MOTIF

FORT OF JHANSI

Historical fort of Jhansi is situated in the middle of the city. It is primarily known as the Gateway of Bundelkhand and a stronghold of the Chandela kings. It rose to prominence in the 17th century, when Raja Bir Singh Deo – one of the close associate of Mugal emperor Jahangir built this fort on the top of a hill during 1605-27 as an army stronghold. It was under the domain of Bundels up to orcha kings i.e. 1736-1753. The karak bijli tank lies within the fort. The palace of Rani Laxami Bai has now been converted into a museum and therein the collection of sculptures, weapons, statues, dresses and photographs that represent the Chandela dynasty and picture gallery of Gupta period. Terracottas, bronzes, manuscripts, paintings and coins are placed there which provides an insight into the history of Bundelkhand. However, the greatest claim of fame on account of the fort is queen Rani Laxami Bai, who led forces against the British in 1857, sacrificing her life to the cause of Indian Independence.

Annexure IV	Percentage distribution of Migrants by place of birth/place of last residence, 1991Census	551
Annexure V	Brief account of main religions in the district/tahsil as per 1991 Census	552
Annexure VI	Marital status of population as per 1991 Census	553
Annexure VII	Age, Sex and Education in the district, 1991 Census	556
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	559

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage

enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri

New Delhi

Registrar General &
Census Commissioner, India

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners. Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar
Deputy Director of Census Operations.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

The early history of the Jhansi district is connected with the region, which was known at different times as Chedidesha, Chedi-rashtra or Chedi Janapada, Jejakbhukti, Jejahuti, or Jajhoti and Bundel khand. The region seems to have inhabited by certain primitive people like the *Bhils, Kols, Saheriyas, Gonds, Bhars, Bangars, and Khungars.* Local tradition ascribes the origin of the name of Jhansi to the beginning of the seventeenth century when Bir Singh Deo, the famous Bundella king of Orchha, built a fort in 1613 A.D. in what is now the city of Jhansi. He called this fort as 'Jhansi', which in course of these time become corrupted to Jhansi. The district of Jhansi was formed as a separate unit of revenue administration by the British when they annexed it in 1854 and brought it under their administration. The district then consisted of nine parganas, Vijaigarh being

one of them which made up the domain of Jhansi that had lapsed to the British. The district of Lalitpur, which came under the British administration in 1860, but continued to be a separate district, till 1891 was also merged in Jhansi and it formed a sub division. This addition rose the number of tahsils to six viz, Jhansi, Moth, Garautha, Mauranipur, Lalitpur and Mahroni. The district continued to have these tahsils till March 1, 1974 when Lalitpur district was created by carving out of Lalitpur and Mahroni tahsils, leaving there by four tahsils viz. Moth, Gauratha, Mauranipur and Jhansi in it. The following are the calendars of the important Event in District.

In 1948 Mac Donnel High school, Jhansi was renamed as Bipin Behari Intermediate College. In 1949 Establishment of Bundelkhand College, Jhansi.; in 1950 Merger of princely states of Dhurwai, BijnaTori Fathepur, Samthar, Banka, Pahari and Tahrauli into Jhansi district were the important events. Following events also important.

(i) Police firing in connection with establishment of 'Azad' drinking water place in 1951.

(ii) Construction of Matalita dam started in 1957, establishment of Maharani Laxmi Bai statue at Jhansi. In 1958 Matalita dam commissioned.and Lalitpur district was created out of Lalitpur and Mahroni tahsils.

(iii) Administrative Set-up:

Jhansi district came into new form on 1 march 1974 by creation of a new district Lalitpur from Jhansi district. Jhansi district has five tahsils Moth, Jhansi, Mauranipur Garautha and newly created Tahsil Tahrauli and 18 towns which includes two census towns Barua Sagar and Khailar, which were formed in 2001 Census and census town 'Hansarigird' was converted to the revenue village.

In 2001 census total numbers of villages in Jhansi district were 949 out of which 245 villages were in Moth Tahsil, 190 in Jhansi Tahsil, 171 in Mauranipur, 187 in Garautha and 156 villages in newly created Tahsil Taharauli which was created after 1991 census by government Notification No. 1553/1-5/97-192/90-R-5 dated 24.6.1997 from Tahsil Moth (50 villages) Garautha (80villages and 1 town) and Mauranipur (21 villages) of the Jhansi district.

Jurisdictional Changes (1991-2000) :

During the year 1991-2000, the following Jurisdictional changes have taken place in the district.

Jurisdictional Changes (1991-2000)

No	Name of District / Tahsil	Notification No & Date	Jurisdiction Changes Added	Subtracted
1	Tahrauli	1553/1-5/97 -192/90-R-5 dated 24.06.1997	(I)50 villages transferred from Moth (II)21 villages transferred form Mauranipur tahsil (III) 80 villages and one town transferred from Garautha tahsil	
2	Moth	1553/1-5/97 92-/90-R-5 Dated 24.08.1997		50villages transferred to Tahrauli tahsil
3	Mauranipur	1553/1-5/97 192-/90-R-5 Dated 24.08.1997		21villages transferred to Tahrauli tahsil
4	Garautha	1553/1-5/97 192/90-R-5 Dated 24.08.1997		80 villages and onetown transferred to Tahrauli tahsil

District Administration:

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional magistrate is in-charge, who is now re-designated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various District department officer District level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD etc. each have departmental district level officer. The department front of view, the district is district in to community department block. Block Development Officer (BDO) district after department units at community development block level.Assistant Development Officers and Village Development Officers at Village level.

Under the police set-up Senior Superintendent Of Police in big districts and Superintendent of Police in smaller districts are in-charge. Additional Supdt. Of Police (ASP) and their respective area. Deputy Superintendent of Police (DSP) look –after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The Judicial administration of the District is headed by District and Session Judge. In addition to there are Several additional District Judges. Civil judicial Magistrate and Munsif Magistrate

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti ect. Come under Local self-government.

(iv) Physical Features:

(1) Location and Size:

The district Jhansi lies in the south-west portion of Jhansi division between 25°30[1] and 25°57' north latitude and 78°40'and 79° 25' east longitude. It is bounded on the north by District Jalaun, on the south by Lalitpur for a small distance and Madhya Pradesh on its east lies the district of Hamirpur and Madhya Pradesh and the western boundary is also formed by Madhya Pradesh state. The present area of the district, according to survey of India is 5,024 sq. kms.

(2) Physiography

The northern tract of the district which has the general appearance of a plain dotted with isolated low and rocky hills, comprises the tahsils of Moth and Garautha. The north-eastern portion of Mauranipur tahsil and the northern part of the Jhansi tahsil. Lakheri and Ghainch are the chief river of this portion and with their tributaries these drain the areas of Mauranipur and Garautha tahsils. There are irregular mass of hills in Moth and Garautha hills, Besides there are two main dissected ridges which traverses this tract, one starting near Barua Sagar runs north - east wards through Jhansi and Moth tahsils, and the other from extreme south of Mauranipur (Katera) runs northwards past the lakes of Rachnes and Magarwara. The land along the Betwa is characterized by broken relief and is unculturable. Many ravines have come up near the confluence of Betwa and Dhasan. The slope in general, is from north to east.

The southern part of Jhansi and southwestern part of Mauranipur tahsils constitute the southern tract of the district. South to the city, Jhansi, is the principal township of the district and southwards the country becomes undulating and is broken up by nullahs.

On the basis of the homogeneous characteristics of physiography, the district has been subdivided into four, micro regions as under Jhansi plain Betva-Dhasan Ravinestract Mauranipur Uplands and Jhansi Uplands.

Jhansi plain:

It lies in the north-west part of the district and is bounded by the Betwa on the east and 200 metre contour in south, with an average height ranging between 176 to 189 metre the region has a general slope towards the north.

Except marked ravines along the Betwa river, the remaining part is almost plain, However, there are a few rocky knobs in the southern part.

Betwa-Dhasan Ravines Tract:

It is the largest sub micro region of the district lying on the east Physiographically, it presents a dissected landscape drained by numerous. nullahs / streams culminating either into Betwa (north) or Dhasan (east) creating a dendritie drainage pattern. It has a general slope to wards the north east with a height ranging between 166 to 242 mitres, Settlements being mostly away from ravine land, take their sites preferably close to water, reservoirs or lakes.

Mauranipur uplands :

Being situated in the southern part of the district it is cut by the 200 metre contour on its northern and eastern sides covering a major part of the Mauranipur tahsil, The height ranges from 234 to 340 metre. It is formed of Bundelkhand gneisses and granites of Archaean age.

Jhansi uplands:

Occupying the western portion of the Jhansi district, the region is separated form the Jhansi plateau by 200 metre contour in the north-east. The height varies from 240 to 335 metre with a general slope towards the north-east.

(3) Drainage:

The chief rivers of the district are, Betwa, Dhasan, Jamini and Pahuja. The river Betwa enters the district from Lalitpur passing through Baragaon, Pariksha and Erich in the north into Jalaun district. The Pahuja enters the district in Jhansi tahsil and after flowing through the western part of the district rushes into Madhya Pradesh. The general flow of the rivers and their tributaries is from the south to the north so the district has very well drainage and no areas suffer from water scarcity. Lakheri and Chainch are the chief rivers of the northern tract of the district and with there tributaries these drain the areas of Mauranipur and Garautha tahsils.

(4) Climate :

The climate of the district may be characterized by a hot dry summer and a cold winter. The climate of the district is marked for high variability of rainfall year to year. The temperature begins to drop by the middle November and January being the coldest time. The winter lasts by February. The hot season starts earlier and lasts longer than in other parts of doab. May and June are the hottest months. The monsoon breaths after mid June and continues up to September. July is the month, which records maximum rainfall in the district. The average rainfall in the year 1998 was 880 mm, whereas actual was 1,025 mm in the district. The maximum and minimum temperature recorded during the year 1998-99 was 46.5°C and 3.4°C (statistical diary U.P. 2000). It is one of the hottest district during summer and coldest during cold.

(5) Natural and Economic Resources :

Forestry:

The district being situated in the central-India type climate, is rich in dry tropical species of vegetations capable of sustaining on low rainfall. The chief trees are kardhai, dhau, saur, dhak, mahu, sagon, dhamau, tendu, khair and salal. The forests are utilized mainly for local needs. Leaves of tendu trees are utilized for Bidi making Khair trees are numerous but the yield of Catechu is not good. Out of total area of 499,613 hects during the year 1998-99 (statistical Magzine U.P. 2000) an area of 34,358 hectares was recorded under different forests.

The wild life of the district is not rich. It has been considerably deleted owing to reckless shooting and destruction of forests in the past. Panthers, tigers, hyenas, jackal and wild dogs are chief carnivorous found in the district. Other animals found in the district are chikara (ravine deer), neola (mon goose), fox bear and jungle cats. Among the antelopes one of the Indian black buck found in the ravine tracts of Moth and Garautha tahsils, other animals found in the district are chousingha, nilgal or bluebull, sambhar and cheetel (spotted deer). A large variety of birds are found in the district. The existence of lakes in the district attracts a large number

of migratory birds in winter season. The chief migratory birds are teal, pochard duck, white-eyed pochard, rajhans or graylag, bear headed goose. Many game birds are also found.

Minerals and Mining:

Main minerals of this district are stone. Granite, Paropholite, Diaspora, Gypsum and sand.

Soil :

Soils of the district is mainly of two types red and mixture of black. For example Mar, Kobar Padua and Rockar soils. Northeast region of the district is mainly plain and this region covers Chirgaon, Moth, Bamaur, and Mauranipur blocks of the district. This region is agriculturally very fertile. The composition of different variety of soils are Mar-50 per cent followed by Kaber 30 per cent and Padua 20 per cent Padua soil is found is kachhar of the Dhasan and Betwa rivers. In the other part of the district is south-west region and of this region are mainly plateau with red soil because this region is situated in the series of Vindhyachal mountain (plateau). In this region Bangra, Baragaon, and Babina blocks of the district are situated. Main soil of this part is Rocker. whick is not fertile and agriculturally this land is very poor.

Land and land use pattern :

The hilly topography of the district dos her provide a land as it is undulating in shape with abundance of sand stones. There are irregular masses of hills. The land less fertile as compared to other district of doab. The land use statistics of 1998-99 shows that out of the total area of 499,613 hectares as much as 34,358 hectares was under forests, under usar and unfit for agriculture was 31,758 hectares, land put to other uses 40,686 hectares, waste land 17,681 hectares, orchards, bushes ete 1,759 hectares current fallow and other fallow 24,104 hectares and net area sown 349,267 hectares (statistical diary U.P. 2000).As per agriculture census 1995-96, the total number of operational holding in the district was 208,000, out of which the marginal holding comprised of 100, 000 is below one hectare, small holdings ie between one and two hectares 54,000. Total numbers of agricultural labourers were recorded as 67,000 as per statistical diary 2000.

Agriculture and Crop Pattern:

The important crops are Juwar and tooi among Kharif crops and Wheat Gram and Masoor, among Rabi crops. As per agriculture statistic 1999. The cultivation of Wheat is carried on over the largest area 116,773 hectares with a total production of 277,099 m - tons, Gram was sown on 58,373 hectares with a production of 52,614 m tons, Soyabeen is sown on 11,287 hectares, Urad on 22,312 hectares and Masoor on 25,519 hectares with a production of 25,262 m - tons, Ground nut on 31,009 hectares with a production of 37,397 m - tons, More than two third of the area under Wheat crop is irrigated. About one twenty fifth of the area under Masoor is irrigated, and about one seventh of the area under Gram is irrigated. Kharif. crops are raised under rain fed conditions and the impact of irrigation is marginal. The net area sown during 1998-99 was 349,267 hectares (statistical diary U.P. 2000) where as the figures for the gross are a sown during, the above period was 413,000 hectares.

The hilly topography of the district does not permit large scale farming and cultivation of land under improved agricultural practices. The area under vegetables during the above period was 1359 hectares under Kharif, 1763 hectares under Rabi and 426 hectares under Zaid. The consumption of fertilizers was 396 kg per hectares.

Agriculture is the main source of livlihood of the rural population of the district. Irrigation facilities in the district are not proper. In 1999 only 40.76 per cent net land was irrigated. Thus major portion of the agricultural land depend upon rain for irrigation. Soil of the district is mainly a mixture of red and black soil which belongs to Vindhya mountain and its forest region is not very fertile. Thus, main crops of the district are wheat, masoor, urad, maize, gram, arahar, pea, ground nut, juwar, paddy, lahi and mustered. In 1998 wheat was sown in 28.61 per cent area of the total sown area.

Irrigation :

Irrigation plays an important role but with variations depending on the nature of soil. In black soil regions are mostly found in Moth, Garautha and Mauranipur tahsils irrigation is not an input as of great importance as in red soil tract which has less retention capacity of moisture It is mostly needed for raising Rabi, Kharif and Zaid crops, Kharif crops mostly

dependent on rain fall. Canals, tube wells, wells, tanks, lakes are the chief sources of irrigation of Mata Tila, Dhukwa, Paricha and Lahchima dams under major irrigation projects and Paraspur dam under minor irrigation project. The canal network fetches up to a total of 77,420 hectares, Govt. tubewells 4,243 hectares, private tubewells 4,054 hectares and other sources 83,032 hectares (statistical diary 2000) Bulk of the irrigation is done through canals followed by wells, though last of irrigational facility continues to be retarding factor in the agricultural development of the district The actual area irrigated in the district was 16,449 hectares (Agriculture statistics U.P. 1999) and the frequency of irrigation more than one was 1960 hectares.

Animal Husbandry:

Animals are integral part of the Indian agriculture. The live stock of the district are of poor quality and consists of ordinary local breeds. Efforts have been done to improve the local breeds. Cows from Haryana and buffaloes from Murrah have also been introduced. According to 1993 animal Census total number of animals in the district were 834,767. Highest number of animals were in Garautha tahsil (210,386) and smallest number (168,929) of animals were in Jhansi tahsil. Cows, Buffalloes, Goats, Horses, Ass, and oxen are the main animals of the district. Animal density of the district was 154.12 /sq km. In 1998 which is below the state's animal density. Veternary hospitals, artificial insemination centres and live stock development center have been established in each community development block for intensive breeding.

Fishery:

Fishing activities in the natural environment are restricted to inland waters, tanks and ponds which are the main resources. According to the survey of the fishery department of state government in Jhansi district 291 ponds and 304 tanks are engaged in fishery job. In Gursarai a fishery hybrid centre is situated in which 12.69 lakh fishes were produced from fish eggs during 1999-2000 and distributed all over the district. In 1999-2000 total 1,208 quintal fishes were produced. In district nine primary co-operative societies and one district cooperative society of fisher - men were running, to which state government has provided marketing, insurance . and expert training .

Industry:

Jhansi district is one of the backward district. Industrially it is very backward . In 1999-2000 total 4,899 small scale and 13 medium and large scale industries were existing of which only 9 medium and large scale industries were running. Main industries of large and medium scale are BHEL, Sriniwas fertilizers limited Machhia, Jhansi, Indian humpipe, Kankrit industry Bijauli Jhansi, Diamond cement Jhansi, Railway carriage wagon repair workshop Jhansi, U.P. state spinning mills Nayagaon Jhansi, Blanket industry Habitmarket, Jhansi, Minkashhi scaling mill, Indo Gulf explosive and Deepak Handloom. These industries are in public sector. In private sector Baidyanath Aurvedic and Sharma Aurvedic are also important industries.

Trade and Commerce:

There are a good number of work shops in the district engaged in the manufacturing of iron and steel goods, brass ware, oil, ice, bidi, soap, furniture, taps and dyes silk goods, plastic goods and several other articles of daily use. Rural and cottage industries manufacture handloom cloth, leather, shoes, gur, oil, earthern pots, ropes and article from bamboo. The handloom industry is the oldest and an important one and more than half of the units are situated at Mauranipur and Ranipur. These industries are largely run by co-operatives.

Availability of raw material and transportation facilities in the district provides good possibilities for the establishment of new industries. Felspar, granite and sand which are mostly exported can be used locally for the pottery and buildings materials, Linseed can also be put for use in paint and varnishes.

In this district an industrial zone was setup by U.P. State Industrial Development Limited Kanpur at Jhansi –Lalitpur road in 1999-2000. where 48 units were working at Bijauli industrial zone. In district two industrial shades are working, one is three km. away from Jhansi on the Jhansi-Gwalior road. Where 10 units are running. In industrial shades Gram Sakari Mauranis, 5 units are running.

Single table system under one roof was running in district since 1.1.1999 in which all problems or formalities related to the establishment of the new industry are completed at one place. In this district a growth centre is established at 9 km. away from Jhansi city.

Transport:

In 1996-97 total length of the roads in the district was 1,791.00 km. in which 1,563 km. was pitch road, 359 villages ware attached with roads in 1999-2000. The chief mode of road transportation in the district is operated by U.P. State Transport Nigam and M.P. State Transport and private buses and taxis.

In the district 171 km broad gauge railway lines are covered by 16 railway stations. Jhansi is the junction station. Shatabdi express and many other super fast trains pass Through Jhansi railway station. For air services airpad are under construction.

Electricity and Power:

In march 2000, total 581 villages were electrified out of 760 inhabited villages of the district. Thus 76.64 per cent inhabited village of were electrified. In 1999-2000 total 430,060 000 kilowatt hours electricity was consumed. In also a total of 125.11 km. electric lines were installed and 3,075 new home connections, 39 industrial connections and 37 personal tube well connections were given and further 23 villages were electrified.

Gram Panchayat, its Composition, Jurisdiction and role in village Development:

A Gram Panchyat acts as the executive of the Gram Sabha.

The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat.

It is necessary that the village Panchayat should have member belonging to the scheduled caste and also a women member. If they are not elected, then the government itself appoints two such members, The village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

The new Panchayat Raj Act of 1993 has fixed a uniform five-year for every Panchayat.It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

In order to be elected to a village panchayat, a candidate should possess the following qualifications:

(1) He should be resident of the village concerned and his name should be in the voter's list of the village.

(2) He should be twenty-five year old.

(3) He should be mentally and physically sound.

(4) He should not be a proclaimed offender.

Functions

A Gram panchayat is entrusted with various social, economic and judicial function.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Center opened in the village. The Panchayat has also provide land and building for such a center
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works

Department of the district.

6. It arranges for sufficient irrigational facilities, improved seeds, insectaries, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.

7. It manages and maintains the common property of the village.

It some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes finc unto Rs.100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc. have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/

Hotel building was treated as one census house. but if such hostels/hotels havc out-houses or othcr structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village:

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveycd areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area:

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously;

i) a minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits and

iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City:

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration:

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each

such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) A city or town with one or more contiguous outgrowths;

ii) Two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household:

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household:

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household:

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the

Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia,
25 Chero
26 Dabgar
27 Dhangar
28 Dhanuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
33 Dusadh
34 Gharami
35 Ghasiya
36 Gond
37 Gual
38 Habura
39 Hari
40 Hela
41 Jhusia, Jatawa
42 Kalabaz
43 Kanjar
44 Kapariya
45 Karwal
46 Khairaha
47 Kharwar
(excluding Banbasi)
48 Khatik
49 Khorot
50 Kol
51 Kori
52 Korwa
53 Lalbegi
54 Majhwar
55 Mazhabi
56 Musahar
57 Nat
58 Pankha
59 Parahiya
60 Pasi, Tarmali
61 Patari
62 Rawat
63 Saharya
64 Sanaurhiya
65 Sansiya
66 Shilpkar
67 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate:

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate:

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level:

The highest level of education a person has completed

Work:

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker:

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker:

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker:

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator:

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (arcca).

Agricultural labourer:

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker:

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker:

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate:

Percentage of workers (main + marginal) to total population.

Population density:

Population density is the number of persons inhabited per square kilometer of the area.

Age:

Age is measured in terms of the completed number of years.

Sex-ratio:

Number of females per 1,000 males in a population.

(vi) Non Census Concepts:

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage:

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil:

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility:

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR):

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR):

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate:

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR):

Number of live births in a year to female population in any specified age group normally

expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR):

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR):

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR):

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR):

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR \,/\, 1{,}000$$

Total marital fertility rate (TMFR):

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR \,/\, 1{,}000$$

Age-specific mortality rate (ASMR):

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR):

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as·

Neo-natal mortality rate (NMR):

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate:

Number of infant deaths of less than 7 days during the year

$$= \frac{\text{Number of live births during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate:

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR):

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR):

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR):

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR):

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 Population):

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4):

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9):

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration:

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration:

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units:

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc

Size class of UA / town:

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area:

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city:

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities In 2001 Census, cities with 10 millions and above population have been treated as Mega cities

(vii) 2001 Census findings:

Population Distribution :

The total population of the district is 1744,931divided into the 1,033,171 in rural and 711,760 in urban areas. The most populous tahsil is Jhansi with 790,187. population followed by Mauranipur. tahsil a with population of 332,584 . The least populous tahsil is Tahrauli with a population of

151,202. The maximum urban population is at Jhansi tehsil which is 538,805 followed by at Mauranipur with 75,308.urban population whereas the least urban population is in Tahrauli tahsil which is .10,104 At the 2001 Census the district has about 40.8. per cent of its population living in towns. As compated to this in the State the same is 20.8 per cent. The population of urban population is highest at 68.2 per cent in Jhansi tehsil followed by 22.6 per cent in Mauranipur. tehsil and least of 6.7 per cent the .Tahrauli. tehsil.

Size, Class and Status of Towns:

There are 16 statutory and 2 Census Town in the district. There are three class 3 towns. with more than 100,000.population. Mauranipur NPP.with a population of 50,882 is Class II town. There are four Class .III towns. In the district There are seven class IV towns and five towns in size class of V. Jhansi town is alone is Nagar Nigam.

Population Growth:

The population of the district in 1991 adjusted to jurisdiction of 2001 was 1,429,698 in the district. The population of the district at 2001 Census is 1,744,931 There has been decadal wherein population since 1991 amounting to 1,429,698 in absolute term (25.74 per cent). The males who were 767,430.at 1991 Census increased to 932,818 and females increased from 662,268 to 812,113 As against to 22.0 per cent decadal growth in the district, the growth rate has decreased 3.69 per cent in the state of Uttar Pradesh..

Population Density:

The area of the district is 5,024.square kilometre. The density of population in the district is 347 as compared to 690. in the state. In the rural areas of the district the population density is 213.

Sex ratio:

The sex ratio in the district is 871., while it is 898 in the state of Uttar Pradesh. In the rural areas of the district the sex ratio is low at 870, while it is 871 in urban areas. The rural sex ratio of the district is lower to the state. The sex ratio among tahsils varies between 879 in Mauranipur to 856 in Garautha Among C.D. blocks the sex ratio varies from 884.in Bangra. to 849 in Bamaur The sex ration in rural population in the district comes to 870. Among towns of the district the least sex ratio is found in Babina cantt (597) and highest in Gursarai and Garautha (904). The sex ratio of population in the age-group 0-6 is 886. in the district which is higher to 871.from the general population. The sex ratio of population of the age-group 0-6 the rural areas is 892 against .874.in urban areas. The sex ratio of population in the age-group 0-6 among C.D. blocks varies from as low as .876..from Moth..to as high as 910.in Bamaur and Babina. The sex ratio of rural population in the age-group 0-6 by ranges for per cent population in the range. The sex ratio of population in the age-group 0-6. Among towns varies from 196. in Moth (NPP) to 953 in Erick (NP).

Work Participation Rate:

In the district 37.0 per cent comprising 646,007persons pertains to the category of working population. Average males the working population is .49.1 per cent against about 23.1 per cent among females. Main workers constitute 26.8. per cent of population. Female workers predominate male among marginal workers. Non-workers contribute 63.0 per cent of total population. Out of these 24.1 per cent are from the urban population. In rural areas 76.9. per cent females are Non-workers. Of the total worker population in the district 39.9 per cent are cultivators, 20.8 per cent engaged as agricultural labourers, 5.9. per cent in household industry and 33.5.per cent as other workers. Among male workers 40.0 per cent are cultivators as compared to 39.6 per cent among females. Similarly as against 41.5 per cent male other workers, the proportion of female is only 13.8 per cent. In rural areas of the district as much as 55.7 per cent of working population is cultivators as against only 6.6.per cent in urban areas. In case of other workers, the composition of rural and urban proportion is 12.3 and 78.0 per cent of working population. It may be mentioned that the working population in the district is about 37.0. per cent as compared to .32.5. per cent in the state.

Literacy:

In the district about 65.5 per cent of the population is literate as against 56.3 per cent in the state of Uttar Pradesh In the district 78.8 per cent of the male population is literate as compared to 68.8. per cent in the state. However, among females the literacy in the district to 50.2 per cent as compared to 42.2. per cent at the state level. In the district literacy rate is 76.6 per cent in urban areas as against 57.5. per cent in rural areas. The literacy is 76.6 per cent in urban areas. The gap in male/female literacy rate is 34.0 per cent in rural areas as

compared to 18.5 per cent in urban areas. The literacy rate among C.D. blocks varies between 49.4..per cent in Babina to 64.6 per cent in Moth Similarly, the literacy rate among towns varies from

(viii) Brief analysis of PCA data based on inset tablcs 1 to 36 :

The district throws up a vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables 1 to 36:

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Moth				269,887	222,547	47,340					17.5
2	Garautha				201,071	160,868	40,203					20
3	Tahrauli **		N.A.		151,202	141,098	10,104		N.A.			6.7
4	Mauranipur				332,584	257,276	75,308					22.6
5	Jhansi				790,187	251,382	538,805					68.2
District Total		**1,429,698**	**863,342**	**566,356**	**1,744,931**	**1,033,171**	**711,760**	**22**	**19**	**25.7**	**39.6**	**40.8**

The growth rates of Jhansi district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 22.0 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 19.7 and 25.7 per cent respectively . Out of the total population of the district 59.2 per cent lives in rural areas while 40.8 per cent lives in urban areas of the district. The proportion of urban population has slighyly increased during the decade from 39.6 per cent in 1991 to 40.8 per cent in 2001 in the district.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial No.	District / C.D. block	Total number of in-habited villages	Total rural population			Number and percen-tage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 764 inhabited villages, 48 (6.3 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 109 villages having 14.3 per cent villages of the district while in the size class of 500-999 population claims 209 villages with 27.4 per cent of the total villages in the district. 245villages (32.1 per cent) are in the size class of 1,000-1,999 and 140 villages (18.3 per cent) are in the size class of 2,000-4,999. Only 13 of villages (1.7 per cent) are fall in the ranges of 5,000 and above population. None of the villages in the district fall in the range of 10,000 and above.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New

(i) Statutory town – 2

(ii) Census town – 2

(b) Denotified – NIL

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns – NIL

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL

(iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified - NIL

(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	34	4.5	19686	1.9
11-20	4	0.5	2550	0.2
21-50	23	3.0	13452	1.3

Not known	0	0.0	0	0.0
District Total	**764**	***100.0***	***1033171***	***100.0***

This table shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 236 accounting for 30.9 per cent of the total inhabited villages of the district fall in the density range of 101-200 persons having 21.4 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 38 villages (5 per cent). 64 villages (8.4 per cent) have very high density with more than 501 persons per sq. km. while the corresponding proportion in the lower range of 0 to 20 is 5 per cent of the total inhabited villages having 2.1 per cent population of the district. In the medium densities ranges of 21 to 50 and 51-100 persons account for 3.0 and 5.5 per cent of inhabited villages respectively. Both these ranges claim 3.3 per cent rural population. Corresponding proportion in the range of 201-500 is 47.3 per cent of the total inhabited villages having 58 per cent population of the district.

TABLE-5: SEX RATIO OF STATE AND DISTRICT 1991-2001

Census Year	UTTAR PRADESH			JHANSI		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	956	966	918
1911	916	922	866	946	970	872
1921	908	918	834	924	957	834
1931	903	916	813	932	955	871
1941	907	922	824	935	954	888
1951	908	922	827	916	942	865
1961	907	921	817	890	920	832
1971	876	884	826	879	876	887
1981	882	889	850	869	855	891
1991	876	879	864	863	852	880
2001	898	904	876	871	870	871

NOTE- Sex ratio has been defined here as the numberof females per 1000 males

As per 2001 Census sex-ratio of 871 females per 1,000 males has been recorded in the district against the state average of 898 The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 1951 and remained below the state average figures during this period. The subsequent decades show mixed trend from 1961 to 2001 and value remained low the state average. The lowest sex ratio of 863 females per 1000 males were recorded in the district during 1991 against the state average of 882females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in state, but in district this trend fallow up to 1961 and after than trend is reversed and sex ratio in urban areas increases in caparison to rural area.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Moth	875	876	872
2	Garautha	856	844	903
3	Tahrauli **	876	877	858
4	Mauranipur	879	879	881
5	Jhansi	868	870	867
District Total:		**871**	**870**	**871**

The table-6 gives sex-ratios for total, rural and urban areas at tehsil/sub-tehsil level as per 2001 census. There are 871 females for every thousand males in Jhansi district. The sex-ratio among rural and urban population is 870 and 871 females respectively. The rural sex-ratio in the tehsils varies between 844 in Garautha tehsil and 879 females per 1,000 males in Mauranipur sub-tehsil. The sex-ratio in Moth,Tahrauli, and Mauranipur Tegsils is higher than district rural average (870) In urban areas the highest sex-ratio is recorded in Garautha (903) and the lowest is in Tahrauli urban (858).

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial No.	Name of C D block	Sex ratio
1	2	3
1	Moth	873
2	Chirgaon	878
3	Bamaur	849
4	Gursarai	858
5	Bangra	884
6	Mauranipur	877
7	Babina	870
8	Badagaon	870
9	Forest Villages	333
District (Rural) Total		**870**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 870 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 884 females is found in Bangra C.D. block and is fallowed by Chirgaon (878) and Mauranipur(877) while the lowest of 849 is recorded in Bamaur C.D. block. The sex-ratios of Gursarai and Bamaur C.D. block are 849 than the district rural average of 870 females and in remaining blocks, this value is either equal to or greater than the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	18	2.4	850	0.1

Sex ratio (Rural) for District		**870**		

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 294 accounting for 38.5 per cent of the total villages having largest population of 43.4 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 900-949 which claims 172 villages (22.5 per cent) and 22.6 per cent population. The highest range of 1,100 & above claims only villages (0.5 per cent). While in the sex-ratio range of 800-849, there are 162 villages (21.2 per cent) accommodating 24.7 per cent populating. In remaining sex-ratio ranges of 1000-1099,950-999, 750-799, 700-749 and less than 700, the number of villages are 14 (1.8 per cent), 34 (4.5 per cent), 57 (7.5 per cent), 9 (1.2 per cent) and 18 (2.4 per cent) respectively. In these ranges, the percentage of population is comparatively low.. The maximum number of villages i.e 274 having maximum population (43.4 per cent) fall in the sex-ratio ranges of 850-899.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tehsils of the district. Total population in age-group 0-6 is280589 persons comprising 148811 males and 131778 females. The total sex-ratio in this age-group works out 886 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 892 and 874 females in this age-group respectively. The rural sex-ratio in tehsil/sub-tehsil varies between 883 in Moth tehsil and 910 in Garautha tehsil. The sex-ratio of Garautha and Jhansi (T) are higher than district rural average (892) whereas it is lower in Moth,Tahrauli and Mauranipur Tahsils. The sex ratio of total rural population is 870 as against 892 in the age group 0-6 of the rural population. The position of sex ratio in urban areas in this age group (874) is slightly higher as compared to the sex ratio observed for total urban (871) population in the district.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

District (Rural) Total		**180,951**	**95,638**	**85,313**	**892**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the

district. The sex-ratio is 892 for the district (rural). The sex-ratio of C.D. block varies between 876 to 910 . It is highest in Bamaur and Babina C.D. blocks i.e. 910 followed by 893 in Bangra C.D. block and lowest 876 females is found in Month C.D. block. The sex-ratio of Bangra and Babina C.D. block are higher than the district rural (892) and Gursari C.D. Block equals to the district average while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	73	9.6	6,019	3.3

District (Rural) Total	**764**	**100.0**	**180,951**	**100.0**
Sex ratio (Rural) for District		**892**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 108 (14.1 per cent) having largest population (18.9 per cent) in the district (rural) fall in the sex-ratio range of 850-899 females per 1,000 males in age of 0-6 years The similar number of villages i.e. 108 (14.1 per cent) having population 14.1 per cent fall in the sex-ratio range of 1000-1099 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio ranges of 800-849 & 900-949, which claims 98 villages (12.8 per cent) and 14.9 and 16.3 per cent population respectively. Next to it, 90 villages each range (11.8 per cent) are in the range of 750-799 with 11.6 per cent population. 78 villages (10.2 per cent) having 5.0 per cent population fall in sex-ratio range of 1100+ and above. In remaining sex-ratio ranges of 950-999,700-749 and less than 700 claim less number of villages and these are distributed as 68 (8.9 per cent). 43 (5.6 per cent) and 73 (9.6 per cent), respectively In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 304 having population (51.5 per cent) fall in the higher sex-ratio ranges of 750-949 and above.

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomerations/towns 2001. Total population in age group 0-6 in urban area of the district 99,638 persons comprising 53,173 males and 46,465 females and sex ratio of the urban areas of the district is 874 females per 1,000 males. Among towns sex ratio in age group 0-6 varies from 796 in Moth (N.P.) town to 953 in Erich (N.P.) The sex-ratio in all the towns is above the district average (874) except 4 towns namely moth (N.P.), Chirgaon (N.P.P), Jhansi (C.B.) and Jhansi Railway settlement.

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1744931

total population of the district, 28.1 per cent of the total population belong to the Scheduled Castes and 0.1 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 31.9 per cent in rural population and 22.4 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Tahrauli tehsil (35.3) while the lowest is found in Jhansi tehsil (23) The proportion of Scheduled Tribes population is 0.1 per cent in rural and urban areas both in the district. Scheduled Tribes population in the district is mainly concentrated in tehsil Jhansi (0.1 per cent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

District (Rural) Total		**1,033,171**	**329,975**	**677**	**31.9**	**0.1**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 31.9 per cent of rural population of the district belongs to Scheduled Castes and 0.1 per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 26.1 per cent in Babina and 35.8 per cent in Mauranipur C.D. block.. The other C.D. block containing the highest percentage of Scheduled Castes are Gersarai(35.7) Bangra (35.4) and Bamaur(34.6) The highest proportion of 0.4 per cent Scheduled Tribes population is counted in Babina C.D. block and is fallowed by Badagaon (0.1) C.D. block. The lowest percentage of Scheduled Tribes is recorded in Badagaon(0.1) C.D. block. The Scheduled Tribes population in the district is mainly concentrated in Babina and Badgaon C.D. blocks.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

76 and above	9	1.2	1,371	0.4
District Total	**764**	**100.0**	**329,975**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to total population in different ranges of percentage at district level.43 villages accounting for 5.6 per cent

of total 764 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5 per cent in 21 villages (2.7 per cent). In 32 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 94 villages constituting 12.3 per cent of the total villages. The range 21-30 and 31-40 per cent contains 207 and 185 villages respectively. Both these ranges together account for 51.3 per cent villages of the district. 182 villages fall in the range of 41-50 and above per cent. 9 villages are such where the percentage range of Scheduled Castes to total population is more than 76 per cent. These villages contain only 0.4 per cent Scheduled Castes population of the district. The maximum of the 33.7 per cent of the Scheduled Castes population is covered by range of 31-40 per cent. villages respectively. Both these ranges together account for 27.8 per cent villages of the district. 24 villages fall in the range of 41-50 and 51-75 percent fall in 15 villages (3.8 per cent) and 2 villages (0.5 per cent) are in the range of 76 and above per cent and these villages contain 1.1 per cent Scheduled Castes population of the district. The maximum of 33.4 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	746	97.6	0	0.0
Less than 5	12	1.6	176	26.0
5-10	4	0.5	303	44.8
11-20	1	0.1	87	12.9
21-30	1	0.1	111	16.4
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. 0.1 per cent of rural population of the district belong to Scheduled Tribes population. There are 746 (97.6 per cent) villages where none of Scheduled Tribes have been recorded in the district. remaining 18 (2.3 per cent) villages have proportion of Scheduled Tribes population up to range 5 to 30 per cent Out of these 12 villages are such where proportion of Scheduled Tribes population is less than 5 per cent accounting for 26.0 per cent of the total Scheduled tribes population of the district. In 4 villages the proportion of Scheduled Tribes population ranges between 5-10 per cent accounting for 44.8 per cent of the total population of the district. There is one village each lie in the range of 11-20 and 21-30 per cent accounting for 12.9 and 16.4 per cent of the total Scheduled tribes population respectively.

District(Urban) Total		**711,760**	**159,788**	**393**	**22.4**	**0.1**

Table 18 shows number and percentage of scheduled caste and scheduled tribes population recorded in urban Agglomerations/towns during 2001 census in district Jhansi. Of the 711760 total urbanm population of the district,only 22.4 per cent belongs to Scheduled castes. The highest percentage of Scheduled castes poopulation is recorded in Ranipur (N.P.) (45.4), while the lowest percentage found in Barua Sagar (NPP.) (11.5 per cent). Similarly, in urban population of the district obnly 0.1 per cent belongs to Schedled tribes. The Scheduled tribes population in Parichha (C.T.), Khailar (C.T.) and Babina (C.B.) are 0.8,0.6 and 0.2 per cent respectively and in remaining urban units there is either nine or nearing zero per cent of S.T. population.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial No.	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Moth	879	667
2	Chirgaon	879	0

7	Babina	873	929
8	Badagaon	869	933
9	Forest Villages	0	0
District (Rural) Total		**870**	**886**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 870 for district (rural). Among the C.D.blocks, the highest sex ratio of 879 females is found in each Moth and Chirgaon C.D. blocks and lowest of 847 females is recorded in Bamaur C.D. block. The sex ratio of Scheduled tribes is 886 for district (rural). It is highest in Badagaon (C.D.) Block 933 and lowest in Gursarai (C.D.) Block (629). the Scheduled castes sex ratio is higher in Moth,Chirgaon,Bangra and babina (C.D.) Blocks than the district ratio of 870. Similarly the Scheduled Tribes sex ratio is higher in Babina and Badagaon (C.D.) Blocks than the district ratio of 870. similarly the Banina and Badagaon (C.D.) Blocks than the sex ratio observed at district level.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sex ratio (Urban) for the district		**882**	**899**

Table 20 shows sex-ratio among scheduled castes and scheduled tribes in urban agglomerations/towns during 2001 census. A sex ratio of 882 females per 1000 males has been recorded for urban areas in the district for Scheduled castes and 899 for Scheduled trubes. Among towns, sex ratio for Scheduled castes is highest in Jhansi (C.B.) (937) and lowest in Kathera (N.P.) (840).

Among Scheduled tribes it is highest in Babina (C.B.) (1,182) and lowest in Jhansi (NPP.) (709).

District and tehsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 65.5 per cent in the district. This proportion in rural area is 57.5 per cent against 76.6 per cent in urban areas. In the district the literacy rates of males (78.8 per cent) is much higher than that of females (50.2 per cent). Among the tehsils, Jhansi tehsil tops with 70.4 per cent literates followed by Moth –tehsil(66.7 per cent). Mauranipur tehsil with 58.0 per cent literates stands at the bottam in the district. Out of 5 tehsils, the literacy rates of one tehsil i.e. Jhansi is higher than that of district average.

The gap between male and female literacy is very high which comes to28.6 per cent in the district, as a whole. The situation at tehsil level is not much different. However this gap in urban literacy is low which comes to 18.5 points against the rural areas, where the gap between male and female literacy is 35.9 points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District (Rural) Total		**489,913**	**338,667**	**151,246**	**543,258**	**213,712**	**329,546**	**57.5**	**74.1**	**38.2**	**35.9**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 57.5 per cent of the total rural population excluding the age-group of 0-6 years

literates in the district. The corresponding proportion of male and female literates comes to 74.1 and 38.2 per cent respectively which shows very wide gap of 35.9 per cent in male and female literacy. At C.D. block level, Moth C.D. block has the highest rural literacy rate of 64.6 per cent while 81.2 per cent males and 45.5 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Babina C.D. block (49.4 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 37.2 points is found in Gursarai C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	12	0 0
1-10	2	0.3	513	0.0
11-20	3	0.4	1,801	0 2
21-30	22	2.9	19,881	1.9

71-80	64	8.4	88,000	8 5
81-90	5	0.7	2,991	0 3
91-99	1	0.1	69	0 0
100	3	0.4	6	0 0
District Total	**764**	**100.0**	**1,033,171**	**100.0**

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 1 village (0.1 per cent) of the district and population of these villages is only 12 persons. 3 villages (0.4 per cent) have all the literate population. 261 villages accounting for 34.2 per cent of the total villages are in the literacy range of 61-70 per cent and 231 villages (30.2 per cent) fall in the literacy range of 51-60 per cent. The lower literacy rate of 1 to 50 per cent observed in 198 villages (26.0 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 73 villages (9.6 per cent). The range of 41-70 have the maximum number of 611 villages forming 80.0 per cent of the total inhabited villages.

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Parichha C.T. is way ahead of other towns The table reveals that literacy rate is high in the urban areas of the district (76.6 per cent). The literacy rate is quite high (above 82.0 per cent in 15 towns) among males. Female literacy rate is not for behind in 6 towns (above 70 per cent) However, literacy rate among females is very low (37 3 per cent) in Tondi Fatehpur (NP) here the gap in male female literacy rate is very high (36.6).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

The table 25 gives number and percentage of Scheduled castes literates and illiterates by sex in C D blocks at the 2001 Census The number of literates is less than illiterates in all the C D blocks

of the district. In rural areas of the district proportion of literates is 51.9+ per cent in which 69.7 per cent males and 31.3 per cent females. Thus the gap in male and female literacy rates is 38.4 per cent point. The highest literates are in Moth C.D. Block (58.1 per cent) as against lowest (44.8 per cent) in Babina C.D. block. The gap in male and female literacy rate is highest (40.9 per cent) in Chirgaon C.D. Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Literacy rate for District (Rural)		**51.9**		

The table 26 presents the distribution of villages by literacy rate range for scheduled castes population at the 2001 census. Maximum number of villages (236) are in literacy rate range of 51-60 with population of 115,551 which also carries highest percentage of population (35.0). In contrast to this lowest number of only 4 villages (0.6 per cent) is in the literacy rate range of zero with its population being 87. None of the village falls in the literacy rate range of 91-100 per cent. It is observed than in the literacy rate ranges from 31 80, there are 660 villages(91.5 per cent) covering 95.8 per cent of the population.

TABLE27 :NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

The table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The percentage of literates is least in Samthar NPP.(49.1 per cent) among towns but the gap in male/female literate rate is highest in case of Tandi Fatehpur (N.P.) town. The males in all the towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Jhansi C.B.(19.3 per cent).

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial No.	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

District (Rural) Total		**113**	**88**	**25**	**564**	**271**	**293**	**21.2**	**31.2**	**10.0**	**21.2**

The table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of literates is less than illiterates in the district and CD Blocks. The literacy rate of the scheduled tribes population is 21.2 per cent which is lower than the corresponding rate of 52 per cent in case of scheduled castes community. The gap in male and female literacy rates at about 21.2 per cent is also lesser than what it is in case of the scheduled castes community (about 38 per cent).

The percentage of literacy in C.D. blocks varies between 47.9 per cent in Gursarai C.D. Block and 12.8 per cent in Babina C.D.Block.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5

100	0	0 0	0	0 0
District Total	**18**	**100.0**	**677**	**100.0**
Literacy rate for District (Rural)		**21.2**		

The table 29 gives the distribution of villages by literacy rate range for the scheduled tribes population at the 2001 census. In the district the scheduled tribes population is found in 18 villages out of which in 3 villages (16.7 per cent) the literacy range is zero per cent. However, the maximum (46.5 per cent) of the scheduled tribes population is found in only 4 villages with literacy range from 1 to 10 percentages fallowed by 26.0 per cent of the population is found in only 5 villages with literacy range from 31 to 40 percentages.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

The table 30 gives number and percentage of scheduled tribes literates and illiterates by sex in urban agglomerations/town population at the 2001 census. There is small scheduled tribes population in the towns of the district. There are 18 towns of that only five towns tribe population. out of the total Scheduled Tribe population in the district 22.9 per cent and literate comprising 31.6 per cent for males and 13 per cent females. The gap in male and female literacy is 18.6 per cent. the rate of literacy is highest in Jhansi Railways settlements (ITS) and lowest in Babina (CB) 5.4 per cent.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN TAHSILS, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tehsils level in the district as per 2001 Census. The proportion of the total workers works out 37 per cent of the total population in the district. The total workers are comprised of 26.8 per cent of main workers and 10.3 per cent of marginal workers and the remaining 63 per cent are non-workers.

Among the main workers, males participation rate in the district is 42.2 per cent and 9.1 per cent of females. Male and female marginal workers account for 7 and 14 per cent respectively. The percentage of females marginal workers is higher than males. Total workers (main and marginal workers) among tehsils varies from 32 per cent in Jhansi tehsil to 44.3 per cent in Tahrauli tehsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 1033171 total rural population of the district, 28.6 per cent has been categorised as main workers and the marginal workers constitute 13.8 per cent and the remaining 57.6 per cent fall in the category of non-workers The sex-wise break up at the district level shows that 43.9 per cent males and 10 9 per cent females are in the category of main workers Male and female marginal workers account for 7.7 and 20.9 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 42.4 per cent. At the C.D. block level, Bamaur has highest proportion of total workers forming 45.5 per cent of the total population. It is closely followed by Gursari (45.2 per cent), Mauranipur (44.7 per cent), Chirgaon (42 8 per cent), Moth (41.7 per cent) and Bangra (41 5 per cent). The lowest percentage of 38.4 per cent is recorded in Badgaon C.D. block.

The table 33 gives number and per cent of main worker, marginal workers and non workers by sex in urban area of the district at the 2001 census. The proportion of the total workers work out to 29.2 per cent of the total population of the district. The total workers are comprised of 24.1 per cent of main workers and 5.1 per cent of marginal workers and the remaining 70.8 per cent are non-workers.

Among the main workers, male participation rate in the district is 29.2 per cent whereas female participation rate is only 6.4 per cent. male and female marginal workers accounts for 56 per cent. Male and female marginal workers accounts for 6.0 per cent and 4.1 per cent respectively. the percentage of female marginal workers is lower than males. Total workers (Main and marginal workers) among towns varies from 24.8 per cent in Jhansi Railway Settlements to 43.0 per cent in Banina (CB).

				23.1	**39.6**	**37.7**	**9.0**	**13.8**

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 39.9 per cent of the total workers (main + marginal) and remaining 37.0 per cent of total workers are engaged as agricultural labourers (20.8 per cent), Household industry workers (5.9 per cent) and other workers (33.5 per cent) in this district.

The distribution of workers by four categories of economic activity at tehsil/sub-tehsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 22.3 per cent in Jhansi tehsil and 57.8 per cent in Tahrauli tehsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 39.6 per cent which is very close compared to 40.0 per cent of male cultivators in the district. The proportion of other workers varies between 8.2 per cent in Tahrauli tahsil and 61.0 per cent in Jhansi Tahsil. Similarly proportion of agricultural labourers varies between 9.7 per cent in Jhansi tahsil and 30.2 per cent in Tahrauli tahsil. The percentage of household industry workers is low in the district aw stated above.

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) 42.4 per cent of total population. Among these workers, cultivators constitute 55.7 per cent, 28.0 per cent agricultural labourers, 4.0 per cent household industry workers and 12.3 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 4.0 per cent workers of the total working force. Therefore surplus-working force has to depend on primary activities. Among cultivators, the percentage of males (60.7 per cent) is higher than females (46.5 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 44.9 per cent in Budergaon C.D. block to 58.8 per cent in Gursarai C.D. block. Similarly for other workers, the lowest proportion is 6.8 per cent in Gursari C.D. block while 24.1 per cent is the highest in Badugaon C.D. block. The percentage of agricultural labourers is highest in Bamaur (33.0 per cent) C.D. block and is followed by Month C.D Block (31.8) In Babina C.D. block, this proportion is lowest (17.1 per cent). Similarly, household industry workers varies in C.D. blocks between 2.4 per cent in Bamaur and 5.9 per cent in Bangra .

Table 36 presents distribution of workers by sex in four categories of economic activity. In urban areas of the district total workers (Main+marginal) 29.2 per cent of total population. Among these workers cultivators constitute 6.6 per cent, 5.6 per cent agriculture labour, 9.8 per cent household industry workers and 78.0 per cent othr workers. Other workers play a major role in accelerating the urban economy. Cultivators, agricultural labourers, household industry workers could not make much progres in urban areas as reflected in the data.

Among other workers, the percentage of males 83.5 is higher than females (50.7 per cent) in the urban areas of the district. The male play a major role in urban economy of the district. The percentage of other workers is highest in Jhansi Railway settlement (ITS) ((97.8 per cent) where as lowest in Tondi Fatehpur N.P. (24.0 per cent).

The percentage of cultivators is highest in Samthar (NPP.) (32.3 per cent) is followed by Tondi Fatehpur (28.8 per cent), Barwa sagar (NPP.) (25.9 pe cent) and Bara Gaon N.P. (22.0 per cent). In other towns, this proportion is low. Similarly agricultural labourers varies in between 0.2 per cent in Jhansi C.B. and 37.6 per cent in Erich (NP).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37-47:

One of the major parts of the District Census Handbook is Village and Town Directory. Non-census data showing educational, medical, drinking water, banking, communication facilities and other such developmental indicators are incorporated in the town and village directory. From non-census data, inset tables 37 to 47 have been generated and reproduced here showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 764 inhabited villages in the district 659 villages or 86.3 per cent have been provided with the education facilities of one type or the other. Similarly 285 villages in the district constituting 37.3 per cent have medical facilities of one type or the other. Improved drinking water facility is available in732 or 95.8 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 167 villages constituting 21.9 per cent of villages have been provided with post office facility within the village. 308 or 40.3 per cent villages have been provided with the telephone facility. 172 or 22.5 per cent with transport facility, 32 or 4 2 per cent villages with bank facility and 41 or 5.4 per cent with agricultural credit societies. Similarly there are 435 or 56.9 per cent villages which have been linked with the pucca road. Total 518 or 67.8 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation Babina C.D. block has the highest 95 8 per cent

villages where educational facility is available and lowest 78.7 per cent is found in Moth Medical facility is highest in Bamaur (60.4 per cent) and lowest (20.5 per cent) in Mouth C.D. block. Improved drinking water is available to most of the villages in all C.D.Blocks In fact, it is above 93.7 per cent. Telephone facility is highest in Bangra (56.1 per cent) while a lowest (29.8 per cent) in Mauranipur C.D. block. Transport and communications is less developed in Moth with respect to other C.D. Blocks where only 18.9 per cent villages are covered by this facility whereas 26.9 per cent villages of Chirgaon C.D. block are availing this facility.

TABLE38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities at C.D. Block level. Out of total rural population of 1,033,171 persons in the district, 993,954 or 96.2 per cent have educational facility of one or the other type. Similarly 580,711 or 56.2 per cent population has medical facilities while 1,023,038 or 99.0 per cent have got improved drinking water facility. Post office facilities are available to 428,233 or 41.4 per cent population. Telephone facility is available to 5263,65 or 50.9 per cent. Transport communications facility is available to 360,701 or 34.9 per cent. Bank facility is available to 97,177 or 9.4 per cent. 122,288 or 11.8 per cent have been provided with the facility of agricultural credit societies. 733,637 or 71.0 per cent have been provided with the facility of approach by

pucca road. Power supply is available to 840036 or 81.3 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col 2 - 4)

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 107 villages do not have primary school in their villages and out of these villages, children of 92 villages have to travel less than 5 kms. for schooling Out of 764 inhabited villages as many as 556 are deprived of middle school and 760 of degree college. Of these 327 avail the facility of middle school at a distance of less than 5 kms., 191 at a distance 5-10 kms. and the remaining 38 at a distance of 10+ kms. In respect of degree college 58avail this facility at a distance of less than 5 kms., 139 between 5 to 10 kms. and rest 563 villages at a distance of 10+ kms.

Similarly there are 738 villages in the district which have been devoid of Hospital facility and 749 villages which are deprived of PHC facilities. Of these 166villages have the facility of Hospital available within 5 kms. 269 villages 5-10 kms. and rest 303 villages have this facility at a distance of 10+ kms. As regards PHC 120 avail this facility at a distance of less than 5 kms., 240 at a distance of 5-10 kms. and the remaining 389 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 597 villages do not have this facility in the village itself. Of these majority i.e. 380 have this facility at a distance of less than 5 kms., another 166 villages avail it at a distance of 5-10 kms. In the remaining 51 villages inhabitants have to travel a distance of 10+ kms.

As regards Telephone, there are 456 villages in the district which are without telephone facility. Of these 170 avail this facility at a distance of less than 5 kms., 116 at a distance of 5-10 kms. and remaining 170 have to traverse a distance of 10+ kms.

For Bus service out of 618 villages which do not have facility, 279 villages avail this facility at a distance of less than 5 kms., 258 at a distance between 5-10 kms. and 81 at a distance of 10+ kms

In the entire district 740 villages are deprived of Commercial Bank & 747 of Co-operative Bank. Of

these 740 villages which are deprived of Commercial Banks 219 villages avail this facility at a distance of less than 5 kms., 275 between 5-10 kms. & the remaining 246 at a distance of 10+ kms. Regarding Co-operative Banks out of 747 villages 121 villages avail this facility at a distance of less than 5 kms., 290 at a distance of 5-10 kms. and remaining 336 at a distance of 10+ kms. 723 villages do not have agricultural credit societies. This facility to 256 villages is available at a distance of less than 5 kms., 310 at a distance of 5-10 kms. and the remaining 157 at a distance of 10+ kms.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town. Out of total 764 inhabited villages in the district, there are 90 villages which have nearest towns upto a distance of 5 kms. Of these only 74 villages forming 82.2 per cent of these total villages, are having the educational facilities of one type or the other and 27 villages constituting 30.0 per cent, have the medical facilities within the village, 11 villages forming 12.2 per cent have the facility of post office within the village and 31 or 34.4 per cent have the facility of telephone. 21 villages constituting 23.3 per cent have been linked by transport service. 2 villages comprising 2.2 per cent have been provided bank facilities, while 5 villages constituting only 5.6 per cent have been provided by agricultural credit societies. 54 villages comprising 60 per cent have been provided with pucca road.

There are 472 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 406 villages constituting 86.0 per cent have been provided with the educational facilities. 177 villages comprising 37.5 per cent have been provided with medical facilities. 118 villages constituting 25.0 per cent enjoy the post office facility. 192 villages comprising 40.7 per cent have been provided the telephone facility. 119 villages constituting 25.2 per cent have been linked with transport communications. 25 villages comprising 5.3 per cent have bank facility

and agricultural credit societies, while 281 villages or 59.5 per cent are approachable by pucca road. 155 villages fall in the distance range of 16-50 kms. Of these, 92.3 per cent villages have educational facility, 41.3 per cent with medical, 18.7 per cent with post office, 41.9 per cent with telephone and transport & communications available to 16.8 per cent villages. Banks and agricultural credit societies facilities are available to 1.9 and 6.5 per cent of villages. 50.3 per cent have been provided with pucca road.

There are 47 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 36 or 76.6 per cent villages have the educational facility of one or other type. 17 villages constituting 36.2 per cent with medical, 19.1 per cent with post office, 42.6 per cent with telephone and transport and communication available to 12.8 per cent villages. There are only two villages, which have bank facility, and only one village has agricultural credit societies. 22 villages have been provided with pucca road.

There are 272 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these, 227 villages constituting 83.5 per cent have been provided with the educational facilities. 244 villages comprising 89.7 per cent have been provided with medical facilities.58 villages constituting 21.3 per cent enjoy the post office facility. 112 villages comprising 41.2 per cent have been provided the telephone facility.57 villages constituting 21.0 per cent have been linked with transport communications. 15 villages comprising 5.5 per cent have banking facility 16 villages constituting 5.9 per cent are having Agricultural Credit Societies, while 193 villages or 71.0 per cent are approachable by pucca road 30 villages fall in the distance range of 16-50 kms. Of these, 25 villages (83.3 per cent) have educational facility, 27 (90.0 per cent) with medical, only 4, (13.3 per cent) with post office, 11 (36.7 per cent) with telephone and transport and communications is available to 10, (33.3 per cent) villages. Banks and Agricultural Credit Societies are available to 6.7 and 3.3 per cent of villages respectively. Approach to pucca road is in 73.3 percent villages.

* Based on the improved drinking water source, drinking water supply has been classified as Improved or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Jhansi district out of a total 764 inhabited villages, there are 157 villages have a population of less than 500 persons. Of these, 81 villages (51.6 per cent) have education facility, 11 (7.0 per cent) have medical facility, 133 (84.7 per cent) have improved drinking water facility. No village has post office,. Bank and agricultural credit society facilities. 31 villages (19.7 per cent) have telephone facility. 9 (5.7 per cent) have been linked by bus service. 54 villages (34.4 per cent) have been linked with pucca road. and 61 villages (38.9 per cent) have been provided with electricity.

Out of 209 villages, which fall in the population range of 500-999 persons, 184 villages (88.0 per cent) have been provided with the education facility, 51 (24.4 per cent) with medical facility, 203 villages (97.1 per cent) have improved drinking water facility. 9 villages (4.3 per cent) have been provided with post office facilities, 68 villages (32.5 per cent) with telephone facility, 38 villages (18.2 per cent) with transport facilities, 2 villages (1.0 per cent) with bank facility, and agricultural credit societies 100 villages (47.8 per cent) have approach by pucca road and 132 villages (63.2 per cent) in this range have electricity.

245villages fall in population range of 1,000-1,999 persons. Out of these 243 villages (99.2 per cent) have education, 111 villages (45.3 per cent) have medical facility, 244 villages (99.6 per cent) have improved drinking water facilities. 62 villages (25.3 per cent) have post office facility, 117 villages (47.8 per cent) have telephone facility, 55 villages (22.4 per cent) have transport communications facilities, 9 villages (3.7 per cent) have bank facilities, 11 villages (4.5 per cent) have agricultural credit societies and 149 villages (60.8 per cent) have approach by pucca road. 183 villages (74.7 per cent) have been provided with electricity.

There are 140 villages in the district which are covered under 2000-4999 population range. out of these 138 villages (98.6 per cent) have been provided with the education facility. 101 villages (72.1 per cent) have medical facility, 139 villages (99.3 per cent) have improved drinking water facility, 86 villages (61.4 per cent) have post office facility, 83 villages (59.3 per cent) have telephone facility and 60 villages (42.9 per cent)have transport and communication facilities. 16 villages (11.4 per cent) have bank facility. 23 villages (16.4 per cent) have agricultural credit societies, 121 villages (86.4 per cent) have been linked with pucca road and 130 villages (92.9 per cent) have electricity facility.

Out of 13 villages in the population range of 5000-9999 persons all the villages have educational and improved drinking water facilities. 84.6 per cent of villages have medical,76.9 per cent of villages have post office and 69.2 per cent of villages have telephone facilities. None of the village fall in the range of 10,000 and above persons.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial No.	Name of C. D. block	Number of inhabited villages	Total area in hectare	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Moth	127	55,311.0	90.8	70.8

8	Badagaon	84	41,773.6	58.8	69.2
9	Forest Villages	5	-	0.0	0.0
	District Total	**764**	**453,635.4**		**38.6**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes

irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 764 inhabited villages in the district having a total area of 453,635.4 hectares. Of this, 38.6 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Moth block with 127 villages have a total area of 55,311.1 hectares, of this 90.8 per cent of land is cultivable and of the aforesaid area 70.8 per cent is irrigated. In Gursari block, 106 villages have a total land area of 59,118.17 hectares, of this 86.6 per cent of land is cultivable and of the aforesaid area only 21.9 per cent is irrigated. In Chirgaon block, 104 villages have a total area of 46,127.8 hectares, of this cultivable area is 85.7 per cent and 73.1 per cent is irrigated. In Bamaur block, 101 villages have a total area of 70,035.2 hectares. Of this, cultivable area is 79.8 per cent. Of cultivable area 29.5 per cent is irrigated. Mauranipur block with 84 villages have a total land area of 66,282.6 hectares, of this 63.2 per cent is cultivable area and out of this cultivable area 55.1 per cent is irrigated.

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for a Bidi,Transformer and Electric Rail Engine. The chief export items of the district are Bidi and Transformer are the main items which are manufactured in the town and these are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48-52 :

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

* House list households.

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 286,015 consisting of 175,858 rural and 110,517 urban households. 89,255 households belong to Scheduled Castes and 4,098 to Scheduled Tribes. 256,115 households are living in their owned houses constituting 89.5 per cent of total households. Of these households, the largest number of households (88,608) have occupied three plus roomed accommodation and is followed by double roomed accommodation numbering to 68,546 households. Next position is claimed by households (58,799) occupying three roomed accommodation. Number of households in owned accommodation occupying one room rank at fourth place with 37,784 households while 2,378 households are without any exclusive room.

23,085 households living in rented accommodation account for 8.1 per cent of total number of households in the district. The largest number of 9,827 households are living in single roomed accommodation followed by 8,688 households in double roomed accommodation. Households with three rooms and three plus are 2,460 and 1,878 in numbers respectively. Other households numbering to 6,815 forming only 2.4 per cent of total households are distributed in single roomed accommodation numbering 2,479 and is followed by 2,453 double roomed and 1,048 in three roomed accommodation.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refer to those houses whose wall & roofs are made of pucca materials i.e., burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc oro t h e r metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate a re-used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refer to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that than 68.0 per cent of the households in the district had permanent houses. The trend is almost similar in rural (61.0 per cent) and urban area (79.3 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Jhansi (82.2 per cent) followed by Mauranipur (63.1 per cent), Tahrauli 54.5 per cent) Moth (57.8 per cent) and lowest in Garautha (50.0 per cent). In respect of semi-permanent houses, the returns were 31.2 per cent of district level where as among tahsils, in Garautha it was highest 49.1 per cent and lowest was 16.9 per cent in tahsil Jhansi. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 14.3 to 65.1 per cent. In respect of temporary houses, the returns were 0.8 per cent of district level, it was 1.5 per cent in tahsil Moth and lowest 0.3 per cent in tahsil Tahrauli, whereas temporary houses in rural and urban areas were in the percentage range of 0.2 to 1.7 and 0.1 to 1.0 respectively.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

* House list Households.

**Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises, it is considered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage means closed and open drainage.

The above table shows that out of total households of the district 59.3 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 46.5 and 79.8 per cent. Tahsil Moth had higher order of proportion of households where percentage for rural area was 74.5 and 85.3per cent in urban areas. Electricity was available for 43.3 per cent of households at district level households of the district had better access of electricity. Bathrooms and toilet facilities

were available in 39.9 and 35.2 per cent of households. At district level drainage facility was available for 64.1per cent of households, whereas the proportion of rural and urban areas households accounted to 48.4 and 89.2 per cent respectively.

* House list households.

Data source: Census of India 2001, H-series: Tables on Houses, Households amenities and Assets.

It is observed from the above table that to 35.9 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is to 38.2 and in urban area it comes to to 32.2 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in to 17.3 per cent of the households. The composition of rural and urban comes to to 2.2 and to 41.4 per cent respectively. Kerosene is used for cooking in as many as 6.1 per cent of the households (to 0.5 per cent rural and to 14.9 per cent urban households). The other methods like crop residence, cow dung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between to 0.2 per cent to 35.3 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is cow dung cake except in tahsil Jhansi where to 59.6 per cent of households use firewood. The table shows that firewood, cow dung cake, LPG (cooking gas) and kerosene are the predominant fuel for cooking in the district.

Data source: Census of India 2001, H-series: Table on Houses, Households amenities and Assets.
* Houselist Households.

The above table shows that 101568 household in the district avail banking facility in the district, whereas corrosponding of household in tahsil Jhansi, Moth , Mauranipur, Garautha and Tahrauli calculated to 57100, 16177, 14435, 8472 and 5384 respectively. Radio and transistor was possessed by 97,099 household in the district. The pattern is almost similar other tahsils. The distribution of households in Tahrauli, comes to 10,271 households in Moth 16,200 households in Garautha, 12,203 households in Mauranipur 20,571 and 37,854 households in Jhansi. The network of television was available to 102,737 households. As much as 26,661 household in the district had telephone connections. Availability of other assets like bicycle, scooter/moter cycle/moped and car/jeep/van came to the number of 67,711, 47290 and 6,877 respectively. More than 72935households in the district did not have none of these specified assets. The number among tahsils acounted to 13573 in Garautha, 10307 in Tahrauli.13861 in Moth, 18624 in Mauranipur and 7836 households in Jhansi tahsil.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

Neither any signifient social, cultural events nor any natural development has taken place during the last decade however, jurisdictional change has happened by formation a new tahsil e. g. Tahrauli by carving out 50 villages from Moth, 21 villages from Jhansi, and 80 villages and one town from Garautha tahsils. These intra district changes are the only administrative development of the last decade.

Under cultural event 'Jhansi Mahotsav' is celebrated every year in February/March month in which folk songs and dances are played and local people enjoy the function. In addition to aforesaid cultural activities defferent festivals of different religions are celebrated by district residents. Local fairs are celebrated on occassion of festivals.

(xii) Brief descriptions of places of religious, historical, archaeological importance in villages and places of tourist interest in the towns of the district

Jhansi:

The walled city and the headquarters of the district and the Division of the same name, revives the memories of that heroic young Rani Lakshmi Bai, who led her force into battle against the British imperialism during 1857-58. The city was founded by Raja Bir Sing Deo who built its fort on a rocky hill in 1613 AD. It is very well connected with rails and roads from all sides. The present township of Jhansi extends beyond the old wall which has ten gates and four *Khirkis* (entrances).

Places of tourist interest in Jhansi city are Rani Mahal, Jhansi fort and Government Garden. Rani Mahal, the residence of Rani Lakshmi Bai, with a good collection of exquisite sculptures of ninth to twelfth century has been turned into a museum by Archaeological Survey of India. Jhansi fort is another place of interest. It belonged to the great Rani Lakshmi Bai. Government Garden, Narain Bagh and Rani Lakshmi Bai park are the other places which attract the visitors to this place.

Dhakwa dam:

It is situated on Betwa road at about 11 kms, away in south east of Babina Cantt. and is connected with a metalled road from Babina. The site is full of jungle covered hills and a reservoir which forms charming piece of water.

Barua Sagar :

Named after the Barua Sagar Tal, it is a small historic town where a battle between the Peshwa's troops and Bundela's was fought in 1944. It is situated at a distance of about 24 kms. away from Jhansi on Jhansi-Mauranipur road. It is well connected with rail and road services. A fine old fort built by Raja Udit Singh is Picturesquelly situated here and commands an excellent view of large lake and surrounding landscape. The ruins of the two old Chandell's temples, the older one, known as Ghughua Math, being of granite and consisting of four cells, each with an ornamented door way, three bearing the image of Ganesh and fourth the figure of Durga are worth seeing. There is an old mound crowned with a tower (Known as Jarah-ki-Math) which contains an image of Shiva and Parvati. The eastern side of the tower in lavishly decorated with hooded balconies being projected towards the north and south. It is about 4.8kms. away in west of the town.

Erich:

It is said to be the birth place of Prahlad, the son of Hiranyakashyap. It is a small town, situated on the right bank of Betwa river about 70 kms away from Jhansi An old Hindu temple with four gates can be seen here. A relief of Hanuman is carved on one of its walls situated at about 60 feet above the

river and 30' feet from the top. This old temple is still in existence. The Jama Masjid in the town is said to have been built in 1413 A.D.

Mauranipur:

The town is the headquaters of the tahsil of the same name. There is an old fort in the town in which the tahsil and police station are located. The Jain temple of Dhamsh Dhasi Maharaj are said to be the oldest temples. This town is a place of repute for manufacturing of Khadi, terryecot, power loom cloth, footwear, baskets and trade in agriculture produce. About 6 kms. south west of the town, Kamla Sagar Dam has been constructed on the river Sarpar. Here is an Inspection House of irrigation department.

Gairba:

The village lies in Mauranipur tahsil at a distance of about 19kms north east. It has a small but beautiful temple apparently of great antiquity. The temple is situated at a small hill and is made of grey granite. The stones were cut to required size but no mortar was used in construction. The architectural plan is simple and logically projected. It has three sections, each having its own roof rising in regular gradation. There is a badly mutilated basalt image said to be that of the Buddha in Padamasana which bears an inscription on its base the date samvat 1,234(1177 A.D.).

Gurha:

Situated on the left bank of river Dhasan about 16 kms. south east of Garautha, has Nagonath hill, a conspicious land mark. On the top of the hill two old temples and a shrine of Mahadeo are situated in a cave. A Chandella baithak also exist at the foot of the hill. There is also an image of sage Vishwa Mittra, submerged in the Dhasan. It could be seen in summer if a dip is taken in the river. Fairs are held at these places in Kartika or Makar Sankranti.

Haibatpura:

Situated on Jhansi baragaon road in tahsil Garautha, there is a cluster of villages, the chief among them being Haibatpura, said to be of interest for having the remains of Chandella temples and carvings. The old Chandella tank has been brought under cultivation. There is an old temple which is in ruins. In Chutki there is an old Chandella baithak (building) locally known as Kutchery. It is associated with Alha and Udal, the Banaphar heroes. At Nunar there is weathered figure in granite, said to be that of Mahabir, the 24th tirthankara.

Pachhar:

It lies in Moth tahsil, about east of Jhansi. Here a copper plate was found and presented to the Government in 1908. The plate bears an inscription dated samvat 1233 (1176A.D.) and records the bestowal of Bilaspur (former name of Pachhar) by Raja Parnol of Kalinjar to a brahmana, Sri Keshwa Sharma.There is a small Chandella temple of carved granite.

(xiii) Major characteristics and contribution of the district

Jhansi district lies in the south-west of the state of Uttar Pradesh. Agriculture is the main occupation of the rural population and is also backbone of the district economy. Soils of the district are of mainly two types such as red and mixture of black. This district is situated mainly in Vindhyachal mountain range (plateaue) and basin of the rivers of Betwa and Dhasan. Irrigation facilities are very weak and depends mainly on the rain. Animal husbandry and fishery activities have better chances of development.

Infrastructure of the district has improved tremendously but Jhansi district is one of the backward districts of the U.P. In 1999-2000 total number of 4898 small scale and 13 medium and large scale industries were existing but out of 13 only 9 were functioning. Thus, there are better chances to setup new industries and improving capacity of the existing industries Since district is situated in Vendhyachal mountains cement industry has better chance to flourish. The district is well connected by railways and roads from other parts of country. Main

minerals of the district are stone, granite, parophilite, Diaspora, gypsum and sand.

Maharani Lakshmi Bai widow of the king Gangadhar Rao, lead the freedom struggle in 1857 in Jhansi and defeated British forces and attacked on Gwalior but she lost her life during war . National Poet Maithali Sharan Gupt, novelist Brindavan Lal Verma, Dr. Bhagwati Charan Verma were born in the district. This district had very important role in the freedom struggle of the country.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1. Population and households Cols.4 & 5
2. Amenities. Cols.6 to 13
3. Other infrastructural facilities etc. Cols.14 to 16
4. Availability of newspaper/ magazine Column 17
5. Commodities manufacture Column 18
6. Total area of village and land use pattern Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s)

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the

purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY
(SECTION I & II)

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is

available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i) Tap Water

(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc the same is indicated in codes mentioned below along with the number of banks in brackets If not available the distance of nearest place where the facility exist is given

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i e Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets In case the facility is not available within the village the distance of the nearest place where such facility exist is given

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village The same is recorded in these columns If not available the particulars of the nearest place with the facility is recorded The information is indicated in codes mentioned below along with the number of such facilities in brackets

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village The approach to the village is indicated in following codes

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.

Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.

SECTION II

TOWN DIRECTORY

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle

Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of 'internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which is in north –central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000.The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Jhansi
q1	Persons	99	67
	Males	98	61
	Females	104	73
q2	Persons	117	85
	Males	117	80
	Females	118	90
q5	Persons	134	111
	Males	135	93
	Females	132	132

(*Undivided Uttar Pradesh at 1991 Census)

The child mortality by ages 1, 2 and 5 years was lower in the district as against the State. The child mortality indicators in the district for females were in the improved condition as compared to the State by ages 1, 2 and 5 years.

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person Male/ Female	Uttar Pradesh	Jhansi
1	2	3	4	5
1	CBR		37.21	32 49
2	TFR		5.6	4.33
3	TMFR		6.3	4.99
4	GFR		172	145
5	GMFR		200	166
6	Mean age at marriage (1981-91)		17.27	16 65
7	Number of children ever born per ever married woman aged 45-49 years		4.59	4.5
8	Child woman ratio 0-4		631	584
	5-9		752	668

(i) Estimates of fertility indicators Uttar Pradesh Table # 2 23

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which ratio of the number of live births in a year to the mid year population, is 32.49 per cent in the district. It is below to the state of Uttar Pradesh i.e. of 37.21 per cent. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower proportion form the state figures. The conclusion that may be drawn is lower fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.27 years for the state where as 16.65 years has been observed for the district. It may be observed that higher age at marriage leads to low rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever married women in the age group 45-49. The state and the district figures are placed as 4.59 and 4.50 per cent respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-19 has been calculated to 584 and 668 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that fertility levels as such are below to the state average. Another important factors i.e. the probability of dying between birth and at age 1 has been of higher order in the district but at the age 2 and 5 it is more in case of persons, males and females in the state.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 44.9 in 1991, while in 2001 it was 44.6 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 54.2 percent and 55.0 percent respectively. This shows in-migration from other states to this district was increased in 2001 in comparison to 1991. At district level in-migration from other countries was 0 9

percent in 1991 and 0.4 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 48.7 percent and 54.1 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 51.0 percent and 45.2 percent respectively. The movement of population from other countries in the district was 0.3 percent in 1991 and 0.7 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 follow by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 90.3 percent in 1991 and 91.4 percent in 2001, while Muslim were 8.4 percent in 1991 and 7.4 percent in 2001. Rest of the four religions i.e.

Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 52.8 percent male and 43.4 percent female to 53.1 percent male and 43.9 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 44.4 percent and female was 51.4 percent in 1991 and in 2001 it was 44.4 percent male and 50.3 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.3 percent male and 5.6 percent female while it was 2.7 percent male and 5.2 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0 1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 44.5 percent male and 70.8 percent female in 1991 which declined to 33.8 percent male and 58.0 percent female in 2001. Primary level education was 13.3 percent male and 7.8 percent female in 1991, which was 18.0 percent male and 14.1 percent female in 2001. Middle level education was 12.5 percent male and 5.2 percent female in 1991 and 17.9 percent male and 9.2 percent female in 2001. Matriculation and above level of education was achieved by 16.6 percent male and

6.6 percent female in 1991 which was 25.4 percent male and 12.5 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001, while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note : For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02%. The remaining tongues have been merged in the column of "Total of Other Mother Tongues."

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 93.7 percent person in 1991 and 92.2 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas at district level

Bundelkhandi returned as second largest spoken mother tongue with 3.2 in 1991 and 5.6 in 2001 Census. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
