4 per cent have the facility of post office within the village and 35 or 27.3 per cent have the facility of telephone. 22 villages constituting 17.2 per cent have been linked by transport service. 5 villages comprising 3.9 per cent have been provided bank facilities, while 8 villages constituting only 6.3 per cent have been provided by agricultural credit societies. 67 villages comprising 52.3 per cent have been provided with pucca road.

There are 586 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 519 villages constituting 88.6 per cent have been provided with the educational facilities. 212 villages comprising 36.2 per cent have been provided with medical facilities. 148 villages constituting 25.3 per cent enjoy the post office facility. 234 villages comprising 39.9 per cent have been provided the telephone facility. 135 villages constituting 23.0 per cent have been linked with transport communications. 36 villages comprising 6.1 per cent have bank facility. 40 villages constituting 6.8 per cent are having agricultural credit societies, while 331 villages or 56.5 per cent are approachable by pucca road. 212 villages fall in the distance range of 16-50 kms. Of these, 88.7 per cent villages have educational facility, 26.4 per cent with medical, 19.8 per cent with post office, 37.7 per cent with telephone and transport & communications available to 23.6 per cent villages. Banks and agricultural credit societies facilities are available to 6.1 and 5.2 per cent of villages.

There are 1 villages in the district which are situated beyond 50 kms .from the nearest town and this single village enjoy the education facility in the village itself but remaining other facilities i.e. Medical, Post office, Telephone, Transport and Communication, Bank and agricultural credit society and pucca road are not available in this village. There are 10 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 8 or 80.0 per cent villages have the educational facility of one or other type. Six villages constituting 60.0 per cent have the medical, 3 villages or 30.0 per cent enjoy post office facility, 6 villages or 60.0 per cent have been provided with telephone facility, 5 villages comprising 50.0 per cent have been linked with transport and communications, 2 villages comprising 20.0 per cent are having Banks and agricultural credit societies and 6 villages comprising 60.0 per cent are linked by pucca roads.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Jalaun district out of a total 937 inhabited villages, overwhelming 244 have a population of less than 500 persons. Of these, 157 villages (64.3 per cent) have education facility, 25 (10.2 per cent) have medical facility, 219 (89.8 per cent) have improved drinking water facility. None of village (0.0 per cent) have post office facility. 54 (22.1 per cent) have telephone facility. 28 (11.5 per cent) have been linked by bus service. 1 (0.4 per cent) have Bank facility. None of village (0.0 per cent) have been provided with the agricultural credit societies, 81 villages (33.2 per cent) have been linked with pucca road. 100 villages (41.0 per cent) have been provided with electricity.

Out of 281 villages, which fall in the population range of 500-999 persons, 266 villages (94.7 per cent) have been provided with the education facility, 70 (24.9 per cent) with medical facility, 278 villages (98.9 per cent) have improved drinking water facility. 24 villages (8.5 per cent) have been provided with post office facilities, 99 villages (35.2 per cent) with telephone facility, 51 villages (18.1 per cent) with transport facilities, None village (0.0 per cent) with bank facility, 7 villages (2.5 per cent) with agricultural credit societies & 125 villages (44.5 per cent) have approach by pucca road. 185 villages (65.8 per cent) in this range have electricity.

272 villages fall in population range of 1,000-1,999 persons. All of these villages have improved drinking water facilities. Whereas 265 villeges have been provided with the education facility, 114 (41.9 per cent), enjoy the medical facility, 84 villages (30.9 per cent) have post office facility, 131villages (48.2 per cent) have telephone facility, 75 villages (27.6 per cent) have transport communications facilities, 7 villages (2.6 per cent) have bank facilities, 15 villages (5.5 per cent) have agricultural credit societies and 179 villages (65.8 per cent) have approach by pucca road. 210 villages (77.2 per cent) have electricity.

There are 127 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy the facility of, improved drinking water, 126 villages (99.2 per cent) have education facility,. 95 villages (74.8 per cent) have medical facility. 102 villages (80.3 per cent) have post office facility, 64 villages (50.4 per cent) have telephone facility, 47 villages (37.0 per cent) have transport communication facility, 38 villages (29.9 per cent) have bank facility, 32 villages (25.2 per cent) is having agricultural credit societies. 116 village (91.3 per cent)have been linked with pucca road. 111 villages (87.4 per cent)have been provided with electricity, 12 villages fall in population range of 5,000-9,999 persons. All of these village have education, medical, improved drinking water, post office and approach by pucca roads facilities. Where as 7 villages (58.3 per cent) have telephone facility, 10 villages (83.3 per cent) have transport and communication facility, 6 villages (50.0 per cent) have agricultural societies and 11 villages (91.7 per cent) have electricity,

One villages falls in population range of 10,000 + persons. This village have all facilities except telephone facility i.e. education. Medical improved drinking water, post office, transport and communication, Banks, Agricultural credit society, approach by pucca road and power supply.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Rampura	77	24,786.0	65.8	49.9
2	Kuthaund	117	21,424.1	98.6	72.0
3	Madhoganj	77	26,733.2	74.4	53.7
4	Nadigaon	146	44,092.4	65.6	48.5
5	Jalaun	98	48,135.3	71.9	61.3
6	Maheva	95	32,676.4	76.7	38.7
7	Kadaura	98	131,134.6	35.2	49.5
8	Dakor	129	65,602.9	63.0	40.7
9	Konch	100	25,006.6	~~127.6~~	57.5
District Total		**937**	**419,591.595**	**63.2**	**51.6**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 937 inhabited villages in the district having a total area of 419,591.6 hectares. Of this, 63.2 per cent is cultivable and 51.6 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at CD block level shows that Rampura block with 77 villages have a total area of 24,786 hectares, of this 65.8 per cent of land is cultivable and of the aforesaid area 49.9 per cent is irrigated. In Kuthaund block, all the 117 villages have a total land area of 21,424.1hectares, of this 98.6 per cent of land is cultivable and of the aforesaid area 72 per cent is irrigated. In Madhoganj block, all the 77 villages have a total area of 26,733.2 hectares, of this cultivable area is 74.4 per cent and 53.7 per cent is irrigated. In Nadigaon block, all the 146 villages have a total area of 44,092.4 hectares. Of this, cultivable area is 65.6 per cent. Of cultivable area 48.5 per cent is irrigated. Jalaun block with 98 villages have a total land area of 48,135.3 hectares, of this 71.9 per cent is cultivable area and out of this cultivable area 61.3per cent is irrigated. Maheva block with 95 villages has a total land area of 32,676.4 hectares. Of this 76.7 per cent is cultivated area, out of which 38.7 per cent is irrigated. Kadaura block with a total 98 villages have an area of 131,134.6 hectares. Of this 35.2 per cent is cultivable area, out of which 49.5 per cent is irrigated. Dakor with 129 villages have an area of 65,602.9 hectares. Of this cultivable area is 63.0 per cent; of cultivable area 40.7 per cent is irrigated. Konch block with 100 villages have a total land area of 25,006.6 hectares of this cultivable area ~~is 127.6 per cent of cultivable area~~ 57.5 per cent is irrigated.

The table 43 gives the per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Jalaun works out to Rs186 of which Rs 11 are derived through local taxes and the remaining Rs 175 received from all other sources. The average of total expenditure incurred per head is Rs 159. Out of this Rs 67 are spent on general administration, Rs·23 on public health and conveniences, Rs 32 on public works, Rs 0 on public institutions and Rs 36 is spent other items. Among all the Nine towns the receipt and expenditure recorded per head is the highest in Kalpi NPP.

TABLE 44: SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Jalaun, NPP	6.0	1.0	1.6	0.4	0.2
2	Kadaura, NP	7.9	7.1	0.8	0.8	0.0
3	Kalpi, NPP	4.0	2.3	1.2	1.2	0.2

TABLE 47: MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No..	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Jalaun, NPP	Carpet, Pulses, Oil	--, --, --
2	Kadaura, NP	Pulses, Carpet, Furniture	Masoor, Reed Oil, Pea
3	Kalpi, NPP	Carpet, Paper, Cloths	Carpet, Paper, Cloth
4	Konch, NPP	Leather, Pulses, Veg. Oil	Leather, Reed Oil, Food grains
5	Kotra, NP	--, --, --	Wheat, Gram, Pea
6	Madhogarh, NP	Gur, Arhar, Sugarcane	Wheat, Potato, Ghee
7	Nadigaon, NP	--, --, --	--, --, --
8	Orai, NPP	Gutkha, Health Capsule, Pan Masala	Pea, Gram, Pulses
9	Rampura, NP	Shoes, --, --	Wheat, Rice, Soyabeen
10	Umri, NP	Milk, Ghee, Potato	Gur, Wheat, Bajra

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for a Carpet and pulses. The chief export items of the district are Carpet, Tilhan and wheat are the main items which are manufactured in the towns.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001: 48 to 52

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48: HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes

	3+ rooms	341	178	163	58	32	26	15	1	14
	Median number of rooms	2	2	2	2	2	2	2	3	2
District total		**231,353**	**180,892**	**50,461**	**71,619**	**58,674**	**12,945**	**1,833**	**1,358**	**475**

The data presented in the table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 231,353 consisting of 180,892 rural and 50,461 urban households. 71,619 households belong to Scheduled Castes and 1,833 to

Scheduled Tribes. 223,342 households are living in their owned houses constituting 96.5 per cent of total households. Of these households, the largest number of households (78,977) have occupied 3+ roomed accommodation and is followed by double roomed accommodation numbering to 60,030 households. Next position is claimed by households (57,639) occupying three roomed accommodation. Number of households in owned accommodation occupying one room rank at fourth place with 23,916 households while 2,780 households are without any exclusive room.

6,269 households living in rented accommodation account for 2.7 per cent of total number of households in the district. The largest number of 2,343 households are living in double roomed accommodation followed by 1,990 households in single roomed accommodation. Households with three rooms and three plus are 922 households and 921 households respectively Other households numbering to 1,742 forming only 0.8 per cent of total households are distributed in single roomed accommodation numbering 445, 554 double roomed, 347 in three roomed accommodation and 341 in 3+ roomed accommodation. In rural areas majority of households have bigger size and majority of them have their own houses.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary
1	2	3	4	5	6	7	8	9	10	11
1	Madhogarh	44.0	50.4	5.5	42.9	51.3	5.9	55.4	42.7	1.9

5	Konch	52.8	46.7	0.5	48.8	50.7	0.4	69.5	29.7	0.7
	District Total	**52.5**	**44.9**	**2.6**	**46.1**	**50.9**	**3.0**	**75.6**	**23.3**	**1.2**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note: - Permanent: - 1 Permanent house refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent: - 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary: - 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc are used for roofs

The percentage distribution of households as shown in the above table reveals that more than 52.5 per cent of the households in the district had permanent houses. The trend is different in rural (46.1 per cent) and urban area (75.6 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Orai (64.7per cent) followed by Konch (52.8 per cent), Jalaun (52.3 per cent) and lowest in Madhogarh (44.0 per cent). In respect of semi-permanent houses, the returns were 44.9 per cent of district level, whereas among tahsils, in Madhogarh it was highest 50.4 per cent and lowest was 34.3 per cent in tahsil Orai rural areas represented a similar ratio at district and tahsil level but semi-permanent houses in the urban areas were in the proportion range of 13.6 to 42.7 per cent. Temporary houses in the district lie between the range of 0.5 to 5.5 per cent.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as *having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered* accordingly.

Note: Percentage is to be given in brackets after the number of households

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage menas closed and open drainage.

The above table shows that out of total households of the district 73.7 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 69.3 and 89.5 per cent. Tahsil Konch had higher order of proportion of households where percentage for rural area was 81.0 and 85.4 per cent in urban areas. Electricity was available for 26.3 per cent of households at district level households of the district had better access of electricity. Bathrooms and toilet facilities were available in 35.9 per cent and 35.4 per cent of households. Tahsil Madhogarh poorly served in respect of these amenities. Similarly,

drainage facility was also poor in Madhogarh and tahsil. At district level drainage facility was available for 73.5 per cent of households, whereas the proportion of rural and urban areas households accounted to 68.7 per cent and 90.8 per cent

Percentage in brackets
Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that to 27.4 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is to 21.5 and in urban area it comes to 48.6 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in to 7.3 per cent of the households. The composition of rural and urban comes to 1.3 and to 28.5 per cent respectively. Cow dung cake is used for cooking in as many as 57.0 per cent of the households (to 69.4 per cent rural and to 12.5 per cent urban households). The other methods like crop residence, Kerosene, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.1 per cent to 6.9 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is

cow dung cake and to the table shows that cow dung cake firewood and LPG (cooking gas) are the predominant fuel for cooking in the district.

TABLE 52: NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

This table presents data for total rural and urban areas at district/tahsil level households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households. There are 231,353 households in the district and among them 68,586 households have been availing banking services, 84,511 households have Radio/Transistor, Television is possessed by 46,353 households, telephone is available in 11,314 house holds. Bicycle is main means of transport and is available in 129,345 households. Scooter/Motor cycle/Moped and Car/Jeep/Van are used by 19,131 and 3,545 households respectively. The picture in use of banking services and possession of assets by households at tahsil level is almost similar as analysed above for district as a while.

(xi) Major Social and Cultural Events, Natural and Administrative, Development and Significant Activities during the Decade:

By and large, district Jalaun is a peaceful place. People live in social harmony. Typical Bundelkhandi culture can be observed in the district. No significant, social, cultural or natural event has taken place in the last decade. As regards administrative development, internal change in the form of creation of a new tahsil – Madhogarh, during the last decade has taken place.

(xii) Brief description of places of Religious, Historical or Archeological importance in villages and places of tourist interest in the towns of the district.

The district does not have any famous places of tourist interest. Following few places can be mentioned because it attracts some tourist occasionally from surrounding areas.

Kalpi: It is situated on the bank of river Yamuna. Kalpi is believed to be founded by Kalib Dev a raja in ancient time. Traditionally Kalpi traces its importance from the day of the Puranas. The mounds the Vyas Teela and the Narsimha Teela are situated here. The former is believed to be the site of the hermitage of rishi Vyas and the latter was the place where Narsimha saved his devotee Prahlad from Hirnya Kashyapa. Historically the place has its own importance.

A lofty tower known as Lanka and built by a local advocate Babu Mathura Prtasad was built in honour of Ravana, the demon king of Ramayan period. The principal remains of Kalpi are the tombs of Madar Sahib, Ghafoor Zanjani, Chol Bidi and Bhadur Shaheed and the great enclosure called Chaurasi

Gumbad, which is said to be the tomb of Lodi Shah Badshah and some people even assign it to Sikandar Lodi.

Kanjausa: A village, it has some local celebrity as the spot where the united waters of four tributaries namely the Chambal, Kuwari, Sindh and Pahuj join the river Yamuna. In view of this particular feature on the full moon day of Kartika every year, a fair called the Pachnada is held. The fair is attended by shopkeepers and people from Etawah, Gwalior and other places of Madhya Pradesh. There is a tomb of one Baba Mukund Man Gosain, at which offerings are made.

Konch: The place derives its present name from Kronch, an ancient rishi who is said to have lived here, it is a historical place. Many old monuments, now in ruins are found here. There are numerous temples in Konch. The famous temple of Ramlalji is considered to be the oldest.

Orai: It is district headquarters. According to tradition, rishi Uddalak had mediated here. There are remains of old brick fort and scattered around are some Muslim tombs. There is a fine and big tank known as Mahil-ka-Talab. Besides, there is the temple of Thandeshwari where a large beautiful image of Hanuman is worth seeing.

(xiii) Major Characteristics and Contribution of the District:

District Jalaun is one of the five district of Bundelkhand division in Uttar Pradesh. Its culture and lifestyle is different from the rest of the country. Nothing much is heard about this district these days. But the chequered history of this district tells us about the turmoil and upheaval of the brave men of this region. The great warrior Chhatrasal belong to whole of Bundelkhand but was virtual master of the tract of Jalaun. During the first struggle for freedom in 1857, this district became the centre of the fierce battle between British forces and the freedom fighters. Rani Laxmi Bai of Jhansi and Tantia Tope fought with British army from the soil of Jalaun. During the freedom movement many distinguished persons of this district fought against Britishers, Prominent amongst them were. Asharfi Lal, Babu Ram, Gauri Shankar, Babboo Singh Rathor, Badri Prasad Chopra. Beni Madhav Tewari, Chaturbhuj, Kali Charan Bisariya, Lila Dhar, Lallu Ram Duwedi and Manni Lal Pande.

The local and popular traditions relate kalpi as the birthplace of a literary luminary Veda Vyasa, the author of the Mahabharat and the Puranas.

District Jalaun, like other parts of the Bundelkhand region has a distinct tradition of folk songs and folk dances.

The sleepy district of Jalaun has the potential to become much better than what it presently is. It needs the attention of the government and private entrepreneurs.

(xiv) Scope of Village Directory and Town Directory Column Heading wise Explanation and Coverage of Data

Village Directory :

The village directory, as the title connotes, presents information pertaining to rural areas of the district at C.D block/ village level. For each CD block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rationale of giving 2001 location codes along with 1991 location codes is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufactured	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been adopted:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration, are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement, a note is given against such towns that there are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999 and trade, commerce, industry and banking activities in year 1999. In this way, population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, Manufactured cinemas etc. and number of banks as well as commodities and exports are enumerated vividly in various statements relating to the town directories of the districts.

The Village Directory is the compilation of basic information pertaining to a particular village. The format of the Directory has been revised from time to time but it has been continued to remain as the traditional source of village level basic data. It contains a list of villages with Location Code Numbers. Population, amenities, namely, Educational and Medical facilities, availability of Drinking Water, Post. Telegraph and Telephone facilities, Commercial and Co-operative Banks, Agricultural and Non-agricultural and other Credit Societies, Recreational and Cultural facilities, Communication, Approach Roads to village. Power Supply and Newspaper/Magazine etc.. The name of villages of each Rural Development Block of the District has been arranged alphabetically and location codes number of the Census of India 2001 and corresponding code number of 1991 Census have been given for each village for easy reference.

Generally a 'village' is taken as a statutorily recognised unit of an area having definite and recognised boundaries and separate land records. Thus in Census, the basic unit of rural areas is taken as a revenue village which has definite surveyed boundaries. A revenue village may comprise of several hamlets but the entire village is treated as one Unit for presentation of data. In Mizoram, however, the concept of village is different from what has been mentioned above since there is no surveyed village in the state. Therefore an inhabited area with locally recognised boundaries and having a name of its own is treated as a village. The un-inhabited villages i.e., the villages where no population was found during Census Operations have also been included in the list of villages and CD Blockwise in the Village Directory.

Although there is no Panchayat Institution in the District, the villages have Village Councils which are democratically elected local bodies. In addition to the information as to the availability or otherwise of the

basic amenities as mentioned in the preceding paragraphs, following nine appendices have also been included :

1. Appendix I — Abstract of Educational, Medical and other amenities in villages - CD Block level.
2. Appendix II — Villages with 5,000 and above population which do not have one or more amenities.
3. Appendix III — Land Utilization Data in respect of Census Towns/Non-Municipal Towns.
4. Appendix IV — CD Block-wise list of inhabited villages where no amenities other than drinking water facility are available.
5. Appendix V — Summary showing number of villages not having Scheduled Castes population.
6. Appendix VI — Summary showing number of villages not having Scheduled Tribes population.
7. Appendix VII — List of villages according to the proportion of the Scheduled Castes and the Scheduled Tribes to the total population by ranges.
8. Appendix VIII — Number of villages under each Gram Panchayat (CD Block wise)
9. Appendix IX — Statement showing number of girls schools in the villages.

Since a large number of abbreviations had to be used due to space problems, a detailed and explanatory note on each of these abbreviations has also been incorporated for easy clarification of the subject concerned.

PART A
VILLAGE AND TOWN DIRECTORY

SECTION I
VILLAGE DIRECTORY

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)Primary School P

(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital Ayurvedic Hospital Unani Hospital Homeopathic Hospital	H HA HU HHom
(ii)	Allopathic Dispensary Ayurvedic Dispensary Unani Dispensary Homeopathic Dispensary	D DA DU DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W

(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the s given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)(vi)	Navigable CanalNavigable waterways other than River,Canal	NC,NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposesEA	

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to proportion of the

Appendix-VII B Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates C D Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

Statement
List of Villages Merged in Towns and Out-growth at 2001 Census

Sl. No.	Name of Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

Not applicable as there are no merged villages and outgrowths in the district.

SECTION II
TOWN DIRECTORY

Town Directory

Note explaining the abbreviations used in Town Directory :

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Cor/NN
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB/NPP
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded..

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III

Municipal Finance 1998 -1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV

Civic and Other amenities,1999

Column (1 to 6) : Self explanatory.

Column (7) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/

Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 :Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to Area (in sq km.), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., Cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors

of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - I TO VIII

ANNEXURE-I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE-II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which in north –central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000.The population of the UP state was 139 million at the 1991 Census, which accounted for 16 per cent of India's total population. It grew by 25 per cent between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Jalaun
q1	Persons	99	83
	Males	98	79
	Females	104	94
q2	Persons	117	118
	Males	117	111
	Females	118	126
q5	Persons	134	132
	Males	135	124
	Females	132	153

The child mortality by age one year was lower in case of female and higher in case of male as against the State. Child mortality by age two years in both male and female are lower while by age five years the mortality indicators in the district for male is lower and for female shows higher order as compared to the State.

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person/ Male/ Female	Uttar Pradesh	Jalaun
1	2	3	4	5
1	CBR		37.2	34.1
2	TFR		5.6	4.9
3	TMFR		6.3	5.5
4	GFR		172	158
5	GMFR		200	176
6	Mean age at marriage (1981-91)		17.3	16.9
7	Number of children ever born per ever married woman aged 15-49 years		4.6	4.3
8	Child woman ratio 0-4		631	590
	5-9		752	745

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CRB), which is the ratio of the number of live births in a year to the mid year population, is 36.1 per thousand in the district which is slightly lower to the state of Uttar Pradesh i.e. of 37.2 per thousand . In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), the district presents a slightly lower proportion from the state figures. The conclusion that may be drawn is higher fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3 years for the state whereas 16.9 years has been observed for the district. It may be observed that lower age at marriage leads to high rate of fertility in the state and district as well. Number of children born per ever married women in the age group 15-49 is almost equal in the district and state. The state and the district figures are placed as 4.6 and 4.3 per thousand respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 590 and 745 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that levels as such are high to the state average.

Annexure – IV

Percentage distribution of Migrants 1991 Census

In-migrants by Place of Birth

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 79.0 in 1991, while in 2001 it was 82.1 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 17.5 percent and 20.9 percent respectively. This shows in-migration from other states to this district was increased in 2001 in comparison to 1991. At district level in-migration from other countries was 0.4 percent in 1991 and 0.1 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 82.4 percent and 77.9 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 17.4 percent and 22.1 percent respectively. The movement of population from other countries in the district was 0.2 percent in 1991 and 0.0 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 89.8 percent in 1991 and 89.3 percent in 2001, while Muslim were 9.3 percent in 1991 and 10.1 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that.

for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 54.2 percent male and 42.7 percent female to 54.6 percent male and 44.7 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 42.6 percent and female was 52.8 percent in 1991 and in 2001 it was 42.1 percent male and 49.9 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 3.2 percent male and 5.3 percent female while it was 3.2 percent male and 4.4 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Annexure - VII

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 46.1 percent male and 74.9 percent female in 1991 which declined to 35.2 percent male and 59.2 percent female in 2001. Primary level education was 15.0 percent male and 10.5 percent female in 1991, which was 17.2 percent male and 15.4 percent female in 2001. Middle level education was 12.6 percent male and 5.4 percent female in 1991 and 17.4 percent male and 9.8 percent female in 2001. Matriculation and above level of education was achieved by 17.2 percent male and 4.7 percent female in 1991 which was 25.9 percent male and 9.3 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001, while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note : For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02%. The remaining tongues have been merged in the column of "Total of Other Mother Tongues."

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 94.9 percent person in 1991 and 95.7 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 4.2 percent and 4.0 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
