DISTRICT HAMIRPUR

CHANGE IN JURISDICTION 1991 - 2001

MOTIF

KALP VRIKSH

The unique 'Kalp-vriksh' erecting on the bank of Yamuna is the source of inspiration for people of the district Hamirpur. By tradition, town Hamirpur is said to be 'Pravesh Dwar' of Bundelkhand. The people of the district have distinction of patriotic culture among the entire Bundelkhand region. The age of the tree is unknown but may be conjectured hundred of years old. The scenic beauty of the 'kalp-vriksh' is magnificient and inspires an individual to grow and to be prosperous to touch the heights of the sky like a pillar. The nearby surrounding area of the tree is plain and un-inhabited. The tree contains numerous big branches looking like a tomb in shape. It is a property of forest department of the State government.

ANNESURES I to VIII

Annexure I Number of villages under each Gram Panchayat 415
Annexure II Fertility and Mortality, 1991 Census 415
Annexure III Various measures of fertility and mean age at marriage, 1991 Census 416
Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991Census 417
Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 419
Annexure VI Marital status of population as per 1991 Census 420
Annexure VII Age, Sex and Education in the district, 1991 Census 424
Annexure VIII Distribution of different mother tongues returned in 1991 Census 427

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of

all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Hamirpur ranks 67th in terms of population in the state.
2. The percentage share of urban population in the district is 16.7 as against 20.8 of the population in urban areas of the state.
3. Hamirpur district has population density of 244 persons per sq.km.which is less than the state average 690 persons per sq. km
4. Hamirpur district ranks 60th in terms of sex ratio (851) which is lower than the state average (898) females per one thousand males.
5. Hamirpur district ranks 37th in literacy 57.4 which is higher than the state average 56.3 percent.
6. There are only 127 uninhabited villages out of total 648 villages in the district.
7. Decadal growth rate of the district 18.0 is lower to the state average of 25.8
8. Rath tahsil has the highest number of inhabited villages (201) while Hamirpur (146) tahsil has the lowest number.
9. The district has 7 towns. No new town has been added after 1991 census and no town has been declassified.
10. There are 175,948 households in the district accounting for 0.68 per cent of the total households in the state. The average size of households in the district is 5.9 persons.

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" seems now to be a misnomer.

Brief History of the District

Hamirpur is one of the district of Bundelkhand Division. A little authentic information is known about the early history of the district. The first historical notice we get of the district is obtained from the Chinese traveler Hiuen Tsang, who visited Bundelkhand in 641-642 AD. The pilgrim has stated that the region was fertile and yielded good crops. The country was ruled by a Brahman king, who was a firm believer in Buddhism. There were more than ten Deva temples. The king patronised man of merit and a number of learned scholar from other kingdom adorned his court. After Harsha's death the history of district again enveloped in darkness for about half a century. During this period of political insatiability many ruler emerged. It is believed that Gond, Kols, Bhils and Bhars etc occupied the major part of the region. In 8th century Yoshaver-man, Paratihara ruler Vatsa Raja, Nag Bhatt II, Govind III – the Rashtra Kut King, the Chandel king and Nannuka ruled this area one by one. Between 836-925 AD Mihir Bhoj, Rohila and Harsha also ruled. It was followed by Harsha's son Yashover man and his son Dhanga (950-1008 AD). Dhanga was succeeded by his son Ganda (1008-1017 AD), who was also further succeeded by Vidyadhar, has distinguished himself by containing Mahmud Ghazni's triumphant carier and saving his kingdom by the ruthless invader. Between 1050-1060 AD Kalachuris reigned the region. Kirtiverman defeated Kalachuris and

established his kingdom (1060-1100 AD) and was succeeded by his son Sallaksanaver-man (1100-1115 AD), there after Jayaverman (1115-1120 AD) Prithiviverman (1120-29 AD), Madanverman (1129-1162 AD) Promidi deva, also ruled this region. For a short period in 1182 AD Maholia the capital of Chandel Kingdom was occupied by Prithivi Raj. But Paramidideva drew him out with in a short time. In 1202 Qutub-ud-din Aibak penetrated into his kingdom, thus the Chandel dynasty ended in 1203 AD. After it Ala-ud-din Khilji (1249-1316), Firoz Shah Tughlak (1376-83), Sikander Lodi (1488 AD), Rudra Pratap (1507 AD) and Mahmud Khan Bemgush (1728 AD) one after other ruled over this region until the British conquest. In between, there was Muslim power in this portion but certainly was ill-defined and did not extend far beyond the local headquarters. However, the scene of the earliest Bundela exploits lies outside the boundaries of the district. Bundelas became an important factor in the history of the tract only after the beginning of the 16th century. The Bundelas are now survived in Hamirpur through their remains, though very few, like those of the Mughals. Ultimately by an agreement dated December 16th, 1803, it was agreed "to cede in perpetuity to the Hon'ble East India Company from the province of Bundelkhand conquered for the Poona State by Ali Bahadur, territory yielding an estimated annual revenue of Rs. 36,16,000". In the year 1804, the capture of Kalpi effectually confirmed the British occupation of Bundelkhand. Thereafter, the district was extremely disturbed till 1812. From 1812 to 1857 it remained almost undisturbed. At the outbreak of mutiny, the composition of the district was the same as it is now Jaitpur and Mahoba having been received from Jalaun in 1853. During the mutiny, however, the district was much disturbed. By the first quarter of 1858, with the defeat and flight of the Nawab of Banda, the great rebellion as far as this district is concerned, may be said to have come to an end. The district then soon settled in its normal state and the work of reorganisation was effectually carried out. Thereafter with few exceptions, the history of the district since 1858 has been one of the orderly administrations. On 11 Feb. 1995, the district of Hamirpur was divided into two parts forming yet another district namely Mahoba.

Administrative Setup

The seat of district administration is at Hamirpur. There are 3 tahsils in the district; namely Hamirpur, Rath and Maudaha. The number of Community Development Blocks are 7. Total area of the district is 4282 sq kms.

Jurisdictional Change (1991-2001)

During the year 1991-2001 the following jurisdictional change took place in the district.

S.No.	Name of Tahsil	Notification No. & date	Jurisdictional Change	
			Added	Subtracted
1	2	3	4	5
1.	Hamirpur	5-4(1)88-(359)-R-5 dated 09.02.1995	-	Entire 3 tahsils, viz., Mahoba with 2 towns, Kulpahar tahsil with one town and Charkhari tahsil with two towns transferred to newly created Mahoba district.

District Administration :

District administration comprises Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is

in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each have a department at district level office, departments point of view the district is divided into community development block. Block Development Officers (BDO) looks after development works at community development block level. Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big district and Superintendent of Police in small districts are incharge. Additional Superintendent of Police (ASP) are in charge of their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc. also developed to help in judicial matters.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

Physical Features

Location and Size :

The district of Hamirpur lies in the centre of Jhansi division. On the west and north-west lie the district Jhansi and Jalaun, the boundary is formed throughout by the Dhasan and Betwa rivers. The river Yamuna separates the district on the north from Kanpur and Fatehpur district. To the east lies Banda district. The natural frontier of the tract being the Ken river, though only forming the border for a distance of some 29 kms. The newly carved out Mahoba district bounds it in the south. The distirct lies between the parallels of $25^0$and 26^0 north latitude and $79^05'$ and $80^05'$ east longitude. Total area of the district is 4282 sq. kms.

Physiography :

Topographically, the district is made up of flat plain. The district Hamirpur lies in the Jhansi Uplands and occupies an area of 4282 sq. km.

On the basis of geology, soils, topography, climate and natural vegetation the district is subdivided in the following sub-micro regions.

Dhasan-Betwa Ravines: Mainly formed of rocks of Recent age the region runs parallel to Dhasan and Betwa rivers in a strip form. Dhasan flows in its lower part and joins Betwa approximately 32 kilometres from the southern boundary of the district. Afterwards Betwa drains in the area. The general slope corresponds to the river flow of Dhasan and Betwa. The area is infested with ravines.

Rath Plain: Formed by the rocks of Recent age, the region is spread over between the watershed lines of Dhasan, Betwa and Birma rivers in part of Rath tahsil. Central part of the plain is comparatively higher. As compared to other regions it lacks streams. The general slope of the area is from south to north. The region is served with Dhasan irrigation canal system. The road networks are very well developed.

Yamuna-Betwa Doab: The region spread over part of Hamirpur tahsil and is bounded from north and south by Yamuna and Betwa rivers respectively. Here the river Betwa joins with Yamuna river. It is formed of Alluvium and Dun gravels of Recent age. Physiographically it is different from other regions. There are small streams which flow in the region and form ravines along its course. The slope is very gentle from west to east. Hamirpur, the district headquarters, is situated at the confluence of Yamuna and Betwa. Being district town it is connected with roads from other parts. Rest of the area lacks transport links.

Maudaha Plain: The region spread over Hamirpur, Maudaha, Charkhari and Mahoba tahsils (partly) is situated in the eastern part of the district and covers the largest area as compared to other regions. It is also formed of Alluvium and Dun gravels of Recent age. A 200 mt. contour limits is its southern boundary whereas Birma, Betwa and Yamuna mark the western and northern boundary respectively. The area slopes towards north-west direction. Chandrawal is the main river in this belt. Sukheli, Magaria, Kuraur, Bhainsora are the other tributaries. As compared to other regions ravines are insignificant along these tributaries. North of Maudaha, the surface is comparatively smooth. There are number of canals in the area which serve the irrigational need. It is well connected by roads and railways. The above characteristics are suitable for human habitat. The important urban centres situated in this belt are Maudaha, Charkhari, Mahoba, Kabrai, Kharela and Sumerpur. Charkhari, Mahoba and Maudaha happen to be tahsil headquarters also.

Drainage :

The main river that flow through the district are Yamuna, Betwa, Dhasan Verma, Chandrawal and Pandwahar. Besides, there are many minor streams. These streams for most part of the year are torrents which get swollen greatly during the rains but at other times quickly subside into narrow stream with a very small discharge. The river yamuna enters the district from Jalaun, first touching the district near Misripur, flowing from west to east forming some portion of the northern boundary. The Betwa flows along the north-eastern boundary from the point where the Dhasan joins it to the village of Radhina in tahsil Rath. The Betwa, a tributary to Yamuna, is the longest river in the district. Dhasan, emanating from the Vindhyachal flows through Rath tahsil, forming the western boundary of the district. Ken, for some 22 kms. forms the boundary between tahsil Maudaha and district Banda. It also emanates from Vindhyachal and flows.

Climate :

The intense heat and dryness especially in the north are the main climatic characteristics. The hot weather commences early in March and subsides only with the outbreak of the monsoon. If monsoon rains are delayed the heat becomes actually distinctly trying. The rocky terrain in the south adds to the blazing glare of the hot weather day. On the other hand atmosphere is generally clear and free from the dust. The nights during cold weather are generally chilly and crisp. During the rains the climate becomes unhealthy. Indeed rainy season gives notoriety to climate for unhealthiness.

The district has the lowest rainfall among the districts of Jhansi division. The rainfall in the district is capricious and irregular. It is characterized by heavy falls causing floods somewhere with long breaks or widespread failure somewhere. Actual rainfall during the year 1998 was 709 mms against the average rainfall of 864 mms, in the district. The maximum and minimum temperature recorded was 45.2^{0}C and 4.2^0 Celsius.

Natural and Economic Resources

Forestry :

Forestry does not play important role in the economy of the district. Mainly firewood is produced in the forests. The northern portion of the district is particularly devoid of natural vegetation. The hardy Babool grows spontaneously, and in the riverine tracts where it is generally mixed Jungle of small and stunted type.

The Babool is useful for the manufacture of plough and carts. Khais is a common tree, and the other trees include the Hingol, Karaunda and Karil. In the south, in tahsils Charkhari, Kulpahar and Mahoba, the hills as well as considerable level stretches are covered with forest. The tree that grows in the great profusion in these forest is Tendu. Other common species besides the Mahua are the Semal, Dadhi, Dhawa, Gurja, Dhak, Rionikhair and Kardhai. During the year 1997-98, the covered area under forest was 24,172 hectares out of total area of 416,665 hectares. This comes to 5.80 percent of the total area. The chief trees thus found in the forests of Maudaha and Rath tahsils are Babool, Dhak, Sahjan, Tendu, Teek, Semal, Neem, Jamun, Mahuwa and Mango.

Among the wild animals tiger is a very rare visitant but leopard is fairly common in the rocky hills and forests of Mahoba and Kulpahar. The bear is occasionally found. Wolves and hyenas are common animals to be found in hills and ravines throughout the district. Other animals commonly found in the district are jaickals, foxes, pigs, sambhar and deer. Hares are common only in south. Monkeys are uncommon.

So far birds are concerned, peafowl, gray partridge, peacock, koil and ducks are most common. Of migratory waterfowls, various species of geese, duck and teal visit the area in cold weather. Numerous varieties of cranes, stocks sand other waders also congregate at the places of water.

Mineral and Mining :

There are no important minerals found in the district. Sandstone of red colour is found in river Betwa which earns crores of rupees for district administration and it is exported to remote areas in the state. It is used in building and construction work. Muskara and Rath development blocks are surrounded by hilly tract. The minerals Pyrophyllite and Dias pore found in the district is a moderately soft mineral light pick, grejish, white or brownish black in colour and generally used in paints, as filler in paper industry, cosmetics, ceramics and as potstone. It is specially used in the manufacturing of slate pencils and is sometimes called pencil stone. It is also very useful in wall tile products.

Soil :

Soil in the district consists of well known Bundelkhand variety, Mar, Kevar, Parua and Rekar. The former two being commonly known as black and the later two are light soils. The northern portion of the district is singularly bare with no tree growth. On black soil there is spontaneous growth of babool etc.

Land and Land use Pattern :

The district is made up of flat plain. The land use details during 1997-98 are as follows total area was 416,665 hectares, forests 24,172 hectares, cultivable barren land 5,643 hectares, current fallow 13,236 hectares and other fallow 5,134 hectares. Usar and uncultivable area was recorded as 9,615 hectares, other than agriculture 30,851 hectares, permanent meadows 328 hectares, orchards & bushes 683 hectares. The net area sown was 327,003 hectares. Out of total land holdings of 168,222 as many as 3,187 holdings were of 10 hectares and above, 20,331 land holding lie in the range of 4 to 10 hectares, 29065 land holdings lie in 2 to 4 hectares 37,101 land holding lie in 1-2 hectares 39,574 land holdings in 0.5 to 1 hectares and 38,964 land holdings lie in the range of less than 0.5 hectares as per statistical holdings 1998.

Agriculture and Crop Pattern :

In the district agriculture is the main stay of the people. This is so, because there is a complete absence of any large-scale industry in the area. As much as 80.16 percent of the population lives in the country side. The system of agriculture persued in the district is characterised by slovenly ploughing insufficient weeding and an absence of intensive husbandry, which are quite common with these found in

other parts of Bundelkhand. The vagaries of climate are also a steady discouragement to improved method of agriculture.

There are three harvests, Kharif, Rabi and Zaid. Zaid is insignificant in the area. The most important is Kharif. The main Kharif crops are juwar, bajra, small millets and rice. Besides, there are very valuable crops of cotton, seasamum and betel leaves. A considerable area is also devoted to sugarcane. During the year 1997-98 the total gross area sown was 366,312 hectares, out of this, the sown area for more than once was 39,309 hectares. The gross area sown during Rabi accounted for 263,662 hectares, Kharif 102468 hectares and Zaid 155 hectares. In addition to this 27 hectares was prepared for sugarcane. Pulses and oil seeds covered 198,369 hectares and 5,051 hectares in the said year respectively. The lack of irrigation network in the district resembles poor scenario of Agriculture.

Among Rabi crops the most important is gram, which is grown in all soils. Next comes wheat and linseed as also urad, arhar and masur. The cultivation of tobacco is also carried on mostly in Rath.

Irrigation :

In the year 1997-98 the irrigation network included 797 kms. of canals, 492 government tube-wells, 1094 private tube-wells, 17799 pumping sets, 7450 Pucca wells. The major sources of irrigation are canals and pucca wells. During the year 1997-98, the area irrigated by various sources was as follows: (In hectares)

Year	By Canal	Tube wells		Well	Pond	Others
		Govt.	Priv.			
1	2	3	4	5	6	7
1997-98	39,692	11,667	16,063	13,622	317	3,665

Animal Husbandry :

Animal husbandry is also a source of supplementing the income of rural population. The livestock population of the district stood to more than 10 lakhs. Of these 84 percent is accounted for by bovine and sheep population. Cows and she-buffaloes are generally kept by all classes of people for production of milk for household consumption. Commercial production of milk is carried on generally by 'Ahir' caste. The dairy industry is not commercially viable because of low productivity and production for self consumption. There are many dairy units in the district. There are nine milk cooperative societies located all in Sumerpur in tahsil Hamirpur. Poultry units are also established in the district. A large number of sheep and goats is being kept in the district mainly in the ravines of the northern tahsils. There is hardly any production of wool. They are reared for milk and meat.

Fishery :

The river, canals and lakes of the district contain a plentiful supply of fish. The usual modes of catching fish are by means of the dragnet, the tapa of funnel-shaped basket and the fishing rod. The fish mostly found here and locally called Rohu, Nain Chilwa, Saul and those of the Carp type.

Industry :

The district is characterized with very weak industrial activities which are largely confined to village and cottage industries. In the north of Kulpahar hundreds of persons are employed in making bowls from soap stones found in the hills close by. In the name of registered factory under the factory Act. 1948, there are 50 big and medium size industries in whole of the district employing 1104 persons to produce goods. The name of some important industries are Hindustan Lever Ltd., Rin Soap factory, Rajat paper board factory and some medium size industries are Bandana Steels, Sushil Pump and Compressor etc. In the year 1990-91 the number

small-scale industries registered in the district were 5042. Another noticeable feature of the district is the total absence of any large central market. Rath is the biggest market. Mahoba owing to prestigious long standing betel leaf business and its position on the railways enjoys a considerable trade. Th other chief local markets are Sumerpur, Maudaha and Hamirpur.

Trade and commerce :

The following table gives most important commodities manufactured imported and exported from towns.

Name of the towns	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
Gohand	Bricks	Bricks	Cloth
Hamirpur	--	Wheat	Cloth
Kurara	--	Wheat	Cloth
Rath	Gur	Gur	Sugar
Maudaha	Soap	Shoes	Cloth
Sarila	Khadi Cloth	Wheat	Cotton
Sumerpur	Leather	Foodgrains	Cement

Transport:

District Hamirpur is deficient in railway communication on Jhansi Manikpur road, Mohaba is the main railway station. It is served by one branch line of Central Railway between Kanpur and Banda. The important railway stations are Sumerpur, Bhoudana and Bharua. The main commercial centres of the district are Sumerpur, Bharua, Bhoudaha etc. There is a good network of state Highways as well as other all weather roads. The State Highways Nos. 21 and 17 passe through the district with a length of 194 kms. The main transport activities are carried out by roads.

Electricity and Power:

There are no power generation units in the district. It is served by outside district which is used for domestic, commercial industrial as well as irrigation purposes. During the year 1998-99 the total consumption of electricity amounted to 83989 kwh. Out of which 14940 thousand kwh accounts for domestic consumption, 2666 thousand kwh. in commercial light, 40305 thousand kwh. for industrial consumption and 37 thousand kwh. in public light. Irrigation sector claims the consumption of 24554 thousand kwh and public water and sewerage claims 932 thousand kwh.

Gram Panchayats, its composition, jurisdiction and role in village development :

A Gram Panchayat acts as the executive of the Gram Sabha. It is vital for village development.

composition : The members of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 394 gram sabhas in the district.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villages.

its term : The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the sarpanch.

qualifications: In order to be elected to a village panchayat, a candidate should passes the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

functions : A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks after the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a centre.
5. It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area of the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal case and imposes fine upto Rs. 100.

(v) Census Concepts

Building :

14 structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also

provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, un burnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1 1/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A

room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/

Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In un surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within

tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Dhangar
28 Dhanuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
33 Dusadh
34 Gharami
35 Ghasiya
36 Gond
37 Gual
38 Habura
39 Hari
40 Hela
41 Kalabaz
42 Kanjar
43 Kapariya
44 Kharwal (excluding Banbasi)
45 Khairaha
46 Kharwar
47 Khatik
48 Khorot
49 Kol
50 Kori
51 Korwa
52 Lalbegi
53 Majhwar
54 Mazhabi
55 Musahar
56 Nat
57 Pankha
58 Parahiya
59 Pasi, Tarimali
60 Patari
61 Rawat
62 Saharya
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue:

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any eco-nomically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word *fertility* is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a Particular age group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a Particular age group}}{\text{Mid-year married female Population of the same age group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15-19}^{45-49} \text{ASFR}}{} \times 1000$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15-19}^{45-49} \text{ASMFR}}{} \times 1000$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The emigrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These

are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 1,043,724 in which 869,916 live in rural and rest 173,808 in urban parts. There are three tahsils in district namely Hamirpur,Rath and Maudaha which are sans urban population. The most populous tahsil is Rath with 369,627 population followed by Maudaha with population 360,522 and least populated tahsil is Hamirpur with population of 313,575. The maximum urban population in term of absolute figure is seen in Rath tahsil while in term of percentage this is maximum in Hamirpur tahsil. The urban population in the district is 16.7 percent percent. There are 127 inhabited villages in the district. The total rural population of 869,916 is spread over in 7 CD blocks and 521 inhabited villages. The most populous CD Block is Maudaha with population of 201,206 and maximum number of inhabited villages (111). Although the population density in the rural area is 205 ,the highest proportion is in tahsil Maudaha with population density range of 274 per sq kms.

Size-class and status of towns:

In the total urban population of 55,950 live in Rath (NPP) the next big town is Maudaha (NPP) with a population of 34,730 followed by Hamirpur (NPP) with population of 32,046. Among 7 towns there are 3 of NPP and rest 4 towns are of Nagar Panchayat (NP) status. Hamirpur and Rath tahsil contains 3 towns each, while Maudaha tahsil has only one town.

Population growth:

At the present territorial Jurisdiction the population of the district was 884,512 at 1991 Census and growing by 18.0 percent during the decade 1991-2001 it is 1,043,724 at 2001 Census. The decadal growth at 18.0 percent in the district has been lower level than the state at 25.8 percent..

Population Density:

The total district area is 4,282 square kilometres. The population density in the district is 244. In the rural areas of the district the density is 205.

Sex-Ratio:

The sex-ratio in the district is 851 which is lower to 898 at the state level. Indeed the sex-ratio at the district has been all along lower in the district as against the state since 1901. As against to urban areas of the district the sex-ratio is lower in rural areas except between 1951 to 1991. Among tahsils, highest sex-ratio is 854 in Rath. and lowest is 847 in Maudaha. Among CD Blocks the sex-ratio is highest in Gohand at 863 and lowest in Sarila at 839. Out of 521 inhabited villages in the district there are 36.5 percent villages (with 42.1 percent of rural population) which are having a sex-

ratio of 850-899. In the urban parts of the district the sex-ratio in the age group 0-6 is 882 and highest of 954 in Gohand (NP) and lowest of 848 in Kurara (NP). The sex-ratio in the age-group 0-6 is 903 in the district which is lower than the state being only at 916. As against a sex-ratio of 907 in the age-group 0-6 of rural population of the district, it is highest at 936 in Kurara Block and lowest at 890 in Gohand C.D. Block. It may be noted that out of 521 inhabited villages in the district, the sex-ratio in the age-group 0-6 is between 890 to 936. As against the sex-ratio in 0-6 age group of 907 in the rural area is only 882 in urban.

Work Participation Rate:

In the total population of the district of 1,043,724 as much as 39.2 percent are workers and rest of 60.8 percent are non-workers. Among workers 26.0 percent are main workers and rest of 13.2 percent are marginal workers of total population. In absolute terms male outnumber females as main workers and females out number males as marginal workers as well. The extent of main workers is highest at 28.4 percent in Rath tahsil and lowest at 24.1 percent in Hamirpur tahsil. Marginal workers are highest in Rath tahsil as 14.2 percent in comparison to only 13.5 percent in Maudaha and 11.7 percent in Hamirpur tahsil. The extent of workers in rural parts and non-workers in urban parts is higher. In the district among workers 41.3 percent are cultivators and 58.7 percent are workers. Over 35.2 percent of female workers are engaged as cultivators.

Literacy:

In the district 57.4 percent population is literate. The literacy is 72.0 percent in urban areas and 54.4 percent in rural areas. The male literacy is as high as 71.9 percent as against 40.1 percent females literacy and therefore, the gap in male/female literacy rate is 31.7 percentage points. In rural areas among 7 CD Blocks, the highest literacy is at 57.6 percent in Gohand CD Block. and lowest at 50.0 percent in Sarila CD Block. The literacy among males in rural areas is 69.7 percent in comparison to 36.1 percent among females. The lowest female literacy of 29.7 percent is in Sarila CD Block. The gap in male/female literacy rate is highest in Gohand CD Block which is 38.1 percentage points. In 97.8 percent of villages covering also 99.9 percent of rural population the literacy range is 11-20 to 71-80. Among urbanites in the district, as much as 82.7 percent males are literates as against 59.0 percent females. The highest urban literacy is in Hamirpur NPP is 81.0 percent and lowest in Sarila (NP) at 59.0 percent. The maximum male literacy is also found in Hamirpur NPP at 88.6 percent and lowest 75.8 percent in Sarila NP. However, the highest female literacy is in Hamirpur NPP at 72.0 percent and lowest at 39.6 percent in Sarila (NP) Still, the maximum gap in male-female literacy rate is 39.9 percentage points is found in Gohand (NP). The literacy among Scheduled Castes is 47.1 percent in the countryside and 59.9 percent in towns. In rural areas among 5 Scheduled Tribe persons only two are literate while in urban areas 21 persons are found literates.

(viii) Brief Analysis of Primary Census Abstract Data Based on inset Tables 1 to 36 :

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along with main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural labourers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Hamirpur	NA	NA	NA	313,575	245,388	6,8187	NA	NA	NA	NA	21.7
2	Rath	NA	NA	NA	369,627	298,736	70,891	NA	NA	NA	NA	19.2
3	Maudaha	NA	NA	NA	360,522	325,792	34,730	NA	NA	NA	NA	9.6
District Total		**884,512**	**747,555**	**173,808**	**1,043,724**	**869,916**	**173,808**	**18| .0**	**16.4**	**26.9**	**17.3**	**16.7**

The growth rate of district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 28.8 per cent during 1991-2001. The growth rate for rural and urban areas of the district are 28.2 and 31.7 per cent respectively. Out of the total population of the district 83.3 per cent lives in rural areas while 16.7 per cent lives in urban areas of the district. The proportion of urban population has slightly declined during the decade from 17.3 per cent in 1991 to 16.7 per cent in 2001 in the district. The highest growth of urban population is recorded in Hamirpur (21.7) per cent tahsil and lowest is registered in Maudaha (9.6) tahsil.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Table 2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 521 inhabited villages, 52 (10.0 per cent) are small size villages with population below 200 persons. In the size of 200 to 499 persons, there are 61 villages having 11.7 per cent villages of the district, while in the size class of 500-999 population claims 91 villages with 17.5 per cent of the total villages in the district. 163.villages (31.3 per cent) are in the size class of 1,000-1,999 and 138 villages (26.5 per cent) are in the size class of 2,000-4,999. 14 (2.7 per cent) villages in the district fall in the ranges of 5,000 -9999. 2 villages (0.4 per cent) are in the size class of 10000 and above.

Table 3 : New Towns, Denotified, Declassified and Merged Towns in 2001 Census

Name of town
1
(a) New
(i) Statutory town
NIL
(ii) Census town
NIL
(b) Denotified
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns.
NIL
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria.
NIL
(iii) Census towns of 1991 census are notified as statutory town in 2001 census.
NIL
(c) Declassified
NIL
(d) Wholly merged with other town(s)
NIL

**Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.*

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	21	4.0	288	0.0
11-20	6	1.2	369	0.0
21-50	17	3.3	5,855	0.7
51-100	43	8.3	24,028	2.8
101-200	141	27.1	198,872	22.9
201-300	143	27.4	274,478	31.6
301-500	105	20.2	248,610	28.6
501 +	45	8.6	117,416	13.5
Not known	0	0.0	0	0.0
District Total	**521**	**100.0**	**869,916**	**100.0**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 143 accounting for 27.4 per cent of the total inhabited villages of the district fall in the density range of 201-300 persons having 31.6 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 27 villages (5.2 per cent). 45villages (8.6 per cent) have very high density with more than 501+ persons per sq. km., while the corresponding proportion in the lower range of 0 to 10 is 4.0 per cent of the total inhabited villages having (0.0 per cent) population of the district. In the medium density ranges of 21 to 50 and 51-100 persons account for 3.3 and 8.3 per cent of inhabited villages respectively. Both these ranges claim 3.5 per cent rural population.

Table 5 : Sex Ratio of State and District 1901-2001

Year	UTTAR PRADESH			HAMIRPUR		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	992	990	1,015
1911	916	922	866	982	980	999
1921	908	918	834	963	962	982
1931	903	916	813	957	956	965
1941	907	922	824	958	957	967
1951	908	922	827	938	943	893
1961	907	921	817	923	927	855
1971	876	884	826	879	883	837
1981	882	889	850	853	856	840
1991	876	879	864	839	839	838
2001	898	904	876	851	850	859

NOTE- Sex Ratio has been defined here as the number of females per 1000 males

As per 2001 Census sex-ratio of 851 has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 1971 and remained above the state average figures during this period. The subsequent decades show declining trend from 1981 to 2001 and value remained below the state average. The lowest sex ratio of 839 was recorded in the district during 1991 against the state average of 876 in the district. From 1901 to 2001 the proportion of rural areas is higher than the urban areas in state. The sex-ratio in urban areas of the district is higher from

1901 to 1941, while it is of lower order in the urban areas from 1951 to 1991. In 2001 urban has higher order of sex-ratio in the district.

TABLE 6 : SEX RATIO BY TAHSILS 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Hamirpur	853	853	852
2	Rath	854	853	860
3	Maudaha	847	844	869
District Total		**851**	**850**	**859**

The table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 Census. There are 851 females for every thousand males in Hamirpur district. It becomes clear from the table that sex-ratio in urban areas is higher than that of rural areas. The rural sex-ratio in tahsils varies between 853 in Hamirpur, Rath tahsil and 844. Maudaha tahsil. The sex-ratio in Hamirpur tahsil and Rath tahsil is higher than district rural average (851). In urban areas the highest sex-ratio is recorded in Maudaha (869) and the lowest is in Hamirpur urban (852).

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Kurara	855
2	Sumerpur	852
3	Sarila	839
	Gohand	863
5	Rath	857
6	Muskara	845
7	Maudaha	844
District (Rural) Total	**850**	

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 850 as a whole. Among the C.D. blocks the highest sex-ratio of 863 females is found in Gohand C.D. block and is fallowed by Rath (857) while the lowest of 839 is recorded in Sarila C.D. block. The sex-ratios of Kurara, Sumerpur, Gohand and Rath C.D. blocks are higher than the district rural average of 850 and in remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	22	4.2	1,434	0.2
700-749	10	1.9	5,088	0.6
750-799	56	10.7	73,603	8.5
800-849	159	30.5	343,039	39 4
850-899	190	36 5	366,396	42.1
900-949	55	10.6	66,520	7 6
950-999	11	2.1	8,509	1.0
1000-1099	14	2.7	4,354	0.5
1100+	4	0.8	973	0.1
District Total	**521**	**100.0**	**869,916**	**100.0**

Sex ratio (Rural) for District 850

Table 8 presents the distribution of villages by percentage of village and population in each sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 190 accounting for 36.5 per cent of the total villages having largest population of 42.1 per cent in the district fall in the sex-ratio range of 850-899, It is followed by the sex-ratio range of 800-849, which claims 159 villages (30.5 per cent) and 39.4 per cent population. The highest range of 1,100 and above claims only 04 villages (0.8 per cent). This range shares 0.1 percent rural population of the district.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Gohand	NP	845
2	Hamirpur	NPP	848
3	Kurara	NP	865
4	Maudaha	NPP	869
5	Rath	NPP	861
6	Sarila	NP	870
7	Sumerpur	NP	851
Sex ratio (Urban) for the district:			**859**

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 859 females per 1,000 males as a whole. Among the towns of the district the sex-ratio varies between 845 to 870. Sarila (NPP) has the highest sex-ratio (870), while Gohand (NP) has the lowest sex-ratio 845 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Hamirpur	Total	57,048	29,954	27,094	905
		Rural	46,269	24,167	22,102	915
		Urban	10,779	5,787	4,992	863
2	Rath	Total	64,811	33,959	30,852	909
		Rural	53,509	28,064	25,445	907
		Urban	11,302	5,895	5,407	917
3	Maudaha	Total	66,881	35,263	31,618	897
		Rural	61,064	32,125	28,939	901
		Urban	5,817	3,138	2,679	854
District Total		**Total**	**188,740**	**99,176**	**89,564**	**903**
		Rural	**160,842**	**84,356**	**76,486**	**907**
		Urban	**27,898**	**14,820**	**13,078**	**882**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils/ sub-tahsils of the district. Total population in age group 0-6 is 188,740 persons comprising 99,176 males and 89,564 females. The total sex-ratio in this age-group works out 903 in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 907 and 882 in this age-group respectively. The rural sex-ratio in tahsil varies between 901 in Maudaha tahsil and 915 in Hamirpur tahsil. The sex-ratio of Hamirpur is lower than district rural average

(907) and lowest sex-ratio of 901. In urban areas the highest sex-ratio is recorded in Rath urban (917) and the lowest is found in Maudaha urban (854).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Kurara	16,630	8,589	8,041	936

7	Maudaha	38,835	20,496	18,339	895
District (Rural) Total:		**160,842**	**84,356**	**76,486**	**907**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 907 for the district (rural). The sex-ratio of C.D. blocks varies between 890 to 936. It is highest in Kurara C.D. block i.e. 936 followed by 927 in Sarila C.D. block and lowest 890 is found in Gohand C.D block. The sex-ratio of Kurara, Sarila and Muskara C.D block are higher than the district rural 907 while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	49	9.4	3,548	2.2

District (Rural) Total	521	**100.0**	**160,842**	**100.0**
Sex ratio (Rural) for District		**907**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 85 (16.3 per cent) having largest population (22.5 per cent) in the district (rural) fall in the sex-ratio range of 850-899 in age of 0-6 years. It is followed by the sex-ratio range of 1000-1099 which claims 84 villages (16.1 per cent) and 14.5 per cent population. Next to it, 72villages (13.8 per cent) are in the range of 900-949 with 16.6. per cent population. 71 villages (13.6 per cent) having 18.2 percent population fall in sex-ratio range of 800-849. In remaining sex-ratio ranges of 700-749, 750-799, and 950-999 claim less number of villages and these are distributed as 16 (3.1per cent), 38 (7.3 per cent), 52 (10.0 per cent) respectively. In these ranges, the percentage of population is also low.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Kurara	(NP)	1,894	1,025	869	848
2	Hamirpur	(NPP)	4,480	2,398	2,082	868

		Rural	**869,916**	**200,889**	**5**	**23.1**	**0.0**
		Urban	**173,808**	**37,013**	**161**	**21.3**	**0.1**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,043,724 total population of the district, 22.8 per cent of the total population belong to Scheduled Caste and nil per cent to Scheduled Tribe. The percentage of Scheduled Castes population constitutes 23.1 per cent in rural population and 21.3 per cent in urban population of the district. The highest percentage of total Scheduled Caste population is recorded in Rath tahsil (25.6), while the lowest is found in Maudaha tahsil (20.9). The proportion of Scheduled Tribe population is nil and 0.1per cent in rural and urban areas respectively. Scheduled Tribe population in the district is mainly concentrated in Rath tahsil (25.6 per cent), Hamirpur (21.7) and Maudaha tahsil (20.9). The nil percentage of Scheduled Tribes is recorded in Hamirpur tahsil Rath, and Maudaha tahsil.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

District (Rural) Total		**869,916**	**200,889**	**5**	**23.1**	**0**

Table 15 shows distribution of Scheduled Caste and Scheduled Tribe population in each C.D. block of the district. 23.1 per cent of rural population of the district belongs to Scheduled Caste and nil per cent to Scheduled Tribe. At C.D block level, Scheduled Caste population varies between 20.2 per cent in Sumerpur and 29.4 per cent in Rath C.D block. The other C.D block containing the highest percentage of Scheduled Caste are Rath (29.4), Gohand (26.3.) and Sarila (24.8).

TABLE 16 : PROPORTION OF SCHEDULED CASTE POPULATION TO TOTAL POPULATION VILLAGES, 2001

Percentage range of Scheduled Caste population to total population	Number of villages	Percentage	Scheduled Caste Population	Percentage
1	2	3	4	5
Nil	43	8.3	0	0.0

76 and above	3	0.6	479	0.2
District Total	**521**	**100.0**	**200,889**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Caste population to their total population in different ranges of percentage at district level. 43 villages accounting for 8.3 per cent of total 521 inhabited villages in the district do not have any Scheduled Caste population. The proportion of Scheduled Caste population is 0.2 per cent in 3 villages (0.6 per cent). It varies between 0.2 per cent, while the next range of 46.8 per cent accounts for 162 villages constituting 31.1 per cent of the total villages. Nil and 76 and above, both ranges account for 8.9 per cent villages of the district. 15 villages in the range of 41-50 accounts 3.8 per cent of population. 16 villages are such where the proportion of Scheduled Caste is 2.3 per cent. The maximum of the 46.8 per cent of the Scheduled Caste population is covered by range of 21-30 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBE POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribe Population	Percentage

District Total	**521**	**100.0**	**5**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. There are 520 (99.8 per cent) villages where none of Scheduled Tribes have been recorded in the district. Hamirpur remaining 1 (0.2 per cent) village has a population of 5 per cent Scheduled Tribes population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTE AND SCHEDULED TRIBE POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Caste population	Total Scheduled Tribe population	Percentage of Scheduled Caste population to total population	Percentage of Scheduled Tribe population to total population
1	2	3	4	5	6	7
1	Gohand (NP)	7,087	1,726	0	24.4	0
2	Hamirpur (NPP)	32,046	5,127	21	16	0.1
3	Kurara (NP)	11,480	4,293	0	37.4	0
4	Maudaha (NPP)	34,730	5,517	0	15.9	0
5	Rath (NPP)	55,950	10,984	136	19.6	0.2
6	Sarila (NP)	7,854	2,073	0	26.4	0
7	Sumerpur (NP)	24,661	7,293	4	29.6	0
District (Urban) Total		**173,808**	**37,013**	**161**	**21.3**	**0.1**

Table 18 shows number and percentage of Scheduled Caste and Scheduled Tribe population recorded during 2001 Census in district. The table depicts that Scheduled Caste population in Kurara (NP) 37.4 per cent and in Sumerpur (NP) 29.6 per cent but lowest about 15.9 per cent in Maudaha (NPP). Scheduled Tribe population is negligible in the urban areas of the district. Highest percentage (0.2) of Scheduled Tribe population was recorded in Rath (NPP). There is a total population of 161 in urban areas of the district.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTE AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Sl. No.	Name of C D block	Scheduled Caste sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Kurara	839	0
2	Sumerpur	839	0
3	Sarila	831	0
4	Gohand	849	0
5	Rath	832	0
6	Muskara	838	1,500
7	Maudaha	833	0
District (Rural) Total		**837**	**1,500**

Table 19 indicates sex ratio among Scheduled Caste and Scheduled Tribes in each C.D block of the district. The Scheduled Caste sex ratio is 837 for district (rural). Among the C.D blocks, the highest sex ratio of 849 is found in Gohand C.D block and lowest of 831 is recorded in Sarila C.D block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTE AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Kurara (NP)	829	0
2	Hamirpur (NPP)	825	615
3	Sumerpur (NP)	864	1,000
4	Sarila (NP)	836	0
5	Gohand (NP)	819	0
6	Rath (NPP)	858	789
7	Maudaha (NPP)	835	0
Sex ratio (Urban) for the district		**845**	**769**

Table 20 shows sex-ratio of Scheduled Caste and Scheduled Tribe in the urban areas of the district. The sex ratio of Scheduled Caste is 845 and, while in case of Scheduled Tribe it is 769. The sex ratio of Scheduled Caste in towns is highest 864 in Sumerpur (NP), while it is lowest 819 in Gohand (NP).

TABLE 21: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

District and tahsil-wise literacy rate besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rate is worked out by excluding population of 0-6 years. As per

2001 Census, the proportion of literates to total population excluding 0-6 years comes to 57.4 per cent in the district. This proportion in rural area is 54.4 per cent against 72.0 per cent in urban areas. In the district the literacy rate of males (71.9 per cent) is much higher than that of females (40.1 per cent). Among the tahsils, Hamirpur tahsil tops with 60.2 per cent literates followed by Rath tahsil (56.6 per cent). Maudaha. tahsil with 55.7. per cent literates stands at the bottom in the district. Out of 3 tahsils, the literacy rate of Hamirpur tahsil is higher than that of district average. It is observed that in urban areas of district the literacy rate is higher than the rural areas.

The gap between male and female literacy is 31.7 per cent in the district. In rural areas (33.5 per cent) and (23.3 per cent) in urban areas.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

District (Rural) Total		**385,505**	**268,812**	**116,693**	**484,411**	**201,486**	**282,925**	**54.4**	**69.7**	**36.1**	**33.5**

The table 22 reveals number of literates, illiterates and the literacy rate in rural areas at C.D. block level in the district. 54.4. per cent of the total rural population excluding the age-group of 0-6 years literates in the district. The corresponding proportion of male and female literates comes to 69.7 and 36.1.per cent respectively, which shows very wide gap of 33.5 per cent in male and female literacy. At C.D. block level, Sumerpur, Gohand C.D. block has the highest rural literacy rate of 56.9 per cent, while 75.2 per cent males and 37.1 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Sarila. C.D block (50 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 38.1 points is found in Gohand C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	5	1.0	15	0.0
1-10	0	0.0	0	0.0

District Total	**521**	**100.0**	**869,916**	**100.0**
Literacy rate for District	**57.4**			

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 5 villages (1.0 per cent) of the district and population of these villages is only 15 persons. 5 villages (1.0 per

cent) have all the literate population. 224 villages accounting for 43.0 per cent of the total villages are in the literacy range of 51-60 per cent and 128 villages (24.6 per cent) fall in the literacy range of 41-50 per cent. The lower literacy rate of 1 to 40 per cent observed in 43 villages (8.3 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 20 villages (3.9 per cent).

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Hamirpur (NPP) town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (72.0 per cent). The literacy rate is quite high (above 75 per cent in all towns) among males. However, literacy rate among females is low (39.6 per cent) in Sarila (NP). The gap in male/ female literacy rate is 23.3 percentage points in all urban of the district.

Table 25 shows number and percentage of Scheduled Castes literates and illiterate by sex in CD blocks 2001. In rural areas of the district proportion of literates is 47.1 per cent in which 62.4 males and 28.5 females. Thus, the gap in male and female literacy rate is 33.9. Among 7 CD blocks, Sumerpur CD block has

the highest literacy rate and Sarila CD block has the lowest literacy rate. The gap in male/female literacy rate in Gohand CD block is highest and this gap is lowest in Kurara CD block.

The table 27 brings out the number and percentage of Scheduled Caste literates and illiterates by sex in urban agglomerations/towns population at the 2001 Census. The number of literates is less than illiterates in the district (urban) towns. The percentage of literates is least in Sarila (NP) among 7 town, but the gap in male/female literate rate is highest in case of Sarila NP. The males in all the 7 towns enjoy higher literacy rate than females and the female literacy rate is lowest in Sarila NP with 27.6 per cent.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBE LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 869,916 total rural population of the district, 26.6 per cent has been categorised as main workers and the marginal workers constitute 14.7 per cent and the remaining 58.8 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 41.2 per cent males and 9.3 per cent females are in the category of main workers. Male and female marginal workers account for 8.9 and 21.5 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 41.2. per cent. At the C.D. block level, Gohand has highest proportion of total workers forming 47.1 per cent of the total population. It is closely followed by Sarila. (46.5 per cent), Rath (42.6 per cent), Muskara (40.5 per cent), Maudaha (39.6 per cent) and Sumerpur 39 per cent. The lowest percentage of 35.6 per cent is recorded in Kurara C.D. block.

Note Percent of Worker to total worker are given in brackets.

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 41.3 per cent of the total workers (main + marginal) and remaining 35.5 per cent of total workers are engaged as agricultural labourers. Household industry workers (2.9 per cent) and other workers (20.3 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 34.3 per cent in Hamirpur tahsil and 46.4 per cent in Rath tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 35.2 per cent which is very low as compared to 44.2 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district. The workers in other activities occupy the second position next to household industry in the district. The highest proportion of 30.4 per cent of other workers is recorded in Hamirpur tahsil, while the lowest proportion of 16.5 per cent is found in Rath and Maudaha tahsil.

Note Percent of Worker to total worker are given in brackets

Table 35 presents C.D block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) 41.2 per cent of total population. Among these workers, cultivators constitute 45.1 per cent, 38.7 per cent agricultural labourers, 2.7 per cent household industry workers and 13.5 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 2.7 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (36.3 per cent) is low than males (49.7 per cent) in the rural areas of the district. The males play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 37.6 per cent in Sumerpur C.D. block to 55.1 per cent in Sarila C.D. block. Similarly for other workers, the lowest proportion is 9.1 per cent in Sarila. C.D. block, while 23.1 per cent is the highest in Sumerpur C.D. block. The percentage of household industry workers is quite low i.e. only 2.7 per cent in the district. The percentage of agricultural labourers is highest in Muskara. (43.4.) block and is followed by Maudaha (41.2). In other C.D. blocks, this proportion is quite insignificant. Similarly, household industry workers varies in C.D. blocks between 3.6 per cent in Sarila and 3.4 per cent in Gohand.

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district Hamirpur. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (69.3), followed by cultivators with 14.0 per cent (13.1 per cent male and 18.3 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (37.7) is recorded in Sarila NP. In the agriculture labourer category Gohand NP recorded high percentage (39.4). Hamirpur NPP town has 2.0 per cent agricultural workers. Household industry workers are also very low (2.1 per cent in Hamirpur NPP and 3.9 per cent in Sarila NP. As the usual trend recorded in the urban areas.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport,

communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 521 inhabited villages in the district 467 villages or 89.6 per cent have been provided with the education facilities of one type or the other. Similarly, 264 villages in the district constituting 50.7 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 503 villages or 96.5 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 327 villages constituting 62.8 per cent of villages have been provided with post office facility within the village. 197 or 37.8 per cent villages have been provided with the telephone facility, 146 villages or 28.0 per cent with transport facility, 41 villages or 7.9 per cent villages with bank facility and 37 villages or 7.1 per cent with agricultural credit societies. Similarly, there are 353 villages 67.8 per cent villages which have been linked with the pucca road. Total 345 or 66.2 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Rath C.D. block has the highest 95.1 per cent villages where educational facility is available lowest 77.8 per cent is found in Muskara. Medical facility is highest in Rath (86.9 per cent) and lowest (30.3 per cent) in Sarila C.D. block. Improved drinking water is available to 96.5 per cent villages. Telephone facility is highest in Kurara (56.5 per cent) and lowest 4.9 per cent in Rath transport and communications facilities is available in 146 (28.0 per cent) villages in district. In the field of power supply 345 (66.2 per cent) villages covered in the district.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 869,916 persons in the district, 858,732 or 98.7 per cent have educational facility of one or the other type. Similarly, 598,822 or 68.8 per cent population has medical facilities, while 864,137 or 99.3 per cent have got improved drinking water facility. Post office facilities are available to 432,861 or 49.8 per cent population. Telephone facility is available to 469,126 or 53.9 per cent. Transport communications facility is available to 349,450 or 40.2 per cent. Bank facility is available to 160,993 or 18.5 per cent. 147,781. or 17.0 per cent have been provided with the facility of agricultural credit societies. 711,583 or 81.8 per cent have been provided with the facility of approach by pucca road. Power supply is available to 706,495 or 81.2 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. In Rath C.D. block facilitiy of education is the highest with 100 per cent. Medical facility in Rath and Muskara CD block is 91.6 and 97.0 per cent respectively. Drinking water facility is highest in Muskara CD block with 100 percent.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 55 villages do not have primary school in their villages and out of these villages, children of 51 villages have to travel less than 5 kms. for schooling. Out of 521 inhabited villages as many as 330 are deprived of middle school and 520 of degree college. Of these 217 avail the facility of middle school at a distance of less than 5 kms., 104 at a distance 5-10 kms. and the remaining 9 at a distance of 10+ kms. In respect of degree college 34 avail this facility at a distance of less than 5 kms., 99 between 5 to 10 kms. and rest 387 villages at a distance of 10+ kms.

Similarly, there are 502 villages in the district which have been devoid of Hospital facility and 504 villages which are deprived of PHC facilities. Of these 89 villages have the facility of Hospital *available*

within 5 kms. while in respect of 180 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly, overwhelming number i.e. 233 villages have this facility at a distance of 10+ kms. As regards PHC 68 avail this facility at a distance of less than 5 kms., 195. at a distance of 5-10 kms. and the remaining 241 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 391 villages do not have this facility in the village itself. Of these majority i.e. 266 have this facility at a distance of less than 5 kms., another 109 villages avail it at a distance of 5-10 kms. In the remaining 16 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 324 villages in the district which are without telephone facilitiy. Of these 137 avail this facility at a distance of less than 5 kms., 99 at a distance of 5-10 kms. and remaining 88 have to traverse a distance of 10+ kms.

For Bus service out of 401 villages which do not have facility, 162 villages avail this facility at a distance of less than 5 kms., 181 at a distance between 5-10 kms. and 58 at a distance of 10+ kms.

In the entire district 485 villages are deprived of Commercial Bank and 506 of Co-operative Bank. Of these 485 villages which are deprived of Commercial Banks 196. villages avail this facility at a distance of less than 5 kms., 206 between 5-10 kms and the remaining 83 at a distance of 10+ kms. Regarding Co-operative Banks out of 506 villages 86 villages avail this facility at a distance of less than 5 kms., 232 at a distance of 5-10 kms. and remaining 188 at a distance of 10+ kms. 484 villages do not have agricultural credit societies. This facility to 189 villages is available at a distance of less than 5 kms., 255 at a distance of 5-10 kms. and the remaining 70 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available					Type of amenity available

 # Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 521inhabited villages in the district, there are 50 villages which have nearest towns upto a distance of 5 kms. Of these only 46 villages forming 92.0 per cent of these total villages, are having the educational facilities of one type or the other and 18 villages constituting 36.0 per cent, have the medical facilities within the village, 6 villages forming 12.0 per cent have the facility of post office within the village and 22 or 44.0. per cent have the facility of telephone.

17 villages constituting 34.0 percent have been linked by transport service. 2 villages comprising 4.0 per cent have been provided bank facilities, while 2 villages constituting only 4.0 per ent have been provided by agricultural credit societies. 41villages comprising 82.0 per cent have been provided with pucca road.

There are 297 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 266 villages constituting 89.6 per cent have been provided with the educational facilities. 148 villages comprising 49.8 per cent have been provided with medical facilities. 73 village constituting 24.6 per cent enjoy the post office facility. 106 villages comprising 35.7 per cent have been provided the telephone facility. 77 villages constituting 25.9 per cent have been linked with transport communications. 20 villages comprising 6.7 per cent have bank facility. 20 villages constituting 6.7 per cent are having agricultural credit societies, while 213 villages or 71.7per cent are approachable by pucca road. 172 villages fall in the distance range of 16-50 kms. Of these, 89.0 per cent villages have educational facility, 55.8 per cent with medical, 29.1 per cent with post office, 39.5 per cent with telephone and transport & communications available to 29.7 per cent villages. Banks and agricultural credit societies facilities are available to 11.0 and 8.7 per cent of villages.

There is one village in the district which is situated beyond 50 kms. from the nearest town and out of these 1.or 100.0 per cent enjoy the education facility in the village itself whereas one village comprising 100.0 per cent has been provided with medical facility of one type or the other. No such village comprising nil per cent has the post office facility. No village comprising nil per cent has been provided with telephone facility. No village constituting nil per cent has been linked by bus service whereas no village comprising nil per cent has been provided with the bank facilities. None village comprising 0 per cent are having agricultural credit societies, while nil village comprising nil per cent has been linked by pucca roads. There is 1 village whose distance ranges from the nearest statutory town has not been given. Such villages have been grouped under the unspecified category. 100 or cent per cent villages have the educational facility of one or other type. One village constituting 100 per cent has the medical, post office, telephone. Transport communication in the village. One village has also been connected by pucca road.

$ Transport communication includes bus service, rail facility and navigable waterways

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Hamirpur district out of a total 521 inhabited villages, overwhelming 113 are there in the population range of 1-499 persons. Of these, 67 villages (59.3 per cent) have education facility, 17 (15.0 per cent) have medical facility, 100 (88.5 per cent) have improved drinking water facility. No village (nil per cent) has post office facility. 13 (11.5 per cent) have telephone facility. 14 (12.4 per cent) have been linked by bus service. 3 (2.7 per cent) have bank facility. No village (nil per cent) have been provided with the agricultural credit societies, 49 villages (43.4 per cent) have been linked with pucca road. 45 villages (39.8 per cent) have been provided with electricity.

Out of 91 villages, which fall in the population range of 500-999 persons, 84 villages (92.3 per cent) have been provided with the education facility, 41 (45.1 per cent) with medical facility, 88 village with 96.7 per cent have improved drinking water facility. 1 village (1.1 per cent) has been provided with post office facilities, 25 villages (27.5per cent) with telephone facility, 16 villages (17.6 per cent) with transport facilities. No village (nil per cent) with bank facility, 1 village (1.1 per cent) with agricultural credit societies and 51villages (56.0 per cent) have approach by pucca road. 48 villages with 52.7 per cent have provided with electricity.

163 villages fall in population range of 1,000-1,999 persons. All of these villages have education, power supply and improved drinking water facilities. Whereas 88 villages (54.0 per cent) enjoy the medical facility, 29 villages (17.8 per cent) have post office facility, 69villages (42.3 per cent) have telephone facility, 47 villages (28.8 per cent) have transport communication facilities, 8 villages (4.9 per cent) have bank facilities, 9 villages (5.5 per cent) have agricultural credit societies and 115 villages (70.6 per cent) have approach by pucca road.

There are 138 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy the facility of education, improved drinking water, telephone, transport communications, approach by pucca road and power supply. 104 villages (75.4 per cent) have medical facility. 86 villages (62.3 per cent) have post office facility, 21.villages (15.2 per cent) have bank facility, 19 villages (13.8. per cent) having agricultural credit societies. There are 16 villages in the district having a population of 5,000 persons or above.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Kurara	62	3,947,7.0	74.5	28.1
2	Sumerpur	84	5,326,6.1	NA	23.2
3	Sarila	66	57,526.0	44.5	33.4
4	Gohand	74	50,538.0	71.9	54.7
5	Rath	61	391,31.4	68.1	64
6	Muskara	63	490,69.2	81.5	34.3
7	Maudaha	111	895,59.8	82 2	21.6
District Total		521	37,856,7.6	75.5	33.6

Note - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D block wise distribution of villages according to land use. It also gives details of total area and cultivable area available to inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 521inhabited villages in the district having a total area of 378,567.55 hectares. Of this, 75.5 per cent is cultivable and 33.6 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that 7 block with 521 villages have a total area of 378,567.55 hectares, of this 75.5 per cent of land is cultivable and of the aforesaid area 33.6 per cent is irrigated. In Kurara block, 62 villages have a total land area of 39,477.01.hectares, of this 74.5 per cent of land is cultivable and of the aforesaid area 28.1 per cent is irrigated. In Sumerpur block, 84 villages have a total area of 53,266.14 hectares, 23.2 per cent is irrigated. In Sarila block, 66 villages have a total area of 57,526 hectares. Of this, cultivable area is 44.5 per cent. Of cultivable area 33.4 per cent is irrigated. Gohand block with 74 villages have a total land area of 50,538 hectares, of this 71.9 per cent is cultivable area and out of this cultivable area 54.7 per cent is irrigated. Rath block with 61.villages has a total land area of 391,31.4 hectares. Of this 68.1 per cent is cultivated area, out of which 64.0 per cent is irrigated. Muskara block with a total 63 villages have an area of 49,069.2 hectares. Of this 81.5 per cent is cultivable area. Out of which 34.3 per cent is irrigated. The Maudaha block has 111 villages with an area it 89,559.8 hectares of which 82.2 is cultivable and irrigation of 21.6 percent only.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through Local taxes	From all other sources	Total	General Adminis-tration	Public health and conveniences	Public works	Public institutions	Other(s)

	District Total	**5.4**	**2.1**	**1.3**	**0.9**	**0.1**

Table 44 shows in urban areas of Hamirpur district the average number of primary school per 10,000 population comes to 5.4 schools, 2.1 junior secondary/middle, 1.3 secondary/matriculation, 0.9 senior secondary schools and the ratio of colleges is only 0.1 college per 10,000 population. Among the towns, the ratio of primary schools is highest in Sarila NP 8.9 per cent, Sarila NP (3.8) per cent has highest ratio of junior secondary and matriculation schools, while in case of senior secondary school this position is claimed by Rath NP (0.4) college education is available only in Hamirpur (NPP), Maudaha (NPP) and Rath NPP.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Gohand, NP	0
2	Hamirpur, NPP	34
3	Kurara, NP	3
4	Maudaha, NPP	7
5	Rath, NPP	5
6	Sarila, NP	6
7	Sumerpur, NP	2
	District Total	10

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Hamirpur district. On an average there are 10 beds per 10,000 population in urban areas of the district, whereas it is highest 34 beds in Hamirpur NPP, while lowest value of 2 beds is recorded in Sumerpur NP .

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl.No.	Name of the Town	District Total population	Slum population	Percentage of slum population to District Total population

		Not Available		

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl.No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Kurara, NP	Pulses, Veg. Oil, --	Pulses, Gram, --
2	Hamirpur, NPP	--, --, --	Morang, Vegetable, --
3	Sumerpur, NP	Shoes, Steel Rod, Soap	--, --, --
4	Sarila, NP	Pulses, Oil Seeds, Khadi Cloth	Pulses, Oil Seed, Khadi Cloth
5	Gohand, NP	Gur, Khadi Cloth, Wooden Furniture	Gur, Oil Seed, Reed Oil
6	Rath, NPP	Gur, Khadi Cloth, Carpet	Gur, Khadi Cloth, Reed Oil
7	Maudaha, NPP	Fish, Tractor Trolly, Cement Grill	Shoes, Tomato, Sugarcane

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The chief export items of the district are Khadi and Tilhan are the main items which are manufactured in Gohand NP, Rath NPP and Sarila NP and these are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001 : 48 to 52

Data on houses and household amenities have traditionally been undertaken a few months before each census. Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared. In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

Data source Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets "

The data presented in the table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 183,460 consisting of 154,483 rural and 28,977 urban households. 46,641 households belong to Scheduled

Castes and 931 to Scheduled Tribes. 177,514 households are living in their owned houses. Of these households, the largest number of households 59,505 have occupied 3+ room accommodation and is followed by three rooms accommodation numbering to 50,089 households. Next position is claimed by households 48,499 occupying two room accommodation. Number of households in owned accommodation occupying one room rank at fourth place with 17,976 households, while 1,445 households are with no exclusive room.

4,480 households living in rented accommodation. The largest number of 1,861 households are living in two room accommodation followed by 1,617 households in one room accommodation. Households with three rooms and three plus are small in numbers.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Sl. No	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Perma-nent	Semi-permanent	Temporary	Perma-nent	Semi-permanent	Tempo-rary

Data source. Census of India 2001, H-series. Tables on Houses, Household amenities and Assets.

Note.- Permanent - 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof

Semi permanent - 2 Semi-permanent houses refer to those houses made of other types of materials

Temporary - 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs

The percentage distribution of households as shown in the above table reveals that 41.2 per cent of the households in the district had permanent houses. The trend is different in rural (36.4.per cent) and urban area (67.0 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Rath (53.9.per cent) followed by Hamirpur tahsil (35.8 per cent), Maudaha tahsil (32.9.per cent) which is lowest. In respect of semi-permanent houses, the returns were 58.1 per cent of district level, whereas among tahsils, in Maudaha it was 66.5 per cent and lowest was 45.7 per cent in tahsil Rath Rural areas represented a similar ratio at district and tahsil level but semi-permanent houses in the urban areas were in the proportion range of 25.6 to 39.5 per cent. Temporary houses in the district lie between the range of 0.2 to 0.6 per cent in the urban areas.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

**Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.*

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage menas closed and open drainage.

The above table shows that out of total households of the district 64.2 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 60.4 and 84.8 per cent. Tahsil Hamirpur had higher order of proportion of households where percentage for rural area was 70.3 and 88.2 per cent in urban areas in Maudaha tahsil. Electricity was available for 17.2 per cent of households at district level households of the district had better access of electricity. Bathrooms and toilet facilities were available in 27.8 and 24.4 per cent of households. At district level drainage facility was available for 50.9 per cent of households, whereas the proportion of rural and urban areas households accounted to 43.5 and 90.1 per cent.

Percentage is given in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that to 33.9 per cent of households in the district use firewood as fuel for cooking, the proportion in the rural area is to 31.9 and in urban area it comes to 44.6 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food to 5.2 per cent of the households. The composition of rural and urban comes to 1.2 and 26.9 per cent respectively. Kerosene is used for cooking in 0.7 per cent of the households (0.2. per cent rural and to 3.3 per cent urban households). The other methods like crop residue, cow dung cake, coal, lignite, charcoal, electricity and biogas etc. range between 0.1 per cent to 55.6 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is cow dung cake.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

The table reveals that out of the total households (183,460) of the district, 24.9 per cent could avail banking services at district level, while only 35.5, 12.3, 3.17, 44.0, 5.0 and 0.1 per cent enjoyed the availability of household assets radio/transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively, whereas only 42.2 per cent had none of the specified assets.

It also reveals that at tahsil levels a highest proportion of 29.5 per cent of households were availing banking services as well in Hamirpur tahsil. The highest of none of specified assets 46.0 per cent in the tahsil Rath against it, on the other hand the lowest of 22.0 per cent was observed were availing banking services in Rath tahsil and 36.16 per cent radio/transistor household asset in Hamirpur tahsil.

(xi) Major Social and Cultural Events, Natural and Administrative, Developments and Significant Activities during the Decade :

During last decade, the district have been newly carved out from Hamirpur district. No important incident took place in Cultural, Natural and Social sphere.

(xii) Brief description of Places of religious, historical or Archaeological importance in villages and places of Tourist Interest in the towns of the district:

Hamirpur, a town of no considerable size, is the district headquarters. It is situated on a tongue of land between the Betwa and Yamuna rivers, at a short distance west of their confluence. The town as is believed, was founded by Hamir Deva in the eleventh century. He was a Karchuli

Rajput who was driven out of Alwar taking refuge with one Badna, an Ahir here. Hamira, later on drove out Badna and built a fort, which is now in ruins. It is also said that Prithviraj, the ruler of Delhi left a force at Hamirpur on his way to Mahoba about 1180 A.D. The fort and a few Muslim tombs are now the only trace of antiquity in the place.

(xiii) Major characteristics and contribution of the district:

There are so many famous worship centres relating to various religions like Hindu, Muslim, Baudh & Jain. Peoples of the district have also taken major part in the freedom struggle.

Fairs and Festivals : Important fairs and festivals organised in different parts of the district are mentioned below :

Chaturbhuj Baba, Nav Durga, Gabhaula, Shyamala Devi, Dwij fair, Ram Lila, Deviji, Sidh Baba, Sarila, Mardan Ghail, Barey Pir, Kalika Devi, Kartika Purnama, Chhattra Sal, Maheshwari Devi, Kammu Peer Baba, Donaya, Sayd Bale, Manasir Nath, Daya Karar, Jhara Baba, Sidh Bhanti, Gausal Baba, Sadrukh Baba, Brahma Deo, Sankranti, Shivratri, Bhuiyan Rani, Ghazi Miyan, Nag Panchmi, Rahas Lila, Sravana fair, Mahabirji, Basdeo Baba, Balbhadra Baba, Gau Ghat, Sidh Baba, Gudari, Mahabirji, Jal Bihar, Gobardhan Nath, Sankura, Mania Mela, Garai Baba, Dhanush Yagya, Mahadeoji, Burki, Kanhaiyaji, Jawaraka-Mela, Kajli Mela, Dhanush Yagya, Bidesan Devi, Sidh Baba, Mahabirji, Mela Pipra Muaf, Burki, Ajnar. The above mentioned fairs and festivals attract thousands of people from with in district and adjoining district.

(xiv) Scope of Village Directory and Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing

villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1. Population and households	Cols.4 & 5
2. Amenities.	Cols.6 to 13
3. Other infrastructural facilities etc.	Cols.14 to 16
4. Availability of news paper/ magazine	Column 17
5. Commodities manufacture	Column 18
6. Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII). The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by

year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital Ayurvedic Hospital Unani Hospital Homeopathic Hospital	H HA HU HHom
(ii)	Allopathic Dispensary Ayurvedic Dispensary Unani Dispensary Homeopathic Dispensary	D DA DU DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the

distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)(vi)	Navigable CanalNavigable waterways other than River,Canal	NC,NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block

wise of the district.

Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	The appendix shows the list of villages according to proportion of the
Appendix-VII B	Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES FULLY MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

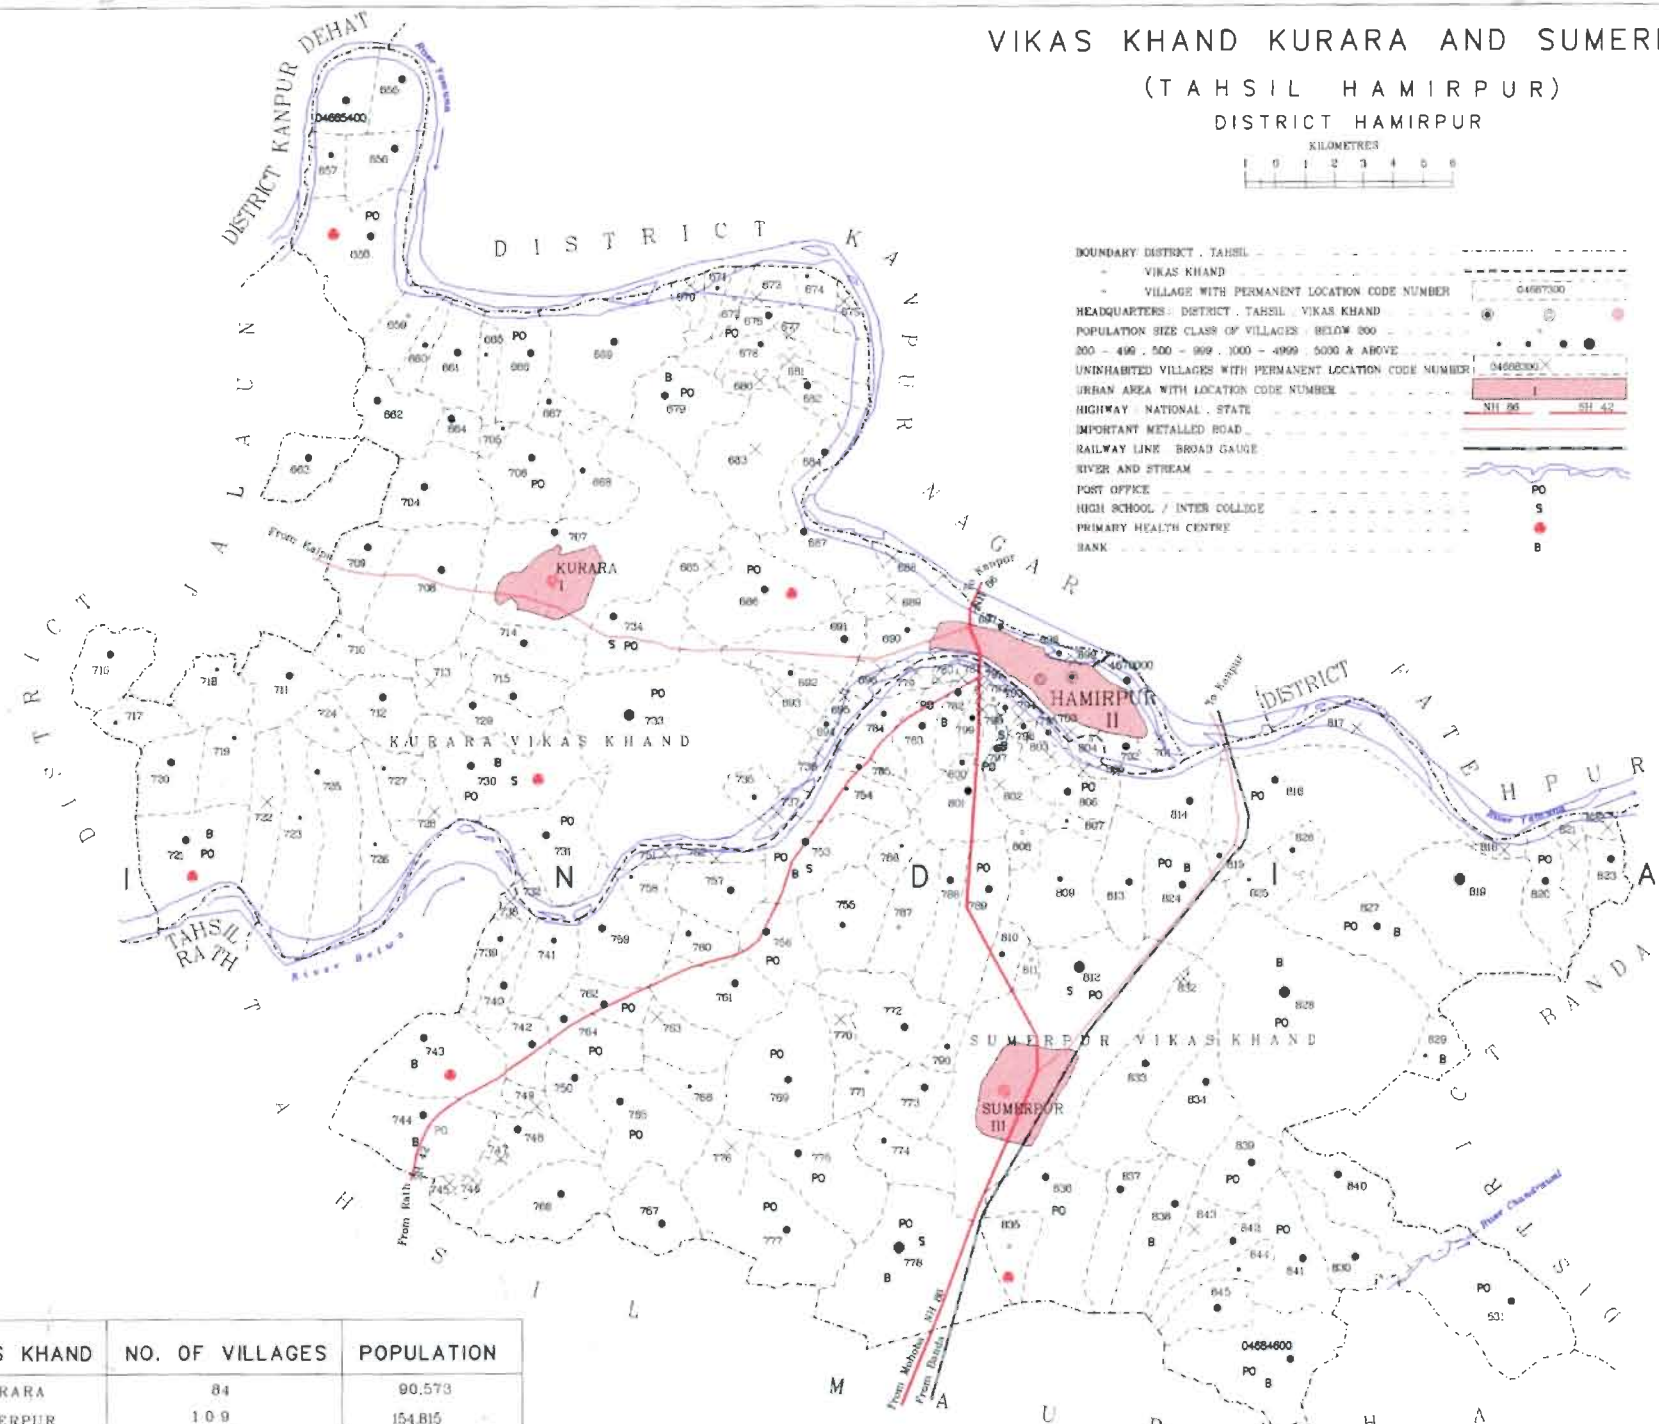

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4
Not applicable as there are no villages merged in towns & any outgrowths at 2001 census.

Name of CD Block: Muskara		
Less than 5		
	04715900	Kandhouli
Name of CD Block: Maudaha		

Note:- Villages having NIL Scheduled Tribes Population have been excluded

APPENDIX VIII

Number of villages under each Gram Panchyat (C.D. block wise)

Name of District - Sultanpur	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total SC population	Total ST population	Income and expenditure of Gram panchayat (in Rs.'000)	
			Number of villages with location code numbers	Location code					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttar Pradesh due to certain reasons

APPENDIX IX

Statement showing number of girls schools in the villages

Name of District - Sultanpur

Name of District	Name of C.D. Block	Location Code	Name of Village Number	No. of Girls School
1	2	3	4	5
Information not available for this district				

SECTION II
TOWN DIRECTORY

Town Directory

Note explaining the abbreviations used in Town Directory :

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Cor/NN
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB/NPP
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III

Municipal Finance 1998 -1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV

Civic and Other amenities,1999

Column (1 to 6) : Self explanatory.

Column (7) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night

soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/

Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 :Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were

made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE I - VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Mahoba
q1	Person	99	105
	Male	98	100
	Female	104	111
q2	Person	117	124
	Male	117	116
	Female	118	133
q5	Person	134	148
	Male	135	132
	Female	132	172

The child mortality by ages 1, 2 and 5 years was higher in the district as against the State, thus child mortality indicators in the district for both male and females shows higher except for males q2 and q5 as compared to the State.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001

Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 63.3 in 1991, while in 2001 it was 88.7 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 36.1 percent and 11.3 percent respectively. This shows in-migration from other states to this district was decreased in 2001 in comparison to 1991. At district level in-migration from other countries was 0.6 percent in 1991 and 0.0 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 68.4 percent and 86.9 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 31.4percent and 13.1 percent respectively. The movement of population from other countries in the district was 0.3 percent in 1991 and 0.0 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 92.6 percent in 1991 and 92.0 percent in 2001, while Muslim were 7.3 percent in 1991 and 8.0 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 52.8 percent male and 42.2 percent female to 56.4 percent male and 46.6 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 42.4 percent and female was 49.4 percent in 1991 and in 2001 it was 40.6 percent male and 48.1 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4:6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.9 percent male and 5.1 percent female while it was 3.2 percent male and 4.7 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 55.4 percent male and 83.4 percent female in 1991 which declined to 40.8 percent male and 67.4 percent female in 2001. Primary level education was 14.6 percent male and 7.1 percent female in 1991, which was 18.0 percent male and 12.6 percent female in 2001. Middle level education was 11.4 percent male and 3.7 percent female in 1991 and 17.5 percent male and 7.2 percent female in 2001. Matriculation and above level of education was achieved by 12.5 percent male and 2.7 percent female in 1991 which was 18.1 percent male and 5.8 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note : For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0.02 percent. The remaining tongues have been merged in the column of "Total of other mother tongue".

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 96.1 percent person in 1991 and 96.9 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 2.6 percent and 2.1 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages a mother tongue were very small in number in both th state, and district, in both Censuses.
